U.S. GOVERNMENT END USERS: Oracle programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, delivered to U.S. Government end users are “commercial computer software” pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, use, duplication, disclosure, modification, and adaptation of the programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, shall be subject to license terms and license restrictions applicable to the programs. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate failsafe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

This software or hardware and documentation may provide access to or information on content, products and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services.

Table of Contents

1. Preface.....	17
1.1 Intended Audience	17
1.2 Documentation Accessibility	17
1.3 Access to Oracle Support	17
1.4 Structure.....	17
1.5 Related Information Sources.....	17
2. Transaction Host Integration Matrix.....	18
3. Dashboards.....	41
3.1 System Administrator Dashboard	41
3.2 Administrator Maker Dashboard	60
3.3 Administrator Approver Dashboard.....	69
3.4 Approve the transaction	77
4. User Management.....	79
4.1 User Management - Create.....	80
4.2 User Management - Search and View	90
4.3 User Management - Edit	101
5. Party Preferences	113
6. Party to Party Linkage	132
6.1 Party to Party Linkage- Search	133
6.2 Party To Party Linkage - Create.....	135
6.3 Party to Party Linkage- View.....	137
6.4 Party To Party Linkage - Edit and De-link.....	138
7. Merchant Onboarding	141
7.1 Merchant Management	141
7.1.1 Merchant Management – Search.....	142
7.1.2 Merchant Management – View	144
7.1.3 Merchant Management – Create Merchant	147
7.1.4 Merchant Management – Edit.....	149
7.1.5 Merchant Management - Delete.....	152

8.	Electronic Bill Presentment and Payment	155
8.1	Biller Onboarding	156
8.1.1	Biller Onboarding - Search.....	156
8.1.2	Biller Onboarding - Create	158
8.1.3	Biller Onboarding - View	163
8.1.4	Biller Onboarding - Edit	167
8.1.5	Biller Onboarding - Delete	171
9.	Limits Definition	173
9.1	Limits Definition - View	174
9.2	Limits Definition - Create.....	176
9.3	Limits Definition - Delete Limit.....	182
10.	Limit Package Management	185
10.1	Limit Package Management - View	186
10.2	Limit Package Management - Create	191
10.3	Limit Package Management - Edit	195
10.4	Limit Package Management - Clone.....	200
10.5	Limit Package Management - Delete.....	203
11.	User Limits.....	209
11.1	User Limits - View	210
11.2	User Limits - Edit.....	216
12.	Transaction Group Maintenance	224
12.1	Transaction Group Maintenance - View.....	224
12.2	Transaction Group Maintenance - Create.....	227
12.3	Transaction Group Maintenance - Edit	228
12.4	Transaction Group Maintenance - Delete	231
13.	Party Account Access	235
13.1	Party Account Access - Mapping (Create).....	236
13.2	Party Account Access- View	243
13.3	Party Account Access - Edit.....	251
13.4	Party Account Access - Delete.....	256
14.	User Account Access	258

14.1	User Account Access - Mapping (Create).....	259
14.2	User Account Access- Search	267
14.3	User Account Access - Edit.....	273
14.4	User Account Access - Delete	279
15.	Party Resource Access	281
15.1	Party Resource Access - Mapping (Create)	282
15.2	Party Resource Access- View.....	286
15.3	Party Resource Access - Edit	289
15.4	Party Resource Access - Delete	292
16.	User Resource Access	293
16.1	User Resource Access - Mapping (Create)	294
16.2	User Resource Access- Search.....	301
16.3	User Resource Access - Edit	306
16.4	User Resource Access - Delete	309
17.	Approvals.....	310
17.1	Workflow Management	311
17.1.1	Approval Workflow – Select User Type	311
17.1.2	Approval Workflow - Admin User - Admin Workflow Management.....	312
17.1.3	Admin Workflow Management – Search.....	313
17.1.4	Admin Workflow Management – View	314
17.1.5	Admin Workflow Management – Create	315
17.1.6	Admin Workflow Management - Edit.....	317
17.1.7	Approval Workflow - Corporate User - Workflow Management	318
17.1.8	Workflow Management – Summary.....	320
17.1.9	Workflow Management – View.....	321
17.1.10	Workflow Management – Create.....	322
17.1.11	Workflow Management - Edit	324
17.2	Approval Rules.....	327
17.3	Approval Rules – Select User Type	328

17.4	Approval Rules - Admin User - Admin Approval Rules.....	328
17.4.1	Admin Approval Rules – Search	329
17.4.2	Admin Approval Rules – View.....	330
17.4.3	Admin Approval Rules – Create.....	332
17.4.4	Admin Approval Rules - Edit	334
17.5	Approval Rules - Corporate User - Approval Rule	336
17.5.1	Approval Rules - Corporate User - Search	336
17.5.2	Approval Rule – Corporate User - Create	338
17.5.3	Approval Rules – Corporate User – Rule Summary	342
17.5.4	Approval Rules - View	344
17.5.5	Approval Rules - Edit	347
18.	Service Request Form Builder.....	352
18.1	Service Request Definition - Summary	352
18.2	Service Request Definition - Search and View	353
18.3	Service Request Form Builder - Create	360
18.3.1	Copy and Create a new Request	368
18.4	Service Request Form Builder - Edit.....	369
18.5	Deactivate/Activate Service Request	375
19.	Feedback.....	378
19.1	Feedback Template Maintenance.....	378
19.1.1	Feedback Template Maintenance - Search	379
19.1.2	Feedback Template Maintenance - Edit	384
19.1.3	Feedback Template Maintenance - Create.....	391
19.2	Feedback Analytics	398
19.2.1	Top Three and Bottom Three Transactions	398
19.2.2	Individual Transactions	399
19.2.3	All Transactions.....	401
	General Feedback	402
20.	SMS Banking	405

20.1	SMS Banking - Edit	407
20.2	Missed Call Banking - Search	408
20.3	Missed Call Banking - Edit	410
21.	System Rules.....	412
22.	Workflow Configuration	418
22.2	Product Configuration - View Default Workflow	421
22.3	Product Configuration - Create Custom Flow	422
22.4	Product Configuration - View Custom Workflow	426
22.5	Product Configuration - Edit.....	428
23.	Transaction Aspects.....	431
23.1	View Transaction Aspects.....	431
23.2	Update Transaction Aspects	433
24.	ATM / Branch Maintenance	435
24.1	ATM/ Branch Maintenance - Search.....	436
24.2	ATM/ Branch Maintenance - Add.....	438
24.3	ATM/ Branch Maintenance - Edit	446
24.4	ATM/ Branch Maintenance - Delete	448
25.	Product Mapping.....	450
25.1	Product Mapping - View	451
25.2	Product Mapping - Edit.....	454
25.3	Product Mapping - Create	456
26.	User Profile Maintenance	460
26.1	User Profile - Create	461
26.2	User Profile - View	463
26.3	User Profile - Edit	464
27.	Payment Purpose Mapping	467
27.1	Payment Purposes - View.....	468
27.2	Payment Purposes - Edit	469
27.3	Payment Purposes Mapping- Map Purposes	471
28.	Payee Restriction Setup	473
28.1	Payee Restriction Setup - View.....	474
28.2	Payee Restriction Setup - Edit	477

28.3	Payee Restriction Setup - Create.....	479
29.	Biller Category Maintenance.....	484
29.1	Biller Category Maintenance - Summary	485
29.2	Biller Category Maintenance - Add Category.....	486
29.3	Biller Category Maintenance - Edit Category.....	487
29.4	Biller Category Maintenance - Delete	489
30.	Forex Deal Maintenance.....	491
30.1	Add Currency Pairs	491
30.2	Update Forex Deal	492
31.	Biller Category Maintenance- Integrated.....	494
31.1	Search Biller	495
31.2	Map Biller	496
31.3	Manage Category- View.....	497
31.4	Manage Category- Add Category	498
32.	Network Preference Maintenance	501
32.1	Network Preference Maintenance - View.....	501
32.2	Network Preference Maintenance - Edit	503
33.	Touch Point Maintenance.....	505
33.1	Touch Point Maintenance - View	506
33.2	Touch Point Maintenance - Edit.....	508
33.3	Touch Point Maintenance - Create	511
34.	Touch Point Group Maintenance.....	514
34.1	Touch Point Group Maintenance - View	514
34.2	Touch Point Group Maintenance - Edit.....	517
34.3	Touch Point Group Maintenance - Create	519
35.	Role transaction Mapping	522
35.1	Search Application Role	523
35.2	Edit Application Role	527
35.3	Delete Application Role.....	529
35.4	Create Application Role	530
36.	Entitlements.....	537
36.1	Entitlements - View	537

36.2	Entitlements - Edit	539
37.	User Segment Maintenance	542
37.1	User Segment Maintenance - Search	543
37.2	User Segment Maintenance - Edit	546
37.3	User Segment Maintenance - Create	549
38.	Authentication	552
38.1	Authentication - View	553
38.2	Authentication - Edit	556
38.3	Authentication - Create	559
39.	Security Questions Maintenance.....	565
39.1	View Security Questions	566
39.2	Security Questions Maintenance - Edit.....	567
39.3	Security Questions Maintenance - Create	568
40.	Password Policy Maintenance.....	571
40.1	Password Policy Maintenance - Search	571
40.2	Password Policy Maintenance - View	572
40.3	Password Policy - Create.....	576
40.4	Password Policy Maintenance - Edit.....	579
41.	Security Keys.....	584
41.1	Password Encryption and Decryption with Public and Private Key Pairs	584
41.2	JWT Encryption Key.....	584
42.	User Group - Subject Mapping	586
42.1	User Group - Subject Mapping - Search	587
42.2	User Group - Subject Mapping - Create	589
42.3	User Group - Subject Mapping - Modify.....	591
43.	Alerts Maintenance	594
43.1	Alerts Maintenance - Search.....	595
43.2	Alerts Maintenance- Create	600
43.3	Alerts Maintenance- Edit.....	606
43.4	Alerts Maintenance- Delete.....	608
44.	Mailers	610
44.1	Mailers - Search and View	610

44.2	Mailers - Create.....	614
44.3	Mailers - Edit	617
44.4	Mailers - Delete	620
45.	Account Aggregation.....	622
45.1	External Bank Maintenance	623
45.1.1	Search and View External Bank's Details	623
45.1.2	Add External Bank.....	626
45.1.3	Update External Bank's Details.....	629
45.1.4	Delete External Bank's Details	632
46.	Spend Category.....	633
46.1	Spend Category - Search.....	634
46.1.2	Spend Category - View	635
46.2	Spend Category - Create	636
46.3	Spend Category - Edit.....	637
47.	Goal Category Maintenance.....	640
47.1	Goal Category - Search	641
47.1.2	Goal Category - View	642
47.2	Goal Category - Create	643
47.3	Goal Category - Edit.....	645
48.	Manage Brand.....	648
48.1	Manage Brand - Create.....	650
48.2	Manage Brand - View.....	669
48.3	Manage Brand - Edit	670
48.4	Manage Brand - Delete	689
48.5	Brand Mapping	691
48.5.1	Brand Mapping Search	691
48.5.2	Create Mapping.....	693
48.5.3	Delete Mapping	694
49.	Dashboard Builder	695
49.2	Dashboard Builder – View.....	697

49.3	Dashboard Builder – Create.....	699
49.4	Dashboard Builder – Design – Create Administrator Template.....	704
49.5	Dashboard Builder – Edit.....	708
49.6	Dashboard Builder – Delete.....	710
49.7	Dashboard Mapping – Summary.....	712
49.7.2	Create Mapping.....	713
49.7.3	Delete Mapping.....	716
50.	Relationship Maintenance.....	718
50.1	Relationship Mapping.....	718
50.1.1	Relationship Mapping Maintenance - View.....	719
50.1.2	Relationship Mapping Maintenance - Edit.....	721
50.2	Relationship Matrix.....	723
50.2.1	Relationship Matrix Maintenance - View.....	723
50.2.2	Relationship Matrix Maintenance - Edit.....	725
51.	Transaction Blackout.....	728
51.1	Transaction Blackout - Search.....	729
51.2	Transaction Blackout - Create.....	732
51.3	Transaction Blackout - Edit.....	735
51.4	Transaction Blackout - Delete.....	737
52.	Working Window.....	740
52.1	Transaction Working Window - Search.....	741
52.2	Transaction Working Window - Create.....	745
52.3	Transaction Working Window - Edit.....	749
52.4	Transaction Working Window - Delete.....	753
53.	Audit Log.....	756
53.1	Search Audit Details.....	756
54.	File Upload.....	761
54.1	File Identifier Maintenance.....	762
54.1.1	File Identifier Maintenance – User Type Selection.....	763
54.1.2	File Identifier Maintenance - Administrator User – Summary.....	763

54.1.3	File Identifier Maintenance - Administrator User - Create.....	767
54.1.4	File Identifier Maintenance - Administrator User – Edit.....	769
54.1.5	File Identifier Maintenance - Corporate User – Search and View.....	770
54.1.6	File Identifier Maintenance - Corporate User - Create.....	776
54.1.7	File Identifier Maintenance - Corporate User – Edit.....	781
54.2	User File Identifier Mapping.....	785
54.2.1	User File Identifier Mapping – User Type Selection.....	786
54.2.2	User File Identifier Mapping – Administrator - Search.....	787
54.2.3	User File Identifier Mapping – Administrator - Create.....	790
54.2.4	User File Identifier Mapping – Administrator - Edit.....	792
54.2.5	User File Identifier Mapping - Corporate User - Search.....	794
54.2.6	User File Identifier Mapping - Corporate User - Create.....	798
54.2.7	User File Identifier Mapping - Corporate User - Edit.....	800
54.3	File Upload (for Biller Maintenance).....	803
54.4	Uploaded Files Inquiry (Biller Maintenance).....	807
54.4.1	Uploaded File Inquiry – Search.....	809
55.	OAuth 2.0.....	816
55.1	Identity Domain Maintenance.....	817
55.1.1	Identity Domain Maintenance - Search.....	817
55.1.2	Identity Domain Maintenance – Edit.....	820
55.1.3	Identity Domain Maintenance – Create.....	822
55.2	Resource Server Maintenance.....	825
55.2.1	Resource Server Maintenance - Search.....	825
55.2.2	Resource Server Maintenance – Edit.....	828
55.2.3	Resource Server Maintenance – Create.....	829
55.3	Client Maintenance.....	832
55.3.1	Client Maintenance - Search.....	832
55.3.2	Client Maintenance – Edit.....	835

55.3.3	Client Maintenance – Create.....	837
56.	User Group Management	840
56.1	User Groups - Summary	841
56.2	User Groups - Admin User – Create.....	842
56.3	User Groups - Admin User – Search Summary.....	843
56.4	User Groups - Admin User – Edit Group	845
56.5	User Groups - Corporate User – Search Party	846
56.6	User Groups - Corporate User – Create	848
56.7	User Groups - Corporate User – Group Summary	849
56.8	User Groups - Corporate User – Edit Group.....	852
57.	Print Password	855
57.1	Print Password - Search	856
57.2	Print Password - Print	859
58.	Alerts Subscription	861
58.1	Alerts Subscription - Search.....	862
58.2	Subscribe/ Unsubscribe Alerts	865
59.	Request Processing.....	869
59.1	Request Processing - Summary	870
59.2	Service Request Details (For Service Requests available out of the box)	873
59.2.1	Approve or Reject Service Requests (For Service Requests available out of the box)....	875
59.3	Service Request Details (Requests created using Service Request-Form Builder).....	877
59.3.1	Approve or Reject Service Requests (created using Service Request Form Builder).....	879
60.	Reports.....	883
61.	Report Generation.....	884
61.1	Adhoc Reports.....	886
61.2	Schedule Reports.....	887
61.2.1	View Scheduled Reports	888
61.2.2	Edit Schedule Reports	891
61.2.3	Delete Schedule Reports	893
61.3	API Consumption Report	894
61.3.1	API Consumption - Adhoc Report.....	894

61.3.2	API Consumption - Schedule Reports	899
61.4	Biller Registration Report	902
61.4.1	Biller Registration - Adhoc Report.....	902
61.4.2	Biller Registration - Schedule Reports	905
61.5	Biller Reconciliation report	908
61.5.1	Biller Reconciliation - Adhoc Report.....	908
61.5.2	Biller Reconciliation - Schedule Reports	911
61.6	Bill Payment Pay Later Report.....	914
61.6.1	Bill Payment Pay Later - Adhoc Report	914
61.6.2	Bill Payment Pay Later - Schedule Reports.....	917
61.7	Date Wise User Creation Report.....	920
61.7.1	Date Wise User Creation - Adhoc Report	920
61.7.2	Date Wise User Creation - Schedule Reports	924
61.8	EPI Payment Reconciliation Report.....	927
61.8.1	EPI Payment Reconciliation - Adhoc Report	927
61.8.2	EPI Payment Reconciliation – Schedule Report.....	930
61.9	FATCA & CRS Declaration Report	933
61.9.1	FATCA & CRS Declaration - Adhoc Report.....	933
61.9.2	FATCA & CRS Declaration - Schedule Reports	944
61.10	File Identifier wise Party User Mapping Report.....	947
61.10.1	File Identifier wise Party User Mapping - Adhoc Report	947
61.10.2	File Identifier wise Party User Mapping - Schedule Report	950
61.11	Party User wise File Identifiers Mapping Report.....	953
61.11.1	Party User wise File Identifiers Mapping - Adhoc Report	953
61.11.2	Party User wise File Identifiers Mapping - Schedule Reports.....	956
61.12	Party wise Approval Rule report.....	959
61.12.1	Party wise Approval Rule - Adhoc Report.....	959
61.12.2	Party wise Approval Rule - Schedule Reports	962

61.13	Party wise File Identifiers Mapping Report	965
61.13.1	Party wise File Identifiers Mapping - Adhoc Report.....	965
61.13.2	Party wise File Identifiers Mapping - Schedule Reports	968
61.14	Party wise Payee Maintenance Report	971
61.14.1	Party wise Payee Maintenance - Adhoc Report	971
61.14.2	Party wise Payee Maintenance - Schedule Reports.....	974
61.15	Party wise Pending Approvals List Report.....	977
61.15.1	Party wise Pending Approvals list - Adhoc Report.....	977
61.15.2	Party wise Pending Approvals List – Schedule Report.....	981
61.16	Party wise User Group Report	984
61.16.1	Party wise User Group - Adhoc Report.....	984
61.16.2	Party wise User Group - Schedule Report.....	987
61.17	Party Wise Workflows Report	990
61.17.1	Party wise Workflows - Adhoc Report.....	990
61.17.2	Party wise Workflows - Schedule Reports	993
61.18	User Segment Summary Report.....	996
61.18.1	User Segment Summary - Adhoc Report	996
61.18.2	User Segment Summary - Schedule Reports.....	999
61.19	Wallets Creation for a Date Range Report	1002
61.19.1	Wallets Creation for a Date Range - Adhoc Report.....	1002
61.19.2	Wallets Creation for a Date Range - Schedule Report	1005
61.20	Wallet KYC report.....	1008
61.20.1	Wallets KYC - Adhoc Report.....	1008
61.20.2	Wallets KYC - Schedule Report	1011
61.21	Wallets Transaction Activity Report	1015
61.21.1	Wallets Transaction Activity - Adhoc Report.....	1015
61.21.2	Wallets Transaction Activity - Schedule Report	1018
62.	My Reports.....	1021

62.1	My Reports - Adhoc	1021
62.2	My Reports - Scheduled.....	1023
63.	User Report Mapping.....	1025
63.1	User Report Mapping - Search	1026
63.2	User Report Mapping - Create	1029
63.3	User Report Mapping - Edit.....	1030
64.	Message Maintenance	1032
64.1	Message Maintenance - View	1032
65.	User Helpdesk	1036
66.	Mailbox	1040
66.1	Mails	1041
66.1.2	Mailbox - Inbox	1042
66.1.3	Mailbox - Sent Mail.....	1044
66.1.4	Mailbox - Deleted Mail.....	1047
66.2	Alerts	1049
66.3	Notifications.....	1051
67.	Security Settings	1054
67.1	Set Security Question	1054
67.1.1	View Security Questions	1057
67.1.2	User Security Question - Edit.....	1058
67.2	Change Password.....	1060
68.	My Profile	1062
69.	Session Summary	1064
70.	Forgot Password	1066
71.	Forgot Username	1069

1. Preface

1.1 Intended Audience

This document is intended for the following audience:

- Customers
- Partners

1.2 Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

1.3 Access to Oracle Support

Oracle customers have access to electronic support through My Oracle Support. For information, visit

<http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info> or visit

1.4 Structure

This manual is organized into the following categories:

Preface gives information on the intended audience. It also describes the overall structure of the User Manual.

Introduction provides brief information on the overall functionality covered in the User Manual.

The subsequent chapters provide information on transactions covered in the User Manual.

Each transaction is explained in the following manner:

- Introduction to the transaction
- Pre-requisite for the transaction
- Screenshots of the transaction
- The images of screens used in this user manual are for illustrative purpose only, to provide improved understanding of the functionality; actual screens that appear in the application may vary based on selected browser, theme, and mobile devices.
- Procedure containing steps to complete the transaction- The mandatory and conditional fields of the transaction are explained in the procedure.

If a transaction contains multiple procedures, each procedure is explained. If some functionality is present in many transactions, this functionality is explained separately.

1.5 Related Information Sources

3. Dashboards

Dashboard allows an administrator user to access various administrative functions of the channel banking system. The role of the System/Bank administrator is to manage and administer day-to-day functions of a bank. Administrators can perform various tasks such as doing Day 1 maintenances, maintenances pertaining to retail / corporate banking, creation of roles, user creation, maintenance of party preferences etc.

Dashboards provides a quick view of the most relevant functions, to achieve a particular objective or complete a process. OBAPI supports role specific dashboards for an administrator user. -

- System Administrator Dashboard
- Administrator Maker Dashboard (Bank Administrator maker)
- Administrator Approver Dashboard (Bank Administrator checker)

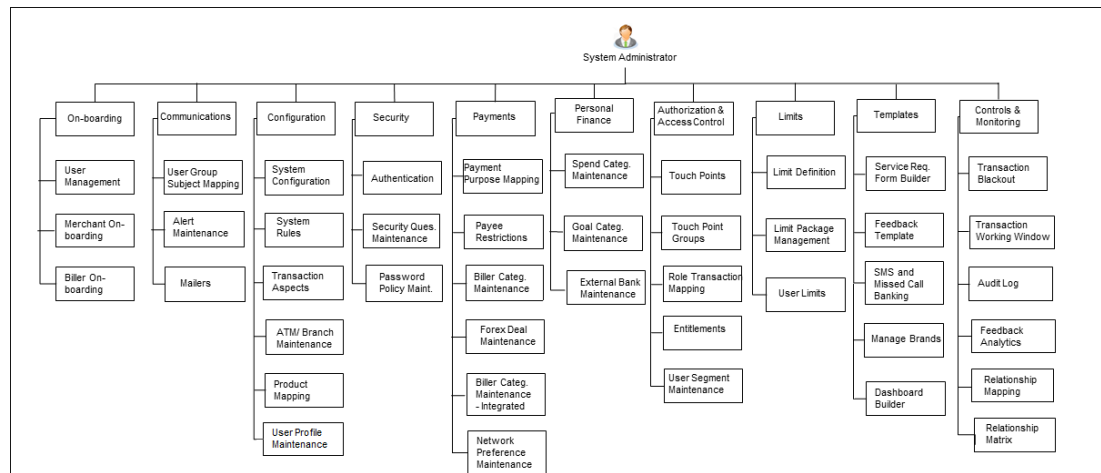

Note: All Administrative maintenances are supported only on 'Desktop' form factor and not supported on 'Mobile' and 'Tablet' .

3.1 System Administrator Dashboard

A System Administrator is responsible for setting up and maintaining the system. System Administrators are the members of the information technology department of the Bank who are mainly responsible for Bank's Day 1 maintenances or other day to day maintenances like Role Transaction Mapping, password policy maintenance and rules and roles maintenances etc.

Note: By default System Administrator role is given access to all the administrative functions. If the Bank wants to change the entitlements, the same can be done using Role Transaction Mapping function.

Summary

Note: Above diagram depicts the transactions available on dashboard. Apart from these transactions, there are other transactions available in the toggle menu.

System Administrator Dashboard – Overview

The System Administrator dashboard comprises of Quick Links, each of which when clicked launches into the respective item.

Dashboard

Onboarding

- User Management
- Merchant Management
- Biller Onboarding

Communications

- User Group Subject Mapping
- Alerts Maintenance
- Mailers

Dashboard Overview

Icons

Following icons are present on the System Administrator dashboard:

-  : Clicking this icon takes you to the dashboard.
-  : Clicking this icon takes you to the Mailbox screen.
-  : Click this icon and enter the transaction name to search the transactions.
-  Welcome, superadmin  : Click this icon to view the user's profile and for logout option
-  : Click the toggle menu to access the list of all the transactions.

Toggle Menu Transactions

Following items are present on the Toggle Menu:

- **Your Current View is:** Select your role as System Administrator. The drop-down to select the role is available only if the user is mapped with more than one role.
- **Select Language:** Select your desired language from the drop-down list.
-  **Configuration** : Click this menu to access the configuration like System Rules, System Configuration, Transaction aspects etc.
-  **Authorization and Access** : Click this menu to setup access controls and authorization related transactions like maintain touch points, Application role creation and entitlement mapping etc.
-  **Security** : Click this menu to access the security setup related transactions like setting up second factor authorization, password policy etc.
-  **Limits** : Click this menu to manage limits.
-  **Onboarding** : Click this menu to onboard and manage Party, users, merchants and billers.
-  **Account Access** : Click this menu to set up account access rules for a corporate.
-  **Approvals** : Click this menu to access and setup Approval workflow and rules for Corporate and Administrator users.
-  **Payments** : Click here to access maintenances with respect to payments.
-  **Personal Financial Manage** : Click this menu to plan finances and track expenditures. It consists of sub menu items like Spend Category Maintenance, Goal Category Maintenance and External Bank Maintenance.

-  **Reports** : Click this menu to generate reports and view the generated reports.
-  **File Upload** : Click this menu to create a file identifier and map it to the user along with file upload and inquiry
- **Communication** : Click this menu to access User Group Subject Mapping, Alert Maintenance and Mailers.
-  **Controls and Monitoring** : Click this menu for controlling and monitoring the transactions like transaction blackout, working window and Audit log.
-  **User Experience** : Click this menu to manage and build your customize dashboards.
-  **Templates** : Click this menu to manage service request form, feedback and SMS banking templates.
-  **OAuth** : Click this menu to manage and limit the third party authorization access to an HTTP service.
-  **Others** : User Group Management, Print Password, Alert Subscription, Request Processing and User Help Desk.
-  **Mail Box** : Click this menu to view the Mails, Alerts and Notifications.
-  **Account Setting** : Click this menu to view the user's profile and login details like start date and time, end date and time, Channel and IP address of the last sessions of the logged in user.
-  **ATM/Branch Locator** : Click to view the address and location of the ATMs and the branches of the Bank.
-  **Security Settings** : Click here to setup security questions and change password.
-  **Help** : Click this menu to launch the online help.
-  **About** : Click this menu to view the information about the application like version number, copyright etc.

Note: The user will be shown the above options only if he has the access to the all the transactions falling under that group.

Administrative Transactions

Following transactions are present on the System Administrator dashboard and in the menu:

- **On-boarding**

- (a) **User Management**

User Management function enables the System Administrator to onboard and manage users along with their login credentials for channel banking access. This module facilitates channel banking access to the bank's internal users (administrators) and external users (customers).

User will get access to all the entities and clients mapped to it. Also the limit packages can get assigned once the user selects the accessible entities.

- (b) **Merchant Management**

Merchant Management facilitates System Administrator to set up and maintain merchants using channel banking platform. This is to enable the customers to initiate merchant based payments using channel banking facility. This option allows the administrator to create / onboard new merchants, view existing merchants and modify their details, if required.

- (c) **Party Preferences (Through Toggle menu)**

Party Preferences maintenance enables Bank administrator to define certain parameter values as per the corporate entities requirements. Following preferences can be set for a corporate party:

- Cumulative Daily/Monthly limits per transaction
- Transaction limits for users
- Approval flow – Parallel or Sequential or none
- To enable Channel access or not
- To enable Forex Deal creation or not
- To enable a Corporate Administrator or not.

- (d) **Party To Party Linkage (Through Toggle menu)**

Party to Party linkage is required by medium and large corporates if the user(s) of the parent company needs to access accounts of the subsidiary companies. For e.g. consider a case wherein 'ABC Industries' is the parent company with a subsidiary company 'PQR Enterprises' and the users of ABC Industries needs to access accounts of PQR Enterprises to carry out transactions and/or inquiries. The corporate will provide a mandate/ board resolution to the bank for creation of Party to Party linkage. Bank administrator will setup a Party to Party linkage by selecting the parent party and the parties to be linked.

- (e) **Biller Onboarding**

Using Biller Onboarding, System Administrators can create billers. The system administrator defines payment methods accepted by biller (e.g. Current and Savings Account, Credit Card, Debit Card etc.) while creating a biller. He also maintains category of the biller, full address of the biller and location/ area in which the biller operates or provides his services.

System Administrator creates billers, which are then made available to the customers to register themselves with these billers to receive and pay bills online.

- **Communications**

- (a) **User Group Subject Mapping**

This maintenance facilitates mapping of subjects, to user groups in the bank, to streamline communication between the bank's users and its end customers.

Once User Groups are mapped to certain transactions or modules, users, in that group can reply to communication pertaining to the specific subject. The communication channel used is the bank's secure mailbox.

This option allows the System Administrator to search and view existing User Group – Subject mapping, modify the existing mapping and to create a new User Group – Subject mapping.

- (b) **Alert Maintenance**

Alerts maintenance allows the System Administrator to define required parameters for each alert that is to be sent to the banks customers.

This option allows the System Administrator to search and view existing alerts, create a new alert and modify or delete an existing alert.

- (c) **Mailers**

Mailers are information or a messages published by the Bank, to communicate about the Banks Products, services and other information to its users. A Bank may send mailers to announce a limited period promotional offer, launch of a product or service, etc.

The System Administrator creates Mailers which are sent to specific users, parties or user segments (all Retail / Corporate / Admin) users. Mailers can be customized to reach some or all users, to be sent now or on a specific date and time, in the future.

- **Configuration**

- (a) **System Configuration**

Using this option System Administrator defines the basic components of this application which is necessary to run the application. The creating of system configuration is done at 'Day 0' configuration.

- (b) **System Rules**

System rules are defined to set different parameters for each enterprise role. The parameters that can be set for each enterprise role (Retail or Corporate Users) are Party Mapping, Limits Check, Party Preferences Check, Account Transaction Mapping, First Time Login Steps and Approvals Check. If these parameters are enabled, application will check for a fulfillment of the maintenances, before final processing.

E.g. If Approval check flag is enabled for 'Corporate User' type of enterprise role; transactions initiated by corporate users will follow the approval maintenance. If approval check flag is disabled for Retail Users, transactions initiated by retail user will not follow the approval maintenance and will get auto-approved by the system.

This screen allows the System Administrator to search and view existing system rules, create new system rule, and modify an existing system rule.

(c) Transactions Aspects

Using this option, System Administrator can define the aspects for a transaction. Depending on the aspects defined for a transaction through this maintenance, the transaction will be available/unavailable for selection in the respective maintenance screen.

User can view the aspects for a selected transaction and also edit the aspects i.e. enable/disable the aspects for the selected transaction.

(d) ATM/ Branch Maintenance

ATM Branch Locator feature available to the bank customers enables the users to locate the bank's ATMs/ branches available within a specific radius of his current location.

For the customers, to fetch the relevant information related to ATMs and Branches, system administrator maintains the data at their local databases. The basic details of ATMs and Branches are fetched from the core banking application, which is further enriched and stored in local database. This is a one-time activity at the time of implementation. Subsequently, as and when branches and ATMs are added, or any details regarding them updated, the administrator performs the necessary updates to the bank database.

Using this option, the System Administrator can search and view the ATM/ branch and its details (Fetched from Core Banking application) which include branch/ ATM id, branch name, address details, phone number, work timings and services offered by the bank. New ATM and branch details can also be manually added, viewed and edited.

The bank administrator can manually add new branch/ ATM details one by one, or add multiple branches / ATMs details simultaneously through file upload.

(e) Product Mapping

Product Mapping feature allows the System Administrator to map products with the channel. The business users will be able to access accounts related to the products mapped to the channel.

The System Administrator will be allowed to register the banks products to be made available to bank users for opening further accounts.

(f) User Profile Maintenance

This function enables the System/ Bank Administrator user to manage the user profile details that needs to be shown and needs to be made available for modification for Retail users. Details maintained on user profile includes date of birth, PAN card number, Aadhar number, passport number, national ID, driving license, communication address, email ID, and contact number, fax number, etc.

In a multi entity scenario, Administrator can do this setup for each entity by selecting the entity.

- **Security**

(a) Authentication

Passwords are the most common form of authentication used in the world today. But passwords are commonly forgotten and easily compromised. Two-factor authentication (2FA) adds an extra layer of security by requiring users to use two different authentication factors to verify user's identity.

The two step verification or Two Factor Authentication is an extra layer of security that is a subset of "multi factor authentication" that requires not only a password and username but also something that user has or something user knows or something they are e.g. tokens, OTP, biometrics etc. Using a Two Factor Authentication process can help to lower the number of cases of identity theft on the Internet, as well as phishing via email. For security reason authentication is used by user (Retail/ Corporate) while performing transactions through internet channel.

The two factor Authentication requires two different kinds of evidences before executing any transaction successfully. This option enables the system administrator to maintain authentication pattern for each transaction of a specific user segment.

The types of two factor authentication used in the application are as follows:

- Security Question
- Soft Token
- One Time Password (OTP)

(b) Security Question Maintenance

Application allows the System Administrator user to set up security questions, which will then be used as another layer of security (Over and above the Login credentials), before a user (Retail/ Corporate) can complete transactions through the internet channel.

Through the Manage Security Questions functionality, the administrator user can create and modify security questions that need to set and answered by user for completing any transaction. Administrator can add the security questions, if required.

(c) Password Policy Maintenance

Password policy maintenance enables System Administrator to define password parameters for users. Using this option System Administrator create, view and edit password policy for different user role/segments (Admin, Retail, and Corporate). Password policy maintenance contains following sections:

- **Password Validators:** This section contains the validations for a password. The validations include minimum and maximum length of the password, allowed characters in a password, repetitive and successive characters allowed, details to be excluded in the password like, date of birth, first and last name, user ID and party ID, and bank defined restricted passwords. User can also define number of successive incorrect attempts allowed, and number of previous password disallowed.
- **Password Expiry Parameters:** This section contains details about password expiry period, first password expiry period, and whether to force user to change password if there is a change in password policy (so that users can change their password as per the new password policy).

(d) Security Keys (Through Toggle menu)

Security key includes:

Password Encryption and Decryption with Public and Private Key Pairs:

Encryption and decryption allow communication between two parties to disguise information. The sender encrypts information before sending it and the receiver decrypts the information after receiving it. While in transit, the information is encrypted to ensure that it is protected from an intruder.

- Public and Private key pair helps to encrypt information that ensures sensitive data is protected during transmission. Whatever is encrypted with a Public Key can only be decrypted by its corresponding Private Key and vice versa.
- JWT Encryption Key: A JSON web token is a JSON object to represent a set of information. On sign in, user is authenticated and JWT token is generated. This JWT is subsequently passed to make API calls. To keep sensitive information hidden from the bearer (client) or third parties, JWT should be encrypted. A single key can be used to encrypt the data, if the JWT is encrypted with the key then the data can be decrypted using the same key.

- **Payments**

- (a) **Payment Purpose Mapping**

System Administrator maps purposes of payments (the purpose of initiating a payment transaction as maintained in Core Banking or Product processor) to a payment type.

System Administrator can search and View the mapped payments purposes, map / un-map the payments purposes.

- (b) **Payee Restrictions**

Payee Restriction Set up maintenance allows System Administrator to restrict the number of payees that a retail user can create for each payment network per day.

System Administrator can also restrict the total number of payees irrespective of payment network that the retail user can create per day.

This option allows the administrator to create payee restriction maintenance, View and Edit existing maintenance.

- (c) **Biller Category Maintenance**

System Administrator creates new biller categories and map it to the billers. E.g. administrator can create biller category as 'Insurance' and use it as Biller Category when creating billers related to insurance.

The System administrators can change the order of the categories as per their priority by dragging the categories. In the business user screen, these categories appear in the same order for selection to the customers, as defined by the administrators.

- (d) **Forex Deal Maintenance**

Using Forex Deal Maintenance option, System Administrator can maintain currency pair. The maintained currency pairs are made available to corporate users to book deals and utilize those while making payments. Based on the treasury system, timer window can also be set for each currency pair so that the deal expires after the setup time, which helps corporate user to get the latest rate possible.

- (e) **Biller Category Maintenance - Integrated**

Using biller category mapping maintenance, System Administrators can map a Biller Category to each Biller maintained in the core banking system.

System Administrator creates biller category (e.g. Insurance) and maps billers (e.g. 'United Health Care' and AXA) to each type of Biller Category through channel banking, which are then made available to the customers for selection while initiating a bill payment.

This option allows the administrator to manage Biller Category, Map Billers, View Biller Mapping and Edit Biller Mapping).

- (f) **Network Preference Maintenance**

Network suggestion is a feature that is provided to retail and corporate users as part of the domestic transfer (India region) offering. If domestic transfer network suggestion is enabled in system configuration, when a business user initiates a domestic transfer, the system will identify which networks (NEFT, IMPS or RTGS) are supported for the transfer based on certain factors such as payee bank support of networks, network limits and working window maintenance. The system will also suggest a network, out of the enabled networks, based on the preferences defined for each domestic network by the administrator from the Network Preference Maintenance screen.

- **Personal Finance**

- (a) **Spend Category Maintenance**

Using this option, the System Administrator can maintain the spend categories. Spend Category maintenance allows the administrator to create, modify or expire categories under which user can map expenses.

- (b) **Goal Category Maintenance**

Goal Category maintenance allows the System Administrator to create, modify or expire goal categories. This maintenance is done only for Retail users and is not applicable to corporate.

The System Administrator created categories are linked with a product which will decide the other key parameters which will govern the Goal category. These parameters could be:

- Goal Amount Range (Minimum and Maximum Value)
- Interest Rate Offered
- Tenure Range (Minimum and Maximum)

The System Administrator can search and view goal categories, create a new goal category, and modify an existing goal category.

- (c) **External Bank Maintenance**

The account aggregation feature empowers customers to view information of financial accounts that are external to OBAPI, in addition to the customer's OBAPI accounts. This feature also provides the customer with a consolidated view of accounts, net worth and recent transactions, across OBAPI and external bank accounts.

To enable a retail user to access external bank accounts, and aggregate accounts with OBAPI, the system administrator has to perform External Bank Maintenance

- **Authorization and Access Controls**

- (a) **Touch Points**

Touch Points are different channels/ medium through which transactions or inquiries can be performed in OBAPI. These can be created or modified under this section.

Touch Points in OBAPI are of type 'Internal' and 'External'. Internal Touch Points are defined as part of Day 0 definition whereas External Touch Points are typically third party applications that can be defined by the System/ Bank Administrator as part of onboarding in OBAPI

- (b) **Touch Points Groups**

Touch Points are different channels e.g. Internet, Mobile, SMS, Third Party applications etc. through which the OBAPI services can be accessed. This maintenance enables the System Administrator user to group two or multiple touch points together for the purpose of defining common limits for a transaction accessed from any touch point grouped together.

- (c) **Role Transaction Mapping**

This function enables System Administrator to create Application Role and transaction mapping to application roles will be done for Touch Points. Administrator can create the application roles for the User Segments (Retail/ Corporate/ Administrator) and map the transactions to the application roles for internal as well as external touch points. The benefit of mapping the transactions on a touch point is that the Bank can control transaction access at each touch point.

- (d) **Entitlements**

Entitlements are the transactions that the user can perform. Each Entitlement is linked to a single or group of resources.

Using this transaction user can view and edit the services and UI components linked to an entitlement for different actions i.e. Perform, Approve, and View.

(e) User Segment Maintenance

In order to offer appropriate product and services to the customers, banks can employ some method of segmentation. Banks can group customers into different segments based on different attributes of the customer; it could be demographic information, geographical information, behavioral information etc.

Banks can have different communication mailers, authentication mechanisms transaction limits and branding aspects based on customer segmentation.

User segment maintenance screen, allows the system administrator to create new segments and subsequently use these segments to define specific maintenances at user segment level. Limits can also be defined specific to a user segment. Within each user segment, limits package can be associated to different touch points.

• **Limits**

(a) Limit Definition

Limits are defined by the bank to set up amount and duration based restrictions on the transactions that can be carried out by the user.

As part of Limits Definition maintenance, the System Administrator can define:

- **Transaction Limits:** It is the initiation limit with minimum and maximum amount, defined typically for a user with role 'Maker'.
- **Cumulative Limits:** It is the collective transaction amount limit for all the transactions that can be performed during a day and maximum **number of transactions in a day**.
- **Cooling Period Limits:** It is the time set by the bank during which fund transfer is not allowed to a newly added payee.

This option allows the System Administrator to search and view limits, create limits and edit / delete existing limits.

(b) Limits Package Management

As part of the Limits Package definition, the created limits can be mapped to relevant transactions and/or roles.

The Limits Packages once created can be associated at User Level, Party Level and Role Level at an touch point level.

This option allows the System Administrator to search and view Limit Package, create a new Limit Package, and edit / delete existing Limit Package.

(c) Transaction Group Maintenance (Through Toggle menu)

Transaction group maintenance enables the System Administrator user to create and maintain group of transactions. Administrator can maintain a transaction group for the purpose of defining consolidated transaction limits. Once limits are assigned at transaction group, these limits acts as collective limit for selected transactions in a group.

(d) User Limits

This option allows the System Administrator to view the current available and utilized limits of specific retail user and also can modify (increase or decrease) the limits as per the requirement.

The user limits can be set for specific transaction level or at transaction group level or for a specific channel or for a group of channels.

The different types of limits are as follows:

- Daily Count- Permitted number of transactions in a day
- Daily Amount- Cumulative amount of transactions in a day
- Monthly Count- Permitted number of transactions in a month
- Monthly Amount- Permitted number of transactions in a month

- **Templates**

- (a) **Service Request Form Builder**

Service Request Form Builder transaction allows the system administrator to define service requests by defining its attributes and by building the form (Request page that should be available to business user) which are then available for Retail users for creating a new Service Request.

- (b) **Feedback Template**

Using this option, the System Administrator can maintain the feedback templates by defining the feedback question, selecting the rating scale, adding new questions along with new options, selecting the transactions for which feedback capture needs to be enabled.

The administrator can also decide whether an additional question is to be asked for a scale weight and select the applicable options for the question.

- (c) **SMS and Missed Call Banking**

Using this option, the System Administrator can maintain the sms and missed call templates. The templates can be defined as:

- **SMS:** You can set the template / format of the message, which the account holder will be sending to the bank to receive the information in a specified format.
- **Missed Call:** You can set the template / format the account holder will receive, once he / she gives a miss call on the specified phone number.

- (d) **Manage Brand**

Banks can have varied requirements with regards to the theme and for look and feel of the application.

Manage Brand is an administrative maintenance that allows the System Administrator to define the preferred theme for the application.

There is a list of categories on the left of the screen to choose from. System administrator can click and navigate the categories to upload their bank logo, select the preferred colors of the headers, back ground, Font, label, buttons etc. System administrator can also set the font style and font size.

- (e) **Dashboard Builder**

Dashboard Builder is an administrative maintenance that allows the System Administrator to create and configure dashboard templates for Retail and Corporate users.

System Administrator can configure new dashboards by dragging and dropping the desired widget at desired location in template. And also can add and edit rows and columns while configuring new dashboard to add more widgets. Facility is also provided to search, view, edit and delete the configured dashboards.

These configured dashboards are responsive and can adapt to any type device that Bank wants to enable it to the customers' i.e. desktop, mobile and tablet. System allows the user to design new template and preview on different types of devices before enabling it.

The administrator can define multiple dashboards with the various attributes/ widgets. Further these templates can be mapped to the user segment, party or even to a specific user.

- **Controls & Monitoring**

- (a) **Transaction Blackout**

The System Administrator can maintain a transaction blackout, for a period, when transaction/s are not accessible to users of the bank's retail and corporate or even to Bank administrators, for a preset time period.

The administrator may use the time, when a transaction is blacked-out, to do necessary maintenances.

Through this maintenance, the System Administrator can create a transaction blackout, User can search and view existing blackouts, and modify these if required. User can delete future dated blackouts.

- (b) **Transaction Working Window**

A working window is maintained, by the System Administrator for each transaction for which a value date is applicable for processing. In order to enable such transactions on the channel, it is mandatory to define a working window for all the days of a week as Day 0 Maintenance. By performing this maintenance, the System Administrator defines the channel working window for each day of the week for a specific transaction.

Further, administrator can also define the processing pattern if the transaction is initiated by customers after the window is closed. Through this maintenance, the System Administrator can create a working window for a transaction, and also can create an exception to the normal window. User can search and view existing maintenances, and modify these if required.

- (c) **Audit Log**

Audit log is set of records that provide information about operations performed in the application and details of the user who has performed it along with date and time when it was performed. The System Administrator can search and view the Audit Log.

- (d) **Feedback Analytics**

Using this option, the System Administrator can analyze the feedback for different transactions. System Administrator can view top and bottom three transactions based on average customer review or he can search for individual transactions for a selected time period. Feedback Analytics gives the bank a quick analysis of the feedback information collected. The analytics covers information the average of feedback ratings transactions have got, trends in how the average ratings have changes, the top and bottom transactions in terms of ratings etc. The analytics helps banks in quickly identifying the pain points in customer journeys in the system points out the specific areas for improvement and action.

Using this option, the System Administrator can analyze the feedback given by users of the system.

- (e) **Relationship Mapping**

Customer Relationship Maintenance enables the System Administrator to set up the transaction access logic for Bank's retail customers from Digital Banking Platform based on their account - mode of operation or relationship.

E.g. If a customer relationship (Mode of operation) is 'Either or Survivor', provide an access of all transactions whereas, if a customer relationship (Mode of operation) is 'Jointly', provide an access of all Inquiries and restrict all financial transactions from Digital Banking Platform. Such account and transaction access rules can be set up by the System Administrator using 'Relationship Maintenance Module'.

(f) Relationship Matrix

Relationship Matrix maintenance allows the System Administrator to define the transaction access based on the account relationships. Administrator can enable or disable each transaction for each relationship code. OBAPI first checks if the transaction is enabled in a role attached to a user and then if it is enabled in relationship matrix. If both the conditions are satisfied, an access of a transaction and of an account is provided to the user.

Additional options accessible via Menu

- **Access Management**

Account Access**(a) Party Account Access**

Bank Administrator can set up account and transaction access rules at the corporate party level. The administrator can provide access to accounts held by the party with the bank as available in the core banking system. Bank Administrator maker can search and view accounts and transactions mapping done at primary party and linked party. User can create, modify and delete such mapping.

(b) User Account Access

Alerts maintenance allows the System Administrator to define required parameters for each alert that is to be sent to the banks customers.

This option allows the System Administrator to search and view existing alerts, create a new alert and modify or delete an existing alert.

Resource Access**(a) Party Resource Access**

As part of Resource Access Management, administrator can define access on resources other than account like Remitter List from Virtual Account Management for a Corporate Party.

(b) User Resource Access

As part of Resource Access Management, administrator can define access on resources other than account like Remitter List from Virtual Account Management for a specific corporate user.

Approvals**(a) Workflow Management**

Approval workflows are created to support requirements where multiple levels of approval are required in a specific sequence for a transaction/maintenance. Each workflow can be configured to have up to 5 levels of approval with a specific user or a user group configured at each level.

System Administrator can search and view approval workflows maintained and create new workflows. As a part of creating workflows, user can add various levels of approvals and map users or user groups to each level. User can also modify workflows maintained.

(b) Rules Management

The Administrator, can set up rules for approvals. Applying a rule makes the requirement for an approval more customized. For instance, through this screen, the bank administrator can create a rule, so that all administrator maintenances initiated by a certain user-group, always require approval.

- **Reports**

- (a) **Report Generation**

Using this option, the System Administrator, can generate various adhoc reports. Application provides an option to generate reports using Oracle Business Intelligence (BI) Publisher and / or by using an internal application.

- (b) **My Reports**

On accessing 'My Reports' menu, the System Administrator, can view the last 10 reports generated with the respective report status. He can choose to search a specific report using the search criteria or can opt to view/ download detailed report.

- (c) **User Report Mapping**

The user report mapping maintenance allows the Bank Administrators to map the report or set of reports to a specific corporate user. The corporate users can generate and view the reports which they have an access to.

Bank administrator searches a corporate user based on the party id and view the reports mapped to him, he can also un-map the reports from specific corporate user so that access of the specific report/ s can be removed to that corporate user.

The System Administrator can also map the accounts of primary and linked parties for which the reports can be generated by a corporate user, so that corporate user can generate the report only for the accounts mapped to him.

- **File Upload**

- (a) **File Identifier Maintenance**

System Administrator, can create file identifiers (FI) for a corporate entity. A File Identifier is always mapped to a specific single file template. It permits configuration of corporate preferences like approval type (file level/ record level) for a particular type of file. This is a pre-requisite for the File Uploads functionality, for a corporate.

- (b) **User File Identifier Mapping**

Through this option Administrator, can map a file identifier to a user to grant access rights to the user, for this specific file type. This maintenance enables a user to upload a specific file, approve the uploaded file and view its status. System administrator can map / un-map file identifiers to a User. Further, user can enable or disable the sensitive data check. This is a pre-requisite maintenance, for the File Uploads functionality, for a corporate.

- (c) **File Upload**

This option allows the System administrator user to upload the files containing EBPP Billers. Billers uploaded will be available for retail users to register and make online bill payment & pre-paid recharge transactions.

- (d) **Uploaded File Inquiry**

Through this option the user can view the Billers file uploaded and their status.

- The search can be filtered on various parameters like status and file reference ID.
- The user can track the status of the file and if there is an error in the file, he / she can download the error file to arrive at the exact reason for error.
- For files in the 'Processed' status, the user can download Response file, to vet status of processing (in the host) for each record, of the file.
- The user can track file history and also check Individual record details.

- **OAuth**

- (a) **Identity Domain Maintenance**

The Identity Domain corresponds to the notion of a tenant and each identity domain corresponds to an identity store. All artifacts such as resource server and client needs to be created under an identity domain.

As part of the Identity Domain definition, Identity store as well as token settings can be defined.

Currently only 'Embedded LDAP' i.e. DB Authenticator as Identity Store is supported.

- (b) **Resource Server Maintenance**

The resource server is the server that contains the user's information that is being accessed by the third party application and handles authenticated requests after the application has obtained an access token.

Resource Server is always associated to one Identity Domain. Through this maintenance, the administrator can define scopes for the resource server. Scopes are transactions or inquiries that are provided to the client so that the TPP/client can transact or inquire on behalf of the customer with an access token provided the customer has provided consent to the TPP.

- (c) **Client Maintenance**

Clients are Third Party Provides (TPPs) that can access information from the resource server on behalf of the user provided the user has provided consent to the TPPs. As part of this definition, the administrator can define client details i.e. client ID, client name, scopes, redirect URLs etc.

- **Others**

- (a) **Origination Workflow Configuration**

Workflow configuration allows the System Administrator to define the sequence of the sections in application form for each of the products.

There will be a default workflow defined in the product as part of Day0 definition for each of the product along with identified set of steps; bank administrator will have an option to view the default workflow for each of the products. If the sequence defined for a product does not suit the bank requirements, the admin can opt to create a custom workflow by re-arranging the steps.

- (b) **User Group Management**

The System Administrator, can create administrator and corporate user groups with two or more users. User can search and views already maintained groups, and also modify these. The maintained administrator user groups are used for further maintenances like – User Group Subject Mapping or while creating approval rules.

- (c) **Print Password**

When a new user opens an account in the bank and registers for internet banking, the bank sends the printed password along with some other documents like Welcome letter, Terms & Conditions document and applicable promotional offers to the registered user via courier or post. This screen allows the Bank Administrator to print the password along with these documents for new users as well as for existing users who have requested for reset password.

- (d) **Alert Subscription**

The System Administrator, can subscribe users to mandatory alerts, through this option. In addition, Retail and Corporate users of the bank, can subscribe to alerts, and choose whether they want alerts delivered through Email, SMS or in their secured mailbox. The bank administrator processes the subscription request, received from customers. (For non-mandatory alerts).

(e) Request Processing

Service requests allows the System Administrator to search and view all the service requests that have been initiated by the Bank customers and are available with various statuses like Open, Completed and Rejected. Bank Administrator can search the service requests with specific search criteria and can update the status of open service requests.

(f) User Help Desk

This option enables the Administrator to create business user's session and perform the transaction requested by business user if he has forgotten his internet banking password or is unable to perform a transaction using his internet banking.

To authenticate the user, system will send an OTP to the customer and the same OTP needs to be communicated to the administrator user so that he can enter it on the screen to create user's session.

(g) Message Maintenance

Using this option, System Administrator can inquire the existing Error Messages defined in the system for an OBAPI error code. It also allows you to modify the text defined for a message code for a particular Language.

- **Notifications**

The notification section allows the System Administrator user to view last 'N' number of notifications sent by the bank. Click **View All** to view all the notifications sent by the bank.

Note:

1) If the setup requires an approval workflow, it will be initiated. Once approved by the required number of approvers, the maintenance will be effective.

2) If the setup does not require an approval workflow or is self / auto approved, the maintenance will come into effect on confirmation.

- **Activity Log**

The System Administrator can view the log of activities here. For ease of use, he can provide a Date Range and search.

Icons

- : Click this icon to open the section in a new window.
- : Click this icon to search the transactions that are performed on a particular date. It has two fields From and To, you can select the start and end date to search the transaction.

(a) Corporate

In the Corporate activity log, the System Administrator, can view the activities performed for a corporate party id. The following fields are displayed.

- Date: Date of the maintenance
- Description: Description of the maintenance
- Party Name: Party Name
- Reference Number: Reference number of the maintenance.
- Status: Status of the maintenance

(b) Administrative Maintenance

Through the Admin Activity log, the System Administrator can view the Bank Administrator activities. The following fields are displayed:

- **Date:** Date of the maintenance
- **Description:** Description of the maintenance
- **Reference Number:** Reference number of the maintenance.
- **Status:** Status of the maintenance

(c) Bulk File Administrator

In Bulk File Activity Log, the Administrator can view the bulk file activities. The following fields are displayed.

- **Date:** Date of the maintenance
- **File Identifier:** Unique code assigned to files as required by parties
- **File Name:** Name assigned to files.
- **Initiated by:** Initiator of the Party Maintenance.
- **Reference No:** Reference number of the maintenance.
- **Status:** Status of the maintenance.

(d) Bulk Record Administrator

In Bulk Record Activity Log, the Administrator can view the bulk record activities. The following fields are displayed.

- **Date:** Date of the maintenance
- **File Identifier:** Unique code assigned to files as required by parties
- **File Name:** Name assigned to files
- **Initiated by:** Initiator of the Party Maintenance.
- **Reference No:** Reference number of the maintenance.
- **Status:** Status of the maintenance

Transaction Journey

Click the **Reference Number** link in the **Activity Log** section to view the Transaction Journey.

This screen displays the transaction details and transaction journey of corporate and administrator transactions. It displays the current status of transaction whether it is Initiated, Approved or Processed.

- Completion

3.2 Administrator Maker Dashboard

Bank Administrator Maker’s role involves the maintenances which are mainly required for day to day business in banks. Maintenances like onboarding the users on Digital Platform and providing them the account and transactions access, etc.

Note: Transactions appearing in toggle menu for Bank Administrator – Maker is same as ‘System Administrator’ transactions depending upon the access provided to the associated role in Role Transaction Mapping maintenance.

Summary

Maker Dashboard - Overview

The Bank administrator – Maker dashboard comprises of:

- Quick Links
- Activity Log

Dashboard Overview

Icons

Following icons are present on the maker's dashboard:

-  : Clicking this icon takes you to the dashboard.
-  : Clicking this icon takes you to the Mailbox screen.
-  : Click this icon and enter the transaction name to search the transactions.
-  : Click this icon to view the user's profile and for logout option
-  : Click the toggle menu to access the list of all the transactions.

Toggle Menu Transactions

Following items are present on the Toggle Menu:

- **Your Current View is:** Select your role as maker. The drop-down to select the role is available only if the user is mapped with more than one role.
- **Select Language:** Select your desired language from the drop-down list.
-  **Configuration** : Click this menu to access the configuration like System Rules, System Configuration, Transaction aspects etc.
-  **Authorization and Access** : Click this menu to setup access controls and authorization related transactions like maintain touch points, Application role creation and entitlement mapping etc.

-  **Security** : Click this menu to access the security setup related transactions like setting up second factor authorization, password policy etc.
-  **Limits** : Click this menu to manage limits.
-  **Onboarding** : Click this menu to onboard and manage Party, users, merchants and billers.
-  **Account Access** : Click this menu to set up account access rules for a corporate.
-  **Approvals** : Click this menu to access and setup Approval workflow and rules for Corporate and Administrator users.
-  **Payments** : Click here to access maintenances with respect to payments.
-  **Personal Financial Manage.** : Click this menu to plan finances and track expenditures. It consists of sub menu items like Spend Category Maintenance, Goal Category Maintenance and External Bank Maintenance.
-  **Reports** : Click this menu to generate reports and view the generated reports.
-  **File Upload** : Click this menu to create a file identifier and map it to the user along with file upload and inquiry
- **Communication** : Click this menu to access User Group Subject Mapping, Alert Maintenance and Mailers.
-  **Controls and Monitoring** : Click this menu for controlling and monitoring the transactions like transaction blackout, working window and Audit log.
-  **User Experience** : Click this menu to manage and build your customize dashboards.
-  **Templates** : Click this menu to manage service request form, feedback and SMS banking templates.
-  **OAuth** : Click this menu to manage and limit the third party authorization access to an HTTP service.
-  **Others** : User Group Management, Print Password, Alert Subscription, Request Processing and User Help Desk.
-  **Mail Box** : Click this menu to view the Mails, Alerts and Notifications.
-  **Account Setting** : Click this menu to view the user's profile and login details like start date and time, end date and time, Channel and IP address of the last sessions of the logged in user.

-  [ATM/Branch Locator](#) : Click to view the address and location of the ATMs and the branches of the Bank.
-  [Security Settings](#) : Click here to setup security questions and change password.
-  [Help](#) : Click this menu to launch the online help.
-  [About](#) : Click this menu to view the information about the application like version number, copyright etc.

Note: The user will be shown the above options only if he has the access to the all the transactions falling under that group.

Quick Links

On-boarding

(a) User Management

Bank Administrator can search and view users, create users and modify users. User can reset passwords of the users. Bank Administrator can also change the user status (lock/unlock) and grant/deny the channel access to a user, through this option.

(b) Party Preferences

Party Preferences maintenance enables Bank administrator to define certain parameter values as per the corporate entities requirements. Following preferences can be set for a corporate party:

- Cumulative Daily/Monthly limits per transaction
- Transaction limits for users
- Approval flow – Parallel or Sequential or none
- To enable Channel access or not
- To enable Forex Deal creation or not
- To enable a Corporate Administrator or not.

Approvals

(a) Workflow Management

Approval workflows are created to support requirements where multiple levels of approval are required in a specific sequence for a transaction/maintenance. Each workflow can be configured to have up to 5 levels of approval with a specific user or a user group configured at each level.

Bank Administrator Maker can search and view approval workflows maintained and create new workflows. As a part of creating workflows, user can add various levels of approvals and map users or user groups to each level. User can also modify workflows maintained.

(b) Rules Management

The Bank administrator – Maker, can set up rules, for approvals. Applying a rule makes the requirement for an approval more customized. For instance, through this screen, the bank administrator can create a rule, so that all administrator maintenances initiated by a certain user-group, always require approval.

Account Access**(a) Party Account Access**

Bank Administrator can set up account and transaction access rules at the corporate party level. The administrator can provide access to accounts held by the party with the bank as available in the core banking system. Bank Administrator maker can search and view accounts and transactions mapping done at primary party and linked party. User can create, modify and delete such mapping.

(b) User Account Access

Using this option Bank Administrator can set up account and transaction access for user(s) of the corporate party. This maintenance can be done only after the Party Account Access is setup for the party of the user(s). Bank Administrator maker can search and view account and transaction mapping of a specific user. User can create, modify and delete mapping of a user to an account / transaction.

Resource Access**(a) Party Resource Access**

As part of Resource Access Management, administrator can define access on resources other than account like Remitter List from Virtual Account Management for a Corporate Party.

(b) User Resource Access

As part of Resource Access Management, administrator can define access on resources other than account like Remitter List from Virtual Account Management for a specific corporate user.

File Upload**(a) File Identifier Maintenance**

Bank administrator – Maker, can create file identifiers (FI) for a corporate entity. A File Identifier is always mapped to a specific single file template. It permits configuration of corporate preferences like approval type (file level/ record level) for a particular type of file. This is a pre-requisite for the File Uploads functionality, for a corporate.

(b) User File Identifier Mapping

Through this option Bank Administrator – Maker, can map a file identifier to a user to grant access rights to the user, for this specific file type. This maintenance enables a user to upload a specific file, approve the uploaded file and view its status. Bank administrator maker can map / un-map file identifiers to a User. Further, user can enable or disable the sensitive data check. This is a pre-requisite maintenance, for the File Uploads functionality, for a corporate.

Origination Administrator**(a) Workflow Configuration**

Workflow configuration allows the Bank Administrator to define the sequence of the sections in application form for each of the products.

There will be a default workflow defined in the product as part of Day0 definition for each of the product along with identified set of steps; bank administrator will have an option to view the default workflow for each of the products. If the sequence defined for a product does not suit the bank requirements, the admin can opt to create a custom workflow by re-arranging the steps.

Others**(a) Request Processing**

Service requests allows the Bank Administrator- maker to search and view all the service requests that have been initiated by the Bank customers and are available with various statuses like Open, Completed and Rejected. Bank Administrator can search the service requests with specific search criteria and can update the status of open service requests.

(b) Feedback

Using this option, the Administrator can maintain the feedback templates by defining the feedback question, selecting the rating scale, adding new questions along with new options, selecting the transactions for which feedback capture needs to be enabled.

The administrator can also decide whether an additional question is to be asked for a scale weight and select the applicable options for the question.

(c) User Help Desk

This option enables the Administrator to create business user's session and perform the transaction requested by business user if he has forgotten his internet banking password or is unable to perform a transaction using his internet banking.

To authenticate the user, system will send an OTP to the customer and the same OTP needs to be communicated to the administrator user so that he can enter it on the screen to create user's session.

Note:

- If the setup requires an approval workflow, it will be initiated. Once approved by the required number of approvers, the maintenance will be effective.
- If the setup does not require an approval workflow or is self / auto approved, the maintenance will come into effect on saving and confirming.

Activity Log

The Bank Administrator – Maker, can view the log of activities here. For ease of use, user can provide a Date Range and search.

Icons

-  : Click this icon to open the section in a new window.
-  : Click this icon to search the transactions that are performed on a particular date. It has two fields From and To, you can select the start and end date to search the transaction.

(a) Corporate Activity Log

In the Corporate activity log, the bank administrator – Maker, can view the activities of corporate users. The following fields are displayed.

- Date: Date of the maintenance
- Description: Description of the maintenance
- Party Name: Party Name
- Reference Number: Reference number of the maintenance.
- Status: Status of the maintenance

(b) Administrative Activity Log

Through the Admin Activity log, the bank administrator - maker can view the bank admin activities. The following fields are displayed:

- Date: Date of the maintenance
- Description: Description of the maintenance
- Reference Number: Reference number of the maintenance.
- Status: Status of the maintenance

(c) Bulk File Administrator Activity Log

In Bulk File Activity Log, the Bank **Administrator** – maker, can view the bulk file activities. The following fields are displayed.

- Date: Date of the maintenance
- File Identifier: Unique code assigned to files as required by parties
- File Name: Name assigned to files.
- Initiated by: Initiator of the Party Maintenance.
- Reference No: Reference number of the maintenance.
- Status: Status of the maintenance

(d) Bulk Record Administrator Activity Log

In Bulk Record Activity Log, the Bank Administrator – maker, can view the bulk record activities. The following fields are displayed.

- Date: Date of the maintenance
- File Identifier: Unique code assigned to files as required by parties
- File Name: Name assigned to files
- Initiated by: Initiator of the Party Maintenance.
- Reference No: Reference Number of the maintenance.
- Status: Status of the maintenance

Transaction Journey

Click the **Reference Number** link in the **Activity Log** section to view the Transaction Journey.

This screen displays the transaction details and transaction journey of corporate and administrator transactions. It displays the current status of transaction whether it is Initiated, Approved or Completed.

- Status: Status of the maintenance

Quick Links

Onboarding

(a) User Management

The Bank Administrator can search and view users, create users and modify users. User can reset passwords of the users. Also user can lock / unlock a user, through this option.

(b) Party Preferences

Party Preferences maintenance enables Bank Administrator to define certain parameter values as per the corporate entities requirements. Following preferences can be set for a corporate party:

- Cumulative Daily/Monthly limits per transaction
- Transaction limits for users
- Approval flow – Parallel or Sequential or none
- To enable Channel access or not
- To enable Forex deal or not
- To enable a Corporate Administrator or not.

Approvals**(a) Workflow Management**

Approval workflows are created to support requirements where multiple levels of approval are required in a specific sequence for a transaction/maintenance. Each workflow can be configured to have up to 5 levels of approval with a specific user or a user group configured at each level.

Bank Administrator Approver can search and view approval workflows maintained and create new workflows. As a part of creating workflows, user can add various levels of approvals and map users or user groups to each level. User can also modify workflows maintained.

(b) Rules Management

The Bank administrator – Approver, can set up rules, for approvals. Applying a rule makes the requirement for an approval more customized. For instance, through this screen, the Bank Administrator can create a rule, so that all administrator maintenances initiated by a certain user-group, always require approval.

Account Access**(a) Party Account Access**

Bank Administrator can set up account and transaction access rules at the corporate party level. The administrator can provide access to accounts held by the party with the bank as available in the core banking system. Bank administrator Approver can search and view accounts and transactions mapping done at primary party and linked party. User can create, modify and delete such mapping.

(b) User Account Access

Using this option Bank Administrator can set up account and transaction access for user(s) of the corporate party. This maintenance can be done only after the Party Account Access is setup for the party of the user(s). Bank administrator Approver can search and view account and transaction mapping of a specific user. User can create, modify and delete mapping of a user to an account / transaction.

Resource Access**(a) Party Resource Access**

As part of Resource Access Management, administrator can define access on resources other than account like Remitter List from Virtual Account Management for a Corporate Party.

(b) User Resource Access

As part of Resource Access Management, administrator can define access on resources other than account like Remitter List from Virtual Account Management for a specific corporate user.

File Upload**(a) File Identifier Maintenance**

Bank administrator – Approver, can create file identifiers (FI) for a corporate entity. A File Identifier is always mapped to a specific single file template. It permits configuration of corporate preferences like approval type (file level/ record level) for a particular type of file. This is a pre-requisite for the File Uploads functionality, for a corporate.

(b) User File Identifier Mapping

Through this option bank administrator – Approver, can map a file identifier to a user to grant access rights to the user, for this specific file type. This maintenance enables a user to upload a specific file, approve the uploaded file and view its status. Bank administrator Approver can map / un-map file identifiers to a User. Further, user can enable or disable the sensitive data check. This is a pre-requisite maintenance, for the File Uploads functionality, for a corporate.

Origination Administrator

(a) Workflow Configuration

Workflow configuration allows the bank administrator to define the sequence of the sections in application form for each of the products.

There will be a default workflow defined in the product as part of Day0 definition for each of the product along with identified set of steps; bank administrator will have an option to view the default workflow for each of the products. If the sequence defined for a product does not suit the bank requirements, the admin can opt to create a custom workflow by re-arranging the steps.

Others

(a) Request Processing

Service requests allows the bank administrator- approver to search and view all the service requests that have been initiated by the maker and are pending for approvals. This option also allows him to approve or reject the service requests.

(b) Feedback

Using this option, the Administrator can maintain the feedback templates by defining the feedback question, selecting the rating scale, adding new questions along with new options, selecting the transactions for which feedback capture needs to be enabled.

The administrator can also decide whether an additional question is to be asked for a scale weight and select the applicable options for the question.

(c) User Help Desk

This option enables the Administrator to create business user's session and perform the transaction requested by business user on his behalf in case, he has forgotten his internet banking password or is unable to perform a transaction using his internet banking.

To authenticate the user, system will send an OTP to the customer and the same OTP needs to be communicated to the administrator user so that he can enter it on the screen to create user's session.

Activity Log

The Bank administrator – Approver, can view the log of activities here. For ease of use, he can provide a Date Range and search.

Icons

- : Click this icon to open the section in a new window.

- : Click this icon to search the transactions that are performed on a particular date. It has two fields From and To, you can select the start and end date to search the transaction.

(a) Corporate Activity Log

In the Corporate activity log, the Bank administrator – Approver, can view the activities of corporate users. The following fields are displayed.

- Date: Date of the maintenance
- Description: Description of the maintenance
- Party Name: Party Name
- Initiated by: Initiator of the Party Maintenance.
- Reference Number: Reference number of the maintenance.
- Status: Status of the maintenance

(b) Administrative Activity Log

Through the Admin Activity log, the Bank administrator – Approver, can view the bank admin activities. The following fields are displayed:

- Date: Date of the maintenance
- Description: Description of the maintenance
- Initiated by: Initiator of the Party Maintenance.
- Reference No: Reference number of the maintenance.
- Status: Status of the maintenance

(c) Bulk File Administrator Activity Log

In Bulk File Activity log, the Bank Administrator – approver, can view the bulk file activities. The following fields are displayed.

- Date: Date of the maintenance
- File Identifier: Unique code assigned to files as required by parties
- File Name: Name assigned to files
- Initiated by: Initiator of the Party Maintenance.
- Reference No: Reference number of the maintenance.
- Status: Status of the maintenance

(d) Bulk Record Administrator Activity Log

In Bulk Record Activity Log, the Bank Administrator – approver, can view the bulk record activities. The following fields are displayed.

- Date: Date of the maintenance
- File Identifier: Unique code assigned to files as required by parties
- File Name: Name assigned to files
- Initiated by: Initiator of the Party Maintenance.

- Reference No: Reference number of the maintenance.
- Status: Status of the maintenance

3.4 Approve the transaction

The transactions that have been initiated by the maker and are pending for approvals are listed here. The approver user logs in to the application, user views all the transactions that are pending for approvals.

How to reach here:

Approver Dashboard > Pending for Approvals section

To approve the transaction:

1. Click the **Reference Number** link of the transaction that is to be approved, in the **Pending for Approval** section. The transaction screen appears for review and approval.

Transaction Journey

The screenshot displays the 'Update FileIdentifier Registration' interface in the ZigBank system. At the top, there is a navigation bar with the ZigBank logo, search, mail, and user profile icons. The user is identified as Philippe Coutinho, with a last login time of 19 Jun 05:55 PM. The main content area is titled 'Update FileIdentifier Registration' and features two buttons: 'Approve' (highlighted in green) and 'Reject'. Below these buttons is a 'Review' section containing the following information:

- Party Id:** 001930
- Party Name:**
- Details:**
 - File Identifier:** SDMCDomFile
 - Description:** SDMC Domestic AB File Level
 - File Template:** Domestic Funds Transfer Delimited SDMC
 - Transaction Type:** Domestic Funds Transfer
 - Accounting Type:** Single Debit Multiple Credit
 - File Type:** DELIMITED
 - Format Type:** CSV/XML/XLS/XLSX
 - Approval Type:** Record Level, File Level (highlighted in green)

Below the review section is a 'Transaction Journey' diagram showing three stages: 'Initiation', 'Approval', and 'Completion'. Each stage is marked with a green checkmark. The 'Initiation' stage is associated with the user 'David Sanchez Villa' and the timestamp '19 Jun 12:25 PM'. A 'Back' button is located at the bottom left of the page. The footer contains the copyright notice: 'Copyright © 2006, 2017, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

Transaction to approve

This screen displays the details of the transaction that is to be approved for review.

Transaction Journey

This section displays the status of transactions that has been initiated by the maker. Transaction journey displays the status as:

- Initiation
- Approval
- Completion

-
2. Click **Approve** to approve the initiated transaction. The **Transaction Approval** screen appears.
OR
Click **Reject** to reject the transaction.
OR
Click **Back** to navigate to the **Dashboard**.
 3. Enter the remarks and click **Approve**.
OR
Enter the remarks and click **Reject**.
OR
Click **Cancel** to cancel the transaction.
The screen with success message appears.

FAQs

1. **How can I access different dashboards if multiple roles are assigned to me?**

An option is available in toggle menu to switch between the different dashboards if multiple roles are assigned to you.

2. **Will I be able to see the current status of a transaction initiated by me?**

Yes, transaction journey section shows the latest status of the transaction along with the date, time and name of the user last acted on the same.

3. **What are quick links; can I change the transactions appearing under quick link section?**

Quick links gives you easy access to some of the more commonly used transactions/maintenances in the system. You cannot change the transactions appearing under quick link section.

4. **Can I remove/grant access of a transaction to System/Bank administrator?**

Yes, transaction access can be given or removed for a particular application role from role transaction mapping function.

[Home](#)

4. User Management

User Management function enables System/ Bank Administrator to onboard and manage users and their login credentials for channel banking access. This module facilitates channel banking access to the bank's internal users (administrators) and external users (customers).

This function also lets the System/Bank Administrator to define the various touch points from which the user can access the channel banking and limit package applicable for the same.

Users can also be mapped to a User Segment, so that the attributes applicable at the segment level should get applied to the user. Currently user segments are only applicable for user type Retail.

In a multi entity scenario, this function enables system/ bank administrator to provide access to multiple entities to users.

Internal Users

- System Administrator
- Bank Administrator

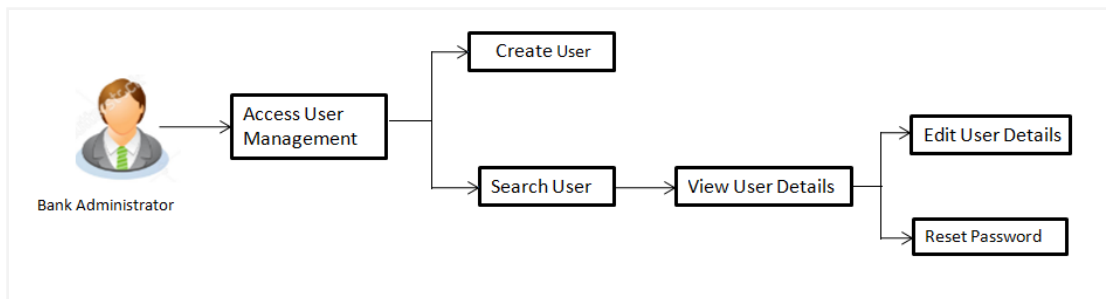

External Users

- Retail User
- Corporate User
- Corporate Administrator

Pre-Requisites

- User Segment and Application roles are maintained
- Transactions are associated with each Application role
- Transaction (User Management) access is provided to System/Bank Administrator.
- Approval rule set up for Bank administrator to perform the actions.
- Party Preference is maintained for corporate user

Workflow

Features Supported In Application

The User Management module allows the system/bank administrator to

- Create User
- View User
- Edit User
- Reset Password

How to reach here:

System/ Bank Administrator Dashboard > Onboarding > User Management

OR

System/ Bank Administrator Dashboard > Toggle menu > Onboarding > User Management

4.1 User Management - Create

System/Bank Administrator logs into the system and navigates to the User Management screen. This function allows the administrator to create internal and external users.

Note: In case of multi entity implementation, if the system/bank administrator has access to multiple entities, then the administrator can select the entity from the entity switcher on which the user needs to be on boarded. The selected entity of the user as part of onboarding will be the default/home entity of the user being created.

To create a new user:

1. In the **User Management** screen, click **Create**. The **User Management - Create New User** screen appears.
 2. From the **User Type** list, select the appropriate type for the user being created.
 - If the user type selected is **Retail and Corporate** user, Party ID and Party Name fields are displayed.
 - If the user type is selected as **Administrator**, the **Personal Information, Contact Details, Accessible Entity Details** and **Roles** section is displayed.
- OR
- Click **Back** to navigate to previous screen.
- OR
- Click **Cancel** to cancel the transaction.

Create User - Select User Type

Field Description

Field Name

Description

User Type

User type for which the new user is to be created.

The user can be:

- Corporate
- Retail
- Administrator

Create User – Map Party ID

If the user type to be created is selected as Retail or Corporate User, system displays a screen to enter the party information (party ID or party name) and search party. User can enter the party ID (if known) or the party name with a minimum of 5 characters. The matching results are shown on the screen.

In case of a party search by party ID, it is an exact match and Party ID entered by the user gets validated from the core banking application. After the core banking application validation is successful, party name gets displayed on the screen.

In case of a party search by name, system displays the matching party records. The records have parties listed with both Party ID and Party Name information. User can select the record by clicking on the Party ID from the list.

The screenshot shows the 'User Management' page in the ZigBank system. At the top, there is a navigation bar with the ZigBank logo, a search icon, an envelope icon, and a user profile icon with the text 'Welcome, superadmin' and 'Last login: 29 May 08:33 PM'. Below the navigation bar, the page title is 'User Management'. The main content area is titled 'Create New User' and contains a form with the following fields:

- User Type:** A dropdown menu currently showing 'RetailUser'.
- Party ID:** An empty text input field.
- Party Name:** A text input field containing the value 'Will'.

Below the form are three buttons: 'Search' (highlighted in green), 'Cancel', and 'Clear'. Below the buttons is a table with two columns: 'Party ID' and 'Party Name'. The table contains the following data:

Party ID	Party Name
001981	Will Smith
001198	Will Smith
001980	Will Smith
001993	Mark Will
002145	Will Smith
002065	Will Smith
002067	Will Smith
002066	Will Smith
002068	Will Smith
002265	Will Smith

At the bottom of the page, there is a footer with the text: 'Copyright © 2006, 2017, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

Field Name	Description
Party Name	Enter the party name to search the party to be associated to the user for accessible entity selected. This field is only applicable for retail and corporate type of user.
Limits – Touch Points/Groups	
Select the limits package to be associated to the user for the accessible entity for each touch point. This section is only applicable for retail and corporate type of user.	
Touch Points/ Group	Name of touch points/ groups under a specific entity to which the limit packages are to be mapped.
Package	List of the packages which can be mapped to touch points/ groups. Only limit packages maintained for the selected touch point will get listed here.
Roles	For the accessible entity selected/added, system will default the roles same as that of home entity of the user. The administrator cannot define separate roles for each of the entities.
Select Touch Points	The touch points (banking channels) allows a user to perform transactions using the touch points. The touch points could be: <ul style="list-style-type: none"> • Mobile Application • Mobile (Responsive) • Internet • Mobile Banking • Missed Call Banking • SMS Banking • Wearables • Snapshot • Siri / Chatbot

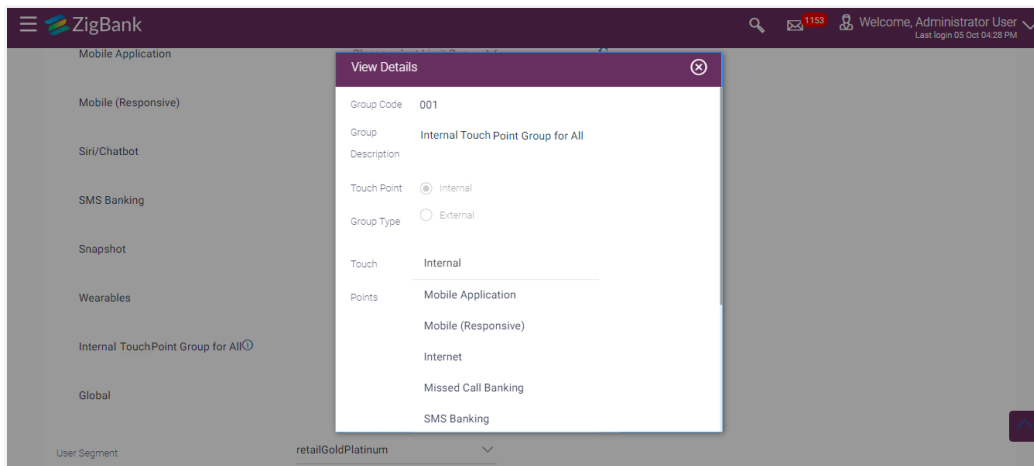

- iv. In the **User Name** field, enter the required details. Click **Check Availability** to check the uniqueness of the user ID. If the user ID is already used.
- v. In the **Personal Information** section, enter the required details.
- vi. In the **Contact Details** section, enter the required details.
- vii. In the **Limits** section, select the limit packages to be mapped to touch points from the limit package list.
- viii. From the **User Segment** list, select the appropriate segment for the user in **Limits and Roles** section.
- ix. Select the checkbox (s) against the **Roles**, to map to the selected **User Segment**.
- x. Select the touch points to be mapped to user.

- xi. Add the **Accessible** entities for the User and select the party and limits for that entity (applicable only if Bank has Multi Entity setup).
- xii. Click **Add Accessible Entity** button, to add accessible entity to a user.
- xiii. From the **Entity Name** list, select the name of the entity.
- xiv. In the **Party ID** field, enter the party ID.
- xv. In the **Party Name** field, enter the party name.
- xvi. Click **Search**. The search result is displayed.
- xvii. Select the appropriate party ID.
- xviii. In the **Limits** section, select the appropriate limit package under the **Package** for each touch point.

Click  to reset the limit package assigned.

- xix. Click  to view the details of touch points group. The **View Details -Touch Point Group** popup window appears

View Details

Field Description

Field Name	Description
Group Code	Group code defined for touch point group.
Group Description	Group description defined for touch point groups.
Group Type	Type of touch point i.e. whether touch point is of type internal or external.

Field Name	Description
Touch Points	List of the internal or external touch points.

- xx. To enable the various touch points (banking channels) to a user, select the **Select Touch Points** check box.
- b. If you select **Administrator** option:
 - i. In the **Organization** field, enter the organization of the employee.
 - ii. In the **Manager** field, enter the name of the manager of the user being created.
 - iii. In the **Employee Number** field, enter the six digit employee number of the user.
 - iv. In the **Personal Information** section, enter the required details.
 - v. In the **Contact Details** section, enter the required details.
 - vi. Add the **Accessible** entities for the User (applicable only if Bank has Multi Entity setup)
5. Click **Save** to save the user details.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to previous screen.
6. The **Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to previous screen.
The user will be navigated back to the create screen
7. The success message of user creation appears along with the transaction reference number.
Click **OK** to complete the transaction.

4.2 User Management - Search and View

Using this option, System/ bank administrators can search and view details of the existing users. Administrator selects the user type of the user to be searched.

System/ bank administrators can also change the user status or the channel access permission for a user using this screen.

Default search is available with User Name, but the user can also be searched by providing other details like First Name, Last Name, Party ID. Email ID and Mobile Number.

To search user:

1. Enter the search criteria, click **Search**.
The search results appear on the **User Management** screen based on the search parameters.
OR
Click **Cancel** if you want to cancel the transaction.
OR
Click **Clear** if you want to reset the search parameters.

Field Name	Description
Roles	For the accessible entity selected/ added, system will default the roles same as that of home entity of the user. The administrator cannot define separate roles for each of the entities.

