# Welcome to Core Maintenance

This user guide is designed to help you quickly get acquainted with the many functions routinely executed everyday in Oracle Banking.

This section contains the following topics:

Local Holiday	Country Code
BIC Directory	Currency Pair Definition
External Customer	Upload Source Preference
Host Code	Currency Rate Type
External Branch Parameters	System Date
Language Code	External Credit Approval (ECA) System
Currency Exchange Rate	External Customer Account
External Bank Parameters	Customer Category
Forget Customer	End of Day (EOD)
Transaction Code	Amount Text Language
Currency Definition	External Chart Account
Upload Source	Currency Holiday

## Local Holiday

You can configure a local holiday.

### Local Holiday Summary

The summary screen provides a list of configured local holidays. You can configure a local holiday using the [Local Holidays Maintenance](#).

**How to reach here:**

**Core Maintenance > Local Holiday > View Local Holiday**

View Local Holiday			
Branch Code: 002 Unexpected Holiday: Y <b>2023</b> Year   Unauthorized  Open	Branch Code: 965 Unexpected Holiday: <b>2055</b> Year   Unauthorized  Open	Branch Code: 002 Unexpected Holiday: Y <b>11</b> Year   Unauthorized  Open	Branch Code: 203 Unexpected Holiday: Y <b>2017</b> Year   Unauthorized  Open
Branch Code: 002 Unexpected Holiday: Y <b>2012</b> Year   Unauthorized  Open	Branch Code: Unexpected Holiday: <b>2012</b> Year   Unauthorized  Open	Branch Code: 002 Unexpected Holiday: Y <b>2022</b> Year   Unauthorized  Open	Branch Code: Unexpected Holiday: <b>2015</b> Year   Authorized  Open

Field	Description
Branch Code	Displays the code of the branch.
Unexpected Holiday	Indicates if the record is an unexpected holiday.
Year	Displays the year of the holiday.
Status	Displays the status of the record.

## Local Holidays Maintenance

The maintenance screen allows you to configure local holidays.

### How to reach here:

**Core Maintenance > Local Holiday > Create Local Holiday**

Create Local Holiday

**Save** **Cancel**

### How to add a local holiday:

1. In the **Create Local Holiday** screen, provide the required details:
  - Branch Code: Click **Search** to view and select the required branch code.
  - Year: Enter the year details.
  - Weekly Holidays: By default, this is disabled. If selected, you can define weekly holidays.
  - Unexpected Holidays: By default, this is disabled. If selected, you can define unexpected holidays.
2. Select the dates using the calendar. The selected dates appear in blue highlighted circle.
3. Click **Save**. You can view the configured local holiday details in the [Local Holiday Summary](#).

## Country Code

You can configure a country code.

### Country Code Summary

The summary screen provides a list of configured country code. You can configure a country code using the [Country Code Maintenance](#).

### How to reach here:

[Core Maintenance > Country Code > View Country Code](#)

View Country Code			
Country Code: SRL Country Name: SRILANKA ISO Numeric Code: SR1   Unauthorized 	Country Code: CA Country Name: Canada ISO Numeric Code:   Unauthorized 	Country Code: BA Country Name: BOSNIA AND HERZEGOVINA ISO Numeric Code: BIH   Unauthorized 	Country Code: ZA Country Name: Zambia ISO Numeric Code:   Authorized 
Country Code: USD Country Name: United States ISO Numeric Code:   Unauthorized 	Country Code: GBP Country Name: ISO Numeric Code:   Unauthorized 	Country Code: JI Country Name: Jumani ISO Numeric Code:   Unauthorized 	Country Code: 355 Country Name: ALBANIA ISO Numeric Code: ALB   Authorized 

Field	Description
Country Code	Displays the country code details.
Country Name	Displays the name of the country.
ISO Numeric Code	Displays the ISO numeric code details of the country code.
Status	Displays the status of the record.

## Country Code Maintenance

The maintenance screen allows you to configure a country code.

### How to reach here:

**Core Maintenance > Country Code > Create Country Code**

Create Country Code

<input type="button" value="New"/>							
Country code *							
Country Name	Alternate Country code	Region Code	ISO Country code				
ISO code	Limit Currency <input type="text" value=""/>	Overall Limit <input type="text" value=""/>	Blacklist <input type="checkbox"/>				
EU Member <input type="checkbox"/>	Generate 205 <input type="checkbox"/>	IBAN Check Required <input type="checkbox"/>	BIC Clearing Code <input type="checkbox"/>				
Intra European <input type="checkbox"/>							
<input type="button" value="Save"/> <input type="button" value="Cancel"/>							

### How to add a country code:

1. In the **Create Country Code** screen, provide the required details:
  - Country Code: Enter the country code.
  - Country Name: Enter the name of the country.
  - Alternate Country Code: Enter an alternate country code.
  - Region Code: Enter the region code.

