This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, delivered to U.S. Government end users are "commercial computer software" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, use, duplication, disclosure, modification, and adaptation of the programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, shall be subject to license terms and license restrictions applicable to the programs. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle and Java are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Xeon are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Opteron, the AMD logo, and the AMD Opteron logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

This software or hardware and documentation may provide access to or information about content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

Preface

This Release Notes provides an overview of the features and known issues in Oracle Utilities Testing Accelerator, Patch 28824033 (MDM/SGG 2.3.0.1 PRODUCT PACK FOR OUTA 6.0.0.0). Note that the product is referred to as Oracle Utilities Testing Accelerator v6.0.0.0 or OUTA v6.0.0.0 in this document.

The preface includes the following sections:

- [Audience](#)
- [Related Documents](#)
- [Conventions](#)

Audience

This Release Notes is intended for anyone installing or using Oracle Utilities Testing Accelerator v6.0.0.0, Patch 28827631.

Related Documents

For more information, see these resources:

- *Oracle Utilities Testing Accelerator Installation and Administration Guide*
- *Oracle Utilities Testing Accelerator Reference Guide for Oracle Utilities Meter Data Management/Oracle Utilities Smart Grid Gateway v2.1.0.3*

Conventions

The following text conventions are used in this document:

Notation	Indicates
boldface	Graphical user interface elements associated with an action, terms defined in text, or terms defines in the glossary
<i>italic</i>	Book titles, emphasis, or placeholder variables for which you supply particular values
monospace	Commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter

Release Notes

This chapter introduces Oracle Utilities Testing Accelerator, Release 6.0.0.0 Patch 28824033. It includes the following:

- [About this Release](#)
 - [Pre-requisites](#)
 - [Patch Contents](#)
 - [New Product Packs](#)
- [Known Issues](#)

About this Release

Refer to the *Oracle Utilities Testing Accelerator Installation and Administration Guide* for information regarding certifications, supported platforms, and installation steps.

Please visit My Oracle Support (<http://support.oracle.com>) for the most recent service packs and/or patches for this release to ensure you have the most current version of this product.

Pre-requisites

Before installing this patch, ensure that Oracle Utilities Testing Accelerator v6.0.0.0 is installed.

Patch Contents

The Oracle Utilities Testing Accelerator v6.0.0.0 Patch 28824033 includes the Oracle Utilities Meter Data Management/Oracle Utilities Smart Grid Gateway v2.1.0.3 media pack.

New Product Packs

Oracle Utilities Meter Data Management/Oracle Utilities Smart Grid Gateway (v2.1.0.3)

This release includes two Oracle Utilities Meter Data Management sample flows used to understand the flow creation process.

- Demo Interval

Includes creation of a smart meter, adding device configuration and interval measuring components to the smart meter, loading Initial Measurement Data (IMD) on the meter, and creating usage transactions.

- Demo Scalar

Includes creation of a manual meter, adding device configuration and scalar measuring components to the manual meter, loading Initial Measurement Data (IMD) on the meter, and creating usage transactions.

The release contains a sample cloud sanity flow that demonstrates how a flow can be created for a cloud environment.

- MDM-SGG_Cloud_Environment_Sanity Sample

Used to verify On demand Read scalar for a device on a cloud environment which is an initial install environment.

The release also includes the following Oracle Utilities Smart Grid Gateway sample flow to understand the flow creation process.

- Itron Sample Flow

The Itron Sample flow includes creation of an Itron Smart Meter, adding device configuration and scalar measuring components to it, adding the Meter in Itron test harness, and performing various commands on the Meter.

For more information about these sample flows, see the **Sample Work Flows** chapter in *Oracle Utilities Testing Accelerator Reference Guide for Oracle Utilities for Meter Data Management/Oracle Utilities Smart Grid Gateway (v2.1.0.3)*.

Known Issues

There are no known issues at the time of this release.