- Click **Edit** to edit the user details.
OR
Click **Reset Password** to reset user's password. A warning message **'Do you want to reset the password?'** appears on the screen.
If user clicks **'Yes'**, a reset password confirmation screen is displayed. New password gets communicated to the user on registered email address (if the alert for the same is maintained) and the record for that user gets available in the Print password screen, from where it can be printed.
If user clicks **'No'**, the action gets cancelled.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to the previous screen.
OR
Click  **Download profile** to download the user details.

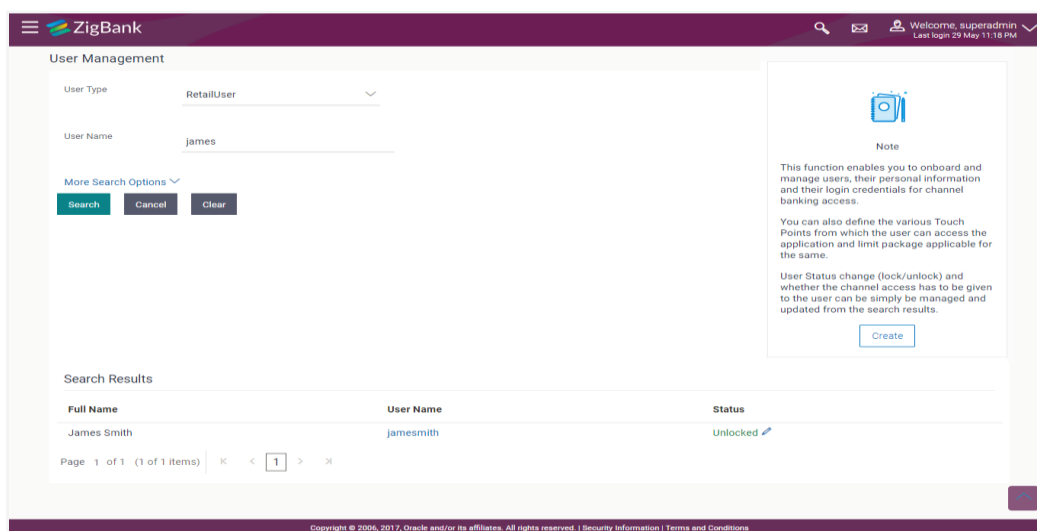

User Management - Change user status

This section allows you to lock and unlock a user.

To lock or unlock a user:

- Enter the search criteria, click **Search**.
The search results appear on the **User Management** screen based on the search parameters.

Lock / Unlock User

The screenshot displays the ZigBank User Management interface. At the top, there is a navigation bar with the ZigBank logo and user information: 'Welcome, superadmin' and 'Last login: 29 May 11:18 PM'. Below the navigation bar, the 'User Management' section is visible. It includes search filters for 'User Type' (set to 'RetailUser') and 'User Name' (set to 'james'). There are buttons for 'Search', 'Cancel', and 'Clear'. A 'More Search Options' dropdown is also present. To the right of the search filters, there is a 'Note' box with a camera icon, containing text about onboarding and managing users, and a 'Create' button. Below the search filters, the 'Search Results' section shows a table with columns for 'Full Name', 'User Name', and 'Status'. The results show one entry: 'James Smith' with 'User Name' 'jamesmith' and 'Status' 'Unlocked'. At the bottom of the page, there is a footer with copyright information: 'Copyright © 2006, 2017, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

- Click  in the **Status** column to lock / unlock a user. The **User Status Maintenance** screen appears.

- In the **Lock Status** field move the slider to lock / unlock a user.
- In the **Reason** field enter the appropriate description.
- Click **Submit** to save.
OR
Click **Cancel** to close.

User Management - Channel Access Permission

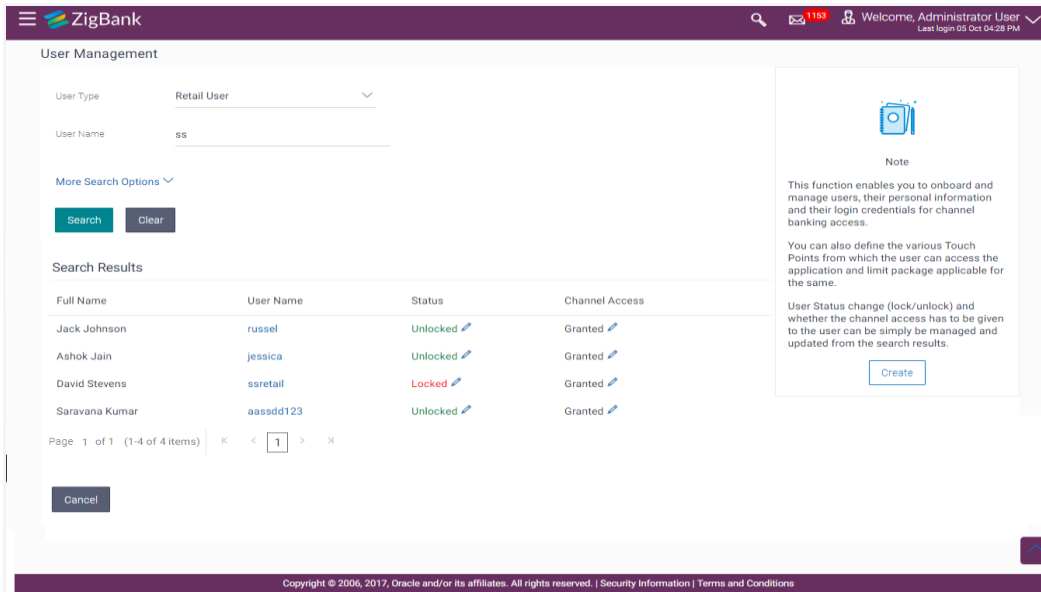

This section allows the administrator to grant / revoke channel access for a user. In case Bank administrator changes the channel access from grant to revoke, user will not be able to access his channel banking.

Note: Channel Access feature is only available and displayed if the Application is configured on DB Authenticator as Identity Management system.

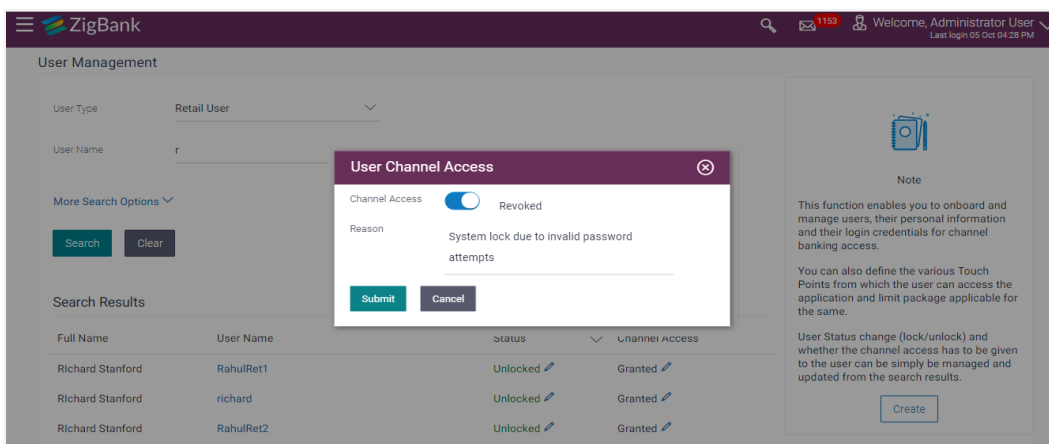

To grant or revoke channel access:

- Enter the search criteria, click **Search**.
The search results appear on the **User Management** screen based on the search parameters.

Channel Access

- Click  in the **Channel Access** column to grant / revoke channel access to a user. The **User Channel Access** screen appears.

- In the **Channel Access** field move the slider to grant / revoke channel access rights for a user.
- In the **Reason** field enter the appropriate description.
- Click **Submit** to save.
OR
Click **Cancel** to close.

4.3 User Management - Edit

This function enables the Administrator to edit the existing user details.

To edit or update a user details:

- Enter the search criteria, click **Search**.
The search results appear on the **User Management** screen based on the search parameters.
OR

- Click **Clear** if you want to reset the search parameters.
 OR
 Click **Cancel** if you want to cancel the transaction.
- In the **User Management - Search Results** section, click the **User Name** link of the record for which you want to edit the user details.
 The **User Management - View** screen appears.
 - Click **Edit** to update the user information.
 OR
 Click **Reset Password** to reset user's password. A warning message '**Do you want to reset the password?**' appears on the screen.
 If user clicks **Yes**, a reset password confirmation screen is displayed. New password gets communicated to the user on registered email address (if the alert for the same is maintained) and the record for that user gets available in the Print password screen, from where it can be printed.
 If user clicks **No**, the action gets cancelled.
 OR
 Click **Cancel** to cancel the transaction.
 OR
 Click **Back** to navigate to the previous screen.

User Management - Edit User

The screenshot displays the 'User Management - Edit User' interface. The header includes the ZigBank logo, a search icon, a notification icon with '1432', and a user profile for 'Administrator User' with the text 'Welcome, Administrator User' and 'Last login 13 Nov 08:05 PM'. The main content area is titled 'User Management' and contains the following information:

User Type	Retail User

24. The success message of updates appears.
Click **OK** to complete the transaction.

FAQs

1. Who can create / update the user?

System administrator, bank administrator and corporate administrator can create or edit the users. Corporate Administrator can create user for the part ID he belongs to.

2. Can I edit the party id mapped to the user?

No, party ID mapped to the user cannot be edited.

3. When does the system update a user status as 'locked'?

User status can get locked if he has exceeded the maximum number of attempts allowed for entering a wrong password.

4. When will the System/ Bank Administrator use Revoke Channel Access feature?

Incase if the customer does not want to use his channel banking and requests bank to disable his internet banking, bank user can do the same by revoking the channel access for his user. Similarly if a corporate user leaves a corporate house, his channel access should be revoked using this feature, so that he should not be able to access the company accounts.

5. Can I set the user name which is already used in the application?

No, uniqueness of a user name/user ID is checked while creating or modifying a user.

6. Can I edit personal and contact details of Retail user?

No, personal and contact details of Retail user are fetched from the core banking application and cannot be edited using User Management functionality.

7. Can one assign multiple Application roles to a user?

Yes, multiple Application roles can be assigned to the user. e.g. Corporate user is acting as maker of few transactions and approver of few other transactions.

8. What are the different child roles available out of box?

Following are the Application role associated with each application role out of box.

Application Role	Application Roles
Retail User	Customer
Corporate User	<ul style="list-style-type: none"> • Maker • Checker • Viewer • Corporate Admin Maker • Corporate Admin Checker
Administrator	<ul style="list-style-type: none"> • Admin Maker • Admin Checker

9. If I update the limit package associated with a user, what will happen to the in-flight transactions?

Yes, new limit package can be mapped to a user. Limits get applied from an immediate effect if the effective date is less than or equal to current date. And if the effective date is future date, the limit package will be applied from the date available in the package.

10. If I update the Application role associated to a user, what will happen to the in-flight transactions?

In case of any update of Application roles mapped to the user as edit user functionality, the privileges associated with new child roles get applied to the user with an immediate effect. So if any transaction is pending with approver for approval, user can view and approve those transactions only if checker role is mapped to him. As soon as checker role is unmapped, then user will not be able to view and approve the transactions which were pending for his approval.

11. Can administrator with one entity have right to create users in different entity?

No, administrator can only create users in his own entity only.

12. Can I assign a user Segment to a Corporate User?

No, User Segment can only be attached to a Retail user.

13. Can I assign additional roles to a Retail user associated to a Segment?

Yes, system displays all the application roles which are not linked to a segment against the roles field, these roles can be attached to a user in addition to the roles attached to a segment.

14. If a user's User ID is locked and he/she has requested for a reset password, does the admin needs to unlock it separately ?

No, the user ID will automatically get unlocked at the time of resetting the password by Admin.

[Home](#)

5. Party Preferences

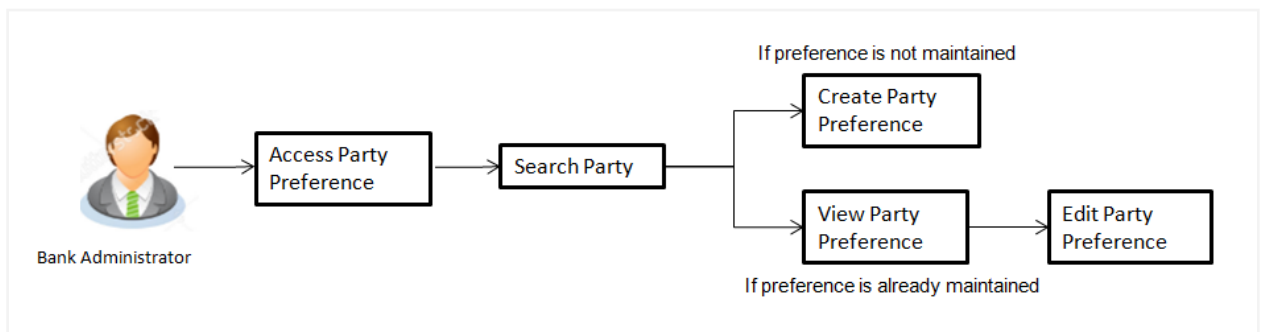

Party Preference setup allows the administrator to onboard the party on OBAPI along with definition of attributes like limits, Approval flow, grace period etc. This maintenance is done only for corporate type of parties and is not applicable for retail type of parties. Parameter values maintained against a corporate party defines the system behavior for the following:

- Cumulative daily limits per transaction for the corporate party
- Transaction limits for the users
- Type of approval flow applicable
- Channel access preferences
- Availability of corporate administrator facility

Pre-Requisites

- Transaction access is provided to Bank Administrator.
- Approval rule set up for Bank Administrator to perform the actions.
- Party for which preference needs to be set up is created in core banking application.

Workflow

Features Supported In Application

Party Preference maintenance available for bank administrator in the application includes:

- Create Party Preferences
- View Party Preferences
- Edit Party Preferences

How to reach here:

System/ Bank Administrator Dashboard > Toggle Menu> OnBoarding > Party Preferences
OR

Bank Administrator Dashboard > Onboarding > Party Preferences

Party Preferences- Search

Bank Administrator logs into the system and navigates to the Party Preferences screen.

System displays a screen to enter the party information (party ID or party name) and search party for which the preferences are to be maintained or viewed.

User can enter the party ID (if known) or the party name with a minimum of 5 characters. System matches the input provided by the user with the party name records and displays the matching party records.

In case of a party search by party ID, it is an exact match and system displays the party preference maintained if any, else displays an option to create party preference.

To search party preferences of party:

1. In the **Party ID** field, enter the party ID whose party preferences you want to view.
OR
In the **Party Name** field, enter the name of the party whose party preferences you want to view.
2. Click **Search**.
If party preference is already maintained, user is directed to **Party Preference – View** screen.
If party preference is not maintained, user is directed to **Party Preference – Create** screen.
In case of invalid party, error message is shown on the screen.
OR
Click **Clear** to reset the details.
OR
Click **Cancel** to cancel the transaction and navigate the user back to **Dashboard**.

Party Preferences- Search (Party Id)

The screenshot displays the 'Party Preferences' search interface in the ZigBank system. At the top, there is a header with the ZigBank logo and user information: 'Welcome, Administrator User' with a last login time of '05 Oct 02:12 PM'. The main content area is titled 'Party Preferences' and contains a search form with two input fields: 'Party ID' (containing '001') and 'Party Name'. Below these fields are 'Search' and 'Clear' buttons. A table below the form lists party records with the following data:

Party ID	Party Name
001105	VINAY OBDX 14 BANK
001125	Mustafa Yusuf Gari
001145	ODBX_TEST1
001146	FDLBANK1
001166	ABXNBANKLTD
001167	ABXDBANK123
001194	Richard Parker
001195	Lion Messi
001197	Alleppey Inn Ltd
001198	Will Smith
001199	Merlin Entertainments Ltd
001201	Bechtel Corporation
001207	Roger Federer
001208	Ryan John

At the bottom of the table is a 'Cancel' button. To the right of the table is a 'Note' box with a camera icon and the following text: 'User can search a party for which user preferences are to be viewed or edited. Parties can have different accesses, daily and cumulative limits and approval patterns. The limit packages mapped can also be accessed.' The footer of the page contains the text: 'Copyright © 2006, 2017, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

In case of a party search by name, system displays the matching party records. The records have parties listed with both Party ID and Party Name information. User can select the record by clicking on the Party ID from the list.

15. The success message of updation appears.
Click **OK** to complete the transaction.

FAQs

1. What is sequential type of approval flow?

Under Sequential approval flow, the approval can be done only in the sequence as mentioned in approval workflow. So, at the 1st level of approval, users/user groups who are assigned to authorize only can view and approve the transaction. After the transaction is approved by level 1 user, users/user groups having rights for 2nd level of approval will be able to view and authorize the transaction. The transaction is marked as approved only after the user at the last level approves/authorizes it.

2. What is Parallel type of approval flow?

It is "Non-Sequential" type of approval flow which doesn't follow any specific sequence. Any user (who is part of the approval flow) from any approval level can pick up the transaction/maintenance and approve it. The transaction/maintenance is marked as approved if one user from each approval level (as configured) has approved/authorized the transaction.

3. What is cumulative daily limit package?

This limit package acts as a cumulative limit for all users of a party and is utilized as and when any user authorizes the transaction as a final approver. The daily limit per transaction and number of transactions allowed limit is checked and updated against the cumulative limit set.

4. What is User limit package?

This limit package is applicable for all users of the party (Users to whom this party ID is mapped as primary Party ID). This package will be overridden by User level limits package, if defined, at User level in User Management screen.

5. Can administrator delete Party Preference?

No, party preference cannot be deleted but can be disabled.

6. If I change the approval type from sequential to parallel or vice versa, what happens to the in-flight transactions/maintenances?

Edited approval type is applicable for new transactions initiated post modification. Previously initiated transactions (in flight transactions/maintenances) which are pending approval will follow an approval type which was applied at the time of transaction initiation.

7. If I edit the 'Allowed Roles field' and remove one of the options supported earlier, what impact will it have to the existing users on-boarded on that role?

If the Bank administrator edits and removes the roles mapped as 'Allowed Roles', the removed role will not be available to corporate administrator while creating new user and editing existing user. Old users whom the role is already mapped will continue to get the privileges.

8. Can I edit the limit packages? How does it impact the transactions?

Yes, new limit package can be mapped for party. Limits get applied from an immediate effect if the effective date is less than or equal to current date. And if the effective date is future date, the limit package will be applied from the date available in the package.

9. Is it mandatory to map packages for all the touch points and groups available under each entity?

Mapping the limit packages (CCL) for each touch point and for all groups is not mandatory. Whereas, administrator needs to operationally ensure that packages are mapped to the relevant touch point/groups which are accessible by the party users.

In case of customer user limit packages (CUL), if the package will be overridden by User level limits package, if defined, at User Maintenance. Or packages maintained for a user segment at system rules will be applicable if not package mapping is not defined at user or party level.

10. Can I manually define Global touch point group?

No, Touch Point – Global is nothing but a group of all internal and external touch points available in the application. This group cannot be maintained manually.

[Home](#)

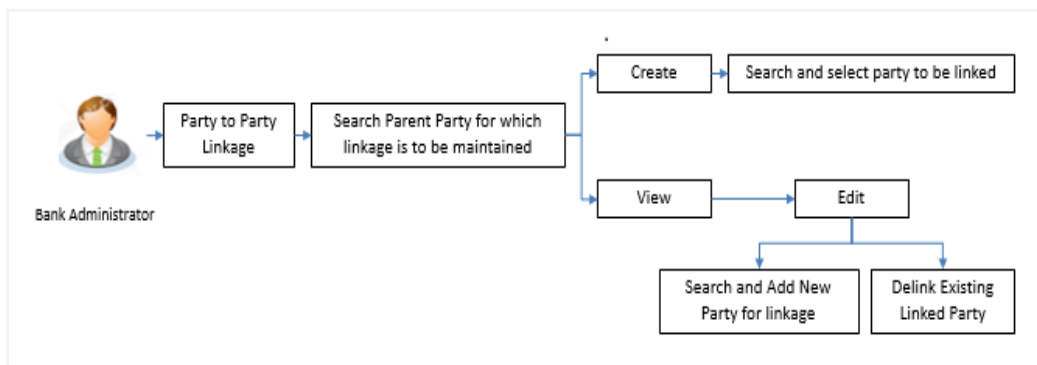

6. Party to Party Linkage

Party to Party linkage is required by medium and large corporates if the user(s) of the parent company needs to access accounts of the subsidiary companies. For e.g. consider a case wherein say 'ABC Industries' is the parent company with a subsidiary company 'PQR Enterprises' and the users of ABC Industries needs to access accounts of PQR Enterprises to carry out transactions and/or inquiries. The corporate will provide a mandate/ board resolution to the bank for creation of Party to Party linkage. Bank Administrator will setup a Party to Party linkage by selecting the parent party and the parties to be linked.

Pre-Requisites

- Transaction access is provided to Bank Administrator.
- Approval rule set up for Bank Administrator to perform the action.
- Party preferences should be maintained for the parent as well as the party to be linked
- Channel Access should be enabled for both the parent as well as the party to be linked

Workflow

Features Supported In Application

The following options are available as part of Party to Party linkage maintenance

- Search a party for Party to Party linkage
- Create Party to Party linkage
- View an existing Party to Party Linkage
- Edit and Delink Party to Party Linkage

How to reach here:

System/ Bank Administrator Dashboard > Toggle menu> OnBoarding> Party To Party Linkage

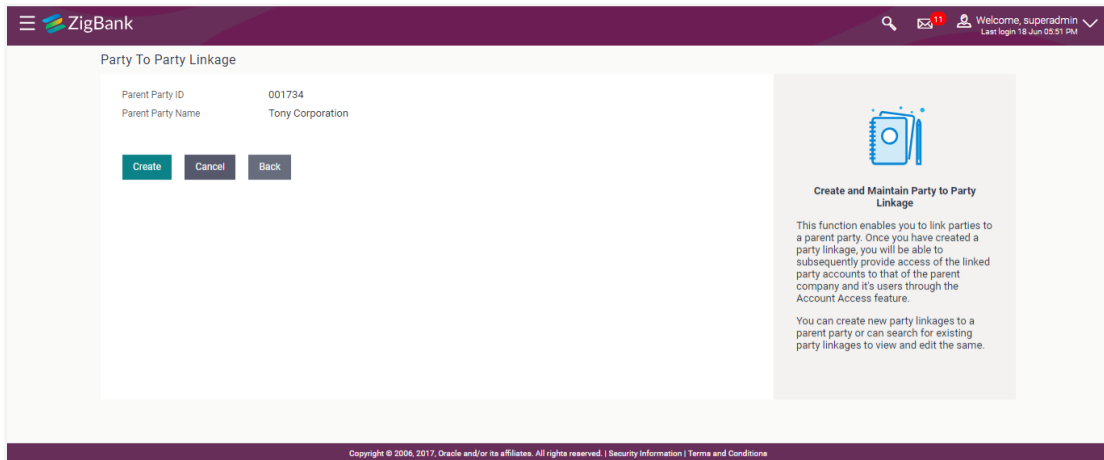

6.1 Party to Party Linkage- Search

Once the logged in user navigates to Party to Party Linkage screen, user will have an option to enter the party information (party ID or party name) and search party.

User can enter the party ID (if known) or the party name with a minimum of 5 characters. In case of search by party name, system matches the input provided by the user with the party name records and displays the matching party records.

In case of a party search by party ID, it will be an exact match and system will display the party details with appropriate options of linkage creation (if no linkage maintained) and created linkage(s) (if maintained) for the input parent party ID.

Party to party Linkage - search by party ID

In case of a party search by name, system will display the matching party records. The records will have parties listed with both Party ID and Party Name information. User will select the record by clicking on the Party ID from the list.

Party to Party Linkage - search by party name

Field Description

Field Name	Description
------------	-------------

Create

Parent Party ID Parent party ID of the corporate user to which you want to link other party.

Parent Party Name Name of the parent party.

Link Parties

Party ID A party ID which you want to link to parent party ID

Party Name Name of the parent party which is to be linked to parent party ID

Action To delete the party linkage.

- a. In the **Party ID** field, enter the party to be linked by party ID or party name as specified in 'Party Search' section.
 - b. Click **Search**. The party details appear.
Once the party is selected, it will appear in the linked party section i.e. there will be a row displayed for each party with a icon.
OR
Click **Clear** to clear the search parameters.
6. Click **Save** to save the linkage of the linked parties with the parent party.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to the previous screen.

7. The **Party To Party Linkage - Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to the previous screen.
8. The screen with success message and reference number appears. Click **OK** to complete the transaction.

6.3 Party to Party Linkage- View

The Bank Administrator would want to view the Party to Party Linkage by entering the details of the parent party.

To view party to party linkage:

1. Search the parent party by party ID or party name as specified in 'Party Search' section.
2. Click **Search**.
Parent party details will appear. There will be a linked party section with details of the parties linked to the parent party. It will have party ID and party name of the linked party.
OR
Click **Clear** to clear the search parameters.
OR
Click **Cancel** to cancel the transaction and navigate the user back to 'Dashboard'.
The **Party to Party Linkage** screen with search results with parent party identified and list of linked parties appears.

Party To Party Linkage - View

The screenshot displays the 'Party To Party Linkage' view. At the top, the ZigBank logo and user information 'Welcome, superadmin' are visible. The main content area is divided into two sections. The left section shows the 'Parent Party' details: Parent Party ID (001734) and Parent Party Name (Tony Corporation). Below this is a 'Linked Parties' table with one entry: Party ID (002046) and Party Name (Bechtel Corporation). At the bottom of this section are three buttons: 'Edit' (green), 'Cancel' (grey), and 'Back' (grey). The right section is titled 'Create and Maintain Party to Party Linkage' and features an icon of a notepad. It contains two paragraphs of text explaining the functionality: 'This function enables you to link parties to a parent party. Once you have created a party linkage, you will be able to subsequently provide access of the linked party accounts to that of the parent company and it's users through the Account Access feature.' and 'You can create new party linkages to a parent party or can search for existing party linkages to view and edit the same.'

3. Click **Edit** to update the **Party to Party Linkage**.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to the previous screen.

6.4 Party To Party Linkage - Edit and De-link

The Bank Administrator gets a request to edit Party to Party Linkage in the system with details of the parent party and the party to be linked and/or de-linked. As part of linkage creation, more than one party can be linked to the parent party selected.

To edit or de link a party to party linkage:

1. Search the parent party by party ID or party name as specified in **Party To Party - Search** section.
2. Click **Search**, **Party to Party Linkage - View** screen appears. Linkages displayed (if already exists) or click **Add** (if new linkage to be added) or click **delete** against the party (if existing to be delinked).
3. Click **Edit**. The **Party To Party Linkage - Edit** screen appears.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to the previous screen.

Party To Party Linkage - Edit

The screenshot shows the 'Party To Party Linkage - Edit' interface. At the top, the ZigBank logo and user information (Welcome, superadmin) are visible. The main content area is divided into two sections. On the left, there are fields for 'Parent Party ID' (001734) and 'Parent Party Name' (Tony Corporation). Below these is a table titled 'Linked Parties' with columns for 'Party ID', 'Party Name', and 'Action'. One row is shown with Party ID 002046 and Party Name Bechtel Corporation, with a trash icon in the Action column. Below the table are buttons for 'Add', 'Save', 'Cancel', and 'Back'. On the right, there is a help box titled 'Create and Maintain Party to Party Linkage' with an icon of a notepad and pencil. The help text explains that this function allows linking parties to a parent party and provides access to linked party accounts. At the bottom of the screen, there is a copyright notice: 'Copyright © 2006, 2017, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

4. Parent party details will appear. There will be a linked party section with linked party details. As part of edit, existing linked party can be de-linked or new parties can be linked.
5. Click **Add** will open up party search panel. Search a party to be linked by party ID or party name as specified in 'Party Search' section. Once the party is selected, it will appear in the linked party section i.e. there will be a row displayed for each party with an  icon.
6. Once the party appears in the linked party section, there will be an option to remove the linkage. Click  to remove the linkage if there is an erroneous selection. User can remove the existing linked party for the parent party.
7. Click **Save** to save the changes made as part of edit i.e. added/removed linkages.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to the previous screen.

8. The **Party To Party Linkage - Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Cancel** to cancel the transaction and navigate back to 'Dashboard'.
OR
Click **Back** to navigate to the previous screen.
9. The screen with success message with reference number appears. Click **OK** to complete the transaction.

FAQs

5. I am unable to maintain Party to Party linkage with an error of Channel Access not maintained?

Party to Party linkage cannot be maintained if Channel Access is disabled either for the parent party and/or selected linked party. You can maintain channel access by visiting party preferences screen and selecting parent party and/or linked party.

Navigation: (i) Dashboard > OnBoarding > Party Preferences (ii) Dashboard > Party Preferences

6. I am unable to maintain Party to Party linkage with an error of Party Preference not maintained?

Party to Party linkage cannot be maintained if party preference is not maintained either for the parent party and/or selected linked party. You can maintain party preference by visiting party preferences screen and selecting parent party and/or linked party.

Navigation: (i) Dashboard > OnBoarding > Party Preferences (ii) Dashboard > Party Preferences

7. I am unable to delink a party (linked party)?

Linkage with the parent party cannot be removed/deleted if there is an active Party Account Access linkage or User Account Access maintained. User will need to delete the party account and user account access linkage for the linked party and then proceed with deletion of party to party linkage.

8. Can a linked party have more than one parent party?

No. A party cannot be linked to more than one parent party i.e. if a party has been linked to a parent party then that party cannot be linked to another party.

9. Can there be multiple associations between the parent and the linked party?

No. The parent party cannot be linked to the linked party with linked party as the parent. For e.g. if there is a linkage already maintained with P1 (parent party) to P2 (child party) then system will not allow another linkage of P1 and P2 with P2 as parent and P1 as child party.

10. Can the parent party be a linked party to another party?

Yes, the parent party to a linked party can exist as a linked party to another parent party.

11. Have created a linkage between the parent party and linked party but it is not reflecting in the system even after a successful maintenance save message?

There is a possibility that the maintenance is saved but the status is 'Pending Approval'. For the maintenance, if there is an approval required then the changes will reflect only once the approver(s) approve the submitted request. If the setup does not require an approval workflow or is self / auto approved, then the linkage will be effected for the party immediately.

7. Merchant Onboarding

Merchant Onboarding facilitates the system administrator to set up and maintain merchants using the channel banking platform. This, in turn, enables the users to initiate merchant based payments using the channel banking facility.

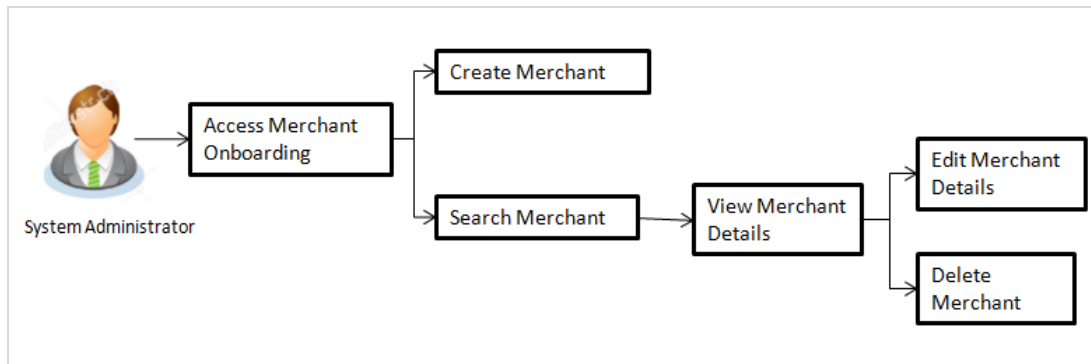

7.1 Merchant Management

Using this option, the system administrator can create and maintain merchant details in the application. Administrators can map the CASA account of the merchant, to enable the merchant payments.

Pre-requisites

- Transaction access is provided to the System Administrator
- Approval rule set up for System Administrator to perform the actions
- Checksum type and checksum algorithm is maintained
- Enterprise roles are maintained in the application
- Merchant's account is maintained in the host system

Workflow

Features Supported In Application

The following features are available for merchant maintenance:

- Create Merchant
- View Merchant Details
- Edit Merchant details
- Delete Merchant

How to reach here:

System Administrator Dashboard > Onboarding > Merchant Onboarding > Merchant Management

OR

System/ Bank Administrator Dashboard > Toggle Menu > Onboarding > Merchant Management

7.1.1 Merchant Management – Search

From this screen, the administrator is able to search existing merchant maintenances based on the search parameters provided. On being displayed the search results based on the search criteria defined, the administrator is able to view the details of any merchant maintenance by selecting a record.

To search merchant:

1. Navigate to the **Merchant Management** screen.

Search Merchant

Merchant Management

Merchant Id

Merchant Description

[Search](#) [Cancel](#) [Clear](#)

Note

Through this function you can set up and maintain merchant accounts, which will enable users to initiate merchant based payments online. You can also search for an existing merchant maintenance to view details of the merchant and to edit or delete the maintenance. Click on the Create option provided to create a new merchant maintenance.

Merchant Management - Search Results

The screenshot displays the 'Merchant Management' interface. At the top, there's a header with the ZigBank logo and user information: 'Welcome, superadmin' and 'Last login 06 Jun 11:34 PM'. Below the header, the 'Merchant Management' section contains two input fields: 'Merchant Id' and 'Merchant Description' (with the letter 'a' entered). There are 'Search' and 'Clear' buttons. Below the inputs is a table with two columns: 'Merchant Id' and 'Merchant Description'. The table contains one row with the value 'flip' in the 'Merchant Id' column and 'Flipkart - Retail Merchant' in the 'Merchant Description' column. Below the table, there's a pagination control showing 'Page 1 of 1 (1 of 1 items)' and a 'Cancel' button. To the right of the table is a 'Note' box with a blue icon of a notepad and a pencil. The note text reads: 'Through this function you can set up and maintain merchant accounts, which will enable users to initiate merchant based payments online. You can also search for an existing merchant maintenance to view details of the merchant and to edit or delete the maintenance. Click on the Create option provided to create a new merchant maintenance.' Below the note is a 'Create' button. At the bottom of the page, there is a footer with the text: 'Copyright © 2006, 2017, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

Field Description

Field Name	Description
Merchant Id	The facility to search for a specific merchant maintenance record on the basis of the unique ID/key assigned to the merchant by the bank.
Merchant Description	The facility to search for a specific merchant maintenance based on the description of the merchant.

Search Results

The following details are displayed per merchant record which are retrieved based on the search criteria identified in the fields defined above.

Merchant Id	The unique ID/key assigned to the specific merchant by the bank.
Merchant Description	The description of the merchant corresponding to the merchant Id.

- To view the details of a specific merchant, click the record. The **Merchant Management - View** screen appears.

7.1.2 Merchant Management – View

On selecting a specific merchant record by clicking on the link provided on the merchant description, the screen displaying the details of the selected merchant is displayed.

Merchant Management – View

The screenshot displays the 'Merchant Management – View' interface in the ZigBank system. The header includes the ZigBank logo, a search icon, a notification bell with '1468', and a user profile for 'Administrator User' with the last login time '17 Nov 07:12 PM'. The main content area is titled 'Merchant Management' and shows the following details:

- Merchant Id:** merchantNew
- Merchant Description:** merchantNew
- QR Code:** A link to view the QR code.
- Accounts:**
 - Credit Account Details:**
 - Account Type:** CASA
 - Account Number:** AT30012290031
 - Service Charge Account Details:**
 - Define another account for service charge
 - Default customer's debit account number as request parameter
- Response Redirections:**
 - Success URL:** https://j.k.html
 - Failure URL:** https://j.k.html
- Checksum Details:**
 - Checksum Type:** None
 - Checksum Algorithm:** None

At the bottom of the form, there are four buttons: 'Edit', 'Delete', 'Cancel', and 'Back'. A sidebar on the right titled 'Merchant Onboarding' contains a lightbulb icon and text explaining the function: 'Through this function you can set up and maintain merchant accounts, which will enable users to initiate merchant based payments online. You can also search for an existing merchant maintenance to view details of the merchant and to edit or delete the maintenance.'

Field Description

Field Name	Description
Merchant Id	The unique ID/key assigned to the merchant by the bank.
Merchant Description	The description of the merchant.
QR Code	Click the QR code link to view the QR code assigned to the merchant.
Accounts	
Credit Account Details	
Account Type	The type of account associated with the merchant, e.g. CASA.

Field Name	Description
Account Number	The merchant's credit account number.
Service Charge Account Details	
Define another account for service charge	This checkbox is selected if the merchant has another account defined for service charge.
Account Type	The service charge account type associated with the merchant e.g. CASA account. This field appears if Define Account number for service charge check box is selected.
Account Number	The merchant's credit account number. This field appears if Define Account number for service charge check box is selected.
Default customer's debit account number as request parameter	This check box is selected if the customer's debit account number is defaulted as request parameter.
Response Redirections	
Success URL	The URL for sending the response of the transaction for a successful transaction.
Failure URL	The URL for sending the dynamic response of the transaction for a failed transaction.
Checksum Details	
Checksum Type	The checksum type.
Checksum Algorithm	The checksum algorithm.
Security Key	Input the security key. Field will be displayed if a value is selected in checksum algorithm.

1. Click the **QR Code** link to view the QR Code of the merchant. A pop-up screen with QR code appears. You can also download the QR Code so as to send it to the merchant through offline mode.
2. Click **Edit** to edit merchant details. The user is directed to the **Merchant Management - Edit** screen.
OR
Click **Back to navigate to the previous screen.**
OR
Click **Cancel** to cancel the transaction.
OR
Click **Delete** to delete the merchant maintenance.

QR code

The QR code is displayed if the system administrator clicks on the QR code link on the Merchant Maintenance details screen. The administrator is provided with the facility to download the QR code so as to send it to the merchant through any offline mode.

The screenshot displays the ZigBank Merchant Management interface. A modal window titled "QR Code" is open, showing a QR code. The background interface includes sections for Merchant Management, Accounts, Service Charge Account Details, Response Redirections, and Checksum Details. The QR code modal has a close button (X) and a download icon (downward arrow) in the top right corner.

3. Click  to download the QR Code image of the merchant.

7.1.3 Merchant Management – Create Merchant

The system administrator can create a new merchant so that the bank's customers can make payments to the merchant using channel banking or by scanning the QR code of the Merchant without entering merchant account details. The QR code is generated once the merchant is created by the bank administrator.

To create a merchant:

1. In the **Merchant Maintenance** screen, click Create. The **Merchant Management – Create** screen appears.

Create Merchant

The screenshot shows the 'Merchant Management - Create Merchant' form in the ZigBank system. The form is divided into several sections:

- Merchant Management:**
 - Merchant Id: M001
 - Merchant Description: Merchant 001
- Accounts:**
 - Credit Account Details:**
 - Account Type: Current and Savings
 - Account Number: AT300012100012
 - Service Charge Account Details:**
 - Define another account for service charge
 - Account Type: Current and Savings
 - Account Number: FCUBS000012
 - Default customer's debit account number as request parameter
- Response Redirections:**
 - Success URL: https://abc.example.com/retailpublic/epi-success.html
 - Failure URL: https://abc.example.com/retailpublic/epi-failure.html
- Checksum Details:**
 - Checksum Type: None
 - Checksum Algorithm: None

At the bottom of the form, there are three buttons: **Save** (green), **Cancel** (grey), and **Back** (grey). A scroll-to-top button is also visible in the bottom right corner.

On the right side of the form, there is a 'Merchant Onboarding' section with a lightbulb icon and the following text: "Through this function you can set up and maintain merchant accounts, which will enable users to initiate merchant based payments online. You can also search for an existing merchant maintenance to view details of the merchant and to edit or delete the maintenance."

The footer of the page contains the text: "Copyright © 2006, 2017, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions"

Field Description

Field Name	Description
Merchant Id	Specify a unique ID by which the merchant will be identified.
Merchant Description	Enter a description of the merchant.
Accounts	
Credit Account Details	
Account Type	Specify the type of account i.e. GL or CASA account, associated with the merchant.
Account Number	Specify the merchant's credit account number.
Service Charge Account Details	
Define another account for service charge	The option to define another account of the merchant.
Account Type	Select the type of service charge account being added e.g. CASA account. This field appears if you select the Define another Account for service charge check box.

Default customer's debit account number as request parameter	Select this box to enable defaulting of the customers debit account number from request parameter.
Response Redirections	
Success URL	Specify the URL for sending the response of the transaction for a successful transaction.
Failure URL	Specify the URL for sending the response of the transaction for a failed transaction.
Checksum Details	
Checksum Type	Specify the checksum type.
Checksum Algorithm	Specify the checksum algorithm.

Field Name	Description
Security Key	Input the security key. This field appears if a value is selected in checksum algorithm.

2. In the **Merchant Id** field, enter the ID of the merchant.
3. In the **Merchant Description** field, enter the description of the merchant.
4. From the **Account Type** list under the section **Credit Account Details**, select the appropriate account type.
5. In the **Account Number** field, enter the account number of the merchant corresponding to the account type selected.
6. In the **Response Redirections** section, enter the valid URL in the **Success URL** field.
7. In the **Response Redirections** section, enter the valid URL in the **Failure URL** field.
8. Click **Save** to save the Merchant details.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to the previous screen.
9. The **Review** screen appears, verify the details and click **Confirm** to confirm the details.
OR
Click **Edit** to make changes if any.
The administrator is directed to **Merchant Management – Create** screen with values in editable form.
OR
Click **Cancel** to cancel the operation and to navigate back to 'Dashboard'.
10. The success message appears along with the status of the transaction. Click **Done**.

7.1.4 Merchant Management – Edit

The system administrator can edit the details of any merchant maintained in the application. In order to edit the details of any merchant, the user must select the **Edit** option provided on Merchant Maintenance – View (details) page of the specific merchant.

To edit a merchant:

1. Navigate to the **Merchant Management** screen and in the **Merchant Id** field, enter the unique id of the merchant whose details you want to edit.
OR
In the **Merchant Description** field, enter the description of the merchant whose details you want to edit.
2. Click **Search**. The search results appear based on the search parameters defined.
OR
Click **Clear**, if you want to reset the search parameters.
OR
Click **Cancel**, if you want to cancel the transaction.
OR

Click **Create** to create a new merchant maintenance.

3. Select the merchant record of which details you want to edit, by selecting the link provided on the merchant description. The **Merchant Management – View** screen appears.
4. Click the **Edit** option available on the Merchant Management– View screen to edit merchant details. The administrator is directed to the **Merchant Management - Edit** screen.

Merchant Management - Edit

The screenshot displays the 'Merchant Management - Edit' interface. At the top, the ZigBank logo and user information 'Welcome, Administrator User' are visible. The main content area is titled 'Merchant Management' and contains several sections:

- Merchant Management:** Fields for 'Merchant Id' (value: merchantNew) and 'Merchant Description' (value: merchantNew).
- Accounts:**
 - Credit Account Details:** 'Account Type' is set to 'Current and Savings' and 'Account Number' is 'AT30012290031'.
 - Service Charge Account Details:** Two checkboxes are present: 'Define another account for service charge' and 'Default customer's debit account number as request parameter', both currently unchecked.
- Response Redirections:** 'Success URL' and 'Failure URL' are both set to 'https://j.k.html'.
- Checksum Details:** 'Checksum Type' and 'Checksum Algorithm' are both set to 'None'.

At the bottom of the form, there are three buttons: 'Save' (green), 'Cancel' (grey), and 'Back' (grey). A 'Merchant Onboarding' tip box on the right explains that this function is used to set up and maintain merchant accounts for online payments.

Field Description

Field Name	Description
Merchant Id	The unique ID assigned to the merchant by the bank. This field cannot be edited.
Merchant Description	The description of the merchant. This field is editable.
Accounts	
Credit Account Details	

Field Name	Description
Account Type	The type of account associated with the merchant, e.g. CASA. This field is editable.
Account Number	The merchant's credit account number. This field is editable.
Service Charge Account Details	
Define another account for service charge	This check box is checked if the merchant has another account defined for service charge. This field is editable.
Account Type	The service charge account type associated with the merchant e.g. CASA account. This field is editable. This field appears if Define Account number for service charge check box is selected.
Account Number	The merchant's credit account number. This field is editable. This field appears if Define Account number for service charge check box is selected.
Default customer's debit account number as request parameter	This checkbox is checked if the customer's debit account number is defaulted as request parameter. This field is editable.
Response Redirections	
Success URL	The URL for sending the response of the transaction for a successful transaction.
Failure URL	The URL for sending the response of the transaction for a failed transaction.
Checksum Details	
Checksum Type	The checksum type. This field is editable.
Checksum Algorithm	The checksum algorithm. This field is editable.
Security Key	Input the security key. This field is editable. This field appears only if a value is selected in checksum algorithm.

-
- Update the required fields, click **Save** to save the changes.
OR
Click **Cancel** to cancel edit of the merchant maintenance.
OR
Click **Back** to navigate to the previous screen.

6. The **Review** screen appears, verify the details and click **Confirm** to confirm the details.
OR
Click **Edit** to make the changes if any.
The administrator is directed to **Merchant Management – Edit** screen with all values (other than Merchant ID) in editable form.
OR
Click **Cancel** to cancel the operation and navigate back to 'Dashboard'.
7. The success message appears along with the status of the transaction. Click **Done**.

7.1.5 Merchant Management - Delete

The System administrator can delete any merchant maintained in the application.

To delete a merchant:

1. Navigate to the **Merchant Management** screen and in the **Merchant Id** field, enter the unique ID of the merchant whose maintenance you want to delete
OR
In the **Merchant Description** field, enter the description of the merchant whose maintenance you want to delete.

Click **Search**. The search results appear based on the search parameters defined.
OR
Click **Clear**, if you want to reset the search parameters.
OR
Click **Cancel**, if you want to cancel the transaction.

OR
Click **Create** to create a new merchant maintenance.
2. Select the merchant record whose maintenance you want to delete, by selecting the link provided on the merchant description. The **Merchant Management – View** screen appears.
3. Click the **Delete** option available on the Merchant Management – View screen.
The application displays a message asking the applicant to confirm deletion.

Merchant Management - Delete

The screenshot displays the ZigBank Merchant Management interface. At the top, the ZigBank logo is on the left, and a search icon, a notification bell with '1481', and the user name 'Welcome, Administrator User' with a dropdown arrow are on the right. Below the header, the 'Merchant Management' section shows details for a merchant named 'merchantNew', including a QR code icon. The 'Accounts' section is expanded to show 'Credit Account Details' with fields for 'Account Type' (CASA) and 'Account Number' (AT30012290031). Below this is the 'Service Charge Account Details' section with two unchecked checkboxes. A 'Delete' dialog box is overlaid in the center, asking 'Are you sure you want to delete merchant merchantNew?' with 'Yes' and 'No' buttons. At the bottom of the form, there are 'Edit', 'Delete', 'Cancel', and 'Back' buttons. A 'Merchant Onboarding' sidebar on the right contains a lightbulb icon and text explaining the function. The footer contains copyright information: 'Copyright © 2006, 2017, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

4. Click **Yes** to delete the merchant. A confirmation page appears with a success message and the status of deletion.
OR
Click **No** if you do not wish to delete the Merchant Maintenance.
5. Click **Ok**.

FAQs

1. **Who can create or edit merchants?**
The System administrator can create and edit the merchants.
2. **Can I specify the account number which is not held within this Bank?**
No, Merchant account number/GL should be of the same bank.
3. **When will the newly added merchants be available to customers?**
Newly added merchants will be made available to the customers with immediate effect.
4. **What is the significance of defining separate account numbers for service charge account?**

Service charges, if applicable, for an online transaction initiated by a customer will be accounted separately in the merchant's account number maintained for service charge credits.

8. Electronic Bill Presentment and Payment

Electronic bill presentment and payment (EBPP) is a process that enables the billers to create, and present the bills / invoices online to their customers. This feature also enables the customers/ users to pay the bills online. The EBPP services are widely used in many areas like utility bill payment, fund transfer through net banking against various purchases of utility products and services by the users, payment to service providers, mobile/ DTH bill payment etc.

The main advantage of electronic bill presentment and payment is that users/ customers can pay their bills anytime quickly and conveniently, which saves lots of time and paper work.

Note: Currently the new Electronic bill presentment and payment (EBPP) module will work only with third party and is not yet qualified with UBS. The existing Bill Payments module under 'Payments' will continue to work with UBS. For more details, refer 'Bill Payments' section in the *User Manual Oracle Banking Digital Experience Retail Payments*.

[Home](#)

8.1 Biller Onboarding

Bank customers initiate bill (utility) payments from their accounts using channel banking facility by selecting billers maintained by the Bank. Using Biller Onboarding, System Administrators can create billers. The system administrator also defines payment methods accepted by biller (e.g. Current and Savings Account, Credit Card, Debit Card etc) while creating a biller, category of the biller, full address of the biller and location/ area in which the biller operates or provides his services.

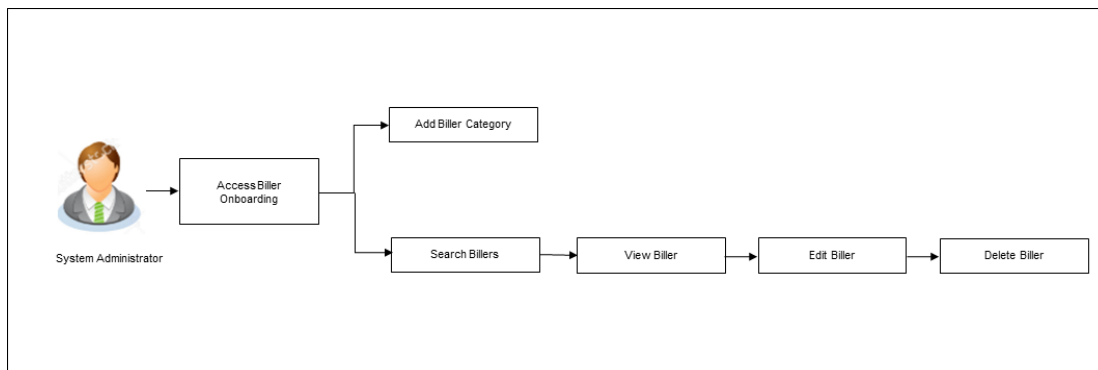

System Administrator creates billers, which are then made available to the customers to register themselves with these billers to receive and pay bills online.

This option allows the System Administrator to search and view the list of existing billers in the system.

Pre-Requisites

- Transaction access is provided to System Administrator.
- Approval rule set up for System Administrator to perform the actions.
- Billers are maintained in core banking application.

Workflow

Features Supported In Application

This option allows the System Administrator to:

- Search Biller
- Create Biller
- View Biller
- Edit Biller

How to reach here:

System/ Bank Administrator Dashboard > Toggle Menu > Onboarding > Biller Onboarding
OR

System Administrator Dashboard > Onboarding > Biller Onboarding

8.1.1 Biller Onboarding - Search

Using this option, System Administrators search the existing billers based on parameters like Biller ID, Biller Name, Biller Category and Biller Location. The search result displays a list of all biller types, that is Presentment only, Payment only and Presentment + Payment & Recharge type of billers.

Billers Onboarding - Search Biller

Field Description

Field Name	Description
Biller Name	The name of the biller.
Biller Category	The name of the biller category to which the biller belongs.
Biller Location	Location of the biller

To search billers:

1. In **Biller Name** field, enter the name of the biller that is to be searched.
OR
In **Biller Category** field, enter the category to which the biller belongs.
OR
In **Biller Location** field, enter the location of the biller.
2. Click **Search**, to search the billers.
OR
Click **Clear** if you want to reset the search parameters.
OR
Click **Cancel** if you want to cancel the transaction.

Search Result

Biller Name and Id	The name of the biller.
Biller Category	The name of the biller category to which the biller belongs.
Biller Location	Location of the biller

3. Click **Create** to create a new biller.

8.1.2 Biller Onboarding - Create

Using this option, the System Administrator can create a biller with specific labels. System Administrator defines whether the biller accepts:

- Quick Bill Payment(bill payment without customer registration) - for Payment type billers only
- Quick Recharge(pre-paid recharge without customer registration) - for Recharge type billers only
- Bill payments past due date- for presentment only type biller
- Part bill payment - for presentment only type biller
- Excess bill payment - for presentment only type biller

The administrator also defines the various payment methods accepted by the biller like Current and Savings Account, Credit Card, Debit Card etc. System administrator can also upload image of biller's logo and sample bill, if available.

To create a biller:

1. In the **Biller Onboarding** screen, click **Create**. The **Biller Onboarding - Create** screen appears.

9. Limits Definition

Limits are defined by the bank to set up amount and duration based restrictions on the transactions that can be carried out by the user.

As part of limits definition maintenance, following types of limits can be defined:

- Transaction: It is the initiation limit with minimum and maximum amount defined typically for a user with role 'Maker'
- Cumulative: It is the collective transaction amount limit for all the transactions that can be performed during a day/month and maximum number of transaction in a day/month
- Cooling Period: Payee cooling period limit is a time and the amount limit set by the bank during which fund transfer is not allowed or allowed till the specified limit, to a newly added payee.
- Limit package maintenance allows the administrator to map these definitions to every transaction.

Pre-Requisites

- Transaction access is provided to System Administrator.
- Approval rule set up for System Administrator to perform the actions.

Workflow

Features supported in application

Using this option system administrator can perform the following actions:

- Search/ View Limits
- Create Limit
- Delete Limits

How to reach here:

System Administrator Dashboard > Limits > Limits Definition
OR

System/ Bank Administrator Dashboard > Toggle menu > Limits > Limits Definition

9.1 Limits Definition - View

Using this option, administrator can search for particular limit based on different search parameters. The search results displays a limit list based on different search filters selected.

If the search parameters are not specified, records of all the limits maintained in the application for selected limit type are displayed.

To search and view limits:

1. In the **Limits Definition** screen, enter the search parameters and click **Search**. The **Limits Definition** screen with search results appears based on the searched criteria.
OR
Click **Clear** to reset the search parameters.
OR
Click **Cancel** to cancel the search process.

Limits Definition - Search

The screenshot shows the 'Limits Definition' search interface in the ZigBank application. The header includes the ZigBank logo and user information: 'Welcome, superadmin' and 'Last login 28 Jun 09:15 AM'. The main content area is titled 'Limit Definition' and contains search filters for 'Limit Code', 'Limit Description', and 'Limit Type' (with radio buttons for Transaction, Cumulative, and Cooling Period). Below the filters are 'Search' and 'Clear' buttons. A table displays the search results with columns for 'Limit Code', 'Limit Description', and 'Limit Type'. The table lists several limit entries, including CLM1, nehcumret14, CLD1, MustuCumDailyL01, MustuCumMonthlyL01, FUCORPCUM, LD_Cum_D_All_OBPM, LD_Cum_M_All_OBPM, and CumuM. A 'Cancel' button is located at the bottom left of the table. On the right side, there is a 'Limit Definition' section with a 'Create' button and a descriptive text about transaction limits.

Limit Code	Limit Description	Limit Type
CLM1	Cumulative Monthly Count 500 Amount 500000	Cumulative
nehcumret14	nehcumret14	Cumulative
CLD1	Cumulative Limit Daily Count 200 Amount 200000	Cumulative
MustuCumDailyL01	Max Trans 3 Cum Trans Amt 40000	Cumulative
MustuCumMonthlyL01	Cum Trans Amt 150000 Max Trans 17	Cumulative
FUCORPCUM	FUCORP Cumulative Limit	Cumulative
LD_Cum_D_All_OBPM	LD_Cum_D_All_OBPM	Cumulative
LD_Cum_M_All_OBPM	LD_Cum_M_All_OBPM	Cumulative
CumuM	Cumulative Limit Monthly	Cumulative

3. Click **Delete**. The **Delete Warning** message appears.
OR
Click **Back** to navigate to the previous screen.
OR
Click **Cancel** to cancel the transaction and navigate back to dashboard.

Delete Limit

The screenshot shows the 'Delete Limit' dialog box overlaid on the 'Limit Definition' page. The dialog box contains the following text:

Limit Deletion

Are you sure you want to delete this Limit?

Yes No

The background page shows the same limit details as the previous screenshot, but with a greyed-out appearance. The 'Delete' button is highlighted in green.

Copyright © 2006, 2017, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions

4. Click **Yes** to confirm the deletion.
OR
Click **No** to cancel the deletion process.
5. The success message of transaction submission appears.
Click **OK** to complete the transaction.

FAQs

1. Can I delete transaction and/ or cumulative/ cooling period limit definitions against a transaction in limit package?

No, existing limits against a transaction cannot be deleted; it can only be edited if effective date is starting from a future date.

2. Can I maintain multiple definitions for each limit type?

Yes, you can maintain multiple limit definitions under each limit type.

3. What is a significance of defining different slab limits in case of cooling period limit type?

Payee cooling period limit is a time and the amount limit set by the bank during which fund transfer is not allowed or allowed till the specified limit, to a newly added payee. Administrator can set up 2 or more time slabs to define the payee limits. E.g.

- 0 mins to 30 Mins – Amount limit – \$ 0
- 31Min to 60 Mins – Amount limit is \$ 5000.

Customer cannot transfer any amount till first 30 mins from the time payee is added. From 31 to 60 mins, customer can maximum transfer upto \$ 5000 subject to sufficient transaction and cumulative limits available.

[Home](#)

10. Limit Package Management

Limit package is a group of transaction limits. As part of the limit package management, defined limits (created through 'Limit Definition') can be mapped to each transaction or to a transaction group (Created using Transaction Group Maintenance). Each package is associated with a specific channel/Touch point or with a group of Touch points.

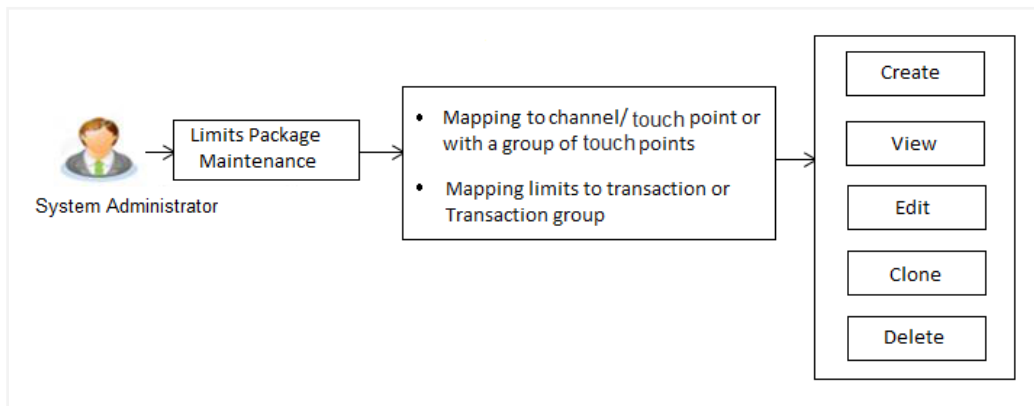

The limits packages once created can be mapped to

- Enterprise Roles (Retail/Corporate/Administrator) – using System Rules
- User Segment – using System Rules maintenance
- Party – using Party Preferences (Cumulative User Limits and Cumulative Customer limits)
- User – using User Management

Prerequisites:

- Transaction access is provided to System Administrator.
- Approval rule set up for System Administrator to perform the actions.
- Transaction aspects - limit parameter is enabled for required transactions,
- Transactions groups are maintained as required.
- Touch Point and touch point groups are maintained as required.
- Limit definitions are maintained.

Workflow

Features supported in application

Following functions can be performed by the bank administrator as part of the limit package maintenance

- Search/ View Limit Package
- Create Limit Package
- Edit Limit Package
- Clone Limit Package
- Delete Limit Package

How to reach here:

System Administrator Dashboard > Limits > Limit Package Management

OR

System/ Bank Administrator Dashboard > Toggle menu > Limits > Limits Package

10.1 Limit Package Management - View

Using this option, Administrator can search for specific limit package based on different search parameters like package code, user segments to for which the package is enabled, touch point/touch point groups to which a package can be mapped etc. The search results displays a list or particular limit package/s based on different search filters selected.

If the search parameters are not specified, records of all the packages maintained in the application are displayed.

To search and view limit package:

1. In the **Limit Package Management** screen, click **Search**. The **Limit Package Management** screen with search results appears based on the searched criteria.
OR
Click **Clear** to reset the search parameters.
OR
Click **Cancel** to cancel the search process.

-----------------	---

Transactions / Transaction Groups - Limits
--

Field Name	Description
Transactions / Transaction Group Name	Name of the transaction group that is mapped to the limit package.
Effective Date	The date from which the limit package is effective for the transaction/transaction group.
Expiry Date	Expiry date of a specific limit linked to a transaction. This field will be displayed only if expiry date is maintained for each transaction.
Cumulative Limit Daily	The daily cumulative limit set for the specific transaction. It displays the limit name and description along with the cumulative transaction amount and transaction count.
Cumulative Limit Monthly	The cumulative limit set for the specific transaction on basis on month. It displays the limit name and description along with the cumulative transaction amount and transaction count.
Transaction Limit	The transaction limit set for the specific transaction. It displays the limit name and description along with the minimum and maximum transaction amount set for the specific transaction.
Cooling Limit	The cooling limit set for the specific transaction. It displays the limit name and description along with the amount and time limit.

3. Click **Clone** to make another limit package with similar details.
OR
Click **Edit** to edit the limit package.
OR
Click **Delete** to delete the limit.
OR
Click **Cancel** to cancel the transaction and go back to Dashboard.
OR
Click **Back** to navigate to the previous screen.

10.2 Limit Package Management - Create

An administrator can create a new limit package using this maintenance. User has to define touch point or a touch point group and a currency in which a package is to be created. The touch points and groups defined are listed for selection. An administrator can also create a limit package for Global Touch point group (a group which is created automatically with all available internal and external touch points) A package can also be enabled for mapping at multiple user segments.

An administrator can add multiple transactions and transaction groups in a package and can assign limit definitions created for each transaction and for a group.

Further, these packages can be assigned at each touch point/group level while defining user segment parameters, party preferences and while creating business users.

To create a limit package:

1. In the **Limit Package Management** screen, click **Create**. The **Limit Package Management - Create** screen appears.

Limit Package Management - Create

The screenshot displays the 'Limit Package Management - Create' interface. The form contains the following fields and values:

- Limit Package Code: LM100PRC
- Limit Package Description: LIMIT-Retail
- Touch Point: Touch Point Group
- Touch Point Group: Internal Acces...
- Available To Role: Retail User
- Currency: USD
- Transaction Group Name: ALLTXNSGRP1
- Effective Date: 23 Jun 2018
- Cumulative Limit Daily: LD_Cum_D_All_OBPM - LD_Cum_...
- Cumulative Limit Monthly: LD_Cum_M_All_OBPM - LD_Cum_...
- Transaction Limit: LDTxn_All_OBPM - LDTxn_All_OB...
- Cooling Limit: FUCORPCP143 - FUCORP Cooling...

A callout box titled 'Create Limit Package' contains the following text: 'You can now create a limit package for specific transaction and for group of transactions. Also you can define applicable Touch Point for a package. To speed up the process you can clone an existing limit package. If you want to create fresh package, ensure to maintain necessary transaction groups, Touch Point groups and required limit definitions before you proceed.'

At the bottom of the form, there are three buttons: 'Save', 'Cancel', and 'Back'.

Field Description

Field Name	Description
Limit Package Code	The unique code of the limit package.

Field Name	Description
Limit Package Description	Description of the limit package.
Touch Point	Touch point or a group of touch point for which a package is to be created. The options are: <ul style="list-style-type: none"> • Touch Point • Touch Point Group • Global: This a group of touch points created automatically (default touch point group has all internal and external touch points).
Touch Point	Internal and external touch points defined using touch point maintenance is available for selection. This field is displayed and enabled if you select Touch Point option in the Touch Point field.
Touch Point Group	Internal and external touch points groups defined using touch point group maintenance are available for selection. This field is displayed and enabled if you select Touch Point Group option in the Touch Point field.
Available To Role	User segment/s for which a package is to be enabled for mapping.
Currency	The currency to be set for the limit package.
Transactions/ Transaction Group - Limits	
Transactions/ Transaction Group Name	The transaction or transaction group name, to assign the limits to it.
Effective Date	Date from which the limits should be applied for a selected transaction or transaction group.
Cumulative Limit Daily	Cumulative transaction limits which are applicable for each day. All the limit definitions maintained with cumulative – daily limit type and with the same currency as defined at package level are listed for selection.
Cumulative Limit Monthly	Cumulative transaction limits which are applicable for each month. All the limit definitions maintained with cumulative – monthly limit type and with the same currency as defined at package level are listed for selection.

Field Name	Description
Transaction Limit	Transaction minimum and maximum initiation limits. All the limit definitions maintained with transaction – limit type and with the same currency as defined at package level are listed for selection.
Cooling Limit	All the limit definitions maintained with cooling period – limit type and with the same currency as defined at package level are listed for selection.

2. In the **Limit Package Code** field, enter the code for the limit package.
3. In the **Limit Package Description** field, enter the description of the limit package.
4. In the **Touch Point** field, select the appropriate option.
 - a. If you select **Touch Point**;
 - i. From the **Touch Point** list, select the appropriate option.
 - b. If you select **Touch Point Group**;
 - i. From the **Touch Point Group** list, select the appropriate option.
 - c. Select **Global**, to create a limit package for a group of all touch points.
5. From **Available To Role** list, select the appropriate role.
6. From **Currency** list, select the appropriate currency to be associated with the Limit Package. It enables the **Transactions / Transaction Group - Limits** section.
7. From the **Transaction / Transaction Group Name** from the list, select the appropriate option for the limit package in the **Transactions / Transaction Group - Limits** section.

Note: Click [View Details](#) link to view transaction group details.

View Details -Transaction Group Details

The screenshot displays the ZigBank Transaction Group Maintenance interface. A modal window titled 'View Details' is open, showing the following information:

Sr No.	Transactions
1	QR Payment
2	Domestic Payment - IMPS
3	PeerToPeer Transfer
4	Self Transfer
5	Bill Payment
6	International Transfer
7	International Draft
8	Domestic Draft

The background interface shows the 'Transaction Group Maintenance' form with fields for Limit Package Code (STLPGroup26Sep14), Limit Package Description (STLPGroup), Touch Point Group (001), Available To Role (Corporate User), Currency (GBP), Transaction Name (Self Transfer), and Effective Date (26 Sep 2018). A right-hand panel contains an 'Edit Package Details' section with instructions on how to manage transactions within the limit package.

Field Description

Field Name	Description
Group Code	Search the transaction groups with group code.
Group Description	Search the transaction groups with group description.
No. of Transactions	Number of transactions associated with the transaction groups.

8. Select the **Effective Date** from the calendar for the limit package in the **Transactions / Transaction Group - Limits** section.
9. From the **Cumulative Limit Daily, Cumulative Limit Monthly, Transaction Limit and Cooling Limit** lists, select the appropriate limits.
10. Click **Add Transaction** and repeat the steps 4 to 6, if you want to assign limits for more transactions.
OR
Click **Add Transaction Group** and repeat the steps 4 to 6, if you want to assign limits for more transactions groups.
11. Click **Save** to save the limit package.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate back to previous screen.
12. The **Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate back to previous screen.
13. The success message of transaction submission appears.
Click **OK** to complete the transaction.

Note: You can click  to delete a transaction or cooling limit of a transaction.

10.3 Limit Package Management - Edit

Using this option, System Administrator can update or edit a limit package created for a specific channel/touch point. User is not allowed to edit the code, currency and touch point details, whereas can add or remove the transactions/transaction groups available as a part of package. And also can edit the limit definitions mapped against each type of limit.

To edit a limit package:

1. In the **Limit Package Management** screen, click **Search**. The **Limits Package Management** screen with search results appears based on the searched criteria.
OR
Click **Clear** to reset the search parameters.
OR
Click **Cancel** to cancel the search process.

Limit Package Management - Search

The screenshot shows the 'Limit Package Management' search interface in the ZigBank system. The search filters include Package Code, Package Description, Role (with a 'Select Roles' dropdown), Touch Point/ Group (with radio buttons for Touch Point, Touch Point Group, and Global), Currency, and Updated On (with 'From Date' and 'To Date' fields). Below the filters are 'Search' and 'Clear' buttons. The search results table has the following data:

Package Code	Package Description	Touch Point	Currency	Updated On	Roles
LimitPackage6	Package 6 for all txns	APINTERNET	GBP	13 Jul 2018	corporateuser
LimitPackage1	Package 1 for all txns	APINTERNET	GBP	13 Jul 2018	corporateuser

5. The success message of limit package deletion appears.
Click **OK** to complete the transaction.

FAQs

1. Can I delete transaction and/ or cumulative limits against a transaction in limit package?

No, existing limits against a transaction cannot be deleted; it can only be edited if effective date is starting from a future date.

2. Am unable to delete a limit through limit maintenance?

There is a possibility that the limit that you are trying to delete is associated in the limit package against a transaction(s).

3. Am unable to delete limits package through limit maintenance?

There is a possibility that the limit package that you are trying to delete is associated at any of the entities i.e. User / Party / Segment/ Enterprise Role level.

4. As part of edit, what can I update in the limits package maintenance?

You can edit the transaction and/ or cumulative limits against the transaction. You can delete the transaction(s) from the limits package and/or you can also add new transaction(s) as part of the limits package

5. What is the significance of 'Available to Roles' in Limits package?

The roles defined in Limits package will make the package available to the users of that role only.

6. Have created/ edited/ deleted Limits and/ or Limits package but it is not reflecting in the system even after a successful maintenance save message?

There is a possibility that the maintenance is saved but the status is 'Pending Approval'. For the maintenance, if there is an approval required then the changes will reflect only once the approver(s) approve the submitted request. If the setup does not require an approval workflow or is self / auto approved, then the same will reflect immediately.

7. How can I define the touch point groups?

A separate menu option 'Touch Point Group Maintenance' is available using which you can maintain internal and external touch point groups.

8. How can I define the transaction groups?

A separate menu option 'Transaction Group Maintenance' is available using which you can maintain group of transactions.

9. Can I manually define Global touch point group?

No, Touch Point – Global is nothing but a group of all internal and external touch points available in the application. This group cannot be maintained manually,

10. Will the limits be applicable for newly added touch point or transactions in a respective groups?

Yes, limits will also be applicable for transaction or touch points added at a later stage in respective groups which are mapped as a part of limit package.

11. How the limit will be utilized, if you add a new transaction to the group for which customers have already initiated transactions during the day but before group formation?

Limits assigned at individual transaction level will be utilized for the transaction Initiated before the transaction group formation. These limits will not be considered for group limit utilization.

12. Can I delete a transaction group which is a part of any limit package?

No, a transaction group cannot be deleted if a group is already associated with the limit package.

13. How the limits will be applied if the limit definitions are mapped for a specific transaction and to a group in which the same transaction is available?

Limits mapped for a transaction and group will be checked. Only if the sufficient limits are available at both the level, then user will be allowed to perform the transaction.

Example:

User level daily transaction limit of Domestic Transfer internet banking channel = 100000

User level daily transaction limit of Domestic Transfer for mobile banking channel = 50000

User level daily consolidated touch points transaction limit for Domestic Transfer = 120000

Days	User action	Internet – Touch Point Limit	Mobile – Touch Point limit	Touch Point Group – User level limits
Day 1	For internet as a touch point, Domestic Transfer transaction limit assigned by the Bank is 100000.	100000		120000
Day 1	For Mobile as a touch point, Domestic Transfer transaction limit assigned by the Bank is 50000		50000	
Day 1	This means, user can perform maximum transaction worth 100000 from internet and maximum of 50000 from mobile daily. And touch point group limit maintained is 120000 for a day User level will override the limits			

Days	User action	Internet – Touch Point Limit	Mobile – Touch Point limit	Touch Point Group – User level limits
	defined at user segment/type level			
Day 1	<ol style="list-style-type: none"> 1. User preforms Domestic Transfer transaction worth 20000 from mobile touch point. 2. Now, user will be allowed Domestic transfer transaction of 100000 from internet and 30000 from mobile for that day 3. As per touch point group limits, user will be allowed to perform domestic transfer transaction of 100000 from either internet banking OR mobile banking. 	100000	30000	100000
Day 1	<ol style="list-style-type: none"> 1. User preforms Domestic transfer transaction of 50000 from internet \ on the same day. 2. Now, user will be allowed maximum of 50000 Domestic transfer transaction from internet banking and 30000 from mobile banking for that day. 3. Whereas, as per consolidated touch point limit, user will be allowed to perform Domestic Transfer transaction worth 50000 from either internet or from mobile. 	50000	30000	50000
Day 1	<ol style="list-style-type: none"> 1. Now user preforms Domestic transfer transaction of 20000 from mobile. 2. Then user will be allowed to perform the transaction of 50000 from internet and 10000 from mobile for that day. 3. As per consolidated touch point limit, user will be allowed Domestic Transfer transaction of 30000 from either internet or mobile. 4. Now, user will be allowed transaction of 30000 only from internet as consolidated channel limit is reduced to 30000. 	50000	10000	30000
Day 1	<ol style="list-style-type: none"> 1. After above transaction, if user utilizes 30000 from internet then internet limit 	20000	10000	0.00

Days	User action	Internet – Touch Point Limit	Mobile – Touch Point limit	Touch Point Group – User level limits
	will be 20000 2. Now, if user performs Domestic transfer transaction of any amount from mobile or internet then user will be displayed an error message. As touch point group limits are exhausted.

11. User Limits

Using this option the System/Bank Administrator can view the current available and utilized limits of specific retail user and also can modify (increase or decrease) the limits as per the requirement.

The user limits can be set for specific transaction level or at transaction group level or for a specific channel or for a group of channels.

The different types of limits are as follows:

- Daily Count- Permitted number of transactions in a day
- Daily Amount- Cumulative amount of transactions in a day
- Monthly Count- Permitted number of transactions in a month
- Monthly Amount- Permitted number of transactions in a month

Prerequisites:

- Transaction access is provided to System Administrator.
- Limit package are assigned.
- Approval rule set up for System/Bank Administrator to perform the actions.

Workflow

Features supported in application

Following functions can be performed by the System administrator as part of the maintenance:

- Search/ View User Limits
- Edit User Limits

How to reach here:

System Administrator Dashboard > Limits > User Limits

OR

System/ Bank Administrator Dashboard > Toggle menu > Limits > User Limits

11.1 User Limits - View

Using this option, System Administrator can search and view the current available and utilized limits of specific retail user.

To search and view user limits:

1. Enter the search criteria, click **Search**.
The search results appear on the **User Limits** screen based on the search parameters.
OR
Click **Cancel** if you want to cancel the transaction.
OR
Click **Clear** if you want to reset the search parameters.

User Limits - Search

The screenshot displays the 'User Limits' search interface in the ZigBank system. The header includes the ZigBank logo, a search icon, a notification badge with '1447', and a user profile for 'Administrator User' with the last login time '14 Nov 12:03 AM'. The main content area is titled 'User Limits' and contains a search form. The 'User Type' is set to 'Retail User'. The form includes input fields for 'User Name', 'First Name', 'Last Name', 'Email', 'Mobile Number', and 'Party ID'. A 'Search Party Name' button is positioned below the 'Party ID' field. Below the search fields is a link for 'Less Search Options' with an upward arrow. At the bottom of the form are three buttons: 'Search' (green), 'Cancel' (grey), and 'Clear' (grey). To the right of the search form is a 'User Limits' information box. It features a blue icon of a notepad and a pencil, followed by the title 'User Limits'. The text inside the box states: 'You can now enforce the limits assigned to a user for performing various transactions. You can also check a user's utilized and available limits and customer defined limits if any. Further you can modify the user's limits for specific transaction.' The footer of the page contains the text: 'Copyright © 2006, 2017, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

Field Description

Field Name

Description

User Type

Type of user to be searched.
This will be defaulted to 'Retail User'.

User Name

To search the retail user with the user name. Partial search is allowed.

More Search Options

Below fields appears if you click the **More Search Options** link.

First Name

Allows to search based on first name or given name of the retail user.

Last Name

Allows to search based on last name/ surname of the retail user.

Email

Allows to search based on email id of the retail user.

Mobile Number

Allows to search based on mobile number of the retail user.

Field Name	Description
Party ID	Allows to search based on Party id of the retail user.
Search Party Name	Allows search based on Party name of the retail user.
Enter Party Name	Party name of the retail user based on which search is to be done.
Search Result	
Full Name	First name and last name of the retail user.
Party ID	Displays the party id of the retail user.
User Name	Displays the retail user's user name.

2. Click the **User Name** of the record for which you want to view the user limits details. The **User Limits - View** screen appears.

 7. The **Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate back to previous screen.
 8. The success message of limits updation appears.
Click **OK** to complete the transaction.

FAQs

1. **Can I delete transaction and/ or cumulative group of transactions for which the limits are assigned using this function?**

No, the transactions and/or group of transactions available in the limit package cannot be deleted or new transaction/transaction group can be added using this maintenance.

2. **Will the changes made in the user's limits will be applicable to all other users whom the same package is mapped?**

No, the changes made in the limits will be applicable only the user of whom the details are being changed. Other users will continue to enjoy the same limits.

3. **Will the changes made in the user's limits will be effective immediately?**

The limits will be effective from the date mentioned as 'Effective Date' while updating the limits. If the effective date is current date and day 0 flag is set as 'Next Day' for change in limits applicability. Then the changed limits will be applicable from the next day.

4. **How can I reassure of changing the specific limits, as the screen has lot of information?**

As a part of user limits change review screen, only the transactions of which the limits are changed are shown on the screen with highlighted values. You can recheck the information and confirm the changes.

5. **Can I make the changes in the limits assigned to corporate users?**

No, changes cannot be done for the limits assigned to corporate users using this maintenance.

12. Transaction Group Maintenance

Transaction group maintenance enables the System Administrator to create and maintain group of transactions. Administrator can maintain a transaction group for the purpose of defining consolidated transaction limits. Once limits are assigned at transaction group, these limits acts as collective limit for selected transactions in a group.

For e.g., If the cumulative limit daily (for payment transaction group) is set to GBP 2000, then in a day, customer will be allowed to perform transactions up to GBP 2000 only, spanning across all selected transactions in a group.

Prerequisites:

- Transaction access is provided to system administrator.
- Approval rule set up for system administrator to perform the actions.
- Transactions are available for grouping.

Workflow

Features supported in application

The administrator can perform the following actions:

- Create Transaction Group
- Search/ View Transaction Group
- Edit Transaction Group
- Delete Transaction Group

How to reach here:

System/ Bank Administrator Dashboard > Toggle menu > Limits > Transaction Group Maintenance

12.1 Transaction Group Maintenance - View

Using this option, System Administrator can search and view details of particular transaction group based on different search parameters like group code or group description. The search results displays a summary of matching transaction groups.

Further, System Administrator can view the details of transaction groups created for the purpose of maintaining limits.

To search and view transaction group:

1. In the **Transaction Group Maintenance** screen, enter the search parameters and click **Search**.
The **Transaction Group Maintenance** screen with search results appears based on the search criteria.
OR
Click **Cancel** to cancel the search process.
OR
Click **Clear** to reset the search parameters.

Transaction Group Maintenance - Search

The screenshot shows the 'Transaction Group Maintenance' screen. At the top, there's a header with the ZigBank logo and user information: 'Welcome, superadmin' and 'Last login 17 Jun 02:10 AM'. Below the header, there are search filters: 'Group Code' (empty) and 'Group Description' (containing 'a'). There are 'Search' and 'Clear' buttons. Below the filters is a table with the following data:

Group Code	Group Description	No of Transactions
ALLTXNSGRP1	All transaction group 1	23
MustuTG03	InternationalDraft /DomesticDraft	8
CorpTransactionGroup	CorpTransactionGroup	9
GroupCode1	AJGroupCode	8
AJGroupCode	AJGroupCodeDesc	8
FUCORPALLTXNGRP	All Txn Group FUCORP	25
MustuTG02	International Draft/Self Transfer/Bill Payment/Domestic Draft	4
FUCORPTXNGRP	FUCORP Transaction Group	25
PAYMENTS1	PAYMENTS1	2
PAYMENTS02	PAYMENTS02	2

On the right side, there is a sidebar titled 'Create and Maintain Transaction Groups' with a 'Create' button and a description: 'Create a group and add multiple transactions to a group. Similarly you can create multiple groups. Access Limit, Package Management for defining limits for a group of transactions.'

Field Description

Field Name	Description
Group Code	Search the transaction groups with group code.
Group Description	Search the transaction groups with group description.
Search Results	
Group Code	Group code defined for a Transaction Groups.
Group Description	Group description defined for a Transaction Groups.
No. of Transactions	Number of transactions associated with the transaction groups.

- Click the **Group Code** link of the record to view the transaction group details. The **Transaction Group Maintenance - View** screen appears.

Transaction Group Maintenance - View

The screenshot displays the 'Transaction Group Maintenance - View' interface. At the top, the ZigBank logo and user information 'Welcome, superadmin' are visible. The main content area is divided into two sections:

- Transaction Group Maintenance:** A table showing the group code 'ALLTXNSGRP1' and description 'All transaction group 1'. Below this is a list of 23 transactions, each with a serial number (Sr No.) and a description. At the bottom of this section are buttons for 'Edit', 'Delete', 'Cancel', and 'Back'.
- Transaction Group Details:** A sidebar on the right containing a calendar icon and a warning message: 'You may edit or delete this Transaction Group. Using edit option, you can add or remove the transactions. Group can be deleted if not associated with any limit package and the package is not mapped at various levels.'

Field Description

Field Name	Description
Group Code	Group code defined for a Transaction Groups.
Group Description	Group description defined for a Transaction Groups.
Transactions	Displays the transactions which are a part of transaction group.

- Click **Edit** to add or remove the transactions from the transaction group.
OR
Click **Delete** to delete the transaction group.
OR
Click **Cancel** to cancel the transaction and go back to Dashboard.
OR
Click **Back** to navigate to the previous screen.

12.2 Transaction Group Maintenance - Create

Using this option, System Administrator can create a new transaction group and can add multiple transactions to a group. Administrator can create multiple transaction groups. Also can add same transactions as a part of multiple groups.

To create a transaction group:

1. In the **Transaction Group Maintenance** screen, click **Create**. The **Transaction Group Maintenance - Create** screen appears.

Transaction Group Maintenance - Create

Field Description

Field Name	Description
Group Code	Unique group code defined for a Transaction Groups.
Group Description	Group description defined for a Transaction Groups.
Transactions	The list of transactions which are a part of transaction group.

2. In the **Group Code** field, enter the code for the transaction group.
3. In the **Group Description** field, enter the description for the transaction group.
4. Click **Select Transactions**, a transaction drop-down appears with the list of transactions grouped according to the type. Multiple transactions can be selected.

Note: All the transactions for which limit flag is enabled will be displayed according to the type.

5. Add required transactions to group.
6. Click **Save** to save the transaction group details.
OR

- Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to the previous screen.
7. The **Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to the previous screen.
8. The success message of Transaction Group Maintenance saved successfully appears along with the transaction reference number.
Click **OK** to complete the transaction.

12.3 Transaction Group Maintenance - Edit

Using this option, System Administrator can update or edit a transaction group by adding / removing the transactions associated with the transaction group for purpose of limit maintenance.

To edit a transaction group:

1. In the **Transaction Group Maintenance** screen, click **Search**. The **Transaction Group Maintenance** screen with search results appears based on the searched criteria.
OR
Click **Cancel** to cancel the search process.
OR
Click **Clear** to reset the search parameters.

