1. Preface

1.1 Introduction

This manual is intended as a guide to help you define User Defined events in FLEXCUBE. Besides this User Manual, you can find answers to specific features and procedures in the Online Help, which can be invoked, by choosing 'Help Contents' from the Help Menu of the software. You can further obtain information specific to a particular field by placing the cursor on the relevant field and striking <F1> on the keyboard.

1.2 Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc.

1.3 Organization

This manual is organized as follows:

<table>
<thead>
<tr>
<th>Chapter</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Chapter 1</td>
<td>About this Manual gives information on the intended audience. It also lists the various chapters covered in this User Manual.</td>
</tr>
<tr>
<td>Chapter 2</td>
<td>Building User Defined Events explains how to define events in Oracle FLEXCUBE either for your own convenience or to suit the requirements of your bank.</td>
</tr>
</tbody>
</table>

1.4 Glossary of Icons

This User Manual may refer to all or some of the following icons.

<table>
<thead>
<tr>
<th>Icons</th>
<th>Function</th>
</tr>
</thead>
<tbody>
<tr>
<td>✕</td>
<td>Exit</td>
</tr>
<tr>
<td>+</td>
<td>Add row</td>
</tr>
<tr>
<td>−</td>
<td>Delete row</td>
</tr>
<tr>
<td>🔍</td>
<td>Option List</td>
</tr>
</tbody>
</table>

1.5 Related Documents

For further information on procedures discussed in the manual, refer to the Oracle FLEXCUBE manuals on:

- Core Services
- Common Procedures
2. User Defined Events

2.1 Introduction

A contract that you process in Oracle FLEXCUBE goes through different stages during its life cycle. These stages are defined as Events. Every new module that you maintain has to be associated with a set of events, which will be triggered at appropriate stages during the lifecycle of the contract.

Apart from the factory shipped events, you can create your own events as per the requirements of the bank.

This chapter contains the following sections:

- Section 2.2, "Event Details"
- Section 2.3, "User Defined Events Triggering"
- Section 2.4, "Accounting Roles and Heads"
- Section 2.5, "User Defined Events"

2.2 Event Details

This section contains the following topics:

- Section 2.2.1, "Invoking User Defined Events Screen"
- Section 2.2.2, "Default Button"
- Section 2.2.3, "Value Date Derivation Button"
- Section 2.2.4, "Event Processing Button"
- Section 2.2.5, "Calculating the Commission on the Highest Outstanding Balance"
- Section 2.2.6, "Viewing Event Details"

2.2.1 Invoking User Defined Events Screen

You can define the events through the ‘User defined Events’ screen. You can invoke this screen by typing ‘UDDEVVMNT’ in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.
You can define events for a new module and also for existing modules in this screen.

User defined events will be linked to a product and is triggered in the life cycle of a contract, which is processed under that product.

**Report Module**
Specify the module for which you want to set up a user-defined event. The adjoining option list contains all the module codes available in the system. Select the appropriate one.

**Event Code**
Specify the event code that you want to set up for the module.

**Event Description**
Give a brief description of the event that you are defining. The description that you enter is for information purposes.

**Accounting Entries Definition**
Specify the accounting entries definition. You have the following options:
- Yes
- No

**Advice Definition**
Specify the advice entries definition. You have the following options:
- Yes
- No

**UDE Advices Definition**
Specify the UDE advice definition. You have the following options:
- Yes
- No
**Association**

Indicate your preferences.

**Allow Charge**
Specify the association allow charge. You have the following options:
- Yes
- No

**Allow Transaction Tax**
Specify the association allow transaction tax. You have the following options:
- Yes
- No

**Application**

Indicate your preferences. These fields will not be applicable if you have specified any one of the following in the ‘Report Module’ field:
- CL
- CI
- LE
- MO

**Allow Charge**
Specify the application allow charge. You have the following options:
- Yes
- No

**Allow Transaction Tax**
Specify the application allow transaction tax. You have the following options:
- Yes
- No

**Liquidation**

Indicate your preferences. These fields will not be applicable if you have specified any one of the following in the ‘Report Module’ field:
- CL
- CI
- LE
- MO

**Allow Charge**
Specify the liquidation allow charge. You have the following options:
- Yes
- No

**Allow Transaction Tax**
Specify the liquidation allow transaction tax. You have the following options:
- Yes
2.2.2 Default Button

Click ‘Default’ button in the ‘User Defined Events’ screen to define the triggering parameters for the configured event.

In this screen you can enter the following details below:

**Module Code**
The system displays the module code here.

**Event Code**
The system displays the event code here.

**Event Trigger**
The event, which you are defining, can be triggered in either of the following ways:

- Automatic – This means that the event should be triggered automatically during EOD.
- Manual - This means that the event should be triggered manually from the ‘User Defined Event’ triggering screen.

