1. Preface

1.1 Introduction

This manual is designed to help acquaint you with the Islamic Integrated Liquidity Management module of Oracle FLEXCUBE.

This manual provides answers to specific features and procedures that you need to be aware of for the module to function successfully. Besides this User Manual, while maintaining the interface related details, you can invoke the context sensitive help available for each field. This help encapsulates the purpose of each field within a screen. Placing the cursor on the relevant field and striking the <F1> key on the keyboard can obtain information specific to a particular field.

1.2 Audience

This manual is intended for the following User/User Roles:

Role	Function
Back office data entry Clerks	Input functions for maintenance related to the interface.
Back office Managers/ Officers	Authorization functions

1.3 Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

1.4 Organization

This manual is organized into the following chapters:

Chapter	Description
Chapter 1	<i>About this Manual</i> gives information on the intended audience. It also lists the various chapters covered in this User Manual.
Chapter 2	<i>Islamic Integrated Liquidity Management - An Overview</i> offers an introduction to the module and its features.
Chapter 3	<i>Maintaining Parameters for Islamic Integrated Liquidity Management</i> explains how to maintain certain parameters before defining account structures for integrated liquidity management process.
Chapter 4	<i>Batch Maintenance</i> explains the Batches that need to be maintained for II.
Chapter 5	<i>Batch Process</i> explains various processes related to batches maintained for the Islamic Liquidity Management.
Chapter 6	<i>IP Batch Processing</i> explains about the process involved in IP batch

Chapter 7	<i>Reports</i> give a detailed account of report generation from this module and the contents of such reports.
Chapter 8	<i>Annexure A - Accounting Entries</i> lists the Accounting Entries for Profit and Charge Product applicable for the Integrity Liquidity Management module.
Chapter 9	<i>Annexure B – IP Rule Set-up</i> lists the Profit and Charge rules that need to be maintained for the Islamic Integrity Liquidity Management module.
Chapter 10	<i>Function ID Glossary</i> has alphabetical listing of Function/Screen ID's used in the module with page references for quick navigation.

2. Islamic Integrated Liquidity Management - An Overview

2.1 Introduction

Liquidity Management refers to the services your bank provides to its corporate customers thereby allowing them to optimize profit on their checking/current accounts by sweeping funds from different accounts. Your corporate customers can, therefore, manage the daily liquidity in their business in a consolidated way.

Customers need to define 'account structures' which form the basis of liquidity management. The account structure reflects the hierarchical relationship of the accounts as well as the corporate strategies in organizing accounts relationships.

Islamic liquidity management supports sweeping funds. Sweeping is the process where physical funds are moved in account structure from child to parent or parent to child.

The Islamic Integrated Liquidity Management (ILM) module in Oracle FLEXCUBE supports a multi-branch, multi-currency liquidity management structure using architecture of 'System Accounts'. This enables the system to keep track of balances in accounts in the structure, calculate profit on the accounts in the structure as well as track the history of the sweep structure.

Note

System accounts are internal accounts created by the system based on the role played by an account in an Account Structure.

This document is broadly classified into two sections as follows:

- Maintenance required for ILM
- EOD Batch operations and sequenc

3. Maintaining Parameters for Islamic Integrated Liquidity Management

3.1 Introduction

You need to maintain certain parameters before you define account structures for integrated liquidity management process. They are:

- Account class
- IC – SDE Maintenance
- IP Rule Maintenance
- IP Product Maintenance
- Customer Maintenance
- Islamic Account Maintenance
- Transaction Code
- Product Event class and Accounting entries for ILM
- ILM Branch parameters Maintenance
- Group Code Maintenance
- Account Structure Maintenance
- Group Account Linkage
- Other Maintenances

This chapter contains the following sections:

- [Section 3.2, "Maintaining Account Classes"](#)
- [Section 3.3, "Maintaining SDEs"](#)
- [Section 3.4, "Maintaining UDEs"](#)
- [Section 3.5, "Profit & Charges Rules"](#)
- [Section 3.6, "Product Event Class & Accounting Entries"](#)
- [Section 3.7, "Group Code Maintenance"](#)
- [Section 3.8, "Account Structures"](#)

3.2 Maintaining Account Classes

You can use the Account Class feature in Oracle FLEXCUBE to create a set of accounts which have the same characteristics. You can invoke the 'Account Class Maintenance' screen by typing 'IADACCLS' in the field at the top right corner of the Application tool bar and clicking

on the adjoining arrow button. Click on the 'Preferences' button in the 'Account Class Maintenance' screen to invoke the 'Preferences' screen.

You are required to input the following details in this screen:

Integrated Liquidity Management

Check this option to indicate that accounts created under this Account Class should be part of an ILM Structure. If the option is checked, the system creates system accounts (internal accounts) for each account that is linked in a sweep structure and tracks the balances on both the actual accounts as well as these system accounts. It also calculates profit on these system accounts.

Note

Profit on accounts that are not part of an account structure are calculated on the actual customer account.

3.3 Maintaining SDEs

In order to calculate Profit, Oracle FLEXCUBE uses components called 'data elements' that provide the required data.