Transaction Group Maintenance - Search

The screenshot displays the 'Transaction Group Maintenance' search interface. At the top, there is a navigation bar with the ZigBank logo and user information: 'Welcome, superadmin' and 'Last login 19 May 03:40 AM'. Below the navigation bar, the page title is 'Transaction Group Maintenance'. The main content area contains search filters for 'Group Code' and 'Group Description', with the value 'all' entered in the 'Group Description' field. There are three buttons: 'Search' (green), 'Cancel' (grey), and 'Clear' (grey). Below the filters is a table with the following data:

Group Code	Group Description	No of Transactions
ALLTXNS1	All Transactions Group 1	24

To the right of the table is a sidebar titled 'Create and Maintain Transaction Groups' with a 'Create' button. The sidebar text reads: 'You can create new Transaction Groups by clicking on create.'

At the bottom of the page, there is a footer with the text: 'Copyright © 2006, 2017, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'

2. Click the **Group Code** link of the record to view the transaction group details. The **Transaction Group Maintenance - View** screen appears.

- Click **Yes** to confirm the deletion.
OR
Click **No** to cancel the deletion process.
- The success message of transaction group deletion appears.
Click **OK** to complete the transaction.

FAQs

1. Can I club one transaction as a part of multiple groups?

Yes, one transaction can be clubbed as part multiple groups.

2. Where can I use these transaction groups?

You can define a transaction limits using 'Limit Package Management' for these transaction groups.

3. Can I edit a transaction group which is a part of any limit package?

Yes, you can edit the transaction group details if a group is already associated with the limit package.

4. How the limit will be utilized, if you add a new transaction to the group for which customers have already initiated transactions during the day but before group formation?

Limits assigned at individual transaction level will be utilized for the transaction Initiated before the transaction group formation. These limits will not be considered for group limit utilization.

5. Can I delete a transaction group which is a part of any limit package?

No, if a transaction group cannot be deleted if a group is already associated with the limit package.

13. Party Account Access

System/Bank Administrator can set up account and transaction access rules at the corporate party level. The System/ Bank Administrator can provide access to accounts held by the party with the bank as available in the core banking application or the respective mid-office application.

Using this function system administrator can manage access for Current and Savings Accounts, Term Deposit Loan accounts along with Liquidity Management enabled Real Accounts (including External Accounts if any) and VAM enabled Real and virtual accounts for a Corporate.

Upon navigating to the specific category tab viz. Demand Deposits, Term Deposits, Loans etc., the administrator can select a global check box of 'Map all accounts' to enable all the existing accounts under the selected category for channel banking. If specific accounts are required to be given access then the user needs to select the respective check boxes preceding the account number.

Note: Access Management for Loan Accounts are for accounts fetched from Core Banking System i.e. FCUBS. It is not supported for accounts from Oracle Banking Corporate Loan (OBCL) system.

As part of this maintenance, own accounts and transaction mapping as well as accounts of the linked parties can be mapped to the parent party.

Note: 1) Linked Party Access Management can be provided to parent party or users of the parent party only for Account Types CASA, TD and Loans.

2) Linked party account mapping is not supported for Account Types 'VAM-Real Accounts, Virtual Accounts and Liquidity Management – Real Accounts'.

If there is any party to party linkage maintained in the mid-office system 'OBLM', then those accounts will appear in own account linkage itself on the OBAPI side for access management.

Pre-Requisites

- Party preferences should be created for the party for which access is to be maintained
- Channel Access should be enabled for party for which account access is to be maintained
- Account access maintenance for linked party accounts can be done once there is a party to party linkage maintained.
- Transaction access is provided to Bank Administrator.
- Approval rule set up for Bank Administrator to perform the actions.

Workflow

Features Supported In Application

The following options are available as part of this maintenance:

- Party Account Access - Mapping (Own accounts and linked party accounts)
- Party Account Access – View (Own accounts and linked party accounts)
- Party Account Access - Edit (Own accounts and linked party accounts)
- Party Account Access - Delete (Own Accounts and linked party accounts)

How to reach here:

Bank Administrator Dashboard > Account Access > Party Account Access

OR

System/ Bank Administrator Dashboard > Toggle menu > Account Access > Party Account Access

13.1 Party Account Access - Mapping (Create)

The Bank Administrator gets a request with the list of account(s) and transactions for which access needs to be provided to the party.

To provide the party with account and transaction access:

1. In the **Party ID** field, enter the party id of the user.
OR
In the **Party Name** field, enter the party name of the user.
2. Click **Search**. For a searched party, two sections **Own Account Mapping Summary** and **Linked Party Account Mapping Summary** appears.
Linked party account mapping will only be available if the selected party has Party to Party Linkage maintained.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Clear** to clear the search parameters.

Party Account Access - View (Linked Party Account Mapping Summary)

The screenshot displays the 'Party Account Access' page in the ZigBank system. At the top, the parent party is identified as 'FIER INDUSTRIES' (ID: 002385) and the linked party as 'Will Smith' (ID: 002306). The main section is titled 'Linked Party Account Mapping' and includes tabs for 'Current & Savings', 'Term Deposit', and 'Loans'. Under 'New Accounts', there are 'Auto' and 'Manual' mapping options. The 'Existing Accounts' section shows a table of three active current accounts for the parent party, all in GBP currency. A note at the bottom indicates that account mapping for these categories can be viewed by visiting the respective account type tabs.

Account Number	Currency	Product Name	Account Status
AT30238500022	GBP	Current Accounts - Regular	ACTIVE
AT30238500033	GBP	Current Accounts - Regular	ACTIVE
AT30238500011	GBP	Current Accounts - Regular	ACTIVE

Field Description

Field Name	Description
------------	-------------

Current and Savings/ Term Deposits/ Loans

New Accounts

Map Accounts Mapping of the accounts.
The options can be:

- Auto: gives default access to the all future newly added accounts and transactions of the party as soon as the account is opened.
- Manual: gives specific access to future accounts. This is to explicitly map new accounts and transactions if access needs to be provided

Existing Accounts

Map All Accounts Mapping all the existing accounts under the selected category to enable for channel banking.

Account Number List of account numbers present in a particular account type.

Field Name	Description
Currency	Account currency.
Product Name	Name of the product available under the party.
Account Status	Status of the account access for the party

8. Click **Next**. The **Party Account Access- View** screen for account selected and transactions enabled for the selected account appears.
OR
Click **Edit** to modify the account access.
OR
Click **Delete** to delete the Party Account Access setup.
OR
Click **Cancel** to cancel the transaction.
OR

Party Account Access - Transaction- Account Mapping (Linked Account Mapping) - View

The screenshot displays the 'Party Account Access' page in the ZigBank system. At the top, the parent party is identified as 'FIER INDUSTRIES' (ID: 002385) and the linked party as 'Will Smith' (ID: 002306). The main section is titled 'Transaction Mapping for Linked Party Accounts' and is currently set to 'Current & Savings'.

A table lists the accounts to be mapped:

Account Number	Currency	Product Name	Account Status
AT30238500022	GBP	Current Accounts - Regular	ACTIVE
AT30238500033	GBP	Current Accounts - Regular	ACTIVE
AT30238500011	GBP	Current Accounts - Regular	ACTIVE

Below the table, a comprehensive list of transaction types is shown with checkboxes for mapping. These include categories like 'Map All Transactions', 'CASA Inquiries', 'Loans', 'Bank Guarantee', 'Letter Of Credit', 'Payments', 'Reports', 'File Upload', 'CASA', 'Term Deposits - Financial', 'Electronic Bill Payment', and 'Term Deposits'. Each category contains several specific transaction types, such as 'Domestic Payment', 'International Draft', 'Request User Report', 'File Upload - Record Cancellation', 'Replace Debit card', 'Create RD', 'Create Biller Registration', and 'Amend RD'.

At the bottom of the interface, there are 'Edit', 'Cancel', and 'Back' buttons. A footer note states: 'Transaction Mapping for each of the accounts can be viewed by visiting the respective Account Type tabs'.

9. Click  against the particular account number to view the mapped transactions.
OR
Click **Edit** to update transaction mapping.
OR
Click **Cancel** to cancel the transaction.
10. Click **Edit** to update the **Party Account Access** account mapping for new accounts and existing accounts.
OR

Click **Cancel** to cancel the transaction.
 OR
 Click **Back** to navigate to the previous screen.

13.3 Party Account Access - Edit

The Bank Administrator gets a request with the list of account(s) and transactions for which access details needs to be edited for the party.

To edit account and transaction access for the party:

1. In the **Party ID** field, enter the party id of the user.
 OR
 In the **Party Name** field, enter the party name of the user.
2. Click **Search**. For a searched party, two sections **Own Account Mapping Summary** and **Linked Party Account Mapping Summary** appears.
 Linked party account mapping will only be available if the selected party has Party to Party Linkage maintained.
 OR
 Click **Cancel** to cancel the transaction.
 OR
 Click **Clear** to clear the search parameters.
3. If there is no mapping done for a party (own/ linked), the message **No Accounts mapped for the party** with **Map** appears.
4. Click **Account Type** i.e. Current and Savings / TD / Loans/ Liquidity Management – Real Account/ Virtual Account Management – Real Account/ Virtual Account in the summary details for the party, which will navigate to the view page.
 All the accounts held by the selected party as a relationship with the bank as available in the core banking system or respective mid-office system will be fetched and displayed in the respective categories i.e. Current and Savings, Term Deposits, Loans, Liquidity Management – Real Account, Virtual Account Management – Real Account and Virtual Account.
 OR
 Click **Cancel** to cancel the transaction and navigate back to 'Dashboard'.
 OR
 Click **Back** to navigate to the previous screen.
5. In case the selected party is mapped as a parent party to another party, select on the account type in the linked party summary section.
6. Click on **Account type** link to view/edit the details
7. Navigate to the specific category tab viz. Current and Savings, Term Deposits, Loans, the administrator can view both the accounts for which access has been provided and the ones for which access is not provided.
 Click **Edit**. The **Party Account Access - Edit** screen appears.
 This enables the selection and de-selection option against the accounts and also allow changing the map accounts from Auto to Manual and vice-versa.
 OR
 Click **Next** to next tab (Current and Savings/Term Deposit/Loans/ Liquidity Management – Real Account/ Virtual Account Management – Real Account/ Virtual Account)
 OR
 Click **Delete** to delete the Party Account Access setup.
 OR
 Click **Cancel** to cancel the transaction.

OR

Click **Back** to navigate to the previous screen.

8. Click **Account Type** for which you want to edit the mapping of the accounts.
9. The cookie message displayed indicating the administrator that account mapping for other category tabs can be viewed by visiting the respective tabs.

Party Account Access (Linked Party Account Mapping) – Edit

The screenshot displays the 'Party Account Access' interface. At the top, it shows the parent party information: Parent Party ID 002385 and Parent Party Name FIER INDUSTRIES. The linked party information is: Linked Party ID 002306 and Linked Party Name Will Smith. Below this, there are tabs for 'Account Mapping' with sub-tabs for 'Current & Savings', 'Term Deposit', and 'Loans'. The 'Current & Savings' tab is active. Under 'New Accounts', there is a 'Map Accounts' field with 'Auto' and 'Manual' options. Under 'Existing Accounts', there is a checkbox for 'Map All Accounts' and a table of accounts. The table has columns for 'Account Number', 'Currency', 'Product Name', and 'Account Status'. Three accounts are listed, all with 'ACTIVE' status. At the bottom, there are 'Next', 'Cancel', and 'Back' buttons.

Account Number	Currency	Product Name	Account Status
<input checked="" type="checkbox"/> AT30238500022	GBP	Current Accounts - Regular	ACTIVE
<input checked="" type="checkbox"/> AT30238500033	GBP	Current Accounts - Regular	ACTIVE
<input checked="" type="checkbox"/> AT30238500011	GBP	Current Accounts - Regular	ACTIVE

10. To map the new accounts, select appropriate option from **Map Accounts** field; Select **Auto** if you wish to allow access to all future Current and Savings/ Term Deposit/ Loans/ Liquidity Management – Real Account/ Virtual Account Management – Real Account / Virtual Account accounts.
OR
Select **Manual** if you wish to allow specific access to all future Current and Savings/ Term Deposit/ Loans/ Liquidity Management – Real Account/ Virtual Account Management – Real Account/ Virtual Account accounts.
11. Select the respective check boxes preceding the **Account Number** to be mapped.
OR
Select **Map All Accounts**, if you want to map all the account numbers.
12. Click **Next**. The **Party Account Access - Edit** screen with mapped transaction - account appears.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to the previous screen.
13. To map the transactions to the account, click  against the particular account number to view the transaction mapping.
14. Select the respective check boxes preceding the transaction to be mapped.
OR
Select **Map All Transactions**, if you want to map all the transactions to all accounts.

Party Account Access - Transaction- Account Mapping (Linked Party Account Mapping) - Edit

The screenshot displays the 'Party Account Access' page in the ZigBank system. At the top, the parent party is identified as 'FIER INDUSTRIES' (ID: 002385) and the linked party as 'Will Smith' (ID: 002306). The main section is titled 'Transaction Mapping for Linked Party Accounts' and includes tabs for 'Current & Savings', 'Term Deposit', and 'Loans'. A table lists three accounts, all with GBP currency and 'Current Accounts - Regular' product names, and 'ACTIVE' status. The first account (AT30238500022) is expanded to show a comprehensive list of transaction types, each with a checked checkbox indicating it is mapped. These include categories like 'Map All Transactions', 'CASA Inquiries', 'Loans', 'Bank Guarantee', 'Letter Of Credit', 'Payments', 'Reports', 'File Upload', 'Credit Cards', 'All Inquiry Transactions', 'Sweep-In Instruction', 'Electronic Bill Payment', and 'Term Deposits'. At the bottom of the mapping area, there are 'Save', 'Cancel', and 'Back' buttons. A footer note states: 'Transaction Mapping for each of the accounts can be viewed by visiting the respective Account Type tabs'.

15. Click **Save** to save the changes.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to the previous screen.
16. The **Party Account Access - Review** screen appears. Verify the details, and click **Confirm**.
OR

Click **Cancel** to cancel the transaction.

OR

Click **Back** to navigate to the previous screen.

17. The screen with success message appears. Click **OK** to complete the transaction.

13.4 Party Account Access - Delete

As part of this option, own account mapping and/or linked party account mapping can be deleted.

To delete account and transaction access for the party:

1. In the **Party ID** field, enter the party id of the user.
OR
In the **Party Name** field, enter the party name of the user.
2. Click **Search**. For a searched party, two sections **Own Account Mapping Summary** and **Linked Party Account Mapping Summary** appears.
Linked party account mapping will only be available if the selected party has Party to Party Linkage maintained.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Clear** to clear the search parameters.
3. If there is no mapping done for a party (own/ linked), the message **No Accounts mapped for the party** with **Map** appears.
4. Click **Account Type** i.e. Current and Savings / TD / Loans/ Liquidity Management – Real Account/ Virtual Account Management – Real Account/ Virtual Account in the summary details for the party, which will navigate to the view page.
All the accounts held by the selected party as a relationship with the bank as available in the core banking system or respective mid office system will be fetched and displayed in the respective categories i.e. Current and Savings, Term Deposits, Loans, Liquidity Management – Real Account, Virtual Account Management – Real Account and Virtual Account.
OR
Click **Cancel** to cancel the transaction and navigate back to 'Dashboard'.
OR
Click **Back** to navigate to the previous screen.
5. In case of mapping of linked party accounts to the parent party, select on the account type in the linked party summary section.
6. Navigate to the specific category tab viz. Current and Savings, Term Deposits, Loans, Liquidity Management – Real Account, Virtual Account Management – Real Account, Virtual Account etc., the administrator can view both the accounts for which access has been provided and the ones for which access is not provided.
7. Click **Delete**. The application prompt the administrator with a message Are you sure you want to delete Party Account Access setup for linked Party ID – Party name with an option of Yes / No.
8. Click **Yes** to proceed with the deletion request.
It will navigate to confirmation page with a success message and the status.
OR
Click **No** if you do not wish to proceed with deletion.
9. The success message and the status appear.

10. Click **OK** to complete the transaction.

FAQs

1. Is it necessary to setup Party Account Access Management before setting up User Account Access?

Yes. The party account access management setup must be done before the user level mapping of accounts and transactions.

2. What is the significance of Auto and Manual option in 'Map Accounts'?

This feature allows the administrator to configure access policies for accounts and associated transactions which may get added subsequently in the future.

Auto: Gives access to the newly added accounts and transactions of the party as soon as the account is opened. This option can be selected whenever bank administrator wishes to provide access by default

Manual: Denies the newly added accounts and transactions by default. This is to ensure that access to accounts and transactions is provided only upon receiving specific instructions from corporates

3. Party Account Access has not been maintained for the party for Own or Linked party, still there is no 'Map' button available?

It is possible that the channel access and/or party preferences has not been maintained for the party whose accounts needs to be provided for access to the selected party. There will be an appropriate message provided to the user below the party details. Before proceeding with account access, administrator can visit 'Party Preferences' screen and maintain the preferences and/or channel access for the party.

4. Will Party Account Access – Deletion for a party (Own/Linked) lead to automatic deletion of User Account Access?

Yes. Deletion of account access for a party will lead to automatic deletion of access for the users of that party.

5. If I remove access of account(s) and transaction(s) for a party, will it lead to automatic access removal for the users of that party

Yes. Access removal at party level for an account and/or transaction will automatically remove access at user level of the selected party.

6. I have mapped/edited/deleted party account access for a party but it is not reflecting in the system even after a successful maintenance save message?

There is a possibility that the maintenance is saved but the status is 'Pending Approval'. For the maintenance, if there is an approval required then the changes will reflect only once the approver(s) approve the submitted request. If the setup does not require an approval workflow or is self / auto approved, then the same will reflect immediately.

[Home](#)

14. User Account Access

Using this option the Bank Administrator can set up account and transaction access for user(s) of the corporate party. This maintenance can be done only after the Party Account Access is setup for the party of the user(s). The user level mapping of accounts and transactions must be done in order to provide access to the accounts for performing transactions to the specific user. If this step is not followed, the corresponding user will not be able to view any accounts on the dashboard screen or at the individual transactions.

Pre-Requisites

- Account Access should be maintained for the party of the user for which access is to be maintained
- Account Access for the party should be maintained for linked party accounts if the user needs access to linked party accounts.
- Party preferences should be created for the party of the user for which access is to be maintained
- Channel Access should be enabled for party of the user for which account access is to be maintained
- Transaction access is provided to Bank Administrator.
- Approval rule set up for Bank Administrator to perform the actions.

Workflow

Features Supported In Application

The following options are available as part of this maintenance:

- User Account Access - Mapping (Own accounts and linked party accounts)
- User Account Access – View (Own accounts and linked party accounts)
- User Account Access - Edit (Own accounts and linked party accounts)
- User Account Access - Delete (Own Accounts and linked party accounts)

How to reach here:

Bank Administrator Dashboard > Account Access > User Account Access

OR

System/ Bank Administrator Dashboard > Toggle Menu > Account Access > User Account Access

14.1 User Account Access - Mapping (Create)

This option lets the administrator to provide account access to specific users of a party.

To provide the user with account and transaction access:

1. In the **Party ID** field, enter the party id of the user.
OR
In the **Party Name** field, enter the party name of the user.
2. Click **Search**.
For a searched party, there will be a list of users displayed with information like user ID, contact details of the user and an indicator whether there is an account mapping done for the user.
Click on user ID to navigate to **Account Access summary** section with two sections **Own Account Mapping Summary** and **Linked Party Account Mapping Summary**. Linked party account mapping will only be available if the selected party has Party to Party Linkage maintained.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Clear** to clear the search parameters.

User Account Access – Search

The screenshot shows the 'User Account Access' search interface. At the top, there is a navigation bar with the ZigBank logo and user information: 'Welcome, superadmin' and 'Last login 15 Jun 08:57 PM'. The main content area has a search form with two input fields: 'Party ID' and 'Party Name'. Below these fields are three buttons: 'Search' (green), 'Cancel' (grey), and 'Clear' (grey). To the right of the search form is a 'Note' box with a blue icon of a notepad. The note text reads: 'The function enables you to set up account and transaction access rules for a corporate user. You can decide the account(s) along with transaction(s) for each of the selected account that the corporate user needs to be provided access. Accounts of the parent as well as of the linked party (if any) will be available for access definition.'

Field Description

Field Name	Description
Party ID	The party ID searched by the Bank Administrator.
Party Name	The name of the party.
User ID	User ID of the selected user.
User Name	User name of the selected user.
Account Mapping	
Current and Savings/ Term Deposits/ Loans/ Liquidity Management – Real Account/ Virtual Account Management – Real Account/ Virtual Account	
Apply Party Level Changes Automatically	User will get access to accounts that are allowed/ disallowed at the party level.
Map All Transactions to All Accounts	Mapping all the transactions to all the existing accounts.
Account Number	List of account numbers present in a particular account type.
Currency	Account currency.
Product Name	Name of the product.
Account Status	Status of the account access for the party

11. To map the transactions to the account, click  against the particular account number to view the transaction mapping.
12. Select the respective check boxes preceding the transaction to be mapped.
OR
Select **Map All Transactions**, if you want to map all the transactions to all accounts.
13. Select **Apply Party Level Changes Automatically** to automatically apply the party changes.
14. Click **Save**.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to the previous screen.
15. The **User Account Access - Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to the previous screen.
16. The screen with success message appears. Click **OK** to complete the transaction.

14.2 User Account Access- Search

The Bank Administrator can view the list of account(s) and transactions for which access has been provided to the user.

To view the account and transaction access:

1. In the **Party ID** field, enter the party ID of the user.
OR
In the **Party Name** field, enter the party name of the user.
2. Click **Search**.
For a searched party, there will be a list of users displayed with information like user ID, contact details of the user and an indicator whether there is an account mapping done for the user.
3. Click on **User ID** to navigate to Account Access summary section for the user with two sections **Own Account Mapping Summary** and **Linked Party Account Mapping Summary**.
Linked party account mapping will only be available if the selected party has Party to Party Linkage maintained.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Clear** to clear the search parameters.
4. Click **Account Type** i.e. Current and Savings / TD / Loans/ Liquidity Management – Real Account/ Virtual Account Management – Real Account/ Virtual Account in the summary details for the party, which will navigate to the view page.
OR
Click **Cancel** to cancel the transaction and navigate back to 'Dashboard'.
OR
Click **Back** to navigate to the previous screen.

Account Access – Search

The screenshot displays the 'User Account Access' search interface in the ZigBank system. At the top, the ZigBank logo and navigation icons are visible. The main content area features two input fields: 'Party ID' and 'Party Name'. Below these fields are three buttons: 'Search' (highlighted in green), 'Cancel', and 'Clear'. To the right of the input fields is a 'Note' box with a blue icon of a notepad, containing the following text: 'The function enables you to set up account and transaction access rules for a corporate user. You can decide the account(s) along with transaction(s) for each of the selected account that the corporate user needs to be provided access. Accounts of the parent as well as of the linked party (if any) will be available for access definition.' The top right corner shows a search icon, a notification bell with '11', and a user profile for 'superadmin' with the text 'Welcome, superadmin' and 'Last login 15 Jun 08:57 PM'. The footer contains the copyright notice: 'Copyright © 2006, 2017, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

9. Click  against the particular account number to view the mapped transactions.
10. Click **Edit** to update the **User Account Access** account mapping for new accounts and existing accounts.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to the previous screen.

14.3 User Account Access - Edit

The Bank Administrator gets a request with the list of account(s) and transactions for which access details needs to be edited for a selected user of the party.

To edit account and transaction access for the user:

1. In the **Party ID** field, enter the party id of the user.
OR
In the **Party Name** field, enter the party name of the user.
2. Click **Search**.
For a searched party, there will be a list of users displayed with information like user ID, contact details of the user and an indicator whether there is an account mapping done for the user.
3. Click on **user ID** to navigate to Account Access summary section for the user with two sections **Own Account Mapping Summary** and **Linked Party Account Mapping Summary**.
Linked party account mapping will only be available if the selected party has Party to Party

Linkage maintained.

OR

Click **Cancel** to cancel the transaction.

OR

Click **Clear** to clear the search parameters.

4. Click **Account Type** i.e. Current and Savings / TD / Loans/ Liquidity Management – Real Account/ Virtual Account Management – Real Account/ Virtual Account in the summary details for the party, which will navigate to the view page.
OR
Click **Cancel** to cancel the transaction and navigate back to 'Dashboard'.
OR
Click **Back** to navigate to the previous screen.
5. In case of mapping of linked party accounts to the parent party, select on the account type in the linked party summary section.
6. Navigate to the specific category tab viz. Current and Savings, Term Deposits, Loans, Liquidity Management – Real Account, Virtual Account Management – Real Account, Virtual Account etc., the administrator can view both the accounts for which access has been provided and the ones for which access is not provided.
7. Click **Edit**. The **User Account Access - Edit** screen appears.
This enables the selection and de-selection option against the accounts. There is also an option to edit checkbox **Apply Party Level Changes Automatically** to apply/ remove the party changes.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to the previous screen.
8. Click **Account Type** for which you want to edit the mapping of the accounts.

13. Click **Save**.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to the previous screen.
14. The **User Account Access - Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Edit** to edit the transaction.
OR
Click **Cancel** to cancel the transaction.
15. The **User Account Access - Confirmation** screen with success message appears.
16. Click **OK** to complete the transaction.

14.4 User Account Access - Delete

The Bank Administrator gets a request with the user information of a party for which access details needs to be deleted. As part of this option, own account mapping and/or linked party account mapping can be deleted for a user.

To delete account and transaction access for the user:

1. In the **Party ID** field, enter the party id of the user.
OR
In the **Party Name** field, enter the party name of the user.
2. Click **Search**.
For a searched party, there will be a list of users displayed with information like user ID, contact details of the user and an indicator whether there is an account mapping done for the user.
3. Click on **user ID** to navigate to Account Access summary section for the user with two sections **Own Account Mapping Summary** and **Linked Party Account Mapping Summary**.
Linked party account mapping will only be available if the selected party has Party to Party Linkage maintained.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Clear** to clear the search parameters.
4. Click **Account Type** i.e. Current and Savings / TD / Loans/ Liquidity Management – Real Account/ Virtual Account Management – Real Account/ Virtual Account in the summary details for the party, which will navigate to the view page.
OR
Click **Cancel** to cancel the transaction and navigate back to 'Dashboard'.
OR
Click **Back** to navigate to the previous screen.
5. In case of mapping of linked party accounts to the parent party, select on the account type in the linked party summary section.
6. Navigate to the specific category tab viz. Current and Savings, Term Deposits, Loans, Liquidity Management – Real Account, Virtual Account Management – Real Account, Virtual Account etc., the administrator can view both the accounts for which access has been provided and the ones for which access is not provided.

7. Click **Delete**.
The application will prompt the administrator with a deletion message with an option of Yes / No.
8. Click **Yes** to proceed with the deletion request. It will navigate to confirmation page with a success message and the status.
OR
Click **No** if you do not wish to proceed with deletion.
9. Click **OK** to complete the transaction.

FAQs

1. **Is it necessary to setup Party Account Access Management before setting up User Account Access?**
Yes, party account access management setup must be done before the user level mapping of accounts and transactions.
2. **User Account Access has not been maintained for the user for Own or Linked party, still there is no 'Map' button available?**
It is possible that the account access maintenance has not been done for the party to which the user belongs to. In such a case, bank admin will need to maintain account access for the party and only then proceed with User Account Access.
3. **Will Party Account Access – Deletion for a party (Own/Linked) lead to automatic deletion of User Account Access?**
Yes, deletion of account access for a party will lead to automatic deletion of access for the users of that party.
4. **If I remove access of account(s) and transaction(s) for a party, will it lead to automatic access removal for the users of that party?**
Yes, access removal at party level for an account and/or transaction will automatically remove access at user level of the selected party.
5. **I am unable to see some of the account(s) and/or transaction(s) for mapping as part of User Account Access that were available in Party Account Access for the party of the user?**
There is a possibility that these accounts and/or transactions have not been provided access at party level of the selected user. The accounts and transactions that are unmapped at party level will not be visible at user level of the selected party.
6. **Have mapped/edited/deleted user account access for a party but it is not reflecting in the system even after a successful maintenance save message?**
There is a possibility that the maintenance is saved but the status is 'Pending Approval'. For the maintenance, if there is an approval required then the changes will reflect only once the approver(s) approve the submitted request. If the setup does not require an approval workflow or is self / auto approved, then the same will reflect immediately.

15. Party Resource Access

Using this maintenance, the System/ Bank Administrator can provide access to Virtual Account Management Resource 'Remitter List'. The Party Resource Access screen lists the remitter IDs for the selected Corporate.

The administrator can select a global check box of 'Map All Remitter List ' to enable all the existing remitter list under the party for channel banking. If specific remitters are required to be given access then the user needs to select the respective check boxes preceding the remitter ID.

Pre-Requisites

- Party preferences should be created for the party for which access is to be maintained
- Channel Access should be enabled for party for which resource access is to be maintained
- Transaction access is provided to Bank Administrator.
- Approval rule set up for Bank Administrator to perform the actions.

Workflow

Features Supported In Application

The following options are available as part of this maintenance:

- Party Resource Access - Mapping
- Party Resource Access – View
- Party Resource Access - Edit
- Party Resource Access - Delete

How to reach here:

Bank Administrator Dashboard > Resource Access > Party Resource Access

OR

System/ Bank Administrator Dashboard > Toggle menu Access Management > Resource Access > Party Resource Access

15.1 Party Resource Access - Mapping (Create)

The Bank Administrator gets a request with the Virtual Account Management Remitter list for which access needs to be provided to the party.

To provide the party with remitters access:

1. In the **Party ID** field, enter the party id of the user.
OR
In the **Party Name** field, enter the party name of the user.
2. Click **Search**. For a searched party, **Remitter List Mapping Summary** appears.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Clear** to clear the search parameters.

Party Resource Access - Search

The screenshot displays the 'Party Resource Access' search interface in the ZigBank system. At the top, there is a navigation bar with the ZigBank logo and a user welcome message for SAMUEL DEAN. The main content area is divided into several sections. On the left, there is a search form with the following fields: 'Party ID' (000396), 'Party Name' (SK Agro Solutions), and 'Module Name' (Virtual Account Management (Remitter List)). Below the search form is a 'Remitter List Mapping Summary' section, which currently shows 'No Remitter Lists mapped.' and a 'Map' button. At the bottom of this section are 'Cancel' and 'Back' buttons. On the right side of the page, there is a 'Note' box with a blue icon and text explaining the function: 'The function enables you to set up resource (Program, Facility and Remitter List) and transaction access rules for a corporate customer. You can decide the resources along with transaction(s) for each of the selected resources that needs to be provided access for the corporate customer.' The footer of the page contains the text: 'Copyright © 2006, 2017, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

16. User Resource Access

Using this option the System/ Bank Administrator can set up remitter list mapping and transaction access for user(s) of the corporate party. This maintenance can be done only after the Party Resource Access is setup for the party of the user(s).

Pre-Requisites

- Resource Access should be maintained for the party of the user for which access is to be maintained
- Party preferences should be created for the party of the user for which access is to be maintained
- Channel Access should be enabled for party of the user for which resource access is to be maintained
- Transaction access is provided to Bank Administrator.
- Approval rule set up for Bank Administrator to perform the actions.

Workflow

Features Supported In Application

The following options are available as part of this maintenance:

- User Resource Access - Mapping
- User Resource Access – View
- User Resource Access - Edit
- User Resource Access - Delete

How to reach here:

Bank Administrator Dashboard > Resource Access > User Resource Access

OR

System/ Bank Administrator Dashboard > Toggle Menu > Resource Access > User Resource Access

16.1 User Resource Access - Mapping (Create)

This option allows the administrator to provide access to specific users of a party.

To provide the user with account and transaction access:

1. In the **Party ID** field, enter the party id of the user.
OR
In the **Party Name** field, enter the party name of the user.
2. Click **Search**.
For a searched party, there will be a list of users displayed with information like user ID, full name of the user and initials of the user.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Clear** to clear the search parameters.

User Resource Access – Search

The screenshot displays the 'User Resource Access' search interface in the ZigBank system. 12. Select the respective check boxes preceding the transaction to be mapped.

OR

Select **Map All Transactions**, if you want to map all the transactions to all accounts.

13. Select **Apply Party Level Changes Automatically** to automatically apply the party changes.

14. Click **Save**.

OR

Click **Cancel** to cancel the transaction.

OR

Click **Back** to navigate to the previous screen.

15. The **User Resource Access - Review** screen appears. Verify the details, and click Confirm.

OR

Click **Cancel** to cancel the transaction.

OR

Click **Back** to navigate to the previous screen.

16. The screen with success message appears along with the reference number and status of the transaction. Click **OK** to complete the transaction.

16.2 User Resource Access- Search

The Bank Administrator can view the list of remitter(s) and transactions for which access has been provided to the user.

To view the remitter and transaction access:

1. In the **Party ID** field, enter the party id of the user.

OR

In the **Party Name** field, enter the party name of the user.

2. Click **Search**.

For a searched party, there will be a list of users displayed with information like user ID, full name of the user and initials of the user.

OR

Click **Cancel** to cancel the transaction.

OR

Click **Clear** to clear the search parameters.

OR

Click **Back** to navigate to the previous screen.

4. Click the **Remitter List** link. The **User Resource Access – View** screen, displaying remitter list mapping appears.
 5. Click **Edit**. The **User Resource Access - Edit** screen appears.
This enables the selection and de-selection option against the remitter list. There is also an option to edit check box **Apply Party Level Changes Automatically** to apply/ remove the party changes.
- OR
- Click **Cancel** to cancel the transaction.
- OR
- Click **Back** to navigate to the previous screen.

User Resource Access – Edit

The screenshot displays the 'User Resource Access - Edit' interface. At the top, the ZigBank logo and user information 'Welcome, Harvy Spector' are visible. The main content area shows the following details:

- Party ID: 000396
- Party Name: SK Agro Solutions
- User ID: adicorpmaker
- User Name: Alex Lacazette
- Module Name: Virtual Account Management (Remitter List)

A progress bar indicates the current step is 'Remitter List Mapping' (Step 1 of 2). Below this, there are two checkboxes:

- Apply Party Level Changes Automatically
- Map All Remitter Lists

The 'Remitter List Mapping' section contains a table with the following data:

Remitter List ID	Remitter List Name	Status
<input checked="" type="checkbox"/> SAS02	SAS GIFT PACK	Active
<input checked="" type="checkbox"/> SAS01	SK PAYMENT	Active
<input type="checkbox"/> SKFUND1	FIXED	Active

At the bottom of the form, there are three buttons: 'Next', 'Cancel', and 'Back'. The footer contains the copyright notice: 'Copyright © 2006, 2017, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

6. Select the respective check boxes preceding the **Remitter List ID** to be mapped.
OR
Select **Map All Remitter List**, if you want to map all the Remitter Lists available.
Select/ De-select check box **Apply Party Level Changes Automatically** to apply/remove the party changes.
7. Click **Next**. The **User Resource Access - Edit** screen with mapped remitter list appears.
OR
Click **Back** to navigate to the previous screen.
OR
Click **Cancel** to cancel the transaction.
8. To map the transactions to the remitter lists, click ▶ against the particular Remitter List ID to view the transaction mapping.

16.4 User Resource Access - Delete

The Bank Administrator gets a request with the user information of a party for which access details needs to be deleted. As part of this option, remitter list mapping can be deleted for a user.

To delete remitter and transaction access for the user:

1. In the **Party ID** field, enter the party id of the user.
OR
In the **Party Name** field, enter the party name of the user.
2. Click **Search**.
For a searched party, there will be a list of users displayed with information like user ID, full name of the user and initials of the user.
3. Click the **User Name** link against the user record for which you want to delete the details. The **User Resource Access – Mapping Summary** screen appears.
4. Click the **Remitter List** link. The **User Resource Access – View** screen, displaying remitter list mapping appears.
5. Click **Delete**. The application will prompt the administrator with a deletion message with an option of Yes / No.
OR
Click **Edit** to modify the remitter list mapping.
OR
Click **Next** to go to the next screen. The **User Resource Access – View (Transaction Mapping)** screen appears.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to the previous screen.
6. Click **Yes** to proceed with the deletion request. It will navigate to confirmation page with a success message and the status.
OR
Click **No** if you do not wish to proceed with deletion.
7. Click **OK** to complete the transaction.

17. Approvals

Each user is assigned a particular task to perform as per their position in the hierarchy of the bank/corporate. For instance, some user(s) may be given rights to do data entry for transactions such as domestic fund transfer, draft issuance by logging in to channel banking. Transaction created by initiator in the system is routed to the appropriate authorized signatory or group of signatories for approval depending upon the rules configured. A transaction once approved by all the required approvers gets processed.

Approval Management function enables the Bank Administrator to configure approval flows for various financial and non-financial transactions on channel banking for bank’s customers and for administrators.

Approval flow includes configuration of rules for the users with following access types:

- Maker/ Initiator – User who is a creator of the transaction.
- Authorizer/ Approver – User who authorizes the transactions created by the maker. His authorization rights are maintained by an administrator.

Features supported in application

Approval management supported for Bank administrator users includes;

- Approval Workflow Maintenance
- Approval Rule Maintenance

Business scenario

AES Corporation wants to enable approval workflow for all financial transactions. The requirement is – All the financial transactions will be initiated by ‘Officers’ of the corporate. The transactions initiated by ‘Officers’ should be sent to ‘Assistant Managers’ for 1st level approval. After the transaction is approved by any one user from a group of ‘Assistant Managers’ then the transaction should be sent to ‘Managers’ for final level of approval. The transaction processing should happen only after final approval.

17.1 Workflow Management

Approval workflows are created to support requirements where multiple levels of approval are required in a specific sequence for a transaction/maintenance. Each workflow can be configured to have up to five levels of approval with a specific user or a user group configured at each level.

Workflows can be created independently and can be attached to a specific transaction/maintenance as part of the Approval Rule configuration.

Prerequisites

- Transaction access is provided to Bank Administrator.
- Party preference is maintained.
- Multiple users are maintained under a party or as Bank Administrators
- Approval rule set up for Bank Administrator to perform the actions.
- Necessary user groups are maintained using User Group Management.

Workflow

Features supported in application

Approval Rule maintenance allows Bank Administrator to:

- View Approval Workflows
- Create Approval Workflows
- Edit Approval Workflows

How to reach here:

System/ Bank Administrator Dashboard > Toggle Menu > Approvals > Workflow Management

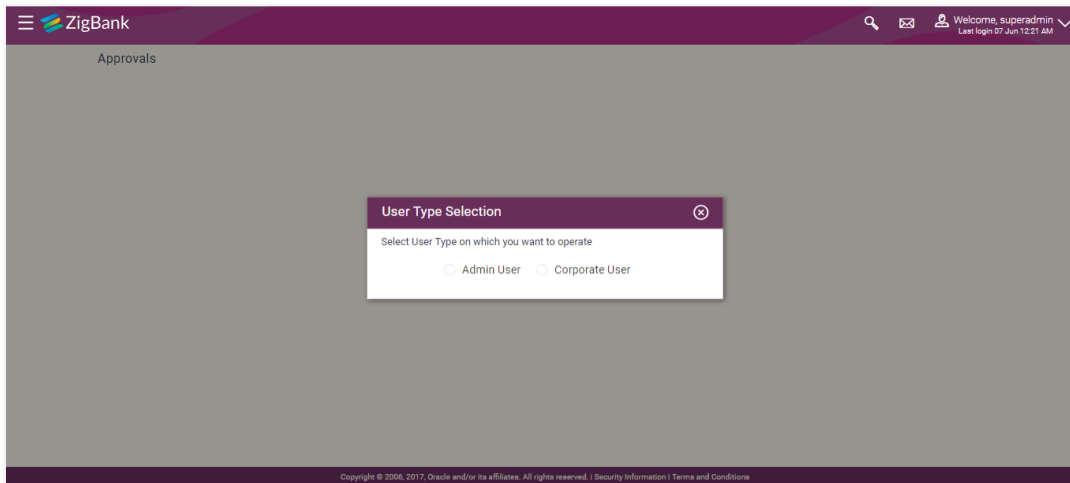

OR

Bank Administrator Dashboard > Approvals > Workflow Management

17.1.1 Approval Workflow – Select User Type

Bank Administrator logs into the system and navigates to the Approval Workflow screen. On accessing the 'Approval Workflow Management' menu, bank administrator has to select the user type for whom the workflows are to be maintained.

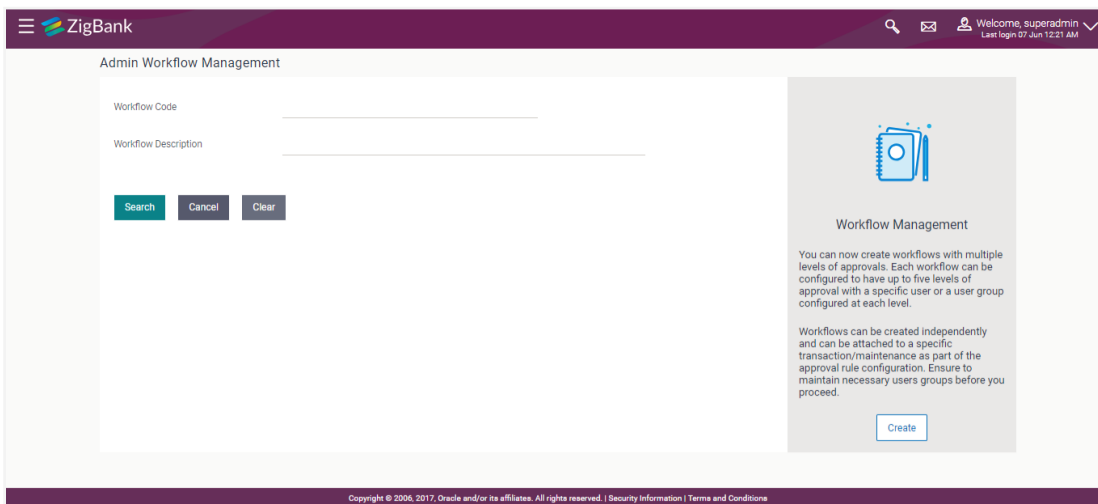

Approval Workflow – Select User Type

1. Click **Admin User** to access the workflow management of bank administrator users. The **Admin Workflow Management** screen appears.
2. Click **Corporate User** to access the workflow management of bank administrator users. The **Workflow Management** screen appears.

17.1.2 Approval Workflow - Admin User - Admin Workflow Management

Admin Workflow Management

Field Description

Field Name	Description
Workflow Code	Code of the already maintained approval workflow.
Workflow Description	Description of the already maintained approval workflow.

1. Click **Create** to create new admin workflow. The **Admin Workflow Management – Create** screen appears.
OR
Click **Cancel** to cancel the operation and navigate the user back to ‘Dashboard’.
OR
Enter the search parameters and click **Search** to search the matching records.
OR
Click **Clear** to clear the input search parameters.

17.1.3 Admin Workflow Management – Search

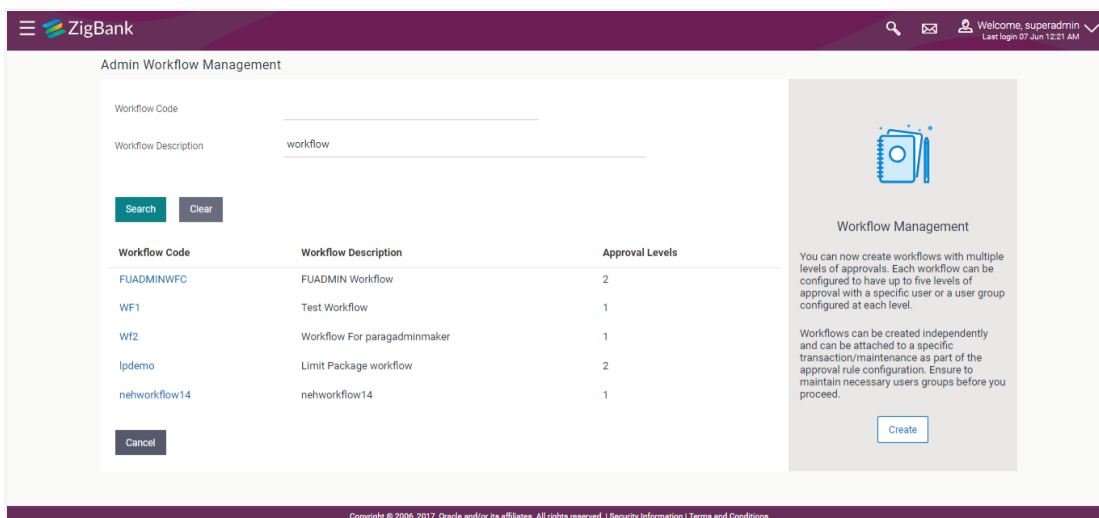

Bank Administrator user can search the workflows maintained for administrator users.

Workflows maintained (if any) for admin users are displayed on the screen after searching with valid input. User can view the details of existing workflow by clicking on the search results or can create new approval workflow using this screen.

To search the approval workflow for admin users:

1. In the **Admin Workflow Management** screen, enter the search parameters and click **Search**. The **Admin Workflow Management** screen with search results appears based on the searched criteria.

Admin Workflow Management – Search

Field Description

Field Name	Description
Workflow Code	The approval workflow code to search the approval workflows.
Workflow Description	The approval workflow description to search the approval workflows.
Search Results

Approval Level	Number of approval levels in each workflow.

2. Click the **Work Flow code** link, to view details of the selected Approval Workflow. The **Workflow Management - View** screen appears.
 OR
 Click **Cancel** to cancel the operation and navigate back to 'Dashboard'.
 OR
 Click **Create** to create new Approval Workflow for admin users.

17.1.4 Admin Workflow Management – View

Further drill down is given on the each workflow to view the details of the users/ user groups who are the part of workflow.

Admin Workflow Management – View

Field Description

Field Name	Description
View	
Workflow Code	Workflow code is displayed.
Workflow Description	Workflow description is displayed.
Approval Details	
Approval Level	User / user group maintained at each approval level. There can be up to five levels of approval levels.
User Name / User Groups	User or a user group maintained at each level of approval.

1. Click **Edit** to edit the workflow. The **Admin Workflow Management - Edit** screen with values in editable form appears.
OR
Click **Cancel** to cancel the operation and navigate back to 'Dashboard'.
OR
Click **Back** to go back to the previous screen.

17.1.5 Admin Workflow Management – Create

Bank Administrator can create approval workflows for the Admin users. By default, user can specify minimum one and maximum five levels of approvals as a part of workflow.

Administrator can set either an individual user or user group of a corporate as a part of each level of approval. Approval type (sequential/non-sequential/no authorization) is defined at the party preference.

To create an approval workflow:

1. In the **Admin Workflow Management** screen, click **Create**. The **Admin Workflow Management - Create** screen appears.

Admin Workflow Management – Create

Field Description

Field Name	Description
Create	
Workflow Code	To specify approval workflow code.
Workflow Description	To specify approval workflow description.
Approval Details	
Approval levels for a user / user group. You can click Add for multi level approval process.	
Approval Level	Approval levels for a user / user group. User can click Add for multi level approval process.
User / User Group	To select specific user or a user group at each level of approval.

2. In the **Workflow Code** field, enter the workflow code.
3. In the **Workflow Description** field, enter the name of the workflow.
4. In the **Approval Details** section, from the **Level 1** field, click appropriate user / user group.
5. From the **User Name / User Groups** list, select the approver user name.
6. Click **Add** to add the selected user/ user group at specific level of approval.
OR
7. Click  icon to remove specific approval level.

8. Click **Save** to save Approval Workflow.
OR
Click **Cancel** to cancel the operation and navigate back to 'Dashboard'.
OR
Click **Back** to go back to previous screen.
9. The **Admin Workflow Management - Create - Review** screen appears post necessary validations. Verify the details, and click **Confirm**.
OR
Click **Cancel** to cancel the operation and navigate back to 'Dashboard'.
OR
Click **Back** to go back to previous screen.
10. The success message of saving the created approval workflow appears along with the transaction reference number and status.
Click **OK** to complete the transaction and navigate back to the 'Dashboard'.

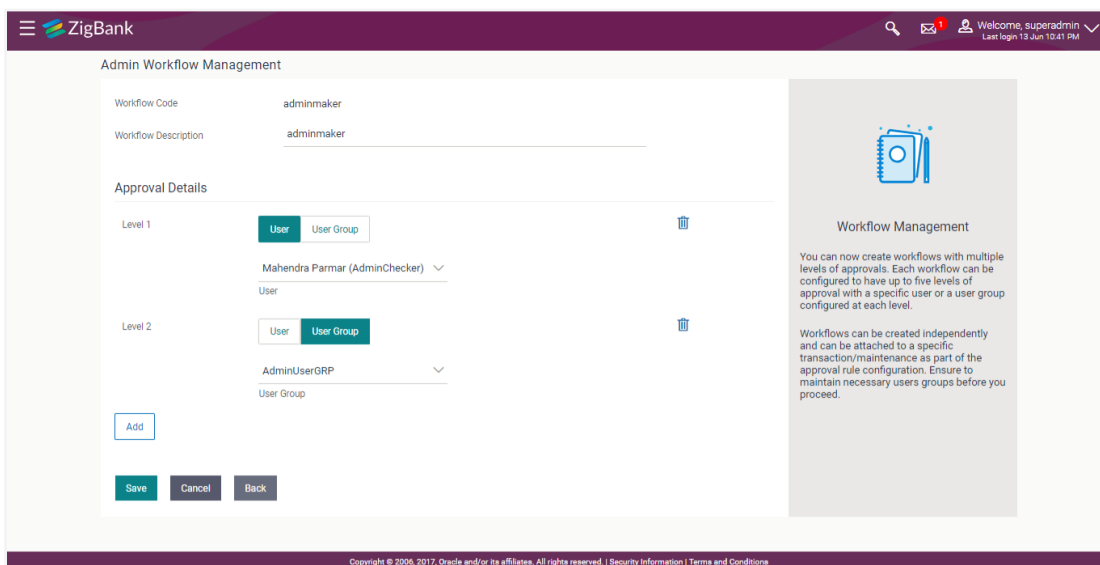

17.1.6 Admin Workflow Management - Edit

This function enables the Bank Administrator to update the description of the workflow and also to remove existing and add the new approval levels. Edited workflows are applicable for new transactions initiated post workflow update, whereas the previously initiated and transactions pending approval follows the old workflow.

To edit an approval workflow:

1. In the **Admin Workflow Management** screen, click the **Work Flow code** link, for which you want to view the details. The **Admin Workflow Management - View** screen appears.
2. Click **Edit**. The **Admin Workflow Management - Edit** screen appears.

Admin Workflow Management - Edit

Field Description

Field Name	Description
Edit	
Workflow Code	Workflow code is displayed.
Workflow Description	Workflow description is displayed in editable form.
Approval Details	
Approval Level	Approval levels for a user / user group. Administrator can remove or add approval levels in a workflow.
User Name / User Groups	User or a user group maintained at each level of approval. Administrator can edit an existing user/user group maintained at each level and can also specify user/user group for additional approval level.

3. Edit the required details.
4. Click **Add** to add the selected user/ user group at specific level of approval.
OR
Click  icon to remove specific approval level.
5. Click **Save** to save Approval Workflow.
OR
Click **Cancel** to cancel the operation and navigate back to 'Dashboard'.
OR
Click **Back** to cancel the operation and to go back to previous screen.
6. The **Admin Workflow Management – Edit - Review** screen appears post necessary validations. Verify the details, and click **Confirm**.
OR
Click **Cancel** to cancel the operation and navigate back to 'Dashboard'.
OR
Click **Back** to cancel the operation and to go back to previous screen.
7. The success message of saving the approval workflow modification appears along with the transaction reference number and status.
Click **OK** to complete the transaction and navigate back to 'Dashboard'.

17.1.7 Approval Workflow - Corporate User - Workflow Management

System displays a screen to enter the party information (party ID or party name) and search party for which the approval workflows are to be maintained/ viewed.

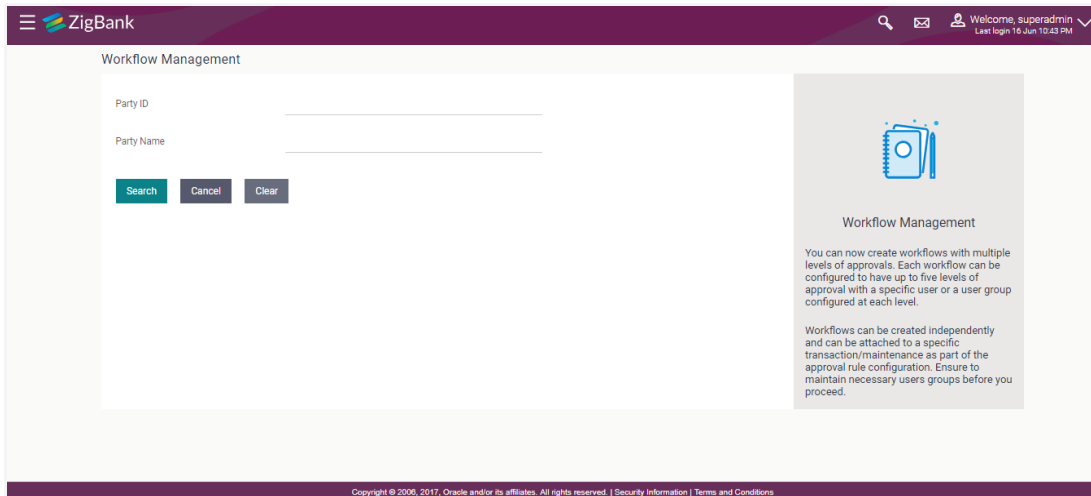

User can enter the party ID (if known) or the party name with a minimum of five characters.

System matches the input provided by the user with the party name records and displays the matching party records.

In case of a party search by party ID, it is an exact match and system displays the workflows maintained if any.

In case of a party search by name, system displays the matching party records. The records have parties listed with both Party ID and Party Name information. User can select the record by clicking on the Party ID from the list.

Workflow Management

Field Description

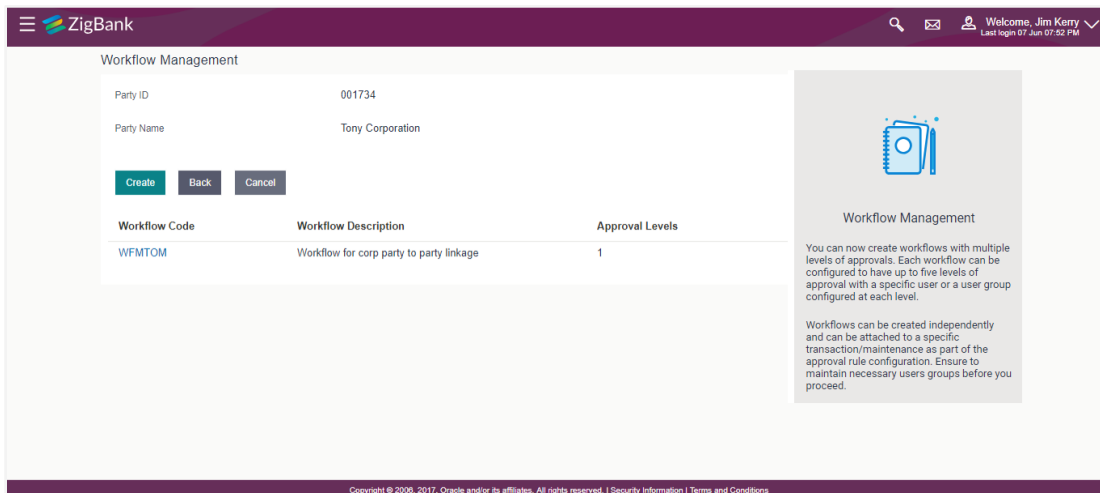

Field Name	Description
Party ID	Party IDs as per search input.
Party Name	Party names of the party ID.

Enter the search parameters and click **Search** to search the matching records.
 OR
 Click **Cancel** to cancel the operation and navigate the user back to 'Dashboard'.
 OR
 Click on '**Clear**' to clear the input search parameters.

17.1.8 Workflow Management – Summary

Clicking on Workflow Code Hyperlink, workflows maintained (if any) under a party are displayed on the screen. User can opt to view the details of existing workflows or can create new approval workflow using this screen.

Workflow Management – Summary

Field Description

Field Name	Description
Party ID	Party ID of which workflows to be viewed/ edited.

OR
Click **Back** to go back to previous screen.
12. The success message of saving the created approval workflow appears along with the transaction reference number and status.
Click **OK** to complete the transaction and navigate back to 'Dashboard'.

17.1.11 Workflow Management - Edit

This function enables the Bank Administrator to update the description of the workflow and also to remove existing and add the new approval levels. Edited workflows are applicable for new transactions initiated post workflow update, whereas the previously initiated and transactions pending approval follows the old workflow.

To edit an approval workflow:

1. In the **Workflow Management** screen, enter the search parameters and click **Search**. The **Workflow Management** screen with search results appears based on the searched criteria.
2. Click the **Workflow Code** link to view details of the selected Approval Workflow. The **Workflow Management - View** screen appears.
3. Click **Edit** to edit the workflow. The **Workflow Management - Edit** screen with values in editable form appears.
OR
Click **Cancel** to cancel the operation and navigate back to 'Dashboard'.
OR
Click **Back** to go back to the previous screen.

Workflow Management - Edit

Field Description

Field Name	Description
Edit	
Party ID	Party ID of which workflows to be viewed/ edited.
Party Name	Party name of Party ID of which workflows to be viewed/ edited.
Workflow Code	Workflow code is displayed.
Workflow Description	Workflow description is displayed in editable form.
Approval Details	
Approval Level	Approval levels for a user / user group. Administrator can remove or add approval levels in a workflow.
User Name / User Groups	User or a user group maintained at each level of approval. Administrator can edit an existing user/user group maintained at each level and can also specify user/user group for additional approval level.

4. Edit the required details.
5. Click **Add** to add the selected user/ user group at specific level of approval.
OR
Click  icon to remove specific approval level.
6. Click **Save** to save Approval Workflow.
OR
Click **Cancel** to cancel the operation and navigate back to 'Dashboard'.

OR

Click **Back** to cancel the operation and go back to previous screen.

7. The **Workflow Management - Edit- Review** screen appears post necessary validations. Verify the details, and click **Confirm**.

OR

Click **Cancel** to cancel the operation and navigate back to 'Dashboard'.

OR

Click **Back** to cancel the operation and go back to previous screen.

8. The success message of saving the approval workflow modification appears along with the transaction reference number and status.
Click **OK** to complete the transaction and navigate back to 'Dashboard'.

FAQs

1. What is approval management?

Approval Management enables a bank administrator to set up approval conditions for various transactions on channel banking. The approval management allows setting up the maker / checker flow, wherein a transaction is initiated by a maker and the same is authorized by a single / multiple checkers depending on the configuration.

2. What is approval workflow maintenance?

Approval workflows are created to support requirements where multiple levels of approval are required in a specific sequence for a transaction/maintenance. Each workflow can be configured to have up to 5 levels of approval with a specific user or a user group configured at each level.

3. How many approval levels can I set up in the system?

Administrator can set up minimum one and maximum five levels of approvals as a part of approval workflow.

4. Can I get the list of users associated with a group from workflow management screen?

No, list of the users associated with a group cannot be viewed using workflow management screen. However you can view the same from User Group Management screen.

[Home](#)

17.2 Approval Rules

This function enables the Bank Administrator to set up conditions for approval as per the bank/corporate requirements. Rule can be set up for financial transactions, non-financial, non account financial transactions, and for maintenances. Flexibility exists to define approval rules with conditions stating that 'specific transaction' if initiated by a 'specific user/ user group' has to be approved by a 'specific approver/approver group' along with other attributes like amount range etc.

Prerequisites:

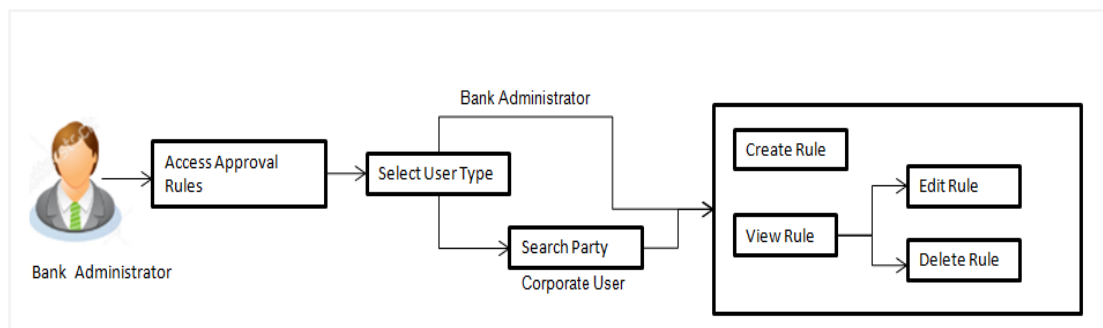

- Transaction access is provided to Bank Administrator
- Party preference is maintained for setting up rules for corporates
- Corporate and Administrator users are maintained
- Workflow configuration is maintained if approval required is to be set as 'Yes'
- Approval rule set up for Bank Administrator to perform the actions
- Necessary user groups and approval workflows are maintained

Features supported in application

The Approval Rule maintenances allow the bank administrator to:

- Create Approval Rules
- View Approval Rules
- Edit Approval Rules
- Delete Approval Rules

Workflow

How to reach here:

System/ Bank Administrator Dashboard > Toggle Menu > Approvals > Rule Management > Approval Rules

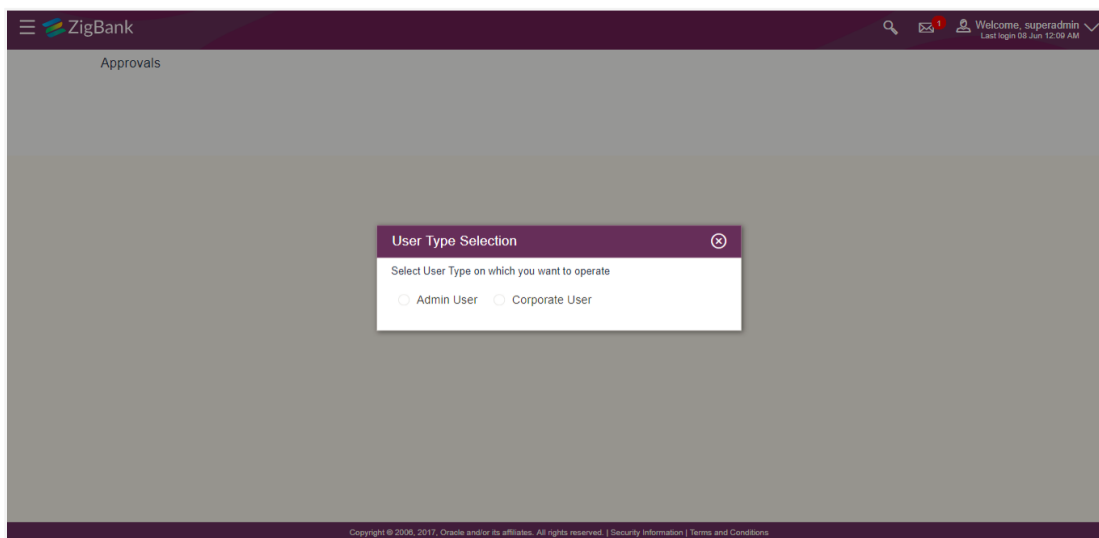

OR

Bank Administrator Dashboard > Approvals > Rule Management

17.3 Approval Rules – Select User Type

Bank Administrator logs into the system and navigates to the Rule Management screen. On accessing the 'Approval Rules Management' menu, Bank Administrator has to select the user type for which the rules are to be maintained.

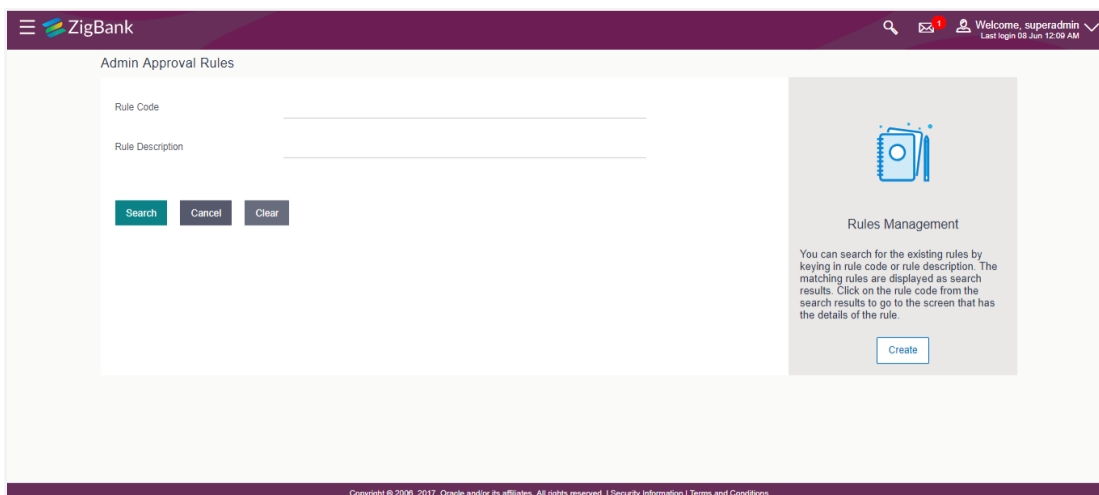

Approval Rules – Select User Type

1. Click **Admin User** to access the Approval Rules of Bank Administrator users. The **Admin Approval Rules** screen appears.
2. Click **Corporate User** to access the Approval Rules of Corporate users. The **Approval Rules** screen appears.

17.4 Approval Rules - Admin User - Admin Approval Rules

Admin Approval Rules

Field Description

Field Name	Description
------------	-------------

Rule Code	Search rules with a rules code of the already maintained approval rule.
------------------	---

Rule Description	Search rules with a rule description of the already maintained approval rule.
-------------------------	---

1. Click **Create** to create new admin workflow. The **Admin Approval Rules – Create** screen appears.
OR
Enter the search parameters and click **Search** to search the matching records.
OR
Click **Cancel** to cancel the operation and navigate the user back to 'Dashboard'.
OR
Click on '**Clear**' to clear the input search parameters.

17.4.1 Admin Approval Rules – Search

Approval rules maintained (if any) for administrator users are displayed on the screen after searching with valid input. User can view the details of existing rule or can create new approval rule using this screen.

To search the approval rules for admin users:

1. In the **Admin Approval Rules** screen, enter the search parameters and click **Search**. The **Admin Approval Rules** screen with search results appears based on the searched criteria.

Admin Approval Rules – Search

The screenshot displays the 'Admin Approval Rules' search interface. At the top, there are search filters for 'Rule Code' and 'Rule Description' (containing the text 'admin'). Below the filters are 'Search' and 'Clear' buttons. The main area contains a table with the following data:

Rule Code	Rule Description	Transactions
R3	Rule For Paragadminmaker	Create Party Preference
AdminChecker	AdminChecker	Create Party Preference
NELSONAUTHADMIN	NELSONAUTHADMIN	All Admin Maintenances
Adminapproval	ritwick admin rule	All Admin Maintenances
SDADMINRL0	SDADMIN Rule Level 0	All Admin Maintenances
autoauthadmin	autoauthadmin	All Admin Maintenances
SABARL1	superadmin basic rule 1	Create Approval Rules
SAALLTXNSRL1	superadmin all transaction rule 1	All Admin Maintenances
skadmin_rule	skadmin_rule	All Admin Maintenances
R2	Rule For Paragadminchecker	All Admin Maintenances
FUADMINRC	Rule for FUADMIN	All Admin Maintenances
srkadmin1stLevel	srkadmin1stLevelApproval	All Admin Maintenances

At the bottom left of the table area is a 'Cancel' button. On the right side, there is a 'Rules Management' sidebar with a 'Create' button and a text box stating: 'You can search for the existing rules by keying in rule code or rule description. The matching rules are displayed as search results. Click on the rule code from the search results to go to the screen that has the details of the rule.'

 Click **Create** to create new Approval Rules for admin users.
 OR
 Click **Cancel** to cancel the operation and navigate back to 'Dashboard'.
 OR
 Click **Back** to go back to previous screen.

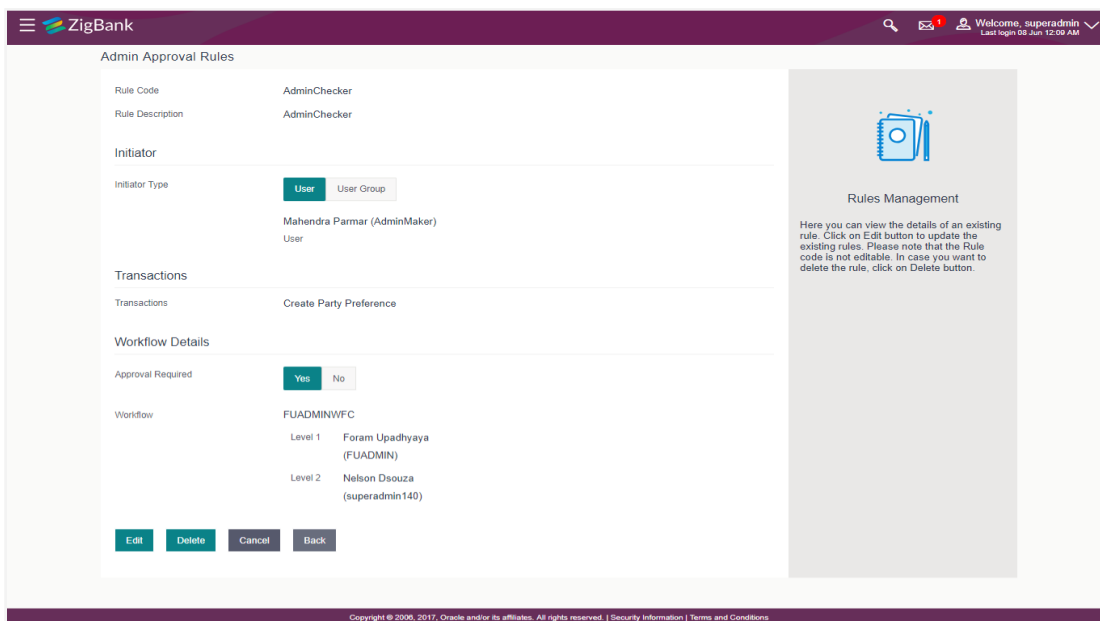

17.4.2 Admin Approval Rules – View

Further drill down is given on the each workflow to view the details of the users/ user groups who are the part of workflow.

To view the admin approval rules:

- In the **Admin Approval Rules** screen, click the **Rule Code** link, for which user wants to view the details. The **Admin Approval Rules - View** screen appears.

Admin Approval Rules - View

Field Description

Field Name	Description
View	
Rule Code	Approval rule code.
Rule Description	Approval rule description.
Initiator	
Initiator Type	Initiator type specified while creating a rule.
User Name / User Groups	Name of the user or user group defined as initiator for the rule condition.
Transactions	Transaction for which the rule is set up.
Workflow Details	
Approval Required	Field displays whether approval is required or not for the set condition.
Workflow Details	Field displays the approval workflow details along with the defined approval levels. This field appears if you select Yes in the Approval Required field.

2. Click **Edit** to edit the approval rule. The **Admin Approval Rule - Edit** screen with values in editable form appears.
OR
Click **Delete** to delete the approval rule.
OR
Click **Cancel** to cancel the operation and navigate back to 'Dashboard'.
OR
Click **Back** to go back to previous screen.
The application will prompt the administrator with a deletion message, Click **Yes** to confirm.
User is directed to **Admin Approval Rule – Delete** confirmation page.

17.4.3 Admin Approval Rules – Create

Approval rules can be setup based on the following parameters.

- Transactions
- Initiator
- Specific User
- User Group

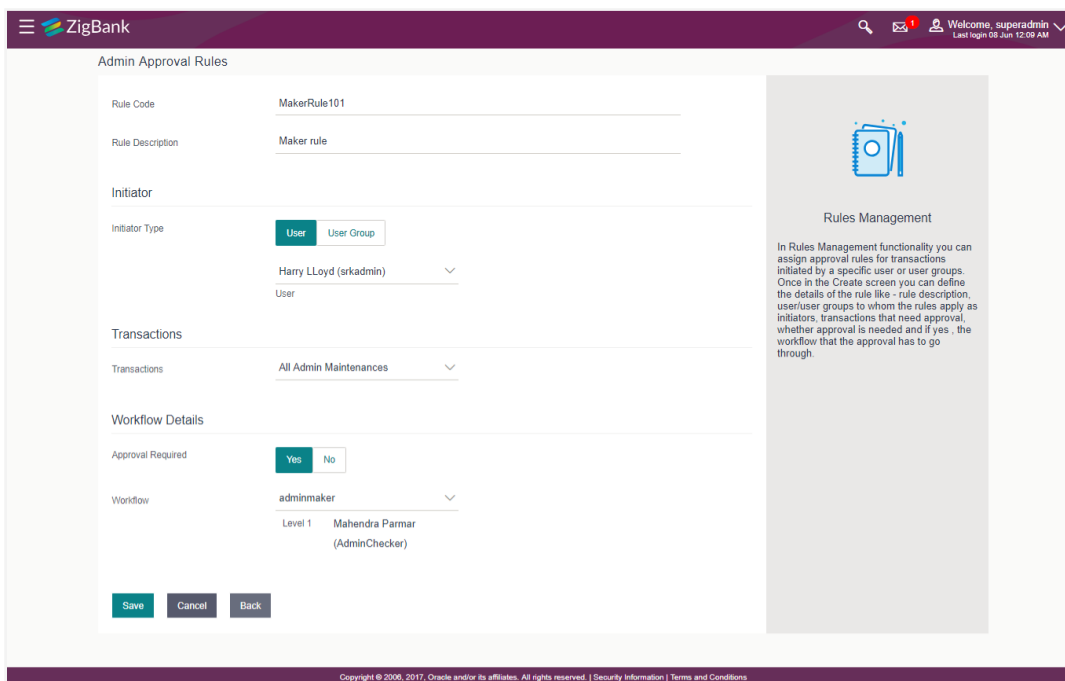

Bank Administrator can create multiple approval rules for Administrator users. In a scenario when a transaction is initiated and multiple rules are applicable as per set conditions, then the complex rule amongst all the applicable rules is applied for approval.

User can further define if for a condition, the transaction should be auto approved (which means there is no approval workflow and the transaction gets approved as soon as initiator submits the transaction) or should follow a set approval workflow and should get approved by the defined set of approvers. The same is achieved by attaching a workflow maintained for the administrator users.

To create an approval rule:

1. In the **Admin Approval Rules** screen, click **Create**. The **Admin Approval Rules - Create** screen appears.

Admin Approval Rules - Create

Field Description

Field Name	Description
Rule Code	To specify approval rule code.

Field Name	Description
Rule Description	To specify approval rule description.
Initiator	
Initiator Type	Initiator type who initiates the transaction. This has options as 'User' and 'User Group'.
User Name / User Groups	Name of the user or user group as initiator. If initiator is selected as User, then all the users belongs to administrator user segment will be listed for selection. If initiator is selected as User Group, then all the user groups belongs to the administrator user segment will be listed for selection.
Transactions	All transactions to set the approval rules are listed. User can select specific transaction or all admin transactions.
Workflow Details	
Approval Required	Option to decide whether approval is required or not for the set condition.
Workflow	Field has description of the approval workflow. All workflows maintained for the administrator type of user segment are listed here along with the defined approval level for each of them. This field appears if you select Yes in the Approval Required field.

2. In the **Rule Code** field, enter the code.
3. In the **Rule Description** field, enter the rule name.
4. From the **Initiator Type** field, click appropriate user / user group and select the user/ user group.
5. From the **Transaction** list, select the transactions to be mapped to the rule.
6. In the **Workflow Details** section, select whether approval is required for the mapped transactions.
 - d. If you select **Yes** option, select the appropriate **Workflow**.
7. Click **Save** to save the approval rule.
OR
Click **Cancel** to cancel the operation and navigate back to 'Dashboard'.
OR
Click **Back** to go back to previous screen.
8. The **Approval Rule - Create Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Cancel** to cancel the operation and navigate back to the 'Dashboard'.

OR

Click **Back** to go back to previous screen.

- The success message of saving the created approval rule appears along with the transaction reference number and status.

Click **OK** to complete the transaction and navigate back to 'Dashboard'.

17.4.4 Admin Approval Rules - Edit

Bank Administrator can edit the approval rules. An Administrator is allowed to change the description of the rule and is also allowed to change the parameters associated with the specific approval rule.

Edited rules are applicable for new transactions initiated post rule update. Previously initiated transactions which are pending approval will follow a rule which was applied at the time of transaction initiation.

To edit an approval workflow:

- In the **Admin Approval Rules** screen, click the **Rule Code** link, for which you want to view the details. The **Admin Approval Rules - View** screen appears.
- Click **Edit**. The **Admin Approval Rules - Edit** screen appears.

Admin Approval Rules - Edit

The screenshot displays the 'Admin Approval Rules - Edit' interface. The form fields are as follows:

- Rule Code:** AdminChecker
- Rule Description:** AdminChecker
- Initiator:**
 - Initiator Type:** User (selected), User Group
 - Initiator:** Mahendra Parmar (AdminMaker) (selected), User
- Transactions:**
 - Transactions:** Create Party Preference (selected)
- Workflow Details:**
 - Approval Required:** Yes (selected), No
 - Workflow:** FUADMINWFC (selected)
 - Level 1:** Foram Upadhyaya (FUADMIN)
 - Level 2:** Nelson Dsouza (superadmin140)

At the bottom of the form, there are three buttons: **Save**, **Cancel**, and **Back**.

On the right side, there is a 'Rules Management' section with a blue icon of a notepad and a pencil. Below the icon, the text reads: 'Rules Management. In Rules Management functionality you can assign approval rules for transactions initiated by a specific user or user groups. Once in the Create screen you can define the details of the rule like - rule description, user/user groups to whom the rules apply as initiators, transactions that need approval, whether approval is needed and if yes, the workflow that the approval has to go through.'

Field Description

Field Name	Description
Edit	
Rule Code	Approval rule code provided by the user.
Rule Description	Approval rule description provided by the user in editable form.
Initiator	
Initiator Type	Initiator type who initiates the transaction will be displayed in editable form.

Workflow Details	
Approval Required	Whether approval is required will be displayed in editable form.
Workflow Details	<p>Details of the approval workflow along with the defined approval levels for a condition will be displayed in editable form.</p> <p>This field appears if you select Yes in the Approval Required field.</p>

3. Edit the required details.
4. Click **Save** to save the approval rule.
OR
Click **Cancel** to cancel the operation and navigate back to 'Dashboard'.
OR
Click **Back** to cancel the operation and to go back to previous screen.
5. The **Admin Approval Rule - Edit Review** screen appears post necessary validations. Verify the details, and click **Confirm**.
OR
Click **Cancel** to cancel the operation and navigate back to 'Dashboard'.
OR
Click **Back** to cancel the operation and to go back to previous screen.
6. The success message of saving the approval rule modification appears along with the transaction reference number and status.
Click **OK** to complete the transaction and navigate back to 'Dashboard'.

17.5 Approval Rules - Corporate User - Approval Rule

17.5.1 Approval Rules - Corporate User - Search

System displays a screen to enter the party ID or party name to search the approval rules that are maintained.

User can enter the party ID (if known) or the party name with a minimum of 5 characters.

System matches the input provided by the user with the party name records and displays the matching party records.

In case of a party search by party ID, it is an exact match and system displays the rules maintained if any.

In case of a party search by name, system displays the matching party records. The records have parties listed with both Party ID and Party Name information. User can select the record by clicking on the Party ID from the list.

Approval Rules - Corporate User

Field Description

Field Name	Description
Party ID	Party IDs as per search input.
Party Name	Party names of the party ID.

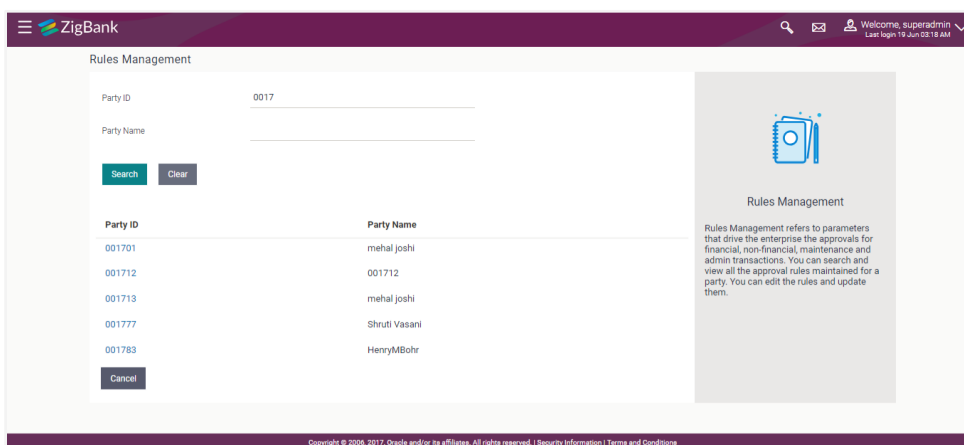

To search the approval rules for corporate users:

1. In the **Approval Rules** screen, enter the party ID in the **Party ID** field.
OR
In the **Party Name** field, enter the party name.
2. Click **Search** to search the matching records. The **Approval Rules** screen with search results appears based on the searched criteria.
OR
Click **Cancel** to cancel the operation and navigate the user back to 'Dashboard'.

OR
Click **'Clear'** to clear the input search parameters.

Note: The Approval rule - Corporate User - Party Search Results screen appears only if no approval rule is created, else the search results displays the approval rules already created by the party.

Rules Management

Rules Management refers to parameters that drive the enterprise the approvals for financial, non-financial, maintenance and admin transactions. You can search and view all the approval rules maintained for a party. You can edit the rules and update them.

Copyright © 2006, 2017, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions

4. Click the **Rule code** link, to view details of the selected Approval Rule. The **Approval Rules - View** screen appears.
OR
Click **Create** to create new Approval Rule for corporate users.
OR
Click **Cancel** to cancel the operation and navigate back to 'Dashboard'.
OR
Click **Back** to go back to previous screen.

17.5.2 Approval Rule – Corporate User - Create

Bank Administrator can create approval rules for the corporate users. Administrator is allowed to create an approval rule only if the party preference is maintained and party is in active status.

Approval rules can be setup based on the following parameters.

- Type of Transaction
 - Financial Transactions
 - This option is used to setup approval rules for the transactions, this involves exchange of money.
 - E.g. Money Transfer, Draft Issuance, Redeem Term Deposit etc.
 - Non Financial Transactions
 - This option is used to setup approval rules for the transaction which are for an account, but does not involve exchange of money.
 - E.g. Cheque Book Request, Statement Request, Stop Cheque etc.
 - Maintenance
 - This option is used to setup approval rules for the transaction which are at the party level and not for a specific account
 - E.g. Payee Maintenance, Biller Maintenance etc.
 - Administration
 - Option is used to setup approval rules for the maintenances which corporate administrator can initiate. These are mainly configurations related transactions for that corporate
 - E.g. Account-Transaction mapping, Approval related maintenances etc.

- Non Account Financial Transactions:
 - This option is used to setup approval rules for the transaction with amount range and no debit account
 - E.g. Initiate LC, Supply Chain Finance related transactions like create Invoice.
- Initiator
 - Specific User
 - User Group
- Accounts
- Transactions
- Currency
- Amount Range

Administrator can create multiple approval rules for party users. In a scenario when a transaction is initiated and multiple rules are applicable as per set conditions, then the complex rule amongst all the applicable rules is applied for approval.