**Value Date Derivation**
Check this box to indicate that the value date derivation is defined for a particular event.

**Event Processing**
Check this box to indicate the event processing is defined for a particular event.

**Execution Query**
Enter the query condition to select the list of accounts for the execution of the event during EOD. Input to this field will be mandatory if you choose ‘Automatic’ triggering of the event.
2.2.3 **Value Date Derivation Button**

Click ‘Value Date Derivation’ button on the ‘Event Trigger’ screen and invoke the ‘Derivation Rule’ screen to specify the value date derivation logic.

In this screen you can enter the following details:

**Module Code**
The system displays module code here.

**Event Code**
The system displays event code here.

**Value Date Derivation Rule**
Enter description about the value date derivation rule. You need to assign a value to ‘L_VAL_DT’. For instance, ‘L_VAL_DT:=global.application_date’.

**Error**
Click ‘X’ button to execute the code. The derivation code will be validated by the system. If any checks fail, you must alter the statement so that the validation can be made successfully. Click ‘E’ button to view the errors.
2.2.4 Event Processing Button

Click ‘Event Processing’ button on the ‘Event Trigger’ screen and invoke the ‘Derivation Rule’ screen to assign values for processing of the event.

In this screen you can enter the following details:

Module Code
The system displays module code here.

Event Code
The system displays event code here.

Errors

Click ‘X’ button to execute the code. The derivation code will be validated by the system. If any checks fail, you must alter the statement so that the validation can be made successfully. Click ‘E’ button to view the errors.

2.2.5 Calculating the Commission on the Highest Outstanding Balance

System uses UDE to calculate the commission on the highest outstanding balance of the loan and the mortgage Accounts.

You can define a UDE Highest Debit Balance Commission Event (HDBC) for computation of commission with following parameters:
- Event Trigger can be either Auto or Manual
- Apply Charge should be Yes
- Execution Query should be all accounts which satisfy the following criteria:
  - Account Status is Active
  - Outstanding Principal is greater than 0.00
- Value Date derivation rule to return the date as month-end
- This event is available at Loan and Mortgage product level.

2.2.6 **Viewing Event Details**

You can view the event details maintained in the 'User Defined Events' screen under 'Events' screen of a contract screen. You can invoke the ‘Events’ screen by typing ‘CSDEVENT’ in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

![Reference Number](image)

Reference Number

Specify the reference number.

The system displays the following details:

- Event Number
- Event code
- Description
- Event Date
- Authorization Status
- Maker Id
- Checker Id

2.2.6.1 **Viewing Accounting Entries**

You can view the accounting entries maintained for an event in the ‘Accounting Entries’ screen by selecting an event and clicking on ‘Accounting Entries’ button in the ‘Events’
screen. To invoke the screen type ‘CSDACENT’ in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

Reference Number
Specify the transaction reference number

See Position Entries
Check this box to view currency position of the entries.

Event
Specify the event.

Event Number
The system displays the event number.

The following details are displayed in the Accounting Entries:
- Event
- Branch
- Account
- Account Description
- Dr/Cr
- Amount Tag
- Account Ccy
- Foreign Currency Amount
- Rate
- Local Currency Amount
- Date
- Value Date
- Txn Code

The following details are displayed in the Accounting Under Process:
- Event
- Branch
- Account
- Dr/Cr
- Amount Tag
- Account Ccy
- Foreign Currency Amount
- Rate
- Local Currency Amount
- Date
- Value Date
- Txn Code

**Override Details**

Click on 'Overrides' button to view the override details of the accounting entries.
2.2.6.2 Viewing Messages

You can view the messages by selecting an event and clicking on ‘Messages’ button in the ‘Events’ screen. To invoke the screen type ‘CSDMSGVW’ in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

The system displays the following details:

- Contract Reference
- ESN
- Event
- Message Type
- SWIFT Message Type
- Medium
- Message Status
- Authorization Status
- Receiver
- Receiver Name
- DCN
Message Details

You can view the details of a message by selecting a message from the ‘Message’ screen and clicking on ‘Message Details’ button.

2.3 User Defined Events Triggering

You can use the ‘User Defined Events Triggering’ screen to manually trigger the user defined events for accounts. You can invoke this screen by typing ‘UDDEVENT’ in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

Here you need to specify the following details:

Contract Reference
Select the contract reference number from the adjoining option list.

Event
Select the event from the adjoining option list.