System Data Elements (SDEs) are values such as the balance in an account or the number of transactions in a day. This information is constantly updated in the system and is readily available for computation of Profit. These values can only be picked up by the system while applying Profit. User cannot indicate what the value of an SDE should be.

The following SDEs will be used in IC Processing:

SDE (System Data Elements)	Description
ILBD_ULT_DR_BAL	Captures the book dated Debit balance of the pool header in this Data element during the IC calculation process
ILBD_ULT_CR_BAL	System populates the book dated Credit balance of the pool header in this data element during the IC calculation process
ILVD_ULT_DR_BAL	System populates the value dated Debit balance of the pool header in this data element during the IC calculation process
ILVD_ULT_CR_BAL	System populates the value dated Credit balance of the pool header in this variable during the IC calculation process
ILBD_CP_DR_- CONT	This data element captures the Compensated contribution of the book dated Debit balance
ILBD_CP_CR_- CONT	This data element captures the Compensated contribution of the book dated Credit balance
ILVD_CP_DR_- CONT	This data element captures the Compensated contribution of the value dated Debit balance
ILVD_CP_CR_- CONT	This data element captures the Compensated contribution of the value dated Credit balance
ILBD_NCP_DR_- CONT	This data element captures the Non Compensated contribution of the book dated Debit balance
ILBD_NCP_CR_- CONT	This data element captures the Non Compensated contribution of the book dated Credit balance
ILVD_NCP_DR_- CONT	This data element captures the Non Compensated contribution of the value dated Debit balance
ILVD_NCP_CR_- CONT	This data element captures the Non Compensated contribution of the value dated Credit balance

3.4 Maintaining UDEs

User Data Elements (UDEs) are elements (such as Profit or Tax rate) the values for which are provided by the User. The following User Data Elements (UDE) can be specified in IP Rule Maintenance:

- Debit Rate for Sweep Balance
- Credit Rate for Sweep Balance
- Inter-Bank Rate
- Tax Rate

3.5 Profit & Charges Rules

This section contains the following topics:

- [Section 3.5.1, "Creating Profit & Charges Rules"](#)
- [Section 3.5.2, "Creating Profit & Charges Products"](#)

- [Section 3.5.3, "Maintaining IP Special Conditions for Customer Accounts"](#)
- [Section 3.5.4, "IP Special Conditions"](#)

3.5.1 Creating Profit & Charges Rules

You can use the SDEs and UDEs that you have previously defined to create formula to be used by the system for Profit calculations in the 'Profit & Charges Rule Maintenance' screen. You can invoke the 'Profit & Charges Rule Maintenance' screen by typing 'IPDRLMNT' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

You are required to input the following detail in this screen:

Integrated LM

Choose this option if you want to use the product for Integrated Liquidity Management processing.

Integrated LM Type

Specify the type of System Account to which the product ought to be linked. It can be:

- Pool Leader: Indicates that the Rule will apply to Header accounts in a structure.
- Pool Reallocation: Indicates that the rule will apply to Parent and Child Accounts below the Header Account.

Refer the chapter 'Annexure B – IC Rule Set-up' in this User Manual for suggested IC rules.

3.5.2 Creating Profit & Charges Products

You can invoke the 'Profit And Charges – Profit Product Preferences' screen by clicking 'Preferences' button on the 'Profit And Charges Product Maintenance' screen. You can invoke

the latter by 'typing 'IADPRMNT' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

You can input the following details in this screen:

Integrated LM Product

Choose this option if you want to use the product for Integrated Liquidity Management processing.

Integrated LM Type

Specify the type of System Account to which the product ought to be linked. It can be:

- Pool Leader: Indicates that the Rule will apply to Header accounts in a structure.
- Pool Reallocation: Indicates that the rule will apply to Parent and Child Accounts below the Header Account.

Refer the chapter 'Annexure A - Accounting Entries' in this User Manual for suggested IC products.

3.5.3 Maintaining IP Special Conditions for Customer Accounts

The 'Islamic Accounts Maintenance' screen is used to create accounts for a given Customer using the desired account class and currency combination. You can invoke the 'Islamic Accounts Maintenance' screen by typing 'IADCUSAC' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

Note

ILM accounts need to be created with special conditions by attaching the products with effective date and UDE values.

3.5.4 IP Special Conditions

The system displays the following fields on the basis of your choice in the IP Rule and IP Product screens.

Integrated LM

The system defaults the value specified in the product screen from based on product selected from the option list.

Integrated LM Type

The system displays the value on the basis of your choice in the IP Rule and IP Product screens.

3.6 Product Event Class & Accounting Entries

This section contains the following topics:

- [Section 3.6.1, "Maintaining Product Event Class & Accounting Entries"](#)
- [Section 3.6.2, "Defining Accounting Entries for Event"](#)
- [Section 3.6.3, "Associating Branch to Event Class"](#)

3.6.1 Maintaining Product Event Class & Accounting Entries

When you define an Events Class, you choose, first of all, the set of events that would belong to the class. Events are, usually, unique to a module.

The events that you would like to include in an Events Class can be identified through the 'Events Accounting Entries and Advices Class Maintenance' screen. This screen is invoked from the Application Browser.

