1.5 Glossary of Icons

This User Manual may refer to all or some of the following icons:

Icon	Function
	Add new criteria

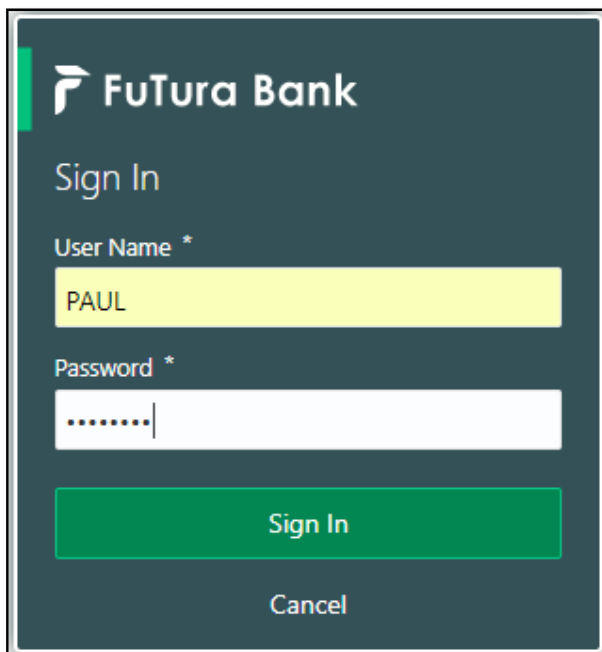

Icon	Function
	Grid View
	List View

2. Queue Maintenance

Queue Maintenance enables the user to set criteria for the queue of the tasks based on their status. In the subsequent steps, let's look at the details for creating a queue:

