1. Preface

1.1 Introduction

This manual is designed to explain the Term Deposits (TD) module of Oracle FLEXCUBE. It provides an overview to the module, and provides information on using the Term Deposits module of Oracle FLEXCUBE.

You can further obtain information specific to a particular field by placing the cursor on the relevant field and striking <F1> on the keyboard.

1.2 Audience

This manual is intended for the following User/User Roles:

| Role | Function |
|---------------------------------------|--|
| Back office managers/officers | Authorization functions |
| Product Managers | Product definition and authorization |
| End of day operators | Processing during end of day/ beginning of day |
| Financial Controller/Product Managers | Generation of reports |

1.3 Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

1.4 Organization

This manual is organized into the following chapters:

| Chapter | Description |
|------------------|---|
| Chapter 1 | <i>About this Manual</i> acquaints you quickly with the organization, audience, glossary of icons and related documents for this User Manual. |
| Chapter 2 | <i>Term Deposits - An Overview</i> offers a brief insight into the TD module and lists out the salient features. |
| Chapter 3 | <i>Term Deposit Maintenance</i> explains the maintenances required for creating and servicing TDs. |
| Chapter 4 | <i>TD Account</i> gives details about how to create a TD account. |
| Chapter 5 | <i>TD Additional Details</i> gives information about the additional information that can be captured while creating a TD. It also explains the procedure to maintain instructions for operating a TD. |
| Chapter 6 | <i>TD Operations</i> explains the operations you can perform on a TD. |

| | |
|-------------------|---|
| Chapter 7 | <i>RD Operations</i> explains the operations you can perform on a recurring deposit. |
| Chapter 8 | <i>Reports</i> - provides a list of reports that can be generated in this module and also explains their contents. |
| Chapter 9 | <i>Annexure A - Accounting Entries</i> lists the suggested event-wise accounting entries that can be set up, for the Interest and Charge product applicable for the TD module of Oracle FLEXCUBE. |
| Chapter 10 | <i>Annexure B – IC Rule Set-up</i> lists the Interest and Charge (IC) rules that need to be maintained for the TD module of Oracle FLEXCUBE. It also gives the UDEs and rates for which values need to be maintained. |
| Chapter 11 | <i>Function ID Glossary</i> has alphabetical listing of Function/Screen ID's used in the module with page references for quick navigation. |

- Settlements User Manual
- Core Entities User Manual

1.6 Glossary of Icons

This User Manual may refer to all or some of the following icons:

| Icons | Function |
|---|-----------------|
|  | Exit |
|  | Add row |
|  | Delete row |
|  | Option List |

2. Term Deposits - An Overview

2.1 Introduction

A Term Deposit (TD), also known as 'fixed deposit' is a deposit that is held at a financial institution for a fixed term. A fixed deposit account allows customers to deposit money for a set period of time, thereby earning a higher rate of interest in return. These are of varying maturities ranging anywhere from a day or a month to a few years. When a term deposit is placed, the lender (the customer) understands that the money can only be withdrawn after the term has ended and in case of premature withdrawal, the financial institution can levy a penalty. In some cases, the customer may be required to give notice of withdrawal of term deposit (in that case termed as 'notice deposits'). When the term is over, the deposit can be withdrawn or it can be held for another term, partly or fully. Generally speaking, the longer the term the better is the yield on the money.

Some banks put conditions like minimum amount of deposit and in multiples of specific units of amount. For e.g. the minimum deposit amount is Euro. 100 and deposits can be made in multiples of Euro 10. Banks may allow full or partial withdrawal of amount. Customers can place TD as collateral while availing loan facility or while availing Letters of Credit/Guarantee facility from the bank.

Recurring Deposit (RD) is an account where the lender/customer deposits a fixed amount of money every month for a fixed tenure (generally ranging from one year to five years). This scheme is meant for investors who want to deposit a fixed amount every month, in order to get a lump sum after some years. The small monthly savings in the Recurring Deposit scheme enable the lender to accumulate a handsome amount on maturity. Interest at TD rates is computable on monthly or quarterly compounded basis.

Dual Currency Deposit (DCD) is a short-term currency-linked deposit that allows the lender to earn a higher interest rate than regular TD. The bank provides the customer/lender with a 'yield enhancement' over and above the normal TD rate. In return, the bank has the right to convert the deposit currency into a linked currency at the pre-determined conversion rate on the fixing date. The fixing date may be few (for instance 2) working days prior to deposit maturity. Thus, at maturity, the lender shall receive the principal and interest in either the deposit currency or the linked currency, whichever is weaker. In other words, while taking the deposit the bank also buys a currency option from the depositor and the enhanced interest is the premium the bank pays for this option.

2.2 Term Deposit in Oracle FLEXCUBE

In Oracle FLEXCUBE, you can create and service a deposit (TD, RD and DCD) either through the TD module or by using the Savings (Teller/Branch) module.

This section contains the following topics:

- [Section 2.2.1, "Salient Features"](#)
- [Section 2.2.2, "Pre-requisites for TD Processing"](#)

2.2.1 Salient Features

The salient features of TD module are listed below:

- Automation - Accounting, collateral tracking, rollover handling and accounting, and tracking of unclaimed deposits are completely automated. This means your staff with the treasury department can remain focused on customer service.

- Multi Mode Pay-in - TD can be funded using multiple pay-in modes. You can choose any combination of the following pay-in modes:
 - Pay in by transfer from GL
 - Pay-in by Savings Account
 - Pay-in by Cash (Only from Savings module)
 - Pay-in by Cheque
- Multi Mode Pay-out – In case of automatic and manual redemption, a TD can be redeemed using multiple pay-out modes. You can choose any combination of the following pay-out modes:
 - Pay-out by Banker's Cheque
 - Pay-out by International Payment to any account specified by the customer
 - Pay-out by child TD creation – wherein another TD is created using the maturity amount
 - Pay-out by transfer to GL
 - Pay-out by cash (Only from Savings module)
 - Pay-out by Demand Draft
 - Pay-out by Local Payment
- Simulation – The TD module offers a simulation tool wherein a TD can be simulated to enhance sales and service aspects to new/existing customers.

You can also generate a TD Certificate.

2.2.2 Pre-requisites for TD Processing

To handle a term deposit in Oracle FLEXCUBE, you need to:

1. Set up a suitable account class
2. Set up an IC rule
3. Set up a suitable IC product
4. Maintain UDE + Account Class combination
5. Define IC rates
6. Define floating interest rates
7. Maintain a term deposit account
8. Define Interest 'Conditions' and other parameters for the deposit account
9. Maintain Pay-in and Close out mode parameters

This manual explains how you can create and service a deposit through the TD Module.

For details about TD creation using Branch, you may refer the Savings User Manual.

3. Term Deposit Maintenance

3.1 Introduction

This chapter contains the following sections:

- [Section 3.2, "Pay-in Parameters"](#)
- [Section 3.3, "Closing Mode"](#)
- [Section 3.4, "Account Class for TD "](#)
- [Section 3.5, "Interest Preferences for TD"](#)
- [Section 3.6, "Floating Interest Rates"](#)
- [Section 3.7, "Pre-closure Factor Maintenance"](#)

3.2 Pay-in Parameters

This section contains the following topics:

- [Section 3.2.1, "Maintaining Pay-in Parameters"](#)
- [Section 3.2.2, "Specifying UDF Values"](#)
- [Section 3.2.3, "Validations for Pay-in Accounts"](#)
- [Section 3.2.4, "Viewing Pay-in Parameters Summary"](#)

3.2.1 Maintaining Pay-in Parameters

In case you have specified that the TD Pay-in be done by GL, you need to maintain the GL details through the 'Term Deposit Payin Parameters Maintenance' screen. You can also invoke this screen by typing 'STDTDPAY' in the field at the top right corner of the Application tool bar and clicking the adjoining arrow button.

|--------------------------|----------------------------|--------------------------|
| Input By Date Time | Authorized By Date Time | Modification Number |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |

To link appropriate GLs in case the pay in option chosen is pay in by GL, you need to maintain the following details:

Branch Code

Specify the branch code for which you want to maintain payin parameters. The adjoining option list displays all valid branch codes maintained in the system. You can select the appropriate one.

Pay-in Option

Select the pay-in option from the adjoining drop down list. The options available are:

- Pay-in by GL - While creating a TD, if the pay-in option is specified as GL then GL maintained at STDTDPAY should be selected. If the offset account for pay-in is not specified then GL account maintained in STDTDPAY is defaulted, thus creating a TD.
- Pay-in by Cash - While creating a TD, if the pay-in option is specified as Cash (created through TDMM) and the offset account for pay-in is not specified then the system debits the GL account specified in 'TD Pay In Parameters', thus creating a TD.

General Ledger Code

Specify the GL code that should be picked up the system for the TD pay in. The adjoining option list displays all valid GLs maintained in the system. You can select the appropriate one.

3.2.2 Specifying UDF Values

All User Defined Fields (UDFs) linked to the function ID 'STDTDPAY' are displayed in the 'User Defined Fields' screen. Invoke this screen by clicking 'Fields' button on the 'Term Deposits Payin Parameters Maintenance' screen.

| Field Name | Value | Value Description |
|------------|-------|-------------------|
|------------|-------|-------------------|

Here you can specify values for each UDF.

Refer the User Manual titled 'User Defined Field' for details about defining UDFs.

3.2.3 Validations for Pay-in Accounts

System performs the following validations on pay-in accounts during TD account 'Save' stage (accounting entry passing stage):

- When a deposit account is created or topped-up with the pay-in from a CASA account, if the account does not have funds but has a limit line attached to the account, then the deposit amount is taken from the limit attached the account. In this case, during save, system displays the configurable override message, "The limit amount attached to the account is used for deposit pay-in".

- If the deposit is opened using the funds from a CASA account which does not have sufficient funds and the limit line attached to the CASA account is expired, then on save, system displays an override message, “The pay-in account does not have sufficient balance to open the deposit account and the limit line attached to the account is expired.”
- When a deposit account is created or topped-up with the pay-in from a CASA account, if the account does not have funds but has a limit line attached to the account, and after considering the limit, if the funds are still insufficient, then during save, system displays the configurable override message, “Insufficient funds to open the deposit account' should be displayed during save to the user.”

3.2.4 Viewing Pay-in Parameters Summary

You can view summary of all payin parameters using the ‘Term Deposit Payin Parameters Summary’ screen. To invoke this screen, type ‘STSTDPAY’ in the field at the top right corner of the Application tool bar and click the adjoining arrow button.

You can query on records based on any one or all of the following criteria:

- Authorization Status
- Record Status
- Branch Code
- Payin Option

Click ‘Search’ button. The system identifies all records satisfying the specified criteria and displays the following details for each one of them:

- Authorization Status
- Record Status
- Branch Code
- Payin Option

Double click on a record to invoke the detailed screen for that record.

3.3 Closing Mode

This section contains the following topics:

- [Section 3.3.1, "Maintaining Closing Mode"](#)
- [Section 3.3.2, "Specifying UDF Values"](#)
- [Section 3.3.3, "Viewing Closing Modes Summary"](#)

3.3.1 Maintaining Closing Mode

When you close an account the system checks whether any Interest/Charge (IC) products linked to the account are pending liquidation. If the account does not have any IC products pending liquidation the system will display list of 'Close Out' modes to facilitate account closure. You can maintain the closing modes using 'Term Deposit Closing Mode Maintenance' screen. To invoke this screen, type 'STDCLOSE' in the field at the top right corner of the Application tool bar and click the adjoining arrow button.

The screenshot shows the 'LBL_ACCLOSE_MAINT' application window. The window title is 'LBL_ACCLOSE_MAINT'. The menu bar includes 'New' and 'Enter Query'. The main area contains the following fields:

- Close Mode * (Text box)
- Product (Dropdown menu)
- Description (Text box)
- Debit Credit * (Dropdown menu, currently set to 'Credit')

At the bottom, there is a 'Fields' section with the following details:

- Input By Date Time
- Authorized By Date Time
- Modification Number
- Authorized (checkbox)
- Open (checkbox)

Specify the following details:

Closing Mode

You need to maintain the following modes:

- CASH – This indicates closure by cash.
- International Payment – This indicates closure by International Payment.
- GL – This indicates closure by transfer to GL.
- BCA – This indicates closure by banker's cheque.
- Local Payment – This indicates closure by transfer of funds to another account using Local Payment module

Note

- The close mode maintained in the screen will be used at the time of processing redemption.

- Close mode is mandatory if the redemption is by Account, GL, Cash & Loan.
- For redemption through BC/DD, the RT product maintained at ARC level for the BC/DD instrument will be considered during redemption.
- Close mode is not applicable or Local Payment and TD pay-outs..

Description

Give a brief description for the closing mode.

Product

Specify the Retail Teller product that should be used for booking withdrawal entries. It can be any one of the following:

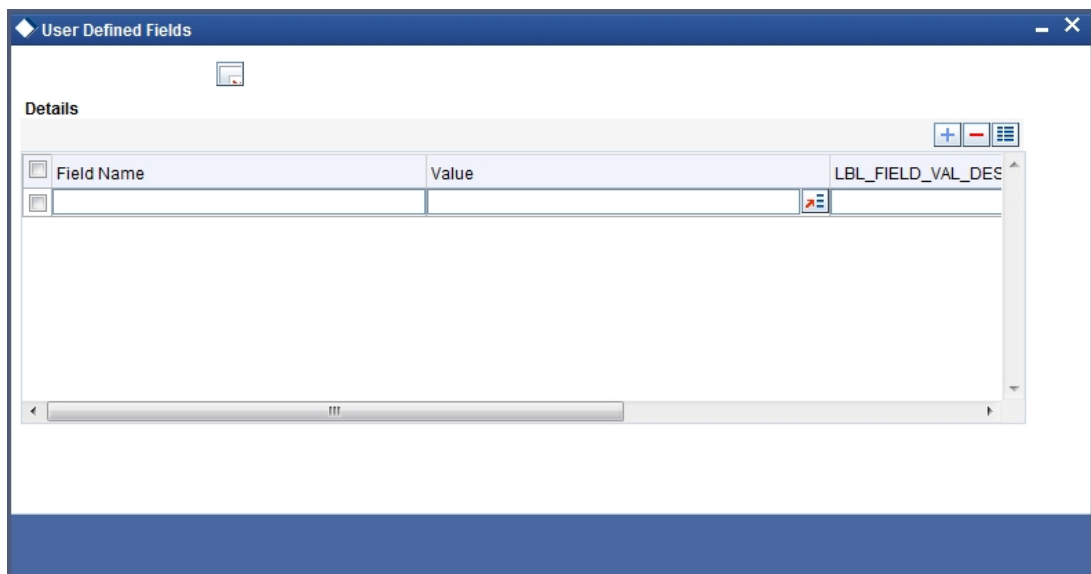

- Retail Teller Product
- Product linked to the instrument type

Debit Credit

The closure can be effected by means of a debit or a credit to the account. For each of the aforesaid closing modes, you need to select the 'Debit' option from the adjoining drop-down list..

3.3.2 Specifying UDF Values

All User Defined Fields (UDFs) linked to the function ID 'STDCLOSE' are displayed in the 'User Defined Fields' screen. Invoke this screen by clicking 'Fields' button on the 'Term Deposit Closing Mode Maintenance' screen.

Here you can specify values for each UDF.

Refer the User Manual titled 'User Defined Field' for details about defining UDFs.

3.3.3 Viewing Closing Modes Summary

You can view summary of all closing modes using the 'Term Deposit Closing Mode Maintenance' screen. To invoke this screen, type 'STSCLOSE' in the field at the top right corner of the Application tool bar and click the adjoining arrow button.

The screenshot shows a web application window titled 'Summary'. At the top, there are 'Advanced Search' and 'Reset' buttons. Below are search filters: 'Authorization Status' (dropdown), 'Record Status' (dropdown), 'Close Mode' (text input with a search icon), and 'Debit Credit' (dropdown set to 'Credit'). A pagination bar shows 'Records per page' set to 15, with buttons for 'First', 'Previous', '1 Of 1', 'Next', 'Last', and 'Go'. Below the filters is a table with the following header: Authorization Status, Record Status, Close Mode, Description, Product, and Debit Credit. The table body is currently empty. At the bottom left, there are buttons for 'Authorizal' and 'Record St'. At the bottom right, there is an 'Exit' button.

You can query on records based on any one or all of the following criteria:

- Authorization Status
- Record Status
- Close Mode
- Debit Credit

Click 'Search' button. The system identifies all records satisfying the specified criteria and displays the following details for each one of them:

- Authorization Status
- Record Status
- Close Mode
- Description
- Product
- Debit Credit

Double click on a record to invoke the detailed screen for that record.

3.4 Account Class for TD

This section contains the following topics:

- [Section 3.4.1, "Maintaining Account Class for TD"](#)
- [Section 3.4.2, "Account Details Tab"](#)
- [Section 3.4.3, "Maintaining Deposit Details"](#)
- [Section 3.4.4, "Maintaining Denominated Deposit Details"](#)

3.4.1 Maintaining Account Class for TD

To handle term deposits in Oracle FLEXCUBE, you have to set up an account class of type 'Deposit', in the 'Account Class Maintenance' screen. To invoke this screen, type 'STDACCLS' in the field at the top right corner of the Application tool bar and click the adjoining arrow button.

Specify the following details:

Account Class and Description

Identify the account class you are setting up with a unique code and a brief description.

Account Type

Select the 'Deposit' from the drop-down list.

Start Date

Specify the date from which the account class should become active, using the adjoining calendar. You will be able to create deposit accounts under this account class only from this date.

End Date

You can also specify the life span of the account class by indicating the end date.

The end date for an account class refers to the termination date after which, creation of new account under the account class is disallowed.

Consequently, the option list for Account Class in all further transactions screen in Oracle FLEXCUBE, will not display the 'expired' account class as of the system date. However, the existing accounts for the account class will be active even after the end date.

Note

If you do not specify an End Date for the account class, the account is taken to be an open-ended account class.

3.4.2 Account Details Tab

This tab is displayed by default on invoking the 'Account Class Maintenance' screen.

Account Code

As per your bank's requirement you can choose to classify account classes into different account codes. The bank can decide the manner in which the account classes are to be assigned to different account codes. An account code can consist of a maximum of four characters. Depending on the customer account mask maintained, the value in the account code field would be used during the generation of customer account numbers through the 'Customer Accounts Maintenance' screen.

If you have decided to include account code as part of the customer account number (in the account number mask), then at the time of creating a new customer account number, you will need to select the account class for the account number being generated. In the option-list provided, the account class is displayed along with the associated account code. When the account number gets populated, it is the account code that forms a part of the customer account number.

Dual Currency Deposit

Check this box to indicate that account class is for creating dual currency deposits. You can check this box only if the account type is 'Deposit'.

Natural GL

The reporting of all turnovers of the particular account class will be directed to the GL that you identify as the natural GL. Based on the characteristic of the account balance; you can specify whether the turnover is to be posted to the Debit GL or to the Credit GL. Deposit accounts normally have a credit balance.

Applicable Customer Status

Select the applicable customer status to indicate whether deposit product is available to minors or not. You can choose one of the following values from the adjoining drop-down list:

- Not Applicable
- Major
- Minor
- Both

Note

- By default 'Not applicable' option is selected when a new account class is created.
 - If you select 'Minor' option at the CIF level and 'Applicable customer status' as 'Major' at the account class level then the system will display the error message "The A/c class you selected is for major customer"
 - If you uncheck 'Minor' option at the CIF level and select 'Applicable customer status' as 'Minor' at the account class level, then the system will display the error message "The A/c class you selected is for minor customer"
-

3.4.3 Maintaining Deposit Details

Click the 'Deposits' button to define the parameters for a deposit type account class. The 'Deposit Account Details' screen is displayed.

The screenshot shows the 'Deposit Account Details' window. It contains various configuration options for a deposit account class, including rollover settings, liquidation options, interest rate calculations, holiday treatments, and maturity notices. There are also sections for rate chart deposits and exchange rate maintenance.

On the maturity date of a deposit, you can opt to:

- Rollover the deposit
- Liquidate the deposit
- Move it to an 'unclaimed' GL

The values given here will be defaulted when the TD is opened. You can modify defaulted values for each TD.

Auto Rollover

You can opt to automatically rollover a deposit if it is not liquidated on its maturity date. Check this box to automatically rollover deposits opened under the account class. TDs that are open and marked for Auto Rollover will automatically be rolled over during the Beginning of Day operations on the Maturity date. You can define the terms and conditions for the new deposit while maintaining the deposit account.

Close on Maturity

Deposit accounts opened under an account class can be closed automatically on the Maturity Date of the deposit. You can specify this for the account class you are maintaining by checking this box.

If you check this box, then during the Beginning of Day operations on the Maturity Date, the account will be closed. The principal will be moved, if specified, to the account your customer has directed. In case you don't check this box and the deposit remains unclaimed, you can

opt to move the principal and interest to the respective 'Unclaimed GLs' maintained at your bank.

Note

If you check the 'Auto Rollover' box, you will not be able to check 'Close on Maturity' box. Your specifications here will default to all deposit accounts opened under the account class. However, when maintaining a deposit account, you can change the specifications that default.

You have to check this box mandatorily, if you had checked the box 'Recurring Deposit' in the 'Deposit Account Details' screen.

Allow Partial Liquidation

Check this box to indicate that partial redemption is allowed. If 'Allow partial Liquidation' is not checked, then partial redemption will not be allowed on term deposits under this account class.

Refer the section 'Maintaining Floating Interest Rates' in this Manual for details about maintenance required for partial liquidation of TD.

Allow Partial Liquidation with Amount Block

Check this box to indicate that partial liquidation is allowed for the deposits with amount blocks. If the TD is linked partially then partial liquidation of the TD will be allowed only if you check this box.

Tenor Modification

Check this box if you intend to avail a tenor modification facility for a Term Deposit Account,

Move Interest to Unclaimed

Check this field to move the interest amount to the unclaimed GL mapped at the IC product in the accounting role 'INT_UNCLAIMED' on maturity date or grace period end date of the term deposit account.

Move Principal to Unclaimed

Check this field to move the principal amount to the unclaimed GL mapped at the IC product in the accounting role 'PRN_UNCLAIMED' on maturity date or grace period end date of the term deposit account.

Note

- You cannot opt Principal or Interest individually to move to unclaimed. It should be opted together.
 - The system does not allow payout instruction if Principal and Interest is moved to unclaimed.
-

Rate Chart Allowed

Check this box to indicate that the system should calculate TD interest based on the LDMM float rate maintained in the 'LD MM Floating Rate input' screen ('CFDFLTRI'). If you check this box, the system will pick interest rates based on different tenors, amount slab, currency and effective date for a TD. The rate is picked up at the time of booking. The rate is further picked up only at the time of liquidation/ rollover/ redemption operations based on re-population flag at IC product level.

You will not be able to modify this preference once the record is authorised.

Re-pick up Account Class Tenor On Rollover

Check this box to enable re-pick up of the account class tenor on rollover. If you check this box, the system will default the rollover tenor as 'Account Class Tenor'. During rollover, the system will pick up the default account class tenor.

Denominated Deposit

Check this box to allow opening of denominated deposits. This box is automatically selected during save, if the Denomination details are maintained for the account class at the 'Denominated Deposit Details' Tab.

Interest Rate Based on Cumulative Amount

Check this box to indicate that the system should arrive at the interest rate of a new deposit using the cumulative amount of other active deposits, under the same account class, customer, and currency.

The cumulation of the amount for arriving at the interest rate is done at the account level during the save of the below events:

- Deposit account opening
- Any interest rate change to the deposit - floating rate deposits, rate change on interest liquidation, rate change on rollover, and top-up

Note

- When cumulating the amount of the deposits system considers the current deposit balance of all the deposits along with the new deposit amount.
 - For backdated deposit opening, all the active deposits as of the current system date are considered to arrive at the cumulative amount, if the 'Interest Rate Based on Cumulative Amount' box is checked.
 - This is applicable only for rate chart cases.
 - TD accounts opened after the interest start date will not be considered for arriving at the cumulation amount.
 - If more than one deposit with same account class ccy and customer combination is opened on the same day with cum flag checked (for atleast one account) then during eod, system would rearrive the cumulation amount for the accounts opened on the same day so as to give the cumulation benefit for all accounts opened on same day.
 - The interest rate derived is applied only to the floating rate deposits, rate change on interest liquidation, and rate change on rollover and there will be no change to the deposits which are used for arriving at the interest rate.
 - If back dated TDs are opened, then the system will not pick up cumulation rate during EOD. Cumulation rate is picked up only during the rate pick up events.
 - The system does not pick up the cumulation rate on modification of TD account.
-

Refer the section 'Calculating Interest Rate Based on Base Amount' in this User Manual for details about arriving at interest rate based on cumulative amount.

Month-end Maturity Deposit

Check this box to indicate that the deposit is a month-end maturing deposit, i.e., the deposit matures on the last working day of the month.

If this box is checked at the account class, then during deposit input, if the account opening date is the last working day of the month and the maturity date is the last day of the subsequent month, then you have to enter the tenor in Months only. If this box is un-checked,

then the deposit is not considered as a month-end maturing deposit even though the deposit is opened on the last working day of the month and the tenor of the deposit is across months.

During TD opening, a deposit is considered as a month-end maturing deposit only if the following criteria are met:

- The start date of the deposit is the last working day of the month
- The tenor of the deposit is across months
- The 'Month-end Maturity Deposit' box should be checked

An account class with 'Month-end Maturity Deposit' box checked can also have deposits that are not month-end maturing deposits. A deposit is classified as an ordinary deposits (not month-end maturing deposit) if the following criteria are met:

- The deposit is not opening on the last working day of the month
- The tenor of the deposit is across months but not month-end maturing
- The deposit is opened on the last working day of the month, but the tenor is in Months and Days.

Note

- For month-end maturing deposits, holiday movement and movement across months is not applicable.
 - During rollover, the deposit maturity date will be the last day of the month and if it is a holiday as per the applicable holiday calendar, then the maturity date movement is not applicable for month-end maturing deposits.
-

Grace Period for Renewal

Specify the grace period for renewing a TD. Only if grace days are provided, the TD can be renewed using the 'Term Deposit Redemption' screen (ICDREDMN) or 'Renewal Simulation' screen (ICDREDRN) upon maturity of the TD. This option is applicable only for deposits whose interest and principal is moved to unclaimed GLs upon maturity. If you check the 'Auto Rollover' box or the 'Close on Maturity' box, the system will ignore the value that you specify here. In other words, grace period will not be applicable on the maturity date in case of auto rollover or closure of the account.

After the account has matured, renewal of the TD is possible from the beginning of day (BOD) of the maturity date to the end of day (EOD) of the grace period. The TD gets renewed with the value date as of the maturity date when the grace period is valid.

The counter for the grace period is '0' on the maturity date. It is incremented by 1 during EOD processing of every subsequent day. When the grace period counter is '0', TD renewal is possible before start of the EOD as of the maturity date. When the grace period counter goes to '1', TD renewal is possible before start of the EOD of the (maturity date +1), and so on.

Refer the section 'Redeeming a TD' and 'Transferring to Unclaimed Deposit on Maturity' in this User Manual for details about TD redemption and application of grace period respectively.

Grace period is maintained only at the account class level. You cannot modify it at account level.

Maturity Notice Period

Specify the number of days before which the notification is to be sent for TD maturity. If 'N' days is mentioned, then the notification will be sent 'N' working days prior to the TD maturity date. The default value is zero.

Transaction Code

Specify the transaction code that should be used to process TD pay-out by Local Payment. The adjoining option list displays all valid transaction codes maintained in the system. You can select the appropriate one.

Cluster Identification

Specify a valid cluster ID which you need to link to deposit account class. On linking the cluster, the booking and withdrawal amount is validated against cluster amount in units.

Note

You can link cluster ID only for term deposits.

Rate Chart Tenor

Specify the unit by which the tenor maintained in 'Floating Rate Code Definition' screen should be considered. You can select one of the following units:

- Months - If you select this, the rate chart tenor will be considered as months for all deposit under this account class
- Days - If you select this, the rate chart tenor will be considered as days for all deposit under this account class

If rate chart is allowed for the account class, then the system will take the tenor from 'Floating Rate Code Definition' in terms of the unit specified here.

Note

You can use this feature only if the rate code has been maintained for the specific tenor. Also, this feature is available only if the check-box 'Rate Chart Allowed' is checked on this screen.

Deposit Amount Currency wise Limits

Currency

Specify the Ccy for which the min / max / top-up units to be defined. The list displays all the active Ccy's maintained.

Min amount

Specify the minimum amount for which deposit should be created under this account class. If the TD account is booked below the minimum amount then the system displays an error message: "Deposit amount is less than the minimum amount at account class"

Max amount

Specify the maximum amount for which deposit can be created under this account class. The system will display a configurable override if the deposit amount contravenes the specified amount range or if the maximum amount is not specified.

Top-up Units

Specify the top-up units for each ccy. The top-up has to be made only in multiples of these units specified for each Ccy. if not, an error message "Top-up should be in multiples of top-up units" will be displayed on top-up.

Holiday Treatment

Holiday Calendar

Select the holiday calendar applicable to the account class from the adjoining drop-down list. This list displays the following values:

- Ignore - Select this option to ignore all other holiday parameters for the account class. By default, this option is selected.
- Branch- Holiday calendar will be based on the branch holiday maintenance of the respective branch
- Currency - Holiday calendar will be based on the currency maintenance done at bank level for the respective currency
- Both Branch & Currency - Holiday calendar is based on both branch and currency holiday maintenance

The holiday calendar is used to arrive at the maturity date. The holiday calendar defined at the account class is applicable to all term deposits under the account class. You cannot modify the 'Holiday Calendar' if there are active accounts under the account class.

For month-end deposits, if holiday calendar is applicable, then the account class holiday calendar options indicate the following:

- Ignore - Maturity date does not change even if it is a holiday, i.e., the maturity date will be last day of the month. If you select this option, then system ignores all other values.
- Deposit Branch Holiday - If the maturity date is a holiday as per the deposit branch calendar, then system moves the maturity date to the last working day of the same month.
- Deposit Currency Holiday - If the maturity date is a holiday as per the deposit currency calendar, then system moves the last working day to the same month.
- Both Deposit Currency and Branch Holiday - If the maturity date is a holiday as per the deposit currency and branch calendars, then system moves the maturity date to the last working day of the month.

Holiday Movement

Select the working day to which the holiday should be moved from the adjoining drop-down list. This list displays the following values:

- No Change - If you select this option, then there is no change in the maturity date. Also, system ignores the value selected for 'Maturity Date Across Months'. By default, this option is selected.
- Previous Working Day - In case the computed maturity date is a holiday, then system moves the maturity date to the previous working day for the corresponding Holiday Calendar chosen.
- Next Working Day - In case the computed maturity date is a holiday, then system moves the maturity date to the next working day for the corresponding Holiday Calendar chosen.

Holiday movement is adjusting the next maturity date when the maturity date falls on a holiday, based on the Holiday Calendar chosen. 'Holiday Movement' is not applicable if you select 'Ignore' option for 'Holiday Calendar'.

Note

You cannot modify the 'Holiday Movement' if there are active account under the account class.

Maturity Date Movement Across Months

Select the maturity date movement across months from the adjoining drop-down list:

- Allowed - The maturity date is moved across months. If the computed maturity date falls on a Holiday, then the maturity date can be moved to the next or previous working day, based on the holiday movement option, even if it falls in a different month.
- Previous/next working day of the same month - After moving the maturity date, if the adjusted maturity date falls in the previous/next month, then the system moves the maturity date forward or backward to the next/previous working day of the same month
- No change in maturity date - If the adjusted maturity date falls on next/previous month, then the system ignores the movement and considers the computed maturity date as the maturity date even it falls on a holiday.

Maturity date across months is applicable only when the maturity date is adjusted to previous or next working day.

System displays an override message in the following cases:

- When allowed, the maturity date is moved across months
- when the maturity date is re-adjusted to the last working day of the month
- When the calculated maturity date is used in case the maturity date movement to the next month is not allowed

Whenever there is a change in the maturity date, system changes the rollover maturity date accordingly.

System ignores the value of 'Maturity date movement across months' if you select the 'No Change' option for 'Holiday Movement'.

Adhoc Holiday Change

Select the adhoc holiday change from the adjoining drop-down list. The adjoining drop-down list displays the following values:

- Change Maturity date and generate advice - System updates the maturity date and the rollover maturity date as per the TD holiday calendar maintenance, generates an advice to the customer.
- Generate Advice - System generates an advice on deposits having maturity date falling on a holiday.
- No Action - By default, this option is selected. If this is selected, the maturity date does not change. In that case the system will not generate advices for the TD.

The adhoc holiday change is the change in branch and currency holiday calendar after opening the TD due to adhoc change in holiday or branch transfer of the deposit. System ignores the value of 'Adhoc Holiday Change' if you select the 'Ignore' option for 'Holiday Calendar'.

Applicable Deposit Tenor

Select the deposit tenor, applicable to the deposit for interest rate pick-up, from the adjoining drop-down list. This list displays the following values:

- Original Tenor - If you select this option, then system considers the tenor which is defaulted from the account class or modified at the account level. By default,
- Deposit Tenor - If you select this option, then system considers the tenor based on the adjusted maturity date.

Note

- On saving a deposit, if there is a change in maturity date due to holiday treatment, then system displays the revised tenor as the deposit tenor due to the revision in maturity date.
 - During account opening, system defaults the tenor from the account class to the TD account. However, you can modify the tenor. The maturity date is arrived based on the account tenor.
 - The holiday calendar is applicable for maturity date during TD opening (including sweeps) and TD rollover (auto/manual). If there is a change in maturity date due to the holiday calendar, then system considers the tenor based on the value.
-

Exchange Rate Maintenance

The user can maintain exchange rate preferences used for term deposit operations, so that the term deposit does not default to the Mid Rate as the exchange rate. The term deposit exchange rate is only applicable to 'Deposit' type of account class.

The user define the following fields for setting the preference of exchange rate:

- Pay In/Out - Select the process for which the rates are defined from the dropdown list. The list displays the following values:
 - Pay -In (booking and top-up)
 - Pay-out (TD Redemption, Liquidation, Rollover, Maturity Payout components)
- Mode - Select the account from the dropdown list, for which the rates are being defined.
- Rate Type - Select the rate type from the list of values. They can be CASH, STANDARD, and so on.
- Rate Code -Select the code for the rate type from the dropdown list. The list displays the following values:
 - Mid rate
 - Buy/Sell Rate
- Variance - Enter the difference in the rate allowed at transaction level from defaulted rate. This will be in '%' terms and will be considered as both '+' & '-' variance. The variance percentage cannot be entered as 0.

The user can modify the defaulted rate at the time of the transaction.

Default Tenor

You can define a tenor for the deposits that are opened under an account class. Deposits opened under the account class will automatically acquire this tenor. However, you can change the tenor to suit the requirements of a specific deposit. The default tenor should be within the minimum and maximum range specified.

Days

Specify the default tenor in terms of days.

Months

Specify the default tenor in terms of months.

Years

Specify the default tenor in terms of years.

Maximum Tenor

Specify the maximum tenor for which deposits can be created under this account class. If the term deposit is booked beyond the maximum tenor then the account fails to save and the system displays following error message:

Tenor of deposit is greater than the maximum tenor of the deposit

Days

Specify the maximum tenor in terms of days.

Months

Specify the maximum tenor in terms of months.

Years

Specify the maximum tenor in terms of years.

Minimum Tenor

Specify the minimum tenor for which deposits should be created under this account class. If the term deposit is booked before the minimum tenor then the account fails to save and the system displays following error message:

Tenor of deposit is lesser than the minimum tenor of the deposit.

Days

Specify the minimum tenor in terms of days.

Months

Specify the minimum tenor in terms of months.

Years

Specify the minimum tenor in terms of years.

Premature Redemption Parameters for Rate Chart Allowed Deposits

Interest Rate for Redemption Amount

Select the interest rate to be applied for the redemption amount, from the adjoining drop-down list. The following options are available in the drop-down list for selection:

- Continue Existing
- As on Opening date - By default this option is selected.
- As on Redemption date
- As on Rate Revision Events
- Special Rate Code

Note

- This is applicable only for 'Rate Chart Allowed' deposits.
 - By default 'As on Opening Date' option is selected
 - You can modify this only if there is no active accounts linked to the account class.
-

Special Rate Code

Specify the special rate code for the redemption amount. Alternatively, you can also select the rate code from the adjoining option list. This is a mandatory input only if the interest rate is chosen as 'Special Rate Code'.

Interest Rate After Redemption

Select the interest rate to be applied after redemption of TD, from the drop-down list. The following options are available for selection:

- Continue Existing
- As on Opening date
- As on Redemption date
- As on Rate Revision Events

Note

- By default 'As on Opening Date' option is selected
 - You can modify this only if there is no active accounts linked to the account class.
-

Top-up of Deposit

You can top-up an existing Term Deposit by adding funds to the TD account. You can allow or disallow top-up and also define the top-up block duration after opening date and top-up block duration before maturity date. The block duration are considered as calendar days based on the account branch holidays.

Allow top-up of Deposit

Check this box to indicate that you can top-up funds to an existing term deposit. By default this box is not checked.

Block Duration after Opening Date

You can specify the duration for which the term deposit top up has to be blocked after the account opening date. The block duration after Opening date (Days / Months) should not be greater than the max tenor at the account class.

Months

Specify the number of months for which the term deposit top-up has to be blocked after the account opening date.

Days

Specify the number of days for which the term deposit top-up has to be blocked after the account opening date.

Block Duration Before Maturity Date

You can specify the duration for which the term deposit top-up has to be blocked before the account maturity date. The top-up can be done any time before the maturity date (i.e. in term) of the deposit if there is no block duration defined. The block duration before maturity date (Days / Months) should not be greater than the max tenor at the account class.

Months

Specify the number of months for which the term deposit top-up has to be blocked before the account maturity date.

Days

Specify the number of months for which the term deposit top-up has to be blocked before the account maturity date.

Note

The sum of block duration after opening date and block duration before maturity date should not be greater than the max tenor at account class. If not, system displays the error message "Block duration cannot be greater than maximum tenor allowed".

Interest Rate

Select the interest to be applied on the top-up deposit, from the adjoining drop-down list. The options available for selection are:

- Current - Select this option to apply the current interest rate of the TD on the top-up amount. By default this option is selected.
- As on opening date - Select this option to apply the interest rate based on the slab as on the value date of deposit opening. If top-up is made to a deposit after rollover, the rate as on rollover date will be considered for rate pick up.
- As on top-up value date - Select this option to apply the interest rate based on the slab as on the value date of the top-up.

Note

- For Rate Chart allowed TDs you can select any of the above options in the drop-down list.
- For IC Rate code TDs you can select only 'Current' option. If any other option is selected the error message "Interest rate option should be current for Non rate chart account class" is displayed.

If the option 'Interest Rate Based on Cumulative Amount' is checked then the interest rate will be based on the cumulative amount of all the deposits including this deposit amount, of the same customer under the same account class for the same currency.

Dual Currency Deposits

Dual Currency Deposit (DCD) is a short-term currency-linked deposit through which you earn a higher interest rate than regular term deposits. The Bank converts the deposit currency into the linked currency at the pre-determined conversion rate on the fixing date two working days prior to deposit maturity. At maturity you receive the principal and interest in either the deposit currency or the linked currency, whichever is weaker.

The following details are captured here;

Linked Currency

Specify the linked currency if the account class is to be used for creating TD with Dual Currency option. Alternatively, you can also choose the currency from the adjoining option list.

Note

You will be allowed to capture this value here only if the option 'Dual CCY Deposit' is checked at the 'Account Class Maintenance' screen. You will be allowed to modify this value even after authorization.

Currency Option Product

Specify the currency option product under which an Options contract has to be created in case of a Dual Currency deposit. The adjoining option list displays all valid Options products with Product Type 'CO', with the following features.

On saving the account class, system validates the following to ensure that the currency option product selected here has the below features:

- Option product type is Currency options
- Option Type is Call
- Deal Type is Buy
- Option Style is Plain Vanilla
- Barrier is not allowed
- Delivery type is Physical
- Expiration Style is American

Fixing Days

Specify the number of days from TD maturity date, before which the exchange rate has to be fixed. On maturity, the exchange rate at the time of booking and the exchange rate at the time of fixing date are compared to determine the currency in which TD amount should be settled.

Note

You will be allowed to capture this value here only if the option 'Dual CCY Deposit' is checked at the 'Account Class Maintenance' screen. You will be allowed to modify this value even after authorization.

Recurring Deposit

Specify the following details for recurring deposits.

Recurring Deposit

Check this box to indicate that the account class is specific to recurring deposit.

Move Maturity to Unclaimed

This box is unchecked and disabled for recurring deposits.

Move funds on Overdraft

Check this option to indicate that the system should pass an overdraft in the payment account (i.e. CASA) when the account does not have sufficient funds for making RD installment payment.

Installment Frequency

Specify the frequency for payment of installment for RD. The installment frequency should be within the minimum and maximum schedule days.

Days

Specify the installment frequency in terms of days.

Months

Specify the installment frequency in terms of months.

Years

Specify the installment frequency in terms of years.

Minimum Schedule Days

Specify minimum schedule days here.

Maximum Schedule Days

Specify maximum schedule days here.

Minimum Installment Amount

Specify the minimum RD installment here. The installment amount at account level should be greater than or equal to the minimum installment amount.

Pre-Closure Preferences

You can attach the pre-closure factor ID, which is used to calculate the penalty for pre-mature TD redemptions at account class level.

Pre-Closure Factor ID

Specify the pre-closure factor ID. Alternatively, you can select the factor ID from the option list. The list displays all factor IDs maintained in the 'Pre-closure Factor Maintenance' (STDPCMNT) screen.

Description

The system displays the description of the factor ID based on the Pre-closure factor ID selected.

Pre-closure Factor ID Based on

Select the effective date based on which the pre-closure factor needs to be considered, from the drop down list. The list displays the following values:

- Account Open Date: To consider the latest effective date which is less than or equal to the TD account opening date.
- Latest Effective Date: To consider the latest effective date which is less than or equal to the current system date.

The System Data Element (SDE) 'SDE PRE_CLS_FACT' identifies the effective date based on the value maintained in the 'Pre-closure Factor ID Based on' field. If there no records available matching with the 'Account Opening Date' or the 'Latest Effective Date', then the SDE considers the value as 1.

3.4.4 Maintaining Denominated Deposit Details

You can maintain various denominations of the denominated certificates per currency using 'Denominated Deposit Details' screen. Only the denominations maintained in this screen can be used for issuance of denominated certificates under this account class.

To invoke this screen click the button 'Denominated Deposits' on the Account Class Maintenance' screen.

| Currency | Denomination ID | Denomination Description | Denomination Value |
|----------|-----------------|--------------------------|--------------------|
|----------|-----------------|--------------------------|--------------------|

The following details are captured here:

Currency

If inventory module is allowed, select a valid currency code for which the denomination ids are maintained in inventory module. If inventory module is not allowed then select any valid currency code maintained in the system.

Denomination ID

If inventory tracking is 'YES', then select the denomination id available at the inventory module. If inventory tracking is 'NO' then you can specify the required denomination id.

Denomination Description

Enter a description if inventory tracking is not available. If inventory tracking is done then the denomination description of the selected denomination id is defaulted here.

Denomination Value

Specify a denomination value if inventory tracking is not available. If inventory tracking is done then the denomination value of the selected denomination id is defaulted here. *For further details about setting up an account class, refer the chapter 'Maintaining Mandatory Information' in the Core Entity User Manual.*

3.5 Interest Preferences for TD

This section contains the following topics:

- [Section 3.5.1, "Setting Up Interest Preferences for TD"](#)
- [Section 3.5.2, "Specifying Accounting Roles for Unclaimed Deposits"](#)
- [Section 3.5.3, "Linking TD Account Class to Interest Product"](#)
- [Section 3.5.4, "Linking Main Interest Rate UDE"](#)

3.5.1 Setting Up Interest Preferences for TD

You need to set up an Interest/Charge product to handle the calculation of interest and charges on a TD. You can invoke the 'Interest and Charges Product Maintenance' screen by

typing 'ICDPRMNT' in the field at the top right corner of the Application tool bar and clicking the adjoining arrow button.

Check 'Deposit' to create Deposit Interest product. The booking account type should be maintained as Interest for the deposit product. The accounting roles are generated for the product based on the interest rule maintained at ICDRUMNT.

For details on User Defined Fields screen refer Other Maintenances chapter in Core Service User Manual.

3.5.2 Specifying Accounting Roles for Unclaimed Deposits

In case you have checked the option 'Move Interest to Unclaimed' and 'Move Principal to Unclaimed' in the Deposit Account Details' screen at the account class level, you will have to specify appropriate accounting roles for the IC product using the 'Accounting Roles' screen.

Click 'Accounting Roles' button on the 'Interest and Charges Product Maintenance' screen and invoke the following screen.

Accounting Roles

Product Code

Product Description

Class Details

Class Code

Class Description

Roles

1 Of 1

| Accounting Role | Role Description | Account Head | GL Description |
|-----------------|------------------|--------------|----------------|
|-----------------|------------------|--------------|----------------|

Specify the following details in case you have opted for moving interest and/or principal to unclaimed GL:

Accounting Role

Choose 'PRN_UNCLAIMED', 'INT_UNCLAIMED' and 'MAT_UNCLAIMED' from the adjoining list.

Account Head

Attach 'INT_UNCLAIMED' to a miscellaneous GL for unclaimed interest - for eg '25691234'. Similarly, map 'PRN_UNCLAIMED' and 'MAT_UNCLAIMED' to a miscellaneous GL for unclaimed principal - for eg '25691235'.

3.5.3 Linking TD Account Class to Interest Product

You can link the TD Account Class to the Interest product in the 'Interest and Charges–Interest Product Preferences' screen. Click 'Preferences' button on the 'Interest and Charges Product Maintenance' screen and invoke the following screen.

Interest Product Preferences

Product Code _____ UDE Currency Account Currency ▾

Description _____ Main interest Rate UDE _____

Accrual

Product Level _____

Defer Liquidation Days 0

Liquidation Date Month End

Ok Exit

Here you can specify preferences for profit calculation and application on the accounts to which this product is applied.

Account Details

You can indicate the TD accounts on which this product should be applied.

Account Class

Specify the account class of 'Deposit' type that you have maintained for creating TDs. The adjoining option list displays all valid account classes maintained in the system. You can select the appropriate one.

All TDs created under this account class will inherit the interest parameters as maintained in this screen.

You should not link the same account class to multiple IC products. One deposit account class should be linked only to one interest product.

Currency

Specify the currency here. You can book deposit accounts in the currency and account class combination specified at the IC product level.

The system defaults the interest product to account at the time of booking if the account class with the currency combination is linked to the IC product.

Special Condition

Check this box to calculate interest. If Special Condition is checked, then the product is defaulted while booking the deposit account.

Note

While saving the IC product with Deposits checked, special condition is mandatory

Rate Change on Interest Liquidation.

If the box 'Rate Chart Allowed' has been checked for the account class, then you should leave this box unchecked. If this box is checked, then on every interest liquidation new rates are picked up for interest calculation. However, you cannot modify this box once authorized.

Rate Change onRollover

Check this box to re pick up the rate activity on the rollover of TD. The rate is picked up for fixed and rate chart allowed term deposits.

Open

Check this box if the account class and product combination is effective and open for booking deposit accounts. To discontinue the mapping of an account class on an IC product, uncheck this box.

Refer the chapter 'Defining Interest and Charge Products' in the Interest and Charges User Manual for details about setting up the product.

Refer the chapters 'Annexure A - Accounting Entries and Advices' in this User Manual for details on the accounting entry set-up for the IC products. Also refer the chapter 'Annexure B – IC Rule Set-up' in this User Manual for details about setting up IC rules for the products.

3.5.4 Linking Main Interest Rate UDE

You can link the main interest rate UDE to the interest product in the 'Interest and Charges - Interest Product Preferences' screen. Click 'Preferences' button on the 'Interest and Charges Product Maintenance' screen to invoke the following screen.

Interest Product Preferences

Product Code UDE Currency

Description Main interest Rate UDE

The UDE specified here is used by the system to compute and display the maturity amount while booking redemption and simulation. You can specify one of the UDE here as multiple UDEs can be attached to an IC product.

3.5.5 Negative Interest for Term Deposits

Oracle FLEXCUBE allows you to capture negative interest rate for a term deposit. While positive interest rate is based on the credit formula, negative interest rate is based on the debit formula.

During early redemption interest formula goes through recalculation with either positive or negative interest rate. For credit formula, interest formula is maintained and for debit formula, interest, penalty and tax formula are maintained.

Interest component is calculated based on the sum of amount with credit formula minus sum of amount with debit formula that has Book Flag as Non Tax and Non Penalty. Penalty component is calculated based on Debit formula that has Book Flag value as Penalty.

You can waive penalty during partial redemption. The penalty amount is set to 0 when, Waive Penalty flag is enabled.

Interest Formula in Rule Maintenance:

| Formula No. | Formula Type | Accrual Required | Periodicity | Condition | Result |
|-------------|--------------|------------------|-------------|--------------------------------------|--|
| 1 | Credit | Y | Daily | DEPOSIT_AMOUNT > 0 AND INT_RATE >= 0 | ((DEPOSIT_AMOUNT * DAYS * INT_RATE)/(100 * YEAR)) |
| 2 | Debit | Y | Daily | DEPOSIT_AMOUNT > 0 AND INT_RATE < 0 | ((DEPOSIT_AMOUNT * DAYS * ABS(INT_RATE)) / (100 * YEAR)) |
| 3 | Debit | N | Periodic | (Formula1 – Formula2) >= 0 | (Formula1 – Formula2) * Tax_Rate |

Interest Liquidation and Interest Payout

| | If Interest booking account is CASA | If Interest booking account CASA does not have balance | If Interest booking account is TD | If Interest booking account TD does not have balance |
|----------------------|--|---|---------------------------------------|--|
| Interest Liquidation | Interest will be debited from the CASA account | If CASA a/c does not have balance, and no track receivable or overdraft is set, then liquidation fails with AC-OVD-02 | Interest would be debited from the TD | Interest liquidation fails, if Interest Liquidated amount is greater than available balance. |

| | If Interest booking account is CASA | If Interest booking account CASA does not have balance | If Interest booking account is TD | If Interest booking account TD does not have balance |
|---------------------------------|--|--|---|--|
| Rollover of Principal | Principal paid out = Principal. Interest debited from CASA account | Interest Liquidation fails, once CASA has balance, it would be picked in next EOD. For avoiding liquidation failure, Either CASA should have Track receivable or overdraft. | Rollover amount = P-I. Interest Payout component is not considered | If TD interest rate is negative, TD cannot be attached as collateral. But if Rate chart TD and interest rate is positive, then TD can be attached as collateral. If there is any block on TD, the TD will be rolled over as P + Interest (Effective Interest can be positive or negative). |
| Rollover of Interest | Not possible | Not possible | On maturity, Principal= (Principal - Interest) rollover. Principal Payout component is not considered | |
| Rollover of Principal +Interest | Not possible | Not possible | On maturity, Principal= (Principal - Interest) rollover | |
| Rollover Special Amount | Rollover happens till Principal. Any additional amount has to be paid using PAYIN details | Rollover happens till Principal. Any additional amount has to be paid using PAYIN details | On TD booking, if Maturity Amount < Special Amount, then it asks for additional funds. On Rollover if available balance will become less than special amount, then at EOD, rollover fails. | |

| | If Interest booking account is CASA | If Interest booking account CASA does not have balance | If Interest booking account is TD | If Interest booking account TD does not have balance |
|---|--|---|---|---|
| Move Interest to Unclaimed Move Principal to Unclaimed | Not possible | Not possible | If Manual Rollover is P-I , if rolled over. If Move to Unclaimed, Amount = P- I moved. | |

Note

- Maturity Value is calculated based on Debit and Credit Interest formula as per the effective date.
 - Penalty amount is calculated based on sum of amounts of all formulas for which Book Flag is selected as Penalty.
 - You cannot create a discounted TD with negative interest rate.
 - If the interest rate is positive and the collateral is attached, then the available balance will be Available Balance = TD Amount - Collateral Blocked Amount
 - You can store multiple tax formulas or multiple formulas of same type separately in the system.
-

3.6 Floating Interest Rates

This section contains the following topics:

- [Section 3.6.1, "Maintaining Floating Interest Rates"](#)
- [Section 3.6.2, "Maintaining Parameters for Premature Withdrawal of TD"](#)
- [Section 3.6.3, "Calculating Interest Rate during Normal Maturity of a TD"](#)
- [Section 3.6.4, "Calculating Interest Rate during Partial redemption of a TD"](#)
- [Section 3.6.5, "Calculating Interest Rate during Pre Closure of a TD"](#)
- [Section 3.6.6, "Calculating Interest Rate Based on Cumulative Amount"](#)

3.6.1 Maintaining Floating Interest Rates

You can apply interest either as a 'Fixed' rate or as a 'Floating' rate. A floating rate corresponds to the market rates for the day. These rates are maintained and updated daily (or whenever they change,) in the 'Floating Rate Maintenance' screen.

You can invoke this screen by typing 'CFDFLTRI' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

The floating interest rates are defined through this screen. A Rate Code identifies a set of rates defined for a combination of Currency, Amount Slab and Effective Date. Also, for each such combination, you can maintain rates that can differ by each tenor.

The following details have to be captured here:

Rate Code and Description

Specify the rate code to identify the Floating Rate you are defining. Alternatively, you can select the rate code from the list of values. The list displays all valid rate codes maintained in the 'Rate Code Definition' Screen (CFDFRTCD).

Currency

You have to associate each Rate Code with a currency. You can define rates for the same Rate Code in different currencies. Select a currency from the option list provided.

Effective Date

Each rate that you define for a Rate Code and Currency combination should have an Effective Date associated with it. This is the date on which the rate comes into effect. Once a rate comes into effect, it will be applicable till a rate with another Effective Date is given for the same Rate Code and Currency combination.

Borrow/Lend Indicator

For every Amount Slab - Effective Date combination, you should define the rate to be applied as a borrow rate, a lend rate or a mid rate. Borrow rates are applied for loans taken by the bank and lend rates applied on loans disbursed.

Tenor and Interest Rates

The rates that will be applied for a given combination of Amount Slab – Effective date – Lend/Borrow Indicator can be tenor based. In this screen, you can also define interest rates for different tenors.

For instance, for an amount slab you can maintain rates for the Rate Code LIBOR for tenors 1 - 30 Days, 30 – 90 Days and so on. If you do not maintain tenor wise interest rates, you have to maintain the tenor as '0' and then specify the rate. This is mandatory to save the details.

Note

You can maintain negative values for Tenor and Interest Rates.

3.6.2 Maintaining Parameters for Premature Withdrawal of TD

Oracle FLEXCUBE allows you to capture current TD balance amount using the SDE 'DEPOSIT_AMOUNT' which will consider TD amount – sum of partial redemption amount. You need to maintain the parameters by capturing the Interest rates on the basis of tenor, minimum amount, currency and effective date for a TD. Based on these parameters, the system picks the corresponding rate during Normal Maturity, Pre-Closure and Partial Redemption of TD.