You can invoke the 'Events Class Maintenance' screen by typing 'CSDACTCL' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

Event Code *	Event Description

You can maintain the following details in this screen:

Class Code

An Events Class is identified with a unique Code and a Description. This indicates the name of the event class to which the events for ILM processing will be linked.

Description

You need to enter a brief description for the class code.

Module

Events are, usually, unique to a module. Specify the module as IL to define the events for Islamic Liquidity Management module.

Event Code

Specify a valid code for the event you need to maintain. The adjoining option list displays all valid codes maintained for IL events. You can select the appropriate one.

Event Description

Once you specify the class code and module, click on add icon. The system will display the events associated with the Integrated Liquidity Management module.

The following events are available for the integrated liquidity management module:

- SWBK : Sweep Booking
- RVSW: Reverse of Sweep Booking
- RALL: Reverse ALL (Book / Reverse Sweep)

3.6.2 Defining Accounting Entries for Event

You can indicate the accounting entries that should be passed at an event in the Accounting Entries section of the 'Events Class' screen. This section is invoked by clicking the 'Accounting Entries' button.

As part of the Accounting Entry details of an event, you should specify the following details:

- The accounting role
- The amount tag
- If a debit or a credit
- The transaction code

Accounting Role

If accounting entries are to be passed for an event, you have to indicate the different Accounting Roles. At an event in the life cycle of a deal, involving a product to which you associate the class, the appropriate entries will be passed under the specified Accounting Roles.

The adjoining option list displays a list of all the available accounting roles.

Amount Tag

The amount (i.e. the available balance, booking dated balance etc.) that is to be posted for an event, is referred to as the Amount Item. The tag associated with an Amount Item is the Amount Tag.

The adjoining option list displays a list of the amount tags that are maintained in the system. You can choose a tag by double clicking on it.

Debit/Credit

You have already specified the type of account to which an entry should be passed, and the tag which identifies the amount (available balance, booking dated balance etc.) that should be passed. In this field, you must indicate if the amount is to be debited from credited to the specified account. Choose the Debit or Credit indicator.

Transaction Codes

Every accounting entry in Oracle FLEXCUBE involves a Transaction Code that describes the nature of the entry. This code and its description will identify the original sweep book, reverse

booking and their corresponding reversals. The Transaction Code for both legs of the transaction would be the same.

The table below illustrates the accounting entries for each event that you need to set up for the liquidity management module.

Event	Debit/Credit Indicator	Accounting Role	Amount Tag
SWBK	DR	CHILD	CR_CONT
SWBK	CR	PARENT	CR_CONT
SWBK	CR	CHILD	DR_CONT
SWBK	DR	PARENT	DR_CONT
RVSW	DR	PARENT	CR_CONT
RVSW	CR	CHILD	CR_CONT
RVSW	DR	CHILD	DR_CONT
RVSW	CR	PARENT	DR_CONT

Refer to the Modularity User Manual for further information on setting up accounting details.

3.6.3 Associating Branch to Event Class

After you define the accounting entries that need to be passed for a set of events, you need to associate the event accounting entries to the branches of your bank.

You can invoke the 'ILM Branch Parameter Maintenance' screen by typing 'ILDBRPRM' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

For field details refer 'Associating Branch to Event Class' section in 'Maintaining Parameters for Integrated Liquidity Management' of IL module.

Note

Branch parameters maintained for IL modules is applicable for II module and the vice versa. Hence a single maintenance in any of the both modules is sufficient.

3.7 Group Code Maintenance

This section contains the following topics:

- [Section 3.7.1, "Maintaining Group Code"](#)
- [Section 3.7.2, "A"](#)

3.7.1 Maintaining Group Code

In Oracle FLEXCUBE, you can bring together several accounts to form a 'Group' for ILM processing. You can then link this group code to the Header Account maintained as part of Account Structure. In Oracle FLEXCUBE, group codes allow you to uniquely identify a given account structure for ILM processing.

You can invoke the 'Integrated Liquidity Management Group Code Maintenance' screen by typing 'IIDGRPCD' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

BVT Duration

Fields

Maker	Date Time:	Mod No	Record Status
Checker	Date Time:	Authorization Status	Exit

You can input the following details in this screen:

Group Code and Description

Enter a unique code to identify the group code in the system. Enter a brief description.

Effective Date

Specify the date from which the group will become active in the system. You will not be allowed to input Back Valued Dates (BVT) here.

Sweep Basis

You need to indicate if the sweep should be performed on Book Dated balance or Value Dated Balance for the entire structure falling under the group. . If BVT support is required, it must have 'Value Dated' option.

Pool Benefit

If you select this option, profit re-allocation is carried out for the child accounts involved in the group.

Reverse Sweep

Indicate whether reverse sweeps should be performed during BOD batch.

BVT Applicable

Specify if BVT processing is applicable for a group

BVT Unit

Indicate the unit the system should consider while calculating the BVT date. This can be Days/ Months

BVT Duration

This indicates the number of BVT units allowed as back period from today's date while calculating BVT date.

For instance, to indicate 30 Days input 'Days' as BVT Unit and '30' in the BVT Duration fields. Similarly, to indicate 2 months, the BVT Unit should be 'Months' and the BVT Duration '2'.

