Copyright © 2016, 2019, Oracle and/or its affiliates. All rights reserved.

This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, delivered to U.S. Government end users are "commercial computer software" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, use, duplication, disclosure, modification, and adaptation of the programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, shall be subject to license terms and license restrictions applicable to the programs. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle and Java are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Xeon are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Opteron, the AMD logo, and the AMD Opteron logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

This software or hardware and documentation may provide access to or information about content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

# Preface

Oracle Hospitality Hotel Mobile brings the power of Oracle Hospitality property management systems to the hotel industry, empowering hotel associates to serve guests anywhere on property using commercially available smart phones and tablets.

## Purpose

These Release Notes provide a brief overview of additions, enhancements, and corrections implemented in this software release. Their intent is informative, not instructional. Review the Hotel Mobile product documentation for more information.

## Audience

This document is intended for customers who use Hotel Mobile.

## Customer Support

To contact Oracle Customer Support, access My Oracle Support at the following URL:

<https://support.oracle.com>

When contacting Customer Support, please provide the following:

- Product version and program/module name
- Functional and technical description of the problem (include business impact)
- Detailed step-by-step instructions to re-create
- Exact error message received
- Screen shots of each step you take

## Documentation

Oracle Hospitality product documentation is available on the Oracle Help Center at <http://docs.oracle.com/en/industries/hospitality/>.

## Revision History

Date	Description of Change
April 2019	Initial publication. Please note that the versions on <a href="https://edelivery.oracle.com/">https://edelivery.oracle.com/</a> and in all our documentation are listed as version 1.X.0.0 (1.4.0.0). The installed Hotel Mobile apps show version 1.X0 (1.40).

# 1

## Features and Updates

This section describes the new features and enhancements included in this release. Key capabilities of Hotel Mobile include:

### Android App

- When the feature control **Chargelt** is enabled in the RestApi configuration, a new menu icon is available in the Hotel Mobile app, allowing you to post single or multiple articles like minibar or laundry articles to the selected reservation.

### iOS App

- When the feature control **Chargelt** is enabled in the RestApi configuration, a new menu icon is available in the Hotel Mobile app, allowing you to post single or multiple articles like minibar or laundry articles to the selected reservation.
- When the feature **ReservationAlerts** is enabled in the RestApi configuration and the reservation alert messages exist in the connected PMS, a pop-up window appears when entering the reservation screen, and alert messages appear.

Additionally, there is a new panel called **Alerts** in the reservation screen displaying all reservation alert messages.

### Windows App

- When the feature control **Chargelt** is enabled in the RestApi configuration, a new menu icon is available in the Hotel Mobile app, allowing you to post single or multiple articles like minibar or laundry articles to the selected reservation.
- When the feature **ReservationAlerts** is enabled in the RestApi configuration and the reservation alert messages exist in the connected PMS, a pop-up window appears when entering the reservation screen, and alert messages appear.

Additionally, there is a new panel called **Alerts** in the reservation screen displaying all reservation alert messages.

### RestAPI

- The feature control **Chargelt** is now available in the **PmsApiXMIconfig** file. If set to **True**, a new menu icon is available in the Hotel Mobile app enabling you to post single or multiple articles like minibar or laundry articles to the selected reservation.
- The feature control **ReservationAlerts** is now available in the **PmsApiXMIconfig** file for enabling or disabling the reservation alert functionality in Hotel Mobile. If set to **True**, pop-up messages displaying the alerts appear in the app when entering the reservation screen.

# 2

## Resolved Issues

There are no resolved issues for this release.

# 3

## System Requirements, Supported Systems, and Compatibility