Oracle FLEXCUBE also provides additional spread rate maintenance in addition to interest rate for TD based on the parameters maintained which is added to the derived interest rate from the rate chart maintenance and used for Interest calculation. The spread is maintained by specifying fixed rate in addition to the rate code attached.

3.6.3 Calculating Interest Rate during Normal Maturity of a TD

Oracle FLEXCUBE performs calculation of Interest Rate during normal Maturity of a TD. During interest liquidation on maturity for TDs, the system derives the interest rate from the rate maintenance in 'LD MM Floating Rate Input' screen based on tenor, amount slab, currency and effective date for a TD.

3.6.4 Calculating Interest Rate during Partial redemption of a TD

Oracle FLEXCUBE performs calculation on partial redemption of the TD. On partial redemption, the system performs the following actions:

- It credits the redemption amount to customer payout account and debits from TD account.
- It recalculates the tenor for the redemption amount i.e., Reduced Tenor = Completed tenor from the TD value date till the partial redemption date in months.
- It recalculates the interest for the previous periods including the current period (Till partial redemption date) by considering the redemption amount as the TD amount and on the reduced tenor.
- It applies the interest based on the new reduced tenor. The amount slab derived from the rate chart maintenance is 'Amount 1'.

- It recalculates the interest for the remaining amount from TD Start date till last liquidation period by considering the remaining amount as TD balance and on the original tenor of TD is 'Amount 2'.
- In case of TD payouts, the system calculates the interest amount paid to the customer till date which is 'Amount 3'.
- If the interest for the previous periods is already paid to the customer, then the system debits the customer with the difference amount between already liquidated amount till the last liquidation date and newly recalculated profit (for redemption amount and remaining amount) and debits customer with Amount3 – (Amount1+Amount2).
- The system considers the balance amount after the partial redemption as the new TD with the original TD tenor.
- If top-up is made to a TD account, then on part / full redemption, the redemption amount is taken from the top-up amount first (LIFO order).
- The tenor for the redemption amount i.e., Reduced Tenor = Completed tenor from the Top-up date till the redemption date is calculated. The tenor for the remaining amount will be the total tenor.(mat_date - interest_Start date). This tenor is applicable for the rate pickup in case of floating rates (LDMM).
- Arriving at the interest rate for redemption amount and remaining amount will be based on the Premature Redemption Parameters chosen for Rate Chart Allowed Deposits
- If redemption amount involves both from top-up amount and initial deposit amount, then the interest and penalty on partial redemption is calculated separately for top-up amount from value date of top-up till the partial redemption date and for initial deposit amount from the from value date of opening till the partial redemption date.

3.6.5 Calculating Interest Rate during Pre Closure of a TD

Oracle FLEXCUBE allows calculating Interest Rate during Pre Closure of a TD. The system performs the following action during calculation on Pre Closure of the TD:

- It credits the TD balance to customer payout account and debits from TD account
- It calculate the completed tenor of TD
- It calculates the interest rates for the amount slab and completed tenor from the rate chart maintenance.
- It recalculates the interest from TD start date, including pre closure period by considering the redemption amount and reduced tenor. Then the system debits the customer account with the difference between already liquidated amount and newly calculated amount till the previous period of pre closure.
- It reverses / pays the amount re-calculated based on the revised interest rate for the current period at the time of preclosure.
- Close the TD

Note

- The system picks the floating rates at the time of booking, rollover and pre closure only.
 - The system does not post any separate accounting entries for Penalty. Penalty is deducted only if it is maintained at IC rule level.
 - The redemption with BC, Local Payment and Child TD not allowed in case of account class (of account) having 'Rate Chart Allowed'.
-

3.6.6 Calculating Interest Rate Based on Cumulative Amount

Oracle FLEXCUBE allows calculating interest rate of a new deposit using the cumulative amount of other active deposits, under the same account class, customer, and currency. To enable this you should check the box 'Interest Rate Based on Cumulative Amount' at Account Class level.

Note

- Interest rate based on cumulative amount is applicable only for rate chart allowed deposits.
 - TD accounts opened after the interest start date will not be considered for arriving at the cumulation amount.
-

The cumulation of the amount for arriving at the interest rate is done at the account level during the save of below events:

- Deposit account opening transaction
- Any interest rate change to the deposit - floating rate deposits, rate change on interest liquidation, rate change on rollover

If 'Interest Rate Based on Cumulative Amount' is checked at Account Class level, then system operates in the following ways:

- For deposits with 'LDMM rates' all the rate interest related UDEs will use the cumulative amount feature,
- Every time an interest rate change is triggered for a deposit system arrives at the new cumulative amount.
- When cumulating the amount of the deposits, the current deposit balance of all the deposits along with the new deposit amount is considered.
- For backdated deposit opening, all the active deposits as of the current system date are considered to arrive at the cumulative amount.

The following table displays the effect on the lifecycle events of the new deposit:

| Interest rate pickup | 'Interest Rate Based on Cumulative Amount' Flag Status | | | |
|----------------------|--|-------|-------------|-------|
| | YES | | NO | |
| | Base Amount | Tenor | Base Amount | Tenor |
| | | | | |

| | | | | |
|---|--------------------|--------------------|---------------------|--------------------|
| Opening | | | | |
| Rate change on interest liquidation flag -YES | | | | |
| Rate change on rollover flag – YES | Cumulative amount* | This deposit tenor | This deposit amount | This deposit tenor |
| Floating Rate | | | | |
| Premature redemption remaining amount (Partial) | | | | |
| Premature Redemption Amount (Full/Partial) | Redeemed amount | Completed tenor | Redeemed amount | Completed tenor |

When a deposit is opened automatically (like auto deposits, auto rollover etc.) the ‘Interest Rate Based on Cumulative Amount’ option from the account class is defaulted to the account level. For deposit opening/rollover from channels, this option can be set and send through the channel itself, else if it is not explicitly mentioned then the ‘Interest Rate Based on Cumulative Amount’ option set from the account class is defaulted and applied.

Once a deposit is opened, even if any of the deposit used to arrive at the interest rate is closed, the interest rate for the deposit remains the same. This is applicable for Dual Currency deposits, TDs created through Structured deposits, and Denominated deposits.

The interest statement, deposit advices, - deposit certificate (ICCOD), ICCOD_SIM, TDMM advice, Input slip advice, TD_ROLL statement, for the deposit account will have the advice Tags ‘_INTCUM_’ and ‘_BASEAMT_’. If the ‘Interest Rate Based on Cumulative Amount’ box is checked for the deposit, then the advice tag ‘_INTCUM_’ will have value ‘Y’ and this tag provides the option to display statements similar to ‘Interest rate for the deposit arrived using the cumulative amount of deposits available for the customer’. Also the advice tag ‘_BASEAMT_’ will have the value ‘Y’ and display the value of ‘Base Amount for arriving at the interest Rate’.

3.7 Pre-closure Factor Maintenance

During pre-mature redemption of a Term Deposit, a penalty can be levied on the interest amount. To calculate the penalty amount the pre-closure factor needs to be maintained based on the TD closing period percentage. This maintenance is computed based on the effective date for the currency and TD elapsed period percentage combination.

To maintain this pre-closure factor, you can invoke the 'Pre-closure Factor Maintenance' screen, by typing 'STDPCMNT' in the field at the top right corner of the Application tool bar and clicking the adjoining arrow button.

You can specify the following parameters:

Branch Code

The system defaults the logged in branch. You cannot modify it.

Pre-closure Factor ID

Specify a unique pre-closure factor ID with effective date. This is a mandatory field.

Description

Specify a brief description of the factor ID to be maintained.

Effective Date

Specify the date from which the factor ID will be effective from the adjoining calendar. A back-date value or a future dated value can be specified in this field. A duplicate date cannot be maintained for the same factor ID.

Currency

CCY

Select a valid currency code from the option list. Alternatively, you can select the currency from the option list. The list displays all valid currency codes maintained in the system. You can select a particular currency only once. If you select the same currency more than once, the system displays an error message. You can also select the option 'ALL' from the option list.

Pre-Closure Factor Details

Elapsed Period Percentage

Specify the percentage of the TD term at which the TD terms lapses. You can maintain multiple TD elapsed period percentages for a currency.

For example: A one year TD deposit is redeemed in 6 months then the Elapsed Period Percentage will be 50%.

For a particular currency, you can maintain multiple TD elapsed period percentage records.

Pre-closure Factor

Specify the pre-closure factor on the basis of the currency and elapsed period percentage maintained. You should specify a value between 0 and 1. The value '0' is not an allowed value.

During pre-mature redemption of the TD, the system calculates the percentage of completed tenor by using the following formula:

$$(\text{Completed Tenor}/\text{Actual Tenor}) * 100$$

Based on the completed tenor percentage the pre-closure factor which is maintained in this screen against the elapsed period percentage and the currency combination, is identified by the system. Both the completed and actual tenors are calculated from the account opening date of the deposit account.

Note

The day count method as maintained at the rule level is used for computing the completed and actual tenors. If branch is selected as 'ALL', the pre-closure factor maintained will be propagated to all the branches.

A System Data Element (SDE) 'PRE_CLS_FACT' computes the percentage of completed tenor and based on the result identifies the TD elapsed closing percentage and fetches the linked pre-closure factor. If the pre-closure factor is not maintained for a specific completed tenor percentage, then the SDE considers the value as 1.

The SDEs 'PRE_CLS_LIQ' identifies the liquidation period during pre-closure of the term deposit. If the interest calculation is performed for the liquidated period and for the redemption amount, SDE 'PRE_CLS_LIQ' will return the value as '1'.

The SDEs 'PRE_CLS_ACCR' identifies the accrual period during pre-closure of the term deposit. If the interest calculation is performed for the accrued period for the redemption amount, SDE 'PRE_CLS_ACCR' will return the value as '1'.

An SDE 'PRE_CLS' identifies whether the TD is redeemed pre-maturely or not. If the redemption is a pre-mature redemption, then the SDE considers the value as 1 or else the SDE considers the value as 0. For a partial redemption, the SDE considers the formula with the condition $PRE_CLS = 1$ and executes only for the redemption amount not for the remaining amount.

The formula setup is as follows:

| SI.No | Condition | Dr/Cr | Expression | Formula | Remarks |
|-------|---|-------|------------|--|---------|
| 1 | DEPOSIT_A MOUNT >0 AND PRE_- CLS = 0 | Cr | 1 | ((DEPOSIT_ AMOUNT * DAYS * TER- M_RATE) / (100 * YEAR)) | Booked |
| 2 | DEPOSIT_A MOUNT >0 AND PRE_- CLS = 1 | Cr | 2 | ((DEPOSIT_ AMOUNT * DAYS * (TER- M_RATE * PRE_CLS_- FACT)) / (100 * YEAR)) | Booked |

| SI.No | Condition | Dr/Cr | Expression | Formula | Remarks |
|-------|-----------------|-------|------------|----------------------------------|-------------|
| 1 | FORMULA1 > 0 | Dr | 1 | FORMULA1 * TAX- _RATE /100 | Tax Formula |

OR

| SI.No | Condition | Dr/Cr | Expression | Formula | Remarks |
|-------|--|-------|------------|--|---------|
| 1 | DEPOSIT_A MOUNT >0 AND PRE_- CLS = 0 | Cr | 1 | ((DEPOSIT_ AMOUNT * DAYS * TER- M_RATE) / (100 * YEAR)) | Booked |
| 2 | DEPOSIT_A MOUNT >0 AND (PRE_- CLS_LIQ = 1 OR PRE_- CLS_ACCR = 1) | Cr | 2 | ((DEPOSIT_ AMOUNT * DAYS * (TER- M_RATE * PRE_CLS_- FACT)) / (100 * YEAR)) | Booked |

| SI.No | Condition | Dr/Cr | Expression | Formula | Remarks |
|-------|-----------------|-------|------------|----------------------------------|-------------|
| 1 | FORMULA1 > 0 | Dr | 1 | FORMULA1 * TAX- _RATE /100 | Tax Formula |

For more information on how to create an SDE, refer to the section 'Invoking System Data Elements Maintenance' in the chapter 'Maintaining System Data Elements' in Interest and Charges User Manual.

4.1 Introduction

This chapter contains the following sections:

- [Section 4.2, "Creating a Deposit Account"](#)
- [Section 4.3, "Viewing Recurring Deposit Details "](#)

4.2 Creating a Deposit Account

This section contains the following topics:

- [Section 4.2.1, "Creating a Deposit Account"](#)

4.2.1 Creating a Deposit Account

You can create a term deposit account using the 'Deposit Account Booking' screen. To invoke this screen type 'STDCUSTD' in the field at the top right corner of the Application tool bar and click the adjoining arrow button. Select the 'New' button on the Application toolbar.

Here you can capture the following details.

Branch Code

The system displays the branch code of the sign on branch. If you have multi branch access rights, the system will display a screen where you can select the branch in which TD should be created.

Customer No.

Specify the customer identification (CIF) for whom you are creating a TD. The adjoining option list displays all valid CIF maintained in the system. You can choose the appropriate one.

Customer Name

The system displays the name of the customer based on the CIF specified.

Term Deposit Account Number

Account numbers can either be generated automatically or you can choose to allocate them manually. If you have enabled auto generation of customer account numbers at the bank parameters level, the system will create a unique reference number to identify the TD account and display it here, on pressing the 'P' (populate) button.

In case of manual number allocation, specify a unique account number.

In case of a child TD creation (as part of payout of parent TD), the number will be automatically generated.

To view the joint holder's details of an account and the mode of operation maintained at the account level, place the cursor on the Term Deposit Account field and press Ctrl+J. The system displays the 'Joint Holder' screen.

For more information on the 'Joint Holder' screen refer to the section 'Joint Holder Maintenance' in the Core User Manual.

Term Deposit Currency

Specify the currency of the TD. A list of all the currencies maintained in the system is displayed in the available option list. You can select the appropriate one. The TD will be created in the term deposit currency specified here.

SD User Reference

The system displays the SD user reference for the TD. This is the SD user reference number of the TD created out of structured deposit.

Account Class

Specify the account class to which the particular account belongs. You can select the appropriate account class from the option list that displays all 'deposit' type of account classes maintained in the system. Account classes that have surpassed their end date (expired) will not be displayed in the option list.

If the start date of the selected account is a future date, then on clicking 'Populate' button, the system will display an error message indicating that the account class was not available yet.

Pay-In Option

Pay-in By

Select the pay-in option from the adjoining drop-down list. This list displays the following values:

- Cheque
- Others

If you want to create TD through cheque, you must specify the pay-in option as 'Cheque'.

If the pay-in option 'Cheque' is selected, you need to pay the total TD amount only by cheque. During account class default, the account opening dates would be updated as expected value date of the cheque transaction based on the float days maintained at ARC maintenance level.

Note

- If the pay-in option once selected from the main tab cannot be changed after account class defaults.
 - Pay-in details of the cheque entered in the 'Main' tab will be automatically displayed in the 'Pay-in Details' multigrid. You cannot modify it. The pay-in option will be read only after the TD account number is populated.
 - Pay-in option as cheque is not applicable to discounted TDs.
-

If the pay-in option 'Cheque' is selected, you must specify the following details:

Cheque Instrument No

Specify the cheque instrument number.

Cheque Date

Specify the date of issue of the cheque.

The cheque date cannot be future date.

Cheque date cannot be back dated more than the cheque stale days. But, If the Cheque Stale Days is set to NULL at branch level, then the system allow you to proceed.

Clearing Type

Specify the clearing type for the transaction. The adjoining option list displays a list of the outward clearing products maintained in the system. You can select the appropriate one. The cheque clearing happens based on the clearing product specified.

Drawee Account Number

Specify the drawee account number.

Routing No.

Specify the Routing number.

Note

- If a TD account is opened with payin through cheque, then till float days completion, funds will be in Uncollected stage in TD account.
- TD account cannot be modified nor any operations are allowed till cheque clearance. The system displays an error as 'Account is in tanked status. Operation will not be allowed'
- Cheque can be rejected till the float days. If float days is 0, then cheque can be rejected only on current day.Rejection can be done through 6560, CGDCLGDT, IFDCLGDTor file upload.
- On cheque rejection, the REVR will be fired debiting the uncollected amount online, if cheque consolidation is not done.and RETN will be fired debiting the TD amount online, if cheque consolidation is done. In this case, uncollected will be released online.
- If cheque is rejected, the TD account will be closed in EOD.
- If the cheque float days is 0 & the transaction code availability is X days, then till that X days, funds will be in Uncollected & account will be in tanked status. No operation is allowed till the cheque clearance.

Details maintained in this screen are classified into the following tabs:

| | |
|-----------------------|---|
| Main | Here you maintain the main attributes of the TD like the account number, customer code, the account class, account currency, type of account - single or joint, account status etc. |
| Nominee | Here you can capture nominee details for the TD. |
| Check List | In this tab, you can maintain the details such as documents required for opening a TD, expected date of submission, expiry date and notification/reminder frequency. You can also upload the documents from this tab. |
| Dual Currency Deposit | In this tab, you can maintain details of a dual currency deposit. |

Note

The Customer Number, Pay in and Payout account numbers should be different. The following override message is provided to ensure that different account numbers are entered in these fields:

“Book TD with Single or Joint, Provide the IB, Pay-in and Payout A/C as differ customer”

4.2.2 **Main Tab**

On invoking the 'Deposit Account Booking' screen, this tab is displayed by default. You can specify the following details.

Initial Deposit Amount

The initial deposit amount displays the amount for which TD is created. If you have specified the percentage in the Pay-In options, on clicking the 'Compute' button, the system computes the amount. And while saving, the system validates the sum of Pay-In Amounts against the 'TD Amount' keyed in.

The system will validate the following:

- The deposit amount should be equal or greater than minimum booking amount maintained at the 'Deposits Cluster Maintenance' screen, else the system will display the error message “The deposit amount is less than the minimum booking amount”.

The deposit amount should be a multiple of the booking unit maintained at the 'Deposits Cluster Maintenance' screen, else the system will display the error message “The deposit amount must be in multiples of booking unit”.

Principal Balance

Principal balance displays the initial deposit amount in TD on save. If any top-up or redemption has happened on the TD, then the Initial deposit amount plus Top-up less redeemed amount is displayed here. Liquidated interest added to TD account will not be considered. On closure/full redemption, the Principal balance will be made as 0.

Account Type

You have to indicate whether the account is to be opened only by the account holder or whether it can be jointly operated. Select one of the following account types:

- Single - If you select this, you need to capture the details of single account only
- Joint - If you select this, the joint holder details needs to be specified under 'Joint Holder sub-screen.

Mode of Operation

Indicate the mode of operation. Choose one of the following options from the drop-down list:

- Single
- Jointly
- Either-Anyone or Survivor
- Former or Survivor
- Mandate Holder

Next Maturity Date

On selecting the rollover for the TD account, the system defaults the next maturity date based on the rollover tenor option of the deposit. This is updated only for rollover TD's.

The display of next maturity date is based on the Rollover tenor options:

- Account class Tenor: This is the default value of the rollover tenor if the Re-pick up account class tenor on rollover is yes. If account class tenor is selected, the next maturity date will be blank since the account class tenor is subject to change. On rollover, the account class default tenor will be picked and applied to TD. However, this default option can be changed anytime during the life cycle of the TD and a configurable override "Re-pick account class tenor on rollover restrictions exists at account class" will be displayed on save. The rollover tenor in days, months & years will be null and non-amendable.
- Account Tenor: This is the default value of the rollover tenor if the Re-pick up account class tenor on rollover is No. However, this default option can be changed anytime during the life cycle of the TD and a configurable override "Re-pick account class tenor on rollover restrictions exists at account class" will be displayed on save. The rollover tenor in days, months & years will be populated with the original tenor of the TD and will be non-amendable. The next maturity date will be calculated based on the maturity date + account tenor.

Independent tenor : The rollover tenor in days, months & years will be amendable and you are allowed to input if independent tenor is selected. The rollover tenor should be within the min / max tenor specified at account class. The rollover tenor will be validated for not null during save. Interest Rate

Click Compute button to display the interest rate. The system displays the interest rate of the main interest UDE linked to the IC product.

If the interest rate for the main Interest UDE is customized using the 'Interest' sub-screen, the system will display the customized rate here.

Along with the interest rate in the 'Interest' sub-screen, this will be re-populated during liquidation, redemption and rollover, based on the instruction at the product level.

On clicking on 'Save' or 'Compute', system defaults the next maturity date based on the rollover tenor option of the deposit. This is updated only for rollover TDs.

System calculates the next maturity date based in the current maturity date and the rollover tenor maintained at the account level. System calculates the next maturity date based on the changes to the maturity date due to holiday treatment.

Stock Catalog Code

The system displays the Stock Catalog Code of the TD certificate number. The term deposit certificate has to be maintained as an inventory. On generation of certificate from 'Term Deposit Advice' (ICDBADHC) screen, the stock catalog code will be updated to TD account automatically.

Certificate Number

The system displays the TD certificate number in Main tab. On generation of TD certificate, the certificate number will be updated in the TD account automatically. On duplicate certificate generation/rollover issue, the latest certificate number issued against the TD account will be updated in TD account.

Deposit Tenor

The system calculates the tenor of the deposit account to the difference between Interest start date and Maturity date and displays it. In case of change in maturity date, the system changes the deposit tenor.

Note

System validates that the deposit tenor is within the minimum and maximum tenor allowed for the account class. If this validation fails, then system displays the error message, "Deposit tenor does not fall in the range of minimum and maximum tenor allowed".

Tenor of TD account cannot be modified during the lifecycle of TD account, It can be done through ICDREDMN- Tenor modification feature only. Tenor can be modified before authorization. You can modify the default tenor during the following:

- Deposit account opening
- Any time before maturity during the life cycle of the deposit
- On rollover of the deposit

On rollover of TD account, different rollover tenor can be specified, which will be considered as Deposit tenor on rollover.

If you specify the tenor, the system computes the maturity date. Once the record is authorized, you cannot amend the tenor.

The deposit tenor is represented in terms of years, months and days. For example, if the deposit tenor is 185 days, it should be represented as 0 years, 6 months and 5 days. You need to specify the values in the appropriate fields.

If the arrived maturity date falls on a holiday, then the system will adjust the maturity date as per the Holiday Treatment Maintenance at Account Class level and update revised tenor.

Years

This indicates the number of years in the deposit tenor.

Months

This indicates the number of months in the deposit tenor.

Days

This indicates the number of days in the deposit tenor.

Maturity Date

The system defaults the maturity date from the default tenor from the account class. However, you can modify this date. On this date the term deposit account gets liquidated.

Interest Rate

The rate of interest.

Maturity Amount

Click Compute button to display the maturity amount. System computes Maturity Amount based on the TD booking amount and the accrued interest till maturity. Maturity amount is based on the capitalized interest (P + I), if the booking account and the interest liquidation account are the same and the interest payout details are not provided.

Note

In case of rollover in a TD account, the system recalculates the interest rate and maturity amount and displays the values accordingly. On partial redemption, the system re-computes and displays the interest rate and maturity amount.

The SDE 'DEPOSIT_AMOUNT' is used for displaying the 'Maturity Amount' on the screen.

Refer the chapter '*Annexure B - IC Rule Set-up*' in this user manual for details about the formula for calculating interest rate and maturity amount.

Duplicate

If any duplicate certificate is generated for the TD account, this box will be checked automatically on generation of duplicate certificate. By default, this box will be unchecked.

Sanction Check Status

The system displays the status of the sanction check request.

Sanction check will not be sent for Child TD, TD creation from SF and Auto Deposit Creation.

Original Tenor

This indicates the original tenor of the deposit. The system displays the default tenor or the tenor specified for account, which is arrived before the holiday movement. You can view the original tenor in terms of years, months and days. For example, if the deposit tenor is 185 days, it is represented as 0 years, 6 months and 5 days.

This value cannot be modified. It stores the account class tenor/ user modified tenor before holiday adjustment, if any.

Years

This indicates the number of years in the original tenor.

Months

This indicates the number of months in the original tenor.

Days

This indicates the number of days in the original tenor.

Auto Rollover

Check this box to automatically rollover the deposit you are maintaining. If you check this box, then you need to specify the rollover tenor.

Close on Maturity

Check this box to close the account automatically on maturity date.

Move interest to Unclaimed

Check this box to move the interest amount to the unclaimed GL mapped at the IC product in the accounting role 'INT_UNCLAIMED' on Grace period End date. If you select this option, then you will have to check the box 'Move Principal to Unclaimed'.

Note

- If you have selected auto rollover, then this field will not be applicable.
 - Funds will be moved to unclaimed GLs only if the maturity options have not been specified. If an account matures and no action is taken (closure or roll-over) within the grace period, then the funds are moved to the unclaimed GLs on the EOD of the last day of the grace period (maturity date + grace days).
-

Move Principle to Unclaimed

Check this box to move the principal amount to the unclaimed GL mapped at the IC product in the accounting role 'PRN_UNCLAIMED' on Grace period End date. If you select this option then only principle amount will be moved to unclaimed and Interest will be settled to TD payout. If You select both 'Move Interest to Unclaimed' and 'Move Principle to Unclaimed'

then TD amount (i.e. P+I will be moved to Unclaimed GL, irrespective to the TD payout Details).

Cascade Month -End Maturity Date

Check this box to cascade the month end maturity date of the deposit. If not selected then, the maturity date will fall in line with the account open date. To cascade to function, tenor should be multiple of months.

This value gets defaulted based on account class.It should by default be checked.

Computed Amount

On clicking the 'Compute' after specifying the percentage under the 'Pay-In Details' section the system computes the amount of the TD in this field.

On saving the record, the system validates the sum of Pay-In amounts against the 'TD Amount' keyed in.

Payin Details

You can specify the following details of the deposit:

Term Deposit Pay In Option:

The TD module allows you to fund a TD using multiple pay-in modes viz:

- Pay in by transfer from GL - In case of pay-in through GL, the offset GL account maintained at 'TD Payin Parameters' (STDTDPAY) screen should be selected.If the offset GL account is not specified, the GL maintained at TD Payin Parameters' (STDTDPAY) will be defaulted and used on save of TD
- Pay in by transfer from Savings Account - In case of pay-in from savings account, it is mandatory to specify the offset account. If it is not specified, the system displays an error on saving the TDaccount. If the pay-in account specified is disallowed for the TD product, then on saving the account, the system displays an error message. The account specified is debited and TD will be created.
- Pay in by Cheque - In case of pay-in by cheque, the TD should be entirely funded by a single cheque. Multimode, combining multiple cheques or part payment by cheque and the rest by other modes, is not allowed.
You can also have a combination of the aforesaid modes while funding a single TD. Once the TD account is created, the system considers each of the pay-in options entered in this screen and processes it accordingly.
You can specify the TD funding amount as a percentage or as an absolute value. You can fund a TD by cash too.
However, this option is available for TD creation through the Savings module (TDMM) only.You can

Percentage

Specify the percentage amount that funds the TD by the pay-in mode

Amount

Specify the amount that funds the TD. If you have specified the percentage, then the system computes the amount.

Note:

When Amount and Percentage options are provided, amount takes precedence and percentage is ignored.

Offset Branch

The system populates the branch code of the account from which fund is transferred to TD account.

Offset Account

Specify the account number/ GL from which the fund is transferred to TD account. This field returns the branch code if the account is selected and NULL is returned if GL is selected. If Pay-In mode is GL, then the system displays only GL's and if the Pay-In mode is Account then only accounts are displayed in the option list.

Offset Currency

The currency of the TD amount.

Cheque Instrument No

Specify the cheque instrument number.

Clearing Type

Specify the clearing type for the transaction. The adjoining option list displays a list of the clearing types maintained in the system. You can select the appropriate one.

Cheque Date

Specify the date of issue of the cheque.

Drawee Account Number

Specify the drawee account number.

Routing No

Specify the Routing number.

Original FX Rate

The FX rate picked up by the system.

Applied FX Rate

The FX rate entered by the user.

In the following scenarios the Applied FX rate should be equal to the Original FX rate:

- If the Deposit Account Currency and the Pay-In/Out Account Currency are same.
- If the Rate Type/Rate code combination is not maintained at the account class for a Pay-In/Out Mode. In this case the system considers the STANDARD Rates as the default and the MID Rate code as the existing rate type.

Offset Amount

The offset amount displayed after saving the details.

Payout Details

The TD module allows you to close a TD using multiple pay-out modes viz:

- Pay-out by Bankers Cheque
- Pay-out by transfer to GL
- Pay-out by transfer to own bank Savings Account
- Pay-out by transfer to Other Bank's Account
- Pay-out resulting in a new child TD
- Pay-out by Demand Draft

You can specify following pay out details of the deposit:

Payout Type

Indicate the method for settlement of the TD on maturity date. The payout instructions are mandatory in case of Close on Maturity, Rollover Principal, Rollover Interest and Special Amount. The payout option can be specified separately for Principal and Interest components. The following payout options are available:

- Bankers Cheque
- Payments
- General Ledger
- Account
- Term Deposit
- Demand Draft

Percentage

Specify the percentage of payout for each payout option specified.

Offset Branch

The system displays the branch code of the account to which fund is transferred from TD account.

Offset Account

Specify the account number/ GL to which the fund is transferred to TD account on liquidation, maturity or rollover. This field will return the branch code if the account is selected and NULL will be returned if GL is selected. If pay-out mode is GL then the system displays only GLs in the option list. If the pay-out mode is Account then the system displays only accounts in the option list.

The offset account should not be specified for payout through Bankers Cheque, Demand Draft, Payments and Term Deposits.

To view the joint holder's details of an account and the mode of operation maintained at the account level, place the cursor on the Offset Account field and press Ctrl+J. The system displays the 'Joint Holder' screen.

For more information on the 'Joint Holder' screen refer to the section 'Joint Holder Maintenance' in the Core User Manual.

Narrative

Specify the description for the payout.

Payout Component

Select the payout component from the options given below. The options available are:

- Principal
- Interest

Note

You can select separate payout types for principal and interest components respectively. If you select different payout types for the principal and interest, these components will be paid out through the respective modes.

Payout component for interest is not mandatory. If you do not specify it, the interest will be liquidated to the principal payout account.

Payout of interest component through term deposit is not supported. Multiple payout modes with banker's cheque or demand draft are not allowed.

Recurring Deposit

You can maintain the pay-in details for recurring deposits here:

Auto Payment Take Down

Check this box to allow the recurring deposit account to debit the payment account for the payment amount as per the installment frequency. If you check this box, the payment account will be debited automatically for installment collection on the due date. If you do not check this, the payment has to be done manually through 'Recurring Deposit Payment Input' screen.

The system triggers the event 'RDLQ' on installment payment. Payment to account will be successful only if the redemption transaction code is specified at IC branch parameter level.

Move Maturities to Unclaimed

Check this field to move all the funds, on the maturity date, to the unclaimed GL mapped to the accounting role in the IC product.

The system un-checks and disables this box for RD.

Payment Branch

Specify the details for the branch to which the payment account belongs.

Payment Accounts

Specify the payment account; this can be either savings account or the current account from which the installment for the Recurring Deposit is collected as per the installment frequency. If you have not checked the option 'Auto Payment Take Down', the system will not allow you to specify the payment accounts.

To view the joint holder's details of an account and the mode of operation maintained at the account level, place the cursor on the Payment Accounts field and press Ctrl+J. The system displays the 'Joint Holder' screen.

For more information on the 'Joint Holder' screen refer to the section 'Joint Holder Maintenance' in the Core User Manual.

Installment Amount

Specify the installment amount that has to be collected from the payment account as per the installment frequency. This installment amount should be greater than the minimum installment amount mentioned at the account class.

Recurring Deposit Account

Check this box to indicate recurring deposit account. For recurring deposits, by default this checkbox will be checked.

Payment Date

The system displays the account booking date as the date on which the payment is made for recurring deposit account. You cannot modify it.

This is the date on which the payment will happen. On successful payment of installments, the system changes the payment date to the next due date based on the installment frequency.

Payment Currency

The system displays the account currency of the payment account.

Note

- The system enables the offset account and branch detail fields only if the option to pay is selected as the savings account.
 - The Unclaimed Interest and Principal GLs are specified while maintaining an Interest and Charges (IC) Deposit Type product. The Accounting Roles for the GLs are 'INT_UNCLAIMED' and 'PRN_UNCLAIMED' respectively. When maintaining an IC-Deposit type product, you have to map these Accounting Roles to the appropriate GLs maintained at your bank.
 - The system allows you to select 'Close on Maturity' box, only when you specify the recurring deposit details. You have to maintain deposit transaction code as 'DPN', RD Payment transaction code as 'RED' and prepayment transaction code as 'TRF' for the recurring payments in the Branch Parameters for the Interest and Charges.
 - On booking date, RD installment accounting entries are posted during the IC batch (Post End of Transaction Input stage). From the second installment, entries are posted during every IC BOD batch on the schedule date.
 - If an RD installment is overdue due for insufficient funds in the payment account, then the system will collect the overdue installment amount as soon as funds are available, during the IC batch (Post End of Transaction Input stage) on that day. During the same batch the system will also calculate the number of overdue days and apply penalty on that,
 - RD penalty amount is calculated at the EOD, but penalty is collected on account liquidation date from the interest booking account.
-

Installment Frequency

Specify the following details:

Move funds on Overdraft

Check this option to indicate that the system should pass an overdraft in the payment account (i.e. CASA) when the account does not have sufficient funds for making RD installment payment.

Days

Specify the installment frequency in terms of days.

Months

Specify the installment frequency in terms of months.

Years

Specify the installment frequency in terms of years.

The installment frequency needs to be greater than the minimum schedule days and less than the maximum schedule days specified at account class level.

Auto Deposit

A TD can also be automatically created from a savings account if the balance in the savings account exceeds a predefined limit. You can capture the following details of such a TD:

Sweep Type

The system indicates the type of sweep based on which the TD was created. It can be any one of the following:

- -1 - This indicates 'No sweeps'.

- 1 - This indicates 'Default from account class'.
- 0 - This indicates that deposit is instructed.

Master Account No

The system displays the account number of the savings account from which this auto deposit was created.

Account Details

Account Description

This is the description of the account. Here you can enter the nature of the TD account. If a customer has two or more accounts under one account class you can specify the purpose of that account.

In case of child TD, the system automatically populates the description on creation of child TD.

Country Code

Specify the country code to define country limits. The adjoining option list displays all valid country codes maintained in the system You can select the appropriate one.

Account Open Date

The date on which the account has to be opened is defaulted based on the account class selected here. You can however change the opening date of account.

In case of pay-in through cheque, the account open date can be a future date considering the expected date of clearing.

Alternate Account Number

The system displays the account number as the alternate account number. However, you can change it.

Clearing Bank Code

The code for the bank serving as clearing house for the account is displayed here.

Address Code

Specify the address code from the adjoining option list.

Address 1

Specify the address of the customer.

Pincode

The customer's postal code.

Location

An address for a customer account is based on the 'Location' and 'Media' combination. Location codes maintained through the 'Account Address Location Type Maintenance' screen are made available against this field. Select the appropriate one. The address maintained here is always the primary or the default address. Each customer can have several addresses for a particular media. To distinguish between one address of a customer from another for a given media, it is essential for you to specify a unique location for each address.

Media

Select the media to communicate account related details to the customer, such as account maintenance related charges, fees, interest etc. from the option list. You can choose any one of the following:

- FAX

- MAIL
- SWIFT
- TELEX

Option

Indicate your preferences for the following:

Track Receivable

Check this box if you choose to block the subsequent credit that happens to the settlement account (linked to this account class) of a loan contract or retail teller contract, if the system detects insufficient funds in the account, during liquidation. In other words, the system will track the account for receivables (credits). As and when a credit happens, the funds will be allocated to the loan or the retail teller contract for liquidation.

Replicate Customer Signature

Check this box to indicate that customer signature should be replicated to the account.

Goal Account Details

Goal Reference Number

At the branch level, you can specify the goal reference number. If received from channels then the goal reference number will be auto populated.

Target Amount

At the branch level, you can specify the goal amount. If received from channels then the goal amount will be auto populated.

Auto Rollover

Check this box to automatically rollover the deposit you are maintaining. You have to indicate 'Rollover Type' on selecting this option. The TD will be rolled over automatically on maturity date during beginning of day operations.

Close on Maturity

Check this box to close the term deposit account on maturity date and transfer the amount as per the TD pay-out details. For a recurring deposit, you need to mandatorily check this box.

For a TD, only one of the options - Close on Maturity, Auto Rollover or Move Interest & Principal to Unclaimed - can be checked.

Move Interest to Unclaimed

Check this box to move the interest amount to the unclaimed GL mapped at the IC product in the accounting roles on grace period end date. If you select this option, you will have to check the box 'Move Principal to Unclaimed'.

Move Principal to Unclaimed

Check this box to move the principal amount to the unclaimed GL mapped at the IC product in the accounting roles and liquidate the interest amount to the interest booking account on grace period end date.

If you have checked the option 'Move Interest to Unclaimed' it is mandatory to check 'Move Principal to Unclaimed'. If both options are checked, on the maturity date or at the end of grace days, the system will close the TD and move the proceeds to the unclaimed GL maintained at IC product.

If you check the option 'Move Principal to Unclaimed' alone, the system will display an error 'If Move Interest to Unclaimed is checked, Move Principal to Unclaimed should also be checked' if you check both the boxes, payout instruction is not allowed.

Note:

If both principal and interest have to be moved to unclaimed, then interest booking account should be a TD account only. If not, an error message "Booking account should be TD account when move Interest to unclaimed is checked" will be displayed.

Intermediary Details

Intermediary Required

Check this box to link Intermediaries with Term Deposit. If this is checked, the intermediary is allowed to be attached to TD account. If you do not check this, the system displays an error when you attempt linking intermediary to the TD.

Intermediate

Intermediary Code

Specify the intermediary code from the adjoining option list.

Intermediary Description

The system gives a brief description about intermediary code.

Intermediary Ratio

Specify the ratio of individual intermediary contribution against the Term Deposit account. The commission for intermediary will be calculated according to the ratios specified for each intermediary.

Sweeps

In this section you can enable Sweep In and Reverse Sweep In.

Enable Sweep in

Check this box to enable sweep in.

Enable Reverse Sweep in

Check this box to enable reverse sweep in. You can check this box only if the 'Enable Sweep in' check box is checked. If the check box is checked without checking 'Enable Sweep in', the system disable saving, current account class creation and amendment of the account class.

4.2.3 Viewing Amounts and Dates

You can view all financial details of this account along with the details of the previous debit or credit activities. However, access to all financial information of an account can be restricted for any user. The financial details of an account include the account balance, the uncleared debit and credit balances, the debit and credit turnover and the interest details. The turnover limit details of an account include the current financial period, currency, utilized and unutilized limit balances.

Click 'Amounts and dates' button in the 'Deposit Account Booking' screen.

| | | |
|---------------------------------|------|-------------------------------|
| Branch | | |
| Account | | Opening 0.00 |
| Opening | 0.00 | Daily Turnover (Dr)(LCY) 0.00 |

| Debit (Dr) | 0.00 | CR Activity |
| Turnover | | |

The total available balance displayed by the system includes the initial funding amount and unutilized line amount (in case the customer enjoys an OD limit). You can also view the outstanding debit interest and/or charges due on the account, as on the current date.

You can also view the amount that can be withdrawn against uncollected funds, on the account. The system computes the allowable amount based on the 'Withdrawable Uncollected Funds Basis' option specified in the Branch Parameters Preferences screen.

Unposted

When this branch is under EOD processing, the inter-branch transactions that have originated from other branches are tanked. The funds are made available automatically after BOD and till such time they are treated as unposted items.

4.2.3.1 Viewing Turnover Amounts

In the Customer Account - Turnover Amounts screen you can view the total turnover of this customer account from the first date of this month to the current day's system date. Also, you can view the accumulated interest associated with debit or credit transactions after the last liquidation.

To view the turnovers for the account, click the 'Turnover' button.

4.2.4 Nominee Tab

Click 'Nominee' tab on the 'Deposit Account Booking' screen. The following screen will be displayed.

The screenshot displays the 'TD Accounts Maintenance' application window. The 'New' form is open, showing account details such as Branch (000), Customer No (000007), and Term Deposit Account Number (000280441026). The 'Pay In Option' section includes a dropdown menu set to 'Others'. The 'Nominee Details' section contains fields for Name, Date of Birth, Relationship, Address Code, and four address lines (Address 1-4), along with a Pincodes field and a 'Minor' checkbox. A 'Guardian Name' section includes fields for Guardian Name, Relationship, Address Code, and four address lines (Address 1-4), along with a Pincodes field. At the bottom, there are navigation links and a status bar with fields for Maker, Checker, Date Time, Mod No, Record Status, and Authorization Status, and an 'Exit' button.

Specify the following details:

Name

Specify the name of the nominee.

Date of Birth

Specify the date of birth of the nominee.

Relationship

Specify the relationship of the nominee with the customer.

Address 1 to 4

Specify the address of domicile of the nominee. You can enter the address in four lines. You can specify a maximum of 105 alphanumeric characters in each line.

Minor

Check this box if the nominee is a minor.

Guardian Name

If the nominee is a minor, specify the name of the guardian.

Relationship

Specify the relationship of the guardian with the minor.

Address 1 to 4

Specify the address of domicile of the guardian. You can enter the address in four lines. You can specify a maximum of 105 alphanumeric characters in each line.

4.2.5 Dual Currency Deposit Tab

Click 'Dual Currency Deposit' tab on the 'Deposit Account Booking' screen. The following tab will be displayed.

The screenshot shows the 'Dual Currency Deposit' tab in the TD Accounts Maintenance system. The interface includes a header with the window title 'TD Accounts Maintenance' and a 'New' tab. The main content area is divided into several sections. At the top, there are input fields for 'Branch * 000', 'Customer No * 000007', 'Term Deposit Account Number * 000280441026', 'Customer Name FAISALCORP', 'Term Deposit Currency * GBP', 'Account Class * TDIRV1', and 'Pay In Option' (set to 'Others'). Below these are fields for 'Clearing Type', 'Cheque Instrument No', 'Drawee Account Number', 'Cheque Date', and 'Routing No'. A navigation bar below the main content area includes tabs for 'Main', 'Nominee', 'Check List', and 'Dual Currency Deposit'. The 'Dual Currency Deposit' section contains fields for 'Linked Currency', 'Currency Option Product', 'Option Contract Reference', 'Exchange Rate', 'Linked Currency Settlement Account', 'Linked Currency GL', 'Fixing Days', 'Yield Enhancement', and 'Inception Fair Value'. At the bottom, there is a navigation bar with links for 'Interest', 'Charges', 'Linked Entities', 'Restrictions', 'MIS', 'Statement', 'Joint Holders', 'Fields', 'Account Signatory', 'TD Payout Details', 'Statistics', 'Interest Payout Details', 'Rollover History', and 'Documents'. A status bar at the very bottom displays 'Maker 2014-01-01 18:37', 'Date Time', 'Mod No', 'Record Status', 'Checker 2014-01-01 18:37', 'Date Time', 'Authorization Status', and an 'Exit' button.

Specify the following details:

Dual Currency Deposit

You can capture the following details for the deposit.

Linked Currency

This option is defaulted from the account class. However you can modify this value.

Currency Option Product

Specify the currency option product from the option list under which the Options Contract has to be created in case of Dual Currency Deposit. The option list displays all the Option Products with Product Type 'CO'.

Note

You need to mandatorily specify this product if the 'Linked Currency' is entered. You will be allowed to capture this value here only if the option 'Dual CCY Deposit' is checked at the 'Account Class Maintenance' screen. You will be allowed to modify this value even after authorization.

On saving the account, system validates the following to ensure that the currency option product selected here has the below features:

- Contract type is Trade
- Option Type is Call
- Deal Type is Buy
- Option Style is Plain Vanilla
- Barrier is not allowed

- Delivery type is Physical
- Expiration Style is American

Option Contract Ref No.

The system displays here the reference number of Options contract that is being created while authorising the dual currency TD account.

Exchange Rate

Specify the exchange rate between TD account currency and the linked currency. Initially, it will be defaulted with the standard exchange rate. However, you are allowed to change the same.

Linked Currency Settlement A/c

Here you can specify the settlement account of the linked currency in case if the settlement has to happen in the linked currency at maturity. The adjoining option list displays all valid accounts maintained in the system. You can select the appropriate one.

Linked Currency GL

You can capture the GL used for posting the settlement entries in the linked currency. The adjoining option list displays all valid GLs maintained in the system. You can select the appropriate one.

Fixing Days

Specify the number of days from TD maturity date before which the exchange rate has to be fixed. This will be defaulted from the 'Account Class Maintenance' screen. However you change it. Fixing days cannot be lesser than zero or greater than the tenor of the TD.

Yield Enhancement

Specify the additional yield percentage that the customer receives for agreeing on the currency Option. This is the premium paid to the customer for investing in dual currency deposits.

Inception Fair Value

Specify the market value of the option contract at inception. This will be defaulted in the linked Options contract.

4.2.6 Check List Tab

Click 'Check List' tab on the 'Deposit Account Booking' screen. The following screen will be displayed.

The screenshot displays the 'TD Accounts Maintenance' application window. The 'New' form includes the following fields:

- Branch * 000
- Customer No * 000007
- Term Deposit Account Number * 000280441026
- Customer Name FAISALCORP
- Term Deposit Currency * GBP
- Account Class * TDIRV1
- SD User Reference
- Pay In Option: Pay in By Others
- Clearing Type
- Cheque Instrument No
- Drawee Account Number
- Cheque Date
- Routing No

The 'Document List' table has the following columns: Document Type, Mandatory, Expiry Date, Expected Date of Submission, Actual Date of Submission, and Document R. The table is currently empty.

Navigation links at the bottom include: Interest | Charges | Linked Entities | Restrictions | MIS | Statement | Joint Holders | Fields | Account Signatory | TD Payout Details | Statistics | Interest Payout Details | Rollover History | Documents | Denominated Deposit | Rollover Details | Banking Channels | Change Log.

Footer information: Maker 2014-01-01 18:37, Date Time, Mod No, Record Status, Checker 2014-01-01 18:37, Date Time, Authorization Status, and an Exit button.

Specify the following details:

Document Type

The system displays the document check list based on the customer type.

Mandatory

Based on the details maintained in the account class for the document type, the system indicates whether it is a mandatory document or not. If this box is checked, the document is mandatory. If it is not checked, it is not mandatory.

Expiry Date

Specify the expiry date of the document provided by the customer.

Note

- Expiry date will always be greater than 'Expected Date of Submission' and 'Actual Submission Date'.
 - Expected Date of Submission will always be greater than current date.
-

Expected Date of Submission

Specify the expected date on which the customer is accepted to submit the required documents. If the documents are not submitted by the customer at the time of opening a TD, you need to specify the expected date of submission. The TD is booked if the documents are available and uploaded. If they are not available, you need to specify the expected date of submission of documents for opening the TD.

Actual Submission Date

System displays the actual date on which customer has submitted the required documents.

Document Reference

Once the document is uploaded, the system defaults the document reference here.

Checked

Check this box to indicate that the received documents are acknowledged.

Note

You cannot save and authorize an account if the mandatory documents are not confirmed as 'Checked'.

Upload

Click on this button to upload the selected document type.

Delete

Click on this button to delete the selected document.

View

Click on this button to view the selected document.

Notification Details

System defaults notification details from the 'Account Class Maintenance' screen.

Send Notification

This check box indicates whether to send notifications or reminders for not submitting the mandatory documents.

Frequency (Notification)

System defaults the frequency of notification to be sent. The frequency can be one of the following:

- Daily
- Weekly
- Monthly
- Quarterly
- Half yearly
- Yearly

Note

Notification will be sent only if

- the check box 'Send Notification' is checked in Account Class Maintenance' screen.
- the account status is active and authorized.

- the mandatory documents are not submitted.

Notifications will be sent based on the frequency specified.

First notification will be sent on the expected date of submission or expiry date

If notification date falls on a holiday then system will send the notification on next working day.

Days (Reminder)

System defaults the number of days left for the expiry or submission due date of the documents for sending the reminder.

System will send the following reminders:

- Reminder prior to the submission due date of the document.
 - Reminder prior to the expiry date of the document.
 - Overdue notifications after the due date if the document is not submitted based on the frequency.
 - Notifications after the expiry date if the document is not submitted after the expiry date.
-

Note

Reminder will be sent only if,

- the mandatory documents are not submitted.
- the account status is active and authorized.

Reminder will be sent only once.

If reminder date falls on a holiday then system will send the notification on next working day.

Reminder will be sent prior the number of days specified at the account level from expected date of submission or the expiry date.

If there are more than one notifications or reminders of the same message type for which the notification schedule date falls on the same day for the same account, a single notification will be sent which will have the details of all the related documents.

Remarks 1 to 10

Specify the additional information, if required.

4.2.7 Banking Channels Button

The system defaults the common channel information captured at CIF and account class levels during TD account creation.

The screenshot shows a software window titled "Banking Channels Subscription Details". The window contains a section for "Banking Channels Details" with a navigation bar showing "1 Of 1" and a "Go" button. Below the navigation bar is a table with two columns: "Banking Channel Name" and "Remarks". The table is currently empty. At the bottom right of the window, there are "Ok" and "Exit" buttons.

Specify the following details:

Banking Channels

Specify the banking channels code. Alternatively, you can select the list of channels from the option list. The list displays the channels maintained in the system.

Banking Channel Name

The system displays the name of the banking channel.

Remarks

Specify remarks for the banking channel subscription.

Note

- While populating the channels to the Customer Account screen, the system populates only the channels which are allowed in primary CIF and Account Class. The system defaults the remarks maintained at customer level to the account. You can modify it.
- You can delete the channels which need not be allowed at the customer account level, but you cannot add the channels which are disallowed at the customer or account class level. The system will display only those channels which are available in both CIF and account class levels.
- You can add channels which are mapped at both CIF and Account Class levels. You cannot delete a channel at CIF/Account Class level, which is already mapped to accounts (authorized or unauthorized) belonging to the CIF/Account Class. The system checks only for active accounts. You can delete the channels from customer/account class level only if the account is closed. During reopen of the account, the system validates whether the account is modified after reopening.

- When an account is created automatically from Customer Creation screen, the channels maintained at both Customer and Account Class is defaulted to the account. If no maintenance is performed at CIF/account class levels for channels, the system does not populate any channels at account.
- When account class transfer happens during batch, the system deletes the existing channels attached to the account and repopulates from the new Account Class and Customer.

During authorization of the account, the system does not repopulate the channel details. While authorizing primary party change, the system defaults the existing channels which are attached to the account and repopulates from the new Customer and Account Class. You can modify the channel information from the main screen for Customer Account Creation.

During save, the system defaults the channel details from Customer and Account Class of the account. You can modify the details in the Account Creation screen (STDCUSTD).

4.2.8 **Capturing Additional Details**

You can capture additional details for the account by clicking the following buttons in the 'Deposit Account Booking' screen:

| Button | Function |
|-------------------------|---|
| Interest | This invokes the 'IC Special Conditions Maintenance' screen. |
| Charges | This invokes the 'Account level charges conditions' screen. |
| Linked Entities | This invokes the 'Linked Entities' screen. |
| Restrictions | This invokes the 'Products and Transaction Codes Restriction' screen. |
| MIS | This invokes the 'Management Information System' screen. |
| Statement | This invokes the 'Statement Details' screen. |
| Joint Holders | This invokes the 'Linked Entities' screen |
| Fields | This invokes the 'User Defined Fields' screen. |
| Account Signatory | This invokes the 'Signatory Details' screen. |
| TD Payout Details | This invokes the 'Term Deposit Payout Details' screen. |
| Statistics | This invokes the 'Account Statistics' screen |
| Interest Payout Details | This invokes the 'Interest Pay-out Details' screen |
| Rollover History | This invokes the 'Rollover History' screen. |
| Documents | This invokes the 'Document Upload' screen. |

| | |
|---------------------|--|
| Denominated Deposit | This invokes the 'Denominated Deposit' screen. |
| Rollover Details | This invokes the 'TD Rollover Details' screen. |
| Banking Channels | This invokes the 'Banking Channels Subscription Details' screen. |
| Change Log | This invokes the 'Customer Address Change Log' screen. |

Refer the chapter 'Capturing Additional Details' in this User Manual for details about the aforesaid buttons.

At the time of saving of a customer account or TD, the account or TD's details will be passed on to the FATCA account and obligation maintenance. The details will be passed on if the customer who would be the beneficiary of the interest/proceeds of the account has a reportable FATCA classification and if the account class used to open the account or TD is present in the FATCA Products, Account Class and Instruments Maintenance.

At the time of closure or deletion of an account/ term deposit, if the details of account / term deposit exists in the accounts and obligations maintenance, then the account / term deposit details will be removed from the maintenance and archived.

While saving the transaction, if you had modified the interest rate at TD account level for TD booking or for creating Payout TD, the system displays configurable override messages.

These overrides are displayed during subsequent modifications of the interest rate. You can also configure overrides for Dual Authorization to be displayed at Contract and Maintenance level in the 'Override Maintenance' screen.

For more information about configuring overrides, refer to the section 'Override Maintenance' in the chapter 'Configuring Overrides' in the Core Services User Manual.

4.2.9 Viewing Term Deposit Account Details

You can view the term deposit account details maintained in the 'Deposit Account Booking' screen using the 'Deposit Account Summary' screen. You can invoke this screen by typing

'STSCUSTD' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

The screenshot shows a web application window titled 'Summary'. At the top, there are tabs for 'Search', 'Advanced Search', and 'Reset'. Below these are two columns of search criteria, each with a dropdown menu and a search icon (magnifying glass):

- Authorization Status
- Branch
- Account Description
- Term Deposit Currency
- Certificate Number
- Record Status
- Term Deposit Account Number
- Customer Number
- Stock Catalog Code
- Maturity Date

Below the search criteria is a navigation bar with 'Records per page' set to 15, '1 Of 1' records, and a 'Go' button. Below this is a table with the following columns: Authorization Status, Record Status, Branch, Term Deposit Account Number, Account Description, Customer Number, Term Deposit Currency, Account Class, Account Open Date, and Alter. The table is currently empty. At the bottom right of the window is an 'Exit' button.

In the above screen, you can base your queries on any or all of the following parameters and fetch records:

- Authorization Status
- Record Status
- Branch
- Term Deposit Account Number
- Customer Number
- Term Deposit Currency
- Stock Catalogue Code
- Certificate Number
- Maturity Date

Select any or all of the above parameters for a query and click 'Search' button. The records meeting the selected criteria are displayed.

System will only fetch records for the group code allowed for the user. If a user tries to query customer information which is restricted for him, system displays the error message "No query results found for the specific criteria".

If you are allowed to query customer information, system displays the following details pertaining to the fetched records:

- Authorization Status
- Record Status
- Branch Code

- Term Deposit Account Number
- Description
- Customer Number
- Term Deposit Currency
- Account Class
- Account Open Date
- Alternate Account Number
- Account Number
- Account Type
- Goal Reference Number
- Maturity Date

4.3 Viewing Recurring Deposit Details

You can view the details of Recurring Deposit using the 'RD schedule enquiry' screen. You can invoke this screen by typing 'RDDSCHEQ' in the field at the top right corner of the Application tool bar and click the adjoining arrow button.