Note

- If the Sweep basis is Book Dated, back value dated transaction is not allowed.
 - While maintaining a new Group, the system validates if 'ILM Applicable' check box is checked at the branch level.
 - BVT is considered only from the same day, if it's posted on working day. If it is posted on a holiday, then the system considers BVT from the next working day. The same is applicable for BVT entries entered by the system to the account.
-

3.7.2 A**Note on Back Valued Transactions**

The system rebooks the sweeps (in case of physical pooling) and adjusts the profit amount that had been accrued and settled in the accounts when you input a transaction with a back value date. In case of a change in the Account Structure in the interim between the Back Value Transaction (BVT) date and current date, the system uses the account structure existing on the execution days.

The following points need to be kept in mind for BVT Processing:

- It is performed only for sweeps which are value based.
- The corresponding System Account active on the Effective Date is considered for a back valued transaction to an account. (BVT for Islamic ILM is considered only when it is a working day)

- The processing involves replaying the sweep from the least date of the BVT which means that the Contributions and Pool Balances of the System Accounts are calculated afresh. The balances in all accounts of the structure are reworked and the sweeps carried out again for each of the previous sweep having the same value date.
- The value dated balances of the Parent Account as well as the Child Accounts in the Account Structure are updated
- In Customer Account Statements, only the back value transaction will be available on the date that it was posted.

The system follows the following process for replaying sweeps:

1. It omits BOD processing for the least back value date only and continues till the current processing date. It then identifies the value dated balance of the current processing date for the corresponding System Account and carries out the EOD processing.
2. For a particular Effective Date, it calculates Sweep Amount for the corresponding System Accounts.
3. It fetches the entry posted for the BVT date from the Sweep Log and compares it with the Sweep Amount that has been calculated currently.
4. If the Sweep Amounts are equal, no entry is posted.
5. If the Sweep Amounts are different, it reverses the entry that was posted for the BVT date (SWBK) and the corresponding entry that was used during BOD to reverse the entry above
Reverse sweep booking (RSBK)
6. Reversal of Reverse Sweep (RSWR) entry gets posted during reversal of RVSW.
7. It inputs a new entry whose booking date is the processing date of the BVT and whose value date is the BVT date. This entry is entered into the Daily Log.
8. It then updates the post sweep balances for a combination of Account + Effective Date + System Account.

Note

Every time a physical sweep is executed, the system stores the credit balance and the unused OD limit in the Parent Account before and after the sweep.

3.8 Account Structures

This section contains the following topics:

- [Section 3.8.1, "Maintaining Account Structures"](#)
- [Section 3.8.2, "Indicating Account Details"](#)
- [Section 3.8.3, "Maintaining Sweeping Parameters"](#)
- [Section 3.8.4, "Closing Accounts in an Account Structure"](#)
- [Section 3.8.5, "Creating Group Account Linkages"](#)

3.8.1 Maintaining Account Structures

In Oracle FLEXCUBE, you can define a structure for the various accounts participating in the ILM process and set up a hierarchy for the accounts - establish the relationships or links among the accounts that are to be part of the Group.

You need to define the account structure and the hierarchy for ILM processing in the 'Islamic Account Structure' screen. You can invoke the 'Account Structure Maintenance' screen by

typing 'IIDSWEEP' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

You can define the following parameters as part of maintaining the account structure for ILM processing:

3.8.2 **Indicating Account Details**

Specify the following details.

Account

First, you need to specify the account (main or affiliate account) which has to be part of the account structure.

Account Type

You need to indicate whether the account that you have specified is a main account or secondary account. The account type defines the relationship between the accounts.

- Select the option 'Parent' to indicate that the account is the main account in the hierarchy.
- Select the option 'Child' to indicate that the account is a secondary account in the hierarchy.

You will not be able to link the accounts at the same level in an account structure.

If you de-link a parent account from a structure or link it to another parent in the same structure, the associated child accounts linked to it will also follow the parent account.

Effective Date

You need to indicate the date from which the account structure is available in the system for ILM processing.

Parent Account

This is applicable only if you are maintaining a child account. You need to indicate the parent account for the child here.

Note

You cannot link a child account to more than one parent account.

Booking Account

You need to indicate the account to which the profit amount is to be booked during profit reallocation (after Profit is calculated).

Note

The booking account linked to the account should have the same currency as the account.

Scheme

Indicate the type of structure for which the link is being defined. The following types are possible:

- Sweep: Indicates that the level of the structure is Sweep, in which movement of funds is physical.

Profit Reallocation

Check this option to allow profit to be re-allocated to child accounts based on their contribution.

3.8.3 Maintaining Sweeping Parameters

Specify the following details.

Sweep Type

This indicates the sweep type of the parent and child account. The sweep type can be either of the following:

- Debit (Sweep Out)
- Credit (Sweep In)
- Target Balance Agreement

Base Amount

The amount depends on the sweep type that you have selected.

