**Advice**

You can configure various BIP advices that are available for the process.

**Advice Summary**

The summary screen provides a list of configured advice. You can configure an advice for a process using the Advice Maintenance.

**How to reach here:**

Core Maintenance > Advice > View Advice
Advice Maintenance

The maintenance screen allows you to configure advices.

How to reach here:

Core Maintenance > Advice > Create Advice

How to add an advice:

1. In the Create Advice screen, provide the required details:
   - Advice Name: Enter a name for the advice.
   - Advice Description: Enter additional information about the advice.
   - Micro Service Name: Enter the micro service name generating the advice.
- Swift Micro Service: Enter the information about the swift micro service.
- Micro Service Endpoint: Enter an endpoint micro service.
- Application Name: Enter an application name for which advice is generated.
- Application Description: Enter additional information about the application.

**Media Details**

By default, fields that require an media details appear. You can click + to add multiple media details and click - to remove a media details.

- Media: Click Search to view and select the required media.
- Branch: Click Search to view and select a branch.
- Currency: Click Search to view and select a currency.
- Report Locale: Enter a locale report details.
- Report Absolute Path: Enter a report absolute path.
- Format: Select a download file format for an advice from the dropdown list. The formats available are, PDF, PPTX, HTML, XLS, and RTF.
- Swift Endpoint: Enter a swift endpoint.

2. Click Save. You can view the confirmation advice details in the Advice Summary.

### Amount Text Language

You can configure an amount text language.

**Amount Text Language Summary**

The summary screen provides a list of configured amount text language. You can configure an amount text language using the Amount Text Language Maintenance.

**How to reach here:**

Core Maintenance > Amount Text Language > View Amount Text Language

![View Amount Text Language](image)

<table>
<thead>
<tr>

<tr>
<td>Status</td>
<td>Displays the status of the record.</td>
</tr>
</tbody>
</table>

**Amount Text Language Maintenance**

The maintenance screen allows you to configure amount text language.
How to reach here:

Core Maintenance > Amount Text Language > Create Amount Text Language

How to add an amount text language:

1. In the Create Amount Text Language screen, provide the required details:
   - Language Code: Click Search to view and select the required language code.

Amount Word Currency List

2. Click + to add a row and provide the required details:
   - CCY Symbol: Enter the CCY symbols.
   - Decimals As Fraction: Select a decimals as fraction value from the dropdown list.
   - Final Text: Enter the final text for the amount word currency list.
   - CCY: Click Search to view and select the CCY.
   - Post Decimal: Enter the post decimal details.
   - Pre Decimal: Enter the pre decimal details.
   - Text Before: Select an option for the before text.
   - Text Between: Enter the text that must appear between the amount word currency list.

Amount Word Text List

3. Click + to add a row and provide the required details.
   - Amount: Select the amount details.
   - One Flag: Select an option for the amount word text list.
   - Text: Enter a text for the amount word.

4. Click Save. You can view the configured amount text language details in the Amount Text Language Summary.

BIC Directory

As part of setting up basic information, you must maintain Bank Identifier Codes (BIC). You can configure the BIC directory for a customer.
BIC Directory Summary

The summary screen provides a list of configured BIC directory. You can configure the BIC directory using the BIC Directory Maintenance.

How to reach here:

Core Maintenance > BIC Directory > View BIC Directory

Field | Description
--- | ---
Customer Number | Displays the number of the customer.
Sub-type Code | Displays the sub-type code associated with the customer number.
BIC Code | Displays the defined BIC code for the associated customer number.
Bank Name | Displays the name of the bank.
Status | Displays the status of the record.

BIC Directory Maintenance

The maintenance screen allows you to configure a BIC directory for a customer.