You can query recurring deposit details in this screen based on the following mandatory parameters:

- Branch Code
- RD Account Number

To view the joint holder's details of an account and the mode of operation maintained at the account level, place the cursor on the RD Account Number field and press Ctrl+J. The system displays the 'Joint Holder' screen.

For more information on the 'Joint Holder' screen refer to the section 'Joint Holder Maintenance' in the Core User Manual.

Note

System displays a description of the Recurring Deposit account once the querying parameter is selected.

Select any of the parameters for a query and click 'Query' button. The records meeting the selected criteria are displayed.

System displays the following Recurring Deposit details:

- Account open date
- Installment Amount
- Installment frequency
- Deposit Tenor
- Number of successful installments
- Number of un successful installments
- Number of installments paid
- Number of outstanding installments
- Interest Rate
- Maturity Date
- Maturity amount

5. TD Additional Details

5.1 Introduction

This chapter contains the following sections:

- [Section 5.2, "Capturing Additional Details"](#)
- [Section 5.3, "Specifying Interest Details"](#)
- [Section 5.4, "Specifying Charge Details"](#)
- [Section 5.5, "Specifying Linked Entities"](#)
- [Section 5.6, "Specifying Restrictions"](#)
- [Section 5.7, "MIS Details"](#)
- [Section 5.8, "Specifying Statement Details"](#)
- [Section 5.9, "Specifying Joint Holder Details"](#)
- [Section 5.10, "Capturing User Defined Fields"](#)
- [Section 5.11, "Specifying Account Signatory Details"](#)
- [Section 5.12, "TD Payout Details"](#)
- [Section 5.13, "Deposit Tab \(Deposit Preferences for Child TD\)"](#)
- [Section 5.14, "Viewing Change Log"](#)
- [Section 5.15, "Interest Payout Details for Banker's Cheque / DD and Local Payment"](#)
- [Section 5.16, "Viewing Rollover History Details"](#)
- [Section 5.17, "Specifying Document Details"](#)
- [Section 5.18, "Specifying Denominated Deposit Details"](#)
- [Section 5.19, "Rollover Details"](#)
- [Section 5.20, "Maintaining Amount Blocks"](#)
- [Section 5.21, "Deposit Instructions"](#)
- [Section 5.22, "Input and Authorization Limit Validation for TD and RD"](#)

5.2 Capturing Additional Details

You can capture additional details for the account by clicking the following buttons in the 'Deposit Account Booking' screen:

| Button | Function |
|-----------------|---|
| Interest | This invokes the 'IC Special Conditions Maintenance' screen. |
| Charges | This invokes the 'Account level charges conditions' screen. |
| Linked Entities | This invokes the 'Linked Entities' screen. |
| Restrictions | This invokes the 'Products and Transaction Codes Restriction' screen. |

| | |
|-------------------------|---|
| MIS | This invokes the 'Management Information System' screen. |
| Statement | This invokes the 'Statement Details' screen. |
| Joint Holders | This invokes the 'Linked Entities' screen |
| Fields | This invokes the 'User Defined Fields' screen. |
| Account Signatory | This invokes the 'Signatory Details' screen. |
| TD Payout Details | This invokes the 'Term Deposit Payout Details' screen. |
| Change Log | This invokes the 'Customer Address Change Log' screen. |
| Interest Payout Details | This invokes the 'Term Deposit Interest Payout Details' screen. |
| Rollover History | This invokes the 'rollover History' screen. |
| Denominated Deposit | This invokes the 'Denominated Deposit' screen. |
| Rollover Details | This invokes the 'TD Rollover Details' screen. |

5.3 Specifying Interest Details

Click 'Interest' button on the 'Deposit Account Booking' screen and invoke the 'IC Special Conditions Maintenance' screen.

The screenshot shows the 'IC Special Conditions Maintenance' window. It is divided into two main sections: 'Account Details' and 'Product Details'.
Account Details:
- Branch: [Text Field]
- Account: [Text Field]
- Calculation Account: [Text Field]
- Interest Booking Account: [Text Field]
- Charge Booking Account: [Text Field]
- Consolidated Charge Account: [Text Field]
- Redemption Interest Payout: Interest Booking account, Interest Payout account
- Interest Statement:
- Interest Start Date: YYYY-MM-DD [Text Field]
- Charge Start Date: YYYY-MM-DD [Text Field]
- Interest Booking Branch: [Text Field]
- Charge Booking Branch: [Text Field]
- Dr Cr Advices:
- Rate Chart Allowed:
- Interest Rate Based on Cumulative Amount:
Product Details:
- Product Code: [Text Field]
- UDE Currency: [Text Field]
- ILM Product:
- ILM Product Type: [Text Field]
- UDE Default: [Text Field]
- Waive Interest:
- Generate UDE Change Advice:
- Open:
- Continue Variance on Rollover:
A pagination bar shows '1 Of 1'. At the bottom right are 'Ok' and 'Exit' buttons.

You can specify the following details:

Branch Code

The Branch Code to which the account belongs (for which you are defining special conditions) is displayed in this field.

Account

The account number of customer (for which you are defining special conditions) is displayed in this field.

Calculation Account

Specify the account for which interest will be calculated. The TD account populated will be the calculation account. By default, it will be same as the customer account. However you can change it.

Interest Booking Account

You can select the account for booking interests on transaction processed at your bank.

At the time of creating an IC product, if you have maintained the booking account type as Interest (in the 'Interest and Charges – Product Definition' screen), the Interest will be liquidated into the Interest Booking account. By default, the TD account is defaulted as the

interest booking account. However, you have the option of booking interest to a different account belonging to another branch also. The accounts maintained in the selected Booking Branch will be available in the adjoining option list. You can select the appropriate account. Interest will then be liquidated into the selected account.

Charge Booking Account

You can select the account for booking charges on transactions processed at your bank

At the time of creating an IC product, if you have maintained the booking account type as Charge (in the 'Interest and Charges – Product Definition' screen), the charge will be liquidated into the Charge Booking account. By default, the customer's account in the current branch will be displayed in this screen (in the 'Charge Booking Account' field). However, you have the option of booking charge to a different account belonging to another branch also. The accounts maintained in the selected Booking Branch will be available in the adjoining option list. You can select the appropriate account. Charges will then be liquidated into the selected account.

Interest Statement

Check this box to indicate that you would like to generate an interest statement for the account. The Interest Statement will furnish the values of the SDEs and UDEs and the interest rule that applies on the account.

Interest Start Date

Specify the date from which the interest accruals of TD account begins. You can specify the date as of booking the TD or any date in the future. If you specify a date in future, the system will post entries for account opening (DEBK event) on the account opening date with the value date as interest start date. It will start interest accrual calculation on the date specified in this field and post entries for IACR event.

Charge Start Date

For the account for which you are defining special conditions, you must specify the date from which you would like to apply charges. Charges for this account will be calculated according to the special conditions that you define subsequently.

By default, charges on an account would be applied when the free banking period (if any) elapses. This means that the Charge Start Date is arrived at by the System by adding the Free Banking Period days (if any, specified for the Term Deposit used by the account) to the Account Opening Date. If no Free Period has been indicated for the account class used by the account, the Charge Start Date is defaulted to the Account Opening Date (that is, charges on the account would be applied right from the account opening date) and displayed in the Special Conditions Maintenance screen.

You can override the default Charge Start Date and specify the desired start date for charge application.

Interest Booking Branch

By default, the customer's account in the current branch will be displayed in this screen (in the Interest/Charge Booking Account and Interest/Charge Booking Branch fields). However, you have the option of booking interest/charge to a different account belonging to another branch also. You can select the Interest/Charge Booking Branch from the option-list available. The accounts maintained in the selected Booking Branch will be available in the option-list provided for Interest/Charge Booking Account. You can select the account from this list. Interest/Charge will be liquidated into the selected account.

Interest booking account will be validated with the interest booking branch on save. If interest book account branch and interest booking branch are different, then the system displays an error, "Booking account not valid for branch."

Dr Cr Advices

You can indicate whether you want to generate an interest liquidation advice for a customer account. Check this box to indicate that the system must generate payment advices when interest liquidation happens on an account. The advices are generated in the existing SWIFT or/and MAIL format. No advices will be generated if you leave this box unchecked.

Charge Booking Branch

By default, the customer's account in the current branch will be displayed. However, you have the option of booking charge to a different account belonging to another branch also. You can select the Charge Booking Branch from the option-list available. The accounts maintained in the selected Booking Branch will be available in the option-list provided for Charge Booking Account. Charge will be liquidated into the selected account.

Rate Chart Allowed

The system defaults this preference from account class and it indicates that the system should calculate TD interest based on the LDMM float rate maintained in the 'LD MM Floating Rate input' screen (CFDFLTRI). If it is checked, the system will pick interest rates based on different tenors, amount slab, currency and effective date for a TD. The system does not allow you to amend it.

Note

During account creation for TDs, if 'Rate Chart Allowed' is checked, the system does not allow IC rate code. During IC calculation, if the rate code is maintained for the UDE then the system derives the interest rate from the Rate Maintenance done in 'LD MM Floating Rate input' screen (CFDFLTRI).

Continue Variance on Rollover

This is defaulted based on the Interest and Charges product. However, you can modify this. If you have modified this, then during save, the system will prompt that 'Continue variance on Rollover Flag is modified'. You can proceed.

Check this box to enable continued variance on rollover. If you check this, then the system will default account variance as current value to the rollover deposit for the next cycle.

If you do not check this, then the account variance will not be carried forward to next rollover cycle.

Interest Rate Based on Cumulative Amount

Check this box to indicate that the system should arrive at the interest rate of a new deposit using the deposit amount/principal balance of other active deposits, under the same account class, customer and currency.

The cumulation of the amount for arriving at the interest rate is done at the account level during the save of the below events:

- Deposit account opening
- Any interest rate change to the deposit - floating rate deposits, rate change on interest liquidation, and rate change on rollover.

Note

- When cumulating the amount of the deposits system considers the current deposit balance of all the deposits along with the new deposit amount.
- TD accounts opened after the interest start date will not be considered for arriving at the cumulation amount.

- For backdated deposit opening, all the active deposits as of the current system date are considered to arrive at the cumulative amount, if the 'Interest Rate Based on Cumulative Amount' box is checked.
 - The interest rate derived is applied only to the new deposit to be opened and there will be no changes done to the deposits which are used for arriving at the interest rate.
 - The interest rate based on cumulative amount is defaulted from account class level. However the same can be modified at TD account. If the flag is modified at TD account level, an override "Change in account class defaulted value for interest rate based on cumulative amount" will be displayed. The interest rate based on cumulative amount cannot be modified after authorization.
 - The interest rate is picked during TD opening considering the active TDs for a customer under same account class and Ccy combination.
 - If a TD is rolled over, the interest start date of the TD will be considered and TDs opened before the interest start date will be considered for cumulation. Facility is available to opt/opt out cumulation during rollover.
 - If a deposit participating in cumulation is closed, then no change will be done to existing TDs. For further rate pick-up, the closed TD will not be considered for cumulation.
 - Cumulation feature is not supported for recurring deposits. And if checked at account level, an error message "Interest rate based on cumulative amount feature is not supported for recurring deposits" will be displayed.
 - If child TD account has to be considered for cumulation then this box needs to be selected. Cumulation is applicable only for rate chart allowed TDs.
-

Refer the section 'Calculating Interest Rate Based on Base Amount' in this User Manual for details about arriving at interest rate based on cumulative amount.

Consolidated Charge Account

Specify the account for posting consolidated charges. The adjoining option list displays all valid accounts maintained in the system. You can select the appropriate one.

Currency

Specify the term deposit currency.

Redemption Interest Payout

This field will specify whether the interest proceeds from redemption(both liquidated and non-liquidated adjustments on redemption) inclusive of penalty and tax to be credited to interest booking account or redemption payout. This option once selected cannot be modified after account authorization.

Select the Redemption Interest Payout option from the following:

- Interest Booking account - If at account level, the redemption interest proceeds is specified to liquidate to Interest booking Account then the Interest payout component should not be specified while redemption. During redemption, if interest payout is specified, then the interest for redemption will be credited/debited to the CASA account specified in the interest payout instead of the interest booking account.
- Interest Payout account - If at account level, the redemption interest proceeds is specified to liquidate to Redemption Interest Payout account then the Interest payout component is mandatory to be specified while redemption.

Product Details

Specify the following details:

Product Code

Specify an interest product in order to allow calculation of interest. When you apply an interest product on the account, interest for the account will be calculated according to the interest rule attached to the product.

Multiple interest products can be attached to TD account class. But, a TD can be created with one interest product attached. Charge product is not supported for TD accounts.

UDE Currency

Specify the UDE currency for the product that you apply on the account. UDE values that you specify for the account subsequently will be taken to be in this currency.

Waive Interest

This box is unchecked by default. However, you cannot waive interest on a TD. Leave this box unchecked.

Generate UDE Change Advice

Check this box to indicate that interest rate change advice has to be generated for the account at EOD. The system generates interest rate change advices for accounts when the interest rate changes as part of EOD. For those accounts, when interest rate changes the details are handed off for rate change advice generation and the same is generated in the pre determined SWIFT format as per MT 935.

If the advice format is maintained in MAIL / FAX formats, then message type UDECA will be used

The advice tag used for interest rate change is 'RTCHG_ADVICE'. The advice format for interest rate change as per MT935 is given below:

| Status | Tag | Field Name | Content/ Options | No. |
|-----------------------------|------------|--------------------------------|-----------------------------|------------|
| M | 20 | Transaction Reference Number | 16x | 1 |
| O | 23 | Further Identification | 16x | 2 |
| O | 25 | Account Identification | 35x | 3 |
| M | 30 | Effective Date of New Rate | 6!n | 4 |
| M | 37H | New Interest Rate | 1!a12d | 5 |
| O | 72 | Sender to Receiver Information | 6*35x | 6 |
| M = Mandatory, O = Optional | | | | |

Open

You can temporarily stop applying an IC product on a TD by un-checking this box. The product will cease to be applied on the term deposit. You can make the product applicable again by checking this box.

External Pricing

External Pricing

External pricing check box will be enabled when interest product selected is enabled for external pricing.

To view the details of external pricing enabled interest products, select '+' button and add the interest product which is enabled for external pricing by selecting from the list.

Once the product is added, you can add the effective date and then select 'UDE Default' which defaults all the UDEs linked to selected interest product and the values against the same which are returned by external pricing system.

Effective Date

Indicate the following details:

Effective Date

The 'Effective Date' of a record is the date from which a record takes effect. You can maintain different values for a UDE, for different effective dates, for an account. When interest is calculated on a particular day for an account with special conditions applicable, the value of the UDE corresponding to the date will be picked up.

Typically, you would want to open records with different Effective Dates if the values of UDEs vary within the same liquidation period.

Open

Typically, you would want to open records with different effective dates if the values of UDEs vary within the same liquidation period.

If this box is unchecked, then on save system displays the error message "Special condition not maintained for the account".

UDE Values

Specify the following details.

User Defined Element ID

Specify the UDE for which value is given. The adjoining option list lists all UDEs maintained for the Interest Rule. You can select the appropriate one.

UDE Value

Specify the value of the UDE. For a fixed interest rate, you can specify a numeric value.

Note

UDE ID/variance and UDE value/variance of previous rollover dates cannot be modified..

Rate Code

If you want to use a floating rate instead of a fixed rate, you should specify a valid IC rate code. The system will pick up the applicable rate based on the branch, currency and effective date combination maintained for the rate code in the 'Interest & Charges Rate Input' screen (ICDRATMA). For a given tenor, the system picks up the applicable rate as per the effective dates defined for the rate code. If a floating rate has to be used instead of fixed rate, IC rate code defined in the screen 'ICDUDVAL' will be defaulted to the TD account. On every rate change for the effective dates, the system will apply new rate to TD account effective from that date.

In the corresponding IC rule, you need to ensure that UDE Type is maintained as 'Rate' for interest rate pick-up for this account. If at the IC Rule, the UDE Type is maintained as "Rate as Rate Code", then the rate for IC rate code will be resolved and defaulted to TD account and rate pick-up will happen only during events (Book / Liqd / Roll).

TD Rate Code

Specify the rate code to be used for TD calculation. The adjoining option list displays all rate codes maintained using the 'LD MM Floating Rate Input' screen (CFDFLTRI). You can select the appropriate one. You can use TD rate code only when you have checked 'Rate Chart Allowed' option for the account class that is linked to the IC product.

In the corresponding IC rule, you need to ensure that UDE Type is maintained as 'Rate as Rate Code' for interest rate pick-up for this account.

Refer the chapter 'Annexure B – IC Rule Set-up' in this User Manual for further details about IC rules.

Variance

Specify the variance in the interest rate. This is the variance alone. The effective rate will be the sum of the TD rate code and the variance that you specify here. You can modify it anytime.

Note

- If you specify the UDE value and also a rate code (rate code or TD rate code), the system will add the UDE value to the specified rate code value and apply that interest rate on the deposit.
 - You can define either the rate code or the TD rate code, but not both.
-

5.4 Specifying Charge Details

Click 'Charges' button on the 'Deposit Account Booking' screen and invoke the 'Account level charges conditions' screen. This screen is not applicable for Term Deposits.

Account level charges conditions

Account Details

Branch _____

Account _____

Default

Product Details

Product Code * _____

Waive Charges

Open

List of Slab Amounts

1 Of 1

Go

| Slab Amount/Item Count * | Charge Amount | Rate |
|--------------------------|---------------|------|
|--------------------------|---------------|------|

Ok Exit

You can specify the following details:

Branch Code

The Branch Code to which the account belongs (for which you are defining special conditions) is displayed in this field.

Account

The Account number of customer (for which you are defining special conditions) is displayed in this field.

You can click the 'Default' button to default the Charge Products and the corresponding details applicable for the account. You can then modify these values to define the special conditions.

5.4.1 Specifying Product Details

Specify the following details:

Product Code

The system defaults a product when you click the 'Default' button at the time of account creation. You must modify it to identify the Charge product using which the applicable charges would be collected.

Currency

The charges would be collected in the currency defined for the selected charge product, and this currency is displayed on the screen.

Minimum and Maximum

You must indicate the charge amount range, representing the minimum and maximum charge that can be applied for the account.

Free Items

You must indicate the number of free items for which the customer will not be charged.

Open

By default, each charge consolidation charge setup that you set up is enabled and active. You can also disable the setup by checking the 'Open' box.

Waive Charges

You can choose to waive charges for an account.

5.5 Specifying Linked Entities

Click 'Linked Entities' button on the 'Deposit Account Booking' screen and invoke the 'Linked Entities' screen.

| Customer * | Customer Name | Relations * | Include Relationship |
|------------|---------------|-------------|----------------------|
|------------|---------------|-------------|----------------------|

Specify the following details:

Customer

Select the customer from the option list with whom you want to establish the relationship with the account that you are maintaining.

Description

In this field, the system displays the name of customer that you have selected in the previous field. You cannot change the description.

Relations

By default, the system will select the customer of the account as the Primary Holder. This is a pre-shipped relationship and you will not be allowed to change the relationship.

Include Relationship

Check this box to indicate that relationship should be inherited for all transactions.

5.6 Specifying Restrictions

Click 'Restrictions' button on the 'Deposit Account Booking' screen and invoke the 'Products and Transaction Codes Restriction' screen.

The screenshot shows a window titled "Products and Transaction Codes Restriction". It is divided into two main sections: "Product Details" and "Transaction Details".

Product Details:

- Product List: Allowed, Disallowed
- Special Condition: Applicable, Not Applicable

Below the settings is a table with columns: Product, Description, Debit, Credit. The table is currently empty.

Transaction Details:

- Transaction List: Allowed, Disallowed
- Special Condition: Applicable, Not Applicable

Below the settings is a table with columns: Transaction Code, Description, Debit, Credit. The table is currently empty.

At the bottom right of the window are "Ok" and "Exit" buttons.

Specify the following details:

Product Details

Indicate the following preferences.

Special Condition

By default, the restrictions maintained at the account class level will be displayed here. When you define product restriction attributes for an account itself, rather than for the account class to which it belongs, it is referred to as a Special Condition. You can apply special conditions by selecting the option 'Applicable'. If you opt to define special conditions for an account the 'restrictions' defined for the Account Class, to which the account belongs, will NOT apply to this account. If you wish to continue with the account class restrictions, opt for 'Not Applicable'.

Product List

Specify the restriction type here. The options available are:

- Allowed – If you select this, the products entered in the multi-entry block will be allowed for that account.
- Disallowed – If you select this option, the products entered in the multi-entry block will be disallowed.

Product

You can select the products and specify the type of transaction (Dr, Cr or both) that you would like to allow/disallow for each product. In contracts involving the selected products, the accounts would be used for processing the selected type of transaction. For instance, assume that for the account A1, you have allowed 'Dr' for the product ABCD. This would mean that if a Dr entry for the product ABCD is passed to the account, A1, it would go through but in case a Cr entry is passed for this product, then the system will display a message indicating that the transaction is restricted for the account.

Description

The system displays the description for the product code that which you have specified

Debit

During transaction processing, the system will validate whether any restrictions are placed on the account based on the product code. If you have indicated to allow 'Dr' Transactions for the product ABCD, and attempt to post a debit entry, the system will seek an override. If the message has been configured as an 'override' instead of an 'error', you will be able to continue the transaction, despite the restrictions, by providing appropriate reasons for the same. Otherwise you cannot continue with the transaction.

During maintenance or online operations, in the respective contract screens for the restricted transactions, when you specify the customer account, the system checks whether the account is restricted for the product that has been selected, or the debit/credit transaction type. If so, an override is sought when such contracts are saved.

Credit

During transaction processing, the system will validate whether any restrictions are placed on the account based on the product code. If you have indicated to allow 'Cr' transactions for the product ABCD, and attempt to post a credit entry, the system will seek an override. If the message has been configured as an 'override' instead of an 'error', you will be able to continue the transaction, despite the restrictions, by providing appropriate reasons for the same. Otherwise you cannot continue with the transaction.

During maintenance or online operations, in the respective contract screens for the restricted transactions, when you specify the customer account, the system checks whether the account is restricted for the product that has been selected, or the debit/credit transaction type. If so, an override is sought when such contracts are saved.

Transaction Details

Indicate the following preferences.

Special Condition

By default, the restrictions maintained at the account class level will be displayed here. When you define transaction code restriction attributes for an account itself, rather than for the account class to which it belongs, it is referred to as a Special Condition. You can apply special conditions by selecting the option 'Applicable' at the account level. If you opt to define special conditions for an account the 'restrictions' defined for the Account Class, to which the account belongs, will NOT apply to this account. If you wish to continue with the account class restrictions, opt for 'Not Applicable'.

Transaction List

Specify the restriction type here. The options available are:

- Allowed – If you select this, the transaction codes entered in the multi-entry block will be allowed for that account.
- Disallowed – If you select this option, the transaction codes entered in the multi-entry block will be disallowed.

Transaction Code

Likewise, you can maintain restrictions for transaction codes as well. Transaction code based restrictions are allowed only for entries initiated from the Data Entry module. Otherwise you should use product code based restriction.

Description

The system displays the description for the transaction code that you have specified

Debit

During transaction processing, the system will validate whether any restrictions are placed on the account based on the transaction code. If you have indicated to allow 'Dr' transactions for a particular transaction code, and attempt to post a credit entry, the system will seek an override. If the message has been configured as an 'override' instead of an 'error', you will be able to continue the transaction, despite the restrictions, by providing appropriate reasons for the same. Otherwise you cannot continue with the transaction.

During maintenance or online operations, in the respective contract screens for the restricted transactions, when you specify the customer account, the system checks whether the account is restricted for the product that has been selected, or the debit/credit transaction type. If so, an override is sought when such contracts are saved.

Credit

During transaction processing, the system will validate whether any restrictions are placed on the account based on the transaction code. If you have indicated to allow 'Cr' transactions for a particular transaction code, and attempt to post a debit entry, the system will seek an override. If the message has been configured as an 'override' instead of an 'error', you will be able to continue the transaction, despite the restrictions, by providing appropriate reasons for the same. Otherwise you cannot continue with the transaction.

During maintenance or online operations, in the respective contract screens for the restricted transactions, when you specify the customer account, the system checks whether the account is restricted for the product that has been selected, or the debit/credit transaction type. If so, an override is sought when such contracts are saved.

5.7 MIS Details

This section contains the following topics:

- [Section 5.7.1, "Specifying MIS Details"](#)
- [Section 5.7.2, "Viewing Change Log"](#)
- [Section 5.7.3, "Viewing Transfer Log"](#)

5.7.1 Specifying MIS Details

Click 'MIS' button on the 'Deposit Account Booking' screen and invoke the 'Management Information System' screen.

Management Information System

Branch

Account

MIS Group

Rate Code

Calc Method

Rate Type

Spread

Pool Code

Account Level

Reference Rate

Transaction MIS Codes

| <input type="text"/> |
| <input type="text"/> |

Change Log | Transfer Log

Ok Exit

Specify the following details:

Branch Code

The current logged-in branch code is displayed here

Account

The TD account number is displayed here.

MIS Group

For an account, the transaction type of MIS class will be picked up from the account class.

Rate Code

Specify the rate code. You can also select the appropriate one from the adjoining option list, which displays all valid rate codes maintained in the system.

Calc Method

Specify the method to be considered for MIS related component computation.

Rate Type

If you have indicated that rates maintained for the individual account should be picked up for MIS refinancing you have to specify the Rate Type that is to be used. The options available are:

- Fixed
- Floating – Automatic – indicating that the system should pick up the refinancing rate associated with the account. Since the account number is linked to a Rate Code the

system picks up the rate code associated with the account when the EOD processes are run to refresh the various rates.

Spread

Specify the spread that should be applied if rate type is selected as 'floating' type.

Pool Code/Account Level

Define the Pool Code/Account Level to which the account class or product belongs.

Pool Code

For an account, the pool code will be picked up from the account class.

Transaction MIS Group

For an account, the transaction type of MIS class will be picked up from the account class.

Composite MIS Group

The composite type of MIS class will be defaulted from those defined for the customer.

Cost Code

For an account, the cost codes will be picked up from the account class.

5.7.2 Viewing Change Log

Click 'Change Log' button on the 'Management Information System' screen and invoke the 'Change Log' screen. If MIS reclassification occurs, through changing of the MIS codes for the 'Customer Type' of MIS classes, the system will store the changes made, in the Customer MIS 'Change Log' screen.

The screenshot shows a window titled "Change Log" with a dark blue header. Below the header, there are two input fields: "Branch" and "Account". Underneath these is a section titled "Change Log Details" which contains a table with the following columns: "MIS Class", "Transaction Date", "Old MIS Code", and "New MIS Code". The table is currently empty. At the bottom right of the window, there are "Ok" and "Exit" buttons.

Here you can view the following details:

Branch Code

The current logged-in branch code is displayed here.

Account

The system displays the TD account number.

Change Log Details

You can view the following details:

- MIS Class
- Transaction Date
- Old MIS Code
- New MIS Code

5.7.3 Viewing Transfer Log

Click 'Transfer Log' button on the 'Management Information System' screen and invoke the 'Balance Transfer Log' screen. When MIS reclassification occurs with respect to a customer, account or contract, the balances in a GL associated with the old MIS code in each case are transferred to the GL for the new MIS code, if the option of transferring MIS balances upon reclassification has been set in the 'Chart of Accounts' screen for the GL.

Here you can view the following details:

Account

The system displays the TD account number.

Balance Transfer Log Details

You can view the following details:

- Branch Code
- Product Code
- Fin Year
- Transaction Date
- GL Code
- MIS Class
- Old MIS Code
- New MIS Code
- TRF Ind
- Currency
- Ex rate
- Amount

5.8 Specifying Statement Details

Click 'Statement' button on the 'Deposit Account Booking' screen and invoke the 'Statement Details' screen.

The screenshot shows the 'Statement Details' window with the following sections:

- Statement Account:** A text input field.
- Primary Account Statement:**
 - Generate Statement Only On Movement
 - Type: None, Summary, Detailed
 - Account:
 - Cycle: Quarterly, On:
- Secondary Account Statement:**
 - Generate Statement Only On Movement
 - Type: None, Summary, Detailed
 - Cycle:
 - On:
- Tertiary Account Statement:**
 - Generate Statement Only On Movement
 - Type: None
 - Cycle:
- Previous Statement Details:** Three input fields for Date, Balance, and No.
- Exclude Same Day Reversal Transactions from Statement:**
- Buttons:** Ok, Exit

You can specify the following details:

Primary A/C Statement

This refers to the type of statement to be generated periodically by the system, for this account. You can specify whether you want a detailed or summary statement or if you do not want a statement for this account at all.

Generate Stat. Only On Movement

Check this box to indicate that an account statement should be generated for the account only when there has been a movement of funds into the account or when funds have been transferred out of the account.

For instance, let us assume that on the August 21, 2001, you have set the account statement generation frequency as Daily for the account LI020804. On the September 5, 2001, there has been no movement of funds in the particular account. If you have opted for the Generate Only on Movement option, the system will not generate a statement message for September 5, 2001.

If you choose not to enable this option, account statements will be generated regardless of whether there has been a movement of funds or not.

Type

You can specify whether you want a detailed or summary statement or if you do not want a statement for this account at all.

Account

The system displays the account number for which you are setting the statement details.

Cycle

You can specify the frequency for generating the account statements. To specify the frequency of the statements, click on the adjoining drop-down list. The following list is displayed:

- Annual
- Semi-annual
- Quarterly
- Monthly
- Fortnightly
- Weekly
- Daily

On

For a weekly statement you specify the day of the week on which account statements should be generated and for fortnightly and monthly statements the dates of the month. To specify for weekly statements, click on the adjoining drop-down list. The following list of days will be displayed:

- Monday
- Tuesday
- Wednesday
- Thursday
- Friday
- Saturday
- Sunday

To specify for monthly statements enter a number between 1 and 31 (corresponding to the system date).

If you set the statement date to 30, then account statements will be generated on:

- The last working day for months with < 30 days
- For months with 30 days on the 30th; if 30th is a holiday on the next working day

If you set the statement date to 31, then account statements will be generated on:

- The 31st for month with 31 days; if 31st is a holiday on the next working day
- The last working day for months < 31 days

For a fortnightly statement, you could specify 1 and 15

For all other cycles, account statement will be generated on the last day of that cycle.

Secondary A/C Statement

This refers to the type of statement to be generated periodically by the system, for this account. You can specify whether you want a detailed or summary statement or if you do not want a statement for this account at all.

Tertiary A/c Statement

This refers to the type of statement to be generated periodically by the system, for this account. You can specify whether you want a detailed or summary statement or if you do not want a statement for this account at all.

Statement Account

Specify the account for which the statement has to be generated. The adjoining option list displays all valid accounts maintained in the system. You can select the appropriate one.

Exclude Same Day Reversal trns from Stmt

If you do not wish transactions booked and reversed on the same day to be reflected in the account statement, you can specify the preference here. This feature is applicable only for the customer account legs and not for the related GL legs. Also, reversals made through the DE module will not be considered for exclusion.

This specification is defaulted from the account class linked to the account. You can change it for a specific account.

5.9 Specifying Joint Holder Details

Click 'Joint Holders' button on the 'Deposit Account Booking' screen and invoke the 'Joint Holders' screen.

The screenshot shows a software window titled "Joint Holders". At the top, there are three input fields labeled "Branch", "Account Number", and "Customer No". Below these is a section titled "List of Joint Holders" which contains a table with the following columns: "Customer No", "Customer Name", "Joint Holder Type", "Start Date", and "End Date". The table is currently empty. At the bottom right of the window, there are two buttons labeled "Ok" and "Exit".

Specify the following details:

Account Number

The system displays the account number here.

Customer No

The system displays the customer account number.

Branch Code

The system displays the branch code of the current branch.

List of Joint Holders

You can add the joint holder details in this section if the selected account type is 'Joint'. Maintain the following details:

Customer Number

Specify the customer Id for the joint holder. The adjoining option list displays the list of all valid customer numbers. Select the appropriate one.

Customer Name

The system displays the customer name based on the selected customer number.

Joint Holder Type

Indicate the type of authority. Select the appropriate one from the drop-down menu. The options are:

- Authorized Signatory
- Customer Contact Person
- Guardian
- Custodian
- Developer
- Guarantor
- Joint and First
- Joint and Other
- Joint or First
- Joint or Other
- Nominee
- Related for Enquiry
- Solicitor
- Sole Owner
- Third Party
- Trustee
- Valuer

Start Date

Specify the date from which the joint holding of the account begins.

End date

Specify the date on which the joint holding of the account ends.

Note

- If the end date expires, the system does not allow you to save the customer account in case of amendment in the joint holder details. The system will display an error message if you attempt to save the amendment.
 - You can enter the joint holder details only if 'Account Type' is 'Joint'. If the account type is 'Joint' then it is mandatory to specify the details of at least one joint holder.
-

5.10 Capturing User Defined Fields

All User Defined Fields (UDFs) linked to the function ID 'STDCUSTD' are displayed in the 'User Defined Fields' screen.

Invoke this screen by clicking 'Fields' button on the 'Deposit Account Booking' screen.

Here you can specify values for each UDF.

Refer the User Manual titled 'User Defined Field' for details about defining UDFs. Click 'Fields' button on the 'Deposit Account Booking' screen and invoke the 'User Defined Fields' screen.

5.11 Specifying Account Signatory Details

Click 'Signatory' button on the 'Deposit Account Booking' screen and invoke the 'Signatory Details' screen.

Here you can capture the following details:

Account Branch

The system defaults the current branch here.

Account Number

This is the account number to which signatories are to be linked.

Account description

The system displays the description for the account you have selected.

Account Currency

The system displays the account currency.

Minimum Number of Signatories

Specify the minimum number of signatories necessary to endorse an instrument involving the account.

Note

If the linked or replicated signatories are less than the specified minimum number, system will display an error message.

Account Message

Specify a brief description about particular signatories. It can be related to the name, number and the type of signatory your customer is. You can specify a maximum of 4000 characters as account message length.

For instance you can capture a message like - "This signatory is a joint account holder with rights to sign instruments only up US 8000".

5.11.0.1 Account Signatory Details Tab**Customer ID**

Enter the customer ID you want to link to the account

You can link a customer signatory to an account either by:

- Click on the option list next to the Signatory Number. A list of customer signatory numbers, whose details have been captured will be displayed, along with their names. Pick up the signatory whom you want to make an account signatory for the account
- Keying-in the customer Signatory Number and Name directly, if the signatory number has not been maintained through the Customer Signatory details screen

Note

If the signatory ID that you specify has not been maintained, the System displays an override. On confirming the override, you will be allowed to save the signatory details. An error message is displayed if you enter a duplicate Signatory ID. Each time you capture a new Signatory ID at the account level you must identify the relationship of the signatory with the customer.

Relation Type

The relation of the customer to the signature. Signature ID

Specify the signatory identification number.

Signatory Name

The system displays the corresponding name of the signatory ID specified.

Signature

The details of the signature. Click the **Signature** button to fetch the signature.

Signatory Type

Specify the signatory type.

Approval Limit

Specify the amount up to which the account signatory can approve for debits.

Signatory Message

The system displays the message corresponding to the signatory.

5.11.0.2 Amount Based Signatory Instruction Tab

You can maintain account signatory instructions for different amount slabs in this tab. Click on 'Amount Based Signatory Instruction, tab to invoke the following screen:

The screenshot shows a window titled "Signatory Details" with a blue header. The main content area is divided into several sections. At the top, there are input fields for "Account Number*" (with a red asterisk), "Account Branch", "Account Description", "Account Currency", "Minimum No of Signatories", and "Account Message". Below this is a tabbed interface with "Account Signatory Details" and "Amount Based Signatory Instructions" (the active tab). Under the active tab, there is a section titled "Amount Slab Details" with a navigation bar showing "1 Of 1" and a "Go" button. Below this is a table with a header row containing a checkbox, "To Amount*", and a "Go" button. The table body is currently empty. Below the table is a section titled "Account Signatory Instruction Options" with a similar navigation bar and a table with a header row containing a checkbox, "Condition Id*", and "Remarks*". The table body is also empty. At the bottom of the window, there is a section for "All Signatures/Images" and "Ok" and "Exit" buttons.

Amount Slab Details

To Amount

Specify the slabs by setting a 'To Amount'. The amount slab will start from zero and the first value entered will set the slab from zero to that amount. The amounts will be arranged in ascending order. For next slab, an amount above the previous 'To Amount' will be considered as the 'From' value.

For example, If the 'To Amount' entered are as below

| To Amount |
|-----------|
| 10,000 |
| 100,000 |

| |
|------------------|
| To Amount |
| 10,000 |
| 1,000,000 |

Then the maintenance will indicate the below amount slabs:

| From Amount | To Amount |
|--------------------|------------------|
| 0 | 10,000 |
| Above 10,000 | 100,000 |
| Above 100,000 | 1,000,000 |

Account Signatory Instruction Options

For each amount slab, you can define different conditions in this section.

Condition Id

Specify a unique Id for condition to be set.

Remarks

Give a brief description for the condition id.

Required Signatories

You can define different conditions for the amount slabs in this section.

Signature Type

Select the signature type required from the option list. The list displays the signature types as maintained in static type maintenance screen.

Note

The signature type cannot be repeated for a condition.

Required No. of Signatories

Specify the number of signatories for each signatory type. This number should be less than or equal to the total number of signatories maintained under the signatory type.

Note

The Amount Based Signatory Instructions tab will be enabled in the following RT screens only if the value of param 'AMOUNT_BASED_SV' is Y in CSTM_BRANCH_LOC_PARAMS.

- Cash Withdrawal (1001)
- Account to Account Transfer (1006)
- Miscellaneous Customer Debit (1008)
- TC Sale against Account (1009)

- BC Issue against Account (1010)
- Cheque Withdrawal (1013)
- DD Issue against Account (1014)
- Bill Payment Against account (1075)
- Account Close Out Withdrawal by BC (1300)
- Close Out Withdrawal (1301)
- Multimode Deposit Redemption
- Account Close Out Withdrawal (1320)
- Account Close Out Withdrawal by Multi Mode (1350)
- Cash Transfer (1405)
- Inward Clearing Data Entry (5555)
- FX Sale Against Account (8206)
- TT Issue against Account (8318)
- DD Issue against Cheque (8330)
- BC Issue against Cheque (8335)
- In House Cheque Deposit (LOCH)
- Payment by in house cheque (1045)

5.11.0.3 All Signatures/Images button

Click on 'All Signatures/Images' button to view 'Customer Signature/Image Consolidated View' screen.

The following details will be displayed in the above screen

- Account Number
- Account Branch
- Account Description
- Account Currency
- Customer Number
- Signature Id
- Signature Name

The **'Signature/Image'** tab displays nine signatures/Images for a signature id in a single pane with three signatures/Images in a row.

If there is more than one signature id linked to a customer account, then they would be displayed in different pages.

Each image is provided with the following buttons:

- Zoom In
- Zoom Out
- Rotate Clockwise
- Rotate Anticlockwise
- Flip Horizontal
- Flip Vertical

5.12 TD Payout Details

This section contains the following topics:

- [Section 5.12.1, "Indicating TD Payout Details"](#)
- [Section 5.12.2, "Term deposit Tab"](#)
- [Section 5.12.3, "Bankers Cheque/DD Tab"](#)
- [Section 5.12.4, "Specifying Local Payment Details"](#)
- [Section 5.12.5, "Capturing Payout Interest Details for Child TD"](#)
- [Section 5.12.6, "Interest Tab \(interest preferences for Child TD\)"](#)

5.12.1 Indicating TD Payout Details

Click 'TD Payout Details' button on the 'Deposit Account Booking' screen and invoke the 'Term Deposit Payout Details' screen to capture the parameters for automatic pay-out.

Pay Out Details

Branch 000 Currency

Account

Term deposit Bankers Cheque / Demand Draft Local Payments

Branch 000

Currency

Customer No

Default From Parent Account Account Class

Account Class P

Interest

Ok Cancel

Here you can capture the following details:

Branch code

The system defaults the current branch here.

Account

This is the parent TD account number.

Currency

The system defaults the TD currency.

5.12.2 Term deposit Tab

This tab is displayed by default on invoking the screen. Here you can capture details for creation of a child TD as part of pay-out of the parent TD.

Customer No

The system defaults the customer number. However, the customer no can be changed and a different customer can be provided for child TD creation.

Branch code

The system defaults the current branch here.

Currency

The system defaults the TD currency.

Default From

Indicate whether the details should be picked up from the parent TD account or the account class, by choosing one of the following options:

- Account
- Account Class

Account Class

Specify the account class, if you have selected the 'Default From' as Account Class.

If you select the 'Default From' as Account, then on clicking of 'P' button, the system will default the interest and deposit details from the parent TD account. Or if you select the 'Default From' as Account Class, then on clicking 'P' button, the system will default the interest and deposit details from the account class selected. For the child TD, you will have to capture interest calculation and pay-out preferences. You can do this by clicking 'Interest' button on the screen.

Refer the section 'Capturing Payout Interest Details for Child TD' in this chapter for details about capturing interest preferences for Child TD in case auto pay-out by rollover option is selected.

5.12.3 Bankers Cheque/DD Tab

Click 'Banker's Cheque/DD' tab to capture cheque related details if you have opted for TD pay-out through a banker's cheque.

The screenshot shows a 'Pay Out Details' window with the following fields and sections:

- Branch:** 000
- Account:** [Empty field]
- Currency:** [Empty field]
- Term deposit:** Bankers Cheque / Demand Draft (selected), Local Payments
- Instrument Details:**
 - Bank Code:** [Empty field]
 - Payment Branch:** [Empty field]
 - Instrument Type:** [Empty field]
 - Currency:** [Empty field]
- Beneficiary Details:**
 - Beneficiary Name:** [Empty field]
 - Passport/IC Number:** [Empty field]
 - Narrative:** [Empty field]
 - Beneficiary Address:** [Empty field]
- Interest:** [Empty field]

Buttons: Ok, Cancel

Here you can capture the following details:

Cheque Details

Specify the following details.

Bank Code

Specify the bank code of the Bankers cheque.

Currency

The system displays the TD currency. You cannot modify it.

Payable Branch

Specify the payable branch for the cheque. The adjoining option list displays all branch codes linked to the specified bank code. You can select the appropriate one.

Instrument Type

Instrument type of the TD will be defaulted here based on the payout type value selected in the main screen, if you have selected 'Payout Type' as 'Demand Draft' or 'Bankers Cheque'.

Beneficiary Details

Specify the following details.

Beneficiary Name

Specify the name of the beneficiary for the pay-out.

Passport/IC Number

Specify the passport number or identification card number of the beneficiary for the pay-out.

Narrative

Specify the description for the pay-out.

Beneficiary Address

Specify the address of the beneficiary for the pay-out.

5.12.4 Specifying Local Payment Details

Click 'Local Payment' tab to capture pay-out details if you have opted for TD pay-out through Local Payment transfer to another account.

The screenshot shows a 'Pay Out Details' dialog box with the following fields and sections:

- Branch: 000
- Account: [Empty]
- Currency: [Empty]
- Term deposit: Bankers Cheque / Demand Draft, Local Payments (selected)
- Counterparty:
 - Counterparty Bank Code: [Empty]
 - Counterparty Account: [Empty]
 - Currency: [Empty]
- Beneficiary Details:
 - Beneficiary Name: [Empty]
 - Passport/IC Number: [Empty]
 - Narrative: [Empty]
 - Beneficiary Address: [Empty]
- Interest: [Empty]
- Buttons: Ok, Cancel

The following details are captured here:

Counterparty

Specify the following details.

Counterparty Bank Code

Specify the bank code of the counter party for the pay-out.

Counterparty Account

Specify the account name of the counter party for the pay-out.

Currency

Specify the currency of the counter party for the pay-out.

Beneficiary Details

Specify the following details.

Beneficiary Name

Specify the name of the beneficiary for the pay-out.

Beneficiary Address

Specify the address of the beneficiary for the pay-out.

Passport/IC Number

Specify the passport or identification card number of the beneficiary for the pay-out.

Narrative

Specify the description for the pay-out.

The system will process TD payout through Local Payment transfer using a bridge GL that is specified for the account class in the 'Deposit Account Details' screen.

Refer the section 'Maintaining Deposit Details' in the chapter Term Deposit Maintenance' for details about the bridge GL

5.12.5 Capturing Payout Interest Details for Child TD

As mentioned before, if you have opted for creation of a child TD on maturity of the parent TD, you need to specify interest details of the child TD. Click 'Interest' button on the 'Term Deposit Payout Details' screen and invoke the 'Term Deposit Interest' screen.

In this screen, the system defaults all the parameters maintained for the parent TD. However, you can modify them.

The screenshot displays the 'Term Deposit Interest' window with the following sections:

- Account Details:** Includes tabs for 'Interest' (selected) and 'Deposit'. Fields include Calculation Account, Interest Booking Account, Charge Booking Account, Interest Statement, Interest Rate Based on Cumulative Amount, Interest Start Date, Charge Start Date, Interest Booking Branch, Dr Cr Advices, and Charge Booking Branch.
- Product Details:** Includes Product Code, UDE Currency, and a '1 Of 1' indicator. Checkboxes for Waive Charges, Generate UDE Change Advice, Open, and Continue Variance on Rollover are present.
- Effective Date:** Features a 'Go' button, a '1 Of 1' indicator, and a table with columns for 'Effective Date' and 'Open'.
- UDF Values:** A section for 'Payout Parameters' is visible at the bottom.

Buttons for 'Ok' and 'Exit' are located at the bottom right of the window.

This screen comprises two tabs viz:

- Interest
- Deposit

5.12.6 Interest Tab (interest preferences for Child TD)

You need to capture the following details here:

Interest Tab

You can capture the following interest-related details.

Calculation Account

Select the calculation account of the child term deposit from the option list. All the CASA accounts and the current TD account for which child TD is to be created will be available for selection in the option list.

Interest Booking Account

You can select the accounts for booking interests on transactions processed at your bank.

Charge Booking Account

You can select the accounts for booking charges on transactions processed at your bank.

Interest Statement

You can also indicate if you would like to generate an interest statement for the account. The Interest Statement will furnish the values of the SDEs and UDEs and the interest rule that applies on the account.

Consolidated Charge Account

Specify the account. The option list consolidated change account

Dr Cr Advices

You can indicate whether you want to generate an interest liquidation advice for a customer account. Check the 'Debit/Credit Advices' box to indicate that the system must generate payment advices when interest liquidation happens on an account. The advices are generated in the existing SWIFT or/and MAIL format. No advices will be generated if you leave this box unchecked.

The preference you have made in the Customer Account Class screen will be defaulted here. However, you can choose to change your preference to generate or suppress these Advices.

Interest Start Date

The system displays the Maturity date of the parent TD as the interest start date for the child TD. However, you can modify it. Interest for this account will be calculated according to the special conditions that you define subsequently.

Charge Start Date

For the account for which you are defining special conditions, you must specify the date from which you would like to apply charges. Charges for this account will be calculated according to the special conditions that you define subsequently.

By default, charges on an account would be applied when the free banking period (if any) elapses. This means that the Charge Start Date is arrived at by the System by adding the Free Banking Period days (if any, specified for the account class used by the account) to the Account Opening Date. If no Free Period has been indicated for the account class used by the account, the Charge Start Date is defaulted to the Account Opening Date (that is, charges on the account would be applied right from the account opening date) and displayed in the Special Conditions Maintenance screen.

You can override the default Charge Start Date and specify the desired start date for charge application.

Interest Booking Branch

By default, the customer's account in the current branch will be displayed in this screen (in the Interest/Charge Booking Account and Interest/Charge Booking Branch fields). However, you have the option of booking interest/charge to a different account belonging to another branch also. You can select the Interest/Charge Booking Branch from the option-list available. The accounts maintained in the selected Booking Branch will be available in the option-list provided for Interest/Charge Booking Account. You can select the account from this list. Interest/Charge will be liquidated into the selected account.

Charge Booking Branch

By default, the customer's account in the current branch will be displayed in this screen (in the Interest/Charge Booking Account and Interest/Charge Booking Branch fields). However, you have the option of booking interest/charge to a different account belonging to another branch also. You can select the Interest/Charge Booking Branch from the option-list available. The accounts maintained in the selected Booking Branch will be available in the option-list provided for Interest/Charge Booking Account. You can select the account from this list. Interest/Charge will be liquidated into the selected account.

Consolidated Charge Branch

Select the charge booking branch from the option-list available. You have an option of booking interest/charge to a different account belonging to another branch. The accounts maintained in the selected booking branch are available in the option-list provided. The system liquidates the Interest/Charge into the selected account

Product Code

Specify the product code.

UDE Currency

Specify the UDE currency for the product that you apply on the account. UDE values that you specify for the account subsequently will be taken to be in this currency.

Generate UDE Change Advice

Check this box to generate the UDE change advice.

Waive Charge

This box is unchecked by default. However, you cannot waive charge on a TD. Leave this box unchecked.

Open

Check this box to make the product applicable again. More than one product may be applicable on an account class at the same time. You can temporarily stop applying a product on an account class by 'closing' it. You can achieve this by un-checking the box 'Open'. The product will cease to be applied on the account class.

Continue Variance on Rollover

This is defaulted based on the Interest and Charges product. However, you can modify this. If you have modified this, then during save, the system will prompt that 'Continue variance on Rollover Flag is modified'. You can proceed.

Check this box to enable continued variance on rollover. If you check this, then the system will default account variance as current value to the rollover deposit for the next cycle.

If you do not check this, then the account variance will not be carried forward to next rollover cycle.

Interest rate based on cumulative amount

Check this box if child TD account has to be considered for cumulation. Cumulation is applicable only for rate chart allowed TDs.

Effective Date

Specify the effective date of a record which is the date from which a record takes effect. The system displays the maturity date of the parent TD. However, you can change it.

Open

Specify the open records with different Effective Dates if the values of UDEs vary within the same liquidation period.

UDE ID

Specify the UDE ID for the account.

UDE Value

Specify the values for a UDE, for different effective dates, for an account. When interest is calculated on a particular day for an account with special conditions applicable, the value of the UDE corresponding to the date will be picked up.

Rate Code

Specify the rate code for the account. TD rate code is not applicable for Child TD.

Variance

Specify the variance in the interest rate. This is the variance alone. The effective rate will be the sum of the TD rate code and the variance that you specify here. You can modify it anytime.

5.13 Deposit Tab (Deposit Preferences for Child TD)

Click 'Deposit' tab to capture deposit-related details of the child TD, if you have opted for creation of a child TD on maturity of the parent TD.

The system defaults all the parameters maintained for the parent TD in this screen. However, you can modify them.

The screenshot shows the 'Term Deposit Interest' application window. The 'Deposit' tab is selected under the 'Interest' section. The 'Deposit Tenor' and 'Rollover Tenor' sections allow users to select the tenor type (Account Class Tenor, Account Tenor, or Independent Tenor) and specify the duration in Years, Months, and Days. The 'Maturity Date' section includes options for 'Auto Rollover', 'Close on Maturity', 'Move Interest to Unclaimed', 'Move Principal to Unclaimed', and 'Cascade Month-End Maturity Date'. The 'Rollover Type' section offers choices for 'Principal', 'Principal + Interest', 'Special Amount', and 'Interest'. The 'Rollover Amount' section features a 'Compute' button. The 'Pay Out Details' section contains a table with columns for 'Payout Type', 'Percentage', 'Offset Branch', 'Account', and 'Narrative'. The bottom of the window includes 'Payout Parameters' and 'Ok' and 'Exit' buttons.

You need to capture the following details here:

Deposit Tenor

Select the deposit tenor type. The following options are available.

- Account class tenor - If you select this, the system will default the default tenor from the account class. This is represented in terms of days, months and years. You cannot edit it. The system will not display the next maturity date, as account class tenor is subject to change.
- Account tenor - If you select this, the system displays the original tenor of the parent TD. The tenor is represented in days, months and years. You cannot change this.
- Independent tenor - If you select this, you can specify the tenor in terms of days, months and years. The default value of the independent tenor will be null.

The tenor should be specified within the minimum and maximum tenor limits maintained at the account class level. The tenor months cannot be greater than 11 months and if tenor months is specified, the tenor days cannot be greater than 30 days.

Years

This indicates the number of years in the original tenor.

Months

This indicates the number of months in the original tenor.

Days

This indicates the number of days in the original tenor.

If the maturity date falls on the holiday, the system adjusts it to next working day.

Rollover Tenor

The deposit tenor has following options as below,

- Account class tenor - If you select this, the system displays the account class tenor in days, months and years. You cannot change this. The system will not display the next maturity date, as account class tenor is subject to change. The default account class tenor at the time of rollover is considered.
- Account tenor - This is the default option. If this is selected, the system populates the original tenor of the parent TD. The tenor is represented in days, months and years. You cannot change this.
- Independent tenor - If you select this, you can enter the rollover tenor in terms of days, months and years. The default value of the independent tenor will be null.

Years

This indicates the number of years in the rollover tenor.

Months

This indicates the number of months in the rollover tenor.

Days

This indicates the number of days in the rollover tenor.

The tenor should be specified within the minimum and maximum tenor limits maintained at the account class level. The tenor months cannot be greater than 11 months and if tenor months is specified, the tenor days cannot be greater than 30 days.

The tenor is represented in terms of years, months and days. For example, if the deposit tenor is 185 days, it should be represented as 0 years, 6 months and 5 days. You need to specify the values in the appropriate fields.

Maturity Date

The system defaults the maturity date from the default tenor from the account class. However, you can modify this date. On this date the term deposit account gets

Auto Rollover

Check this field to automatically rollover the deposit you are maintaining. You have to indicate 'Rollover Type' on selecting this option

Close on Maturity

Check this box to close the term deposit account on maturity date and transfer the amount as per the pay-out details maintained for the child TD.

Move Interest to Unclaimed

Check this box to move the interest amount to the unclaimed GL mapped at the IC product in the accounting roles on grace period end date. If you select this option, you will need to check the box 'Move Principal to Unclaimed'.

Move Principal to Unclaimed

Check this box to move the principal amount to the unclaimed GL mapped at the IC product in the accounting roles and liquidate the interest amount to the interest booking account on grace period end date. If you select this option, the principal liquidation account should be the term deposit account.

Rollover interest rate based on cumulative amount

Check this box to opt for cumulation at the time of rollover.**Next Maturity Date**

On selecting the rollover for the TD account, the system defaults the next maturity date from the previous tenor of the deposit.

Deposit Tenor

The system calculates the tenor of the deposit account to the difference between Interest start date and Maturity date and displays it. In case of change in maturity date, the system changes the value of this field.

Rollover Type

Indicate the components that should be rolled over by choosing one of the following options:

- Principal
- Principal + Interest
- Special Amount
- Interest

Rollover Amount

If a special amount is to be rolled over, you have to specify the amount (less than the original deposit amount) in this field.

