Oracle Financial Services Investigation Hub Release 8.1.2.6.0

Oracle Financial Services Investigation Hub (OFS Investigation Hub) is a separately licensed product.

Description

ID **36032001** – OFS Investigation Hub 8.1.2.6.0 Release

This release of OFS Investigation Hub is the major release, and it is based on OFS Compliance Studio.

New Features in this Release

- The ECM Case Narrative Notebook has been introduced.

  For more information, see the ECM Case Narrative Notebook section in the OFS Investigation Hub User Guide.

- ECM-IHub integration has been improved.

  - Availability of a generic ECM patch for IHub Integration with Compliance Studio 8.1.2.6.0.

  - It is certified on the ECM 8.0.7.3.0 and 8.1.2.5.0 versions.

- Configuration to enable/disable graph dependency in the Special Investigation and ECM Integration L1 notebooks.

- Configuration to make a real-time search (Entity Search) is optional.

- Improvements on performance and configuration.

  For configuration improvement, see the OFS Investigation Hub Installation Guide.

How to Install this Release

For detailed instructions on installing this OFS Investigation Hub release, see the OFS Investigation Hub Installation Guide 8.1.2.6.0.

Known Issues and Limitations in this Release

Table 1 lists the known issues or limitations in this release.

Table 1: Known Issues and Limitations

S. No.	Bug ID	Known Issue or Limitation	Workaround
1	32895388	USER ACTIVITY – **Export To PDF** Exported PDF will not have complete information about the notebook details for the following notebooks: ● Special Investigation (SI) ● ECM Integration L1 For example, When you export the SI notebook as PDF, the **Graph Result of the Entity Search** details will be missing in the exported PDF.	-
2	34786745	Notebook - Error occurs while executing the Quantifind Risk Report Paragraph.	Contact My Oracle Support (if Quantifind is purchased) for integration of Quantifind.
3	35476579	For accounts, input search results/ search for non case entities - Tax ID - User needs to concatenate "acct_tax_id" and "tax_id_frmt_cd" when entering Tax Id as search parameter.	-
4	35432889	Event ID mismatch in ECM UI and IHUB "Entity Summary Historical Report". IHub is showing an internal ID but otherwise the details are same.	-
5	35396425	Offloaded graph – "Initial Screening Results" paragraph taking extended times for loading 5 hops.	This issue will be resolved in upcoming Compliance Studio release.
6	36111601	The user is not able to open the IHUB notebook in the ECM application without logging into the Data Studio in the same browser if the ECM-IH Integration is done with a self-signed certificate.	Log in to the Data Studio and launch the ECM Application in a new tab.
7	36104249	The user is not getting exact matches in the Initial Screening Results paragraph when SEARCH_TYPE is exact and it gives fuzzy matches.	-
8	36053055	JSON format results are displayed instead of graph when running the 'Graph Result of Entity Search' paragraph.	Clear the result and re-run the graph result of the Entity Search paragraph.
9	36153962	The user is unable to expand the particular nodes in the graph. Error is throwing as "CANNOT EXPAND VERTEX-IDS" - Intermittent Issue.	-
10	36169756	User encounters null pointer exception in the Initial Screening Results paragraph, when user is searching with Name/Tax id/Address for non-case entities in case of re-run.	Re-run the Initial Screening Results Paragraph.

Table 1: Known Issues and Limitations

S. No.	Bug ID	Known Issue or Limitation	Workaround
11	36081975	The fields such as Address, Phone number, City, Email ID, and Country are repeated multiple times in the Customer/Account graph property.	-
12	36226324	Output of the notebook paragraph does not switch automatically.	-