How to reach here:

Core Maintenance > BIC Directory > Create BIC Directory
How to add a BIC directory:

1. In the Create BIC Directory screen, provide the required details:
   - BIC Code: Enter a unique BIC Code by which the bank is identified by SWIFT.
   - Bank Name: Enter a name for the bank.
   - Customer Number: Click Search to view and select the required customer number.
   - Customer Name: Based on the Customer Number selected, the information is auto-populated.
   - Bank Address 1-3: Based on the Customer Number selected, the information is auto-populated.
   - SWIFT Key: Enter a unique SWIFT key for the BIC directory.
   - Telex Key: Enter a unique telex key for the BIC directory.
   - SWIFT Key Arrangement: Select a SWIFT key arrangement from the dropdown list.
   - Relationship: Select one of the following options:
     - No: If selected, indicates that the BIC Entity is not a customer of your bank.
     - Mail: If selected, the BIC entity is not a recognized SWIFT entity but an address internal to your bank. In such cases, all correspondence directed to the particular BIC entity is sent as mail messages.
     - Keys: If selected, a SWIFT/Telex connectivity exists between your bank and the bank for which you are maintaining details. Subsequently, you must specify the SWIFT/Telex Key in the adjacent field.
   - Sub-type Code: Click Search to view and select the required sub-type code.
   - BEI Indicator: Based on the Sub-type Code selected, the information is auto-populated.
   - ADB Member: Select an ADB member from the dropdown list.

   Payment Message
   - MT103+ Preferred: By default, this is disabled. If selected, indicates the counter party whose BIC code details you are capturing capacitate to receive payment messages in the MT 103 format.
   - Blacklisted: By default, this is disabled. If selected, indicates the BIC entity is blacklisted.
   - CUG Member: By default, this is disabled. If selected, indicates the BIC entity is a closed user group member.
   - Remit Member: By default, this is disabled. If selected, indicates the customer is registered with MT 103 extended remittance information multiple user group.
   - Update During Upload: By default, this is disabled. If selected, updated the BIC directory during an upload.

Multi-Customer Credit Transfer
   - Multi-Customer Credit Transfer: By default, this is disabled. If selected, indicates multiple credit transfer feature [MT102 support] exists between the bank and the BIC entity.
   - Generate 102+: By default, this is disabled. If selected, generates 102+ message.
   - Maximum Size in Bytes: Enter the maximum size.

Request for Transfer
   - Generate MT101: By default, this is disabled. If selected, indicates MT101 can be sent/received from this BIC. Select to generate MT101 message.
   - Number of Transactions Per Page: Enter the number of transactions to view per page. If you do not specify a value it is defaulted to 10.
   - Real Customer Number: Click Search to view and select the required real customer number.
   - Real Customer Name: Based on the Real Customer Number selected, the information is auto-populated.

2. Click Save. You can view the configure BIC directory in the BIC Directory Summary.
**Branch EOD**

You can invoke End of Day (EOD) to indicate that all the activities for the day are complete. Activities can be performed on the system only after the system date is changed to the next working day and authorized.

Most of the automated functions are part of the beginning of day operations. Thereafter, some of them must be executed when the system is in the EOTI (End of Transaction Input) stage.

**Branch EOD Maintenance**

The maintenance screen allows you to invoke the branch EOD details.

**How to reach here:**

**Core Maintenance > Branch EOD > Invoke EOD**

<table>
<thead>
<tr>
<th>Mark EOFI</th>
<th>Change Date</th>
</tr>
</thead>
</table>

<table>
<thead>
<tr>
<th>Branch Code</th>
<th>Current Branch Date</th>
<th>Status</th>
</tr>
</thead>
<tbody>
<tr>
<td>004</td>
<td>Jan 24, 2019</td>
<td>Not Available</td>
</tr>
</tbody>
</table>

**How to invoke a branch EOD:**

- In the **Invoke EOD** screen, you can perform the following actions:
  - Mark EOFI (End of Financial Input): Click to initiate the EOD process.
  - Change Date: Click to change the current application date to next working day.
  - Branch Code: Displays the branch code that is associated with the logged in user.
  - Current Branch Date: Displays the logged in application date.
  - Status: Based on the operation performed the status is updated.

**Note**

Use the **Reset** option to reset all the configured details to current application’s configured details.

**Country Code**

You can configure a country code.

**Country Code Summary**

The summary screen provides a list of configured country code. You can configure a country code using the **Country Code Maintenance**.