Description
Give a brief description on the event.
Click ‘Default’ to default the following details:

- Counterparty
- Status
- Currency

**Payment Remarks**
Specify remarks pertaining to the payment on the account.

**Value Date**
If the value date derivation rule has been maintained for the event code, the system will calculate the value date and display it here. However, you can change it.

**Amount Details**
The system displays the following amount details:

- Amount Tag
- Description
- Currency
- Amount Paid

### 2.3.1 MIS Tab
Click ‘MIS’ button in the screen to invoke the ‘MIS’ screen.

Refer *MIS user manual for details on this sub-screen*.

### 2.3.2 Settlement Tab
Click ‘Settlement’ button in the screen to invoke the ‘Settlement Details’ screen.

Refer *Settlements user manual for details on this sub-screen*.

### 2.3.3 Tax Tab
Click ‘Tax’ button in the screen to invoke the ‘Tax Details’ screen.

Refer *Tax user manual for details on this sub-screen*.

### 2.3.4 Charge Tab
Click ‘Charge’ button in the screen to invoke the ‘Charge Detail’ screen.

Refer *Charges Fees user manual for details on this sub-screen*.

### 2.3.5 Events Tab
Click ‘Event’ button in the screen to invoke the ‘Event Details’ screen.

### 2.4 Accounting Roles and Heads
This section contains the following topics:

- Section 2.4.1, "Invoking Accounting Roles and Heads Screen"
- Section 2.4.2, "Amount Tag Tab"
2.4.1 Invoking Accounting Roles and Heads Screen

You can define the amount tags for accounting roles through the ‘Accounting Role and Head Maintenance’ screen. You can invoke this screen by typing ‘UDDRLTAG’ in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

![Screen shot of Accounting Role and Head Maintenance](image)

You can specify the following parameters for the module:

- Amount Tag
- Accounting Roles

2.4.2 Amount Tag Tab

This tab is displayed by default when you invoke the screen.

**Amount Tag**
Specify the amount tag.

**Description**
Enter the brief description for amount tag.

**Charge**
Indicate whether the amount tag pertains to a charge or not by choosing one of the following options:
- Yes
- No

**Accounting**
Indicate whether accounting entries are required or not by choosing one of the following options:
- Yes
- No
**Transaction Tax**
Indicate whether transaction tax is applicable or not by choosing one of the following options:
- Yes
- No

**Local Currency**
Indicate the local currency preference by choosing one of the following options:
- Average
- Equivalent

**Local Currency Eq. Tag**
Specify the amount tag for the local currency equivalent amount.

Click 'Derivation' button and invoke the 'Derivation Rule Details' screen to derive the amount and currency for the amount tag.

Here you can specify derivation logic for the following:
- Amount Rule
- Currency Rule

**Module Code**
The system displays module code here.

**Amount Tag**
The system displays the amount tag here.
**Amount Rule Derivation**

You can specify the following details.

**Amount Rule Type**

Check this box if the amount has to be derived based on a specified condition. The amount for a particular tag can be derived based on a condition.

**Derivation Amount Rule**

If you have checked against the option ‘Amount Rule Type’, the system will derive the amount for the amount tag that is being defined. You can use the following as variables while creating the derivation rule:

- Account Level UDF
- SDE

You can use any of the following SDEs:

- CUSTOMER_CATEGORY - Category of the customer of the loan
- CUSTOMER_ID - Customer ID
- LOAN_STATUS - Status
- ACCOUNT_CCY - Loan account's currency
- TODAY - Today
- NEXT_WORKDAY - Date of next workday
- PAYMENT_VALUE_DATE - Payment value date
- LAST_PAYMENT_DATE - Last payment date for the customer
- DAYS_FOR_NEXT_PMNT - Days for next payment
- AMOUNT_DISBURSED - Current disbursement amount
- COMMITMENT_UTILIZED - Utilized part of commitment
- EMI_AMOUNT - EMI AMOUNT
- NET_PRINCIPAL - Non-funded amount for which the loan is applied
- TOTAL_DUE_AMOUNT - Sum of all the Outstanding Balances for the Customer
- CURRENT_PAYMENT_AMOUNT - Current Amount which is Due
- TOTAL_PRINCIPAL - Amount for which the loan is applied
- PAYED_INTEREST_AMOUNT - Total Interest Amount Paid
- INTEREST_ACCRUED_AMOUNT - Sum of all the Accrued Amounts for Interest
- AMOUNT_NOT_DISBURSED - Amount Not Disbursed
- COMMITMENT_UNUTILIZED - Unutilized part of commitment
- TENOR - Duration for which the loan is applied
- PRINCIPAL - Amount disbursed
- PRINCIPAL_OUTSTAND - Principal amount outstanding
- OVERDUE_MONTHS - OverDue Months
- TOTAL_OVERDUE_AMOUNT - Total Overdue amount for all components
- INS_TENOR - INSTALLMENT TENOR
- NO_OF_RPMNT_SCHS - Number of Non-Moratorium repayment schedules
- MORA_OUTSTANDING - Moratorium Outstanding Amount
- AMOUNT_DISBURSED - Current disbursement amount
- COMPOUND_VALUE - Amount Compounded
• TOTAL_MORA_AMOUNT - Total Moratorium Amount
• OVR_DAYS - <Component> overdue days
• EXPECTED - <Component> expected amount
• OUTSTAND - <Component> outstanding amount
• CCY - <Component> currency
• OVERDUE - <Component> overdue amount
• FN_NO_REPAY_SCH - <Component> number of schedules for a component if periodic
• NET_PRINCIPAL - <Component> amount financed
• PROJECTED_AMOUNT - Projected Amount
• UIDB_DIFFERENTIAL - UIDB Differential
• BALLOON_AMOUNT - Balloon Amount
• RESIDUAL_AMOUNT - Residual Amount
• CAPITAL_AMOUNT - Capital Amount
• CLOSURE_AMOUNT - Closure Amount
• NET_MORTGAGE - Net Mortgage Amount