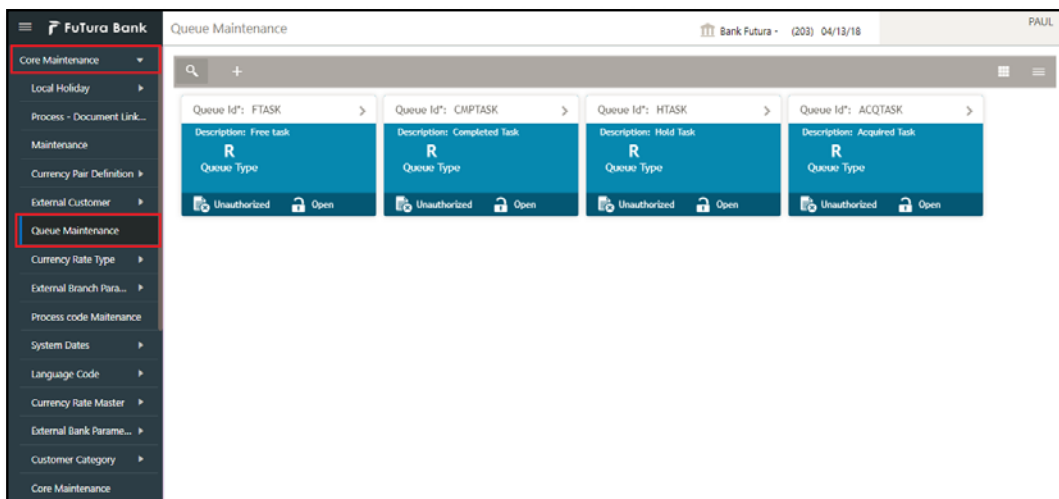

2.1 Create a Queue Criteria

1. Log in to the application with appropriate user credentials.

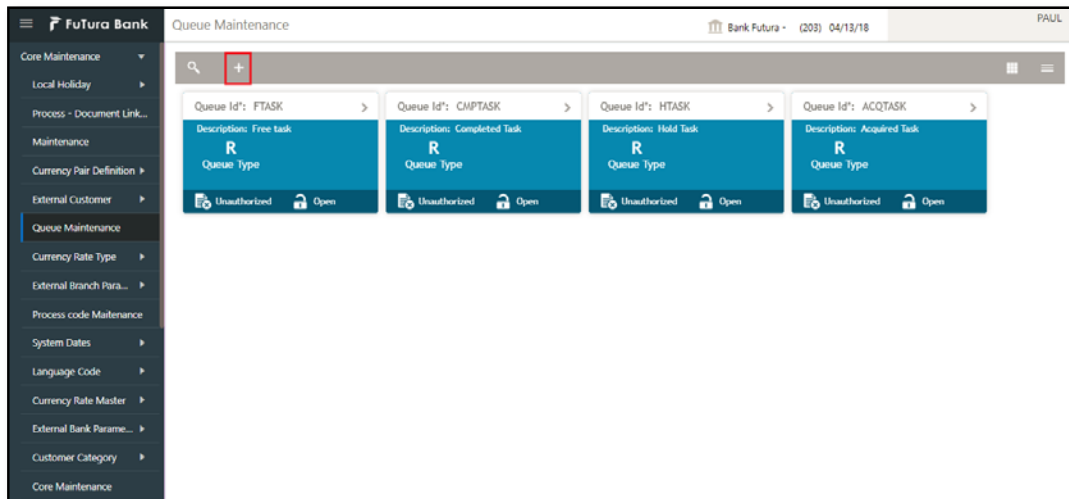

The image shows the FuTura Bank Sign In screen. It features the FuTura Bank logo at the top left. Below the logo, the text "Sign In" is displayed. There are two input fields: "User Name *" with the value "PAUL" and "Password *" with masked characters. A green "Sign In" button is located below the password field, and a "Cancel" button is positioned at the bottom center.

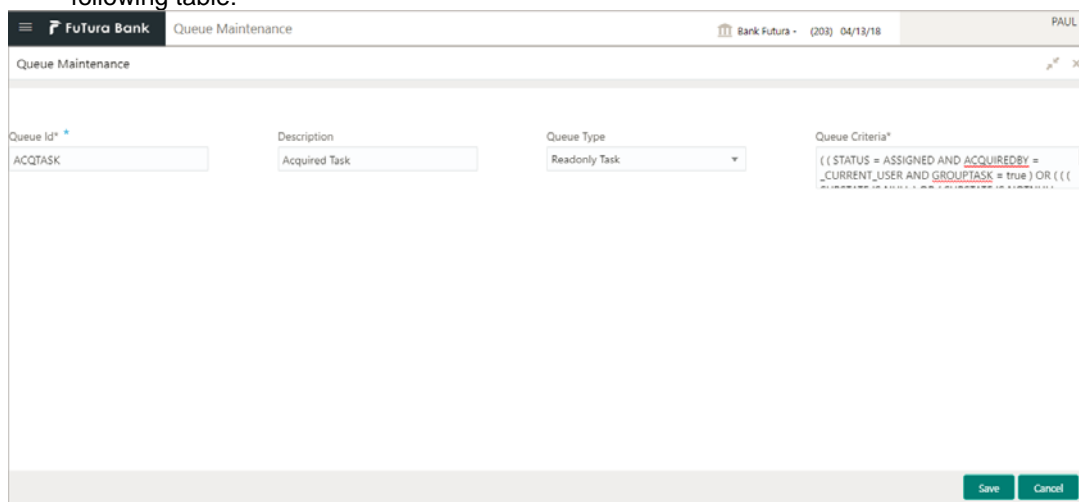

2. Click **Core Maintenance > Queue Maintenance** on the left pane of the application.

3. Click plus icon  to create a new queue criteria.

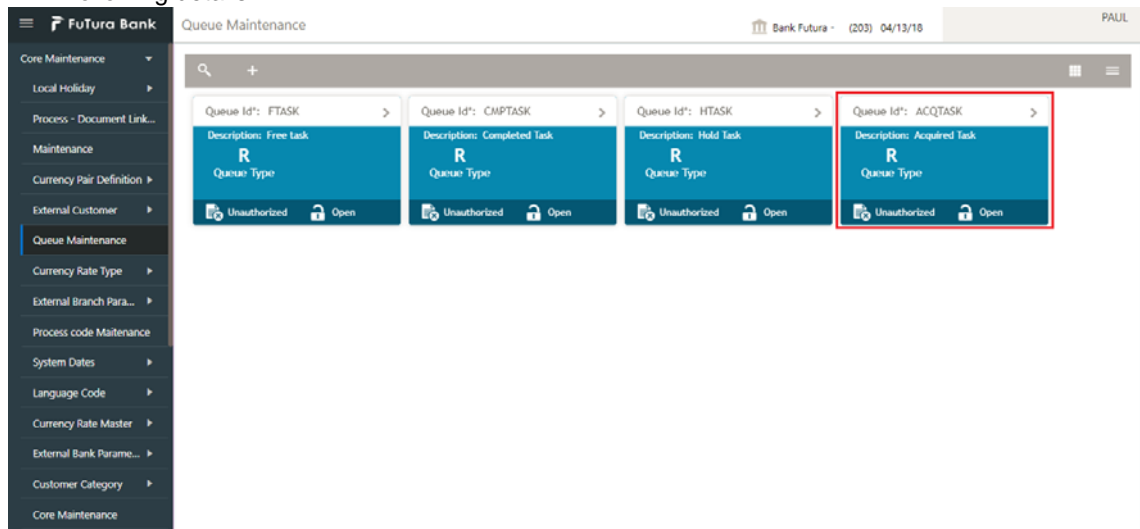

4. Provide queue criteria details based on the description provided in the following table:

Field Name	Description	Sample Values
Queue ID	Specify a unique ID for the queue.	ACQTASK
Description	Provide an appropriate description for the queue criteria.	Acquired Task
Queue Type	Select the type of the task for which this queue criteria is applicable. Type of tasks available are as follows: <ul style="list-style-type: none"> Read only Task Supervisor Task - This feature will be implemented in future release. Free Task Acquired Task Completed Task 	Readonly Task