User can further define if for a condition, the transaction should be auto approved (which means there is no approval workflow and the transaction gets approved as soon as initiator submits the transaction) or should follow a set approval workflow and should get approved by the defined set of approvers. The same is achieved by attaching a workflow maintained for the corporate party.

To create an approval rule for corporate user:

1. In the **Approval Rules** screen, enter the search parameters and click **Search**. The **Approval Rules** screen with both Party ID and Party Name appears.
2. Click the **Party ID** link, to view details. The **Approval Rule - Summary** screen appears.
3. Click **Create**. The **Approval Rules - Create** screen appears.

Approval Rules – Corporate User - Create

The screenshot shows the 'Rules Management' page in the ZigBank system. The page is divided into two main sections: a form on the left for rule configuration and a sidebar on the right with a 'Rules Management' icon and a brief description: 'You create new rules that apply to specific transactions when initiated by a select user or user group need to be approved by the specified user or user groups.' The form includes the following fields and options:

OR
Click **Cancel** to cancel the operation and navigate back to 'Dashboard'.
OR
Click **Back** to cancel the operation and to go back to previous screen.
8. The success message of saving the approval rule modification appears along with the transaction reference number and status.
Click **OK** to complete the transaction and navigate back to 'Dashboard'.

FAQs

1. How many approval levels can I set up in the system?

Administrator can set up minimum one and maximum five levels of approvals as a part of approval workflow. Whereas, maximum levels of approvals that the user can set is configurable as Day0.

2. Which approval rule will get applied when multiple applicable approval rules are found for specific transaction?

In a scenario when a transaction is initiated and multiple rules are applicable as per set conditions, then the complex rule amongst all the applicable rules is applied for approval.

3. What happens to the approval process when approval rule gets edited and a transaction is pending with one of the approver for approval?

Edited rules are applicable for new transactions initiated post rule update. Previously initiated transactions which are pending for approval will follow a rule which was applied at the time of transaction initiation.

4. What happens if the transaction is initiated in the currency in which approval rule is not maintained?

If the rule is not maintained in specific currency, then the approval rule set in the local currency for the transaction and amount combination will be applied.

5. What happens if the approval rule in local currency is not maintained in above scenario?

If the approval rule is not set for both transaction currency and local currency, then transaction cannot be initiated.

18. Service Request Form Builder

Service Request Form Builder transaction allows the system administrator to define service requests by defining its attributes and by building the form (Request page that should be available to business user) which are then available for Retail users for creating a new Service Request.

This screen is divided in three sections – Request Parameters, Build your Form and Preview

Request Parameters section lets the System/Bank Administrator to create a service requests by defining attributes like, SR Name, description, Product, Category name, SR type, severity, and status etc..

Second tab which is the **Form Builder** page lets the System/Bank administrator define the request form and the fields that needs to be available on the Service Request screen to retail user. Field attributes like field name, field type, allowed characters and error message with respect to that field can also be defined for each field.

Preview Section lets the administrator preview the Service Request form created in the same way as it will be shown to the retail user while raising the Service Request.

Pre-Requisites

- Transaction access is provided to System/Bank Administrator.

Features Supported In Application

The module supports following features:

- Create Service Requests Form
- Search and View Service Request
- Copy and Create a new Request
- Edit Service Requests

How to reach here:

System Administrator Dashboard > Templates > Service Request - Form Builder

OR

System/ Bank Administrator Dashboard > Toggle Menu > Others > Service Request - Form Builder

OR

Bank Administrator Dashboard > Quick Links > Service Request

18.1 Service Request Definition - Summary

Last three service requests that are created by the administrator are by default displayed on the Service Request Definition summary screen.

To view the service requests:

1. Navigate to the **Service Request Definition** screen. The initial (summary) page of the service request appears.

Service Request Definition - Summary

The screenshot displays the 'Service Request Definition' interface. At the top, there is a search bar labeled 'Request Name' with a placeholder 'Search Request Name'. Below it are 'More Search Options' and buttons for 'Search', 'Cancel', and 'Clear'. The 'Recently Added Service Requests' section lists two items: 'New Debit Card' and 'Cheque Book Request', both created on 25 May 2018. A sidebar on the right titled 'Create Service Request' provides instructions on how to define a service request and includes a 'Create' button. The footer of the page reads: 'Copyright © 2006, 2017, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

2. Click  against a specific service request record if you want to create a new Service Request definition by copying the definition of that service request.

18.2 Service Request Definition - Search and View

The System/Bank Administrator can search and view Service Request using a search criteria.

To search and view an existing Service Request definition:

1. In the **Request Name** field, enter the name of the service request.
OR
In the **Request Description** field, enter the description of the service request.
OR
From the **Product Name** list, select the name of the product.
OR
From the **Request Type** list, select the type of request.

Value for these fields gets auto populated, administrator can only define the label name, validations and error message for the same.</p> <p>Following predefined elements are defined in this option:</p> <ul style="list-style-type: none"> • Account Number: Text box to enter the account number of the user. This field populates all active accounts for the customer who is raising that Service Request when displayed on the Service request form. • Account Number & Debit Card: Drop-down to select the account number and debit card. This field populates all active accounts and debit cards (for the selected account) for the customer who is raising that Service Request when displayed on the Service request form. • Gender: Drop-down to select the gender of the user. • Salutation: Drop-down to select the salutation of the user • Date: Date picker to select the date • Country And States: Drop-down to select the country and state of the user

Field Name	Description
Page Elements	<p>The page elements consists of text that needs to be displayed to the business user.</p> <p>The page elements are:</p> <ul style="list-style-type: none"> Confirmation Message: confirmation message that is to be displayed to the business user after submission of the request.
Information Box	This field displays the information header, text and icon uploaded by administrator that should be available to the retail user in information panel section while raising this service request.

4. Click **Edit** to edit the service request.
OR
Click **Cancel** to cancel the transaction and go back to Dashboard.
OR
Click **Back** to navigate to the previous screen

Note: The above mentioned fields appear in the **Build Your Form** section depending upon the on type of field you have selected to build the service request definition.

18.3 Service Request Form Builder - Create

Service Request Form Builder feature allows the System/Bank Administrator to create Service requests. The Service Request Form Builder involves following steps to create a service request form.

- Request Parameters: This step involves entering the request name, description, product, type of service request etc.
- Build Your Form: In this steps System/ Bank administrator defines the various form fields and its attributes like field name, field type, field validations and error message which will be used to create business user's 'Service Request' screen for raising a new SR.
- Preview: After completing the screen creation System/Bank administrator previews the created Service Request in this step.

To create a new service request:

1. In the **Service Request Definition** screen, click Create. The **Service Request - Form Builder** screen appears.

Service Request Form Builder - Request Parameters

The screenshot displays the 'Service Request - Form Builder' interface. At the top, there is a navigation bar with the 'ZigBank' logo and user information: 'Welcome, superadmin' and 'Last login'. Below the navigation bar, a progress indicator shows three steps: 'Request Parameters' (active, marked with a green checkmark), 'Build Your Form', and 'Preview'. The main form area contains the following fields:

- Request Name:** Cheque Book Request
- Request Description:** Cheque Book Request
- Product Name:** Savings (with a dropdown arrow and a link 'Add new' below it)
- Request Category Name:** savings (with a dropdown arrow and a link 'Add new' below it)
- Request Type:** Request (with a dropdown arrow)
- Applicable Status:** Initiated (with a close button 'x')
- Severity:** Medium (with a dropdown arrow)
- Activation Status:** Active (with a toggle switch)

At the bottom of the form, there are three buttons: 'Next' (highlighted in green), 'Cancel', and 'Back'. A footer at the very bottom contains the copyright notice: 'Copyright © 2006, 2017, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

Field Description

Field Name	Description

Information Header	The header name and the information notes that is to be displayed on information panel section of the Service request page of the business user.

5. Edit the required details.
OR
You can add more fields if required from **Form Fields** section.

6. Click **Next**. The **Service Request Form Builder - Preview** screen appears.
OR
Click **Cancel** to cancel the transaction and go back to Dashboard.
OR
Click **Back** to navigate back to the **Service Request Form Builder - Request Parameters** screen.
7. Click **Save** to save the details.
OR
Click **Cancel** to cancel the transaction and go back to Dashboard.
OR
Click **Back** to navigate back to the previous page.
8. The **Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate back to the **Service Request Form Builder - Preview** screen.
9. The success message appears along with the reference number and status.
Click **OK** to complete the transaction.

18.5 Deactivate/Activate Service Request

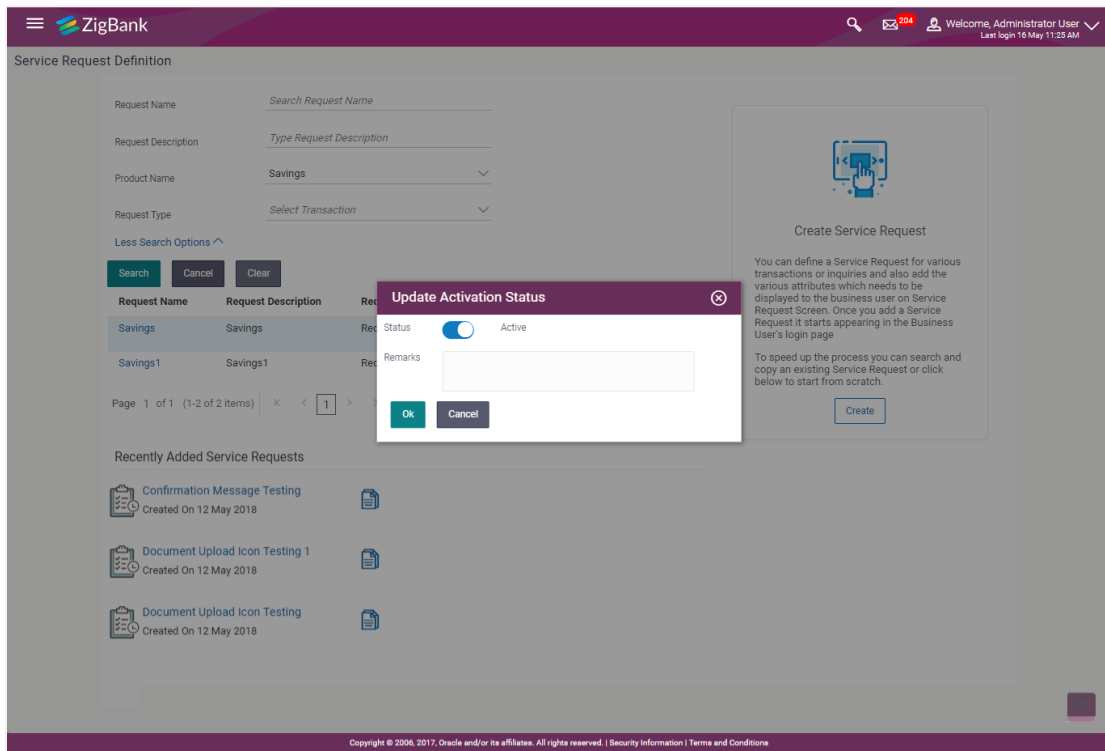

System/Bank Administrator can deactivate the Service Request which is no longer required by the bank and it will not be available to the business users.

The System/Bank administrator can also activate the service requests whenever it is required by the bank.

To deactivate the service request:

1. In the initial **Service Request Definition** screen, enter the search criteria and click **Search**.
The **Service Request Definition** screen with search results appears based on the searched criteria.
2. Click the **Activation Status** link, of the service request record, which you want to deactivate.
The **Service Request Definition** screen with **Update Activation Status** pop-up box appears.

Deactivate Service Request

3. In the **Status** toggle field, click the toggle to deactivate.
 4. In the **Remarks** field, enter the remarks.
 5. Click **Ok**. The success message appears.
- Using the same flow Admin can activate a deactivated Service Request.

FAQs

1. **How can I change the sequence of fields defined on form builder while creating the Service Request-form?**
You can drag and drop the fields for changing the sequence of the form fields at the time of creation.
2. **Can I edit the fields on preview page?**
No, you cannot edit the form fields on preview page, but you can go back to form builder page and edit the fields.
3. **Can I edit an existing Service Request Form ?**
You can only update a Service Request form only if there are no service request raised for that Service Request- form, by business users.

4. Can I delete a Service Request –form ?

No, Service Request form cannot be deleted. However you can deactivate the Service Request –form and it will stop appearing in the business user’s login.

5. Can I create two Service Request forms with the same names?

No, Service Request Forms are unique, so two forms cannot have the same names.

19. Feedback

Customer experience and satisfaction are very important aspects for the banks and it differentiates one bank from another, hence measuring customer satisfaction is exceedingly important. Feedback capture allows the customers to express their opinion on the services offered by the bank.

The following capabilities are available as part of feedback:

- Feedback Template definition
- Feedback capture on transaction completion
- General Feedback capture
- Feedback Analytics

As part of feedback template definition, the administrator can define the feedback question, the rating scale, question and option set along with deciding the set of transaction(s) for which feedback capture needs to be enabled.

The business users i.e. retail and corporate users will get an option to capture feedback on completion of transaction depending upon whether the transaction is part of the feedback template applicable to the role of the user.

The business user also has an option to capture general feedback if required and not necessarily perform a transaction to capture feedback.

Feedback captured by the user in terms of the rating and the options selected on the subsequent questions asked are stored in the system for the bank to carry out analysis for corrective actions if required. The administrator will have an option to view the details.

19.1 Feedback Template Maintenance

Using this option, the System Administrator can maintain the feedback templates by defining the feedback question, selecting the rating scale, adding new questions along with new options, selecting the transactions for which feedback capture needs to be enabled.

The administrator can also decide whether an additional question is to be asked for a scale weight and select the applicable options for the question.

How to reach here:

System Administrator Dashboard > Templates > Feedback Template

OR

Bank Administrator Dashboard > Others > Feedback Template Maintenance

OR

System / Bank Administrator Dashboard > Toggle Menu > Others > Feedback > Feedback Template Maintenance

19.1.1 Feedback Template Maintenance - Search

To search feedback template:

1. In the **Template ID** field, enter an appropriate template ID if you wish to search by template ID.
 2. In the **Template Name** field, enter the name of the template to be searched.
 3. Select appropriate role(s) if you wish to search the template based on the parameter **Applicable to Role**.
 4. Click **Search**.
- OR
- Click **Clear** to reset the search parameters
- OR
- Click **Cancel** to cancel the transaction

Feedback Template Maintenance-Search

The screenshot shows the 'Feedback Template Maintenance' page in the ZigBank application. The page has a purple header with the ZigBank logo and user information: 'Welcome, superadmin' and 'Last login 24 May 03:08 AM'. The main content area is titled 'Feedback Template Maintenance' and contains the following elements:

- Search Fields:** Two input fields labeled 'Template Id' and 'Template Name', both with placeholder text 'Enter Template Id' and 'Enter Template Name' respectively.
- Applicable to Role:** Three checkboxes: 'Administrator', 'CorporateUser', and 'RetailUser', all of which are currently unchecked.
- Action Buttons:** Three buttons: 'Search' (green), 'Clear' (grey), and 'Cancel' (grey).
- Search Results Table:** A table with three columns: 'Template Id', 'Template Name', and 'Applicable To Role'. It contains two rows of data:

Template Id	Template Name	Applicable To Role
dsfsdf	dsfds	corporateuser
Retail123	RetailTemplate	retailuser
- Feedback Template Definition:** A sidebar on the right with a blue icon of a notepad and pencil. It contains the text: 'Feedback template allows definition of Feedback Question, Scale selection, Question bank along with applicable options and selection of transactions for which feedback needs to be enabled'. Below this text is a 'Create' button.

At the bottom of the page, there is a footer with the text: 'Copyright © 2006, 2017, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

Field Description

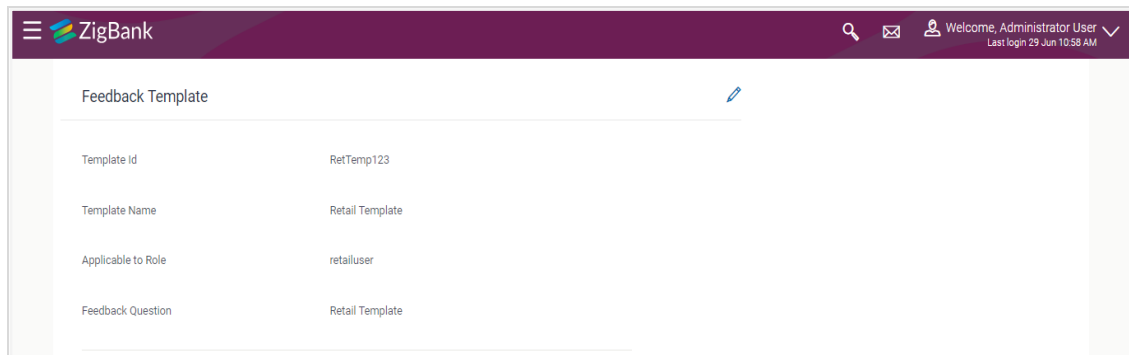

Field Name	Description
Template ID	Specify the template ID you want to search.
Template Name	Specify the template name you want to search.
Applicable To Role	Select the role if you wish the search the template based on the role.

Search Results

Field Name	Description
Template ID	Displays the template ID of the applicable template based on the search criteria.
Template Name	Displays the template name of the applicable template based on the search criteria.
Applicable To Role	The role to which the searched feedback template is applicable.

- Click the link under the **Template ID** column. The **Feedback Template Maintenance** screen appears with the details of the feedback template i.e. template ID, template name, feedback question, question and option set along with the set of transactions for which template is applicable.

Feedback Template – View

The screenshot shows the 'Feedback Template' view in the ZigBank system. The header includes the ZigBank logo, search, mail, and user profile icons, along with the text 'Welcome, Administrator User' and 'Last login 29 Jun 10:58 AM'. The main content area displays the following details:

Feedback Template	
Template Id	RetTemp123
Template Name	Retail Template
Applicable to Role	retailuser
Feedback Question	Retail Template

 Click **Cancel** to cancel the transaction.
 OR
 Click **Back** to navigate to the previous screen.

19.1.2 Feedback Template Maintenance - Edit

Using this option, the administrator can modify details in the feedback template i.e. update feedback question, change the rating scale, add new questions and options, add / remove transactions from the template.

To edit or modify feedback template:

1. Search the Feedback template by specifying different search criteria and click **Search**. The search results appear on the **Feedback Template Maintenance** screen based on the search parameters.
2. Click the link under the **Template ID** column. The **Feedback Template Maintenance** screen appears.
3. Click  to edit the details in respective section of the feedback template. The **Feedback Template Maintenance - Edit** screen appears.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to the previous screen.
4. The administrator will be navigated to the respective section i.e. feedback template details or scale definition or select question or link transaction depending on the edit option selected against the respective section.
5. As part of feedback template details, feedback question, template ID, template name and applicable to role can be modified
6. As part of scale definition, the administrator can change the rating scale
7. As part of select question section, the administrator can add new questions and also add new options for existing as well as new questions defined.
8. As part of link transaction section, the administrator can add new transactions as well as remove existing transactions.

Administrator can also add new options, to the existing questions associated to each scale weight of the rating scale applicable to general feedback as well as for transactions
9. Edit the required details in the respective section and click **Save** if you need to go to review page
OR
Click **Next**, to go to the next step in the process and edit details wherever required.
OR
Click **Back** to go to the previous page
OR
Click **Cancel** to cancel the transaction

Field Description

Field Name	Description
Link Transactions	
Feedback Type	<p>Indicates whether feedback type is general or is specific to transaction.</p> <p>The options are:</p> <ul style="list-style-type: none"> • General: This is very generic in nature and not feedback specific to a transaction. The template defined will be applicable when the user wishes to leave feedback generally through the menu option. • Transactions: This is in case wherein administrator wants to define the template very specific to a set of transaction or a set of transactions.

13. Select the applicable feedback type i.e. general or transactions or both
14. If you select **General** option, there will be a panel available to define questions along with options against each of the scale weights of the rating scale. It is not mandatory to assign a question to each scale weight.
15. If you select **Transaction** option, there will be a panel available to select the transactions in the '**Select transaction**' field and also define questions along with options against each of the scale weights of the rating scale. It is not mandatory to assign a question to each scale weight.
16. Click **Save** to save the template information.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to the previous screen.
17. The **Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to go to previous screen.

FAQs

1. Can I define multiple feedback questions as part of the template definition?

No. Only one feedback question can be defined as part of the template and this will be asked to the business user on which he/she will rate. The same question will be applicable to General feedback and for transactions.

2. What is the relevance of the questions and option set defined as part of select question section?

The questions and options defined as part of the select question section are used for association to the scale weights if required which will be asked to the user on he/she selecting the weight on the rating scale as part of actual feedback capture.

3. Can I have separate questions associated at scale weight level for different transactions?

Yes, you will need to select and group transactions for which you wish to have common questions and options at scale weight level. Click on Add Another Transaction to add transactions that require different set of questions and options at scale weight level.

4. Can I remove the questions associated at scale weight level as part of edit?

No. Currently questions once defined can't be removed.

5. Can the same feedback template be applicable to multiple roles?

Yes, provided multiple roles have been selected in the 'Applicable to Role' field.

19.2 Feedback Analytics

Feedback Analytics gives the bank a quick analysis of the feedback information collected from the customers. The analytics covers information about the average of feedback ratings that transactions have got, trends in how the average ratings have changed the top and bottom transactions in terms of ratings etc. The analytics helps banks in quickly identifying the pain points in customer journeys and points out the specific areas for improvement and action.

Using this option, the System Administrator can analyze the feedback given by users.

The following information will be available to the administrator as part of analytics:

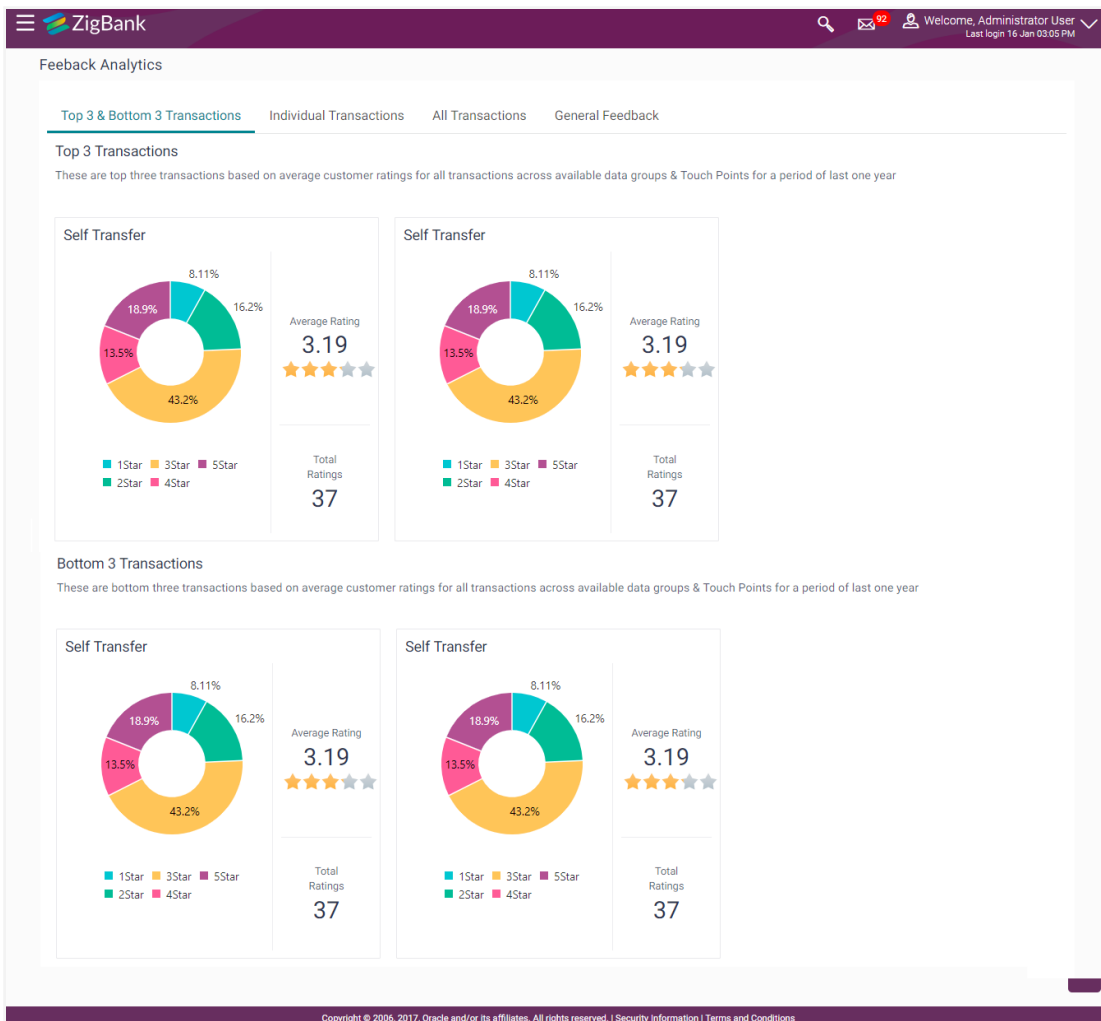

- Top three and bottom three transactions: Shows the top three and bottom three transactions based on user given rating
- Individual Transactions: Shows the user given ratings, distribution of the ratings given, the answer options chosen for the associated question & change of ratings over three time periods for an individual transaction
- All Transactions : Shows the user given ratings, distribution of the ratings given, and change of ratings over three time periods
- General Feedback: Shows the user's general feedback i.e. Average rating for the selected time period, Rating over time (last month, last quarter, last year), Recent comments by user grouped based on ratings, and the Customer response for the question associated with each rating

How to reach here:

Administrator Dashboard > Control & Monitoring > Feedback Analytics

19.2.1 Top Three and Bottom Three Transactions

Top three and bottom three transactions

Field Description

Field Name	Description
Top / Bottom 3 Transactions	Displays the top / bottom three transactions in graphical format. It also displays the ratings given by the user to that particular transaction.

19.2.2 Individual Transactions

To view individual transactions:

1. From the **Data Set** list, select the user for which the transaction is to be searched.
2. From the **Touch Point** list, select the banking channel.
3. From the **Select Transaction** list, select the transaction name for which the feedback is to be searched.
4. From the **Time Frame** list, select the duration in number of months / years.

5. Click **Submit**. The search results are displayed.
 OR
 Click **Cancel** to cancel the transaction.
 OR
 Click **Clear** to clear the search criteria.

Individual Transactions

The screenshot shows the 'Feedback Analytics' page for 'Individual Transactions'. The interface is divided into several sections:

- Navigation:** Top 3 & Bottom 3 Transactions, Individual Transactions (selected), All Transactions, General Feedback.
- Filters:** Data Set (RetailUser), Touch Point (Internet), Select Transaction (Cheque Book Request), Time Frame (Select Period).
- Buttons:** Submit, Cancel, Clear.
- Ratings:** Average rating is the mean of all the ratings given by users for the selected time period. The chart represents the total ratings given and their % break up. A pie chart shows 100% for 2Star. Average Rating is 2 (represented by two stars). Total Ratings is 1.
- Rating Over Time:** The chart below shows how the ratings have been over the past three periods - last month, last quarter & last year. This chart is independent of Time Period selected above. A line chart shows Values in % for 1 Year, 3 Months, and 1 Month, all at 100% for 2Star.
- Customer Review:** Below are the recent 5 comments given by users grouped based on ratings. A 5-star rating is shown.
- Customer Response:** Following are the responses chosen by users for the question associated with each rating. A bar chart shows 100% for 'Too much information capture'.

Field Description

20. SMS Banking

SMS and Missed call banking gives business user the control to manage his/her account whenever and wherever needed by sending a SMS or by giving a missed call on a designated number.

Business user just needs to register his/her mobile number with the bank and explicitly opt for SMS/Missed Call banking services to access the required information.

Using this option, the system administrator can maintain the following templates

- **SMS Banking:** The template for an event and locale combination can be created by defining the input keyword, data attributes, whether PIN required and response message.
- **Missed Call Banking:** The template for an event and locale combination can be created by defining the contact number on which the customer would need to give a missed call and response message.

How to reach here:

System Administrator Dashboard > Templates > SMS and Missed Call Banking > SMS

SMS Banking - Search

The screenshot displays the 'SMS Banking' search interface. At the top, there's a navigation bar with the ZigBank logo and user information: 'Welcome, superadmin' and 'Last login 19 Jun 03:39 AM'. Below the navigation bar, the main content area is titled 'SMS Banking'. It features two tabs: 'SMS' (selected) and 'Missed Call'. Under the 'SMS' tab, there are two dropdown menus: 'Event Name' and 'Locale'. Below these are 'Search' and 'Cancel' buttons. To the right, there's a panel with a calendar icon and the heading 'SMS and Missed Call Banking'. The text in this panel explains that the function allows administrators to define templates for SMS and Missed Call Banking, including input syntax, data attributes, and response messages. The footer contains copyright information: 'Copyright © 2006, 2017, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

To search SMS template:

1. From the **Event Name** list, select the appropriate event.
2. From the **Locale** list, select the language.
3. Click **Search**. The View screen appears, depending on the search criteria.

OR

Click **Cancel** to cancel the transaction.

SMS Banking - View

The screenshot shows the 'SMS Banking' configuration page in the ZigBank admin interface. The page is divided into two main sections: 'SMS' and 'Missed Call'. The 'SMS' section is currently active and shows the following settings:

- Event:** Last 5 transactions
- Locale:** English
- Pin Required:** A toggle switch is currently turned off.
- Input:** Three buttons are visible: 'BNKTXNS' (green), 'PIN' (blue), and 'ACCOUNTNO' (blue).
- Response:** A text field contains the message: "Your last 5 transactions for account number #AccountNumber# are #Transactions#".
- Data Attributes:** A section with two attributes: 'AccountNumber' and 'Transactions'.
- Buttons:** 'Edit', 'Cancel', and 'Back' buttons are located at the bottom of the form.

On the right side, there is a sidebar titled 'SMS and Missed Call Banking' with an icon of a notepad and pencil. The text in the sidebar reads:

The function allows the administrator to define the template for SMS as well as Missed Call Banking. In case of SMS Banking, for each event and locale combination, input syntax (keyword and data attributes) as well as response message can be defined.

For Missed Call Banking, for each event and locale combination, contact number along with response message can be defined.

At the bottom of the page, there is a copyright notice: "Copyright © 2006, 2017, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions".

Field Description

Field Name	Description
Event Name	Select the event name.
Locale	Select the locale of the template. Currently only 'English' is supported
Event Name	Displays the event name as selected on the search page for which the template details are to be viewed.
Locale	Displays the language in which the SMS template is defined i.e. input syntax as well as the response message
Pin Required	Indicates whether PIN is required while requesting information from the bank.
Input	<p>Displays the input syntax containing the keyword, data attribute(s) and PIN (if required) for the selected event and locale combination</p> <p>The format in which the user needs to send the text message with the required attribute(s) to receive appropriate information.</p> <p>For example: If the account holder wishes to receive account balance information from the bank and the template is defined as MBAL <PIN> <AccountNumber>, user's PIN is defined as 5678, and account number is AT30012100012, then user will need to send SMS as MBAL 5678 AT30012100012.</p>

Field Name	Description
Response	Displays the response message along with the data attributes as defined for the event and locale combination. It is the response message that the account holder would be receiving on sending a SMS for a specific inquiry or transaction
Data Attributes	Displays the data attributes used as part of response message for the respective event.

- Click **Edit** to if you want to edit the SMS template.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to the previous screen.

20.1 SMS Banking - Edit

Using this option, System Administrator can modify the SMS Banking template defined for an event and locale combination.

To edit or update a SMS template:

- Select the Event and Locale and click **Search**. You will be navigated to the SMS Banking Template in View mode.
- Click **Edit** to modify the details. The **SMS Banking- Edit** screen appears.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to the previous screen.

SMS Banking - Edit

The screenshot displays the 'SMS Banking - Edit' screen in the ZigBank application. The top navigation bar includes the ZigBank logo, a search icon, an envelope icon, and a user profile with the text 'Welcome, superadmin' and 'Last login 19 Jun 04:50 AM'. The main content area is titled 'SMS Banking' and has two tabs: 'SMS' (selected) and 'Missed Call'. Below the tabs, there are several fields: 'Event' with the value 'Stop Cheque Book Request', 'Locale' with 'English', and 'Pin Required' with a blue toggle switch turned on. The 'Input' field contains four buttons: 'BNKSTCHRQ' (green), 'PIN' (blue with a refresh icon), 'ACCOUNTNO' (blue with a refresh icon), and 'CHEQUENO' (blue with a refresh icon). Below these is an 'Add Data Attribute' link. The 'Response' field is a text area containing the text 'Request to stop cheque for number #ChequeNumber# has been received'. At the bottom of the form are three buttons: 'Save' (green), 'Cancel' (grey), and 'Back' (grey). A footer at the very bottom of the screen reads 'Copyright © 2006, 2017, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

3. As part of edit, you can modify the keyword defined for the event, include new data attributes in the input syntax or remove existing data attributes, modify the response message and also include new data attributes as part of response message.
4. Click **Save** to update the changes.
OR
Click **Back** to navigate to previous screen.
OR
Click **Cancel** to cancel the transaction.
5. The **Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Back** to go to previous screen.
OR
Click **Cancel** to cancel the transaction.
6. The success message about modification appears.
Click **OK** to complete the transaction.

20.2 Missed Call Banking - Search

How to reach here:

Administrator Dashboard > Templates > SMS and Missed Call Banking > Missed Call

Missed Call Banking - Search

The screenshot shows the 'Missed Call' search interface in the ZigBank administrator dashboard. At the top, there's a navigation bar with the ZigBank logo, a search icon, an email icon, and user information: 'Welcome, superadmin' and 'Last login 19 Jun 04:50 AM'. Below this, the 'Missed Call' section is active, showing two tabs: 'SMS' and 'Missed Call'. Under the 'Missed Call' tab, there are two dropdown menus: 'Event Name' with the placeholder 'Event Name' and 'Locale' with the placeholder 'Locale'. Below these are two buttons: 'Search' (in green) and 'Cancel' (in grey). To the right of the search area is a sidebar with a blue icon of a calendar and a text box titled 'SMS and Missed Call Banking'. The text box explains that the function allows administrators to define templates for SMS and Missed Call Banking based on event and locale combinations, including input syntax and response messages. At the bottom of the page, there is a footer with copyright information: 'Copyright © 2006, 2017, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

Missed Call Banking - Search

To search Missed Call Banking template:

1. From the **Event Name** list, select the appropriate event.
2. From the **Locale** list, select the language.
3. Click **Search**. The View screen appears, depending on the search criteria.
OR
Click **Cancel** to cancel the transaction

Missed Call Banking - View

The screenshot shows the 'Missed Call' configuration page in the ZigBank interface. The page has a purple header with the ZigBank logo and user information. The main content area is divided into two sections. On the left, there is a form with the following fields:

- Event:** Last 5 transactions
- Locale:** English
- Contact Number:** 9869288402
- Response:** Your last 5 transactions for account number #AccountNumber# are #Transactions#

Below these fields is a 'Data Attributes' section with the following fields:

- AccountNumber:**
- Transactions:**

At the bottom of the form are three buttons: 'Edit', 'Cancel', and 'Back'. On the right side, there is a sidebar with an icon of a calendar and a pen, and the following text:

SMS and Missed Call Banking

The function allows the administrator to define the template for SMS as well as Missed Call Banking, in case of SMS Banking, for each event and locale combination, input syntax (keyword and data attributes) as well as response message can be defined.

For Missed Call Banking, for each event and locale combination, contact number along with response message can be defined.

Copyright © 2006, 2017, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions

Field Description

Field Name	Description
Event Name	Select the event name from the list.
Locale	Select the locale of the template. Currently only 'English' is supported.
Event Name	Displays the event name as selected on the search page for which the template details are to be viewed
Locale	Displays the locale as selected on the search page for which the template details are to be viewed It is the language in which the information is communicated to the account holder on request.
Contact Number	Displays the contact number defined for the selected event and locale combination on which the user needs to give a missed call to get the required information.
Response	Displays the response message as defined for the event and locale combination with the required data attributes. It is the response message that the account holder would be receiving when he gives a missed call on a specific contact number
Data Attributes	Data attributes that are used as part of response message for the respective event.

- Click **Edit** if you want to edit the missed call template.
OR
Click **Cancel** to cancel the transaction.

OR

Click **Back** to navigate to the previous screen.

20.3 Missed Call Banking - Edit

Using this option, System Administrator can modify the Missed Call Banking template defined for an event and locale combination.

To edit or update a missed call template:

1. Select the Event and Locale from the list and click **Search**. You will be navigated to the **Missed Call Banking** template in View mode.
2. Click **Edit** to modify the details. The **Missed Call Banking- Edit** screen appears.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to the previous screen.

Missed Call Banking - Edit

The screenshot displays the 'Missed Call Banking - Edit' interface. At the top, the ZigBank logo and user information 'Welcome, superadmin' are visible. The main content area is titled 'Missed Call' and contains a form with the following fields:

- Event:** Last 5 transactions
- Locale:** English
- Contact Number:** 9869288402
- Response:** Your last 5 transactions for account number #AccountNumber# are #Transactions#
- Data Attributes:** A section with a trash icon and a link to 'Add Attribute Mask'.
- Transactions:** A section with a trash icon.

At the bottom of the form, there are three buttons: 'Save' (green), 'Cancel' (grey), and 'Back' (grey). A footer at the very bottom contains the copyright notice: 'Copyright © 2006, 2017, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

3. As part of edit, you can modify the contact number as well as the response message
4. Edit the required details.
5. Click **Save** to update the changes.
OR
Click **Back** to navigate to previous screen.
OR
Click **Cancel** to cancel the transaction.
6. The **Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Back** to go to previous screen.
OR
Click **Cancel** to cancel the transaction.

7. The success message about modification appears.
Click **OK** to complete the transaction.

FAQs

1. How can the business user register for SMS Banking?

User can send a SMS with the required keywords and data attributes defined by the bank to a specified contact number. User needs to send the SMS from his/her registered mobile number with the bank. Alternatively he/she can login to Internet Banking and register for SMS Banking.

2. Is it mandatory to have a PIN in each of the request for SMS Banking?

It will depend on the template defined for event and locale combination. If PIN is required, then user needs to define the PIN as part of registration process and subsequently send that as part of the request.

3. Does the user needs to specify an account number as part of the request while sending SMS?

No, it is not necessary. If the user does not specify the account number, system will return response for the primary account number if defined.

4. For which account does system return the response in case of Missed Call Banking?

System will always return the response for the primary account number (if defined) on receipt of request through missed call banking

5. User is unable to receive information and getting an error, how can he/she find the correct keyword?

User might be getting an error due to keyword and/or account number not being valid or the required data attributes not present. He/she can find the keywords by sending a help message and system will return the set of business functions supported through SMS Banking along with keywords for each of the transactions.

6. Should the user be on-boarded on channel platform for him/her to access SMS Banking?

Yes, the user needs to be on-boarded on OBAPI with SMS Banking as a touch point enabled to access SMS Banking.

21. System Rules

System rules are defined to set different parameters for each enterprise role (User Type- Retail, Corporate and Administrator). Various parameters that can be set for each enterprise role are Party Mapping required Limits check, Party Preferences check, Account Transaction Mapping and Approvals check. Enabling these parameters at enterprise role, enforces the system to check if respective maintenances are available for users associated with those enterprise roles.

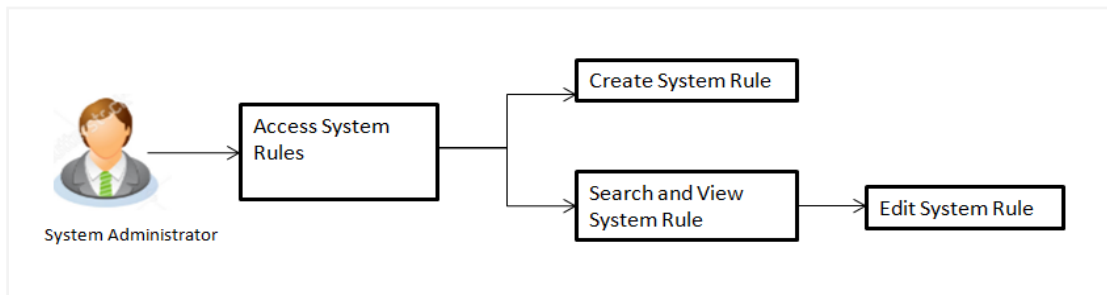

E.g. if Approval check flag is enabled for 'Corporate User' type of enterprise role; then transactions initiated by corporate type of users will follow the approval maintenance for a party mapped to user and vice versa.

This screen allows the System Administrator to search and view existing system rules, and create new system rule.

Pre-Requisites

- Transaction access is provided to System Administrator.
- Approval rule set up for System Administrator to perform the actions.
- Enterprise roles are maintained in application.
- Touch point groups are maintained, if required.
- Limit packages are maintained.

Workflow

Features Supported In Application

This option allows the System Administrator to:

- Maintain system rules
- View system rules
- Edit system rules

How to reach here:

System Administrator Dashboard > Configuration > System Rules

OR

System/ Bank Administrator Dashboard > Toggle Menu > Configuration > System Rules

System Rules

Account Transaction Mapping	Account transaction mapping check is required or not.
Approvals Check	Approvals check is required or not.
First Time Login Steps	First time login steps to be followed or not. Administrator can also configure the steps along with the order of the steps that need to be displayed to user.
Below field are displayed if the First Time Login Steps option is enabled.	
Select	Option to decide whether that transaction is to be displayed as part of the first time login steps.
Name of Screen	Name of the transaction which is to be included as part of First Time Login Steps process.
Mandatory	Option which will decide whether the transaction is mandatory to execute as part of First Time Login Steps process.
Reorder	Order in which the transactions will get displayed when the user logs in for the first time. Administrator can click on the reorder icon and configure the order of steps in which these steps need to be displayed to user.
Account Relationship Check	Account Relationship check is required or not.
Limits Check	Limits check is required or not.

Field Name	Description
Limits - Entity Level Configuration	
If limit check is required, assign a limit package.	
In case of multi entity set up, limit packages needs to be mapped at each entity level.	
Name of the entity	Name of entity under which limit packages are to be mapped is shown in the header.
Touch Points/ Group	Name of touch points/ groups under a specific entity to whom the limit packages are to be mapped. Also an option is provided to map the limit package at Global level (a group created with all internal and external touch points)
Package	List of the packages which are to be mapped to a touch points/ groups. Only limit packages maintained for the selected touch point will get listed here.

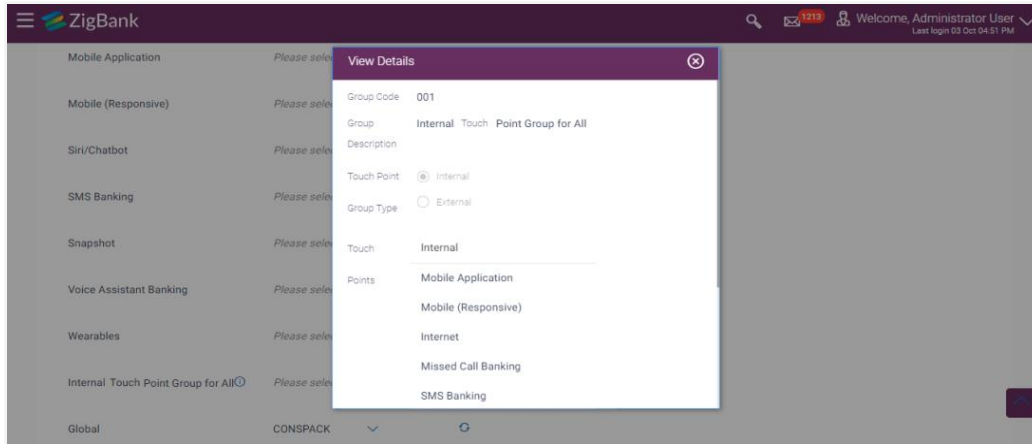

To set the system rules:

1. From the **Enterprise Role** list, select the appropriate option.
2. In the **Party Mapping Required** field, select the appropriate option.
3. In the **Party Preferences Check** field, select the appropriate option.
4. In the **Account Transaction Mapping Check** field, select the appropriate option.
5. In the **Approvals Check** field, select the appropriate option.
6. In the **First Time Login Steps** field, select the appropriate option.
 - a. To include in the **First Time Login Steps** process, select the checkbox(s) against the transaction and configure the steps.
 - b. Slide Mandatory option to enabled /disabled the execution of transaction in the **First Time Login Steps** process.
 - c. Slide  icon to set order in which transaction are executed in the **First Time Login Steps** process.
7. In the **Account Relationship Check** field, select the appropriate option.
8. In the **Limits Check** field, select the appropriate option.
 - a. Click  of desired entity to whom limit package to be mapped. Displays the list of touch points/ groups to map limit package.
 - b. From the **Package** list, select the appropriate option.

Note: Click  to refresh the option.

- c. Repeat steps a to b of step 8 for all touch points/ groups.
 - i. Click  to view the details of touch points group. The **View Details -Touch Point Group** popup window appears.

View Details -Touch Point Group

Field Description

Field Name	Description
Group Code	Group code defined for a touch point group.
Group Description	Group description defined for a touch point groups.
Touch Point Group Type	Type of touch point i.e. whether touch point is of type internal or external.
Touch Points	List of the internal or external touch points.

9. Click **Submit** to save system rules.
OR
Click **Cancel** to cancel the transaction.
The success message appears.
10. The **System Rules - Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Back** to make the changes if any.
OR
Click **Cancel** to cancel the transaction and navigate back to 'Dashboard'.
11. The success message of System Rules maintenance appears along with the transaction reference number. Click **OK** to complete the transaction.

FAQs

1. **Who can create-edit this maintenance?**
System Administrator can create and edit this maintenance.
2. **How can I find out what checks are granted to a particular role and can I change it?**
You can select a role and view the checks mapped to the role, you can also edit the type of checks.
3. **How can I group the touch points?**

A separate menu option 'Touch Point Group Maintenance' is available to the system administrator user to maintain the groups. Groups maintained under specific entity are shown on the System Rules screen against which a consolidated limit package can be assigned.

4. Is it mandatory to map packages for all the touch points and groups available under each entity?

Mapping the limit packages for each touch point and for all groups available under each entity is not mandatory. But it is mandatory to map a limit package at Global level for each entity.

[Home](#)

22. Workflow Configuration

Banks across different geographies can have varied requirements with regards to sequence of steps in originations for different products.

Workflow configuration is an administrative maintenance using which the bank administrator can define the sequence of the sections in application form for each of the products.

There will be a default workflow defined in the product as part of Day0 definition for each of the product along with identified set of steps.

Bank administrator will have an option to view the default workflow for each of the products. If the sequence defined for a product does not suit the bank requirements, the admin can opt to create a custom workflow by re-arranging the steps.

Bank administrator also will have a choice to decide on the workflow to be applied for products i.e. default/custom.

Prerequisites

- Transaction access is provided to Bank Administrator
- Default Workflow with set of steps applicable for a product is defined in the system

Features supported in application

Workflow configuration allows Bank Administrator to:

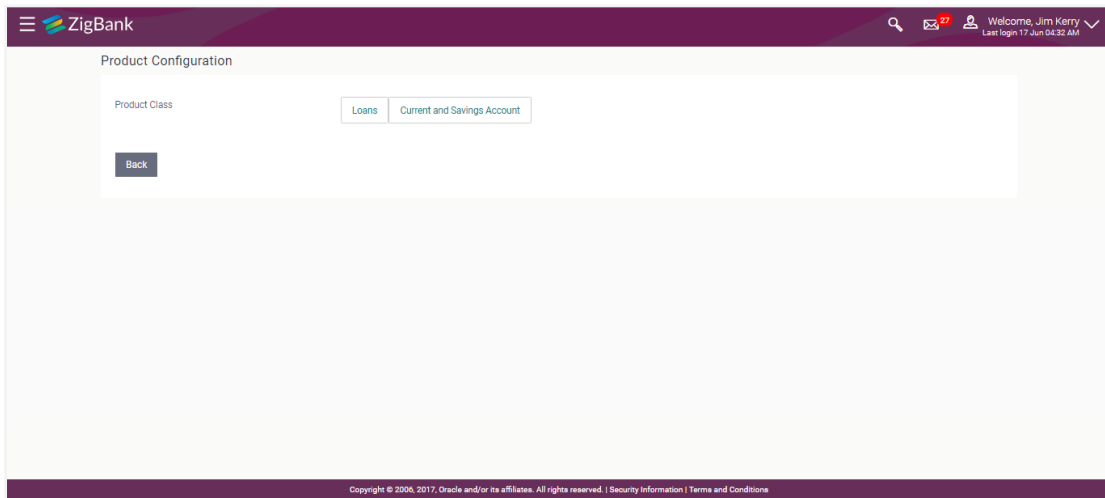

- View Default / Custom Workflow
- Create Custom Workflow
- Edit Custom Workflow

How to reach here:

*Bank Administrator Dashboard > **Origination Administrator**> Workflow Configuration*
OR

System/ Bank Administrator Dashboard > Toggle Menu > Others > Workflow Configuration

Product Configuration

Field Description

Field Name	Description
Product Class	Select the product class for which the workflow needs to be viewed or custom workflow is to be defined.

1. In the **Product Class** field, click the desired product. The **Product Configuration** screen with option to select the product appears.
OR
Click **Back** to navigate back to the previous screen.

[Home](#)

23. Transaction Aspects

Using this option, System Administrator can define the aspects for a transaction. Depending on the aspects defined for a transaction through this maintenance, the transaction will be available/unavailable for selection in the respective maintenance screen.

User can view the aspects for a selected transaction and also edit the aspects i.e. enable/disable the aspects for the selected transaction.

The following aspects are available for a transaction:

- Limits Check
- Approvals
- Grace Period
- Working Window
- Blackout
- 2 Factor Authentication
- Audit
- e-Receipts
- Customer Relationship Matrix

Pre-Requisites

System Administrator has access to the specified transaction

Note: There are certain transactions in the system for which all the aspects are not applicable. In such cases on selection of the transaction, the aspect(s) that are not applicable will not get displayed to user.

Features supported in Application:

- View Transaction Aspects
- Edit Transaction Aspects

How to reach here:

System Administrator Dashboard > Configuration > Transaction Aspects

OR

System/ Bank Administrator Dashboard > Toggle Menu > Configuration > Transaction Aspects

23.1 View Transaction Aspects

System Administrator can view the aspects enabled/disabled for a transaction.

To view the transaction aspects:

1. From the **Transaction** list, select the transaction for which you wish to view the defined aspects.

Transaction Aspects

Field Description

Field Name	Description
------------	-------------

Transaction	The name of the transaction for which aspects are to be listed.
--------------------	---

- Click **Search**. The **Transaction Aspects- View** screen appears.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Clear** to reset the selected transaction.

Transaction Aspects- View

Field Description

Field Name	Description
Transaction	The name of the transaction for which aspects are to be listed.
Aspects	
List of Aspects	The list of aspects for a transaction.

- Click **Edit** to modify the aspects.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate back to previous screen.

23.2 Update Transaction Aspects

Using this option user can update the listed aspects for a transaction by enabling or disabling it.

To modify the transaction aspects:

- From the **Transaction** list, select the appropriate transaction.
- Click **Search**. The Transaction Aspects- View screen appears.
- Click **Edit** to modify the aspects i.e. the aspect for a transaction can be enabled/disabled. The **Transaction Aspects- Edit** screen appears.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate back to previous screen.

Transaction Aspects- Edit

The screenshot displays the 'Transaction Aspects' edit interface. At the top, the 'Transaction' field is set to 'Own Account Transfer Pay Now'. Below this, the 'Aspects' section contains two toggle switches: 'Transaction Blackout' and 'Working Window', both of which are currently turned on. At the bottom of the form, there are three buttons: 'Save' (in green), 'Cancel', and 'Back'. To the right of the form is a 'Note' box with a blue icon of a notepad and pencil, containing the following text: 'Using this option, you can define the aspects for a transaction. Depending upon the aspects maintained, the transaction will be available/unavailable for selection in the respective maintenance screen. You can view the aspects for a selected transaction and can also edit the aspects i.e. enable/disable the aspects for the same.'

Field Description

Field Name	Description
------------	-------------

Transaction	The name of the transaction for which aspects are to be updated.
--------------------	--

Aspects

List of Aspects	The list of aspects applicable for the selected transaction.
------------------------	--

4. Click on the toggle button against the respective aspect to enable/disable the aspect
5. Click **Save** to confirm the changes.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate back to previous screen.
6. The **Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Edit** to make the changes if any. User is directed to the **Transaction Aspects- Edit screen** with values in editable form.
OR
Click **Cancel** to cancel the transaction.
7. The success message appears confirming the modification of aspects for the transaction.

[Home](#)

24. ATM / Branch Maintenance

ATM Branch Locator feature available to the bank customers enables the users to locate the bank's ATMs/ branches available within a specific radius of his current location.

Default radius is 2.5 Kms which can be configured by updating the value of DEFAULT_SEARCH_RADIUS in digx_fw_config_all_b. Changed value will be in effect post server restart.

For the customers, to fetch the relevant information related to ATMs and Branches, System Administrator maintains the data at their local databases. The details of ATMs and Branches are fetched from the core banking application, which is further enriched and stored in local database. This is a one-time activity at the time of implementation. Subsequently, as and when branches and ATMs are added, or any details regarding them updated, the administrator performs the necessary updates to the bank database.

Using this option, the System Administrator can search and view the ATM/ branch and its details (Fetched from core banking application) which include branch/ ATM ID, branch name, address details, phone number, work timings and services offered by the bank. New ATM and branch details can also be manually added, viewed and edited.

The System Administrator can manually add new branch/ ATM details one by one, or add multiple branches / ATMs details simultaneously through file upload.

Pre-requisites

- Transaction access is provided to System Administrator.
- Approval rule set up for System Administrator to perform the actions.
- ATM and Branches are maintained in core banking application.

Workflow

Features Supported In Application

- Add ATM/ branches
- View ATM/ branches
- Edit ATM/ branches
- Delete ATM / branches

How to reach here:

System Administrator Dashboard > Configuration > ATM/ Branch Maintenance

OR

System/ Bank Administrator Dashboard > Toggle Menu > Configuration > ATM/ Branch Maintenance

24.1 ATM/ Branch Maintenance - Search

Using this option, System Administrator can search for particular ATM/ Branch based on search parameters. The search results display a list of ATM/ Branch corresponding to the search inputs.

If the search parameters are not specified, records of all the limits maintained in the application are displayed.

To search the ATM/ branch:

1. Click **Search**. The **ATM/ Branch Maintenance** screen with search results appears based on the searched criteria.
OR
Click **Clear** to reset the search parameters.
OR
Click **Cancel** to cancel the search process.

ATM/ Branch Maintenance - Search

The screenshot shows the 'ATM/Branch Maintenance' search interface. It includes a search form with the following fields and options:

- Country:** A dropdown menu with 'Select' as the current value.
- City:** A text input field.
- ATM/Branch ID:** A text input field.
- Filters:** Checkboxes for 'ATM' (checked) and 'Branch' (checked).
- Buttons:** 'Search' (green) and 'Clear' (grey).

The search results are displayed in a table:

ATM/Branch ID	Address
1212	asdad, asdasdad, qweqw, India
DBA090	Line1, Line2, Mumbai, Andorra
DBA09012	Line1, Line2, Mumbai, INDIA
DBA091	Line1& Goregaon, Line2, Nagpur, Andorra
BR001	Hub Mall, WEH, Mumbai, I
BR00100	Oberoji Mall Branch, WEH, Mumbai, I

Below the table, there is a pagination control showing 'Page 1 of 1 (1-6 of 6 items)' and a 'Cancel' button.

A 'Note' sidebar on the right contains the following text:

ATM and Branch locations/addresses are maintained in this functionality. You can search for the existing ATM/branch locations by keying in the search parameters like Country, City & Branch/ATM IDs.

Click on "Create" if you want to Add a new ATM/Branch location details. In the search results click on the ATM/Branch code to view the details of that ATM/Branch and to further Edit & Delete the details.

A 'Create' button is located at the bottom of the note sidebar.

Field Description

Field Name	Description
------------	-------------

ATM/ Branch ID	Unique key to identify the ATM / branch. This field is not editable.
-----------------------	---

ATM/ Branch Name	Name of the ATM / branch which is to be edited.
-------------------------	---

Field Name	Description
Latitude	The location of the ATM/ branch in term of latitude which is the angular distance, north or south of the equator (an imaginary circle around the Earth halfway between the North Pole and the South Pole).
Longitude	The location of the ATM/ branch in term of longitude which is angular distance, east or west of the prime meridian (an imaginary line running from north to south through Greenwich, England).
Address Line 1 - 4	The address of the ATM / branch that corresponds with the ATM / branch ID.
City	The city of the ATM / branch that corresponds with the ATM / branch ID.
Country	The country of the ATM / branch.
Work Timings	The operating hours of the branch / ATM. This field is only applicable when the user is editing details of the Branch .
Additional Details	Additional details if any. This field appears if you are viewing the details of a Branch of the bank .
Phone Number	The phone number of the branch / ATM. This field is only applicable when the user is editing details of the Branch .
Services Offered	The services offered by the bank branch/ ATM.

4. In the **ATM/ Branch Name** field, edit the name of the new ATM/ branch if required.
5. In the **Coordinates** field, click the **Search Location** link to enter the location. The coordinate value appears in the field. Modify, if required.
6. In the **Address Line 1, 2** field, edit the address of the new ATM/ branch if required.
7. In the **City** field, edit the city of the ATM/ branch (if required).
8. From the **Country** list, select the country of the new ATM/ branch.
9. In the **Phone Number** field, edit the phone number of the bank branch if required.
10. Click **Save** to update the ATM/ branch details.
OR
Click **Cancel** to cancel current transaction.
OR
Click **Back** to navigate back to previous screen.
11. The **Edit ATM/ Branch Details - Review** screen appears post necessary validations. Verify the details, and click **Confirm**.
OR
Click **Edit** to make changes if any.
User is directed to the **Edit ATM/ Branch Details** screen with values in editable form.
OR
Click **Cancel** to cancel the operation and navigate back to 'Dashboard'.

- The success message of saving the ATM/ Branch maintenance appears along with the status of the transaction.
Click **OK** to complete the transaction and navigate back to 'Dashboard'.

24.4 ATM/ Branch Maintenance - Delete

The System Administrator can delete the ATM and branch details.

To delete ATM/ branch details:

- In the **ATM/ Branch Maintenance** screen, click **Search**. The **ATM/ Branch Maintenance** screen with search results appears based on the search criteria.
OR
Click **Clear** to reset the search parameters.
OR
Click **Cancel** to cancel the search process.
- Click the **ATM/ Branch ID** link of the record for which you want to view the details. The **ATM/ Branch Maintenance - View** screen appears.
- Click **Delete** to delete the ATM/ branch details.
The application will prompt the administrator with a deletion message with an option of Yes / No.

ATM/ Branch Maintenance - Delete

- Click **Yes** to delete ATM / Branch. It will navigate to confirmation page with a success message and the status.
OR
Click **No** if you do not wish to delete the ATM / Branch.
- Click **OK** to complete the transaction.

FAQs

- In which format I can upload a file with ATM and Branch details?**

You can upload a file in xml format to add new branches and ATMs.

2. Do I need to remember the latitude and longitude while updating single ATM/Branch?

No, you may search the location. Based on the location selected latitude and longitude data will be auto fetched and shown on the screen.

3. Can I edit the address and other details of already saved ATM/Branch?

Yes, an option to edit the information of already saved ATM/Branches is provided.

[Home](#)

25. Product Mapping

Product mapping feature allows the System Administrator to map products to users from the channel.

System Administrator can map products maintained in the core banking system to different User type and all the users falling under that user type can open accounts for the mapped products only. This option is currently enabled for Term Deposit and Recurring Deposit module.

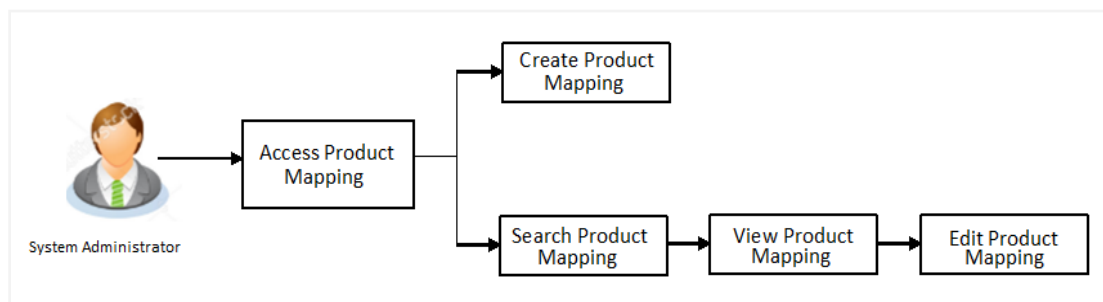

For example: A user can open a term deposit or a recurring deposit only under those products which are mapped to the User Type/User Segment assigned to the user. Products which are not mapped, will not be available (for opening deposit accounts) to a channel user. This will be a part of Day 1 setup.

Note: For User Type – Retail, product mapping can be done for User Type and User Segment combination.

Pre-Requisites

- Transaction access is provided to System Administrator.
- Approval rule is set up for System Administrator to perform the actions.
- Necessary products are maintained in core banking application.

Workflow

Features Supported In Application

The module supports following features:

- View Product Mapping
- Edit Product Mapping
- Create Product Mapping

How to reach here:

System Administrator Dashboard > Configuration > Product Mapping

OR

System/ Bank Administrator Dashboard > Toggle Menu > Configuration > Product Mapping

25.1 Product Mapping - View

Using Product mapping view option, System Administrators can view the list of products mapped to the product module. The System Administrator can view the mapping details by clicking the User Segments link.

To view the product mapping:

1. Navigate to the **Product Mapping** screen. The **Product Mapping** screen with mapped products appears.
OR
Click **Cancel** to cancel the transaction and navigate to the dashboard.

Product Mapping

The screenshot displays the 'Product Mapping' screen in the ZigBank system. At the top, there's a navigation bar with the ZigBank logo and user information: 'Welcome, Administrator User' with a last login time of '27 Sep 10:28 AM'. Below the navigation bar, the 'Product Mapping' section has three filter dropdowns: 'User Type' set to 'Retail User', 'Product Module' set to 'Term Deposits', and 'Product Type' set to 'NRE'. A green 'Search' button is located below the filters. The main content area features a table with three columns: 'User Type', 'User Segments', and 'Products Mapped'. The table lists 12 rows of user segments, each with a 'Map Products' link. At the bottom left of the table area is a 'Cancel' button. On the right side, there is a 'Tips' box with a lightbulb icon and text: 'Using this option, You can enable or map products you want to offer to users for creating new Term deposits and Recurring deposits. Simply select the Product module, select the user segment to make changes and save it.' The footer of the page contains the text: 'Copyright © 2006, 2017, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

Field Description

Field Name	Description
User Type	The user type available for mapping products.
Product Module	Following product modules are available for mapping: <ul style="list-style-type: none"> • Term Deposit • Recurring Deposit

Field Name	Description
Product Type	The type of products available to be mapped to the user segment or to the role for that product module.
Search Result	
User Type	The user for which products are mapped.
User Segment	The user segments for which products mapped. This field is applicable only for Retail user type.
Products Mapped	The number of products mapped to the user segment or user type for that product type and product module.

2. Click the **Product Mapped** link of the user record for which you want to view the details. The **Product Mapping - View** screen appears.

Product Mapping - View

The screenshot displays the 'Product Mapping - View' interface. At the top, the ZigBank logo is on the left, and user information 'Welcome, Administrator User' with a last login time of '27 Sep 10:28 AM' is on the right. Below this, the 'Product Mapping' section shows filters: User Type (Corporate User), Product Module (Term Deposits), Product Type (CONVENTIONAL), and User Segment. A table lists product mappings with columns: Product Name, Expiry Date, Status, Currency, Minimum Amount, and Maximum Amount. The table contains 12 rows of data. At the bottom of the table, there are three buttons: 'Edit', 'Cancel', and 'Back'. A footer at the very bottom contains copyright information: 'Copyright © 2006, 2017, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

Product Module	<p>Following product modules are available for mapping:</p> <ul style="list-style-type: none"> • Term Deposit • Recurring Deposit <hr/> <p>Note: For corporate only Term Deposit product module is available</p>
Product Type	The type of product under the selected module for which the product list needs to be fetched .
User Segment	The user segment for which products are mapped. This field is applicable only for Retail user type.
Product Name	Name of the product which is mapped to the user type for the selected product type and product module.
Expiry Date	<p>The expiry date of the product.</p> <p>If the product is expired, an 'Expired' flag is shown against the product.</p>
Status	The current status of the product.
Currency	The currency in which products are maintained.
Minimum Amount	The minimum permissible amount for opening deposit under the selected product.
Maximum Amount	The maximum permissible amount for opening deposit under the selected product.

3. Click **Edit** to edit the user-segment - product mapping.
OR
Click **Cancel** the operation and navigate to the 'Dashboard'.
OR
Click **Back** to navigate to the previous screen.

25.2 Product Mapping - Edit

This function enables the System Administrator to edit the product mapping. The System Administrator can map or delete the products to the product module.

To edit or update the product mapping:

1. In the **Product Mapping** screen, click the **Product Mapped** link of the user record for which you want to edit the details.
The **Product Mapping - View** screen appears.
2. Click **Edit** to edit the user-segment - product mapping. The **Product Mapping – Edit** screen appears.
OR
Click **Cancel** the operation and navigate to the 'Dashboard'.
OR
Click **Back** to navigate to the previous screen.

Product Mapping - Edit

The screenshot shows the 'Product Mapping - Edit' interface in ZigBank. The top navigation bar includes the ZigBank logo, a search icon, a notification icon with '6/21', and a user profile for 'Administrator User' with the last login time '27 Sep 10:28 AM'. The main content area is titled 'Product Mapping' and contains a form with the following fields:

- User Type: Corporate User
- Product Module: Term Deposits
- Product Type: CONVENTIONAL
- User Segment: (empty)

Below the form is a table with the following columns: Product Name, Expiry Date, Status, Currency, Minimum Amount, and Maximum Amount. The table contains the following data:

Product Name	Expiry Date	Status	Currency	Minimum Amount	Maximum Amount
<input checked="" type="checkbox"/> TD without topup	NA	Active	USD	100	100000
	NA	Active	GBP	100	100000

Currency	The currency in which products are maintained.
Minimum Amount	The minimum permissible amount for opening deposit under the selected product.
Maximum Amount	The maximum permissible amount for opening deposit under the selected product.

3. Edit View the defined values for fields, in an editable form.
4. Edit the required details.
5. Click **Save** to save the changes.
OR
Click **Cancel** to cancel the operation and navigate back to 'Dashboard'.
OR
Click **Back** to navigate to previous screen.
6. The **Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to previous screen.
7. The success message of transaction submission appears along with the transaction reference number and status.
Click **OK** to complete the transaction.

25.3 Product Mapping - Create

This option enables the System Administrator to select the products and map it to the Product Module.

To create a new product mapping:

1. Navigate to the **Product Mapping** screen.
2. Select the User Type for which the product mapping needs to be maintained
3. Select the User Segment (applicable only for Retail user type).

Product Mapping

The screenshot displays the 'Product Mapping' interface. At the top, there's a navigation bar with the ZigBank logo and user information: 'Welcome, Administrator User' and 'Last login 27 Sep 10:28 AM'. The main content area is titled 'Product Mapping' and contains three dropdown menus: 'User Type' set to 'Retail User', 'Product Module' set to 'Term Deposits', and 'Product Type' set to 'NRE'. A green 'Search' button is positioned below these menus. To the right, a 'Tips' box with a lightbulb icon states: 'Using this option, You can enable or map products you want to offer to users for creating new Term deposits and Recurring deposits. Simply select the Product module, select the user segment to make changes and save it.' Below the search area is a table with the following structure:

User Type	User Segments	Products Mapped
Retail User	Retail User Gold	Map Products
Retail User	Current Savings	Map Products
Retail User	Current Savings TD Loans	Map Products
Retail User	Current Savings	Map Products
Retail User	Current Savings TD Loans and Payments	Map Products
Retail User	Current Savings and Term Deposits	Map Products
Retail User	customerSegment 1	Map Products
Retail User	Retail segment 1	Map Products
Retail User	Current Savings TD Loans and Payments1	Map Products
Retail User	Current and Savings Account	Map Products
Retail User	customerSegment	Map Products

A 'Cancel' button is located at the bottom left of the table area. The footer of the page reads: 'Copyright © 2006, 2017, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

4. Click **Map Products**.
The **Product Mapping - Create** screen appears.

Note: The **Map Products** link is available only if no products are mapped to the user segment.

Click **OK** to complete the transaction.

FAQs

1. For which type of products, product mapping functionally is available?

As of now, product mapping feature is enabled only for Term Deposit and Recurring Deposit type of products for retail users and Term Deposit for corporate users.

2. Can customer view the account details of an account opened under a product which is not mapped?

Yes, user can view the account details of an account opened under a product which is not mapped. The restriction will only be for opening new account from channel.

3. What will happen once the products mapped gets expired?

The expired products will no longer be available for product mapping. Also customers will not be able to open new accounts using expired product.

4. What will happen if the products are not mapped to any user segment and are only mapped to user type?

In this case, all the products mapped to the user type will be available for account opening to the users associated to that user type.

26. User Profile Maintenance

This function enables the System/Bank Administrator user to manage the user profile details that needs to be shown and needs to be made available for modification for Retail users. Details maintained on user profile includes date of birth, PAN card number, Aadhar number, passport number, national ID, driving license, communication address, email ID, and contact number, fax number, etc.

In a multi entity scenario, Administrator can do this setup for each entity by selecting the entity.

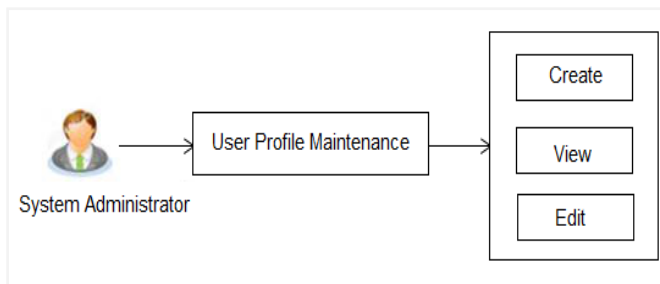

Note: For the business users to be able to modify the 'My Profile' fields, the modification of those fields should be allowed in FCUBS or in the backend Host System.

FCUBS has a separate maintenance for allowing modification of user's details, please make sure that modification of the required user details in enabled (if the FCUBS is configured as a backend system).

Pre-requisites

- User must have a valid Login credentials
- Transaction access is provided to system administrator.
- Approval rule set up for Bank administrator to perform the actions.

Workflow

Features supported in application

The administrator can perform the following actions:

- Create User Profile
- View User Profile
- Edit User Profile

How to reach here:

System/ Bank Administrator Dashboard > Configuration > User Profile Maintenance

26.1 User Profile - Create

It allows System Administrator to setup the user profile details for user type retail, where the administrator can choose which details is to be displayed in his profile like date of birth, PAN card number, Aadhar number, passport number, driving license, communication address, email ID, and phone number, fax number, etc.

To create user profile details:

1. Displays the **User Profile Maintenance** screen, if the user profile is not maintained.
2. Click **Create**.

User Profile Maintenance- Create

Field Description

Field Name	Description
User Type	Displays the user type for whom the user profile is to be created. The user can be: <ul style="list-style-type: none"> • Retail

3. Click **Personal Information**; select the appropriate personal information details from the drop-down that needs to be displayed on the user profile screen.
4. Click **Contact Information**; select the appropriate contact information details from the drop-down that needs to be displayed on the user profile screen.
5. Based on the selection of Personal Information and Contact Information, user details get listed down.
6. Enable the toggle button against each detail to allow the business user to modify those details. If the toggle button is disabled against a field, user will not be able to modify that particular field in his/her profile screen.

Field Description

Field Name Description

Details to be displayed on User Profile

Personal Information Select the personal information that needs to be displayed to user on his profile.

The options are:

- National ID
- Passport
- Driving License
- Aadhar Card Number

27. Payment Purpose Mapping

The customers of the bank initiate various outgoing payments from their accounts using channel banking facility. As per regulations set by Central Bank of various countries, outgoing payments must contain the purpose of payment which needs to be provided by the customer while initiating a transaction. Core banking application /Product Processor maintain various purposes of payments.

System Administrator maps these purposes to each type of payment available through channel banking, which are then made available to the customers for selection while initiating each payment.

Pre-Requisites

- Transaction access is provided to System Administrator.
- Payment purposes are maintained in core banking application.
- All payment types for which the purposes can be maintained are set as day 0.

Workflow

Features Supported In Application

This option allows the System Administrator to:

- Map Purposes
- View Payment Purposes
- Edit Payment Purposes

How to reach here:

System Administrator Dashboard > Payments >Payment Purpose Mapping

OR

System/ Bank Administrator Dashboard > Toggle Menu> Payments >Payment Purpose Mapping

27.1 Payment Purposes - View

System Administrator logs into the system and navigates to the Payment Purpose Mapping maintenance. This screen allows the administrator to search and view payment purposes mapped to payment transactions.

User selects the transaction type to view the mapping; the results are displayed on the same screen.

To search purposes for the payment type:

1. From the **Payment Type** list, select the appropriate option.
2. Click **Search** to search the purposes mapped to selected transaction type.
3. Click **Edit** to make the changes if any. User is directed to the **Payment Purpose Mapping – Edit** screen with values in editable form.
4. Click **Cancel** to cancel the transaction and navigate the user back to **Payment Purpose Mapping - View** screen

Search Purposes

The screenshot displays the 'Payment Purpose Mapping' screen. At the top, the ZigBank logo and user information 'Welcome, Jack Johnson' are visible. The main content area is divided into two columns. The left column features a 'Payment Type' dropdown menu with the text 'Please select' and a downward arrow. Below this is a green 'Search' button. Underneath, the 'Purpose Description' section lists 28 different transaction types, each with an unchecked checkbox. At the bottom of this list are 'Edit' and 'Cancel' buttons. The right column is a grey sidebar containing a blue icon of a calendar and a 'Payment Purpose Mapping' section. This section includes a paragraph explaining the purpose of the mapping, a sub-paragraph about searching and editing, and a 'Map Purposes' button. The footer of the page contains the text: 'Copyright © 2006, 2017, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

Click **Cancel** to cancel the transaction.
6. The success message of payment purpose mapping appears along with the transaction reference number.
7. Click **Done** to complete the transaction and navigate back to 'Dashboard'.

FAQs

1. Who can create-edit this maintenance?

System administrator can create and edit this maintenance.

2. Can I maintain new payment purposes using this option?

No, the payment purposes are maintained in core banking application, only mapping of these purposes to the transaction type can be done using this maintenance.

3. Can customer specify his own purpose of payment while making a payment from channel?

Yes, if 'Other' option is mapped by an administrator to specific transaction type. Customer can select purpose of payment as 'Other', and can specify purpose while initiating a payment.

4. If new purposes are added in the core banking application, will they get mapped automatically to a transaction type for which the existing maintenance is available?

No, System Administrator will have to operationally map these newly added payment purposes to a specific transaction type.

5. Can I edit the payment purpose mapping? How does it impact the transactions?

Yes, administrator can edit the transaction type – payment purpose mapping. The changes will be applicable with an immediate effect. Customers will see the updated list of payment purposes while initiating payment.

6. What happens if the payment purpose code mapped to a transaction type is deleted from the core banking application?

Payment purposes deleted from the core banking application needs to be manually unmapped from a specific transaction type by System Administrator.

28. Payee Restriction Setup

Bank customers add payees or beneficiaries to transfer funds from one account to another. Bank can limit the number of payees that can be added by the retail user in a day.

Payee Restriction set up maintenance allows the System Administrator to restrict the number of payees that a retail user can create for each payment network per day.

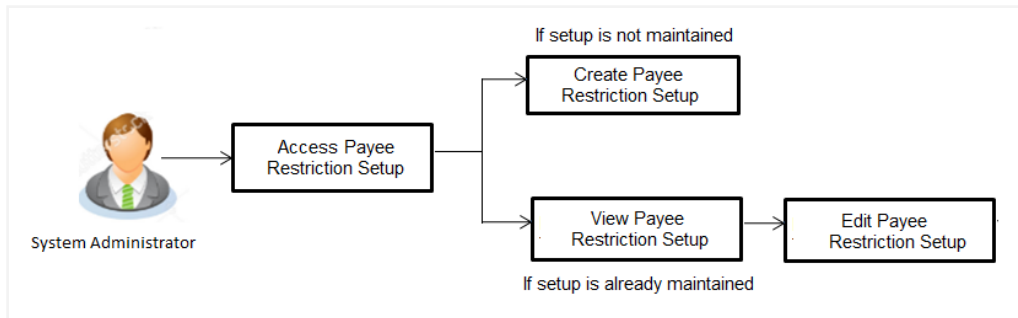

System Administrator can also restrict the total number of payees irrespective of payment network that the retail user can create per day.

Payee restriction setup can be done for a User type and also for a User type and Segment combination.

Prerequisites:

- Transaction access is provided to System Administrator
- Approval rule set up for System Administrator to perform the actions

Workflow

Features supported in Application

Payee Restriction Setup maintenance is created only once at the 'Day 1' configuration by the System Administrator. However it can later be viewed and modified.

This option allows an administrator to:

- Create Payee Restriction Maintenance
- View Existing Maintenance
- Edit Maintenance

How to reach here:

System Administrator Dashboard > Payments > Payee Restrictions
OR

System/ Bank Administrator Dashboard > Toggle Menu > Payments > Payee Restrictions

28.1 Payee Restriction Setup - View

Using this option, administrator can search for particular payee restriction set up based on different search parameters. The search results displays a payee restriction set up based on search filters selected.

System displays the payee restriction set up for the search criteria entered. When System Administrator user is accessing Payee Restriction Set-up for the very first time, the limit set up for payment network type is defaulted to 'No'.

To view payee restriction setup:

1. From the **User Type** list, select the appropriate user whose payee restriction setup to be viewed.
2. From the **User Segment** list, select the appropriate name of segment whose payee restriction setup to be viewed.
3. Click **View**. The **Payee Restriction Setup** screen with payee restriction setup appears.
OR
Click **Cancel** to cancel the process.

Payee Restriction Setup

The screenshot shows the 'Payee Restriction Setup' interface in the ZigBank system. At the top, there is a navigation bar with the ZigBank logo, a search icon, a notification bell with '1439', and a user profile for 'Administrator User' with the last login time '13 Nov 09:17 PM'. The main content area is titled 'Payee Restriction Setup' and contains two dropdown menus: 'User Type' (set to 'Retail User') and 'User Segment' (set to 'Retail User Gold'). Below these are two buttons: 'View' (in green) and 'Cancel' (in grey). To the right, there is a panel titled 'Maintain Payee Restrictions' with a blue icon of a document and a dollar sign. The text in this panel reads: 'Define restrictions on the number of payees that can be added by retail users on a daily basis. This feature enables you to define a daily cumulative payee creation limit that will be applicable across all transactions as well as individual payee creation limits per transaction. Once defined, you can view and edit this maintenance as required.' At the bottom of the page, there is a footer with the text: 'Copyright © 2006, 2017, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

Draft Payee - Payee Restriction	Enable cumulative payee restriction to define the number of payees for international draft payment.
Payees Per Day	Specify the total number of payees that are permitted, if the account payee restriction for international draft payment is enabled. Field will not be displayed if International Draft - Payee Restriction for Domestic Payment is disabled.

5. In the **Cumulative Payee Restriction/ Account Payee - Payee Restriction/ Draft Payee - Payee Restriction** field, select the appropriate option.
 - a. If user select **Yes** option:
 - i. Edit the values in **Total number of Payees permitted per day** or **Payees Per Day** field.
OR
Click  or  to increase or decrease the values.
 - b. If user select **No** option:
 - i. Fields Total Number of payees per day and Payees per day are not displayed for respective payment type.
6. Select the transactions whose details you want to define.
7. Click **Save** to save the changes made to the payee restriction set up. The message box informing that the changes will be effective next day appears.
OR
Click **Cancel** to cancel the operation and navigate back to 'Dashboard'.
OR
Click **Back** to navigate back to previous screen.
8. The **Payee Restriction Set-up– Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Cancel** to cancel the operation.
The success message of Payee Restriction Set-up creation appears along with the transaction reference number.
OR
Click **Back** to navigate back to previous screen.
9. Click **OK** to complete the transaction and navigate back to 'Dashboard'.

FAQs

1. **Will edited maintenance be applicable from immediate effect?**
No, edited maintenance will be applicable from next calendar date.
2. **What happens if the user's cumulative payee limit for a day is fully utilized but network for which he is creating a payee is available?**
System will first check the availability of cumulative payee limit. If available, will check network level payee availability limit. If both the conditions are met, user is allowed to create a payee.
3. **Is this maintenance is also applicable for corporate type of users?**
No, currently this maintenance is applicable only to Retail Users.

29. Biller Category Maintenance

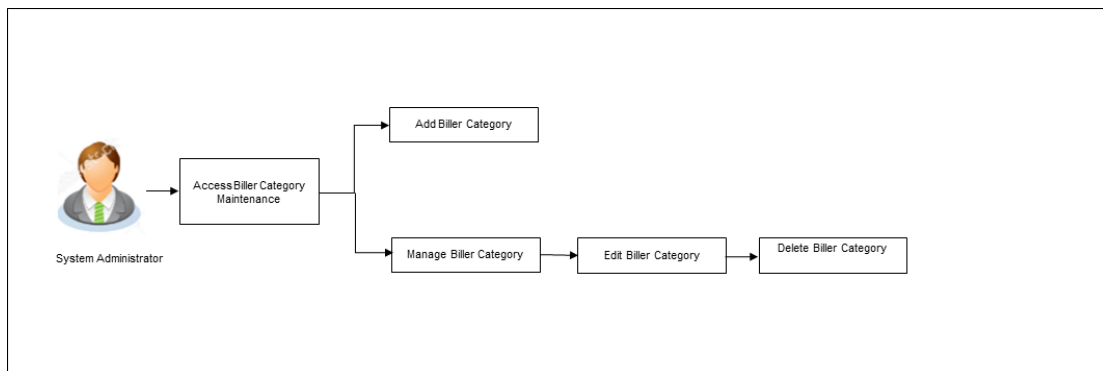

Using this function System Administrator can create new biller categories and can upload an image (image file type allowed SVG & PNG only) for that biller, which will appear as icon for these categories. These categories are mapped to billers when system administrator is creating billers. E.g. administrator can create biller category as 'Insurance' and link this Biller Category when creating Insurance billers like 'United Healthcare' and 'Healthspring' and 'WellCare Health Plans'.

The System administrators can change the order of the categories as per their priority by dragging the categories. In the Biller Category drop-down these categories appear in the same order for selection to the customers, as defined by the administrators.

Pre-Requisites

- Transaction access is provided to System Administrator.
- Approval rule set up for System Administrator to perform the actions.

Workflow

Features Supported In Application

This option allows the System Administrator to:

- Manage Biller Category
- Add Biller Category
- Edit Biller Mapping Category
- Delete Biller Category

How to reach here:

System Administrator Dashboard > Payments > Biller Category Maintenance

OR

System/ Bank Administrator Dashboard > Toggle Menu > Payments > Biller Category Maintenance

29.1 Biller Category Maintenance - Summary

Billers Category Maintenance screen displays a list of all the billers along with the biller icon and number of billers mapped to the selected biller category.