Payout Type

Indicate the method for initial funding during account creation.

Choose one of the following options:

- Account Number
- General Ledger
- Banker's Cheque

- Payments

Percentage

Specify the percentage of the amount that be rolled over.

Offset Branch

The system populates the branch code of the account from which fund is transferred to TD account. This field returns the branch code if the account is selected and NULL is returned if GL is selected.

Account

Specify the account number/ GL from which the fund is transferred to TD account. If it is Pay-In mode in GL then the system displays only GL's and if the Pay-In mode is Account then only accounts are displayed in the option list.

Narrative

Specify remarks about the transaction.

5.13.1 Specifying Pay-out Parameters for Child TD

Click 'Payout Parameters' button on the 'Term Deposit Interest' screen and invoke the 'Payout Parameters' screen. Here you can specify pay-out preferences for the child TD.

This screen comprises two tab viz:

- Bankers Cheque
- Local Payment

5.13.2 Bankers Cheque Tab (for auto pay-out of Child TD)

By default this tab is displayed on invoking the screen. You need to capture the following details in case you want to redeem the child TD using a banker's cheque.

Cheque Details

Specify the following details.

Bank Code

Specify the bank code of the Bankers cheque.

Currency

Specify the currency in which the cheque is drawn.

Payable Branch

Specify the payable branch for the cheque. The adjoining option list displays all branch codes linked to the specified bank code. You can select the appropriate one.

Beneficiary Details

Specify the following details.

Beneficiary Name

Specify the name of the beneficiary for the pay-out.

Passport/ IC Number

Specify the passport or IC number of the beneficiary for the pay-out.

Narrative

Specify the description for the pay-out.

Beneficiary Address

Specify the address of the beneficiary for the pay-out.

5.13.3 Local Payment Tab for Child TD

Click 'Local Payment' tab to capture payment details if you want to redeem the child TD through a Local Payment transfer to another account.

The screenshot shows a dialog box titled "Payout Parameters" with a close button (X) in the top right corner. At the top, there are two tabs: "Bankers Cheque" and "Local Payments", with "Local Payments" being the active tab. The dialog is divided into two main sections: "Counterparty" and "Beneficiary Details".

Counterparty Section:

- Counterparty Bank Code: Input field with a help icon.
- Counterparty Account: Input field with a help icon.
- Currency: Input field.

Beneficiary Details Section:

- Beneficiary Name: Input field.
- Passport/IC Number: Input field.
- Narrative: Input field with a help icon.
- Beneficiary Address: Input field.

At the bottom right of the dialog, there are "Ok" and "Cancel" buttons.

The following details are captured here:

Counterparty

Specify the following details.

Counterparty Bank Code

Specify the bank code of the counter party

Counterparty Account

Specify the account name of the counterparty for the pay-out.

Currency

Specify the currency for the pay-out.

Beneficiary Details

Specify the following details.

Beneficiary Details

Specify the details of the beneficiary

Beneficiary Name

Specify the name of the beneficiary

Passport/IC Number

Specify the Passport/IC Number of the beneficiary

Narrative

Give a brief description for the payout.

Beneficiary Address

Specify the address of the beneficiary.

5.14 Viewing Change Log

Click 'Change Log' button on the 'Deposit Account Booking' screen and invoke the 'View' screen.

5.15 Interest Payout Details for Banker's Cheque / DD and Local Payment

This section contains the following topics:

- [Section 5.15.1, "Capturing Interest Payout Details for Banker's Cheque / DD and Local Payment"](#)
- [Section 5.15.2, "Banker's Cheque / DD Tab"](#)
- [Section 5.15.3, "Local Payment Tab"](#)

5.15.1 Capturing Interest Payout Details for Banker's Cheque / DD and Local Payment

You can capture interest payout details for Banker's Cheque / DD and PC in the 'Term Deposit Interest Payout Details' screen.

You can capture the following details:

Branch Code

Branch code of the current branch is defaulted here.

Account

Account number of TD is defaulted here from the main tab.

Currency

Currency code of the TD account is defaulted here.

5.15.2 **Banker's Cheque / DD Tab**

On invoking the 'Term Deposit Interest Payout Details' screen, this tab is displayed by default. You can specify the following details:

Cheque /DD Details

You can specify the following cheque or DD details here:

Bank Code

Specify the bank code. The adjoining option list displays all the bank codes maintained in the system. You can choose the appropriate one.

Payable Branch

Specify the branch from which the interest is payable. The adjoining option list displays all the bank codes maintained in the system. You can choose the appropriate one.

Instrument Type

The system displays the instrument type.

Currency

The system displays the currency.

Beneficiary Details

You can specify the following beneficiary details here:

Beneficiary Name

Specify the beneficiary name.

Passport Number

Specify the passport number of the beneficiary.

Narrative

Enter a brief description of the beneficiary.

Beneficiary Address

Specify the beneficiary address.

5.15.3 Local Payment Tab

Click 'PC' tab on the 'Term Deposit Interest Payout Details' screen. The following screen will be displayed.

The screenshot shows a window titled "Interest Payout Details" with a close button (X) in the top right corner. The window contains several input fields and a tab selector. At the top, there are fields for "Branch", "Account", and "Currency". Below these, there are two tabs: "Bankers Cheque / Demand Draft" and "Local Payments", with "Local Payments" being the active tab. Under the "Local Payments" tab, there are three sections: "Counterparty" with fields for "Counterparty Bank Code", "Counterparty Account", and "Counterparty Currency"; "Beneficiary Details" with fields for "Beneficiary Name", "Passport/IC Number", and "Narrative"; and "Beneficiary Address" with two lines of text input. At the bottom right of the window, there are "Ok" and "Cancel" buttons.

Counterparty

You can specify the following counterparty details here:

Counterparty Bank Code

Specify the counterparty bank code. The adjoining option list displays all the counterparty bank codes maintained in the system. You can choose the appropriate one.

Counterparty Account

Specify the counterparty account. The adjoining option list displays all the counterparty bank codes maintained in the system. You can choose the appropriate one.

Currency

The system displays the instrument currency.

Beneficiary Details

You can specify the following beneficiary details here:

Beneficiary Name

Specify the beneficiary name.

Passport Number

Specify the passport number of the beneficiary.

Narrative

Enter a brief description of the beneficiary.

Beneficiary Address

Specify the beneficiary address.

Note

The system supports the following payout options for interest payout:

- Account
- General Ledger
- Bankers Cheque
- Demand Draft
- Local Payment

If payout details are maintained for interest component then interest liquidation happens on the basis of payout details maintained for interest component. However, if payout details are not maintained for interest component then interest liquidation happens on the basis of interest book account specified.

If payout type is chosen as Account or GL for interest component then interest liquidation happens on the basis of offset account mentioned in the 'Term deposit payout details' multi grid. If payout type is chosen as Demand Draft /Banker's Cheque or Local Payment for interest component then interest liquidation happens on the basis of payout details maintained in the 'Interest Payout Details' sub screen.

Interest payout through as Demand Draft /Banker's Cheque or Local Payment happens through the same bridge GL used for principal payout.

The system does not support payout option as Term Deposit.

Interest payout is not supported if rollover type is interest or principal and interest. For Interest rollover type interest liquidation will be done based on the interest book account.

5.16 Viewing Rollover History Details

You can view Rollover History details in TD Rollover History screen. Click on 'Rollover History' to invoke this screen.

The screenshot shows a software window titled "TD Rollover History". At the top, there are two input fields labeled "Branch Code" and "Account No". Below these is a section titled "Rollover History" which contains a table. The table has a header row with the following columns: "Sequence Number", "Rollover Date", "Rollover Type", "Principal", "Interest", and "Rollover Amount". Above the table, there are navigation arrows and a "Go" button. At the bottom right of the window, there is an "Exit" button.

The following details are defaulted in the above screen:

- Sequence Number
- Rollover Date
- Rollover Type
- Principal
- Interest
- Rollover Amount
- Tenor Years

- Tenor Months
- Tenor Days
- Old Maturity Date
- New Maturity Date
- Account Status

For Rollover Type, P = PRINCIPAL, I = PRINCIPAL + INTEREST, T = INTEREST and S = SPECIAL AMOUNT.

Note

On rollover, the adjusted rollover tenor of the TD account is updated in the fields Tenor Years, Tenor Months and Tenor Days.

If the rollover tenor is 1 year, 5 months and 7 days, then the rollover history is updated as

- Tenor Years - 1
 - Tenor Months - 5
 - Tenor Days - 7
-

5.17 Specifying Document Details

You can capture the customer related documents in central content management repository through the 'Document Upload' screen. Click 'Documents' button to invoke this screen.

The screenshot shows a window titled 'Document Upload'. At the top, there is a navigation bar with '1 Of 1' and a 'Go' button. Below this is a table with the following columns: Document Category *, Document Type *, Document Reference *, Remarks, Upload, and View. The table is currently empty. At the bottom right of the window, there are 'Ok' and 'Exit' buttons.

Here, you need to specify the following details:

Document Category

Specify the category of the document to be uploaded.

Document Type

Specify the type of document that is to be uploaded.

Document Reference

The system generates and displays a unique identifier for document reference.

Remarks

Specify the additional information, if any.

Upload

Click 'Upload' button to open the 'Document Upload' sub-screen. The 'Document Upload' sub-screen is displayed below:

The screenshot shows a web application window titled "Document Upload". The window contains a table with the following columns: "Document Category", "Document Type", "Document Reference", "Remarks", "Upload", and "View". The table is currently empty. At the bottom right of the window, there are "Ok" and "Exit" buttons. The window also has a search bar with a "Go" button and a "1 Of 1" indicator.

In the 'Document Upload' sub-screen, specify the corresponding document path and click the 'Submit' button. Once the document is uploaded through the upload button, the system displays the document reference number.

View

Click 'View' to view the document uploaded.

5.18 Specifying Denominated Deposit Details

You can capture denominated deposits details in the 'Denominated Deposit' screen. To invoke this screen click the button 'Denominated Deposit' on 'Deposit Account Booking' screen.

Denominated Allocation Details

| Denomination ID | Denomination Description | Denomination Value | Units | Total Amount |
|-----------------|--------------------------|--------------------|-------|--------------|
|-----------------|--------------------------|--------------------|-------|--------------|

Certificate Status Query/Modification

Active Certificate Only

 All Certificates

| Certificate Number | Denomination Value | Issue Date | Current Status | New Status | Status Change Date | Status Change Reason |
|--------------------|--------------------|------------|----------------|------------|--------------------|----------------------|
|--------------------|--------------------|------------|----------------|------------|--------------------|----------------------|

Bulk Status Change:

Ok Exit

The following details are captured here:

Denomination Allocation Details

The following denomination allocation details are captured here:

Denomination ID

Specify the denomination id here. Alternatively you can also select the denomination ID from the adjoining option list. The list displays all denomination ids allowed at the account class level.

Denomination Description

This is defaulted from the account class level.

Denomination Value

This is defaulted from the account class level.

Units

Specify the required units here.

Total Amount

The Total Amount which is Denomination value x Units is displayed here.

Certificate Status Query/Modification

After a deposit is opened, you can perform a query or modification on the certificate status of a deposit. Select the type of query or modification that you want to perform on the certificates from the following options:

- Active Certificate Only
- Single Certificate Number
- All Certificates

Certificate Number

Select the certificate number from the adjoining option list for which the status has to be changed or queried on.

Denomination Value

This is defaulted from the account level.

Issue Date

The date of issuance of the certificate to the deposit is displayed here.

Current Status

The current status of the certificate is displayed here

New Status

You can select the new status of the certificate from the adjoining drop-down list. The following options are available for selection:

- Issued
- Lost/damaged
- Re-denominated
- Modified
- Duplicate
- Rollover Issue

Note

Only valid certificate status which are allowed to be modified manually will be available in the drop down

Status Change Date

The status change date is defaulted here

Status Change Reason

Specify the reason for status change of the certificate. You can enter up to 225 characters.

Bulk Status Change

Select the appropriate bulk status change option from the drop-down list:

- Modified
- Issued
- Lost/damaged
- Re-denominated
- Duplicate
- Rollover Issue

Note

Only valid certificate status which are allowed to be modified manually will be available in the drop down

Bulk Status Change Reason

Specify the reason for status change of the certificate. You can enter up to 225 characters.

Click 'Populate' button. System calculates and displays the following details:

Denomination Allocation Pending Amount

This indicates the amount for which the denomination is yet to be allocated.

Certificate Allocation Pending Amount

This indicates the amount for which the certificate is yet to be allocated.

Term Deposit Amount

This indicates the deposit amount.

Deposit certificate statuses are available for modification as detailed below. Certain status changes are based on occurrence of events on the term deposit account.

| Current Certificate Status | Action | Status of the existing certificate after the action | Status of the new certificate |
|-----------------------------------|---|--|--------------------------------------|
| Issued | Account not opened due to unsuccessful pay-in transaction | Cancelled | |
| | Amount Block to the deposit certificate | Amount Blocked | |
| | Re-denomination of the certificate | Modified | Re-denominated |
| | Redemption of the deposit (partial or full) | Redeemed | |
| | Rollover of the deposit | Cancelled **.In ICDBADHC screen on trying to issue new certificate with 'Rollover Issuance' as 'Y' ,then the status of the old certificate will get changed as "Cancelled". Else the previous status only will be retained. | Rollover Issue |
| | Certificate lost / damaged | Lost/Damaged | Duplicate |

| Current Certificate Status | Action | Status of the existing certificate after the action | Status of the new certificate |
|-----------------------------------|--|--|--------------------------------------|
| Re-denominated | Amount Block to the deposit | Amount Blocked | |
| | Re-denomination of the certificate | Modified | Re-denominated |
| | Redemption of the deposit (partial or full) | Redeemed | |
| | Rollover of the deposit | Cancelled **.In ICDBADHC screen on trying to issue new certificate with 'Rollover Issuance' as 'Y' ,then the status of the old certificate will get changed as "Cancelled". Else the previous status only will be retained. | Rollover Issue |
| | Certificate lost | Lost/Damaged | Duplicate |
| Rollover Issue | Amount Block to the deposit | Amount Blocked | |
| | Re-denomination of the certificate | Modified | Re-denominated |
| | Redemption of the deposit (partial or full) | Redeemed | |
| | Rollover of the deposit | Cancelled **.In ICDBADHC screen on trying to issue new certificate with 'Rollover Issuance' as 'Y' ,then the status of the old certificate will get changed as "Cancelled". Else the previous status only will be retained. | Rollover Issue |
| | Certificate lost | Lost/Damaged | Duplicate |

| Current Certificate Status | Action | Status of the existing certificate after the action | Status of the new certificate |
|-----------------------------------|--|--|--------------------------------------|
| Duplicate | Amount Block to the deposit | Amount Blocked | |
| | Re-denomination of the certificate | Modified | Re-denominated |
| | Redemption of the deposit (partial or full) | Redeemed | |
| | Rollover of the deposit | Cancelled **.In ICDBADHC screen on trying to issue new certificate with 'Rollover Issuance' as 'Y' ,then the status of the old certificate will get changed as "Cancelled". Else the previous status only will be retained. | Rollover Issue |
| | Certificate lost | Lost/Damaged | Duplicate |
| Amount Blocked | Removal of amount block to the deposit | Issued / Rollover Issue/Duplicate/ Re-denominated | |
| Lost/Damaged | User marked the certificate Lost/ Damaged by mistake | Issued / Rollover Issue/Duplicate/ Re-denominated | |
| Modified | User marked the certificate Modified by mistake | Issued / Rollover Issue/Duplicate/ Re-denominated | |

The following table shows the status reasons that are factory shipped for the statuses which are changed automatically.

| Automatic Status Change | Action Due to which the status is changed | Status Change Reason -Updated Automatically |
|--------------------------------|---|---|
| Cancelled | Account not opened due to unsuccessful pay-in transaction | Pay-in transaction unsuccessful |
| Amount Blocked | Amount Block to the deposit certificate | Hold description for the hold code will be displayed. |
| Redeemed | Redemption of the deposit (partial or full) | Deposit Redeemed |

| Automatic Status Change | Action Due to which the status is changed | Status Change Reason -Updated Automatically |
|---|--|--|
| Cancelled | Rollover of the deposit | Deposit Rollover |
| Issued / Roll-over Issue/ Duplicate/ Re-denominated | Cancel | Amount Block removed |

For denominated deposits you can do both automatic and manual rollover (including force rollover) only on the entire principal portion. During rollover, there will be no automatic re-issuance of certificates.

In case the certificate is required to be re-issued after rollover the ICDBADHC screen will be used. You can check the 'Rollover Issue' box and then the status of the original certificate will be changed automatically to 'Cancelled' and the status change reason will be updated as 'Deposit Rollover'. The status of the new certificate will be 'Rollover Issue'. You are not allowed to re-denominate the certificate during the rollover issue.

5.18.1 Denomination Allocation

Before allocation of the denominations the 'denomination allocation pending amount' and 'term deposit amount' will be equal and once the denominations are allocated on click on the 'Populate' button, the 'Denomination Allocation Pending Amount' field will display the difference between the Term deposit amount and the total of the total amount field (i.e. Term Deposit Amount – Total of the Total Amount field). If you fail to click the 'Populate' button, then on 'Save' the fields are updated.

There will be a validation for the 'Denomination Allocation Pending Amount' to be 'Zero' on save of the deposit. If the validation fails then system displays an error message like:

Allocation of Denomination is not done for the full term deposit amount'

You can change the denomination before allocating the certificates from the 'Term Deposit Certificate' (ICDBADHC) screen by unlocking the 'Deposit Account Booking' (STDCUSTD) screen. But if the denominations are to be changed after allocating the certificates from 'Term Deposit Certificate' (ICDBADHC) screen, the process of re-denomination has to be followed.

Note

- The interest rate pickup and the interest calculations are based on the entire deposit amount and not on each certificate denomination.
- TD accounts opened after the interest start date will not be considered for arriving at the cumulation amount.
- The interest rate based on cumulative amount is applicable if 'Interest Rate Based on Cumulative Amount' at the account class is selected.

The settlement account for the interest cannot be the same TD account.

5.19 Rollover Details

You can capture Rollover Details in the 'TD Rollover Details' screen. To invoke this screen click the button 'Rollover Details' on 'Deposit Account Booking' screen.

The screenshot shows the 'TD Rollover Details' application window. It contains the following elements:

- Rollover Details:**
 - Rollover Type:** Radio buttons for Principal, Principal + Interest, Special Amount, and Interest.
 - Rollover Amount:** Text input field.
 - Add Amount:** Text input field.
 - Add Funds:** Button.
- Rollover Tenor:**
 - Radio buttons for Account Class Tenor, Account Tenor, and Independent Tenor.
 - Input fields for Years, Months, and Days.
 - Checkbox for Rollover Interest Rate Based on Cumulative Amount.
- Pay In Details:**
 - Navigation: 1 Of 1, Go button.
 - Table with columns: Term Deposit Pay In Option, Percentage, Amount, Offset Branch, Offset Account.
- Buttons:** Ok, Exit.

You can specify the following details here:

Rollover Details

Rollover Type

Select the component that should be rolled over. The options are as follows:

- **Principal** - To roll over the principal amount alone on TD maturity date or end of the grace period. If a CASA account is specified as the interest booking account, interest will be liquidated to that account. However, if the interest booking account is given as TD account, then it is mandatory to specify the interest payout account. On interest liquidation cycle, the interest will be booked on the TD and paid out to the interest payout account. On maturity date, the interest amount will be first liquidated to the TD account and then settled as per the pay-out details maintained for the TD account. Thus the principal alone is rolled over.
- **Principal + Interest** - To rollover the principal and interest amount on TD maturity date. You can choose this option only if the interest booking account is TD account. Payout details should not be specified.
- **Special Amount** - To roll over the amount specified in 'Rollover Amount' field, irrespective of the interest booking account. Upon maturity of the rolled over TD, the system will roll over with the same amount special amount and settle the interest amount as per TD pay-out details maintained.
- **Interest** - To roll over the interest amount on TD maturity date. You can choose this option only if the interest booking account is TD account. You should specify the principal payout account and leave the interest payout account. The principal will be settled as per the pay-out details maintained. This option is not allowed for discounted deposits.

Note

- If the Close on Maturity option is checked then, the system will select the option 'Principal' and disable this field.
 - Add funds & add amt can be specified any time during lifecycle of TD. TD account can be modified & additional amount can be provided. If due to insufficient funds, the add amount cannot be debited on rollover, then rollover will fail. This will be retried till the funds becomes available and when funds becomes available, the TD Account will be rolled with add funds with maturity date as value date.
 - The additional funds will take effect only at the time of rollover. If rollover is with Principal / Principal+Interest / Interest, then user has to manually check the add funds & specify the additional amount.
 - For rollover types Principal / Principal + interest & interest, add funds specified will be directly applied in addition to rollover amount & TD will get rolled with add funds
 - If additional amount is specified, then add pay in details are mandatory. If not, error will be thrown on save.
 - If rollover is special amount, then based on the rollover amount, the add funds & additional amount will get populated. user should not input add funds & amount for special amnt. If rollover amount is more than the Maturity amount (P+I), then Rollover amount -Maturity amnt will be populated as add amount & add funds will gets checked automatically. In this case, rollover amount can be more than the maturity amount.
 - Add amount populated once for a special amount rollover TD will not be changed. If TD account is topped up / redeemed, it will be updated only when rollover amount is changed at rollover details subsystem
 - If due to Top up, the TD amount becomes more than the rollover amount, then excess of rollover amount less maturity amount will be paid out. For special amount rollover TD, even if rollover amount is more than maturity amount, payout is mandatory.
-

In case of Discounted Interest, only Principal can be rolled over. The 'Cumulative' option is not allowed. The interest computed during deposit booking with discounted option will be paid to the interest booking account. When 'Amount block' option is checked at the product level, the amount block will be created on the TD account to the extent of the credited discounted interest. This amount block will use the Hold Code which has 'Hold Type' as Discounted TD in the 'Hold Maintenance' screen. This is to safeguard the bank from withdrawal of interest by the customer. The amount block created automatically by the system can be manually removed in case of premature closure. Closure is allowed on the amount blocks manually and amendment of these amount blocks is not allowed. TD amount blocks will be available in the 'Amount Block Input' screen.

Note

If 'Close on Maturity' option is checked and there is an amount of TD blocked, then the TD will be forcibly rolled over on the maturity date. However, the maturity instruction on the TD account will not be altered.

Rollover Amount

Specify the special amount to be rolled over.

Add Funds

Check this box to add additional funds for rollover.

Add Amount

Specify the additional amount to be considered for rollover in TD account currency.

Note

'For Rollover Type, 'Special Amount', 'Add Funds' and 'Add Amount' fields will be auto populated.

- If the user specifies higher amount, the 'Add Funds' gets updated as 'Yes' and 'Add Amount' will be updated as the difference between special rollover amount and TD maturity amount (P+I) on Save of TD booking. The additional amount field will not be updated on subsequent events in the TD. Any difference amount after rollover will be transferred to the principal payout account.
 - If Rollover amount specified is lower than TD amount, the difference will be paid out. In this case, 'Add Funds' and 'Add Amount' will not be auto populated.
-

Rollover Tenor

Select the rollover tenor for the TD account. This is mandatory if 'Auto Rollover' box is checked. The options are as follows:

- Account Class Tenor - If 'Re-pick up Account Class Tenor on Rollover' is set to 'Yes' at the account class level, then on selecting rollover, the rollover tenor will be defaulted as account class tenor.

The default account class tenor is displayed as tenor in days, months and years which you cannot change. However, you can change the default option during rollover. When you save it, the system displays an override message 'Re-pick account class tenor on rollover restrictions exists at account class'.

If 'Re-pick up Account Class Tenor on Rollover' is checked at the account class level, then by default, this option is selected. If you select this option, then the following are applicable:

- The value of 'Default Tenor' at account class is considered as the 'Rollover Tenor' during deposit rollover
- During opening or modification within the term of the deposit, if you change the defaulted value for 'Rollover Tenor' from 'Account Class Tenor' to 'Account Tenor' or 'Independent Tenor', then on save system displays an override message.
- On save, 'Maturity Date' will not be displayed.
- Account Tenor - If Re-pick up Account Class Tenor on Rollover is set to 'No' at the account class level, then on selecting rollover, the rollover tenor will be defaulted as account tenor.

On rollover, the system displays the original tenor of the TD in terms of days, months and years. However, you can change the default option during rollover. When you save it, the system displays an override message 'Re-pick account class tenor on rollover restrictions exists at account class'. If 'Re-pick up Account Class Tenor on Rollover' is unchecked at the account class level, then by default, this option is selected. If you select this option, then the following are applicable:

- The value of 'Original Tenor' of the deposit account is considered as the 'Rollover Tenor' during deposit rollover.
- During opening or modification within the term of the deposit, if you change the defaulted value for 'Rollover Tenor' from 'Account Tenor' to 'Account Class Tenor', then on save system displays the override message, "Re-pick up Account Class Tenor on Rollover restrictions at account class will be ignored".

- On save, system updates the 'Next Maturity Date' with the sum of maturity date and original tenor of the deposit.
- Independent Tenor - Select this option to provide a different tenor, other than default from account class or account tenor. On selecting this option, you can specify the Rollover Tenor in years, months and days combination.

The tenor should be specified within the minimum and maximum tenor limits maintained at the account class level. If it is not within the minimum and maximum limit, then the system will display an error message "Rollover tenor does not fall in the range of minimum and maximum tenor allowed". The rollover tenor for independent tenor should not be null.

On save, system updates the 'Next Maturity Date' accordingly.

Note

System validates that the rollover tenor is within the minimum and maximum tenor allowed for the account class. If this validation fails, then system displays the error message, "Rollover tenor does not fall in the range of minimum and maximum tenor allowed".

The next maturity date will be adjusted based on the holiday treatment at account class level. The tenor in ICDREDMN screen will remain the same after holiday adjustment. On query from STDCUSTD after rollover, Deposit tenor will be populated with the holiday adjusted tenor and original tenor with the actual tenor before holiday adjustment.

Years

Specify the number of years in the rollover tenor.

Months

Specify the number of months in the rollover tenor.

Days

Specify the number of days in the rollover tenor.

Rollover Interest Based on Cumulative Amount

Check this box to arrive at the rollover interest rate of a new deposit using the cumulative amount of other active deposits, under the same account class and currency.

Note

- If this box is checked, then the rolled over deposit will earn a cumulative interest rate corresponding to the slab based on all active deposits of the customer.
 - This selection can be modified any time during the life cycle of TD. The modification will take effect only on next rollover. The rollover interest rate based on cumulative amount flag will be defaulted on rollover to the 'Interest rate based on Cumulative amount' flag at interest subsystem.
 - Rollover interest rate based on cumulative amount can be 'No', if interest rate based on cumulative amount is 'Yes' and vice-versa.
 - Rollover interest rate based on cumulative amount can be checked only for rollover TDs and not for close on maturity and unclaimed TDs.
 - Cumulation feature is not supported for recurring deposits, discounted deposits, fixed rate deposits and IC rate code deposits.
-

Payin Details

Select the Payin Details for debiting the additional amount for rollover from the drop down list. The list displays the following values:

- GL - In case of pay-in through GL, if the offset GL account is not specified, the list displays the GL maintained at 'TD Payin Parameters' (STDTDPAY) screen and should be specified. If not specified, then GL at STDTDPAY will be defaulted and used on save of TD. The payin mode and Add Funds specified will be debited only on rollover
- Account - In case of pay-in from savings account, it is mandatory to specify the offset account. If it is not specified, the system displays an error on saving the TD account. If the pay-in account specified is disallowed for the TD product, then on saving the account, the system displays an error message
 - If the offset account is not specified then, an error message is displayed as : “Offset account is mandatory.”
 - Before rollover, the customer has to manually verify the availability of funds in the offset account. If not the rollover will fail. If the offset account does not have sufficient funds then the system will display an error as ‘Insufficient balance in the account.

If the offset account provided has limits attached, then on save the system will display a message as “The limits/Collateral attached is used for Payin.”

Percentage

Specify the percentage of payout for each payout option specified.

Amount

Specify the amount to be transferred to TD.

Offset Branch

The system displays the branch code of the account to which fund is transferred from TD account.

Offset Account

Specify the account number/ GL from which the fund is transferred to TD account on rollover. This field will return the branch code if the account is selected and NULL will be returned if GL is selected. If pay-out mode is GL then the system displays only GLs in the option list.

Note

- If amount block exists and TD account is force rolled, then Add Funds will be applicable on rollover.
- Add Funds is allowed only for auto rollover TDs. If it is opted for Close on Maturity or Unclaimed, the system displays an error as ‘Add funds feature is applicable only for rollover TDs’
- Even if one add pay in account does not have funds, then the rollover will fail.
- When TD account is topped up/ Redeemed the Add Amount populated for a special amount rollover TD will not be changed. It will be updated only when rollover amount is changed at rollover details subsystem.
- Add funds and Add amount can be specified at any time during the life-cycle of TD. TD account can be modified and additional amount can be provided.,
- When funds are insufficient the Add amount cannot be debited on rollover. and the rollover will fail. And will retire till the funds become available.
- When funds are available, then the TD account will be rolled with add funds with maturity date as value date.

- During Top-up if the TD amount becomes more than the rollover amount then for the excess of rollover amount less maturity amount will be paid out.

5.20 Maintaining Amount Blocks

Oracle FLEXCUBE allows you to facilitate creation of manual amount blocks and closure of the same for TD accounts. You can maintain the amount blocks using 'Amount Block Input' screen. To invoke this screen type 'STDAMBLK' in the field at the top right corner of the Application tool bar and click the adjoining arrow button.

You can specify the following details:

Account

Specify the TD account that needs to be blocked. The adjoining option list displays all active, open and authorized TD accounts that are available for blocking.

To view the joint holder's details of an account and the mode of operation maintained at the account level, place the cursor on the Account field and press Ctrl+J. The system displays the 'Joint Holder' screen.

For more information on the 'Joint Holder' screen refer to the section 'Joint Holder Maintenance' in the Core User Manual.

Account Description

The system displays the description of the specified account number based on the details maintained at 'Deposit Booking' screen.

Currency

System defaults the currency of the specified account.

Amount

Specify the amount details. The amount to be blocked cannot be greater than the available balance in TD account.

Amount Block Type

Select the type of amount block from the drop-down list. Following are the options available in the drop-down list:

- FLEXCUBE
- Switch
- PreAuth
- Escrow
- System
- Account
- Bulk Salary
- Discounted TD
- Sweep Deposit
- Loan

Note

The amount block type should always be 'FLEXCUBE' for the manually blocked amounts. From front end, the system will not allow you to create, modify or close a record which has 'Amount Block Type' as 'Loan'.

Auto deposits created under the Auto Deposit account class (mapped in CASA account class -> Auto Deposit subsystem -> Account class field) cannot be blocked using this screen. However, deposit created manually under this Auto Deposit account class in STDCUSTD can be blocked.

Amendment of block amount not supported for Discounted Deposits and Mudarabah Sweep Deposit.

Hold Code

Specify the hold code. The hold codes are maintained in the 'Hold Maintenance' screen. Specify the reason for amount block here. In case of discounted TDs, the hold code and description will be automatically defaulted.

Amount Block Number

The system displays the amount block number when the new operation is initiated.

Effective Date

Specify the effective date from when the block becomes effective. The effective date can be current / future dated. If you do not specify the effective date, system defaults the current date here.

Expiry Date

Specify the expiry date. If you do not specify the expiry date, on save, system defaults the current date here. The block will be released on EOTI of the specified expiry date.

The record status will remain as open until the block record is closed. This is irrespective of amount block expiry; however, you cannot modify the amount block after the expiry date.

Reference Number

Specify the reference number.

Hold Description

The system displays the description for the hold code specified.

Remarks

Specify remarks, if any.

Denominated Deposit Certificate Details

Amount blocking of a denominated certificates can be done using 'TD Amount Block Input' screen. In case of manual TD amount block, you can designate the denominated certificates supporting the block. Once a certificate is designated for block, the status of the certificate will be modified to 'Amount Blocked' from issued, re-denominated, rollover issue or duplicate status automatically.

Specify the following details for capturing amount block details for denominated deposit certificates:

Select All

Check this box to select all certificates for the account.

Certificate Number

Select the certificate number from the option list. The list displays all active certificates issued for the account.

Certificate Status

This indicates the current status of the certificate selected.

Certificate Amount

This indicates the amount of the certificate.

Block

Check this box to block a certificate.

5.20.1 Viewing TD Summary

You can view a summary of all term deposit accounts in the system, using the 'Deposit Account Summary' screen.

To invoke this screen type 'STSCUSTD' in the field at the top right corner of the Application tool bar and click the adjoining arrow button.

The screenshot shows a window titled 'Summary' with a search interface. At the top, there are buttons for 'Search', 'Advanced Search', and 'Reset'. Below these are two columns of search criteria, each with a dropdown menu and a magnifying glass icon:

- Authorization Status
- Record Status
- Branch
- Term Deposit Account Number
- Account Description
- Customer Number
- Term Deposit Currency
- Stock Catalog Code
- Certificate Number
- Maturity Date

Below the search criteria is a table with the following columns: Authorization Status, Record Status, Branch, Term Deposit Account Number, Account Description, Customer Number, Term Deposit Currency, Account Class, Account Open Date, and Alter. The table is currently empty. At the bottom right of the window is an 'Exit' button.

You can query on records based on any one or all of the following criteria:

- Authorization Status
- Record Status
- Branch Code
- Term Deposit Account Number
- Customer Number
- Term Deposit Currency
- Stock Catalog Code
- Certificate Number

Click 'Search' button. The system identifies all records satisfying the specified criteria and displays the following details for each one of them:

- Authorization Status
- Branch Code
- Term Deposit Account Number
- Description
- Customer No
- Term Deposit Currency

Double click on a record to invoke the detailed screen.

5.21 Deposit Instructions

This section contains the following topics:

- [Section 5.21.1, "Specifying Deposit Instructions"](#)
- [Section 5.21.2, "Specifying UDF Values"](#)
- [Section 5.21.3, "Viewing Instruction Summary"](#)

5.21.1 Specifying Deposit Instructions

You can give instructions for processing auto created deposits. The values you specify here will override the parameters you have maintained in the Account Class maintenance.

Invoke the 'Term Deposits Instruction Maintenance' screen from the Application Browser to maintain the deposits instructions specifically for the auto created deposits. Type 'ICDINSMT' in the field at the top right corner of the Application tool bar and click the adjoining arrow button.

| Field | Value |
|---------------------------|--------------|
| Account Number * | 000000058259 |
| Branch Code * | 000 |
| Account Class | CACCR |
| Sequence Number * | 1 |
| Customer | 000058 |
| Account Currency Code | GBP |
| Sweep Branch | |
| Deposit Account Class | |
| Sweep To Account | |
| Deposit Currency | |
| Amount | |
| Years | |
| Minimum Required Balance | 50000 |
| Months | |
| Source Code | |
| Days | |
| External Reference Number | |
| Sweep Multiple Of | |
| Retry Till Date | |
| Start Date | |

| Field | Value |
|----------------------|---------------------|
| Maker | RT_AT1 |
| Checker | DL1_AT1 |
| Date Time | 2014-01-01 23:03:05 |
| Mod No | 1 |
| Record Status | Open |
| Authorization Status | Authorized |

You can set the terms and a condition for a deposit as follows:

Account Number

Specify the account number of the term deposit. The adjoining option list displays all valid TD accounts maintained in the system. You can select the appropriate one.

Account Class

The system defaults account class of the CASA account.

Customer

The system defaults the customer of the CASA account.

Sweep Branch

Specify the branch where the sweep-to account resides. The adjoining option list displays all valid branch codes maintained in the system. You can select the appropriate one.

Sweep to Account

Specify the account to which the sweep is carried out. The adjoining option list displays all valid accounts maintained in the sweep to branch. You can select the appropriate one.

Amount

Specify the amount which to be swept to 'Sweep To Account'.

Minimum Required Balance

Specify the minimum balance required for creation of auto deposit. Only the amount above this limit will be used for auto creating deposits.

Source Code

Specify a code assigned for the sweep.

External Reference Number

The system displays the identification number of the transaction in the source system.

Branch Code

The system displays the branch code of the branch where the TD account resides.

Sequence Number

The system generates a sequence number for the instruction you are maintaining and displays it here.

Account Currency Code

The system defaults the CASA account currency.

Deposit Account Class

The system defaults the Default Auto deposit account class specified in CASA account class. However, you can modify, if needed. The adjoining option list displays all active ,authorized and allowed list of auto deposit account classes specified in CASA account class. Select the appropriate one.

Deposit Currency

Specify the currency in which the auto deposit should be created. The adjoining option list displays all valid currency codes maintained for auto deposit account classes which are active and authorized. You can select the appropriate one. If you want to restrict auto deposit in account level, delete the defaulted AD account class and save the account.

Tenor

The system displays the default tenor maintained for the linked account class in terms of Years, Months, and Days.

Sweep Multiple of

Indicate the number in multiples of which the sweep should be carried out.

Start Date

Indicate the date from which instructions should be valid, using the adjoining calendar.

Retry Till Date

Indicate the date post which the instructions will be rendered invalid. Any failed sweeps after this date will not be picked up for processing the next day.

While saving term deposit instructions;

- If active auto deposit accounts already exist for the Account, the system will display an error message as "Active Auto Deposits are already exist. Cannot modify the Account Class/Currency".

- The system validates if the deposit currency is part of the Interest and Charges Product's account class and currency combination of the Deposit Account class. If not the system will display an error message as "The Auto deposit Currency is not part of the Interest and Charges Product's account class and currency combination".

5.21.2 Specifying UDF Values

All User Defined Fields (UDFs) linked to the function ID 'ICDINSMT' are displayed in the 'User Defined Fields' screen. Invoke this screen by clicking 'Fields' button on the 'Term Deposits Instruction Maintenance' screen.

The screenshot shows a window titled "User Defined Fields" with a sub-header "UDF Details". Below the header, there is a navigation bar with "1 Of 1" and a "Go" button. The main area contains a table with three columns: "Field Name *", "Value", and "Value Description". The table is currently empty. At the bottom right of the window, there are "Ok" and "Exit" buttons.

Here you can specify values for each UDF.

Refer the User Manual titled 'User Defined Field' for details about defining UDFs.

5.21.3 Viewing Instruction Summary

You can view summary of all instructions using the 'Term Deposits Instruction Summary' screen. To invoke this screen, type 'ICSINSMT' in the field at the top right corner of the Application tool bar and click the adjoining arrow button.

The screenshot shows a web-based application window titled "Term Deposits Instruction Summary". At the top, there are search options: "Search", "Advanced Search", and "Reset". Below these are several input fields: "Authorization Status" (a dropdown menu), "Record Status" (a dropdown menu), "Branch Code" (a text input field), and "Account Number" (a text input field). A pagination bar indicates "Records per page: 15" and "1 Of 1". Below the search and input fields is a table with the following columns: "Authorization Status", "Record Status", "Branch Code", "Account Number", "Sequence Number", "Sweep To Account", and "Sweep Branch". The table is currently empty. At the bottom right of the window, there is an "Exit" button.

You can query on records based on any one or all of the following criteria:

- Authorization Status
- Record Status
- Account Number

Click 'Search' button. The system identifies all records satisfying the specified criteria and displays the following details for each one of them:

- Authorization Status
- Record Status
- Branch Code
- Account Number
- Sequence Number
- Sweep To Account
- Sweep Branch

Double click on a record to invoke the detailed screen for that record.

5.22 Input and Authorization Limit Validation for TD and RD

The role level limit set up for a user in 'Role Limits Maintenance' (SMDRLMNE) screen is applicable for Term Deposit and Recurring Deposit transactions. If the user has auto

authorization rights, while saving the transaction, input limit is validated first. If the input amount is within the input limit then subsequently the authorization limit is validated.

At the time of input/authorization of a deposit transaction, if there is a breach of limit then system displays a configurable override message.

Note

- The role level limit set up done in SMDRLMNE screen is not applicable for branch screens.
 - You can set up a common limit for each channel and for all the deposit transactions done through a channel validation is done against that limit.
 - Limit restrictions will not be validated during deposit amendment.
 - Limit validations are applicable for excel upload.
 - Limit restrictions are not applicable for all type of simulation screens.
-

Limit validation is applicable only for the following types of deposits:

- Normal Deposits - including Denominated deposits
- Recurring Deposits
- Discounted Deposit

Limit validation is not be applicable for the following types of deposits:

- Auto Deposit
- Sweep
- Structured Deposit.

Limit validation is applicable for the following types of transactions:

- Term Deposit Opening – Term Deposit amount (Principal amount/Deposit Amount) is considered as the transaction amount.
- Term Deposit Redemption – The redemption amount will be considered as follows:
 - Full Redemption - The deposit account balance as on redemption date will be considered for limit validation. If there is any interest portion as part of the redemption transaction it will not be considered for limit validation.
 - Partial Redemption - The redemption amount entered by the user for the partial redemption only be considered for the limit validation. If there is any interest portion as part of the partial redemption transaction it will not be considered for limit validation.
- Recurring Deposit Opening – Installment amount is considered as the transaction amount.
- Recurring Deposit Redemption – The RD account balance as on date of redemption (full) will be considered for validation. If there is any interest portion as part of redemption transaction will not be considered for validation.
- Top up Deposit – For top up deposits only the top up amount is considered for limit validation.
- Manual renewal – In case of manual renewal the total renewal amount is validated against the limit.

The role level limit control is applicable for the Term/Recurring Deposit transactions made through the following screens:

- STDCUSTD - Deposit Account Booking

- ICDREDMN - Term Deposits Redemption Input (Applicable only for Manual redemption and Manual rollover)
- STDTDTOP - Deposit top up screen
- ICDRDPMT- Recurring Deposit Payments Input (Installment Amount is validated for the limit)
- ICDRDREV - Recurring Deposit Payments Reversal (Amount of transaction that needs to be reversed is validated)

6. TD Operations

6.1 Introduction

You can perform the following operations on a Term Deposit (TD):

- Top-up
- Redemption
- Advice/Certificate generation
- Closure
- Simulation

This chapter contains the following sections:

- [Section 6.2, "Topping-up a TD"](#)
- [Section 6.3, "Redeem TD"](#)
- [Section 6.4, "Premature Redemption of Top-up Deposit"](#)
- [Section 6.5, "Premature Redemption of 'Rate Chart Allowed' TD"](#)
- [Section 6.6, "Generate or Print TD Certificate"](#)
- [Section 6.7, "Closing a TD"](#)

- [Section 6.13, "Simulating TD Top Up"](#)
- [Section 6.14, "Simulating TD Redemption"](#)
- [Section 6.15, "Deposit Audit Trail Inquiry"](#)

6.2 Topping-up a TD

You can top-up a TD by adding funds to an existing active term deposit. The top-up can be done anytime after the opening date of the TD or anytime before the maturity date of the TD. Top-up input and approval is restricted to only those users who have sufficient rights assigned to their user roles. Limit for input and limit for approval defined at the role level for the user is applicable for the top-up transactions.

You are allowed to do multiple top-ups to the same account in a single day provided the minimum and maximum booking amount and the maximum amount for the deposit account is not breached. The top-up amount must not exceed the limit of minimum and maximum amount allowed for the deposit. If the deposit amount after top-up exceeds the maximum amount system displays the error message: "Deposit amount after top-up should not cross the maximum amount limit allowed for the deposit". On top up, the deposit amount including top up amount is validated against the min-max limits at deposit cluster level and account class level. If the top-up amount crosses the maximum booking amount for the deposit currency, then the top-up is not allowed. The top-up amount is validated against the top-up units specified for each Ccy at account class.

The top-up amount is validated against the top-up units specified for each Ccy at account class. If top-up is not in multiples of top-up units system displays the following error message:

"Top-Up amount should be given in the Multiples of for Top-Up units"

The rate pick-up happens on top-up, based on the interest rate option defined for top-up at account class. The rate will be applicable from the value date of top-up.

The funding of top-up amount can be through multiple modes such as Account, GL, and cash and its combination.

You can top-up a TD using the 'Top-up of Term Deposit' screen. You can invoke this screen by typing 'STDTDTOP' in the field at the top right corner of the Application tool bar and clicking the adjoining arrow button.

The screenshot shows the 'Top-Up of Term Deposit' application window. The window title is 'Top-Up of Term Deposit' and it has a menu bar with 'New' and 'Enter Query'. The form is divided into several sections: 'Account Number*' with a 'P' button, 'Account Description', 'Customer No', 'Customer Name', 'Account Branch', 'Currency', and 'Top-Up Reference Number'. Below these are 'Current Deposit Details' and 'Deposit Tenor' sections with fields for 'Interest Start Date', 'Principal Balance', 'Maturity Amount', 'Maturity Date', 'Years', 'Months', and 'Days'. The 'Top-Up Details' section includes 'Top-Up Amount', 'Value Date', 'Narrative', and 'Remitter Name'. A 'Compute' button is located below the 'Remitter Name' field. At the bottom, there is a status bar with fields for 'Maker', 'Checker', 'Date Time', 'Mod No', 'Record Status', and 'Authorization Status', along with an 'Exit' button.

The following details are captured here:

Account Number

Select the account number from the adjoining option list.

On the click of 'P' button the following details related to the selected account is populated in the screen.

To view the joint holder's details of an account and the mode of operation maintained at the account level, place the cursor on the Account Number field and press Ctrl+J. The system displays the 'Joint Holder' screen.

For more information on the 'Joint Holder' screen refer to the section 'Joint Holder Maintenance' in the Core User Manual.

Account Description

The description of the selected TD account is displayed here. You cannot modify this.

Account Branch

The branch code where the selected TD account is available is displayed here. You cannot modify this.

Currency

The currency of the selected TD account is displayed here. You cannot modify this.

Customer Name

The name of the customer holding the TD account is displayed here.

Customer No

The code of the customer holding the TD account is displayed here.

Top-up Reference Number

A system generated reference number for the top-up transaction is displayed here.

Current Deposit Details**Interest Start Date**

The date from which the interest on the TD account should be calculated is displayed here. You cannot modify this.

Principal Balance

The principal balance amount of the term deposit is displayed here. You cannot modify this.

In case a partial redemption is made to the TD account, the principal balance is arrived at by subtracting the partially redeemed amount from TD amount. Any interest liquidated to TD account during partial redemption will not be considered in principal balance.

Maturity Amount

The amount available on the maturity of the TD account is displayed here.

In case of partial redemption of the TD account, the maturity amount displayed will not include the liquidated interest on partial redemption.

Maturity Date

The maturity date of the TD account is displayed here. You cannot modify this.

Deposit Tenor

The deposit tenor details of the TD are displayed here.

Years

The tenor of the TD account in years is displayed here. You cannot modify this. The tenor of the TD account in years is displayed here. You cannot modify this.

Months

The tenor of the TD account in months is displayed here. You cannot modify this.

Days

The tenor of the TD account in days is displayed here. You cannot modify this.

Top-up Details

The top-up details of the TD are captured here.

Top-Up Amount

Specify the top-up amount for the TD.

Value Date

Select the date on which the top-up on the TD has to be effective. The top-up value date can be a back-dated or current date. Future dated top-up is not allowed.

Note

- Top-up can be back-dated to the date of last financial transaction like pay-in, interest liquidation, redemption, maturity, rollover, and top-up of funds.
 - If TD booked is backdated and TD ILIQ is due then top up cannot be made till ILIQ happens for the back dated TD.
 - If top-up is made back-dated before last financial transaction system displays the following error message: "Top up can be back value dated only up to the value date of the last financial transaction".
 - Top- up value date cannot fall on a holiday. If back-dated top-up date is a holiday system displays the following error message: "Top- up value date is holiday"
-

Narrative

Enter remarks about the top-up transaction, if any.

Remitter Name

Specify the name of the remitter in this field.

Top-Up Pay-in Details

The pay-in details for the TD top-up is captured here.

Pay-in Option

Select the funding option from the adjoining drop-down list. The following options are available for selection in the drop-down list:

- Account
- GL
- Cash- This option for TD Pay-in is not allowed for 'Top-up of Term Deposit' STDTDTOP screen. If top-up is made through branch screen 'TDTP' by Cash, then on query the same will be displayed.

Percentage

Specify the percentage of top-up amount that has to be funded through the selected funding option.

Amount

Specify the top-up amount that has to be funded through the selected funding option.

Note

In case of multiple pay in modes, the sum of amounts in multiple payins should match the top up amount entered.

Offset Account

Select the offset account for passing the accounting entries.

Offset Branch

The branch where the selected offset account is available is displayed here.

Offset Currency

The currency of the offset account.

Original FX Rate

The FX rate picked up by the system.

Applied FX Rate

The user defined FX rate.

By default, the Original FX Rate is picked up, but the user can change it within the variance range.

In the following scenarios the Applied FX rate should be equal to the Original FX rate:

- If the Deposit Account Currency and the Pay-In/Out Account Currency are same.
- If the Rate Type/Rate code combination is not maintained at the account class for a Pay-In/Out Mode. In this case the system considers the STANDARD Rate as the default and the MID Rate code as the existing rate type.

Offset Amount

The amount paid for the term deposit account, in the account currency.

After entering the above details, click the **Compute** button. The system will compute the deposit details after top-up and display it.

Note

The top-up payin account number and the customer numbers should use different CASA account numbers. The following override message is displayed to ensure that the account numbers are different:

“Do Top-up with different pay-in A/C number”

Deposit Details After Top-up

The following details are captured here:

Principal Balance

The principal balance amount of the term deposit after top-up is displayed here. You cannot modify this.

Interest Rate

The new interest rate to be applied on the top-up deposit, which is maintained at the account class level, is displayed here.

Maturity Amount

The amount that you will get on maturity of the top-up deposit is displayed here.

6.2.1 Viewing Top-up of Term Deposits Summary

You can view the details of top-up TDs using the ‘Top-up of Term Deposit Summary’ screen.

To invoke this screen, type 'STSTDTOP' in the field at the top right corner of the Application tool bar and click the adjoining arrow button.

The screenshot shows a software window titled 'Summary'. At the top, there are three tabs: 'Search', 'Advanced Search', and 'Reset'. Below the tabs, there are two columns of search filters. The left column includes: 'Authorization Status' (dropdown), 'Account' (text), 'Top-up Amount' (text), 'Customer No' (text), and 'Branch' (text). The right column includes: 'Record Status' (dropdown), 'Top-up Value Date' (text), 'Top-Up Reference Number' (text), and 'Currency' (text). Below the filters is a control bar with 'Records per page' set to 15, '1 Of 1' records, and a 'Go' button. The main area is a table with the following columns: 'Authorization Status', 'Record Status', 'Account', 'Account Description', 'Interest Start Date', 'Top-up Date', 'Top-up Value Date', 'Top-up Amount', 'Top-Up Reference Number', and 'Principal Balance'. The table is currently empty. At the bottom right of the window is an 'Exit' button.

You can search records based on the following parameters:

- Authorization Status
- Record Status
- Account
- Top-Up Value Date
- Top-up Amount
- Top-up Reference Number
- Customer No
- Currency
- Branch

Click 'Execute Query' button. System fetches and displays all records matching with the entered query parameters. The following details pertaining to each record are displayed:

- Authorization Status
- Record Status
- Account
- Account Description
- Interest Start Date
- Top-up Date
- Top-up Value Date
- Top-up Amount
- Top-up Reference Number
- Principal Balance

- Interest Rate After Top-up
- Maturity Date
- Maturity Amount
- Customer No
- Customer Name
- Currency
- Branch
- Maker ID
- Release Time

6.3 Redeem TD

This section contains the following topics:

- [Section 6.3.1, "Redeeming a TD"](#)
- [Section 6.3.2, "Capturing Denominated Deposit Certificate Details"](#)
- [Section 6.3.3, "Capturing Pay Out Details"](#)
- [Section 6.3.4, "Cheque/DD Details Tab"](#)
- [Section 6.3.5, "Counter Party Details Tab"](#)
- [Section 6.3.6, "Capturing Interest Details"](#)
- [Section 6.3.7, "Interest Tab"](#)
- [Section 6.3.8, "Deposit Tab"](#)
- [Section 6.3.9, "Authorizing Transaction"](#)
- [Section 6.3.10, "Viewing TD Redemption Details "](#)

6.3.1 Redeeming a TD

The 'Term Deposits Redemption Input' screen enables you to redeem a term deposit. Using this screen, you can do a premature redemption, either in full or in part, ahead of maturity of the deposit and also after maturity date when the TD is in grace days..

This screen also allows you to renew the TD manually. However, renewal of the TD is allowed only on the following scenarios:

- If you have selected 'Grace period for Renewal' at the account class maintenance level
- If the TD is in the grace period currently
- The maturity instruction of the TD is 'Move Principal to Unclaimed' & 'Move Interest to Unclaimed'.

In case of 'Close on Maturity' or 'Auto rollover', the maturity instruction will be executed on the BOD of maturity date, and thus, Grace Days are not applicable. You can invoke the 'Term Deposit Redemption Input' screen by typing 'ICDREDMN' in the field at the top right corner of the Application tool bar and clicking the adjoining arrow button.

Click the new button on the Application toolbar.

You have to specify the following fields for redeeming the TD.

Branch

Specify the branch where the TD resides. The adjoining option list displays all valid branch codes maintained in the system. You can select the appropriate one.

Term Deposit Account Number

Specify the TD Account Number. You can also choose the appropriate one from the option list. The option list displays the deposit type of accounts maintained in the system.

Note

Redemption can be done from a different customer account number. The following override message is displayed:

“Payout account belongs to different CIF”

The option list also lists auto deposit type of accounts., but on save, error will be displayed as below:

“Redemption is not allowed for auto deposit.”

To view the joint holder’s details of an account and the mode of operation maintained at the account level, place the cursor on the TD Account Number field and press Ctrl+J. The system displays the ‘Joint Holder’ screen.

For more information on the ‘Joint Holder’ screen refer to the section ‘Joint Holder Maintenance’ in the Core User Manual.

Customer ID

The customer identification (CIF) of the customer for whom TD needs to be renewed or redeemed is displayed based on the TD account number.

Account Currency

The TD currency is displayed here based on the TD account number.

Account Description

A description of the TD is displayed here based on the TD account number.

Account Balance

The account balance is displayed here based on the TD account number.

Redemption Reference Number

The system displays the reference number here.

This field will be enabled only for the query mode and not for the new transaction.

Product Code

You can select an RT product from the adjoining option list.

Note

- In case of product selection in this field, the RT product set as part of close mode (existing setup) would be ignored. System will post the accounting entries as defined in the selected RT product and charges, if any, linked to the selected RT product would be applied.
 - You have to select an RT product so that the accounting is in conjunction to the selected mode.
 - The manual product selection is applicable only for transfer to GL or Savings or Loan. For other modes, the respective BC / DD / PC product would hold good.
 - In case you select an RT product in ICDREDMN screen then on save, the following override message is displayed: 'The selected RT product would supersede the RT product set based on the close mode'.
-

Waive Interest

Check this box to waive off the accrued interest amount that is to be paid to the customer during redemption. This flag is disabled if 'Tenor Modification' is selected.