Field Name	Description	Sample Values
Queue Criteria	Provide the details/rule of the queue criteria. This rule must be as an arithmetic expression with standard keys.	((STATUS = ASSIGNED AND ACQUIRED BY = _CURRENT_USER AND GROUPTASK = true) OR ((SUBSTATE IS NULL) OR (SUBSTATE IS NOTNULL AND SUBSTATE <> ESCALATED)) AND (STATUS = ASSIGNED AND GROUPTASK = false)))
Save	Click Save to save the queue criteria. Note: By default the queue will be saved as unauthorized.	

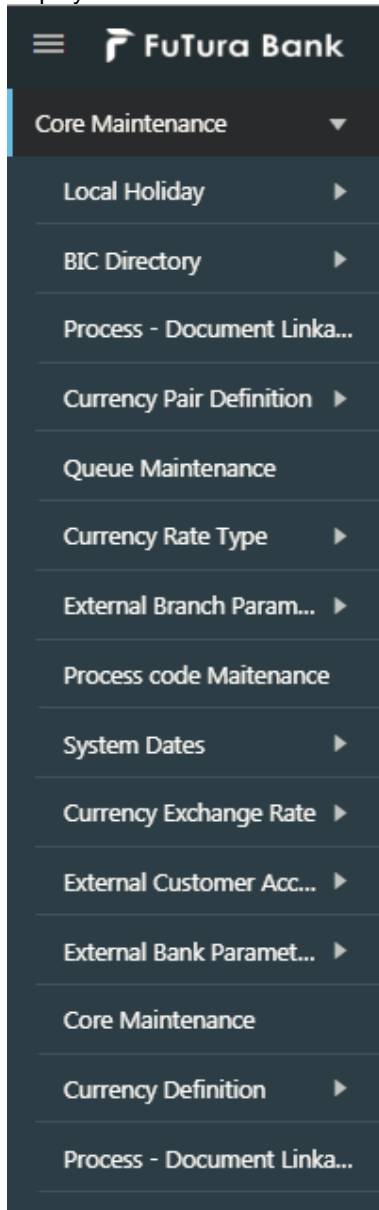

5. Once the queue is created, it will be displayed in the dashboard with the following details:

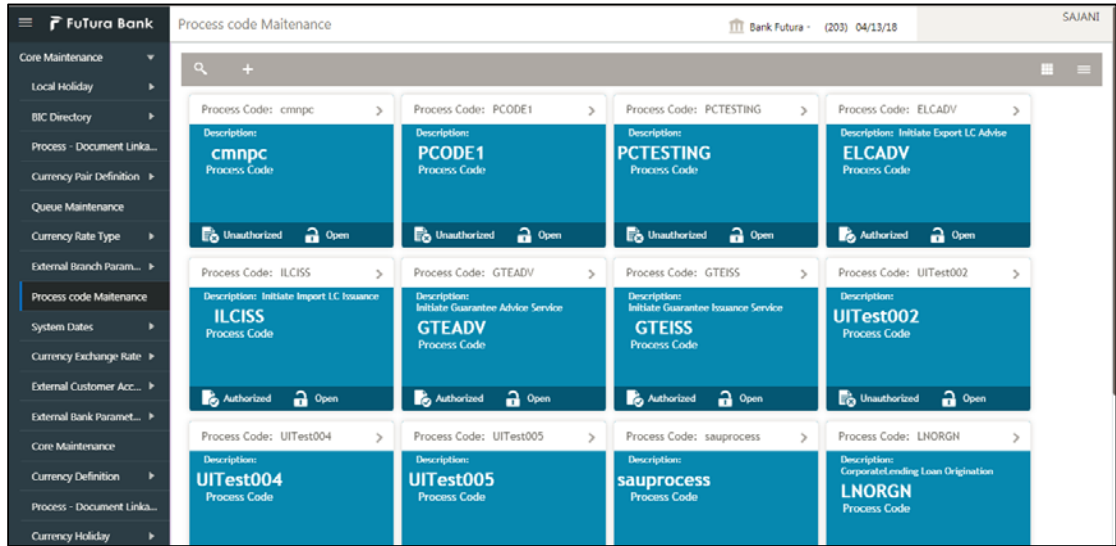

- Queue tile displays the Queue ID, Description of the Queue and Queue type.
- Unauthorized () - This provides the information whether this queue is authorized for another user or unauthorized.
- Open () - Status of the queue which enables the user to use this queue if it is open.
- Search () - Search the available queue criteria.
- Grid View () - Display the queue criteria in grid view.
- List View () - Display the queue criteria in list view.