Billers Category Maintenance - Summary

Biller Icon	Biller Category	Mapped Billers			
	Entertainment	9			
	Electricity2	7			
	Internet	4			
	Water2	6			
	DTHN	6			
	Telecom	3			
	Investments	4			
	Education	4			
	Doctor1	0			
	AircelNew	0			
	Utility	0			
	NewCat01	0			
	sjTestCategory1	1			

Create and Maintain Category

Add Category
Create new categories and map billers here. When creating new billers of bill payment, if you cannot find the ideal category to map then new categories can be created here.

Category Icon
An icon also needs to be updated at the time of creating a category. This icon will be displayed to customer in bill payment screens.

Update Priority
The order in which the customers see categories in Biller category dropdown will be as set here. You can re-arrange the order by selecting and dragging a category up or down.

[Add Category](#)

[Back](#)

Field Description

Field Name	Description
Biller Icon	The image associated with the category. Displays the preview of the image uploaded for the category.

Field Name **Description**

Billers Category The name of the biller category.

Mapped Billers The number of billers mapped to the category at a given point of time.

1. Click the **Add Category** link to add a new biller category.
OR
Click  to edit the biller category.
OR
Click  to delete existing biller category.
OR
Click the **Back** to navigate to the previous screen.

29.2 Biller Category Maintenance - Add Category

Using this option, the System Administrator can add a new biller category.

To add a new biller category:

1. In the **Biller Category Maintenance** screen, click the **Add Category** link to add a new biller category. The **Biller Category Maintenance** screen with a row to add new category appears.

Biller Category Maintenance - Edit Category

Field Description

Field Name	Description
Billers Icon	The image associated with the category. Displays the preview of the image uploaded for the category.
Billers Category	The name of the biller category. Category name should be unique. Category name entered here will appear as a Billers Category drop-down to the customers screens.

2. Click the **Billers Icon** field, select and upload the biller image. OBAPI provides a set of icons for categories out of the box. These image files have to be copied to the user's local drive before selection. Alternatively user can select his own icon images as long as they are in SVG or PNG format.
3. In the **Billers Category** field, enter the name of the biller category.
4. Click .
OR
Click  to cancel the transaction.
OR
Click the **Remove** link to remove the uploaded image and upload a new biller image.
5. The success message of saving the biller category appears along with the status and reference number.
Click **OK** to complete the transaction.

29.3 Billers Category Maintenance - Edit Category

System Administrator can modify the existing biller category using this screen.

To edit a biller category:

1. In the **Billers Category Maintenance** screen, select and click  against the record for which you want to edit the biller category. The **Billers Category Maintenance** screen appears in the editable form.

Billers Category Maintenance - Edit Category

2. In the **Biller Icon** field, click the **Remove** link to remove the uploaded image and upload a new biller image, if required.
3. In the **Biller Category** field, edit the name of the biller category, if required.
4. Click .
OR
Click  to cancel the transaction.
5. The success message of saving the biller category appears along with the status and reference number. Click **OK** to complete the transaction.
6. Click and drag  against a record to re-arrange the biller categories, if required.

29.4 Biller Category Maintenance - Delete

Using this option the system administrator can delete a biller category. As part of this option, only those biller category can be deleted if there are no billers mapped to the existing biller category.

To delete a biller category:

1. In the **Biller Category Maintenance** screen, select and click  against the record for which you want to delete the biller category. The application prompt the administrator with a message 'Are you sure you want to delete the category' with an option of Yes / No.

Biller Category Maintenance - Delete

2. Click **Yes** to proceed with the deletion request.
It will navigate to confirmation page with a success message along with the status and reference number.
OR
Click **No** if you do not wish to proceed with deletion.
3. Click **OK** to complete the transaction.

FAQs

1. Who can create-edit this maintenance?

System Administrator can create and edit this maintenance.

2. Can I link a biller to multiple biller categories?

No, one biller can be linked only to one biller category.

3. Can I delete a biller category which is having billers mapped to it?

No, biller category can only be deleted if no billers are mapped to a category.

4. Can I change the icon image associated with a category?

Yes, you can change the image as long as the new images are in PNG or SVG format.

5. If I change the order of the categories, how long does it take to come into effect in the system?

The change happens in real time (or after checker approves the change). You will start seeing the revised order of categories in all Biller Category drop-downs immediately.

30. Forex Deal Maintenance

Using this option System Administrator can maintain currency pair. The maintained currency pairs are made available to corporate users to book deals and utilize those while making payments.

Features supported in application

Using this option System Administrator can perform the following actions:

- Maintain currency Pair

How to reach here:

System Administrator Dashboard > Payments> Forex Deal Maintenance

OR

System/ Bank Administrator Dashboard > Toggle Menu > Payments> Forex Deal Maintenance

30.1 Add Currency Pairs

Using this option System Administrator can define currency pairs.

To add currency pair:

1. From the **Currency Pair** list, select the appropriate currency pair.
2. Click **Add** to add the currency pair.

Forex Deal Maintenance - Create

The screenshot displays the 'Forex Deal Maintenance - Create' interface. At the top, there is a navigation bar with the ZigBank logo and user information. The main content area is divided into two sections. On the left, under 'Add Currency Pair Details', there is a dropdown menu for 'Currency Pair' with the text 'Please Select' and an 'Add' button. Below this is a table titled 'Selected Currency Pairs' with columns for 'Currency Pair' and 'Action'. The table contains one entry: 'GBP - INR' with a trash icon in the 'Action' column. At the bottom of the table, there is a pagination control showing 'Page 1 of 1 (1 of 1 items)' and a 'Save' button. On the right side, there is a 'Note' box with a calendar icon and text explaining that admin users can choose from suggested options and that a timer can be set for each currency pair. An 'Edit Active Pairs' button is located at the bottom of the note box.

Field Description

Field Name	Description
------------	-------------

Add Currency Pair Details

Currency Pair	List of the permissible currency combinations in which corporate user can book a deal.
----------------------	--

Selected Currency Pairs

Field Name	Description
Currency Pair	The maintained currency pair for corporate users.
Action	Allows user to maintain i.e. delete the selected currency pairs.

3. The Currency pair gets added in the **Selected Currency Pairs** section.

4. Click  to delete the added currency pair.

5. Click **Save** to save the changes.

OR

Click **Cancel** to cancel the transaction.

30.2 Update Forex Deal

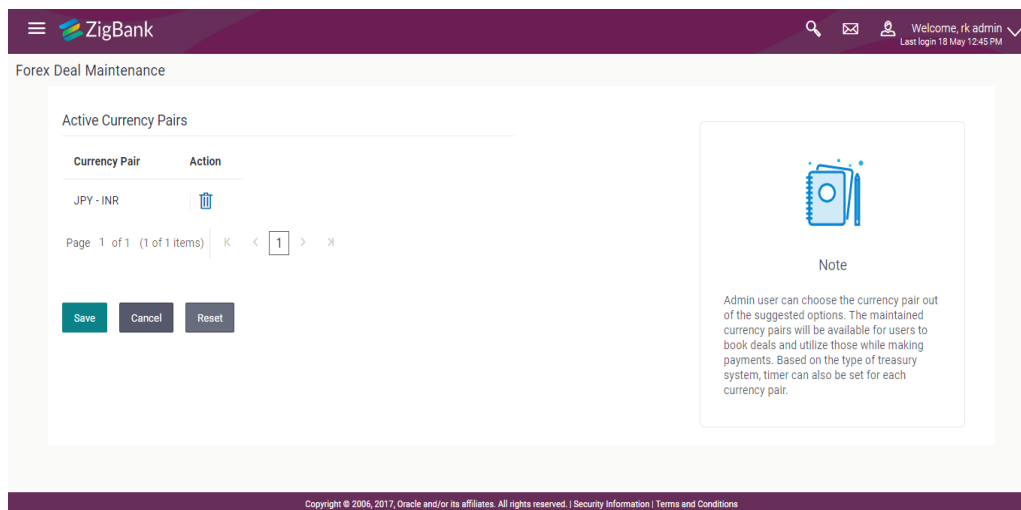

Using this option, System Administrator can modify active currency pairs maintained in the application. System Administrator can delete the existing maintained currency pair.

To update forex deal:

1. Click **Edit**.

The list of active currency pairs maintained in application appears.

Forex Deal Maintenance- Edit

The screenshot displays the 'Forex Deal Maintenance - Edit' page in the ZigBank application. At the top, there is a navigation bar with the ZigBank logo and user information: 'Welcome, rk admin' and 'Last login: 18 May 12:45 PM'. The main content area is titled 'Forex Deal Maintenance' and contains a section for 'Active Currency Pairs'. This section features a table with two columns: 'Currency Pair' and 'Action'. The table lists one entry: 'JPY - INR' with a trash icon in the 'Action' column. Below the table, there is a pagination control showing 'Page 1 of 1 (1 of 1 Items)' and navigation arrows. At the bottom of the table area, there are three buttons: 'Save', 'Cancel', and 'Reset'. To the right of the table, there is a 'Note' box with a blue icon of a notepad and a pencil. The note text reads: 'Admin user can choose the currency pair out of the suggested options. The maintained currency pairs will be available for users to book deals and utilize those while making payments. Based on the type of treasury system, timer can also be set for each currency pair.' The footer of the page contains the text: 'Copyright © 2006, 2017, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

Field Description

Field Name	Description
Active Currency Pairs	
Action	Allows user to maintain i.e. delete the existing currency pairs.

2. Click  to delete the selected currency pair.
3. Click **Save** to save the changes.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Reset** to clear the entered details.

31. Biller Category Maintenance- Integrated

The customers of the Bank initiate bill (utility) payments from their accounts using channel banking facility by selecting billers maintained by the Bank. Core banking applications/Product Processor maintains various billers. Using biller category mapping maintenance, System Administrators can map a biller category to each biller maintained in the core banking application.

System Administrator creates biller category and maps these billers to each type of biller category through channel banking, which are then made available to the customers for selection while initiating bill payment. E.g. administrator can create biller category as 'Insurance' and map 'United Healthcare' and 'Healthspring' and 'WellCare Health Plans' billers which are fetched from the core banking application system to biller category 'Insurance' which is created in channel banking application.

Note: This function is applicable for Bill payment feature integrated with UBS or FCR as host system.

Pre-Requisites

- Transaction access is provided to System Administrator.
- Billers are maintained in core banking application.

Workflow

Features Supported In Application

This option allows the System Administrator to:

- Manage Biller Category
- Map Billers
- View Biller Mapping
- Edit Biller Mapping

How to reach here:

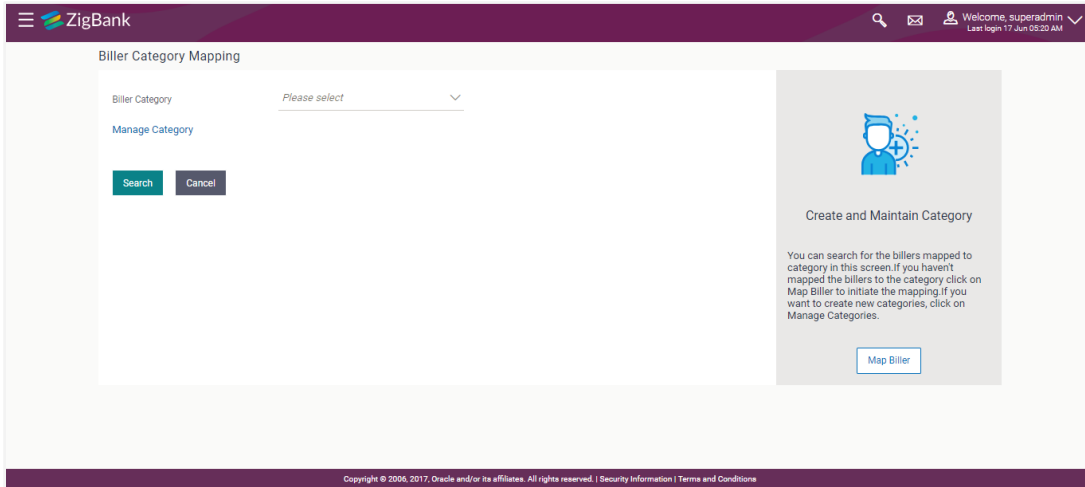

System Administrator Dashboard > Payments > Biller Category Maintenance- Integrated
OR

System/ Bank Administrator Dashboard > Toggle Menu > Payments > Biller Category Maintenance- Integrated

31.1 Search Biller

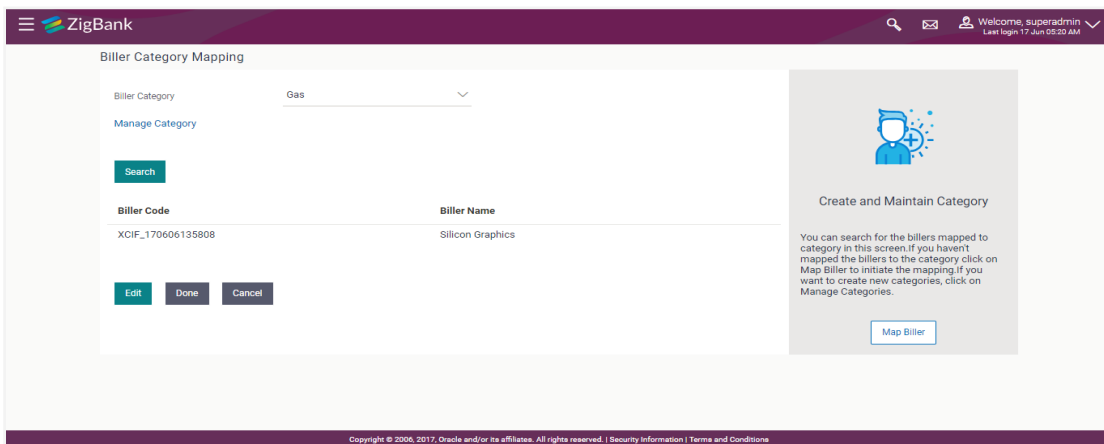

Using this option, System Administrators search the billers mapped under the selected biller category. The search result displays a list of particular biller along with the biller code mapped to the selected biller category.

Search Biller

1. Click **Search**, to search the billers mapped to selected biller category.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Map Biller**, to map new billers to existing biller category.
OR
Click **Manage Category**, to maintain new biller categories, edit and delete existing biller.

Biller Category Mapping- Search Result

Field Description

Field Name	Description
Search Biller Category	
Biller Category	The name of the biller category.
Search Result	
Biller Code	The unique biller code of the biller.
Biller Name	The name of the biller.

To search biller mapped under biller category:

2. From the **Biller Category** list, select the appropriate option.
3. Click **Search**.
The search result appears based on the search parameters.
4. Click **Done** to complete the transaction.
OR
To edit biller, click **Edit**.
The billers mapped under selected biller category appear.
 - c. To delete a biller, click . The **Delete Warning** message appears.
 - ii. Click **Confirm** to delete the biller.
 - iii. The success message of biller category deletion appears.
 - d. Click **Done** to complete the transaction.
OR
Click on **Back** to go back to previous screen.

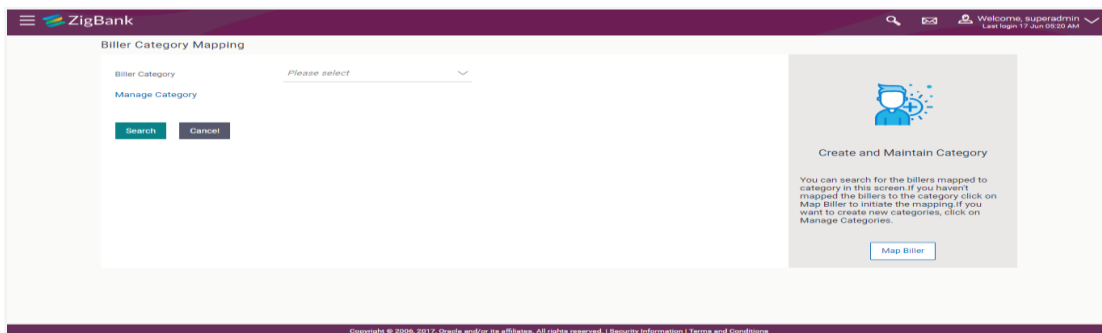

31.2 Map Biller

Using this option, the System Administrator can map one or more biller to the biller category.

To map a biller:

1. In the **Biller Category Mapping** screen, click **Map Biller**. The screen appears.

Map Biller

Field Description

Field Name	Description
Biller Category	The biller category.
Biller Information	The unique biller code of the biller to be mapped with the selected biller category. This field appears, if you select Biller Category .

2. From the **Biller Category** list, select the appropriate option.
3. From the **Biller Information** list, select the appropriate biller code to be mapped with the selected biller category.

Note:

- 1) Click **Add more** to add multiple biller for mapping.
- 2) Click  to delete added biller.

4. Click **Map**.
5. The **Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Cancel** to cancel the transaction.
6. The success message of biller mapped to a biller category appears.
7. Click **OK** to complete the transaction.

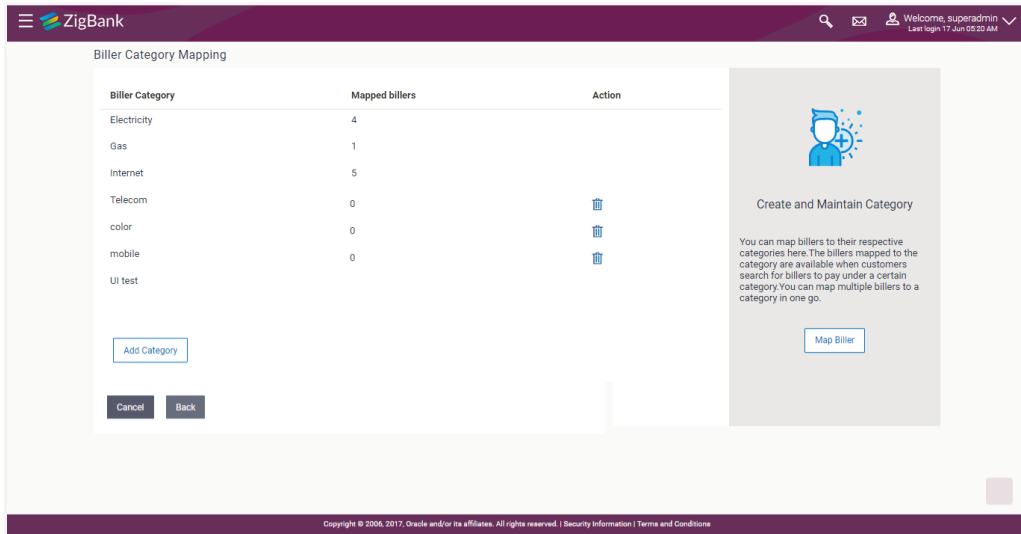

31.3 Manage Category- View

System Administrator can view and create new biller category using this maintenance. The existing biller categories with respective number of mapped billers appear on Manage Categories screen.

To view biller category:

1. Click **Manage Category** link on **Biller Category Mapping** screen.
2. The existing biller categories with respective mapped billers appear on **Manage Categories** screen.

Manage Biller Category- View

Field Description

Field Name	Description
------------	-------------

View

Biller Category Existing biller categories maintained are listed.

Mapped Billers Number of billers mapped to the existing biller category.

Note: This field will not be displayed for newly added category.

3. Click **Add Category** to add new category. A box will be shown to enter a new category.
4. Click **Done** to complete the transaction.
5. Click  adjacent to already added biller category. The **Delete Warning** message appears.
Click **Confirm** to delete the category.

31.4 Manage Category- Add Category

System Administrator can create new category using this screen.

To add new biller category:

1. Click **Manage Category** link on **Biller Category Mapping** screen to maintain new biller categories, edit and delete existing biller categories.
2. The existing biller categories with respective mapped billers appear on **Manage Categories** screen.
3. Click **Add Category** to add new category. A box will be shown to enter a new category.

Manage Biller Category

Field Description

Field Name	Description
View	
Biller Category	Existing biller categories maintained are listed.
Mapped Billers	Number of billers mapped to the existing biller category. Note: This field will not be displayed for newly added category.
Box(Biller Category)	Empty box to enter a new biller category is displayed on clicking upon 'Add Category'.

- a. If you click **Add Category**.
 - i. In the **Biller Category** field, enter a new category.
 - ii. Click **Save** to confirm the category addition. The success message of category addition appears on the screen.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to the previous screen.
 - iii. The success message of biller category added appears.
 - iv. Click **Done** to complete the transaction.
- b. If you click  adjacent to already added biller category. The **Delete Warning** message appears.
This icon will be shown only if the billers are not mapped under a category.

- i. Click **Delete** to delete the category.
OR
Click **Cancel** to cancel the transaction.
- ii. The success message of biller category deletion appears.

FAQs

1. Who can create-edit this maintenance?

System Administrator can create and edit this maintenance.

2. Can I link a biller to multiple biller categories?

No, one biller can be linked only to one biller category.

3. Can I delete a biller category which is having billers mapped to it?

No, biller category can be deleted only if no billers are mapped to a category.

4. Will a biller get auto removed from biller-category mapping when biller gets deleted from the core banking application?

No, biller deleted from the core banking application needs to be removed operationally from biller category mapping.

5. Can customers make online payments for biller which is available in core banking application but is not mapped to any biller category on channel banking platform?

Customers can make payments only to the billers which are available in core banking application and for which the biller category mapping is available on channel banking platform.

32. Network Preference Maintenance

Network suggestion is a feature that is provided to retail and corporate users as part of the domestic transfer (India region) offering. If domestic transfer network suggestion is enabled in system configuration, when a business user initiates a domestic transfer, the system will identify which networks (NEFT, IMPS or RTGS) are supported for the transfer based on certain factors such as payee bank support of networks, network limits and working window maintenance. The system will also suggest a network, out of the enabled networks, based on the preferences defined for each domestic network by the administrator from the Network Preference Maintenance screen.

Once defined, the administrator can also modify this network preference.

Pre-Requisites

- Transaction access is provided to the administrator.

Features Supported In Application

This option allows the System Administrator to:

- View Network Preference Maintenance
- Edit Network Preference Maintenance

How to reach here:

System Administrator Dashboard > Payments > Network Preference Maintenance

OR

System/ Bank Administrator Dashboard > Toggle Menu > Payments > Network Preference Maintenance

32.1 Network Preference Maintenance - View

This screen allows the System Administrator to view the domestic network preference maintenance.

To view the network preference maintenance:

1. Navigate to the Network Preference Maintenance screen.

Network Preference Maintenance - View

The screenshot shows the 'Network Suggestion Configuration' page in the ZigBank system. The page title is 'Network Suggestion Configuration'. Under the 'Network Preference Definition' section, there is a table with two columns: 'Resolved Networks' and 'Priority'. The table lists three networks: IMPS with priority 1, NEFT with priority 2, and RTGS with priority 3. Below the table are 'Edit' and 'Cancel' buttons. To the right of the table is a 'Note' box with a calendar icon and text: 'Identify the priority to be assigned to each domestic transfer network. This priority will be considered while resolving suggested networks during Domestic Funds Transfers.' The top navigation bar includes the ZigBank logo, a search icon, a notification icon with '1349', and a user profile for 'Administrator User' with a last login of '26 Oct 04:06 PM'. The footer contains copyright information: 'Copyright © 2006, 2017, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

Resolved Networks	Priority
IMPS	1
NEFT	2
RTGS	3

Network Preferences – View (When Priority has not been set)

The screenshot shows the 'Network Suggestion Configuration' page in the ZigBank system. The page title is 'Network Suggestion Configuration'. Under the 'Network Preference Definition' section, there is a table with two columns: 'Resolved Networks' and 'Priority'. The table lists three networks: NEFT, RTGS, and IMPS, all with a dash '-' in the priority column. Below the table are 'Edit' and 'Cancel' buttons. To the right of the table is a 'Note' box with a calendar icon and text: 'Identify the priority to be assigned to each domestic transfer network. This priority will be considered while resolving suggested networks during Domestic Funds Transfers.' The top navigation bar includes the ZigBank logo, a search icon, a notification icon with '1469', and a user profile for 'Administrator User' with a last login of '21 Nov 12:31 PM'. 33. Touch Point Maintenance

Touch points are different channels/medium through which transactions or inquiries can be performed in OBAPI.

Touch points in OBAPI are of type 'Internal' and 'External'.

Internal Touch points are defined as part of Day 0 definition whereas External Touch Points are typically third party applications that can be defined by the System Administrator as part of onboarding in OBAPI.

Internal Touch Points defined/available as parts of OBAPI system are as follows:

- Internet
- Mobile App
- Mobile Browser
- SMS
- Missed Call
- Siri/Chatbot
- Snapshot
- Wearables

External Touch Points enable the user to perform inquiries and transactions from Third Party applications provided the user has provided consent to the Third Party Application. Each Third Party application i.e. Client defined on the OAuth Server is onboarded as an External Touch Point.

As part of Touch Point Maintenance, Touch Points can be defined/created, viewed/inquired and modified by the System Administrator

Prerequisites

- Transaction Access has been provided to the System Administrator
- Approval Rules have been setup for approval of Touch Point Maintenance

Workflow

Features supported in application

The administrator can perform the following actions:

- Search/ View Touch Point
- Create Touch Point
- Edit Touch Point

How to reach here:

System Administrator Dashboard > Access Policies > Touch Points

OR

System/ Bank Administrator Dashboard > Toggle Menu > Authorization and Access Controls > Touch Points

33.1 Touch Point Maintenance - View

Using this option, System Administrator can search and view details for specific touch point based on different search parameters like Touch Point ID or Touch Point name.

To search and view touch point:

1. In the **Touch Point Maintenance** screen, enter the search parameters and click **Search**. The **Touch Point Maintenance** screen with search results appears based on the search criteria.
OR
Click **Cancel** if you want to cancel the transaction.
OR
Click **Clear** to reset the search parameters.

Touch Point Maintenance - Search

The screenshot displays the 'Touch Point Maintenance' search interface. At the top, there are search filters for 'Touch Point Id' and 'Touch Point Name' (containing the letter 'a'). Below the filters are 'Search' and 'Clear' buttons. The main area shows a table of results:

Touch Point Name and ID	Touch Point Type
Mobile Application APMOBAPP	Internal
Siri/Chatbot APSRICHATBOT	Internal
SMS Banking APSMSBANKING	Internal
Voice Assistant Banking APVOICEAST	External
Snapshot APSNAPSHOT	Internal
Missed Call Banking APMISCALBANKING	Internal
Wearables APWEARABLE	Internal

At the bottom of the table, it indicates 'Page 1 of 1 (1-7 of 7 items)' with navigation arrows. A 'Cancel' button is located at the bottom left. On the right side, there is a sidebar titled 'Create and Maintain Touch Point' with a 'Create' button and explanatory text about touch points.

Field Description

Field Name	Description
------------	-------------

Touch Point ID	Specify the touch point ID to search a specific Touch point by ID.
-----------------------	--

Field Name	Description
Touch Point Name	Specify the touch point name to search a Touch point by name.
Search Results	
Touch Point Name and ID	Displays the touch point name and unique ID defined for a Touch point.
Touch Point Type	Displays the touch point type i.e. internal/ external against the Touch points.

2. Click the **Touch Point Name and ID** link to view details of the touch point. The **Touch Point Maintenance - View** screen appears.

Touch Point Maintenance - View

The screenshot shows the 'Touch Point Maintenance - View' screen in the ZigBank application. The header includes the ZigBank logo, a search icon, a notification icon with '1267', and a user profile for 'Welcome, Administrator User' with a last login of '03 Oct 10:59 AM'. The main content area is titled 'Touch Point Maintenance' and contains the following fields and controls:

- Touch Point Id:** APMOBAPP
- Touch Point Name:** Mobile Application
- Touch Point Type:** Radio buttons for INTERNAL (selected) and EXTERNAL.
- Client Id:** 2d79e939e0424mobapp8e5fab436fb5581

- Skip First Time Login Flow:** Toggle switch (OFF)
- Consent Required:** Toggle switch (OFF)

At the bottom of the form are three buttons: 'Edit' (green), 'Cancel' (grey), and 'Back' (grey). To the right of the form is a box titled 'Create and Maintain Touch Point' with an icon of a smartphone and the following text: 'Touch Points are different channels through which the OBDX services can be accessed. Touch Points could be internal like Internet, Mobile, SMS etc and it could also be third party applications i.e. vendor/partners accessing application resources provided OBDX user has given consent to the third party.'

At the bottom of the screen, there is a footer: 'Copyright © 2006, 2017, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'

Field Description

Field Name	Description
Touch Point ID	Unique ID defined for the Touch Point.
Touch Point Name	Name of the touch point.
Touch Point Type	Type of touch point i.e. whether touch point is of type internal or external.

Field Name	Description
Client ID	Client ID of the touch point if touch point is of type internal or external.
Scope	The applicable scope(s) defined for touch point in case of type External .
Upload Logo	The logo of the Third Party. This field is displayed if the Touch Point Type is External .
Touch Point Status	Status of the Touch Point i.e. whether it is Inactive or Active. If touch point is marked as Inactive, then the system will not honor the request i.e. transaction or inquiry is initiated from that touch point.
Headless Mode	Mode in which the touch point operates i.e. headless mode enabled / disabled. If headless mode is enabled, it means the touch point is capable of working without user interface and session parameters <hr/> Note: By default, the mode is in disabled state. <hr/>
Two Factor Authentication	Two Factor Authentication enabled / disabled for the touch point.
Default Available	Touch point default available to users. If enabled, then the user gets access to touch points which are default available.
Self On Board Touch Points	Whether the user can self on board himself on the touch point or by bank administrator.
Skip First Time Login Flow	Displays if Skip First Time Login Flow option is checked by the user. If this option is enabled for the selected touch point, user will not be shown the first time login steps (configured in system rule), when he/she logs in for the first time.
Consent Required	To decide if Consent definition and validation is required for a Touch Point i.e. TPPs. For UK Open Banking, it should always be defined as 'Y'.

3. Click **Edit** to modify touch point details.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate back to previous screen.

33.2 Touch Point Maintenance - Edit

Using this option, System Administrator can modify the details of a touch point

To modify touch point details:

1. In the **Touch Point Maintenance** screen, enter the search parameters and click **Search**. The **Touch Point Maintenance** screen with search results appears based on the search criteria.

- OR
Click **Cancel** to cancel the transaction.
OR
Click **Clear** to reset the search parameters.
2. Click the **Touch Point Name and ID** link to view details of the touch point. The **Touch Point Maintenance - View** screen appears.
 3. Click **Edit** to modify the touch point details.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate back to previous screen.

Touch Point Maintenance - Edit

The screenshot displays the 'Touch Point Maintenance - Edit' interface. The form contains the following fields and controls:

- Touch Point Id:** APOBAPP
- Touch Point Name:** Mobile Application
- Touch Point Type:** Radio buttons for INTERNAL (selected) and EXTERNAL.
- Client Id:** 2d79e939e0424mobapp8e5fab436fb5581
- Touch Point Status:** Toggle switch (ON)
- Headless Mode:** Toggle switch (OFF)
- Two Factor Authentication:** Toggle switch (ON)
- Default Available:** Toggle switch (ON)
- Self On Board Touch Points:** Toggle switch (OFF)
- Skip First Time Login Flow:** Toggle switch (OFF)
- Consent Required:** Toggle switch (OFF)

At the bottom of the form are three buttons: **Save**, **Cancel**, and **Back**. On the right side, there is a sidebar with a blue icon of a mobile device and the heading 'Create and Maintain Touch Point'. Below this heading is a text box explaining that touch points are different channels for OBDX services, which can be internal (Internet, Mobile, SMS) or third-party applications (vendor/partner access).

Field Description

Field Name	Description
Touch Point ID	Displays the Unique ID for the Touch Point and cannot be modified.
Touch Point Name	Displays the name of the touch point. The same can be modified.
Touch Point Type	Displays the type of touch point i.e. whether touch point is of type internal or external. The same can be modified

Field Name	Description
Client ID	Displays the Client ID of the touch point if touch point is of type External. The same can be modified. This field is mandatory for External type of touch point.
Scope	Displays the applicable scope(s) defined for touch point in case of type External. The same can be modified i.e. new scopes can be added and/or existing can be removed.
Upload Logo	The logo of the Third Party. This field is displayed if the Touch Point Type is External .
Touch Point Status	Displays the status of touch point. The same can be modified to enable to an active state or disable to make it inactive.
Headless Mode	Displays the mode in which the touch point operates i.e. headless mode enabled / disabled. The same can be modified to enable/disable the mode
Two Factor Authentication	Displays if Two Factor Authentication is enabled/disabled for the touch point. The same can be modified.
Default Available	Displays if Touch point is available to users by default. If enabled, then the user gets access to touch points which are default available.
Self On Board Touch Points	Displays if Touch point can be on boarded by the user. The same can be modified.
Skip First Time Login Flow	Displays if Skip First Time Login Flow option is checked by the user. If this option is enabled for the selected touch point, user will not be shown the first time login steps (configured in system rule), when he/she logs in for the first time. The same can be modified.
Consent Required	To decide if Consent definition and validation is required for a Touch Point i.e. TPPs. For UK Open Banking, it should always be defined as 'Y'. The same can be modified.

4. Modify the required details, e.g. Touch Point Name, Touch Point Type, Client ID, Scope, Logo, Touch Point Status, Headless Mode, Two Factor Authentication, Default Available and Self On board Touch Points.
5. Click **Save** to save the touch point details.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate back to previous screen.
6. The **Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Cancel** to cancel the transaction.

OR
Click **Back** to navigate back to previous screen.

- The success message of Touch Point Maintenance saved successfully appears along with the transaction reference number.
Click **OK** to complete the transaction.

33.3 Touch Point Maintenance - Create

Using this option, System Administrator can create new touch point of type Internal or External

To create a touch point:

- In the **Touch Point Maintenance** screen, click **Create**. The **Touch Point Maintenance - Create** screen appears.

Touch Point Maintenance - Create

The screenshot shows the 'Touch Point Maintenance - Create' interface. The form fields are as follows:

- Touch Point Id: EXT01
- Touch Point Name: Third Party Application
- Touch Point Type: INTERNAL EXTERNAL
- Client Id: xyz1234
- Scope: Account Balance Inquiry x |
- Upload Logo: [Icon]
- Touch Point Status:
- Headless Mode:
- Two Factor Authentication:
- Self On Board Touch Points:
- Skip First Time Login Flow:
- Consent Required:

Buttons at the bottom: Save, Cancel, Back.

Informational box on the right: **Create and Maintain Touch Point**
Touch Points are different channels through which the OBDX services can be accessed. Touch Points could be internal like Internet, Mobile, SMS etc and it could also be third party applications i.e. vendor/partners accessing application resources provided OBDX user has given consent to the third party.

Field Description

Field Name	Description
Touch Point ID	Specify the unique ID for the Touch Point.
Touch Point Name	Specify the name for the Touch Point.

Field Name	Description
Touch Point Type	Select the type of Touch point type i.e. whether the type is Internal or External
Client ID	Specify the Client ID for the touch point. This field is mandatory for External Type of Touch point.
Scope	Specify the applicable scope(s) for the touch point. This field is enabled, if you select External option in the Touch Point Type field.
Upload Logo	Upload logo of the Third Party Provider through browse and upload image option. This field is enabled, if you select External option in the Touch Point Type field.
Touch Point Status	Select the status for the touch point i.e. whether it is active/inactive.
Headless Mode	Select the mode in which the touch point operates i.e. whether headless mode is to be enabled for a touch point. <hr/> Note: By default this mode is in disabled state. <hr/>
Two Factor Authentication	Select if Two Factor Authentication is required for a touch point.
Default Available	Select if Touch point is to be default made available to users. If enabled, then the user gets access to touch points which are default available
Self On Board Touch Points	Select if user will self on board himself on the touch point or by the bank administrator. If the bank administrator on boards the user on a touch point, then the same needs to be disabled.
Skip First Time Login Flow	Select if user wants to skip the first time login flow for a touch point. If this option is enabled for the selected touch point, user will not be shown the first time login steps (configured in system rule), when he/she logs in for the first time.
Consent Required	Select if user wants Consent definition and validation is required for a Touch Point i.e. TPPs. For UK Open Banking, it should always be defined as 'Y'.

2. In the **Touch Point ID** field, enter the unique ID for the touch point.
3. In the **Touch Point Name** field, enter the name for touch point.
4. In the **Touch Point Type** field, select the appropriate option i.e. Internal or External.
5. In the Client ID field, enter the client ID
 - a. If you select **External**;
 - i. Click **Scope**; select the appropriate scope from the drop-down.

- ii. Click on upload icon to upload a logo for the external type of touch point.
6. Click the **Touch Point Status** toggle to enable it to mark the touch point 'Active'.
7. Click the **Headless Mode** toggle to enable the touch point in headless mode.
8. Click the **Two Factor Authentication** toggle to enable 2FA for a touch point.
9. Click the **Default Available** toggle to make the touch point available to users by default in case of self-onboarding.
10. Click the **Self On board Touch Point** toggle if the user will self-onboard himself on the touch point and not by bank administrator.
11. Click the **Skip First Time Login Flow** toggle if the user wants to skip it for touch point.
12. Click **Save** to save the Touch Point details.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate back to previous screen.
13. The **Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate back to previous screen.
14. The success message of touch point creation successfully appears along with the transaction reference number.
Click **OK** to complete the transaction.

34. Touch Point Group Maintenance

Touch points are different channels e.g. Internet, Mobile, SMS, Third Party applications etc. through which the OBAPI services can be accessed. This maintenance enables the System Administrator user to group two or multiple touch points together for the purpose of defining common limits for a transaction accessed from any Touch point grouped together.

Further this maintenance facilitates user to view and modify the touch point groups.

Prerequisites

- Transaction access is provided to system administrator.
- Approval rule set up for system administrator to perform the actions.
- Multiple touch points are maintained.

Workflow

Features supported in application

The administrator can perform the following actions:

- Create Touch Point Groups
- Search/ View Touch Point Groups
- Edit Touch Point Groups

How to reach here:

System Administrator Dashboard > Access Policies > Touch Point Groups

OR

System/ Bank Administrator Dashboard > Toggle Menu > Authorization and Access Controls > Touch Point Groups

34.1 Touch Point Group Maintenance - View

Using this option, System Administrator can search and view details for particular touch point groups based on different search parameters like group code and/or group description.

To search and view touch point group:

1. In the **Touch Point Group Maintenance** screen, enter the search parameters and click **Search**.
The **Touch Point Group Maintenance** screen with search results appears based on the search criteria.
OR
Click **Cancel** to cancel the search process.
OR
Click **Clear** to reset the search parameters.

Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate back to previous screen.

Touch Point Group Maintenance - Edit

The screenshot displays the 'Touch Point Group Maintenance - Edit' interface. At the top, the ZigBank logo and user information 'Welcome, Administrator User' are visible. The main content area is divided into several sections:

- Group Code:** 001
- Group Description:** Internal Access Point Group for All
- Touch Point Group Type:** Radio buttons for 'Internal' (selected) and 'External'.
- Touch Points:** A list of touch points with checkboxes:
 - Internal (checkbox)
 - Mobile Application (checked)
 - Mobile (Responsive) (checked)
 - Internet (checked)
 - Missed Call Banking (checked)
 - SMS Banking (checked)
 - Wearables (checked)
 - Snapshot (checked)
 - Siri/Chatbot (checked)

At the bottom left, there are three buttons: 'Save' (highlighted in green), 'Cancel', and 'Back'. On the right side, a sidebar contains a message with a blue icon of a touch point device:

Want to define limits for a group of Touch Points?
Create a group and add Touch Points to a group. Similarly, you can create multiple groups. Clubbing one Touch Point as a part of multiple groups is not allowed. Touch Points already grouped will not be available for selection while creating new group. Access Limit Package Management for defining Limits for a group.

At the very bottom, a footer contains the text: 'Copyright © 2006, 2017, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'

Field Description

Field Name	Description
Group Code	Group code defined for touch point group.
Group Description	Group description defined for touch point groups.
Touch Point Group Type	Displays the type of touch point group i.e. whether touch point group is of type internal or external. The same can be modified.
Touch Points	
Internal Touch Points	Displays all the internal touch points. Touch points which are the part of a group will be shown as pre-selected.
	<hr/> <p>Note:</p> <p>1) User can de-select a pre-selected internal touch points which are already part of the group.</p> <p>2) Other Internal touch points which are not part of any other group will be listed for selection.</p> <p>3) The touch points which are already a part of one of the groups will be shown in disable mode. (one Touch point can be part of on group only)</p> <hr/>
External Touch Points	Displays all the external touch points. Touch points which are the part of a group will be shown as pre-selected.
	<hr/> <p>Note:</p> <p>1) User can de-select an external touch points which are already part of a group will be shown as pre-selected.</p> <p>2) Other external touch points which are not part of any other group will be listed for selection.</p> <p>3) The touch points which are already a part of one of the group will be shown in disable mode.</p> <hr/>

4. Modify the required details, e.g. Group Description, Internal / External Touch Points.
5. Click **Save** to save the touch point group details.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate back to previous screen.
6. The **Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate back to previous screen.
7. The success message of Touch Point Group Maintenance saved successfully appears along with the transaction reference number.
Click **OK** to complete the transaction.

34.3 Touch Point Group Maintenance - Create

Using this option, System Administrator can create a new touch point group and add touch points to a group.

Note: System Administrator cannot club one touch point as part of multiple groups. While creating group, touch points which are already part of a group will not be available for selection.

To create a touch point group:

1. In the **Touch Point Group Maintenance** screen, click **Create**. The **Touch Point Group Maintenance - Create** screen appears.

Touch Point Group Maintenance - Create

The screenshot shows the 'Touch Point Group Maintenance - Create' interface. At the top, the ZigBank logo and user information 'Welcome, Administrator User' are visible. The main form area contains the following fields and options:

- Group Code:** TA112
- Group Description:** TA1123A
- Touch Point Group Type:** Radio buttons for 'Internal' (selected) and 'External'.
- Touch Points:** A list of touch point types with checkboxes:
 - Internal
 - Mobile Application
 - Mobile (Responsive)
 - Internet
 - Missed Call Banking
 - SMS Banking
 - Wearables
 - Snapshot
 - Siri/Chatbot

At the bottom left, there are 'Save', 'Cancel', and 'Back' buttons. On the right, a callout box asks 'Want to define limits for a group of Touch Points?' and provides instructions on group creation and limitations.

Field Description

Field Name	Description
Group Code	Unique group code defined for touch point group.
Group Description	Touch point group description defined for touch point groups.
Touch Point Group Type	Select the type of Touch point group type i.e. whether the type is Internal or External.
Touch Points	

Field Name	Description
Internal Touch Points	<p>Displays all the internal touch points maintained.</p> <hr/> <p>Note: 1) Internal touch points which are not part of any other group will be listed for selection. 2) Touch points which are already a part of any other group will be shown in disabled mode.</p>
External Touch Points	<p>Displays all the external touch points maintained.</p> <hr/> <p>Note: 1) External touch points which are not part of any other group will be listed for selection. 2) Touch points which are already a part of any other group will be shown in disabled mode.</p>

2. In the **Group Code** field, enter the unique group code for touch point group.
3. In the **Group Description** field, enter the touch point group description.
4. In the **Touch Points** field, select the checkbox against the Internal / External Touch Points.

Note: To select all available Internal / External Touch Points in one instance, select the checkbox adjacent to Internal / External Touch Points.

5. Click **Save** to save the Touch point group details.
 OR
 Click **Cancel** to cancel the transaction.
 OR
 Click **Back** to navigate back to previous screen.
6. The **Review** screen appears. Verify the details, and click **Confirm**.
 OR
 Click **Cancel** to cancel the transaction.
 OR
 Click **Back** to navigate back to previous screen.
7. The success message of Touch Point Group Maintenance saved successfully appears along with the transaction reference number.

FAQs

1. From where can I get the list of touch points which I can club together?

Internal and external touch points maintained by the System Administrator using 'Touch Point Maintenance' will be listed for group creation.

2. Can I club internal and external touch points together in one group?

No, clubbing of internal and external touch points together in one group is not allowed.

3. Can I club one touch point as a part of multiple groups?

No, one touch point can be a part of only one group.

4. Where can I use these touch point groups?

You can create a transaction limit package using 'Limit Package Management' for touch point group.

[Home](#)

35. Role transaction Mapping

OBAPI application has many roles for different type of users defined under different user types i.e. Retail, Corporate, and Admin. These roles are defined for internal as well as for external touch points.

Application roles mapped to Internal Touch Points (Internet, Mobile Application, SIRI, Chatbot, etc.) are used by OBAPI itself, whereas Application roles mapped to External Touch Points are defined for being used by third party system. Each External role is mapped to a scope (defined in Identity Management System) and the same scopes are mapped to External Touch Points in **Touch Point Maintenance** screen.

For Internal Touch Points, a user can perform only those transactions which are mapped to the application role assigned to that user. Whereas for External Touch Points, third party system can only perform only those transactions (on behalf of the user), which are mapped to the application role, mapped to the scope assigned to that external touch point (third party system).

Using this option a customer can define an Application role. Application Roles are mapped to Entitlements for various Touch Points, so that System Administrator can decide which all transactions should be available for which touch points.

Apart from the transactions, OBAPI widgets are also available as entitlement and can be mapped to the application roles.

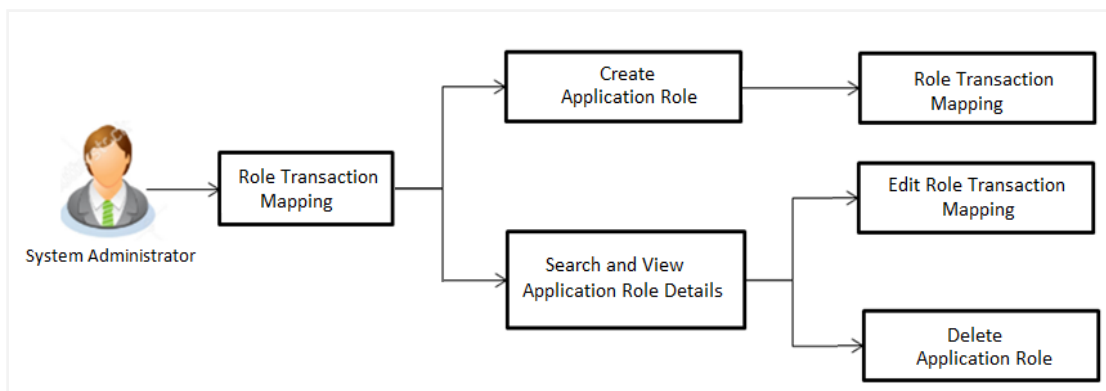

System displays only those menu options widgets and dashboard which are mapped to the application role assigned to the logged in user. For e.g. If a user with application role 'Retail' does not have access to transactions widgets & dashboard related to Wealth Management module, then those transactions, widgets and dashboard will not be shown on the UI to user.

Note: The users can have access only to those transactions, dashboards and widget which are mapped to the role associated to the him/her.

Pre-Requisites

- Transaction access is provided to System Administrator.
- Approval rule set up for System Administrator to perform the actions.

Workflow

Features supported in application

Using this option System Administrator can perform the following actions:

- Create Application Roles
- View Application Roles
- Edit Application Roles
- Delete Application Roles

How to reach here:

System Administrator Dashboard > Authorization and Access Controls > Role Transaction Mapping

OR

System/ Bank Administrator Dashboard > Toggle Menu > Authorization and Access Controls > Role Transaction Mapping

35.1 Search Application Role

Using this option, System Administrator can search application roles based on the search criteria. By default all the application roles will be displayed on this screen, Administrator can filter the list by entering the values in search criteria.

To search application role/ application roles:

1. In the **User Type** field, select the user type.
2. In the **Application Role Name** field, enter the name of the application role.
3. Click **Search**.
The search result based on search criteria displayed in **Application Role Details** section.
OR
Click **Clear** to reset the search parameters.
OR
Click **Cancel** to cancel the search process and to go back to dashboard.

Click **Delete** To delete the application role along with the transaction mapping.
(Deletion of any role is only allowed if there are no users attached to that role)
OR
Click **Back** to navigate back to previous screen.

OR

Click **Cancel** to cancel the search process and to go back to dashboard.

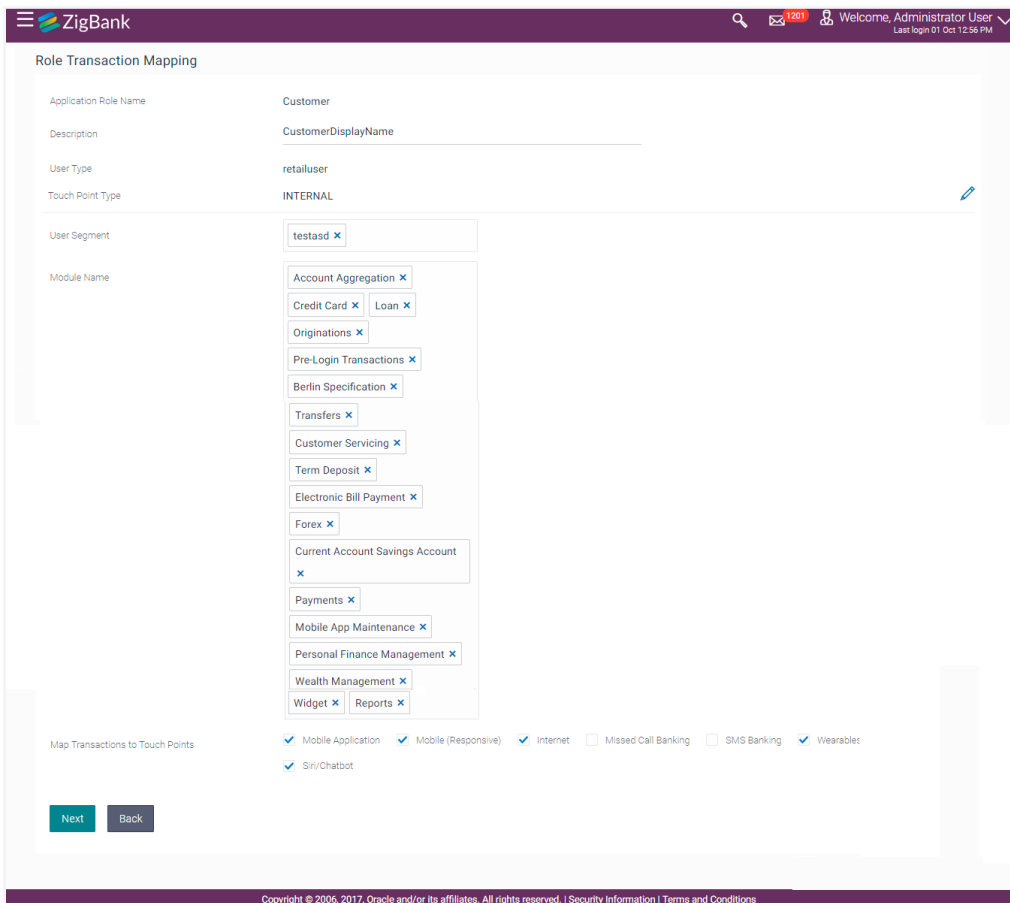

35.2 Edit Application Role

Using this option System Administrator can edit or update the details of an existing role transaction mapping.

To modify role transaction mapping:

1. Repeat step 1 to 4 of **Search Application Role** section.
2. Click  against the **Map Transactions**.
Screen in editable mode appears.

Role Transaction Mapping - Edit

The screenshot displays the 'Role Transaction Mapping - Edit' interface in the ZigBank system. The form contains the following details:

- Application Role Name:** Customer
- Description:** CustomerDisplayName
- User Type:** retailuser
- Touch Point Type:** INTERNAL
- User Segment:** testasd
- Module Name:** A list of modules including Account Aggregation, Credit Card, Loan, Originations, Pre-Login Transactions, Berlin Specification, Transfers, Customer Servicing, Term Deposit, Electronic Bill Payment, Forex, Current Account Savings Account, Payments, Mobile App Maintenance, Personal Finance Management, Wealth Management, Widget, and Reports.
- Map Transactions to Touch Points:**
 - Mobile Application
 - Mobile (Responsive)
 - Internet
 - Missed Call Banking
 - SMS Banking
 - Wearables
 - Siri/Chatbot

Navigation buttons 'Next' and 'Back' are located at the bottom left of the form.

Note: Application Role Name, User Type, and Touch Point Type fields cannot be edited.

3. Update the role description if required.
4. Add/ remove the user segment as per requirement.
5. Select/ deselect module names for which the transaction mapping is to be done.
6. Check/uncheck the touch points for which the transaction mapping is to be done.

7. Click **Next** to link/ delink transactions.
- OR
- Click **Back** to go back to previous screen.

Note: If the administrator deselects a module from Module name field, transaction mapping done for all the transactions under that module will get removed for that module. Similarly if the administrator unchecks and existing touch point, transaction mapping done for all modules for that touch point will get removed for that Touch Point.

Buttons: Save, Cancel, Back

8. Modify the transactions mapping for different touch points. Click  against the particular category to view and update the transaction mapping.
9. Click on the next touch point tab, a pop up window appears for asking **Copy data from touch point**.

Copy data from touch point Confirmation popup window

- a. Click **Yes** to select the touch point from which the data has to be copied.
- b. Copy transaction mapping details of touch point to another popup window.

Copy data from touch point Confirmation popup window

- a. From the **Select** list, select the touch point from the list.
 - b. Click **Apply**.
OR
Click **No**. to do the mapping operationally.
10. Modify the transactions mapping for current touch points if required.
 11. Click **Save** to save the updates.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate back to previous screen.
 12. The screen with success message appears. Click **OK** to close the message screen.

35.3 Delete Application Role

Using this option System Administrator can delete an existing role transaction mapping. Deletion of any role is only allowed if there are no users attached to that role.

To delete role transaction mapping:

1. Repeat step 1 to 4 of **Search Application Role** section.
2. Click **Delete** to delete the application role along with the transaction mapping.
The **Delete Warning** message appears.

Delete Application Role

3. Click **Yes**.
The **Role Transaction Mapping** screen with the successful role deletion message appears.
OR
Click **No** to cancel the transaction.

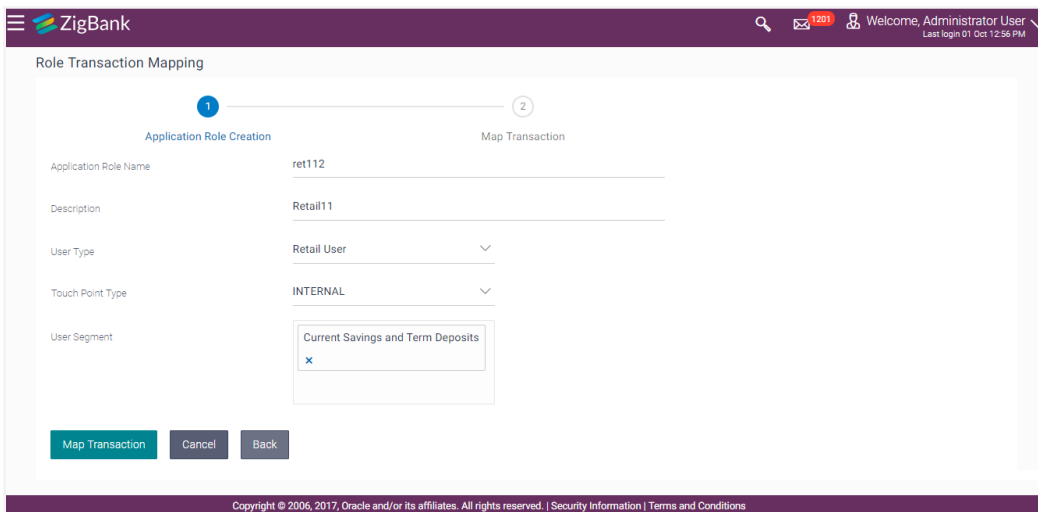

35.4 Create Application Role

Using this option System Administrator can define an application role and map transactions to it for selected touch points.

To create an application role transaction mapping:

1. In the **Role Transaction Mapping** screen, click **Create**. The **Role Transaction Mapping - Create** screen appears.

Application Role Creation

Field Description

Field Name	Description
Application Role Name	Name of the application role.
Description	Description of the application role.
User Type	Type of the user for which the application role is to be created. The options are: <ul style="list-style-type: none"> • Retail User • Corporate User • Administrator
Touch Point Type	Type of Touch Point. The options are: <ul style="list-style-type: none"> • Internal: (for internal touch points like internet, Mobile Application, Siri, Chatbot etc.) • External : (for third Party applications)
User Segment	User segments of selected user type for which the maintenance is to be done. This field is applicable only for Retail user type and Internal touch point type.
Scope Name	List the scopes for the external touch point. This field is displayed and enabled, if you select External option in the Touch Point Type field. Once a scope is mapped to a role, it cannot be mapped to any other role.

2. In the **Application Role Name** field, enter the name of the application role.
3. In the **Description** field, enter the description of the application role.
4. From the **User Type** list, select appropriate type for which role is to be created.
5. From the **Touch Point Type** list, select appropriate option.
 - a. If you select **External**;
 - i. From the **Scope Name** list, select the appropriate scope to map to application role.
 - b. If you select **Internal and User Type as Retail**;
 - i. From the **User Segment** list, select the appropriate segments for which maintenance is to be done.
6. Click **Map Transaction** to map transaction to the role.
The **Application Role Creation** screen to add transaction modules and touch points appears.
OR
Click **Back** to navigate back to previous screen.

OR

Click **Cancel** to cancel the transaction and to go back to dashboard.

Field Description

Field Name	Description
Transaction Name	Name of transaction to be mapped to the application role.
Action	<p>Name of the action that can be performed for that transaction by the user to which this application role is assigned.</p> <ul style="list-style-type: none"> • Perform- This action lets the user to perform or initiate that transaction and should be given to maker role. • Approve- This action lets the user to approve that transaction and should be given to approval role • View- This action lets the user to view the initiated and approved transactions by other users and should be given to viewer role.

10. Click on the desired Touch Point tab for e.g. Internet.
11. To map the transactions to the role, click  against the particular module, then select the transaction type, and then transactions to be mapped.
12. Select the respective check boxes preceding to transaction to be mapped.
OR
Select the checkbox at header level if you want to map all the transactions below that at one instance.
13. Click on the next touch point tab, a pop up window appears for asking **Copy data from touch point**.

Copy data from touch point Confirmation popup window

- a. Click **Yes** to select the touch point from which the data has to be copied.
- b. Copy transaction mapping details of touch point to another popup window.

Copy data from touch point Confirmation popup window

- a. From the **Select** list, select the touch point from the list.
 - b. Click **Apply**.
OR
Click **No.** to do the mapping operationally.
14. Click **Save** to save the changes.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate back to the previous screen.
 15. The **Role Transaction Mapping - Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate back to the previous screen.
 16. The screen with success message of **Application Role Policy Map** appears. Click **OK** to complete the transaction.

FAQs

1. Is it mandatory to map transactions to the created application role?

Yes. You will need to associate transactions for at least one module for a touch point, once an application role is created.

2. Do I need to mandatorily map transactions for each touch point for the new application role created?

No, it is not mandatory to map transactions for each touch point for the new role created but if the same are not defined then on initiation of transaction from that touch point, system will give an access denied message.

3. Why am I unable to select an action against a specific entitlement for a transaction?

This could be because that the specific action is not applicable or relevant for an entitlement i.e. approve as an action is not applicable to inquiry entitlement for a transaction.

4. Can I copy the same transaction mapping for an application role from one touch point to another?

Yes, you can copy the details along with an option to decide from which touch point the details need to be copied. On selection of a touch point, system will prompt to select the

touch point from which the entitlements need to be copied. If you had selected 'No' and later wish to copy the details, then you will need to click on the touch point tab again for the system to provide that option.

5. Once I select the module and touch points for transaction mapping to an application, can I include additional modules and touch points?

Yes, you can click on 'Edit' and include additional modules and touch points for mapping.

6. Can I associate multiple scopes to an application role of type external and how are they associated to external touch points?

No. Only one scope can be mapped to an application role to map transactions. Once a scope is mapped to an application role, that scope cannot be mapped to another application role. Multiple scopes can be associated to an external touch point as part of touch point definition and the same scope can be mapped to different external touch points.

[Home](#)

36. Entitlements

Entitlements are the transactions that the user can perform. Each Entitlement is linked to a single or group of resources. Access of these entitlements to a role is given basis on the necessity and relevance of entitlement to that role. For creation of role and mapping entitlements to that role please refer to Role Transaction Mapping screen.

Pre-Requisites

- Transaction access is provided to System Administrator.

Workflow

Features supported in application

Using this option system administrator can perform the following actions:

- View Entitlement
- Edit Entitlement

How to reach here:

System Administrator Dashboard > Authorization and Access Controls > Entitlements
OR

System/ Bank Administrator Dashboard > Toggle Menu > Authorization and Access Controls > Entitlements

36.1 Entitlements - View

Using this option, Administrator can search and view the existing entitlements.

To search entitlement (s):

1. From the **Module Name** list, select the appropriate module for which the entitlements are to be viewed.
2. From the **Category Name** list, select the appropriate category of the selected module. 3. Enter the entitlement name.
3. Click **Search**. The based on the search criteria the list of entitlements appears.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Clear** to reset the entered details.
OR
Enter the value directly in the **Entitlement Name** field and Click **Search**.

37. User Segment Maintenance

In order to offer appropriate product and services to the customers, banks can employ some method of segmentation. Banks can group customers into different segments on the basis of different attributes of the customer; it could be demographic information, geographical information, behavioral information etc.

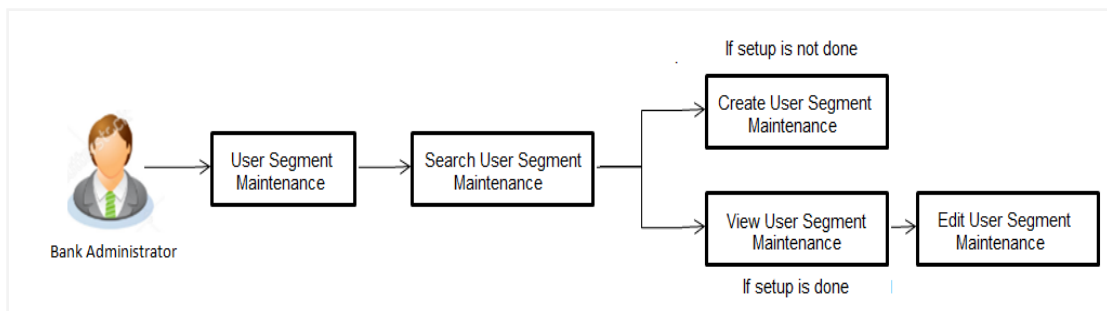

Banks can have different communication mailers, authentication mechanisms, transaction limits and branding aspects on the basis of customer segmentation.

User segment maintenance screen allows the system administrator to create new segments and subsequently use these segments to define specific maintenances at user segment level. Limits can also be defined specific to a user segment. Within each user segment, limits package can be associated to different touch points.

Pre-Requisites

- Transaction access is provided to System / Bank Administrator.
- Application roles are maintained

Workflow

Features Supported In Application:

- Create User Segment
- Search and View User Segment
- Edit User Segment

How to reach here:

System/ Bank Administrator Dashboard > Toggle Menu > Authorization and Access Controls > User Segments

OR

System Administrator Dashboard > Authorization and Access Controls > User Segment Maintenance

37.1 User Segment Maintenance - Search

Using this option, System Administrator user can search the user segments maintained for retail users. The search result displays matching results based on search criteria entered.

System Administrator can view details of a specific segment by selecting the segment ID to get required details for a segment.

To search user segments:

- In the **Segment Code** field, enter the segment code whose details you want to view.
OR
In the **Segment Name** field, enter the name of the segment whose details you want to view.
OR
From the **User Type** list, select the user type for which you wish to view user segment details. Currently only segments for user type 'Retail' can be defined.
- Click **Search**.
The search results appear on the **User Segment Maintenance** screen based on the search parameters.
OR
Click **Clear** to reset the details.
OR
Click **Cancel** to cancel the transaction and the administrator will be navigated back to the **Dashboard**.

User Segment Maintenance- Search Result

The screenshot displays the 'User Segment Maintenance' interface. At the top, there is a navigation bar with the ZigBank logo and user information: 'Welcome, Administrator User' and 'Last login 27 Sep 01:20 PM'. The main content area is titled 'User Segment Maintenance' and contains a search form with the following fields:

- Segment Code:
- Segment Name:
- User Type:

Below the form are 'Search' and 'Clear' buttons. The search results are displayed in a table:

Segment Code	Segment Name	User Type	Status
RETAILGOLD	Retail User Gold	Retail User	Enabled
test12	te	Retail User	Enabled
CASATD	Current Savings and Term Deposits	Retail User	Enabled
testx	ters	Retail User	Enabled
RETSEG1	Retail segment 1	Retail User	Enabled

At the bottom of the table is a 'Cancel' button. On the right side of the page, there is a 'User Segment' section with a 'Create' button and explanatory text: 'Customers are grouped into user segments so that banks can offer appropriate products and services. You can create new user segments and use it subsequently to define specific maintenances at user segment level if required.'

Field Description

Field Name	Description
Segment Code	System displays the Segment Code of the segment that was selected to view details.
Segment Name	System displays the name of the segment that was selected to view details.
User Type	System displays the user type of the segment that was selected to view the details.
Allowed Application Roles	System displays the application roles that are mapped to the selected segment.
Status	System displays the current status of the selected segment i.e. whether the segment is active / inactive. <hr/> Note: If the user segment is no longer active and needs to be disabled then the same can be done in Edit mode.

Limits - Touch Points /Group/ Global

Limits package can be optionally attached at user segment level. All the touch points and touch point groups maintained in the system are listed under each entity in case of multi entity setup. Limits Package can be mapped for each touch point and for a touch point group.

Touch Points/ Group/ Global Name of touch points/ groups/ global under a specific entity (with all internal and external touch points).

Internal Touch Points Group for All Displays the touch points which are the part of a group.

Touch Points Displays the touch points (banking channels) which allows a user to perform transactions using the touch points.

The touch points could be:

- Mobile Application
- Mobile (Responsive)
- Internet
- Mobile Banking
- Missed Call Banking
- SMS Banking
- Wearables
- Snapshot
- Siri / Chatbot

4. Click **Edit** to modify the segment details.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to previous screen.

37.2 User Segment Maintenance - Edit

Using this option, System Administrator can modify the details of the existing user segment.

To edit the user segment details:

1. In the **Segment Code** field, enter the segment code whose details you want to modify.
OR
In the **Segment Name** field, enter the name of the segment whose details you want to modify.
OR
From the **User Type** list, select the user type whose user segment details you want to modify.
2. Click **Search**.
The search results appear on the **User Segment Maintenance** screen based on the search parameters.
OR
Click **Clear** to reset the details.
OR
Click **Cancel** to cancel the transaction. The **Dashboard** appears.
3. Click the **Segment Code** link of the record to select the segment for which you want to modify the details. The **User Segment Maintenance - View** screen appears.
4. Click **Edit** to modify the User Segment details.
The **User Segment Maintenance - Edit** screen appears. .

Field Description

Field Name	Description
Segment Code	System displays the segment code of the segment selected and is non-editable.
Segment Name	System displays the name of the selected segment and is available for edit.

Field Name	Description
User Type	System displays the User type for the selected segment and is non-editable
Allowed Application Roles	System displays the application roles that have been mapped to the selected segment and are available for edit. As part of edit, new application roles can be mapped and existing roles can be removed.
Status	System displays the current status of the user segment and is available for edit. Note: You can modify the segment status to Active if the current state is Inactive and vice-versa.

Limits

Limit - Touch Points /Group

Limits package can be optionally attached at user segment level. All the touch points and touch point groups maintained in the system are listed under each entity in case of multi entity setup. Limits Package can be mapped for each touch point and for a touch point group.

Touch Points/ Group Name of touch points/ groups maintained under a specific entity to which the limit packages can be mapped.

Package System lists the packages available for mapping to a touch point/ touch point group. If there was any limits package to a touch point/group mapped earlier, it will be shown in editable form.

Actions

Click  to reset the limit packages defined for a segment.

5. Edit the required details i.e. segment name, allowed Application Roles, Status, and Limits package for any of the touch point/touch point group.
6. Click **Save** to update the changes.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to previous screen.
7. The **Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Edit** to make changes if any.
OR
Click **Cancel** to cancel the transaction and navigate back to **Dashboard**.
8. The success message of modification appears.
Click **OK** to complete the transaction.

37.3 User Segment Maintenance - Create

Using this option, System Administrator can create new user segment for a user type 'Retail'.

To create the user segment:

1. In the **User Segment Maintenance** screen, click **Create**. The **User Segment Maintenance - Create** screen appears.

User Segment Maintenance- Create

User Segment

Customers are grouped into user segments so that banks can offer appropriate products and services.

You can create new user segments and use it subsequently to define specific maintenances at user segment level if required.

Copyright © 2006, 2017, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions

Field Description

Field Name	Description
------------	-------------

Segment Code	Enter the unique code for the user segment to be created.
---------------------	---

Segment Name	Enter the name of the user segment to be created.
---------------------	---

Field Name	Description
User Type	Select the User type from the list for which the user segment is to be created. Currently only user type 'Retail' is supported
Allowed Application Roles	Select the application role(s) that needs to be associated to the user segment being created. The selected application role(s) will be by default available to the users to whom the created segment is associated.

Limits

Limit - Touch Points /Group

In this section user can define limits package for a user segment so that, bank can have varying limits depending on the segment of the user.

Touch Points/ Group	Name of touch points/ groups maintained under a specific entity to which the limit packages can be mapped.
----------------------------	--

Note: The limits package will be associated to a touch point/touch point within a segment. It is not mandatory to associate limits package to each touch point / touch point group.

Package	Select the limits package from the list of packages available for mapping to a touch points/ groups.
----------------	--

Actions

Click  to reset the limit packages selected against the touch point.

2. In the **Segment Code** field, enter the unique code for the user segment to be created.
3. In the **Segment Name** field, enter the name of the user segment to be created.
4. In the **User Type** list, select the appropriate user type for the user segment being created.
5. In the **Allowed Application Roles** list, select the application role(s) to be mapped to the segment.
6. In the **Limits** section, select the limit packages to be mapped to touch points / touch point from the limit package list. The limits package selected as part of this definition will be applicable to the users to whom this segment is associated and will also depend on the limits preference applicability.

Note: Click  to reset the limit packages applicable to a segment.

7. Click **Save** to save the user segment details.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to previous screen.
8. The **Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Cancel** to cancel the transaction.
OR

Click **Back** to navigate to previous screen.
The user will be navigated back to the create screen.

9. The success message of transaction completion appears.
Click **OK** to complete the transaction.

FAQs

1. Is it mandatory to create a User Segment as part of Day 1 maintenances?

No. It is not mandatory to create User Segments as part of Day 1 definition. If User Segments are created, then the same will be available for association to user as part of User Onboarding but it is not mandatory to associate user segment to business users as part of onboarding.

2. What is the relationship between User Segment and Application Roles?

Association of application roles to user segment is not mandatory. Multiple application roles can be assigned to a user segment and those application roles will be by default available to all users who are assigned that segment. The same application role can be mapped to multiple user segments.

3. Can I remove specific application role(s) from the user level if I associate user segment?

The application role(s) that are mapped to a user segment cannot be removed from the user if the segment is associated to the user, however the application role(s) that are not associated to any user segment will be available for mapping/unmapping at user level.

4. What will happen if I disable a Segment which is associated to Users?

Access to all the maintenances done on that segment level like Dashboard Builder, Product mapping, 2FA, Limits will not be referred. System will start referring to the maintenance done for the User Type associated to the users attached to the disabled segment, for Dashboard Builder, Product mapping, 2FA and Limits.

Users associated to the disabled segment will not have access to the application roles attached to that segment, hence bank user should attach new segment or application operationally to those users.

[Home](#)

38. Authentication

Passwords are the most common form of authentication used in the world today. But passwords can easily be forgotten and commonly compromised. Two-factor authentication (2FA) adds an extra layer of security by requiring users to use two different authentication factors to verify their identity.

The two step verification or 2 Factor Authentication is an extra layer of security that is known as "multi factor authentication" that requires not only a password and username but also something that only, and only, the user knows e.g. tokens, OTP, answer of security questions etc. Using a Two Factor Authentication process can help to lower the number of cases of identity theft on the Internet, as well as phishing via email. For security reason authentication is used by user (Retail/ Corporate) while performing transactions through digital platform.

The Two Factor Authentication requires two different kinds of evidence before executing transaction successfully. This option enables the System Administrator to maintain authentication pattern for each transaction of a specific user segment.

Second Factor authentication can be set for each User type (Retail & Corporate) and for user type and User Segment combination (as of now user segment is only available for Retail user type).

This maintenance can be setup for each entity in a multi entity setup, which enables banks in defining different authentication mode for a same transaction for each entity.

The types of 2 factor authentication used are as follows:

- Security Question
- Soft Token
- One Time Password (OTP)

Note: Two factor authentication is only for retail and corporate user.

Pre-requisites

- Transaction access is provided to System Administrator.
- Approval rule set up for Bank Administrator to perform the actions.
- Transactions are enabled for 2 Factor Authentication aspect.

Workflow

Features Supported In Application

The following options are available as part of this maintenance:

- View Authentication
- Edit Authentication
- Create Authentication

How to reach here:

System Administrator Dashboard > Security > Authentication

OR

System/ Bank Administrator Dashboard > Toggle Menu > Security > Authentication

38.1 Authentication - View

On accessing 'Authentication' menu, system displays the existing maintenance available for selected user segment to view the authentication setup for user segment:

To view the authentication setup for user segment:

1. From the **Enterprise Role** list, select the appropriate role.
2. From the **User Segment** list, select the appropriate user segment.

Authentication Setup

The screenshot displays the 'Authentication' configuration page in the ZigBank system. At the top, the header includes the ZigBank logo, a search icon, a notification bell with '1439' alerts, and a user profile for 'Administrator User' with the last login time '13 Nov 09:17 PM'. The main content area is titled 'Authentication' and features two dropdown menus: 'Enterprise Role' (currently set to 'Retail User') and 'User Segment' (currently set to 'Retail User Gold'). Below these menus are three buttons: 'View' (highlighted in green), 'Cancel', and 'Back'. To the right of the configuration area is a 'Note' box with a blue icon of a document and a lock, containing the text: 'Now you can set up an extra layer of security by requiring users to use upto two different authentication factors to verify their identity. You can choose to maintain different authentication factors for each transaction or can even define no levels for transaction requiring no authentication.' The footer of the page contains the copyright notice: 'Copyright © 2006, 2017, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

Field Description

Field Name	Description
------------	-------------

Click **OK** to complete the transaction and navigate back to **'Dashboard'**.

FAQs

1. Can I also set the 2 Factor Authentication for transaction approval?

You don't have to set up separate 2 Factor Authentication for transaction approval. The 2 Factor Authentication set for transaction initiation will also be applied for transaction approval as well.

2. When will the changes made in authentication maintenance be applied?

Changes made in the authentication maintenance will be effective from an immediate effect. This will be applicable to new transactions initiated as well as for transactions pending for approval post the changes are effective.

3. Is it mandatory to set authentication method at both the levels?

No, you may set 1 level authentication for specific transaction. This can be achieved by selecting specific authentication method at level 1 and by specifying 'None' option at level 2.

4. Can I set 'No additional authentication required' for specific transaction?

Yes, this can be achieved by selecting 'None' option at level 1 and level 2. No additional authentication is required for transaction initiation and approval if both levels are set as 'None'.

5. Where can I define which security questions to be asked to the users?

A separate maintenance 'Manage Security Questions' is available to set up the questions which are to be asked to the users as a part of authentication process.

6. Is it mandatory to set up 2 factor authentication for a User Type and User Segment Combination

No, User Segment is an optional field and is applicable for only for Retail type of users. If the Bank doesn't want to setup the authentication for a user segment, they can simply do it for each user type.

7. Can I set up this maintenance for each entity in case of a multi entity setup?

Yes, Authentication can be setup for each entity in case of a multi entity setup. User can select the entity from the entity selection dropdown available on the top right corner of the application to set up the maintenance.

[Home](#)

39. Security Questions Maintenance

This function allows the System Administrator to set up security questions, which will then be used as another layer of security (Over & above the Login credentials), before a user (Retail/ Corporate/ Administrator) can complete transactions through the internet channel.

Through the Manage Security Questions functionality, the administrator user can create and modify security questions. He / She can add the security questions, if required.

Features Supported In Application

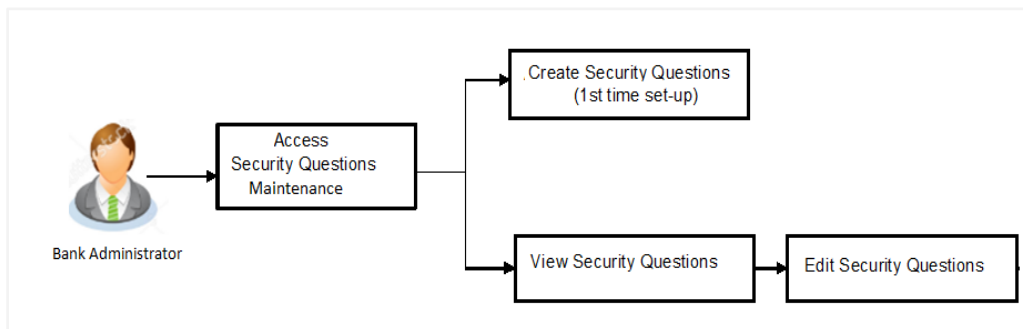

The following options are available to the administrator user as part of this maintenance:

- View Security Questions
- Edit Security Questions (Add new)
- Setup Security Questions (1st time setup)

Pre-requisites

- Transaction access is provided to System Administrator.

Workflow

How to reach here:

System Administrator Dashboard > Security > Security Questions Maintenance

OR

System/ Bank Administrator Dashboard > Toggle Menu > Security > Manage Security Questions

39.1 View Security Questions

On accessing 'Manage Security Questions' option, system displays the existing security questions already maintained if any.

To view the existing security questions maintenance:

Security Questions Maintenance - View

Field Description

Field Name	Description
------------	-------------

View

Questions	The list of security questions set for users, as an added layer of security.
------------------	--

Note: If the first-time maintenance is not already done, a message will be displayed "Security Questions has not been set up yet". With a button alongside – 'Set up now'

1. Click **Edit** to update the set of security questions. An editable screen appears.
OR
Click **Cancel** to cancel the transaction.

39.2 Security Questions Maintenance - Edit

System Administrator can modify existing maintenance for security questions. Administrator is allowed to add security questions but cannot delete the existing questions.

To edit the security questions set:

1. Click **View** to view the security questions already set. The **Security Questions Maintenance - View** screen appears.
2. **Click Edit**. The **Security Questions Maintenance – Edit** screen with values in editable form screen appears.

Security Questions Maintenance - Edit

The screenshot shows the 'Security Question Maintenance' interface. It features a list of questions with corresponding input fields for editing. The questions listed are: 'what's your fav color?', 'what's your mother birth place?', 'what's your pet name?', 'what's your birth place?', 'what's your fav place?', 'What is favourite Cricketer', and 'Name of your first teacher?'. Below the list is an 'Add More' button. At the bottom, there are 'Confirm', 'Cancel', and 'Back' buttons. On the right side, there is a 'Note' section with an icon of a notepad and a pencil, containing the text: 'Security questions are used to verify user's identity in case he forgets his password. Using this option, you can create new or can view/modify existing set security questions for a user. Once saved these Questions set is then made available to the end user to set up the answers.'

Click **Cancel** to cancel the operation and navigate back to '**Dashboard**'.
OR
Click **Back** to go back tom previous screen.
5. The **Security Questions Maintenance – Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Cancel** to cancel the operation and navigate back to '**Dashboard**'.
OR
Click **Back** to go back tom previous screen.
6. The success message of security question setup appears along with the transaction reference number.
Click **OK** to complete the transaction and navigate back to '**Dashboard**'.

FAQs

1. Can I delete the existing security questions?

No, you can add more questions, but cannot delete the existing questions.

2. How many questions will be asked to the user as layer of security?

Number of questions to be asked shall be defined while defining 'Authentication' mode using 'Authentication' maintenance.

40. Password Policy Maintenance

Password policy maintenance enables System Administrator to define password parameters for users. Using this option System Administrator can create, view and edit, password policy for different user types (Admin, Retail and Corporate). Password policy maintenance contains following sections:

- **Password Validators:** This section contains the validations for a password. The validations include minimum and maximum length of the password, allowed characters in a password, repetitive and successive characters allowed, details to be excluded in the password like, date of birth, first and last name, user ID and party ID and Bank defined restricted passwords. User can also define, number of successive incorrect attempts allowed, and number of previous passwords disallowed.
- **Password Expiry Parameters:** This section contains details about password expiry period in days, first password expiry period in days and whether to force user to change password if there is a change in password policy(so that users can change their password as per the new password policy).

Note: This feature will only be available with OBAPI DB authenticator as Identity Management System.

Pre-requisites

- Provide transaction access to System Administrator.

Workflow

How to reach here:

System Administrator Dashboard > Security > Password Policy Maintenance

OR

System/ Bank Administrator Dashboard > Toggle menu > Security > Password Policy Maintenance

40.1 Password Policy Maintenance - Search

To search password policy:

1. In the **Policy Name** field, enter the password policy name.
2. Click **Search**. The search results corresponding to the search criteria are displayed.
OR
Click **Clear** to reset the entered details.
OR
Click **Cancel** to cancel the transaction.

Field Description

Field Name	Description
User Type	<p>Indicates the user type for which the password policy is applied. Multiple user types can be selected for a single policy.</p> <p>The user type are:</p> <ul style="list-style-type: none"> • Corporate User • Administrator • Retail User
Policy Name	Password policy name.
Policy Description	Brief description of the password policy.
Password Validators	
Password Length	The minimum and maximum length of the password.
Allowed Characters	<p>Characters allowed in the password. Different types of characters are:</p> <ul style="list-style-type: none"> • Upper Case • Lower Case • Special Characters • Numbers
Allowed Special Characters	<p>The allowed Special characters in the password.</p> <p>The example of special characters could be, @, #, &, etc.</p> <p>This field only gets enabled if the Administrator has allowed special characters in the password (in Allowed Characters field).</p>
Repetitive Characters Allowed	<p>Number of repetitive characters allowed in the password.</p> <p>For example: If you enter 2 in this field, user can enter 2 repetitive characters in his password like aabcd. If user enters aaabcd as his password, system will display error.</p>
Successive Characters Allowed	<p>Number of successive characters allowed.</p> <p>For example: If you enter 4 in this field, then user cannot enter four successive characters (aaaa/1111) in the password.</p>

Field Name	Description
Exclusion Details in Password	<p>The exclusion options. It can be multiple values.</p> <p>Exclusion details includes:</p> <ul style="list-style-type: none"> • First Name • Last Name • User ID • Date of Birth • Party ID
Restricted Password	<p>The restricted password. The multiple commonly used passwords which are entered by user which the Bank does not want it's user to define as password..</p> <p>For example: If you enter restricted password as Password123, the system does not allow the user to set his password as 'Password123'.</p>
Successive Invalid Login Allowed	<p>The number of attempts allowed for login with incorrect password. User will get locked once he reached the maximum invalid attempts allowed.</p>
Previous Password Disallowed	<p>The disallowed number of historic passwords.</p> <p>For example: If you enter 5 in this field user can not define his last five passwords as his new password.</p>
Password Expiry Parameters	
Password Expiry Period	<p>The number of days after which the password will get expired.</p>
Password Warning Period	<p>The period in days in this field, post which user will get a warning message to change his password.</p> <p>This field gets only enabled if the Password Expiry Period is set.</p>
First Password Expiry Period	<p>The number of days after which user's first system generated password will get expired.</p>
Force Password Change with Policy Change	<p>The check box to force change the password if there is a change in any of the parameter in the password validators section.</p>

-
4. Click **Edit** if you want to edit the password policy details.
OR
Click **Cancel** to cancel the password policy maintenance and to go back to dashboard.
OR
Click **Back** to navigate to the previous screen.

