1. Creating Property File for Standalone scheduler

1.1 Introduction

This chapter explains the steps to create property file for Standalone Scheduler.

1.2 Creating Property File

To create the property file for Oracle FLEXCUBE, follow the steps given below:

1. Launch Oracle FLEXCUBE Universal Banking Solution Installer. Select ‘Property File Creation’ option and Click ‘Next’ button.

2. Select ‘Scheduler’ component and appropriate plugin if needed and click ‘Next’ button.
3. The below Screen accepts EAR name, Conext Name, Application Server Path, Source Path and EAR Destination path. Enter the valid data and select File Seperator Style and application server from drop down.
4. Click on ‘Next’ button to navigate to below Screen.

5. Below shown Screen contains:

   **Release**

   Select the release from the adjoining drop down list.

   **Hashing Algorithm Iteration Count** and **Security key for encryption logic** should be entered which will be used for encryption.
6. Click on ‘Next’ button to proceed to DataSource Screen.

7. Enter JNDI value for the Datasources enabled and click on Next button.
1.2.1 Setting General Properties

This section describes the process of setting common properties of Standalone Installer.

1. The installer displays the ‘General Properties’ screen.
Specify the following details:

**Debug Logs Required**

If you require debug option, select ‘Yes’ from the drop-down list. If you do not require debug option, select ‘No’.

**Work Area**

Specify the work area.

For example: D:\BrnDbgs\n
**Signature Path**

Specify the location at which the signature images are placed.

**Excel Path**

Specify the location at which the excel files are generated.

**Request Time Out**

Specify the database request timeout value in milli seconds. This is the maximum number of seconds the database waits for a query to return the result.
**Connection Time Out**

Specify the database connection timeout value in seconds. This is the maximum number of seconds the application waits for a connection to the database to open.

**Session Time Out**

Enter the session time out value in seconds. This is the maximum number of seconds during which the application gets active without any user intervention. If there is no user intervention continuously for the duration specified here, the user session gets expire.

**LOV Fetch Required**

If you check this box, the option lists in Oracle FLEXCUBE displays the matching values based on the first characters that you enter in a field. If you specify the first three characters of a value to be entered in an option list and tab out, the system displays the complete list of values that are matching the first three characters.

If you do not check this, option lists does not show the matching values based on the first few characters. You need to specify the complete value against the field.

**CSS style**

Select Default or Custom from dropdown. By Default CSS Style name will be ‘flexblue’.

**Language**

Select language from the dropdown.

Version and Copyright are other general properties.

Click on Next button, once all the property details are entered.

**1.2.2 Single Sign on**

Only ‘OPSS Available’ option will be enabled for Scheduler. Select the option if needed.
1.2.3 **SMTPS Details**

SMPTS mail configuration is enabled for Scheduler.

Specify the below details:

Host: Specify the SMTP host name.

User ID: Specify the user ID.

User Password: Specify the user password.

JNDI Name: Specify the JNDI name.
1.2.4 Configuring Scheduler Queues

This section describes the method to configure scheduler Queues.

1. System displays the following screen:
**Notify Destination**

Specify the notify destination. Select one of the following options:

- QUEUE
- TOPIC

**Queue Name**

Set ‘NOTIFY_DEST_QUEUE’ as the destination queue name.

**Queue Connection Factory**

Set ‘NotifyDestQCF’ as the queue connection factory.

**Secure**

Check this box to indicate that it is a secured queue connection factory. If you check this box, the caller ID and caller password will be enabled.

**Caller ID**

Specify the caller ID for the secured queue connection factory.

**Caller Password**

Specify the password for the caller ID to access the secured queue connection factory.
If the queue connection factory is not secured, i.e., if you have not checked the box ‘Secure’, the installer will not display the fields ‘Caller ID’ and ‘Caller Password’. You need not provide these details in that case.

**Notify Queue Location**

Specify the notify queue location. Select one of the following options:

- Internal
- External

For Oracle WebLogic application server, the notify queue location should be selected as ‘Internal’.

If you choose ‘External’ following details for the external queue will be enabled

**Provider URL**

Specify the provide URL (iiop://localhost:1010).

1010 is the default IIOP port.

