Oracle Insurance Insbridge Enterprise Rating Release Notes Version 5.6

The purpose of this document is to:

Describe the new features and resolved issues offered in the Insbridge Enterprise Rating system Release 5.6.

ANNOUNCEMENTS for RELEASE 5.6

ORACLE Issue #	Product	Description
28883818	RateManager, IBFA, IBSS	Impacted Area: Microsoft Windows Server 2008 Announcement: Release 5.6 will be the last supported release for Microsoft Windows Server 2008.

NEW FEATURES for RELEASE 5.6

ORACLE Issue #	Product	Description
28865437	RateManager	Impacted Area: Scenarios Announcement: Scenario Sandbox (Phase 2) added on the capabilities of Scenarios. <ul style="list-style-type: none">• An admin or a non-admin user can change a table in a scenario so that the table change will not affect the table in main program.• An admin can publish changes in a scenario to the main program without creating new program versions.• A non-admin can have read-only access to programs in RateManager, so that custom tables can be added to the scenario if needed.• New rates can be loaded without changing rates in the main program so that no rates/tables are messed up if an error has occurred.

ORACLE Issue #	Product	Description
28865642	RateManager	<p>Impacted Area: Step Types</p> <p>Enhancement: Four new step types are introduced:</p> <ul style="list-style-type: none"> • Multiply across, allows to multiply values across instances of a child category. • Min/Max, allows to get the minimum or maximum value among variables from a category or its parent category. • Date data type support for Rank step, allows to rank instances of a child category based on a date type variable. • Date Difference (No absolute), allows to calculate the “no absolute” difference between two dates.
28865785	RateManager	<p>Impacted Area: Debug Report</p> <p>Enhancement: The Debug Report option has been enhanced to perform easier access in following ways:</p> <ul style="list-style-type: none"> • An authorized user can access (open for editing) universal, global and local program elements by clicking a hyperlink in the debug report. • A “Create Package” button has been added to the Testing Module. • P2P navigation has been made easier. • Horizontal scrolling has been largely reduced.
28883528	ESI	<p>Impacted Area: ESI</p> <p>Enhancement: Many new capabilities are added to the ESI. With these features, now you can:</p> <ul style="list-style-type: none"> • Set Rating Table Revision as “Active”. • Add Global Versioning package to Release. • Package, Deploy, and Load the Release. • Get Release Programs Package Status. • Get Releases. • Insbridge Program Version, Release Module, and SoftRater Clean-Up. • Export multiple table variables data to excel file. • Import multiple table variables excel data to Active/Specified revisions.

ORACLE Issue #	Product	Description
28883768	RateManager, IBFA, IBSS	Impacted Area: RateManager, IBFA, IBSS Enhancement: HTTPS support has been implemented system wide.
28883382	Online Help	Impacted Area: Documentation Enhancement: All user guides for RateManager, IBFA, IBSS, SoftRater and SDK are now available online under Help in RateManager.

ISSUE RESOLUTION for RELEASE 5.6

ORACLE Issue #	Product	Description
25981075	Ratemanager	Impacted Area: Scenarios Issue Impact: The title on Universals Tab was incorrect. There was an issue with opening both RateManager Universals and Scenario Universals tabs together.
24292711	SoftRater	Impacted Area: SoftRater Issue Impact: The version number was not showing for a secure node.
