

Textura Payment Management v22.3 Release Notes

Release date: March 7, 2022

What's New in This Release?

The Textura v22.3 release includes improvements to the user interface, new functionality, and numerous bug fixes.

Below is a summary of the overall changes:

- The Textura Payment Management for Head Contractors Learning Path is now available! Designed for Head Contractors, this comprehensive learning path includes a video training course and post-assessment. Learning paths are a valuable resource available to all users on-demand at mylearn.oracle.com.
- We've enhanced the Enterprise Classification tracking screen to readily display the classifications indicated for vendors.
- Head Contractors are now prevented from creating contracts with a different bank country than the project funding bank country.
- Periodic Compliance Requirement functionality has been enhanced to send subcontractors email notifications at expiry.
- Subcontractor Compliance Managers will now receive email notifications when a Statutory declaration is rejected by the Head Contractor.
- Integration Managers can now update the status of manually posted integration records from Fail to Success to align with the actual status within their Organisation's ERP.
- Integration's Import Owner Funding API has been enhanced to provide improved audit messaging for missing project number, vendor id, or a null ERP payment due date
- Data Service now supports fetching incremental updates on a daily basis as an alternative to doing full data fetches.
- Numerous bugs have been fixed in this release.
