Oracle and Java are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

**U.S. GOVERNMENT END USERS:** Oracle programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, delivered to U.S. Government end users are "commercial computer software" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, use, duplication, disclosure, modification, and adaptation of the programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, shall be subject to license terms and license restrictions applicable to the programs. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate failsafe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

This software or hardware and documentation may provide access to or information on content, products and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services.

# Welcome to Configuration User Guide

This user guide is designed to help you quickly get acquainted with the many functions routinely executed everyday in Oracle Banking Virtual Account Management.

This section contains the following topics:

External DDA System	Entity Mask Configuration
Bank Parameters	Branch Parameters

## External DDA System

The transactions into virtual account through transaction journal service, results in posting entries to real account. The external DDA system interacts with the external DDA for posting entries and calling out other services on DDA.

### External DDA System Summary

The summary screen provides a list of configured external DDA system. You can configure an external DDA system using the [External DDA System Maintenance](#)

**How to reach here:**

**Virtual Account Management > Configuration > External DDA System > View External DDA System**

View External DDA System			
ECA System: ECASystem1	ECA System: FCUBS	ECA System: ECA	ECA System: ECA2
EAC URL: Unauthorized	EAC URL: http://10.184.151.116:8010/FCUBSAccServ WSDL Authorized	EAC URL: http://10.184.151.116:8010/FCUBSAccServ WSDL Unauthorized	EAC URL: abc Unauthorized

Field	Description
ECA System	Displays the ECA system details.
EAC URL	Displays the EAC URL details.
Status	Displays the status of the record.

### External DDA System Maintenance

The maintenance screen allows you to configure an external DDA system.

**How to reach here:**

**Virtual Account Management > Configuration > External DDA System > View External DDA System**

Create External DDA System

ECA System \*

EAC URL

Account Entries URL

ECA URL

Package Structure

Default Offset GL

Save Cancel

### How to configure an external DDA system:

1. In the **Create External DDA System** screen, provide the required details:
  - ECA System: Click **Search** to view and select the require ECA system.
  - EAC URL: Enter the EAC URL details.
  - Account Entries URL: Enter the account entries URL details.
  - ECA URL: Enter the ECA URL details.
  - Package Structure: Enter the package structure details.
  - Default Offset GL: Click **Search** to view and select the default offset GL.
2. Click **Save**. You can view the configured external DDA system details in the [External DDA System Summary](#).

## Entity Mask Configuration

You can configure entity mask ID for a bank.

### Entity Mask Configuration Summary

The summary screen provides a list of configured entity mask ID. You can configure entity mask ID using the [Entity Mask Configuration Maintenance](#)

#### How to reach here:

**Virtual Account Management > Configuration > Entity Mask Configuration > View Entity Mask Configuration**

View Entity Mask Configuration	
Bank Code: 0000	Bank Code: 0021
Maker: ROHIT OnceAuthorized: Y <b>0000 aannn</b> Bank Code Virtual Entity Mask	Maker: MOBEENA1 OnceAuthorized: Y <b>0021 aannnnnn</b> Bank Code Virtual Entity Mask

Field	Description
Bank Code	Displays the code of the branch associated with the bank.

Field	Description
Maker	Displays the name of the user who has configured the bank details.
Once Authorized	Indicates if the record is authorized once or not.
Virtual Entity Mask	Displays the virtual entity mask details.
Status	Displays the status of the record.

## Entity Mask Configuration Maintenance

The maintenance screen allows you to configure entity mask ID for a bank.

### How to reach here:

**Virtual Account Management > Configuration > Entity Mask Configuration > View Entity Mask Configuration**

The screenshot shows a software interface titled 'Create Entity Mask Configuration'. It contains three main input fields: 'Bank Code' with a required asterisk, 'Bank Name' showing 'Not Selected', and 'Virtual Entity Mask' with a note 'Allowed values are : a & n'. At the bottom right are 'Save' and 'Cancel' buttons.

### How to configure an entity mask:

1. In the **Create Entity Mask Configuration** screen, provide the required details:
  - Bank Code: Click **Search** to view and select the required bank code.
  - Bank Name: Based on the Bank Code selected, information is auto-populated.
  - Virtual Entity Mask: Enter the virtual entity mask. You can input a combination of alpha and/or numeric characters. You can enter up to a maximum of 12 characters. You can use the following identifiers to define the mask:
    - b: User input alpha characters
    - n: User input numbers
2. Click **Save**. You can view the configured entity mask details in the [Entity Mask Configuration Summary](#).