- ISO Country Code: Enter the ISO country code.
- ISO Code: Enter the ISO code.
- Limit Currency: Enter the limit currency.
- Overall Limit: Enter an overall limit.
- Blacklist: By default, this is disabled. If enabled, indicates whether the country is blacklisted.
- EU Member: By default, this is disabled. If enabled, indicates whether the country is recognized by Swift as a part of the Intra European countries.
- Generate 205: By default, this is disabled. If enabled, indicates the cover message 205COV or 205 need to be generated for transactions involving this country. If you do not select this option, RTGS, 202 or 202COV message is generated.
- IBAN Check Required: By default, this is disabled. If enabled, indicates check required for an IBAN is mandatory.
- BIC Clearing Code: By default, this is disabled. If enabled, indicates the National ID in the BIC plus file is the clearing code. During upload of clearing codes from BIC plus file, the records belong to countries against which this box is selected.
- Intra European: By default, this is disabled. If enabled, indicates the country is an intra European country.

2. Click **Save**. You can view the configured country code details in the [Country Code Summary](#).

## BIC Directory

As part of setting up basic information, you must maintain Bank Identifier Codes (BIC). You can configure the BIC directory for a customer.

### BIC Directory Summary

The summary screen provides a list of configured BIC directory. You can configure the BIC directory using the [BIC Directory Maintenance](#).

**How to reach here:**

**Core Maintenance > BIC Directory > View BIC Directory**

View BIC Directory			
Customer Number:	Sub Type Code:	BIC Code	Bank Name
Customer Number: 001345	Sub Type Code: APACGB61CIWCANARA	BIC Code BANK	Bank Name
	Sub Type Code: ALLAINBBSPT	BIC Code SBI	Bank Name
	Sub Type Code: ALLAINBBAGC	BIC Code SBI	Bank Name
	Sub Type Code: KISHLI12	BIC Code HDFC	Bank Name
Customer Number: 000028	Sub Type Code: ALLAINBBDF	BIC Code SBI	Bank Name
Customer Number: 000074	Sub Type Code: APACGB61BCN	BIC Code FUTURA	Bank Name
Customer Number: 001343	Sub Type Code: ODKPTG10DM	BIC Code GRAMIN	BANK
Customer Number: 000006	Sub Type Code: ANDBINBBBHUANDHRA	BIC Code BANK	Bank Name
	Sub Type Code: APACGB61CIP	BIC Code HDFC	Bank Name

Field	Description
Customer Number	Displays the number of the customer.
Sub-type Code	Displays the sub-type code associated with the customer number.
BIC Code	Displays the defined BIC code for the associated customer number.
Bank Name	Displays the name of the bank.
Status	Displays the status of the record.

## BIC Directory Maintenance

The maintenance screen allows you to configure a BIC directory for a customer.

### How to reach here:

**Core Maintenance > BIC Directory > Create BIC Directory**

### How to add a BIC directory:

1. In the **Create BIC Directory** screen, provide the required details:
  - BIC Code: Enter a unique BIC Code by which the bank is identified by SWIFT.
  - Bank Name: Enter a name for the bank.
  - Customer Number: Click **Search** to view and select the required customer number.
  - Customer Name: Based on the Customer Number selected the information is auto-populated.
  - Bank Address 1-3: Based on the Customer Number selected the information is auto-populated.
  - SWIFT Key: Enter a unique SWIFT key for the BIC directory.
  - Telex Key: Enter a unique telex key for the BIC directory.
  - SWIFT Key Arrangement: Select a SWIFT key arrangement from the dropdown list,
  - Relationship: Select one of the following options:
    - No: If selected, indicates that the BIC Entity is not a customer of your bank

- Mail: If selected, the BIC entity is not a recognized SWIFT entity but an address internal to your bank. In such cases, all correspondence directed to the particular BIC entity is sent as mail messages.
- Keys: If selected, a SWIFT/Telex connectivity exists between your bank and the bank for which you are maintaining details. Subsequently, you must specify the SWIFT/Telex Key in the adjacent field.
- Sub-type Code: Click **Search** to view and select the required sub-type code.
- BEI Indicator: Based on the Sub-type Code selected the information is auto-populated.
- ADB Member: Select an ADB member from the dropdown list.

### Payment Message

- MT103+ Preferred: By default, this is disabled. If enabled, indicates the counter party whose BIC code details you are capturing capacitates to receive payment messages in the MT 103 format.
- Blacklisted: By default, this is disabled. If enabled, indicates the BIC entity is blacklisted.
- CUG Member: By default, this is disabled. If enabled, indicates the BIC entity is a closed user group member.
- Remit Member: By default, this is disabled. If enabled, indicates the customer is registered with MT 103 Extended Remittance Information Multi User Group.
- Update During Upload: By default, this is disabled. If enabled, updated the BIC directory during an upload.

### Multi-Customer Credit Transfer

- Multi-Customer Credit Transfer: By default, this is disabled. If enabled, indicates whether or not a Multi Credit Transfer Feature [MT102 support] exists between the bank and the BIC entity.
- Generate 102+: By default, this is disabled. If enabled, generates 102+ message.
- Maximum Size in Bytes: Enter the maximum size.