- If the sweep type is Debit, the Amount indicates the balance in the account that should trigger a sweep out of funds. The sweep transaction will be executed if the balance in the account becomes greater than this amount.
- If the sweep type is Credit, the Amount indicates the balance in the account that should trigger a sweep in of funds. The sweep transaction will be executed if the balance in the account goes below this amount.
- If the sweep type is Target Balance, the Amount indicates the minimum balance that is to be left behind in the Child Account after the sweep is performed. A value of zero indicates Zero Balancing sweeps.

Multiples Amount

This indicates the multiples amount in which the system performs sweeps.

3.8.3.1 Validating Account Structure

The system validates the following for account structure:

- Account must not be linked to more than one Parent Account

- Account must not participate in another account structure with different header account
- There must not be any cyclic links in the structure
- Accounts that act as a Parent Account in the structure must be explicitly maintained with the account type as Parent
- Back Dated Structure Change is disallowed
- Accounts at the same level in the structure must not be linked
- If a Parent Account is delinked from a structure or linked to another parent in the same structure, then the Child Accounts linked to it must also be delinked or linked accordingly
- If 'Scheme' is maintained as 'Sweep', then the Parent Account and Child Account must be in the same currency
- Parent and Child Account in the account structure must be in the same fund ID
- Effective date of child must be greater than or equal to parent structure
- Base amount must not be assigned to parent structure

3.8.4 Closing Accounts in an Account Structure

The following steps explain how to close an account in a given account structure. Let us assume that, in the structure shown below, we need to close account P2 and attach account C2 directly to H1.

The steps to be followed for the closure are:

- Child Account C2 is closed first (You can query to find out the child accounts of a given parent account, say P2)
- Subsequently, account P2 is closed.
- Account C2 is now freshly linked with H1.

After the structure change has been carried out, the new structure appears as shown below:

In the new structure (i.e. after the change), account C2 will have a new 'System Account' associated with it.

Note

BVT is not applicable for a group if any of the account structure closes and BVT falls in that period.

3.8.5 Creating Group Account Linkages

You can link the account structure to the group codes that you have maintained in the 'Islamic Account Group Linkage Maintenance' screen. You can invoke the 'Account Group Linkage

Maintenance' screen by typing 'IIDGRPLN' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

Islamic ILM-Account Group Linkage

New

Enter Query

Account Branch *

Header Account *

Currency

Effective Date *

Group Code *

Fields

Maker	Date Time:	Mod No	Record Status
Checker	Date Time:	Authorization Status	Exit

In this screen, you need to specify the following:

Header Account

The system will display the parent accounts maintained as part of account structure maintenance. Select the account which you want to link to the group.

Effective Date

Indicate the date on which the structure under the group should come into effect.

Group Code

Indicate the group code to which you want to link the account structure.

3.8.5.1 Validating Group Account Linkages

The system validates the following for group account linkages:

- Modification of Account Group linkage is disallowed for an effective date
- If a record has to be closed, then the structure reporting to the group code must be validated. The structure must be linked to the new group code for the effective date greater than the closure date
- Group linkage effective date must be greater than or equal to Group code effective date
- Effective date of Account structure related to group linkage must be greater than or equal to linkage effective date

For example, the following structure may be defined for a Group Code 'GRP'

- **HACC** (Header Account)
- **PACC1** (Child to HACC)
- **CACC1** (Child to PACC1)
- **PACC2** (Child to HACC)

- **CACC2** (Child to PACC2)
- **CACC3** (Child to PACC2)

In the above structure, PACC2 is the Child Account in the link HACC – PACC2 whereas Parent Account in PACC2 – CACC.

4. Reports

4.1 Introduction

Reports provide details of various events in the life of a specific contract, or across contracts at a specific point of time. For every module in Oracle FLEXCUBE, you can generate reports. This chapter details out the reports that you can generate from Islamic Integrated Liquidity Management module of Oracle FLEXCUBE.

You can generate the following report for the Islamic Integrated Liquidity Management module:

- Account Structure Report

4.2 Account Structure Report

Account structure report provides information on the type of account and effective date of each account. You can set preferences as to generation of the report using 'Account Structure Report' screen. To invoke the screen, type 'ILRTQUERY' in the field at the top right corner of the Application tool bar and click the adjoining arrow button.

The screenshot shows a software window titled "Account structure Report". Inside the window, there are several input fields and controls. At the top left, there is a "Group Code" label. Below it, there are two radio buttons: "Single" (which is selected) and "All". To the right of these is a text input field for "Group Code". Below the radio buttons, there are two dropdown menus: "Report Format" (set to "PDF") and "Report Output" (set to "View"). To the right of these, there is another dropdown menu labeled "Printer At" (set to "Client") and a text input field for "Printer". At the bottom right of the window, there are two buttons: "Ok" and "Exit".

4.2.1 Report Options

You can set your preferences for report generation on this screen.

Group Code

Specify the group code for which you are generating the report. The option list displays all valid group codes maintained in the system. Choose the appropriate one.

Once you have specified the group code, click OK button. The system displays the print option screen. Here, you can set your preferences as to printing the report. Click OK button to print the report.

4.2.2 Contents of the Report

The contents of Account Structure report have been discussed under the following heads:

Header

The 'Header' carries the title of the report, branch code, branch date, user ID, module from which the report has been generated, date and time at which the report has been generated and the page number of the report.