<table>
<thead>
<tr>
<th>Application Server</th>
<th>EMS Out Initial Context Factory</th>
</tr>
</thead>
<tbody>
<tr>
<td>Oracle WebLogic</td>
<td>t3://&lt;ip_address&gt;:port</td>
</tr>
<tr>
<td></td>
<td>For example: t3://10.10.10.10:1010</td>
</tr>
<tr>
<td></td>
<td>Here, 10.10.10.10 represents the local host and 1010 to the target server default port (AdminServer/ManagedServer).</td>
</tr>
<tr>
<td>IBM WebSphere</td>
<td>iiop://&lt;ip_address&gt;:port</td>
</tr>
<tr>
<td></td>
<td>For example: iiop://10.10.10.10:1010</td>
</tr>
<tr>
<td></td>
<td>Here, 1010 represents the default iiop port</td>
</tr>
</tbody>
</table>

**Security Principal**

Specify the login ID to access the application server.

**Security Credentials**

Specify the password to access the application server.

Click ‘Next’ to proceed with scheduler configuration.

**Notify Deffered Queue Name**

Set ‘DEFFERED_DEST_QUEUE’ as the notify differed queue name.
Deffered Queue Connection Factory
Set ‘DefferedDestQcf’ as the deffered queue connection factory.

Secure
Check this box to indicate that it is a secured deffered queue connection factory. If you check this box, caller ID and caller password will be enabled.
Specify the caller ID and caller password for the secured deferred queue connection factory.

Notify Queue Name
Set ‘NOTIFY_QUEUE’ as the notify queue name.

Dead Letter Queue Name
Set ‘NOTIFY_QUEUE_DLQ’ as the dead letter queue name.

Notify Queue Connection Factory
Set ‘NOTIFY_MDB_QCF’ as the notify queue connection factory.

Secure
Check this box to indicate that it is a secured notify internal Queue. If you check this box, caller ID and caller password will be enabled. Specify the caller ID and caller password for the secured notify queue connection factory.

2. Click ‘Next’ and the following screen is displayed:
Specify the following details:

**Incoming Dead Letter Queue Name**

Set 'EMS_QUEUE_DLQ' as the incoming dead letter queue name.

**Incoming Backup Queue Name**

Set 'EMS_QUEUE_BACK' as the incoming backup queue name.

**Incoming Queue Connection Factory**

Set 'EmsQcf' as the incoming queue connection factory.

**Secure Incoming Queue Connection**

Check this box to indicate that it is a secured queue connection.

**Incoming Queue Caller ID**

Specify the caller ID for the secured queue connection.

**Incoming Queue Caller Password**

Specify the caller password for the secured queue connection.

**Outgoing Dead Letter Queue Name**

Set 'EMS_QUEUE_DLQ' as outgoing dead letter queue name.
**Outgoing Queue Connection Factory**

Set ‘EmsQcf’ as the outgoing queue connection factory.

**Secure Outgoing Queue Connection**

Check this box to indicate that it is a secured outgoing queue connection.

**Outgoing Queue Caller ID**

Specify the caller ID for the secured queue connection.

**Outgoing Queue Caller Password**

Specify the caller Password for the secured queue connection.

**Outgoing Queue Provider URL**

Specify the URL of the outgoing queue.

**Queue Principal**

Specify the queue principal.

**Queue Credential**

Specify the queue credential.

**Incoming Queue Name**

Specify the incoming queue name.

**Outgoing Queue Name**

Specify the outgoing queue name.

**SFMS Incoming Queue**

Specify the SFMS Incoming Queue.

**RTGS Incoming Queue**

Specify the RTGS incoming Queue.

**EMS Bulker Queue**

Specify the EMS Bulker Queue.

Once you have specified the above details, click ‘Next’ and system displays the next screen.
1.2.5 Setting EMS FTP/FTPS Properties

Specify the following details:

**File Transfer Mode FTPS**

Specify the mode of transferring files to EMS. Select one of the following:

- FTPS
- SFTP
- HTTP

**Server**

Specify the server IP address for the selected file transfer mode.

**User ID**

Specify the user ID to access the server of the file transfer mode.

**Password**

Specify the password to for the above user ID.

**File Type**

Specify the type of file that is transferred. By default, the Installer sets it as `.txt`. 
**SWIFT Message Delimiter**
Select check box if needed.

**SWIFT Message Terminator**
Select check box if needed.

**Media**
Specify the Media

**Signature Block**
Check this box to enable signature block.

**Keystore File Name**
Specify the keystore file name.

**Keystore Alias Name**
Specify the keystore alias name.

**Keystore Password**
Specify the keystore password.

Once you have specified the above details, click ‘Next’ and system displays the next screen.

### 1.2.6 Setting BIP/GI Upload Queue

This screen describes how to create the property file. Here, you need to set the BIP and BIP Advice report details.

1. System displays the following screen:
Specify the following details

**BIP Queue Name**

Specify the BIP queue name as ‘INTERNAL_BIPREPORT_QUEUE’.

