1. Welcome to Oracle Banking Credit Facilities Process Management

Welcome to the Oracle Banking Credit Facilities Process Management (OBCFPM) User Manual. This manual provides an overview on the OBCFPM application and guides you through the various steps involved in creating, modifying and processing Facility closure transaction. If you need any information, look out for the help icon.

This document is intended for helping you to conveniently close facilities and create collateral closure process in OBCFPM

Overview of OBCFPM

OBCFPM is a collateral and credit facilities middle office platform which enables your bank to streamline the Collateral and Credit facilities operations.

Benefits

OBCFPM application provides service for the customers and financial institutions. This service helps the financial institutions to manage the Collaterals and Credit Facilities of the corporate clients.

OBCFPM allows you to:

- Handle Collateral Evaluation, Collateral Perfection, Collateral Review and Collateral Release process
- Handle Credit Proposal with Customer on-boarding
- Handle Credit Amendment
- Handle Facility Closure
- Financial Document Upload of the corporate clients.
- Quantitative and Qualitative analysis of the corporate clients
- Handle Credit Exceptions

Key Features

- Stand-alone system agnostic to back office application
- Requires very little change to bank’s existing core systems
- Faster time to market
- Highly configurable based on corporate specific needs
- Flexibility in modifying processes
- Roll Based Dashboards
1. Facility Closure

Facility closure process is used to close/cancel a single facility or a group of facilities. Facility closure can be both initiated by the customer as well as the Bank.

Facility Closure will be initiated by the customer due to the following reasons-
1. Customer not having the need of the facilities any more.
2. Customer getting higher amount of facilities from a competing bank hence moving the relationship there
3. Customer getting a similar amount however at a better rate of interest from a competing bank
4. Customer not able to repay the outstanding amount hence requesting the bank to liquidate the collateral and close the facilities.

Facility closure will be initiated by the bank due to the following reasons-
1. Customer unable to repay outstanding balances hence bank liquidating the collateral and closing the facilities
2. Worsening of the financial performance of the client leading to the bank to not extend the facilities anymore and asking the client to close the facilities
3. Breach of covenant or T&C by the Client leading to the bank deciding in closure of facilities
4. Maturity of the facility as per its natural course.
5. Bank not continuing with the sanctioned facilities, tenor, rates, etc.

Facility Closure is the process of evaluating a customer’s worthiness of being provided with the type of credit facility the borrower has asked for or enhancement request made on. This includes the evaluation of current financial status, appraisal of projected cash flows, fund flows, P&L and Balance sheets, purpose for which the facility is availed, technical and financial feasibility of the project, credit history.

The various activities performed for Facility Closure are
- Input Application Details
- Upload of related Mandatory and Non Mandatory documents
- Verify Documents and Capture Details
- Validation
- Approval
- Notify customer on closure

1.1 Facility Closure - Process Flow Diagram
The Facility Closure process has the following stages handled by users authorized to perform the task under those stages.

1. Initiation
2. Validation
3. Approval
4. Customer Notification
5. Manual Retry
Facility Closure Initiation is initiated by the customer as well as the Bank.

As a user, you will be able to login to the OBCFPM application with appropriate credentials. On login, you will be able to view the dashboard screen with dashboards, widgets mapped for your user profile.

Menu→Credit Facilities →Initiate Facility Closure

From the 'menu bar', you can view the portfolio of customers linked to your id.

On expanding, further details on the customer selected furnished for review.

Click on “Initiate Closure” will create a new Facility Closure Task for the selected customer and redirect you to Facility Closure Initiation screen.
1.2.1 Basic Information

The Relationship Manager can capture the basic information of the Facility Closure request.

Generate Info Tab:

Facilities Tab:
Tree View - Vertical and Horizontal View

Click on “View Facilities Structure” will open the screen to view the facilities list as a tree view. There are two options to view the Tree view of facilities vis-à-vis Vertical and Horizontal view. User can toggle between the two views.