Body

You can find the following details in the body of the report:

Field	Description
Branch Code	The code that identifies the branch.
Account	The account number for which the corresponding details are provided.
Account Type	The type of corresponding account.
Effective Date	The effective date of the corresponding account.

5. Annexure A - Accounting Entries

5.1 Accounting Entries for ILM

This Annexure lists the suggested event-wise accounting entries that can be set up, for the Interest and Charge product applicable for the Integrated Liquidity Management module of Oracle FLEXCUBE.

This chapter contains the following sections:

- [Section 5.2, "Events"](#)
- [Section 5.3, "Event-wise Accounting Entries for Products"](#)

5.2 Events

You need to set up the following events for a profit product:

Event Code	Event Description
ILIQ	Interest Liquidation
IACR	Interest Accruals
SWBK	Sweep Booking
RVSW	Reverse Sweep

5.3 Event-wise Accounting Entries for Products

You can set up various IP products for liquidity management. Some representative products are listed below:

- Pool Header Product – 'PHR1'
- Pool Reallocation Product – 'PLC1'

This section contains the following topics:

- [Section 5.3.1, "Pool Header Product"](#)
- [Section 5.3.2, "Pool Reallocation Product"](#)
- [Section 5.3.3, "Sweep and Reverse Sweep"](#)

5.3.1 Pool Header Product

To define a pool header product, you need to check 'ILM Product' check box in preference tab at Product level and select 'ILM Type' as 'Pool Lead'.

Consider the below accounting entries table for Pool Header product 'PHR1', which provides details about mapping of the accounting role to amount tag:

5.3.1.1 IACR: Interest Accrual

Accounting Entries

Accounting Role	Amount Tag	Dr/Cr Indicator
PHR1-PNL-1	IACR	Credit
PHR1-ACCR-1	IACR	Debit
PHR1-PNL_ADJ-1	IACR_ADJ	Credit
PHR1-ACR_ADJ-1	IACR_ADJ	Debit
PHR1-PNL-2	IACR	Debit
PHR1-ACCR-2	IACR	Credit
PHR1-PNL_ADJ-2	IACR_ADJ	Debit
PHR1-ACR_ADJ-2	IACR_ADJ	Credit

5.3.1.2 ILIQ: Interest Liquidation

Accounting Entries

Accounting Role	Amount Tag	Dr/Cr Indicator
PHR1-ACCR-1	ILIQ	Credit
PHR1-BOOK-1	ILIQ	Debit
PHR1-ACQUIRED-1	IACQUIRED	Credit
PHR1-BOOK-1	IACQUIRED	Debit
PHR1-ACQUIRED-2	IACQUIRED	Debit
PHR1-BOOK-2	IACQUIRED	Credit
PHR1-ACCR-2	ILIQ	Debit
PHR1-BOOK-2	ILIQ	Credit
PHR1-TPBL-3	TAX	Credit
PHR1-BOOK-3	TAX	Debit
PHR1-TPBL_ADJ-3	TAX_ADJ	Credit
PHR1-BOOK-3	TAX_ADJ	Debit

5.3.2 Pool Reallocation Product

To define a pool reallocation product, you need to check 'ILM Product' check box in preference tab at Product level and select 'ILM Type' as 'Pool Reallocation.' Also, you need to check the 'Reallocation through Header' check box.

Consider the below accounting entries table for Pool Reallocation product 'PLC1', which provides details about mapping of the accounting role to amount tag

5.3.2.1 **IACR: Interest Accrual**

Accounting Entries

Accounting Role	Amount Tag	Dr/Cr Indicator
PLC1-PNL-1	IACR	Debit
PLC1-ACCR-1	IACR	Credit
PLC1-PNL_ADJ-1	IACR_ADJ	Debit
PLC1-ACR_ADJ-1	IACR_ADJ	Credit
PLC1-PNL-2	IACR	Credit
PLC1-ACCR-2	IACR	Debit
PLC1-PNL_ADJ-2	IACR_ADJ	Debit
PLC1-ACR_ADJ-2	IACR_ADJ	Credit

5.3.2.2 **ILIQ: Interest Liquidation**

Accounting Entries

Accounting Role	Amount Tag	Dr/Cr Indicator
PLC1-ACCR-1	ILIQ	Credit
PLC1-BOOK-1	ILIQ	Debit
PLC1-ACQUIRED-1	IACQUIRED	Credit
PLC1-BOOK-1	IACQUIRED	Debit
PLC1-ACQUIRED-2	IACQUIRED	Debit
PLC1-BOOK-2	IACQUIRED	Credit
PLC1-ACCR-2	ILIQ	Debit
PLC1-BOOK-2	ILIQ	Credit
PLC1-TPBL-3	TAX	Credit
PLC1-BOOK-3	TAX	Debit
PLC1-TPBL_ADJ-3	TAX_ADJ	Credit
PLC1-BOOK-3	TAX_ADJ	Debit

5.3.3 Sweep and Reverse Sweep

5.3.3.1 SWBK: Sweep Booking

Accounting Entries

Accounting Role	Amount Tag	Dr/Cr Indicator
CHILD	CR_CONT	DR
PARENT	CR_CONT	CR
CHILD	DR_CONT	CR
PARENT	DR_CONT	DR

5.3.3.2 RVSU: Reverse Sweep

Accounting Entries:

Accounting Role	Amount Tag	Dr/Cr Indicator
PARENT	CR_CONT	DR
CHILD	CR_CONT	CR
CHILD	DR_CONT	DR
PARENT	DR_CONT	CR

6. Annexure B – IP Rule Set-up

6.1 Introduction

This Annexure lists the Profit and Charge (IP) rules that need to be maintained for the Integrated Liquidity Management module of Oracle FLEXCUBE. It also gives the UDEs and rates for which values need to be maintained.

