## Copying a Payment Agreement Request Type

Instead of creating a payment agreement request type from scratch, you can create a new payment agreement request type using an existing payment agreement request type. This is possible through copying a payment agreement request type. On copying a payment agreement request type, the details including the characteristics are copied to the new payment agreement request type. You can then edit the details, if required.

### Prerequisites

To copy a payment agreement request type, you should have:

- Payment agreement request type (whose copy you want to create) defined in the application
- Payment agreement request business objects defined in the application
- The Payment Agreement Request Information algorithm is defined using the **C1-PA-INFO** algorithm type
- **C1-PAREQ** To Do Type assigned to a To Do role whose users must receive To Do generated while submitting a payment agreement request for approval

### Procedure

To copy a payment agreement request type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **P** and then click **Payment Agreement Request Type**.  
A sub-menu appears.
3. Click the **Search** option from the **Payment Agreement Request Type** sub-menu.  
The **Payment Agreement Request Type** screen appears.
4. In the **Payment Agreement Request Type List** zone, click the **Duplicate**  icon in the **Duplicate** column corresponding to the payment agreement request type whose copy you want to create.

The **Payment Agreement Request Type** screen appears. It contains the following sections:

- **Main** – Used to specify basic details about the payment agreement request type.
- **Characteristics** – Used to define characteristics for the payment agreement request type.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Payment Agreement Request Type	Used to specify the payment agreement request type.	Yes
Business Object	Indicates the payment agreement request type business object used while defining the payment agreement request type (whose copy you want to create).	Not applicable
Description	Used to specify the description for the payment agreement request type.	Yes
Payment Agreement Request Business Object	Used to specify the business object that you want to use while creating the payment agreement request.	Yes
Detailed Description	Used to specify additional information about the payment agreement request type.	No
Status	Used to indicate the status of the payment agreement request type. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>	Yes
Status Change Notification Type	Used to indicate the notification type on the status change of payment agreement request type. The valid values are: <ul style="list-style-type: none"> <li>• Alert</li> <li>• To Do</li> <li>• Both</li> </ul>	No
Approval Required	Used to indicate whether approval is required while creating payment agreement request using the payment agreement request type.	Yes
Approval To Do Type	Used to indicate that To Do of the specified To Do type must be created when you submit the payment agreement request for approval. <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> This field appears only when the <b>Approval Required</b> check box is selected.</p> <p>The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.</p> </div>	Yes (Conditional) <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> This field is required when the <b>Approval Required</b> check box is selected.</p> </div>

Field Name	Field Description	Mandatory (Yes or No)
Approval To Do Role	Used to indicate that users with the specified To Do role can only approve the payment agreement request submitted for approval.  <b>Note:</b> This field appears only when the <b>Approval Required</b> check box is selected.	Yes (Conditional)  <b>Note:</b> This field is required when the <b>Approval Required</b> check box is selected.
Submitter To Do Type	Used to indicate the To Do type for the submitter when the payment agreement request is resubmitted by the approver.  <b>Note:</b> This field appears only when the <b>Approval Required</b> check box is selected.  The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.	Yes (Conditional)  <b>Note:</b> This field is required when the <b>Approval Required</b> check box is selected.
Submitter To Do Role	Used to indicate the To Do role for the submitter when the payment agreement request is resubmitted by the approver.  <b>Note:</b> This field appears only when the <b>Approval Required</b> check box is selected.	Yes (Conditional)  <b>Note:</b> This field is required when the <b>Approval Required</b> check box is selected.

**Tip:** Alternatively, you can click the **Duplicate** button in the **Payment Agreement Request Type** zone to create a copy of the payment agreement request type.

5. Enter the required details.
6. Define, edit, or remove characteristics from the payment agreement request type, if required.
7. Click **Save**.

The new payment agreement request type is defined.

## **Deleting a Payment Agreement Request Type**

### **Procedure**

To delete a payment agreement request type:

1. Click the **Admin** link in the **Application** toolbar.

A list appears.

- From the **Admin** menu, select **P** and then click **Payment Agreement Request Type**.

A sub-menu appears.

- Click the **Search** option from the **Payment Agreement Request Type** sub-menu.

The **Payment Agreement Request Type** screen appears.

- In the **Payment Agreement Request Type List** zone, click the **Delete** () icon in the **Delete** column corresponding to the payment agreement request type that you want to delete.

A message appears confirming whether you want to delete the payment agreement request type.

**Note:** You can delete a payment agreement request type only when you have not created a payment agreement request using the payment agreement request type.

**Tip:** Alternatively, you can click the **Delete** button in the **Payment Agreement Request Type** zone to delete the payment agreement request type.

- Click **OK**.

The payment agreement request type is deleted.

- [Search Payment Agreement Request](#) on page 1872
- [Bill Details](#) on page 1875

### Search Payment Agreement Request

The **Search Payment Agreement Request** zone allows you to search for a payment agreement request using various search criteria. This zone contains the following two sections:

- **Search Criteria** – The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for a payment agreement request using request or bill details. The valid values are: <ul style="list-style-type: none"> <li>• Request Details</li> <li>• Bill Details</li> </ul> <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"><b>Note:</b> By default, the <b>Request Details</b> option is selected.</div>	Yes
Payment Agreement Request ID	Used to search a particular payment agreement request. <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"><b>Note:</b> This field appears only when you select the <b>Request Details</b> option from the <b>Search By</b> list.</div>	No
Created From	Used to search payment agreement requests which are created from a particular date onwards. <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"><b>Note:</b> This field appears only when you select the <b>Request Details</b> option from the <b>Search By</b> list.</div>	No
To	Used to search payment agreement requests which are created till a particular date. <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"><b>Note:</b> This field appears only when you select the <b>Request Details</b> option from the <b>Search By</b> list.</div>	No

Field Name	Field Description	Mandatory (Yes or No)
Payment Agreement Request Type	Used to search payment agreement requests which are created using a particular payment agreement request type.  <b>Note:</b> This field appears only when you select the <b>Request Details</b> option from the <b>Search By</b> list.	No
Status	Used to search payment agreement requests with a particular status. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Approval In Progress</li> <li>• Broken Promise</li> <li>• Draft</li> <li>• Kept Promise</li> <li>• Rejected</li> <li>• Return to Submitter</li> </ul> <b>Note:</b> This field appears only when you select the <b>Request Details</b> option from the <b>Search By</b> list.	No
Account ID	Used to search for unpaid bills of a particular account.  <b>Note:</b> This field appears only when you select the <b>Request Details</b> option from the <b>Search By</b> list. You can search for a account ID by clicking the <b>Search</b>  icon corresponding to the field.	No
Person ID	Used to search the person ID based on which you want to search for bills of a person.  <b>Note:</b> This field appears only when you select the <b>Request Details</b> option from the <b>Search By</b> list. You can search for a person ID by clicking the <b>Search</b>  icon corresponding to the field.	No
Bill ID	Used to search a particular bill.  <b>Note:</b> This field appears only when you select the <b>Bill Details</b> option from the <b>Search By</b> list. You can search for a bill by clicking the <b>Search</b>  icon corresponding to the field.	No

Field Name	Field Description	Mandatory (Yes or No)
Bill Date From	Used to search bills which are created from a particular date onwards.  <b>Note:</b> This field appears only when you select the <b>Bill Details</b> option from the <b>Search By</b> list.	No
To	Used to search bills which are created till a particular date.  <b>Note:</b> This field appears only when you select the <b>Bill Details</b> option from the <b>Search By</b> list.	No
Alternate Bill ID	Used to search a particular bill using the alternate bill ID.  <b>Note:</b> This field appears only when you select the <b>Bill Details</b> option from the <b>Search By</b> list.	No

**Note:** You must specify at least one search criterion while searching for a payment agreement request.

- **Search Results** – On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Create Date/Time	Displays the date and time when the payment agreement request was created in the system.
Payment Agreement Request Information	Displays information about the payment agreement request.  <b>Note:</b> It has a link. On clicking the link, the <b>Payment Agreement Request</b> screen appears where you can view the details of the respective payment agreement request.
Schedule Amount	Displays the amount that the customer has agreed to pay on the scheduled date.
Status	Indicates the status of the payment agreement request. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Approval In Progress</li> <li>• Broken Promise</li> <li>• Draft</li> <li>• Kept Promise</li> <li>• Rejected</li> <li>• Return to Submitter</li> </ul>
Last Updated Date/Time	Displays the most recent updated date and time of the payment agreement request.
Total Unpaid Amount	Displays the total unpaid amount for debit bills.  <b>Note:</b> <b>Total Unpaid Amount</b> should be equal to total <b>Schedule Amount</b> .

Column Name	Column Description
Person Information	Displays information about the person. In addition, this column has a context menu which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Person</b> screen appears where you can view the details of the respective person.
Account Information	Displays information about the account. In addition, this column has a context menu which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account.

**Note:** Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

### Bill Details

The **Bill Details** zone lists unpaid debt bill details. You will not find any records in this zone if the payment agreement request list does not have any unpaid bills assigned to it. This zone contains the following columns:

Column Name	Column Description
Bill Information	Indicates the bill against which the payment agreement request is created. In addition, this column has a context menu which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Bill</b> screen appears with the details of the respective bill.
Original Bill Amount	Displays the bill amount when the bill was generated.
Current Bill Balance	Displays the outstanding amount.
Due Date	Displays the due date of the bill.

By default, the **Bill Details** zone does not appear in the **Payment Agreement Request** screen. It appears only when you click the **Broadcast**  icon corresponding to the payment agreement request in the **Search Payment Agreement Request** zone.

You can change the layout of this zone. For more information on how to change the layout, see [Changing the Layout](#) on page 2336.

## Searching for a Payment Agreement Request

### Prerequisites

To search for a payment agreement request, you should have:

- Payment agreement request types defined in the application

### Procedure

To search for a payment agreement request:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Credit & Collection** and then click **Payment Agreement Request**.  
A sub-menu appears.
3. Click the **Search** option from the **Payment Agreement Request** sub-menu.  
The **Payment Agreement Request** screen appears.
4. Enter the search criteria in the **Search Payment Agreement Request** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search**.

A list of payment agreement requests that meet the search criteria appears in the **Search Results** section.

## Defining Characteristics for a Payment Agreement Request

### Prerequisites

To define characteristics for a payment agreement request:

- Characteristic types defined in the application (where the characteristic entity is set to **Payment Agreement Request**)

### Procedure

To define characteristics for a Payment Agreement Request:

- Ensure that the **Characteristics** section is expanded when you are editing, submitting, approving, rejecting or resubmitting a payment agreement.

The **Characteristics** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to indicate the date from when the characteristic is effective for the payment agreement request.	Yes (Conditional)

**Note:** This field is required when you are defining a characteristic for the payment agreement request.

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Type	Used to indicate the characteristic type.  <b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to Payment Agreement Request.	Yes (Conditional)  <b>Note:</b> This field is required when you are defining a characteristic for the payment agreement request.
Characteristic Value	Used to specify the value for the characteristic type.  <b>Note:</b> On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	Yes (Conditional)  <b>Note:</b> This field is required when you are defining a characteristic for the payment agreement request.

2. Enter the required details.

**Note:** If you select a predefined characteristic type, the **Search** () icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

3. If you want to define more than one characteristic for the payment agreement request, click the **Add** () icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from the payment agreement request, click the **Delete** () icon corresponding to the characteristic.

### Related Topics

## Defining Payment Schedule for a Payment Agreement Request

### Prerequisites

To define payment schedule for a payment agreement request:

- Scheduled date, sum of installments for overdue or unpaid bills defined in the application for which the payment is scheduled is set to **Payment Agreement Request**

### Procedure

To define payment schedule for a Payment Agreement Request:

1. Ensure that the **Payment Schedule** section is expanded when you are editing, submitting, approving, rejecting or resubmitting a payment agreement.

The **Payment Schedule** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Schedule Date	Used to indicate the date schedule for the payment.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a payment schedule for the payment agreement request.
Schedule Amount	Used to indicate the amount scheduled for overdue or unpaid bills to be paid in installments. <b>Note:</b> This field appears only when you select a <b>Schedule Date</b> for the payment schedule.	Yes (Conditional) <b>Note:</b> This field is required only when you select a <b>Schedule Date</b> for the payment schedule.
Auto Pay ID	Used to indicate the auto pay id of the payor. <b>Note:</b> This field appears only when you select auto pay method option for <b>Pay Method</b> . The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Auto Pay ID Search</b> window appears.	No

- Enter the required details.

**Note:** If you select a auto pay method option for **Pay Method**, the **Search**  icon appears corresponding to the **Auto Pay ID** field. On clicking the **Search** icon, you can search for a **Payor Account ID**.

- If you want to define more than one payment schedule for the payment agreement request, click the **Add**  icon and then repeat step 2.

**Note:** However, if you want to remove a payment schedule from the payment agreement request, click the **Delete**  icon corresponding to the payment schedule.

## Adding a Log Entry for a Payment Agreement Request

### Procedure

To add a log entry for a payment agreement request:

1. Search for the payment agreement request in the **Payment Agreement Request** screen.
2. In the **Search Results** section, click the link in the **Payment Agreement Request Information** column corresponding to the payment agreement request whose log you want to edit.

The **Payment Agreement Request** screen appears. It consists of the following tabs:

- **Main** – This tab contains the following three zones:
  - **Payment Agreement Request** – Displays the details of the payment agreement request.
  - **Bill Details** – Lists the bill details of the payment agreement request.
  - **Payment Schedule** – Lists the payment schedule details of the bills for the payment agreement request.
- **Bills** – This tab lists the unpaid bill amount details for the same account.

**Note:** This tab will be displayed only when the payment agreement is in **Draft** status.

- **Log** – This tab lists the complete trail of actions performed on the payment agreement request.
3. Click the **Log** tab.

The **Log** tab appears.

4. Click the **Add Log Entry** link in the upper right corner of the **Payment Agreement Request Log** zone.

The **Add Payment Agreement Request Log** window appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Payment Agreement Request Information	Displays information about the payment agreement request.	Not applicable
Log Details	Used to specify additional comments on the payment agreement request.	Yes

5. Enter the comments in the **Log Details** field.
6. Click **Save**.

The log entry is added in the **Payment Agreement Request Log** zone.

- [Dispute Request Type](#)
- [Dispute Request \(Used for Searching\)](#)
- [Dispute Request \(Used for Viewing\)](#)

Oracle Revenue Management and Billing allows you to create a dispute request for an account. Through a dispute request, the dispute against a particular bill, bill segment, and/or adjustment is tracked and closed. While creating a dispute request, you need to specify the dispute request type using which you want to create the dispute request. It is the dispute request type which helps the system to determine:

- The business object using which the dispute request should be created
- Whether the dispute request must be approved before creating adjustments to settle a dispute against a bill, bill segment, or adjustment
- Approval profile using which the dispute request must be approved
- Whether multi-level or single-level approval is required for a dispute request
- Whether debit or credit hierarchy must be used for approval when the dispute request amount is zero
- Default adjustment type using which adjustments must be created

You can add completed bills, its bill segments, and adjustments in the dispute request. In other words, at present, the system enables you to resolve the dispute against a bill, bill segment, and adjustment. If the dispute is against a bill, the system, by default, sets the dispute amount and does not allow you to change the dispute amount. The dispute amount is set to the original bill amount because the original bill amount and dispute amount must be equal. However, if the original bill amount is positive, then the dispute amount is set to negative, and vice versa. If the dispute is against a bill segment or adjustment, you can change the dispute amount, if required.

Once a dispute request is created, the status of the dispute request is set to Draft. You can then edit or delete the dispute request, if required. Once you add the bills, bill segments, or adjustments in a dispute request, you can submit the dispute request. On submitting a dispute request, the system behaves in the following manner:

Dispute Against	Type of Bill	Stop Auto Pay (Yes or No)	Behavior
Bill	Fully Paid	Not applicable	<p>The system does the following:</p> <ol style="list-style-type: none"> <li>1. Creates the adjustment using the specified adjustment type for the bill.</li> <li>2. Swaps the adjustment onto the next bill.</li> </ol>
Bill	Unpaid	Yes	<p>The system does the following:</p> <ol style="list-style-type: none"> <li>1. Stops the automatic payment created for the current bill.</li> <li>2. A characteristic is defined on the current bill indicating the date till when the bill should not be considered by the <b>Overdue Monitor (C1-ADMOV)</b> batch.</li> </ol> <div style="border: 1px solid black; padding: 5px; margin: 10px 0;"> <p><b>Note:</b> The above step (2) occurs only when the approval is required for the dispute request.</p> </div> <ol style="list-style-type: none"> <li>3. Reopens the current bill of the account.</li> <li>4. Creates the adjustment using the specified adjustment type for the bill and swaps the adjustment onto the current bill.</li> <li>5. Completes and freeze the current bill.</li> </ol>
Bill	Unpaid	No	<p>The system does the following:</p> <ol style="list-style-type: none"> <li>1. Creates the adjustment using the specified adjustment type for the bill.</li> <li>2. Swaps the adjustment onto the current or next bill depending on the value defined for the <b>Adjustment on Next Bill</b> parameter in an algorithm created using the <b>C1-ENTERADJ</b> algorithm type.</li> </ol>

Dispute Against	Type of Bill	Stop Auto Pay (Yes or No)	Behavior
Bill	Partially Paid	Not applicable	<p>The system does the following:</p> <ol style="list-style-type: none"> <li>1. Creates two adjustments using the specified adjustment type for the bill.</li> <li>2. Swaps one adjustment onto the current bill and another adjustment onto the next bill.</li> </ol> <p><b>Example:</b> A dispute is raised against a bill (Bill Amount – 100, Dispute Amount – 100, and Unpaid Amount - 50), then one adjustment (with the adjustment amount 50) is swap on the current bill and another adjustment (with the adjustment amount 50) is swap on the next bill.</p>
Bill Segment	Fully Paid	Not applicable	<p>The system does the following:</p> <ol style="list-style-type: none"> <li>1. Creates the adjustment using the specified adjustment type for the bill segment.</li> <li>2. Swaps the adjustment onto the next bill.</li> </ol>

Dispute Against	Type of Bill	Stop Auto Pay (Yes or No)	Behavior
Bill Segment	Unpaid	Yes	<p>The system does the following:</p> <ol style="list-style-type: none"> <li>1. Stops the automatic payment created for the current bill.</li> <li>2. A characteristic is defined on the current bill indicating the date till when the bill should not be considered by the <b>Overdue Monitor (C1-ADMOV)</b> batch.</li> </ol> <div style="border: 1px solid black; padding: 5px; margin: 10px 0;"> <p><b>Note:</b> The above step (2) occurs only when the approval is required for the dispute request.</p> </div> <ol style="list-style-type: none"> <li>3. Reopens the current bill of the account.</li> <li>4. Creates the adjustment using the specified adjustment type for the bill segment and swaps the adjustment onto the current bill.</li> <li>5. Completes and freeze the current bill.</li> </ol>
Bill Segment	Unpaid	No	<p>The system does the following:</p> <ol style="list-style-type: none"> <li>1. Creates the adjustment using the specified adjustment type for the bill segment.</li> <li>2. Swaps the adjustment onto the current or next bill depending on the value defined for the <b>Adjustment on Next Bill</b> parameter in an algorithm created using the <b>C1-ENTERADJ</b> algorithm type.</li> </ol>

Dispute Against	Type of Bill	Stop Auto Pay (Yes or No)	Behavior
Bill Segment	Partially Paid	Not applicable	<p>The system does the following:</p> <ol style="list-style-type: none"> <li>1. Creates two adjustments using the specified adjustment type for the bill segment.</li> <li>2. Swaps one adjustment onto the current bill and another adjustment onto the next bill.</li> </ol> <p><b>Example:</b> A dispute is raised against a bill segment (Bill Segment Amount – 100, Dispute Amount – 100, and Unpaid Bill Segment Amount - 50), then one adjustment (with the adjustment amount 50) is swap on the current bill and another adjustment (with the adjustment amount 50) is swap on the next bill.</p>
Adjustment	Fully Paid	Not applicable	<p>The system does the following:</p> <ol style="list-style-type: none"> <li>1. Creates the adjustment using the specified adjustment type for the adjustment (against which you have raised a dispute).</li> <li>2. Swaps the adjustment onto the next bill.</li> </ol>

Dispute Against	Type of Bill	Stop Auto Pay (Yes or No)	Behavior
Adjustment	Unpaid	Yes	<p>The system does the following:</p> <ol style="list-style-type: none"> <li>1. Stops the automatic payment created for the current bill.</li> <li>2. A characteristic is defined on the current bill indicating the date till when the bill should not be considered by the <b>Overdue Monitor (C1-ADMOV)</b> batch.</li> </ol> <div style="border: 1px solid black; padding: 5px; margin: 10px 0;"> <p><b>Note:</b> The above step (2) occurs only when the approval is required for the dispute request.</p> </div> <ol style="list-style-type: none"> <li>3. Reopens the current bill of the account.</li> <li>4. Creates the adjustment using the specified adjustment type for the adjustment (against which you have raised a dispute) and swaps the adjustment onto the current bill.</li> <li>5. Completes and freeze the current bill.</li> </ol>
Adjustment	Unpaid	No	<p>The system does the following:</p> <ol style="list-style-type: none"> <li>1. Creates the adjustment using the specified adjustment type for the adjustment (against which you have raised a dispute).</li> <li>2. Swaps the adjustment onto the current or next bill depending on the value defined for the <b>Adjustment on Next Bill</b> parameter in an algorithm created using the <b>C1-ENTERADJ</b> algorithm type.</li> </ol>

Dispute Against	Type of Bill	Stop Auto Pay (Yes or No)	Behavior
Adjustment	Partially Paid	Not applicable	<p>The system does the following:</p> <ol style="list-style-type: none"> <li>1. Creates two adjustments using the specified adjustment type for the adjustment (against which you have raised a dispute).</li> <li>2. Swaps one adjustment onto the current bill and another adjustment onto the next bill.</li> </ol> <p><b>Example:</b> A dispute is raised against an adjustment (Adjustment Amount – 100, Dispute Amount – 100, and Unpaid Adjustment Amount - 50), then one adjustment (with the adjustment amount 50) is swap on the current bill and another adjustment (with the adjustment amount 50) is swap on the next bill.</p>

Finally, the status of the dispute request is changed to **Processed**. You can optionally configure the system to use the approval workflow process for a dispute request. If the **Approval Required** flag is set to **Yes** in a dispute request type, then on submitting the respective dispute request, the approval workflow process creates a To Do for the approver to review the dispute request. Once the approver approves the dispute request, the system behaves as mentioned in the above table. The approver can approve, reject, or resubmit the dispute request. When the dispute request is resubmitted to the submitter, the submitter can edit, cancel, or submit the dispute request.

The approval process is configured through the approval profile. The approval profile allows you to define the debit and credit hierarchy. If the dispute request amount is negative, the credit hierarchy in the approval profile is used for approval. However, if the dispute request amount is positive, the debit hierarchy in the approval profile is used for approval. You can either opt to use single-level or multi-level approval for the dispute requests.

During the dispute request process, a dispute request creation goes through various statuses in its lifecycle. For more information about the dispute request statuses, see [Dispute Request \(Without Approval\) Status Transition](#) on page 1908 and [Dispute Request \(With Approval\) Status Transition](#) on page 1908.

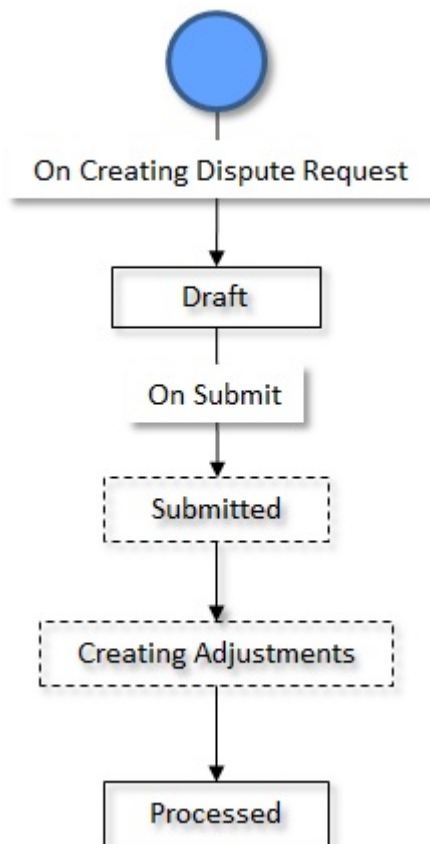

**Note:** The lifecycle of a dispute request creation is driven by the respective business object using which the request is created. The dispute request feature explained in this document is articulated based on the lifecycle and logic defined in the business objects.

For more information on how to setup the dispute request process, see [Prerequisites](#) on page 1909.

## Dispute Request (Without Approval) Status Transition

---

The following figure graphically indicates how a dispute request moves from one status to another when approval workflow is off:

## Dispute Request (With Approval) Status Transition

---

The following figure graphically indicates how a dispute request moves from one status to another when approval workflow is on:

## Prerequisites

To setup the dispute request process, you need to do the following:

- Define the required refund request types in the system
- Define the required adjustment types (for creating dispute adjustments) where A/P request type is defined
- Define the required characteristic types where the characteristic entity is set to **Dispute Request Type**
- Define the required characteristic types where the characteristic entity is set to **Dispute Request**
- Define rejected status reasons for the **C1-DisputeRequest** business object

- Assign the **C1-DSPSB** To Do type to a To Do role whose users must receive To Do generated while submitting a dispute request for approval
- Define the required approval profiles with the credit/debit hierarchy and **C1\_DISAP** To Do type
- Create an algorithm using the **C1-DSPTRQINF** algorithm type if you want to create Dispute Requests using the dispute request information.
- Define an algorithm of the **C1-ADI-INFO** algorithm type and attach to the **Adjustment Information** system event in the **Algorithms** tab of the **Installation Options – Framework** screen

## Algorithms Used in C1-DisputeRequest

The following table lists the algorithms which are attached to the **C1-DisputeRequest** business object:

System Event	Algorithm	Algorithm Type	Description
Information	C1-DSPTRQINF	C1-DSPTRQINF	This algorithm generates the dispute request information string which appears throughout the application. It concatenates the following fields: <ul style="list-style-type: none"> <li>• Dispute Request Type Description</li> <li>• Dispute Request Status Description</li> <li>• Dispute Request ID</li> </ul>
Validation	C1-DSPTVADN	C1-DSPTVADN	This algorithm validates following: <p><b>Draft</b> status validations:</p> <ul style="list-style-type: none"> <li>• At-least one entity should be selected to submit a dispute. <b>Dispute Request</b> with at-least one <b>Bill</b> or <b>Bill Line Item</b> should be added for submission</li> <li>• Dispute amount cannot be zero or null</li> <li>• If a bill is already present in dispute request and request is not in final status then user should not be allowed to add same bill in another dispute request</li> <li>• Disputed Amount should be equal to bill outstanding amount if bill Line item contain multiple contracts</li> </ul>

The following table lists the algorithms which are used in the lifecycle of the **C1-DisputeRequest** business object:

Status	System Event	Algorithm	Algorithm Type	Description
Submitted	Enter	C1-DISPUTSUB	C1-DISPUTSUB	<p>This algorithm checks the following:</p> <ul style="list-style-type: none"> <li>Whether the approval is required for the dispute request. If the approval is required for a dispute request, the status of the dispute request is changed to <b>Approval In Progress</b>. However, if the approval is not required for a dispute request, the status of the dispute request is changed to <b>Creating Adjustment</b>.</li> <li>At least one entity, such as payment event, payment, or credit bill line item (such as credit bill segment or adjustment) is selected in the dispute request.</li> <li>Whether the approval profile attached to the <b>Dispute Request Type</b> has the credit hierarchy and <b>To Do Type</b> defined.</li> </ul>
Submitted	Enter	C1-DPTSTAUPY	C1-DPTSTAUPY	<p>This algorithm is used to stop auto pay on bill.</p> <p><b>Parameter – Characteristic Type</b></p> <p>Characteristic Type is used to add the characteristic which is stamped on the bill to postpone overdue process</p>
Dispute	Monitor	F1-AT-RQJ	F1-GEN-BOMNJ	<p>This algorithm type transitions business object current state to the input <b>Next Status</b> or to the status related to the input <b>Next Transition Condition</b>. Either one but not both soft parameters may be specified. If both soft parameters are not specified, the business object will be transitioned to the default next status specified on lifecycle. Algorithms of this algorithm type may be defined for any business object status as its monitor algorithm.</p>
Dispute	Enter	C1-DPTSTAUPY	C1-DPTSTAUPY	<p>This algorithm is used to stop auto pay on bill.</p> <p><b>Parameter – Characteristic Type</b></p> <p>Characteristic Type is used to add the characteristic which is stamped on the bill to postpone overdue process</p>

Status	System Event	Algorithm	Algorithm Type	Description
Creating Adjustments	Monitor	F1-AT-RQJ	F1-GEN-BOMNJ	This algorithm type transitions business object current state to the input <b>Next Status</b> or to the status related to the input <b>Next Transition Condition</b> . Either one but not both soft parameters may be specified. If both soft parameters are not specified, the business object will be transitioned to the default next status specified on lifecycle. Algorithms of this algorithm type may be defined for any business object status as its monitor algorithm.
Creating Adjustments	Enter	C1-ENTERADJS	C1-ENTERADJ	<p>This algorithm is executed on submit or on approve of a dispute request. It creates the adjustments which will be swapped on the current or next bill.</p> <p>Adjustment are created with below logic</p> <p><b>Unpaid Bill logic</b></p> <ul style="list-style-type: none"> <li>• If stop auto pay switch is <b>No</b> and auto pay exist then create adjustment on next bill</li> <li>• If stop auto pay switch is <b>Yes</b> then perform below step <ul style="list-style-type: none"> <li>• If bill cannot be reopen or adjustment need to be created on next bill then create adjustment on next bill</li> <li>• If approval is configured then create to do for manual creation of auto pay (Auto Pay is stopped while submitting the request)</li> <li>• Else <ul style="list-style-type: none"> <li>• create adjustment on current bill <ul style="list-style-type: none"> <li>• if approval is configured then <ul style="list-style-type: none"> <li>• Bill reopen and complete (Auto Pay is stopped while submitting the request)</li> <li>• Delete overdue char from bill</li> </ul> </li> </ul> </li> </ul> </li> </ul> </li> </ul>