**BIP DeadLetter Queue Name**

Specify the BIP deadletter queue name as ‘INTERNAL_BIP_QUEUE_DLQ’.

**BIPAdvice Queue Name**

Specify the BIP advice queue name as ‘INTERNAL_BIPADVREPORT_QUEUE’.

**BIPAdvice DeadLetter Queue Name**

Specify the BIP advice dead letter queue name as ‘INTERNAL_BIP_ADVICE_QUEUE_DLQ’.

**Queue Connection Factory**

Specify the queue connection factory as ‘BIPQCF’.

**Secure**

Check this box to indicate that it is a secured deferred queue connection factory. The caller ID and caller password will be enabled.

Specify the caller ID and caller password for the secured queue connection factory.
Enter these values for GI Upload Queue.

**Queue Name**

Specify the queue name as ‘INTERNAL_GI_UPLOAD_QUEUE’.

**Dead Letter Queue Name**

Specify the dead letter queue name as ‘INTERNAL_GI_UPLOAD_DLQ’.

**Queue Connection Factory**

Specify the queue connection factory as ‘GI_UPLOAD_QCF’.

**Secure**

Check this box to indicate that it is a secured deferred queue connection factory. The caller ID and caller password as shown in the following screen:

Specify the caller ID and caller password for the secured queue connection factory.

Once you have specified the above details, click ‘Next’ and system displays the next screen.

### 1.2.7 Setting Report Properties

This section describes the methods to set report properties.

1. System displays the following screen:
Specify the following details:

**Server End Point**

Specify the BIP end point.

However, you need to change the IP and port where BIP Application is installed. WSDL URL gets modified based on “BIP Server Version” on selecting the required version from the dropdown.

**Name Space**

Specify the BIP name space.

By default, the installer displays ‘http://xmlns.oracle.com/oxp/service/PublicReportService’.

**User Name**

Specify the BIP user name. By default, the Installer displays ‘Administrator’.

**Password**

Specify the password for the above user name. By default, the Installer sets it as ‘Administrator’.

**Reports Spool Path**

Specify the reports spool path. By default, the Installer displays /ReportsSpool

**Advice Type**

Specify the advice type. You can choose one of the following:

- **NATIVE** - This advice type is used for generating advices in text format
- **BIP** - This advice type is used for generating advices in PDF format.

**BIP Server Version**

Specify the qualified BIP server version. You can select the appropriate one from the adjoining drop-down list - 10g/11g/12c

**BIP Time Zone**

Specify the time zone of the BIP server.

If you have selected BPEL Enabled option, then you need to set the BPEL properties.

2.  Set the BPEL properties.
Specify the following details:

**Factory Initial**

Specify the factory initial.

**Provider URL**

Specify the URL of the server. Enter the IP address, target server port (AdminServer/ManagedServer) and the context root.

**Security Principal**

Specify the user name to access the application server where BPEL is installed.

**Security Credential**

Specify the password for the above user name.

**Soa Partition Name**

Specify the Soa Server Name. By default it will be the Installer sets it to ‘default’.

**Domain Password**

Specify the domain password for which SOA server is extended

**Dedicated Connection**

Check this box to indicate that this connection is not used for other purposes.
BPEL Realm Name
Specify the BPEL realm name.

BAM URI
Specify the BAM URI.

BPM Installed
Check this box if the BPM is installed.

BI User
Specify the BI user.

BI Password
Specify the password for BI user.

External Alerts Required
Check this box to enable External Alerts Required.

Enabling Load Balance
Check this box to enable BPEL load balance.

Frequency
Specify the balance load frequency.

Task Counts
Specify the balance load task count.

Cut-off Time
Specify the balance load cut-off time.

Once you have specified the above details, click 'Next' and system displays the next screen.

1.2.8 Setting ELCM Properties
If you have selected ELCM required option, then you need to set the ELCM properties.
ELCM Application Name
Specify the ELCM application Name.

Provide URL
Specify the provide URL

Security Principal
Specify the login ID to access the application server.

Security Credentials
Specify the password to access the application server.

1.2.9 Saving Property File
After completing all the required settings explained above, you need to save the property file.
1. Save the property file.
2. You can view the status of property file creation in the above screen. Once the file is saved, the installer displays the following message:

![Message dialog with text: Property File saved successfully]

Two property files: fcubs.properties and scheduler.properties are saved.

3. If you do not use the ‘Save’ or Save As’ buttons, the installer will save the properties file in ‘<InstallerSources>\config\PropertyFiles’ folder. In that case, you will see the message below.

![Message dialog with text: Property File will be saved in D:Installer12.0/config/PropertyFiles Folder...]

This completes the properties file creation.