Note

The interest accrued for the current period alone will be waived and already liquidated interest will not be waived.

Rollover/Redemption/Tenor Modification

Choose 'Rollover' option to rollover the accounts that are within the grace period days. Grace period can be opted only for unclaimed TD's and manual rollover is possible only during grace days. Choose 'Redemption' to redeem the term deposit. If, rollover is opted, the payout instructions are not applicable at redemption screen. On saving, the renewal days / months / years need to be specified and the next maturity date is defaulted based on the rollover tenor, on save. Select Tenor Modification if you wish to modify the tenor of the TD account.

- The tenor can be extended or reduced and a new rate will be picked up for either case.
- The reduction can be done to date till previous ILIQ cycle.

- The modified tenor will be populated to TD account.
- Online ILIQ will happen if tenor reduction is made for previous cycles. For current non liquidated period, the accrual adjustment will happen in EOD.

Add Funds

Check this box to add additional funds for rollover.

Add Amount

Specify the additional amount to be considered for rollover in TD account currency.

Note

- If the user specifies higher amount, the 'Add Funds' gets updated as 'Yes' and 'Add Amount' will be updated as the difference between special rollover amount and TD maturity amount (P+I) on Save of TD booking. The additional amount field will not be updated on subsequent events in the TD. Any difference amount after rollover will be transferred to the principal payout account.
 - If Rollover amount specified is lower than TD amount, the difference will be paid out.
-

Redemption

Indicate the following details if you have chosen 'Redemption'. The fields under the heading Redemption will not be applicable when the 'Tenor Modification' is selected.

Redemption Mode

Select the mode of redemption from the following options.

- Full Redemption - In this case, you can redeem the complete deposit balance of the account. On save, the redemption amount will be equal to the account balance. Full redemption will update the status of the deposit account as closed. On complete redemption interest along with principal is redeemed. The redemption amount is equal to the total of principal and interest amounts subtracted by penalty and tax amounts.
- Partial Redemption - In this case you have to specify the redemption amount. Ensure that the redemption amount is less than the account balance. On partial redemption only the principal amount is withdrawn where as the interest amount for the partially redeemed amount is liquidated to the interest booking account. This is allowed only if 'Allow Partial Liquidation' check box is checked at Account Class Maintenance level.

During partial redemption, if amount blocks of type 'discounted' exist, the system throws an override stating "Amount Blocks exist for the Discounted Deposit Account".

Note

- If a back dated TD account is booked and it is due for ILIQ, then partial redemption will not be allowed.
- Full redemption will be allowed for a back dated TD account pending ILIQ/ Unclaimed TD account after maturity /Maturity processing has failed. An override will be displayed in such cases as " Pending ILIQ exists in account.".The liquidated interest of previous periods will be paid out on redemption but capitalization benefit will not be provided. This has to be operationally controlled.
- In case of partial redemption, the amount block on the TD account will be updated to the extent of the credited discounted interest.
- On accepting the override, the system will close the amount blocks and process the redemption. The amount blocks can also be closed manually. However in the case

of a full redemption, the system will close any existing amount Blocks of type 'discounted' and process the redemption.

Redemption Amount

Specify the redemption amount for the partial redemption. Ensure that that the redemption amount is less than the account balance. On partial redemption only the principal amount is withdrawn. The interest amount applicable for the partially redeemed principal is liquidated to the interest booking account specified at TD level.

The system will validate for the following:

- During partial redemption the withdrawal amount should be a multiple of withdrawal unit maintained at the 'Deposits Cluster Maintenance' level, else the system will display the error message "Withdrawal amount must be multiples of withdrawal unit".
- Withdrawal amount should be greater than minimum booking amount maintained at the 'Deposits Cluster Maintenance' level, else the system will display the error message "Withdrawal exceeds minimum balance level".

During "Full Redemption" of the term deposit with "Goal Reference Number", the system validates whether there is any open settlement instruction available for that particular TD. If an open settlement instruction is available then full redemption is not allowed and an error message "Full Redemption of TD is not Possible When Open SI's are Available" will be displayed to the user.

Waive Penalty

Check this field to waive any penalty related to the deposit redemption.

Note

You can check the 'Waive Interest' and 'Waive Penalty' boxes only for full redemption and not for partial redemption.

Suppress Redemption Advice

By default the system will generate the redemption advice. However if you check this box, the redemption advice creation will be suppressed.

Redemption Interest Payout

This field will specify whether the interest proceeds from redemption(both liquidated and non-liquidated adjustments on redemption) inclusive of penalty and tax to be credited to Interest Booking account or Interest Payout account or Principal Payout account.

This field will be defaulted with the option provided in the account creation screen while selecting the account number. This field can be modified only for full redemption.

Proper error will be thrown if the field is modified for any other operation.

Select the redemption interest payout from the following options.

- Interest Booking account - If the option selected is 'Interest Booking account', system will not allow to enter a record for the interest payout component. The interest will be credited to the interest payout account maintained at account level.
- Interest Payout account - If the option selected is 'Interest Payout account', system will throw error if no row is maintained for interest payout component. Interest will be credited to the interest payout account provided in the redemption screen.
- Principal Payout account -If the option selected is 'Principal Payout account', system will not allow to enter a record for the interest payout component.

Principal +Interest will be credited to the principal payout account provided in the redemption screen.

Principal and Interest Details

The system displays the following principal and interest details: The fields under the heading Principal and Interest Details heading will not be applicable when the 'Tenor Modification' is selected.

Principal Amount

The system displays the amount paid at the time of term deposit booking, when you click on the 'Compute' button.

Interest Rate

The system displays the current interest rate applicable after partial/full redemption when you click on the 'Compute' button. On redemption, for rate chart allowed TD's, the system picks the rate again, based on the amount slab and tenor

Maturity Amount

Revised maturity amount is displayed here based on the current redemption maintained, when you click 'Compute'. Also, for partial redemption, the revised maturity amount is updated on the TD account automatically.

The maturity amount displayed is net of Principal, Interest less tax and penalty, if any.

Refer the chapter 'Annexure B - IC Rule Set-up' in this user manual for details on calculating principal and interest amount during term deposit redemption.

Tenor

You can rollover a TD only during the grace period. You can select the TD account and define the tenor for which TD should be renewed.

During rollover, the interest is liquidated. The system changes the TD interest start date as the maturity date of the old TD. In the 'Main' tab of the 'Deposit Accounts Booking' screen, you can see the new maturity date based on the tenor defined here.

If 'Rollover' box is checked, then indicate the rollover tenor for the TD account. You can select one of the following options:

- Account Class Tenor - If 'Re-pick up Account Class Tenor' on rollover is set to 'Yes' at the account class level, then on selecting rollover, the rollover tenor will be defaulted as account class tenor.

The default account class tenor is displayed as tenor in days, months and years which you cannot change. However, you can change the default option during rollover. When you save it, the system displays an override message 'Re-pick account class tenor on rollover restrictions exists at account class'.

If 'Re-pick up Account Class Tenor on Rollover' is checked at the account class level, then by default, this option is selected. If you select this option, then the following are applicable:

- The value of 'Default Tenor' at account class is considered as the 'Rollover Tenor' during deposit rollover
- During opening or modification within the term of the deposit, if you change the defaulted value for 'Rollover Tenor' from 'Account Class Tenor' to 'Account Tenor' or 'Independent Tenor', then on save system displays the override message, "Re-

pick up Account Class Tenor on Rollover restrictions at account class will be ignored”.

- On save, the system displays the ‘Next Maturity Date’.
- Account Tenor - If re-pick up account class tenor on rollover is set to ‘No’ at the account class level, then on selecting rollover, the rollover tenor will be defaulted as account tenor.

On rollover, the system displays the original tenor of the TD in terms of days, months and years. However, you can change the default option during rollover. When you save it, the system displays an override message ‘Re-pick account class tenor on rollover restrictions exists at account class’.

If ‘Re-pick up Account Class Tenor on Rollover’ is unchecked at the account class level, then by default, this option is selected. If you select this option, then the following are applicable:

- The value of ‘Original Tenor’ of the deposit account is considered as the ‘Rollover Tenor’ during deposit rollover.
- During opening or modification within the term of the deposit, if you change the defaulted value for ‘Rollover Tenor’ from ‘Account Tenor’ to ‘Account Class Tenor’, then on save system displays the override message, “Re-pick up Account Class Tenor on Rollover restrictions at account class will be ignored”.
- On save, system updates the ‘Next Maturity Date’ with the sum of maturity date and original tenor of the deposit.
- Independent Tenor - Select this option to provide a different tenor, rather than default from account class or account tenor. On selecting this option, you can specify the Rollover Tenor in years, months and days combination.

The tenor should be specified within the minimum and maximum tenor limits maintained at the account class level. If it is not within the minimum and maximum limit, then the system will display an error message "Rollover tenor does not fall in the range of minimum and maximum tenor allowed". The rollover tenor for independent tenor should not be null.

On save, system updates the ‘Next Maturity Date’ accordingly.

Note

System validates that the rollover tenor is within the minimum and maximum tenor allowed for the account class. If this validation fails, then system displays the error message, “Rollover tenor does not fall in the range of minimum and maximum tenor allowed”.

The next maturity date will be adjusted based on the holiday treatment at account class level. The tenor in ICDREDMN screen will remain the same after holiday adjustment. On query from STDCUSTD after rollover, Deposit tenor will be populated with the holiday adjusted tenor and original tenor with the actual tenor before holiday adjustment.

Days(Offset)/ Value date (Slab)

Specify number of days for the rollover of term deposit.

Months

Specify number of months for the rollover of term deposit.

Years

Specify number of years for the rollover of the term deposit.

Note

On saving the rollover, the system displays the 'Maturity Date'.

Next Maturity Date

The system displays the new maturity date based on the given renewal period.

Interest Rate Based on Cumulative Amount

Check this box to indicate that the system should arrive at the interest rate of a new deposit using the cumulative amount of other active deposits, under the same account class, customer, and currency.

The cumulation of the amount for arriving at the interest rate is done at the account level during the save of the below events:

- Deposit account opening
- Any interest rate change to the deposit - floating rate deposits, rate change on interest liquidation, and rate change on rollover

Note

- When cumulating the amount of the deposits system considers the current deposit balance of all the deposits along with the new deposit amount.
 - TD accounts opened after the interest start date will not be considered for arriving at the cumulation amount.
 - For backdated deposit opening, all the active deposits as of the current system date are considered to arrive at the cumulative amount, if the 'Interest Rate Based on Cumulative Amount' box is checked.
 - The interest rate derived is applied only to the new deposit to be opened and there will be no changes done to the deposits which are used for arriving at the interest rate.
-

Refer the section 'Calculating Interest Rate Based on Base Amount' in this User Manual for details about arriving at interest rate based on cumulative amount.

Continue Variance on Rollover

The system defaults it based on the flag availability in the TD account level. However, you can modify this flag.

Check this box to enable continued variance on rollover. If you check this, then the system will default account variance as current value to the rollover deposit for the next cycle.

If you do not check this, then the account variance will not be carried forward to next rollover cycle.

Tenor Modification

If 'Tenor Modification' box is checked, then it indicates that the Tenor of the TD account can be modified. This flag is applicable only when 'Tenor Modification' is selected in 'Deposits' screen of the Account Class Maintenance (STDACCLS) screen. If this box is checked, then the following fields are disabled:

- Waive Interest Flag
- Fields under the 'Redemption' and 'Principal and Interest Details' section

If this box is checked, then the Days, Months, Years and New Maturity fields are enabled. You can specify the modified tenor in years, months and days combination. Independent Tenor field is selected automatically. The tenor should be specified within the minimum and maximum tenor limits maintained at the account class level. If it is not within the minimum and maximum limit, then the system will display an error message. The independent tenor for 'Tenor Modification' should not be a null value.

Specify the following details if Tenor Modification is checked:

Days

Specify the new number of days in this field.

Months

Specify the new number of months .

Years

Specify number of years for the tenor modification of term deposit.

—

Next Maturity Date

The system displays the new maturity date based on the given tenor on 'Save' operation.

On 'Save' operation, the transaction system will also validate whether 'Tenor Modification' flag is selected in the 'Account Class' STDACCLS screen. In case, this flag is not selected in the STDACCLS screen, then an error message 'Tenor Modification Facility Not available for this TD Account' is displayed.

Term Deposit Redemption Pay Out Details

Specify the following details for TD payout.

Pay Out Component

It indicates the payout component type. The available options in payout component are principal and interest .

Pay Out Type

Select the pay-out type from the drop-down list. The options available are:

- Account
- General Ledger
- Banks Check
- Payments
- Term Deposit
- Demand Draft
- Loan Payment

Note

For Dual Currency Deposits you are allowed to select only 'GL' and 'Savings Account' options as the pay-out mode. You can either select GL or Savings Account but not both. Also, you can select only one GL or one Savings account and not multiple GLs or accounts in either case.

Percentage

Specify the amount of redemption in percentage. For redemption through multiple payment modes, the redemption amount that needs to be paid to each mode is computed based on the percentage of payout specified.

Redemption Amount

Specify the actual amount of redemption.

The percentage and redemption amount are conditionally mandatory. You should specify either the percentage or the redemption amount.

Instrument Number

Specify the instrument number to be issued, if payout mode is BC. If not, the system will default the least instrument no available in the branch on save.

Waive Issuance Charges

Check this box to indicate waive option for pay-out BC issuance charge

Offset Branch

Specify the branch code of the account for redemption.

Offset Account

Specify the account number/ GL for redemption through account, GL and loan. For redemption through PC, BC / DD, TD the offset account should not be given.

Narrative

Give a brief description for the redemption.

Original FX Rate

The FX rate picked up by the system.

Applied FX Rate

The user defined FX rate.

By default, the Original FX Rate is picked up, but the user can change it within the variance range.

In the following scenarios the Applied FX rate should be equal to the Original FX rate:

- If the Deposit Account Currency and the Pay-In/Out Account Currency are same.
- If the Rate Type/Rate code combination is not maintained at the account class for a Pay-In/Out Mode. In this case the system considers the STANDARD Rate as the default and the MID Rate code as the existing rate type.

Offset Amount

The amount paid for the term deposit account, in the account currency.

Note

You can query, modify and amend other branch transactions only through the summary screen.

Payin Details

Select the Payin Details for debiting the additional amount for rollover from the drop down list. The list displays the following values:

- GL - In case of pay-in through GL, if the offset GL account specified should be the GL maintained at 'TD Payin Parameters' (STDTDPAY) screen. If not, on save, the GL at STDTDPAY will be auto defaulted.
- Account - In case of pay-in from savings account, it is mandatory to specify the offset account. If it is not specified, the system displays an error on saving the TD account. If the pay-in account specified is disallowed for the TD product, then on saving the account, the system displays an error message
 - If the offset account is not specified then, an error message is displayed as : “Offset account is mandatory.”
 - Before rollover, the customer has to manually verify the availability of funds in the offset account. If not the rollover will fail. If the offset account does not have sufficient funds then the system will display an error as ‘Insufficient balance in the account.
 - If the offset account provided has limits attached, then on save the system will display a message as “The limits/Collateral attached is used for Payin.”
- Pay in by Cheque - In case of pay-in by cheque, the TD should be entirely funded by a single cheque. Multimode, combining multiple cheques or part payment by cheque and the rest by other modes, is not allowed.
 - In case of payin by cheque, the additional amount will be reflected online after authorization of redemption. TD account will be TD amount plus additional amount.
 - Till the completion of float days, the funds will be uncollected in the TD account. Until the cheque is cleared, no operations/modifications will be allowed on this account. The system displays an error message as “Account is in tanked status. Operations will not be allowed.”
 - Cheque can be rejected till the float days. Rejection can be done through 6560,CGDCLGDT, IFDCLGDT or file upload. If the float days is zero, then the cheque can be rejected only on current day
 - On cheque rejection, if the consolidation has not be done, then REVR will be fired debiting the uncollected amount online. If the consolidation has been done, then RETN will be fired debiting the TD amount online. The uncollected amount will b released online.
 - On rejection, the maturity amount and interest rate update will happen only in EOD.
 - If the cheque float days in zero and the transaction code availability is X days, then till that X days, the funds will be in uncollected status and account will be in tanked status. No operations will be allowed till the cheque clearance..

Note

On manual renewal, new event MROL will be fired and the additional funds pay in account will be debited for additional amount. If the 'pay in' is selected as Cheque, then MROL will be fired debiting the clearing GL and crediting the TD account. The funds will be in uncollected till the cheque clearance date.

Percentage

Specify the percentage of payout for each payout option specified.

Amount

Specify the amount to be transferred to TD.

Offset Branch

The system displays the branch code of the account to which fund is transferred from TD account.

Offset Account

Specify the account number/ GL to which the fund is transferred to TD account on liquidation, maturity or rollover. This field will return the branch code if the account is selected and NULL will be returned if GL is selected. If pay-out mode is GL then the system displays only GLs in the option list.

Cheque Instrument No

Specify the cheque instrument number.

Clearing Type

Specify the clearing type for the transaction. Alternatively, you can select the clearing type from the option list. The list displays the list of outward clearing products maintained in the system. The cheque clearing happens based on the clearing product specified.

Cheque Date

Specify the date of issue of the cheque.

Drawee Account Number

Specify the drawee account number.

Routing No.

Specify the Routing number. Alternatively, you can select the routing number from the option list. The list displays all the routing number maintained in the system.

Note

If a TD is opened through cheque and is rejected or if a manual rollover transaction through a cheque is rejected, then the TD is updated during the IC batch. The maturity amount, initial principal amount and interest rate of this transaction will be updated only during the EOD batch. Hence, these details will not be available in the report or advice generated during the day.

6.3.2 Capturing Denominated Deposit Certificate Details

Click 'Denominated Deposit' button on the 'Term Deposit Redemption Input' screen and invoke the following screen.

The screenshot shows a software window titled "Denominated Deposit". The main content area is titled "Denominated Deposit Certificate Details" and includes a "Select All" checkbox. Below this is a table with the following columns: "Certificate Number", "Certificate Status", "Certificate Amount", and "Redeem". The table indicates "1 Of 1" records. At the bottom of the window, there are two input fields: "Total Amount of Redemption" and "Number of Certificates Redeemed", with a "Populate" button positioned between them. The bottom right corner of the window contains "Ok" and "Exit" buttons.

Specify the following details for denominated deposit certificate:

Select All

Check this box to select all certificates for the account.

Certificate Number

Select the certificate number from the option list. The list displays all active certificates issued for the account.

Certificate Status

This indicates the current status of the certificate selected.

Certificate Amount

This indicates the amount of the certificate.

Redeem

Check this box to redeem a certificate.

After you enter the above details click 'Populate' button. The following details will be displayed:

Total Amount of Redemption

The total amount of redemption is displayed here.

Number of Certificate Redeemed

The number of certificates currently redeemed is displayed here.

During manual part redemptions, all the active certificates of the account are displayed in the 'Denominated Deposit Certificate Details' screen and available for redemption.

At the time of full redemption or automatic redemption (i.e. close on maturity), all the active certificates will be marked as 'Redeemed' provided there are no certificates with amount block. In case of part redemption of the TD, only the available certificates can be redeemed. A single certificate cannot be part redeemed. The interest amount for the certificates being redeemed prematurely will be paid along with the principal amount. Once a particular certificate has been redeemed, it will not be available for further redemption.

6.3.3 Capturing Pay Out Details

Click 'TD Pay Out' button on the 'Term Deposit Redemption Input' screen and invoke the following screen. Here you can specify details of the child TD that should be created on maturity of the parent TD.

Note

For denominated deposits, payout to a child TD using the same denominated deposit account class or any other denominated deposit account class will be restricted. This restriction will be applicable during opening, redemption, maturity processing or amendments. System will do a validation for this and if the validation fails an error similar to 'Payout to

term deposit using denominated deposit account class is not allowed for this denominated deposits' is displayed...

The screenshot shows a software window titled "Term deposit" with three tabs: "Term deposit", "Instrument Details", and "Counterparty Details". The "Term deposit" tab is selected. The window contains several input fields: "Branch Code", "Customer Account Number", "Customer Number", and "Currency". To the right, there is an "Account Class" section with a "P" button and two radio buttons: "Account" and "Account Class". At the bottom, there is an "Interest" section and "Ok" and "Exit" buttons.

The 'Term Deposit' tab is displayed by default. Here you can capture the following details:

Branch Code

The system displays the branch code.

Account No

The system displays the TD account number. When you click 'Populate', the new child TD number is computed automatically for payout through TD,.

Customer Number

The system displays the customer number. However, you can change it.

Currency

The system displays the TD currency.

Account Class

Specify the account class from which the interest and deposit should be picked up. If you have selected the 'Account Class' option, then you have to specify the Account Class. Else you can leave it blank.

Account/Account Class

Indicate whether the interest and deposit should be picked up from the parent account TD account or from the account class. The options available are:

Note

If you select the option 'Account', then on clicking 'P' button, the system will default the interest and deposit details from the parent TD account. If you select the 'Account Class' option, then on clicking 'P' button, the system will default the interest and deposit details from the account class selected.

6.3.4 Cheque/DD Details Tab

Click 'Instrument Details' tab on the 'Term Deposit' screen and invoke the following screen. Here you can capture details of the banker's cheque by which the TD needs to be redeemed. You need to maintain these details, if you have selected 'Payout Option' as 'Banker's Cheque' or 'Demand Draft'.

Term deposit

Term deposit | Instrument Details | Counterparty Details

Instrument Details

Bank Code _____

Instrument type _____

Cheque Date _____

Payment Branch _____

Beneficiary Details

Beneficiary Name _____

Passport/IC Number _____

Narrative _____

Address Line 1 _____

Address Line 2 _____

Address Line 3 _____

Interest _____

Ok Exit

You can capture the following details:

Instrument Details

Specify the following instrument details.

Bank Code

Specify the bank code of the Bankers cheque.

Instrument Type

Specify the type of the instrument.

Cheque Date

Specify the cheque date for the pay-out.

Payment Branch

Specify the payable branch for the cheque. The adjoining option list displays all branch codes linked to the specified bank code. You can select the appropriate one.

Beneficiary Details

Indicate the following details.

Beneficiary Name

Specify the name of the beneficiary for the payout.

Other Details

Specify other details (if any) for the beneficiary.

Narrative

Give a brief description for the payout.

Country Code

Specify the country code for the payout address.

Address Line 1 to 3

Specify the address of the beneficiary for the payout.

6.3.5 Counter Party Details Tab

Click 'Counter Party Details' tab on the 'Term Deposit' screen and invoke the following screen. Here you can capture pay-out details for Local Payment transfer to another bank account. You need to maintain these details, if you have selected 'Payout Option' as 'Payments'.

The screenshot shows a software window titled "Term deposit" with three tabs: "Term deposit", "Instrument Details", and "Counterparty Details". The "Counterparty Details" tab is selected. It contains two main sections: "Counterparty Details" and "Beneficiary Details".

Counterparty Details

- Counterparty Bank Code
- Counterparty Account
- Offset Currency

Beneficiary Details

- Beneficiary Name
- Address Line 1
- Address Line 2
- Passport/IC Number
- Narrative

At the bottom of the window, there is an "Interest" label and "Ok" and "Exit" buttons.

You can capture the following details:

Counter Party Details

Specify the following cheque details.

Counter Party Bank Code

Specify the bank code of the counter party.

Counter Party Offset Account

Specify the branch code of the account for redemption.

Beneficiary Details

Indicate the following details.

Beneficiary Name

Specify the name of the beneficiary.

Address Line 1 to 2

Specify the address of the beneficiary.

Other Details

Specify other details (if any) for the beneficiary.

Narrative

Give a brief description for the payout.

6.3.6 Capturing Interest Details

The Child TD parameters are similar to the Parent TD, except the child will not have the option to create a new TD as part of Pay-out. You can capture the details of child TD that is created by payout, by clicking on the 'Interest' button on the 'Term Deposit' screen.

The screenshot shows the 'Interest Charges' form. The 'Interest' tab is active. The form includes the following fields and options:

- Branch: [Text Field]
- Account: [Text Field]
- Calculation Account: [Text Field]
- Interest Booking Account: [Text Field]
- Charge Booking Account: [Text Field]
- Account Class: [Text Field]
- Customer Number: [Text Field]
- Interest Start Date: [Text Field]
- Interest Booking Branch: [Text Field]
- Charge Booking Branch: [Text Field]
- Charge Start Date: [Text Field]
- Product: [Text Field]
- User Data Elements Currency: [Text Field]
- Interest Rate Based on Cumulative Amount:
- Dr Cr Advices:
- Waive:
- Generate UDE Change Advice:
- Open:
- Continue Variance on Rollover:

At the bottom of the form, there is a 'TD Payout Details' section and 'Ok' and 'Exit' buttons.

Here you can capture the following details:

Branch

The system displays the branch code where the child TD resides.

Account Class

The system displays the account class to which the TD belongs.

Account

The system displays the child TD account number.

Customer No

The customer identification (CIF) of the TD customer is displayed here.

6.3.7 Interest Tab

This tab is displayed by default. You can specify the following details:

Calculation Account

Specify the calculation amount of the child TD. The adjoining option list displays all accounts maintained in the respective branch. You can select the appropriate one.

Interest Start Date

Indicate the date from which interest calculation should start, using the adjoining calendar.

Interest Booking Account

Specify the account to which interest should be booked. You have an option of booking interest to a different account belonging to another branch. The accounts maintained in the selected booking branch are available in the option list provided. The system liquidates the interest into the selected account.

The interest booking account lists only CASA accounts and the TD account nos. which is to be created.

Interest Booking Branch

Specify the interest booking branch. The adjoining option list displays all valid branch codes available in the system. You can select the appropriate one.

Interest Statement

Check this box to generate an interest statement for the account. The interest statement will furnish the values of the SDEs and UDEs and the interest rule that applies on the account.

Dr Cr Advices

Check this box to generate payment advices when interest liquidation happens on an account. The advices are generated in the existing SWIFT or/and MAIL format. No advices will be generated if you leave this box unchecked.

Charge Booking Branch

Specify the charge booking branch. The adjoining option list displays all valid branch codes available in the system. You can select the appropriate one.

Charge Book Account

Specify the account to which charge should be booked. You have an option of booking charge to a different account belonging to another branch. The accounts maintained in the selected booking branch are available in the option list provided. The system liquidates the charge into the selected account.

Charge Start Date

Indicate the date from which charge calculation should start, using the adjoining calendar.

Continue Variance on Rollover

The system defaults it based on the Interest and Charges product. However, you can modify this. If this is modified, during the save, the system displays a prompt 'Continue variance on Rollover Flag is modified'.

Check this box to enable continued variance on rollover. If you check this, then the system will default account variance as current value to the rollover deposit for the next cycle.

If you do not check this, then the account variance will not be carried forward to next rollover cycle.

Product Code

Specify the interest/charge (IC) product code that should be linked to the account. The adjoining option list displays all valid IC products available in the system. You can select the appropriate one.

UDE Currency

Specify the UDE Currency defined for the product.

Waive

Check this box to waive off an interest or a charge that has been specified.

Generate UDE Change Advice

Check this box to generate the UDE change advice.

Open

Check this box to make the product applicable again. More than one product may be applicable on an account class at the same time. You can temporarily stop applying a product on an account class by 'closing' it. You can achieve this by un-checking the box 'Open'. The product will cease to be applied on the account class.

Effective Dates

Specify the following details:

Effective Date

Indicate the date from which a record takes effect, using the adjoining calendar.

Open

Check this box for records with different effective dates if the values of the UDEs vary within the same liquidation period.

Account UDE Value

Specify the following details:

User Defined Element ID

Specify the UDE ID for the account.

UDE Value

Specify the values for a UDE, for different effective dates, for an account. When interest is calculated on a particular day for an account with special conditions applicable, the value of the UDE corresponding to the date will be picked up.

Rate Code

Specify the rate code for the account.

Variance

Specify the variance in the interest rate. This is the variance alone. The effective rate will be the sum of the TD rate code and the variance that you specify here. This value can be modified at any point of time.

Interest Rate Based on Cumulative Amount

Check this box to indicate that the system should arrive at the interest rate of a new deposit using the cumulative amount of other active deposits, under the same account class, customer, and currency.

The cumulation of the amount for arriving at the interest rate is done at the account level during the save of the below events:

- Deposit account opening
- Any interest rate change to the deposit - floating rate deposits, rate change on interest liquidation, and rate change on rollover.

Note

- When cumulating the amount of the deposits system considers the current deposit balance of all the deposits along with the new deposit amount.
 - TD accounts opened after the interest start date will not be considered for arriving at the cumulation amount.
 - For backdated deposit opening, all the active deposits as of the current system date are considered to arrive at the cumulative amount, if the 'Interest Rate Based on Cumulative Amount' box is checked.
 - The interest rate derived is applied only to the new deposit to be opened and there will be no changes done to the deposits which are used for arriving at the interest rate.
-

Refer the section 'Calculating Interest Rate Based on Base Amount' in this User Manual for details about arriving at interest rate based on cumulative amount.

6.3.8 Deposit Tab

Click 'Deposit tab' in the 'Interest Charges' screen to capture deposit details.

TD Payout Details

You can capture the following details:

Next Maturity Date

On selecting the 'Auto Rollover' box, the system displays the next maturity date based on the previous tenor of the deposit.

Deposit Tenor

Select the deposit tenor type. The following options are available.

- Account class tenor - If you select this, the system will default the default tenor from the account class. This is represented in terms of days, months and years. You cannot edit it. The maturity date is displayed based on the tenor specified.
- Account tenor - If you select this, the system displays the original tenor of the parent TD. The tenor is represented in days, months and years. You cannot change this.
- Independent tenor - If you select this, you can specify the tenor in terms of days, months and years. The default value of the independent tenor will be null.
- The tenor should be specified within the minimum and maximum tenor limits maintained at the account class level. The tenor months cannot be greater than 11 months and if tenor months is specified, the tenor days cannot be greater than 30 days.

Years

This indicates the number of years in the original tenor.

Months

This indicates the number of months in the original tenor.

Days

This indicates the number of days in the original tenor.

If the maturity date falls on the holiday, the system adjusts it,

Rollover Tenor

The deposit tenor has following options as below,

- Account class tenor - If you select this, the system displays the account class tenor in days, months and years. You cannot change this. The system will not display the next maturity date, The default account class tenor at the time of rollover is considered.
- Account tenor - This is the default option. If this is selected, the system populates the original tenor of the parent TD. The tenor is represented in days, months and years. You cannot change this.
- Independent tenor - If you select this, you can enter the rollover tenor in terms of days, months and years. The default value of the independent tenor will be null.

Years

This indicates the number of years in the rollover tenor.

Months

This indicates the number of months in the rollover tenor.

Days

This indicates the number of days in the rollover tenor.

The tenor should be specified within the minimum and maximum tenor limits maintained at the account class level. The tenor months cannot be greater than 11 months and if tenor months is specified, the tenor days cannot be greater than 30 days.

The tenor is represented in terms of years, months and days. For example, if the deposit tenor is 185 days, it should be represented as 0 years, 6 months and 5 days. You need to specify the values in the appropriate fields.

Maturity Date

The system picks up the maturity date from the default tenor from the linked account class and displays it here. However, you can modify this date.

Auto Rollover

Check this box to automatically rollover the deposit you are maintaining. You have to indicate 'Rollover Type' on selecting this option.

Close on Maturity

Check this box to close the term deposit account on maturity date and transfer the amount as per the pay-out details maintained for the TD.

Move Interest to Unclaimed

Check this field to move the interest amount to the unclaimed GL mapped at the IC product in the accounting role 'INT_UNCLAIMED' on grace period end date. If you select this option, you will need to check the box 'Move Principal to Unclaimed'.

Move Principal to Unclaimed

Check this box to move the principal amount to the unclaimed GL mapped at the IC product in the accounting role 'PRN_UNCLAIMED' and liquidate the interest amount to the interest booking account on grace period end date.

Rollover Type

Indicate the components that should be rolled over by choosing one of the following options:

- Principal - If you select this option, then the system will roll over the principal amount alone on EOD of TD maturity date or BOD after end of the grace period. If interest booking account is given as TD account, then on maturity date the interest amount will be first liquidated to the TD account and then settled as per the pay-out details maintained for the TD account.
- Principal + Interest - For you to choose this option, the interest booking account has to be the TD account. If you select this option, then the system will roll over the principal and interest amount on EOD of TD maturity date or BOD after end of the grace period.
- Special Amount – If you choose this option, the system will roll over the amount specified in 'Rollover Amount' field, irrespective of what the interest booking account is. Upon maturity of the rolled over TD, the system will roll over with the same amount special amount and settle the interest amount as per TD pay-out details maintained.
- Interest - For you to choose this option, the interest booking account has to be the TD account. If you select this option, then the system will roll over the interest amount on EOD of TD maturity date or BOD after end of the grace period. The principal will be settled as per the pay-out details maintained.

Rollover Amount

If a special amount is to be rolled over, you have to specify the amount (less than the original deposit amount).

Term Deposit Payout Details

Specify the following details in order to allow automatic pay-out:

Pay Out Type

Select the pay-out mode from the drop down list. The options available are:

- Bankers Cheque - BC
- Transfer to Other bank - Local Payment
- Transfer to GL – GL
- Transfer to Savings Account – AC

Note

- This option will be available only when account number generation is 'Auto'.
 - For Dual Currency Deposits you are allowed to select only 'GL' and 'Savings Account' options as the pay-out mode. You can either select GL or Savings Account but not both. You can select only one GL or one Savings account and not multiple GLs or accounts in either case.
-

Percentage

Specify the amount of redemption in percentage.

Offset Branch

Specify the branch code of the account for redemption. The adjoining option list displays all valid branch codes available in the system. You can select the appropriate one.

Offset Account

Specify the account number/ GL for redemption. The adjoining option list displays all valid accounts and GLs available in the offset branch. You can select the appropriate one.

Narrative

Give a brief description for the redemption.

6.3.8.1 Indicating Payout Details

Click 'Term Deposit Payout Out' button in the 'Interest Charges' screen and invoke the following screen.

The screenshot shows a window titled "Pay Out Details" with two tabs: "Bankers Cheque" (selected) and "Counterparty Details". The "Bankers Cheque" section contains the following fields: "Bank Code", "Currency", and "Payment Branch". The "Beneficiary Details" section contains the following fields: "Bank Code", "Beneficiary Name", "Passport/IC Number", "Narrative", "Country Code", "Beneficiary Address", "Address Line 2", and "Address Line 3". The window has "Ok" and "Exit" buttons at the bottom right.

The 'Bank Cheque' tab is displayed by default. You can capture the following details for payout using a banker's cheque:

Bankers Cheque

Specify the following cheque details.

Bank Code

Specify the bank code of the Bankers cheque.

Payment Branch

Specify the payable branch for the cheque. The adjoining option list displays all branch codes linked to the specified bank code. You can select the appropriate one.

Currency

The currency code is displayed here.

Beneficiary Details

Indicate the following details.

Beneficiary Name

Specify the name of the beneficiary.

Other Details

Specify other details (if any) for the beneficiary.

Narrative

Give a brief description for the payout.

Country Code

Specify the country code for the payout address.

Address Line 1 to 3

Specify the address of the beneficiary for the payout.

6.3.8.2 Counter Party Details Tab

Click 'Counter Party Details' tab on the 'Term Deposit Payout Details' screen and invoke the following screen. Here you can capture details for pay-out through Local Payment transfer to another bank account.

The screenshot shows a window titled "Pay Out Details" with a tab labeled "Counterparty Details". The window contains the following fields:

- Currency
- Counterparty Bank Code
- Counterparty Account
- Beneficiary Details**
 - Beneficiary Name
 - Passport/IC Number
 - Narrative
- Beneficiary Address

At the bottom right of the window, there are "Ok" and "Exit" buttons.

You can capture the following details:

Counter Party Details

Specify the following cheque details.

Counter Party Bank Code

Specify the bank code of the counter party.

Counter Party Offset Account

Specify the branch code of the account for redemption.

Beneficiary Details

Indicate the following details.

Beneficiary Name

Specify the name of the beneficiary.

Address Line 1 to 2

Specify the address of the beneficiary.

Other Details

Specify other details (if any) for the beneficiary.

Narrative

Give a brief description for the payout.

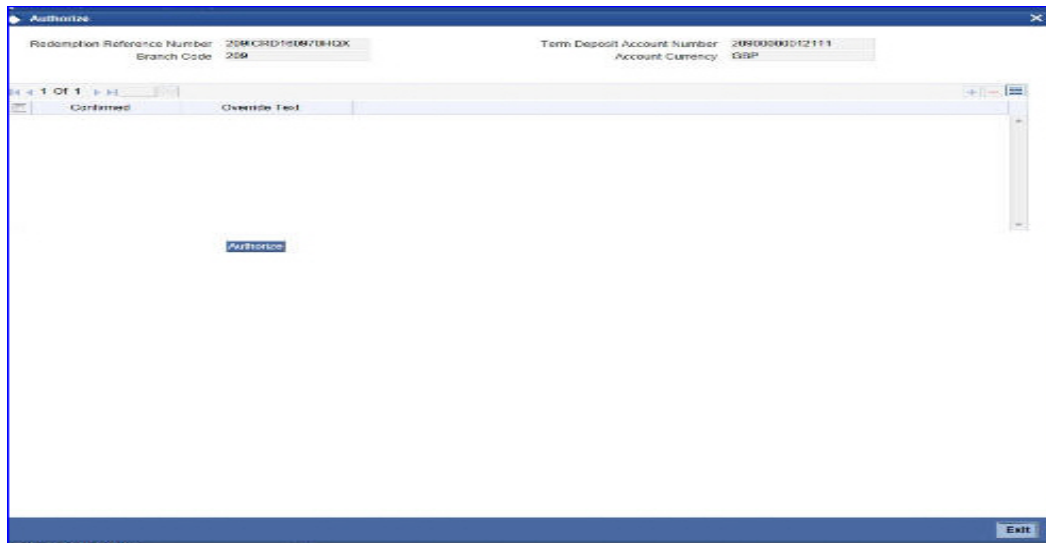

While saving the transaction, if you had modified the interest rate at TD account level for TD booking or for creating Payout TD, the system displays configurable override messages.

These overrides are displayed during subsequent modifications of the interest rate. You can also configure overrides for Dual Authorization to be displayed at Contract and Maintenance level in the 'Override Maintenance' screen.

For more information about configuring overrides, refer to the section 'Override Maintenance' in the chapter 'Configuring Overrides' in the Core Services User Manual.

6.3.9 **Authorizing Transaction**

For the transaction to be authorized, click 'Authorize' button. The following screen will be displayed:

Note

The accounting entries for redemption/renewal are passed only on authorization.

6.3.10 **Viewing TD Redemption Details**

You can view the details of TDs redemption using the 'Term Deposit Redemption Input - Summary' screen.

To invoke this screen, type 'ICSREDMN' in the field at the top right corner of the Application tool bar and click the adjoining arrow button.

The screenshot shows a web application window titled 'Summary'. At the top, there are tabs for 'Search', 'Advanced Search', and 'Reset'. Below these are several search criteria fields: 'Redemption Reference Number', 'Parent Account', 'Maker ID', 'Authorized' (a dropdown menu), 'Branch Code', 'Customer ID', 'LBL_CHECKER_ID', and 'Contract Status' (a dropdown menu). Below the search fields is a navigation bar with 'Records per page 15', '1 Of 1', and a 'Go' button. The main area is a table with the following columns: 'Redemption Reference Number', 'Branch Code', 'Parent Account', 'Customer ID', 'Maker ID', 'LBL_CHECKER_ID', 'Authorized', and 'Contract Status'. The table is currently empty. At the bottom right of the window is an 'Exit' button.

You can query on records based on any one or all of the following criteria:

- Authorization Status
- Record Status
- Redemption Reference Number
- Branch Code
- Account Number
- Transaction Date

Click 'Search' button. The system identifies all records satisfying the specified criteria and displays the following details for each one of them:

- Authorization Status
- Record Status
- Redemption Reference Number
- Branch Code
- Account Number
- Transaction Date
- Customer Id
- Account description
- Redemption Amount
- Action
- Redemption By
- Currency
- Redemption Mode
- Bank Narrative
- Savings Narrative
- GL Narrative

Note

- You can query or modify the account details of the customers whose accounts are permitted to you for the query/modification in the 'Group Code Restriction' screen.
 - If you are allowed to query customer information, then system displays the details pertaining to the fetched records:
 - You can query, modify and amend other branch transactions through the summary screen.
-

6.4 Premature Redemption of Top-up Deposit

While doing a premature partial redemption of a top-up deposit, system follows the LIFO method, i.e. the redemption amount will be taken from the latest top-up first.

The system keeps track of the funds inflow and outflow. During premature redemption the funds moving out using LIFO method are tracked and the interest for the remaining amount is calculated accordingly. The penalty is calculated on LIFO method, based on the number of days the redemption amount is available in the deposit. This is applicable during premature full redemption penalty calculation also. The SDEs DAYS_FROM_START, DEPOSIT_AMOUNT and PENALTY_BASIS are used for calculation of penalty.

If for a deposit the interest amount is liquidated to the deposit account itself, then any redemption after the top-up will consider only the principal amount i.e. the interest amount liquidated to the account will not be considered for the redemption. If the interest rate for the redeemed amount and the amount after redemption is 'Corresponding slab as on Opening date' at the account class, then the opening date of the deposit is considered instead of the top-up date.

If a top-up is made to a deposit and the redemption amount is taken only from top-up amount, then the interest re-calculation will happen only from that top-up date, and the initial deposit amount and the interest rate picked up for that will remain unaffected.

6.5 Premature Redemption of 'Rate Chart Allowed' TD

This section contains the following topics:

- [Section 6.5.1, "Rate Pick-up and Interest Recalculation for the Redemption Amount"](#)
- [Section 6.5.2, "Rate Pick-up and Interest Recalculation for the Remaining Principal"](#)
- [Section 6.5.3, "Recovering Paid Interest from the Redemption Amount"](#)

6.5.1 Rate Pick-up and Interest Recalculation for the Redemption Amount

For Pre-mature redemption of rate chart allowed term deposit, system re-calculates the interest for the principal amount being redeemed with any one of the following interest rate as defined in the field 'Interest Rate for Redemption Amount':

- **Continue Existing** - The contracted interest rate for the deposit to continue. This is the rate applicable to the account just before the current redemption.
- **As on Opening Date** – Corresponding interest rate for the completed tenor and redeemed amount applicable as on the opening date for the deposit interest rate code. The completed tenor will be used to pick the rate.
- **As on the Redemption Date** – Corresponding interest rate for the completed tenor and redeemed amount applicable as on the current redemption date for the deposit interest rate code. The completed tenor will be used to pick the rate.

- **As on the Rate Revision Events** – Corresponding interest rate for the redemption amount and completed tenor will be re-picked for each event where the rate revision is done. For e.g. If the interest rate for the deposit is changed for each interest liquidation cycle and on the top-up date, then the interest rate is re-picked for the redemption amount and completed tenor for each liquidation cycle date and top-up date.
- **Special Rate Code** – A fixed rate effective as on current redemption date. The rate code defined using ICDRATMA screen is to be captured in case of fixed rate. The rate code is captured at the STDACCLS screen 'Special Rate Code' field. The pick list for this field will display only the rate codes defined using the ICDRATMA. This field is mandatory for this option. There will be a validation available for the same and if the validation fails system displays an error message: 'The special rate code field is mandatory for the interest rate for redemption amount'.

6.5.2 Rate Pick-up and Interest Recalculation for the Remaining Principal

The interest rate for the remaining principal amount after premature partial redemption (i.e. interest rate after redemption) can be any of the following:

- Continue Existing - The contracted interest rate (existing rate) of the deposit to continue. This is the rate applicable to the account just before the redemption.
- As on Opening Date – Corresponding interest rate for the deposit tenor and remaining amount applicable as on the opening date applicable for deposit opening date. The deposit tenor is used to pick the rate.
- As on Redemption Date – Corresponding interest rate for the deposit tenor and remaining amount applicable as on the current redemption date. The deposit tenor is used to pick the slab rate.
- As on the Rate Revision Events – Corresponding interest rate for the remaining amount and deposit tenor will be re-picked for each event where the rate revision is done. For e.g. If the interest rate for the deposit is changed for each interest liquidation cycle and on the top-up date, then the interest rate is re-picked for the remaining amount and deposit tenor for each liquidation cycle date and top-up date.
- If the interest is compounded (i.e. liquidated to the same deposit account) then, it is not considered while arriving at the principal amount for interest pick-up.

6.5.3 Recovering Paid Interest from the Redemption Amount

For premature redemption, the interest amount is recalculated for both redemption amount and the balance principal amount. In case the interest already paid is greater than the interest liable to be paid as of redemption date, then the difference amount needs to be recovered from the interest booking account. This is applicable to partial and full premature redemption of term deposits.

The following override message is displayed to the authorizer only during authorization:

“Interest adjustment amount is debited from the interest booking account of the customer. Do you want to Proceed?”

6.6 Generate or Print TD Certificate

This section contains the following topics:

- [Section 6.6.1, "Generating or Printing a TD Certificate"](#)
- [Section 6.6.2, "Capturing Regular Deposit Details"](#)
- [Section 6.6.3, "Capturing Denominated Certificates Details"](#)
- [Section 6.6.4, "Certificate Re-denomination"](#)

6.6.1 Generating or Printing a TD Certificate

Once a denominated deposit is opened the certificates and duplicate deposit advice can be printed using the 'Term Deposit Certificate' screen. You can also do a partial printing of denominated deposit certificates i.e. print few certificates at one point of time and the balance certificate later.

To invoke 'Term Deposit Certificate' screen, type 'ICDBADHC' in the field at the top right corner of the Application tool bar and click the adjoining arrow button.

You need to specify the following details.

Advice

Account Number

Specify the account for which you want to generate an advice. The adjoining option list displays all valid accounts maintained in the system. You can select the appropriate one.

To view the joint holder's details of an account and the mode of operation maintained at the account level, place the cursor on the Account Number field and press Ctrl+J. The system displays the 'Joint Holder' screen.

For more information on the 'Joint Holder' screen refer to the section 'Joint Holder Maintenance' in the Core User Manual.

Account Description

The description of the selected account number is defaulted here.

Term Deposit Amount

The deposit amount of the selected TD account is defaulted here.

Branch Code
The system displays the branch code.

Account Currency

The currency of the selected TD account is displayed here.

6.6.2 Capturing Regular Deposit Details

If the TD account selected is a regular deposit and not a denominated deposit then this tab is enabled. The following details are captured here:

The screenshot shows a software window titled "Term Deposit Advice" with a "New" tab. The window is divided into several sections. At the top, there are input fields for "Account Number *" (with a red asterisk), "Account Description", "Term Deposit Amount", "Account Branch", and "Account Currency". Below these is a tabbed interface with "Regular Deposit" selected and "Denominated Certificates" disabled. Under the "Regular Deposit" tab, there are input fields for "Stock Catalog Code" and "Certificate Number". To the right of these fields is a "No. of Advices Generated" field. Further right are three checkboxes: "Rollover Issue", "Mark As Duplicate", and "Auto Generate Certificate No". Below the checkboxes are "Generate" and "Print" buttons. An "Exit" button is located at the bottom right of the window.

Stock Catalog Code

Select the stock catalog code from the adjoining option list. The list displays active stock catalog codes for the TD Certificate instrument type.

Certificate Number

Specify the Certificate Number if the Auto Generate Certificate Number is not checked. System defaults the Certificate Number if Auto Generate Certificate Number is checked.

Note

If the Auto Generate Certificate Number is checked, then the existing Generate button will be used to fetch the next Certificate Number from the inventory maintenance based on the selected Stock Catalog Code for the TD Certificate instrument type.

If Auto Generate Certificate Number is not checked then you have to enter the certificate number. System validates whether the certificate number is valid or not based on the selected stock code. If the entered certificate number is already in use then the system displays an error message.

No. of Advice Generated

The system displays the advice number being generated automatically, when each certificate is generated. On rollover of Term deposit this field will be updated as zero.

Rollover Issue

Check this box if the certificate is generated for a rolled over term deposit.

Note

- If you want to issue certificate for Rollover, then the Rollover should be checked.
- If the account is not rolled over and if you select rollover issue, system throws an error message "Since Account is not rolled over, Rollover issue should not be checked".

- If The Rollover certificate is issued already but the rollover issue is selected again, then the system prompts to select Duplicate Issue.
- If The certificate is not issued for rollover activity and if the duplicate issue is done, then the system displays the message “Certificate not issued for Rollover activity”.

Mark as Duplicate

Select Mark as Duplicate to issue duplicate certificate, for TD account for which certificate is already issued. If it is not selected, then the system displays an error message while generating the certificate

Auto Generate Certificate Number

Check this box to indicate whether system should automatically pickup the certificate number from inventory or the certificate number should be entered manually.

Click ‘Generate’ button. The system will generate the deposit advice. The advice can be viewed on clicking the ‘Print button.

You can view the advice using the ‘Outgoing Message Browser Summary’ screen (MSSOUBRS).

6.6.3 Capturing Denominated Certificates Details

If the TD account selected is a denominated deposit then this tab is enabled.

The screenshot shows the 'Term Deposit Advice' window with the 'Denominated Certificates' tab selected. The window contains several input fields and checkboxes. The 'Advice' section includes 'Account Number*' (with a red asterisk), 'Account Branch', 'Account Description', and 'Account Currency'. Below this is the 'Term Deposit Amount' field. The 'Regular Deposit' section has a 'Denominated Certificates' tab highlighted in blue. Underneath, there is a 'Certificate Allocation Pending Amount' field, a 'Rollover Issue' checkbox, and an 'Auto Generate Certificate Number' checkbox. A table with columns 'Denomination ID', 'Denomination Description', 'Denomination Value', 'Stock Catalog Code', 'Series Number', and 'Availability' is visible, with a 'Go' button above it. At the bottom, there are 'Populate' and 'Generate' buttons, and an 'Exit' button in the bottom right corner.

Certificate Allocation Details

The following details are captured here:

Certificate Allocation Pending Amount

This indicates the amount for which the certificate is yet to be allocated. Certificate Allocation Pending Amount = Term Deposit Amount - Certificate Allocated Amount.

Rollover Issue

Check this box if the certificate is generated for a rolled over term deposit.

Note

This is applicable only if the deposit is rolled over.

Auto Generate Certificate Number

Check this box to indicate that system should auto populate the certificate start number and end number.

Denomination ID

Select the denomination id from the adjoining option list. The list displays all denominations that are already allocated to the account in the 'Deposit Account Booking' screen and are not yet issued.

Denomination Description

The description of the selected denomination id is defaulted here.

Denomination Value

The denomination value of the selected denomination id is defaulted here.

Stock Catalog Code

Specify the stock catalog code here. Alternatively you can also select the code from the adjoining option list. The list displays all stock catalog codes defined at the inventory level.

Note

This is applicable only if Inventory module is used for certificate tracking

Series No.

This is the series number as defined at the inventory level.

Note

This is applicable only if Inventory module is used for certificate tracking

Availability

This indicates the number of certificates available in the inventory for the selected denomination id.

Note

This is applicable only if Inventory module is used for certificate tracking

Units

This is defaulted from the 'Deposit Account Booking' or 'TD Account Opening by Multi Mode' screen. However, you can modify this value.

You can modify the 'Units' field to a number less than the defaulted value, but it cannot be greater than the defaulted value. System validates the same on click of 'Populate' button by verifying whether the number of units for each denomination are less than or equal to the selected units during opening using STDCUSTD or TDMM screens.

Note

The number of units entered is validated with the 'Availability' field.

Total Amount

The system computes the denomination value by multiplying the denomination value with the number of units.

Certificate Start No

This indicates the certificate start number. This is auto-generated if the box 'Auto Generate Certificate Number' is checked.

If the 'Auto Generate Certificate Number' is not checked then you have to key in the 'Certificate Start Number'

Certificate End No

This is auto generated if the box 'Auto Generate Certificate Number' is checked, else it gets defaulted based on the value provided at Certificate Start Number and Units field. Certificate End Number = Certificate Start Number + Units

Once the above specified details are entered, you have to click the 'Populate' button. On click of the 'Populate' button the 'Certificate Allocation Pending Amount', 'Certificate Allocated Amount' and 'Number of Certificates for the Deposit' fields are displayed.

Certificate Allocated Amount

This indicates the sum of 'Total Amount' field.

Number of Certificates for the Deposit

The total number of certificates for the term deposit is displayed here. Number of Certificates for the Deposit = Total of 'Units' field.

If you do not use the 'Populate' button these fields will get displayed on click of 'Generate' or 'Print' button, whichever is clicked first.

Click 'Generate' button to generate the certificates and click 'Print' button to print the certificates.

6.6.4 Certificate Re-denomination

During the life cycle of a deposit, a customer can surrender some or all of the certificates to issue new certificates with new denominations.

You can unlock the existing account using the STDCUSTD screen. At the 'Denominated Deposit' sub-screen the 'Certificate Status Query/Modification' grid you can change the status of the existing certificate to 'Modified'.

The status can be changed for a single certificate or for bulk certificates, by selecting the certificates required to change status and there by selecting the bulk status change field as 'Modified'.

On click of 'Populate' button the following actions will take place:

- The 'Denomination Allocation Pending Amount' is displayed as the total amount of the modified certificates.
- The denomination allocation details grid displays only the denomination and the corresponding units currently available for the account. I.e. the 'Modified' denominations are removed from the list

You can input the required denomination by adding new rows only if the existing certificate status is 'Modified'. System validates whether the 'Denomination allocation pending amount' and the new denomination total amount are the same. Fresh certificates with the new denomination are issued using the ICDBADHC screen. The status of the new certificates will be 'Re-denominated'.

6.7 Closing a TD

Deposit accounts can be closed automatically on the Maturity Date of the deposit. You can specify this by choosing the 'Close on Maturity' option while creating the TD. A deposit acquires the specifications for the account class under which it is opened; you can change this.

If you choose the 'Close on Maturity' option, during the Beginning of Day operations on the Maturity Date, the account will be closed. The principal will be moved, if specified, to the account your customer has directed. If the deposit remains unclaimed, you can opt to move the principal and interest to the respective 'Unclaimed GLs' maintained at your bank.

Note

If value has been provided to the field "No. of Days for Closing Authorized Accounts With No Activity" at the account class level and if there is no activity in the deposit account for that particular period of time the account will get closed automatically.

6.8 Transferring to Unclaimed Deposit on Maturity

As explained in the 'Main Tab' section in the chapter 'TD Account', you can move the deposit to an unclaimed GL as per options specified in 'Main' Tab in 'Deposits Account Booking' screen upon deposit maturity (end of grace period).

Configure the Unclaimed Principal GL and Unclaimed Interest GL at accounting role maintenance at IC product level, to move the Principal & Interest components respectively.

6.8.1 Moving Principal and Interest to Unclaimed GLs

The following example explains this case.

Assume the following:

- 26155010000889' is the TD account opened under Account class ACCT2 for which 'Grace period for renewal' is 1.
- Interest Booking Account and Principal Liquidation account are TD accounts.