Status	System Event	Algorithm	Algorithm Type	Description
				<ul style="list-style-type: none"> <li>• Else <ul style="list-style-type: none"> <li>• Stop auto pay</li> <li>• Reopen and complete</li> </ul> </li> </ul> <p><b>Paid Bill logic</b></p> <ul style="list-style-type: none"> <li>• Adjustment will be created on next bill</li> </ul> <p><b>Partial Bill Logic</b></p> <ul style="list-style-type: none"> <li>• Adjustment will be created to balance current bill and another adjustment will be created for remaining amount and it will be stamped on next bill.</li> <li>• If dispute adjustment will increase the debit or credit balance then adjustment will be stamped on next bill.</li> </ul> <p>There are four parameters for this algorithm.</p> <p><b>Parameter 1 – Adjustment on Next Bill (Required)</b></p> <ul style="list-style-type: none"> <li>• Adjustments should be swapped on the current or next bill. It is used only for unpaid bill.</li> </ul> <p><b>Parameter 2 – Match Type Entity Flag (Required)</b></p> <ul style="list-style-type: none"> <li>• Valid values for this parameter are <b>BILL</b>, <b>BSEG</b> and <b>SA</b>. This parameter defines the open item at which the match events are to be created. For bills which are not paid yet, new match events will be created based on the value of this parameter.</li> <li>• Based on the flag defined <b>Match Events</b> are created as follows, <ul style="list-style-type: none"> <li>• If the <b>Match Type Flag</b> is <b>BILL</b>, then all FTs on a bill have the same Match Event.</li> <li>• If the <b>Match Type Flag</b> is <b>BSEG</b>, then each line item (bill segment or adjustment) on the bill will have a unique match event.</li> <li>• If the <b>Match Type Flag</b> is <b>SA</b>, then line items belonging to the same contract within a bill will have the same match event.</li> </ul> </li> </ul> <p><b>Parameter 3 – To Do Type</b></p> <ul style="list-style-type: none"> <li>• To Do will be sent to the user if bill can't be reopen and auto pay has been stopped.</li> </ul>

Status	System Event	Algorithm	Algorithm Type	Description
				<p><b>Parameter 4 – Characteristic Type</b></p> <ul style="list-style-type: none"> <li>Characteristic Type is used to remove the characteristic which is stamped on the bill to postpone overdue process</li> </ul>
Approval In Progress	Enter	C1-DSPTAPP	C1-DSPTAPP	<p>This algorithm creates the following:</p> <ul style="list-style-type: none"> <li>A To Do using the To Do type specified in the approval profile which is attached to the dispute request type. The To Do is sent to the appropriate users in the approval hierarchy depending on whether hierarchical approval is required or not.</li> <li>A log entry is added when a To Do is created using the To Do type.</li> </ul>
Approval In Progress	Exit	F1-TODOCOMPL	F1-TODOCOMPL	<p>This algorithm type completes To Do entries that are linked to an object when the object exits a given state. The system finds all open To Do entries with drill keys for the current business object's primary key, and completes them, unless the To Do entry's type has been configured with an <b>Exclude To Do Type Characteristic Type</b> indicating that it should not be automatically completed.</p>
Approved	Enter	C1-DSPAPPRVD	C1-DSPAPPRVD	<p>This algorithm is triggered when the approver clicks the <b>Approve</b> button. It checks whether the approval is required from users at the next level in the approval hierarchy. If the approval is required from the next level in the approval hierarchy, the status of the dispute request is changed to <b>Approval In Progress</b> and the algorithm attached to the Approval In Progress status is invoked. If further approval is not required, the status of the dispute request is changed to <b>Creating Adjustment</b>.</p>
Return to Submitter	Enter	C1-DSPPTRESUB	C1-DSPPTRESUB	<p>This algorithm is invoked on <b>Re-Submit</b> button. It moves the status of <b>Dispute Request</b> into <b>Draft</b>. A <b>To Do</b> will be generated for the user as submitter whose <b>To Do Type</b> and <b>To Do Role</b> are fetched from <b>Dispute Request Type</b>.</p>

Status	System Event	Algorithm	Algorithm Type	Description
Rejected	Enter	C1- DSPTREJT	C1- DSPTREJT	This algorithm is executed when on reject. <b>Parameter 1 – To Do Type</b> <ul style="list-style-type: none"> <li>To Do will be sent to the user if bill can't be reopen and auto pay has been stopped.</li> </ul> <b>Parameter 2 – Characteristic Type</b> <ul style="list-style-type: none"> <li>Characteristic Type is used to remove the characteristic which is stamped on the bill to postpone overdue process</li> </ul>
Canceled	Enter	C1- DSPTREJT	C1- DSPTREJT	This algorithm is executed when on reject. <b>Parameter 1 – To Do Type</b> <ul style="list-style-type: none"> <li>To Do will be sent to the user if bill can't be reopen and auto pay has been stopped.</li> </ul> <b>Parameter 2 – Characteristic Type</b> <ul style="list-style-type: none"> <li>Characteristic Type is used to remove the characteristic which is stamped on the bill to postpone overdue process</li> </ul>

## Dispute Request Type

Oracle Revenue Management and Billing allows you to define:

- **Dispute Request Type** – It is used to create a dispute request. You can define multiple dispute request types in the system. A dispute request type helps the system to determine:
  - Whether the dispute request must be approved before creating dispute adjustments in the system
  - Approval profile using which the dispute request must be approved
  - Whether multi-level or single-level approval is required while creating dispute adjustments in the system
  - Adjustment type using which the dispute adjustment must be created when the total dispute amount is less than the minimum dispute amount
  - Default adjustment type using which dispute adjustments must be created

While defining a dispute request type where approval workflow is required, you need to select the **Approval Required** check box. If the **Approval Required** check box is selected, the dispute request (which is created using the dispute request type) is sent for approval before creating the dispute adjustments. However, if the **Approval Required** check box is not selected, the dispute adjustments are created immediately on submitting a dispute request. The approval process is configured through the approval profile. The approval profile allows you to define the approval hierarchy. You can define a debit and credit hierarchy in the approval profile using the threshold amount. The debit approval hierarchy and credit approval hierarchy is used for approving dispute request. Therefore, while defining an approval profile for dispute, you need to define credit and debit hierarchy and set the To Do Type to **C1-DISAP**.

You can define an approval hierarchy where users with different To Do role at each level can approve or reject the dispute request. For example, you can define an approval profile called A1 with two levels of approval. At the first level, a user with the *Manager* To Do role will approve or reject the dispute request, and at the second level, a user with the *Senior Manager* To Do role will approve or reject the dispute request. On submitting a dispute request where approval is required, a notification in the form of To Do is sent to all users with the To Do role defined at the first level in the hierarchy. Once the request is approved at the first level, a notification is sent to all users with the To Do role defined at the next level in the hierarchy. This process continues till the approval is received from all levels in

the hierarchy. Once users at all levels approve the dispute request, the dispute adjustments are created. However, if an approver at any level in the hierarchy rejects the request, the dispute adjustments are not created.

The approval hierarchy is controlled by the threshold amount. For example, you define an approval profile called A1 with two levels of approval – First Level (Threshold Amount: 300, To Do Role: Manager) and Second Level (Threshold Amount: 500, To Do Role: Senior Manager). Now, if the total dispute amount is equal to 300 or less than 500, then the approval is required only from the first level in the hierarchy and not from the second level in the hierarchy. However, if the total dispute amount is equal to or greater than 500, then the approval is required from the first level and then from the second level in the hierarchy. But, if the total dispute amount is less than 300, then the approval is not required from any levels in the hierarchy. The system will automatically approve the dispute request and create the dispute adjustments.

The system supports both single-level and multi-level approval process while approving dispute request. If the **Hierarchical Approval** check box is selected while defining a dispute request type, the approval hierarchy defined in the approval profile is followed based on the threshold limit. However, if the **Hierarchical Approval** check box is not selected while defining a dispute request type, the approval is required only from the approval level where the total dispute amount falls within the threshold limit. Let us understand this with the help of some examples.

Dispute Request Type	Approval Profile	Approval Hierarchy	Hierarchical Approval								
D1	Dispute Analyst	<p><b>Credit Hierarchy</b></p> <table border="1"> <thead> <tr> <th>Threshold Amount</th> <th>To Do Role</th> </tr> </thead> <tbody> <tr> <td>\$500</td> <td>Senior Analyst</td> </tr> <tr> <td>\$750</td> <td>Manager</td> </tr> <tr> <td>\$1500</td> <td>Senior Manager</td> </tr> </tbody> </table>	Threshold Amount	To Do Role	\$500	Senior Analyst	\$750	Manager	\$1500	Senior Manager	Yes
Threshold Amount	To Do Role										
\$500	Senior Analyst										
\$750	Manager										
\$1500	Senior Manager										
D2	Dispute Analyst	<p><b>Credit Hierarchy</b></p> <table border="1"> <thead> <tr> <th>Threshold Amount</th> <th>To Do Role</th> </tr> </thead> <tbody> <tr> <td>\$500</td> <td>Senior Analyst</td> </tr> <tr> <td>\$750</td> <td>Manager</td> </tr> <tr> <td>\$1500</td> <td>Senior Manager</td> </tr> </tbody> </table>	Threshold Amount	To Do Role	\$500	Senior Analyst	\$750	Manager	\$1500	Senior Manager	No
Threshold Amount	To Do Role										
\$500	Senior Analyst										
\$750	Manager										
\$1500	Senior Manager										
D3	Dispute Analyst	<p><b>Debit Hierarchy</b></p> <table border="1"> <thead> <tr> <th>Threshold Amount</th> <th>To Do Role</th> </tr> </thead> <tbody> <tr> <td>\$100</td> <td>Senior Analyst</td> </tr> <tr> <td>\$200</td> <td>Manager</td> </tr> <tr> <td>\$300</td> <td>Senior Manager</td> </tr> </tbody> </table>	Threshold Amount	To Do Role	\$100	Senior Analyst	\$200	Manager	\$300	Senior Manager	Yes
Threshold Amount	To Do Role										
\$100	Senior Analyst										
\$200	Manager										
\$300	Senior Manager										
D4	Dispute Analyst	<p><b>Debit Hierarchy</b></p> <table border="1"> <thead> <tr> <th>Threshold Amount</th> <th>To Do Role</th> </tr> </thead> <tbody> <tr> <td>\$100</td> <td>Senior Analyst</td> </tr> <tr> <td>\$200</td> <td>Manager</td> </tr> <tr> <td>\$300</td> <td>Senior Manager</td> </tr> </tbody> </table>	Threshold Amount	To Do Role	\$100	Senior Analyst	\$200	Manager	\$300	Senior Manager	No
Threshold Amount	To Do Role										
\$100	Senior Analyst										
\$200	Manager										
\$300	Senior Manager										

The following table indicates how the system will behave in different dispute scenarios:

Dispute Request	Dispute Request Type	Total Refund Amount (\$)	Comments
DR1	D1	200	This dispute request is automatically approved by the system because the total dispute amount is less than \$500.
DR2	D1	750	The To Do is sent for approval to the following users in the specified order: <ol style="list-style-type: none"> <li>1. Users with the Senior Analyst To Do role</li> <li>2. Users with the Manager To Do role</li> </ol> This is because the total dispute amount is either equal to \$750 or less than \$1500 and hierarchical approval is required.
DR3	D1	2000	The To Do is sent for approval to the following users in the specified order: <ol style="list-style-type: none"> <li>1. Users with the Senior Analyst To Do role</li> <li>2. Users with the Manager To Do role</li> <li>3. Users with the Senior Manager To Do role</li> </ol> This is because the total dispute amount is greater than \$1500 and hierarchical approval is required.
DR4	D2	200	This dispute request is automatically approved by the system because the total dispute amount is less than \$500.
DR5	D2	750	The To Do is sent for approval to users with the Manager To Do role. This is because the total dispute amount is either equal to \$750 or less than \$1500 and hierarchical approval is not required.
DR6	D2	2000	The To Do is sent for approval to users with the Senior Manager To Do role. This is because the total dispute amount is greater than \$1500 and hierarchical approval is not required.
DR7	D3	90	This dispute request is automatically approved by the system because the total dispute amount is less than \$100.
DR8	D3	250	The To Do is sent for approval to the following users in the specified order: <ol style="list-style-type: none"> <li>1. Users with the Senior Analyst To Do role</li> <li>2. Users with the Manager To Do role</li> </ol> This is because the total dispute amount is either equal to \$200 or less than \$300 and hierarchical approval is required.

Dispute Request	Dispute Request Type	Total Refund Amount (\$)	Comments
DR9	D3	500	<p>The To Do is sent for approval to the following users in the specified order:</p> <ol style="list-style-type: none"> <li>1. Users with the Senior Analyst To Do role</li> <li>2. Users with the Manager To Do role</li> <li>3. Users with the Senior Manager To Do role</li> </ol> <p>This is because the total dispute amount is greater than \$300 and hierarchical approval is required.</p>
DR10	D4	90	This dispute request is automatically approved by the system because the total dispute amount is less than \$100.
DR11	D4	250	The To Do is sent for approval to users with the Manager To Do role. This is because the total dispute amount is either equal to \$200 or less than \$300 and hierarchical approval is not required.
DR12	D4	500	The To Do is sent for approval to users with the Senior Manager To Do role. This is because the total dispute amount is greater than \$300 and hierarchical approval is not required.

The **Dispute Request Type** screen allows you to define, edit, delete, and copy a dispute request type. This screen consists of the following zones:

- [Dispute Request Type List](#) on page 1918
- [Dispute Request Type](#) on page 1919

## Dispute Request Type List

The **Dispute Request Type List** zone lists dispute request types that are already defined in the system. It contains the following columns:

Column Name	Column Description
Dispute Request Type	Displays the dispute request type.
Description	Displays the description of the dispute request type.
Edit	On clicking the <b>Edit</b> (  ) icon, the <b>Dispute Request Type</b> screen appears where you can edit the details of the dispute request type.
Duplicate	On clicking the <b>Duplicate</b> (  ) icon, the <b>Dispute Request Type</b> screen appears where you can define a dispute request type using an existing dispute request type.
Delete	<p>On clicking the <b>Delete</b> () icon, you can delete the dispute request type.</p> <p><b>Note:</b> You can delete a dispute request type only when you have not created a dispute request using the dispute request type.</p>

On clicking the **Broadcast**  icon corresponding to dispute request type, the **Dispute Request Type** zone appears with the details of the respective dispute request type.

## **Dispute Request Type**

The **Dispute Request Type** zone displays the details of the dispute request type. This zone consists of the following sections:

- **Main** – This section provides basic information about the dispute request type. It contains the following fields:

<b>Field Name</b>	<b>Field Description</b>
Dispute Request Type	Displays the dispute request type.
Description	Displays the description of the dispute request type.
Dispute Request Business Object	Indicates the business object that will be used to create the dispute request. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.
Detailed Description	Displays additional information about the dispute request type.
Status	Indicates the status of the dispute request type. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>
Default Adjustment Type	Indicates the adjustment type using which the dispute adjustment must be created.  <b>Note:</b> It has a link. On clicking the link, the <b>Adjustment Type</b> screen appears where you can view the details of the respective adjustment type.
Approval Required	Indicates whether approval is required while creating the dispute adjustments using the dispute request type.

Field Name	Field Description
Approval Profile	<p>Indicates the approval profile which must be used to define approval hierarchy for the dispute request type.</p> <p><b>Note:</b> This field appears only when the <b>Approval Required</b> check box is selected. It has a link. On clicking the link, the <b>Approval Profile</b> screen appears where you can view the details of the respective approval profile.</p>
Hierarchical Approval	<p>Indicates whether multi-level or single approval is required while creating the dispute adjustments using the dispute request type.</p> <p><b>Note:</b> This field appears only when the <b>Approval Required</b> check box is selected.</p>
Zero Threshold Amount Hierarchy	Indicates that based on the approval profile hierarchy, To Do Type from the hierarchy (credit/debit) will be picked up.
Submitter To Do Type	<p>Indicates the To Do type for the submitter when the dispute request type is resubmitted by the approver.</p> <p><b>Note:</b> This field appears only when the <b>Approval Required</b> check box is selected. It has a link. On clicking the link, the <b>To Do Type</b> screen appears where you can view the details of the respective To Do type.</p>
Submitter To Do Role	<p>Indicates the To Do role for the submitter when the dispute request type is resubmitted by the approver.</p> <p><b>Note:</b> This field appears only when the <b>Approval Required</b> check box is selected. It has a link. On clicking the link, the <b>To Do Role</b> screen appears where you can view the details of the respective To Do role.</p>

- **Characteristics** – This section lists the characteristics defined for the dispute request type. It contains the following columns:

Column Name	Column Description
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- **Record Actions** – This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the dispute request type.

Button Name	Button Description
Delete	Used to delete the dispute request type.  <b>Note:</b> You can delete a dispute request type only when you have not created a dispute request using the dispute request type.
Duplicate	Used to create a new dispute request type using an existing dispute request type.

- **Record Information** – This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the dispute request type is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.

By default, the **Dispute Request Type** zone does not appear in the **Dispute Request Type** screen. It appears only when you click the **Broadcast**  icon corresponding to the dispute request type in the **Dispute Request Type List** zone.

## **Defining a Dispute Request Type**

### **Prerequisites**

To define a dispute request type, you should have:

- Dispute request business objects defined in the application
- Approval profiles defined in the application
- Adjustment types with and without A/P request type defined in the application

### **Procedure**

To define a dispute request type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **D** and then click **Dispute Request Type**.  
A sub-menu appears.
3. Click the **Add** option from the **Dispute Request Type** sub-menu.

The **Select Business Object** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Dispute Request Type Business Object	Used to indicate the business object that you want to use to create the dispute request type.	Yes

**Tip:** Alternatively, you can access the **Select Business Object** screen by clicking the **Add** button in the **Page Title** area of the **Dispute Request Type** screen.

**Note:** The **Select Business Object** screen appears only when there are multiple dispute request type business objects defined in the application. If there is only one dispute request type business object defined in the application, the **Dispute Request Type** screen appears.

4. Select the required dispute request type business object from the respective field.
5. Click **OK**.

The **Dispute Request Type** screen appears. It contains the following sections:

- **Main** – Used to specify basic details about the dispute request type.
- **Characteristics** – Used to define characteristics for the dispute request type.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Dispute Request Type	Used to specify the dispute request type.	Yes
Business Object	Indicates the dispute request type business object used while defining the dispute request type.	Not applicable
Description	Used to specify the description for the dispute request type.	Yes
Dispute Request Business Object	Used to indicate the business object that you want to use while creating the dispute request.	Yes
Detailed Description	Used to specify additional information about the dispute request type.	No
Status	Used to indicate the status of the dispute request type. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> You cannot change the status of a dispute request type to <b>Inactive</b> if there are dispute requests which are created using the dispute request type and are currently in the <b>Draft</b> or <b>Approval In Progress</b> status.</p> </div>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Default Adjustment Type	<p>Used to indicate the adjustment type using which the dispute adjustment must be created.</p> <p><b>Note:</b> The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Adjustment Type Search</b> window appears.</p>	Yes
Approval Required	Used to indicate whether approval is required while creating the dispute adjustments using the dispute request type.	No
Approval Profile	<p>Used to indicate the approval profile which must be used to define approval hierarchy for the dispute request type.</p> <p><b>Note:</b> This field appears only when the <b>Approval Required</b> check box is selected.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required when the <b>Approval Required</b> check box is selected.</p>
Hierarchical Approval	<p>Used to indicate whether multi-level or single-level approval is required while creating the dispute adjustments using the dispute request type.</p> <p><b>Note:</b> This field appears only when the <b>Approval Required</b> check box is selected.</p>	No
Zero Threshold Amount Hierarchy	<p>Used to indicate that based on the approval profile hierarchy, To Do Type from the hierarchy will be selected. The valid values are:</p> <ul style="list-style-type: none"> <li>• Credit</li> <li>• Debit</li> </ul>	No
Submitter To Do Type	<p>Used to indicate the To Do type for the submitter when the dispute request is resubmitted by the approver.</p> <p><b>Note:</b> This field appears only when the <b>Approval Required</b> check box is selected.</p> <p>The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required when the <b>Approval Required</b> check box is selected.</p>

Field Name	Field Description	Mandatory (Yes or No)
Submitter To Do Role	Used to indicate the To Do role for the submitter when the dispute request is resubmitted by the approver.  <b>Note:</b> This field appears only when the <b>Approval Required</b> check box is selected.	Yes (Conditional)  <b>Note:</b> This field is required when the <b>Approval Required</b> check box is selected.

**Note:**  
When the threshold amount is equal to zero for the request then based on the value in **Zero Threshold Amount Hierarchy**, the to do type will be picked from the **Approval Profile** hierarchy to send notification.  
Only when the **Approval Required** checkbox is selected, you will be able to select **Hierarchical Approval** and **Approval Profile** to be used. If hierarchical approval is not selected, the request has to be approved by a single approver (highest level approver determined by the dispute amount and approval profile).

6. Enter the required details depending on whether you want to define dispute request type.
7. Define characteristics for the dispute request type, if required.
8. Click **Save**.

The dispute request type is defined.

## **Defining Characteristics for a Dispute Request Type**

### **Prerequisites**

To define characteristics for a dispute request type, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Dispute Request Type**)

### **Procedure**

To define characteristics for a dispute request type:

1. Ensure that the **Characteristics** section is expanded when you are defining, editing, or copying a dispute request type.

The **Characteristics** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Type	Used to indicate the characteristic type.  <b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Dispute Request Type</b> .	Yes (Conditional)  <b>Note:</b> This field is required when you are defining a characteristic for the dispute request type.
Characteristic Value	Used to specify the value for the characteristic type.  <b>Note:</b> On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	Yes (Conditional)  <b>Note:</b> This field is required when you are defining a characteristic for the dispute request type.

2. Enter the required details.

**Note:** If you select a predefined characteristic type, the **Search**  icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

3. If you want to define more than one characteristic for the dispute request type, click the **Add**  icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from the dispute request type, click the **Delete**  icon corresponding to the characteristic.

## Editing a Dispute Request Type

### Prerequisites

To edit a dispute request type, you should have:

- Dispute request business objects defined in the application
- Approval profiles defined in the application
- Adjustment types with and without A/P request type defined in the application

### Procedure

To edit a dispute request type:

1. Click the **Admin** link in the **Application** toolbar.

A list appears.

- From the **Admin** menu, select **D** and then click **Dispute Request Type**.

A sub-menu appears.

- Click the **Search** option from the **Dispute Request Type** sub-menu.

The **Dispute Request Type** screen appears.

- In the **Dispute Request Type List** zone, click the **Edit** () icon in the **Edit** column corresponding to the dispute request type whose details you want to edit.

The **Dispute Request Type** screen appears. It contains the following sections:

- Main** – Used to specify basic details about the dispute request type.
- Characteristics** – Used to define characteristics for the dispute request type.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Dispute Request Type	Displays the dispute request type.	Not applicable
Business Object	Indicates the dispute request type business object used while defining the dispute request type.	Not applicable
Description	Used to specify the description for the dispute request type.	Yes
Dispute Request Business Object	Used to indicate the business object that you want to use while creating the dispute request.	Yes
Detailed Description	Used to specify additional information about the dispute request type.	No
Status	Used to indicate the status of the dispute request type. The valid values are: <ul style="list-style-type: none"> <li>Active</li> <li>Inactive</li> </ul> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> You cannot change the status of a dispute request type to <b>Inactive</b> if there are dispute requests which are created using the dispute request type and are currently in the <b>Draft</b> or <b>Approval In Progress</b> status.</p> </div>	Yes
Default Adjustment Type	Used to indicate the adjustment type using which the dispute adjustment is created. <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> The <b>Search</b> () icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Adjustment Type Search</b> window appears.</p> </div>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Approval Required	Used to indicate whether approval is required while creating the dispute adjustments using the dispute request type.	No
Approval Profile	<p>Used to indicate the approval profile which must be used to define approval hierarchy for the dispute request type.</p> <p><b>Note:</b> This field appears only when the <b>Approval Required</b> check box is selected.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required when the <b>Approval Required</b> check box is selected.</p>
Hierarchical Approval	<p>Used to indicate whether multi-level or single-level approval is required while creating the dispute adjustments using the dispute request type.</p> <p><b>Note:</b> This field appears only when the <b>Approval Required</b> check box is selected.</p>	No
Zero Threshold Amount Hierarchy	<p>Used to indicate that based on the approval profile hierarchy, To Do Type from the hierarchy is selected. The valid values are:</p> <ul style="list-style-type: none"> <li>• Credit</li> <li>• Debit</li> </ul>	No
Submitter To Do Type	<p>Used to indicate the To Do type for the submitter when the dispute request is resubmitted by the approver.</p> <p><b>Note:</b> This field appears only when the <b>Approval Required</b> check box is selected.</p> <p>The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required when the <b>Approval Required</b> check box is selected.</p>
Submitter To Do Role	<p>Used to indicate the To Do role for the submitter when the dispute request is resubmitted by the approver.</p> <p><b>Note:</b> This field appears only when the <b>Approval Required</b> check box is selected.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required when the <b>Approval Required</b> check box is selected.</p>

**Tip:** Alternatively, you can click the **Edit** button in the **Dispute Request Type** zone to edit the details of the dispute request type.

5. Modify the details, if required.
6. Define, edit, or remove characteristics from the dispute request type, if required.
7. Click **Save**.

The changes made to the dispute request type are saved.

## **Deleting a Dispute Request Type**

### **Procedure**

To delete a dispute request type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **D** and then click **Dispute Request Type**.  
A sub-menu appears.
3. Click the **Search** option from the **Dispute Request Type** sub-menu.  
The **Dispute Request Type** screen appears.
4. In the **Dispute Request Type List** zone, click the **Delete** (🗑) icon in the **Delete** column corresponding to the dispute request type that you want to delete.  
A message appears confirming whether you want to delete the dispute request type.

**Note:** You can delete a dispute request type only when you have not defined a dispute request using the dispute request type.

**Tip:** Alternatively, you can click the **Delete** button in the **Dispute Request Type** zone to delete the dispute request type.

5. Click **OK**.  
The dispute request type is deleted.

## Copying a Dispute Request Type

Instead of creating a dispute request type from scratch, you can create a new dispute request type using an existing dispute request type. This is possible through copying a dispute request type. On copying a dispute request type, the details including the characteristics are copied to the new dispute request type. You can then edit the details, if required.

### Prerequisites

To copy a dispute request type, you should have:

- Dispute request type (whose copy you want to create) defined in the application
- Dispute request business objects defined in the application
- Approval profiles defined in the application
- Adjustment types with and without A/P request type defined in the application

### Procedure

To copy a dispute request type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **D** and then click **Dispute Request Type**.  
A sub-menu appears.
3. Click the **Search** option from the **Dispute Request Type** sub-menu.  
The **Dispute Request Type** screen appears.
4. In the **Dispute Request Type List** zone, click the **Duplicate** () icon in the **Duplicate** column corresponding to the dispute request type whose copy you want to create.

The **Dispute Request Type** screen appears. It contains the following sections:

- **Main** – Used to specify basic details about the dispute request type.
- **Characteristics** – Used to define characteristics for the dispute request type.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Dispute Request Type	Used to specify the dispute request type.	Yes
Business Object	Indicates the dispute request type business object used while defining the dispute request type.	Not applicable
Description	Used to specify the description for the dispute request type.	Yes
Dispute Request Business Object	Used to indicate the business object that you want to use while creating the dispute request.	Yes
Detailed Description	Used to specify additional information about the dispute request type.	No

Field Name	Field Description	Mandatory (Yes or No)
Status	<p>Used to indicate the status of the dispute request type. The valid values are:</p> <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul> <p><b>Note:</b> You cannot change the status of a dispute request type to <b>Inactive</b> if there are dispute requests which are created using the dispute request type and are currently in the <b>Draft</b> or <b>Approval In Progress</b> status.</p>	Yes
Default Adjustment Type	<p>Used to indicate the adjustment type using which the dispute adjustment must be created.</p> <p><b>Note:</b> The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Adjustment Type Search</b> window appears.</p>	Yes
Approval Required	Used to indicate whether approval is required while creating the dispute adjustments using the dispute request type.	No
Approval Profile	<p>Used to indicate the approval profile which must be used to define approval hierarchy for the dispute request type.</p> <p><b>Note:</b> This field appears only when the <b>Approval Required</b> check box is selected.</p>	Yes (Conditional)
Hierarchical Approval	<p>Used to indicate whether multi-level or single-level approval is required while creating the dispute adjustments using the dispute request type.</p> <p><b>Note:</b> This field appears only when the <b>Approval Required</b> check box is selected.</p>	No
Zero Threshold Amount Hierarchy	<p>Used to indicate that based on the approval profile hierarchy, To Do Type from the hierarchy will be selected. The valid values are:</p> <ul style="list-style-type: none"> <li>• Credit</li> <li>• Debit</li> </ul>	No

Field Name	Field Description	Mandatory (Yes or No)
Submitter To Do Type	<p>Used to indicate the To Do type for the submitter when the dispute request is resubmitted by the approver.</p> <p><b>Note:</b> This field appears only when the <b>Approval Required</b> check box is selected.</p> <p>The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required when the <b>Approval Required</b> check box is selected.</p>
Submitter To Do Role	<p>Used to indicate the To Do role for the submitter when the dispute request is resubmitted by the approver.</p> <p><b>Note:</b> This field appears only when the <b>Approval Required</b> check box is selected.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required when the <b>Approval Required</b> check box is selected.</p>

**Tip:** Alternatively, you can click the **Duplicate** button in the **Dispute Request Type** zone to create a copy of the dispute request type.

- Enter the required details.
- Define, edit, or remove characteristics from the dispute request type, if required.
- Click **Save**.

The new dispute request type is defined.

## Dispute Request (Used for Searching)

The **Dispute Request** screen allows you to search for a dispute request using various search criteria. It also allows you to create a dispute request. Through this screen, you can navigate to the following screen:

- [Dispute Request \(Used for Viewing\)](#) on page 1940

This screen consists of the following zone:

- [Search Dispute Request](#) on page 1932

### Search Dispute Request

The **Search Dispute Request** zone allows you to search for dispute requests using various search criteria. This zone contains the following two sections:

- Search Criteria** – The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for a dispute request using request, person, account or bill details. The valid values are: <ul style="list-style-type: none"> <li><b>Request Details</b> – Used when you want to search for dispute requests.</li> <li><b>Person, Account, or Bill Details</b> – Used when you want to search for person, account, or bill requests.</li> </ul> <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"><b>Note:</b> By default, the <b>Request Details</b> option is selected.</div>	Yes
Dispute Request Type	Used to search dispute requests which are created using a particular dispute request type. <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"><b>Note:</b> This field appears only when you select the <b>Request Details</b> option from the <b>Search By</b> list.</div>	No

Field Name	Field Description	Mandatory (Yes or No)
Status	<p>Used to search dispute requests with a particular status. The valid values are:</p> <ul style="list-style-type: none"> <li>• Approval In Progress</li> <li>• Cancelled</li> <li>• Draft</li> <li>• Processed</li> <li>• Rejected</li> </ul> <p><b>Note:</b> This field appears only when you select the <b>Request Details</b> option from the <b>Search By</b> list.</p>	No
User ID	<p>Used to search dispute requests which are created by a particular user.</p> <p><b>Note:</b> This field appears only when you select the <b>Request Details</b> option from the <b>Search By</b> list.</p>	No
Created From	<p>Used to search dispute requests which are created from a particular date onwards.</p> <p><b>Note:</b> This field appears only when you select the <b>Request Details</b> option from the <b>Search By</b> list.</p>	No

## Searching for a Dispute Request

### Prerequisites

To search for a dispute request, you should have:

- Dispute request types defined in the application

### Procedure

To search for a dispute request:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Financial** and then click **Dispute Request**.  
A sub-menu appears.
3. Click the **Search** option from the **Dispute Request** sub-menu.  
The **Dispute Request** screen appears.
4. Enter the search criteria in the **Search Dispute Request** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search**.