### Request for Transfer

- Generate MT101: By default, this is disabled. If enabled, indicates whether an MT101 can be sent/received from this BIC. Select this option to generate MT101 message.
- Number of Transactions Per Page: Enter the number of transactions to view per page. If you do not specify a value it is defaulted to 10.
- Real Customer Number: Click **Search** to view and select the required real customer number.
- Real Customer Name: Based on the Real Customer Number selected the information is auto-populated.

2. Click **Save**. You can view the configure BIC directory in the [BIC Directory Summary](#).

## Currency Pair Definition

In the foreign exchange markets, the exchange rates for some currency pairs such as the USD-GBP or USD-JPY are easily obtainable, since these are frequently traded. The exchange rates of other currencies such as the ZAR-INR (South African Rand - Indian Rupee), which is not traded very often, is determined through a third currency. The third currency is usually the US dollar, since the US dollar is quoted in all trading centres.

You can define the static attributes of currency pairs for which a regular market quote is readily available. For other pairs, which do not have a regular market quote, you need to specify the third currency through which the system should compute the exchange rate. The currency pair is maintained at the bank level by the Head Office branch.

### Currency Pair Definition Summary

The summary screen provides a list of define a currency pair. You can define a currency pair using the [Currency Pair Definition Maintenance](#).

## How to reach here:

### Core Maintenance > Currency Pair Definition > View Currency Pair Definition

Maintenance Country	Number of Units	Currency 1	Currency 2	Status
IN	2	ARS	DZD	Unauthorized
IN	2	BZD	BMD	Authorized
IN	2	BOP	MMO	Authorized
IN	1	XCD	DZD	Unauthorized
BA	2	BAS	CAS	Unauthorized
IN	1	BZD	BZD	Unauthorized
IN	2	BMD	BZD	Unauthorized
AUS	1	BOB	BOV	Unauthorized

Field	Description
Maintenance Country	Displays the maintenance country details.
Number of Units	Displays the number of units.
Currency 1-2	Displays the currency associated with the country.
Status	Displays the status of the record.

## Currency Pair Definition Maintenance

The maintenance screen allows you to define currency pair.

## How to reach here:

### Core Maintenance > Currency Pair Definition > Create Currency Pair Definition

Currency 1	Currency 2	Maintenance Country
Checkthrough Currency	Through Currency	Number of Units
Quotation	Spread Definition	Points Multiplier
<input type="radio"/> Direct	<input type="radio"/> Percentage	<input type="radio"/>
<input type="radio"/> Indirect	<input type="radio"/> Points	<input type="radio"/>
<input type="button" value="Save"/> <input type="button" value="Cancel"/>		

### How to define a currency pair:

1. In the **Create Currency Pair Definition** screen, provide the required details:
  - Currency 1-2: Click **Search** to view and select the required currency. A currency pair (specified as currency 1 and currency 2, in the currency pair) represents the two currencies for which you need to maintain exchange rates.  
To specify the pair, choose from the list provided against Currency 1. Select the pair for which you want to maintain parameters. The pair must be selected according to the quotation method followed by the market, which can be direct or indirect. Exchange rates can be defined for currency 1 against currency 2 or currency 2 against currency 1.
  - Maintenance Country: Click **Search** to view and select the required maintenance country.
  - Check through Currency: By default, this is disabled. If selected, indicates a check through currency.
  - Through Currency: Click **Search** to view and select the required through currency for which the exchange rate between the currencies must be calculated.
  - Number of Units: Select one of the number of units.
  - Points Multiplier: Select the points multiplier.
  - Quotation: Select one of the required quotation
    - Direct method the exchange rate for the currency pair is quoted as follows:  
Buy rate = mid rate - buy spread  
Sell rate = mid rate + sell spread  
$$\text{Ccy 1} = \text{Rate} \times \text{Ccy 2}$$
    - Indirect method the exchange rate for the currency pair is quoted as follows:  
Buy rate = mid rate + buy spread  
Sell rate = mid rate - sell spread  
$$\text{Ccy 2} = \text{Rate} \times \text{Ccy 1}$$
- Spread Definition: Select one spread definition. There are two ways of defining the spread - in points and in percentage. The effective spread can be calculated using any of the following two methods:
  - In points - spread x points multiplier
  - In percentage - spread/100 x mid rate

The method of spread definition that you specify here applies to two instances:

- While maintaining exchange rates for the currency pair
- While maintaining customer spread for the currency pair

2. Click **Save**. You can view the defined currency pair details in the [Currency Pair Definition Summary](#).

## External Customer

You can configure the external customer details.

### External Customer Summary

The summary screen provides a list of configured external customer details. You can configure the external customers using the [External Customer Maintenance](#).

### How to reach here:

**Core Maintenance > External Customer > View External Customer**

View External Customer

Save    Cancel

### How to add an external customer:

1. In the **Create External Customer** screen, provide the required details:

#### Customer Details

- Customer Number: Enter a number for the customer.
- Customer Name: Enter a name for the customer.
- Short Name: Enter a short name for the customer.
- Customer Type: Select one of the options:
  - Individual: If selected, the customer is an individual customer.
  - Corporate: If selected, the customer is a corporate customer.
  - Bank: If selected, the customer is a bank employee.
- Source Customer ID: Enter the source customer ID.
- Source System: Click **Search** to view and select the required source system.
- Customer Category: Click **Search** to view and select the required customer category.
- Relationship Manager ID: Enter the relationship manager ID.