Assume that you have an account-level UDF called ‘OSCHGRATE’.

The derivation rule using the SDEs and UDF may be given as under.

DECLARE

l_osprin_amt number;
rate number;

BEGIN

l_osprin_amt:=(@SDE_VAL#PRINCIPAL_OUTSTAND);

rate: =(@UDF_UD#OSCHGRATE);

l_amount:=rate * l_osprin_amt;

END

Amount Rule Error Description

Enter a brief description about amount rule error that should be displayed in case the derivation fails.

Currency Rule Derivation

The currency can either be derived from the existing account currency or can be maintained as a UDF field in the account or it can be hard-coded in the ‘Currency Rule Definition’ screen.

Currency Rule Type

Check this box if the currency for a particular amount tag has to be derived based on the derivation rule.

Derivation Currency Rule

Specify the rule based on which the system should derive the currency for the amount tag. You need to assign a value to ‘L_CCY’. For instance, the rule may be given as under.
BEGIN
SELECT currency
INTO      l_ccy
FROM     cltb_account_master
WHERE  account_number = p_acc_no
AND        branch_code=p_branch;
END;

Currency Rule Error Description
Enter a brief description about currency rule error that should be displayed in case the
derivation fails.

2.4.3 Accounting Roles Tab

Click ‘Accounting Roles’ tab in the ‘Accounting Role and Head Maintenance’ screen.

In this screen you can enter the following details:

Role Code
Specify the role code.

Description
Enter a brief description about role code.

Role Type
Select the role type from the adjoining drop-down list. The following values are available:
- Asset
- Liability
- Income
2.5 **User Defined Events**

This section contains the following topics:

- **Section 2.5.1, "Triggering User Defined Events Automatically"**

### 2.5.1 Triggering User Defined Events Automatically

You can add the user defined event batch to the mandatory programs to be run for the module, using the ‘Mandatory Batch Program Maintenance’ screen. You can invoke this screen by typing ‘EIDMANPR’ in the field at the top right corner of the Application tool bar and clicking the adjoining arrow button.

**Module**

Choose the module code from the adjoining option list.

**Function Identification**

Specify ‘UDBATEVT’ as the batch that needs to be run. You can also select this value from the adjoining option list.
End Of Cycle Group
Select the option ‘End Of Transaction Input’.

Predecessors
You need to add the following batches as predecessors to the ‘UDBATEVT’ batch:

- CL batch (CLBATCH)
- Islamic CL batch (CIDBATCH)
- Leasing batch (LEDBATCH)
- Mortgage batch (MODBATCH)

*For further details about this screen, refer the chapter ‘Setting- up Mandatory Programs for EOD’ in the AEOD User Manual.*

This batch fetches the list of user defined events of the following modules for which the event triggering is set as ‘Automatic’:

- CL
- Islamic Financing
- Mortgages
- Leasing

It fetches valid accounts associated with the event by the executing the query defined for the event in the ‘Event Trigger’ screen. The settlement account and branch are defaulted from the settlement details maintained for the account. If these details are not maintained, they will be defaulted from the settlement details maintained for the ‘Principal’ component.

The system triggers the derivation rule maintained for the event to arrive at the value date of the event. The system then posts accounting entries to the respective GLs using the value date derived. The system also derives the amount and currency for each amount tag of the accounting entries defined for the event. The system allows you to link only payment advice ‘CR_ADV, DR_ADV’ to the user defined event. So if linked to an account, this advice will be generated.