40.3 Password Policy - Create

To create a new password policy:

1. In the **Password Policy Maintenance** screen, click **Create**. The **Create New Password Policy** screen appears.
2. To apply the password policy, select the appropriate user type.
3. In the **Policy Name** field, enter the password policy name.
4. In the **Policy Description** field, enter the password description.
5. In the **Password Validators** section, enter the minimum and maximum length of the password in the **min** and **max** field.

Create New Password Policy

The screenshot shows the 'Create New Password Policy' form in the ZigBank Password Policy Maintenance screen. The form is divided into several sections:

- User Type:** Three radio buttons are present: 'Corporate User' (checked), 'Administrator' (unchecked), and 'Retail User' (checked).
- Policy Name:** A text field containing 'OBDX _pwdpicy'.
- Policy Description:** A text field containing 'Password policy for OBDX reatl and corp user'.
- Password Validators:**
 - Password Length:** 'min' field is 2, 'max' field is 5.
 - Allowed Characters:**
 - Upper Case: Allowed (checked), Mandatory (checked), Count: 1
 - Lower Case: Allowed (checked), Mandatory (checked), Count: 1
 - Special Characters: Allowed (checked), Mandatory (unchecked)
 - Numbers: Allowed (checked), Mandatory (unchecked)
 - Allowed Special Characters:** A text field containing '@ x'.
 - Repetitive Characters Allowed:** A text field containing 2.
 - Successive Characters Allowed:** A text field containing 4.
 - Exclusion Details in Password:** A list of exclusion rules: 'First Name x', 'Last Name x', and 'Date of Birth x'.
 - Restricted Passwords:** A list of restricted passwords: 'ORACLE x' and 'ofss x'.
 - Successive Invalid Login Allowed:** A text field containing 3.
 - Previous Password Disallowed:** A text field containing 5.
- Password Expiry Parameters:**
 - Password Expiry Period:** 90 Days
 - Password Expiry Warning Period:** 80 Days
 - First Password Expiry Period:** 5 Days
 - Force Password Change with Policy Change:** A checkbox that is unchecked.

At the bottom of the form, there are three buttons: 'Save', 'Cancel', and 'Back'. The footer of the page contains the copyright information: 'Copyright © 2006, 2017, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

8. The success message of password creation appears along with the transaction reference number.
Click **OK** to complete the transaction.

FAQ

1. **If I edit a password policy, will the new policy be applied for the existing users mapped under the user category?**
Yes, the new password policy will get applied to existing as well as new users.
2. **If an existing password policy has changed will the existing users be asked to change their password to meet criteria as per the new policy**
Existing users will only be asked to change their password if the **Force Password Change with Policy Change** checkbox is checked in the password policy.
3. **Will the user be shown any warning before the password expiry?**
Yes, user will be shown a message on his dashboard prompting him to change his password starting from the number of days maintained in password warning period until the password gets expired.
4. **Can the Bank define more than one password policy for a user type (Administrator/Corporate/Retail)?**
No, only one policy can be defined for a particular user type.
5. **Can the System Administrator delete a Password policy?**
No, deletion of password policy is not permitted; however system administrator can make changes to the existing password policy.

41. Security Keys

41.1 Password Encryption and Decryption with Public and Private Key Pairs

Encryption and decryption allow communication between two parties to disguise information. The sender encrypts information before sending it and the receiver decrypts the information after receiving it. While in transit, the information is encrypted to ensure that it is protected from an intruder.

Public and Private key pair helps to encrypt information that ensures sensitive data is protected during transmission. Whatever is encrypted with a Public Key can only be decrypted by its corresponding Private Key and vice versa.

41.2 JWT Encryption Key

A JSON web token is a JSON object to represent a set of information. On sign in, user is authenticated and JWT token is generated. This JWT is subsequently passed to make API calls.

To keep sensitive information hidden from the bearer (client) or third parties, JWT should be encrypted.

A single key can be used to encrypt the data, if the JWT is encrypted with the key then the data can be decrypted using the same key.

How to reach here:

System/ Bank Administrator Dashboard > Toggle Menu > Security > Security Keys

Security Keys

Public and Private Key Pair

Public and Private key pair helps to encrypt information that ensures data is protected during transmission. Whatever is encrypted with a Public Key may only be decrypted by its corresponding Private Key and vice versa. You can click to generate the key pair.

[Generate](#)

[Ok](#)

JWT Encryption Key

To encrypt and decrypt a JWT, you need a symmetric key which can be generated by clicking the generate button.

[Generate](#)

Copyright © 2006, 2017, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions

To generate the security keys:

1. The default behavior in the product will be no encryption for password as well as JWT.
2. If encryption needs to be enabled, then the system administrator should generate the respective keys.
3. Click **Generate** against the **Public and Private Key Pair**. System will generate public as well as private keys.
4. Click **Generate** against the **JWT Encryption Key**. System will generate the symmetric key for encryption.
5. Click **OK** to navigate back to dashboard

Note: The server will need to be restarted post key generation.

42. User Group - Subject Mapping

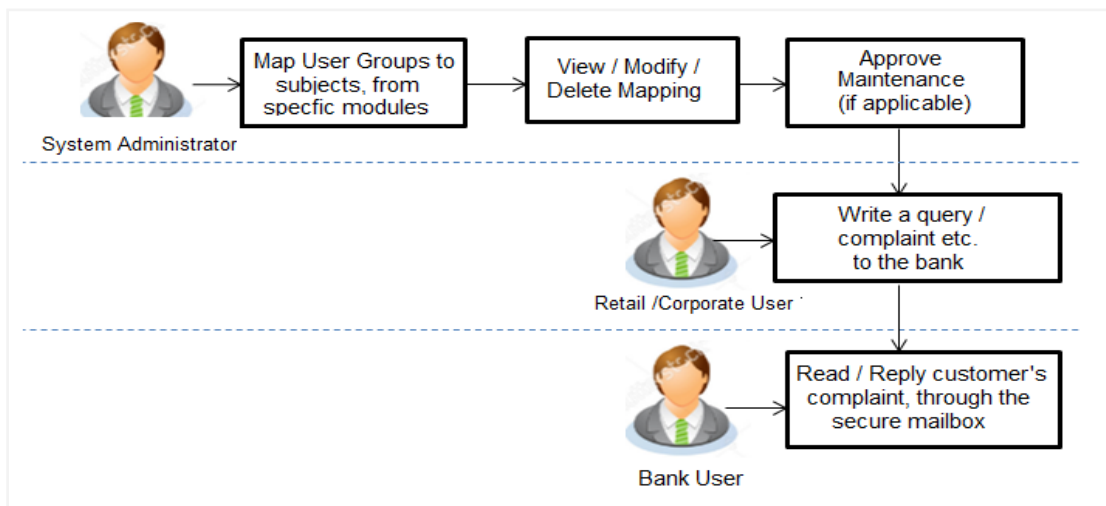

This maintenance facilitates mapping of subjects, to user groups in the bank, to streamline communication between the bank's users and its end customers.

Once User Groups are mapped to certain transactions or modules, users, in that group can reply to communication pertaining to the specific subject. The communication channel used is the bank's secure mailbox. For instance, employees in the Credit Card department of the bank will be able to reply to / address queries raised by customers who are overdue on their payments or who want to seek clarification on their monthly statement.

Pre-Requisites

- Transaction access is provided to System Administrator.
- Approval rule set up for System Administrator to perform the actions.
- Administrator user groups are maintained.
- Maintain applicable subjects, for each Module

Workflow

Features Supported In Application

- Search User Group - Subject Mapping
- Create User Group - Subject Mapping
- Modify User Group - Subject Mapping

How to reach here:

System Administrator Dashboard > Communications > User Group Subject Mapping

OR

System/ Bank Administrator Dashboard > Toggle Menu > Communications > User Group Subject Mapping

42.1 User Group - Subject Mapping - Search

User Group – subject mapping search option allows System Administrator to view the existing User Group - Subject Mapping.

To view User Group - Subject Mapping:

1. In the **Mapping Code** field, enter the user group - subject mapping code for which you want to view the details.
OR
In the **Description** field, enter the user group - subject mapping description for which you want to view the details.
OR
From the **Group Code** list, select the group code already maintained to view the details of the same. Click **Search**, display results based on search criteria.
OR
Click **Clear** to reset the details.
OR
Click **Cancel** to cancel the transaction.

User Group - Subject Mapping - Search

The screenshot displays the 'User Group - Subject Mapping' search interface in the ZigBank system. At the top, there is a navigation bar with the ZigBank logo and user information: 'Welcome, superadmin' and 'Last login 09 Jun 09 04 PM'. The main content area is titled 'User Group - Subject Mapping' and contains three input fields: 'Mapping Code', 'Description', and 'Group Code'. The 'Group Code' dropdown menu is currently set to 'superadminGrouping-superad...'. Below these fields are three buttons: 'Search' (in green), 'Clear', and 'Cancel'. Underneath the search area is a 'Mapping Details' table with the following data:

Mapping Code	Description	Group Code
TD+Credit	TD+Credit group	superadminGrouping

To the right of the search area is a 'Note' box with a blue icon of a notepad and pencil. The note text reads: 'You can map group of users of the Bank to various mail subjects. This ensures to simplify the communication between the Bank and end customers through secured mailbox.' Below the note is a 'Create' button.

At the bottom of the page, there is a copyright notice: 'Copyright © 2006, 2017, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

Field Description

Field Name	Description
Mapping Code	The user group - subject mapping code.
Description	The user group - subject mapping description.
Group Code	The group code to enquire about user group subject mapping, already maintained.

2. Click the **Mapping Code** for which you want to view the mapping details. The **User Group - Subject Mapping - View** screen displays the mapping of subject to the user group.

User Group - Subject Mapping - View

The screenshot displays the 'User Group - Subject Mapping' interface. It includes a header with the ZigBank logo and user information. The main content area contains the following details:

- Mapping Code:** Td group
- Mapping Description:** Td group of user
- Mapping Details:**
 - Group Code:** superadminGrouping-superadminGrouping
 - Subjects:**
 - All Subjects

Mapping Details

Group Code	The group code assigned to user group subject mapping.
-------------------	--

Subjects	The list of all subjects maintained.
-----------------	--------------------------------------

Note:

- 1) All Subjects: if this is checked, then all subjects will be mapped with selected group code within the CASA, TD, Loans, Credit Cards modules.
 - 2) List of Individual Subject: Module wise list of subjects will be available with check box against those. If this is checked, then individual subject is mapped with selected group code within the CASA, TD, Loans, Credit Cards and other modules.
-

3. Click **Edit** to edit the subject mapping details.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to previous screen.

42.2 User Group - Subject Mapping - Create

Using User Group – Subject mapping - Create option, System Administrator can create the user group - subject mapping.

To create User Group - Subject Mapping:

1. Click **Create**.
The **User Group - Subject Mapping - Create** screen appears.
OR
Click **Back** to navigate to previous screen.
OR
Click **Cancel** to cancel the transaction.

User Group - Subject Mapping - Create

The screenshot displays the 'User Group - Subject Mapping' creation interface. The top navigation bar includes the ZigBank logo and user information: 'Welcome, superadmin' with a last login time of '10 Jun 03:34 AM'. The main form area is titled 'User Group - Subject Mapping' and contains the following fields and sections:

- Mapping Code:** CASA001
- Mapping Description:** CASA txn grp
- Mapping Details:**
 - Group Code:** superadminGrouping-superadmi...
- Subjects:**
 - All Subjects
 - Current and Savings Accounts
 - Block Debit / ATM card
 - Open New Bank Account
 - Reissue of lost ATM/Debit Card
 - Unblock Debit / ATM card
 - Change Communication Address
 - Reissue Debit card PIN
 - Transaction Dispute
 - Others
 - Term Deposits
 - Term Deposit Certificate
 - Others
 - Loans
 - Automobile Loan
 - Home Loan
 - Others
 - Education Loan
 - Personal Loan
 - Credit Cards
 - Apply for New Credit Card
 - Change Communication Address
 - Reward Points related queries
 - Others
 - Block Credit Card
 - Reissue Credit Card PIN
 - Transaction Dispute
 - Miscellaneous
 - Complaint
 - Feedback

At the bottom of the form, there are three buttons: **Save** (green), **Cancel** (grey), and **Back** (grey). The footer of the page contains the copyright notice: 'Copyright © 2006, 2017, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

Field Description

Field Name	Description
------------	-------------

Mapping Code	The user group - subject mapping code.
---------------------	--

Description	The user group - subject mapping description.
--------------------	---

Mapping Details

Group Code	The group code to create user group subject mapping.
-------------------	--

Subjects	The list of all subjects maintained.
-----------------	--------------------------------------

Note:

- 1) All Subjects: if this is checked, then all subjects will be mapped with selected group code within the CASA, TD, Loans, and Credit Cards modules.
 - 2) List of Individual Subject: Module wise list of subjects will be available with check box against those. If this is checked, then individual subject is mapped with selected group code within the CASA, TD, Loans, Credit Cards and other modules.
-

2. In the **Mapping Code** field, enter the user group - subject mapping code.
3. In the **Description** field, enter the user group - subject mapping description.
4. From the **Group Code** list, select the appropriate option.
5. Select the respective check boxes preceding the subject to be mapped.
OR
Select **All Subjects** check box, if you want to map all subjects.
6. Update the required details.
7. Click **Save** to save the modified details.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to previous screen.
8. The **Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Edit** to modify the details.
9. The success message of creation of user group - subject mapping along with the transaction reference number appears.
Click **OK** to complete the transaction.

Note:

- 1) If the mapping setup requires an approval workflow, the maintenance will be initiated. Once approved by the required number of approvers, the mapping will be effected.
 - 2) If the setup does not require an approval workflow or is self / auto approved, then the mapping will be effected immediately.
-

42.3 User Group - Subject Mapping - Modify

Using User Group – Subject Mapping - Modify option; System Administrator can edit the user group - subject mapping.

To edit the User Group - Subject Mapping:

1. In the **Mapping Code** field, enter the user group - subject mapping code for which you want to view the details.
OR
In the **Description** field, enter the user group - subject mapping description for which you want to view the details. OR
From the **Group Code** list, select the group code already maintained to view the details of the same.
2. Click **Search** to display results based on search criteria.
3. Click the **Mapping Code** for which you want to view the mapping details. The **User Group - Subject Mapping - View** screen displays the mapping of subject to the user group.

User Group - Subject Mapping - Edit

The screenshot displays the 'User Group - Subject Mapping' edit interface. At the top, the ZigBank logo and user information (Welcome, superadmin) are visible. The main form contains the following fields:

- Mapping Code:** TD+Credit
- Mapping Description:** TD+Credit group
- Group Code:** superadminGrouping-superadmL (dropdown menu)

Below the form is the **Mapping Details** section, which includes a tree view of subjects. The 'All Subjects' section is expanded, showing various categories. The 'Credit Cards' category is selected, and the following sub-items are checked:

- Reward Points related queries
- Apply for New Credit Card
- Block Credit Card
- Reissue Credit Card PIN

At the bottom of the screen, there are three buttons: **Save**, **Cancel**, and **Back**.

Field Description

Field Name	Description
------------	-------------

Mapping Code	The user group - subject mapping code.
---------------------	--

Description	The user group - subject mapping description.
--------------------	---

Mapping Details

Group Code	The group code assigned to user group subject mapping.
-------------------	--

Subjects	The list of all subjects maintained.
-----------------	--------------------------------------

Note:

1) All Subjects: if this is checked, then all subjects will be mapped with selected group code within the CASA, TD, Loans, and Credit Cards modules.

2) Individual Subject: if this is checked, then individual subject is mapped with selected group code within the CASA, TD, Loans, Credit Cards modules.

4. Select the respective check boxes preceding the subject to be mapped.
OR
Select **All Subjects** check box, if you want to map all subjects.
5. Update the required details.
6. Click **Save** to save the modified details.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to previous screen.
7. The **Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Edit** to modify the details.
8. The success message of update along with the transaction reference number appears.
Click **OK** to complete the transaction.

Note:

1) If the mapping setup requires an approval workflow, the maintenance will be initiated. Once approved by the required number of approvers, the mapping will be effected.

2) If the setup does not require an approval workflow or is self / auto approved, then the mapping will be effected immediately.

FAQs

1. If a user has been mapped to all subjects in the CASA module, what does it mean?

If the bank user is mapped to all subjects in CASA, he will be able to receive and reply to the business users on those CASA subjects.

2. How does this maintenance help the bank and its customers?

This set-up is a way to allow or restrict access, to the users of the bank. This enables a secure communication channel between the bank and its end customers.

3. I am an employee of the bank, and I belong to the user group that is mapped to all Term Deposits subjects. Can I initiate an email and send it to the customer?

No, you cannot initiate a correspondence with a customer, you can only reply to his queries on Term Deposits, through the mailbox.

43. Alerts Maintenance

Alerts maintenance allows the System Administrator to define required parameters for each alert that is to be sent to the banks internal (Administrators) and external users (Business users). User can define the alert messages to be sent to different recipients on different channels. Also the type of alert Mandatory or subscribed can be defined by the user for each event.

Pre-Requisites

- Transaction access is provided to System Administrator.
- Approval rule set up for System Administrator to perform the actions.
- Various events are maintained

Workflow

Features Supported In Application

Alert maintenance available features available to System Administrator users in the application:

- View alerts already maintained
- Create a new alert
- Edit an alert
- Delete an alert

How to reach here:

System Administrator Dashboard > Communications > Alert Maintenance

OR

System/ Bank Administrator Dashboard > Toggle Menu > Communications > Alert Maintenance

43.1 Alerts Maintenance - Search

Using this option, System Administrator can search and view the details of any alerts maintained based on the search parameters. If the search parameters are not specified, records of all the alerts maintained in the application are displayed (i.e. a blank search is allowed).

To view alerts:

1. From the **Module Name** list, select the appropriate option whose alerts you to view.
2. From the **Event Name** list, select the event, for which one wants to view the alerts maintained.
3. Click **Search**.
The alerts maintained appear based on the entered search parameters.
OR
Click **Clear** to reset the details.
OR
Click **Cancel** to cancel the transaction.

Alerts Maintenance- Search

The screenshot shows the 'Alert Maintenance' search interface in the ZigBank application. At the top, there is a search bar and a user profile indicator. The main area contains a search form with two dropdown menus: 'Module Name' (set to 'Deposits') and 'Event Name' (set to 'Select'). Below the form are 'Search' and 'Clear' buttons. A table of alerts is displayed below the form, with columns for 'Event Name', 'Module Name', and 'Alert Type'. A 'Note' box on the right provides instructions on how to define and maintain alert parameters. At the bottom of the interface, there is a 'Cancel' button and a copyright notice.

Event Name	Module Name	Alert Type
Amend Term Deposit	Term Deposit	Subscribed
Redeem Term Deposit	Term Deposit	Subscribed
Term Deposit Adhoc Statement Request	Term Deposit	Subscribed
Amend Term Deposit - Auto Approved	Term Deposit	Mandatory
Open Term Deposit - Auto Approved	Term Deposit	Mandatory
Redeem Term Deposit - Auto Approved	Term Deposit	Mandatory
Term Deposit Adhoc Statement Request - Auto Approved	Term Deposit	Mandatory
Term Deposit Top-Up - Auto Approved	Term Deposit	Mandatory
Amend Term Deposit - Initiated	Term Deposit	Mandatory
Open Term Deposit - Initiated	Term Deposit	Mandatory
Redeem Term Deposit - Initiated	Term Deposit	Mandatory
Term Deposit Adhoc Statement Request - Initiated	Term Deposit	Mandatory
Term Deposit Top-Up - Initiated	Term Deposit	Mandatory
Amend Recurring Deposit Alert	Term Deposit	Mandatory
Redeem Recurring Deposit	Term Deposit	Mandatory
RD Account Opened	Term Deposit	Mandatory
Recurring Deposit Adhoc Statement Request	Term Deposit	Mandatory

Note
Define & maintain the parameters that drive the internal & external alerts. For a module, you can define the events for alert generation, the text of the alert & whether its mandatory or subscription based for user. These parameters can be viewed, edited & deleted as required.

2. To delete an alert, click **Delete**.
3. The **Delete Warning** message appears, click **Yes**.

Alert Delete Warning

4. The **Alert Maintenance** screen with the successful object deletion message appears. Click **Done** to complete the transaction.

Click [here](#) to view the list of events for **Alert Maintenance**.

FAQs

1. What is a significance of Mandatory and Subscribe types of alerts?

Recipients will get an alert by default for the alert types defined as Mandatory and will have to subscribe for those alerts for which the alert type is defined as 'Subscribe'.

2. What is a reason for applying attribute masking?

The main reason for applying masking to a data field is to protect data that is classified as personal identifiable data, personal sensitive data or commercially sensitive data as a communication between the customer and Bank.

3. Can I define the masking for data attribute available in subject?

No, data attribute masking can be defined only for the data available in the message body.

4. Can I add an attribute masks for more the one data attribute for a specific recipient and channel?

Yes, you can add multiple attribute masks for different data attributes for a specific recipient and channel.

5. Can I delete specific recipient added for an alert event in Alert Maintenance?

Yes, administrator can delete specific recipient mapped to an event.

6. What happens to the in-transit transactions if I edit the alert maintenance for specific recipient?

An updated maintenance will be applicable for any new event performed after maintenance is saved successfully.

44. Mailers

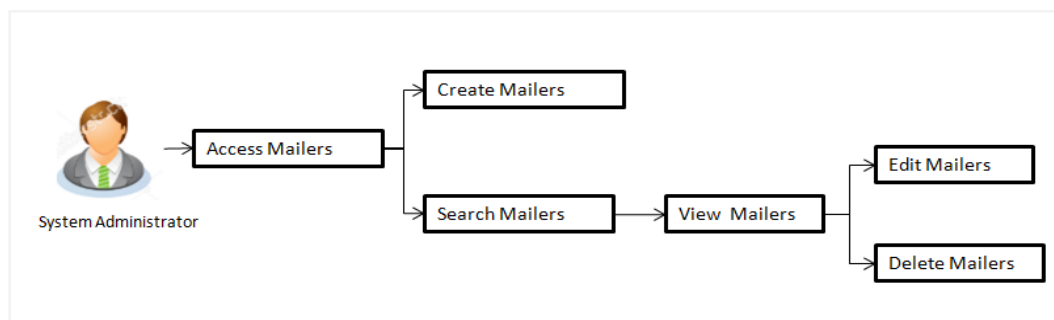

Mailers are information or messages published by the Bank, to communicate about the Bank's Products, services and other information to its users. Bank may send mailers to announce a limited period promotional product rate, launch of a product or service, etc.

Using this option, the System Administrator creates Mailers which are sent to specific users, parties or user segments. Mailers can be customized to reach some or all users, to be sent now or on a specific date and time, in the future.

Pre-Requisites

- Transaction access is provided to System Administrator
- Approval rule set up for Administrator to perform the actions

Workflow

Features Supported In Application

The Mailers module supports following features:

- Search and View Mailers
- Create Mailers
- Edit Mailers (Only for Scheduled Mailers)
- Delete Mailers (Only for Scheduled Mailers)

How to reach here:

System Administrator Dashboard > Communications > Mailers

OR

System/ Bank Administrator Dashboard > Toggle Menu > Communication > Mailers

44.1 Mailers - Search and View

Using Mailers – search option, System Administrators can search and view the list of mailers created in the application. System Administrator enters the mailer code or mailer description to search the user, however blank search is also allowed.

The information will be displayed sorted by Date of creation.

To search the mailer:

1. In the **Mailer Code** field, enter the mailer code to view the mailer details.
OR
In the **Mailer Description** field, enter the mailer description to view the mailer details.
2. Click **Search**.
3. The search results appear on the **Mailers** screen.
OR
Click **Clear** if you want to reset the search parameters.
OR
Click **Cancel** if you want to cancel the transaction.

Mailers - Search

The screenshot displays the 'Mailers' search page in the ZigBank system. At the top, there are search input fields for 'Mailer Code' and 'Mailer Description', along with 'Search' and 'Clear' buttons. Below these is a table with columns for Mailer Code, Mailer Description, Date Created, Send Date, and Status. The table lists several mailers, including 'Default New', 'Default Mail', and various 'Mailer8' entries. A 'Note' sidebar on the right provides context on mailers and includes a 'Create' button. The footer of the page reads: 'Copyright © 2006, 2017, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

Field Description

Field Name	Description
Mailer Code	The unique key to identify the mailer.
Mailer Description	The description of the mailer corresponding to mailer code.
Search Results	
Mailer Code	The mailer code.
Mailer Description	The description of the mailer corresponding to mailer code.
Date Created	The date on which the mailer was created.

Field Name	Description
Send Date	The date on which mailer is sent.
Status	The status of the mailer - viz., scheduled, sent and expired.

To view the mailer details:

- In the **Mailer - Search Results** section, click the **Mailer Code** link of the record for which you want to view the details.
The search results appear on the **Mailers - View** screen appears.

Mailer - View

The screenshot displays the 'Mailer - View' page in the ZigBank system. The top navigation bar includes the ZigBank logo, a search icon, a notification bell with '1483', and the user 'Welcome, Administrator User' with a last login time of '20 Nov 06:01 PM'. The main content area is titled 'Mailers' and is divided into two main sections: 'Mail' and 'Recipients'.
Mail Section: A table-like view showing:
 - Mailer Code: Mailer2
 - Mailer Description: Mailer2
 - Send Date: 31 Jul 2019 12:00:00 AM
 - Expiry Date: (blank)
 - Send Time: 0 Hour(s) & 0 Minute(s)
 - Priority: Low
 - Subject: This is mailer 2 notification
 - Mail Body: Hi, This is mailer 2 notification
Recipients Section: A 'Send To' area with several checkboxes:
 - All Corporate Users
 - All Bank Administrator
 - All Retail Users
 - Segmented User
 - Non-Segmented User
 Below these is a 'List of User ID' text area containing the text 'superadmin'.
Actions: At the bottom left, there are four buttons: 'Edit' (green), 'Delete' (teal), 'Cancel' (grey), and 'Back' (grey).
Note: A blue-bordered box on the right contains a calendar icon and the text: 'Note: Mailers are information or messages published by the Bank, to communicate about the Bank's Products, services and other important information to its users. Bank may send mailers to announce a limited period promotional product rate, launch of a product or service etc. This option enables you to manage such mailers and send it to targeted customers.'

Field Description

Field Name	Description
Mail	
Mailer Code	The unique key to identify the mailer.
Mailer Description	The description of the mailer corresponding to the mailer code.
Send Date	The date and time on which the mailer was sent.

Send Time	The time on which the mailer was sent.
Priority	The priority of the mailer. The options can be: <ul style="list-style-type: none"> • Low • Medium • High
Subject	The subject of the mailer.
Mail Body	The content of the main body of the mailer.
Recipients	
Send To	The recipients of the mailer. The recipients can be: <ul style="list-style-type: none"> • All Corporate Users • All Bank Administrator • All Retail Users • Segmented Users • Non-Segmented Users • User IDs • Party IDs

-
5. Click **Edit** to edit the mailer.
OR
Click **Delete** the delete the mailer.
OR
Click **Cancel** the operation and navigate the user back to 'Dashboard'.
OR

Click **Back** to navigate to the previous screen.

Note: The **Edit** and **Delete** option is available only for Mailers that have a status as '**Scheduled**'.

44.2 Mailers - Create

This function allows the System Administrator to create mailers. The System Administrator creates the content of the mailers, specifies the date - when a mailer is to be sent, priority of the mailer, and the recipients to whom the mailer needs to be sent.

To create a new mailer:

1. In the **Mailers** screen, click **Create**. The **Mailers - Create** screen appears.

Field Description

Field Name Description

Mailer Code Specify the unique key to identify the mailer.

Mailer Description The description of the mailer corresponding to the mailer code.

Send Date The desired date and time for sending the mailer.

Expiry Date The date and time on which the mailer will expire and it will stop appearing in the user's mailbox.

Priority The priority of the mailer.

The options are:

- Low
- Medium
- High

Subject The subject of the mailer.

Mail Body The content of the main body of the mailer.

Recipients

Send To The recipients of the mailer.

The options are:

- All Corporate Users
- All Bank Administrator
- All Retail Users
- Segmented Users
- Non-Segmented Users
- List of User ID: This field is enabled, if you click the **Add_List of User ID** button.
- List of Party ID: This field is enabled, if you click the **Add_List of Party ID** button.

-
2. In the **Mailer Code** field, enter the mailer id.
 3. In the **Mailer Description** field, enter the mailer description.
 4. From the **Send Date** list, select the appropriate date and time to send the mailer.
 5. From the **Expiry Date** list, select the appropriate date and time on which the mailer will expire.
 6. In the **Priority** field, select the priority to send the mailer.
 7. In the **Subject** field, enter the appropriate subject for the mailer.

8. In the **Mail Body** field, enter the appropriate content for the mailer.
9. To send the mailer, select the type of recipients from the **Send To** list.
 Click the  against the Segmented Users/ Non Segmented Users field to view and select the desired user.
 OR
 Select the check box to select all the segmented users/ non segmented users.
 OR
 Click **Add List of User ID** and enter the user ids, if you want to add specific user ids as mailer recipients.
 OR
 Click **Add List of Party ID** and enter the party ids, if you want to add specific party ids as mailer recipients.
 OR
 Click **Save** to save the details.
 OR
 Click **Cancel** the operation and navigate the user back to 'Dashboard'.
 OR
 Click **Back** to navigate to previous screen.
10. The **Review** screen appears. Verify the details, and click **Confirm**.
 OR
 Click **Cancel** to cancel the transaction.
 OR
 Click **Back** to navigate to previous screen.
11. The success message of mailer creation appears along with the transaction reference number.
 Click **OK** to complete the transaction.

44.3 Mailers - Edit

This function enables the System Administrator to edit the mailer details.

Note: This option is available only for Mailers, which have status as '**Scheduled**' (future dated).

To edit or update a mailer details:

1. Enter the search criteria, click **Search**.
 The search results appear on the **Mailers** screen.
2. In the **Mailer - Search Results** section, click the **Mailer Code** link of the record for which you want to view the details.
 The search results appear on the **Mailers - View** screen appears.
3. Click **Edit** to edit the mailer. The **Mailers - Edit** screen appears
 OR
 Click **Cancel** to cancel the operation and navigate the user back to 'Dashboard'.
 OR
 Click **Back** to navigate to the previous screen.

4. View the defined values for fields, in an editable form.
5. Modify the required details.
6. Click **Save** to update the changes.
OR
Click **Cancel** to cancel the operation and navigate the user back to 'Dashboard'.
OR
Click **Back** to navigate to previous screen.
7. The **Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to previous screen.
8. The success message of mailer update appears along with the transaction reference number.
Click **OK** to complete the transaction.

44.4 Mailers - Delete

Using this option, the System Administrator can delete the mailer.

Note: This option is available only for Mailers, which have status as '**Scheduled**' (future dated).

To delete the mailer:

1. Enter the search criteria, click **Search**.
The search results appear on the **Mailers** screen.
2. In the **Mailer - Search Results** section, click the **Mailer Code** link of the record for which you want to view the details.
The search results appear on the **Mailers - View** screen appears.
3. Click **Delete**. The application prompt the System Administrator with a delete confirmation message with an option of **Yes / No**.

Mailers - Delete

The screenshot displays the 'Mailers - Delete' interface. At the top, the ZigBank logo and user information 'Welcome, Administrator User' are visible. The main content area is divided into 'Mail' and 'Recipients' sections. The 'Mail' section contains a form with the following details: Mailer Code: Test12345, Mailer Description: Test12345, Send Date: 31 Jul 2019 12:00:00 AM, Expiry Date, Send Time: 0 Hour(s) & 0 Minute(s), Priority: Low, Subject: mailer 2, and Mail Body: This a test mail. A 'Delete' dialog box is centered over the form, with the text 'Are you sure you want to delete this Mailer?' and two buttons: 'Yes' and 'No'. The 'Recipients' section includes a 'Send To' field with checkboxes for 'All Corporate Users', 'All Bank Administrator' (checked), 'All Retail Users', 'Segmented User', and 'Non-Segmented User' (checked). At the bottom of the form are buttons for 'Edit', 'Delete', 'Cancel', and 'Back'. The footer contains the text: 'Copyright © 2006, 2017, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

4. Click **Yes** to continue.
OR
Click **No** to cancel the deletion process.
5. The screen with success message appears. Click **OK** to complete the transaction.

FAQs

1. Can I attach a file while creating a Mailer?

No, option to attach files is not supported.

2. Till which date I can see the mailers which are already sent to the customers?

You can view already sent mailers till the date, data is available in the system. This will be based on the Bank's purging policy.

3. Can I send mailers to specific customers?

Mailers can be sent to all the customers (Retail/corporate/Administrators), specific user segments or to specific user(s) by specifying the user IDs or party IDs.

4. Who will be the recipients of the mailers incase if mailers are targeted for specific party id(s)?

The users to whom the party ID is mapped as primary party will receive the mailers on scheduled date and time.

45. Account Aggregation

Account aggregation feature allows retail users to link their external bank accounts to OBAPI and provides with an ability to view and access all their savings, term deposits and loan accounts information anytime, anywhere using single digital platform. The benefit of account aggregation is that retail users get a snapshot of all financial accounts while being able to easily retrieve account details, such as net balance available across all the current and savings accounts, recent transactions, etc. in one place. Using this feature, the user log on to the application to see all financial accounts, instead of log in to several accounts to tally up a financial overview, which saves time and effort of the user.

As a part of Account Aggregation module OBAPI enables a retail user to access external bank accounts, and aggregate accounts with OBAPI, the system administrator has to perform External Bank Maintenance.

[Home](#)

45.1 External Bank Maintenance

Using external bank maintenance, System Administrators can add an external bank. The external bank logo, address, URL and other details can be maintained. In addition to this, the authorization details can be captured, that will enable linking of OBAPI with the external bank. Multiple external APIs can be saved, to facilitate access of data, which will then be available for the perusal of the OBAPI customer.

Pre-Requisites

- Transaction access is provided to System Administrator
- Approval rule set up for System Administrator to perform the actions

Workflow

Features Supported In Application

This option allows the System Administrator to:

- View External Bank Details
- Add External Bank
- Update External Bank Details
- Delete External Bank

How to reach here:

System Administrator Dashboard > Personal Finance > External Bank Maintenance

OR

System/ Bank Administrator Dashboard > Toggle Menu > Personal Financial Management > External Bank Maintenance

45.1.1 Search and View External Bank's Details

System Administrators can search and view the details of the external banks already maintained in the application.

To view external bank's details:

1. In the **Bank Name** field, enter the bank name to search for a specific external bank.
2. Click **Search**.
List of external banks matching search criteria appears in search summary section.

OR

Click **Cancel** to cancel the transaction and navigate the user back to **Dashboard**.

OR

Click **Clear** to reset the details.

OR

Click **ADD** to add new external bank.

External Bank Maintenance - Search Result

The screenshot shows the 'External Bank Maintenance' interface. At the top, there's a search bar with the text 'a' and buttons for 'Search' and 'Clear'. Below the search bar is a table with the following columns: Bank Logo, Bank Name, Bank URL, Enable OAuth Details, and Enabled on. The table contains two rows: one for AxisBank (URL: https://www.axisbank.com, Enabled on: 27 Jul 2018) and one for HDFC Bank (URL: http://www.hdfc.com, Enabled on: 13 Jul 2018). Below the table is a pagination control showing 'Page 1 of 1 (1-2 of 2 items)'. To the right of the table is a sidebar titled 'Add and Maintain External Bank Accounts' with an 'Add' button. The sidebar text explains that users can now maintain external banks to enable retail users to link their external bank accounts for account aggregation.

6. The **External Bank Maintenance** screen with the successful object deletion message appears.
Click **OK** to complete the transaction.

[Home](#)

46. Spend Category

Using this option, the System Administrator can maintain the spend categories. Spend Category maintenance allows the System Administrator to create, modify or expire categories. For each of the Spend Category, System Administrator shall be able to map its corresponding sub categories under which the transactions will be tagged. This maintenance is done only for retail customers. Any time there can be a maximum of 7 categories available and each will have a unique category code. Spend categories cannot be deleted.

The each spend category can have up to four sub categories each.

Prerequisites

- Transaction access is provided to System Administrator
- Transactions which needs to be mapped to different categories are maintained
- Transaction description must have keywords which can be distinguished by rule engine for classification into subcategories

Workflow

Features Supported In Application

The Spend Category maintenance allows the System Administrator to:

- Search and View Spend Category
- Create Spend Category
- Edit Spend Category
- Add Spend Sub Category
- Edit Spend Sub Category

How to reach here:

System Administrator Dashboard > Personal Finance > Spend Category

OR

System/ Bank Administrator Dashboard > Toggle Menu > Personal Financial Management > Spend Category

46.1 Spend Category - Search

Using Spend category search option, System Administrators search the existing spend category. The search result displays a particular spend categories based on search criteria entered.

If the search parameters are not specified, then it displays all the records.

To search a spend category:

1. Enter the search criteria, click **Search**. The search results appear on the **Spend Category** screen based on the search parameters.
OR
Click **Clear** if you want to reset the search parameters.
OR
Click **Cancel** if you want to cancel the transaction.

Spend Category - Search

The screenshot shows the 'Spend Category Maintenance' page in the ZigBank system. At the top, there is a navigation bar with the ZigBank logo and user information: 'Welcome, Jack Johnson' and 'Last login: 06 Jun 04:28 PM'. Below the navigation bar, the page title is 'Spend Category Maintenance'. There are two input fields: 'Category Code' and 'Category Name'. Below these fields are 'Search' and 'Clear' buttons. A table displays the search results with two columns: 'Category Code' and 'Category Name'. The table contains five rows of data. Below the table is a pagination control showing 'Page 1 of 1 (1-5 of 5 items)' and a 'Cancel' button. On the right side of the page, there is a 'Note' section with an icon of a calendar and a 'Create' button. The note text reads: 'These are the various categories amongst which customer's expenses will be mapped. Maintenance of seven categories are allowed and each category will have a unique code. All categories can have subcategories to further bifurcate the expenses. Most common type of expenses can be categorized so that most of the customer's expenses get mapped.'

Category Code	Category Name
001	Monthly expenses
002	Essentials
003	Travel
004	Events
C1	Mobile

Field Description

Field Name Description

Category Code	Unique ID maintained for the spend category.
Category Name	Name of the spend category. Transactions are mapped to the category name to classify spending under each category.

Search Results

Category Code	Category codes of the searched spend categories.
----------------------	--

Field Name	Description
------------	-------------

Category Name	Name of the searched categories.
----------------------	----------------------------------

46.1.2 Spend Category - View

Using spend category view option, the System Administrator can view the spend categories and sub categories.

To view a spend category:

1. Enter the search criteria, click **Search**. The search results appear on the **Spend Category** screen based on the search parameters.
2. Click the **Category Name** link of the record for which you want to view the spend category. The **Spend Category - View** screen appears.

Spend Category - View

The screenshot shows the 'Spend Category Maintenance' interface. It features a table with the following data:

Category Code	001
Category Name	Monthly expenses
Sub Category Code	GAS
Sub Category Name	GAS

Below the table, there is a pagination control showing 'Page 1 of 1 (1 of 1 items)' and navigation buttons: 'Edit', 'Cancel', and 'Back'. A 'Note' box on the right states: 'A user can see the various subcategories maintained for the selected category. A maximum of four subcategories is allowed to be maintained. Each will have a unique code. Customers transactions will be mapped to these subcategories under the category. Selection and maintenance of categories are optional.'

Field Description

Field Name	Description
------------	-------------

Category Code	Unique ID maintained for the spend category
----------------------	---

Category Name	Name of the category. Transactions are mapped to the category name to classify spending under each category.
----------------------	--

Sub Category Details

Field Name	Description
------------	-------------

Sub Category Code	Unique ID maintained for the spend sub-category.
--------------------------	--

Sub Category Name	Name of the subcategory based on the category name. Transactions can be further classified under the sub categories available under a category. For e.g. Spend category name could be Household Expenses and under that, sub categories could be Grocery, Rent etc.
--------------------------	---

- Click **Edit** to if you want to edit the spend category.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to the previous screen.

46.2 Spend Category - Create

Using spend category create option, the System Administrator can create new spend categories and sub categories.

To create a spend category:

- In the **Spend Category** screen, click **Create**. The **Spend Category - Create** screen appears.

Spend Category - Create

The screenshot shows the 'Spend Category Maintenance' interface. At the top, there's a header with the ZigBank logo and user information: 'Welcome, Jack Johnson' and 'Last login: 09 Jun 04:39 PM'. The main content area is titled 'Spend Category Maintenance'. It features a form with the following fields: 'Category Code' (M111) and 'Category Name' (Monthly Expenses). Below this is a section for 'Add Sub Categories (optional)' which contains a table with one row: 'Gas' for both 'Sub Category Code' and 'Sub Category Name'. There is an 'Add' button below the table and 'Save', 'Cancel', and 'Back' buttons at the bottom. A 'Note' box on the right side of the screen contains text explaining that these are various categories for mapping customer expenses, that seven categories are allowed, and that all categories can have subcategories.

Field Description

Field Name	Description
------------	-------------

Category Code	Unique ID maintained for the spend category.
----------------------	--

Field Name	Description
------------	-------------

Category Name	Name of the category. Transactions are mapped to the category name to classify spending under each category.
----------------------	--

Sub Category Details

Sub Category Code	Unique ID maintained for the spend sub-category.
--------------------------	--

Sub Category Name	Name of the subcategory based on the category name. Transactions can be further classified under the sub categories available under a category. For e.g. Spend category name could be Household Expenses and under that, sub categories could be Grocery, Rent etc.
--------------------------	---

2. In the **Category Code** field, enter the code for the spend category.
3. In the **Category Name** field, enter the name of the spend category.
4. In the **Sub Category Details** section, enter the relevant information for subcategories.
5. Repeat step 4 to add more sub categories to a sub category.

Note: You can click  to delete a spend sub category or click **Add** to add more spend sub categories.

6. Click **Save** to save the category and sub category details.
OR
Click **Back** to navigate to previous screen.
OR
Click **Cancel** to cancel the transaction.
7. The **Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Edit** to modify the details.
The user will be navigated back to the create screen.
OR
Click **Cancel** to cancel the transaction.
8. The success message of spend category creation appears.
Click **Ok** to complete the transaction.

46.3 Spend Category - Edit

Using spend category edit option, System Administrator can modify the spend category details.

To edit or update a spend category:

1. Enter the search criteria, click **Search**. The search results appear on the **Spend Category** screen based on the search parameters.
2. Click the **Category Name** link of the record for which you want to edit the spend category. The **Spend Category - View** screen appears.
3. Click **Edit** to edit the spend category. The **Spend Category- Edit** screen appears.
OR
Click **Cancel** to cancel the transaction.

OR
Click **Back** to navigate to the previous screen.

Spend Category - Edit

ZigBank | Welcome, Jack Johnson | Last login 09 Jun 04:59 PM

Spend Category Maintenance

Category Code: 001
Category Name: Monthly expenses

Add Sub Categories (optional)

Subcategory Code	Subcategory Name
GAS	GAS
Electricity	Tata Power

Note

A user can see the various subcategories maintained for the selected category. A maximum of four subcategories is allowed to be maintained. Each will have a unique code. Customers transactions will be mapped to these subcategories under the category. Selection and maintenance of categories are optional.

4. Edit the required details.
5. Click **Save** to update the changes.
OR
Click **Back** to navigate to previous screen.
OR
Click **Cancel** to cancel the transaction.
6. The **Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Edit** to modify the details.
The user will be navigated back to the create screen.
OR
Click **Cancel** to cancel the transaction.
7. The success message of updates appears.
Click **OK** to complete the transaction.

FAQs

1. How many spend categories can a System Administrator can create?

A System Administrator can create maximum of seven categories. However this is a Data base configuration and can be increased or decreased at the time of implementation.

2. How many spend sub-categories can a System Administrator can create?

A System Administrator can create a maximum of four sub-categories under a main category.

3. What is category code used for?

It is used as a unique key to distinguish different categories.

4. How are the transactions being mapped to the categories?

The categories would be linked to a rule engine which will use some keywords in the description of transaction and get mapped to the category or sub category on its own.

47. Goal Category Maintenance

Goal Category maintenance allows the System Administrator to create, modify or expire goal categories. For each of the Goal Category, System Administrator can map the Product under which the goals will be opened. This maintenance is done only for retail type of parties and is not applicable for corporate type of parties. Any time there can be a maximum of 10 categories available and each will have a unique category code.

Administrator created categories needs to be linked with a product which will decide the other key parameters which will govern the Goal category. These parameters would be:

- Goal Amount Range (Minimum and Maximum Value)
- Interest Rate Offered
- Tenure Range (Minimum and Maximum)

Prerequisites

- Transaction access is provided to System Administrator
- Products which needs to be mapped to different categories are well maintained
- Goal categories to be made are limited and cannot be deleted

Workflow

Features Supported In Application

Goal category maintenance available for System administrator include

- Search Goal Category
- Create Goal Category
- Edit Goal Category

How to reach here:

System Administrator Dashboard > Personal Finance > Goal Category
OR

System/ Bank Administrator Dashboard > Toggle Menu > Personal Financial Management > Goal Category

47.1 Goal Category - Search

Using this option, System Administrators can search the existing goal category already created. The search result displays matching results of the goal based on search criteria entered.

If the search parameters are not specified, then it displays all the records. The search criteria comprises of two parameters:

- Category Code
- Category Name

Category code will be a unique code which can be used by administrator to distinguish Goals which can vary on the product mapped.

To search a goal category:

1. Enter the search criteria, click **Search**. The search results appear on the **Goal Category** screen based on the search parameters.
OR
Click **Clear** if you want to reset the search parameters.
OR
Click **Cancel** if you want to cancel the transaction.

Search Goal Category

The screenshot shows the 'Goal Category Maintenance' page in the ZigBank system. At the top, there is a search bar with 'ZigBank' logo and user information 'Welcome, superadmin'. Below the search bar, there are two input fields: 'Category Code' and 'Category Name'. There are 'Search' and 'Clear' buttons. Below the input fields is a table with the following data:

Category Code	Category Name	Product Type	Product	Status
CAR	CAR	TD	TD topup	Active
Education	Education	TD	TD topup	Active
HOME001	Home	TD	goal product	Active
olympics	Olympics tour	TD	goal product	Active
Tour	Tour	TD	TD topup	Active
Travel	Travel	TD	TD topup	Active

Below the table, there is a 'Cancel' button and a pagination indicator 'Page 1 of 1 (1-6 of 6 items)'. To the right of the table, there is a 'Note' section with a calendar icon and the following text:

Note

These are the various categories amongst which customer's goals will be mapped. Each category will have a unique code for easier maintenance.

Each category will have a product mapped to it and the category will have the limits accordingly. Option to have an image linked to the goal is also available.

There is a 'Create' button below the note.

Field Description

Field Name	Description
------------	-------------

Category Code	Unique ID maintained for the category for internal search for bank administrator.
----------------------	---

Category Name	Name of the category.
----------------------	-----------------------

Field Name	Description
------------	-------------

Search Results

Category Code Category code of the searched goal(s).

Category Name Name of the searched category.

Product Type Type of product mapped to the category under which the goals are opened.

Product Name of the product which is mapped to the category.

Status Status of the category, whether it is active or expired.

47.1.2 Goal Category - View

Using Goal category view option, the System Administrator can view the goal categories which already exist.

To view a goal category:

1. Enter the search criteria, click **Search**. The search results appear on the **Goal Category** screen based on the search parameters.

48. Manage Brand

Banks can have varied requirements with regards to the theme and for look and feel of the application.

Manage Brand is an administrative maintenance that allows the System Administrator to define the theme using brand logo, colors, fonts and font sizes.

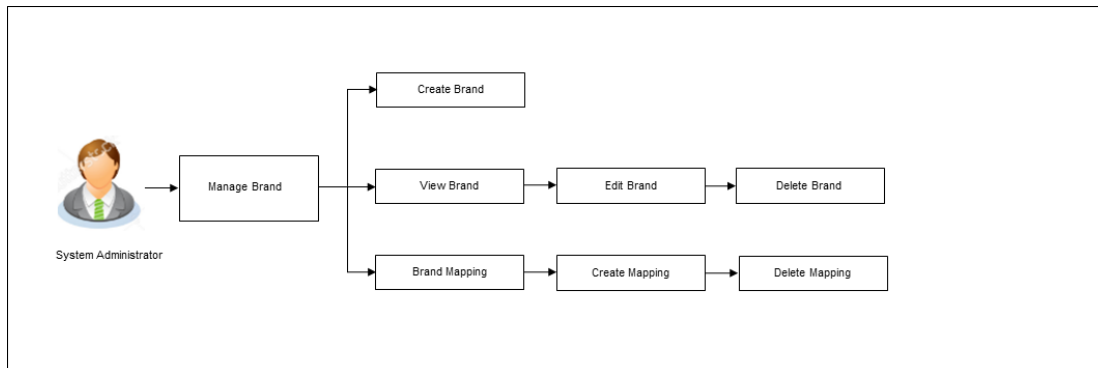

System Administrator can configure the style / theme by selecting brand logo, header, background, label, button and font colors, font type and sizes for header text, menu, buttons etc. The administrator can define multiple themes with the above-mentioned attributes and once defined, the administrator can activate one of the themes from the available list. The administrator defines brand attributes for user segments.

This function also enables the System Administrator to create themes which will be available for Retail user for personalizing his view.

At any point in time, the administrator can deactivate a theme and activate another one.

Prerequisites

- Transaction access is provided to System Administrator

Features supported in application

- [View Brand](#)
- [Create Brand](#)
- [Edit Brand](#)
- [Delete Brand](#)
- [Brand Mapping](#)

How to reach here:

System Administrator Dashboard > User Experience > Manage Brand

OR

System/ Bank Administrator Dashboard > Toggle menu > User Experience > Manage Brand

Manage Brand – Summary

The screenshot displays the 'Manage Brand' interface. At the top, there is a navigation bar with the ZigBank logo, a search icon, a notification icon with '48', and a user profile for 'Wayne Rooney' with a dropdown arrow and the text 'Last login 05 Dec 11:03 AM'. Below the navigation bar, the page title 'Manage Brand' is shown. There are two tabs: 'Brand' (selected) and 'Mapping'. The main content area contains a table with the following data:

Brand Name	Brand Description	Date Created	Actions
AllRetailPFM	AllRetailPFM	12 Nov 2018	View

To the right of the table, there is a 'Brand' section with an icon of a laptop and code symbols. The text reads: 'Customise the application to match a theme for your corporate branding with just a few clicks! Click on create and get going.' Below this text is a 'Create' button.

At the bottom of the page, there is a footer with the text: 'Copyright © 2006, 2017, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

Field Description

Field Name	Description
Brand Name	Displays the theme name as defined.
Brand Description	Displays the theme description as defined.

49. Dashboard Builder

Dashboard Builder provides an ability to the Bank to build custom dashboards.

Dashboard Builder is an administrative maintenance that allows the System Administrator to create and configure dashboard templates for Retail, Corporate and Administrator users.

System Administrator can configure new dashboards by dragging and dropping the desired widget at desired location in template. System administrator can define the dashboard for a user segment, application role, module and for a user type. Facility is provided to search, view, edit and delete the configured dashboards.

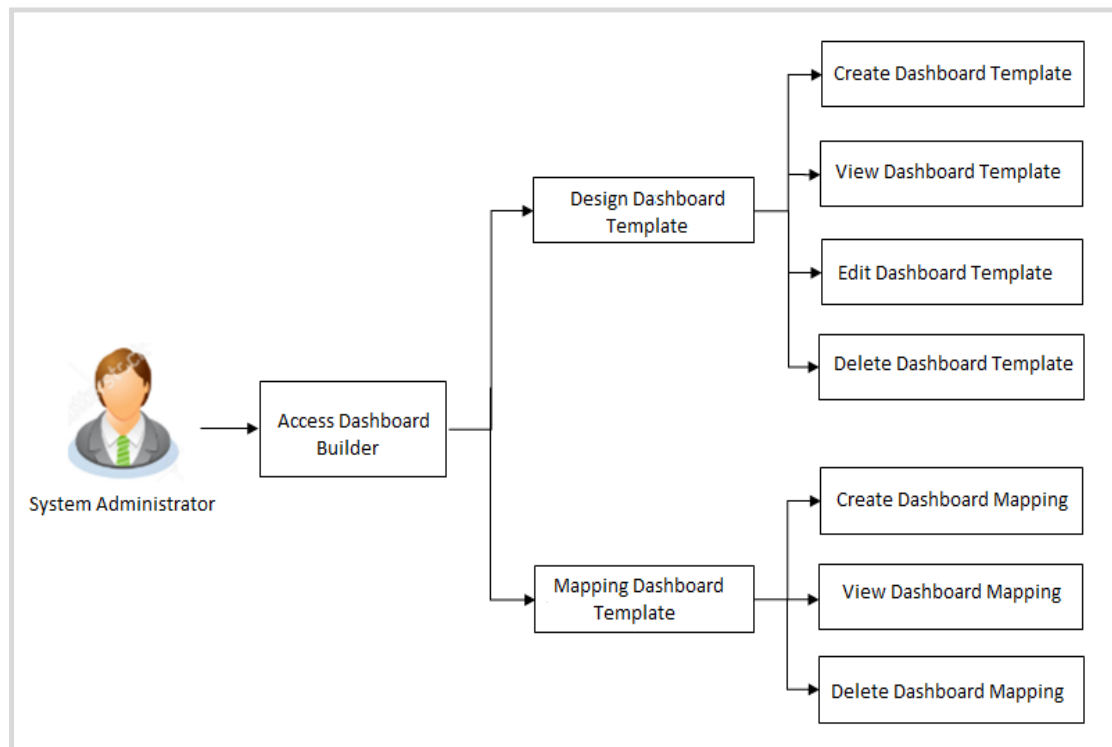

These dashboards are responsive and can adapt to any type of device i.e. desktop, mobile and tablet. System allows the user to design new template and preview it for different types of devices before enabling it. The user can also change the size of the widget (expand and compress) and can remove the widget from the template if desired. The widgets on the dashboard auto adjust itself according to the place available on the dashboard.

The administrator can define multiple dashboards with the various attributes/ widgets. Further these templates can be mapped to the roles, party or even to a specific user.

Prerequisites

- Transaction access is provided to System Administrator
- Approval rule set up for System Administrator to perform the actions
- Application roles are maintained in application and widgets are mapped to application roles

Workflow

Features supported in application

Design

- Create New Dashboard
- View Dashboard
- Edit Dashboard
- Delete Dashboard

Mapping

- View Dashboard Mapping
- Create Dashboard Mapping
- Delete Dashboard Mapping

How to reach here:

System Administrator Dashboard > User Experience > Dashboard Builder
OR

Bank Administrator Dashboard > Toggle Menu > User Experience > Dashboard Builder

Dashboard Builder – Summary

Dashboard Builder- Design summary page displays the list of already designed templates, with template name, description, dashboard type, value and date of creation. The administrator can view the dashboard template details by clicking the View link in the Action column against the respective template.

The screenshot displays the ZigBank Dashboard Builder interface. At the top, the navigation bar includes the ZigBank logo, a search icon, a notification icon with '27', and user information: 'Welcome, rk admin' and 'Last login 18 Mar 11:30 AM'. Below the navigation bar, the page title is 'Dashboard Builder'. There are two tabs: 'Design' (active) and 'Mapping'. Under the 'Design' tab, there are radio buttons for 'User Type' with options: 'Corporate User', 'Administrator' (selected), and 'Retail User'. Below this is a search bar for 'Template Name' with the placeholder text 'Search by Template Name'. The main content area features a table with the following data:

Template Name	Description	Type	Value	Date Created	Actions
Dashboard adminmaker	Factory Dashboard for adminmaker	Application Role	adminmaker	18 Mar 2019	View
Dashboard adminchecker	Factory Dashboard for adminchecker	Application Role	adminchecker	18 Mar 2019	View
Dashboard auditadmin	Factory Dashboard for auditadmin	Application Role	auditadmin	18 Mar 2019	View
Dashboard authadmin	Factory Dashboard for authadmin	Application Role	authadmin	18 Mar 2019	View
UserProfileAdmin	UserProfileAdmin	Application Role	UserProfileAdmin	15 Mar 2019	View

At the bottom of the table area, there are 'Back' and 'Cancel' buttons. On the right side of the page, there is a 'Build your own Dashboard' section with an icon of a computer screen and a 'Create' button. Below the icon, the text reads: 'You can create and configure dashboard templates and reuse them later.'

At the very bottom of the page, there is a footer with the text: 'Copyright © 2006, 2017, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'

Field Description

Field Name	Description
User Type	Specify the user type for which the dashboard template needs to be viewed. The options are: <ul style="list-style-type: none"> • Corporate User • Administrator • Retail User
Template Name	Name of the template that the administrator can enter to view the specific template.
Search Results	
Template Name	Displays the name of the custom dashboard template.
Description	Displays the description as defined for the custom dashboard template.
Type	Displays the type for which the dashboard template is created i.e. application role, segment, user type or module.
Value	Displays the name of the application role / segment / module for which the dashboard template is defined.
Date Created	Displays the date of dashboard template creation.
Actions	The available action buttons against the dashboard template are displayed. The action button can be: <ul style="list-style-type: none"> • View: Click to view the created dashboard template.

-
1. In the **Action** column, click **View** to view the already created dashboard template.
OR
Click Back to navigate to the previous screen.

49.2 Dashboard Builder – View

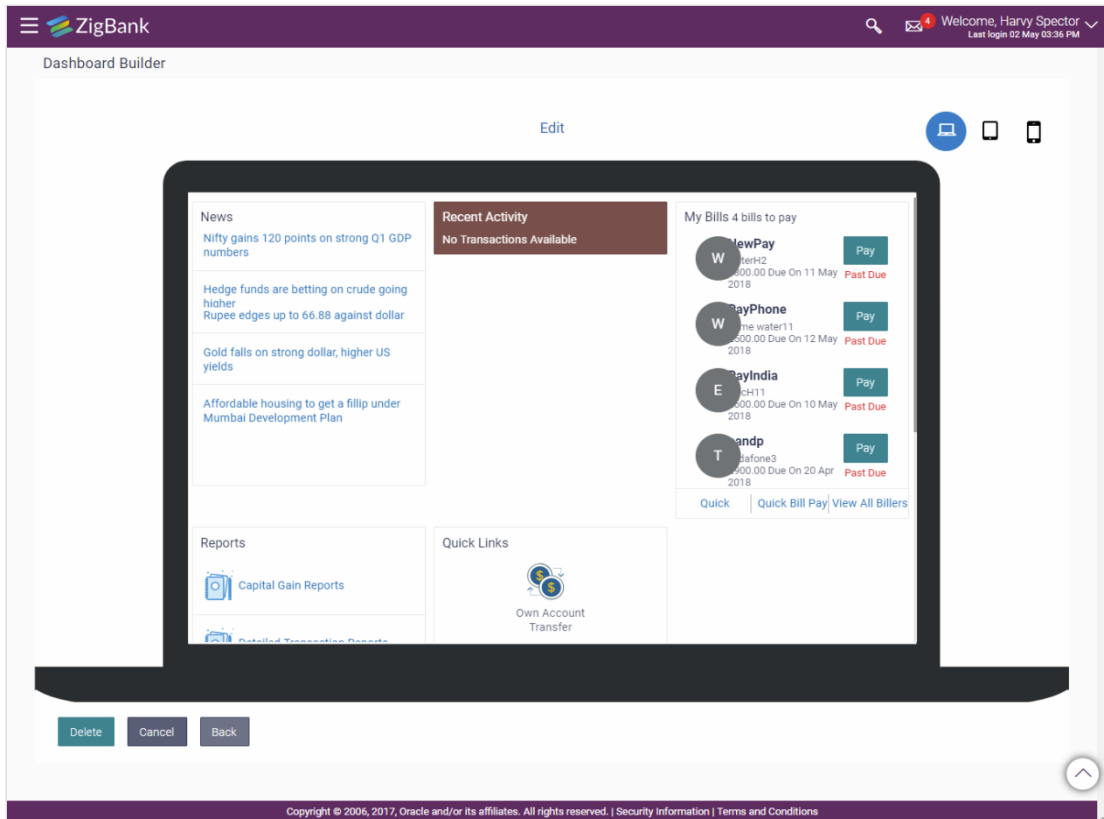

Using this option, System Administrator can view the details of already created dashboard template. The system administrator can view the template in desktop, tablet and for mobile mode by clicking the respective icons.

To search and view a dashboard template:

1. In the **Dashboard Builder – Summary** screen, select the appropriate type of user in the **User Type** field. All the dashboard templates of the selected user type appears on the screen.
OR
In the **Template Name** field, enter the name of the template that you want to search. The searched dashboard template appears on the screen.

2. In the **Action** column, click **View** against the template, which you want to view. The **Dashboard Builder - View** screen appears.
 - OR
 - Click **Back** to navigate to the previous screen.
 - OR
 - Click **Cancel** to cancel the transaction and navigate to the 'Dashboard'.

Dashboard Builder – View

3. Click **Edit** to modify the template. The **Dashboard Builder - Edit** screen appears.
 - OR
 - Click **Delete** to delete the dashboard template.
 - OR
 - Click **Cancel** to cancel the transaction and navigate to the 'Dashboard'.
 - OR
 - Click **Back** to navigate to the previous screen.
 - OR
 - Click the **Desktop/ Tab/ Mobile** icon to view the template in desktop, tab or mobile mode.

49.3 Dashboard Builder – Create

System Administrator can create new custom dashboard template for Retail, Corporate and Administrator user using this option.

As part of creation of custom dashboard, the administrator needs to select the appropriate tab for which the dashboard needs to be created/ designed i.e. user segment or module or application role or user type.

System will facilitate the user with a default dashboard available and the administrator can decide to create a custom dashboard by dragging and dropping new widgets available from the list of widgets.

Following types of dashboard can be created:

- Segment Dashboard - Design dashboard for a user segment
- Application Role Dashboard - Design dashboard for an application role
- Module Dashboard - Design dashboard for the available application modules i.e. CASA, Term Deposit, Loans etc.
- User Type Dashboard - Design dashboard for a user type i.e. Retail, Corporate or Administrator.

To create a new dashboard template:

1. In the **Dashboard Builder** screen, click Create. The **Dashboard Builder** screen appears in create mode.

Dashboard Builder - Create

The screenshot displays the 'Dashboard Builder - Create' interface. At the top, the ZigBank logo and user information 'Welcome, Harry Spector' are visible. The main form area includes the following fields and options:

- Template Name:** RetailDashboardDemoBank
- Template Description:** Retail Dashboard for Demo Bank
- Design:** Checkboxes for Desktop, Tab, and Mobile are all checked.
- Segment Dashboard:** Radio buttons for Corporate User, Administrator, and Retail User. The 'Retail User' option is selected.
- User Type Based Modules:** Three preview thumbnails are shown for Corporate User, Administrator, and Retail User. The 'Retail User' thumbnail is selected.
- Navigation:** 'Next', 'Cancel', and 'Back' buttons are located at the bottom left.

The footer of the page contains the text: Copyright © 2006, 2017, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions

Field Description

Field Name	Description
Template Name	Name of the template that the System Administrator user wants to create.
Template Description	Description for the template.
Design	The type of device on which the template will be enabled.
Select Module	System lists the dashboard for the segments / application roles / user type / module depending on the option selected.
User Type	Select the user type for which the dashboard needs to be created. If dashboard needs to be created for a user segment then user type 'Retail' needs to be selected. User Segment is not supported for Corporate and Administrator user.
Select Module Icon	Select the dashboard icon that is displayed based on the selected segments / application roles / user type / module.
List of Dashboards	System displays the list of dashboards available for selection based on the selected module type.

2. In the **Template Name** field, enter the name of the new template that is to be created.
3. In the **Template Description** field, enter the description of the new template.
4. To enable the template for Desktop/ Tablet / Mobile, select the required options from the **Design** check box.
5. From the **Segment Dashboard/ Application Role Dashboard/ Module Dashboard/ User Type Dashboard** tabs, select the appropriate module. The **Dashboard Builder - Design** screen of the selected module appears.
For example, Retail is selected from the **User Type Dashboard**. The Dashboard Builder - Design template for Retail user appears.
6. In the **User Type** field, select the appropriate user type. If dashboard needs to be created for a user segment then user type 'Retail' needs to be selected. User Segment is not supported for Corporate and Administrator user.
7. Select the appropriate dashboard from the list of dashboards displayed based on the selected module.
8. Click **Next**. The **Dashboard Builder** template screen appears.
OR
Click **Cancel** to cancel the transaction and navigate to the 'Dashboard'.
OR
Click **Back** to navigate to previous screen.

Note: In case of Segment based and application role based dashboard, system will list the widgets based on the mapping of application role(s) to widgets in the Role to Transaction mapping.

System will always display the widgets (for dashboard building) mapped to a combination of application role and internet as touch point (definition in Role Transaction Mapping) irrespective of any device size the user selects.

9. Drag and drop the desired widgets from the widget list.
OR
In the **Search Widget** field, enter the name of the widget that you want to appear on the dashboard and click  .
OR
Drag and drop widgets of the dashboard to the desired location. System highlights the area where the widget can be dropped.
10. Click  on the upper right corner of the widget, if you want to expand the widget.
OR
Click  on the upper right corner of the widget, if you want to compress the widget.
OR
Click  on the upper right corner of the widget, if you want to remove the widget from the dashboard.
11. If the selected widget has multiple widgets on the same like quick links, select the required widget that you want to appear on the dashboard.
12. Click **Save** to save the template.
OR
Click **Cancel** to cancel the transaction and navigate to the 'Dashboard'.
OR
Click **Back** to navigate to previous screen.
13. The **Review** screen appears. Verify the details, and click **Confirm**.
OR
Click the **Desktop/ Tab/ Mobile** icon to review the created template in desktop, tab or mobile mode.
OR
Click **Cancel** to cancel the transaction.
A warning message of canceling the operation appears. Click **Yes** to confirm.
OR
Click **Back** to navigate to previous screen.
14. The success message appears along with the status of transaction.
Click **Ok** to complete the transaction.

49.4 Dashboard Builder – Design – Create Administrator Template

The system administrator can select a default dashboard available for administrator or can create a custom dashboard by dragging and dropping new widgets available from the list of components.

The administrator can create the administrator dashboard template either by selecting the administrative maintenance or group of administrative functions.

As part of administrative maintenances UI component, there are individual transaction quick links put in a single widget and basis on the application role to component mapping available, the administrator user on actual login will be shown only those quick links that his application role has access to.

As part of system functions UI component, there is a logical group of transactions that can placed as a widget on the dashboard by selecting the administrative function from the group.

To create a new administrative dashboard template:

1. In the **Dashboard Builder** screen, click Create. The **Dashboard Builder** screen appears in create mode.

Dashboard Builder - Create Administrator Template

The screenshot displays the 'Dashboard Builder' interface for creating a new administrator template. The top navigation bar includes the 'ZigBank' logo and user information: 'Welcome, Harry Spector' with a last login time of '02 May 12:33 PM'. The main form contains the following fields and options:

- Template Name:** AdministratorDashboardDemoBank
- Template Description:** Administrator Dashboard for Demo Bank
- Design:** Desktop (checked), Tab, Mobile
- Segment Dashboard:** Application Role Dashboard, Module Dashboard, User Type Dashboard
- User Type:** Corporate User, Administrator (selected), Retail User
- User Type Based Modules:** Three preview thumbnails are shown for Corporate User, Administrator, and Retail User.
- Navigation:** Next, Cancel, Back buttons.
- Help:** A blue bubble with the text 'Hey, I am here to help if you need it!' and a circular icon.

Field Description

Field Name	Description
Template Name	Name of the template that the System Administrator user wants to create.
Template Description	Description for the template.
Design	The type of device on which the template will be enabled.

Field Name	Description
Select Module	System lists the dashboard for the segments / application roles / user type / module depending on the option selected.
User Type	Select administrator from the user type list.
List of Dashboards	System displays the list of dashboards available for selection based on the selected module type.

2. In the **Template Name** field, enter the name of the new template that is to be created.
3. In the **Template Description** field, enter the description of the new template.
4. To enable the template for Desktop/ Tablet / Mobile, select the required options from the **Design** check box.
5. From the **Segment Dashboard/ Application Role Dashboard/ Module Dashboard/ User Type Dashboard** tabs, select the appropriate module. The **Dashboard Builder - Design** screen of the selected module appears.
To create a dashboard for a newly created administrator application role or to customize the dashboard for an existing administrator application role, user will need to select Application Role Dashboard/ User Type Dashboard tab.
6. In the **User Type** field, select the administrator user.
7. Select the appropriate dashboard from the list of dashboards displayed based on the selected module.
8. Click **Next**. The **Dashboard Builder - Design** template for Administrator appears.
OR
Click **Cancel** to cancel the transaction and navigate to the 'Dashboard'.
OR
Click **Back** to navigate to previous screen.

Dashboard Builder - Design – Create Administrator Template

The screenshot shows the ZigBank Dashboard Builder interface. At the top, there is a header with the ZigBank logo, a search icon, and user information: "Welcome, Harvy Spector" and "Last login 02 May 02:22 PM". Below the header, the "Dashboard Builder" section displays the following details:

- Dashboard Type: administrator
- Template Name: AdminDashboardforDemoBank
- Description: Admin Dashboard for Demo Bank

The "Desktop" view shows a workspace with several widget panels:

- Onboarding**: User Management, Merchant Management, Biller Onboarding.
- Notifications**: No New Notifications. Check this section for new notifications. View All.
- Communications**: User Group Subject Mapping, Alerts Maintenance, Mailers.
- Security**: Authentication, Security Question Maintenance, Password Policy Maintenance.
- Limits**: Limit Definition, Limit Package Management, User Limits.

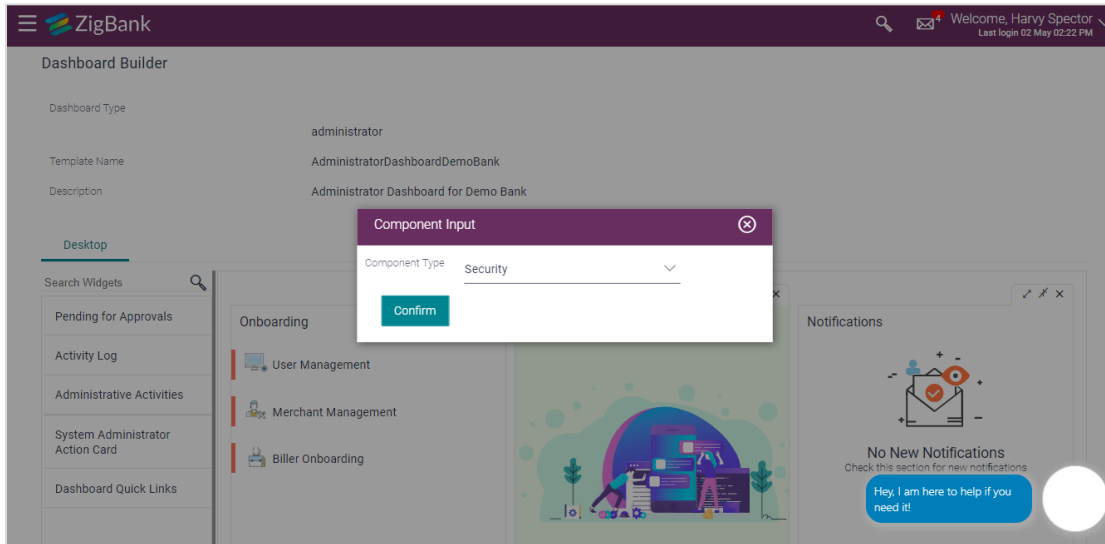

At the bottom of the workspace, there is a search bar and a table with the following columns: Corporate, Administrative Maintenance, Bulk File Administrator, Bulk Record Administrator, Date, Description, Party Name, Reference No, Status. The table currently displays "No data to display." and "Page 1 (0 of 0 Items)".

At the bottom of the interface, there are "Save", "Cancel", and "Back" buttons. The footer contains the copyright notice: "Copyright © 2006, 2017, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions".

9. Drag and drop the desired widgets from the widget list.
OR
In the **Search Widget** field, enter the name of the widget that you want to appear on the dashboard and click .
OR
Drag and drop widgets of the dashboard to the desired location. System highlights the area where the widget can be dropped.
10. Click  on the upper right corner of the widget, if you want to expand the widget.
OR
Click  on the upper right corner of the widget, if you want to compress the widget.
OR
Click  on the upper right corner of the widget, if you want to remove the widget from the dashboard.

11. If the selected widget has multiple widgets on the same component like 'System Administrator Action Card', select the required widget that you want to appear on the dashboard.

Dashboard Builder - Component Input box

Field Description

Field Name	Description
Component Type	Select the component type, which you want to appear on your dashboard. This field is applicable only if the selected widget has multiple components.

- t. From the **Component Type** list, select the widget component that you want to appear on the dashboard.
 - u. Click **Confirm**. The selected component appears as a widget on the selected location of your dashboard.
12. Click **Save** to save the template.
OR
Click **Cancel** to cancel the transaction and navigate to the 'Dashboard'.
OR
Click **Back** to navigate to previous screen.
13. The **Review** screen appears. Verify the details, and click Confirm.
OR
Click Cancel to cancel the transaction and navigate to the 'Dashboard'.
OR
Click Back to navigate to previous screen.
OR
Click the **Desktop/ Tab/ Mobile** icon to review the template in desktop, tab or mobile mode.
14. The success message appears.
Click **Go to Dashboard** to view your customized dashboard.

49.5 Dashboard Builder – Edit

The system administrator can modify the configured dashboard using the Edit option. The administrator can edit the dashboard widgets for desktop, tablet or mobile devices by clicking the specific icons.

Note:

- 1) Dashboard Builder - Edit section is common for Administrator user and business users.
 - 2) System Administrator will not be able to edit the factory shipped dashboards.
-

To edit the configured dashboard:

1. In the **Dashboard Builder - Summary** screen, click the **View** link, against the dashboard, which you want to edit. The **Dashboard Builder - View** screen appears.
2. Click the **Edit** link to modify the dashboard template. The **Dashboard Builder** screen appears in edit mode.
 - OR
 - Click the **Desktop/ Tablet/ Mobile** icon to edit the template in desktop, tablet or mobile mode.
 - OR
 - Click Delete to delete the dashboard template.
 - OR
 - Click Cancel to cancel the transaction.
 - OR
 - Click Back to navigate to the previous screen.

3. Drag and drop widgets from the widget list if required.
4. Click  on the upper right corner of the widget, if you want to expand the widget.
OR
Click  on the upper right corner of the widget, if you want to compress the widget.
OR
Click  on the upper right corner of the widget, if you want to remove the widget from the dashboard.
5. Click **Save** to save the changes.
OR
Click **Cancel** to cancel the transaction and navigate to the 'Dashboard'.
OR
Click **Back** to navigate to previous screen.
6. The **Review** screen appears. Verify the details, and click Confirm.
OR
Click the **Desktop/ Tablet/ Mobile** icon to review the template in desktop, tablet or mobile mode.
OR
Click **Edit** to make the changes if any for the selected device type.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to previous screen.
7. The success message appears along with the status of transaction.
Click **Ok** to complete the transaction.

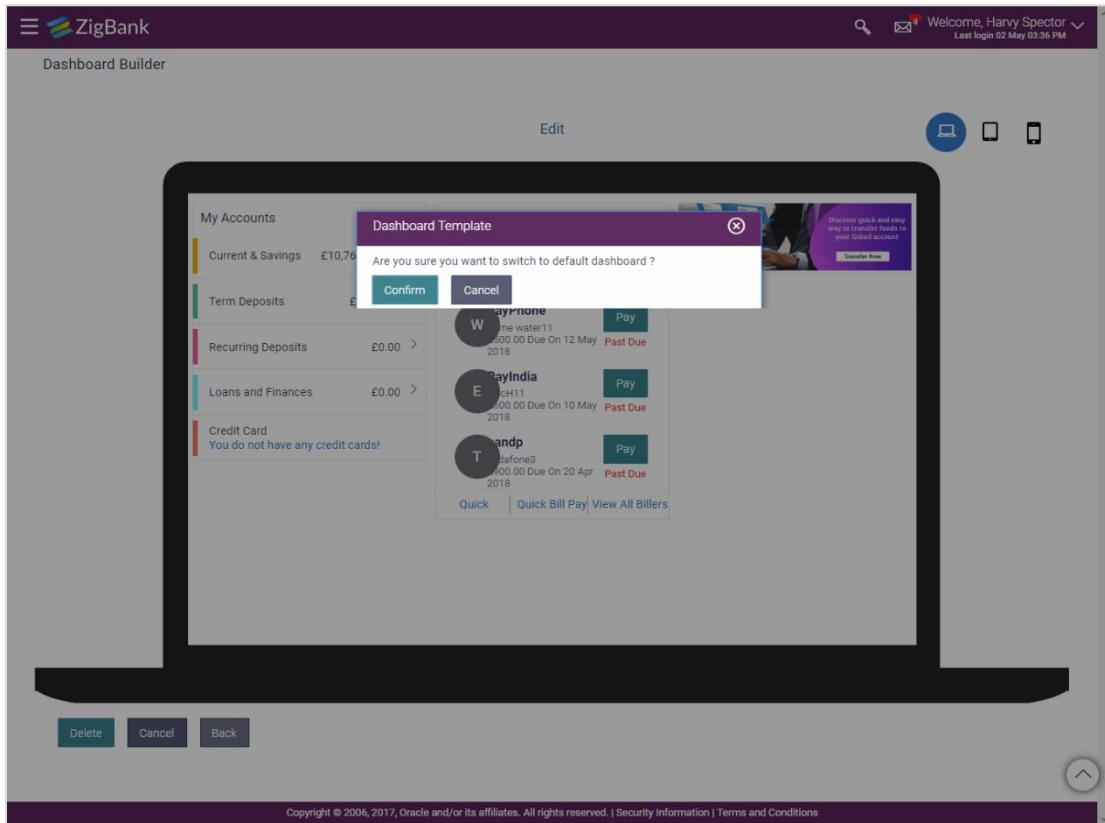

49.6 Dashboard Builder – Delete

The System Administrator can delete the custom dashboard templates maintained in the application. Deleting specific template will also result in deleting the template and revert back to the default dashboard.

To delete the configured dashboard:

1. In the **Dashboard Builder - Summary** screen, click the **View** link, against the dashboard that you want to delete. The **Dashboard Builder - View** screen appears.
2. Click **Delete**. The application prompts the administrator with a warning message 'Are you sure you want to switch to default dashboard' with an option of Confirm / Cancel.

Dashboard Builder - Delete

3. Click **Confirm** to proceed with the deletion request.
It will navigate to confirmation page with a success message along with the status and reference number.
OR
Click **Cancel** if you do not wish to proceed with deletion.
4. Click **OK** to complete the transaction.

49.7 Dashboard Mapping – Summary

Using this option, System Administrator can map the configured dashboards to the user or party, or user type or user segments depending on the dashboard template selected. The system administrator can create mapping and can delete the mapping.

To view the Dashboard mapping summary:

1. In the **Dashboard Builder** screen, click the **Mapping** tab. The **Dashboard Builder - Mapping** summary screen appears.

Dashboard Mapping Summary

The screenshot displays the 'Dashboard Builder' interface with the 'Mapping' tab selected. The page header includes the 'ZigBank' logo, a search icon, a notification icon with '617', and a user welcome message: 'Welcome, Administrator User' with a last login time of '07 Dec 09:53 AM'. Below the header, the 'Dashboard Builder' title is shown, followed by 'Design' and 'Mapping' tabs. A 'Mapping Type' dropdown menu is set to 'User'. The main content area features a table with the following data:

Dashboard Name	Dashboard Type	Mapped Value	Date Created	Actions
SegmentLDashboard	Segment Dashboard	SGUser8	30 Nov 2018	Delete
SegmentLDashboard	Segment Dashboard	SGUser7	30 Nov 2018	Delete
SegmentLDashboard	Segment Dashboard	SGUser6	30 Nov 2018	Delete
SegmentLDashboard	Segment Dashboard	SGUser5	30 Nov 2018	Delete
SegmentLDashboard	Segment Dashboard	SGUser4	30 Nov 2018	Delete
SegmentLDashboard	Segment Dashboard	SGUser3	30 Nov 2018	Delete
SegmentLDashboard	Segment Dashboard	SGUser2	30 Nov 2018	Delete
SegmentLDashboard	Segment Dashboard	SGUser1	30 Nov 2018	Delete
CASA1	Segment Dashboard	davidw2	30 Oct 2018	Delete
CASA1	Segment Dashboard	davidw	30 Oct 2018	Delete

To the right of the table is a 'Mapping your templates' section with an icon of a hand pointing to a screen. It contains the text: 'One dashboard template can be linked to multiple User, Party, Role or Entity. Click below to start mapping your templates.' and a 'Create Mapping' button. At the bottom of the page, a footer contains the copyright notice: 'Copyright © 2006, 2017, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

Field Description

Field Name	Description
Mapping Type	Select the mapping type to search the dashboard template. The options are: <ul style="list-style-type: none"> • User • Party • Segment • User Type

Field Name	Description
Dashboard Name	System displays the name of the dashboard template.
Dashboard Type	System displays the type of the dashboard i.e. module / application role / user type.
Mapped Value	<p>System displays the value that is mapped to the template.</p> <p>In case if the dashboard is mapped to the user, user ID to whom the dashboard is mapped will be shown as mapped value.</p> <p>In case if the dashboard is mapped to the party, party ID to whom the dashboard is mapped will be shown as mapped value.</p> <p>In case if the dashboard is mapped to the Role, role name to whom the dashboard is mapped will be shown as mapped value.</p>
Date Created	The date on which template mapping was created.
Actions	Link to delete the mapping.

- From the **Mapping Type** list, select the appropriate option for which you want to view the mapping. The **Dashboard Builder - Mapping Summary** screen appears.

49.7.2 Create Mapping

Using this option, System Administrator selects the dashboard type, the dashboard template and then map either to a user/party/user segment/user type. The mapping type will depend on the type of dashboard selected.

To map dashboard templates:

- In the **Dashboard Builder - Mapping** tab, click Create Mapping. The **Dashboard Builder - Create Mapping** screen appears.

Create Mapping

The screenshot shows the 'Create Mapping' interface. At the top, there's a navigation bar with the ZigBank logo and user information: 'Welcome, Administrator User' and 'Last login 07 Dec 09:53 AM'. The main form area has the following fields:

- Dashboard Type:** Segment Dashboard (dropdown)
- User Type:** Retail User (dropdown)
- Template:** 30810 SegmentL.Dashboard (dropdown)
- Mapping Type:** Party (dropdown)
- Mapping Value:** AJAY (retailuser) with a 'Party Search' button

At the bottom of the form are three buttons: 'Save', 'Cancel', and 'Back'. To the right of the form, there is a callout box titled 'Mapping your templates' with an icon of a hand pointing to a screen. The text inside the callout says: 'One dashboard template can be linked to multiple User, Party, Role or Entity.'