#### Address

- Address Line 1-4: Enter the customer address details.
- Country: Click **Search** to view and select the required country.
- Postal Code: Enter the postal code details.

#### Other Details

- Deceased: By default, this is disabled. If enabled, indicates the customer is deceased.
- Frozen: By default, this is disabled. If enabled, indicates the customer account is frozen.
- Whereabouts Unknown: By default, this is disabled. If enabled, indicates the customer's whereabouts are unknown.
- Sanction Check Required: By default, this is disabled. If enabled, indicates the sanction check is required.
- Walk-in Customer: By default, this is disabled. If enabled, indicated a walk-in customer.

- Language: Click **Search** to view and select the required language.
- Nationality: Click **Search** to view and select the required nationality.

2. Click **Save**. You can view the configured external customer details in the [External Customer Summary](#).

## Upload Source Preference

You can configure upload source preference.

### Upload Source Preference Summary

The summary screen provides a list of configured upload source preferences. You can configure an upload source preference using the [Upload Source Preference Maintenance](#).

**How to reach here:**

**Core Maintenance > Upload Source Preference > View Upload Source Preference**

View Upload Source Preference

### How to add an upload source preference:

1. In the **Create Upload Source Preference** screen, provide the required details:
  - Source Code: Click **Search** to view and select the required source code.

#### Error Handling

- On Error: Select an on error from the dropdown list.
- On Override: Select an on override from the dropdown list.
- On Repairable Exception: Select an on repairable exception from the dropdown list.
- On Queue Exception: Select an on queue exception from the dropdown list.

#### Post Upload

- Status: Select a status from the dropdown list.
- Purge Days: Enter the purging days if you want to maintain any days to be purged while processing interface.
- Allow Deferred Processing: By default, this is disabled. If enabled, allows you to deferred process the upload source preference.
- Allow EOD with Deferred: By default, this is disabled. If enabled, allows you to process the EOD with deferred.
- Deletion Allowed: By default, this is disabled. If enabled, allows you to delete the upload source preferences.
- Reverse Allowed: By default, this is disabled. If enabled, allows you to reverse the upload source preferences.
- Amend Allowed: By default, this is disabled. If enabled, allows you to amend the upload source preferences.
- Proceed with EOD: By default, this is disabled. If enabled, <.

2. Click **Save**. You can view the configured upload source preference details in the [Upload Source Preference Summary](#).

## Host Code

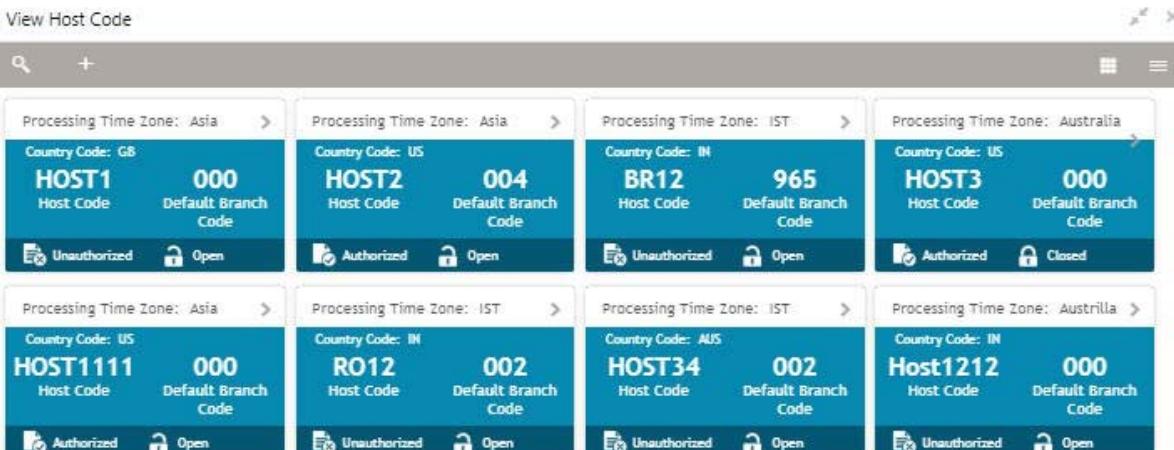

You can group branches in the same zone or region under a host for specific processing. You can have multiple hosts depending on processing requirements.

## Host Code Summary

The summary screen provides a list of configured host codes. You can configure the host code using the [Host Code Maintenance](#)

**How to reach here:**

**Core Maintenance > Host Code > View Host Code**

The screenshot shows a grid of host code records. Each record is a card with the following details:

Processing Time Zone	Country Code	Host Code	Default Branch Code	Status	Action
Processing Time Zone: Asia	Country Code: GB	HOST1	000	Default Branch Code	Unauthorized Open

Field	Description
Processing Time Zone	Displays the processing time zone.
Country Code	Displays the country code details.
Host Code	Displays the host code details.
Default Branch Code	Displays the default branch code associated with the host code.
Status	Displays the status of the records.