A list of dispute requests that meet the search criteria appears in the **Search Results** section.

**Viewing the Dispute Request Details****Procedure**

To view the details of a dispute request:

1. Search for the dispute request in the **Dispute Request** screen.
2. In the **Search Results** section, click the link in the **Dispute Request Information** column corresponding to the dispute request whose details you want to view.

The **Dispute Request** screen appears. It consists of the following tabs:

- **Main** – Displays information about the dispute request. It contains the following zones:
  - **Dispute Request** – Displays the details of the dispute request.
  - **Dispute Details** – Lists the entities, such as auto payment events, and/or credit bill line items (such as credit bill segments and adjustments), of the account which must be disputed.
  - **Dispute Adjustments** – Displays the adjustment details of dispute request.

**Note:** This zone appears when you click the Broadcast  icon corresponding to the entity type as **Bill** in the **Dispute Details** zone and only when the status is **Processed**.

- **Previous Dispute Requests** – Displays the details of the bill which must be disputed.

**Note:** This zone appears when you click the Broadcast  icon corresponding to the entity type as **Bill** in the **Dispute Details** zone.

- **Bills** – Used to search bills with credit line items, such as credit bill segments and adjustments, that you want to dispute.
  - **Log** – Lists the complete trail of actions performed on the dispute request.
3. View the details of the dispute request in the **Dispute Request** zone.
  4. View the entities such as auto payment events, and/or credit bill line items (such as credit bill segments and adjustments), of the account which must be disputed in the **Dispute Details** zone.
  5. View the adjustment details of dispute request in the **Dispute Adjustments** zone.
  6. View the details of the bill which must be disputed in the **Previous Dispute Requests** zone.

## Creating a Dispute Request

### Prerequisites

To create a dispute request, you should have:

- Dispute request types defined in the application

### Procedure

To create a dispute request:

1. Do either of the following:

<b>If you want to</b>	<b>Then</b>
Define a dispute request from the <b>Account Receivable Central</b> screen	<ol style="list-style-type: none"> <li>1. Click the <b>Menu</b> link in the <b>Application</b> toolbar. A list appears.</li> <li>2. From the <b>Main</b> menu, select <b>Financial</b> and then click <b>Account Receivable Central</b>. The <b>Account Receivable Central</b> screen appears.</li> <li>3. Search for the bill in the <b>Account Receivable Central</b> screen.</li> <li>4. In the <b>Search Results</b> section, select the required bill and then click <b>Dispute</b>.</li> </ol> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> Only one bill at a time is allowed to select for <b>Dispute Request</b> from the <b>Account Receivable Central</b> screen.</p> </div>
Define a dispute request from the <b>Dispute Request</b> screen	<ol style="list-style-type: none"> <li>1. Click the <b>Menu</b> link in the <b>Application</b> toolbar. A list appears.</li> <li>2. From the <b>Main</b> menu, select <b>Financial</b> and then click <b>Dispute Request</b>. A sub-menu appears.</li> <li>3. Click the <b>Add</b> option from the <b>Dispute Request</b> sub-menu.</li> </ol>

The **Select Dispute Request Type** screen appears. It contains the following fields:

<b>Field Name</b>	<b>Field Description</b>	<b>Mandatory (Yes or No)</b>
Dispute Request Type	Used to indicate the request type using which you want to create the dispute request.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Account ID	Used to search dispute requests which are created for a particular account.  <b>Note:</b> The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Account Search</b> window appears.	Yes
Dispute Reason	Used to indicate the dispute requests which are created using a particular dispute reason for the bill.	Yes

**Tip:** Alternatively, you can access the **Select Dispute Request Type** screen by clicking the **Add** button in the **Page Title** area of the **Dispute Request** screen.

2. Select the required dispute request type from the respective field.
3. Click **Save**.

The dispute request is defined and the status of the dispute request is set to **Draft**. The **Dispute Request** screen appears where you can view the details of the dispute request. It contains the following tabs:

**Note:** The dispute request can be created only for bill with zero outstanding amount.

- **Main** – Displays information about the dispute request. It contains the following zones:
  - **Dispute Request** – Displays the details of the dispute request.
  - **Dispute Details** – Lists the entities, such as auto payment events, and/or credit bill line items (such as credit bill segments and adjustments), of the account which must be disputed.
  - **Dispute Adjustments** – Displays the adjustment details of dispute request.

**Note:** This zone appears when you click the Broadcast  icon corresponding to the entity type as **Bill** in the **Dispute Details** zone and only when the status is **Processed**.

- **Previous Dispute Requests** – Displays the details of the bill which must be disputed.

**Note:** This zone appears when you click the Broadcast  icon corresponding to the entity type as **Bill** in the **Dispute Details** zone.

- **Bills** – Used to search bills with credit line items, such as credit bill segments and adjustments, that you want to dispute.
  - **Log** – Lists the complete trail of actions performed on the dispute request.
4. Add auto payment events, or credit bill line items that you want to dispute.
  5. Edit the dispute amount of each entity, if required.
  6. Define characteristics for the dispute request, if required.

How to define characteristics for a dispute request	<a href="#">Defining Characteristics for a Dispute Request</a> on page 1939

## Defining Characteristics for a Dispute Request

### Prerequisites

To define characteristics for a dispute request, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Dispute Request**)

### Procedure

To define characteristics for a dispute request:

- Search for the dispute request in the **Dispute Request** screen.
- In the **Search Results** section, click the link in the **Dispute Request Information** column corresponding to the dispute request whose details you want to edit.

The **Dispute Request** screen appears.

- Click the **Edit** button in the **Dispute Request** zone.

The **Dispute Request** screen appears.

**Note:** The **Edit** button appears only when the dispute request is in the **Draft** status.

- Ensure that the **Characteristics** section is expanded when you are editing the dispute request.

The **Characteristics** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the dispute request.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the dispute request.
Characteristic Type	Used to indicate the characteristic type. <b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Dispute Request</b> .	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the dispute request.
Characteristic Value	Used to specify the value for the characteristic type. <b>Note:</b> On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the dispute request.

5. Enter the required details in the **Characteristics** section.

**Note:** If you select a predefined characteristic type, the **Search**  icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

6. If you want to define more than one characteristic for the dispute request, click the **Add**  icon and then repeat step 5.

**Note:** However, if you want to remove a characteristic from the dispute request, click the **Delete**  icon corresponding to the characteristic.

## **Dispute Request (Used for Viewing)**

Once you create a dispute request, the **Dispute Request** screen allows you to:

- Edit and delete a dispute request
- View the details of a dispute request
- Submit a dispute request for approval
- Approve or reject a dispute request
- View the log of a dispute request
- Add a log entry for a dispute request

This screen consists of the following tabs:

- **Main** – Displays information about the dispute request. It contains the following zones:
  - **Dispute Request** – Displays the details of the dispute request.
  - **Dispute Details** – Lists the entities, such as auto payment events, and/or credit bill line items (such as credit bill segments and adjustments), of the account which must be disputed.
  - **Dispute Adjustments** – Displays the adjustment details of dispute request.

**Note:** This zone appears when you click the Broadcast  icon corresponding to the entity type as **Bill** in the **Dispute Details** zone and only when the status is **Processed**.

- **Previous Dispute Requests** – Displays the details of the bill which must be disputed.

**Note:** This zone appears when you click the Broadcast  icon corresponding to the entity type as **Bill** in the **Dispute Details** zone.

- **Bills** – Used to search bills with credit line items, such as credit bill segments and adjustments, that you want to dispute. It contains the following zones:
  - **Search Bills** – Lists completed bills of the account which are either with credit balance or have one or more credit line items, such as bill segments and adjustments. You can filter the bills using various search criteria.
  - **Bill Line Items** – Lists the debit and credit bill segments and adjustments of the bill.

This tab appears only when the dispute request is in the **Draft** status.

- **Log** – Lists the complete trail of actions performed on the dispute request.

## Dispute Request - Main

The **Main** tab displays information about the dispute request. It contains the following zones:

- [Dispute Request](#) on page 1941
- [Dispute Details](#) on page 1943
- [Dispute Adjustments](#) on page 1943
- [Previous Dispute Requests](#) on page 1944

## Dispute Request

The **Dispute Request** zone displays the details of the dispute request. This zone contains the following sections:

- **Main** – This section provides basic information about the dispute request. It contains the following fields:

Field Name	Field Description
Dispute Request Information	Displays information about the dispute request.
Dispute Request Type	Indicates the dispute request type using which the dispute request is created.  <b>Note:</b> It has a link. On clicking the link, the <b>Dispute Request Type</b> screen appears where you can view the details of the dispute request type.
Status	Indicates the status of the refund request. The valid values are: <ul style="list-style-type: none"> <li>• Draft</li> <li>• Approval In Progress</li> <li>• Cancelled</li> <li>• Rejected</li> <li>• Processed</li> </ul>
Dispute Reason	Indicates the reason why the dispute request is rejected.
Account Information	Indicates the account for which the dispute request is created.  <b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account.
Comments	Displays additional information about the dispute request.

- **Characteristics** – Lists the characteristics defined for the dispute request. It contains the following fields:

Field Name	Field Description
Effective Date	Indicates the date from when the characteristic is effective for the dispute request.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- **Record Actions** – This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the dispute request. <b>Note:</b> The <b>Edit</b> button appears only when the dispute request is in the <b>Draft</b> status.
Delete	Used to delete the dispute request. <b>Note:</b> The <b>Delete</b> button appears only when the dispute request is in the <b>Draft</b> status.
Submit	Used to submit the dispute request for approval. <b>Note:</b> The <b>Submit</b> button appears only when the dispute request is in the <b>Draft</b> status.
Cancel	Used to cancel the dispute request resubmitted for approval. <b>Note:</b> The <b>Cancel</b> button appears only when the dispute request is in the <b>Draft</b> status.
Approve	Used to approve the dispute request. <b>Note:</b> The <b>Approve</b> button appears only when: <ul style="list-style-type: none"> <li>The dispute request is in the <b>Approval In Progress</b> status.</li> <li>A user with the approval To Do role is reviewing the dispute request.</li> </ul>
Reject	Used to reject the dispute request. <b>Note:</b> The <b>Reject</b> button appears only when: <ul style="list-style-type: none"> <li>The dispute request is in the <b>Approval In Progress</b> status.</li> <li>A user with the approval To Do role is reviewing the dispute request.</li> </ul>
Re Submit	Used to resubmit the dispute request to the submitter. <b>Note:</b> The <b>Re-Submit</b> button appears only when the dispute request is in the <b>Approval In Progress</b> status.

- **Record Information** – This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the dispute request is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.
Status Date/Time	Displays the date and time when the dispute request status is updated
Create Date/Time	Displays the date and time when the dispute request is created.

## Dispute Details

The **Dispute Details** zone lists the credit/debit bill line items (such as bill segments and adjustments) that you have added to the dispute request. This zone contains the following columns:

Column Name	Column Description
Entity Type	Indicates whether the entity is a bill, bill segment, or an adjustment.
Entity ID	Displays the entity ID.
Currency	Indicates the currency in which the entity was created.
Dispute Amount	Displays the entity amount.
Adjustment Type	Indicates the adjustment type using which the dispute adjustment must be created.  <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> By default, the adjustment type specified in the dispute request type appears in this column. You can change the adjustment type, if required, by editing the dispute request. It has a link. On clicking the link, the <b>Adjustment Type</b> screen appears where you can view the details of the respective adjustment.</p> </div>
Stop Auto Pay	Displays whether to stop auto payment or not. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>
Entity Information	Displays information about the entity. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.  <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> It has a link. On clicking the link, the respective entity screen appears with the details of the respective entity.</p> </div>

### Note:

On clicking the Broadcast  icon corresponding to the entity type as **Bill**, the **Dispute Adjustments** and **Previous Dispute Requests** zones appears with the details of the respective bill.

The **Dispute Details** zone appears only when the status is **Processed**.

**Dispute Amount** currency will be same as bill or invoice currency. It cannot be zero or null. It will be less than or equal to the original, outstanding bill amount, or bill line item amount if the bill line item contains multiple contract.

In addition to above columns, this screen contains following buttons:

Button Name	Button Description
Edit	Used to edit the details of bill line items.
Delete	Used to delete the bill line items.

## Dispute Adjustments

The **Dispute Adjustments** zone lists the adjustment details of dispute request. This zone contains the following columns:

Column Name	Column Description
Adjustment Information	Displays information about the adjustments in dispute request.  <b>Note:</b> It has a link. On clicking the link, the respective <b>Adjustment</b> screen appears with the details of adjustment for respective entity.
Adjustment Amount	Displays the adjustment amount.

**Note:**

On clicking the Broadcast  icon corresponding to the entity type as **Bill**, the **Dispute Adjustments** zone appears with the details of the respective bill.

The **Dispute Adjustments** zone appears only when the status is **Processed**.

**Dispute Adjustment Amount** cannot be zero or null, it should be delta amount.

## Dispute Request - Bills

The **Bills** tab allows you to search bills with credit/debit line items, such as credit/debit bill segments and adjustments, that you want to dispute. It contains the following zones:

- [Search Bills](#) on page 1945
- [Bill Line Items](#) on page 1947

### Search Bills

The **Search Bills** zone lists completed bills of the account which are either with credit/debit balance or have one or more credit/debit line items, such as bill segments and adjustments. You can filter the bills using various search criteria. This zone contains the following two sections:

- **Search Criteria** – The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate that you want to search for a bill using the bill details. The valid values are: <ul style="list-style-type: none"> <li>• Bill Details</li> <li>• Bill and Price Item Details</li> </ul> <b>Note:</b> By default, the <b>Bill Details</b> option is selected.	Yes
Bill ID	Used to search a particular bill.  <b>Note:</b> The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Bill Search</b> window appears.	No

Field Name	Field Description	Mandatory (Yes or No)
Price Item	Used to search bills which are created for a particular price item.  <b>Note:</b> This field appears only when you select <b>Bill and Price Item Details</b> option from the <b>Search By</b> list. You can search for a price item by clicking the <b>Search</b>  icon corresponding to the field. On clicking the <b>Search</b> icon, the <b>Price Item Search</b> window appears.	No
Bill Date From	Used to search bills which are created from a particular date onwards.	No
To	Used to search bills which are created till a particular date.	No

- **Search Results** – On clicking the **Search** button, the search results are filtered based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Bill ID	Displays the bill ID.
Bill Information	Displays additional information about the bill. In addition, this column has a context menu which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Bill</b> screen appears with the details of the respective bill.
Bill Amount	Displays the total bill amount.

If you want to dispute a bill with credit/debit balance and all credit/debit line items, you need to select the check box corresponding to the bill and then click the **Add** button in the **Search Results** section. All credit/debit bill segments and adjustments of the bill are added in the **Dispute Details** zone on the **Main** tab. However, if you select a bill (with credit/debit balance) which contains one or more credit/debit line items or if you select a bill (with credit/debit balance) which contains one or more credit/debit line items, the system will not allow you to add the credit/debit line items by directly adding the bill. In such case, you need to individually select the credit/debit bill segments and adjustments of the bill and then add them to the dispute request.

**Note:**

If a dispute request is currently in progress for a credit/debit bill segment or adjustment of a bill, those bills of the account are not listed in the **Search Bills** zone. In addition, a bill with all credit line items are not listed in the **Search Bills** zone. Multiple bill of same account can be added to the dispute request. Multiple bill line items of any bill can also be added to the dispute request.

**Related Topics**

How to add a bill line item to the dispute request	<a href="#">Adding a Bill Line Item to the Dispute Request</a> on page 1958

## Bill Line Items

The **Bill Line Items** zone lists the debit and credit bill segments and adjustments of the bill. This zone contains the following columns:

Column Name	Column Description
Entity ID	Displays the bill segment or adjustment ID.
Entity Type	Indicates whether the entity is a bill segment or an adjustment.
Entity Information	<p>Displays additional information about the bill segment or adjustment. If the entity is a bill segment, the context menu appears in the column which helps in navigating to other screens in the application.</p> <p><b>Note:</b> It has a link. If the entity is a bill segment then on clicking the link, the <b>Bill Segment</b> screen appears with the details of the respective bill segment. However, if the entity is an adjustment then on clicking the link, the <b>Adjustment</b> screen appears where you can view the details of the respective adjustment.</p>
Entity Amount	Displays the bill segment or adjustment amount.
Currency	Displays the currency in which the amount is billed.
Contract Information	<p>Displays additional information about the contract against which the bill segment or adjustment is created. In addition, this column has a context menu which helps in navigating to other screens in the application.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Contract</b> screen appears where you can view the details of the respective contract.</p>

You can select one or more credit/debit bill segments or adjustments and click the **Add** button in this zone to add selected credit/debit bill segments or adjustments to the dispute request.

By default, the **Bill Line Items** zone does not appear in the **Bills** tab. It appears only when you click the **Broadcast**  icon corresponding to the bill in the **Search Bills** zone.

## Dispute Request - Log

The **Log** tab contains the following zone:

- [Dispute Request Log](#) on page 1947

### Dispute Request Log

The **Dispute Request Log** zone lists the complete trail of actions performed on the dispute request. This zone contains the following columns:

Column Name	Column Description
Date/Time	Displays the date and time when the action was performed on the dispute request.
Details	Displays the details about the action performed on the dispute request.
User	Indicates the user who has performed the action on the dispute request.

Column Name	Column Description
Log Type	Indicates the type of log.
Related Object	Indicates the object or entity which is generated when the action is performed on the dispute request.
Status Reason	Displays the status reason of action performed on the dispute request.

**Note:** You can manually add a log entry for the dispute request by clicking the **Add Log Entry** link in the upper right corner of the **Dispute Request Log** zone.

The **Add Request Log** window appears. Enter **Log Details** and click **Save**. The dispute request log is added.

## Editing a Dispute Request

### Prerequisites

To edit a dispute request, you should have:

- Adjustment types with A/P request type defined in the application

### Procedure

To edit a dispute request:

1. Search for the dispute request in the **Dispute Request** screen.
2. In the **Search Results** section, click the link in the **Dispute Request Information** column corresponding to the dispute request whose details you want to edit.

The **Dispute Request** screen appears.

3. Click the **Edit** button in the **Dispute Request** zone.

The **Dispute Request** screen appears. It contains the following section:

Field Name	Field Description	Mandatory (Yes or No)
Dispute Request Type	Displays information about the dispute request.	Not applicable
Dispute Reason	Used to indicate the dispute requests which are created using a particular dispute reason for the bill.	Yes
Account Information	Indicates the account for which the dispute request is created.	Not applicable
Comments	Used to specify additional information about the dispute request.	No

In addition, this screen contains the following two sections:

- **Characteristics** – Used to define characteristics for the dispute request. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the dispute request.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the dispute request.
Characteristic Type	Used to indicate the characteristic type. <b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Dispute Request</b> .	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the dispute request.
Characteristic Value	Used to specify the value for the characteristic type. <b>Note:</b> On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the dispute request.

- Modify the details of the dispute request, if required.

**Note:** If you select a predefined characteristic type, the **Search**  icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

- Define, edit, or remove characteristics from the dispute request, if required.
- Click **Save**.

The changes made to the dispute request are saved.

## Submitting a Dispute Request

### Prerequisites

To submit a dispute request, you should have:

- Credit/debit bill line items added in the dispute request

### Procedure

To submit a dispute request:

- Search for the dispute request in the **Dispute Request** screen.
- In the **Search Results** section, click the link in the **Dispute Request Information** column corresponding to the dispute request that you want to submit.

The **Dispute Request** screen appears.

- Click the **Submit** button in the **Dispute Request** zone.

The system behaves in the following manner:

If...	Then
The <b>Approval Required</b> and <b>Hierarchical Approval</b> check boxes are selected in the dispute request type using which the dispute request is created	A To Do of the <b>C1-DSPSB To Do</b> type is created and sent to the approver at the first level in the approval hierarchy, and the status of the dispute request is changed to <b>Approval In Progress</b> .
The <b>Approval Required</b> check box is selected, but the <b>Hierarchical Approval</b> check box is not selected in the dispute request type using which the dispute request is created	A To Do of the <b>C1-DSPSB To Do</b> type is created and sent to the approver at the hierarchy level where the total dispute amount falls within the threshold limit. In addition, the status of the dispute request is changed to <b>Approval In Progress</b> .
The <b>Approval Required</b> check box is not selected in the dispute request type using which the dispute request is created	The dispute adjustments are created using the specified adjustment types and the status of the dispute request is changed to <b>Processed</b> .

**Note:**

The **Submit** button appears only when the dispute request is in the **Draft** status.

Dispute request with atleast one bill or bill line item has to be added for submission.

**Approving a Dispute Request**

You can view the number of dispute requests which are pending for approval in the **Dispute Request** screen. The approver can review, and accordingly approve or reject the dispute request based on the observations.

**Note:** The system will not allow you to approve or reject a dispute request submitted by you.

**Procedure**

To approve a dispute request:

1. Do either of the following:

If you want to	Then
Approve a dispute request through the <b>Dispute Request</b> screen	<ol style="list-style-type: none"> <li>1. Search for the dispute request in the <b>Dispute Request</b> screen.</li> <li>2. In the <b>Search Results</b> section, click the link in the <b>Dispute Request Information</b> column corresponding to the dispute request which you want to review.</li> </ol>
Approve a dispute request from the <b>To Do List</b> screen	<ol style="list-style-type: none"> <li>1. Click the <b>Menu</b> link in the <b>Application</b> toolbar. A list appears.</li> <li>2. From the <b>Main</b> menu, select <b>To Do</b> and then click <b>To Do List</b>. The <b>To Do Type for User Search</b> window appears.</li> <li>3. Enter <b>C1_DISAP</b> in the <b>To Do Type</b> field.</li> <li>4. Click the <b>Search</b> button corresponding to the <b>To Do Type</b> field. The <b>To Do List</b> screen appears.</li> <li>5. Select the <b>Open</b> option from the <b>Filter by</b> list to view all unassigned To Dos.</li> </ol>

If you want to	Then
	6. Click the link in the <b>Message</b> column corresponding to the To Do of the dispute request that you want to review.

The **Dispute Request** screen appears.

- Review the dispute request details.
- Click the **Approve** button in the **Dispute Request** zone.

The system behaves in the following manner:

If...	Then
The <b>Hierarchical Approval</b> check box is not selected in the dispute request type using which the dispute request is created	The refund adjustments are created using the specified adjustment types and the status of the refund request is changed to <b>Processed</b> .

**Note:** The **Approve** button appears only when:

- The dispute request is in the **Approval In Progress** status.
- A user with the approval To Do role is reviewing the dispute request.

## Rejecting a Dispute Request

### Prerequisites

To reject a dispute request, you should have:

- Rejection reasons defined in the application

### **Note:**

While rejecting a dispute request, you need to specify the reason why you want to reject the dispute request. You can select the appropriate rejection reason only when you have defined the reasons for the **Rejected** status of the **C1-DisputeRequest** business object in the **Status Reason** screen.

The system will not allow you to approve or reject a dispute request submitted by you.

### Procedure

To reject a dispute request:

- Do either of the following:

If you want to	Then
Reject a dispute request through the <b>Dispute Request</b> screen	<ol style="list-style-type: none"> <li>1. Search for the dispute request in the <b>Dispute Request</b> screen.</li> <li>2. In the <b>Search Results</b> section, click the link in the <b>Dispute Request Information</b> column corresponding to the dispute request which you want to review.</li> </ol>
Reject a dispute request from the <b>To Do List</b> screen	<ol style="list-style-type: none"> <li>1. Click the <b>Menu</b> link in the <b>Application</b> toolbar. A list appears.</li> <li>2. From the <b>Main</b> menu, select <b>To Do</b> and then click <b>To Do List</b>. The <b>To Do Type for User Search</b> window appears.</li> <li>3. Enter <b>C1-DISAP</b> in the <b>To Do Type</b> field.</li> <li>4. Click the <b>Search</b> button corresponding to the <b>To Do Type</b> field. The <b>To Do List</b> screen appears.</li> <li>5. Select the <b>Open</b> option from the <b>Filter by</b> list to view all unassigned To Dos.</li> <li>6. Click the link in the <b>Message</b> column corresponding to the To Do of the dispute request that you want to review.</li> </ol>

The **Dispute Request** screen appears.

2. Review the dispute request details.
3. Click the **Reject** button in the **Dispute Request** zone.

The **Reject Dispute Request** window appears. It contains following fields:

Field Name	Field Description	Mandatory (Yes or No)
Status Reason	Used to indicate the reason why you want to reject the dispute request.	Yes
Comments	Used to specify additional information while rejecting the dispute request.	No

**Note:** The **Reject** button appears only when:

- The dispute request is in the **Approval In Progress** status.
- A user with the approval To Do role is reviewing the dispute request.

4. Select the rejection reason from the **Status Reason** list.
5. Click **Save**.

The status of the dispute request is changed to **Rejected**.

## Resubmitting a Dispute Request

### Prerequisites

To resubmit a dispute request, you should have:

- Entities added in the dispute request which is submitted for approval.

### Procedure

To resubmit a dispute request:

1. Search for the dispute request in the **Dispute Request** screen.
2. In the **Search Results** section, click the link in the **Dispute Request Information** column corresponding to the dispute request that you want to resubmit.

The **Dispute Request** screen appears.

3. Click the **Re Submit** button in the **Dispute Request** zone.

The **Resubmit Dispute Request** screen appears.

**Note:** The **Resubmit** button appears only when the dispute request is in the **Approval In Progress** status.

A To Do of the **C1-DSPSB To Do** type is created and sent to the request submitter using the submitter TO DO Role and the status of the dispute request is changed to **Draft**.

4. Enter the comments in the respective field and click **Save**.

**Note:** While resubmitting, To Do will be sent to the submitter of the request using the submitter To Do Role mapped on the dispute request type and the request will be moved to Draft status. The submitter can do necessary changes and re-submit the request. Log will be maintained when the approver sends the request back to submitter.

## Editing the Dispute Details

### Prerequisites

To edit the dispute details, you should have:

- Adjustment types with A/P request type defined in the application

**Procedure**

To edit the dispute details:

1. Search for the dispute request in the **Dispute Request** screen.
2. In the **Search Results** section, click the link in the **Dispute Request Information** column corresponding to the dispute request whose bill line item details you want to edit.

The **Dispute Request** screen appears.

3. Select the bill whose details you want to edit in the **Dispute Details** zone and click the **Edit** button available in the upper left corner of this zone.

The **Edit Dispute Details** screen appears.

**Note:** A bill line item from the dispute request can be edited only when the dispute request is in the **Draft** status.

The **Edit Dispute Details** screen contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Dispute Request ID	Displays the dispute request ID.	Not applicable
Account Information	Displays additional information about the account.	Not applicable

In addition to these fields, this screen contains following columns:

Column Name	Column Description
Entity Type	Indicates the entity type. The valid values are <ul style="list-style-type: none"> <li>• Adjustments</li> <li>• Bill</li> <li>• Bill Segment</li> </ul>
Entity ID	Displays the entity ID.
Entity Information	Displays the entity information.
Dispute Amount	Indicates the amount that must be disputed.
Currency	Displays the currency in which the entity was created.
Adjustment Type	Displays the adjustment type using which the dispute adjustment must be created.
Stop Auto Pay	Displays whether auto pay needs to be stopped for the entity of the dispute request.

4. Modify the details of the bill line items.
  5. Click **Save**.
- The changes made to the dispute bill line items are saved.

## Viewing the Bill Line Items

### Procedure

To view the bill line items of a dispute request:

1. Search for the dispute request in the **Dispute Request** screen.
2. In the **Search Results** section, click the link in the **Dispute Request Information** column corresponding to the dispute request whose log you want to view.

The **Dispute Request** screen appears. It consists of the following tabs:

- **Main** – Displays information about the dispute request. It contains the following zones:
  - **Dispute Request** – Displays the details of the dispute request.
  - **Dispute Details** – Lists the entities, such as auto payment events, and/or credit bill line items (such as credit bill segments and adjustments), of the account which must be disputed.
  - **Dispute Adjustments** – Displays the adjustment details of dispute request.

**Note:** This zone appears when you click the Broadcast  icon corresponding to the entity type as **Bill** in the **Dispute Details** zone and only when the status is **Processed**.

- **Previous Dispute Requests** – Displays the details of the bill which must be disputed.

**Note:** This zone appears when you click the Broadcast  icon corresponding to the entity type as **Bill** in the **Dispute Details** zone.

- **Bills** – Used to search bills with credit line items, such as credit bill segments and adjustments, that you want to dispute. It contains the following zones:
  - **Search Bills** – Lists completed bills of the account which are either with credit balance or have one or more credit line items, such as bill segments and adjustments. You can filter the bills using various search criteria.

**Note:** Filter the bills, if required, in the **Search Bills** zone.

- **Bill Line Items** – Lists the debit and credit bill segments and adjustments of the bill.

**Note:** This zone appears when you click the Broadcast  icon corresponding to the entity type as **Bill** in the **Search Bills** zone.

This tab appears only when the dispute request is in the **Draft** status.

- **Log** – Lists the complete trail of actions performed on the dispute request.

3. View the details of the bill line items in the **Bill Line Items** zone.

<b>Bill Line Items</b> zone	<a href="#">Bill Line Items</a> on page 1947

## Adding a Bill to the Dispute Request

You can dispute the credit/debit bills to the account.

### Prerequisites

To add a credit/debit bill to the dispute request, you should have:

- Completed bills for the account with one or more credit/debit line items

### Procedure

To add a credit/debit bill to the dispute request:

1. Click the **Bills** tab in the **Dispute Request** screen.

The **Bills** tab appears.

2. Filter the bills, if required, in the **Search Bills** zone.

**Note:** If a dispute request is currently in progress for a credit/debit bill segment or adjustment of a bill, those bills of the account are not listed in the **Search Bills** zone.

