1.1 **FCUBS Application Remote Deployment**

1. Launch Oracle FLEXCUBE Universal Banking Solution Installer.

![Oracle FLEXCUBE Universal Banking Installer](image)

Enter the following details

**JDK Path:**
Provide Home folder path of JDK1.7

**Oracle Home**
Provide home folder path of Oracle Client or Database

**Application Server Home**
Provide home folder path of Application Server

**Application Server Location**
Select location of the application server as Remote
2. Click on ‘Next’ and the following screen is displayed:

4. Click ‘Next’ and the following screen is displayed:

5. Select ‘Deploy Application’.

6. Specify the following details:
Release

Select the release in which you are installing the FCUBS application. Select the appropriate one from the adjoining drop-down list.

Server’s Operating System

Select the server’s operating system in which you are installing the FCUBS application. Select the appropriate one from the adjoining drop-down list.

Application Server

Select ‘Weblogic’ from the adjoining drop down list.

Database Server

Select the database server in which you are installing the FCUBS application. Select the appropriate one from the adjoining drop-down list.

7. Once you have specified all the details, click ‘Next’ and the following screen is displayed:

8. Specify the following details:

**EAR Path**

Specify the location. You can use the directory button to browse and select the directory.

- The Application EAR path cannot be copied and pasted on to the text box, thereby demanding the use of the browse button to the select the EAR.
Property File Path

If the property file is internal to the application EAR, it gets displayed here on selection of EAR path. If the property file is external, specify the location. You can use the directory button to browser and select the directory.

Below three fields are disabled in remote application server option.

   Application Name
   Application Context
   Manage Resources

9. Click ‘Next’ and wait few seconds for installer to prepare the files for remote deployment. The following message is displayed once the preparation is successful.

![Copy the folder](image)

10. Please copy the files from the location (Remote folder) shown in message box and place in the machine where the target application server is installed. The content of the remote folder looks as below
11. Launch FCUBS Deployer by double clicking FcubsDeployInstaller.bat (windows OS) or FcubsDeployInstaller.sh (linux OS)
12. Enter JAVA HOME, and ORACLE HOME location when prompted. The installer will get launched and it will show below screen.
13. Select the application Server home directory and click ‘Next’
14. The above message will be displayed. Click Ok to restart FCUBS installer.
15. Click Next
From this step onwards refer appropriate deployment document as per application server and FCUBS component

For example:

If your appserver is webpshere and application is Gateway then refer the document “Gateway_Application_Deployment_Websphere”

Note: EAR file will be under Remote directory itself, this should be selected for deployment.