## Branch Parameters

You can configure branch level parameters for a virtual account.

### Branch Parameters Summary

The summary screen provides a list of configured branch parameters. You can configure a branch level parameter using the [Branch Parameters Maintenance](#).

## How to reach here:

Virtual Account Management > Configuration > Branch Parameters > View Branch Parameters

View Branch Parameters	
Checksum Algorithm: mod97 > Maker: PRINCE1 OnceAuthorized: N <b>555</b> <b>bbb\$\$\$\$ssf</b> Branch Code Virtual Account Mask  	Checksum Algorithm: > Maker: ROHIT OnceAuthorized: Y <b>AT1</b> <b>nnnnnnnnnn</b> Branch Code Virtual Account Mask  
Checksum Algorithm: > Maker: SUDIPTA OnceAuthorized: Y <b>AT3</b> <b>nnnnn</b> Branch Code Virtual Account Mask  	Checksum Algorithm: mod11 > Maker: PRINCE OnceAuthorized: Y <b>000</b> <b>nnnn</b> Branch Code Virtual Account Mask  
Checksum Algorithm: mod97 > Maker: PRINCE1 OnceAuthorized: Y <b>004</b> <b>bbb\$\$\$\$ssf</b> Branch Code Virtual Account Mask  	Checksum Algorithm: mod97 > Maker: PRINCE1 OnceAuthorized: N <b>565</b> <b>bbb\$\$\$\$ssf</b> Branch Code Virtual Account Mask  
Checksum Algorithm: > Maker: PRINCE OnceAuthorized: Y <b>965</b> <b>nnn</b> Branch Code Virtual Account Mask  	Checksum Algorithm: > Maker: PRINCE1 OnceAuthorized: Y <b>008</b> <b>nnnn</b> Branch Code Virtual Account Mask  

Field	Description
Checksum Algorithm	Displays the checksum algorithm of the bank.
Maker	Displays the name of the user who created the record.
Once Authorized	Indicates if the record is authorized once or not.
Bank Code	Displays the code of the branch associated with the bank.
Virtual Account Mask	Displays the virtual account mask details.
Status	Displays the status of the record.

## Branch Parameters Maintenance

The maintenance screen allows you to configure branch level parameters.

## How to reach here:

Virtual Account Management > Configuration > Branch Parameters > Create Branch Parameters

CreateBranch Parameters

New

Branch Code	Branch Name		
<input type="text"/>	Not Selected		
Account Mask Details			
Account Mask	Checksum Algorithm	Fixed Value	
Allowed values are : b,c,v,t,n,s,f,\$	Select	<input type="text"/>	
Auto Generate Account			
Auto Generate Account	Start Account Number	End Account Number	
<input checked="" type="checkbox"/>	<input type="text"/>	<input type="text"/>	
International Bank Account Number Mask			
IBAN Country Code	IBAN Checksum Algorithm	BBAN Format Mask	BBAN Data Type
<input type="text"/>	Select	<input type="text"/>	<input type="text"/>
BBAN Checksum Algorithm	BBAN Bank Code	BBAN Branch Code	
Select	<input type="text"/>	<input type="text"/>	

**Save** **Cancel**

## How to configure branch parameters:

1. In the **Create Branch Parameters** screen, provide the required details:
  - Branch Code: Click **Search** to view and select the required branch code.
  - Branch Name: Based on the Branch Code selected, information is auto-populated.

### Account Mask Details

- Account Mask: Enter the account mask details.
- Checksum Algorithm: Select one of the required checksum algorithm from the dropdown list:
  - Modulo 97: If selected, can have only numeric account mask.
  - Modulo 10: If selected, can have mask of length 10.
  - Modulo 11: If selected, can have either numeric or alphanumeric account mask. In case of numeric, **D** is appended to the account mask by the system and in case of alpha numeric, user must manually input **D** at the end of the mask.
  - Modulo 11: With weights this can have mask with size not more than 13.
- Fixed Value: Enter a fixed value, if virtual account mask contains character **f**. This field supports maximum of one alphanumeric character.

### Auto Generate Account

- Auto Generate Account: By default, this is disabled. If enabled, system automatically generates numeric account numbers based on the range provided.
- Start Account Number: Enter a start number for the account, if the auto generate account is enabled.
- End Account number: Enter an end number for the account, if the auto generate account is enabled.