3. Do either of the following:

If...	Then...
A bill has all credit/debit line items and you want to add the credit/debit bill to the dispute request	<ol style="list-style-type: none"> <li>1. In the <b>Search Bills</b> zone, select the bills that you want to dispute.</li> <li>2. Click the <b>Add</b> button available at the upper left corner of the <b>Search Bills</b> zone.</li> </ol>
A bill has credit balance and one or more debit line items and you want to add the credit bill to the dispute request	<ol style="list-style-type: none"> <li>1. In the <b>Search Bills</b> zone, select the bills that you want to dispute.</li> <li>2. Click the <b>Add</b> button available at the upper left corner of the <b>Search Bills</b> zone.</li> </ol>

4. Click **Add**.

A message appears indicating that the selected bills are added to the dispute request.

**Note:** If you select a bill (with credit balance) which contains one or more debit line items or if you select a bill (with debit balance) which contains one or more credit line items, the system will not allow you to add the credit line items by directly adding the bill. In such case, you need to individually select the credit bill segments and adjustments of the bill and then add them to the dispute request.

5. Click **OK**.

Note that all the credit/debit bill segments or adjustments of the bills are added in the **Dispute Details** zone on the **Main** tab.

**Note:** Irrespective of whether you select a credit/debit bill, or credit/debit bill segments or adjustments, the credit/debit bill segments or adjustments are added in the **Dispute Details** zone. The credit/debit bill is not added to the **Dispute Details** zone.

## Adding a Bill Line Item to the Dispute Request

You can dispute the credit/debit bill line items, such as bill segments and adjustments, to the account. While adding a credit/debit bill line item to the dispute request, you can either:

- Directly add all credit/debit line items of a bill to the dispute request by adding the bill which has all bill segments and adjustments in credit
- Individually add a credit bill segment or adjustment of a bill (with one or more credit/debit line items) to the dispute request

### Prerequisites

To add a credit/debit bill line item to the dispute request, you should have:

- Completed bills for the account with one or more credit/debit line items

### Procedure

To add a credit/debit bill line item to the dispute request:

1. Click the **Bills** tab in the **Dispute Request** screen.

The **Bills** tab appears.

- Filter the bills, if required, in the **Search Bills** zone.

**Note:** If a dispute request is currently in progress for a credit/debit bill segment or adjustment of a bill, those bills of the account are not listed in the **Search Bills** zone. In addition, a bill with all debit line items are not listed in the **Search Bills** zone.

- Do either of the following:

If...	Then...
A bill has all credit line items and you want to add a particular credit bill line item to the dispute request	<ol style="list-style-type: none"> <li>In the <b>Search Bills</b> zone, click the <b>Broadcast</b>  icon corresponding to the bill whose line items you want to view. The <b>Bill Line Items</b> zone appears.</li> <li>Select the check box corresponding to the credit bill segment or adjustment that you want to dispute.</li> </ol>
A bill has credit balance and one or more debit line items	<ol style="list-style-type: none"> <li>In the <b>Search Bills</b> zone, click the <b>Broadcast</b>  icon corresponding to the bill whose line items you want to view. The <b>Bill Line Items</b> zone appears.</li> <li>Select the check box corresponding to the credit bill segment or adjustment that you want to dispute.</li> </ol>
A bill has debit balance and one or more credit line items	<ol style="list-style-type: none"> <li>In the <b>Search Bills</b> zone, click the <b>Broadcast</b>  icon corresponding to the bill whose line items you want to view. The <b>Bill Line Items</b> zone appears.</li> <li>Select the check box corresponding to the credit bill segment or adjustment that you want to dispute.</li> </ol>

- Click **Add**.

A message appears indicating that the selected bill segments or adjustments are added to the dispute request.

**Note:** If you select a bill (with credit balance) which contains one or more debit line items or if you select a bill (with debit balance) which contains one or more credit line items, the system will not allow you to add the credit line items by directly adding the bill. In such case, you need to individually select the credit bill segments and adjustments of the bill and then add them to the dispute request.

- Click **OK**.

Note that the credit bill segments or adjustments are added in the **Dispute Details** zone on the **Main** tab.

**Note:**

Irrespective of whether you select a credit/debit bill, or credit/debit bill segments or adjustments, the credit/debit bill segments or adjustments are added in the **Dispute Details** zone. The credit bill is not added to the **Dispute Details** zone.

The system will not allow you to add a debit line item to the **Dispute Details** zone.

- [Financial Transaction Distribution Object Extendable Lookup](#)
- [Extendable Lookup \(Financial Transaction Distribution Object\)](#)
- [Financial Transaction Distribution \(Used for Searching\)](#)
- [Financial Transaction Distribution \(Used for Viewing\)](#)

Oracle Revenue Management and Billing enables you to generate the earnings credit rate (ECR) when the account is eligible for earnings credit rate and is associated with a contract of a contract type where the **Financial Transaction Distribution Object** characteristic is defined. In other words, the system enables you to create the financial transaction distribution (ECR) object when the adjustment and/or bill segment financial transaction created against an ECR contract is frozen. The status of the financial transaction distribution object is set to **Pending**.

To enable the Earnings Credit Rate (ECR) feature, you need to setup the following:

- **Financial Transaction Distribution Type** – A financial transaction distribution type is an object which controls the distribution of a credit and debit bill segment or adjustment financial transaction. It is associated to a contract type through a financial transaction distribution object. It helps the system to determine:
  - Whether it is defined for adjustment or bill segment financial transactions whose credit or debit amount should be distributed.
  - The type of adjustment (such as transfer adjustment) should be created when the credit or debit amount on the financial transaction distribution object is distributed.
  - The financial transaction distribution rule using which the credit or debit amount on the financial transaction distribution object should be distributed.
  - Whether the credit or debit amount on the financial transaction distribution object should be used to offset an adjustment or bill segment of the same account (where ECR is earned), another account of the customer (for whom ECR is earned), or the account identified as per the distribution hierarchy.
  - Whether the credit or debit amount on the financial transaction distribution object should be written off when it is equal to or less than the write off threshold amount.
  - The type of adjustment that should be created when the credit or debit amount on the financial transaction distribution object is written off.
  - The type of adjustment that should be created when the credit or debit amount on the financial transaction distribution object is expired.

- The type of adjustment that should be created when the excess credit amount on the financial transaction distribution object is refunded at the end of the year.
- The business object using which the financial transaction distribution object should be created.
- **Financial Transaction Distribution Rule** – A financial transaction distribution rule is associated with one or more financial transaction distribution types. It helps the system to determine:
  - The method using which the credit or debit amount on the financial transaction distribution object should be distributed. If the distribution method is set to **Fee Based**, the system will distribute the credit or debit amount on the financial transaction distribution object to offset fees starting from the highest to lowest amount. If the distribution method is set to **Priority Based**, the system will distribute the credit or debit amount on the financial transaction distribution object to the accounts in the order of their account distribution priority. If the distribution method is set to **Weighted Average**, the system will distribute the credit or debit amount on the financial transaction distribution object to the accounts in the weighted average ratio.
  - The distribution hierarchy using which the accounts, to which the credit or debit amount on the financial transaction distribution object should be distributed, should be derived.
  - The priority in which the objects, such as adjustments of a particular adjustment type or bill segments created for a particular price item, should be offset using the credit or debit amount on the financial transaction distribution object.
  - The objects, such as adjustments of a particular adjustment type or bill segments created for a particular price item, should be excluded from offsetting.
  - Algorithms that should be used to select the accounts, interpret the order of distribution, and then distribute the credit or debit amount.
- **Expiration Cycle** – An expiration cycle is an extendable lookup reference object which indicates the frequency at which the financial transaction distribution object created for the account should be expired (i.e. after two months or 45 days from the date of creation). You can associate an expiration cycle with one or more accounts.
- **Distribution Hierarchy** – A distribution hierarchy is an extendable lookup reference object which indicates the list of hierarchies that should be considered while deriving accounts for offsetting the credit or debit amount on the financial transaction distribution object. The valid hierarchy lists are:
  - **IGA Member Accounts Same Division** – If this option is selected, the system will first offset the credit or debit amount on the financial transaction distribution object against the source account, other accounts of the source customer, and then against other member accounts of an invoicing group in which the source account is also a member account.
  - **Person Relationship (Child) Same Division** – If this option is selected, the system will first offset the credit or debit amount on the

financial transaction distribution object against the source account, other accounts of the source customer, and then against the child persons' accounts who are related to the parent person (i.e. source customer) using a particular relationship type and belongs to the same division.

- **Person Relationship (Child) Other Division** – If this option is selected, the system will first offset the credit or debit amount on the financial transaction distribution object against the source account, other accounts of the source customer, and then against the child persons' accounts who are related to the parent person (i.e. source customer) using a particular relationship type and belongs to a different division.
- **Person Relationship (Parent) Same Division** – If this option is selected, the system will first offset the credit or debit amount on the financial transaction distribution object against the source account, other accounts of the source customer, and then against the parent persons' accounts who are related to the child person (i.e. source customer) using a particular relationship type and belongs to the same division.
- **Person Relationship (Parent) Other Division** – If this option is selected, the system will first offset the credit or debit amount on the financial transaction distribution object against the source account, other accounts of the source customer, and then against the parent persons' accounts who are related to the child person (i.e. source customer) using a particular relationship type and belongs to a different division.

You can associate a distribution hierarchy with one or more financial transaction distribution rules.

- **Financial Transaction Distribution Object** – A financial transaction distribution type is associated to a contract type through a financial transaction distribution object. You can include multiple financial transaction distribution types in a financial transaction distribution object. You can associate a financial transaction distribution object to one or more contract types.
- **Earnings Credit Rate Eligibility** – You can define earnings credit rate eligibility for each account in the system. It helps the system to determine:
  - Whether the account is eligible for generating earnings credit rate (i.e. financial transaction distribution object).
  - Whether the credit or debit amount on the financial transaction distribution object can be offset against the source account, other accounts of the source customer, or against the accounts identified in the distribution hierarchy.
  - The priority in which the account should be considered while distributing the credit or debit amount on the financial transaction distribution object.
  - The expiration cycle for the account.

The following two batches are introduced in this release:

- **Financial Transaction Distribution Monitor (C1-FTDPR)** – It is used to monitor or check whether there are any financial transaction distribution objects in the Pending status. If there is a financial transaction

distribution object in the Pending status, the system validates the financial transaction distribution object and changes the status of the financial transaction distribution object to Validated. From the Validated status, the status of the financial transaction distribution object is changed to either of the following:

- **Refund** (when there is excess credit amount on the financial transaction distribution object at the end of the year and the source account belongs to a particular customer class where refund is allowed).
- **Write Off** (when the credit or debit amount on the financial transaction distribution object is equal to or less than the write off threshold amount)
- **Expire** (when the credit or debit amount on the financial transaction distribution object is expired)

Accordingly, the refund, write off, and expire adjustments are created. However, if none of the above conditions are met, the status of the financial transaction distribution object remains as **Validated**.

- **FT Distribution Single Threaded Transition Batch (C1-FTDTS)** – It is used to monitor or check whether there are any financial transaction distribution objects in the Validated status. If there is a financial transaction distribution object in the Validated status, the system changes the status of the financial transaction distribution object to **Apply Rule** and executes the algorithm attached to the **Apply Rule** system event on the financial transaction distribution rule version which is effective on the batch business date. Once the credit or debit distribution array of accounts is created, the status of the financial transaction distribution object is changed to **Distributed** and then the algorithm attached to the Distribute system event on the financial transaction distribution rule version which is effective on the batch business date is executed. On the credit or debit amount distribution, two adjustments are created – one against the source contract and another against the bill segment or adjustment's contract to which the amount is distributed. Once the credit or debit amount on the financial transaction distribution object is fully distributed, the status of the financial transaction distribution object is changed to **Complete**. However, if the credit or debit amount on the financial transaction distribution object is not yet fully distributed, the status of the financial transaction distribution object is changed to **Validated**.

## Prerequisites

To setup the earnings credit rate process, you need to do the following:

- Add the earnings credit rate to the eligible accounts.
- Define the required financial transaction distribution types in the system.
- Define the required financial transaction distribution rules in the system.
- Define the following extendable lookup reference objects in the system:
  - Expiration Cycle
  - Distribution Hierarchy
  - Financial transaction distribution object

## Financial Transaction Distribution Object Status Transition

The following figure graphically indicates how a financial transaction distribution object is created in the system:

**Note:** For more information about the batches, refer *Oracle Revenue Management and Billing Batch Guide*.

## Algorithms Used in C1-FTDIST

The following table lists the algorithms which are attached to the **C1-FTDIST** business object:

System Event	Algorithm	Algorithm Type	Description																																
Information	C1-FTDISTINF	C1-FTDISTINF	<p>This algorithm formats the FT Distribution that appears throughout the system. It concatenates the fields and separator specified as algorithm parameters. Possible fields are:</p> <table border="1"> <thead> <tr> <th>Field</th> <th>Description</th> </tr> </thead> <tbody> <tr> <td>ACCT_ID</td> <td>Account ID</td> </tr> <tr> <td>ADJ_ID</td> <td>Adjustment ID</td> </tr> <tr> <td>BO_STATUS_CD</td> <td>Status</td> </tr> <tr> <td>BO_STATUS_REASON_CD</td> <td>Status Reason</td> </tr> <tr> <td>BSEG_ID</td> <td>Bill Segment ID</td> </tr> <tr> <td>BUS_OBJ_CD</td> <td>Business Object</td> </tr> <tr> <td>CRE_DTTM</td> <td>Creation Date/Time</td> </tr> <tr> <td>EXPIRATION_DT</td> <td>Expiration Date</td> </tr> <tr> <td>FT_DISTRIBUTION_ID</td> <td>FT Distribution</td> </tr> <tr> <td>FT_DIST_TYPE_CD</td> <td>FT Distribution Type</td> </tr> <tr> <td>FT_ID</td> <td>FT ID</td> </tr> <tr> <td>ILM_DT</td> <td>ILM Date</td> </tr> <tr> <td>SA_ID</td> <td>SA ID</td> </tr> <tr> <td>STATUS_UPD_DTTM</td> <td>Status Update Date/Time</td> </tr> <tr> <td>TOT_AMT</td> <td>Payoff Amount</td> </tr> </tbody> </table>	Field	Description	ACCT_ID	Account ID	ADJ_ID	Adjustment ID	BO_STATUS_CD	Status	BO_STATUS_REASON_CD	Status Reason	BSEG_ID	Bill Segment ID	BUS_OBJ_CD	Business Object	CRE_DTTM	Creation Date/Time	EXPIRATION_DT	Expiration Date	FT_DISTRIBUTION_ID	FT Distribution	FT_DIST_TYPE_CD	FT Distribution Type	FT_ID	FT ID	ILM_DT	ILM Date	SA_ID	SA ID	STATUS_UPD_DTTM	Status Update Date/Time	TOT_AMT	Payoff Amount
Field	Description																																		
ACCT_ID	Account ID																																		
ADJ_ID	Adjustment ID																																		
BO_STATUS_CD	Status																																		
BO_STATUS_REASON_CD	Status Reason																																		
BSEG_ID	Bill Segment ID																																		
BUS_OBJ_CD	Business Object																																		
CRE_DTTM	Creation Date/Time																																		
EXPIRATION_DT	Expiration Date																																		
FT_DISTRIBUTION_ID	FT Distribution																																		
FT_DIST_TYPE_CD	FT Distribution Type																																		
FT_ID	FT ID																																		
ILM_DT	ILM Date																																		
SA_ID	SA ID																																		
STATUS_UPD_DTTM	Status Update Date/Time																																		
TOT_AMT	Payoff Amount																																		
Validation	C1-VALFTDIST	C1-VALFTDIST	<p>This algorithm validates the Business Object - Financial Transaction Distribution, which includes:</p> <ul style="list-style-type: none"> <li>Adjustment ID or Bill Segment ID must be supplied.</li> </ul>																																

The following table lists the algorithms which are used in the lifecycle of the **C1-FTDIST** business object:

Status	System Event	Algorithm	Algorithm Type	Description
In Progress	Monitor	F1-AT-RQJ	F1-GEN-BOMNJ	This algorithm type transitions business object current state to the input Next Status or to the status related to the input Next Transition Condition. Either one but not both soft parameters may be specified. If both soft parameters are not specified, the business object will be transitioned to the default next status specified on lifecycle. Algorithms of this algorithm type may be defined for any business object status as its monitor algorithm.

Status	System Event	Algorithm	Algorithm Type	Description
Validate	Monitor	C1-FTDVALIDT	C1-FTDVALIDT	<p>This algorithm transitions the FT Distribution record from validate to any of the following statuses based on certain conditions:</p> <ul style="list-style-type: none"> <li>• It transitions to <b>Expire</b> status (based on Parameter Expire Status Transition Condition) when the credit is not fully distributed and process date is before or on the same day as the Expiration Date defined in the record.</li> <li>• It transitions to <b>Write Off</b> status (based on Parameter Write Off Status Transition Condition) when the Total Amount is less than or equal to the Write Off Threshold defined in the FT Distribution Type linked to the record. It also uses Parameter Handle Negative or Positive for Write Off. If the Parameter is Negative and the Payoff Amount of the record is negative or the Parameter is Positive and the Payoff Amount of the record is positive, then proceed with Write Off.</li> <li>• It transitions to <b>Refund status</b> (based on Parameter Refund Status Transition Condition) when the Parameter Refund at End of Year is Y and the record's source account's customer class is equal to Parameter Applicable Customer Class for Refund. If none of the conditions are met, the record remains at Validate status.</li> </ul> <p>If none of the conditions are met, the record remains at <b>Validate</b> status.</p>

Status	System Event	Algorithm	Algorithm Type	Description
Apply Rule	Monitor	F1-AT-RQJ	F1-GEN-BOMNJ	This algorithm type transitions business object current state to the input Next Status or to the status related to the input Next Transition Condition. Either of the one soft parameters may be specified. If both the soft parameters are not specified, the business object will be transitioned to the default next status specified on lifecycle. Algorithms of this algorithm type may be defined for any business object status as its monitor algorithm.
Apply Rule	Enter	C1-FTDAPRL	C1-FTDAPRL	This algorithm will call the pre-processing and apply rule algorithms that are configured in the effective rule version of the FT Distribution Rule of the Financial Transaction Distribution record's FT Distribution Type.
Distributed	Enter	C1-FTDDIST	C1-FTDDIST	This algorithm will trigger the distribute algorithms configured in the effective rule version of the FT Distribution Rule linked to the FT Distribution Type of the Financial Transaction Distribution record. After invoking the algorithms, the FT Distribution amount is compared to the sum of the distribution amounts with frozen transfer adjustments in the list. If the amounts are equal, the FT Distribution record is transitioned to <b>Complete</b> (based on the Parameter Complete Status Transition Condition). Otherwise, it is transitioned back to <b>Validate</b> (based on the Validate Status Transition Condition).
Expire	Monitor	F1-AT-RQJ	F1-GEN-BOMNJ	This algorithm type transitions business object current state to the input Next Status or to the status related to the input Next Transition Condition. Either one but not both soft parameters may be specified. If both soft parameters are not specified, the business object will be transitioned to the default next status specified on lifecycle. Algorithms of this algorithm type may be defined for any business object status as its monitor algorithm.

Status	System Event	Algorithm	Algorithm Type	Description
Expire	Enter	C1-FTDEXP	C1-FTDEXP	This algorithm expires credit amount by creating an expiration adjustment defined in the FT Distribution Type. The Expiration Adjustment created will have a characteristic of type Parameter Financial Transaction Distribution Characteristic Type and value equal to the FT Distribution ID. The FT Distribution record will have a characteristic of type Write off Adjustment with value equal to the Expiration Adjustment ID.
Refund	Monitor	F1-AT-RQJ	F1-GEN-BOMNJ	This algorithm type transitions business object current state to the input Next Status or to the status related to the input Next Transition Condition. Either of the one soft parameters may be specified. If both the soft parameters are not specified, the business object will be transitioned to the default next status specified on lifecycle. Algorithms of this algorithm type may be defined for any business object status as its monitor algorithm.
Refund	Enter	C1-FTDREFUND	C1-FTDREFUND	This algorithm refunds the credit amount by creating a refund adjustment defined in the FT Distribution Type. The Refund Adjustment will be linked to the Refund Contract (with type equal to Parameter Refund Contract Type) attached to the source Account of the FT Distribution. The Refund Adjustment will be linked to the FT Distribution via a characteristic with type Parameter Financial Transaction Distribution Characteristic Type. Also, the FT Distribution record will have a characteristic of type Refund Adjustment with value equal to the Refund Adjustment ID.

Status	System Event	Algorithm	Algorithm Type	Description
Write Off	Monitor	F1-AT-RQJ	F1-GEN-BOMNJ	This algorithm type transitions business object current state to the input Next Status or to the status related to the input Next Transition Condition. Either one but not both soft parameters may be specified. If both soft parameters are not specified, the business object will be transitioned to the default next status specified on lifecycle. Algorithms of this algorithm type may be defined for any business object status as its monitor algorithm.
Write Off	Enter	C1-FTDWRTOFF	C1-FTDWRTOFF	This algorithm writes off the credit amount by creating a write off adjustment defined in the FT Distribution Type. The Write off Adjustment created will have a characteristic of type Parameter Financial Transaction Distribution Characteristic Type and value equal to the FT Distribution ID. The FT Distribution record will have a characteristic of type Write Off Adjustment with value equal to the Write Off Adjustment ID.
Cancel	Enter	C1-FTDCANCEL	C1-FTDCANCEL	This algorithm will cancel all the transfer adjustments listed in the Financial Transaction Distribution record's Distribution List. The cancel reason code will be copied or taken from the original Distribution Object's cancel reason. If it is not provided, it will use the parameter Default Cancel Reason.
Complete	Enter	C1-FTDCOMP	C1-FTDCOMP	This algorithm will trigger the post-processing algorithms configured in the effective rule version of the FT Distribution Rule linked to the FT Distribution Type of the Financial Transaction Distribution record.

## Earnings Credit Rate Eligibility

This screen allows you to add earnings credit rate eligibility for each account in the system and helps you to determine the following:

- Whether the account is eligible for generating earnings credit rate (i.e. financial transaction distribution object).
- Whether the credit or debit amount on the financial transaction distribution object can be offset against the source account, other accounts of the source customer, or against the accounts identified in the distribution hierarchy.

- The priority in which the account should be considered while distributing the credit or debit amount on the financial transaction distribution object.
- The expiration cycle for the account.

This screen contains the following zone:

- [Earnings Credit Rate Eligibility](#) on page 1974

## Earnings Credit Rate Eligibility

The **Earnings Credit Rate Eligibility** zone allows you to add earnings credit rate eligibility for each account in the system.

This zone contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Earnings Credit Rate ID	Displays the earnings credit rate ID.	Not applicable
Account ID	Used to search for a particular account.  <b>Note:</b> The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Account Search</b> window appears.	Yes
Earnings Credit Rate Eligible	Used to define whether an earned credit rate can be calculated and created for the account or not.	No
Offset Eligibility	Used to define whether the credit or debit amount on the financial transaction distribution object can be offset against the source account, other accounts of the source customer, or against the accounts identified in the distribution hierarchy.	No
Offset Distribution Type	Used to search the financial transaction distribution type which would be used to offset the credit or debit amount from another account. If this field is left blank, then the financial transaction distribution type for the earning credit rate source account will be used.  <b>Note:</b> This field is enabled only when the <b>Offset Eligibility</b> check box is selected. This field is enabled only when the <b>Offset Eligibility</b> check box is selected.  The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Financial Transaction Offset Distribution Type FK Search</b> window appears.	No
Account Distribution Priority	Used to indicate the priority in which the account should be considered while distributing the credit or debit amount on the financial transaction distribution object.	No
Expiration Cycle	Used to indicate the expiration cycle for the account.	Yes

How to define earnings credit rate eligibility for an account	<a href="#">Defining Earnings Credit Rate Eligibility for an Account</a> on page 1975

## Defining Earnings Credit Rate Eligibility for an Account

### Prerequisites

To define an earnings credit rate eligibility for an account, you should have:

- Accounts defined in the application.
- Expiration cycle defined in the application.
- Financial transaction distribution type defined in the application.

### Procedure

To define earnings credit rate eligibility for an account:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Person Information** and then click **Earnings Credit Rate Eligibility**.

The **Earnings Credit Rate Eligibility** screen appears. It contains the following section:

- **Main** – Used to add the basic details about the earnings credit rate eligibility for an account. This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Earnings Credit Rate ID	Displays the earnings credit rate ID.	Not applicable
Account ID	Used to search for a particular account.  <b>Note:</b> The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Account Search</b> window appears.	Yes
Earnings Credit Rate Eligible	Used to define whether an earned credit rate can be calculated and created for the account or not.	No
Offset Eligibility	Used to define whether the credit or debit amount on the financial transaction distribution object can be offset against the source account, other accounts of the source customer, or against the accounts identified in the distribution hierarchy.	No

Field Name	Field Description	Mandatory (Yes or No)
Offset Distribution Type	<p>Used to search the financial transaction distribution type which would be used to offset the credit or debit amount from another account. If this field is left blank, then the financial transaction distribution type for the earning credit rate source account will be used.</p> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>This field is enabled only when the <b>Offset Eligibility</b> check box is selected. This field is enabled only when the <b>Offset Eligibility</b> check box is selected.</p> <p>The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Financial Transaction Offset Distribution Type FK Search</b> window appears.</p> </div>	No
Account Distribution Priority	Used to indicate the priority in which the account should be considered while distributing the credit or debit amount on the financial transaction distribution object.	No
Expiration Cycle	Used to indicate the expiration cycle for the account.	Yes

3. Enter the required details.
4. Click **Save**.

The earnings credit rate eligibility is defined for the account.

## Financial Transaction Distribution Type

The **Financial Transaction Distribution Type** screen allows you to define, edit, copy, and delete a financial transaction distribution object type.

This screen contains the following zones:

- [Financial Transaction Distribution Type List](#) on page 1976
- [Financial Transaction Distribution Type](#) on page 1978

### Financial Transaction Distribution Type List

The **Financial Transaction Distribution Type List** zone allows you to view the list of financial transaction distribution types that are already defined in the system.

This zone contains the following columns:

Column Name	Column Description
FT Distribution Type	Displays the financial transaction distribution type.
Description	Displays the description of the financial transaction distribution type. <b>Note:</b> It has a link. On clicking the link, the <b>Financial Transaction Distribution Type</b> zone appears with the details of the respective financial transaction distribution type.
Related Transaction BO	Displays the corresponding transaction business object. In addition, this column has a context menu which helps in navigating to other screens in the application. <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears with the details of the respective business object.
FT Adjustment Type	Displays the adjustment type used in the financial transaction adjustment.
Distribution Object Type	Displays the financial transaction object type used in distributing the credit.
Edit	On clicking the <b>Edit</b> (✎) icon, the <b>FT Distribution Type</b> screen appears where you can edit the details of the financial transaction distribution type.
Duplicate	On clicking the <b>Duplicate</b> (📄📄) icon, the <b>FT Distribution Type</b> screen appears where you can define a financial transaction distribution type using an existing financial transaction distribution type.
Delete	On clicking the <b>Delete</b> (🗑️) icon, you can delete the financial transaction distribution type.

On clicking the **Broadcast** (📡) icon corresponding to the financial transaction distribution type, the **Financial Transaction Distribution Type** zone appears with the details of the respective financial transaction distribution type.

You can filter the list using the **Financial Transaction Distribution Type**, **Description**, or **Financial Transaction Object Type** fields available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (⌵) icon in the upper right corner of this zone.

## Financial Transaction Distribution Type

The **Financial Transaction Distribution Type** zone displays the details of the financial transaction distribution types that are already defined in the system. This zone contains the following sections:

- **Main** – This section provides basic information about the financial transaction distribution type. It contains the following fields:

Field Name	Field Description
FT Distribution Type	Displays the financial transaction distribution type.
Description	Displays the description of the financial transaction distribution type.
FT Object Type	Indicates the business object that will be used to create the financial transaction distribution type.  <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.
FT Adjustment Type	Displays the adjustment type used in the financial transaction adjustment.
Distribution Object Type	Displays the financial transaction object type used in distributing the credit.
Distribution Adjustment Type	Displays the adjustment type which is used for distribution if the <b>Transfer Adjustment</b> option is selected from the <b>Distribution Object Type</b> list.  <b>Note:</b> It has a link. On clicking the link, the <b>Adjustment Type</b> screen appears where you can view the details of the respective adjustment type.
FT Distribution Rule	Displays the financial transaction distribution rule to be used for distributing the credit or debit in an account.  <b>Note:</b> It has a link. On clicking the link, the <b>Financial Transaction Distribution Rule</b> screen appears where you can view the details of the respective financial transaction distribution rule.
Write Off Threshold Amount	Displays the minimum credit amount for write off. Any amount specified in this field is assumed to be negative. For example, a value of “2” is treated as “-2”. Such that if the credit is only “-2”, then this will written off instead of distributing it to offset.
Write Off Adjustment Type	Displays the adjustment type used for write off.  <b>Note:</b> It has a link. On clicking the link, the <b>Adjustment Type</b> screen appears where you can view the details of the respective adjustment type.

Field Name	Field Description
Expiration Adjustment Type	Displays the adjustment type used for expiration.  <b>Note:</b> It has a link. On clicking the link, the <b>Adjustment Type</b> screen appears where you can view the details of the respective adjustment type.
Refund Adjustment Type	Displays the adjustment type used for refund.  <b>Note:</b> It has a link. On clicking the link, the <b>Adjustment Type</b> screen appears where you can view the details of the respective adjustment type.
Offset Indicator	Displays whether the financial transaction distribution type is applicable when an account in a hierarchy is using an excess credit from the account credit source to offset its own debt or not.
Related Transaction BO	Displays the object using which financial transaction object is created. In addition, this column has a context menu which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.

- **Characteristics** – This section lists the characteristics defined for the financial transaction distribution type. It contains the following columns:

Column Name	Column Description
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- **Record Actions** – This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the financial transaction distribution type.
Delete	Used to delete the financial transaction distribution type.
Duplicate	Used to create a new financial transaction distribution type using an existing financial transaction distribution type.

- **Record Information** – This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the financial transaction distribution type is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.

By default, the **Financial Transaction Distribution Type** zone does not appear in the **Financial Transaction Distribution Type** screen. It appears only when you click the **Broadcast**  icon corresponding to the financial transaction distribution type in the **Financial Transaction Distribution Type List** zone.

## Defining a Financial Transaction Distribution Type

### Prerequisites

To define a financial transaction distribution type, you should have:

- Financial transaction distribution objects defined in the application.
- Adjustment types defined in the application.
- Financial transaction distribution rule defined in the application.
- Required characteristics defined in the application.

### Procedure

To define a financial transaction distribution type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **Financial Transaction Distribution Type**.  
A sub-menu appears.
3. Click the **Add** option from the **Financial Transaction Distribution Type** sub-menu.