At the very bottom of the page, there is a small copyright notice: 'Copyright © 2006, 2017, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'

Field Description

Field Name	Description
Dashboard Type	Select the dashboard type that is to be mapped.
User Type	Select the user type for which the dashboard template needs to be mapped.
Template	Select the template from the list that needs to be mapped.
Mapping Type	Select the mapping type i.e. the selected dashboard template to map to the required option. The options are: <ul style="list-style-type: none"> • User • Party • Segment • User Type <p>The mapping type options will also depend on the dashboard type selected i.e. for user type dashboard, system will not have options of User, Party and Segment</p>

Field Name	Description
Mapping Value	The mapping value will depend on the option selected in the mapping type. For Party selected in the mapping type, the admin can capture the party for which the dashboard template is applicable. For user selected in the mapping type, the admin can capture the user for which the dashboard template is applicable. For segment selected as the mapping type, admin can capture the segment for which the dashboard template is applicable.
Party ID	Party Id to search a party that is to be mapped to the dashboard template. This field appears if you select Party option from the Mapping Type list.
Party Name	Party name to search a party that is to be mapped to the dashboard template. This field appears if you select Party option from the Mapping Type list.
User ID	User ID that is to be mapped to the dashboard template. This field appears if you select User option from the Mapping Type list.
Select Segment	Select the user segment that is to be mapped to the dashboard template. This field appears if you select Segment option from the Mapping Type list.

2. From the **Dashboard Type**, select the appropriate dashboard type i.e. Application Role Dashboard or Segment Dashboard or Module Dashboard or User Type Dashboard.
3. From the **User Type**, select the user type for which the Template mapping needs to be done.
4. Select the Template from the list that needs to be mapped.
5. From the **Mapping Type** list, select the appropriate option to be mapped.
 - a. If you select **User** option, enter the user name.
 - b. If you select **Party** option, enter the party Id in the **Party ID** field, and click Search. The Mapping Value appears. Click link under the Party ID column to view the party details.
OR
In the **Party Name** field enter the party name and click Search. The Mapping Value appears. Click link under the Party ID column to view the party details.
OR
Click Cancel to cancel the transaction.
OR
Click Clear to clear the entered value.
 - c. If you select **Segment** option, select the role from the **User Segment** list.
6. Click **Save**.
The success message along with the status of transaction appears.

49.7.3 Delete Mapping

Using this option System Administrator can delete the templates mapped to a User or Party or User Segment or to a User Type.

To delete the mapped dashboard template:

1. In the **Dashboard Builder** screen, click the **Mapping** tab. The **Dashboard Builder - Mapping** summary screen appears.
2. Select the **Mapping Type** from the list i.e. User / Party / Segment / User Type
3. In the **Action** column, click **Delete** against the template mapping that you want to delete. The application will prompt the administrator with a deletion message with an option of Confirm/Cancel.

Delete Mapping

The screenshot shows the 'Dashboard Builder' interface with the 'Mapping' tab selected. The 'Mapping Type' is set to 'User'. A table lists several dashboard mappings, each with a 'Delete' link in the 'Actions' column. A modal dialog is displayed over the table, asking for confirmation to delete a mapping. The dialog has a title 'Delete Mapping' and a close button. The main content of the dialog asks 'Are you sure you want to Delete?' and provides 'Confirm' and 'Cancel' buttons. The background of the application is dimmed.

Dashboard Name	Dashboard Type	Mapped Value	Date Created	Actions
SegmentL.Dashboard	Segment Dashboard	SGUser8	30 Nov 2018	Delete
SegmentL.Dashboard	Segment Dashboard	SGUser7	30 Nov 2018	Delete
SegmentL.Dashboard	Segment Dashboard	SGUser6	30 Nov 2018	Delete
SegmentL.Dashboard	Segment Dashboard			
SegmentL.Dashboard	Segment Dashboard			
SegmentL.Dashboard	Segment Dashboard			
SegmentL.Dashboard	Segment Dashboard			
SegmentL.Dashboard	Segment Dashboard	SGUser1	30 Nov 2018	Delete
CASA1	Segment Dashboard	davidw2	30 Oct 2018	Delete
CASA1	Segment Dashboard	davidw	30 Oct 2018	Delete

4. Click **Confirm** to delete the mapping. It will navigate to confirmation page with a success message and the status.
OR
Click **Cancel** if you do not wish to delete the mapping.
5. Click **OK** to complete the transaction.

FAQs

1. Can I design new widgets using Dashboard Builder functionality?

No, designing of a new widget is not allowed using this functionality. Administrator can use the existing widgets and can design the required dashboard.

2. Can I design different dashboards for different device types (desktop, mobile and tablet) using one template?

Yes, you can design different dashboards for different types of devices using one template. An edit option is available while previewing the dashboard on each type of device, which will help the user to make the necessary changes for specific device type.

However the system will always display the widgets mapped to a combination of application role and internet as touch point, irrespective of any device size the user selects

3. Can I delete the template that is mapped to a user / party / segment / user type?

Yes, you can delete the template that are already mapped to a user / party / segment or user type. A warning message informing about the mapping deletion is shown to the administrator while deleting a template.

4. Can I map the same template to multiple users or parties?

Yes, you can map the same template to multiple parties or users. Separate entries are required for such mapping.

5. Can I design the dashboard and map for administrator types of users (Bank/system administrator and corporate administrator)?

Yes, you can design the administrative dashboards using Dashboard Builder maintenance.

6. When will the newly mapped dashboard be visible to the end customer?

Newly mapped dashboard will be available to the end user with an immediate effect.

7. Can an end user (Retail/Corporate users) design their own dashboards or set their preferences to see required widgets?

Only **Retail** users can personalize and design their main dashboard. **Corporate** users cannot personalize their dashboards.

8. In case of dashboard templates available at user level, segment level, application role level and user type level, which dashboard will the system resolve? Also what is the order in which the dashboards are resolved?

If there is a dashboard template mapped at a user level, then the system will display the user level dashboard on login.

Before rendering the dashboard, system will first check if there is a dashboard at user level, followed by segment, application role and then at user type.

In case where a retail user has personalize his/her dashboard, the system will give the priority to user defined dashboard followed by Administrator defined dashboards as user, segment, application role and then at user type.

[Home](#)

50. Relationship Maintenance

Customer Relationship Maintenance enables the System Administrator to set up the transaction access logic for Bank's retail customers from Digital Banking Platform based on their account - mode of operation or relationship.

E.g. If a customer relationship (Mode of operation) is 'Either or Survivor', provide an access of all transactions whereas, if a customer relationship (Mode of operation) is 'Jointly', provide an access of all Inquiries and restrict all financial transactions from Digital Banking Platform. Such account and transaction access rules can be set up by the System Administrator using 'Relationship Maintenance Module'.

This account relationship maintenance is a two-step process.

- Relationship Mapping Maintenance - Using this maintenance System Administrator can map OBAPI relationship codes with core banking relationship codes
- Relationship Matrix Definition - Using this maintenance System Administrator can define the transaction access based on the account relationships

50.1 Relationship Mapping

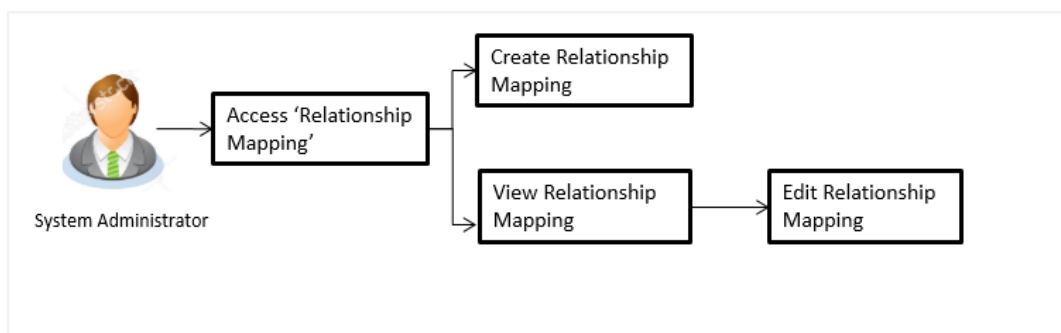

Using this option a System Administrator can map OBAPI account relationship codes with account relationship codes defined in Core Banking Application so that the corresponding matrix defined in OBAPI will be followed based on the available account relationship in the core application.

Note: The relationship matrix maintenance is done using **Relationship Matrix Maintenance** transaction.

Prerequisites

- Transaction access is provided to System Administrator.
- Account relationship codes are maintained in OBAPI and in Core Banking Application.

Workflow

Features supported in application

The administrator can perform the following actions:

- Create Relationship Mapping

- Search/ View Relationship Mapping
- Edit Relationship Mapping

How to reach here:

System Administrator Dashboard > Controls & Monitoring > Relationship Mapping

OR

System Administrator Dashboard > Toggle Menu > Controls & Monitoring > Relationship Mapping

50.1.1 Relationship Mapping Maintenance - View

By accessing this menu option, System Administrator can view the account relationship codes maintained in OBAPI and paired with the codes maintained in Core Banking Application

Relationship code maintained in OBAPI appears on left side of the screen and paired codes if any appears on right side of the screen

1. All the relationships maintained under user account appears on **Relationship Mapping Maintenance** screen.

OR

Click **Edit** to edit the maintenance.

OR

Click **Cancel** to cancel the transaction.

Note: Instead of the **Edit** option, the **Save** option available if user is accessing it for the first time.

Relationship Mapping Maintenance

The screenshot shows the 'Relationship Mapping Maintenance' page. At the top, there is a navigation bar with the ZigBank logo, search, mail, and user profile icons. The user is identified as 'superadmin' with a last login of '22 May 12:05 AM'. The main content area is titled 'Relationship Mapping Maintenance' and contains a table with two columns: 'Relationship Name and ID' and 'Map Relationship'. The table lists 20 relationship types, each with a checkbox in the first column and a greyed-out input field in the second. A dialog box on the right side of the table asks 'Want to map relationship?' and includes the text 'Please maintain account relationship matrix to control the transaction access.' At the bottom left of the table, there are 'Save' and 'Cancel' buttons. A footer at the bottom of the page contains copyright information: 'Copyright © 2006, 2017, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

Field Description

Field Name	Description
Relationship Name and ID	Lists all the relationships maintained in OBAPI.
Map Relationship	Lists all the relationships maintained in Core Banking Application.

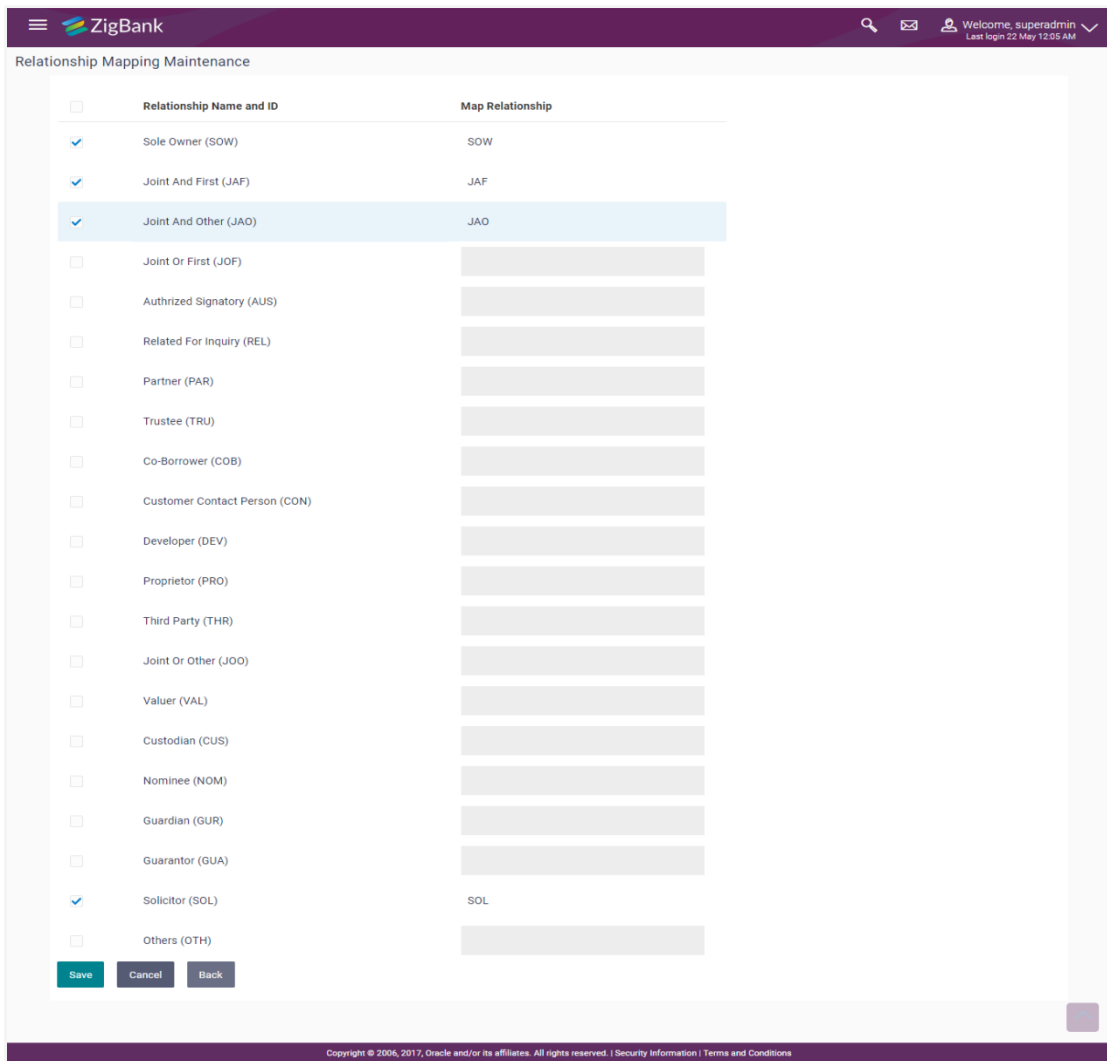

50.1.2 Relationship Mapping Maintenance - Edit

Using this option, System Administrator is allowed to map the newly added relationship codes with the codes defined in core application. As well as System Administrator can remove the relationship codes which are selected from the default list.

To modify relation mapping:

1. Navigating to **Relationship Mapping Maintenance** screen, application displays the All the relationships maintained under user account.
2. Click **Edit** to edit the maintenance.
OR
Click **Cancel** to cancel the transaction.

Relationship Mapping Maintenance - Edit

Field Description

Field Name	Description
Relationship Name and ID	To map the OBAPI relationships with the relationship codes available in the Core Banking system. Note: Lists all the relationships maintained in OBAPI.
Map Relationship	Relationship ID to be mapped with OBAPI relationship ID. Note: Lists all the relationships maintained in Core Banking Application. If an existing mapping is available, a value will be shown in Map Relation field.

1. Select the checkbox against **Relationship Name and ID** to map Core Banking relationships to OBAPI relationships.

Note:

- 1) Select the checkbox adjacent to **Relationship Name and ID** in header row to select all relationships in one instance.
 - 2) To unmap the relation mapping, uncheck the checkbox
2. In the **Map Relationship** field, enter the relationships value as maintained in Core Banking Application.
 3. Click **Save** to save the relationship mapping maintenance.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate back to previous screen.
 4. The **Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate back to previous screen.
 5. The success message of Relationship Mapping Maintenance saved successfully appears along with the transaction reference number.
Click **OK** to complete the transaction.

[Home](#)

50.2 Relationship Matrix

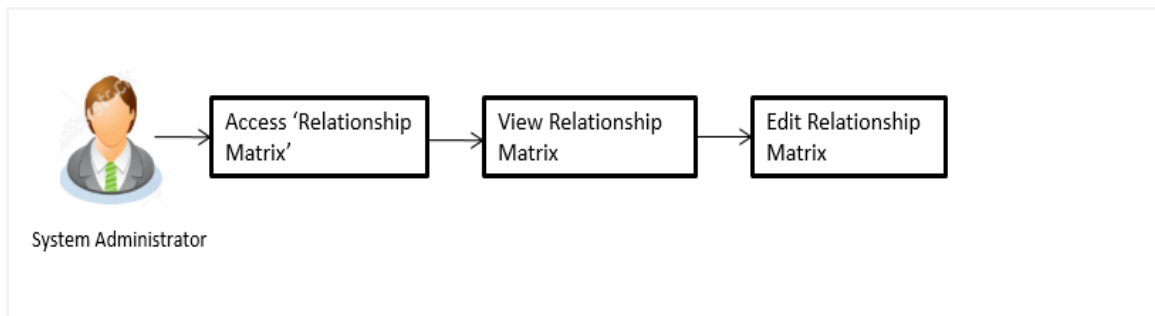

Relationship Matrix maintenance allows the System Administrator to define the transaction access based on the account relationships. Administrator can enable or disable each transaction for each relationship code.

OBAPI first checks if the transaction is mapped to the role attached to the user and then if it is enabled in relationship matrix. If both the conditions are satisfied, an access of a transaction and of an account is provided to the user.

Prerequisites

- Transaction access is provided to System Administrator.
- Approval rule set up for System Administrator to perform the actions.
- Account relationship codes are maintained in OBAPI and in Core Banking Application.
- Relationship mapping (mapping of OBAPI relationship codes with codes maintained in Core Banking application) is maintained.

Workflow

Features supported in application

The administrator can perform the following actions:

- View Relationship Matrix
- Edit Relationship Matrix

How to reach here:

System Administrator Dashboard > Controls & Monitoring > Relationship Matrix Maintenance

50.2.1 Relationship Matrix Maintenance - View

Based on the account relationship and transaction access matrix, System Administrator will know the account relationships IDs for which the channel access has been granted.

To view relationship matrix:

1. Displays the details maintained under user account relationship and transaction access matrix in **Relationship Matrix Maintenance - View** screen.
OR
Click **Edit** to modify the maintenance.
OR
Click **Cancel** to cancel the transaction.

Note: Instead of the **Edit** option, the **Save** option available if user is accessing it for the first time.

Relationship Matrix Maintenance - View

The screenshot shows the 'Relationship Matrix Maintenance' interface. At the top, there is a navigation bar with the ZigBank logo and user information: 'Welcome, superadmin' and 'Last login 24 May 02:51 AM'. Below the navigation bar, there are tabs for 'Current and Savings', 'Term Deposits', 'Loans', and 'Credit Cards'. The 'Current and Savings' tab is active. The main area contains a table with the following columns: 'Transactions', 'Others (OTH)', 'Sole Owner (SOW)', 'Joint Or First (JOF)', 'Joint Or Other (JOO)', 'Joint And Other (JAO)', 'Joint And First (JAF)', and 'Solicitor (SOL)'. The table lists various transactions with checkboxes indicating access permissions. At the bottom of the table, there are 'Save' and 'Cancel' buttons. A footer at the bottom of the page reads: 'Copyright © 2006, 2017, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

Field Description

Field Name Description

Module Name Name of the module under which all transactions are maintained for Relationship Matrix.

- Current and Savings
- Deposits
- Loans
- Credit Cards

Transaction Name Lists all the transactions under a specific module for which a channel access has been granted based on account relationship and transaction access matrix.

Under each module transactions are mainly grouped as:

- Inquiry
- Transactions

Field Name	Description
Relationship ID	Lists all the relationship IDs maintained in OBAPI for which the codes available in core banking application are mapped.

50.2.2 Relationship Matrix Maintenance - Edit

Using this option, System Administrator can modify the account relationship and transaction access matrix.

To modify relationship matrix:

1. Displays the details maintained under user account relationship and transaction access matrix in **Relationship Matrix Maintenance - View** screen.
2. Click **Edit** to modify the maintenance.
The **Relationship Matrix Maintenance - Edit** screen appears.

Relationship Matrix Maintenance - Edit

The screenshot shows the 'Relationship Matrix Maintenance' screen in the ZigBank application. The page title is 'Relationship Matrix Maintenance'. There are four tabs: 'Current and Savings', 'Term Deposits', 'Loans', and 'Credit Cards'. The 'Current and Savings' tab is active. Below the tabs is a table with the following columns: 'Transactions', 'Others (OTH)', 'Sole Owner (SOW)', 'Joint Or First (JOF)', 'Joint Or Other (JOO)', 'Joint And Other (JAO)', 'Joint And First (JAF)', and 'Solicitor (SOL)'. The table contains several rows of transaction types with checkboxes indicating access permissions. At the bottom of the table are 'Save', 'Cancel', and 'Back' buttons. The footer of the application shows 'Copyright © 2006, 2017, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

Field Description

Field Name	Description
Module Name	Name of the module under which all transactions are maintained for Relationship Matrix. <ul style="list-style-type: none"> • Current and Savings • Deposits • Loans • Credit Cards
Transaction Name	Lists all the transactions of a specific account for which a channel access has been granted based on account relationship and transaction access matrix. The transaction categories are: <ul style="list-style-type: none"> • Inquiry • Transactions Select/ deselect the transactions to maintain relationship matrix.
Relationship ID	Lists all the relationship IDs maintained in OBAPI for which the codes available in core banking application are mapped.

3. Select the check box available in the header of transaction category (Inquiry and Transactions), to select all transactions for selected category in one instance.
OR
Select the check box available against the **Relationship ID** for each transaction.

Note:

- 1) Select / deselect the check box against the Transaction category (Inquiry and Transactions) to select all transactions under it.
 - 2) To unmap the relation mapping, deselect the check box.
-
4. Repeat step 2 for all modules as per requirement.
 5. Click **Save** to save the relationship matrix maintenance.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate back to the previous screen.
 6. The **Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate back to previous screen.
 7. The success message of Relationship Matrix Maintenance saved successfully appears along with the transaction reference number.
Click **OK** to complete the transaction.

FAQs

1. Is relationship mapping a mandatory step?

Yes, relationship mapping is a mandatory step, without which the accounts will not be fetched from the core banking application.

2. Will all transactions available be listed under a respective module on relationship matrix screen?

Transactions for which the Customer Relationship Matrix maintenance flag is enabled in 'Transaction Aspects' screen will be listed under the respective modules.

3. Will a user get the access of a transaction and of an account, based on the relationship matrix definition?

No, OBAPI first checks if the transaction is mapped to the role attached to the user and then if it is enabled in relationship matrix. If both the conditions are satisfied, access of the transaction and of account is provided to the user.

4. What will happen if an inquiry access for current and savings accounts module have been granted for a specific relationship code e.g. JAF (Joint and First) and not provided for a non-inquiry transactions?

In the above case user having an account with the relationship code JAF, will be able to access all inquiry transactions from digital platform but the account will not be listed in non-inquiry transaction screen.

51. Transaction Blackout

A blackout period is duration of time when access to something usually available is prohibited.

When a System Administrator maintains a transaction blackout, for a period, transaction/s are not accessible to users of the bank's retail and corporate or even to the administrator users for a preset time period.

The system administrator may use the time, when a transaction is blacked-out, to do necessary maintenances.

Pre-Requisites

- Transaction access is provided to System Administrator.
- Approval rule set up for system administrator to perform the actions.

Workflow

Access Transaction (during blackout) – Blackout message needs to be displayed

Check the flow, message part is against access of transaction outside blackout period.

Features Supported In Application

The following options are available as part of this maintenance:

- Create a new Transaction Blackout Maintenance
- Search and View Transaction blackouts already maintained
- Delete or Edit transaction blackouts maintained.

How to reach here:

System Administrator Dashboard > Controls & Monitoring> Transaction Blackout
OR

System/ Bank Administrator Dashboard > Toggle Menu > Controls & Monitoring> Transaction Blackout

51.1 Transaction Blackout - Search

This function allows the System Administrator to search for transactions under a particular user type and also to create a new Transaction blackout. The search is available on the basis of User type, Transaction Type, Transaction and date. The search result displays only those transactions under a user type for which the 'Transaction Blackout' is maintained.

To search for transactions under a particular user type:

1. Enter the search criteria.
2. Click **Search**, displays results based on search criteria.
OR
Click **Clear** to reset the details.
OR
Click **Cancel** to cancel the transaction.

Transaction Blackout- Search

The screenshot shows the 'Transaction Blackout' search interface. At the top, there's a header with the ZigBank logo and user information: 'Welcome, Administrator User' and 'Last login 18 Jun 09:31 AM'. Below the header, the search criteria are set as follows: Date is 'Select date', Transaction Type is 'Inquiries', User Type is 'Retail User', and Transaction is 'Account Details'. There are 'Search' and 'Clear' buttons. Below the search criteria, a table displays the results:

Transaction	Start Date	End Date	Blackout Type	Status
Account Details	19 Jun 2018	28 Jun 2018	Full	Scheduled

There is also a 'Cancel' button below the table. On the right side, there is a 'Transaction Blackout' section with a calendar icon and a 'Create' button. The text in this section reads: 'Make transactions inaccessible to customers for periods when maintenance is planned by setting up transaction blackout. Search for an existing blackout to view and edit or delete the maintenance. Click on the Create option provided to the setup a new transaction blackout maintenance.'

At the bottom of the page, there is a copyright notice: 'Copyright © 2006, 2017, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'

Field Description

Field Name	Description
------------	-------------

Date	Date of the transaction blackout.
User Type	The type of user for whom the transaction is blacked out. The user types could be: <ul style="list-style-type: none"> • Corporate User • Administrator • Retail User
	Prospect

Field Name	Description
Transaction Type	Transaction type to be blacked out. The options are: <ul style="list-style-type: none"> • Maintenances • Administration • Inquiries • Non-Financial • Financial
Transaction	The specific transaction, for which a blackout is maintained. Transactions list displayed here gets populated basis on the transaction type selected in the previous field.
Search Result	
Transaction	The specific transaction, for which a blackout is maintained
Start Date	Start date for the blackout.
End Date	End date for the blackout.
Blackout Type	Type of black out. <ul style="list-style-type: none"> • Full: Indicates that it will be complete transaction blackout for the set date and time. • Daily: Indicates that it will be daily blackout for the set date and time.
Status	The transaction blackout status. The options are: <ul style="list-style-type: none"> • Ongoing: Indicates that blackout is ongoing. • Scheduled: Indicates that scheduled for some day in the future.

3. View the table with search results. This table contains the start date and end date of the blackout maintenance. Transaction for which the blackout is applicable, the type of blackout (full or daily) and the status – whether the blackout is ongoing, or scheduled for some day in the future.
4. Click on the field **Transaction** to view more details.

Transaction Blackout- View details

The screenshot shows the 'Transaction Blackout' view details page in the ZigBank system. The page is divided into two main sections: a form on the left and a sidebar on the right. The form contains the following fields:

- Transaction:** (Empty)
- Account Details:**
 - User Type: Administrator, Corporate User, Prospect, Retail User
 - Blackout Type: **Full** (selected), Daily
 - Start On: 19 Jun 2018 06:00
 - End On: 28 Jun 2018 19:00
 - Status: Scheduled
- Buttons:** Edit, Delete, Cancel, Back

The sidebar on the right features a calendar icon and a section titled 'Transaction Blackout' with the following text: 'Make transactions inaccessible to customers for periods when maintenance is planned by setting up transaction blackout. Click on Edit button to update the existing blackout. In case you want to delete the blackout, click on Delete button'.

Field Description

Field Name Description

Transaction The specific transaction, for which a blackout is maintained.

User Type The type of user for whom the transaction is blacked out.

The user types could be:

- Corporate User
- Administrator
- Retail User
- Prospect

Blackout Type Type of black out.

- Full: Indicates that it will be complete transaction blackout for the set date and time.
- Daily: Indicates that it will be daily blackout for the set date and time.

Start On Start date and time for the blackout.

This field will be displayed if the Blackout type is selected as 'Full'.

End On End date and time for the blackout.

This field will be displayed if the Blackout type is selected as 'Full'.

Date Range Blackout start and end date.

This field will be displayed if the Blackout type is selected as 'Daily'.

Field Name	Description
------------	-------------

Time Range	Blackout start and end time. This field will be displayed if the Blackout type is selected as ' Daily '.
-------------------	--

Note:

When blackout type is full - the following fields are displayed and enabled: Start On (Date and Time) End On and (Date and Time)
When blackout type is Daily - the following fields are displayed and enabled - Date Range - From and To. Time Range - From and To.
And, an option to Add Time

Status	The transaction blackout status. The options are: <ul style="list-style-type: none"> • Ongoing: Indicates that blackout is ongoing. • Scheduled: Indicates that scheduled for some day in the future.
---------------	--

5. Click **Edit** to edit the maintenance.
OR
Click **Delete** to delete the maintenance.
OR
Click **Cancel** to close the blackout creation process.
OR
Click **Back** to navigate to previous screen.

51.2 Transaction Blackout - Create

System Administrator can create new transaction blackout maintenance for the selected transaction. User needs to select the particular transaction and user type for whom blackout needs to be applied.

Further user can set up blackout type:

- Full – Black out for the entire period.
- Daily - Blackout between start and end time daily, for the days set.

To create new transaction blackout:

1. Click **Create**.
2. From the **Transaction** list select the appropriate option.
3. From the **User Type** select the appropriate option.
4. From the **Blackout Type** select the appropriate option:
5. If you select **Full Day**:
 - a. From the **Start On** list, select the start date and time of the transaction blackout.
 - b. From the **End On** list, select the end date and time of the transaction blackout.
6. If you select **Daily**:
 - a. From the **Date Range** list select the start and end date of the transaction blackout.

b. From the **Time Range** list select the start and end time of the transaction blackout.

Note: You can click **+Add Time Range** button, to add multiple time options for transaction blackout.

Transaction Blackout- Create

The screenshot shows the 'Transaction Blackout' creation interface in the ZigBank system. The form is set up with the following values:

- Transaction Type:** Inquiries
- Transaction:** Account Details
- User Type:** Corporate User and Retail User (both selected)
- Blackout Type:** Full
- Start On:** 19 Jun 2018 at 06:00
- End On:** 28 Jun 2018 at 19:00

At the bottom of the form are buttons for 'Save', 'Cancel', and 'Back'. A sidebar on the right contains a calendar icon and the text: 'Transaction Blackout. Make transactions inaccessible to customers for periods when maintenance is planned by setting up transaction blackout.'

Field Description

Field Name	Description
------------	-------------

Transaction Type	Transaction type to be blacked out. The options are:
-------------------------	---

- Maintenances
- Administration
- Inquiries
- Non-Financial
- Financial

Transaction	The specific transaction, for which a blackout is to be maintained.
--------------------	---

User Type	The type of user for whom the transaction is blacked out. The user types could be:
------------------	---

- Corporate User
- Administrator
- Retail User
- Prospect

Field Name	Description
Blackout Type	Type of black out. <ul style="list-style-type: none"> • Full: A Full transaction blackout prevents access to a transaction from a certain day/time to certain day / time. The transaction is not enabled at all, during a full blackout • Daily: A daily transaction blackout prevents access to a transaction for the defined time in a day, over few days. The transaction is enabled, outside of the blackout window, in case of a daily blackout
Start On	Start date and time for the blackout. This field will be displayed if the Blackout type is selected as ' Full '.
End On	End date and time for the blackout. This field will be displayed if the Blackout type is selected as ' Full '.
Date Range	Blackout start and end date. This field will be displayed if the Blackout type is selected as ' Daily '.
Time Range	Blackout start and end time. This field will be displayed if the Blackout type is selected as ' Daily '.

Note:

When blackout type is full - the following fields are displayed and enabled: Start On (Date and Time) End On and (Date and Time)
When blackout type is Daily - the following fields are displayed and enabled - Date Range - From and To. Time Range - From and To.
And, an option to Add Time Range

- Click **Save** to create the transaction blackout. User will be directed to the Transaction Blackout-Create - review page post necessary validations.
OR
Click **Cancel** to cancel the operation and navigate back to 'Dashboard'.
OR
Click **Back** to navigate to previous screen.
- The **Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to previous screen.
- The success message appears along with the transaction reference number. Click **Ok** to complete the transaction.

51.3 Transaction Blackout - Edit

System Administrator can modify existing blackout instructions. This screen displays the inputs captured for Daily/Full, End date and End time in the create transaction blackout screen in an editable form. Whereas user is not allowed to edit Transaction.

To modify blackout instructions:

1. Enter the search criteria like **Transaction, Date, or User Type**.

Note: Alternately, the user can perform a blank search.

2. Click **Search**, displays results based on search criteria.
OR
Click **Clear** to reset the details.
OR
Click **Cancel** to cancel the transaction.
3. Click on the transaction.
4. Click **Edit** to edit the maintenance.

Editing a scheduled Maintenance

Field Description

Field Name	Description
------------	-------------

Transaction	The specific transaction, for which a blackout is to be modified.
--------------------	---

Field Name	Description
------------	-------------

User Type	The type of user for whom the transaction is blacked out.
------------------	---

The user types could be:

- Corporate User
- Administrator
- Retail User
- Prospect

Blackout Type	Type of black out.
----------------------	--------------------

- Full: A Full transaction blackout prevents access to a transaction from a certain day/time to certain day / time. The transaction is not enabled at all, during a full blackout
- Daily: A daily transaction blackout prevents access to a transaction for the defined time in a day, over few days. The transaction is enabled, outside of the blackout window, in case of a daily blackout

Start On	Start date and time for the blackout.
-----------------	---------------------------------------

This field will be displayed if the Blackout type is selected as '**Full**'.

End On	End date and time for the blackout.
---------------	-------------------------------------

This field will be displayed if the Blackout type is selected as '**Full**'.

Date Range	Blackout start and end date.
-------------------	------------------------------

This field will be displayed if the Blackout type is selected as '**Daily**'.

Time Range	Blackout start and end time.
-------------------	------------------------------

This field will be displayed if the Blackout type is selected as '**Daily**'.

Note:

When blackout type is full - the following fields are displayed and enabled: Start On (Date and Time) End On and (Date and Time)
 When blackout type is Daily - the following fields are displayed and enabled - Date Range - From and To. Time Range - From and To.
 And, an option to Add Time Range

5. From the **User Type** select the appropriate option.
6. From the **Blackout Type** select the appropriate option:
7. If you select **Full Day**:
 - a. From the **Start On** list, select the start date and time of the transaction blackout.
 - b. From the **End On** list, select the end date and time of the transaction blackout.
8. If you select **Daily**:
 - a. From the **Date Range** list, select the start and end date of the transaction blackout.

- b. From the **Time Range** list, select the start and end time of the transaction blackout.

Note: You can click **+Add Time Range** button, to add multiple time options for transaction blackout.

9. Click **Save** to button to save Transaction Blackout Maintenance. User is directed to **Transaction Blackout-Edit - review** page post necessary validations.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to the previous screen.
10. The **Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to the previous screen.
11. The success message appears along with the transaction reference number. Click **OK** to complete the transaction.

51.4 Transaction Blackout - Delete

System Administrator can delete existing blackout instructions. User is allowed to delete future dated blackouts. Deleting ongoing blackout will stop the blackout and the transaction will be available to the users post approved by necessary levels of approvals.

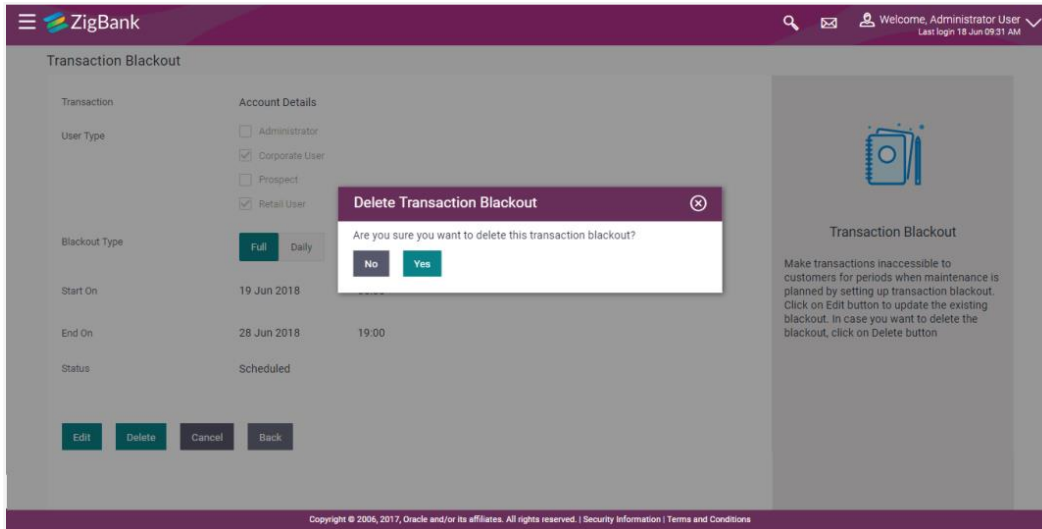

To delete maintenance:

1. Enter the search criteria like **Transaction, Date, or User Type**.

Note: Alternately, the user can perform a blank search.

2. Click **Search**, displays results based on search criteria.
OR
Click **Clear** to reset the details.
OR
Click **Cancel** to cancel the transaction.
3. Click **Edit** to edit the maintenance.
OR
On the Detailed View screen, click **Delete** to delete the maintenance.
OR
Click **Cancel** to close the blackout creation process.
OR
Click **Back** to navigate to previous screen.
4. The Pop-up Message to confirm deletion appears.

Deleting an Ongoing / scheduled Maintenances

5. On the Detailed View screen, of the blackout, click **Delete**.
6. The Pop-up Message to confirm deletion appears.
7. Click **Yes** to delete.
OR
Click **No** to go back to the maintenance.
8. The **Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to previous screen.
9. The success message appears along with the transaction reference number. Click **Ok** to complete the transaction.

FAQs

1. Can I edit an Ongoing Transaction Blackout?

Only the End time and End Date of the ongoing blackout can be edited, that too only if it is greater than the current system date and time.

2. Can I edit scheduled Transaction Blackout?

Yes. System Administrator has more flexibility in editing a scheduled transaction blackout.

3. Can I delete an ongoing Transaction blackout?

Yes, ongoing transaction blackout can be deleted. Deleting ongoing blackout will stop the blackout and the transaction will be available to the users post approved by necessary levels of approvals.

4. Any notification will be sent to the users about the planned blackout?

Administrator can send a notification to the users using the mailers feature available.

5. What happens when user tries to access the transaction which is blacked out?

A message is shown on the screen informing about transaction blackout.

[Home](#)

52. Working Window

A transaction working window is the period in a day, when a transaction can be initiated, approved and processed. This is essentially like business hours, for a transaction. It is a time window within which electronic payments, such as domestic transfers, international transfers etc., must be submitted for an entry in the system so that the transaction is processed with same value date.

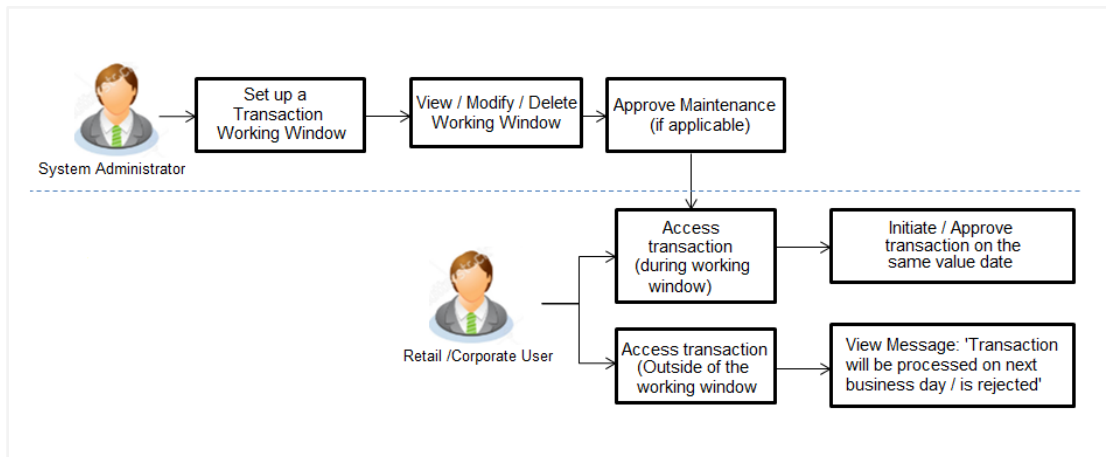

A working window is maintained, by the System Administrator for each transaction for which the value date is applicable for processing. In order to enable such transactions on channel, it is mandatory to define the working window for all the days of a week as day 0 maintenance. By doing this maintenance, user defines the channel working window for each day of the week for a specific transaction. Further, administrator can also define the processing pattern if the transaction is initiated by customers after the window is closed. Transactions, that are initiated or approved outside of the working window, are either processed on the next value date or rejected. Transaction working window can also be maintained for specific date which will be considered as exceptional working window, e.g. maintenance for specific public holiday. Working window set for an exception, overrides the normal working window.

Administrator can set up two different weekly and exceptional working windows for a specific transaction for different user types (Retail and Corporate User).

Pre-Requisites

- Transaction access is provided to System Administrator
- Approval rule set up for System Administrator to perform the actions
- Enable only those transactions for which the working window maintenance is applicable

Workflow

Features Supported In Application

The following options are available as part of this maintenance:

- Create a Transaction Working Window and an Exception for a particular date for all seven days
- Search and View Transaction working windows and Exceptions already maintained
- Delete or Edit transaction working windows / Exceptions maintained.

How to reach here:

System Administrator Dashboard > Controls and Monitoring > Working Window

OR

System/ Bank Administrator Dashboard > Toggle Menu > Controls and Monitoring > Working Window

52.1 Transaction Working Window - Search

This function allows the System Administrator to search the working windows which are already maintained. The search is available on the basis of specific date, transaction and user type.

The screen is broadly divided into:

- Normal Window
- Exception Window

To search the working windows:

1. Select the working window.
2. If you select **Normal Window** tab,
 - a. Enter the search criteria like **Transaction, Effective Date, or User Type**.
 - b. Click **Search**, displays results based on search criteria.
OR
Click **Clear** to clear the search parameters.
OR
Click **Cancel** to cancel the transaction.

Search Normal Window

The screenshot displays the 'Transaction Working Window' search interface. It features a search bar with filters for 'Effective Date' (set to 'Select Date'), 'Transaction' (set to 'Redeem TD'), and 'User Type' (set to 'Select'). Below the search bar are buttons for 'Search', 'Cancel', and 'Clear'. The main content area is titled 'Future Transaction Window' and shows a table with the following data:

Day Of Week	Window Type	From Time	To Time
Monday	Open All Day	00:00	23:59
Tuesday	Open All Day	00:00	23:59
Wednesday	Open All Day	00:00	23:59
Thursday	Open All Day	00:00	23:59
Friday	Open All Day	00:00	23:59
Saturday	Closed All Day	00:00	00:00
Sunday	Closed All Day	00:00	00:00

Below the table, there is an 'Other Details' section with 'Treatment Outside Normal Window' set to 'Process on Next Value Date' and buttons for 'Edit', 'Delete', and 'Cancel'. A 'Create' button is also visible on the right side of the interface.

Field Description

Field Name	Description
Normal Window	
Effective Date	Effective date of working window.
Transaction	The specific financial transaction, for which a working window is maintained.
User Type	The type of user for whom the transaction working window is being maintained. The user types could be: <ul style="list-style-type: none"> • Corporate User • Retail User
Search Result	
Day of Week	Day of week for which the transaction working window is applicable.

Exceptions

Field Name	Description
------------	-------------

Date and Day	Date and date for which the exception is applicable.
---------------------	--

Window Type	Transaction exception applicable window.
--------------------	--

Window types:

- Limited Time: Transaction is applicable for a limited time.
- Open all Day: Transaction can be done for the entire day.
- Close all Day: Transaction is closed for the whole day.

Time Range	Transactions are open during the specific time.
-------------------	---

This field is enabled, if you select **Limited Time**, option from the **Window Type** list.

5. Click the **Exception Date** field to launch the **Detailed View** screen.

Search Exception Window- Detailed View

The screenshot shows the 'Transaction Working Window' interface. At the top, there's a navigation bar with the ZigBank logo and user information: 'Welcome, superadmin' and 'Last login: 09 Jun 11:58 PM'. The main content area is titled 'Transaction Working Window' and has two tabs: 'Normal Window' and 'Exception Window'. The 'Exception Window' tab is active, showing a form with the following fields: 'Exception Date' (14 Jun 2018 (Thursday)), 'User Type' (checkboxes for administrator, Corporate, Retail), 'Transaction' (Internal Transfer), and 'Remarks' (dgdg). Below the form is a table for 'Exceptions' with columns for 'Window Type', 'From Time', and 'To Time'. The 'Open All Day' exception is listed with 'From Time' 00:00 and 'To Time' 23:59. At the bottom of the form are buttons for 'Edit', 'Delete', 'Cancel', and 'Back'. On the right side, there's a sidebar with a calendar icon and a text box explaining the feature: 'Use this feature to define the daily working window for financial transactions and also to specify the handling of transactions processed outside of the working window. You can also define an exception working window that will be considered over and above the regular working window maintenance. Additionally, you can search for existing working window maintenances to view and edit or delete, as per requirements.'

OR

- Click **Clear** to clear the search parameters.
 OR
 Click **Cancel** to cancel the transaction.
- c. Click **Edit** to edit the working window - exception, from the Detailed View page.
 OR
 Click **Delete** to delete the maintenance.

Edit Exception Window

The screenshot shows the 'Transaction Working Window' interface. The 'Exception Window' tab is active. The form contains the following fields and values:

- Exception Date:** Radio buttons for 'Specific Date' (selected) and 'Date Range'. The date '14/06/2018' is entered.
- User Type:** Checkboxes for 'administrator' (checked), 'Corporate' (checked), and 'Retail' (unchecked).
- Transaction:** A dropdown menu showing 'Internal Transfer'.
- Remarks:** A text field containing 'dgdg'.

At the bottom of the form are three buttons: 'Next' (highlighted in green), 'Cancel', and 'Back'. A sidebar on the right contains an icon of a calendar and the text: 'Transaction Working Window. Use this feature to define the daily working window for financial transactions and also to specify the handling of transactions processed outside of the working window. You can also define an exception working window that will be considered over and above the regular working window maintenance. Additionally, you can search for existing working window maintenances to view and edit or delete, as per requirements.'

Field Description

Field Name	Description
------------	-------------

Exception Date	Exception date or date range, when processing for a transaction, overrides that set in the normal transaction working window.
-----------------------	---

The exception date could be:

- Specific Date: Exception for a single day
- Date Range: Exception for a date range

User Type	Type of user, whether the transaction exception is applicable for a retail or corporate user.
------------------	---

Transaction	The specific transaction, for which exception is being maintained.
--------------------	--

Remarks	Reason for exception for e.g. a national holiday.
----------------	---

Exceptions

Field Name	Description
Window Type	Type of working window for the exception. Window types: <ul style="list-style-type: none"> Limited Time: Transaction is applicable for a limited time. Open all Day: Transaction can be done for the entire day. Close all Day: Transaction is closed for the whole day.
Time Range	Business hours of the transaction. This field is enabled, if you select Limited Time , option from the Window Type list.

8. Update the required details.
9. Click **Save** to create the transaction working window.
OR
Click **Back** to navigate to the previous screen.
OR
Click **Cancel** to close the exception creation process.
10. The **Review** screen is displayed. Verify the details, and click **Confirm**.
OR
Click **Edit** to modify details if any.
OR
Click **Cancel** to cancel the transaction.
11. The success message is displayed along with the transaction reference number. Click **OK** to complete the transaction.

52.4 Transaction Working Window - Delete

System Administrator can delete existing working window maintenance. User is allowed to delete future dated maintenances.

To delete normal window:

1. Select the working window.
2. If you select **Normal Window** tab,
 - a. Enter the search criteria like **Transaction**, **Effective Date**, or **User Type**.
 - b. Click **Search**, displays results based on search criteria.
OR
Click **Clear** to clear the search parameters.
OR
Click **Cancel** to cancel the transaction.
 - c. Click **Edit** to edit the working window, from the Detailed View page.
OR
Click **Delete** to delete the working window, from the Detailed View page.

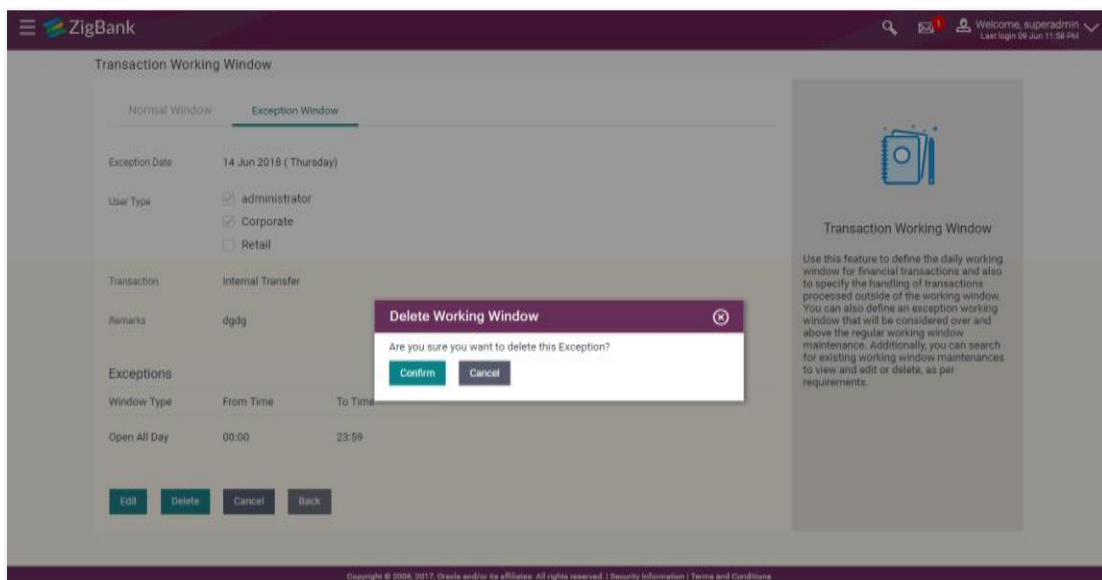

Delete Normal Window

To delete exception window:

3. Select the working window.
4. If you select **exception Window** tab,
 - a. Enter the search criteria like **Transaction, Effective Date, or User Type**.
 - b. Click **Search**, displays results based on search criteria.
OR
Click **Clear** to clear the search parameters.
OR
Click **Cancel** to cancel the transaction.
 - c. Click **Edit** to edit the working window, from the Detailed View page.
OR
Click **Delete** to delete the working window - exception, from the Detailed View page.

Delete Exception Window

- The user can delete a future transaction working window or an exception with an effective date in the future.
- Navigate to the particular working window or the exception and click on Delete.
- The system displays a pop-up message with Confirm and Cancel buttons. On confirming deletion, system displays a transaction successful message, provides a reference number and the status of the maintenance (e.g. pending approval)
- If the user chooses to cancel the transaction, he's directed to the admin dashboard

FAQs

1. Can I set the transaction working window from the current date?

No, you cannot set the transaction working window date from current date. You can set that from future date.

2. If a particular day, have both a normal working window set, and an exception – which will take precedence?

Working window set for an exception, overrides the normal working window set.

3. If the normal working window for a transaction is set for Open all Day and an Exception is set as Closed all Day, will I be able to initiate transaction, on that day?

No, I will not be able to initiate the transaction on that day. The transaction will either have the next working day's value date or be rejected.

4. Can I delete or edit current applicable normal working window?

No, current applicable normal working window cannot be edited or deleted. User can add a new window with future effective date.

5. Can I set 'behavior of transaction outside working window' for exceptional days?

No, behavior of transaction outside working window for exceptional date maintenance will remain same as normal window maintenance.

53. Audit Log

Audit log is set of records that provide information about operations performed in the application and details of the user who has performed it along with date and time when it was performed.

Audit logs are useful both for maintaining security and for auditing any disputed transaction. As part of this function, the bank administrator and/or system administrator can view details about the transactions and maintenances performed by different user(s) in the system.

The administrator can search records by providing specific search parameters and system will display matching records for the search criteria. Maintenances created/edited/deleted/inquired by bank administrator can be audited through this function by the system administrator. Maintenances created/edited/deleted/inquired by corporate administrator can be audited through this function by the bank as well as system administrator.

Transactions carried out by corporate users can be audited if required by the Corporate or Bank administrator and also by system administrator.

Prerequisites

- Transaction access is provided to System and Bank administrator.
- Transactions are available under respective users to check audit log.

How to reach here:

System Administrator Dashboard > Controls and Monitoring > Audit Log

OR

*System/ Bank Administrator Dashboard > Toggle menu > **Controls & Monitoring** > Audit Log*

53.1 Search Audit Details

To view audit log:

1. From the **Date and Time** list, select the period for which you want to view the audit log.
2. Enter required search criteria. Click **Search**.
Audit log appears based on the entered search parameters.
OR
Click **Clear** to reset the details.
OR
Click **Cancel** to cancel the transaction and navigate the user back to **Dashboard**.

FAQs

1. Do I need to enter all the parameters to search?

No. You need to enter at least the date and time criteria to proceed with audit search. Rest of the search parameters are optional and can be entered if the search results are to be narrowed down.

2. I do not remember the party ID for input, can I search a party if I need to view audit details for a specific party?

Yes. You can search a party by clicking 'Search Party' and searching the party by entering the party name.

3. As part of input search criterion/parameters, in the action field there are certain options disabled. Is there a specific reason?

If you select any maintenance in the activity field, 'Initiated' as an action will not be available. If you select any transaction in the activity field, 'Created', 'Edited' or 'Deleted' as actions will not be available.

[Home](#)

54. File Upload

File Uploads facilitates processing of multiple transactions through a single file. This is a faster way of processing transactions than entering single screen transactions. Salary payments, fund transfers, vendor payments are few examples of financial transactions that can be supported through file upload. A non-financial transaction to facilitate upload of multiple payee details, at a single instance, is also possible through file upload.

OBAPI has made File Upload functionality available for both Corporate and Bank Users.

Some of the file uploads available for Corporate User are:

- Internal payments (within the bank)
- Domestic payments (within the country)
- International payments (cross border)
- Mixed payments
- Create Payees / Beneficiaries
- Create Virtual Accounts, Structure & Identifiers

File upload available for Bank User

- Addition of Biller

Oracle Banking APIs File Upload module enables banks to process files of payments according to agreed operational and business rules and save time. File Uploads facility is simple to use, has daily transaction limits and comes with the security of dual / multi signatory approvals.

- File Upload Set up: Enables the administrator to create file identifiers, and map users to file identifiers.
- File Upload Servicing: Enables the corporate user to upload, view and approve files, (files that the user has access to).

File Upload Set up

File Upload set up covers the maintenance part of file upload and is performed by an administrator user. As a part of the initial set-up, the administrator user -

- Creates a File Identifier for a File Template using the 'File Identifier' option
- Maps a File Identifier to a user using the 'User File Identifier Mapping' option

54.1 File Identifier Maintenance

Bank Administrator can create file identifiers (FI) to upload files for corporate as well as bank administrator users. This enables the corporate users and bank administrators to process file uploads. A File Identifier is always mapped to a specific file template. It permits configuration of party preferences like approval type (file level / record level) for a particular type of file.

Prerequisites

- Transaction access is provided to Bank Administrator
- User Creation
- Set up Party Account access (for corporate file upload)
- Set up Transaction Account access (for corporate file upload)
- Set up Approval Rules (for corporate file upload)

Features Supported In Application

- Search File Identifier
- Create File Identifier
- Edit File Identifier

How to reach here:

System/ Bank Administrator Dashboard > Toggle Menu > File Upload > File Identifier Maintenance

OR

Bank Administrator Dashboard > Quick Links > File Identifier Maintenance

54.1.1 File Identifier Maintenance – User Type Selection

Bank Administrator logs into the system and navigates to the File Identifier Maintenance screen. On accessing the 'File Identifier Maintenance' menu, bank administrator has to select the user type.

File Identifier Maintenance – User Type Selection

1. Click **Administrator** to access the file identifier for bank administrator users. The File Identifier Maintenance screen appears.
2. Click **Corporate User** to access the file identifier of corporate users. The File Identifier Maintenance screen appears.

54.1.2 File Identifier Maintenance - Administrator User – Summary

For the bank administrators the only file upload available is for the uploading of EBPP Billers. Once the logged in user navigates to File Identifier Maintenance (Administrator User) screen, user can view the record details of the File Identifiers already created.

To search and view the file identifiers:

1. Navigate to the **File Identifier Maintenance** screen. The **File Identifier** - summary screen appears.

File Identifier - Summary

The screenshot displays the 'File Identifiers' summary page. At the top, there is a header with the ZigBank logo, a search icon, a notification icon with '617', and a user welcome message: 'Welcome, Administrator User' with a dropdown arrow and 'Last login 08 Dec 12:07 PM'. Below the header, the main content area is divided into two sections. On the left, a table lists file identifiers with columns for 'Sr. no.', 'File Identifiers', 'Description', 'Transaction Type', and 'Approval Type'. On the right, there is a 'Note' section with a blue folder icon and a 'Create' button. Below the table are 'Cancel' and 'Back' buttons. At the bottom of the page, a footer contains copyright information: 'Copyright © 2006, 2017, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

Sr. no.	File Identifiers	Description	Transaction Type	Approval Type
1	AddBillerFile	Add Biller File Level	Admin Biller	File
2	AddBillerRec	Add Biller Record Level	Admin Biller	Record

Note

Assignment of file identifiers to different parties can be done. Approval type needs to be set as whether it would be record level or file level. File template can be selected for the maintenance. Once this is created for a party, account level changes can be done from User File Identifier mapping screen.

Field Description

Field Name	Description
------------	-------------

File Identifiers

Sr. No. Serial number of the record.

File Identifiers Unique code/ name assigned as per party preferences for handling of payment files.

Description File name / code description corresponding to the file upload code.

Transaction Type Type of transaction:
The Transaction types could be:

- Admin Biller

Approval Type The approval type is at file level or record level.

2. Click the **File Identifier** link against the record, for which you want to view the details. The **File Identifier Maintenance- View** screen appears.
OR
Click **Cancel** to cancel the operation and navigate back to 'Dashboard'.

OR
Click **Back** to go back to previous screen.

File Identifier Maintenance - View

The screenshot shows the 'File Identifier Maintenance - View' page. The header includes the ZigBank logo, a search icon, a notification icon with '617', and a user profile for 'Administrator User' with a last login time of '08 Dec 12:07 PM'. The main content area is titled 'Details' and contains the following information:

File Identifier	AddBillFile
Description	Add Biller File Level
File Template	Addition of Biller
Maximum No Of Records	-
Partial Preprocessing Tolerance(%)	-
Transaction Type	Admin Biller
File Type	DELIMITED
Format Type	CSV,XML,XLS,XLSX
Approval Type	<input type="radio"/> Record Level <input checked="" type="radio"/> File Level

At the bottom of the form, there are three buttons: 'Edit', 'Cancel', and 'Back'. The footer of the page contains the text: 'Copyright © 2006, 2017, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

Field Description

Field Name	Description
Details	
File Identifier	Unique code/ name assigned for handling of payment files.
Description	File name / code description corresponding to the file upload code.
File Template	Predefined file templates. Following file templates are available: <ul style="list-style-type: none"> • Addition of Biller
Maximum No of Records	Maximum number of records permissible in the uploaded file.

Field Name	Description
Partial Processing Tolerance (%)	<p>The partial processing tolerance for a file (in percentage terms). Suppose, the user sets this value at 60% - this implies that if 60% or more, of the records in a file clear the validation stage, then the file can go for further processing. If less than 60% of the records in a file clear the validation stage, then the file is rejected.</p> <p>This field appears if approval is 'Record Type'.</p>
Transaction Type	<p>Type of transaction: The Transaction type can be:</p> <ul style="list-style-type: none"> • Admin Biller
File Type	The file type - delimited or fixed length.
Format Type	<p>The format in which file is uploaded. The format could be .CSV, .XLS, .XLSX.</p>
Approval Type	<p>The approval type is at file level or record level.</p> <ul style="list-style-type: none"> • File Level - The approver accepts or rejects the entire file, and all records are either processed or rejected en-masse. • Record Level - The approver could approve some records, and rejects others. Payments are processed only for approved records.

-
- Click **Edit** to modify the file identifier.
OR
Click **Cancel** to cancel the operation and navigate back to 'Dashboard'.
OR
Click **Back** to navigate to the previous screen.

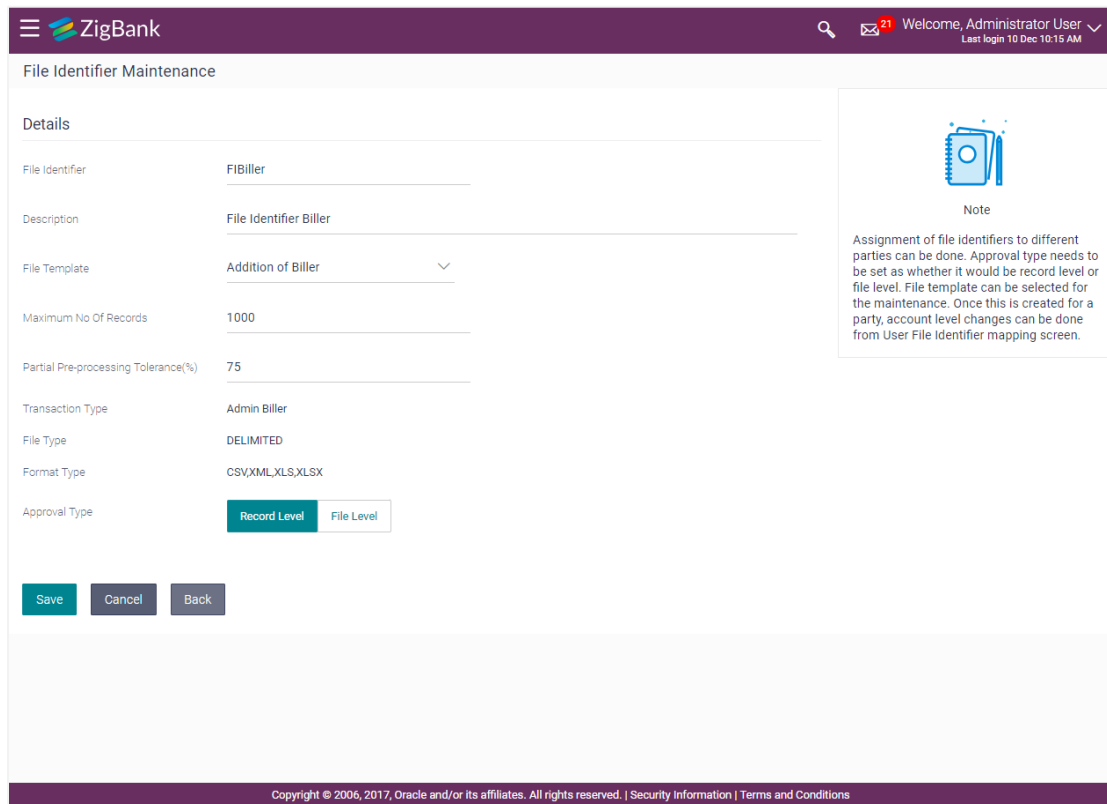

54.1.3 File Identifier Maintenance - Administrator User - Create

Using this option the administrator user can create a new file identifier.

To create a file identifier:

1. In the **File Identifier Maintenance** screen, click **Create**. The **File Identifier Maintenance - Create** screen appears.

File Identifier Maintenance - Create

The screenshot displays the 'File Identifier Maintenance - Create' interface. At the top, the ZigBank logo and user information 'Welcome, Administrator User' are visible. The main content area is titled 'File Identifier Maintenance' and contains a 'Details' section with the following fields:

- File Identifier:** FIBiller
- Description:** File Identifier Biller
- File Template:** Addition of Biller (with a dropdown arrow)
- Maximum No Of Records:** 1000
- Partial Pre-processing Tolerance(%):** 75
- Transaction Type:** Admin Biller
- File Type:** DELIMITED
- Format Type:** CSV,XML,XLS,XLSX
- Approval Type:** Record Level (selected), File Level

At the bottom of the form are three buttons: Save, Cancel, and Back. On the right side, there is a 'Note' box with a blue icon of a notepad and the following text: 'Assignment of file identifiers to different parties can be done. Approval type needs to be set as whether it would be record level or file level. File template can be selected for the maintenance. Once this is created for a party, account level changes can be done from User File Identifier mapping screen.'

- In the **File Identifier** field, enter the code of the file to be maintained for upload.
- In the **Description** field, enter the file description corresponding to the file code.
- From the **File Template** list, select the file template.
- Select the appropriate **Approval Type**.
- Click **Save**.
OR
Click **Cancel** to cancel the operation and navigate back to 'Dashboard'.
OR
Click **Back** to navigate to the previous screen.
- The **File Identifier Maintenance - Review** screen appears. Verify the details and click **Confirm**.
form.
OR
Click **Cancel** to cancel the operation and navigate back to 'Dashboard'.
OR
Click **Back** to navigate to the previous screen.
- The success message appears along with the transaction reference number and status.
Click **OK** to complete the transaction and navigate back to 'Dashboard'.

54.1.4 File Identifier Maintenance - Administrator User – Edit

Using this option the administrator can edit and update a file identifier.

To edit file identifier:

1. In the **File Identifier Maintenance** screen, click the **File Identifier** link against the record, which you want to modify.
The **File Identifier Maintenance- View** screen appears.
2. Click **Edit** to edit the file identifier.
The **File Identifier Maintenance - Edit** screen appears.

File Identifier Maintenance - Edit

The screenshot displays the 'File Identifier Maintenance - Edit' interface. At the top, the header includes the ZigBank logo, a search icon, a notification icon with '21', and the user's name 'Welcome, Administrator User' with a dropdown arrow and 'Last login 10 Dec 11:09 AM'. Below the header, the main content area is titled 'File Identifier Maintenance'. Underneath, there is a 'Details' section with a table of fields and their values:

File Identifier	AddBillerFile
Description	Add Biller File Level
File Template	Addition of Biller
Maximum No Of Records	
Partial Preprocessing Tolerance(%)	
Transaction Type	Admin Biller
File Type	DELIMITED
Format Type	CSV,XML,XLS,XLSX
Approval Type	<input type="button" value="Record Level"/> <input checked="" type="button" value="File Level"/>

At the bottom of the form, there are three buttons: 'Save', 'Cancel', and 'Back'. The footer of the page contains the text: 'Copyright © 2006, 2017, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

3. Edit the required fields of file identifiers. E.g. Description, Maximum Number of Records, and Partial Processing Tolerance, Debit Account Number – if required.

User Interface Details

Field Name	Description
Description	Descriptions corresponding to the file upload code.
Maximum No of Records	Maximum number of records permissible in the uploaded file.
Partial Processing Tolerance (%)	The partial processing tolerance for a file (in percentage terms) Suppose, the user sets this value at 60% - this implies that if 60% or more, of the records in a file clear the Validation stage, then the file can go for further processing. If less than 60% of the records in a file clear the validation stage, then the file is rejected.

4. Click **Save** to save the modified details.
OR
Click **Cancel** to cancel the operation and navigate back to 'Dashboard'.
OR
Click **Back** to navigate to previous screen.
5. The **File Identifier Maintenance – Edit - Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Cancel** to cancel the operation and navigate back to 'Dashboard'.
OR
Click **Back** to navigate to previous screen.
6. The success message appears along with the transaction reference number and status.
Click **OK** to complete the transaction and navigate back to 'Dashboard'.

54.1.5 File Identifier Maintenance - Corporate User – Search and View

Once the logged in user navigates to File Identifier Maintenance (for Corporate User) screen, user can search and view the files that are uploaded under a party with the future date with file type as SDSC(Single Debit Single Credit), SDMC (Single Debit Multiple Credit), and MDMC (Multiple Debit Multiple Credit) and view the record details of the File Identifiers already created.

To search and view the file identifiers:

1. In the **Party ID** field, enter the party id of the user.
OR
In the **Party Name** field, enter the name of the party.
2. Click **Search**. The **File Identifier Maintenance** screen with search results appears.
OR
Click **Clear** to clear the search parameters.
OR
Click **Cancel** to cancel the operation and navigate back to 'Dashboard'.

7. The **File Identifier Maintenance – Edit - Review** screen appears. Verify the details, and click **Confirm**.
OR
Click **Cancel** to cancel the operation and navigate back to 'Dashboard'.
OR
Click **Back** to navigate to the previous screen.
8. The success message appears along with the transaction reference number and status.
Click **OK** to complete the transaction and navigate back to 'Dashboard'.

FAQs

1. For bank administrators which transactions have file upload support?

Currently the file upload feature for bank administrators is available for addition of billers only.

2. What are the different transaction types, accounting types and file formats supported?

The following table details the different transaction types, accounting types and file formats supported. A file identifier with a specific template is a combination of the parameters below:

Sr. No.	Parameter	Types
1	Transaction Type	Internal funds Transfer Domestic Funds Transfer International Funds Transfer Mixed Transfer Admin Biller (available only for admin user) Payee Files (Internal / Domestic / International Or Mixed Payee Files) Virtual Account related (Accounts, Structure & Identifiers creation)
2	Accounting Type	Single Debit, Single Credit (SDSC) Single Debit, Multi Credit (SDMC) Multi Debit, Multi Credit (MDMC)
3	Approval Type	File Level Record Level
4	Format Type	CSV, XML, XLS, XLSX

3. Why do we have different accounting types?

File templates support different accounting types, and business users can use the template that best support their needs. Details with business examples below:

Sr No.	Accounting Type	Business Example	Approval Type
1	Single Debit, Single Credit (SDSC)	A corporate may want to make monthly payments to its various vendors from one central account. So though the debit account is the same across all records, the credit accounts are different and the debit accounting entry is not consolidated.	Record Type or File Type

Sr No.	Accounting Type	Business Example	Approval Type
2	Single Debit, Multi Credit (SDMC)	A corporate may want to make monthly salary payments to all its employees. A single consolidated debit entry is required to be passed, against multiple credits to different accounts.	File Type
3	Multi Debit, Multi Credit (MDMC)	This file format caters to a lot of one to one transfers between two parties for various payments. Organizations that are brokers or intermediaries in trade contracts, may find this format more suitable for their business needs.	Record Type

4. What is the business rationale of having different approval types?

A record type approval, gives more flexibility to the corporate user – in the sense, that even if some records are not validated, the file could still be processed (only those records that have passed validations) and file type approval, gives more control to the corporate user. Since all records in the file have to pass validations, before a file is processed.

5. Who can create File Identifiers for a corporate party?

Only a bank administrator or a corporate administrator with required rights can create file identifiers for a corporate party.

6. What is a 'File Upload Template'?

A template that is used to upload a file is called as file template. It distinguishes one file from another depending on:

- a) Transaction type of the file
- b) Format of the file to be uploaded
- c) Approval type set-up for the file
- d) Accounting type of a payment file

[Home](#)

54.2 User File Identifier Mapping

This function can be used by the administrator to map the required file identifier to a specific user or a set of users so that the user can upload and view the required file types. In case of corporate user the mapping will be done for the Party ID and for bank administrators mapping will be done for the User ID.

Prerequisites

- Transaction access is provided to Bank Administrator User Creation
- Party and Account access (for corporate file upload)
- Set up Transaction and account access (for corporate file upload)
- Set up Approval Rules (for corporate file upload)
- File Identifier Maintenance

Features Supported In Application

- Search User File Identifier Mapping
- Create User File Identifier Mapping
- Edit User File Identifier Mapping

How to reach here:

System/ Bank Administrator Dashboard > Toggle Menu > File Upload > User File Identifier Mapping

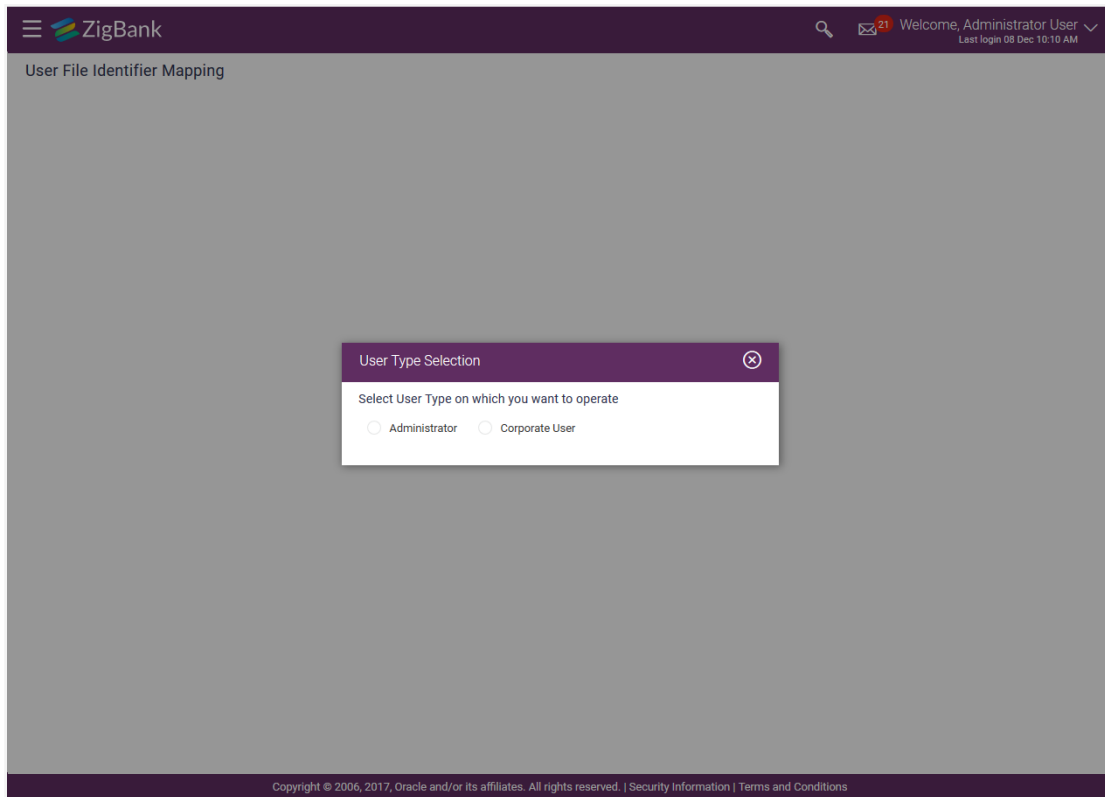

OR

Bank Administrator Dashboard > Quick Links > User File Identifier Mapping

54.2.1 User File Identifier Mapping – User Type Selection

Bank Administrator logs into the system and navigates to the User File Identifier Mapping screen. On accessing the 'User File Identifier Mapping' menu, bank administrator has to select the user type.

User File Identifier Mapping – User Type Selection

1. Click **Administrator** to access file identifier for bank administrator users. The User File Identifier Mapping screen appears.
2. Click **Corporate User** to access the file identifier of corporate users. The User File Identifier Mapping screen appears.

54.2.2 User File Identifier Mapping – Administrator - Search

Using this option the administrator can search and view the file identifiers mapped to the user.

To search and view the file identifiers:

1. In the **User File Identifier Mapping** screen, enter any one search criteria.
2. Click **Search**. The **User File Identifier Mapping** screen with search results appears.
OR
Click **Cancel** to cancel the operation and navigate back to 'Dashboard'.
OR
Click **Clear** to clear the search parameters.

User File Identifier Mapping - Search

The screenshot shows the 'User File Identifier Mapping - Search' interface. At the top, there is a navigation bar with the ZigBank logo and user information: 'Welcome, Administrator User' and 'Last login 10 Dec 11:58 AM'. Below the navigation bar, the search form is displayed. The 'User Type' is set to 'Administrator' and the 'User Name' is 'ra'. There are three buttons: 'Search', 'Cancel', and 'Clear'. Below the search form, a table shows the search results. The table has four columns: 'Initials', 'User Details', 'Contact Details', and 'Mapping'. The table lists several users with their details and mapping icons.

FAQs

1. **Can all users of a particular corporate access all file types, mapped to the corporate?**

User/s have to be mapped to file identifiers to be able to access files. For example, only the user/s of Human Resource Department of a corporate may have access to upload / view and enquire status of salary files.

Mapping File Identifier's to specific users thus enables access of certain types of file/s to certain user/s.

2. **If a user is mapped to a File Identifier and he has uploaded a file – but after this, he is no longer mapped to the File Identifier – can he view the status of the file?**

No, the user will not be able to view the status of the file, if he is not mapped to it, at the point in time when he is checking for the status.

54.3 File Upload (for Biller Maintenance)

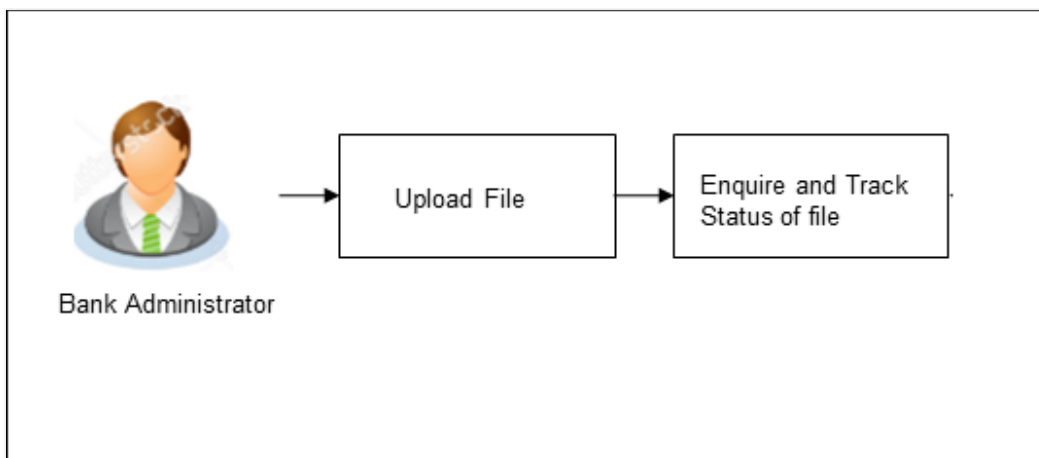

This option allows the Bank administrator user to upload the files containing EBPP Billers. Billers uploaded will be available for retail users to register and make online bill payment & pre-paid recharge transactions.

Prerequisites

- File Identifier Maintenance
- User – File Identifier Mapping

Features Supported In Application

- Upload a File

How to reach here:

System/ Bank Administrator Dashboard > Toggle Menu > File Upload > File Upload

File Upload

The screenshot shows the 'File Upload' page in the ZigBank application. At the top, there is a purple header bar with the ZigBank logo on the left and search, mail, and user profile icons on the right. The user profile shows 'Welcome, superadmin' and 'Last login'. Below the header, the page title 'File Upload' is displayed. The main content area contains two input fields: 'File Identifier' with a dropdown menu labeled 'Select File Identifier' and 'File Name' with a 'Choose file...' button. Below these fields are two buttons: 'Upload' (in green) and 'Cancel' (in grey). At the bottom of the page, there is a purple footer bar with the text: 'Copyright © 2006, 2017, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

Field Description

Field Name	Description
File Identifier	File identifier created earlier in order to identify the file.
File Name	Browse and select the file to be uploaded.

To upload a file:

1. From the **File Identifier** list, select the file identifier.
The file identifier details appear.
2. In the **File Name** field, select the file to be uploaded.

File Upload

The screenshot shows the 'File Upload' page in the ZigBank system. The header includes the ZigBank logo, search, mail, and user profile icons. The user is logged in as 'superadmin'. The form contains the following fields:

- File Identifier:** AddBillerFile - Add Biller File Level
- Transaction Type:** Admin Biller
- File Format Type:** CSV,XML,XLS,XLSX
- Approval Type:** File Level
- File Name:** SDSC.txt

At the bottom of the form, there are two buttons: 'Upload' and 'Cancel'.

Copyright © 2006, 2017, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions

Field Description

Field Name	Description
File Identifier	File identifier created earlier in order to identify the file.
Transaction Type	Transaction type of the file upload. The transaction type could be: <ul style="list-style-type: none"> Admin Biller
File Format Type	Format of the file. The file format could be: <ul style="list-style-type: none"> CSV XLS XLSX

Field Name	Description
Approval Type	Approval level of the file. The approval could be: <ul style="list-style-type: none">• Record Level: In record type approval, the approver can approve some records (in a file), and reject others. Only approved records are processed.• File Level: In a file type approval, the approver accepts or rejects the entire file, and all records are either processed or rejected.
File Name	Name of the file which is uploaded.

3. Click **Upload**.
OR
Click **Cancel** to abort the file uploading process.
4. The success message along with the file reference ID and status of the transaction appears.
Click **OK** to complete the file upload.
OR
Click the **File Reference ID** to inquire about the uploaded file status.
The Uploaded File Inquiry screen appears.

[Home](#)

54.4 Uploaded Files Inquiry (Biller Maintenance)

Through this option the user can view the billers file uploaded and their status.

- The search can be filtered on various parameters like status and file reference ID.
- The user can track the status of the file and if there is an error in the file, he / she can download the error file to arrive at the exact reason for error.
- For files in the 'Processed' status, the user can download Response file, to vet status of processing (in the host) for each record, of the file.
- The user can track file history and also check Individual record details.

Note: The landing screen displays all the files that are uploaded today.

Prerequisites

- File Identifier Maintenance
- User – File Identifier Mapping

Features Supported In Application

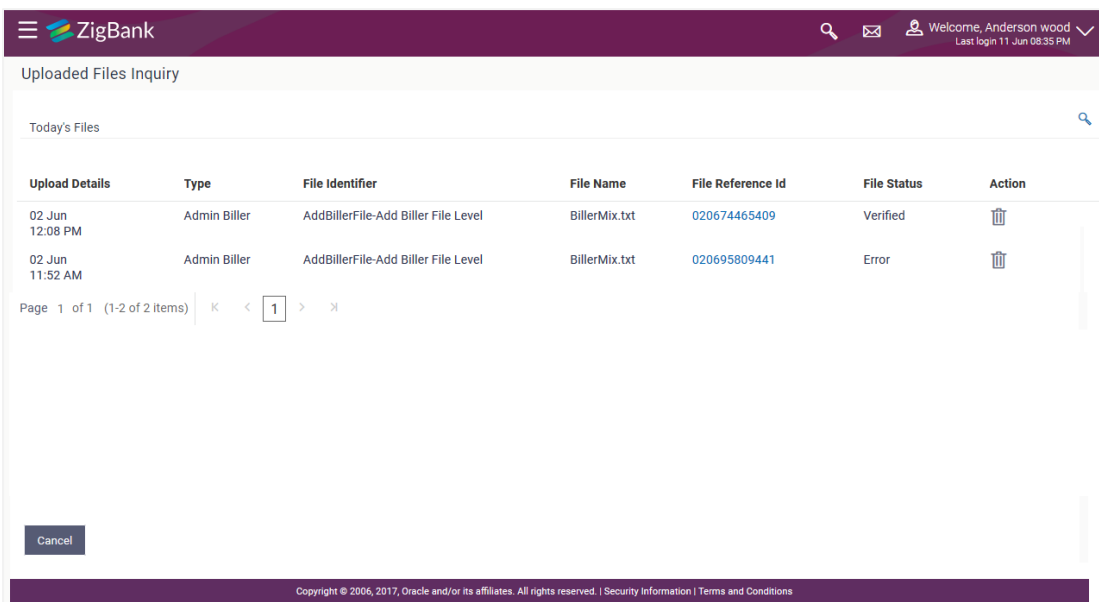

- View Uploaded File & its Status (Uploaded File Inquiry)

How to reach here:

System / Bank Administrator Dashboard > Toggle Menu > File Upload > Uploaded File Inquiry

Uploaded File Inquiry – Summary

All the files that are uploaded today that is the current system date and file details will be displayed on the Uploaded File Inquiry - Summary screen.

