Oracle Banking Trade Finance Process Management

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing trade finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle trade finance transaction.
- Help users to conveniently create and process trade finance transaction

Overview

OBTFPM is a trade finance middle office platform, which enables bank to streamline the trade finance operations. OBTFPM facilitates its customers to initiate new Trade transactions/handle response to existing transaction through Trade portals, or by visiting the branch or through SWIFT.

Benefits

OBTFPM helps banks to manage trade finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all trade finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

Import LC Update Drawing

This illustrates the update to an Import LC Drawing handled in OBTFPM.

For Drawings under Import LC, initiated on account of MT 750, update of drawing under Import LC is initiated to process the documents received from the presenting bank under the LC.

This section contains the following topics:

Registration	Scrutiny
Data Enrichment	Exceptions
Multi Level Approval	Reject Approval

Registration

During Registration stage, user can capture the basic details and upload the documents received from presenting bank. System also enables the user to capture some additional product related details as an option. On submit of the request the request will be available for an LC expert to handle the request in the next stage.

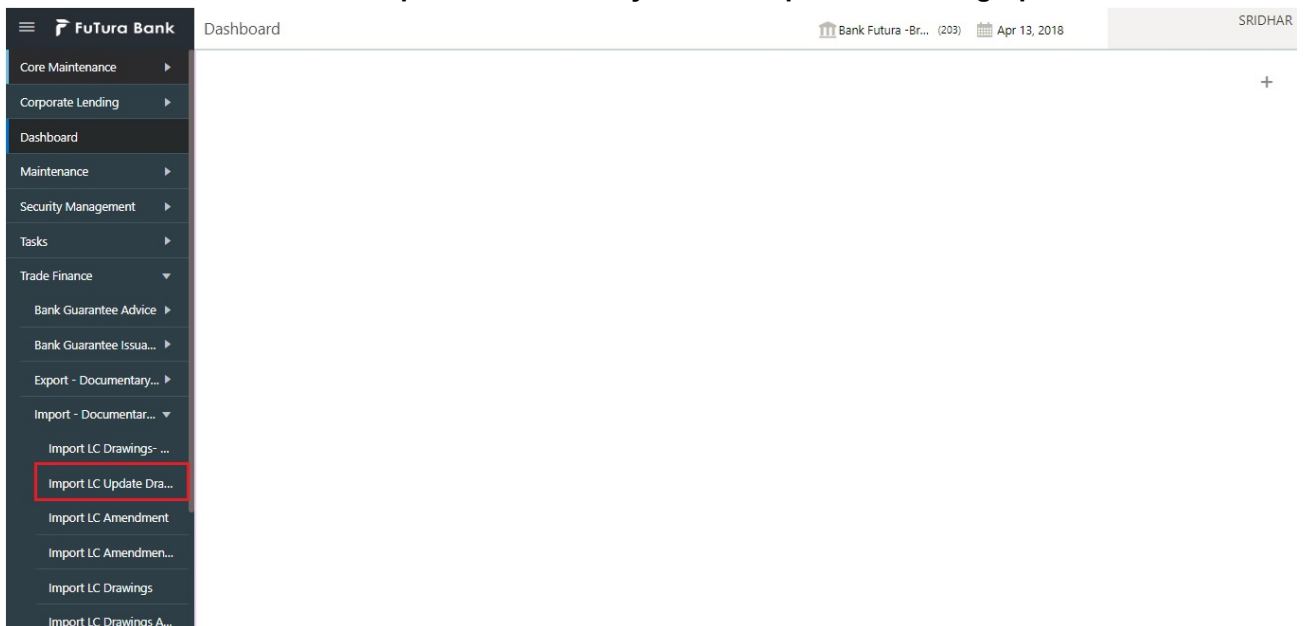

1. Using the entitled login credentials for Registration stage, login to the OBTFPM application.

A screenshot of the FuTura Bank Sign In interface. The background is dark teal. At the top left is the FuTura Bank logo, which consists of a stylized 'F' icon followed by the text 'FuTura Bank'. Below the logo, the text 'Sign In' is displayed. There are two input fields: 'User Name *' with the text 'SRIDHAR' entered, and 'Password *' with masked characters '.....'. Below the password field is a green 'Sign In' button. At the bottom center is a 'Cancel' link.

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

3. Click Trade Finance> Import - Documentary Credit> Import LC Drawing Update.

The Registration stage has two sections Basic Details and Drawing Details. Let's look at the details of Registration screens below:

Exceptions

As per regulatory requirement, all tasks are scrutinized for KYC, Compliance and Sanctions. The checks to external system/internal system is initiated after the Data Enrichment stage.

Exception - Amount Block

As part of amount block validation, application will check if sufficient balance is available in the account to create the block. On hand-off, system will debit the blocked account to the extent of block and credit charges/ commission account in case of charges block or credit the amount in suspense account for blocks created for collateral.

The transactions that have failed amount block due to non-availability of amount in respective account will reach the amount block exception stage.

Log in into OBTFPM application, amount block exception queue. Amount block validation failed tasks for trade transactions will be listed in the queue. Open the task to view summary of important fields with values.

Exception is created when sufficient balance is not available for blocking the settlement account and the same can be addressed by the approver in the following ways:

Approve:

- Settlement amount will be funded (outside of this process)
- Allow account to be overdrawn during hand-off

Refer:

- Refer back to DE providing alternate settlement account to be used for block.
- Different collateral to be mapped or utilize lines in place of collateral.

Reject:

Reject the transaction due to non-availability of sufficient balance in settlement account

Amount Block Exception

This section will display the amount block exception details.

Multi Level Approval

Log in into OBTFPM application and open the task to see the summary tiles. The tiles should display a list of important fields with values. User must be able to drill down from summary Tiles into respective data segments to verify the details of all fields under the data segment.

Authorization Re-Key (Non-Online Channel)

For non online channel, application will request approver for few critical field values as an authorization step. If the values captured match with the values available in the screen, system will allow user to open

the transaction screens for further verification. If the re-key values are different from the values captured, then application will display an error message.

Open the task and re-key some of the critical field values from the request in the Re-key screen. Some of the fields below will dynamically be available for re-key.:

- Applicant Party
- Beneficiary Party
- Drawing Currency
- Drawing Amount

Re-key is applicable to the first approver in case of multiple approvers. All approvers will however be able see the summary tiles and the details in the screen by drill down from tiles.

The screenshot displays the 'Free Tasks' interface in the FuTura Bank system. A modal window titled 'Approval Rekey' is open, allowing for the re-keying of critical fields. The modal includes tabs for 'Incoming Message', 'Documents', and 'Remarks'. The fields being re-keyed are:

- Applicant Party: 000262
- Beneficiary Party: 000263
- Drawing Currency: GBP
- Drawing Amount: £1,200.00

Each field has a green checkmark indicating successful re-keying. The background shows a table of tasks with columns for Action, Priority, Application Number, Process Name, Stage, and Back Office Ref No. The table lists several 'Acquire & Edit' tasks with application numbers starting with GSTELCA00000624. The right side of the background shows a list of 'Export LC Advising' tasks in the 'Scrutiny' stage, with back office reference numbers like GS1ELAC19032BMN8 and GS1ELAC19032BMA5.