The **Financial Transaction Distribution Type** screen appears. It contains the following sections:

- **Main** – Used to specify basic details about the financial transaction distribution type.
- **Characteristics** – Used to define characteristics for the financial transaction distribution type.

**Main** – This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Financial Transaction Distribution Type	Used to specify the financial transaction distribution type.	Yes
Description	Used to specify the description of the financial transaction distribution type.	Yes

Field Name	Field Description	Mandatory (Yes or No)
FT Object Type	Used to indicate the business object that will be used to create the financial transaction distribution type. The valid values are: <ul style="list-style-type: none"> <li>• Adjustment</li> <li>• Bill Segment</li> </ul>	Yes
FT Adjustment Type	Used to indicate the adjustment type used in the financial transaction adjustment. <p><b>Note:</b> By default, this field is disabled. This field gets enabled when you select <b>Adjustment</b> option from the <b>FT Object Type</b> list.</p>	Yes (Conditional) <p><b>Note:</b> This field is required when you are selecting the <b>Adjustment</b> option for the <b>FT Object Type</b> list.</p>
Distribution Object Type	Used to indicate the financial transaction object type used in distribution.	Yes
Distribution Adjustment Type	Used to indicate the adjustment type which is used for distribution if the <b>Transfer Adjustment</b> option is selected from the <b>Distribution Object Type</b> list.	No
FT Distribution Rule	Used to indicate the financial transaction distribution rule to be used for distributing the credit or debit in an account. <p><b>Note:</b> The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Financial Transaction Offset Distribution Type FK Search</b> window appears.</p>	No
Offset Indicator	Used to indicate whether the financial transaction distribution type is applicable when an account in a hierarchy is using an excess credit from the account credit source to offset its own debt or not.	No
Write Off Threshold Amount	Used to specify the minimum credit amount for write off.	Yes (Conditional) <p><b>Note:</b> This field is required when you do not check the <b>Offset Indicator</b> check box.</p>

Field Name	Field Description	Mandatory (Yes or No)
Write Off Adjustment Type	Used to indicate the adjustment type used for write off.  <b>Note:</b> The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Adjustment Type Search</b> window appears.	Yes (Conditional)  <b>Note:</b> This field is required when you do not check the <b>Offset Indicator</b> check box.
Expiration Adjustment Type	Used to indicate the adjustment type used for expiration.  <b>Note:</b> The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Adjustment Type Search</b> window appears.	Yes (Conditional)  <b>Note:</b> This field is required when you do not check the <b>Offset Indicator</b> check box.
Refund Adjustment Type	Used to indicate the adjustment type used for refund.  <b>Note:</b> The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Adjustment Type Search</b> window appears.	Yes (Conditional)  <b>Note:</b> This field is required when you do not check the <b>Offset Indicator</b> check box.
Related Transaction BO	Used to indicate the object using which financial transaction object is created.  <b>Note:</b> The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Financial Transaction Business Object Search</b> window appears.	Yes

**Characteristics** – This section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Characteristic Type	Used to indicate the characteristic type.	Yes (Conditional)  <b>Note:</b> This field is required when you are defining a characteristic for the financial transaction distribution type.
Characteristic Value	Used to specify the value for the characteristic type.  <b>Note:</b> On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	Yes (Conditional)  <b>Note:</b> This field is required when you are defining a characteristic for the financial transaction distribution type.

**Tip:** Alternatively, you can access the **Financial Transaction Distribution Type** screen by clicking the **Add** button in the **Page Title** area of the **Financial Transaction Distribution Type** screen.

4. Enter the required details.
5. Define characteristics for the financial transaction distribution type, if required.
6. Click **Save**.

The financial transaction distribution type is defined.

## **Defining Characteristics for a Financial Transaction Distribution Type**

### **Procedure**

To define characteristics for a financial transaction distribution type:

1. Ensure that the **Characteristics** section is expanded when you are defining, editing, or copying a financial transaction distribution type.

The **Characteristics** section contains the following fields:

<b>Field Name</b>	<b>Field Description</b>	<b>Mandatory (Yes or No)</b>
Characteristic Type	Used to indicate the characteristic type.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the financial transaction distribution type.
Characteristic Value	Used to specify the value for the characteristic type. <b>Note:</b> On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the financial transaction distribution type.

2. Enter the required details.

**Note:** If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

3. If you want to define more than one characteristic for the financial transaction distribution type, click the **Add** (+) icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from the financial transaction distribution type, click the **Delete** () icon corresponding to the characteristic.

## Editing a Financial Transaction Distribution Type

### Procedure

To edit a financial transaction distribution type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **Financial Transaction Distribution Type**.  
A sub-menu appears.
3. Click the **Search** option from the **Financial Transaction Distribution Type** sub-menu.  
The **Financial Transaction Distribution Type** screen appears.
4. In the **Financial Transaction Distribution Type List** zone, click the **Edit** () icon in the **Edit** column corresponding to the financial transaction distribution type whose details you want to edit.

The **FT Distribution Type** screen appears. It contains the following sections:

- **Main** — Used to specify basic details about the financial transaction distribution type.
- **Characteristics** — Used to define characteristics for the financial transaction distribution type.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Financial Transaction Distribution Type	Used to specify the financial transaction distribution type.	Yes
Description	Used to specify the description of the financial transaction distribution type.	Yes
FT Object Type	Used to indicate the business object that will be used to create the financial transaction distribution type. The valid values are: <ul style="list-style-type: none"> <li>• Adjustment</li> <li>• Bill Segment</li> </ul>	Yes

Field Name	Field Description	Mandatory (Yes or No)
FT Adjustment Type	Used to indicate the adjustment type used in the financial transaction adjustment.  <b>Note:</b> By default, this field is disabled. This field gets enabled when you select <b>Adjustment</b> option from the <b>FT Object Type</b> list.	Yes (Conditional)  <b>Note:</b> This field is required when you are selecting the <b>Adjustment</b> option for the <b>FT Object Type</b> list.
Distribution Object Type	Used to indicate the financial transaction object type used in distribution.	Yes
Distribution Adjustment Type	Used to indicate the adjustment type which is used for distribution if the <b>Transfer Adjustment</b> option is selected from the <b>Distribution Object Type</b> list.	No
FT Distribution Rule	Used to indicate the financial transaction distribution rule to be used for distributing the credit or debit in an account.  <b>Note:</b> The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Financial Transaction Offset Distribution Type FK Search</b> window appears.	No
Offset Indicator	Used to indicate whether the financial transaction distribution type is applicable when an account in a hierarchy is using an excess credit from the account credit source to offset its own debt or not.	No
Write Off Threshold Amount	Used to specify the minimum credit amount for write off.	Yes (Conditional)  <b>Note:</b> This field is required when you do not check the <b>Offset Indicator</b> check box.
Write Off Adjustment Type	Used to indicate the adjustment type used for write off.  <b>Note:</b> The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Adjustment Type Search</b> window appears.	Yes (Conditional)  <b>Note:</b> This field is required when you do not check the <b>Offset Indicator</b> check box.

Field Name	Field Description	Mandatory (Yes or No)
Expiration Adjustment Type	Used to indicate the adjustment type used for expiration.  <b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Adjustment Type Search</b> window appears.	Yes (Conditional)  <b>Note:</b> This field is required when you do not check the <b>Offset Indicator</b> check box.
Refund Adjustment Type	Used to indicate the adjustment type used for refund.  <b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Adjustment Type Search</b> window appears.	Yes (Conditional)  <b>Note:</b> This field is required when you do not check the <b>Offset Indicator</b> check box.
Related Transaction BO	Used to indicate the object using which financial transaction object is created.  <b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Financial Transaction Business Object Search</b> window appears.	Yes

5. Modify the details of the financial transaction distribution type.
6. Define, edit, or remove characteristics from the financial transaction distribution type, if required.
7. Click **Save**.

The changes made to the financial transaction distribution type are saved.

## Copying a Financial Transaction Distribution Type

Instead of creating a financial transaction distribution type from scratch, you can create a new financial transaction distribution type using an existing financial transaction distribution type. This is possible through copying a financial transaction distribution type. On copying a financial transaction distribution type, the details including the characteristics are copied to the new financial transaction distribution type. You can then edit the details, if required.

### Prerequisites

To copy a financial transaction distribution type, you should have:

- Financial transaction distribution type (whose copy you want to create) defined in the application
- Financial transaction distribution type business objects defined in the application

### Procedure

To copy a financial transaction distribution type:

- Click the **Admin** link in the **Application** toolbar.  
A list appears.
- From the **Admin** menu, select **F** and then click **Financial Transaction Distribution Type**.  
A sub-menu appears.
- Click the **Search** option from the **Financial Transaction Distribution Type** sub-menu.  
The **Financial Transaction Distribution Type** screen appears.
- In the **Financial Transaction Distribution Type List** zone, click the **Duplicate** () icon in the **Duplicate** column corresponding to the financial transaction distribution type whose copy you want to create.

The **Financial Transaction Distribution Type** screen appears. It contains the following sections:

- Main** — Used to specify basic details about the financial transaction distribution type.
- Characteristics** — Used to define characteristics for the financial transaction distribution type.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Financial Transaction Distribution Type	Used to specify the financial transaction distribution type.	Yes
Description	Used to specify the description of the financial transaction distribution type.	Yes
FT Object Type	Used to indicate the business object that will be used to create the financial transaction distribution type. The valid values are: <ul style="list-style-type: none"> <li>• Adjustment</li> <li>• Bill Segment</li> </ul>	Yes
FT Adjustment Type	Used to indicate the adjustment type used in the financial transaction adjustment. <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"> <p><b>Note:</b> By default, this field is disabled. This field gets enabled when you select <b>Adjustment</b> option from the <b>FT Object Type</b> list.</p> </div>	Yes (Conditional) <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"> <p><b>Note:</b> This field is required when you are selecting the <b>Adjustment</b> option for the <b>FT Object Type</b> list.</p> </div>
Distribution Object Type	Used to indicate the financial transaction object type used in distribution.	Yes
Distribution Adjustment Type	Used to indicate the adjustment type which is used for distribution if the <b>Transfer Adjustment</b> option is selected from the <b>Distribution Object Type</b> list.	No
FT Distribution Rule	Used to indicate the financial transaction distribution rule to be used for distributing the credit or debit in an account. <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"> <p><b>Note:</b> The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Financial Transaction Offset Distribution Type FK Search</b> window appears.</p> </div>	No
Offset Indicator	Used to indicate whether the financial transaction distribution type is applicable when an account in a hierarchy is using an excess credit from the account credit source to offset its own debt or not.	No

Field Name	Field Description	Mandatory (Yes or No)
Write Off Threshold Amount	Used to specify the minimum credit amount for write off.	Yes (Conditional) <b>Note:</b> This field is required when you do not check the <b>Offset Indicator</b> check box.
Write Off Adjustment Type	Used to indicate the adjustment type used for write off. <b>Note:</b> The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Adjustment Type Search</b> window appears.	Yes (Conditional) <b>Note:</b> This field is required when you do not check the <b>Offset Indicator</b> check box.
Expiration Adjustment Type	Used to indicate the adjustment type used for expiration. <b>Note:</b> The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Adjustment Type Search</b> window appears.	Yes (Conditional) <b>Note:</b> This field is required when you do not check the <b>Offset Indicator</b> check box.
Refund Adjustment Type	Used to indicate the adjustment type used for refund. <b>Note:</b> The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Adjustment Type Search</b> window appears.	Yes (Conditional) <b>Note:</b> This field is required when you do not check the <b>Offset Indicator</b> check box.
Related Transaction BO	Used to indicate the object using which financial transaction object is created. <b>Note:</b> The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Financial Transaction Business Object Search</b> window appears.	Yes

**Tip:** Alternatively, you can click the **Duplicate** button in the **Financial Transaction Distribution Type** zone to create a copy of the financial transaction distribution type

5. Enter the required details.
6. Define, edit, or remove characteristics from the financial transaction distribution type, if required.
7. Click **Save**.

The new financial transaction distribution type is defined.

## Financial Transaction Distribution Rule

Once you create a financial transaction distribution rule, the **Financial Transaction Distribution Rule** screen allows you to:

- Edit the details of a financial transaction distribution rule
- Copy a financial transaction distribution rule
- Delete a financial transaction distribution rule
- View the details of a financial transaction distribution rule
- Add the financial transaction distribution rule version

- Edit the details of a financial transaction distribution rule version
- Copy a financial transaction distribution rule version
- Include or exclude objects from a financial transaction distribution rule version
- Associate or dissociate algorithms from a financial transaction distribution rule version
- Delete a financial transaction distribution rule version
- View the details of a financial transaction distribution rule version

This screen consists of following zones:

- [Financial Transaction Distribution Rule List](#) on page 1991
- [Financial Transaction Distribution Rule](#) on page 1992
- [Financial Transaction Distribution Rule Version List](#) on page 1993
- [Financial Transaction Distribution Rule Version](#) on page 1994

## Financial Transaction Distribution Rule List

The **Financial Transaction Distribution Rule List** zone allows you to view the list of financial transaction distribution rules that are already defined in the system.

This zone contains the following columns:

Column Name	Column Description
FT Distribution Rule	Displays the financial transaction distribution rule.
Description	Displays the description of the financial transaction distribution rule.
Distribution Method	Indicates the principle for distributing credit for accounts other than the credit or debit source account. The valid values are: <ul style="list-style-type: none"> <li>• Fee Based</li> <li>• Priority Based</li> <li>• Weighted Average</li> </ul>
Distribution Hierarchy	Indicates the hierarchy of accounts in which the distribution needs to be made.
Edit	On clicking the <b>Edit</b> (  ) icon, the <b>Financial Transaction Distribution Rule</b> screen appears where you can edit the details of the financial transaction distribution rule.
Duplicate	On clicking the <b>Duplicate</b> (  ) icon, the <b>Financial Transaction Distribution Rule</b> screen appears where you can define a financial transaction distribution rule using an existing financial transaction distribution rule.
Delete	On clicking the <b>Delete</b> (  ) icon, you can delete the financial transaction distribution rule.

On clicking the **Broadcast** () icon corresponding to the financial transaction distribution rule, the **Financial Transaction Distribution Rule** and **Financial Transaction Distribution Rule Version List** zones appear with the details of the respective financial transaction distribution rule and financial transaction distribution rule version.

You can filter the list using the **FT Distribution Rule**, **Description**, **Effective Date**, and **Distribution Method** fields available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (  ) icon in the upper right corner of this zone.

## Defining a Financial Transaction Distribution Rule

### Prerequisites

To define a financial transaction distribution rule, you should have:

- Distribution method and hierarchy defined in the application.

### Procedure

To define a financial transaction distribution rule:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **Financial Transaction Distribution Rule**.  
A sub-menu appears.
3. Click the **Add** option from the **Financial Transaction Distribution Rule** sub-menu.

The **Financial Transaction Distribution Rule** screen appears. It contains the following section:

- **Main** – Used to specify basic details about the financial transaction distribution rule.

**Main** – This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
FT Distribution Rule	Used to specify the financial transaction distribution rule.	Yes
Description	Used to specify the description of the financial transaction distribution rule.	Yes
Detailed Description	Used to specify the additional information about the financial transaction distribution rule.	No
Distribution Method	Used to indicate the principle for distributing credit for accounts other than the credit or debit source account. The valid values are: <ul style="list-style-type: none"> <li>• Fee Based</li> <li>• Priority Based</li> <li>• Weighted Average</li> </ul>	Yes
Distribution Hierarchy	Used to indicate the hierarchy of accounts in which the distribution needs to be made.	No

**Tip:** Alternatively, you can access the **Financial Transaction Distribution Rule** screen by clicking the **Add** button in the **Page Title** area of the **Financial Transaction Distribution Rule** screen.

4. Enter the required details.
5. Click **Save**.

The financial transaction distribution rule is defined.

## **Editing a Financial Transaction Distribution Rule**

**Procedure**

To edit a financial transaction distribution rule:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **Financial Transaction Distribution Rule**.  
A sub-menu appears.
3. Click the **Search** option from the **Financial Transaction Distribution Rule** sub-menu.  
The **Financial Transaction Distribution Rule** screen appears.
4. In the **Financial Transaction Distribution Rule List** zone, click the **Edit**  icon in the **Edit** column corresponding to the financial transaction distribution rule whose details you want to edit.

The **Financial Transaction Distribution Rule** screen appears. It contains the following section:

- **Main** – Used to specify basic details about the financial transaction distribution rule.

**Main** – This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
FT Distribution Rule	Used to specify the financial transaction distribution rule.	Yes
Description	Used to specify the description of the financial transaction distribution rule.	Yes
Detailed Description	Used to specify the additional information about the financial transaction distribution rule.	No
Distribution Method	Used to indicate the principle for distributing credit for accounts other than the credit or debit source account. The valid values are: <ul style="list-style-type: none"> <li>• Fee Based</li> <li>• Priority Based</li> <li>• Weighted Average</li> </ul>	Yes
Distribution Hierarchy	Used to indicate the hierarchy of accounts in which the distribution needs to be made.	No

**Tip:** Alternatively, you can click the **Edit** button in the **Financial Transaction Distribution Rule** zone to edit the details of the financial transaction distribution rule.

5. Modify the details of the financial transaction distribution rule.
6. Click **Save**.  
The changes made to the financial transaction distribution rule are saved.

## Deleting a Financial Transaction Distribution Rule

### Procedure

To delete a financial transaction distribution rule:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **Financial Transaction Distribution Rule**.  
A sub-menu appears.
3. Click the **Search** option from the **Financial Transaction Distribution Rule** sub-menu.  
The **Financial Transaction Distribution Rule** screen appears.
4. In the **Financial Transaction Distribution Rule List** zone, click the **Delete** (🗑️) icon in the **Delete** column corresponding to the financial transaction distribution rule that you want to delete.  
A message appears confirming whether you want to delete the financial transaction distribution rule.

**Tip:** Alternatively, you can click the **Delete** button in the **Financial Transaction Distribution Rule** zone to delete the financial transaction distribution rule.

5. Click **OK**.  
The financial transaction distribution rule is deleted.

## Copying a Financial Transaction Distribution Rule

Instead of creating a financial transaction distribution rule from scratch, you can create a new financial transaction distribution rule using an existing financial transaction distribution rule. This is possible through copying a financial transaction distribution rule. On copying a financial transaction distribution rule, the details are copied to the new financial transaction distribution rule. You can then edit the details, if required.

### Prerequisites

To copy a financial transaction distribution rule, you should have:

- Financial transaction distribution rule (whose copy you want to create) defined in the application
- Financial transaction distribution rule business objects defined in the application

### Procedure

To copy a financial transaction distribution rule:

1. Click the **Admin** link in the **Application** toolbar.

A list appears.

2. From the **Admin** menu, select **F** and then click **Financial Transaction Distribution Rule**.

A sub-menu appears.

3. Click the **Search** option from the **Financial Transaction Distribution Rule** sub-menu.

The **Financial Transaction Distribution Rule** screen appears.

4. In the **Financial Transaction Distribution Rule List** zone, click the **Duplicate** () icon in the **Duplicate** column corresponding to the financial transaction distribution rule whose copy you want to create.

The **Financial Transaction Distribution Rule** screen appears. It contains the following section:

- **Main** – Used to specify basic details about the financial transaction distribution rule.

**Main** – This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
FT Distribution Rule	Used to specify the financial transaction distribution rule.	Yes
Description	Used to specify the description of the financial transaction distribution rule.	Yes
Detailed Description	Used to specify the additional information about the financial transaction distribution rule.	No
Distribution Method	Used to indicate the principle for distributing credit for accounts other than the credit or debit source account. The valid values are: <ul style="list-style-type: none"> <li>• Fee Based</li> <li>• Priority Based</li> <li>• Weighted Average</li> </ul>	Yes
Distribution Hierarchy	Used to indicate the hierarchy of accounts in which the distribution needs to be made.	No

**Tip:** Alternatively, you can click the **Duplicate** button in the **Financial Transaction Distribution Rule** zone to create a copy of the financial transaction distribution rule.

5. Enter the required details.
6. Click **Save**.

The new financial transaction distribution rule is defined.

## Viewing the Financial Transaction Distribution Rule Details

### Procedure

To view the details of a financial transaction distribution rule:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **Financial Transaction Distribution Rule**.  
A sub-menu appears.
3. Click the **Search** option from the **Financial Transaction Distribution Rule** sub-menu.  
The **Financial Transaction Distribution Rule** screen appears.
4. In the **Financial Transaction Distribution Rule List** zone, click the **Broadcast**  icon corresponding to the financial transaction distribution rule whose details you want to view.  
The **Financial Transaction Distribution Rule** and **Financial Transaction Distribution Rule Version List** zones appear.
5. View the details of the financial transaction distribution rule in the **Financial Transaction Distribution Rule** zone.

## Defining a Financial Transaction Distribution Rule Version

### Prerequisites

To define a financial transaction distribution rule version, you should have:

- Financial transaction distribution rule defined in the application.
- Object types and algorithms defined in the application.

### Procedure

To define a financial transaction distribution rule version:

- Click the **Admin** link in the **Application** toolbar.

A list appears.

- From the **Admin** menu, select **F** and then click **Financial Transaction Distribution Rule**.

A sub-menu appears.

- Click the **Search** option from the **Financial Transaction Distribution Rule** sub-menu.

The **Financial Transaction Distribution Rule** screen appears.

- In the **Financial Transaction Distribution Rule List** zone, click the **Broadcast**  icon corresponding to the financial transaction distribution rule whose details you want to edit.

The **Financial Transaction Distribution Rule** and **Financial Transaction Distribution Rule Version List** zone appears.

- Click the **Add** link in the upper right corner of the **Financial Transaction Distribution Rule Version List** zone.

The **Financial Transaction Distribution Rule Version** screen appears. It contains the following sections:

- Main** – Used to specify basic details about the financial transaction distribution rule version.
- Included Objects** – Used to include the objects in financial transaction distribution rule version.
- Excluded Objects** – Used to exclude the objects in financial transaction distribution rule version.
- Algorithms** – Used to define the algorithms that are added for financial transaction distribution rule version.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
FT Distribution Rule	Displays the financial transaction distribution rule.	Not applicable
Effective Date	Used to specify the date from when the financial transaction distribution rule version is effective for the respective financial transaction distribution rule.	Yes
Business Object	Displays the business object using which financial transaction distribution rule version is created.	Not applicable
Version Description	Used to specify the description of the financial transaction distribution rule version.	Yes
Detailed Description	Used to specify the additional information about the financial transaction distribution rule version.	No

The **Included Objects** section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Sequence	Used to specify the sequence in which the objects should be included in the financial transaction distribution rule version.	No
Priority	Used to specify the sequence of objects for the credit or debit distribution within an account.	No
Object Type	Used to indicate the type of object.	No
Value	Used to specify the value of the object type.  <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> It has a link. On clicking the link, respective object type screen appears with the details of the respective object type.</p> <p>The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Adjustment Type Search</b> window appears.</p> </div>	No
Bill Status	Used to indicate the status of the bill.	No

**Note:** If you include object, then all the fields are mandatory.

The **Excluded Objects** section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Sequence	Used to specify the sequence in which the objects should be excluded from the financial transaction distribution rule version.	No
Object Type	Used to indicate the type of object.	No
Value	<p>Used to specify the value of the object type.</p> <p><b>Note:</b> It has a link. On clicking the link, respective object type screen appears with the details of the respective object type.</p> <p>The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Adjustment Type Search</b> window appears.</p>	No

**Note:** If you exclude object, then all the fields are mandatory.

The **Algorithms** section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
System Event	Used to indicates the system event on which the algorithm must be executed.	No
Sequence	Used to specify the order in which the algorithms for each system event must be executed.	No
Algorithm	<p>Used to specify the algorithm code.</p> <p><b>Note:</b> It has a link. On clicking the link, <b>Algorithm</b> screen appears with the details of the respective algorithm.</p> <p>The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Algorithm Search</b> window appears.</p>	No

**Note:** While defining a financial transaction distribution rule version, you can either include or exclude objects from it.

6. Enter the required details.
7. Include or exclude the object types, if required.
8. Add the algorithms, if required.
9. Click **Save**.

The financial transaction distribution rule version is defined.

**Including Objects in a Financial Transaction Distribution Rule Version****Procedure**

To include objects in a financial transaction distribution rule version:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **Financial Transaction Distribution Rule**.  
A sub-menu appears.
3. Click the **Search** option from the **Financial Transaction Distribution Rule** sub-menu.  
The **Financial Transaction Distribution Rule** screen appears.
4. In the **Financial Transaction Distribution Rule List** zone, click the **Broadcast**  icon corresponding to the financial transaction distribution rule whose details you want to edit.  
The **Financial Transaction Distribution Rule** and **Financial Transaction Distribution Rule Version List** zones appear.
5. In the **Financial Transaction Distribution Rule Version List** zone, click the **Edit**  icon in the **Edit** column corresponding to the financial transaction distribution rule version whose details you want to edit.  
The **Financial Transaction Distribution Rule Version** screen appears.
6. Ensure that the **Included Objects** section is expanded when you are editing the financial transaction distribution rule version.
7. Enter the required details in the **Included Objects** section.

**Note:** If you select a predefined object type, the **Search**  icon appears corresponding to the **Value** field. On clicking the **Search** icon, you can search for a predefined object value.

8. If you want to include more than one object in the financial transaction distribution rule version, click the **Add**  icon and then repeat step 7.

**Note:** However, if you want to remove an included object from the financial transaction distribution rule version, click the **Delete**  icon corresponding to the object.

## Excluding Objects in a Financial Transaction Distribution Rule Version

### Procedure

To exclude objects from a financial transaction distribution rule version:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **Financial Transaction Distribution Rule**.  
A sub-menu appears.
3. Click the **Search** option from the **Financial Transaction Distribution Rule** sub-menu.  
The **Financial Transaction Distribution Rule** screen appears.
4. In the **Financial Transaction Distribution Rule List** zone, click the **Broadcast**  icon corresponding to the financial transaction distribution rule whose details you want to edit.  
The **Financial Transaction Distribution Rule** and **Financial Transaction Distribution Rule Version List** zones appear.
5. In the **Financial Transaction Distribution Rule Version List** zone, click the **Edit**  icon in the **Edit** column corresponding to the financial transaction distribution rule version whose details you want to edit.  
The **Financial Transaction Distribution Rule Version** screen appears.
6. Ensure that the **Excluded Objects** section is expanded when you are editing the financial transaction distribution rule version.
7. Enter the required details in the **Excluded Objects** section.

**Note:** If you select a predefined object type, the **Search**  icon appears corresponding to the **Value** field. On clicking the **Search** icon, you can search for a predefined object value.

8. If you want to exclude more than one object in the financial transaction distribution rule version, click the **Add**  icon and then repeat step 7.

**Note:** However, if you want to remove an excluded object from the financial transaction distribution rule version, click the **Delete**  icon corresponding to the object.

## Associating Algorithms with a Financial Transaction Distribution Rule Version

### Prerequisites

To associate algorithms with a financial transaction distribution rule version, you should have:

- Algorithms defined in the application.

### Procedure

To associate algorithms with a financial transaction distribution rule version:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **Financial Transaction Distribution Rule**.  
A sub-menu appears.
3. Click the **Search** option from the **Financial Transaction Distribution Rule** sub-menu.  
The **Financial Transaction Distribution Rule** screen appears.
4. In the **Financial Transaction Distribution Rule List** zone, click the **Broadcast**  icon corresponding to the financial transaction distribution rule whose details you want to edit.  
The **Financial Transaction Distribution Rule** and **Financial Transaction Distribution Rule Version List** zone appears.
5. In the **Financial Transaction Distribution Rule Version List** zone, click the **Edit**  icon in the **Edit** column corresponding to the financial transaction distribution rule version whose details you want to edit.  
The **Financial Transaction Distribution Rule Version** screen appears.
6. Ensure that the **Algorithms** section is expanded when you are editing the financial transaction distribution rule version.
7. Enter the required details in the **Algorithms** section.

**Note:** On clicking the **Search**  icon corresponding to the **Algorithm** column, you can search for a predefined algorithm.

8. If you want to associate more than one algorithm to the financial transaction distribution rule version, click the **Add**  icon and then repeat step 5.

**Note:** However, if you want to disassociate an algorithm from the financial transaction distribution rule version, click the **Delete**  icon corresponding to the algorithm.

## Editing a Financial Transaction Distribution Rule Version

**Procedure**

To edit a financial transaction distribution rule version:

1. Click the **Admin** link in the **Application** toolbar.

A list appears.

2. From the **Admin** menu, select **F** and then click **Financial Transaction Distribution Rule**.

A sub-menu appears.

3. Click the **Search** option from the **Financial Transaction Distribution Rule** sub-menu.

The **Financial Transaction Distribution Rule** screen appears.

4. In the **Financial Transaction Distribution Rule List** zone, click the **Broadcast**  icon corresponding to the financial transaction distribution rule whose details you want to edit.

The **Financial Transaction Distribution Rule** and **Financial Transaction Distribution Rule Version List** zone appears.

5. In the **Financial Transaction Distribution Rule Version List** zone, click the **Edit**  icon in the **Edit** column corresponding to the financial transaction distribution rule version whose details you want to edit.

The **Financial Transaction Distribution Rule Version** screen appears. It contains the following sections:

- **Main** – Used to specify basic details about the financial transaction distribution rule version.
- **Included Objects** – Used to include the objects in financial transaction distribution rule version.
- **Excluded Objects** – Used to exclude the objects in financial transaction distribution rule version.
- **Algorithms** – Used to define the algorithms in the financial transaction distribution rule version.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
FT Distribution Rule	Displays the financial transaction distribution rule.	Not applicable
Effective Date	Used to specify the date from when the financial transaction distribution rule version is effective for the respective financial transaction distribution rule.	Yes
Business Object	Displays the business object using which financial transaction distribution rule version is created.	Not applicable
Version Description	Used to specify the description of the financial transaction distribution rule version.	Yes
Detailed Description	Used to specify the additional information about the financial transaction distribution rule version.	No

The **Included Objects** section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Sequence	Used to specify the sequence in which the objects should be included in the financial transaction distribution rule version.	No
Priority	Used to specify the sequence of objects for the credit or debit distribution within an account.	No
Object Type	Used to indicate the type of object.	No
Value	Used to specify the value of the object type.  <b>Note:</b> It has a link. On clicking the link, respective object type screen appears with the details of the respective object type.	No
Bill Status	Used to indicate the status of the bill.	No

**Note:** If you include object, then all the fields are mandatory.

The **Excluded Objects** section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Sequence	Used to specify the sequence in which the objects should be excluded from the financial transaction distribution rule version.	No
Object Type	Used to indicate the type of object.	No
Value	Used to specify the value of the object type.  <b>Note:</b> It has a link. On clicking the link, respective object type screen appears with the details of the respective object type.	No

**Note:** If you exclude object, then all the fields are mandatory.

The **Algorithms** section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
System Event	Used to indicates the system event on which the algorithm must be executed.	No
Sequence	Used to specify the order in which the algorithms for each system event must be executed.	No

Column Name	Column Description	Mandatory (Yes or No)
Algorithm	Used to specify the algorithm code.  <b>Note:</b> It has a link. On clicking the link, <b>Algorithm</b> screen appears with the details of the respective algorithm.	No

**Note:** While defining a financial transaction distribution rule version, you can either include or exclude objects from it.