### International Bank Account Number Mask

- IBAN Country Code: Displays a system default country code of the branch. The system validates the country code is an ISO country code, the country code of the branch, and the length of the character is 2.
- IBAN Checksum Algorithm: Select the IBAN checksum algorithm from the dropdown list.

- BBAN Format Mask: Enter the BBAN format mask details. You can enter a maximum length of 30 characters. The mask must be one of the following characters:
  - b - BBAN Bank Code
  - s - BBAN Branch Code
  - z - Virtual Account Number
  - I - Virtual Account Number
  - d - BBAN Check Digit
  - i - Real Customer Number
  - h - 1, as there is no joint holder
  - t - Virtual Account Code
- BBAN Data Type: Enter the BBAN data type details. The list displays the following character set:
  - n- Number
  - a- Alphabet
  - c- Alphanumeric
- BBAN Checksum Algorithm: Select the BBAN checksum algorithm from the dropdown list.
- BBAN Bank Code: Enter the BBAN bank code details.
- BBAN Branch Code: Enter the BBAN branch code details.

2. Click **Save**. You can view all the configured branch parameters in the [Branch Parameters Summary](#).

## Bank Parameters

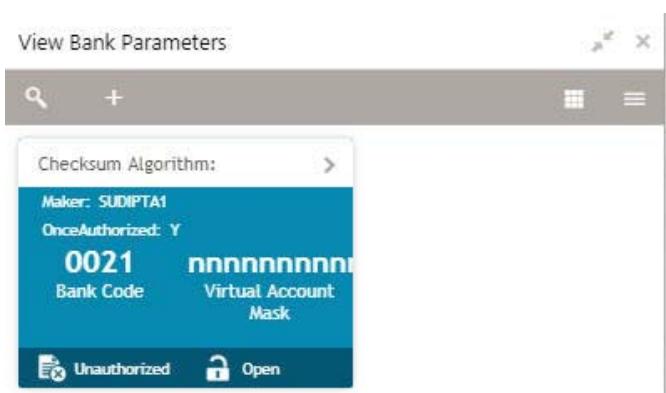

You can configure bank level parameters for a virtual account.

### Bank Parameters Summary

The summary screen provides a list of configured bank parameters. You can configure a bank level parameter using the [Bank Parameters Maintenance](#).

**How to reach here:**

**Virtual Account Management > Configuration > Bank Parameters > View Bank Parameters**

Field	Description
Checksum Algorithm	Displays the checksum algorithm of the bank.
Maker	Displays the name of the user who created the record.
Once Authorized	Indicates if the record is authorized once or not.

Field	Description
Bank Code	Displays the code of the branch associated with the bank.
Virtual Account Mask	Displays the virtual account mask details.
Status	Displays the status of the record.

## Bank Parameters Maintenance

The maintenance screen allows you to configure bank level parameters.

### How to reach here:

**Virtual Account Management > Configuration > Bank Parameters > Create Bank Parameters**

### How to configure bank parameters:

1. In the **Create Bank Parameters** screen, provide the required details:

- **Bank Code:** Click **Search** to view and select the required bank code.
- **Bank Name:** Based on the Bank Name selected, information is auto-populated.

#### Account Mask Details

- **Account Mask:** Enter the account mask details.
- **Checksum Algorithm:** Select one of the required checksum algorithm from the dropdown list:
  - Modulo 97: This can have only numeric account mask.
  - Modulo 10: This can have mask of length 10.
  - Modulo 11: This can have either numeric or alphanumeric account mask. In case of numeric, **D** is appended to the account mask by the system and in case of alpha numeric, user must manually input **D** at the end of the mask.
  - Modulo 11: With weights this can have mask with size not more than 13.
- **Fixed Value:** Enter a fixed value, if virtual account mask contains character **f**. This field supports maximum of one alphanumeric character.

#### Auto Generate Account

- **Auto Generate Account:** By default, this is disabled. If enabled, system automatically generates numeric account numbers based on the range provided.

- Start Account Number: Enter a start number for the account, if the auto generate account is enabled.
- End Account number: Enter an end number for the account, if the auto generate account is enabled.

2. Click **Save**. You can view the configured bank parameters in the [Bank Parameters Summary](#).