The TD is maturing on July 13, 2010. Grace period counter is 0 till the start of July 13 EOD. The grace period counter is 1 till the start of July 14 EOD.

The TD can be renewed post maturity for 'Principal + Interest' as defined above till the grace period (1 day) is over. Hence, the renewal of deposit is possible till EOD starts on (maturity date+1) i.e. till July 14, 2010. But the maturity date will be taken as the value date for renewal i.e. July 13, 2010.

On maturity date (grace period count 0), renewal is possible and value date of TD will be July 13, 2010.

On July 14, 2010 (grace period count 1), renewal is possible and value date will still be July 13, 2010.

In case renewal is not done within the grace period, on lapse of the grace period, both the principal and interest will be moved to Unclaimed Principal and Unclaimed Interest Misc GLs respectively, with an instrument code (reference number for reconciliation).

July 15, 2010 onwards (grace period is over), the principal and interest can be debited from the Miscellaneous GLs using the reference number (instrument code). No renewal is possible beyond this date.

6.9 Closing TD by Payout to Loan Account

If you select 'Payout Type' as 'Loan Account' at 'term Deposits Redemption Input' level, then the system credits the payout amount and automatically initiates liquidation event. The components of the loan, which are due on the payout date, are liquidated based on the liquidation order maintained for Loan Account.

If the payment amount is greater than the due amount, then the system generates an interest book log and the account will be closed manually.

Note

- The maturity date of the payout loan account should be greater than the maturity date of the TD account.

- If the Payout Loan Account and the Term Deposit Account customers are different, then the system displays an override message.

6.9.1 Viewing TD Execution Log

You can view the execution log of all TDs using the 'Term Deposits Execution Log Summary' screen. To invoke this screen, type 'ICSEXELG' in the field at the top right corner of the Application tool bar and click the adjoining arrow button.

The screenshot shows a web application window titled 'Summary'. At the top, there are 'Advanced Search' and 'Reset' buttons. Below these are four search criteria: 'Branch Code', 'Account', 'Currency Code', and 'Run Date', each with a text input field and a search icon. A pagination bar indicates 'Records per page 15', 'First', 'Previous', '1 Of 1', 'Next', 'Last', and 'Go' buttons. Below the pagination bar is a table header with the following columns: Branch Code, Account, Currency Code, Event, Tenor, Amount, Run Date, Execution Status, Error Reason, Deposit Number, and Maturity Date. The table body is currently empty. At the bottom of the window, there is an 'Execution' button on the left and an 'Exit' button on the right.

You can query on records based on any one or all of the following criteria:

- Branch Code
- Account
- Currency Code
- Run Date

Click 'Search' button. The system identifies all records satisfying the specified criteria and displays the following details for each one of them:

- Branch Code
- Account
- Currency Code
- Event
- Tenor
- Amount
- Run Date
- Execution Status
- Error Reason
- Deposit Number
- Maturity Date

6.10 Simulate TD

This section contains the following topics:

- [Section 6.10.1, "Simulating TD"](#)
- [Section 6.10.2, "Generating and Viewing Account Certificate"](#)
- [Section 6.10.3, "Specifying Interest Details for Simulated Account"](#)

6.10.1 Simulating TD

Oracle FLEXCUBE allows you to simulate a TD account in order to enhance sales and services to new and existing customers. You can also provide the customer a certificate with all the details of account. This certificate is generated with a pre-printed number.

You can simulate an account for a customer using the 'Customer Accounts Simulation' screen. The details of a account can be entered in this screen and a printed certificate of the account can be obtained by using this screen. To invoke this screen type 'STDSCSAC' in the field at the top right corner of the Application tool bar and click the adjoining arrow button.

In this screen you can input all the details of the deposit account. A term deposit account is simulated based on all the information you provide in the screen above. You can also view and generate the details of the term deposit account certificate of the account. Additionally you can view the details of interest, charges and amounts for the simulated TD account.

Branch

The branch where the deposit account is being simulated is displayed here on clicking new icon in the Application Toolbar.

Customer

Specify the customer for whom the account is being simulated. You can also select the customer from the option list provided.

Customer Name

The name of the customer for whom the account is simulated, is displayed here, based on the customer selected.

Account Currency

Specify the currency for the deposit account. You can also select the currency from the option list provided.

Account Class

Specify the 'deposit' type of account class under which the deposit should be simulated. You can also select the appropriate account class from the option list provided.

Description

Based on the account class specified, the system displays the corresponding description.

Click 'Default' button after specifying the customer, account class and currency.

Account Number

The account number of the customer for whom you need to simulate a deposit account is displayed here.

Status

The status of the simulated account is displayed here based on the customer selected

First Nominees

Specify the first person to hold the right to the simulated account balance after the customer's expiration.

DCN

The Delivery Control Number used for uniquely identifying a message in Oracle FLEXCUBE is displayed here.

Second Nominees

Specify the secondary person to hold the rights to the simulated account balance after the customer's expiration.

Account Open Date

The date on which the account has to be opened is defaulted based on the account class selected here. You can however change the value of the opening date of account.

Media

Select the media to communicate account related details to the customer, such as account maintenance related charges, fees, interest etc. from the option list. You can choose either of the following:

- Mail
- Telex
- SWIFT
- Fax

Type

The type of account is defaulted based on the account class selected. However, you can select the type of deposit account that you are maintaining a simulation for; you can select any one of the following options:

- Single
- Joint

Clearing Bank Code

The code for the bank serving as clearing house for the simulated account is displayed here

Clearing Account Number

The account number for the clearing activity for the simulated account is displayed here

Alternate Account Number

Specify an alternate account for the simulated account

6.10.2 Generating and Viewing Account Certificate

To generate the details of TD account in certificate format, click the 'Generate Certificate' button on the 'Customer Accounts Simulation' screen.

To view the details of the certificate generated for the simulated account, click the 'View Certificate' button on the 'Customer Accounts Simulation' screen. The following details are displayed:

- The Document Certificate Number
- The account branch
- The reference number
- The report Module
- The contents of the message

To procure a hard copy of the certificate click 'Print'. The generated certificates are also available through the Messaging browser. Messaging archival or purge action determines the storage or removal of these certificates from the Application Browser.

6.10.3 Specifying Interest Details for Simulated Account

To specify the interest and charge related details of the term deposit account click the 'Interest' button. The screen is as shown below:

The screenshot displays the 'LBL_IC_SP_COND_MAINT' application window, which is used for specifying interest and charge details for a simulated account. The window is divided into several sections:

- Account Details:** Includes fields for Branch, Account, Calculation Account, Interest Booking Account, and Charge Booking Account. There are also checkboxes for 'Interest Statement' and 'Dr Cr Advices'.
- Product Details:** Includes fields for Product*, User Defined Element, and Currency. There are checkboxes for 'Waive Product', 'Generate UDE Change Advice', and 'Open'. A checkbox for 'ILM Product' is also present.
- UDE Values:** This section contains two tables:
 - Dates:** A table with columns for 'Effective Date*' and 'Open'. The 'Open' column has a checked checkbox.
 - UDE Values:** A table with columns for 'User Defined Element Id*', 'UDE Id', and 'Rate Code'.

The bottom of the window shows a 'Deposit' tab.

You can define the interest and charge related details associated with the customer's deposit account.

For more information on specifying Interest details for TD refer to the section, 'Specifying Interest Details' in the chapter 'TD Additional Details' in this User Manual.

6.10.3.1 Specifying Deposit Details

Click 'Deposit' button in the 'IC Special Conditions Maintenance' screen to specify preferences for the simulated account.

The screenshot displays the 'LBL_DET_DEP_TY' form with the following fields and sections:

- Principal Liquidation Branch**: A dropdown menu.
- Interest Start Date**: A date input field.
- Maturity Date**: A date input field.
- Auto Rollover**:
- Close on Maturity**:
- Move Interest to Unclaimed**:
- Move Principal to Unclaimed**:
- Term Deposit Pay in Option**: A dropdown menu.
- Offset Branch**: A dropdown menu.
- Principal Liquidation Account**: A text input field.
- Next Maturity Date**: A date input field.
- Deposit Tenor**: A text input field.
- Rollover Details**: Radio buttons for **Principal** (selected), **Principal + Interest**, and **Special Amount**.
- Rollover Amount**: A text input field.
- Offset Account**: A text input field.
- Term Deposit Amount**: A text input field.
- Recurring Deposit** section:
 - Auto Payment Takedown**:
 - Move Maturities to Unclaimed**:
 - Payment Branch**: A dropdown menu.
 - Payment Account**: A text input field.
 - Installment Amount**: A text input field.
 - Recurring Deposit Account**:
 - Payment Date**: A date input field.
 - Payment Currency**: A dropdown menu.
- Installment Frequency** section:
 - Move funds on Overdraft**:
 - Days**: A text input field.
 - Months**: A text input field.
 - Years**: A text input field.

Specify the following details:

Principal Liquidation Branch

Specify the branch in which the liquidation account is maintained. The adjoining option list displays all valid branches maintained in the system. You can select the appropriate one.

Principal Liquidation Account

On maturity, the principal of a time deposit can be liquidated into an account you specify. This would typically be the customer's account. When maintaining a deposit, indicate the account into which the principal should be liquidated. You should also

Interest Start Date

Specify the date from which the interest accruals of TD account begins.

Maturity Date

The system defaults the maturity date from the default tenor from the account class. However, you can modify this date. On this date the term deposit account gets liquidated.

Auto Rollover

Check this field to automatically rollover the deposit you are maintaining. You have to indicate 'Rollover Type' on selecting this option

Close on Maturity

Check this field to close the term deposit account on maturity date and transfer the amount to the principal liquidation account. If you select this option, the principal liquidation account should be an account other than the term deposit account.

Move Interest to Unclaimed

Check this field to move the interest amount to the unclaimed GL mapped at the IC product in the accounting roles on grace period end date of the term deposit account.

Move Principal to Unclaimed

Check this field to move the principal amount to the unclaimed GL mapped at the IC product in the accounting roles and liquidate the interest amount to the interest booking account on grace period end date of the term deposit account.

Term Deposit Amount

Specify the amount for which TD should be simulated.

Next Maturity Date

On selecting the rollover for the TD account, the system defaults the next maturity date from the previous tenor of the deposit.

Deposit Tenor

The system calculates the tenor of the deposit account to the difference between Interest start date and Maturity date and displays it. In case of change in maturity date, the system changes the value of this field.

Rollover Type

Indicate the components that should be rolled over by choosing one of the following options:

- Principal
- Principal + Interest
- Special Amount

Rollover Amount

If a special amount is to be rolled over, you have to specify the amount (less than the original deposit amount) in this field.

Term Deposit Pay-in Option

Indicate the method for initial funding during account creation. Choose one of the following options:

- PAYIN BY GL
- PAYIN BY CASH
- PAYIN BY SAVINGS

Offset Account

Specify the account number/ GL from which the fund should be transferred to TD account as part of simulation. This field returns the branch code if the account is selected and NULL is returned if GL is selected. If the pay-in mode is GL then the system will display only GLs and if the pay-in mode is account then only accounts will be displayed in the option list.

Recurring Deposit

Specify the following details:

Auto Payment Take Down

Check this field to allow the recurring deposit account to debit the payment account for the payment amount as per the installment frequency.

Move Maturities to Unclaimed

Check this field to move all the funds, on the maturity date, to the unclaimed GL mapped to the accounting role in the IC product.

Payment Branch

Specify the details for the branch to which the payment account belongs.

Payment Account

Specify the Payment Account; this can be either savings account or the current account from which the installment for the Recurring Deposit is collected as per the installment frequency

Installment Amount

Specify the installment amount that has to be collected from the payment account as per the installment frequency. This installment amount should be greater than the minimum amount mentioned at the account class.

Recurring Deposit Account

Check this field to indicate recurring deposit account.

Payment Date

Specify the date on which the payment needs to be done for recurring deposit account.

Payment Currency

Specify currency of the payment amount.

Note

- The system enables the offset account and branch detail fields only if the option to pay is selected as the savings account.
 - The Unclaimed Interest and Principal GLs are specified while maintaining an Interest and Charges (IC) Deposit Type product. The Accounting Roles for the GLs are 'INT_UNCLAIMED' and 'PRN_UNCLAIMED' respectively. When maintaining an IC-Deposit type product, you have to map these Accounting Roles to the appropriate GLs maintained at your bank.
 - The system allows you to select 'Close on Maturity' box, only when you specify the recurring deposit details. You have to maintain deposit transaction code as 'DPN' RD payment transaction code as 'RED' and prepayment transaction code as 'TRF' for the recurring payments in the Branch Parameters for the Interest and Charges.
 - All recurring deposit payments are part of IC batch beginning of day activity.
-

Installment Frequency

Specify the following details:

Move funds on Overdraft

Check this option to indicate whether the Recurring Deposit account funds should move to an unclaimed account if it is overdue

Days

Specify the installment frequency in terms of days.

Months

Specify the installment frequency in terms of months.

Years

Specify the installment frequency in terms of years.

6.11 **Simulate TD Opening**

This section contains the following topics:

- [Section 6.11.1, "Simulating TD Opening"](#)

- [Section 6.11.2, "Deposit Input"](#)
- [Section 6.11.3, "Simulation Details"](#)
- [Section 6.11.4, "Creating Term Deposit"](#)
- [Section 6.11.5, "Specifying Interest Details for Simulated Account"](#)

6.11.1 Simulating TD Opening

You can use this screen to initiate the deposit opening simulation for the existing customers as well as for the prospects using Conventional Term Deposit Simulation Input screen. To invoke this screen type 'STDTDSIM' in the field at the top right corner of the Application tool bar and click the adjoining arrow button.

You need to specify the following details:

Account Class

Specify the account class in which the customer wishes to open the TD. The adjoining option list displays the available TD account classes. You can select the appropriate one.

If an RD account class is selected, then on clicking the 'Populate' button the system displays an error message as "RD account class not allowed for simulation".

Click the 'P' button adjoining to the account class. The system validates the account number and defaults the following fields:

Branch

Specify the branch code in which customer wants to open the account. By default, the system displays the current branch code; however, if you are multi branch operational user, then you can modify this by selecting it from the adjoining option list.

Account Open Date

System defaults the current date as account opening date; however, you can modify this date to a back date or future date.

If you have selected the future date for simulation; and you click on 'Create Deposit' button, then the system displays an error message as "Future Dated Deposit Opening not Allowed".

Term Deposit Currency

Select the term deposit currency from the adjoining option list.

Customer No

Specify the customer's/ prospect's identification number. For prospects, walk in customer id of the branch has to be specified.

Note

Customer account number, pay in account number, and payout account number should have different CASA account numbers. The following override message is displayed:

"Book TD with Single or Joint, Provide the IB, Pay-in and Payout Account as different customer".

Customer Name

Specify the customer's/ prospect's name. The system defaults this if you have specified the customer number.

6.11.2 Deposit Input

Initial Deposit Amount

Specify the initial deposit amount you want to keep with the bank for a particular tenor. The system displays an error message if initial deposit amount is not specified.

Maturity Date

If tenor is provided system calculates and displays the maturity date automatically. If maturity date is provided then tenor is calculated automatically.

Click 'Compute' button to default the maturity details as an output of the deposit opening simulation.

Deposit Tenor

Years

Specify the tenor of deposit in years.

Months

Specify the tenor of deposit in months.

Days

Specify the tenor of deposit in days.

6.11.3 Simulation Details

Interest Earnings

System displays the gross amount of interest that will be earned during the tenor of deposit.

Interest Rate

System displays the interest rate applicable for the deposit based on the product/amount/tenor.

Tax Deductions

The system displays the amount of tax that will be deducted from the gross interest amount.

Maturity Amount

System displays the total maturity amount of the deposit, i.e. Principal + Interest earned after deducting tax.

Annual Percentage Yield

System displays the annual percentage yield for the applicable interest rate.

Note

For discounted TDs, Annual Percentage Yield will display the applicable interest rate.

Interest Liquidation Details

You can view the following details here:

Date

System displays the date of interest liquidation.

Interest Amount

System displays the net interest amount that will be earned and liquidated for the compounding period.

Principal Balance

System displays the updated principal balance amount after adding net interest amount earned during the compounding period.

Note

The data can be modified after or before simulation.

Click 'Clear' button to clear the available data in simulation screen at any point of time.

Click on the 'View/Print Advice' button to view or print the simulation details.

6.11.4 Creating Term Deposit

Click 'Create Deposit' button to create the term deposit.

System enables the fields related to deposit opening. System defaults the fields maintained in the 'TD Simulation' screen.

- Account Class
- Term Deposit Currency
- Customer Number

You can modify the following details:

- Account Open Date
- Term Deposit Amount
- Deposit Tenor
- Maturity Date

On clicking 'Create deposit tenor' the min and max tenor applicable for the account class are validated. Validations for deposit opening in this screen are same as in STDCUSTD screen.

Once the create deposit button is clicked and the deposit opening screen is visible, then you will not be able to navigate back to the simulation screen.

Note

If you try to create deposit for a walk-in customer from a TD simulation screen, system will throw an error "Term Deposit cannot be opened with walk-in customer Id".

Account number is created in the simulation screen itself, but displayed only post clicking of "Create Deposit" button. For existing customers new deposit can be created using the existing customer id.

The system displays the pay in options as 'Others'. If the Pay in By option is changed to 'Cheque' then it is mandatory to specify all the details and click on 'Default' button. Once this button is clicked the pay in details provided will be defaulted in the 'Pay in Details' multi-grid.

For more information on specifying TD creation details, refer to the section 'Creating a Deposit Account' in the chapter 'TD Account'.

6.11.5 Specifying Interest Details for Simulated Account

To specify the interest and charge related details of the term deposit account click the 'Interest' button. The screen is as shown below:

The screenshot displays the 'IC Special Conditions Maintenance' window. It is divided into three main sections: 'Account Details', 'Product Details', and 'Effective Date'.
Account Details: Includes fields for Branch, Account, Calculation Account, Interest Start Date, Interest Booking Account, Charge Start Date, Charge Booking Account, Interest Booking Branch, Consolidated Charge Account, Charge Booking Branch, Interest Statement, Dr Cr Advices, Rate Chart Allowed, and Interest Rate Based on Cumulative Amount.
Product Details: Includes fields for Product Code, UDE Currency, Waive Interest, Generate UDE Change Advice, Open, and Continue Variance on Rollover. A '1 Of 1' indicator is present.
Effective Date: Features a 'Go' button, a '1 Of 1' indicator, and a table with columns for 'Effective Date' and 'Open'.
At the bottom right, there are 'Ok' and 'Exit' buttons.

You can define the interest and charge related details associated with the customer's deposit account.

For more information on specifying Interest details for TD refer to the section, 'Specifying Interest Details' in the chapter 'TD Additional Details' in this User Manual.

6.12 Simulating TD Rollover

You can initiate to simulate the term deposit renewal for existing TD accounts using 'Rollover Simulation' screen. To invoke this screen type 'ICDREDRN' in the field at the top right corner of the Application tool bar and click the adjoining arrow button.

The screenshot shows the 'Rollover Simulation Screen' with the following fields and sections:

- New Section:**
 - Account Number* (with a 'P' button)
 - Account Branch
 - Account Currency
 - Customer Name
 - Add Funds
 - Add Amount
- Current Deposit Details Section:**
 - Account Open Date
 - Principal Balance
 - Account Balance
 - Interest Rate
 - Maturity Date (format: YYYYMMDD)
 - Maturity Amount
 - Interest Paid Out
 - Tax Collected
- Deposit Tenor**
- Bottom Section:**
 - Input By, Date Time, Authorization Status
 - Authorized By, Date Time, Status
 - Ok, Exit buttons

The rollover simulation can be done on any date before the maturity date of the deposit, but only the matured and unclaimed deposits which are in a grace period can be renewed using the Rollover Simulation screen. If the user instructs to renew the deposit before the maturity date from simulation screen, then the system displays an error message as "Only matured accounts can be renewed".

Specify the following details:

Existing Deposit Details

Account Number

Specify the existing term deposit account number. The adjoining option list displays all the account numbers for which the top up is allowed at the account class level. Select the appropriate one.

To view the joint holder's details of an account and the mode of operation maintained at the account level, place the cursor on the Account Number field and press Ctrl+J. The system displays the 'Joint Holder' screen.

For more information on the 'Joint Holder' screen refer to the section 'Joint Holder Maintenance' in the Core User Manual.

Click the 'P' button. The system validates the account number and defaults the following fields:

Account Description

System displays the description of the account.

Account Branch

The system displays the branch code in which the account is maintained on click of 'New' button. By default the current branch code is displayed.

Custom Number

The system displays the customer number.

Customer Name

System displays the customer name based on the customer Id.

Account Currency

System displays the currency of term deposit account.

Add Funds

Check this box to add additional funds for rollover.

Add Amount

Specify the additional amount to be considered for rollover in TD account currency.

Current Deposit Details**Account Open Date**

The system displays the date on which the existing deposit is opened.

Principal Balance

The system displays the principal balance of deposit. The principal amount displayed here is the current principal amount of the deposit.

Account Balance

System displays the balance available in deposit account as on date.

Interest Rate

System displays the rate of interest of the current deposit.

Maturity Date

This indicates the maturity date of the existing deposit. This is only a display field and cannot be modified.

Maturity Amount

System displays the amount of maturity for the existing deposit.

Interest Paid Out

System displays the amount of interest liquidated till date from the date of account opening.

Tax Collected

The system displays the amount of tax collected till date from the date of account opening.

Deposit Tenor**Years**

The system displays the tenor of deposit in years.

Months

The system displays the tenor of deposit in months.

Days

The system displays the tenor of deposit in days.

Rollover Details

Rollover Type

Select the rollover type from the following:

- Principal - For rollover simulation, only principal amount of the existing deposit is considered. For denominated deposits, only the option of simulating the principal amount is allowed.
- Special Amount - The rollover amount field is enabled when this option is chosen. You can enter the special amount and the rollover calculation is done based on that amount.
- Interest - Rollover calculation happens only for the interest portion of the existing deposit as on maturity date (Gross interest for the whole term - Applicable tax for the whole term - Applicable charges if any).
- Principal + Interest - When this option is chosen the principal and interest amount as on TD maturity date of the existing deposit is taken as principal amount for simulation. This option can be chosen only when the interest booking account is the same deposit account, otherwise system displays an error message

Rollover Amount

You need to specify the rollover amount only if you have selected 'Special Amount' as rollover type. Specify the amount taken for the rollover. System considers this amount in rollover calculation.

Years

System defaults the tenor of the existing deposit in years; however, you can modify this if required. Maturity date is updated when the tenor is modified.

Months

System defaults the tenor of the existing deposit in months; however, you can modify this if required. Maturity date is updated when the tenor is modified.

Days

System defaults the tenor of the existing deposit in days; however, you can modify this if required. Maturity date is updated when the tenor is modified.

Maturity Date

System calculates and displays the maturity date based on the tenor of existing deposit. You can modify the maturity date. The system updates the tenor based on the modification made on the maturity date. If the maturity date is modified, accordingly the tenor gets adjusted.

Interest rate Based on Cumulative Amount

Check box to confirm whether interest rate will be based on cumulative amount or not. System defaults this box based on the Account Class; however, you can modify this.

Continue Variance on Rollover

Check box to confirm whether variance on rollover will be continued or not. System defaults this box based on the Account Class; however, you can modify this.

Click 'Compute' button to calculate the 'Deposit Details After Rollover' and 'Liquidation Details'.

Payin Details

Select the Payin Details for debiting the additional amount for rollover from the drop down list. The list displays the following values:

- GL - In case of pay-in through GL, if the offset GL account specified should be the GL maintained at 'TD Payin Parameters' (STDTDPAY) screen. If not, on save, the GL at STDTDPAY will be auto defaulted.
- Account - In case of pay-in from savings account, it is mandatory to specify the offset account. If it is not specified, the system displays an error on saving the TD account. If the pay-in account specified is disallowed for the TD product, then on saving the account, the system displays an error message
 - If the offset account is not specified then, an error message is displayed as : “Offset account is mandatory.”
 - Before rollover, the customer has to manually verify the availability of funds in the offset account. If not the rollover will fail. If the offset account does not have sufficient funds then the system will display an error as ‘Insufficient balance in the account.
 - If the offset account provided has limits attached, then on save the system will display a message as “The limits/Collateral attached is used for Payin.”
- Pay in by Cheque - In case of pay-in by cheque, the TD should be entirely funded by a single cheque. Multimode, combining multiple cheques or part payment by cheque and the rest by other modes, is not allowed.
 - In case of payin by cheque, the additional amount will be reflected online after authorization of redemption. TD account will be TD amount plus additional amount.
 - Till the completion of float days, the funds will be uncollected in the TD account. Until the cheque is cleared, no operations/modifications will be allowed on this account. The system displays an error message as “Account is in tanked status. Operations will not be allowed.”
 - Cheque can be rejected till the float days. Rejection can be done through 6560,CGDCLGDT, IFDCLGDT or file upload. If the float days is zero, then the cheque can be rejected only on current day
 - On cheque rejection, if the consolidation has not be done, then REVR will be fired debiting the uncollected amount online. If the consolidation has been done, then RETN will be fired debiting the TD amount online. The uncollected amount will b released online.
 - On rejection, the maturity amount and interest rate update will happen only in EOD.
 - If the cheque float days in zero and the transaction code availability is X days, then till that X days, the funds will be in uncollected status and account will be in tanked status. No operations will be allowed till the cheque clearance..

Note

On manual renewal, new event MROL will be fired and the additional funds pay in account will be debited for additional amount. If the ‘pay in’ is selected as Cheque, then MROL will be fired debiting the clearing GL and crediting the TD account. The funds will be in uncollected till the cheque clearance date.

Percentage

Specify the percentage of payout for each payout option specified.

Amount

Specify the amount to be transferred to TD.

Offset Branch

The system displays the branch code of the account to which fund is transferred from TD account.

Offset Account

Specify the account number/ GL to which the fund is transferred to TD account on liquidation, maturity or rollover. This field will return the branch code if the account is selected and NULL will be returned if GL is selected. If pay-out mode is GL then the system displays only GLs in the option list.

Offset Currency

The currency of the offset account.

Cheque Instrument No

Specify the cheque instrument number.

Clearing Type

Specify the clearing type for the transaction. Alternatively, you can select the clearing type from the option list. The list displays the list of outward clearing products maintained in the system. The cheque clearing happens based on the clearing product specified.

Cheque Date

Specify the date of issue of the cheque.

Drawee Account Number

Specify the drawee account number.

Routing No.

Specify the Routing number. Alternatively, you can select the routing number from the option list. The list displays all the routing number maintained in the system.

Original FX Rate

The FX rate picked up by the system.

Applied FX Rate

The user defined FX rate.

By default, the Original FX Rate is picked up, but the user can change it within the variance range.

In the following scenarios the Applied FX rate should be equal to the Original FX rate:

- If the Deposit Account Currency and the Pay-In/Out Account Currency are same.
- If the Rate Type/Rate code combination is not maintained at the account class for a Pay-In/Out Mode. In this case the system considers the STANDARD Rate as the default and the MID Rate code as the existing rate type.

Offset Amount

The amount paid for the term deposit account, in the account currency.

Note

If a TD is opened through cheque and is rejected or if a manual rollover transaction through a cheque is rejected, then the TD is updated during the IC batch. The maturity amount, initial principal amount and interest rate of this transaction will be updated only during the EOD batch. Hence, these details will not be available in the report or advice generated during the day.

Deposit Details After Rollover

View the following details:

Term Deposit Amount

System displays the term deposit amount based on the "Rollover Type" selected. This amount will be taken as the principal amount for rollover calculations.

Interest Rate

System displays the interest rate applicable for the deposit based on product/amount/tenor as on maturity date of the existing deposit.

Interest Earnings

System displays the total interest that will be earned by the deposit during the rollover tenor.

Tax Deductions

System displays the applicable percentage of tax that will be deducted from the total interest during the term of deposit mentioned for rollover.

Maturity Amount

System displays the maturity amount of the deposit after the rollover term, i.e. Rollover Principal + Interest earned after deducting tax.

Annual Percentage Yield

System displays the annual percentage yield for the applicable interest rate for rollover.

Interest Liquidation Details

You can view the following:

Date

System displays the date of interest liquidation.

Interest Amount

System displays the net interest amount that will be liquidated based on the compounding frequency.

Principal Balance

System displays the Principal balance of deposit after adding net interest amount earned during the compounding period, i.e. Principal Balance at the beginning of cycle + Net Interest liquidated for that compounding cycle.

Click 'Clear' button to clear the available data in simulation screen at any point of time.

Click 'View/Print Advice' button to view or print the simulation details.

6.12.1 Rollover TD

Click 'Rollover Deposit' button to rollover term deposit.

Rollover Simulation Screen

Ok Cancel

System enables the fields related to deposit rollover. System defaults the fields maintained in the 'Rollover Simulation' screen. You can modify the following details:

- Account Number
- Maturity Date
- Rollover Tenor
- Interest Rate Based on Cumulative Amount
- Continue Variance on Rollover

You cannot navigate to the Rollover Simulation screen once you click on the 'Renew Deposit' button.

Note

- Deposit rollover simulation can be initiated only for existing customers, who have term deposit accounts with the Bank.
 - The renewal simulation can be done on any date before the maturity date of the deposit, but only matured unclaimed deposits which are in grace period can be renewed from the simulation screen.
 - If you try to renew the deposit before the maturity date from simulation screen then the error message 'Unable to renew as the deposit is not matured' is displayed.
-

While saving the transaction, if you had modified the interest rate at TD account level for TD booking or for creating Payout TD, the system displays configurable override messages.

These overrides are displayed during subsequent modifications of the interest rate. You can also configure overrides for Dual Authorization to be displayed at Contract and Maintenance level in the 'Override Maintenance' screen.

For more information about configuring overrides, refer to the section 'Override Maintenance' in the chapter 'Configuring Overrides' in the Core Services User Manual.

6.13 Simulating TD Top Up

You can simulate the term deposit top up (additional investments) only for the existing customers having TD account with the bank using the 'Top Up Simulation' screen. To invoke this screen type 'STDTPSIM' in the field at the top right corner of the Application tool bar and click the adjoining arrow button.

The screenshot displays the 'Top up Simulation Screen' with the following fields and sections:

- Account Number ***: Input field with a 'P' button.
- Account Branch**: Input field.
- Account Description**: Input field.
- Account Currency**: Input field.
- Customer Name**: Input field.
- Customer Number**: Input field.
- Current Deposit Details**:
 - Interest Start Date**: Input field (YYYY-MM-DD).
 - Maturity Amount**: Input field.
 - Principal Balance**: Input field.
 - Interest Paid Out**: Input field.
 - Account Balance**: Input field.
 - Tax Collected**: Input field.
 - Interest Rate**: Input field.
 - Maturity Date**: Input field (YYYY-MM-DD).
- Deposit Tenor**:

- Date Time:**: Input field.
- Authorization Status**: Input field.
- Exit**: Button.

Specify the following details:

Account Number

Specify the existing term deposit account number. The adjoining option list displays all the account numbers for which the top up is allowed at the account class level. Select the appropriate one.

To view the joint holder's details of an account and the mode of operation maintained at the account level, place the cursor on the Account Number field and press Ctrl+J. The system displays the 'Joint Holder' screen.

For more information on the 'Joint Holder' screen refer to the section 'Joint Holder Maintenance' in the Core User Manual.

Click the 'P' button. The system validates the account number and defaults the following fields:

Account Branch

The system displays the branch code in which the account is maintained on click of 'New' button. By default the current branch code is displayed.

Account Description

The system displays the description of the account.

Account Currency

The system displays the currency of the term deposit account.

Customer Name

The system displays the customer name based on the account number selected.

Customer Number

The system displays the customer name based on the customer Id.

Current Deposit Details**Principal Balance**

The system displays the current principal amount of the deposit.

Interest Start Date

The system displays the date from which the interest is applicable for this deposit.

Maturity Date

The system displays the maturity date of the existing term deposit.

Maturity Amount

The system displays the maturity amount of the term deposit.

Account Balance

The system displays the current balance available in the deposit account.

Interest Rate

The system displays the rate of interest of the current deposit.

Interest Paid Out

The system displays the interest paid out till date in the term deposit account.

Tax Collected

The system displays the amount of tax collected till date in the term deposit account.

Deposit Tenor**Years**

The system displays the tenor of the existing deposit in years.

Months

The system displays the tenor of the existing deposit in months.

Days

The system displays the tenor of the existing deposit in days.

Top Up Term Deposit**Value Date**

Specify the date on which top up will be made.

Simulation is allowed for the back date or for future date; however, when 'Top up' button is clicked system will display an error that "Future Dated Top Up is not Allowed".

Top-Up Amount

Specify the amount that will be added to the existing deposit on the top up date.

Click 'Compute' button. The system defaults the 'Deposit Details after Topup' and Interest Liquidation Details'.

Deposit Details After Top-up

Term Deposit Amount

The system displays the revised term deposit amount after adding the top up amount to the existing deposit.

Interest Rate

The system displays the revised interest rate applicable for the account class/amount/tenor combination from date of top up.

Interest Earnings

The system displays the total interest that will be earned from the start date of current compounding cycle to the maturity date of deposit by taking top up amount and the revised interest rate into consideration.

Tax Deductions

The system displays the applicable tax amount that will be deducted from the interest earnings during the tenor of deposit.

New Maturity Amount

The system displays the revised maturity amount considering the top up amount.

Annual Percentage Yield

The system displays the annual percentage yield for the applicable interest rate.

Interest Liquidation Details

Date

The system displays the date of interest liquidation.

Interest Amount

The system displays the interest amount that will be liquidated based on the compounding frequency.

Principal Amount

The system displays the updated principal balance amount as on interest liquidation, i.e. Principal Balance at the beginning of cycle + Net Interest liquidated for that compounding cycle.

Click 'Clear' button to clear the available data in simulation screen at any point of time.

Click 'View/Print Advice' button to view or print the simulation details.

System enables the fields related to deposit top up. System defaults the fields maintained in the 'Deposit Top Up Simulation' screen. You can modify the following details:

- Term Deposit Account Number
- Value Date
- Top Up Amount

You cannot navigate to the Top Up Simulation screen once you click on the 'Top Up Deposit' button.

Note

- Deposit top up simulation can be initiated only for existing customers who have term deposit accounts with the Bank.
- You can edit the input data for simulation both before and after the simulation. After the simulation is completed, you can top-up a deposit using the same parameters as entered during simulation.
- The top up simulation can be back dated but in the "Top Up" deposit screen back value dated is allowed only up to the value date of the last financial transaction on the deposit account.
- The applicable financial transactions are pay-in, interest liquidation, redemption, maturity, rollover, and top-up of funds.

6.14 Simulating TD Redemption

You can simulate the partial redemption as well as full redemption for the existing TD accounts using 'Redemption Simulation' screen. To invoke this screen type 'ICDRDSIM' in the field at the top right corner of the Application tool bar and click the adjoining arrow button.

Account Number

Specify the term deposit account number. The adjoining option list displays the existing TD account numbers. Select the appropriate one.

Click the 'P' button. The system validates the account number and defaults the following fields:

To view the joint holder's details of an account and the mode of operation maintained at the account level, place the cursor on the Account Number field and press Ctrl+J. The system displays the 'Joint Holder' screen.

For more information on the 'Joint Holder' screen refer to the section 'Joint Holder Maintenance' in the Core User Manual.

Account Branch

The system displays the branch code in which the account is maintained on click of 'New' button.

Account Description

System displays the description of the account.

Account Currency

System displays the currency of term deposit account.

Customer Number

System displays the customer number based on the account number.

Customer Name

System displays the customer name based on the customer Id.

Current Deposit Details**Account Open Date**

The system displays the date on which the existing deposit is opened.

Principal Balance

The system displays the principal balance of deposit.

Account Balance

System displays the balance available in deposit account as on date.

Interest Rate

System displays the rate of interest of the current deposit.

Maturity Date

System calculates and defaults the maturity date if the tenor details are maintained.

Maturity Amount

System displays the amount of maturity for the existing deposit.

Interest Paid Out

System displays the amount of interest liquidated till date from the liquidated interest.

Tax Collected

The system displays the amount of tax collected till date.

Deposit Tenor**Years**

The system displays the tenor of deposit in years.

Months

The system displays the tenor of deposit in months.

Days

The system displays the tenor of deposit in days.

Redemption Details**Redemption Mode**

Select the mode of redemption from the adjoining drop-down list. Select one of the following:

- Full Redemption
- Partial Redemption

Redemption Execution Date

Specify the date on which redemption will be executed. This date cannot be the past date. If the past date is specified, then the system displays an error message as “Back Dated Redemption is not Allowed”.

Redemption Amount

Specify the amount to be redeemed. Depending on the redemption mode selected,

- Full Redemption: If selected, the system defaults the full redemption amount.
- Partial Redemption: If selected, you need to specify the amount for the partial redemption.

Note

For a TD account that is booked back dated and is due for ILIQ,

- Partial redemption will not be allowed. The system displays an error message as “Redemption not allowed. Pending liquidation exists.”
 - Full redemption will be allowed with an override message as “Pending ILIQ exists.”. In such cases, capitalization benefit will not be provided. This has to be controlled operationally.
-

Click ‘Compute’ button. The system displays the following details:

Payment Details of Redemption

Interest Rate

The system displays the interest rate of the term deposit.

Total Interest

The system displays the total interest amount payable for the current redemption.

Penalty Amount

The system displays the penalty amount for the current redemption.

Tax Amount

The system displays the amount of tax applicable for the current redemption.

Net Interest

The system displays the net interest payable after deducting tax and penalty for the current redemption.

Net Payable Amount

The system displays the net redemption amount that will be paid to the customer.

Deposit Details After Redemption

In case of partial redemption, the system displays the following details:

Term Deposit Amount

The system displays the term deposit amount.

Interest Rate

The system displays the revised interest rate after redemption for the term deposit.

Interest Earnings

The system displays the total interest that will be earned from the redemption date to the maturity date of the deposit.

Tax Deductions

The system displays the applicable tax amount that will be deducted from the interest earnings during the tenor of deposit.

New Maturity Amount

The system displays the recalculated maturity amount after redemption.

Annual Percentage Yield

The system displays the annual percentage yield for the applicable interest rate.

Click 'Clear' button to clear the available data in simulation screen at any point of time.

Click 'View/Print Advice' button to view or print the simulation details.

6.14.1 Redeeming a TD

Click 'Redeem Deposit' button to redeem the term deposit.

The screenshot displays the 'Redemption Simulation Screen' with the following sections and fields:

- Account Information:** Account Number* (with a 'P' icon), Account Branch, Account Currency, Customer Name, Account Description, Customer Number, Product Code, and Redemption Reference Number.
- Current Deposit Details:** Account Open Date, Maturity Amount, Principal Balance, Interest Paid Out, Account Balance, Tax Collected, Interest Rate, and Maturity Date.
- Deposit Tenor:** Years, Months, and Days.
- Redemption Details:** Redemption Mode (set to 'Partial Redemption'), Redemption Execution Date, and Redemption Amount (with a 'Compute' button).
- TD Payout Details | Denominated Deposit:** Input By, Authorized By, Date Time, Authorization Status, and Status.

An 'Exit' button is located in the bottom right corner of the screen.

System enables the fields related to deposit redemption. System defaults the fields maintained in the 'Redemption Simulation' screen. You can modify the following details:

- Term Deposit Account Number
- Redemption Execution Date

- Redemption Mode
- Redemption Amount

You cannot navigate to the Redemption Simulation screen once you click on the 'Redeem Deposit' button.

Note

- Deposit redemption simulation can be initiated only for existing customers. Option is available to simulate full redemption or partial redemption. You can edit the input data for simulation both before or after the simulation.
 - You can simulate the redemption calculations for a denominated deposit. After the simulation is completed, you can redeem a deposit using the same parameters as entered during simulation.
 - If the redemption simulation is done with a future date then while you try to redeem the deposit by clicking the "Redeem Deposit" button, system will display an error message: "Future Dated Redemption is not Allowed"
 - If there is any amount blocks available for the deposit, it will be possible to perform the simulation. However if you try to redeem the deposit by clicking "Redeem Deposit" button then system will display an error message: "Deposit Cannot be Redeemed due to Amount Block".
-

You have to enter the following values to redeem a deposit:

Payout Component

Select the payout component from the options given below. The options available are:

- Principal
- Interest

Payout Type

Select the pay-out mode from the drop down list. The options available are:

- Account
- General Ledger
- Bank's Cheque
- Payment
- Term Deposit
- Demand Draft
- Loan Payment

Percentage

Specify the amount of redemption in percentage.

Redemption Amount

Specify the Redemption Amount if you have selected the Redemption Mode as 'Partial Redemption'.

System displays the principal amount as 'Redemption Amount' if you have selected the Redemption Mode as 'Full Redemption'.

Instrument Number

Specify the instrument number to be issued.

Waive Issuance Charges

Check this box to indicate waive option for pay-out BC issuance charge

Offset Branch

Enter the offset branch code of the account for redemption.

Offset Account

Enter the offset account number/GL for redemption.

Offset Currency

The currency of the offset account.

Narrative

Enter the description for the redemption.

Original FX Rate

The FX rate picked up by the system.

Applied FX Rate

The user defined FX rate.

By default, the Original FX Rate is picked up, but the user can change it within the variance range.

In the following scenarios the Applied FX rate should be equal to the Original FX rate:

- If the Deposit Account Currency and the Pay-In/Out Account Currency are same.
- If the Rate Type/Rate code combination is not maintained at the account class for a Pay-In/Out Mode. In this case the system considers the STANDARD Rate as the default and the MID Rate code as the existing rate type.

Offset Amount

Enter the amount paid for the term deposit account, in the account currency.

6.15 Deposit Audit Trail Inquiry

The following audit trail Inquiry will be provided to query the Audit Trail details of TD and RD Accounts. When TD account is manually rolled over using add funds, an event MROL is generated. This event will be listed in search results when such TDs are queried.

You can query the audit trail details of a TD and RD accounts using 'Customer Account TD Audit Trail' screen. To invoke this screen type 'ACDAUDTR' in the field at the top right corner of the Application tool bar and click the adjoining arrow button.

Specify the following details:

Branch Code

Specify the branch code of the account.

Account No

Specify the TD/RD Account numbers of the branch. The adjoining option list displays the list of all the valid TD/RD account numbers maintained in the system. You can choose the appropriate one.

Trn From Date

Specify the transaction from date.

Trn To Date

Specify the transaction to date.

Cheque Number

Specify the cheque number issued for the transaction.

Currency

The system displays the account currency of the account being queried.

Action

Select the event of the account for the action. This drop down will have

- Booking
- Liquidation
- Accrual
- Rollover
- Redemption

- RD Payments
- RD Payments
- Reversal

Account Description

The system displays the description of the account being queried.

Account Class

The system displays the account class of the account being queried.

Description

The system displays the description of the account class of the account being queried.

Accounting Entries

You can view the accounting entries details:

Event

The system displays the event of transaction of the account being queried.

Description

The system displays the description of the transaction i.e. the description of the transaction code.

The system displays the foreign currency amount.

ount of transaction of the account being queried.

Lcy Amount

The system displays the local currency amount of transaction of the account being queried.

Transaction Date

The system displays the transaction date of transaction of the account being queried.

Value Date

The system displays the value date of the transaction.

Trn Int Dt

The system displays the transaction Initiation date of transaction of the account being queried.

Related Account

The system displays the related account of transaction of the account being queried.

Auth Stat

The system displays the authorization status of transaction of the account being queried.

User ID

The system displays the user Id of transaction of the account being queried.

Accrual

You can view the accrual details:

Event

The system displays the event of transaction of the account being queried.

Description

The system displays the description of the transaction i.e. the description of the transaction code.

Branch

The system displays the account branch of transaction of the account being queried.

Account Number

The system displays the account number being queried.

Dr/Cr

The system displays the Dr/Cr Indicator of transaction of the account being queried.

Fcy Amount

The system displays the foreign currency amount of transaction of the account being queried.

Lcy Amount

The system displays the local currency amount of transaction of the account being queried.

Transaction Date

The system displays the transaction date of transaction of the account being queried.

Value Date

The system displays the value date of the transaction.

Trn Int Dt

The system displays the transaction Initiation date of transaction of the account being queried.

Related Account

The system displays the related account of transaction of the account being queried.

Auth Stat

The system displays the authorization status of transaction of the account being queried.

User ID

The system displays the user Id of transaction of the account being queried.

6.15.1 IC Batch Processing

There will be no interest paid during the course of the deposit in 'Discounted' type products.

The Amount Block created on term deposit account for discounted interest will be removed by the system during the maturity of the term deposit.

The discounted interest of the rolled over deposit will be paid upfront during rollover. If 'Amount Block for Discount' option is required, the amount block will also be done on the new deposit. ICEOD batch will do this operation.

7. RD Operations

7.1 Introduction

This chapter contains the following sections:

- [Section 7.2, "Payment Details"](#)
- [Section 7.3, "Reversing Payment"](#)

7.2 Payment Details

This section contains the following topics:

- [Section 7.2.1, "Capturing Payment Details"](#)
- [Section 7.2.2, "Viewing Accounting Entries"](#)
- [Section 7.2.3, "Specifying UDF Values"](#)
- [Section 7.2.4, "Viewing Payment Summary "](#)

7.2.1 Capturing Payment Details

You have the option of allowing manual receipt of instalments. Invoke the 'Recurring Deposits Payment Input' screen from the Application by typing 'ICDRDPMT' in the field at the top right corner of the Application tool bar and clicking the adjoining arrow button.

The screenshot shows the 'Recurring Deposit Payment Input' application window. The window title is 'Recurring Deposit Payment Input'. It contains several sections:

- New Enter Query:** Fields for 'RD Account Number*', 'Event Sequence Number*', 'Currency', 'Maturity Date' (YYYY-MM-DD), and 'Installment Amount'.
- Payment Details:** Fields for 'Payment Branch Code', 'Payment Account Number', 'Product Code', 'Payment Amount', 'Payment Currency', 'Exchange Rate', 'Minimum Payment Amount', 'Applied FX Rate', 'Amount In Payment Currency', and 'Paid Amount' (with a 'P' button).
- Microfinance:** Fields for 'Amount Due*' (0), 'Charge Amount', 'Mode of Transaction' (By Cash), and 'Receipt ID'.
- Fields:** A table with columns for 'Maker', 'Date Time', 'Mod No', 'Record Status', 'Checker', 'Date Time', and 'Authorization Status', along with an 'Exit' button.

On invoking this screen, all the outstanding and future installments are displayed. You can choose to pay any multiple of the installment amount. To do this, the system will clear all the overdue amounts first and then allocate the amounts to current and future installments.

Type of Payment

Normal Payment

Select this option to indicate the payment as a normal RD payment. When this option is selected 'Recurring Deposit' and 'Flexible Recurring Deposit' account fields are displayed.

Top up Payment

Select this option to indicate the payment as a top-up payment. If this option is selected then only Flexible Recurring Deposit account fields are displayed.

RD Account Details

Specify the following details.

Branch Code

Specify the branch where the RD resides. The adjoining option list displays all valid branch codes maintained in the system. You can select the appropriate one.

Transaction Date

The system displays the date on which the transaction is initiated.

RD Account Number

Specify the RD Account Number. You can also choose the appropriate one from the option list. The option list displays the deposit type of accounts maintained in the system.

To view the joint holder's details of an account and the mode of operation maintained at the account level, place the cursor on the RD Account Number field and press Ctrl+J. The system displays the 'Joint Holder' screen.

For more information on the 'Joint Holder' screen refer to the section 'Joint Holder Maintenance' in the Core User Manual.

Maturity Date

The system display the maturity date of the RD, on specifying the recurring deposit account.

Installment amount

The system displays the installment amount for the RD, on specifying the recurring deposit account.

CCY

The system displays the currency for the RD, on specifying the recurring deposit account.

Payment Details

Specify the following details.

Payment Branch Code

Specify the code assigned to the branch in which the payment is to be made. The adjoining option list displays all valid branch codes maintained in the system. You can select the appropriate one.

Product Code

Specify the retail teller product with combination of ARC maintenance. You have to ensure that the retail teller product is enabled for RD payments by checking the field 'RD Payments allowed' at the teller product level maintenance-preferences screen.

Payment Account Number

Specify the payment account number used for manual payment for the RD. The adjoining option list displays all valid savings account and current accounts maintained in the system. You can select the appropriate one.

Exchange Rate

Specify the exchange rate, if the account currency is different from the currency in which the payment amount is expressed.

Applied FX Rate

The FX rate entered by the user.

In the following scenarios the Applied FX rate should be equal to the Original FX rate:

- If the Deposit Account Currency and the Pay-In/Out Account Currency are same.
- If the Rate Type/Rate code combination is not maintained at the account class for a Pay-In/Out Mode. In this case the system considers the STANDARD Rate as the default and the MID Rate code as the existing rate type.

Amount In Payment Currency

Click the P button to generate the paid amount in the specified currency.

Payment Currency

Specify the currency in which the payment is being made. The adjoining option list displays all valid currency codes maintained in the system. You can select the appropriate one.

Payment Amount

Specify the amount deposited as payment. Here you can specify the installment amount or the complete deposit amount in multiples of the a installment amount.

Minimum Payment Amount

The system displays the installment amount indicating the minimum amount that can be deposited in the RD account.

After entering the RD accounts payment details, click 'P' button. The system then calculates the paid amount and displays them in the respective fields.

Paid Amount

The paid amount.

Microfinance**Amount Due**

The amount due.

Charge Amount

The charge amount.

Mode of Transaction

The mode of transaction such as cash or through the customer's bank account.

Receipt ID

The ID of the receipt received after the payment.

RD Account Payments

On click of 'P' button, along with paid amount, the system calculates the due days, due date, instalment amount and RD contract status.

Due Date

The system displays due date of the installment

Installment Amount

The system displays installment amount.

Payment Date

Specify payment date for the RD. Normally, the payment date is the same as the transaction date. You can change the date and click 'P' button to automatically populate the update 'Due Date' and 'Instalment Amount'.

Due Days

The system displays overdue days in case payment is overdue.

7.2.2 Viewing Accounting Entries

Click 'Events' button in the 'Recurring Deposits Payment Input' screen and view accounting entries.

7.2.3 Specifying UDF Values

All User Defined Fields (UDFs) linked to the function ID 'ICDRDPMT' are displayed in the 'User Defined Fields' screen. Invoke this screen by clicking 'Fields' button on the 'Recurring Deposit Payment Input' screen.

The screenshot shows a window titled 'User Defined Fields'. Inside, there is a section labeled 'UDF Details' with a 'Go' button and a '1 of 1' indicator. Below this is a table with three columns: 'Field Name *', 'Value', and 'Value Description'. The table is currently empty. At the bottom right of the window, there are 'Ok' and 'Exit' buttons.

Here you can specify values for each UDF.

Refer the User Manual titled 'User Defined Field' for details about defining UDFs. Click 'Fields' button on the 'TD Accounts Maintenance' screen and invoke the 'User Defined Fields' screen.

7.2.4 Viewing Payment Summary

You can view summary of all RD payments using the 'Recurring Deposit Payment Summary' screen. To invoke this screen, type 'ICSRDPMT' in the field at the top right corner of the Application tool bar and click the adjoining arrow button.

The screenshot shows a software window titled 'SUMMARY'. At the top, there are three buttons: 'Search', 'Advanced Search', and 'Reset'. Below these are search criteria fields: 'Authorization Status' (a dropdown menu), 'Branch Code', 'Payment Branch Code', 'Product Code', and 'Event Sequence Number'. On the right side, there are fields for 'Record Status' (a dropdown menu), 'RD Account Number', 'Payment Currency', and 'Transaction Date'. Below the search fields is a table with the following columns: 'Authorization Status', 'Record Status', 'Branch Code', 'RD Account Number', 'Payment Branch Code', 'Payment Currency', 'Product Code', 'Transaction Date', and 'Event Sequence Number'. The table is currently empty. At the bottom right of the window, there is an 'Exit' button.

You can query on records based on any one or all of the following criteria:

- Authorization Status
- Record Status
- Branch Code
- RD Account Number
- Payment Branch Code
- Payment Currency
- Product Code
- Transaction Date

Click 'Search' button. The system identifies all records satisfying the specified criteria and displays the following details for each one of them:

- Authorization Status
- Record Status
- Branch Code
- RD Account Number
- Payment Branch Code
- Payment Currency
- Product Code
- Transaction Date

Double click on a record to invoke the detailed screen for that record.

7.3 Reversing Payment

You can reverse the payments made to the RD account rather the installment amounts to the recurring deposit account. Invoke the 'Recurring Deposit Payments Reversal' screen from the

application browser. You can also invoke this screen by typing 'ICDRDREV' in the field at the top right corner of the Application tool bar and clicking the adjoining arrow button.

Recurring Deposit Payments Reversal

Reversal Reference Number

Branch Code *

RD Account Number *

Transaction Date *

Event Sequence Number *

Authorization Status

Contract Status

Remarks *

Maker Date Time: Mod No Record Status

Checker Date Time: Authorization Status

Exit

Here you can capture the following details.

Branch Code

Specify the code assigned to the branch in which the payment is to be made. You can also choose the branch code from the adjoining option list.

RD Account Number

Specify the recurring account number for which the installments are to be collected. The system displays the recurring deposit accounts that are in open and authorized status in the adjoining option list. You can choose the appropriate one from this list.

To view the joint holder's details of an account and the mode of operation maintained at the account level, place the cursor on the RD Account Number field and press Ctrl+J. The system displays the 'Joint Holder' screen.

For more information on the 'Joint Holder' screen refer to the section 'Joint Holder Maintenance' in the Core User Manual.

Transaction Date

The system displays the transaction date for which reversal is supposed to be initiated.

Auth Status

The system displays the authorization status.

Contract Status

The system displays the contract status.

Reversal of a payment transaction can be done from this screen. When a transaction is reversed, the system updates the contract status as 'V' (Reversed).