6. Modify the details of the financial transaction distribution rule version.
7. Modify the included or excluded objects from the financial transaction distribution rule version, if required.
8. Edit the algorithms, if required
9. Click **Save**.

The changes made to the financial transaction distribution rule version are saved.

## Copying a Financial Transaction Distribution Rule Version

Instead of creating a financial transaction distribution rule version from scratch, you can create a new financial transaction distribution rule version using an existing financial transaction distribution rule version. This is possible through copying a financial transaction distribution rule version. On copying a financial transaction distribution rule version, the details are copied to the new financial transaction distribution rule. You can then edit the details, if required.

### Prerequisites

To copy a financial transaction distribution rule, you should have:

- Financial transaction distribution rule version (whose copy you want to create) defined in the application
- Financial transaction distribution rule version business objects defined in the application

### Procedure

To copy a financial transaction distribution rule:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **Financial Transaction Distribution Rule**.  
A sub-menu appears.
3. Click the **Search** option from the **Financial Transaction Distribution Rule** sub-menu.  
The **Financial Transaction Distribution Rule** screen appears.
4. In the **Financial Transaction Distribution Rule List** zone, click the **Broadcast**  icon corresponding to the financial transaction distribution rule whose details you want to edit.  
The **Financial Transaction Distribution Rule** and **Financial Transaction Distribution Rule Version List** zone appears.
5. In the **Financial Transaction Distribution Rule Version List** zone, click the **Duplicate**  icon in the **Duplicate** column corresponding to the financial transaction distribution rule version whose copy you want to create.

The **Financial Transaction Distribution Rule Version** screen appears. It contains the following sections:

- **Main** – Used to specify basic details about the financial transaction distribution rule version.
- **Included Objects** – Used to include the objects in financial transaction distribution rule version.
- **Excluded Objects** – Used to exclude the objects in financial transaction distribution rule version.
- **Algorithms** – Used to define the algorithms in the financial transaction distribution rule version.

**Main** – This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
FT Distribution Rule	Displays the financial transaction distribution rule.	Not applicable
Effective Date	Used to specify the date from when the financial transaction distribution rule version is effective for the respective financial transaction distribution rule.	Yes
Business Object	Displays the business object using which financial transaction distribution rule version is created.	Not applicable
Version Description	Used to specify the description of the financial transaction distribution rule version.	Yes
Detailed Description	Used to specify the additional information about the financial transaction distribution rule version.	No

**Note:** If you include object, then all the fields are mandatory.

**Included Objects** – This section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Sequence	Used to specify the sequence in which the objects should be included in the financial transaction distribution rule version.	No
Priority	Used to specify the sequence of objects for the credit or debit distribution within an account.	No
Object Type	Used to indicate the type of object.	No
Value	Used to specify the value of the object type.  <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> It has a link. On clicking the link, respective object type screen appears with the details of the respective object type.  The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Adjustment Type Search</b> window appears.</p> </div>	No
Bill Status	Used to indicate the status of the bill.	No

**Excluded Objects** – This section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Sequence	Used to specify the sequence in which the objects should be excluded from the financial transaction distribution rule version.	No
Object Type	Used to indicate the type of object.	No
Value	Used to specify the value of the object type.  <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> It has a link. On clicking the link, respective object type screen appears with the details of the respective object type.</p> <p>The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Adjustment Type Search</b> window appears.</p> </div>	No

**Note:** If you exclude object, then all the fields are mandatory.

**Algorithms** – This section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
System Event	Used to indicates the system event on which the algorithm must be executed.	No
Sequence	Used to specify the order in which the algorithms for each system event must be executed.	No
Algorithm	Used to specify the algorithm code.  <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> It has a link. On clicking the link, <b>Algorithm</b> screen appears with the details of the respective algorithm.</p> <p>The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Algorithm Search</b> window appears.</p> </div>	No

**Note:** While defining a financial transaction distribution rule version, you can either include or exclude objects from it.

6. Enter the required details.
7. Define, edit, or remove objects from the financial transaction distribution rule version , if required.
8. Associate or dissociate the algorithms from the financial transaction distribution rule version, if required

9. Click **Save**.

The new financial transaction distribution rule version is defined.

## Expiration Cycle Extendable Lookup

The **Expiration Cycle Extendable Lookup** screen allows you to search for an expiration cycle. An expiration cycle is an extendable lookup reference object which indicates the frequency at which the financial transaction distribution object created for the account should be expired (i.e. after two months or 45 days from the date of creation). You can associate an expiration cycle with one or more accounts. This screen contains the following zone:

- [Extendable Lookup Search](#) on page 2015

### Extendable Lookup Search

The **Extendable Lookup Search** zone allows you to search the details of expiration cycle business object. This zone contains the following two sections:

- **Search Criteria** – This section contains the following fields:

Field Name	Field Description
Business Object	Used to search the expiration cycle business object.
Description	Used to search the expiration cycle business object with a particular description.

- **Search Results** – On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Business Object	Displays the business objects.
Description	Displays description of the business object. <b>Note:</b> It has a link. On clicking the link, the <b>Extendable Lookup</b> screen appears where you can view the details of the respective business object.

**Note:** You must specify at least one search criterion while searching for the expiration cycle business object.

## Searching for an Expiration Cycle Extendable Lookup

### Prerequisites

To search for an expiration cycle extended lookup, you should have:

- Expiration cycle extended lookup defined in the application.

### Procedure

To search for an expiration cycle extended lookup:

1. Click the **Admin** link in the **Application** toolbar.

A list appears.

2. From the **Admin** menu, select **E** and then click **Extendable Lookup**.  
The **Extendable Lookup Query** screen appears.
3. Search for **C1-EXPCYCLE** business object.
4. In the **Search Results** section, click the **Description** link corresponding to the **C1-EXPCYCLE** business object.  
The **Extended Lookup** screen appears.
5. View the list of expiration cycle extended lookup values in the **Extendable Lookup Value List** zone.

**Note:**

You must specify at least one search criterion while searching for an expiration cycle extended lookup.

ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

## Extendable Lookup (Expiration Cycle)

---

Once you create an expiration cycle, the **Extendable Lookup** (Expiration Cycle) screen allows you to:

- Edit the details of an expiration cycle
- Copy an expiration cycle
- Delete an expiration cycle
- View the details of an expiration cycle

This screen contains the following zones:

- [Extendable Lookup Value List](#) on page 2016
- [Extendable Lookup Value](#) on page 2017

### Extendable Lookup Value List

The **Extendable Lookup Value List** zone allows you to view the list of expiration cycle extended lookup values that are already defined in the system.

This zone contains the following columns:

Column Name	Column Description
Value	Displays the expiration cycle extended lookup value.
Description	Displays the description of the expiration cycle extended lookup value.
Detailed Description	Displays the additional information about the expiration cycle extended lookup value.

Column Name	Column Description
Owner	Displays the owner of the expiration cycle extended lookup value.
Edit	On clicking the <b>Edit</b> (  ) icon, the <b>Expiration Cycle</b> screen appears where you can edit the details of the expiration cycle extended lookup value.
Duplicate	On clicking the <b>Duplicate</b> (  ) icon, the <b>Expiration Cycle</b> screen appears where you can define a expiration cycle extended lookup value using an existing expiration cycle extended lookup value.
Delete	On clicking the <b>Delete</b> (  ) icon, you can delete the expiration cycle extended lookup value.

On clicking the **Broadcast** () icon corresponding to the expiration cycle extended lookup value, the **Extendable Lookup Value** zone appear with the details of the respective expiration cycle extended lookup value.

You can filter the list using the **Value** or **Description** fields available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** () icon in the upper right corner of this zone.

## Extendable Lookup Value

The **Extendable Lookup Value** zone allows you to view the details of the expiration cycle extended lookup value. This zone contains the following section:

- **Main** – This section allows you to view the details of the expiration cycle extended lookup value. It contains the following fields:

Field Name	Field Description
Expiration Cycle	Displays the expiration cycle extended lookup value.
Description	Displays the description of the expiration cycle extended lookup value.
Override Description	Displays the overridden description of the expiration cycle extended lookup value.
Detailed Description	Displays the additional information about the expiration cycle extended lookup value.
Status	Displays the status of expiration cycle extended lookup value.
Duration Unit	Displays the duration unit of the expiration cycle extended lookup value.

Field Name	Field Description
Duration Value	Displays the period till when the expiration cycle extended lookup value is active.
Consider Holiday	Displays whether to consider holidays or not while calculating the duration value.

- **Record Actions** – This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the expiration cycle extended lookup value.
Delete	Used to delete the expiration cycle extended lookup value.
Duplicate	Used to create a new expiration cycle extended lookup value using an existing expiration cycle extended lookup value.

- **Record Information** – This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the expiration cycle extended lookup value is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears with the details of the respective business object.
Owner	Indicates the person or entity that created the expiration cycle business object.

By default, the **Extendable Lookup Value** zone does not appear in the **Extendable Lookup** screen. It appears only when you click the **Broadcast**  icon corresponding to the extendable lookup value of the **Extendable Lookup Value List** zone.

## Defining an Expiration Cycle

### Procedure

To define an expiration cycle:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **E** and then click **Extended Lookup**.  
The **Extended Lookup Query** screen appears.
3. Search for **C1-EXPCYCLE** business object.

- In the **Search Results** section, click the **Description** link corresponding to the **C1-EXPCYCLE** business object.

The **Extended Lookup** screen appears.

- Click the **Add** button in the **Page Title** area of the **Extended Lookup** screen.

The **Expiration Cycle** screen appears. It contains the following section:

- Main** – Used to specify basic details about the expiration cycle.

**Main** – This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Expiration Cycle	Used to specify the value of expiration cycle.	Yes
Description	Used to specify the description of the expiration cycle.	Yes
Override Description	Used to specify the override description of the expiration cycle.	No
Detailed Description	Used to specify the additional information about the expiration cycle.	No
Status	Used to indicate the status of the expiration cycle.	No
Duration Unit	Used to indicate the duration unit of the expiration cycle.	Yes
Duration Value	Used to indicate the period till when the expiration cycle is active.	Yes
Consider Holiday	Used to indicate whether to consider the holiday while calculating the duration value.	No

- Enter the required details.
- Click **Save**.

The expiration cycle is defined.

## Copying an Expiration Cycle

Instead of creating an expiration cycle from scratch, you can create a new expiration cycle using an existing expiration cycle. This is possible through copying an expiration cycle. On copying an expiration cycle, the details are copied to the new expiration cycle. You can then edit the details, if required.

### Prerequisites

To copy an expiration cycle, you should have:

- Expiration cycle(whose copy you want to create) defined in the application
- Expiration cycle business objects defined in the application

### Procedure

To copy an expiration cycle:

- Click the **Admin** link in the **Application** toolbar.

A list appears.

- From the **Admin** menu, select **E** and then click **Extended Lookup**.

The **Extended Lookup Query** screen appears.

- Search for **C1-EXPCYCLE** business object.

- In the **Search Results** section, click the **Description** link corresponding to the **C1-EXPCYCLE** business object.

The **Extended Lookup** screen appears.

- In the **Extended Lookup Value List** zone, click the **Duplicate** () icon in the **Duplicate** column corresponding to the expiration cycle whose copy you want to create.

The **Expiration Cycle** screen appears. It contains the following section:

- Main** – Used to specify basic details about the expiration cycle.

**Main** – This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Expiration Cycle	Used to specify the value of expiration cycle.	Yes
Description	Used to specify the description of the expiration cycle.	Yes
Override Description	Used to specify the override description of the expiration cycle.	No
Detailed Description	Used to specify the additional information about the expiration cycle.	No
Status	Used to indicate the status of the expiration cycle.	No
Duration Unit	Used to indicate the duration unit of the expiration cycle.	Yes
Duration Value	Used to indicate the period till when the expiration cycle is active.	Yes
Consider Holiday	Used to indicate whether to consider the holiday while calculating the duration value.	No

**Tip:** Alternatively, you can click the **Duplicate** button in the **Extended Lookup Value** zone to create a copy of the expiration cycle.

6. Enter the required details.
7. Click **Save**.

The new expiration cycle is defined.

## Copying a Distribution Hierarchy

Instead of creating a distribution hierarchy from scratch, you can create a new distribution hierarchy using an existing distribution hierarchy. This is possible through copying a distribution hierarchy. On copying a distribution hierarchy, the details are copied to the new distribution hierarchy. You can then edit the details, if required.

### Prerequisites

To copy a distribution hierarchy, you should have:

- Distribution hierarchy (whose copy you want to create) defined in the application
- Distribution hierarchy business object defined in the application

### Procedure

To copy a distribution hierarchy:

- Click the **Admin** link in the **Application** toolbar.

A list appears.

- From the **Admin** menu, select **E** and then click **Extended Lookup**.

The **Extended Lookup Query** screen appears.

- Search for **C1-HIERARCHY** business object.

- In the **Search Results** section, click the **Description** link corresponding to the **C1-HIERARCHY** business object.

The **Extended Lookup** screen appears.

- In the **Extended Lookup Value List** zone, click the **Duplicate** () icon in the **Duplicate** column corresponding to the distribution hierarchy whose copy you want to create.

The **Hierarchy** screen appears. It contains the following sections:

- Main** – Used to specify basic details about the distribution hierarchy.
- Hierarchy List** – Used to specify the hierarchy list of distribution.

**Main** – This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Hierarchy Code	Displays the unique hierarchy code.	Yes
Parent Person Relationship Type	Displays the person relationship type used for going in parent hierarchy.	No
Child Person Relationship Type	Displays the person relationship type used for going in child hierarchy.	No
Description	Displays the description of the distribution hierarchy extended lookup value.	Yes
Override Description	Displays the overridden description of the distribution hierarchy extended lookup value.	No
Detailed Description	Displays the additional information about the distribution hierarchy extended lookup value.	No
Status	Displays the status of the distribution hierarchy extended lookup value.	No

**Hierarchy List** – This section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Sequence	Used to indicate the order of priority according to which the distribution will be made in hierarchy.	Yes
Value	Used to specify the value of hierarchy.	Yes

**Note:**

You must specify at least one hierarchy list while defining a distribution hierarchy.

If you want to specify more than one hierarchy within the hierarchy list, click the **Add** (+) icon in the **Hierarchy List** section and then specify the details. However, if you want to remove a hierarchy from the hierarchy list, click the **Delete** (🗑️) icon corresponding to the hierarchy.

**Tip:** Alternatively, you can click the **Duplicate** button in the **Extended Lookup Value** zone to create a copy of the distribution hierarchy.

6. Enter the required details.
7. Add to the hierarchy list, if required.
8. Click **Save**.

The new distribution hierarchy is defined.

## Defining a Financial Transaction Distribution Object

### Procedure

To define a financial transaction distribution object:

1. Click the **Admin** link in the **Application** toolbar.

A list appears.

2. From the **Admin** menu, select **E** and then click **Extended Lookup**.

The **Extended Lookup Query** screen appears.

3. Search for **C1-FTDISTOBJECT** business object.

4. In the **Search Results** section, click the **Description** link corresponding to the **C1-FTDISTOBJECT** business object.

The **Extended Lookup** screen appears.

5. Click the **Add** button in the **Page Title** area of the **Extended Lookup** screen.

The **Financial Transaction Distribution Object** screen appears. It contains the following sections:

- **Main** – Used to specify basic details about the distribution hierarchy.
- **Financial Transaction Distribution Type List** – Used to specify the financial transaction distribution types associated to a financial transaction distribution object.

**Main** – This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Financial Transaction Distribution Object Code	Used to specify the financial transaction distribution object code.	Yes
Description	Used to specify the description of the financial transaction distribution object extended lookup value.	Yes
Override Description	Used to specify the override description of the financial transaction distribution object extended lookup value.	No
Detailed Description	Used to specify the additional information about the financial transaction distribution object extended lookup value.	No
Status	Used to indicate the status of the financial transaction distribution object extended lookup value.	No

**Financial Transaction Distribution Type List** – This section contains the following column:

Column Name	Column Description	Mandatory (Yes or No)
Financial Transaction Distribution Type	Used to indicate the financial transaction distribution type to be associated to a financial transaction distribution object.	Yes

**Note:**

You must specify at least one financial transaction distribution type while defining a financial transaction distribution object.

If you want to specify more than one financial transaction distribution type within the financial transaction distribution type list, click the **Add** (+) icon in the **Financial Transaction Distribution Type List** section and then specify the details. However, if you want to remove a financial transaction distribution type from the financial transaction distribution type list, click the **Delete** (🗑️) icon corresponding to the financial transaction distribution type.

6. Enter the required details.
7. Click **Save**.

The financial transaction distribution object is defined.

**Editing a Financial Transaction Distribution Object****Procedure**

To edit a financial transaction distribution object:

1. Search for the **C1-FTDISTOBJECT** business object in the **Extended Lookup Query** screen.
2. In the **Search Results** section, click the **Description** link corresponding to the **C1-FTDISTOBJECT** business object.

The **Extended Lookup** screen appears.

3. In the **Extended Lookup Value List** zone, click the **Edit** (✎) icon in the **Edit** column corresponding to the extended lookup value whose details you want to edit.

The **Financial Transaction Distribution Object** screen appears. It contains the following sections:

- **Main** – Used to specify basic details about the financial transaction distribution object.
- **Financial Transaction Distribution Type List** – Used to specify the financial transaction distribution types associated to a financial transaction distribution object.

**Main** – This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Financial Transaction Distribution Object Code	Used to specify the financial transaction distribution object code.	Yes
Description	Used to specify the description of the financial transaction distribution object extended lookup value.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Override Description	Used to specify the override description of the financial transaction distribution object extended lookup value.	No
Detailed Description	Used to specify the additional information about the financial transaction distribution object extended lookup value.	No
Status	Used to indicate the status of the financial transaction distribution object extended lookup value.	No

**Financial Transaction Distribution Type List** – This section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Financial Transaction Distribution Type	Used to indicate the financial transaction distribution type to be associated to a financial transaction distribution object.	Yes

**Note:**

You must specify at least one financial transaction distribution type while defining a financial transaction distribution object.

If you want to specify more than one financial transaction distribution type within the financial transaction distribution type list, click the **Add** (+) icon in the **Financial Transaction Distribution Type List** section and then specify the details. However, if you want to remove a financial transaction distribution type from the financial transaction distribution type list, click the **Delete** (🗑️) icon corresponding to the financial transaction distribution type.

**Tip:** Alternatively, you can click the **Edit** button in the **Extended Lookup Value** zone to edit the details of the financial transaction distribution object.

4. Modify the details, if required.
5. Add financial transaction distribution type, if required.
6. Click **Save**.

The changes made to the financial transaction distribution object are saved.

## Copying a Financial Transaction Distribution Object

Instead of creating a financial transaction distribution object from scratch, you can create a new financial transaction distribution object using an existing financial transaction distribution object: This is possible through copying a financial transaction distribution object. On copying a distribution hierarchy, the details are copied to the new financial transaction distribution object. You can then edit the details, if required.

### Prerequisites

To copy a financial transaction distribution object, you should have:

- Financial transaction distribution object(whose copy you want to create) defined in the application
- Financial transaction distribution object business object defined in the application

### Procedure

To copy a financial transaction distribution object:

- Click the **Admin** link in the **Application** toolbar.

A list appears.

- From the **Admin** menu, select **E** and then click **Extended Lookup**.

The **Extended Lookup Query** screen appears.

- Search for **C1-FTDISTOBJECT** business object.

- In the **Search Results** section, click the **Description** link corresponding to the **C1-FTDISTOBJECT** business object.

The **Extended Lookup** screen appears.

- In the **Extended Lookup Value List** zone, click the **Duplicate** () icon in the **Duplicate** column corresponding to the financial transaction distribution object whose copy you want to create.

The **Financial Transaction Distribution Object** screen appears. It contains the following sections:

- Main** – Used to specify basic details about the financial transaction distribution object.

- **Financial Transaction Distribution Type List** – Used to specify the financial transaction distribution types associated to a financial transaction distribution object.

**Main** – This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Financial Transaction Distribution Object Code	Used to specify the financial transaction distribution object code.	Yes
Description	Used to specify the description of the financial transaction distribution object extended lookup value.	Yes
Override Description	Used to specify the override description of the financial transaction distribution object extended lookup value.	No
Detailed Description	Used to specify the additional information about the financial transaction distribution object extended lookup value.	No
Status	Used to indicate the status of the financial transaction distribution object extended lookup value.	No

**Financial Transaction Distribution Type List** – This section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Financial Transaction Distribution Type	Used to indicate the financial transaction distribution type to be associated to a financial transaction distribution object.	Yes

**Note:**

You must specify at least one financial transaction distribution type while defining a financial transaction distribution object.

If you want to specify more than one financial transaction distribution type within the financial transaction distribution type list, click the **Add** (+) icon in the **Financial Transaction Distribution Type List** section and then specify the details. However, if you want to remove a financial transaction distribution type from the financial transaction distribution type list, click the **Delete** (🗑️) icon corresponding to the financial transaction distribution type.

**Tip:** Alternatively, you can click the **Duplicate** button in the **Extended Lookup Value** zone to create a copy of the financial transaction distribution object.

6. Enter the required details.
7. Add financial transaction distribution type, if required.
8. Click **Save**.

The new financial transaction distribution object is defined.

How to search for a financial transaction distribution	<a href="#">Searching for a Financial Transaction Distribution Object</a> on page 2043
How to add a log entry for a financial transaction distribution	<a href="#">Adding a Log Entry for a Financial Transaction Distribution</a> on page 2048

**Adding a Log Entry for a Financial Transaction Distribution****Procedure**

To add a log entry for a financial transaction distribution:

1. Search for the financial transaction distribution object in the **Financial Transaction Distribution** screen.
2. In the **Search Results** section, click the link in the **Information** column corresponding to the financial transaction distribution whose log you want to edit.

The **Financial Transaction Distribution** screen appears. It consists of the following tabs:

- **Main** – Displays information about the financial transaction distribution. It contains the following zone:
  - **Financial Transaction Distribution** – Displays information about the financial transaction distribution object.

- **Log** – Lists the complete trail of actions performed on the financial transaction distribution object. This tab contains the following zone:
  - **Financial Transaction Distribution Log** – Displays the trail of actions performed on the particular financial transaction distribution object.

3. Click the **Log** tab.

The **Log** tab appears.

4. Click the **Add Log Entry** link in the upper right corner of the **Financial Transaction Distribution Log** zone.

The **Add Log Entry** window appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Financial Transaction Distribution	Displays information about the financial transaction distribution object.	Not applicable
Log Details	Used to specify additional comments on the financial transaction distribution object.	Yes

5. Enter the comments in the **Log Details** field.

6. Click **Save**.

The log entry is added in the **Financial Transaction Distribution Log** zone.

## Deferred Revenue Recognition

---

### Topics:

- [Prerequisites](#)
- [Deferred Revenue Recognition Status Transition](#)
- [Algorithms Used in Deferred Revenue Recognition](#)
- [Deferred Revenue Recognition Template \(Used for Searching\)](#)
- [Deferred Revenue Recognition Template \(Used for Viewing\)](#)
- [Deferred Revenue Recognition \(Used for Searching\)](#)
- [Deferred Revenue Recognition \(Used for Viewing\)](#)

Most often, insurance company bill policies in installments, but Accounts Receivable (AR) and revenue for the total premium are booked as new business in the beginning of the policy term. Regulations, restrictions, or company policies may require that revenue for the total premium must be initially booked to the general ledger as deferred revenue. As time passes, the deferred revenue is realized as earned revenue. For example, the total premium for six months auto-policy (July 1 to Dec 31) is \$1200. When this new business is booked, the revenue of \$1200 is initially booked as deferred revenue. However, on July 31, August 31, September 30, October 31, November 30, and December 31, \$200 must be transferred from deferred revenue GL to earned revenue GL. In order to manage this process, adjustments are created that transfer amount from deferred revenue GL to earned revenue GL.

A deferred revenue recognition schedule determines when these deferred revenue recognition adjustments must be created and posted. On the recognition date, the deferred revenue recognition adjustment is created to transfer a portion of deferred revenue to earned revenue. The corresponding financial transaction does not impact customer's account balance.

You need to create a deferred revenue recognition template for each distribution code and contract type combination for which you want to create a deferred revenue recognition (when the bill segment and adjustment financial transactions created against the respective contracts are frozen). It is the deferred revenue recognition template which helps the system to determine:

- Adjustment type using which the adjustment should be created when the deferred revenue is recognized
- Whether the recognition amount and date in the deferred revenue recognition schedule are editable until recognized
- Whether the deferred revenue recognition schedule must be generated automatically or manually
- Whether the deferred revenue must be recognized daily, weekly, or monthly
- Whether the deferred revenue amount must be prorated when the recognition schedule is set to Monthly
- Algorithm using which the recognition lines in the deferred revenue recognition schedule should be created
- Algorithm using which the adjustment must be generated when the deferred revenue is recognized

During the deferred revenue recognition process, a deferred revenue recognition creation goes through various statuses in its lifecycle. For more information

about the deferred revenue recognition statuses, see [Deferred Revenue Recognition Status Transition](#) on page 2053.

**Note:** The lifecycle of a deferred revenue recognition creation is driven by the respective business object using which the deferred revenue recognition is generated. The deferred revenue recognition feature explained in this document is articulated based on the lifecycle and logic defined in the business objects.

For more information on how to setup the deferred revenue recognition process, see [Prerequisites](#) on page 2053.

## Prerequisites

---

To setup the deferred revenue recognition feature, you need to do the following:

- Define the required deferred revenue recognition templates in the system.
- Define the required characteristic types where the characteristic entity is set to **Deferred Revenue Recognition**.
- Define the values for the following parameters in the **C1-REVRECITM** algorithm:
  - Use Calendar or Business Days (C or B)
  - Override Default Recognition Date (Y or N)
  - Override Default Weekly Recognition Day (Mon, Tue, Wed, Thu, Fri, Sat, Sun)
  - Override Default Monthly Recognition Date (1-31)
- Define the value for the **Use Contract Expiration Date (Y or N)** parameter in the **C1-REVRECSCH** algorithm.
- Define the value for the **Create Adjustments (Y or N)** parameter in the **C1-REVITMREC** algorithm.
- Set the batch control type of the **Deferred Revenue Recognition Periodic Monitor (C1-RRSMO)** batch to **Timed** and define the following attributes:
  - Time Interval
  - Timer Active
  - User ID
  - Batch Language
  - Email Address

## Deferred Revenue Recognition Status Transition

---

The following figure graphically indicates how a deferred revenue recognition status transition moves from one status to another:

## Algorithms Used in Deferred Revenue Recognition

The following table lists the algorithms which are used in the lifecycle of the business object:

Status	System Event	Algorithm	Algorithm Type	Description
		C1-REVRECSCH	C1-REVRECSCH	<p>This algorithm is invoked when the status of the bill segment and adjustment financial transactions created against the contracts (of the contract type to which the algorithm is attached) is set to Frozen. It checks whether an active deferred revenue recognition template exists for the distribution code and contract type combination. If so, it creates a deferred revenue recognition using the template and sets the status of the deferred revenue recognition to Draft. It then checks whether the type of the corresponding financial transaction is Bill Segment or Adjustment. If the type of the corresponding financial transaction is Bill Segment, it sets the valid until date of the deferred revenue recognition to the bill segment end date. However, if the type of the corresponding financial transaction is Adjustment, it checks whether the Use Contract Expiration Date (Y or N) parameter is set to Y or N. If the Use Contract Expiration Date (Y or N) parameter is set to Y, it sets the valid until date of the deferred revenue recognition to the contract expiration date. However, if the Use Contract Expiration Date (Y or N) parameter is set to N, it sets the valid until date of the deferred revenue recognition to the financial transaction arrears date. In addition, on creating the deferred revenue recognition, an appropriate log entry is added which you can view in the Deferred Revenue Recognition Log zone. It contains the following parameter:</p> <ul style="list-style-type: none"> <li>• Use Contract Expiration Date (Y or N) – Used to indicate whether the valid until date must be set to the contract expiration date when the type of the corresponding financial transaction is Adjustment. The valid values are Y and N. This parameter is mandatory.</li> </ul>

Status	System Event	Algorithm	Algorithm Type	Description
		C1-REVRECITM	C1-REVRECITM	<p>This algorithm creates schedule for the deferred revenue recognition. It considers the valid until date and accordingly creates the recognition lines within the schedule. If the recognition schedule is Weekly, by default, the recognition day is set to Mon (which means Monday of each week). However, if the recognition schedule is Monthly, by default, the recognition date is set to the last day of the month (i.e. 28, 29, 30, or 31) It contains the following parameters:</p> <ul style="list-style-type: none"> <li>• <b>Use Calendar or Business Days (C or B)</b> - Used to indicate whether you want to use the calendar or business days while generating the recognition schedule. The business days are derived using the work calendar defined on the financial transaction. If you do not specify any value for this parameter, by default, it is set to C. This parameter is mandatory.</li> <li>• <b>Override Default Recognition Date (Y or N)</b> – Used to indicate whether you want to override the default weekly or monthly recognition date. The valid values are Y and N. This parameter is mandatory.</li> <li>• <b>Override Default Weekly Recognition Day (Mon, Tue, Wed, Thu, Fri, Sat, Sun)</b> – Used to indicate the day of the week when you want to recognize the deferred revenue. The valid values are Mon, Tue, Wed, Thu, Fri, Sat, and Sun. This parameter is required when you want to override the default weekly recognition day.</li> <li>• <b>Override Default Monthly Recognition Date (1-31)</b> - Used to indicate the day of the month when you want to recognize the deferred revenue. The valid values are 1, 2, 3, ..., 31. This parameter is required when you want to override the default monthly recognition date.</li> </ul>