Field Description

Field Name	Description
------------	-------------

Today's Files

Upload Details	File upload date and time.
-----------------------	----------------------------

Type	Transaction type of file uploaded.
-------------	------------------------------------

File Identifier	File identifier selected while uploading the file.
------------------------	--

File Name	Name of the uploaded file.
------------------	----------------------------

File Reference ID	The file reference number generated after the file was uploaded.
--------------------------	--

File Status	<p>Status of the uploaded file.</p> <p>The file status could be:</p> <ul style="list-style-type: none"> • Uploaded: File Uploaded and file reference number is generated. • Verified: File has been pre-processed and authorization checks done. File is now Pending Approval. • Error: File has been pre-processed and contains error. The end of the life cycle of the file (File Level).The user can download the error file at this stage. • Processing in Progress: File is not yet processed. • Rejected: File has been rejected (File level). The end of the life cycle of the file. • Approved: File has been fully approved. • Processed: File is completely processed. The user can download a response file at this stage. • Processed with exception: File is partially processed – i.e. while some records are processed, others are not. • Expired: File has expired. • Deleted: File was deleted.
--------------------	--

Action	<p>The available action icon against the uploaded files.</p> <p>The action is delete the uploaded file.</p>
---------------	---

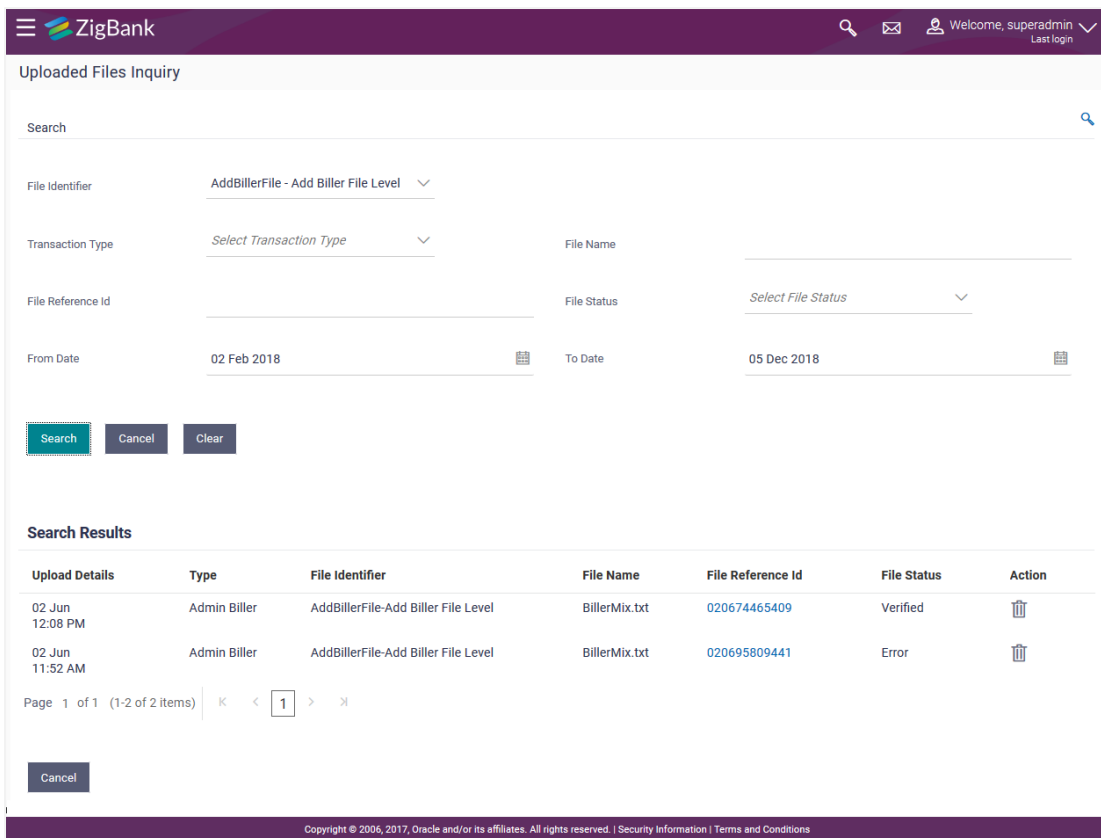

54.4.1 Uploaded File Inquiry – Search

Using this option, system administrator can search and view the files that are uploaded and view the record details under the same.

To search and view uploaded files

1. Click  to expand the search criteria. The search section appears.
2. Enter any two search criteria in the search section.
3. Click **Search**. The search results appear on the **Uploaded File Inquiry** screen based on the search parameters.
OR
Click **Cancel** to close the search panel.
OR
Click **Clear** to reset the search criteria.

Uploaded File Inquiry - Search

The screenshot shows the 'Uploaded Files Inquiry' search interface. At the top, there is a search bar with a magnifying glass icon. Below it, there are several filter fields: 'File Identifier' (set to 'AddBillFile - Add Biller File Level'), 'Transaction Type' (set to 'Select Transaction Type'), 'File Reference Id' (empty), 'From Date' (set to '02 Feb 2018'), and 'To Date' (set to '05 Dec 2018'). There are also 'Search', 'Cancel', and 'Clear' buttons. Below the filters, there is a 'Search Results' section with a table of results.

Upload Details	Type	File Identifier	File Name	File Reference Id	File Status	Action
02 Jun 12:08 PM	Admin Biller	AddBillFile-Add Biller File Level	BillerMix.txt	020674465409	Verified	
02 Jun 11:52 AM	Admin Biller	AddBillFile-Add Biller File Level	BillerMix.txt	020695809441	Error

Field Description

Field Name	Description
File Name	File name of the uploaded file.
Transaction Type	Transaction type associated with the file.
File Reference ID	The file reference number, which was generated while uploading the file.
Number of Records	The total number of records in the file.
File Status	Status of the file uploads.
Transaction Reference ID	The Transaction reference number, which was generated for the uploaded file.
Error Report	Shows an icon to download the error file in case the uploaded file faced some runtime issue and failed to execute.

Field Name	Description
File Workflow	Flow displaying various stages and status of file upload.
Search Results	
Value Date	The date on which the file was uploaded.
Billor Name	Name of the biller in the records.
Billor Type	Biller type in the records.
Billor Category	Category of the biller in the records.
Billor Location	Location of the biller in the records.
Action	The available action icon against the records. Icon to download the e-receipt.

To search and view the specific records

5. Click  to expand the search criteria and search a particular records. The search section appears.
6. Enter the search criteria in the search section.
Click **Search**. The search results appear on the Uploaded File Inquiry - File Details screen based on the search parameters.
OR
Click **Cancel** to close the search panel.
OR
Click **Clear** to reset the search criteria.
7. In the **File Name** field, click  to download the originally uploaded file.
OR
Click the **Billor Name** link to view the record details.
8. In the **Action** column, click  against a specific record to download the e-receipt of the transaction in pdf format.
OR
Click **Download as** to download the file in .pdf or .csv format.
OR
Click **Back** to navigate to the previous screen.

Note: If there is an error during file verification (i.e. the file is in error status), an option will be available to download the generated error file.

FAQs

1. What are some of the validations that a file goes through at various stages, in its life cycle?

The following are the validations performed on an uploaded file by OBAPI and subsequently by the Host, before file is liquidated.

Sr No	Events	Applicable to	Checks
1	On File Upload	All Files	File contents should not match an already uploaded file
2	On File Upload	All Files	File should not exceed the Maximum Size limit
3	On File Upload	All Files	The File Extension type should be the ones permitted viz., xml, xls, xlxs, csv
4	On File Upload	All Files	The file should not be Malicious
5	At Pre-Processing	All Files	The format for all fields, should be as templated viz., Date, Currency in accordance with ISO standards, CIF- numeric, account number-alphanumeric etc.
6	At Pre-Processing	All Files	The CIF(if available) should be valid, should exist

2. If some records in a file are deleted, what will the status of the file be?

The following table shows the file status which is followed to depict various status of the file upload. So if all the records of file are liquidated then the file status is processed, and if any of the records in the file is liquidated while all the other are rejected the file status will be processed, and if any of the records is liquidated and rest all have an error the file status will be processed with exception.

Verified	Approved	Processing in Progress	Processed	Rejected	Deleted	Error	File Status
All							Verified
	All						Approved
		All					Processing in Progress
			All				Processed
				All			Rejected
					All		Deleted
						All	Error

Verified	Approved	Processing in Progress	Processed	Rejected	Deleted	Error	File Status
			1	1			Processed
			1		1		Processed
			1			1	Processed with exception
			1	1	1		Processed
			1	1	1	1	Processed with exception
				1	1		Deleted
				1		1	Processed with exception
					1	1	Processed with exception

3. After a file is successfully uploaded, is the user provided notifications on its status?

Yes, Users mapped to the FI – initiators and approvers of the file, are provided with alerts / notification, as file progresses from the Uploaded stage to Approved to Processing in Progress to the Processed stage. Alternately, users can log in to view the status of the file.

55. OAuth 2.0

The OAuth 2.0 authorization framework enables a third-party application to obtain limited access to an HTTP service, either on behalf of a resource owner by orchestrating an approval interaction between the resource owner and the HTTP service, or by allowing the third-party application to obtain access on its own behalf.

- **Client** - It is the third party app (running on mobile or on browser) that makes requests to the resource server for protected resources on behalf of the resource owner. The resource owner must give the app permission to access the protected resources.
- **Resource owner** - The person who is capable of granting access to a protected resource.
- **Resource server** - The resource server needs some kind of authorization before it will serve up protected resources to the app.
- **Authorization server** - The authorization server is implemented in compliance with the OAuth 2.0 specification, and it is responsible for validating authorization grants and issuing the access tokens that give the app access to the user's data on the resource server.

The following administrative maintenances needs to be done as part of OAuth Server Setup:

- Identity Domain Definition
- Resource Server Definition
- Client Definition

[Home](#)

55.1 Identity Domain Maintenance

The Identity Domain corresponds to the notion of a tenant and each identity domain corresponds to an identity store. All artifacts such as resource server and client needs to be created under an identity domain.

As part of the Identity Domain definition, Identity store as well as token settings can be defined.

Currently only 'Embedded LDAP' i.e. DB Authenticator as Identity Store is supported.

Pre-Requisites

- Transaction access is provided to System Administrator.

Features supported in application

Using this option System Administrator can perform the following actions:

- Create Identity Domain
- Edit Identity Domain details
- View Identity Domain details

How to reach here:

System/ Bank Administrator Dashboard > Toggle menu > OAuth > Identity Domain Maintenance

55.1.1 Identity Domain Maintenance - Search

User can search for any maintained Identity Domains by entering the required search parameters.

To search for an Identity Domain

1. In **Identity Domain Maintenance** screen, enter the **Identity Domain Name**.
2. Click **Search**. The search results appears.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Clear** to clear the search parameters.

Token Type	Displays the token type i.e. Access Token or Authorization Code.
Is Refresh Token Enabled	Displays whether refresh token is enabled.
Access Token Expiry Time	Displays the maintained expiry time for an access token.
Refresh Token Expiry Time	Displays the maintained expiry time for a refresh token.
Token Type	Displays the token type i.e. Access Token or Authorization Code.
Is Refresh Token Enabled	Displays whether refresh token is enabled for token type 'Authorization Code'.
Access Token Expiry Time	Displays the maintained expiry time for an access token with token type 'Authorization Code'.
Refresh Token Expiry Time	Displays the maintained expiry time for refresh token with token type 'Authorization Code'.

4. Click **Edit** to edit the Identity Domain details. User is directed to the **Identity Domain Maintenance - Edit** screen with values in editable form.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to previous screen.

55.1.2 Identity Domain Maintenance – Edit

This function enables the System Administrator to edit the details of maintained identity domains. As part of edit, System Administrator can modify the details i.e. URLs as well as token settings for an identity domain.

To edit or update an identity domain:

1. In **Identity Domain Maintenance** screen, in the **Identity Domain Name** field, enter the identity domain name.
2. Click **Search**. The search results appears.

3. Click the **Name** link of the record whose details you want to view.
The **Identity Domain Maintenance – View** screen appears.
4. Click **Edit** to modify the identity domain details.
The **Identity Domain Maintenance – Edit** screen appears in editable form.

Identity Domain Maintenance – Edit

5. Update the details as required.
6. Click **Save** to save the changes.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to previous screen.
7. The **Review** screen appears. Verify the details, and click **Confirm..**
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to cancel the operation to navigate to previous screen.
8. The success message of identity domain details modification appears along with the reference number.
Click **OK** to complete the transaction.

55.1.3 Identity Domain Maintenance – Create

This function enables the System Administrator to create an identity domain. As part of Identity Domain definition, the administrator can define the identity store, different URLs i.e. redirect and Error URLs and the token settings.

To create an identity domain:

1. Click **Create** to create a new Identity Domain. The **Identity Domain Maintenance - Create** screen appears.

Identity Domain Maintenance – Create

Field Description

Field Name	Description
------------	-------------

Identity Domain Definition

Identity Domain Name	Specify the name of the Identity Domain.
-----------------------------	--

Identity Domain Description	Specify the Identity Domain description.
------------------------------------	--

Field Name	Description
Identity Store	Select the Identity store to be mapped for the identity domain. Currently only Embedded LDAP is supported for the identity store.
Consent page URL	Specify the Consent page URL. This is the page on which the user will get re-directed to provide consent to the Third Party Provider (TPP)
Error page URL	Specify the Error page URL. This is the page on which the user will get re-directed to in case of incorrect details.
Token Setting	
Token Type	Displays the token type as Access Token. Token settings can be defined for both token types i.e. Authorization Code and Access Token
Access Token Expiry Time	Specify the expiry time for the access token.
Is Refresh Token Enabled	Specify whether the refresh token needs to be enabled. If enabled, the TPP will be provided with a refresh token along with access token.
Refresh Token Expiry Time	Specify the expiry time for refresh token. This field will be enabled to enter the expiry time only if Refresh Token is enabled.
Token Type	Displays the token type as Authorization Code. Token settings can be defined for both token types i.e. Authorization Code and Access Token
Access Token Expiry Time	Specify the expiry time for the access token for token type as authorization code
Is Refresh Token Enabled	Specify whether the refresh token needs to be enabled. If enabled, the TPP will be provided with a refresh token along with access token for token type Authorization Code.
Refresh Token Expiry Time	Specify the expiry time for refresh token. This field will be enabled to enter expiry time only if Refresh Token is enabled for token type 'Authorization Code'

2. In the **Identity Domain Name** field, enter name for an identity domain to be created.
3. In the **Identity Domain Description** field, enter description for an identity domain to be created.
4. From the **Identity Store** list, select the Identity store for the identity domain.
5. In the **Consent Page URL** field, enter URL for the consent page on which the user needs to be re-directed for providing consent to the TPP.
6. In the **Error Page URL** field, enter URL for the error page on which the user needs to be re-directed in case of incorrect details entered.

7. In the **Access Token Expiry Time** field for token type **Access Token**, enter the expiry time for the access token in days and hh:mm format.
8. Click the **Is Refresh Token Enabled** toggle to 'Y' if there is a need to provide with a refresh token along with an access token.
 - b. In the **Refresh Token Expiry Time** field, enter the expiry time for the refresh token in days and hh:mm format.
9. In the **Access Token Expiry Time** field of **Authorization Code Token** type, enter the expiry time for the access token in days and hh:mm format.
10. Click the **Is Refresh Token Enabled** toggle to 'Y' if there is a need to provide with a refresh token along with an access token for token type 'Authorization Code'
 - c. In the **Refresh Token Expiry Time** field, enter the expiry time for the refresh token in days and hh:mm format. This expiry time is for refresh token with token type 'Authorization Code'
11. Click **Save** to save the changes.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to previous screen.
12. The **Review** screen appears. Verify the details, and click **Confirm..**
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to cancel the operation to navigate to previous screen.
13. The success message of identity domain details creation appears along with the transaction reference number.
Click **OK** to complete the transaction.

55.2 Resource Server Maintenance

The resource server is the server that contains the user's information that is being accessed by the third party application and handles authenticated requests after the application has obtained an access token.

Resource Server is always associated to one Identity Domain. Through this maintenance, the administrator can define scopes for the resource server. Scopes are transactions or inquiries that are provided to the client so that the TPP/client can transact or inquire on behalf of the customer with an access token provided the customer has provided consent to the TPP.

Pre-Requisites

- Transaction access is provided to System Administrator.

Features supported in application

Using this option System Administrator can perform the following actions:

- Create Resource Server
- Edit Resource Server
- View Resource Server

How to reach here:

System/ Bank Administrator Dashboard > Toggle menu > OAuth > Resource Server Maintenance

55.2.1 Resource Server Maintenance - Search

User can search for any maintained Resource Servers by entering the required search parameters.

To search for a Resource Server.

1. In **Resource Server Maintenance** screen, in the **Resource Server Name** field, enter name of the resource server that is to be searched.
2. From the **Identity Domain** list, select the appropriate identity domain from which resource servers are to be searched. One Identity Domain can have multiple resource servers associated.
3. Click **Search**. Based on the input search parameters, system will display the search results i.e. Resource Server Name and Description.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Clear** to clear the search parameters.

55.3 Client Maintenance

Clients are Third Party Provides (TPPs) that can access information from the resource server on behalf of the user provided the user has provided consent to the TPPs. As part of this definition, the administrator can define client details i.e. client ID, client name, scopes, redirect URLs etc.

Pre-Requisites

- Transaction access is provided to System Administrator.

Features supported in application

Using this option System Administrator can perform the following actions:

- Create Client
- Edit Client
- View Client

How to reach here:

System/ Bank Administrator Dashboard > Toggle menu > OAuth > Client Maintenance

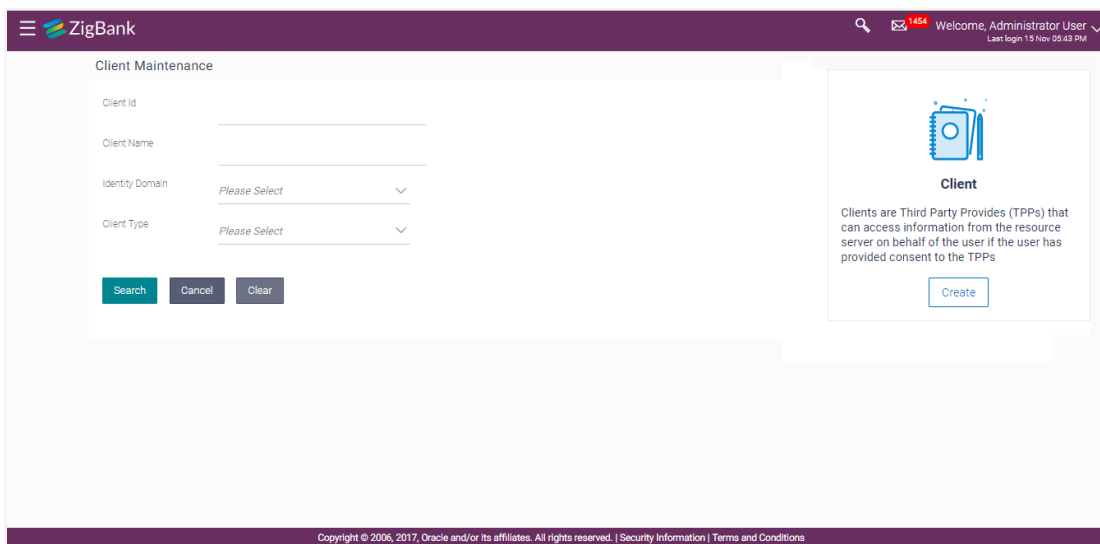

55.3.1 Client Maintenance - Search

User can search for any maintained Clients by entering the required search parameters.

To search for any maintained client

1. In **Client Maintenance** screen, enter the **Client Name** as one of the search criteria.
2. Click **Search**. The search summary appears.
 OR
 Click **Cancel** to cancel the transaction.
 OR
 Click **Clear** to clear the search parameters.

Client Maintenance – Search

Client Maintenance – Search Summary

Field Description

Field Name	Description
Client ID	Specify the Client ID that is to be searched.
Client Name	Specify the Client Name if the client needs to be searched based on client name.
Identity Domain	Select the Identity Domain in which the client needs to be searched.
Client Type	Select the type of client based on which search is to be done.
Search Result	
Client ID	System displays the client ID of the client based on the input search parameters.
Client Name	System displays the client name of the client based on the input search parameters.
Identity Domain	System displays the name of identity domain to which client belongs.
Client Type	System displays the client type for the searched client.

3. Click on **Client Id** link to view details of the selected client.

Client Maintenance – View

The screenshot shows the 'Client Maintenance - View' page in the ZigBank application. The page header includes the ZigBank logo, a search icon, a notification bell with '1454', and the user 'Welcome, Administrator User' with a dropdown arrow and 'Last login 15 Nov 05:43 PM'. The main content area is titled 'Client Maintenance' and contains three sections:

- Client Definition:** A table with the following data:

Client Id	0bbaf721-6731-457c-b351-7320f70b7424
Client Name	OBDXThirdPartyClient
Client Description	OBDXThirdPartyClient
Identity Domain	OBDXThirdPartyAppDomain
Client Type	CONFIDENTIAL_CLIENT
Grant Type	AUTHORIZATION_CODE PASSWORD REFRESH_TOKEN
- Redirect URL:** A table with the following data:

Redirect URL	http://10.180.57.125:12003/oauthobdx/home.html http://10.180.57.125:7777/oauthobdx/home.html http://mumaa012.in.oracle.com/oauthredirect.html http://mum00chm.7777/oauthredirect.html
--------------	--
- Scope:** A table with the following data:

Resource Server	OBDXThirdPartyAppResource
Scope	SC04 SC02 SC05 SC01
Default Scope	OBDXThirdPartyAppResource.SC02

At the bottom of the content area are three buttons: 'Edit' (green), 'Cancel' (grey), and 'Back' (grey). The footer contains the copyright notice: 'Copyright © 2006, 2017, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

Field Description

Field Name	Description
------------	-------------

Client Definition

Client ID Displays the Client ID of the selected Client

Client Name Displays the Client Name of the selected client.

Client Description Displays the Client description of the selected client.

Identity Domain Displays the name of the Identity Domain to which client belongs.

Grant Type Displays the grant type for the selected client.

Redirect URL

Redirect URL Displays the redirect page URLs for the selected client.

Scope

Field Name	Description
Resource Server	Displays the name of the resource server to which the mapped scopes belong.
Scope	Displays the scope name defined for the client.
Default Scope	Displays the default scope defined for the client.

4. Click **Edit** to update details of the client. User is directed to the **Client Maintenance - Edit** screen with values in editable form.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Back** to navigate to previous screen.

55.3.2 Client Maintenance – Edit

This function enables the System Administrator to update the details of the maintained clients. System Administrator can update specific client details, Redirect URL, and scopes.

To update client details:

1. In **Client Maintenance** screen, enter the search criteria.
2. Click **Search**. The search summary appears.

FAQs

1. Can user be the part of multiple user groups created under a party?

Yes, same user can be part of multiple user groups. Whereas creating a user group without any user is not allowed.

2. Where can these Administrator User Groups be used?

User groups created for Administrator users are used for approval and for User Group – mail subject mapping.

Approval - User groups maintained by administrators are used while creating approval workflows and approval rules.

Secured Mailbox - Each subject category is linked to a group of Bank Administrator users. Depending upon the mail-subject mapping to each Bank Administrator user, administrators will receive the mails only of the subjects mapped to the users and initiated by bank's customers.

3. Can I delete an existing user group?

No, user groups cannot be deleted but can be edited. Administrator can add new users and remove existing users of the user group.

4. Can I add users of linked party ID while creating a user group for primary party?

No, only users of primary party can be the part of user group.

Print | **Cancel**

Note

Users created by user management system will appear on this page under the new category and their passwords can be printed from the print option provided. The user whose password has to be printed can be searched by options provided. Passwords created are bifurcated into two categories as "new" for new users of the bank and "reset" for existing users who has requested for the password reset. Once password for a user gets printed, the corresponding record gets deleted.

Field Description

Field Name	Description
------------	-------------

User Type	Type of user, which is to be searched.
------------------	--

The user types are:

- Corporate
- Retail
- Administrator

User Name	To search the user with the user name. Partial search is allowed.
------------------	---

Party ID	Allows to search based on Party id.
-----------------	-------------------------------------

First Name	Allows to search based on first name or given name of the user.
-------------------	---

Last Name	Allows to search based on last name/ surname of the user.
------------------	---

Email ID	Allows to search based on email id of the user.
-----------------	---

Mobile Number	Allows to search based on mobile number of the user.
----------------------	--

Field Name	Description
Password Generation From	Allows to search based on password generation date.
Password Generation To	Allows to search based on password generation date.
Password Type	Allows to search based on password type. The options are: <ul style="list-style-type: none"> • New- Password created for new users of the bank. • Reset- Password created for the existing users of the bank who are requested for the password reset. • All- Password created for new users as well as existing users of the bank.

Search Results

Full Name	First name and last name of the user.
User Name	User Name of the user.
Print Status	Print status of the password. If the password printing gets failed due to some reason for a user, system will show the status as 'error in printing' for that record. If the record gets successfully printed that record will get removed from the list. For the records which are not printed yet, this status remains blank.

5. Click **Search**.
The search results appear on the **Print Password** screen based on the search parameters.
OR
Click **Clear** if you want to reset the search parameters.
OR
Click **Print** if you want to print the password letter, welcome letter, terms and conditions documents.
OR
Click **Cancel** if you want to cancel the transaction.

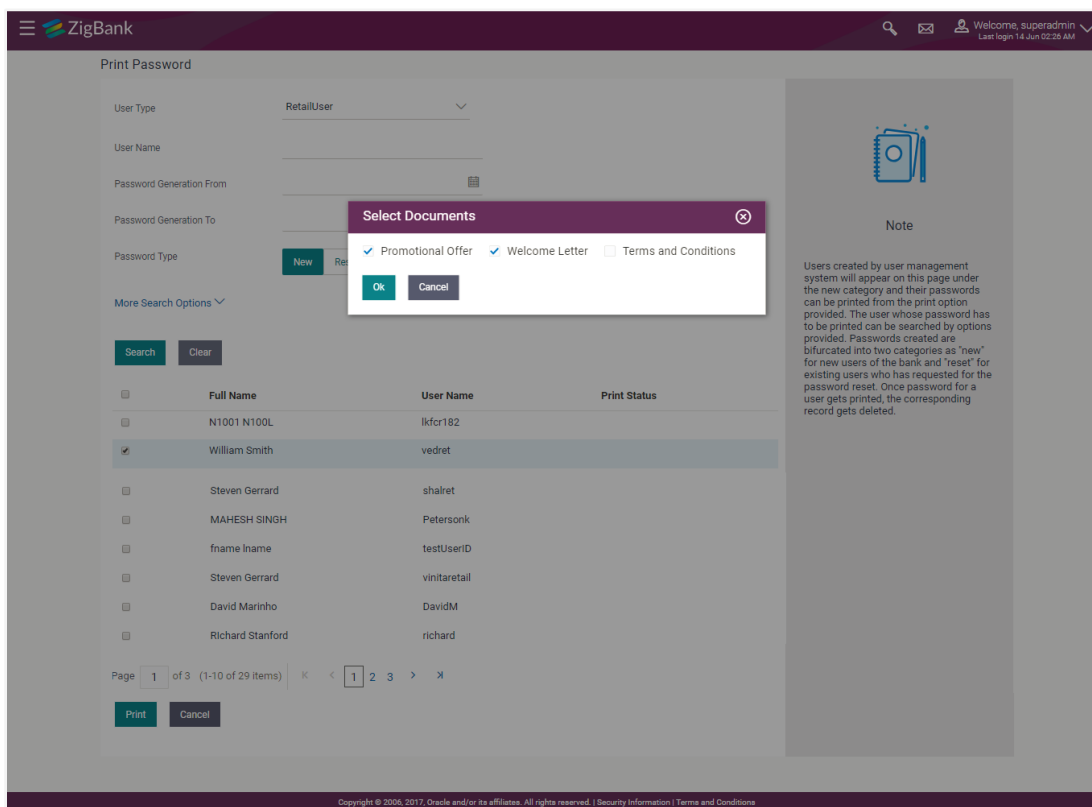

57.2 Print Password - Print

This feature allows the Bank Administrator to print the password letter, welcome letter, terms and conditions document etc.

To print the password letter for the user:

1. In the **Print Password - Search Results** section, select the user record for which you want to print the password letter.
2. Click **Print**. The 'Select Documents' pop up window appears.

Print Password

Field Description

Field Name	Description
Select Documents	
Terms & Conditions	Document containing terms and conditions of the bank.
Welcome Letter	Welcome letter for the user for opening the account.
Promotional Offer	Promotional offers of the bank.

3. Select the documents, which you desire to print.

4. Click **Print** to print the documents.
OR
Click **Cancel** to cancel the printing.

Note: For printing the password, the implementation team will need to write a utility. For more information on implementation of 'Print Password', refer **Oracle Banking APIs Security Guide**.

FAQs

1. **Can the password be only printed by the same Administrator user who has created the user/reset the password or it can be done by any other Administrator user as well?**

All the reset/new passwords can be printed by all the admin users who have access to Print Password Screen.

2. **Can the Bank maintain separate documents for each type of user role?**

No, documents cannot be maintained as per the user role. Same documents will be available for all type of users (Retail/Corporate/Administrator).

58. Alerts Subscription

Using this option System/Bank Administrator can subscribe alerts for a user for selected events. Retail and Corporate users of the bank, can contact the bank to subscribe to alerts. The Bank Administrator subscribes users to alerts, delivered through Email, SMS, through push notification or in their on-screen mailbox.

Note that this functionality is for non-mandatory alerts.

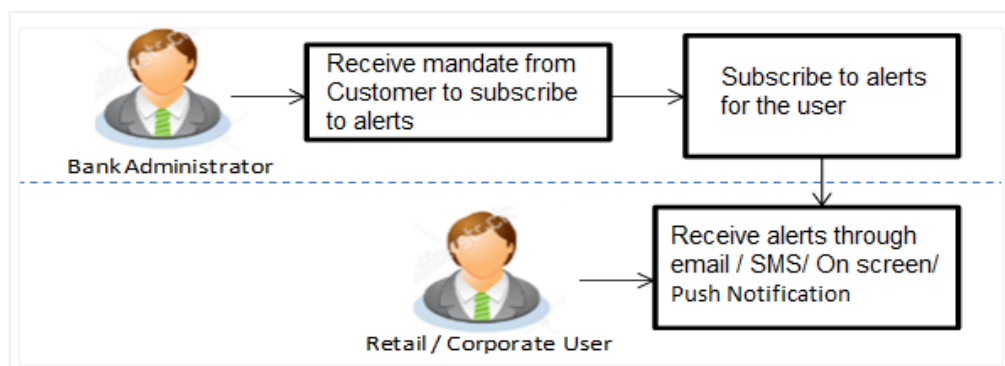

The subscribed alert types are:

- User Level Alerts
- Customer Level Alerts
- Account Level Alerts

Pre-Requisites

- Transaction access is provided to Bank Administrator.
- Approval rule set up for Bank Administrator to perform the actions.
- Maintain Alerts, so that these are available for subscription
- Customers (retail and corporate users) are maintained

Workflow

Features Supported In Application

- Search alerts subscribed
- Subscribe / unsubscribe to alerts

How to reach here:

System/ Bank Administrator Dashboard > Toggle menu > Others > Alerts Subscription

58.1 Alerts Subscription - Search

Using this option, the Bank Administrator can search and view the details of alerts subscribed. If the search parameters are not specified, records of all the alerts maintained for a party are displayed. All the alerts subscribed for a party will be displayed in the respective categories viz. Current and Savings, Term Deposits, Loans etc. in a table.

To view subscribed alerts for a party:

1. From the **User Type** list, select the appropriate option whose alerts you wish to view.
2. In the **User Name** field, enter the user name.
3. Click **More Search Options** to enter the additional search criteria.
4. Click **Search**.
The search result appears based on the search criteria.
OR
Click **Cancel** to cancel the transaction.
OR
Click **Clear** to clear the search parameters.

Alerts Subscription - Search

The screenshot displays the 'Alerts Subscription - Search' page. At the top, there is a navigation bar with the ZigBank logo and user information: 'Welcome, Superadmin' and 'Last login: 17 Jun 03:41 AM'. The main content area is divided into two sections. On the left, there is a search form with the following fields: 'User Type' (set to 'RetailUser'), 'User Name' (set to 'a'), 'First Name', 'Last Name', 'Email', 'Mobile Number', and 'Party ID'. Below these fields is a 'Search Party Name' button. There are also 'Search' and 'Clear' buttons. On the right, there is a sidebar with a calendar icon and the title 'Alert Subscription - Search'. Below the title, there is a brief instruction: 'As Bank Administrator you can subscribe alerts for users or update existing ones. Start by searching for the customer by keying in any of the parameters (user name, party id, email etc). Select the customer you want and proceed to do the alert subscription'. Below the search form, there is a 'Search Results' section with a table. The table has three columns: 'Full Name', 'Party ID / Name', and 'User Name'. The results are as follows:

Full Name	Party ID / Name	User Name
Ronaldo Cristiano	001147	RonaldOC
Santos Neymar	001147	NeymarS
Anderson wood	001164	anderson
Zlatan Ibrahimovic	001147	ZlatanB
Richarlison Andrade	001147	RicharlisonA
p j	001147	userpoonam

At the bottom of the search results, there is a pagination control showing 'Page 1 of 1 (1-6 of 6 items)' and a 'Cancel' button. The footer of the page contains the copyright information: 'Copyright © 2006, 2017, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

Field Description

Field Name	Description
------------	-------------

User Type	The user type.
------------------	----------------

The options are:

- Corporate User
- Retail User

User Name	User name maintained in the core banking application for retail users and maintained for corporate users.
------------------	---

First Name	User's first name.
-------------------	--------------------

Last Name	User's last name.
------------------	-------------------

Email	User's registered email address.
--------------	----------------------------------

Note: For a retail user, the email Id will be fetched from the Party Id maintained in the Core Banking Application. For a corporate user the email Id will be fetched from Users maintained in **User Management**.

Mobile Number	User's registered mobile number.
----------------------	----------------------------------

Note: For a retail user, the mobile number will be fetched from the Party details maintained in the Core Banking Application. For a corporate user the mobile number will be fetched from Users maintained in **User Management**.

Party ID	Party Id of the user.
-----------------	-----------------------

Search Party Name	Enter Party Id, and click to search the party name of the user.
--------------------------	---

Search Result

Full Name	Full name of the user.
------------------	------------------------

Party Id/ Name	Party Id and/ or name of the user.
-----------------------	------------------------------------

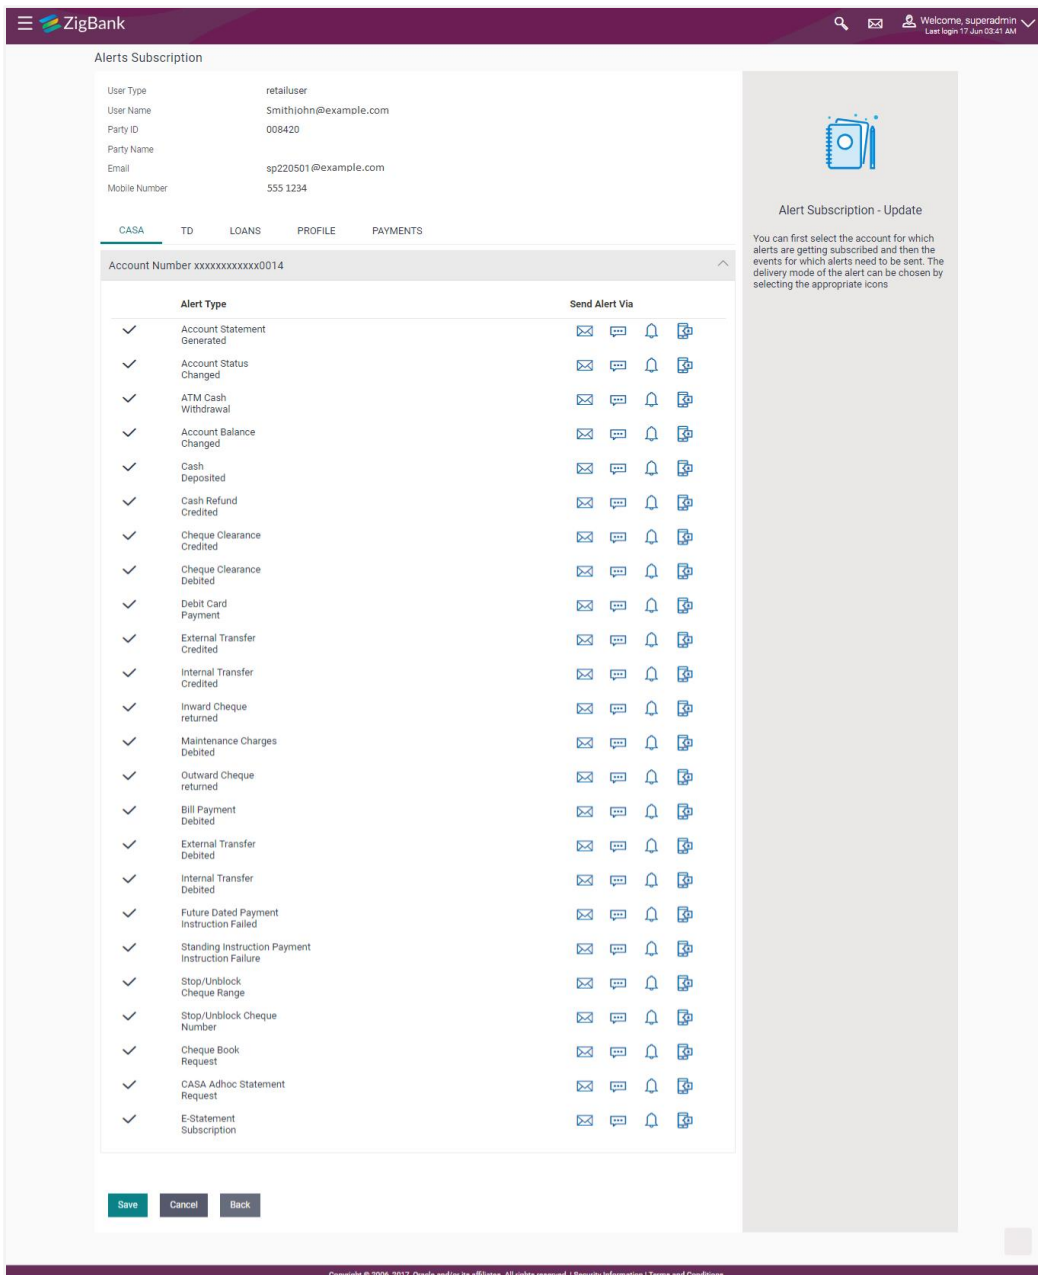

User Name	User name of the user.
------------------	------------------------

5. For the detailed view, click on **User Name** field. The tabs for all modules CASA/ Term Deposit/ Loans / Profile that the user has access to with the respective account numbers appears.

6. Click  against the particular account number to view alert type and delivery mode, for each CASA (Current and Savings Accounts) / TD (Term Deposits) / Loans account.

Note: View the  icon on the delivery mode against the alert, if the user has subscribed to any alerts for that.

Alerts Subscription - Detailed View

The screenshot displays the 'Alerts Subscription' interface for a user named 'retailuser'. The user's details are as follows:

- User Name: Smithjohn@example.com
- Party ID: 008420
- Party Name:
- Email: sp220501@example.com
- Mobile Number: 555 1234

The interface shows tabs for 'CASA', 'TD', 'LOANS', 'PROFILE', and 'PAYMENTS'. The 'CASA' tab is selected, and the account number 'xxxxxxxxxxxx0014' is displayed. Below this, a table lists various alert types and their delivery modes:

Alert Type	Send Alert Via
<input checked="" type="checkbox"/> Account Statement Generated	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
<input checked="" type="checkbox"/> Account Status Changed	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
<input checked="" type="checkbox"/> ATM Cash Withdrawal	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
<input checked="" type="checkbox"/> Account Balance Changed	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
<input checked="" type="checkbox"/> Cash Deposited	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
<input checked="" type="checkbox"/> Cash Refund Credited	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
<input checked="" type="checkbox"/> Cheque Clearance Credited	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
<input checked="" type="checkbox"/> Cheque Clearance Debited	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
<input checked="" type="checkbox"/> Debit Card Payment	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
<input checked="" type="checkbox"/> External Transfer Credited	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
<input checked="" type="checkbox"/> Internal Transfer Credited	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
<input checked="" type="checkbox"/> Inward Cheque returned	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
<input checked="" type="checkbox"/> Maintenance Charges Debited	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
<input checked="" type="checkbox"/> Outward Cheque returned	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
<input checked="" type="checkbox"/> Bill Payment Debited	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
<input checked="" type="checkbox"/> External Transfer Debited	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
<input checked="" type="checkbox"/> Internal Transfer Debited	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
<input checked="" type="checkbox"/> Future Dated Payment Instruction Failed	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
<input checked="" type="checkbox"/> Standing Instruction Payment Instruction Failure	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
<input checked="" type="checkbox"/> Stop/Unblock Cheque Range	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
<input checked="" type="checkbox"/> Stop/Unblock Cheque Number	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
<input checked="" type="checkbox"/> Cheque Book Request	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
<input checked="" type="checkbox"/> CASA Adhoc Statement Request	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>
<input checked="" type="checkbox"/> E-Statement Subscription	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>

At the bottom of the interface, there are buttons for 'Save', 'Cancel', and 'Back'. A sidebar on the right contains an 'Alert Subscription - Update' section with a note: 'You can first select the account for which alerts are getting subscribed and then the events for which alerts need to be sent. The delivery mode of the alert can be chosen by selecting the appropriate icons'.

7. Subscribe/ unsubscribe alerts, and click **Save** to subscribe/ unsubscribe alerts.
OR
Click **Cancel** to cancel the transaction.

OR
Click **Back** to navigate to previous screen.

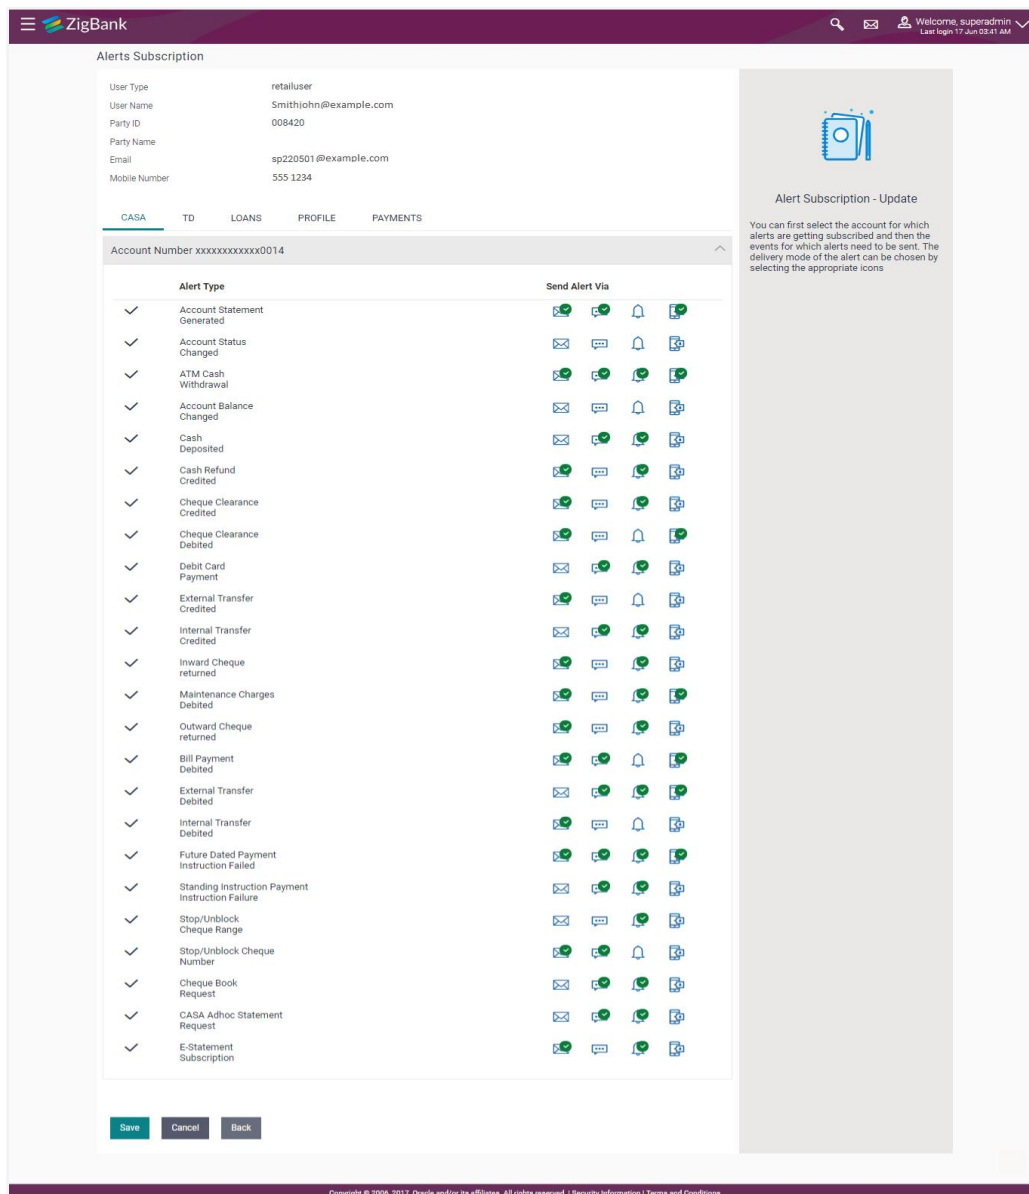

58.2 Subscribe/ Unsubscribe Alerts

Using this option, Bank Administrator can modify the alerts subscribed for the user.

To subscribe / unsubscribe alerts:

1. Repeat steps 1 to 3 of **Alerts Subscription- Search** section.
The categories viz details of an alert subscribed appears.
2. Click  against the particular account number to view the alerts subscribed.

FAQs

1. **Which alerts can the Bank Administrator subscribe or unsubscribe, for the retail or corporate user?**

The alerts which are not mandatory can be subscribed or unsubscribed, by the Bank Administrator for the retail/corporate user.

2. **What if a Retail or Corporate customer wants to opt-out of alerts?**

The Bank Administrator can unsubscribe the alerts for a Retail or Corporate customer. Please note that the customer will continue to receive the mandatory alerts irrespective of his choice on the subscribed alerts.

[Home](#)

59. Request Processing

This feature enables the Bank Administrator to view the details of each service request initiated by business user and hence, enables the administrator to take an informed decision regarding the approval or rejection of the service request. Alternately, the administrator can also select multiple service request records from the summary page to approve or reject multiple requests at once. The search criteria provided enables the administrator to filter service requests based on various criteria such as request type, status, reference number, etc.

For the requests built using Service Request Form builder feature, once the Administrator approves/rejects a Service Request, he can change the status of the request and can also enter the comments while updating the status.

Below are the Service Requests that are available out of the box in the system:

- Credit Card Supplementary
- Credit Card PIN Request
- Replace Credit Card
- Update Card Limits
- Update Credit Card Auto Payment
- Register Credit Card Auto Payment
- Deregister Credit Card Auto Payment
- Activate Credit Card
- Hotlist Debit Card
- Cancel Debit Card
- Debit Card PIN Request
- Apply Debit Card
- Replace Debit Card
- Block Debit Card (temporary block)
- Unblock Debit Card (remove temporary block)
- Upgrade Debit Card

Apart from the above mentioned Service Requests, Bank can define new Service Requests definitions using Service Request-Form builder.

Pre-Requisites

- Transaction access is provided to Bank Administrator.

Features Supported In Application

The module supports following features:

- View details of Service Request raised by customers
- Approve / Reject Service Requests
- Changes status of Service Request and input comments (for service requests built using Service Request-form builder)

How to reach here:

System/ Bank Administrator Dashboard > Toggle Menu > Others >Request Processing
 OR
 Bank Administrator Dashboard > Others >Request Processing

59.1 Request Processing - Summary

To view service requests:

1. Select the **Request Processing** option on the dashboard or menu. The initial (summary) page of the Request Processing appears.

Request Processing - Summary

The screenshot displays the 'Request Processing' summary page. At the top, there's a navigation bar with the ZigBank logo and user information: 'Welcome, admin admin' and 'Last login 25 May 09:32 PM'. Below the navigation bar, there are search filters for 'Products', 'Severity', 'Request Name', 'Request Category', 'Status', and 'Request Type'. The 'Status' filter is set to 'Pending'. There are 'Search', 'Reset', and 'Cancel' buttons, along with a link for 'More Search Options'. Below the filters, there are 'Approve' and 'Reject' buttons. The main content is a table with the following columns: Date, Request Name, Requested By, User Name, Party ID, Reference No, and Status. The table contains 10 rows of data, all with a 'Pending' status. At the bottom of the table, there is a pagination control showing 'Page 1 of 3 (1-10 of 26 items)' and a 'Back' button.

Date	Request Name	Requested By	User Name	Party ID	Reference No	Status
25 May 2018	AddOn Card	Ashok R Jain	MikeCBohr	***236	333	Pending
25 May 2018	Credit Card PIN Request	Ashok R Jain	MikeCBohr	***236	332	Pending
25 May 2018	Credit Card PIN Request	Ashok R Jain	MikeCBohr	***236	320	Pending

Field Name	Description
	product.
Request Category	The administrator can search for service requests based on service request category. Category list gets populated on the basis of the product name selected.
Severity	The administrator can search for service requests based on severity of the service request.
Status	The administrator can search for service requests based on status. On selecting a status, the administrator is required to mandatorily specify a date range so as to be displayed all the service requests that were initiated within the specified date range and that are in the particular status.
Request Name	The administrator can search for service requests on the basis of name of the service request.
Request Type	The administrator can select the type of service request to be displayed in the search result records.
Reference No	The administrator can search for a service request based on reference number that was generated at the time the service request was initiated.
Date Range	The administrator can search for service requests initiated between two dates by specifying a date range. The administrator cannot specify a date range that exceeds 30 days. (The maximum date range is configurable).
First Name	The administrator can search for service requests initiated by a particular business user by specifying the user's first name
Last Name	The administrator can search for service requests initiated by a particular business user by specifying the user's last name or surname
User Name	The administrator can search for service requests initiated by a particular business user by specifying the user's user name.
Party ID	The administrator can search for service requests initiated by business users on the basis of party ID.
Search Results	
Date	The date on which the service request was raised.
Request Name	The name of the service request.
Requested by	The name of the customer who has raised the service request.
User Name	The user name of the customer who has raised the service request
Party ID	The party ID of the user who has raised the service request.

Field Name	Description
------------	-------------

Reference No	The reference number generated at the time the service request was raised.
---------------------	--

Status	The current status of the service request.
---------------	--

- Click on a specific service request record to view the details of that service request.
OR
Select the checkbox of one or multiple service requests to approve or reject service requests.

To search for specific service requests:

- Enter the required information in the search criteria fields.
- Click **Search**. The specific service request records are displayed based on the search criteria specified.
OR
Click **Reset** to clear the search parameters.

Service Request - Search Result

The screenshot shows the ZigBank Request Processing interface. At the top, there is a navigation bar with the ZigBank logo and user information: "Welcome, admin admin" and "Last login 25 May 09:32 PM". Below the navigation bar, there are search filters for "Products", "Severity", "Request Name", "Reference No", "First Name", "User Name", "Request Category", "Status", "Request Type", "Date Range", "Last Name", and "Party ID". The "Request Name" filter is set to "Update Card Limits" and the "Status" filter is set to "Pending". There are "Search", "Reset", and "Cancel" buttons. Below the filters, there are "Approve" and "Reject" buttons. A table displays the search results with columns: Date, Request Name, Requested By, User Name, Party ID, Reference No, and Status. The table contains four rows of data, all with a status of "Pending". At the bottom, there is a "Page 1 of 1 (1-4 of 4 items)" indicator and a "Back" button.

Date	Request Name	Requested By	User Name	Party ID	Reference No	Status
25 May 2018	Update Card Limits	Ashok R Jain	MikeCBohr	***236	306	Pending
25 May 2018	Update Card Limits	Ashok R Jain	MikeCBohr	***236	305	Pending
25 May 2018	Update Card Limits	Ashok R Jain	MikeCBohr	***236	304	Pending
25 May 2018	Update Card Limits	Ashok R Jain	MikeCBohr	***236	303	Pending

- Click on a specific service request record to view the details of that service request.
OR
Select the check box of one or multiple service requests to approve or reject service requests.

59.2 Service Request Details (For Service Requests available out of the box)

This page is displayed once the Bank Administrator selects a service request record from the previous summary page. This screen comprises of three sections which display the details of the service request, the details of the initiator of the service request and also the transaction journey i.e. a time line graph depicting the stages of the service request.

Below are the Service Requests that are available out of the box in the system:

- Credit Card Supplementary
- Credit Card PIN Request
- Replace Credit Card
- Update Card Limits
- Update Credit Card Auto Payment
- Register Credit Card Auto Payment
- Deregister Credit Card Auto Payment
- Activate Credit Card
- Hotlist Debit Card
- Cancel Debit Card
- Debit Card PIN Request
- Apply Debit Card
- Replace Debit Card
- Block Debit Card (temporary block)
- Unblock Debit Card (remove temporary block)
- Upgrade Debit Card

To view the service requests details:

1. Enter the required information in the search criteria fields.
2. Click **Search**. The specific service request records are displayed based on the search criteria specified.
OR
Click **Reset** to clear the search parameters.
3. Click on a specific service request record to view the details of that service request. The service request details appears on the **Service Request Details** screen.

Transaction Journey

This section displays the stages of the service request in the form of a timeline graph. Details pertaining to when the service request was initiated along with when the service request was approved or rejected are displayed with the help of this timeline.

- Click **Approve** to Approve the Service Request.
OR
Click **Reject** to Reject the Service Request.
- Click **Back** to navigate back to the **Request Processing - Summary** screen.

59.2.1 Approve or Reject Service Requests (For Service Requests available out of the box)

The Bank Administrator can take action on service requests initiated by business users by either approving or rejecting requests. The Administrator can select multiple service requests to approve or reject from the Service Request Summary page and can also approve or reject a service request individually after having viewed the details of the request from the Service Request Details page.

To approve / reject service requests from Service Requests Summary page:

- Select the check boxes of the service requests that you wish to take action on. The pop up on which to specify remarks for Approval/Rejection is displayed.
- Enter **Remarks** and click **Approve/Reject**. The service requests get approved / rejected.

Multiple Service Request Approve or Reject

The screenshot displays the ZigBank Request Processing interface. At the top, there is a navigation bar with the ZigBank logo, search, mail, and user profile icons. Below the navigation bar, there are filter dropdowns for Products, Request Category, Severity, Status, Request Name, and Request Type. A table of service requests is shown with columns for Date, Request Name, Reference No, and Status. An 'Approve' modal dialog is open, prompting the user to provide a comment for the selected transactions.

Date	Request Name	Reference No	Status
25 May 2018	Update Card Limits	306	Pending
25 May 2018	Update Card Limits	305	Pending
25 May 2018	Update Card Limits	304	Pending
25 May 2018	Update Card Limits	303	Pending

The 'Approve' modal dialog contains the following text:

Approve

Selected Transactions (4)

Please provide a comment. Max length 100.

Remarks: Approve the requests

Buttons: Cancel, Approve

To approve / reject a service request from the Service Requests Details page:

3. Select the service request on which you wish to take action from the **Service Request Summary** page
4. Click **Approve** or **Reject** button.
The pop up on which to specify remarks for Approval/Rejection is displayed.
5. Enter Remarks and click Approve/Reject.
The service requests get approved/ rejected.

Individual Service Request Approval

The screenshot displays the ZigBank interface for a Service Request Details page. The page is titled "Service Request Details" and contains the following sections:

- Request Details:**
 - Reference No: 306
 - Date Requested: 25 May 2018
 - Request Type: Update Card Limits
 - Credit Card Id: 624700****0110
 - Credit Card Limit Type: Credit
- User Details:**
 - Username: Ashok R Jain
 - User ID: MikeCBohr
 - Party ID: ***236
- Transaction Journey:** A progress bar shows two steps: "1 ADMIN_PE" and "2 COMPLETE".

An "Approve" modal dialog is open in the center of the screen. The modal has a title "Approve" and a close button. The text inside the modal reads: "Please provide a comment. Max length 100." followed by a "Remarks" label and a text input field containing "Approve the request". At the bottom of the modal are two buttons: "Cancel" and "Approve".

At the bottom of the page, there are three buttons: "Approve", "Reject", and "Back".

Individual Service Request Rejection

The screenshot displays the 'Service Request Details' page for a request with Reference No. 306, dated 25 May 2018, for an 'Update Card Limits' request. The user details show Ashok R. Jain. A 'Reject' dialog box is open, asking for a comment (max length 100) with the pre-filled text 'Reject the card limit update request'. The dialog has 'Cancel' and 'Reject' buttons. Below the dialog, a 'Transaction Journey' progress bar shows steps 1 (ADMIN_PE) and 2 (COMPLETE). At the bottom, there are 'Approve', 'Reject', and 'Back' buttons.

59.3 Service Request Details (Requests created using Service Request-Form Builder)

This page appears for the service requests created using 'Service Request Form Builder' screen. The Bank Administrator selects a service request record from the summary page. This screen comprises of three sections which display the request attributes, the details of the service request and the user details.

To view the service requests details:

1. Enter the required information in the search criteria fields.
2. Click **Search**. The specific service request records are displayed based on the search criteria specified.
OR
Click **Reset** to clear the search parameters.
3. Click on a specific service request record to view the details of that service request. The service request details appears on the **Request Processing** details screen.

60. Reports

Using this option, Administrators can generate various adhoc and schedule banking reports. Application provides an option to generate and schedule reports using Oracle Business Intelligence (BI) Publisher and also by using an internal application. The adoption of Oracle BI Publisher provides a simple and easy tool for the Operational and MIS reports

Prerequisites:

- Transaction access is provided to Bank Administrator
- Approval rule set up for Bank Administrator to perform the actions.
- Oracle BI Publisher is configured.

Workflow

Features supported in application

Reports module allows Bank Administrator to

- Generate and schedule Customer and Administrative Reports
- View/ Download generated Reports.
- View User Report Mapping
- Create User Report Mapping
- Edit User Report Mapping
- View Scheduled Report

61. Report Generation

Bank Administrator logs into the system and navigates to Report Generation screen. On accessing 'Report Generation menu, Bank Administrator has to select an option if an adhoc report is to be generated or report needs to be scheduled.

Reports are categorized as:

- Adhoc Reports: When a report needs to be generated immediately on a need basis
- Schedule Reports: When report generation needs to be scheduled at fixed intervals e.g. daily, weekly, monthly etc.

After selecting the report generation category, user has to select a type of a report which needs to be generated. Other reports parameters with respect to each report are displayed on the screen as input fields so that report can be requested with specific data.

Note: If 2 factor authentication is enabled, the reports get generated only after successful authentication.

The list of reports is:

- API Consumption Report
- Bill Payment Pay Later Report
- Biller Reconciliation Report
- Biller Registration Report
- Date wise User Creation Report
- EPI Payment reconciliation Report
- FATCA & CRS Declaration Report
- File Identifier wise Party User Mapping Report
- Party User wise File Identifiers Mapping Report
- Party wise Approval Rule Report
- Party wise File Identifiers Mapping Report
- Party wise Payee Maintenance Report
- Party wise User Groups Report
- Party wise Workflows Report
- Party wise Pending Approvals list Report
- User Segment Summary Report
- Wallet Transaction Activity Report
- Wallets KYC Report
- Wallets Creation for a Date Range Report

Field Description

Field Name	Description
Report Name	Select the type of report to be generated.

61.1 Adhoc Reports

Adhoc reports are generated on demand or on request. Generated reports can be viewed using 'My Reports' screen.

Adhoc Reports

The screenshot displays the 'Reports' section of the ZigBank application. It features a navigation bar with the ZigBank logo and user information. Below the navigation bar, there are two tabs: 'Adhoc' (selected) and 'Schedule'. The 'Adhoc' tab contains a form with the following fields:

- Report Name:** Date wise User creation Report (dropdown menu)
- Report Format:** PDF (dropdown menu)
- Party ID:** 001164
- User Type:** CorporateUser (dropdown menu)
- Duration:** 13 Jan 2018 to 13 Jun 2018 (calendar icons)

At the bottom of the form are three buttons: 'Generate Report' (highlighted in green), 'Cancel', and 'Clear'. To the right of the form is a 'Tips' box with an icon of a notepad and pencil. The tip text reads: 'With this option, you can generate adhoc reports which are internal or related to customers. You need to select the Report Name, Frequency, Duration and Format in which you want to generate it. Once submitted you can view and download the generated reports from My Reports option.'

At the bottom of the page, there is a copyright notice: 'Copyright © 2006, 2017, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'

Field Description

Field Description

Field Name	Description
Report Parameters	
From Date	Date from which the report is generated.
To Date	Date till which the report is generated.
Frequency	The frequency at which the report is generated.
Access Point (Touch Point)	The different channels/ medium for which report is generated.
Party ID	The party ID for whom the report is generated.
Party Name	The name of the party for whom the report is generated.
User Segment	The user segment for which, the report is generated.
User ID	ID of the user.
API Name	The name of the API for which the report is generated.
From Date	Date from which the report is generated.
To Date	Date till which the report is generated.
Count	The total count of transactions that are successful and failed.
Touch Point	The different channels/ medium for which report is generated.
Status	The status of the transaction.

61.3.2 API Consumption - Schedule Reports

The reports that are generated in specific time frame such as daily, weekly, monthly, quarterly, and annually are categorized under scheduled reports.

To generate the API consumption schedule report:

1. Click the **Schedule** tab.
2. From the **Report Name** list, select the appropriate report to be generated.
The respective report generation screen appears.

API Consumption Report - Schedule Report

The screenshot displays the 'Reports' section of the ZigBank interface, specifically the 'Schedule' tab. The form includes the following fields and values:

- Report Name: API Consumption Report
- Report Format: PDF
- Select Frequency: WEEKLY
- Start Generating: 07/30/18 00:00
- Stop Generating: 10/31/18 00:00
- Frequency: WEEKLY
- Touch Point: Internet
- Party Id: 001164
- User Segment: Administrator
- User Id: BruceWay

Buttons for 'Schedule Report', 'Cancel', and 'Clear' are located at the bottom of the form. A 'View Scheduled Reports' link is also present. A 'Tips' section on the right side of the interface provides guidance on scheduling reports.

Tips

With this option, you can schedule reports which are internal or related to customers. You need to select the Report Name, Frequency and Duration for which you want to generate it. Once submitted you can either go to My Reports option and can view or download reports from there or can simply click on View Scheduled Reports link provided on the same page.

Pay Later Date	The future date on which the funds are to be transferred to the billers.
Status	Status of the bill payment
Deletion Date	The date on which the future bill payment cancellation request was initiated

61.6.2 Bill Payment Pay Later - Schedule Reports

The reports that are generated in specific time frame such as daily, weekly, monthly, quarterly, and annually are categorized under scheduled reports.

To generate the Bill Payment Pay Later schedule report:

1. Click the **Schedule** tab.
2. From the **Report Name** list, select the appropriate report to be generated. The receptive report generation screen appears.

Bill Payment Pay Later - Schedule Report

The screenshot shows the ZigBank interface for scheduling reports. The 'Reports' section has two tabs: 'Adhoc' and 'Schedule'. The 'Schedule' tab is active, displaying a form with the following fields:

- Report Name:** Bill Payment Pay Later Report (dropdown menu)
- Report Format:** PDF (dropdown menu)
- Select Frequency:** DAILY (dropdown menu)
- Start Generating:** 06/29/18 00:00 (calendar icon)
- Stop Generating:** 07/29/18 00:00 (calendar icon)
- Biller Id:** BILLER01
- Biller Name:** Vodafone

At the bottom of the form are three buttons: 'Schedule Report' (highlighted in teal), 'Cancel', and 'Clear'. Below the buttons is a link: 'View Scheduled Reports'.

On the right side of the page, there is a 'Tips' section with a lightbulb icon. The tip text reads: "With this option, you can schedule reports which are internal or related to customers. You need to select the Report Name, Frequency and Duration for which you want to generate it. Once submitted you can either go to My Reports option and can view or download reports from there or can simply click on View Scheduled Reports link provided on the same page."

The top navigation bar includes the ZigBank logo, a search icon, a notification icon with a red '1', a user profile icon for 'superadmin', and the text 'Welcome, superadmin' and 'Last login 30 Jun 02:20 AM'.

At the bottom of the page, there is a footer: 'Copyright © 2006, 2017, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

62. My Reports

This option enables the user to download the adhoc/scheduled reports generated using Report Generation screen. On accessing 'My Reports' menu, last 10 reports which generated by the system are listed with the respective report status. User can choose to search the specific report using the search criteria or can opt to view/ download detailed report.

The reports generated on adhoc basis will appear under 'Adhoc' tab, whereas the scheduled reports generated as per set frequency will appear under 'Scheduled' tab.

How to reach here:

Administrator Dashboard > Toggle menu > Reports > My Reports
OR

Bank Administrator Dashboard > Toggle menu > Reports > My Reports

62.1 My Reports - Adhoc

Adhoc reports are generated on demand or on request. Generated reports can be viewed using 'My Reports' screen.

To view and download the generated adhoc reports:

My Reports - Adhoc

The screenshot shows the 'My Reports' page in the ZigBank system. The page has a purple header with the ZigBank logo and user information: 'Welcome, superadmin Last login 14 Jun 01:16 AM'. Below the header, there are tabs for 'Adhoc' and 'Scheduled', with 'Adhoc' selected. A search bar is present with a magnifying glass icon. Below the search bar, there are input fields for 'Report Id', 'Report Name' (with a dropdown arrow), and 'Generation Date' (with 'From Date' and 'To Date' sub-fields and calendar icons). A 'Search' button is located below these fields. The main content area displays a table of reports:

Report Name	Report Sub Id	Generation Date and Time	Status
API Consumption Report	130619513560001	13 Jun 2018 07:06:22 AM	ERROR

1. Click search icon  to search the reports with given search criteria. The search results matching to the search criteria are shown on the same screen.
2. Click on **Report Sub Id** hyperlink to view the detailed report. (Refer specimen provided for each report)

62.2 My Reports - Scheduled

The reports that are generated in specific time frame such as daily, weekly, monthly, quarterly, and annually are categorized under scheduled reports.

To view and download the generated scheduled reports:

1. Click the **Scheduled** tab. The list of scheduled reports appear.
OR

Click  search icon to search the reports with given search criteria. The search results matching to the search criteria are shown on the same screen.

My Reports - Scheduled

The screenshot displays the 'My Reports' section with the 'Scheduled' tab selected. It includes a search interface with the following fields:

- Report Id**: A text input field.
- Report Name**: A dropdown menu with 'Select' as the current selection.
- Generation Date**: Two date pickers labeled 'From Date' and 'To Date'.

Below the search fields is a 'Search' button. The results table is as follows:

Report Name	Report Sub Id	Generation Date and Time	Status
Daily Balance Position Report	080619769439001	08 Jun 2018 11:41:38 AM	PROCESSED
Party wise pending Approvals list Report	080622031109001	08 Jun 2018 10:43:05 AM	PROCESSED
Party wise pending Approvals list Report	080619297480001	08 Jun 2018 10:10:56 AM	PROCESSED

At the bottom of the table, there is a pagination control showing 'Page 1 of 1 (1-3 of 3 items)' and navigation arrows. A 'Cancel' button is located below the table.

Note: You can view the list of all adhoc and scheduled reports from here which are already generated, failed or still under processing.

Field Description

63. User Report Mapping

The user report mapping maintenance allows the Bank Administrators to map the report or set of reports to a specific corporate user. The corporate users can generate and view the reports of which they have an access to.

Bank Administrator searches a corporate user based on the party ID and view the reports mapped to him, he can also un-map the reports from specific corporate user so that access of the specific report/ s can be removed to that corporate user.

The Bank Administrator can also map the accounts of primary and linked parties for which the reports can be generated by a corporate user, so that corporate user can generate the report only for the accounts mapped to him.

How to reach here:

Administrator Dashboard > Toggle menu > Reports > User Report Mapping
OR

Bank Administrator Dashboard > Toggle menu > Reports > User Report Mapping

User Report Mapping

The screenshot shows the 'User Report Mapping' page. At the top left is the ZigBank logo. The top right shows a user profile for 'superadmin' with the text 'Welcome, superadmin' and 'Last login: 16 Jun 04:44 AM'. Below the header, the page title is 'User Report Mapping'. There are two input fields: 'Party ID' and 'Party Name'. Below these fields are three buttons: 'Search' (in green), 'Cancel', and 'Clear'. To the right of the search area is a 'Note' box with a calendar icon and the text: 'You can view the list of all adhoc and scheduled reports from here which are already generated, failed or still under processing.' At the bottom of the page, there is a small copyright notice: 'Copyright © 2006, 2017, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

Field Description

Field Name	Description
Party ID	Party ID of the user.
Party Name	Party name corresponding to the party ID.

63.1 User Report Mapping - Search

Using this option Bank Administrator can search and view the reports mapped to the user.

To search and view the reports mapping:

1. In the **Party ID** field, enter the party id of the user.
OR
In the **Party Name** field, enter the name of the party.
2. Click **Search**. The **User Report Mapping** screen with search results appears.
OR
Click **Clear** to clear the search parameters.
OR
Click **Cancel** the operation and navigate back to 'Dashboard'.

User Report Mapping - Search Result

The screenshot shows the 'User Report Mapping' interface. At the top, there's a search bar with 'Party ID' containing '0023' and an empty 'Party Name' field. Below the search bar are 'Search' and 'Clear' buttons. A table displays the search results with columns for 'Party ID' and 'Party Name'. A 'Cancel' button is at the bottom left. On the right, a 'Note' box states: 'You can view the list of all adhoc and scheduled reports from here which are already generated, failed or still under processing.'

Party ID	Party Name
002306	Karen Dsouza
002309	hh hh

OR
Click **Back** to navigate to the previous screen.

63.2 User Report Mapping - Create

Using this option Bank Administrator can map the reports to a specific corporate user.

To map the reports to a user:

1. In the **Party ID** field, enter the party id of the user.
OR
In the **Party Name** field, enter the name of the party.
2. Click **Search**. The **User Report Mapping** screen with search results appears.
OR
Click **Clear** to clear the search parameters.
OR
Click **Cancel** the operation and navigate back to 'Dashboard'.
3. Click  of user record, for which you want to map the report/ s. The **User Report Mapping** screen to create the report mapping appears.

User Report Mapping - Create

The screenshot shows the 'User Report Mapping' interface. It includes a header with the ZigBank logo and user information (Welcome, superadmin). The main content area contains a form with the following details:

- Party Id: 001121
- Party Name: Steven George Gerrard
- User Name: Steven Gerrard
- User Id: StevenG@gmail.com

Below the form is a 'Mapping Summary' table:

<input type="checkbox"/>	Report Id	Description	Formats
<input type="checkbox"/>	U3	Daily Balance Position Report	PDF,XLSX
<input checked="" type="checkbox"/>	U2	Party wise Payee Maintenance Report	PDF,XLSX
<input type="checkbox"/>	U1	Party wise pending Approvals list Report	PDF,XLSX
<input checked="" type="checkbox"/>	U4	Transaction Summary Report	PDF,XLSX

At the bottom of the form are three buttons: 'Save', 'Cancel', and 'Back'.

Field Description

Field Name	Description
------------	-------------

Party ID	Party ID of the user.
Party Name	Party name of the corporate user.
User Name	Name of the corporate user.
User Id	User Id of the corporate user.

Mapping Summary

Field Name	Description
Report ID	Unique id assigned to a report.
Description	Description of the report.
Formats	The format in which the report is to be generated. The format could be PDF, XLSX.

4. In the **Mapping Summary** section, select the report id of the report which you want to map to the user.
5. Click **Save** to save the mapping.
OR
Click **Cancel** to cancel the operation and navigate back to 'Dashboard'.
OR
Click **Back** to navigate to the previous screen.
6. The **User Report Mapping - Review** screen appears. Verify the details and click **Confirm**.
OR
Click **Cancel** to cancel the operation and navigate back to 'Dashboard'.
OR
Click **Back** to navigate to the previous screen.
7. The success message appears along with the transaction reference number and status of the transaction.
Click **OK** to complete the transaction and navigate back to 'Dashboard'.

63.3 User Report Mapping - Edit

Using this option Bank Administrator can edit the mapping or un-map the reports from specific corporate user.

To edit a User Report Mapping:

1. In the **Party ID** field, enter the party id of the user.
OR
In the **Party Name** field, enter the name of the party.
2. Click **Search**. The **User Report Mapping** screen with search results appears.
OR
Click **Clear** to clear the search parameters.
OR
Click **Cancel** to cancel the operation and navigate back to 'Dashboard'.
3. Click  against the file identifier record for which you want to view the details. The **User Report Mapping - View** screen appears.
4. Click **Edit**. The **User Report Mapping - Edit** screen appears.

User Report Mapping - Edit

The screenshot displays the 'User Report Mapping' edit screen. At the top, the ZigBank logo is on the left, and user information 'Welcome, superadmin' with 'Last login 16 Jun 04:44 AM' is on the right. The main content area is titled 'User Report Mapping' and contains the following details:

- Party Id: 001121
- Party Name: Steven George Gerrard
- User Name: Steven Gerrard
- User Id: StevenG@mail.com

Below this is a 'Mapping Summary' section with a table:

<input checked="" type="checkbox"/>	Report Id	Description	Formats
<input checked="" type="checkbox"/>	U3	Daily Balance Position Report	PDF,XLSX
<input checked="" type="checkbox"/>	U2	Party wise Payee Maintenance Report	PDF,XLSX
<input checked="" type="checkbox"/>	U1	Party wise pending Approvals list Report	PDF,XLSX
<input checked="" type="checkbox"/>	U4	Transaction Summary Report	PDF,XLSX

At the bottom of the mapping summary are three buttons: 'Save' (green), 'Cancel' (grey), and 'Back' (grey). A footer at the very bottom of the page reads: 'Copyright © 2006, 2017, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

5. View the details of report mapping already saved. Select or de-select the report id record to map / un-map a report to a user.
6. Click **Save** to save the modified details.

FAQs

- 1. Can the Bank administrator create the helpdesk session for a new user (who has channel banking facility but has never logged in)?**

No, for new users helpdesk session cannot be created, new users must login himself for the first time.

- 2. Can the administrator set the 2FA mode anything else other than OTP for 'Create Helpdesk session' event in the Authentication screen?**

System does not restrict the administrator from selecting a mode while setting up 2FA for 'Create Helpdesk session', however Administrator must set OTP as the 2FA mode for creating user helpdesk session.

- 3. Can the administrator create the helpdesk session for the user, whose status is updated as 'Locked'?**

No, the system will alert Bank Administrator to update the status of the user to "Unlock" from the User Management before creating the helpdesk session.

[Home](#)

66. Mailbox

Mailbox is a two way communication channel between Bank customers and Bank administrators. Customers communicate with the bank via secured mailbox facility. Customers can send mail messages to the bank with specific pre-defined subjects for their queries/ complaints /feedback. In application, as day 0 maintenance each subject category is linked to a group of bank administrators' users. Depending upon the mail-subject mapping to each bank administrator user, administrators will receive the mails only of the subjects mapped to the users.

Administrators can view the number of received e-mails and access all received and sent e-mails from their secured mailbox. User can click the message to read the detailed content of the message. The subject of the message gives a brief understanding of what the message is about. User can view the message details, the sender information and also view the chain of messages exchanged if any.

The complete chain of message helps user to understand and know the information exchanged with the bank on a particular subject. Bank administrators can also view the alert messages sent by the bank on various banking events.

As a Day 0 maintenance, Bank has to define whether the OBAPI mailbox should point to the UBS-interaction module or to the internal mailbox. In case if the mailbox is pointed to the UBS-Interaction module, the mail initiated by customers will be sent to the UBS bank user for his action and will not be sent to the OBAPI administrator.

Pre-Requisites

- Roles and departments for various Bank Administrator must be defined in reference to mail section
- Alerts must be pre-set by bank and gets auto triggered if subscribed by customer or set as mandatory

Features supported in Application:

- **Inbox:** Where bank administrators can view the messages sent by the customers and also can reply and delete the mails.
- **Sent Mail folder:** This allows user to view the mails replied by logged in user. Also an option is provided to delete the mails.
- **Deleted Mail Folder:** This allows the user to view mails deleted from user's inbox and sent folders and can permanently delete the mails. There is an option to restore the deleted mails to respective folder.
- **Alerts:** View the alerts sent by the bank and received by logged in user. Also an option is provided to delete the alerts.
- **Notifications** - This section allows the logged in user to view all the notifications sent by the bank. Also an option is provided to delete the notifications.

How to reach here:

System/ Bank Administrator Dashboard > Toggle Menu >Mailbox > Mails
OR

System/ Bank Administrator Dashboard > Click 

66.1 Mails

The Mails functionality consist of the following sections:

- **Inbox** : can view messages and can also reply to the messages received
- **Sent Mail**: can view the messages that have been sent by logged in user
- **Deleted Mail**: can view the messages deleted by logged in user from Inbox and Sent Mail folder

Mailbox- Mails

Field Description

Field Name Description

Inbox	Folder that lists the messages sent to Bank Administrator. Number of unread mails if any will be displayed.
Sent Mail	Folder that lists the messages sent by Bank Administrator.
Deleted Mail	Folder that lists the messages deleted by Bank Administrator from Inbox and Sent Mail.
From	The name and the User ID of the sender of the message.

4. Click **Delete** to delete the notification.
OR
Click **Go Back** to navigate to the previous page.

FAQs

1. Can Bank Administrator initiate fresh mails?

No, Bank administrator can not initiate fresh mail. Administrator will be allowed only to reply to the mails received in their inbox.

2. Will Bank Administrators receive all mails initiated by bank's customers?

Bank Administrators will receive only those mails of which the mail subject is mapped to individual user or group of users. E.g. Mail initiated by customer with subject 'Change of communication address' will only be sent to the users whom this subject is mapped.

3. Can Bank Administrator view reply sent by other Administrator to customer's mail?

Yes, bank administrators can view the mails replied by other administrators, only if the mail subject is mapped to the user.

4. Can Bank Administrator delete multiple mails?

Yes, user can select multiple mails and delete the same.

5. Can Bank Administrator restore the deleted mails?

Deleted mails from inbox and sent mail folder will be stored in Deleted Mails folder. User can view the details of deleted mail and can restore the mail back in respective folders. Mails will get permanently deleted from user's view if further deleted from 'Deleted Mail folder'.

67. Security Settings

Security settings includes changing of password and setting of security questions for the user.

Pre-requisites

- User must have a valid Login credentials
- Transaction access is provided to Bank Administrator

Workflow

Features supported in application

The Security Settings maintenance allow the Bank Administrator to:

- Changing of old password to new Password
- Set Security Questions
- View Security Questions
- Edit Security Questions

How to reach here:

System/ Bank Administrator Dashboard > Toggle Menu > Security Settings

67.1 Set Security Question

Security Questions are the second layer of authentication mode set by the Bank to complete various transactions.

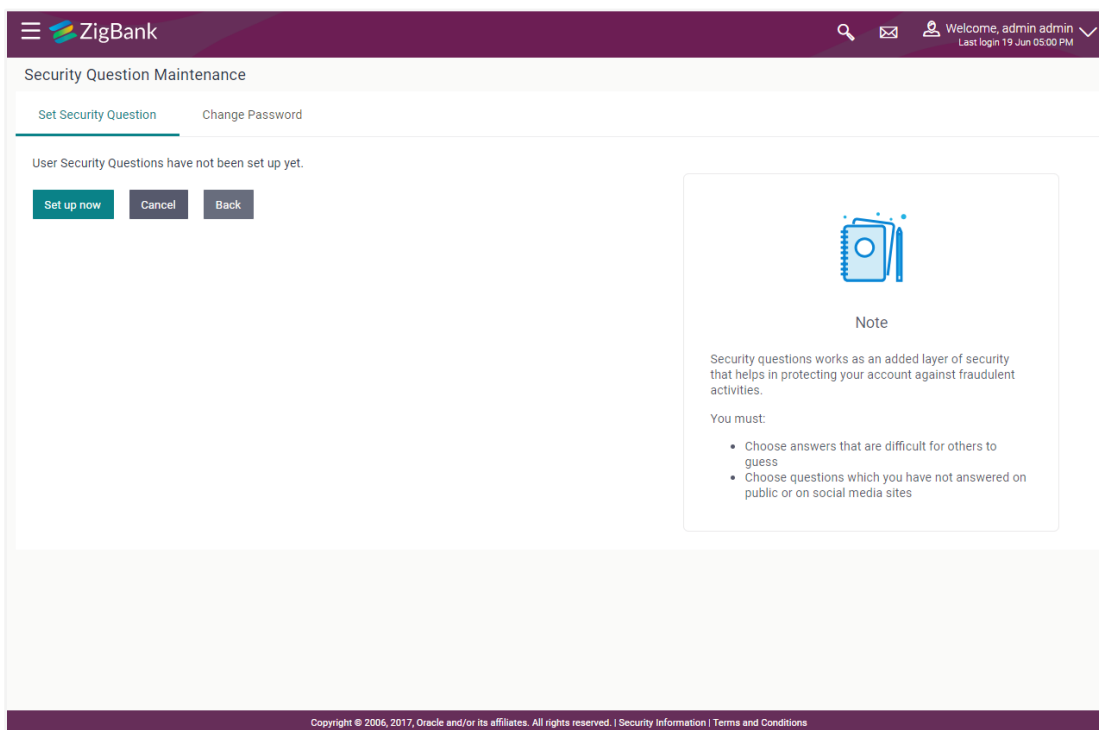

This feature allows the administrator user to set up the answers of the security questions, which will then be used as another layer of security (Over and above the Login credentials).

User will be asked to answer these security questions to complete the transactions for which bank would have set Security Question as the second factor authentication.

How to reach here:

Administrator Dashboard > Toggle Menu > Security Settings > Set Security Question

Set Security Question

To set up security questions:

Note: Since security questions have not been set-up by the user, message will be displayed "Security Questions are not set up yet".

1. Click **Set up now** to set-up security questions. The **User Security Question** screen appears.
OR
Click **Cancel** to cancel the operation and navigate back to '**Dashboard**'.
OR
Click **Back** to go back to the previous screen.

User Security Question

The screenshot displays the 'Security Question Maintenance' page in the ZigBank admin interface. The page header includes the ZigBank logo, search, mail, and user profile icons, along with the text 'Welcome, admin admin' and 'Last login 19 Jun 05:00 PM'. The main content area is titled 'Security Question Maintenance' and contains five question entries. Each entry consists of a question number, a dropdown menu for the question, and a text input field for the answer. The questions are: 'what's your fav color?', 'what's your mother birth place?', 'what's your pet name?', 'what's your birth place?', and 'what's your fav place?'. At the bottom of the form are three buttons: 'Save' (green), 'Cancel' (grey), and 'Back' (grey). A 'Note' box on the right side of the page contains the following text: 'Security questions works as an added layer of security that helps in protecting your account against fraudulent activities. You must: • Choose answers that are difficult for others to guess • Choose questions which you have not answered on public or on social media sites'. The footer of the page contains the copyright notice: 'Copyright © 2006, 2017, Oracle and/or its affiliates. All rights reserved. | Security Information | Terms and Conditions'.

Field Description