8.1 Introduction

This chapter contains the following sections:

- [Section 8.2, "Customers Fixed Deposit Report"](#)
- [Section 8.3, "TD Full Balance Listing Report"](#)
- [Section 8.4, "Large FD Report"](#)
- [Section 8.5, "Deposit Detail Summary by Total Amount Report"](#)
- [Section 8.6, "Interest Paid Report"](#)
- [Section 8.7, "TD Statement of Accounts Report"](#)
- [Section 8.8, "TD Account Class Summary Report"](#)
- [Section 8.9, "Term Deposits Opened for the Period Report"](#)
- [Section 8.10, "Term Deposits Closed for the Period Report"](#)
- [Section 8.11, "Term Deposits Account Renewed Report"](#)
- [Section 8.12, "Term Deposits Account Maturity Report"](#)
- [Section 8.13, "Term Deposit Account Maturity Date Change Report"](#)
- [Section 8.14, "TD Account Maturity Date Falling on a Holiday Report"](#)
- [Section 8.15, "TD Account Maturity Date not Adjusted Report"](#)
- [Section 8.16, "Customer-wise Tax Deduction Report"](#)
- [Section 8.17, "Term Deposits Exceeding Lien Limits Report"](#)
- [Section 8.18, "Unclaimed Deposits Transferred for a Day"](#)
- [Section 8.19, "Term Deposits Topped-up During the Period"](#)
- [Section 8.20, "Ad-Hoc Combined Statement"](#)
- [Section 8.21, "Term Deposit with User Modified Exchange Rate Report"](#)

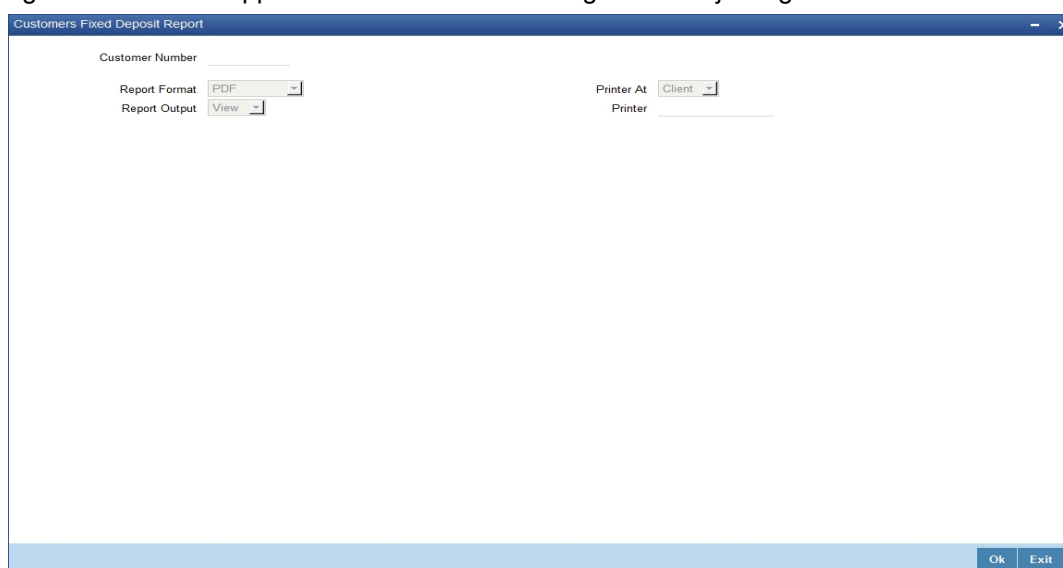

To generate any of these reports choose Reports in the Application Browser. Choose TD under it. A list of all the reports in TD module will be displayed. You can choose to view or print the report.

The time and the operator who generated the report will be displayed.

8.2 Customers Fixed Deposit Report

This report lists out all time deposit accounts for a given customer. This report also provides additional information of whether lien is marked or not. You have an option to print and view the report in PDF, HTML, RTF or Excel format.

You can invoke 'Customers Fixed Deposit' screen by typing 'TDRFIDEP' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

Specify the following details here:

Customer Number

Select the customer number from the adjoining option-list. The list displays all valid customer codes. On failure to provide the value, the report fetches records for all available customers and accounts across the branches.

Click 'OK' button to generate the report. Click 'Exit' to return to the Reports Browser.

8.2.1 Contents of the Report

The parameters specified while generating the report are printed at the beginning of the report. The contents of the report are discussed under the following heads:

Header of the report

The header of the report contains the following information:

| Field Name | Field Description |
|-----------------|-------------------------------------|
| Branch | Current Branch Code and branch Name |
| Branch Date | Current Branch Date |
| Run Date & Time | Current Run Date and Time |
| User ID | Operator generating the Report |
| Module | Module of the Report |
| Page No | Page No. of the Report |

Body of the report

The following detail block elements are displayed in the report:

| Field Name | Field Description |
|------------|-------------------|
|------------|-------------------|

| | |
|--|---|
| Customer Number | This indicates the customer number whose fixed deposit details are reported |
| Customer Type | This indicates the customer type of the above customer |
| Account No. | This indicates the TD account number whose details are generated in the report |
| Customer Name | This indicates the full name of the customer based on the customer number |
| Officer ID | This indicates the unique id of the customer |
| Currency | This indicates the account currency |
| Deposit value date | This indicates the value date of the deposit transaction in an account |
| Maturity date | This indicates the maturity date of a deposit account |
| Deposit Term in days | This indicates the term (tenor) of the deposit account |
| Deposit Amount (LCY) | This indicates the deposit amount of the account in local currency |
| Deposit Amount | This indicates the deposit amount in account currency for an account |
| Interest Rate | This displays the interest rate of the account |
| Maturity Amount | This displays the maturity amount as per new calculation |
| Lien Amount | This indicates the Lien Details (Amount Blocked) of an account |
| Stock Catalogue Code | This displays Stock Catalogue Code for the TD certificate number |
| Certificate No | This indicates the certificate number issued for TD account |
| Duplicate Issue | This indicates Y/N, based on the duplicate certificate issued for TD account |
| Interest Rate Based on Cumulative Amount | This indicates whether the interest rate for the deposit is arrived using cumulative amount or not. |

8.3 TD Full Balance Listing Report

This report gives a complete listing of time deposit accounts opened till the run day. This report gives account class wise grouping of accounts with totals. You have an option to print and view the report in pdf or excel format.

You can invoke 'TD Full Listing Reports' screen by typing 'TDRFULBL' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

Specify the following details here:

Branch Code

Select the branch code for which the report needs to be generated, from the adjoining option-list. The list displays all valid branch codes. You have an option to select all the branches or a single branch. If the branch code is not specified, then the TD accounts of all the branches are shown in the report.

Status

Select the account status from the drop-down list. The options available in the drop-down list are as follows:

- Open – If you select this option the report will be generated for all open deposit accounts
- Close – If you select this option the report will be generated for all closed deposit accounts

Click 'OK' button to generate the report. For the selected branch, currency-wise deposit amount and number of deposits for the previous month and current month will be displayed along with the cost %.

Process Date

Select the date for processing the report from the adjoining calendar button. The open or close TD accounts till the process date is displayed. If the process date is not specified, then the open or closed TD accounts till current system date are shown.

Click 'Exit' to return to the Reports Browser.

8.3.1 Contents of the Report

The parameters specified while generating the report are printed at the beginning of the report. The contents of the report are discussed under the following heads:

Header of the report

The header of the report contains the following information:

| Field Name | Field Description |
|------------|-------------------|
|------------|-------------------|

| | |
|-----------------|-------------------------------------|
| Branch | Current Branch Code and branch Name |
| Branch Date | Current Branch Date |
| Run Date & Time | Current Run Date and Time |
| User ID | Operator generating the Report |
| Module | Module of the Report |
| Page No | Page No. of the Report |

Body of the report

The following detail block elements are displayed in the report:

| Field Name | Field Description |
|--|--|
| Account Class | This indicates the account class code |
| Class Name | This indicates the class name |
| Currency | This indicates the currency of transaction |
| Status | This indicates the status of the TD account |
| Account Number | This indicates the TD account number |
| Customer ID | This indicates the unique id of the customer |
| Customer Name | This indicates the name of the customer |
| Open Date | This indicates the date on which the account was opened |
| Maturity Date | This indicates the maturity date of the deposit account |
| Deposit Tenor | This indicates the deposit tenor, in days, months, and years. |
| Interest Rate | This displays the interest rate applicable to TD account |
| Interest rate based on cumulative amount | This indicates Y/N, based on whether the interest rate is based on cumulative rate or not. |
| Maturity Amount | This displays the maturity amount of the TD |
| Principal Amount | This indicates the total Principal Amount of the deposit account |
| Accrued Interest | This indicates the interest accrued for the deposit account |

8.4 Large FD Report

This report provides customer-wise details of large time deposits beyond the given amount criteria. You have an option to print and view the report in pdf or excel format.

You can invoke 'Large FD Report' screen by typing 'TDRFDREP' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

Specify the following details here:

Branch Code

Select the branch code for which the report needs to be generated from the adjoining option-list. The list displays all valid branch codes. You have an option to select all the branches or a single branch.

Currency

Select the currency code from the adjoining option-list. The list displays all valid currency codes maintained in the system. By default the value 'ALL' will be displayed.

Amount Exceeding

Specify the deposit amount here. The report generated will include only those accounts which exceed the deposit amount specified here.

Click 'OK' button to generate the report. Click 'Exit' to return to the Reports Browser.

8.4.1 Contents of the Report

The parameters specified while generating the report are printed at the beginning of the report. The contents of the report are discussed under the following heads:

Header of the report

The header of the report contains the following information:

| Field Name | Field Description |
|-----------------|-------------------------------------|
| Branch | Current Branch Code and branch Name |
| Branch Date | Current Branch Date |
| Run Date & Time | Current Run Date and Time |
| User ID | Operator generating the Report |
| Module | Module of the Report |

| | |
|---------|------------------------|
| Page No | Page No. of the Report |
|---------|------------------------|

Body of the report

The generated report will have the following information:

| Field Name | Field Description |
|--|--|
| Customer with deposit amount total exceeds | This indicates the TD accounts of the customer with deposit amount exceeding specified amount. |
| Branch Code | Indicates the branch for which report is generated |
| Branch Name | Indicates the name of the branch |
| Customer ID | This indicated the unique id of the customer whose TD accounts exceeds specified amount |
| Customer Short Name | This indicates the short name of the customer |
| Account Currency | This indicates the currency of the TD account |
| Account Number | Indicates the TD account of the customer whose current available balance exceeds the specified limit |
| Interest rate | This displays the interest rate of the account |
| Maturity Amount | This displays the maturity amount based on the display at the TD level |
| Deposit amount | This indicates the deposit amount |
| Interest Rate Based on Cumulative Amount | This indicates whether the interest rate for the deposit is arrived using cumulative amount or not. |

8.5 Deposit Detail Summary by Total Amount Report

This report provides a summary of currency-wise deposit details. You have an option to print and view the report in pdf or excel format.

You can invoke 'Deposit Detail Summary by Total Amount' screen by typing 'TDRDDSUM' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

Specify the following details here:

Processing Date

Select the date on which the report has to be processed, from the adjoining calendar button.

Branch Code

Select the branch code for which the report needs to be generated, from the adjoining option-list. The list displays all valid branch codes. You have an option to select all the branches or a single branch.

For the selected branch, currency-wise the deposit amount and number of deposits for previous month and current month are displayed along with the cost %.

8.5.1 Contents of the Report

The parameters specified while generating the report are printed at the beginning of the report. The contents of the report are discussed under the following heads:

Header of the report

The header of the report contains the following information:

| Field Name | Field Description |
|-------------------|-------------------------------------|
| Branch | Current Branch Code and branch Name |
| Branch Date | Current Branch Date |
| Run Date & Time | Current Run Date and Time |
| User ID | Operator generating the Report |
| Module | Module of the Report |
| Page No | Page No. of the Report |

Body of the report

The generated report will have the following information:

| Field Name | Field Description |
|-------------------------|--|
| Currency | This indicates the interest booking account currency |
| No. of Deposits | Displays the currency-wise number of deposits for a branch for the previous month |
| Previous month Deposits | This indicates the previous month deposits |
| Cost (% per.annum) | This indicates the cost percentage per annum Cost percentage per annum for previous month = (Previous month deposit amount x 100) / (Sum of Deposit Amount) for a specific currency for a branch with start date from first day of the current financial year till date). |
| No of deposits | This indicates the currency-wise no. of deposits for a branch for the current month |
| Current month Deposits | This indicates the current month deposits |
| Cost (% per.annum) | This indicates the cost percentage per annum Cost percentage per annum for current month = (Current month deposit amount x 100) / (Sum of Deposit Amount) for a specific currency for a branch with start date from first day of the current financial year till date). |

8.6 Interest Paid Report

This is a report of term deposits interest paid for the day. In this report accounts are grouped Account class wise and interest type wise. This report is generated at BOD.

You can invoke 'Interest Paid Report' screen by typing 'TDRINREP' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

Interest paid report

Branch Code

Specify the branch code. The system will generate the interest paid report for the branch code that you have selected. If the branch code is not specified, then all the branch accounts are shown in the report.

8.6.1 Contents of the Report

The parameters specified while generating the report are printed at the beginning of the report. The contents of the report are discussed under the following heads:

Header of the report

The header of the report contains the following information:

| Field Name | Field Description |
|-----------------|-------------------------------------|
| Branch | Current Branch Code and branch Name |
| Branch Date | Current Branch Date |
| Run Date & Time | Current Run Date and Time |
| User ID | Operator generating the Report |
| Module | Module of the Report |
| Page No | Page No. of the Report |

Body of the report

The generated report will have the following information grouped by branch code:

| Field Name | Field Description |
|-------------------------|---|
| Branch Code | Indicates the branch for which report is taken. |
| Account Class Code | This indicates the Account Class Code |
| Account Class Name | This indicates the name of the account class |
| Currency | This indicates the account currency |
| Account Number | This indicates the account number. |
| Interest rate | This displays the interest rate of the account |
| Maturity Amount | This displays the maturity amount as per new calculation |
| Customer Name | Indicates the customer name |
| Payment Method | Indicates the payment method defined at IC product level for the TD account. |
| Interest Paid today | Indicates the interest liquidated and due for today. This field will be displayed only on the day the interest is liquidated. |
| Interest Paid till date | Indicates the total interest liquidated till date |

| | |
|--|---|
| Interest Rate Based on Cumulative Amount | This indicates whether the interest rate for the deposit is arrived using cumulative amount or not. |
|--|---|

Following elements will be displayed for Totals:

| Field Name | Field Description |
|---|--|
| Product Wise Total (Interest Paid Today) | This indicates the product wise Account class total for interest paid today (in ACY) |
| Product Wise Total (Interest Paid To Date) | This indicates the product wise Account class total for interest paid to date (in ACY) |
| Currency Wise Total (Interest Paid Today) | This indicates the Currency total for Interest paid Today (in ACY) |
| Currency Wise Total (Interest Paid to Date) | This indicates the Currency total for interest paid To date (in ACY) |
| Branch Wise Total (Interest Paid Today) | This indicates the Branch total for Interest paid Today (in ACY) |
| Branch Wise Total (Interest Paid to Date) | This indicates the Branch total for Interest Paid To Date (in ACY) |

8.7 TD Statement of Accounts Report

This is a report all financial transactions that are customer initiated along with the interest payout and tax deduction if any that has taken place in a time deposit account. There are multiple financial transactions like deposits, interest pay out etc. that takes place in a time deposit account. Some of these will be customer initiated while others may be done by the system for auto renewal, sweep transactions, etc. The customer needs to get a list of such transactions that have taken place in his/her account along with key transaction details like date transacted, description, maturity date of the deposit etc. This report is generated monthly at EOFI.

You can invoke 'TD Statement of Accounts Report' screen by typing 'TDRSOACC' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

Branch Code

Specify the branch code. The system will generate the interest paid report for the branch code that you have selected. On failure to specify the branch code the system generates the report for the accounts of all branches.

8.7.1 Contents of the Report

The parameters specified while generating the report are printed at the beginning of the report. The contents of the report are discussed under the following heads:

Header of the report

The header of the report contains the following information:

| Field Name | Field Description |
|-----------------|-------------------------------------|
| Branch | Current Branch Code and branch Name |
| Branch Date | Current Branch Date |
| Run Date & Time | Current Run Date and Time |
| User ID | Operator generating the Report |
| Module | Module of the Report |
| Page No | Page No. of the Report |

Body of the Report

The report will have the following elements:

| Field Name | Field Description |
|---------------|--|
| Customer No | This indicates the customer number |
| Customer Name | This indicates the name of the Customer |
| Address | This indicates the address of the Customer |

| | |
|---------------------------|--|
| Account No. | This indicates the customer account number |
| Current Balance | This indicates the current balance in the account |
| Transaction Date | This indicates the date of transaction |
| Formula Number | This indicates the formula number |
| Goal Reference Number | This indicates the identification number of the goal that has been captured from channels. |
| Product | This indicates the product code |
| Accrual Amount | This indicates the accrual amount for each transaction date |
| Cumulative Accrual Amount | This indicates the cumulative accrual amount by adding up the accruals for each transaction date |
| Dr/Cr | This indicates the amount credited or debited for interest, penalty or tax |
| Interest rate | This displays the interest rate of the account |
| Maturity Amount | This displays the maturity amount based on the tenor of the TD |
| User ID | This indicates the identification of the user |
| Auth ID | This indicates the identification of the authorizer |

8.8 TD Account Class Summary Report

This summary report provides MIS information like principal amount, interest amount etc. with respect to term deposit accounts of the bank. This is a GL-wise, currency wise Account class summary report for all the branches. This report provides information about Account class Code, Account class Name, Total Accounts, Principal Balance, Interest Accrued. The totals are also provided.

You can invoke 'TD Account class Summary' screen by typing 'TDRPRSUM' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

The screenshot shows a window titled "TD Account class summary". Inside the window, there are several controls for configuring the report:

- Branch Code:** A text input field.
- Report Format:** A dropdown menu currently set to "PDF".
- Report Output:** A dropdown menu currently set to "View".
- Printer At:** A dropdown menu currently set to "Client".
- Printer:** A text input field.

At the bottom right corner of the window, there are two buttons: "Ok" and "Exit".

Branch Code

Specify the branch code. The system will generate the TD account class summary report for the branch code that you have selected.

8.8.1 Contents of the Report

The parameters specified while generating the report are printed at the beginning of the report. The contents of the report are discussed under the following heads:

Header of the report

The header of the report contains the following information:

| Field Name | Field Description |
|-----------------|-------------------------------------|
| Branch | Current Branch Code and branch Name |
| Branch Date | Current Branch Date |
| Run Date & Time | Current Run Date and Time |
| User ID | Operator generating the Report |
| Module | Module of the Report |
| Page No | Page No. of the Report |

Body of the report

The generated report will have the following information:

| Field Name | Field Description |
|--------------------|--|
| GL Type | This indicates the GL Type |
| GL Code | This indicates the GL Code |
| CCY | This indicates the currency for the respective GL |
| Account Class Code | This indicates the Account Class code |
| Account Class Name | This indicates the account class name |
| Total Accounts | This indicates the Total Accounts |
| Maturity Amount | This displays the maturity amount as per new calculation |
| Principal Balance | This indicates the Principal Balance in the accounts |
| Interest Accrued | This indicates the Interest Accrued for the accounts |

Following elements will be displayed for Totals:

| Field Name | Field Description |
|-------------------|--|
| Principal Balance | This indicates the total Principal Balance of the accounts |
| Interest accrued | This indicates the total Interest accrued for the accounts |

8.9 Term Deposits Opened for the Period Report

This report lists the term deposit accounts which are opened for the given period, and that are currently on open status.

You can generate this report using 'TD Account Opened Report' screen by typing 'TDROPEN' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

Specify the following details here:

From Date

Enter the TD accounts which are opened from this date. However by default the system displays the current application date.

To Date

Enter the TD accounts which are opened till this date. However by default the system displays the current application date.

Branch

Specify the branch code of the TD account. The adjoining option list displays the list of all the valid TD/RD branch codes maintained in the system. You can choose the appropriate one.

Account Class

Specify the account class of TD account. The adjoining option list displays the list of all the valid TD/RD account classes maintained in the system. You can choose the appropriate one.

Customer

Specify the customer number of the customer. The adjoining option list displays the list of all the valid customer numbers maintained in the system. You can choose the appropriate one.

Click 'OK' button to generate the report. Click 'Exit' to return to the Reports Browser.

8.9.1 Contents of the Report

The parameters specified while generating the report are printed at the beginning of the report. The contents of the report are discussed under the following heads:

Header of the report

The header of the report contains the following information:

| Field Name | Field Description |
|-----------------|-------------------------------------|
| Branch | Current Branch Code and branch Name |
| Branch Date | Current Branch Date |
| Run Date & Time | Current Run Date and Time |
| User ID | Operator generating the Report |
| Module | Module of the Report |
| Page No | Page No. of the Report |

Body of the report

The generated report will have the following information:

| Field Name | Field Description |
|------------------------|---|
| Account No | This indicates the account number |
| Customer No | This indicates the customer number for whom TD is opened |
| Customer Name | This indicates the Name of the TD account holder |
| Date of Open | This indicates the TD account opened date |
| Value Date | This indicates the Value Date of the TD account |
| Deposit Amount | This indicates the Deposit Amount |
| Deposit Term | This indicates the TD Tenor in days, months & years |
| TD Maturity Date | This indicates the Maturity date of the TD account |
| Total Interest Payable | This indicates the Interest Amount (This will show interest amount on the maturity date.) |
| Maturity Amount | This displays the maturity amount as per new calculation |
| Product Code | This indicates the Account Class code of the TD account |
| Deposit Currency | This indicates the currency under which TD is opened |
| Goal Reference Number | This indicates the identification number of the goal that provided by external channels. |
| Currency Total | This indicates the Currency-wise total for deposit amount, Interest Payable and Maturity Amount |
| Close on Maturity | This will show whether TD will be closed on maturity |
| Auto Rollover | This will show whether TD will be automatically rolled over |
| Interest Rate | This displays the interest rate of the account |
| Stock Catalog Cd | This displays Stock Catalog Code for the TD certificate number |

| | |
|--|---|
| Certificate No | This indicates the certificate number |
| Duplicate Issue | This indicates/N based on the duplicate certificate issued for TD account. |
| Interest Rate Based on Cumulative Amount | This indicates whether the interest rate for the deposit is arrived using cumulative amount or not. |

8.10 Term Deposits Closed for the Period Report

This report list the term deposit accounts which are closed for the given period, and that are currently on open status.

You can generate this report using 'TD Account Closed Report' screen by typing 'TDRCLOSE' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

Specify the following details here:

Branch Code

Specify the branch code of the TD account. The adjoining option list displays the list of all the valid TD/RD branch codes maintained in the system. You can choose the appropriate one.

Based on the branch code, the system displays the branch name.

Customer

Specify the customer number of the customer. The adjoining option list displays the list of all the valid customer numbers maintained in the system. You can choose the appropriate one.

Based on the customer code, the system displays the name of the customer.

Account Class

Specify the account class of TD account. The adjoining option list displays the list of all the valid TD/RD account classes maintained in the system. You can choose the appropriate one.

The system displays the description of the account class.

From Date

Enter the TD accounts which are closed from this date. However by default the system displays the current application date.

To Date

Enter the TD accounts which are closed till this date. However by default the system displays the current application date.

Include Subordinates

The relationship managers can generate the reports for the customers who are associated with their subordinate RMs. Choose one of the following options:

- Yes – Select this to include the customers assigned to your subordinate RMs.
- No – Select this to generate the report only for the customers assigned to you, excluding the customers assigned to your subordinate RMs.

Choose the appropriate one.

Click 'OK' button to generate the report. Click 'Exit' to return to the Reports Browser.

8.10.1 Contents of the Report

The parameters specified while generating the report are printed at the beginning of the report. The contents of the report are discussed under the following heads:

Header of the report

The header of the report contains the following information:

| Field Name | Field Description |
|-----------------|-------------------------------------|
| Branch | Current Branch Code and branch Name |
| Branch Date | Current Branch Date |
| Run Date & Time | Current Run Date and Time |
| User ID | Operator generating the Report |
| Module | Module of the Report |
| Page No | Page No. of the Report |

Body of the report

The generated report will have the following information:

| Field Name | Field Description |
|-------------------------|--|
| Account No./Deposit No. | This indicates the TD account Number |
| Customer Name | This indicates the Name of the TD account holder |
| Closure Date | This indicates the TD account closed date |
| Amount of deposit | This indicates the Deposit Amount |
| Maturity Date | This indicates the Maturity date of the TD account |
| Proceeds credit to | This will show the Payment Mode of the TD account |

| | |
|-----------------------|---|
| Interest Rate | This displays the interest rate of the account |
| Goal Reference Number | This indicates the identification number of the goal received from external channels. |
| Interest Amount | This indicates the Interest Amount, accrued and liquidated for the closed TD account (This will show the actual interest amount which has been paid to the customer) |
| Maturity Amount | This displays the maturity amount as per new calculation |
| Branch | This indicates the Branch Name |
| Product Code | This indicates the Account Class code of the TD account |
| Deposit Currency | This indicates the deposit currency |
| Stock Catalogue Code | This displays Stock Catalog Code for the TD certificate number |
| Certificate Number | This indicates the certificate number |
| Duplicate Issue | This indicates duplicate issue |

8.11 Term Deposits Account Renewed Report

This report lists the term deposit accounts which are renewed for the given period. You can generate this report using 'TD Account Renewed Report' screen by typing 'TDRRENEW' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

Specify the following details here:

From Date

Enter the TD accounts which are renewed from this date. However by default the system displays the current application date.

To Date

Enter the TD accounts which are renewed till this date. However by default the system displays the current application date.

Branch Code

Specify the branch code of the TD account. The adjoining option list displays the list of all the valid TD/RD branch codes maintained in the system. You can choose the appropriate one.

Account Class

Specify the account class of TD account. The adjoining option list displays the list of all the valid TD/RD account classes maintained in the system. You can choose the appropriate one.

Customer

Specify the customer number of the customer. The adjoining option list displays the list of all the valid customer numbers maintained in the system. You can choose the appropriate one.

Click 'OK' button to generate the report. Click 'Exit' to return to the Reports Browser.

8.11.1 Contents of the Report

The parameters specified while generating the report are printed at the beginning of the report. The contents of the report are discussed under the following heads:

Header of the report

The header of the report contains the following information:

| Field Name | Field Description |
|-----------------|-------------------------------------|
| Branch | Current Branch Code and branch Name |
| Branch Date | Current Branch Date |
| Run Date & Time | Current Run Date and Time |
| User ID | Operator generating the Report |
| Module | Module of the Report |
| Page No | Page No. of the Report |

Body of the report

The generated report will have the following information:

| Field Name | Field Description |
|------------------|---|
| Product Code | This indicates the product code and list TD accounts renewed under it |
| Product Title | This indicates the product title |
| Account Number | This indicates the TD account Number |
| Customer Name | This indicates the name of the customer |
| Customer Number | This indicates the customer number of the renewed TD |
| Deposit Currency | This indicates the currency of the deposited amount |

| | |
|--|---|
| TD Opened Date | This indicates the term deposit opened date |
| Value Date | This indicates the Value date of TD account |
| Interest rate | This displays the interest rate of the account |
| Deposit Amount | This indicates the Deposit Amount |
| Period of Deposit | This indicates the TD renewal Period |
| Due Date | This indicates the Maturity date or renewal of the TD account |
| Total Interest Pay | This indicates the Interest Amount (This will show interest amount on the maturity date) |
| Maturity Value | This displays the maturity amount as per new calculation |
| Interest Rate Based on Cumulative Amount | This indicates whether the interest rate for the deposit is arrived using cumulative amount or not. |

8.12 Term Deposits Account Maturity Report

This report lists the term deposits that will be matured for the given period. You can generate this report using 'TD Account Maturity Report' screen.

To invoke this screen, type 'TDRMATR' in the field at the top right corner of the Application tool bar and click on the adjoining arrow button.

Specify the following details here:

From Date

Enter the From date. This should be greater than the current application date

To Date

Enter the To date. This should be greater than the current application date

Branch Code

Specify the branch code of the TD account. The adjoining option list displays the list of all the valid TD/RD branch codes maintained in the system. You can choose the appropriate one.

Account Class

Specify the account class of TD account. The adjoining option list displays the list of all the valid TD/RD account classes maintained in the system. You can choose the appropriate one.

Customer

Specify the customer number of the customer. The adjoining option list displays the list of all the valid customer numbers maintained in the system. You can choose the appropriate one.

Click 'OK' button to generate the report. Click 'Exit' to return to the Reports Browser.

8.12.1 Contents of the Report

The parameters specified while generating the report are printed at the beginning of the report. The contents of the report are discussed under the following heads:

Header of the report

The header of the generated report will have the following information:

| Field Name | Field Description |
|-----------------|-------------------------------------|
| Branch | Current Branch Code and branch Name |
| Branch Date | Current Branch Date |
| Run Date & Time | Current Run Date and Time |
| User ID | Operator generating the Report |
| Module | Module of the Report |
| Page No | Page No. of the Report |

Body of the report

The generated report will have the following information:

| Field Name | Field Description |
|-----------------------------------|---|
| Account Number/ Deposit Number | This indicates the TD account Number |
| Customer Name | This indicates the Name of the TD account holder |
| Date of Open | This indicates the TD account opened date |
| Value Date | This indicates the Value Date of the TD account |
| Deposit Amount | This indicates the Deposit Amount |
| Maturity Date | This indicates the Maturity date of the TD account |
| Deposit Term | This indicates the TD Tenor (Maturity Date – Interest Start Date) |

| | |
|--|---|
| Total Interest Payable | This indicates the Interest Amount (This will show interest amount on the maturity date) |
| Goal Reference Number | This indicates the identification number of the goal provided by the external channels. |
| Interest rate | This displays the interest rate applicable for the account |
| Maturity Amount | This displays the maturity amount for the tenor of TD |
| Branch | This indicates the Branch Name |
| Product Code | This indicates the product code of the TD account |
| Product Currency | This indicates the Currency of the TD account class |
| Currency Total | This indicates the Currency-wise total for deposit amount, Interest Payable and Maturity Amount |
| Auto Rollover | Will indicate whether the TD is Auto Rollover or not |
| Stock Catalogue Code | This displays Stock Catalogue Code for the TD certificate number |
| Certificate Number | This indicates the certificate number |
| Duplicate issue | This indicates Y/N based on the duplicate certificate generation for TD account |
| Interest Rate Based on Cumulative Amount | This indicates whether the interest rate for the deposit is arrived using cumulative amount or not. |

8.13 Term Deposit Account Maturity Date Change Report

You can generate the TD account maturity date change report for term deposits that have the maturity date adjusted due to adhoc holiday change. You can generate this report using the 'Term Deposit Maturity Date Changed Due to Change in Holiday Calendar' screen.

You can invoke this screen by typing 'TDRMDCHG' in the field at the top-right corner of the Application tool bar and clicking the adjoining arrow button.

Term Deposit Maturity Date Changed due to Adhoc Change in Holiday Calendar

Branch Code _____ Branch Description _____

| Account Class | This indicates the account class |
| Generate Advice | Indicates whether the advice should be generated or not. |

8.15 TD Account Maturity Date not Adjusted Report

This report displays the list of term deposit for which the maturity date is not adjusted and falls on a holiday due to the following reasons:

- Blocks exist in the deposit account
- Breach in minimum tenor
- Breach in maximum tenor

You can generate this report using the 'Term Deposit Maturity Date Not Adjusted' screen. You can invoke this screen by typing 'TDRMNADJ' in the field at the top-right corner of the Application tool bar and clicking the adjoining arrow button.

The screenshot shows a software window titled "Main Screen" with a standard Windows-style title bar (minimize, maximize, close buttons). The window contains the following fields and controls:

- Branch Code**: Text input field.
- Customer**: Text input field.
- Deposit Account Number**: Text input field.
- From Date**: Text input field.
- Report Format**: Dropdown menu with "PDF" selected.
- Report Output**: Dropdown menu with "View" selected.
- Branch Description**: Text input field.
- Customer Name**: Text input field.
- To Date**: Text input field.
- Printer At**: Dropdown menu with "Client" selected.
- Printer**: Text input field.

At the bottom right of the window, there are two buttons: "Ok" and "Exit".

Specify the following details here:

From Date

Specify the date from which the report for TD account maturity date change should be generated. By default, system displays the current Application date.

To Date

Specify the date till which the report for TD account maturity date change should be generated. By default, system displays the current Application date.

Branch Code

Specify the branch code of the TD account. The adjoining option list displays all valid TD branch codes maintained in the system. You can choose the appropriate one.

Deposit Account Number

Specify the account number of the term deposit. The adjoining option list displays all valid deposit account numbers maintained in the system. You can choose the appropriate one.

Customer

Specify the customer number here. The adjoining option list displays all the valid customer numbers maintained in the system. You can choose the appropriate one.

Report Format

Select the format in which you want to report to be generated from the options provided in the drop-down list. This list displays the following values:

- PDF
- HTML
- Excel
- RTF

Report Output

Select the output for the report from the adjoining drop-down list. This list displays the following values:

- Print - Select this option if you wish to print the report
- View - Select this option if you wish to view the contents of the report
- Spool - Select this option if you wish to spool the report for further use

Printer At

Select the location where you want the report to be generated from the options provided in the adjoining drop-down list. This list displays the following values:

- Client
- Server

Printer

Specify the name of the printer or select it from the option list provided. The adjoining option list displays all the configured printers.

This is applicable only if you have specified the output as 'Print'.

Click the 'Ok' button to generate the report. Click 'Exit' to return to the Reports Browser.

8.15.1 Contents of the Report

The parameters specified while generating the report are printed at the beginning of the report. The contents of the report are discussed under the following heads:

Header of the report

The header of the generated report will have the following information:

| Field Name | Field Description |
|-------------------|---|
| Branch | Current Branch Code and branch Name |
| Branch Date | Current Branch Date |
| User ID | Operator generating the Report |
| Report From Date | Date from which the report is generated |

| | |
|----------------|---|
| Report To Date | Date till which the report is generated |
|----------------|---|

Body of the report

The generated report will have the following information:

| Field Name | Field Description |
|--------------------------|--|
| Customer ID | This indicates the customer ID |
| Customer Name | This indicates the customer name |
| Deposit Account Number | This indicates the deposit account number |
| Account Description | This indicates the account description |
| Account Branch | This indicates the account branch |
| Account Currency | This indicates the account currency |
| Deposit Amount | This indicates the deposit amount |
| Deposit Tenor | This indicates the deposit tenor |
| Deposit Maturity Date | This indicates the deposit maturity date |
| Account Open Date | This indicates the account opening date |
| Reason for not adjusting | This indicates one of the following reason for not adjusting the maturity date: <ul style="list-style-type: none"> • Block exists • Breach of minimum tenor • Breach of maximum tenor |

Note

You should manually take appropriate action If maturity date is not adjusted due to a block.

8.16 Customer-wise Tax Deduction Report

You can generate term deposit tax deduction EOD reports for specific customers. This report provides the details of the tax deducted at source for a customer for the term deposits. The system generates this report during beginning of day operations.

This report can be generated for a specific branch, as of the date of tax deduction.

8.16.1 Contents of the Report

The parameters specified while generating the report are printed at the beginning of the report. The report contains the following details:

Header

| Field Name | Field Description |
|-------------------|-------------------------------------|
| Branch | Current Branch Code and branch Name |
| Branch Date | Current Branch Date |
| Run Date & Time | Current Run Date and Time |
| User ID | Operator generating the Report |
| Module | Module of the Report |
| Page No | Page No. of the Report |

Body

| Field Name | Field Description |
|----------------------------------|----------------------------------|
| Customer ID | Customer number |
| Account Title | Account class description |
| Account No | TD account number |
| Account Currency | TD account currency |
| Tax Type | IC rule description |
| TDS Date | Tax deduction date |
| Interest in Account Currency | Interest in account currency |
| Tax Deducted in Account Currency | Tax deducted in account currency |
| Interest in Local Currency | Interest in local currency |
| Tax in Local Currency | Tax in local currency |

8.17 Term Deposits Exceeding Lien Limits Report

You can generate a report of term deposits exceeding the lien reports using 'Term Deposits Exceeding Lien Limit' screen. To invoke the screen, type 'STRLELMT' in the field at the top right corner of the application toolbar and click the adjoining arrow button.

The screenshot shows a window titled "Term Deposits exceeding Lien Limit". It contains the following fields and controls:

- Branch Code: [Text Field]
- Branch Name: [Text Field]
- Customer: [Text Field]
- Customer Name: [Text Field]
- Include Subordinates: [Yes] (dropdown)
- Report Format: [PDF] (dropdown)
- Report Output: [View] (dropdown)
- Printer At: [Client] (dropdown)
- Printer: [Text Field]
- Buttons: [Ok] [Exit]

Specify the following details:

Branch Code

Specify the branch code for which you are generating the report. The option list displays all valid branch codes available in the system. Choose the appropriate one.

Based on the branch code selected, the system displays the name of the branch.

Customer

Specify the CIF of the customer for whom the report is being generated. The option list displays all valid customer numbers that are applicable. Choose the appropriate one.

Based on the customer number, the system displays the name of the customer.

Include Subordinates

The relationship managers can generate the reports for the customers who are associated with their subordinate RMs. Choose one of the following options:

- Yes – Select this to include the customers assigned to your subordinate RMs.

Choose the appropriate one.

Once you have specified the details, click 'OK'. The system generates the report based on the parameters specified.

8.17.1 Contents of the Report

The parameters specified while generating the report are printed at the beginning of the report. The term deposit exceeding lien limit report contains the following details:

Header Elements

| Field Name | Field Description |
|-----------------|-------------------------------------|
| Branch | Current Branch Code and branch Name |
| Branch Date | Current Branch Date |
| Run Date & Time | Current Run Date and Time |
| User ID | Operator generating the Report |
| Module | Module of the Report |
| Page No | Page No. of the Report |

Body Elements

| Field Name | Field Description |
|------------------------|--|
| RM Id | Relationship Manager ID |
| Customer No | CIF Number |
| Customer Name | Customer Name |
| Deposit Amount | Deposit Amount |
| Deposit Term | Deposit Term in Days, Months and Years |
| Account Number | Account Number |
| Td Maturity Date | Maturity date of the TD |
| Total Interest Payable | Total Interest Payable |
| Maturity Amount | Maturity Amount |
| Lien Limit % | Lien Limit % at bank level |
| Lien % | Lien percentage utilized |
| Lien Amount | Lien Amount |
| Total Interest Payable | Total Interest Payable |
| Maturity Amount | Maturity Amount |

8.18 Unclaimed Deposits Transferred for a Day

You can generate a report for the unclaimed deposits transferred during a day. If you do the required maintenances and batch set up, you can generate the 'Unclaimed Deposits Transferred for a Day' report as part of EOD operations.

For further details on report parameter and batch maintenances, refer to the Reports User Manual.

8.18.1 Contents of the Report

The parameters specified while generating the report are printed at the beginning of the report. Other content displayed in the report is as follows:

Header

The following details are displayed in the header section:

| Field Name | Field Description |
|-------------------|-------------------------------------|
| Branch | Current Branch Code and branch Name |
| Branch Date | Current Branch Date |
| Run Date & Time | Current Run Date and Time |
| User ID | Operator generating the Report |
| Module | Module of the Report |
| Page No | Page No. of the Report |

Body of the Report

The following details are displayed as body of the generated report:

| Field Name | Field Description |
|-----------------------|---|
| Product Code | Indicates the product code |
| Product Title | Indicates the product title |
| Currency | Indicates the currency of the transaction |
| Account Number | Indicates the account number |
| Customer Name | Indicates the name of the customer |
| Deposit/Renewal Date | Indicates the deposit renewal date |
| Maturity Date | Indicates the maturity date |
| Grace Days | Indicates the grace days |
| Outstanding Principal | Indicates the outstanding principal |
| Outstanding Interest | Indicates the outstanding interest |

8.19 Term Deposits Topped-up During the Period

You can generate the Term Deposit Top-up report for TD accounts for which the top-up is made. This report can be generated for all branches or for specific branch for account. To

invoke the screen, type 'TDRTOPUP' in the field at the top right corner of the application toolbar and click the adjoining arrow button.

The screenshot shows a window titled "Term Deposits Topped-Up During the Period". It contains the following fields and controls:

- Branch Code:
- Branch Name:
- Account Number:
- From Date:
- Report Format:
- Report Output:
- Customer Number:
- Customer Name:
- To Date:
- Printer At:
- Printer:

At the bottom right, there are "Ok" and "Exit" buttons.

Specify the following:

Branch Code

Select the current branch code from the adjoining option list.

Branch Name

The branch name of the selected branch code is displayed here.

Account Number

Select the account number from the adjoining option list.

Customer Number

Select the customer number from the adjoining option list.

Customer Name

The customer name of the selected customer is displayed here.

From Date

Specify the date from which the report for topped-up TD account should be generated.

To Date

Specify the date till which the report for topped-up TD account should be generated.

Report Format

Select the format in which you want to report to be generated from the options provided in the drop-down list. This list displays the following values:

- PDF
- HTML
- Excel
- RTF

Report Output

Select the output for the report from the adjoining drop-down list. This list displays the following values:

- Print - Select this option if you wish to print the report
- View - Select this option if you wish to view the contents of the report
- Spool - Select this option if you wish to spool the report for further use

Printer At

Select the location where you want the report to be generated from the options provided in the adjoining drop-down list. This list displays the following values:

- Client
- Server

Printer

Specify the name of the printer or select it from the option list provided. The adjoining option list displays all the configured printers.

This is applicable only if you have specified the output as 'Print'.

Click the 'Ok' button to generate the report. Click 'Exit' to return to the Reports Browser.

8.19.1 Contents of the Report

The parameters specified while generating the report are printed at the beginning of the report. The report contains the following details:

Header

The following details are displayed in the header section:

| Field Name | Field Description |
|------------------|--|
| Customer Number | Customer for whom the TD is opened |
| Branch Code | Current Branch Code |
| Account Number | TD Account number for which top-up is made |
| Report from Date | The start date for generating the Report |
| Report to Date | The end date for generating the Report |

Body of the Report

The following details are displayed as body of the generated report:

| Field Name | Field Description |
|------------------------|---|
| Deposit Account Number | Indicates the TD Deposit account number |
| Account Description | Indicates the description of the TD Deposit account |
| Customer Number | Indicates the customer number |
| Account Open Date | Indicates the account opening date |
| Top-up Date | Indicates the top-up date of the account |
| Top-up Value Date | Indicates the value date of the TD top-up |
| Top-up Amount | Indicates the account opening date |
| Total Deposit Amount | Indicates the total deposit amount |

| | |
|-----------------|---|
| Interest Rate | Indicates the rate of interest |
| Maturity Date | Indicates the date of TD maturity |
| Maturity Amount | Indicates the TD amount on deposit maturity |

8.20 Ad-Hoc Combined Statement

You can generate ad-hoc combined statement through 'Ad-Hoc Combined Statement' screen. You can invoke this screen by typing 'STDCDSMT' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

Customer No

Select the customer number from the adjoining option list.

Customer Name

The system displays the customer name.

Statement ID

Select the statement ID from the adjoining option list.

Balance

You can select the balance to view based on the book date or value date.

Based on Date Range

From Date

Specify the from date for the combined statement generation.

To Date

Specify the to date for combined statement generation.

Print Options

You can print, view or spool the statement.

Apply Online Charges

Check this box to indicate that the charges needs to be applied to generate the ad-hoc account statement.

Send to Customer

Check this box to send the statement to the customer.

Processing Ad-Hoc Combined Statement

You can process the ad-hoc combined statement by doing the following:

- Select the customer for which ad-hoc account statement needs to be generated..
- Select the plan ID maintained for the customer.
- Specify the date range. If date range is not specified then the system generates report for the current date only.
- Check 'Send to Customer', if the statement should be sent to the customer. You can view, print or spool the message based on the option selected.
- If the 'Send to Customer' is not checked, then the generated statement can only be viewed, spooled or printed. The message will not be available in outgoing browser.
- Specify if charge needs to be applied on the statement generation. Applicable charges can be viewed in the charge sub screen, on click of the 'Charge' button. The actual accounting entries for the charge is processed only on the click of OK button of the Ad hoc screen. You can also waive off the charges applied.
- 'Reports' button is provided for processing the reports.
- Statement is generated for all the accounts maintained in the statement plan.

8.20.1 Charge Details

You can view, waive or modify the online charges computed for the generation of the combined statement through the Charges screen. You can invoke this screen by typing 'CSCONLEVT' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button or click 'Charges' on the 'Ad-Hoc Combined Statement' screen.

The screenshot shows a window titled "Charges" with a search bar at the top containing "Reference No" and "Charge Account". Below the search bar is a navigation bar with "1 Of 1" and a "Go" button. The main area is a table with the following columns: "Event Sequence Number", "Component", "Charge Description", "Amount", "Currency", and "Waived". The table is currently empty. At the bottom right of the window, there are "Ok" and "Exit" buttons.

The system displays the following details in the charges screen:

- Reference No
- Event Sequence Number
- Component
- Charge Account
- Account Description
- Amount
- Currency
- Waiver

Note

The following maintenances are necessary for the online charge calculation:

- Create an RT product.
 - Map the RT product to the ARC maintenance screen.
 - Maintain the combination in Online Charge Product Maintenance screen.
-

8.20.2 **Combined Statement Generation Report**

You can generate Combined Statement Report using 'Combined Statement Report' screen. You can invoke this screen by typing 'CSRCSTAD' in the field at the top right corner of the Application tool bar and clicking on the adjoining arrow button.

**Customer No**

The system displays the customer number.

Statement ID

The system displays the statement ID.

Contents of the Report

The parameters specified while generating the report are printed at the beginning of the report. Other content displayed in the report is as follows:

Header

The following details are displayed in the header section:

| Field Name | Field Description |
|---------------------------|---|
| Report Name | Indicates Report Name |
| Branch Code / Branch Name | Indicates Current Branch code and Branch Name |
| User ID | Indicates the Identification of the User |
| Branch Date | Indicates the date of Branch in which report is taken |
| Page No | Displays Page No out of total No of pages in report |
| Module | Indicates the Module of the Report |

| | |
|-------------------------|---|
| Report Run Date | Indicates Current System Date |
| Report Run Time | Indicates Current System Time |
| Customer Name | Indicates the name of the customer |
| Customer Address | Indicates the address of the customer |
| Account Summary Details | Indicates the summary details for CASA, TD and CL |

Body of the Report

The body of the report displays:

- Current And Savings Account Activity Summary
- Deposit Account Activity Summary
- Loan Accounts Activity Summary
- Detailed CASA Account Activity Statement
- Detailed Deposit Account Activity Statement
- Detailed Loan Accounts Activity Statement

For further details on combined statement refer section 'Maintaining Combined Statements' section in 'Generating Account Statements' chapter of 'CASA' user manual.

8.21 Term Deposit with User Modified Exchange Rate Report

You can generate a report that shows the details of all Term Deposits where the rate is modified by the user in the pay-out or pay-in grid. So all Term Deposits where Original and Applied Exchange Rate are different they are displayed in this Report. You can invoke this screen by typing 'TDRRTMOD' in the field at the top right corner of the application tool bar and clicking on the adjoining arrow button.

The screenshot shows a software window titled "Term Deposits with User modified Exchange Rate". The window contains a form with the following fields and controls:

- Branch Code:
- Customer:
- Deposit Account Number:
- From Date: (with a calendar icon)
- To Date: (with a calendar icon)
- Report Format: (with a dropdown arrow)
- Report Output: (with a dropdown arrow)
- Branch Description:
- Customer Name:
- Printer At: (with a dropdown arrow)
- Printer:

At the bottom right of the window, there are two buttons: "Ok" and "Exit".

Enter the following details:

Branch Code

Select branch code of the account number from the list of values.

Branch Description

The description of the branch based on the branch code you select.

Customer

Select the customer from the list of values. The list displays all the valid customer numbers maintained in the system.

Customer Name

The customer's name based on the account number you select.

Deposit Account Number

Select the customer's account number from the list of values.

From Date

Select the start date using the calendar.

To Date

Select the end date using the calendar.

Report Format

Select the format in which you want to report to be generated from the options provided in the drop-down list. This list displays the following values:

- PDF
- HTML
- Excel
- Excel (*.xlsx)
- RTF

Report Output

Select the output for the report from the adjoining drop-down list. This list displays the following values:

- Print - Select this option if you wish to print the report
- View - Select this option if you wish to view the contents of the report
- Spool - Select this option if you wish to spool the report for further use

Printer At

Select the location where you want the report to be generated from the options provided in the adjoining drop-down list. This list displays the following values:

- Client
- Server

Printer

Enter the name of the printer or select it from the option list provided. The adjoining option list displays all the configured printers.

This is applicable only if you have specified the output as 'Print'.

Click the 'Ok' button to generate the report. Click 'Exit' to return to the Reports Browser.

8.21.1 Contents of the Report

The parameters specified while generating the report are printed at the beginning of the report. The report contains the following details:

Header

The following details are displayed in the header section:

| Field Name | Field Description |
|------------------------|---|
| Customer ID | The customer ID for whom the TD is opened |
| Account Branch | The account branch |
| Deposit Account Number | The TD account number for which the rate is modified. |
| Report from Date | The start date for generating the report |
| Report to Date | The end date of the report |

Body of the Report

The following details are displayed as body of the generated report:

| Field Name | Field Description |
|--------------------------|---|
| Branch | The TD account branch. |
| Customer ID | The ID of the customer for whom the rates are modified. |
| Customer Name | The name of the customer for whom the rates are modified. |
| Deposit Account Number | The TD Deposit account number |
| Account Description | The description of the TD Deposit account |
| Deposit Account Currency | The currency of the TD account. |
| Pay IN (I)/OUT (O) | The mode used for the user defined rates. |
| Offset Account | The offset account number. |
| Offset Currency | The cuurrency of the offset account |
| Offset Amount | The amount paid for the TD account, in the offset account currency. |
| Original Exchange Rate | The FX rate picked up by the system. |
| Applied Excahng Rate | The FX rate entered by the user. |
| Variance | The difference between the Original and Applied Exchange rates. |
| Transaction Date | The date of transaction. |
| Maturity Date | The date of the TD maturity. |

9. Annexure A - Accounting Entries

9.1 Accounting Entries and Advices for TD

This Annexure lists the suggested event-wise accounting entries that can be set up, for the Interest and Charge product applicable for the TD module of Oracle FLEXCUBE.

This chapter contains the following sections:

- [Section 9.1, "Accounting Entries and Advices for TD"](#)
- [Section 9.2, "Events"](#)
- [Section 9.3, "Amount Tags"](#)
- [Section 9.4, "Accounting Roles"](#)
- [Section 9.5, "TD Advices"](#)
- [Section 9.6, "Event-wise Accounting Entries for Products"](#)

9.2 Events

You need to set up the following events at the IC product for Deposit accounts:

| Event Code | Event Description |
|------------|-----------------------------|
| DEBK | Deposit Booking |
| IACR | Interest Accruals |
| ILIQ | Interest Liquidation |
| IMAT | Interest Maturity |
| ROLL | Discounted Deposit Rollover |

9.3 Amount Tags

The following amount tags are available:

| Amount Tags | Description |
|-------------|----------------------------------|
| IACQUIRED | Acquired Interest Amount |
| IACR | Interest Accrual |
| IACR_ADJ | Interest Accrual Adjustments |
| ILIQ | Interest Liquidation Amount |
| ILIQ_ADJ | Interest Liquidation Adjustments |
| IMAT | Interest Maturity |
| PMAT | Principal Maturity |
| TAX | Tax |

| | |
|----------|--------------------------|
| TAX_ADJ | Tax Adjustment |
| TD-PRINC | Deposit Principal Amount |
| TD_INT | Advance Interest Paid |

9.4 Accounting Roles

Accounting roles are automatically defaulted by Oracle FLEXCUBE based on the IC Rule attached to the particular IC product. An accounting role could be accrual, P/L or tax payment. For creation of role type, standard abbreviations are used across Oracle FLEXCUBE.

The accounting role is created in the following format – 'TDAA-<accounting role type>-<X>

Where:

- TDAA represents the IC product.
- X represents the number of the formula for which the accounting role is created.

If you have maintained more than one formula for a rule, the system will default accounting roles for each of your formulae.

For example, assume that the accounting role is 'TDAB-ACCR-1'.

This role indicates the following:

- The IC product is 'TDAB'
- The formula number is '1'. (for example credit interest accrual which was defined in formula 1)

Assume that the accounting role is 'TDAB-PNL-2'

This role indicates the following:

- The IC product is 'TDAB'

The formula number is '2'. (for example debit interest posting against income GL defined for formula 2)

You should select the appropriate accounting role on the 'Role to Head Mapping' screen for every product.

'TDAA-BOOK-X' represents the settlement account where the amount is credited or debited against P/L account. This role cannot be attached to any GL on the 'Role to Head Mapping' screen. It is used while maintaining event-wise accounting entries.

Sample accounting role for IC Rule ID like AP01 are given below:

- AP01-ACCR-1
- AP01-ACQUIRED-1
- AP01-ACR_ADJ-1
- AP01-BOOK-1
- AP01-BOOK-2
- AP01-BOOK-3
- AP01-PNL_ADJ-1
- AP01-PNL_ADJ-2

- AP01-PNL-1
- AP01-PNL-2
- AP01-TPBL_ADJ-3
- AP01-TPBL-3
- AP02-ACCR-1
- AP02-ACQUIRED-1
- AP02-ACR_ADJ-1
- AP02-BOOK-1
- AP02-BOOK-2
- AP02-BOOK-3
- AP02-PNL_ADJ-1
- AP02-PNL_ADJ-2
- AP02-PNL-1
- AP02-PNL-2
- AP02-TPBL_ADJ-3
- AP02-TPBL-3
- INT-BOOK
- INT-LIQD
- PRINC-BOOK
- PRINC-LIQD
- RC02-ACCR-1
- RC02-ACQUIRED-1
- RC02-ACR_ADJ-1
- RC02-BOOK-1
- RC02-BOOK-2
- RC02-BOOK-3
- RC02-PNL_ADJ-1
- RC02-PNL_ADJ-2
- RC02-PNL-1
- RC02-PNL-2
- RC02-TPBL_ADJ-3
- RC02-TPBL-3
- TDACCOUNT
- TDOFFSE0054
- TDRD-ACCR-1
- TDRD-ACQUIRED-1
- TDRD-ACR_ADJ-1
- TDRD-BOOK-1
- TDRD-BOOK-2
- TDRD-BOOK-3
- TDRD-PNL_ADJ-1
- TDRD-PNL_ADJ-2
- TDRD-PNL-1
- TDRD-PNL-2

- TDRD-TPBL_ADJ-3
- TDRD-TPBL-3
- INT_UNCLAIMED
- MAT_UNCLAIMED
- PRN_UNCLAIMED

9.5 TD Advices

The following list contains details of the advices that are applicable to the TDs you can process at your bank.

This section contains the following topics:

- [Section 9.5.1, "TD Top-up Advices"](#)
- [Section 9.5.2, "TD Maturity Date Change Advices"](#)
- [Section 9.5.3, "Redemption Advices"](#)
- [Section 9.5.4, "Rollover Advices"](#)
- [Section 9.5.5, "TD Advices"](#)
- [Section 9.5.6, "TD Renewal Simulation Advice"](#)
- [Section 9.5.7, "TD Top Up Simulation Advice"](#)
- [Section 9.5.8, "TD Redemption Simulation Advice"](#)

9.5.1 TD Top-up Advices

The following advices are sent to customers whenever there is a top-up on existing TDs:

| Tag | Description |
|--------------|-------------------------------------|
| _BRANCH_ | Code of the branch where TD is held |
| _BRANCHNAME_ | Name of the branch where TD is held |
| _BRNADD1_ | Branch address line 1 |
| _BRNADD2_ | Branch address line 2 |
| _BRNADD3_ | Branch address line 3 |
| _TDACCNO_ | TD Account Number |
| _CUSTID_ | CIF ID |
| _CUSTNAME_ | Customer name |
| _ADD1_ | Customer address line 1 |
| _ADD2_ | Customer address line 2 |
| _ADD3_ | Customer address line 3 |
| _ADD4_ | Customer address line 4 |
| _CCY_ | Currency of Term Deposit |
| _AMT_ | Term deposit amount |

| | |
|--------------|--|
| _VALDATE_ | Value Date of Top-up |
| _TOPAMT_ | Top-up Amount |
| _TOTAMT_ | Total amount of the deposit = Amount + Top-up amount |
| _NEWINTRATE_ | New Interest Rate after Top-up |
| _MATDATE_ | Maturity Date |
| _INTCUM | Interest Rate Based on Cumulative Amount |
| _BASEAMT_ | Base Amount for Arriving at Interest Rate |

The advice TD_TOPUP is generated on authorization of top-up.