**How to reach here:**

**Core Maintenance > Country Code > View Country Code**
The maintenance screen allows you to configure a country code.

How to reach here:

Core Maintenance > Country Code > Create Country Code

How to add a country code:

1. In the Create Country Code screen, provide the required details:
   - Country Code: Enter the country code.
   - Country Name: Enter the name of the country.
   - Alternate Country Code: Enter an alternate country code.
   - Region Code: Enter the region code.
   - ISO Country Code: Enter the ISO country code.
   - ISO Code: Enter the ISO code.
   - Limit Currency: Enter the limit currency.
- Overall Limit: Enter an overall limit.
- Blacklist: By default, this is disabled. If selected, indicates the country is blacklisted.
- EU Member: By default, this is disabled. If selected, indicates the country is recognized by Swift as a part of the Intra European countries.
- Generate 205: By default, this is disabled. If selected, indicates the cover message 205COV or 205 need to be generated for transactions involving this country. If you do not select this option, RTGS, 202 or 202COV message is generated.
- IBAN Check Required: By default, this is disabled. If selected, indicates check required for an IBAN is mandatory.
- BIC Clearing Code: By default, this is disabled. If selected, indicates the National ID in the BIC plus file is the clearing code. During upload of clearing codes from BIC plus file, the records belong to countries against which this box is selected.
- Intra European: By default, this is disabled. If selected, indicates the country is an intra European country.

2. Click **Save**. You can view the configured country code details in the Country Code Summary.

## Currency Definition

You can define the attributes of the currencies in which the bank can deal. For each currency, you can define attributes such as, the SWIFT code for the currency, the country the currency belongs, the interest method, the spot days, the settlement days, and so on.

Currencies can be maintained only at the Head Office. The list of currencies are available to the branches based on the currencies defined for the country linked to the branch.

### Currency Definition Summary

The summary screen provides a list of defined currency. You can define a currency using the Currency Definition Maintenance.

### How to reach here:

Core Maintenance > Currency Definition > View Currency Definition

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Currency Code</td>
<td>Displays the code of the currency.</td>
</tr>
</tbody>
</table>
Currency Definition Maintenance

The maintenance screen allows you to define currency.

How to reach here:

Core Maintenance > Currency Definition > Create Currency Definition

How to define a currency:

1. In the Create Current Definition screen, provide the required details:
   - Currency Code: Enter the currency code.
   - Maintenance Country: Click Search to view and select the required maintenance country.
   - Currency Name: Enter the name of the currency.
- Alternate Currency Code: Enter the code of the alternate currency.
- Currency Type: Enter the currency type.
- ISO Numerical Currency Code: Enter the International Standardization Organization numerical currency code.
- Currency Country: Click Search to view and select the required currency country.
- Currency Decimals: Select the currency decimals.
- Currency Interest Method: Select the currency interest method from the dropdown list.
- Currency Spot Days: Select the number of spot working days applicable for the currency.
- Foreign Exchange Netting Days: Select the number of days for the foreign exchange netting.
- Settlement Message Days: Select the settlement message days.
- Position GL: Click Search to view and select the required position GL.
- Position Equivalent GL: Click Search to view and select the required position equivalent GL.
- Currency Tolerance Limit: Enter the currency tolerance limit.
- Index Base Currency: Click Search to view and select the required index base currency.
- Commodity Code: By default, this is disabled. If selected, enables a commodity code.

**Cut Off Time**

Refers to the time by which all transactions involving a currency should be generated. For a currency, you can indicate the cut-off hour and minute. This time should be expressed in the local time of the bank.

The maintenance of a cut-off time for a currency has particular reference to outgoing funds transfers involving it.

Example: The value date of a funds transfer transaction (incoming payment) involving USD, is 3rd June 2018. The number of cut-off days specified for the currency is 2. This means that the payment must be received on or before 1st June 2018. If the payment is received on 1st June, it must be received before the cut-off time specified for USD.

If the USD cut-off time is 1200 hrs, if the payment is received on 1st June 2018, it must be received before 1200 hrs.

- Cut Off Days: Select the cut off days for the payment transaction involving the currency.
- Cut Off Hour: Select the hour of the day for the cut off.
- Cut Off Min: Select the minute of the hour for the cut off.
- CLS Currency: By default, this is disabled. If selected, allow customers of your bank to settle their FX deals via the CLS (Continuous Linked Settlements) Bank, you can identify the currency to be a CLS Currency. FX deals in the CLS currency is only eligible to be routed through the CLS bank.
- Generate 103+: By default, this is disabled. If selected, generate outgoing MT 103 messages in the MT 103 + format.
- Index Flag: By default, this is disabled. If selected, derives index rate of the currency.
- Euro Conversion Required: By default, this is disabled. If selected, indicates the Euro conversion is required.
- New Cover Message Format Required: By default, this is disabled. If selected, indicates a new cover message format is required.
- Validate Tag-50F: By default, this is disabled. If selected, indicates validations must be performed for the 50F details captured for the ordering customer during contract input.