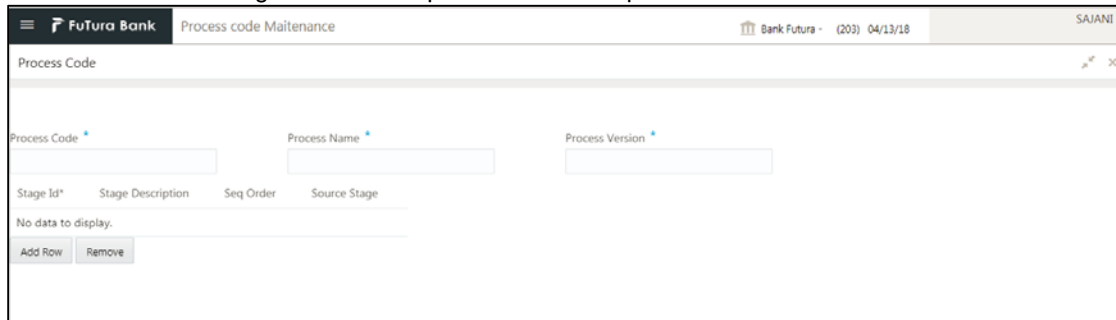

3. Product Code Maintenance - Initiate

Login to the OBTFPM application. Select 'Core Maintenance' on the left side menu in the display list select Process Code Maintenance.

1. Select on the '+' sign on the left top to create a new process code.

Field	Description
Process Code	In this field, the user can enter the process code. The code is an abbreviation of the process name. Alphanumeric text with length max 10 char
Process Name	The process name is the composite name of the process code
Process Version	The version of the process is update in this field

The stages that have to be mapped under a process code are captured in the stage table.

Field	Description
Stage Id	A unique id for the stage for the particular process.
Stage Description	The stage description captures the description of the particular stage.
Sequence Order	The sequence order identifies the order of the stage in the complete process. Registration will always be sequence order 1.
Source stage	This field highlights whether that particular stage is the source/starting point for that process.

Process Code			
Process Code *	Process Name *	Process Version *	
ELCADV	InitiateExportLCAdviseService	1	
Stage Id*	Stage Description	Seq Order	Source Stage
TFPM_FA_ELCADV_SCRTY	Scrutiny	2	N
TFPM_FA_COMMON_REMAP	Release Earmark Exception Approval	14	N
TFPM_FA_ELCADV_CRVER	Customer Response Verification	9	N
TFPM_FA_ELCADV_APPR1	Approval1	10	N
TFPM_FA_COMMON_LEMAP	Limit Earmark Exception Approval	8	N
TFPM_FA_ELCADV_APPR2	Approval2	11	N
TFPM_FA_COMMON_RBKAP	Release Amount block Exception Approval	13	N
TFPM_FA_COMMON_KYCAP	KYC Exception Approval	4	N
TFPM_FA_COMMON_ABKAP	Amount block Exception Approval	7	N
TFPM_FA_COMMON_SANAP	Sanction Exception Approval	6	N
TFPM_FA_COMMON_AMLAP	AML Exception Approval	5	N

4. Task Menu

Based on the role access given to the user the Task menu will have the following

- Search
- Free Task
- My Task
- Hold Task
- Completed Task

4.1 Task - Search

You can query existing tasks by specifying the Filter Criteria's available on the Left side

Following Filter Criteria's is available

Field	Description
Application Number	Capture the Application Number for searching the task with that application number. Minimum 3 characters should be captured for searching the task
Customer Name	Capture the Customer Name for searching the task with that Customer Name
Branch Name	Capture the Branch Name for searching the task with that Branch
Task Status	Select the Task Status for searching the task with that Status. By default Free Task will be searched
Task Priority	Select the task priority for searching the task of that priority
Process	Select the Process for searching the task of that process. On Select of a process the Stages of that process will be defaulted.
Stage	This works only if the Process is selected; Select the Stage of the Process to search the task of that Stage.
Amount	Capture the Currency and the Amount Range to search the task with that Currency and amount range.

All the tasks that meet the criteria's specified are fetched as displayed.

The Task List will display the following details of the task