## Host Code Maintenance

The maintenance screen allows you to configure host code.

**How to reach here:**

**Core Maintenance > Host Code > Create Host Code**

The screenshot shows a form for creating a host code. The fields are:

<b>New</b>		
Host Code *	Description *	
Country Code	Processing Time Zone	Default Branch Code *
<input type="button" value="Save"/>	<input type="button" value="Cancel"/>	

## How to add a host code:

1. In the **Create Host Code** screen, provide the required details:
  - Host Code: Enter the host code details.
  - Description: Enter additional information about the host code.
  - Country Code: Click **Search** to view and select the required country code.
  - Processing Time Zone: Enter the processing time zone details.
  - Default Branch Code: Click **Search** to view and select the required default branch code.
2. Click **Save**. You can view the configured host code details in the [Host Code Summary](#).

## Currency Rate Type

You can configure a currency rate type.

### Currency Rate Type Summary

The summary screen provides a list of configured currency rate type. You can configure a currency rate type using the [Currency Rate Type Maintenance](#).

#### How to reach here:

Local Currency	Displays the local currency details.
Source Branch Code	Displays the code of the source branch.
Status	Displays the status of the record.

## External Branch Parameters Maintenance

The maintenance screen allows you to configure the branch parameters.

### How to reach here:

**Core Maintenance > External Branch Parameters > Create External Branch Parameters**

The screenshot shows the 'Create External Branch Parameters' screen. It includes sections for Branch Details, Branch Address, Other Details, and SWIFT Address. The Branch Details section has fields for Branch Code, Branch Name, Local Currency, and Source System. The Branch Address section has fields for Address Line 1, 2, and 3. The Other Details section has fields for Host Code, Country Code, Host Name, Walk-in Customer, Weekly Holiday 1, Weekly Holiday 2, Auto Authorization, and Report DSN. The SWIFT Address section is a grid for managing SWIFT addresses, showing a table with columns for SWIFT Address and Default BIC, and a message 'No data to display.' At the bottom are Save and Cancel buttons.

### How to configure an external branch parameter:

1. In the **Create External Branch Parameter** screen, provide the required details:

#### Branch Details

- Branch Code: Enter a branch code.
- Branch Name: Enter a name for the branch.
- Local Currency: Click **Search** to view and select the required local currency.
- Source System: Click **Search** to view and select the required source system.

- Source Branch Code: Enter a source branch code.

### Branch Address

- Address Line 1-3: Enter the address details.

### Other Details

- Host Code: Click **Search** to view and select the required host code.
- Country Code: Based on the Host Code selected the information is auto-populated.
- Host Name: Enter a name for the host.
- Walk-in Customer: Click **Search** to view and select the required walk-in customer.
- Weekly Holiday 1-2: Select a weekly holiday from the dropdown list.

#### Note

There are two days of weekly holiday depending on the geographical zone.

- Auto Authorization: By default, it is disabled. If enabled, the record is automatically authorized.
- Report DSN: Enter the details of the report DSN.

### SWIFT Address

2. Click **+** to add a row and provide the required details:

- SWIFT Address: Click **Search** to view and select the required SWIFT address.
- Default BIC: If selected, indicates the selected SWIFT address as the default BIC.

3. Click **Save**. You can view the configure branch parameter details in the [External Branch Parameters Summary](#).

## System Date

You can configure a system date.

### System Date Summary

The summary screen provides a list of configured system date. You can configure a system date using the [System Date Maintenance](#).

#### How to reach here:

#### Core Maintenance > System Date > View System Date

View System Dates			
Branch Code: 008	Branch Code: 555	Branch Code: 203	Branch Code: 004
Today's Date: 2018-05-24	Today's Date: 2018-05-15	Today's Date: 2017-08-31	Today's Date: 2018-05-17
Today's Date in Text:

Today's Date in Text:			
Open	Open	Open	Open

Field	Description
Branch Code	Displays the code of the branch.
Today's Date	Displays system's current date.
Today's Date in Text	Displays the system's current date in words.
Status	Displays the status of the record.

## System Date Maintenance

The maintenance screen allows you to configure system dates.

### How to reach here:

**Core Maintenance > System Date > Create System Date**

The screenshot shows a user interface for managing system dates. At the top, there's a header 'System Dates'. Below it, a 'Branch Code' field contains a search icon. Underneath are four date-related fields: 'Today's Date' (set to 'mm/dd/yy' with a calendar icon), 'Previous Working Date' (set to 'mm/dd/yy' with a calendar icon), 'Next Working Date' (set to 'mm/dd/yy' with a calendar icon), and 'Today Date in Text' (an empty text field). At the bottom right are 'Save' and 'Cancel' buttons.

### How to add a system date:

1. In the **System Date** screen, click **New** to enable the fields.
2. Provide the required details:
  - Branch Code: Click **Search** to view and select the required branch code.
  - Today's Date: Select the system's current date for the associated branch code.
  - Previous Working Date: Select a previous working date from the dropdown calendar.
  - Next Working Date: Select a next working date from the dropdown calendar.
  - Today Date in Text: Select the system's current date in wordings.
3. Click **Save**. You can view the configured system date details in the [System Date Summary](#).

