## 2. *Murabaha* Corporate Islamic Financing

Oracle FLEXCUBE facilitates Corporate Islamic Financing through a process flow. The process of Corporate Murabaha Contract Creation gets initiated when a bank purchases the asset from a vendor on request from the client. The bank then sells the asset to the client on deferred payment basis with mutually agreed profit added to the cost of the asset. The deferred price may be more than the cash price, but it must be fixed at the time of the sale.

This chapter contains the following topics:

- [Section 2.1, "Process Flow Diagram"](#)
- [Section 2.2, "Process Matrix"](#)
- [Section 2.3, "Stages in Corporate Islamic Financing Process Flow"](#)
- [Section 2.4, "Corporate Islamic Financing Application Details"](#)
- [Section 2.5, "Manual Liquidation"](#)

## 2.3 Stages in Corporate Islamic Financing Process Flow

Murabaha process flow uses Oracle BPEL framework with multiple human tasks for workflow stages. The capture and enrichment of information in multiple steps can be dynamically assigned to different user roles, so that multiple users can take part in the transaction. Oracle Business rules are used for dynamic creation of multiple approval stages.

Following are the steps followed while processing Corporate Murabaha Financing Transaction Initiation:

# Step 1. Financing Transaction Initiation

In the application entry stage, you can initiate the Murabaha contract and capture the requested details. The system populates the applicants details maintained. You can capture the purchase details of the asset in the Purchase Details tab. The system defaults the Asset type from the product. Click 'Multiple Asset' button to enter the details about the asset. You can pull Lead data and simulate application details. You can attach interactions to the application and upload the documents maintained for this stage.

The screenshot displays the 'LBL\_MUDARABAH\_TEMPLATE' application form. It is divided into several sections:

- Top Section:** Contains fields for 'Workflow Reference #', 'Application Number \*', 'Applicant Branch \*', 'Application Date \*', 'Application Category \*', 'Application Type' (with a dropdown menu showing 'Mudarabah' and 'Default'), 'Asset Type' (with a dropdown menu showing 'Home'), 'Priority' (with a dropdown menu showing 'Low'), 'Stage', 'Sub-Stage', 'Status' (with a dropdown menu showing 'Initiated'), 'Priority' (with radio buttons for 'High', 'Medium', and 'Low'), and 'User Reference \*'.

The underwriter arrives at the interest rate, tenor and the charges, based on the evaluation of the application with details and analysis performed so far. The Underwriter prepares the final credit recommendation summary that will include all aspects of

the deal like borrower details, finance details, underwriting details, pricing, justification for recommendation and final term sheet.

The screenshot displays the 'LBL\_MUDARABAH\_TEMPLATE' application form. It is divided into several sections: 'Workflow Reference #' at the top left; 'Application Number\*', 'Applicant Branch\*', 'Application Date\*', and 'Application Category\*' in the middle left; 'Application Type' (set to 'Mudarabah') and 'Asset Type' (set to 'Home') below that.