Status	System Event	Algorithm	Algorithm Type	Description
		C1-REVRECADJ	C1-REVRECADJ	This algorithm creates deferred revenue recognition adjustment using the adjustment type defined on the respective deferred revenue recognition template. Before creating the deferred revenue recognition adjustment, it checks whether the contract for which the deferred revenue recognition is created is cancelled. If so, the status of the deferred revenue recognition is set to Canceled. If all lines in the recognition schedule are recognized, the status of the deferred revenue recognition is set to Closed.
		C1-REVITMREC	C1-REVITMREC	<p>If this algorithm is attached in the deferred revenue recognition template, it is invoked while executing the C1-RRADJ batch. It contains the following parameter:</p> <ul style="list-style-type: none"> <li>• <b>Create Adjustments (Y or N)</b> – Used to indicate whether the deferred revenue recognition adjustment must be created or not when the recognition date is earlier than or equal to the batch business date. The valid values are Y and N. This parameter is mandatory.</li> </ul>
		C1-DRRTM-INF	C1-DRRTM-INF	<p>This algorithm generates the deferred revenue recognition template information string which appears throughout the application. It concatenates the following fields separated by a comma in the specified order:</p> <ol style="list-style-type: none"> <li>1. Deferred Revenue Recognition Template</li> <li>2. Description</li> </ol>

Status	System Event	Algorithm	Algorithm Type	Description
		C1-DRRTMPVAL	C1-DRRTMPVAL	<p>This algorithm validates the deferred revenue recognition template. It checks the following:</p> <ul style="list-style-type: none"> <li>• Whether the data is specified in the mandatory fields, such as Deferred Revenue Recognition Template, Description, Status, Distribution Code, Contract Type, Adjustment Type, Recognition Schedule Generation Type, and Recognition Schedule.</li> <li>• Whether an algorithm is attached to the Create Deferred Revenue Recognition Schedule and Generate Deferred Revenue Recognition Adjustment system events.</li> <li>• Whether a deferred revenue recognition template already exists for the specified distribution code and contract type combination.</li> <li>• Whether special characters except underscore are specified in the Deferred Revenue Recognition Template field.</li> <li>• Whether the high proration limit is between 0 to 31 and is greater than the low proration limit.&gt;&gt; Whether the low proration limit is between 0 to 31 and is less than the high proration limit.</li> </ul> <p>In addition, it does not allow you to:</p> <ul style="list-style-type: none"> <li>• Delete a deferred revenue recognition template when it is used to create a deferred revenue recognition.</li> <li>• Edit a deferred revenue recognition template when the corresponding deferred revenue recognition is in the Draft status.</li> <li>• Inactivate a deferred revenue recognition template when the corresponding deferred revenue recognition is not in the Closed status.</li> </ul> <p>You must attach this validation algorithm to the custom business object which is used to create a deferred revenue recognition template. Otherwise, erroneous results might occur.</p>

Status	System Event	Algorithm	Algorithm Type	Description
		C1-DRRSC- INF	C1-DRRSC-INF	<p>This algorithm generates the deferred revenue recognition information string which appears throughout the application. It concatenates the following fields separated by a comma in the specified order:</p> <ol style="list-style-type: none"> <li>1. Deferred Revenue Recognition Template</li> <li>2. Deferred Revenue Recognition Status</li> <li>3. Distribution Code</li> <li>4. Deferred Revenue Recognition ID</li> </ol>
		C1-REVMON	C1-REVMON	<p>This algorithm is invoked when the C1-DRRMO batch is executed. It checks whether there are any deferred revenue recognitions in the Draft status. If there is any deferred revenue recognition in the Draft status, it checks whether the recognition schedule generation type in the respective deferred revenue recognition template is set to Automatic or Manual. If the recognition schedule generation type is set to Automatic, the status of the deferred revenue recognition is changed to In Progress. However, if the recognition schedule generation type is set to Manual, the status of the deferred revenue recognition remains as Draft.</p>
		C1- REVRECINP	C1-REVRECINP	<p>This algorithm creates an appropriate log entry when the status of the deferred revenue recognition is changed to In Progress. It invokes the algorithm attached to the Create Deferred Revenue Recognition Schedule system event of the respective deferred revenue recognition template. Once the recognition schedule is successfully created, the status of the deferred revenue recognition is changed to Active.</p>

Status	System Event	Algorithm	Algorithm Type	Description
		C1-REVRECACT	C1-REVRECACT	<p>This algorithm transitions the current status to the specified status. You can specify the status to which you want the business object to transition in the following parameters:</p> <ul style="list-style-type: none"> <li>• Next Status</li> <li>• Next Transition Condition</li> </ul> <p>At a time, you can specify value for either the <b>Next Status</b> or <b>Next Transition Condition</b> parameter. If you don't specify any value for these parameters, the system will transition the business object to the default next status specified in its lifecycle. This algorithm creates an appropriate log entry when the status of the deferred revenue recognition is changed to Active.</p>

## Deferred Revenue Recognition Template (Used for Searching)

The **Deferred Revenue Recognition** screen allows you to search for a deferred revenue recognition template using various search criteria. Through this screen, you can navigate to the following screen:

- [Deferred Revenue Recognition Template \(Used for Viewing\)](#) on page 2068

This screen consists of the following zone:

- [Search Deferred Revenue Recognition Template](#) on page 2060

### Search Deferred Revenue Recognition Template

The **Search Deferred Revenue Recognition Template** zone allows you to search for a deferred revenue recognition template using various search criteria. It contains the following two sections:

- **Search Criteria** – The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Deferred Revenue Recognition Template	Used to search the basic information about the deferred revenue recognition template.	Yes
Description	Used to search the description of the deferred revenue recognition template.	No
Recognition Schedule	Used to search deferred revenue recognition with a particular schedule. The valid values are: <ul style="list-style-type: none"> <li>• Daily</li> <li>• Monthly</li> <li>• Weekly</li> </ul>	No

Field Name	Field Description	Mandatory (Yes or No)
Status	Used to indicate the deferred revenue recognition template with a particular status. The valid values are: <ul style="list-style-type: none"> <li>Active</li> <li>Inactive</li> </ul>	No

**Note:** You must specify at least one search criterion while searching for a deferred revenue recognition template.

- **Search Results** – On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Deferred Revenue Recognition Template	Displays the deferred revenue recognition. <div style="border: 1px solid black; padding: 5px; margin-top: 5px;"> <p><b>Note:</b> It has a link. On clicking the link, the <b>Deferred Revenue Recognition Template</b> screen appears where you can view the details of the respective deferred revenue recognition template.</p> </div>
Distribution Code	Indicates the distribution code associated with the rate component.
Contract Type	Displays the contract which is generated against a particular type of contract.
Recognition Schedule	Displays the schedule when the deferred revenue is recognized.

### Related Topics

How to view the details of a deferred revenue recognition template	<a href="#">Viewing the Deferred Revenue Recognition Template Details</a> on page 2067
How to search for a deferred revenue recognition template	<a href="#">Searching for a Deferred Revenue Recognition Template</a> on page 2061

## Searching for a Deferred Revenue Recognition Template

### Prerequisites

To search for a deferred revenue recognition template, you should have:

- Deferred revenue recognition template defined in the system.
- Deferred Revenue Recognition Schedule defined in the system.

### Procedure

To search for a deferred revenue recognition template:

1. Click the **Admin** menu in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **D** and then click **Deferred Revenue Recognition Template**.  
The **Deferred Revenue Recognition Template** screen appears.
3. Enter the search criteria in the **Search Deferred Revenue Recognition Template** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

#### 4. Click **Search**.

A list of deferred revenue recognition templates that meet the search criteria appears in the **Search Results** section.

#### Related Topics

## Defining a Deferred Revenue Recognition Template

### Prerequisites

To define a deferred revenue recognition template, you should have:

- Contract types defined in the system

### Procedure

To define a deferred revenue recognition template:

1. Click the **Admin** menu in the **Application** toolbar.

A list appears.

2. From the **Admin** menu, select **D** and then click **Deferred Revenue Recognition Template**.

The **Deferred Revenue Recognition Template** screen appears.

3. Click the **Add** button in the **Page Title** area of the **Deferred Revenue Recognition Template** screen.

The **Deferred Revenue Recognition Template** screen appears. It contains the following sections:

- **Main** – Used to specify basic details about the deferred revenue recognition template.
- **Parameters** – Used to specify the various parameters for the deferred revenue recognition template.
- **Algorithms** – Used to associate algorithms with the deferred revenue recognition template.
- **Divisions** – Used to associate a deferred revenue recognition template with a division.
- **Characteristics** – Used to define characteristics for the deferred revenue recognition template.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Deferred Revenue Recognition Template	Used to specify the deferred revenue recognition template.	Yes
Description	Used to specify the description of the deferred revenue recognition template.	No

Field Name	Field Description	Mandatory (Yes or No)
Status	Used to indicate the status of the deferred revenue recognition template. The valid values are: <ul style="list-style-type: none"> <li>Active</li> <li>Inactive</li> </ul>	Yes

The **Parameters** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Distribution Code	Used to indicate the distribution code associated with the deferred revenue recognition.  <div style="border: 1px solid black; padding: 2px;"> <b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Distribution Code Search</b> window appears. </div>	Yes
Contract Type	Used to indicate a particular type of contract.  <div style="border: 1px solid black; padding: 2px;"> <b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Contract Type Search</b> window appears. </div>	Yes
Adjustment Type	Used to indicate the adjustment type using which the adjustment must be created.  <div style="border: 1px solid black; padding: 2px;"> <b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Adjustment Type Search</b> window appears. </div>	No
Allow Editing	Used to allow editing of recognition schedule.	No
Generation Type	Used to indicate the type of deferred revenue recognition generation. The valid values are: <ul style="list-style-type: none"> <li>Automatic</li> <li>Manual</li> </ul>	Yes (Conditional)
Recognition Schedule	Used to indicate the schedule of deferred revenue recognition generation. The valid values are: <ul style="list-style-type: none"> <li>Daily</li> <li>Monthly</li> <li>Weekly</li> </ul>	Yes
Allow Proration	Used to allow proration.  <div style="border: 1px solid black; padding: 2px;"> <b>Note:</b> The <b>Allow Proration</b> field appears only when you select <b>Recognition Schedule</b> as <b>Monthly</b>. </div>	Yes

Field Name	Field Description	Mandatory (Yes or No)
High Proration Limit (Days)	Used to specify whether deferred revenue amount must be prorated while revenue recognition. If the number of days from when the policy is enrolled to the end of the month (in which it is enrolled) is greater than the specified limit, then the amount is prorated.  <b>Note:</b> This field appears only when you check the tick-box for <b>Allow Proration</b> .	Yes (Conditional)  <b>Note:</b> This field is required only when the recognition schedule is selected as monthly and when the <b>Allow Proration</b> check box is selected.
Low Proration Limit (Days)	Used to specify whether deferred revenue amount must be prorated while revenue recognition. If the number of days from when the policy is enrolled to the end of the month (in which it is enrolled) is less than the specified limit, then the amount is prorated.  <b>Note:</b> This field appears only when you check the tick-box for <b>Allow Proration</b> .	Yes (Conditional)  <b>Note:</b> This field is required only when the recognition schedule is selected as monthly and when the <b>Allow Proration</b> check box is selected.

4. Enter the required details.
5. Associate algorithms with the deferred revenue recognition template, if required.
6. View the division to which the deferred revenue recognition template is associated in the **Divisions** section.
7. Define the characteristics specific to division to which the deferred revenue recognition template is associated in the **Characteristics** section.
8. Click **Save**.

The deferred revenue recognition template is created.

#### Related Topics

<b>Deferred Revenue Recognition Template</b> screen	<a href="#">Deferred Revenue Recognition Template (Used for Searching)</a> on page 2060
How to associate algorithms with the deferred revenue recognition template	<a href="#">Associating Algorithms with a Deferred Revenue Recognition Template</a> on page 2064

## Associating Algorithms with a Deferred Revenue Recognition Template

### Procedure

To associate algorithms with a deferred revenue recognition template:

1. Ensure that the **Algorithms** section is expanded when you are defining or editing a deferred revenue recognition template.

The **Algorithms** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
System Event	Used to indicate the system event for an algorithm.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Sequence	Used to specify the sequence number.  <b>Note:</b> On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	Yes
Algorithm	Used to associate an algorithm to the system event that you have selected.  <b>Note:</b> The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Algorithm Search</b> window appears. On specifying the algorithm for a system event, the description of the algorithm appears corresponding to the <b>Algorithm</b> field.	Yes

- Enter the required details in the **Algorithms** section.
- If you want to define more than one algorithm for the deferred revenue recognition template, click the **Add**  icon, and then repeat 2.

**Note:** However, if you want to remove an algorithm from the deferred revenue recognition template, click the **Delete**  icon corresponding to the algorithm.

### Related Topics

How to define a deferred revenue recognition template	<a href="#">Defining a Deferred Revenue Recognition Template</a> on page 2062
How to edit a deferred revenue recognition template	<a href="#">Editing a Deferred Revenue Recognition Template</a> on page 2070

## Associating Deferred Revenue Recognition Template With A Division

### Prerequisites

To associate deferred revenue recognition template with a division, you should have:

- Divisions defined in the application

### Procedure

To associate deferred revenue recognition template with a division:

- Ensure that the **Divisions** section is expanded when you are creating or editing a deferred revenue recognition template.

The **Divisions** section appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Division	Used to indicate the division to which you want to associate the deferred revenue recognition template.  <b>Note:</b> You can only view those divisions to which you have access in the <b>Division</b> list.	No

- Select the required division from the list.
- If you want to associate the deferred revenue recognition template with more than one division, click the **Add** (+) icon and then repeat step 2.

**Note:** However, if you want to remove the deferred revenue recognition template from a division, click the **Delete** (🗑️) icon corresponding to the division.

- Click **Save**.

The deferred revenue recognition template is associated with the divisions.

## Defining Characteristics for a Deferred Revenue Recognition Template

### Prerequisites

To define characteristics for a deferred revenue recognition template, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Deferred Revenue Recognition Template**)

### Procedure

To define characteristics for a deferred revenue recognition template:

- Ensure that the **Characteristics** section is expanded when you are defining or editing a deferred revenue recognition template.

The **Characteristics** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Type	Used to indicate the characteristic type.	Yes (Conditional)  <b>Note:</b> This field is required when you are defining a characteristic for the deferred revenue recognition template.

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Value	Used to specify the value for the characteristic type.  <b>Note:</b> On specifying the value for a characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Valued</b> field.	Yes (Conditional)  <b>Note:</b> This field is required when you are defining a characteristic for the deferred revenue recognition template.

- Enter the required details in the **Characteristics** section.
- If you want to define more than one characteristic for the deferred revenue recognition template, click the **Add** (+) icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from the deferred revenue recognition template, click the **Delete** (🗑️) icon corresponding to the characteristic.

## Viewing the Deferred Revenue Recognition Template Details

### Procedure

To view the details of a deferred revenue recognition template:

- Click the **Admin** link in the **Application** toolbar.  
A list appears.
- From the **Admin** menu, select **D** and then click **Deferred Revenue Recognition Template**.  
The **Deferred Revenue Recognition Template** screen appears.
- Search for the deferred revenue recognition template in the **Deferred Revenue Recognition Template** screen.
- In the **Search Results** section, click the link in the **Deferred Revenue Recognition Template** column corresponding to the deferred revenue recognition template whose details you want to view.  
The **Deferred Revenue Recognition Template** screen appears.
- View the details of the deferred revenue recognition template in the **Deferred Revenue Recognition Template** zone.

### Related Topics

<b>Deferred Revenue Recognition Template</b> zone	<a href="#">Deferred Revenue Recognition Template</a> on page 2068
How to search for a deferred revenue recognition template	<a href="#">Searching for a Deferred Revenue Recognition Template</a> on page 2061

## Deferred Revenue Recognition Template (Used for Viewing)

Once the deferred revenue recognition templates are created, the **Deferred Revenue Recognition Template** screen allows you to:

- Generate the deferred revenue recognition schedule
- View the details of a deferred revenue recognition template
- Edit a deferred revenue recognition template
- Delete a deferred revenue recognition template

This screen consists of the following zone:

- [Deferred Revenue Recognition Template](#) on page 2068

### Deferred Revenue Recognition Template

The **Deferred Revenue Recognition Template** zone displays the details of the deferred revenue recognition template. It contains the following sections:

- **Main** – Displays basic information about the deferred revenue recognition template. It contains the following fields:

Field Name	Field Description
Deferred Revenue Recognition Template	Displays the deferred revenue recognition template
Description	Used to specify the description of the deferred revenue recognition template
Status	Used to indicate the status of the deferred revenue recognition template. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>

- **Parameters** – Displays the parameters used in the deferred revenue recognition template.

Field Name	Field Description
Distribution Code	Indicates the distribution code.  <b>Note:</b> It has a link. On clicking the link, the <b>Distribution Code</b> screen appears where you can view the details of the respective distribution code.
Contract Type	Displays the <b>Deferred Revenue Recognition Template</b> which are generated against a particular type of contract.
Adjustment Type	Indicates the adjustment type using which the adjustment must be created.  <b>Note:</b> It has a link. On clicking the link, the <b>Adjustment Type</b> screen appears where you can view the details of the respective adjustment type.

Field Name	Field Description
Generation Type	Displays the type of deferred revenue recognition template. The valid values are: <ul style="list-style-type: none"> <li>Manual</li> <li>Automatic</li> </ul>
Allow Editing	Indicates the editing of recognition schedule.
Recognition Schedule	Indicates the schedule when the deferred revenue is recognized. The valid values are: <ul style="list-style-type: none"> <li>Daily</li> <li>Monthly</li> <li>Weekly</li> </ul>
Allow Proration	Used to allow proration.  <div style="border: 1px solid black; padding: 2px;"><b>Note:</b> The <b>Allow Proration</b> field appears only when you select <b>Recognition Schedule</b> as <b>Monthly</b>.</div>
High Proration Limit (Days)	Displays whether deferred revenue amount must be prorated while revenue recognition. If the number of days from when the policy is enrolled to the end of the month (in which it is enrolled) is greater than the specified limit, then the amount is prorated.  <div style="border: 1px solid black; padding: 2px;"><b>Note:</b> This field appears only when you check the tick-box for <b>Allow Proration</b>.</div>
Low Proration Limit (Days)	Displays whether deferred revenue amount must be prorated while revenue recognition. If the number of days from when the policy is enrolled to the end of the month (in which it is enrolled) is less than the specified limit, then the amount is prorated.  <div style="border: 1px solid black; padding: 2px;"><b>Note:</b> This field appears only when you check the tick-box for <b>Allow Proration</b>.</div>

- **Divisions** – Displays the associated deferred revenue recognition template with one or more divisions. It contains the following column:

Column Name	Column Description
Division	Displays the division to which you want to associate the deferred revenue recognition template.

- **Algorithms** – Lists the algorithms associated with the deferred revenue recognition template. It contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
System Event	Indicates the system event on which the algorithm must be executed	No
Sequence	Displays the sequence number.	No

Column Name	Column Description	Mandatory (Yes or No)
Algorithm	Displays an algorithm that needs to be attached to the selected system event.  <b>Note:</b> It has a link. On clicking the link, the <b>Algorithm</b> screen appears where you can view the details of the respective algorithm.	No

- **Characteristics** – Lists the characteristics defined for the deferred revenue recognition template. It contains the following fields:

Column Name	Column Description
Characteristic Type	Displays the characteristic type.
Characteristic Type	Displays the value of the characteristic type.

- **Record Actions** – This section contains the following buttons:

Button Name	Button Description
Edit	Used to define, edit, and remove algorithms of the deferred revenue recognition template.  <b>Note:</b> The <b>Edit</b> button appears only when the deferred revenue recognition template is in the <b>Active</b> status.
Delete	Used to delete the deferred revenue recognition template.

- 
- **Record Information** – This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the deferred revenue recognition template is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.

## Editing a Deferred Revenue Recognition Template

### Procedure

To edit a deferred revenue recognition template:

1. Search for the deferred revenue recognition template in the **Deferred Revenue Recognition Template** screen.
2. In the **Search Results** section, click the link in the **Deferred Revenue Recognition Template** column corresponding to the deferred revenue recognition template whose details you want to edit.

The **Deferred Revenue Recognition Template** screen appears.

3. Click the **Edit** button in the **Deferred Revenue Recognition Template** zone.

The **Deferred Revenue Recognition Template** screen appears.

**Note:** The **Edit** button appears only when the deferred revenue recognition template is in the **Active** status.

4. Associate, edit, or remove algorithms from the deferred revenue recognition template, if required.
5. Define, edit, or remove characteristics from the deferred revenue recognition template, if required.
6. Associate deferred revenue recognition template with a division, if required.
7. Click **Save**.

The changes made to the deferred revenue recognition template are saved.

## **Deleting a Deferred Revenue Recognition Template**

### **Procedure**

To delete a deferred revenue recognition template:

1. Search for the deferred revenue recognition template in the **Deferred Revenue Recognition Template** screen.
2. In the **Search Results** section, click the link in the **Deferred Revenue Recognition Template** column corresponding to the deferred revenue recognition template that you want to delete.

The **Deferred Revenue Recognition Template** screen appears.

3. Click the **Delete** button in the **Deferred Revenue Recognition Template** zone.

A message appears confirming whether you want to delete the deferred revenue recognition template.

4. Click **OK**.

The deferred revenue recognition template is deleted.

## **Viewing the Deferred Revenue Recognition Template Details**

### **Procedure**

To view the details of a deferred revenue recognition template:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **D** and then click **Deferred Revenue Recognition Template**.  
The **Deferred Revenue Recognition Template** screen appears.
3. Search for the deferred revenue recognition template in the **Deferred Revenue Recognition Template** screen.
4. In the **Search Results** section, click the link in the **Deferred Revenue Recognition Template** column corresponding to the deferred revenue recognition template whose details you want to view.  
The **Deferred Revenue Recognition Template** screen appears.
5. View the details of the deferred revenue recognition template in the **Deferred Revenue Recognition Template** zone.

## Deferred Revenue Recognition (Used for Searching)

The **Deferred Revenue Recognition** screen allows you to search for a deferred revenue recognition using various search criteria. Through this screen, you can navigate to the following screen:

- [Deferred Revenue Recognition \(Used for Viewing\)](#) on page 2078

This screen consists of the following zone:

- [Search Deferred Revenue Recognition](#) on page 2072

## Search Deferred Revenue Recognition

The **Search Deferred Revenue Recognition** zone allows you to search for a deferred revenue recognition using various search criteria. It contains the following two sections:

- **Search Criteria** – This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	<p>Used to indicate whether you want to search for a deferred revenue recognition using the deferred revenue recognition, person, account, or policy details. The valid values are:</p> <ul style="list-style-type: none"> <li>• Account Details</li> <li>• Person Details</li> <li>• Deferred Revenue Recognition Details</li> <li>• Financial Transaction Details</li> <li>• Policy Details</li> </ul> <p><b>Note:</b> By default, the <b>Account Details</b> option is selected.</p>	Yes
Person ID	<p>Used to search deferred revenue recognition which are assigned to a particular person.</p> <p><b>Note:</b> This field appears only when you select the <b>Person Details</b> option from the <b>Search By</b> list.</p>	No
Account ID	<p>Used to search the account ID.</p> <p><b>Note:</b> This field appears only when you select the <b>Account Details</b> option from the <b>Search By</b> list.</p>	No
Person Identifier Type	<p>Used to select the identifier type based on which you want to search deferred revenue recognition through which the person's record is created or updated in the system.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> If you specify the person identifier as a search criteria, you have to select the person identifier type.</p>
Person Identifier	<p>Used to specify the value for the person identifier type.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> If you specify the person identifier type as a search criteria, you have to specify the person identifier.</p>
Account Identifier Type	<p>Used to specify the account identifier type of the account whose details you want to search.</p> <p><b>Note:</b> This field appears only when you select the <b>Account Details</b> option from the <b>Search By</b> list.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> If you specify the account identifier as a search criteria, you have to select the account identifier type.</p>

Field Name	Field Description	Mandatory (Yes or No)
Account Identifier	Used to specify the value of the account identifier.  <b>Note:</b> This field appears only when you select the <b>Account Details</b> option from the <b>Search By</b> list.	Yes (Conditional)  <b>Note:</b> If you specify the account identifier type as a search criteria, you have to specify the account identifier.
Contract ID	Used to specify the contract ID linked to the account.  <b>Note:</b> This field appears only when you select the <b>Account Details</b> option from the <b>Search By</b> list.	No
Person Hierarchy	Used to indicate whether to display hierarchy of the person linked to a particular bill.  <b>Note:</b> This field appears only when you select the <b>Person Details</b> option from the <b>Search By</b> list.	No
Status	Used to search deferred revenue recognition with a particular status. The valid values are:  <ul style="list-style-type: none"> <li>• Active</li> <li>• Closed</li> <li>• Canceled</li> <li>• Draft</li> </ul> <b>Note:</b> This field appears only when you select the <b>Person Details</b> , <b>Account Details</b> , or <b>Deferred Revenue Recognition Details</b> option from the <b>Search By</b> list.	No
Deferred Revenue Recognition Template	Used to indicate the template used for deferred revenue recognition.  <b>Note:</b> This field appears only when you select the <b>Person Details</b> , <b>Account Details</b> , or <b>Deferred Revenue Recognition Details</b> option from the <b>Search By</b> list.	No
Valid Until Date	Used to specify the date till which the deferred revenue recognition is valid.  <b>Note:</b> This field appears only when you select the <b>Person Details</b> or <b>Account Details</b> option from the <b>Search By</b> list.	No

Field Name	Field Description	Mandatory (Yes or No)
Deferred Revenue Recognition ID	Used to search a particular deferred revenue recognition  <b>Note:</b> This field appears only when you select the <b>Deferred Revenue Recognition Details</b> option from the <b>Search By</b> list.	No
Description	Used to specify the description of the deferred revenue recognition.  <b>Note:</b> This field appears only when you select the <b>Deferred Revenue Recognition Details</b> option from the <b>Search By</b> list.	No
Recognition Schedule	Used to search deferred revenue recognition with a particular schedule. The valid values are: <ul style="list-style-type: none"> <li>• Daily</li> <li>• Monthly</li> <li>• Weekly</li> </ul> <b>Note:</b> This field appears only when you select the <b>Deferred Revenue Recognition Details</b> option from the <b>Search By</b> list.	No
Financial Transaction ID	Used to search deferred revenue recognition which are assigned to a particular financial transaction.  <b>Note:</b> This field appears only when you select the <b>Financial Transaction Details</b> option from the <b>Search By</b> list.	
Policy Type	Used to indicate the type of policy.  <b>Note:</b> This field appears only when you select the <b>Policy Details</b> option from the <b>Search By</b> list.	Yes
Policy Number	Used to indicate the policy number.  <b>Note:</b> This field appears only when you select the <b>Policy Details</b> option from the <b>Search By</b> list.	No
Plan Number	Used to indicate the plan number of the policy.  <b>Note:</b> This field appears only when you select the <b>Policy Details</b> option from the <b>Search By</b> list.	No
Source System	Used to indicate the name of the external system from where the policy originated.  <b>Note:</b> This field appears only when you select the <b>Policy Details</b> option from the <b>Search By</b> list.	No

Field Name	Field Description	Mandatory (Yes or No)
Start Date	Used to indicate the date from when the policy is effective.  <b>Note:</b> This field appears only when you select the <b>Policy Details</b> option from the <b>Search By</b> list.	No
End Date	Used to indicate the date till when the policy is effective.  <b>Note:</b> This field appears only when you select the <b>Policy Details</b> option from the <b>Search By</b> list.	No

**Note:** You must specify at least one search criterion while searching for a deferred revenue recognition.

- **Search Results** – On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Deferred Revenue Recognition Information	Displays information about the deferred revenue recognition.  <b>Note:</b> It has a link. On clicking the link, the <b>Deferred Revenue Recognition</b> screen appears where you can view the details of the respective deferred revenue recognition.
Contract Information	Displays the basic information about the contract corresponding to the deferred revenue recognition. In addition, this column has a context menu which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Contract</b> screen appears where you can view the details of the respective contract.
Financial Transaction Information	Displays the basic information about the financial transaction corresponding to the deferred revenue recognition.  <b>Note:</b> It has a link. On clicking the link, the <b>Financial Transaction</b> screen appears where you can view the details of the respective financial transaction.

### Related Topics

For more information on...	See...
How to view the details of a deferred revenue recognition	<a href="#">Viewing the Deferred Revenue Recognition Details</a> on page 2077
How to search for a deferred revenue recognition	<a href="#">Searching for a Deferred Revenue Recognition</a> on page 2076

## Searching for a Deferred Revenue Recognition

### Prerequisites

To search for a deferred revenue recognition, you should have:

- Deferred Revenue Recognition Template defined in the application.

- Person identifier types defined in the application
- Account identifier types defined in the application
- Recognition Schedules defined in the application
- Source Systems defined in the application

### **Procedure**

To search for a deferred revenue recognition:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Deferred Revenue Recognition**.  
A sub-menu appears.
3. Click the **Search** option from the **Deferred Revenue Recognition** sub-menu.  
The **Deferred Revenue Recognition** screen appears.
4. Enter the search criteria in the **Search Deferred Revenue Recognition** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search**.

A list of deferred revenue recognition that meet the search criteria appears in the **Search Results** section.

### **Related Topics**

<b>Deferred Revenue Recognition</b> screen	<a href="#">Deferred Revenue Recognition (Used for Searching)</a> on page 2072
<b>Search Deferred Revenue Recognition</b> zone	<a href="#">Search Deferred Revenue Recognition</a> on page 2072

## **Viewing the Deferred Revenue Recognition Details**

### **Procedure**

To view the details of a deferred revenue recognition:

1. Search for the deferred revenue recognition in the **Deferred Revenue Recognition** screen.
2. In the **Search Results** section, click the link in the **Deferred Revenue Recognition Information** column corresponding to the deferred revenue recognition whose details you want to view.

The **Deferred Revenue Recognition** screen appears. It consists of the following tabs:

- [Deferred Revenue Recognition - Main](#) on page 2078
  - [Deferred Revenue Recognition - Log](#) on page 2081
3. Ensure that the **Main** tab is selected.
  4. View the details of the deferred revenue recognition in the **Deferred Revenue Recognition** zone.

### **Related Topics**

## Deferred Revenue Recognition (Used for Viewing)

The **Deferred Revenue Recognition** screen allows you to:

- View the details of a deferred revenue recognition
- Edit a deferred revenue recognition
- Generate the deferred revenue recognition schedule
- Add related deferred revenue recognitions
- Edit the details of a deferred revenue recognition schedule
- View the log of a deferred revenue recognition
- Add a log entry for a deferred revenue recognition

This screen consists of the following tabs:

- [Deferred Revenue Recognition - Main](#) on page 2078
- [Deferred Revenue Recognition - Log](#) on page 2081

### Deferred Revenue Recognition - Main

The **Main** tab displays information about the deferred revenue recognition. It contains the following zones:

- [Deferred Revenue Recognition](#) on page 2078
- [Associated Deferred Revenue Recognitions](#) on page 2080
- [Recognition Schedule](#) on page 2081
- [Revenue Recognition Items](#) on page 2081

### Deferred Revenue Recognition

The **Deferred Revenue Recognition** zone displays the details of the deferred revenue recognition. It contains the following sections:

- **Main** – Displays basic information about the deferred revenue recognition. It contains the following fields:

Field Name	Field Description
Deferred Revenue Recognition Information	Displays information about the deferred revenue recognition.
Deferred Revenue Recognition Template Information	Displays information about the deferred revenue recognition template. <b>Note:</b> It has a link. On clicking the link, the <b>Deferred Revenue Recognition Template</b> screen appears where you can view the details of the deferred revenue recognition template.
Distribution Code	Displays the distribution code which indicates the template associated with the deferred revenue recognition.