## Language Code

You can configure a language code.

### Language Code Summary

The summary screen provides a list of configured language code. You can configure a language code using the [Language Code Maintenance](#).

### How to reach here:

**Core Maintenance > Language Code > View Language Code**

View Language Code			
<input type="text"/> <input type="button"/>	<input type="text"/> <input type="button"/>	<input type="text"/> <input type="button"/>	<input type="text"/> <input type="button"/>

ECA System	Displays the name of the ECA system.
Status	Displays the status of the record.

## ECA System Maintenance

The maintenance screen allows you to configure ECA system details.

**How to reach here:**

**Core Maintenance > ECA System > Create ECA System**

Create ECA System	
New	
Source System *	Description *
<input type="text"/>	<input type="text"/>
<input type="button" value="Save"/> <input type="button" value="Cancel"/>	

**How to add an ECA system:**

1. In the **Create ECA System** screen, provide the required details:
  - Source System: Enter the source system.

- Description: Enter additional information about the ECA system.

2. Click **Save**. You can view the configure ECA system details in the [ECA System Summary](#).

## Currency Exchange Rate

You can maintain exchange rates for a currency pair, the rates at which you buy and sell one currency for another. A bank determines its buy and sell rate for a currency pair by applying a spread (that is, its profit margin) to the mid-rate of the currency pair. Mid rate is the basic rate at which a currency pair is exchanged.

The spread applied for a currency pair varies with the transaction type, while the mid-rate usually remains constant. Consequently, different rates are applicable to different transaction types. For instance dollars in currency are purchased at a certain rate, while USD traveller's checks are bought at a different rate. You can define a rate type which you would like to associate with a transaction type example: CASH, TRAVCHKS, and so on.

You can define the mid-rate, buy and sell spread applicable to each rate type; the buy and sell exchange rates are computed by the system. Buy rates and sell rates can either be maintained by individual branches or can be input by the HO and propagated to all the branches.

If the branch for which the rate is being uploaded or maintained is the head office branch, then the rate would be copied to all those branches that have the same country code as the head office branch.

If the branch for which the rate is being uploaded or maintained is not the head office branch, but it has the same country code as the head office branch, then the rate being uploaded or maintained would be specific to the branch and would not be copied to any other branch.

If the branch for which the rate is being uploaded or maintained is not the head office branch and also does not have the same country code as the head office branch, then the rate being maintained would be copied to all the branches that has the same country code linked as the branch for which the rate is being maintained or uploaded.

## Currency Exchange Rate Summary

The summary screen provides a list of configured currency exchange rates. You can configure a currency exchange rate using the [Currency Exchange Rate Maintenance](#).

### How to reach here:

**Core Maintenance > Currency Exchange Rate > View Currency Exchange Rate**

View Currency Exchange Rate			
Branch code: 002 Currency1: BTN Currency2: MM0  	Branch code: 965 Currency1: BTN Currency2: MM0  	Branch code: 009 Currency1: BTN Currency2: MM0  	Branch code: 002 Currency1: BZD Currency2: GBP

## How to add an external customer account:

1. In the **Create External Customer Account** screen, provide the required details:

### Account Details

- Customer Account Number: Enter the customer account number.
- Account Name: Enter the name for an account.
- Customer Number: Click **Search** to view and select the required customer number.
- Customer Name: Based on the Customer Number selected the information is auto-populated.
- Account Currency: Click **Search** to view and select the required account currency.
- Account Class: Select the account class from the dropdown list.
- Source Account Branch: Click **Search** to view and select the required source account branch.
- Source Customer Account: Based on the Source Account Branch selected the information is auto-populated.
- Account IBAN: Enter the account IBAN details.

### Address

- Address Line 1-4: Enter the address details.
- Country: Click **Search** to view and select the required country.

### Other Details

- No Credit: By default, this is disabled. If enabled, indicates the account does not have any credit facility.
- No Debit: By default, this is disabled. If enabled, indicates the account does not have any debit facility.
- Blocked: By default, this is disabled. If enabled, indicates the account status is blocked.
- Frozen: By default, this is disabled. If enabled, indicates the account status is frozen.
- Dormant: By default, this is disabled. If enabled, indicates the account status is dormant.

- External Credit Approval Required: By default, this is disabled. If enabled, indicates ECA check is required for the external customer account.
- External Credit Approval System: Click **Search** to view and select the required external credit approval system.
- Host Code: Enter the host code details.
- Account Open Date: Select an effective date for the account from the dropdown calendar.

2. Click **Save**. You can view the configured external customer account details in the [External Customer Account Summary](#).

## External Bank Parameters

You can configure bank level parameters.

### External Bank Parameters Summary

The summary screen provides a list of configured external bank parameters. You can configure the external bank parameters using the [External Bank Parameters Maintenance](#).

**How to reach here:**

Bank Code	Displays the code of the bank.
Bank Name	Displays the name of the bank.
Status	Displays the status of the record.

## External Bank Parameters Maintenance

The maintenance screen allows you to configure external bank parameters.