**Rounding**

- Currency Round Rule: Select the currency round rule from the dropdown list.
- Currency Round Unit: Select the currency round unit.
Currency Format Mask

- Select one of the currency format.

Euro Type

- Currency Euro Type: Select one of the currency Euro type.

Auto Exchange Rate

- Credit Auto Exchange Rate Limit: Enter the credit automatic exchange rate limit.
- Debit Auto Exchange Rate Limit: Enter the debit automatic exchange rate limit.

Currency Country Mapping

2. Click + to add a row and provide the required details:
   - Country Code: Click Search to view and select the required country code.
   - Country Name: Enter the name of the country.
   - Currency Code: Click Search to view and select the required currency code.

3. Click Save. You can view the defined currency in the Currency Definition Summary.

Currency Exchange Rate

You can maintain exchange rates for a currency pair, the rates at which you buy and sell one currency for another. A bank determines its buy and sell rate for a currency pair by applying a spread (that is, its profit margin) to the mid-rate of the currency pair. Mid rate is the basic rate at which a currency pair is exchanged.

The spread applied for a currency pair varies with the transaction type, while the mid-rate usually remains constant. Consequently, different rates are applicable to different transaction types. For instance dollars in currency are purchased at a certain rate, while USD traveller’s checks are bought at a different rate. You can define a rate type which you would like to associate with a transaction type example: CASH, TRAVCHKS, and so on.

You can define the mid-rate, buy and sell spread applicable to each rate type; the buy and sell exchange rates are computed by the system. Buy rates and sell rates can either be maintained by individual branches or can be input by the HO and propagated to all the branches.

If the branch for which the rate is being uploaded or maintained is the head office branch, then the rate would be copied to all those branches that have the same country code as the head office branch.

If the branch for which the rate is being uploaded or maintained is not the head office branch, but it has the same country code as the head office branch, then the rate being uploaded or maintained would be specific to the branch and would not be copied to any other branch.

If the branch for which the rate is being uploaded or maintained is not the head office branch and also does not have the same country code as the head office branch, then the rate being maintained would be copied to all the branches that has the same country code linked as the branch for which the rate is being maintained or uploaded.

Currency Exchange Rate Summary

The summary screen provides a list of configured currency exchange rates. You can configure a currency exchange rate using the Currency Exchange Rate Maintenance.

How to reach here:

Core Maintenance > Currency Exchange Rate > View Currency Exchange Rate
Currency Exchange Rate Maintenance

The maintenance screen allows you to configure a currency exchange rate.

How to reach here:

Core Maintenance > Currency Exchange Rate > Create Currency Exchange Rate

How to add a currency exchange rate:

1. In the Create Currency Exchange Rate screen, provide the required details:
   - Branch Code: Click Search to view and select the required branch code.
   - Currency 1: Click Search to view and select the required currency.
   - Currency 2: Click Search to view and select the required currency.

Currency Rate

2. Click + to add a row and provide the required details.
   - Rate Type: Select a rate type from the dropdown list.
• Buy Rate: Enter the buy rate details.
• Buy Spread: Enter the buy spread details.
• Mid Rate: Enter the mid rate details.
• Sale Spread: Enter the sale spread details.
• Sale Rate: Enter the sale rate details.
• Rate Date: Select a rate date from the dropdown calendar.

3. Click Save. You can view the configured currency exchange rate details in the Currency Exchange Rate Summary.

Currency Holiday Master

You can configure a yearly list of holidays, for the currencies, defined in the currency screen. The system uses the information maintained to check if any settlement involving a foreign currency (in the foreign Exchange, Money market, Funds Transfer, Loans and Deposit modules) falls on that currency's holiday. If yes, the system displays a message stating and ask the user for an override.

For any schedule or contract maturing at a future date, five years hence, you can input the future date, only if the calendar for that year is maintained. The currency holiday is maintained at the bank level by the Head Office.