This chapter contains the following sections:

- [Section 6.2, "IC Rule Maintenance"](#)
- [Section 6.3, "UDE Value Maintenance"](#)

6.2 IC Rule Maintenance

This section contains the following topics:

- [Section 6.2.1, "Maintaining IC Rule"](#)
- [Section 6.2.2, "Pool Header "](#)
- [Section 6.2.3, "Pool Reallocation "](#)

6.2.1 Maintaining IC Rule

The components required to calculate profit (the principal, period, and rate) are broadly referred to as 'Data Elements'. Data elements are of two types:

- System Data Elements (SDEs)
- User Data Elements (UDEs)

In addition to specifying how the SDEs and UDEs are connected through the formulae, you also define certain other attributes for a rule using the 'Profit and Charges Rule Maintenance'

screen. You can invoke this screen by typing 'IPDRLMNT' in the field at the top right corner of the Application tool bar and clicking the adjoining arrow button.

For details about the screen, refer the chapter 'Maintaining Interest Rules' in the Interest and Charges User Manual.

You can maintain rules for the following:

- Pool Header
- Pool Reallocation

6.2.2 Pool Header

Specify the following details:

On Account Opening Month

Check this box.

On Account Closure Month

Check this box.

SDE

Maintain the following SDEs:

- DAYS
- ILVD_UL_T_CR_BAL
- ILVD_UL_T_DR_BAL

UDE

You can maintain the following UDE:

MUDARABAH_RATE Type

For the UDE, select the option 'Rate' from the adjoining drop-down list.

Get Latest

For the UDE, select the option 'Use Effective' from the adjoining drop-down list.

Click 'Formulas' button and invoke the 'Formulas' screen.

The screenshot shows the 'Formulas' window in Oracle. The window title is 'Formulas'. The interface includes several sections:

- Formula Number:** A text input field.
- Debit/Credit:** A dropdown menu set to 'Debit'.
- Book Flag:** A dropdown menu set to 'Booked'.
- Days in a Month:** A dropdown menu set to 'Actual'.
- Periodicity:** A dropdown menu set to 'Daily'.
- Days in a Year:** A dropdown menu set to 'Actual'.
- Accruals Required:** A checked checkbox.
- Tax Category:** A text input field.
- Tax Description:** A text input field.
- Calculation Parameters:**
 - Basis Percent:** A text input field.
 - Local Currency Basis:** A checked checkbox.
- Booking:**
 - Book Tax To Expense Account:** A checked checkbox.
 - Tax Payable Currency Flag:** A dropdown menu.
- Basis Amount:**
 - Option:** A dropdown menu.
 - Method:** A dropdown menu.
 - Decimals:** A text input field.
 - Units:** A text input field.
- Tax Amount:**
 - Option:** A dropdown menu.
 - Method:** A dropdown menu.
 - Decimals:** A text input field.
 - Units:** A text input field.

At the bottom of the window, there is a 'Formula Wizard' button.

You need to maintain two booked and two tax formulae.

Formula 1 – being the debit formula

Specify the following details:

Book Flag

Select 'Booked' from the adjoining drop-down list.

Periodicity

Choose 'Daily' from the adjoining drop-down list.

Debit/Credit

Select 'Debit' from the adjoining drop-down list.

Days in a Month

Select 'Actuals' from the adjoining drop-down list.

Days in a Year

Select '365' from the adjoining drop-down list.

Accrual Required

Check this box.

Rounding Required

Check this box.

Click 'Formula Wizard' button and invoke the 'Formula Wizard' screen.

Specify the following expressions:

Case	Result
ILVD_UTL_DR_BAL>0	(ILVD_UL_T_DR_BAL*MUDARABAH_RATE*DAY)/36500

Formula 2 – being the credit formula

Specify the following details:

Book Flag

Select 'Booked' from the adjoining drop-down list.

Periodicity

Choose 'Daily' from the adjoining drop-down list.

Debit/Credit

Select 'Credit' from the adjoining drop-down list.

Days in a Month

Select 'Actuals' from the adjoining drop-down list.

Days in a Year

Select '365' from the adjoining drop-down list.

Accrual Required

Check this box.

Rounding Required

Check this box.

Click 'Formula Wizard' button and invoke the 'Formula Wizard' screen. In this screen, you need to maintain the following expressions:

Case	Result
------	--------

ILVD_UTL_CR_BAL>0	(ILVD_ULT_CR_BAL*MUDARABAH_RATE*DAYS)/36500
-------------------	---------------------------------------------

Formula 3 – being the tax formula for debit

Specify the following details:

Book Flag

Select 'Tax' from the adjoining drop-down list.