### How to reach here:

**Core Maintenance > External Bank Parameters > Create External Bank Parameters**

The screenshot shows the 'Create External Bank Parameters' window. At the top left is a 'New' button. The window contains several input fields: 'Bank Code' (with a required asterisk), 'Bank Name', 'Head Office Branch' (with a search icon), 'Branch Description' (set to 'Not Selected'), and 'No of Days to Forget Customer'. At the bottom right are 'Save' and 'Cancel' buttons.

### How to configure a external bank parameter:

1. In the **Create External Bank Parameter** screen, provide the required details:
  - Bank Code: Enter the code for the bank.
  - Bank Name: Enter the name of the bank.
  - Head Office Branch: Click **Search** to view and select the required head office branch.
  - Branch Description: Based on the Head Office Branch selected the information is auto-populated.
  - Number of Days to Forget Customer: Enter the number of days to inactive/forget the customer.
2. Click **Save**. You can view the configure core bank parameter details in the [External Bank Parameters Summary](#).

## Customer Category

You can configure a customer category.

### Customer Category Summary

The summary screen provides a list of configured customer category. You can configure a customer category using the [Customer Category Maintenance](#).

### How to reach here:

### How to add forget customer:

1. In the **Forget Customer** screen, provide the required details:
  - Forget Customer Process ID: Enter the forget customer process ID.
  - Forget Customer Process Type: Select one of the options:
    - Customer Initiated: If selected, you can initiate the forget option for the customer.
    - Bank Initiated: If selected, you can initiate the forget option for the bank.

**Note**

Depending on the options selected, the grid options appears.

2. Click **+** to add a row and provide the customer/bank details.
3. Click **Save**.

## End of Day (EOD)

You can configure the EOD activities, indicates that all the activities for the day are complete. Further activities can be done on the system only after the system date has been changed to the next working day and authorized.

Most of the automated functions are part of the beginning of day operations. Thereafter, some of them (for example, accruals) must be executed when the system is in the EOTI stage.

## EOD Maintenance

The maintenance screen allows you to configure EOD details.

### How to reach here:

**Core Maintenance > Core Maintenance > Branch EOD > Invoke EOD**

### How to add an end of day:

1. In the **Invoke EOD** screen, provide the required details:
  - Mark EOFI: Click to mark the EOFI.
  - Change Date: Click to change the date to perform the EOD.
  - Mark TI: Click to mark TI.
  - Branch Code: Click **Search** to view and select the required branch code.
  - Current Branch Date: Select the current branch date from the dropdown calendar.
  - Status: Select a status from the dropdown list.

#### Note

You can use the **Reset** option to reset all the configured details and start fresh.

2. Click **Save**.

## Transaction Code

You can configure the transaction code.

## Amount Text Language Maintenance

The maintenance screen allows you to configure amount text language.

**How to reach here:**

**Core Maintenance > Amount Text Language > Create Amount Text Language**

### How to add an amount text language:

1. In the **Create Amount Text Language** screen, provide the required details:
  - Language Code: Click **Search** to view and select the required language code.

#### Amount Word Currency List

2. Click **+** to add a row and provide the required details:
  - CCY Symbol: Enter the CCY symbols.
  - Decimals As Fraction: Select a decimals as fraction value from the dropdown list.
  - Final Text: Enter the final text for the amount word currency list.
  - CCY: Click **Search** to view and select the CCY.
  - Post Decimal: Enter the post decimal details.
  - Pre Decimal: Enter the pre decimal details.
  - Text Before: Select an option for the before text.
  - Text Between: Enter the text that must appear between the amount word currency list.

#### Amount Word Text List

3. Click **+** to add a row and provide the required details.
  - Amount: Select the amount details.
  - One Flag: Select an option for the amount word text list.
  - Text: Enter a text for the amount word.
4. Click **Save**. You can view the configured amount text language details in the [Amount Text Language Summary](#).

# Currency Definition

You can define the attributes of the currencies in which the bank can deal. For each currency, you can define attributes such as, the SWIFT code for the currency, the country the currency belongs, the interest method, the spot days, the settlement days, and so on.

Currencies can be maintained only at the Head Office. The list of currencies are available to the branches based on the currencies defined for the country linked to the branch.

## Currency Definition Summary

The summary screen provides a list of defined currency. You can define a currency using the [Currency Definition Maintenance](#).

### How to reach here:

**Core Maintenance > Currency Definition > View Currency Definition**

Field	Description
Currency Code	Displays the code of the currency.
Currency Name	Displays the name of the currency.
Alternate Currency Code	Displays the code of the alternate currency.
Country	Displays the country associated with the currency.
Maintenance Country	Displays the maintenance country.
Status	Displays the status of the record.

Field	Description
Currency Code	Displays the code of the currency.
Currency Name	Displays the name of the currency.
Alternate Currency Code	Displays the code of the alternate currency.
Country	Displays the country associated with the currency.
Maintenance Country	Displays the maintenance country.
Status	Displays the status of the record.

## Currency Definition Maintenance

The maintenance screen allows you to define currency.