Currency Holiday Master Summary

The summary screen provides a list of configured currency holiday. You can configure a currency holiday using the Currency Holiday Master Maintenance.

How to reach here:

Core Maintenance > Currency Holiday Master > View Currency Holiday Master

<table>
<thead>
<tr>
<th>Field</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Currency</td>
<td>Displays the currency details.</td>
</tr>

<tr>
<td>Status</td>
<td>Displays the status of the record.</td>
</tr>
</tbody>
</table>

Currency Holiday Master Maintenance

The maintenance screen allows you to configure a currency holiday.
How to add a currency holiday

1. In the **Create Currency Holiday Master** screen, provide the required details:
   - Currency: Click **Search** to view and select the required currency.
   - Year: Enter the year details.
   - Weekly Holidays: By default, this is disabled. If selected, indicates the weekly holidays.

2. Select the dates using the calendar. The selected dates appear in blue highlighted circle.

3. Click **Save**. You can view the configured currency holidays in the **Currency Holiday Master Summary**.

### Currency Pair Definition

In the foreign exchange markets, the exchange rates for some currency pairs such as the USD-GBP or USD-JPY are easily obtainable, since these are frequently traded. The exchange rates of other currencies such as the ZAR-INR (South African Rand - Indian Rupee), which is not traded very often, is determined through a third currency. The third currency is usually the US dollar, since the US dollar is quoted in all trading centres.

You can define the static attributes of currency pairs for which a regular market quote is readily available. For other pairs, which do not have a regular market quote, you need to specify the third currency through which the system should compute the exchange rate. The currency pair is maintained at the bank level by the Head Office branch.

### Currency Pair Definition Summary

The summary screen provides a list of define a currency pair. You can define a currency pair using the **Currency Pair Definition Maintenance**.

How to reach here:

**Core Maintenance > Currency Pair Definition > View Currency Pair Definition**
Currency Pair Definition Maintenance

The maintenance screen allows you to define currency pair.

How to reach here:

**Core Maintenance > Currency Pair Definition > Create Currency Pair Definition**

How to define a currency pair:

1. In the **Create Currency Pair Definition** screen, provide the required details:
   - **Currency 1-2**: Click **Search** to view and select the required currency. A currency pair (specified as currency 1 and currency 2, in the currency pair) represents the two currencies for which you need to maintain exchange rates.
     To specify the pair, choose from the list provided against Currency 1. Select the pair for which you want to maintain parameters. The pair must be selected according to the quotation method followed by the market, which can be direct or indirect. Exchange rates can be defined for currency 1 against currency 2 or currency 2 against currency 1.
   - **Maintenance Country**: Click **Search** to view and select the required maintenance country.
   - **Check through Currency**: By default, this is disabled. If selected, indicates a check through currency.
• Through Currency: Click Search to view and select the required through currency for which the exchange rate between the currencies must be calculated.
• Number of Units: Select one of the number of units.
• Points Multiplier: Select the points multiplier.
• Quotation: Select one of the required quotation:
  – Direct method the exchange rate for the currency pair is quoted as follows:
    Buy rate = mid rate - buy spread
    Sell rate = mid rate + sell spread
    \[ \text{Ccy 1} = \text{Rate} \times \text{Ccy 2} \]
  – Indirect method the exchange rate for the currency pair is quoted as follows:
    Buy rate = mid rate + buy spread
    Sell rate = mid rate - sell spread
    \[ \text{Ccy 2} = \frac{\text{Rate}}{\text{Ccy 1}} \]
• Spread Definition: Select one spread definition. The effective spread can be calculated using any of the following two methods:
  – Percentage: Spread/100 \times \text{mid rate}
  – Points: Spread \times \text{points multiplier}

The method of spread definition that you specify applies to two instances:
  – While maintaining exchange rates for the currency pair
  – While maintaining customer spread for the currency pair

2. Click Save. You can view the defined currency pair details in the Currency Pair Definition Summary.

**Currency Rate Type**

You can configure a currency rate type.

**Currency Rate Type Summary**

The summary screen provides a list of configured currency rate type. You can configure a currency rate type using the Currency Rate Type Maintenance.

**How to reach here:**

Core Maintenance > Currency Rate Type > View Currency Rate Type