9.5.2 **TD Maturity Date Change Advices**

The TD maturity date change advice, TD_MAT_ADJ, is generated if there is any adhoc change in the holiday calendar.

| Tag | Description |
|-----------------|---|
| _BRANCH_ | Code of the branch where TD is held |
| _BRANCHNAME_ | Name of the branch where TD is held |
| _BRNADD1_ | Branch address line 1 |
| _BRNADD2_ | Branch address line 2 |
| _BRNADD3_ | Branch address line 3 |
| _REF_ | TD Account Number |
| _CUSTID_ | CIF ID |
| _CUSTNAME_ | Customer name |
| _ADD1_ | Customer address line 1 |
| _ADD2_ | Customer address line 2 |
| _ADD3_ | Customer address line 3 |
| _ADD4_ | Customer address line 4 |
| _CCY_ | Currency of Term Deposit |
| _AMT_ | Term deposit amount |
| _DEPTTENOR_ | Term Deposit Tenor |
| _ORGDEPTENOR_ | Original tenor of deposit before holiday adjustment |
| __DEPTTENORADJ_ | Value 'Y' if tenor is adjusted due to holiday, else NULL. |

| Tag | Description |
|--------------|--|
| _MATDATE_ | Maturity Date |
| _ORGMATDATE_ | Original maturity date of deposit before holiday adjustment |
| _MATADJ_ | Value 'Y' if Maturity Date Adjusted due to holiday, else NULL. |
| _MATHOL_ | Value 'Y' if maturity date is falling on a holiday, else NULL. |

9.5.3 Redemption Advices

This redemption advice will be generated only for term deposits with option 'Redemption Advice Required' checked at the product level. A message type 'TD_REDM' will be used:

| Tag | Description |
|-----------------|--|
| _BRANCH_ | Branch code of the term deposit |
| _REF_ | TD account number |
| _BRANCHNAME_ | Branch name where term deposit is held |
| _BRNADD1_ | Branch address line 1 |
| _BRNADD2_ | Branch address line 2 |
| _BRNADD3_ | Branch address line 3 |
| _CUSTID_ | CIF ID |
| _CUSTNAME_ | Customer name |
| _ADD1_ | Customer address line 1 |
| _ADD2_ | Customer address line 2 |
| _ADD2_ | Customer address line 3 |
| _ADD4_ | Customer address line 4 |
| _CCY_ | Currency of Term Deposit |
| _AMT_ | Term deposit amount |
| _TOTREDMAMT_ | Total Redemption amount |
| _MATDATE_ | Maturity Date |
| _REDMDATE_ | Redemption date |
| _REDMBRANCH_ | Redemption account branch |
| _REDMACCOUNT_ | Redemption account to |
| _REDMNARRATIVE_ | Redemption narrative |

| | |
|-----------------|---|
| _PAYOUTTYPE_ | Pay out Type |
| _PAYOUTPERCNT_ | Payout Percentage |
| _PAYOUTREDMAMT_ | Payout Redemption amount |
| _PENALTYDET_ | Penalty details |
| _MAKERID_ | Teller name |
| _TXNDATETIME_ | Transaction date & time |
| _CERTNO_ | Certificate numbers getting redeemed |
| _NOCERT_ | Total number of certificates getting redeemed |
| _INTCUM | Interest Rate Based on Cumulative Amount |
| _BASEAMT_ | Base Amount for Arriving at Interest Rate |

9.5.4 Rollover Advices

This rollover advice will be generated only for term deposits during rollover. A message type 'TD_ROLL' will be used:

| Tag | Description |
|--------------|-----------------------------|
| _BRANCHNAME_ | Branch Name |
| _BRNADD1_ | Branch address line 1 |
| _BRNADD2_ | Branch address line 2 |
| _BRNADD3_ | Branch address line 3 |
| _TDATE_ | Rollover date |
| _REF_ | Advice Reference |
| _CUSTNAME_ | Customer name |
| _ADD1_ | Customer address line 1 |
| _ADD2_ | Customer address line 2 |
| _ADD2_ | Customer address line 3 |
| _ADD4_ | Customer address line 4 |
| _TDACNO_ | Term deposit account number |
| _AMT_ | Rollover amount |
| _CCY_ | Term deposit currency |
| _DEPTTENOR_ | Term deposit tenor |
| _MATDATE_ | Maturity date |

| | |
|--------------|---|
| _MATAMT_ | Maturity amount |
| _INTRATE_ | Interest rate |
| _INTAMT_ | Projected Interest amount |
| _TDROLLTYPE_ | Rollover type |
| _BLOCKEDAMT_ | Blocked/Lien amount |
| _TAXAMT_ | Tax Amount |
| _TAXRATE_ | Tax Rate |
| _INTCUM | Interest Rate Based on Cumulative Amount |
| _BASEAMT_ | Base Amount for Arriving at Interest Rate |

9.5.5 TD Advices

This advice will be generated for original and duplicate advice for Term Deposit. A message type 'ICCOD' will be used. The tag 'DUPLICATE' will be displayed only in case of duplicate advice generated:

| Tag | Description |
|--------------|--|
| _BRANCH_ | Code of the branch where Account is to be held |
| _BRNAME_ | Branch Name |
| _BRNADD1_ | Branch address line 1 |
| _BRNADD2_ | Branch address line 2 |
| _BRNADD3_ | Branch address line 3 |
| _AClass_ | Account Class |
| _AClassDEC_ | Account class description |
| _CUSTID_ | CIF ID |
| _TDATE_ | Rollover date |
| _REF_ | Advice Reference |
| _CUSTNAME_ | Customer name |
| _ADD1_ | Customer address line 1 |
| _ADD2_ | Customer address line 2 |
| _ADD2_ | Customer address line 3 |
| _ADD4_ | Customer address line 4 |
| _TERMDEPAMT_ | Amount of Term Deposit |
| _TDACNO_ | Term deposit account number |

| Tag | Description |
|---------------|---|
| _VDATE_ | Opening date |
| _AMT_ | Rollover amount |
| _CCY_ | Term deposit currency |
| _XRATE_ | Applicable Rate |
| _INTAMT_ | Interest Amount |
| _SPLCCY_ | Interest Amount currency |
| _INTAMTWORD_ | Interest Amount in words |
| _TAXAMT | Tax Amount |
| _TAXCCY | Tax Amount Currency |
| _SPLCCY_ | Tax collected amount currency |
| _TAXAMTWORD | Tax Amount in words |
| _DEPTTENOR_ | Term deposit tenor |
| _MATDATE_ | Maturity date |
| _MATAMT_ | Maturity amount |
| _MATAMTWORDS_ | Tax Amount in words |
| _CCY_ | Maturity amount currency |
| _MDATE_ | Maturity Date |
| _TDATE_ | TD Booking date |
| _INTRATE_ | Interest rate |
| _DUPLICATE_ | Duplicate Certificate |
| _USERNAME_ | User Name who has generated the advice |
| _INTCUM | Interest Rate Based on Cumulative Amount |
| _BASEAMT_ | Base Amount for Arriving at Interest Rate |

For denominated certificates the following tags are available for ICCOD advice:

| Tag | Description |
|-------------|---------------------------------------|
| _CDENOID_ | Denomination id of the certificate |
| _CDENOVAL_ | Denomination of the certificate |
| _CDENOUNIT_ | The unit of denomination |
| _CSTATUS_ | The current status of the certificate |

9.5.5.1 ICCOD_SIM

This advice will be generated for original and duplicate advice for Term Deposit Simulation.

| Advice Tag | Description |
|-------------------|--|
| _BRANCH_ | Code of the branch where Account is to be held |
| _BRNAME_ | Name of the branch where Account is to be held |
| _BRADDR1_ | Branch address line 1 |
| _BRADDR2_ | Branch address line 2 |
| _BRADDR3_ | Branch address line 3 |
| _AClass_ | Account Class |
| _AClassDEC | Account Class Description |
| _CUSTID_ | CIF ID |
| _CUSTNAME_ | Customer name |
| _ADD1_ | Customer address 1 |
| _ADD2_ | Customer address 2 |
| _ADD3_ | Customer address 3 |
| _ADD4_ | Customer address 4 |
| _TERMDE-PAMT_ | Amount of Term Deposit |
| _TENORY_ | Tenor - Term in years |
| _TENORM_ | Tenor - Term in months |
| _TENORD_ | Tenor - Term in days |
| _VDATE_ | Opening date |
| _CCY_ | Currency |
| _XRATE_ | Applicable Rate |
| _APY_ | Annual Percentage yield |
| _INTAMT_ | Interest Amount |
| _SPLCCY_ | Interest Amount currency |
| _INTAM-TWORD_ | Interest Amount in words |
| _TAXAMT | Tax Amount |
| _SPLCCY | Tax Amount Currency |

| | |
|----------------|---|
| _TAXAM-TWORD | Tax Amount in words |
| _MATAMT_ | Maturity Amount |
| _MATAMTWO RDS_ | Maturity Amount in words |
| _CCY_ | Maturity Amount currency |
| _MDATE_ | Maturity Date |
| _TDATE_ | TD Booking date |
| _INTCUM | Interest Rate Based on Cumulative Amount |
| _BASEAMT_ | Base Amount for Arriving at Interest Rate |

9.5.6 TD Renewal Simulation Advice

This advice will be generated for renewal and simulation of term deposit. A message type 'TD_REN_SIM' will be used.

| Advice Tag | Description |
|---------------|--|
| _BRANCH_ | Code of the branch where Account is to be held |
| _BRNAME_ | Name of the branch where Account is to be held |
| _ BRADDR1_ | Branch address line 1 |
| _ BRADDR2_ | Branch address line 2 |
| _ BRADDR3_ | Branch address line 3 |
| _ACCLASS_ | Account Class |
| _ACCLASSNAME_ | Account Class Name |
| _CUSTID_ | CIF ID |
| _CUSTNAME_ | Customer name |
| _ADD1_ | Customer address 1 |
| _ADD2_ | Customer address 2 |
| _ADD3_ | Customer address 3 |
| _ADD4_ | Customer address 4 |
| _TERMDEPAMT_ | Account Balance |
| _TDACNO_ | Term Deposit Account Number |
| _VDATE_ | Opening date |
| _CCY_ | Currency |
| _XRATE_ | Applicable Rate |

| Advice Tag | Description |
|-----------------------|---|
| _SPLAMT1_ | Interest Amount |
| _SPLCCY_ | Interest Amount currency |
| _SPLAMTWORD1_ | Interest Amount in words |
| _MATAMT_ | Maturity Amount |
| _MATAMTWORDS_ | Maturity Amount in words |
| _CCY_ | Maturity amount currency |
| _MDATE_ | Maturity Date |
| _INTPAIDOUT_ | Interest paid out as on simulation date |
| _SPLCCY | Interest paid amount currency |
| _INTPAIDOUTWORD_ | Interest paid out amount in words |
| _TAXCOLL_ | Amount of tax collected as till date. |
| _SPLCCY | Tax collected amount currency |
| _TAXAMTWORDS_ | Tax amount in words |
| _TDATE_ | TD Booking date |
| _RENTYPE_ | Type of rollover |
| _TENORY_ | Rollover term in years |
| _TENORM_ | Rollover term in months |
| _TENORD_ | Rollover term in days |
| _TERMDEPAMT_ | Amount of Term Deposit for rollover |
| _TERMDE- PAMTWORD_ | Term deposit amount in words |
| _MDATE1_ | Maturity Date |
| _XRATE1_ | Applicable Rate |
| _APY_ | Annual Percentage yield |
| _SPLAMT_ | Interest Amount |
| _SPLCCY_ | Interest Amount currency |
| _SPLAMTWORD | Interest amount in words |
| _TAXAMT_ | Tax Amount |
| _SPLCCY_ | Tax Amount currency |
| _STAXAMTWORD_ | Tax Amount in words |
| _MATAMT1_ | Maturity Amount |

| Advice Tag | Description |
|----------------|--|
| _MATAMTWORDS1_ | Maturity Amount in words |
| _CCY_ | Maturity amount currency |
| _INTCUM | Interest Rate Based on Cumulative Amount |
| _BASEAMT_ | Base Amount for Arriving the Interest |

9.5.7 TD Top Up Simulation Advice

This advice will be generated for simulation of TD top up. A message type 'TD_TOP_SIM' will be used.

| Advice Tag | Description |
|---------------|--|
| _BRANCH_ | Code of the branch where Account is to be held |
| _BRNAME_ | Name of the branch where Account is to be held |
| _BRADDR1_ | Branch address line 1 |
| _BRADDR2_ | Branch address line 2 |
| _BRADDR3_ | Branch address line 3 |
| _ACCLASS_ | Account Class |
| _ACCLASSNAME_ | Account Class Name |
| _CUSTID_ | CIF ID |
| _CUSTNAME_ | Customer name |
| _ADD1_ | Customer address 1 |
| _ADD2_ | Customer address 2 |
| _ADD3_ | Customer address 3 |
| _ADD4_ | Customer address 4 |
| _TERMDEPAMT_ | Amount of Term Deposit |
| -TERMDEPAC_ | Term Deposit Account Number |
| _TENORY_ | Tenor - Term in years |
| _TENORM_ | Tenor - Term in months |
| _TENORD_ | Tenor - Term in days |
| _VDATE_ | Opening date |
| _CCY_ | Currency |
| _XRATE_ | Applicable Rate |
| _APY_ | Annual Percentage yield |

| Advice Tag | Description |
|--------------------------|---|
| _SPLAMT_ | Interest Amount |
| _SPLCCY_ | Interest Amount currency |
| _SPLAMTWORD_ | Interest Amount in words |
| _MATAMT_ | Maturity Amount |
| _MATAMTWORDS_ | Maturity Amount in words |
| _CCY_ | Maturity amount currency |
| _MDATE_ | Maturity Date |
| _INTPAIDOUT_ | Interest paid out as on simulation date |
| _INTPAIDOUTWORD_ | Interest paid out amount in words |
| _TAXCOLL_ | Amount of tax collected as on top up date |
| _SPLCCY_ | Tax Amount currency |
| _TAXAMTWORDS_ | Tax amount in words |
| _TDATE_ | TD Booking date |
| _TOPUPDATE_ | Date of top up |
| _TOPUPAMT_ | Amount of top up |
| _CCY_ | Top up Currency |
| _TOPUPAMTWORD_ | Top up amount in words |
| _BALTERMDEPAMT_ | Amount of Term Deposit after top up |
| _BALTERMDE- PAMTWORD_ | Term deposit amount in words |
| _XRATE_ | Applicable Rate |
| _APY_ | Annual Percentage yield |
| _NEWINTAMT_ | Interest Amount |
| _SPLCCY_ | Interest Amount currency |
| _NEWINTAMTWORD | Interest Amount in words |
| _TAXAMT | Tax Amount |
| _SPLCCY_ | Tax Amount Currency |
| _TAXAMTWORDS_ | Tax Amount in words |
| _NEWMATAMT_ | Maturity Amount |
| _NEWMATAMTWORDS_ | Maturity Amount in words |
| _CCY_ | Maturity amount currency |

| Advice Tag | Description |
|-------------------|---|
| _INTCUM_ | Interest Rate Based on Cumulative Amount |
| _BASEAMT_ | Base Amount for Arriving at Interest Rate |

9.5.8 **TD Redemption Simulation Advice**

This advice will be generated for simulation of TD redemption. A message type 'TD_RED_SIM' will be used.

| Advice Tag | Description |
|-------------------|--|
| _BRANCHCODE_ | Code of the branch where Account is to be held |
| _BRNAME_ | Name of the branch where Account is to be held |
| _BRADDR1_ | Branch address line 1 |
| _BRADDR2_ | Branch address line 2 |

9.6 **Event-wise Accounting Entries for Products**

You can set up various IC products for handling TDs.

This section contains the following topics:

- [Section 9.6.1, "TD with Capitalization"](#)
- [Section 9.6.2, "Normal TD with Simple Interest"](#)
- [Section 9.6.3, "TD with Rate Chart Allowed"](#)
- [Section 9.6.4, "Recurring Deposit Scheme"](#)
- [Section 9.6.5, "Discounted Deposits"](#)

9.6.1 **TD with Capitalization**

You can set up event-wise accounting entries and advices for the product as suggested below. Accounting roles are for sample rule ID AP01.

9.6.1.1 DEBK: Book

Accounting Entries

| Accounting Role | Amount Tag | Dr/Cr Indicator |
|-----------------|------------|-----------------|
| TDACCOUNT | TD-PRINC | Credit |
| TDOFFSET | TD-PRINC | Debit |

9.6.1.2 IACR: Interest Accrual

Accounting Entries

| Accounting Role | Amount Tag | Dr/Cr Indicator |
|-----------------|------------|-----------------|
| AP01-PNL_ADJ-1 | IACR_ADJ | Debit |
| AP01-ACR_ADJ-1 | IACR_ADJ | Credit |
| AP01-PNL-1 | IACR | Debit |
| AP01-ACCR-1 | IACR | Credit |

9.6.1.3 ILIQ: Interest Liquidation

Accounting Entries

| Accounting Role | Amount Tag | Dr/Cr Indicator |
|-----------------|------------|-----------------|
| AP01-ACCR-1 | ILIQ | Debit |
| AP01-PNL_ADJ-2 | IACQUIRED | Credit |
| AP01-BOOK-2 | IACQUIRED | Debit |
| AP01-BOOK-1 | IACQUIRED | Credit |
| AP01-ACQUIRED-1 | IACQUIRED | Debit |
| AP01-BOOK-1 | ILIQ | Credit |
| AP01-BOOK-3 | TAX_ADJ | Debit |
| AP01-TPBL-3 | TAX | Credit |
| AP01-BOOK-3 | TAX | Debit |
| AP01-PNL-2 | ILIQ | Credit |
| AP01-BOOK-2 | ILIQ | Debit |
| AP01-TPBL_ADJ-3 | TAX_ADJ | Credit |

9.6.1.4 **IMAT: Interest Maturity**

Accounting Entries

| Accounting Role | Amount Tag | Dr/Cr Indicator |
|------------------------|-------------------|------------------------|
| INT-LIQD | IMAT | Debit |
| INT-BOOK | IMAT | Credit |
| PRINC-LIQD | PMAT | Debit |
| PRINC-BOOK | PMAT | Credit |

Note

You need to maintain entries for each of your booking type formulae otherwise the system will not be able to process IC.

Tax entries are mandatory if tax parameters are maintained for your rule. When you don't maintain tax through the Tax sub-system, but instead you maintain it as a debit type interest component, you should use the common accounting roles and amount tags.

9.6.2 **Normal TD with Simple Interest**

You can set up event-wise accounting entries and advices for the product as suggested below. Sample accounting entries for IC Product with Rule ID AP02 are given below.

9.6.2.1 DEBK: Book

Accounting Entries

| Accounting Role | Amount Tag | Dr/Cr Indicator |
|-----------------|------------|-----------------|
| TDACCOUNT | TD-PRINC | Credit |
| TDOFFSET | TD-PRINC | Debit |

9.6.2.2 IACR: Interest Accrual

Accounting Entries

| Accounting Role | Amount Tag | Dr/Cr Indicator |
|-----------------|------------|-----------------|
| AP02-PNL-1 | IACR | Debit |
| AP02-ACCR-1 | IACR | Credit |
| AP02-PNL_ADJ-1 | IACR_ADJ | Debit |
| AP02-ACR_ADJ-1 | IACR_ADJ | Credit |

9.6.2.3 ILIQ: Interest Liquidation

Accounting Entries

| Accounting Role | Amount Tag | Dr/Cr Indicator |
|-----------------|------------|-----------------|
| AP02-ACCR-1 | ILIQ | Debit |
| AP02-PNL_ADJ-2 | IACQUIRED | Credit |
| AP02-BOOK-2 | IACQUIRED | Debit |
| AP02-BOOK-1 | IACQUIRED | Credit |
| AP02-ACQUIRED-1 | IACQUIRED | Debit |
| AP02-BOOK-1 | ILIQ | Credit |
| AP02-BOOK-3 | TAX_ADJ | Debit |
| AP02-TPBL-3 | TAX | Credit |
| AP02-BOOK-3 | TAX | Debit |
| AP02-PNL-2 | ILIQ | Credit |
| AP02-BOOK-2 | ILIQ | Debit |
| AP02-TPBL_ADJ-3 | TAX_ADJ | Credit |

9.6.2.4 **IMAT: Interest Maturity**

Accounting Entries

| Accounting Role | Amount Tag | Dr/Cr Indicator |
|------------------------|-------------------|------------------------|
| INT-LIQD | IMAT | Debit |
| INT-BOOK | IMAT | Credit |
| PRINC-LIQD | PMAT | Debit |
| PRINC-BOOK | PMAT | Credit |

9.6.3 **TD with Rate Chart Allowed**

You can set up event-wise accounting entries and advices for the product as suggested below. Sample accounting entries for IC Product with Rule ID RC02 are given below.

9.6.3.1 **DEBK: Book**

Accounting Entries

| Accounting Role | Amount Tag | Dr/Cr Indicator |
|-----------------|------------|-----------------|
| TDACCOUNT | TD-PRINC | Credit |
| TDOFFSET | TD-PRINC | Debit |

9.6.3.2 **IACR: Interest Accrual**

Accounting Entries

| Accounting Role | Amount Tag | Dr/Cr Indicator |
|-----------------|------------|-----------------|
| RC02-PNL-1 | IACR | Debit |
| RC02-ACCR-1 | IACR | Credit |
| RC02-PNL_ADJ-1 | IACR_ADJ | Debit |
| RC02-ACR_ADJ-1 | IACR_ADJ | Credit |

9.6.3.3 **ILIQ: Interest Liquidation**

Accounting Entries

| Accounting Role | Amount Tag | Dr/Cr Indicator |
|-----------------|------------|-----------------|
| RC02-BOOK-2 | ILIQ | Debit |
| RC02-BOOK-1 | IACQUIRED | Credit |
| RC02-ACQUIRED-1 | IACQUIRED | Debit |
| RC02-BOOK-2 | IACQUIRED | Credit |
| RC02-PNL_ADJ-2 | IACQUIRED | Debit |
| RC02-PNL-2 | ILIQ | Credit |
| RC02-BOOK-3 | TAX_ADJ | Debit |
| RC02-BOOK-3 | TAX | Credit |
| RC02-TPBL_ADJ-3 | TAX_ADJ | Debit |
| RC02-BOOK-1 | ILIQ | Credit |
| RC02-ACCR-1 | ILIQ | Debit |
| RC02-TPBL-3 | TAX | Credit |

9.6.3.4 **IMAT: Interest Maturity**

Accounting Entries

| Accounting Role | Amount Tag | Dr/Cr Indicator |
|-----------------|------------|-----------------|
| INT-LIQD | IMAT | Debit |
| INT-BOOK | IMAT | Credit |

| | | |
|------------|------|--------|
| PRINC-LIQD | PMAT | Debit |
| PRINC-BOOK | PMAT | Credit |

9.6.4 Recurring Deposit Scheme

You can set up event-wise accounting entries and advices for the product as suggested below. Sample accounting entries for IC Product with Rule ID TDRD are given below.

9.6.4.1 **DEBK: Book**

Accounting Entries

| Accounting Role | Amount Tag | Dr/Cr Indicator |
|-----------------|------------|-----------------|
| TDACCOUNT | TD-PRINC | Credit |
| TDOFFSET | TD-PRINC | Debit |

9.6.4.2 **IACR: Interest Accrual**

Accounting Entries

| Accounting Role | Amount Tag | Dr/Cr Indicator |
|-----------------|------------|-----------------|
| TDRD-ACR_ADJ-1 | IACR_ADJ | Credit |
| TDRD-PNL_ADJ-1 | IACR_ADJ | Debit |
| TDRD-ACCR-1 | IACR | Credit |
| TDRD-PNL-1 | IACR | Debit |

9.6.4.3 **ILIQ: Interest Liquidation**

Accounting Entries

| Accounting Role | Amount Tag | Dr/Cr Indicator |
|-----------------|------------|-----------------|
| TDRD-BOOK-2 | ILIQ | Debit |
| TDRD-BOOK-1 | IACQUIRED | Credit |
| TDRD-ACQUIRED-1 | IACQUIRED | Debit |
| TDRD-PNL_ADJ-2 | IACQUIRED | Credit |
| TDRD-BOOK-2 | IACQUIRED | Debit |
| TDRD-PNL-2 | ILIQ | Credit |
| TDRD-BOOK-3 | TAX_ADJ | Debit |
| TDRD-TPBL-3 | TAX | Credit |
| TDRD-BOOK-3 | TAX | Debit |
| TDRD-BOOK-1 | ILIQ | Credit |
| TDRD-ACCR-1 | ILIQ | Debit |
| TDRD-TPBL_ADJ-3 | TAX_ADJ | Credit |

9.6.4.4 **IMAT: Interest Maturity**

Accounting Entries

| Accounting Role | Amount Tag | Dr/Cr Indicator |
|-----------------|------------|-----------------|
| INT-LIQD | IMAT | Debit |
| INT-BOOK | IMAT | Credit |

| | | |
|------------|------|--------|
| PRINC-LIQD | PMAT | Debit |
| PRINC-BOOK | PMAT | Credit |

9.6.5 **Discounted Deposits**

You can set up event-wise accounting entries and advices for the product as suggested below. Sample accounting entries for IC Product with Rule ID TD01 are given below. The interest is paid upfront at the time of booking.

Note

The IC rule defined for normal interest product should not be linked for discounted product. Separate rule definition is needed for discounted deposits.

9.6.5.1 **DEBK: Book**

Accounting Entries

| Accounting Role | Amount Tag | Dr/Cr Indicator |
|------------------------|-------------------|------------------------|
| TDACCOUNT | TD-PRINC | Credit |
| TDOFFSET | TD-PRINC | Debit |
| TD01-BOOK-1 | TD-INT | Credit |
| INTPIA | TD-INT | Debit |
| TD01-BOOK-3 | TAX | Debit |
| TD01-TPBL-3 | TAX | Credit |

9.6.5.2 **IACR: Interest Accrual**

Accounting Entries

| Accounting Role | Amount Tag | Dr/Cr Indicator |
|------------------------|-------------------|------------------------|
| TD01-ACR_ADJ-1 | IACR_ADJ | Credit |
| TD01-PNL_ADJ-1 | IACR_ADJ | Debit |
| TD01-ACCR-1 | IACR | Credit |
| TD01-PNL-1 | IACR | Debit |

9.6.5.3 **ILIQ: Interest Liquidation**

Accounting Entries

| Accounting Role | Amount Tag | Dr/Cr Indicator |
|------------------------|-------------------|------------------------|
| TD01-BOOK-1 | ILIQ_ADJ | Debit |
| TD01-ACCR-1 | ILIQ_ADJ | Credit |
| TD01-BOOK-2 | ILIQ | Debit |
| TD01-PNL-2 | ILIQ | Credit |

9.6.5.4 **IMAT: Interest Maturity**

Accounting Entries

| Accounting Role | Amount Tag | Dr/Cr Indicator |
|------------------------|-------------------|------------------------|
| INT-LIQD | IMAT | Debit |
| INT-BOOK | IMAT | Credit |
| PRINC-LIQD | PMAT | Debit |
| PRINC-BOOK | PMAT | Credit |

9.6.5.5 **ROLL: Discounted Deposit Rollover**

Accounting Entries

| Accounting Role | Amount Tag | Dr/Cr Indicator |
|-----------------|------------|-----------------|
| TD01-BOOK-1 | TD-INT | Credit |
| INTPIA | TD-INT | Debit |
| TD01-BOOK-3 | TAX | Debit |
| TD01-TPBL-3 | TAX | Credit |

9.6.6 TD with Negative Interest

Accounting entries in Product maintenance

IACR

| Accounting Role | Amount Tag | Dr/Cr Indicator |
|-----------------|------------|-----------------|
| <Rule>-ACCR-1 | IACR | Credit |
| <Rule>-PNL-1 | IACR | Debit |
| <Rule>-ACCR-2 | IACR | Debit |
| <Rule>-PNL-2 | IACR | Credit |

ILIQ

| Accounting Role | Amount Tag | Dr/Cr Indicator |
|-----------------|------------|-----------------|
| <Rule>-ACCR-1 | ILIQ | Debit |
| <Rule>-BOOK-1 | ILIQ | Credit |
| <Rule>-ACCR-2 | ILIQ | Credit |
| <Rule>-BOOK-2 | ILIQ | Debit |
| <Rule>-TPBL-3 | ILIQ | Credit |
| <Rule>-BOOK-3 | ILIQ | Debit |

During redemption of debit interest accounting roles to which accounting entries are passed will be reversed.

10. Annexure B - IC Rule Set-up

10.1 Introduction

This Annexure lists the Interest and Charge (IC) rules that need to be maintained for the TD module of Oracle FLEXCUBE. It also gives the UDEs and rates for which values need to be maintained.

This chapter contains the following sections:\

- [Section 10.2, "IC Rule"](#)
- [Section 10.3, "IC Rates Maintenance"](#)

10.2 IC Rule

This section contains the following topics:

- [Section 10.2.1, "IC Rule Maintenance"](#)
- [Section 10.2.2, "Capitalized Deposit with Penalty "](#)
- [Section 10.2.3, "TD with Normal Tenor and Penalty "](#)
- [Section 10.2.4, "Recurring Deposit Rule "](#)
- [Section 10.2.5, "Rate Chart Allowed with Penalty "](#)
- [Section 10.2.6, "UDE Value Maintenance"](#)
- [Section 10.2.7, "TD with Capitalization"](#)
- [Section 10.2.9, "TAX_RATE TD with Rate Chart Allowed "](#)
- [Section 10.2.10, "Recurring Deposit Scheme"](#)

10.2.1 IC Rule Maintenance

The components required to calculate interest (the principal, period, and rate) are broadly referred to as 'Data Elements'. Data elements are of two types:

- System Data Elements (SDEs)
- User Data Elements (UDEs)

In addition to specifying how the SDEs and UDEs are connected through the formulae, you also define certain other attributes for a rule using the 'Interest and Charges Rule Maintenance'

screen. You can invoke this screen by typing 'ICDRUMNT' in the field at the top right corner of the Application tool bar and clicking the adjoining arrow button.

The screenshot shows a software interface for creating a new rule. The 'Rule ID' is 'ACTC' and the 'Rule Description' is '2 months average min bal'. The 'Primary Element' field is empty. Under 'Apply Interest', both 'On Account Opening Month' and 'On Account Closure Month' are checked. The 'Integrated LM Type' is set to 'Integrated LM'. The 'System Elements' table lists 'AVG_MON_BAL_CURR' and 'AVG_MON_BAL_PREV'. The 'User Elements' table lists 'CHARGE1' and 'MIN_BAL', both with a type of 'Amount' and 'Use Effective' selected. The status bar at the bottom shows the user 'DEEPIKA03' and the date '2014-01-01 05:59:32'.

Note

- When the formula needs the current outstanding balance, use one of the following:
 - SDE 'DEPOSIT_AMOUNT
 - DLY_NET_BAL_M
 - DLY_NET_VD_BAL
- Use the SDE 'DEP_AMT_INIT' when the formula needs the initial deposit amount (original principal). Interest capitalization will not impact this, however, partial redemption will impact this.
- Use 'DAYS' when the formula needs the number of days from last liquidation date of account to current date.
- Use 'DAYS_FROM_START' SDE when the formula needs the number of days from account opening date to current date. After rollover, this will restart from the rolled over date (interest start date).
- The value for 'PENALTY_APPLY' SDE is always set as '1' (i.e Yes), If you check the box 'Waive Penalty' in the 'Term Deposits Redemption' screen (ICDREDMN), the system will change the SDE value to '0' (i.e No) for that particular account.
- The value for 'PENALTY_BASIS' SDE is taken as the redemption amount.
- Use the SDE 'DEPOSIT_AMOUNT' for displaying the maturity amount based on interest capitalization.
- The system sets the value of 'WAIVE_INTEREST' SDE to '0', if you have unchecked (waiver not applicable) the Waive Interest check box in the 'Term Deposits Redemption Input' screen (ICDREDMN). The system sets the value of this SDE to '1' if you have checked the Waive interest check box (waiver applicable).

- Use the SDE 'CUMAMT' for base amount to arrive at the interest rate. This SDE can be used in the formula conditions in IC Rules, so as to apply the 'Interest Rate Based on Cumulative Amount' flag. For deposits with non cumulative amount options this SDE will be the current deposit amount.
- Use SDE 'PRE_CLS_FACT' to compute the percentage of completed tenor and based on the result identify the TD elapsed closing percentage and fetch the linked pre-closure factor. If the pre-closure factor is not maintained for a specific completed tenor percentage, then the SDE considers the value as 1.
- Use SDEs 'PRE_CLS_LIQ' to identify the liquidation period during pre-closure of the term deposit. If the interest calculation is performed for the liquidated period and for the redemption amount, SDE 'PRE_CLS_LIQ' will return the value as '1'.
- Use SDEs 'PRE_CLS_ACCR' to identify the accrual period during pre-closure of the term deposit. If the interest calculation is performed for the accrued period for the redemption amount, SDE 'PRE_CLS_ACCR' will return the value as '1'.
- Use SDE 'PRE_CLS' to identify whether the TD is redeemed pre-maturely or not. If the redemption is a pre-mature redemption, then the SDE considers the value as 1 or else the SDE considers the value as 0. For a partial redemption, the SDE considers the formula with the condition PRE_CLS = 1 and executes only for the redemption amount not for the remaining amount. Expected Date of Submission will always be greater than current date.

For details about the screen, refer the chapter 'Maintaining Interest Rules' in the Interest and Charges User Manual.

You can maintain rules for the following:

- Capitalized Deposit with Penalty
- TD with Normal Tenor and Penalty
- Recurring Deposit Rule
- Rate Chart Allowed with Penalty
- Discounted TD with Penalty

10.2.2 Capitalized Deposit with Penalty

Specify the following details:

On Account Opening Month

Check this box.

On Account Closure Month

Check this box.

SDE

Maintain the following SDEs:

- DAYS
- DAYS_FROM_START
- DEPOSIT_AMOUNT
- PENALTY_APPLY
- PENALTY_BASIS
- TENOR
- YEAR

UDE

Maintain the following UDEs:

- TAX_RATE
- TD_1
- TD_2
- TD_3
- TD_PNL

Type

For each of the UDEs, select the option 'Rate' from the adjoining drop-down list.

Get Latest

For each of the UDEs, select the option 'Use Effective' from the adjoining drop-down list.

Click 'Formulas' button and invoke the 'Formulas' screen.

The screenshot shows the Oracle Formulas configuration window. The 'Debit/Credit' dropdown is set to 'Debit'. The 'Book Flag' dropdown is set to 'Booked'. The 'Days in a Month' dropdown is set to 'Actual'. The 'Periodicity' dropdown is set to 'Daily'. The 'Days Year' dropdown is set to 'Actual'. The 'Accruals Required' checkbox is unchecked. The 'Interest Method Default from Currency Definition' checkbox is unchecked. The 'Rounding Required' checkbox is unchecked. The 'Basis Percent' field is empty. The 'Local Currency Basis' checkbox is unchecked. The 'Book Tax To Expense Account' checkbox is unchecked. The 'FATCA Withholdable Tax' checkbox is unchecked. The 'Tax Pay Currency Flag' dropdown is empty. The 'Basis Amount' section has 'Option', 'Method', 'Decimals', and 'Units' fields. The 'Tax Amount' section has 'Option', 'Method', 'Decimals', and 'Units' fields. The 'Formula Wizard' link is visible at the bottom left. The 'Ok' and 'Cancel' buttons are at the bottom right.

You need to maintain two booked formulae and one tax formula.

Formula 1

Specify the following details:

Book Flag

Select 'Penalty' from the adjoining drop-down list.

Debit/Credit

Select 'Credit' from the adjoining drop-down list.

Days in a Month

Select '30 Days' from the adjoining drop-down list.

Days in a Year

Select '360' from the adjoining drop-down list.

Accrual Required

Check this box.

Rounding Required

Check this box.

Click 'Formula Wizard' button and invoke the 'Formula Wizard' screen.

Specify the following expressions:

| Case | Result |
|---|---|
| (TENOR<=90) AND (DEPOSIT_AMOUNT>0) AND PENALTY_BASIS = 0 | ((DEPOSIT_AMOUNT* DAYS * TD_1)/(100 * YEAR)) |
| (TENOR>90 AND TENOR<=180) AND (DEPOSIT_AMOUNT>0) AND PENALTY_BASIS = 0 | ((DEPOSIT_AMOUNT* DAYS * TD_2)/(100 * YEAR)) |
| (TENOR>180 AND TENOR<=730) AND (DEPOSIT_AMOUNT>0) AND PENALTY_BASIS = 0 | ((DEPOSIT_AMOUNT* DAYS * TD_3)/(100 * YEAR)) |
| (TENOR<=90) AND (DEPOSIT_AMOUNT>0) AND (PENALTY_BASIS = DEPOSIT_AMOUNT) | ((PENALTY_BASIS * DAYS) * (TD_1-TD_PNL)) / (100 * YEAR) |
| (TENOR>90 AND TENOR<=180) AND (DEPOSIT_AMOUNT>0) AND (PENALTY_BASIS = DEPOSIT_AMOUNT) | ((PENALTY_BASIS * DAYS) * (TD_2-TD_PNL)) / (100 * YEAR) |
| (TENOR>180 AND TENOR<=730) AND (DEPOSIT_AMOUNT>0) AND (PENALTY_BASIS = DEPOSIT_AMOUNT) | ((PENALTY_BASIS * DAYS) * (TD_3-TD_PNL)) / (100 * YEAR) |

Formula 2

Specify the following details:

Book Flag

Select 'Booked' from the adjoining drop-down list.

Debit/Credit

Select 'Debit' from the adjoining drop-down list.

Days in a Month

Select '30 Days' from the adjoining drop-down list.

Days in a Year

Select '360' from the adjoining drop-down list.

Rounding Required

Check this box.

Click 'Formula Wizard' button and invoke the 'Formula Wizard' screen. In this screen, you need to maintain the following expression:

| Case | Result |
|---|---|
| DEPOSIT_AMOUNT > 0 AND PENALTY_APPLY = 1 | $((\text{PENALTY_BASIS} * (\text{DAYS_FROM_START} - \text{DAYS})) * \text{TD_PNL}) / (100 * \text{YEAR})$ |

Formula 3

Specify the following details:

Book Flag

Select 'Tax' from the adjoining drop-down list.

Debit/Credit

Select 'Debit' from the adjoining drop-down list.

Days in a Month

Select '30 Days' from the adjoining drop-down list.

Days in a Year

Select '360' from the adjoining drop-down list.

Rounding Required

Check this box.

Click 'Formula Wizard' button and invoke the 'Formula Wizard' screen. In this screen, you need to maintain the following expression:

| Case | Result |
|--------------|--|
| FORMULA1 > 0 | $\text{FORMULA1} * \text{TAX_RATE} / 100$ |

10.2.3 TD with Normal Tenor and Penalty

Specify the following details:

On Account Opening Month

Check this box.

On Account Closure Month

Check this box.

SDE

Maintain the following SDEs:

- DAYS
- DAYS_FROM_START
- DLY_NET_BAL_M
- PENALTY_APPLY
- PENALTY_BASIS
- TENOR
- YEAR

UDE

Maintain the following UDEs:

- TD_1
- TD_2
- TD_3
- TD_PNL
- TAX_RATE

Type

For each of the UDEs, select the option 'Rate' from the adjoining drop-down list.

Get Latest

For each of the UDEs, select the option 'Use Effective' from the adjoining drop-down list.

Click 'Formulas' button and invoke the 'Formulas' screen. You need to maintain two booked formulae and one tax formula.

Formula 1

Specify the following details:

Book Flag

Select 'Penalty' from the adjoining drop-down list.

Debit/Credit

Select 'Credit' from the adjoining drop-down list.

Days in a Month

Select 'Actuals' from the adjoining drop-down list.

Days in a Year

Select 'Actuals' from the adjoining drop-down list.

Accrual Required

Check this box.

Rounding Required

Check this box.

Click 'Formula Wizard' button and invoke the 'Formula Wizard' screen.

Formula 1

Specify the following expressions:

| Case | Result |
|---|---|
| (TENOR<=90) AND (DLY_NET_BAL_M>0) AND PENALTY_BASIS = 0 | ((DLY_NET_BAL_M * DAYS * TD_1) / (100 * YEAR)) |
| (TENOR>90 AND TENOR<=180) AND (DLY_NET_BAL_M>0) AND PENALTY_BASIS = 0 | ((DLY_NET_BAL_M * DAYS * TD_2) / (100 * YEAR)) |
| (TENOR>180 AND TENOR<=730) AND (DLY_NET_BAL_M>0) AND PENALTY_BASIS = 0 | ((DLY_NET_BAL_M * DAYS * TD_3) / (100 * YEAR)) |
| (TENOR<=90) AND (DLY_NET_BAL_M>0) AND (PENALTY_BASIS = DLY_NET_BAL_M) | ((PENALTY_BASIS * DAYS) * (TD_1 - TD_PNL)) / (100 * YEAR) |
| (TENOR>90 AND TENOR<=180) AND (DLY_NET_BAL_M>0) AND (PENALTY_BASIS = DLY_NET_BAL_M) | ((PENALTY_BASIS * DAYS) * (TD_2 - TD_PNL)) / (100 * YEAR) |
| (TENOR>180 AND TENOR<=730) AND (DLY_NET_BAL_M>0) AND (PENALTY_BASIS = DLY_NET_BAL_M) | ((PENALTY_BASIS * DAYS) * (TD_3 - TD_PNL)) / (100 * YEAR) |

Formula 2

Specify the following details:

Book Flag

Select 'Booked' from the adjoining drop-down list.

Debit/Credit

Select 'Debit' from the adjoining drop-down list.

Days in a Month

Select 'Actuals' from the adjoining drop-down list.

Days in a Year

Select 'Actuals' from the adjoining drop-down list.

Rounding Required

Check this box.

Click 'Formula Wizard' button and invoke the 'Formula Wizard' screen. In this screen, you need to maintain the following expression:

| Case | Result |
|--|---|
| DLY_NET_BAL_M>0 AND PENALTY_APPLY = 1 | (PENALTY_BASIS * DAYS_FROM_START * TD_PNL) / (100 * YEAR) |

Formula 3

Specify the following details:

Book Flag

Select 'Tax' from the adjoining drop-down list.

Debit/Credit

Select 'Debit' from the adjoining drop-down list.

Days in a Month

Select 'Actuals' from the adjoining drop-down list.

Days in a Year

Select 'Actuals' from the adjoining drop-down list.

Rounding Required

Check this box.

Click 'Formula Wizard' button and invoke the 'Formula Wizard' screen. In this screen, you need to maintain the following expression:

| Case | Result |
|-------------|--------------------------|
| FORMULA1 >0 | FORMULA1 * TAX_RATE /100 |

10.2.4 Recurring Deposit Rule

Specify the following details:

On Account Opening Month

Check this box.

On Account Closure Month

Check this box.

SDE

Maintain the following SDEs:

- DAYS
- DLY_NET_VD_BAL
- RD_INSTALL_DUE
- RD_OVERDUE_DAYS
- YEAR

UDE

Maintain the following UDEs:

- TD_1
- OVERDUE_PENALTY
- TAX_RATE

Type

For each of the UDEs, select the option 'Rate' from the adjoining drop-down list.

Get Latest

For each of the UDEs, select the option 'Use Effective' from the adjoining drop-down list.

Click 'Formulas' button and invoke the 'Formulas' screen. You need to maintain two booked formulae and one tax formula.

Formula 1

Specify the following details:

Book Flag

Select 'Penalty' from the adjoining drop-down list.

Debit/Credit

Select 'Credit' from the adjoining drop-down list.

Days in a Month

Select '30 Days' from the adjoining drop-down list.

Days in a Year

Select '360' from the adjoining drop-down list.

Accrual Required

Check this box.

Rounding Required

Check this box.

Click 'Formula Wizard' button and invoke the 'Formula Wizard' screen.

Specify the following expressions:

| Case | Result |
|--------------------|---|
| DLY_NET_VD_BAL > 0 | $(DLY_NET_VD_BAL * DAYS * TD_1) / (100 * YEAR)$ |

Formula 2

Specify the following details:

Book Flag

Select 'Booked' from the adjoining drop-down list.

Debit/Credit

Select 'Debit' from the adjoining drop-down list.

Days in a Month

Select '30 Days' from the adjoining drop-down list.

Days in a Year

Select '360' from the adjoining drop-down list.

Rounding Required

Check this box.

Click 'Formula Wizard' button and invoke the 'Formula Wizard' screen. In this screen, you need to maintain the following expressions:

| Case | Result |
|------------------|---|
| RD_INSTALL_DUE>0 | (RD_INSTALL_DUE*OVERDUE_PENALTY* RD_OVERDUE_DAYS)/(100* YEAR) |

Formula 3

Specify the following details:

Book Flag

Select 'Tax' from the adjoining drop-down list.

Debit/Credit

Select 'Debit' from the adjoining drop-down list.

Days in a Month

Select '30 Days' from the adjoining drop-down list.

Days in a Year

Select '360' from the adjoining drop-down list.

Rounding Required

Check this box.

Click 'Formula Wizard' button and invoke the 'Formula Wizard' screen. In this screen, you need to maintain the following expressions:

| Case | Result |
|------------|-------------------------|
| FORMULA1>0 | FORMULA1* TAX_RATE /100 |

10.2.5 Rate Chart Allowed with Penalty

Specify the following details:

On Account Opening Month

Check this box.

On Account Closure Month

Check this box.

SDE

Maintain the following SDEs:

- DAYS
- DAYS_FROM_START
- DEP_AMT_INIT
- PENALTY_APPLY
- PENALTY_BASIS
- YEAR

UDE

Maintain the following UDEs:

| UDE | Type |
|----------|-------------------|
| TD_1 | Rate Code as Rate |
| TD_PNL | Rate |
| TAX_RATE | Rate |

Get Latest

For each of the UDEs, select the option 'Use Effective' from the adjoining drop-down list.

Click 'Formulas' button and invoke the 'Formulas' screen. You need to maintain two booked formulae and one tax formula.

Formula 1

Specify the following details:

Book Flag

Select 'Penalty' from the adjoining drop-down list.

Debit/Credit

Select 'Credit' from the adjoining drop-down list.

Days in a Month

Select 'Actuals' from the adjoining drop-down list.

Days in a Year

Select 'Actuals' from the adjoining drop-down list.

Accrual Required

Check this box.

Rounding Required

Check this box.

Click 'Formula Wizard' button and invoke the 'Formula Wizard' screen. Specify the following expression:

| Case | Result |
|----------------|-----------------------------------|
| DEP_AMT_INIT>0 | DEP_AMT_INIT*TD_1*DAYS/(YEAR*100) |

Formula 2

Specify the following details:

Book Flag

Select 'Booked' from the adjoining drop-down list.

Debit/Credit

Select 'Debit' from the adjoining drop-down list.

Days in a Month

Select 'Actuals' from the adjoining drop-down list.

Days in a Year

Select 'Actuals' from the adjoining drop-down list.

Rounding Required

Check this box.

Click 'Formula Wizard' button and invoke the 'Formula Wizard' screen. In this screen, you need to maintain the following expression:

| Case | Result |
|---|---|
| DEP_AMT_INIT>0 AND PENALTY_APPLY = 1 | PENALTY_BASIS*DAYS_FROM_START*TD_PNL/ (YEAR*100) |

Formula 3

Specify the following details:

Book Flag

Select 'Tax' from the adjoining drop-down list.

Debit/Credit

Select 'Debit' from the adjoining drop-down list.

Days in a Month

Select 'Actuals' from the adjoining drop-down list.

Days in a Year

Select 'Actuals' from the adjoining drop-down list.

Accrual Required

Check this box.

Rounding Required

Check this box.

Click 'Formula Wizard' button and invoke the 'Formula Wizard' screen. In this screen, you need to maintain the following expression:

| Case | Result |
|--------------|-----------------------|
| FORMULA1 > 0 | FORMULA1*TAX_RATE/100 |

10.2.5.1 Formula for Discounted Interest

Sample formula below:

$(\text{DEPOSIT_AMOUNT} * \text{TENOR} * \text{RATE}) / (\text{YEAR} * 100)$

DEPOSIT_AMOUNT - System defined Element (SDE) for principal amount of the deposit

TENOR – SDE for tenor of the deposit

RATE – UDE for interest rate on the deposit.

YEAR – SDE days in the year (360/365/366/Actual)

10.2.5.2 Formula for Interest Rate and Maturity Amount

The following formula will be used to calculate interest rate and maturity amount during term deposit account opening.

Sample formula is given below:

| Condition | Formula |
|--------------------|---|
| DEPOSIT_AMOUNT > 0 | $((\text{DEPOSIT_AMOUNT} * \text{DAYS} * \text{INT_RATE}) / (100 * \text{YEAR}))$ |

Deposit Amount: 15000 USD

Deposit Booking Date: 01-Jan-2011

Tenor: 180 Days

Interest Rate: 9%

Interest Amount: $(15000 * 9 * 180) / (365 * 100)$
= 665.75 USD

Interest Rate and Maturity Amount after Rollover

The example below shows how the interest rate and maturity amount are calculated after term deposit rollover.

| Condition | Formula |
|--------------------|---|
| DEPOSIT_AMOUNT > 0 | $((\text{DEPOSIT_AMOUNT} * \text{DAYS} * \text{INT_RATE}) / (100 * \text{YEAR}))$ |

Deposit Amount: 10000 USD

Deposit Booking Date: 01-Jan-2011

Tenor: 180 Days

Interest Rate: 9%

Interest Amount: $(10000 * 9 * 180) / (365 * 100)$
= 443.84 USD

Rollover Date: 30-Jun-2011

After Rollover

Deposit amount: 10443.84 USD.

Interest rate: 9.25%.

Interest amount: $(10443.84 * 9.25 * 180) / (365 * 100)$

= 476.41 USD

10.2.5.3 Formula for Interest Waive

Based on the 'WAIVE_INTEREST' SDE, a new formula will be created in the IC Rule Definition screen for Interest Waiver.

| Condition | Formula |
|---|---|
| DEPOSIT_AMOUNT >0 AND WAIVE_INTEREST=0 | $((\text{DEPOSIT_AMOUNT} * \text{DAYS} * \text{INT_RATE}) / (100 * \text{YEAR}))$ |

The example below explains how the interest that is to be paid out to the account holder will be waived off during redemption.

Deposit account opening date: 01-Jan-2011

Accrual frequency is daily.

The liquidation is at maturity.

Deposit amount: 10000 USD

Tenor: 365 Days

Interest rate: 9%

Maturity date: 31-Dec-2011

Redemption date: 15-Dec-2011

Computed interest amount: till redemption date: 858 .08 USD

Computed interest amount: 900 USD

During Redemption when the 'Waive Interest' is set to 'Y':

Redemption date: 15-Dec-2011

Redemption type: Full Redemption

Waive interest flag: Y

Amount to be paid to the customer: 10000 USD

During Redemption when the 'Waive Interest' is set to 'N':

Redemption date: 15-Dec-2011

Redemption type: Full Redemption

Waive interest flag: N

Amount to be paid to the customer: 10858.08 USD

10.2.5.4 Formula for Principal and Interest Details

The following formula will be used to calculate principal and interest amount during term deposit redemption

Sample formula below:

| Condition | Formula |
|--------------------|---|
| DEPOSIT_AMOUNT > 0 | $((\text{DEPOSIT_AMOUNT} * \text{DAYS} * \text{INT_RATE}) / (100 * \text{YEAR}))$ |

Deposit account opening date: 01-Jan-2011

Deposit amount: 10000 USD

Tenor: 365 Days

Interest rate: 10%

Interest payout frequency: Monthly

Maturity date: 31-Dec-2011

Computed interest amount till maturity: 1000 USD

Maturity Amount: 11000 USD

Partial Redemption

Redemption date: 01-Jul-2011

Redemption type: Partial Redemption

Redemption Amount: 5000 USD

Interest liquidated so far: 600 USD

Recalculated interest rate: 7%

Recomputed Interest till redemption: 350 USD

Amount to be recovered from customer: 250 USD

Full Redemption

Redemption date: 01-Jul-2011

Redemption type: Full Redemption

Redemption Amount: 10000 USD

Interest liquidated so far: 600 USD

Recalculated interest rate: 7%

Penalty rate: 2%

Recomputed Interest till redemption: 350 USD

Amount to be recovered from customer: 250 USD

Penalty amount to be recovered: 99 USD

Net Amount paid to the customer after full redemption: $(10000 - 250 - 99) = 9651$ USD

10.2.6 UDE Value Maintenance

You can maintain UDE values for the rules using the 'Interest & Charges User Data Element Maintenance' screen.

You can invoke the 'Interest & Charges User Data Element Maintenance' screen by typing 'ICDUDVAL' in the field at the top right corner of the Application tool bar and clicking the adjoining arrow button.

For details about the screen, refer the chapter 'Giving UDE Values for Condition' in the Interest and Charges User Manual.

In this screen, you need to maintain the following UDEs for the different IC products. Assume that you have maintained the following IC products:

- TD with Capitalization
- Normal TD with Simple Interest
- TD with Rate Chart Allowed
- Recurring deposit Scheme

10.2.7 TD with Capitalization

You need to maintain values for the following UDEs under this product:

- TD_1
- TD_2
- TD_3
- TD_PNL
- TAX_RATE

10.2.8 Normal TD with Simple Interest

You need to maintain values for the following UDEs under this product:

- TD_1
- TD_2
- TD_3
- TD_PNL

10.2.9 TAX_RATE TD with Rate Chart Allowed

You need to maintain values for the following UDEs under this product:

- TD_1
- TD_PNL
- TAX_RATE

10.2.10 Recurring Deposit Scheme

You need to maintain values for the following UDEs under this product:

- TD_1
- OVERDUE_PENALTY
- TAX_RATE

10.3 IC Rates Maintenance

You can maintain rate codes for branches using the “Interest & Charges Branch Availability Maintenance’ screen.

You can invoke this screen by typing 'ICDRATMA' in the field at the top right corner of the Application tool bar and clicking the adjoining arrow button.