### How to reach here:

**Core Maintenance > Currency Definition > Create Currency Definition**

## How to define a currency:

1. In the **Create Current Definition** screen, provide the required details:
  - **Currency Code:** Enter the currency code.
  - **Maintenance Country:** Click **Search** to view and select the required maintenance country.
  - **Currency Name:** Enter the name of the currency.
  - **Alternate Currency Code:** Enter the code of the alternate currency.
  - **Currency Type:** Enter the currency type.
  - **ISO Numerical Currency Code:** Enter the International Standardization Organization numerical currency code.
  - **Currency Country:** Click **Search** to view and select the required currency country.
  - **Currency Decimals:** Select the currency decimals.
  - **Currency Interest Method:** Select the currency interest method from the dropdown list.
  - **Currency Spot Days:** Select the number of spot working days applicable for the currency.
  - **Foreign Exchange Netting Days:** Select the number of days for the foreign exchange netting.
  - **Settlement Message Days:** Select the settlement message days.
  - **Position GL:** Click **Search** to view and select the required position GL.
  - **Position Equivalent GL:** Click **Search** to view and select the required position equivalent GL.
  - **Currency Tolerance Limit:** Enter the currency tolerance limit.
  - **Index Base Currency:** Click **Search** to view and select the required index base currency.

- Commodity Code: By default, this is disabled. If selected,

### **Cut Off Time**

Refers to the time by which all transactions involving a currency should be generated. For a currency, you can indicate the cut-off hour and minute. This time should be expressed in the local time of the bank.

The maintenance of a cut-off time for a currency has particular reference to outgoing funds transfers involving it.

Example: The value date of a funds transfer transaction (incoming payment) involving USD, is 3rd June 2018. The number of cut-off days specified for the currency is 2. This means that the payment must be received on or before 1st June 2018. If the payment is received on 1st June, it must be received before the cut-off time specified for USD.

If the USD cut-off time is 1200 hrs, if the payment is received on 1st June 2018, it must be received before 1200 hrs.

- Cut Off Days: Select the cut off days for the payment transaction involving the currency.
- Cut Off Hour: Select the hour of the day for the cut off.
- Cut Off Min: Select the minute of the hour for the cut off.
- CLS Currency: By default, this is disabled. If selected, allow customers of your bank to settle their FX deals via the CLS (Continuous Linked Settlements) Bank, you can identify the currency to be a CLS Currency. FX deals in the CLS currency is only eligible to be routed through the CLS bank.
- Generate 103+: By default, this is disabled. If selected, generate outgoing MT 103 messages in the MT 103 + format.
- Index Flag: By default, this is disabled. If selected, derives index rate of the currency.
- Euro Conversion Required: By default, this is disabled. If selected, indicates the Euro conversion is required.
- New Cover Message Format Required: By default, this is disabled. If selected, indicates a new cover message format is required.
- Validate Tag-50F: By default, this is disabled. If selected, indicates validations must be performed for the 50F details captured for the ordering customer during contract input.

### **Rounding**

- Currency Round Rule: Select the currency round rule from the dropdown list.
- Currency Round Unit: Select the currency round unit.

### **Currency Format Mask**

- Select one of the currency format.

### **Euro Type**

- Currency Euro Type: Select one of the currency Euro type.

### **Auto Exchange Rate**

- Credit Auto Exchange Rate Limit: Enter the credit automatic exchange rate limit.
- Debit Auto Exchange Rate Limit: Enter the debit automatic exchange rate limit.

### **Currency Country Mapping**

2. Click + to add a row and provide the required details:

- Country Code: Click **Search** to view and select the required country code.
- Country Name: Enter the name of the country.

- Currency Code: Click **Search** to view and select the required currency code.

3. Click **Save**. You can view the defined currency in the [Currency Definition Summary](#).

## External Chart Account

You can configure an external charts.

### External Chart Account Summary

The summary screen provides a list of configured external chart accounts. You can configure an external chart account using the [External Chart Account Maintenance](#).

Status	Displays the status of the record.

## Upload Source Maintenance

The maintenance screen allows you to upload source.

### How to reach here:

**Core Maintenance > Upload Source > Create Upload Source**

### How to upload source:

1. In the **Create Upload Source** screen, provide the required details:
  - Source Code: Enter the source code details.
  - Source Description: Enter additional information of the source code.
  - Base Data from Flexcube: By default, this is disabled. If enabled, indicates the base data is from Flexcube.
  - System Authorization Required: By default, this is disabled. If enabled, indicates the system requires authorization.
2. Click **Save**. You can view the configured upload source details in the [Upload Source Summary](#).

## Currency Holiday

You can configure a yearly list of holidays, for the currencies, defined in the currency screen. The system uses the information maintained to check if any settlement involving a foreign currency (in the foreign Exchange, Money market, Funds Transfer, Loans and Deposit modules) falls on that currency's holiday. If yes, the system displays a message stating and ask the user for an override.

For any schedule or contract maturing at a future date, five years hence, you can input the future date, only if the calendar for that year is maintained. The currency holiday is maintained at the bank level by the Head Office.

## Currency Holiday Summary

The summary screen provides a list of configured currency holiday. You can configure a currency holiday using the [Currency Holiday Maintenance](#).