Periodicity

Choose 'Periodic' from the adjoining drop-down list.

Debit/Credit

Select 'Debit' from the adjoining drop-down list.

Days in a Month

Select 'Actuals' from the adjoining drop-down list.

Days in a Year

Select 'Actuals' from the adjoining drop-down list.

Rounding Required

Check this box.

Tax Category

Select 'TAXAPPLIC' from the adjoining drop-down list.

Basis Percent

Specify '100' as the basis percent.

Local Currency Basis

Check this box.

Tax Payable Currency Flag

Specify 'Local Currency' here.

Basis Amount Option

Select 'Currency Default' from the adjoining drop-down list.

Click 'Formula Wizard' button and invoke the 'Formula Wizard' screen. In this screen, you need to maintain the following expressions:

Case	Result
FORMULA1>0	ROUND(FORMULA1*HTAX_RATE/100,2)

Formula 4 – being the tax formula for credit

Specify the following details:

Book Flag

Select 'Tax' from the adjoining drop-down list.

Periodicity

Choose 'Periodic' from the adjoining drop-down list.

Debit/Credit

Select 'Credit' from the adjoining drop-down list.

Days in a Month

Select 'Actuals' from the adjoining drop-down list.

Days in a Year

Select '365' from the adjoining drop-down list.

Rounding Required

Check this box.

Click 'Formula Wizard' button and invoke the 'Formula Wizard' screen. In this screen, you need to maintain the following expressions:

Case	Result
FORMULA2>0	ROUND(FORMULA2* HTAX_RATE / 100,2)

6.2.3 Pool Reallocation

Specify the following details:

On Account Opening Month

Check this box.

On Account Closure Month

Check this box.

SDE

Maintain the following SDEs:

- DAYS
- ILVD_CP_CR_CONT
- ILVD_CP_DR_CONT
- ILVD_NCP_CR_CONT
- ILVD_NCP_DR_CONT

UDE

You can maintain the following UDE:

MUDARABAH_RATE Type

For the UDE, select the option 'Rate' from the adjoining drop-down list.

Get Latest

For the UDE, select the option 'Use Effective' from the adjoining drop-down list.

Click 'Formulas' button and invoke the 'Formulas' screen. You need to maintain two booked and one tax formulae.

Formula 1 – being the debit formula

Specify the following details:

Book Flag

Select 'Booked' from the adjoining drop-down list.

Periodicity

Choose 'Daily' from the adjoining drop-down list.

Debit/Credit

Select 'Debit' from the adjoining drop-down list.

Days in a Month

Select 'Actuals' from the adjoining drop-down list.

Days in a Year

Select '365' from the adjoining drop-down list.

Rounding Required

Check this box.

Click 'Formula Wizard' button and invoke the 'Formula Wizard' screen. You need to maintain three booked and three non-booked formulae.

Formula 1

Specify the following expression:

Case	Result
$(ILVD_CP_DR_CONT + ILVD_NCP_DR_CONT) > 0$	$((ILVD_CP_DR_CONT + ILVD_NCP_DR_CONT) * MUDARABAH_RATE * DAYS) / 36500$

Formula 2 – being the credit formula

Specify the following details:

Book Flag

Select 'Booked' from the adjoining drop-down list.

Periodicity

Choose 'Daily' from the adjoining drop-down list.

Debit/Credit

Select 'Credit' from the adjoining drop-down list.

Days in a Month

Select 'Actuals' from the adjoining drop-down list.

Days in a Year

Select '365' from the adjoining drop-down list.

Rounding Required

Check this box.

Click 'Formula Wizard' button and invoke the 'Formula Wizard' screen. In this screen, you need to maintain the following expressions:

Case	Result

(ILVD_CP_CR_CONT + ILVD_NCP_CR_CONT) > 0	((ILVD_CP_CR_CONT + ILVD_NCP_CR_CONT) * MUDARABAH_RATE* DAYS) / 36500
-----------------------------------------------	-----------------------------------------------------------------------------

Formula 3 – being the tax formula for debit

Specify the following details:

Book Flag

Select 'Tax' from the adjoining drop-down list.

Periodicity

Choose 'Periodic' from the adjoining drop-down list.

Debit/Credit

Select 'Debit' from the adjoining drop-down list.

Days in a Month

Select 'Actuals' from the adjoining drop-down list.

Days in a Year

Select '365' from the adjoining drop-down list.

Rounding Required

Check this box.

Click 'Formula Wizard' button and invoke the 'Formula Wizard' screen. In this screen, you need to maintain the following expressions:

Case	Result
FORMULA2>0	ROUND(FORMULA2* CTAX_RATE / 100,2)

6.3 UDE Value Maintenance

You can maintain UDE values for the rules using the 'Profit & Charges User Data Element Maintenance' screen. You can invoke the 'Profit & Charges User Data Element Maintenance'

screen by typing 'IPDUDVAL' in the field at the top right corner of the Application tool bar and clicking the adjoining arrow button.
