1 Understanding Patch Releases

A patch release is an official Oracle patch release for Oracle Banking Corporate Lending Process Management. The fourth & fifth digit in a patch release string indicates the patch release number. The first three digits indicate the release to which the patch is applied. This is a consolidate release.

Each patch release includes libraries and files that have been rebuilt to implement one or more fixes. Each patch release is incremental. In other words, the latest patch release includes new fixes released after last patch released for the same release.

2 Patch Requirements

Confirm you are applying this patch release after application of all the patches up to 14.4.0.1.0.

3 Applying the Patch Release

Customers installing this patch release should refer to the "Installation Guide" chapter in the *Oracle Banking Corporate Lending Process Management 14.4.0.0.0 Installation Guide*, which is available here: https://docs.oracle.com/cd/F30281_01/install.htm

5 Enhancements

5.1 Approval Matrix

System is enhanced to configure the multi-level approval for business process based on the transaction amount. This can be configured at the business process definition and user can define the transaction amounts for 3 levels of approval.

5.2 Syndication Payment Process

A new process Syndication Payment has been added to handle the Loan payment for both Agency and Participation Loans. This enables the user to make the Loan payment along with sighting the incoming funds from the Borrower.