Field Name	Field Description
Financial Transaction Information	<p>Displays the basic information about the financial transaction corresponding to the deferred revenue recognition.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Financial Transaction Information</b> screen appears where you can view the details of the financial transaction.</p>
Total Revenue Deferred	Displays the total revenue deferred.
Total Revenue Recognized	Displays the total revenue recognized.
Status	<p>Indicates the status of the deferred revenue recognition. The valid values are:</p> <ul style="list-style-type: none"> <li>• Active</li> <li>• Closed</li> <li>• Canceled</li> <li>• Draft</li> </ul>

- **Related Deferred Revenue Recognitions** - Lists the related deferred revenue recognitions. It contains the following columns:

Column Name	Column Description
Deferred Revenue Recognition Information	Displays the basic information of the related Deferred Revenue Recognition Schedules (i.e. DRR Schedule of the BS/AD, corresponding to the BX/AX)
Create Date Time	Displays the date and time when the deferred revenue recognition is created.
Financial Transaction Information	Displays the basic information about the financial transaction corresponding to the deferred revenue recognition.

- **Record Actions** – This section contains the following buttons:

Button Name	Button Description
Edit	<p>Used to define, edit and remove characteristics, related deferred revenue recognitions of the deferred revenue recognition.</p> <p><b>Note:</b> The <b>Edit</b> button appears only when the deferred revenue recognition is in the <b>Active</b> status.</p>
Generate Schedule	<p>Used to generate the deferred revenue recognition schedule.</p> <p><b>Note:</b> The <b>Generate Schedule</b> button appears only when the deferred revenue recognition is in the <b>Draft</b> status.</p>

- **Record Information** – This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the deferred revenue recognition is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.
Create Date/Time	Displays the date and time when the deferred revenue recognition schedule is created.
Status Date/Time	Displays the date and time when the deferred revenue recognition status is updated.

- **Characteristics** – Lists the characteristics defined for the deferred revenue recognition. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the characteristic is effective for the deferred revenue recognition.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

### Associated Deferred Revenue Recognitions

The **Associated Deferred Revenue Recognitions** zone Displays the basic information of the other schedules linked to the same **FT** having a separate **Schedule** due to the different **Distribution Code**. Purpose of this section is to show all the associated **Schedules** generated for a single **FT**. It contains the following columns:

Column Name	Column Description
Deferred Revenue Recognition Information	Displays information about the deferred revenue recognition.  <b>Note:</b> It has a link. On clicking the link, the <b>Deferred Revenue Recognition</b> screen appears where you can view the details of the deferred revenue recognition.
Financial Transaction Information	Displays the basic information about the financial transaction corresponding to the deferred revenue recognition.  <b>Note:</b> It has a link. On clicking the link, the <b>Financial Transaction</b> screen appears where you can view the details of the respective deferred revenue recognition.
Distribution Code	Displays the distribution code which indicates the template associated with the deferred revenue recognitions.
Deferred Revenue Recognition Template Information	Displays information about the deferred revenue recognition template.  <b>Note:</b> It has a link. On clicking the link, the <b>Deferred Revenue Recognition Template</b> screen appears where you can view the details of the deferred revenue recognition template.

Column Name	Column Description
Status	Indicates the status of the associated deferred revenue recognition. The valid values are: <ul style="list-style-type: none"> <li>Active</li> <li>Closed</li> <li>Canceled</li> </ul>

### Recognition Schedule

The **Recognition Schedule** zone lists the adjustment information and the recognition amount of the deferred revenue recognition. It contains the following columns:

Column Name	Column Description
Recognition Date	Displays the date on which the recognition is scheduled.
Recognition Amount	Displays the amount of the recognition scheduled.
Adjustment Information	Displays information about the adjustments in recognition schedule.

This zone contains the **Edit** button. It is used to edit the details of recognition schedule

**Note:** This zone appears when the deferred revenue recognition is in the **Active** status.

### Revenue Recognition Items

The **Revenue Recognition Items** zone displays the adjustment information about the recognition items. It contains the following columns:

Column Name	Column Description
Recognition Date	Displays the date on which the recognition is scheduled.
Recognition Amount	Displays the amount of the recognition scheduled.
Adjustment Information	Displays information about the adjustments in recognition schedule. “ <div data-bbox="537 1283 1476 1367" style="border: 1px solid black; padding: 5px; margin-top: 5px;"> <p><b>Note:</b> It has a link. On clicking the link, the <b>Adjustment</b> screen appears where you can view the details of the deferred revenue recognition.</p> </div>

## Deferred Revenue Recognition - Log

The **Log** tab contains the following zone:

- [Deferred Revenue Recognition Log](#) on page 2081

### Deferred Revenue Recognition Log

The **Deferred Revenue Recognition Log** zone lists the complete trail of actions performed on the deferred revenue recognition. It contains the following columns:

Column Name	Column Description
Date/Time	Displays the date and time when the action was performed on the deferred revenue recognition
Details	Displays the details about the action performed on the deferred revenue recognition
User	Indicates the user who has performed the action on the deferred revenue recognition

Column Name	Column Description
Log Type	Indicates the type of log.
Related Object	Indicates the object or entity which is created when the action is performed on the deferred revenue recognition.  <b>Note:</b> At present, no data appears in this column. The implementation team can build the custom logic to meet the business requirements.
Status Reason	Indicates the reason why the status of the deferred revenue recognition is changed.  <b>Note:</b> At present, no data appears in this column. The implementation team can build the custom logic to meet the business requirements.

**Note:** You can manually add a log entry for the deferred revenue recognition by clicking the **Add Log Entry** link in the upper right corner of the **Deferred Revenue Recognition Log** zone.

### Related Topics

## Editing a Deferred Revenue Recognition

### Procedure

To edit a deferred revenue recognition:

1. Search for the deferred revenue recognition in the **Deferred Revenue Recognition** screen.
2. In the **Search Results** section, click the link in the **Deferred Revenue Recognition Information** column \orresponding to the deferred revenue recognition whose details you wa  
The **Deferred Revenue Recognition** screen appears.
3. Click the **Edit** button in the **Deferred Revenue Recognition** zone.  
The **Deferred Revenue Recognition** screen appears.

**Note:** The **Edit** button appears only when the deferred revenue recognition is in the **Active** status.

4. Modify the required details in the **Main** section.
5. Define, edit, or remove related deferred revenue recognitions from the deferred revenue recognition, if required.
6. Define, edit, or remove characteristics from the deferred revenue recognition, if required.
7. Click **Save**.

The changes made to the deferred revenue recognition are saved.

## Creating the Deferred Revenue Recognition Schedule

### Prerequisites

To create the deferred revenue recognition schedule, you should have:

- Should have **Revenue Recognition Schedule Creation Algorithm** attached in the **DRR Template**

### Procedure

To create the deferred revenue recognition schedule:

1. Search for the deferred revenue recognition in the **Deferred Revenue Recognition** screen.
2. In the **Search Results** section, click the link in the **Deferred Revenue Recognition Information** column corresponding to the deferred revenue recognition whose recognition schedule you want to generate.

The **Deferred Revenue Recognition** screen appears.

3. Click the **Generate Schedule** button in the **Deferred Revenue Recognition** zone.

**Note:** The **Generate Schedule** button appears only when the deferred revenue recognition is in the **Draft** status.

The status of the deferred revenue recognition is changed to **Active**.

### Related Topics

## Defining Characteristics for a Deferred Revenue Recognition

### Prerequisites

To define characteristics for a deferred revenue recognition, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Deferred Revenue Recognition**)

### Procedure

To define characteristics for a deferred revenue recognition:

1. Ensure that the **Characteristics** section is expanded when you are editing a deferred revenue recognition.

The **Characteristics** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the deferred revenue recognition.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the deferred revenue recognition.
Characteristic Type	Used to indicate the characteristic type. <b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Deferred Revenue Recognition</b> .	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the deferred revenue recognition.
Characteristic Value	Used to specify the value for the characteristic type. <b>Note:</b> On specifying the value for a characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the deferred revenue recognition.

- Enter the required details in the **Characteristics** section.

**Note:** If you select a characteristic type, the **Search**  icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a characteristic value.

- If you want to define more than one characteristic for the deferred revenue recognition, click the **Add**  icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from the deferred revenue recognition, click the **Delete**  icon corresponding to the characteristic.

### Related Topics

For more information on...	See...
How to edit a deferred revenue recognition	<a href="#">Editing a Deferred Revenue Recognition</a> on page 2082

## Adding Related Deferred Revenue Recognitions

### Prerequisites

To add related deferred revenue recognitions, you should have:

- Deferred revenue recognition template defined in the system.

### Procedure

To add related deferred revenue recognitions:

- Ensure that the **Related Deferred Revenue Recognitions** section is expanded when you are editing a deferred revenue recognition.

The **Related Deferred Revenue Recognitions** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Deferred Revenue Recognition ID	Used to specify the ID of the deferred revenue recognition.  <b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Deferred Revenue Recognition Search</b> window appears.	Yes
Create Date Time	Used to indicate the creation date and time of the deferred revenue recognition.	Yes
Financial Transaction ID	Used to specify the ID of the financial transaction corresponding to the deferred revenue recognition.  <b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Financial Transactions Search</b> window appears.	Yes

- Enter the required details in the **Related Deferred Revenue Recognitions** section.
- If you want to add more than one related deferred revenue recognition for the deferred revenue recognition, click the **Add** (+) icon and then repeat step 2.

**Note:** However, if you want to remove a related deferred revenue recognition from the deferred revenue recognition, click the **Delete** (🗑️) icon corresponding to the related deferred revenue recognition.

### Related Topics

How to edit a deferred revenue recognition	<a href="#">Editing a Deferred Revenue Recognition</a> on page 2082

## Editing the Deferred Revenue Recognition Schedule Details

### Prerequisites

To edit the details of the deferred revenue recognition schedule, you should have:

- Should have **Allow Editing Switch** as **Yes** on deferred revenue recognition template.

### Procedure

To edit the details of the deferred revenue recognition schedule:

- Search for the deferred revenue recognition in the **Deferred Revenue Recognition** screen.
- In the **Search Results** section, click the link in the **Deferred Revenue Recognition Information** column corresponding to the deferred revenue recognition whose deferred revenue recognition schedule details you want to edit.

The **Deferred Revenue Recognition** screen appears.

- Select the recognition whose details you want to edit in the **Recognition Schedule** zone and click the **Edit** button available in the upper left corner above the table in this zone.

The **Edit Recognition Schedule** screen appears.

**Note:** A recognition schedule from the deferred revenue recognition can be edited only when the deferred revenue recognition is in the **Active** status.

The **Edit Recognition Schedule** screen contains the following fields:

Field Name	Field Description
Deferred Revenue Recognition Information	Displays the information about the deferred revenue recognition.
Financial Transaction Information	Displays the information of the financial transaction corresponding to the deferred revenue recognition.

In addition to these fields, this screen contains following columns:

Column Name	Column Description	Mandatory (Yes or No)
Recognition Date	Used to display the date on which the deferred revenue is recognized.	Yes
Recognition Amount	Used to display the amount of the deferred revenue.	Yes
Adjustment ID	Used to display the adjustment id.	Not applicable

- Modify the details of the recognition schedule.
- If you want to define more than one recognition schedule for the deferred revenue recognition, click the **Add (+)** icon and then repeat step 4.

**Note:** However, if you want to remove a recognition schedule from the deferred revenue recognition, click the **Delete (🗑)** icon corresponding to the recognition schedule.

- Click **Save**.

The changes made to the recognition schedule are saved.

## **Viewing the Log of a Deferred Revenue Recognition**

### **Procedure**

To view the log of a deferred revenue recognition:

- Search for the deferred revenue recognition in the **Deferred Revenue Recognition** screen.
- In the **Search Results** section, click the link in the **Deferred Revenue Recognition Information** column corresponding to the deferred revenue recognition whose log you want to view.

The **Deferred Revenue Recognition** screen appears. It consists of the following tabs:

- [Deferred Revenue Recognition - Main](#) on page 2078
- [Deferred Revenue Recognition - Log](#) on page 2081

- Click the **Log** tab.

The **Log** tab appears.

- View the complete trail of actions performed on the deferred revenue recognition in the **Deferred Revenue Recognition Log** zone.

Column Name	Column Description
Date/Time	Displays the date and time when the action was performed on the dispute request.
Details	Displays the details about the deferred revenue recognition log
User	Indicates the user who has performed deferred revenue recognition
Log Type	Indicates the type of log.
Related Object	Indicates the object or entity which is generated when the action is performed on the deferred revenue recognition
Status Reason	Displays the status reason of action performed on the deferred revenue recognition

## Adding a Log Entry for a Deferred Revenue Recognition

### Procedure

To add a log entry for a deferred revenue recognition:

- Search for the deferred revenue recognition in the **Deferred Revenue Recognition** screen.
- In the **Search Results** section, click the link in the **Deferred Revenue Recognition Information** column corresponding to the deferred revenue recognition whose log you want to edit.

The **Deferred Revenue Recognition** screen appears. It consists of the following tabs:.

- [Deferred Revenue Recognition - Main](#) on page 2078
- [Deferred Revenue Recognition - Log](#) on page 2081

- Click the **Log** tab.

The **Log** tab appears.

- Click on the **Add Log Entry** link in the upper right corner of the **Deferred Revenue Recognition Log** zone.

The **Add Deferred Revenue Recognition Schedule Log** window appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes Or No)
Deferred Revenue Recognition Information	Displays information about the deferred revenue recognition.	Not applicable
Log Details	Used to specify additional comments on the deferred revenue recognition.	Yes

- Enter the comments in the **Log Details** field.

**6. Click Save.**

The log entry is added in the **Deferred Revenue Recognition Log** zone.

# Chapter 35

---

## Product Lifecycle Management

---

### Topics:

- *Prerequisites*
- *Product Status Transition through User Interface*
- *Product Status Transition through a Batch Process*
- *Product Version Status Transition*
- *Product Enrollment Status Transition through User Interface*
- *Product Enrollment Status Transition through a Batch Process*
- *Product Service (Used for Searching)*
- *Product Service (Used for Viewing)*
- *Product (Used for Searching)*
- *Product Version (Used for Viewing)*
- *Product (Used for Viewing)*
- *Product Enrollment (Used for Searching)*
- *Product Enrollment (Used for Viewing)*

Oracle Revenue Management and Billing facilitates a process of managing the entire lifecycle of a product from inception to service and then to retirement. The system allows you to create the following types of products:

- **Standard** - This type of product is a standalone product.
- **Packaged** - This type of a product is a bundle or group of products.
- **Informational** - This type of a product is used in the product hierarchy, but does not have its own pricing.

On creating a product, the status of the product is set to **Draft**. You can associate a product to one or more divisions. You can create a product to product relationship in the system. You can add product versions in the product. A product version is the entity which holds the following information:

- Product services which are offered with the product
- Price list from where the pricing for offered product services should be obtained.
- Eligibility criteria which must be satisfied when the account enrolls for the product.

The above information is captured when you create a product version for a standard product. However, when you create a product version for a packaged product, it holds the following information:

- Standard products which are offered in the packaged product.

**Note:** Some of these products might be compulsorily offered with the packaged product while some of the products might be optional.

- Standard products' services which are offered in the packaged product.

**Note:** Some of these product services might be compulsorily offered with the standard product while some of the product services might be optional.

- Add-on product services which are offered in the packaged product.
- Price list from where the pricing for offered product services and add-on product services should be obtained.
- Eligibility criteria which must be satisfied when the account enrolls for the packaged product.

A product version is effective from a particular date and its effective date must fall within the product date range. On creating a product version, the status of the product version is set to **In Progress**. You can activate a product only when at least one of its product versions is in the **Finalized** status.

A product service can be associated to one or more price items. A product service can be offered with a product only when it is associated with at least one price item in the system.

Once the product is activated, you can enroll the account for the product. On enrolling for a product, the system retrieves the product details from the product version which is effective on the system date. While enrolling for a standard product, you cannot remove mandatory product services from the product. However, you can enroll for optional product services which are offered with the product.

Similarly, while enrolling for a packaged product, you cannot remove mandatory products and product services from the packaged product. However, you can enroll for optional products and product services which are offered with the packaged product. While enrolling an account for a product, you can set the product enrollment priority for the account.

Once you create the product enrollment, the status of the enrollment is set to **Pending**. On submitting the product enrollment, the validation process is initiated. If all conditions are met, the status of the product enrollment is changed to **Enrolled**. You can unenroll for the product, whenever required.

You can retire a product, whenever required. The product, product version, and product enrollment goes through various statuses in their lifecycle.

The following batches are newly introduced for the Product Lifecycle Management feature:

- Product BO Monitor (C1-PRTRN)
- Product Enrollment Monitor (C1-ENTRN)

For more information on how to setup the product lifecycle management feature, see [Prerequisites](#) on page 2091.

## Prerequisites

---

To setup the product lifecycle management feature, you need to do the following:

- Define the required customer and account in the system.
- Create a approval workflow group with a group name **PRODUCTPLM** for the product and product version.
- Define the feature configuration as **C1-PRODCH**.
- Define the sequence of execution of **C1-PROD-TDCC**, **C1-TRAN-RETR**, and **C1-PROD-ACTV** algorithms, in the **ACTIVE** status of the **C1\_PRODUCT\_BO** business object.
- Define the following parameters for the predefined **C1-PROD-TDCC** algorithm-type.
  - To Do Type1
  - Number of Days
  - Customer Contact
- Define the parameters for the predefined **C1-PRTRN** batch control.

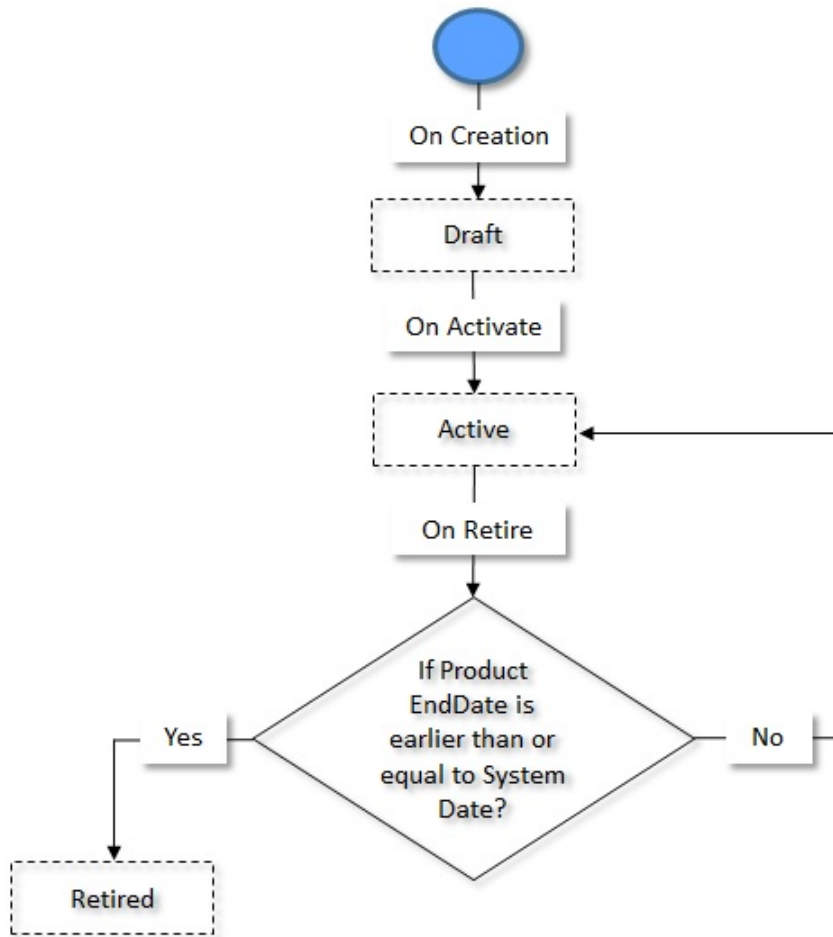

**Note:** If the batch date is not defined while creating the batch control, system date is assigned as the batch date.

- Define at least one packaged or standard product for product enrollment purposes.
- Associate at least one price list with a product, when you are defining single or multiple product versions.

## Product Status Transition through User Interface

---

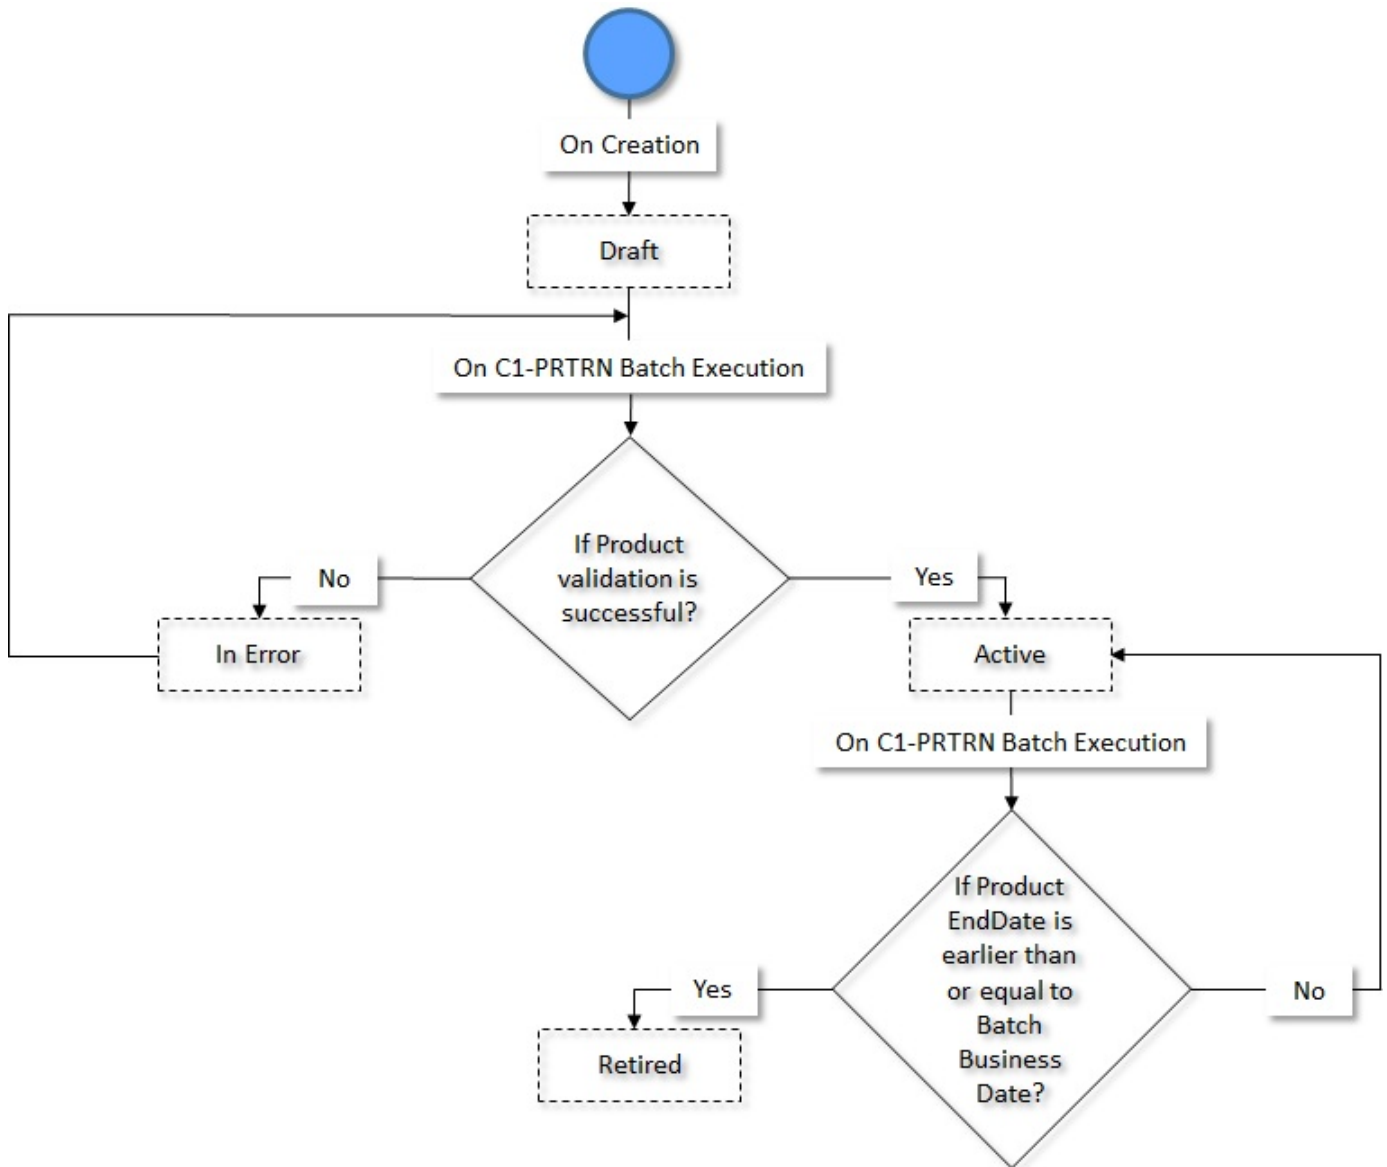

The following figure graphically indicates how a product moves from one status to another through the user interface:

## Product Status Transition through a Batch Process

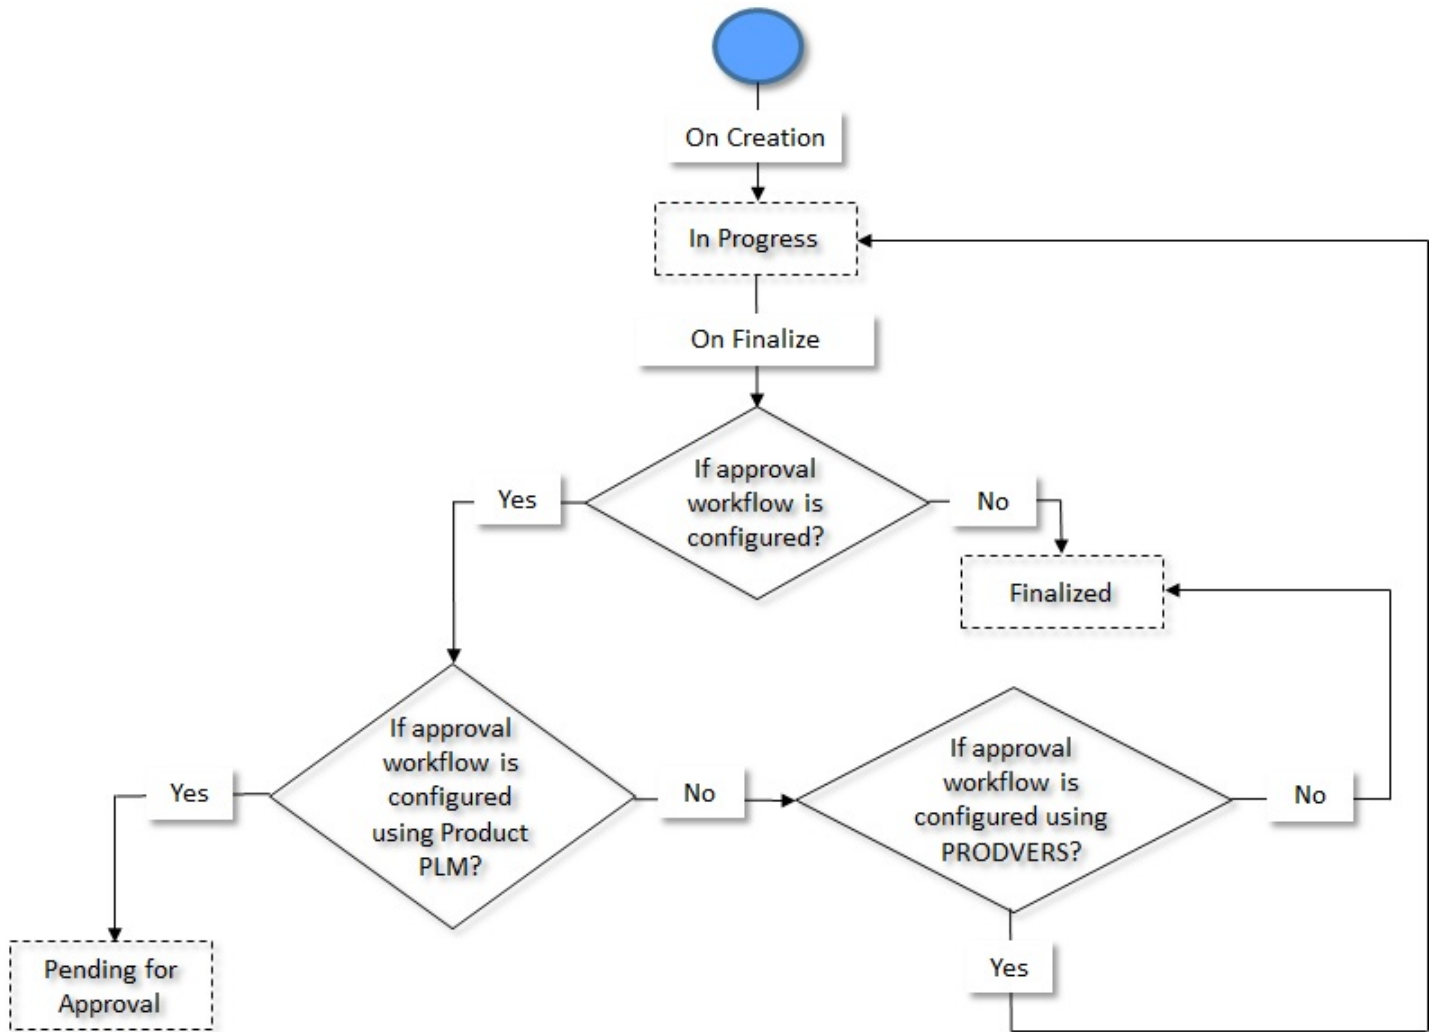

---

The following figure graphically indicates how a product moves from one status to another through the **Product BO Monitor** batch:

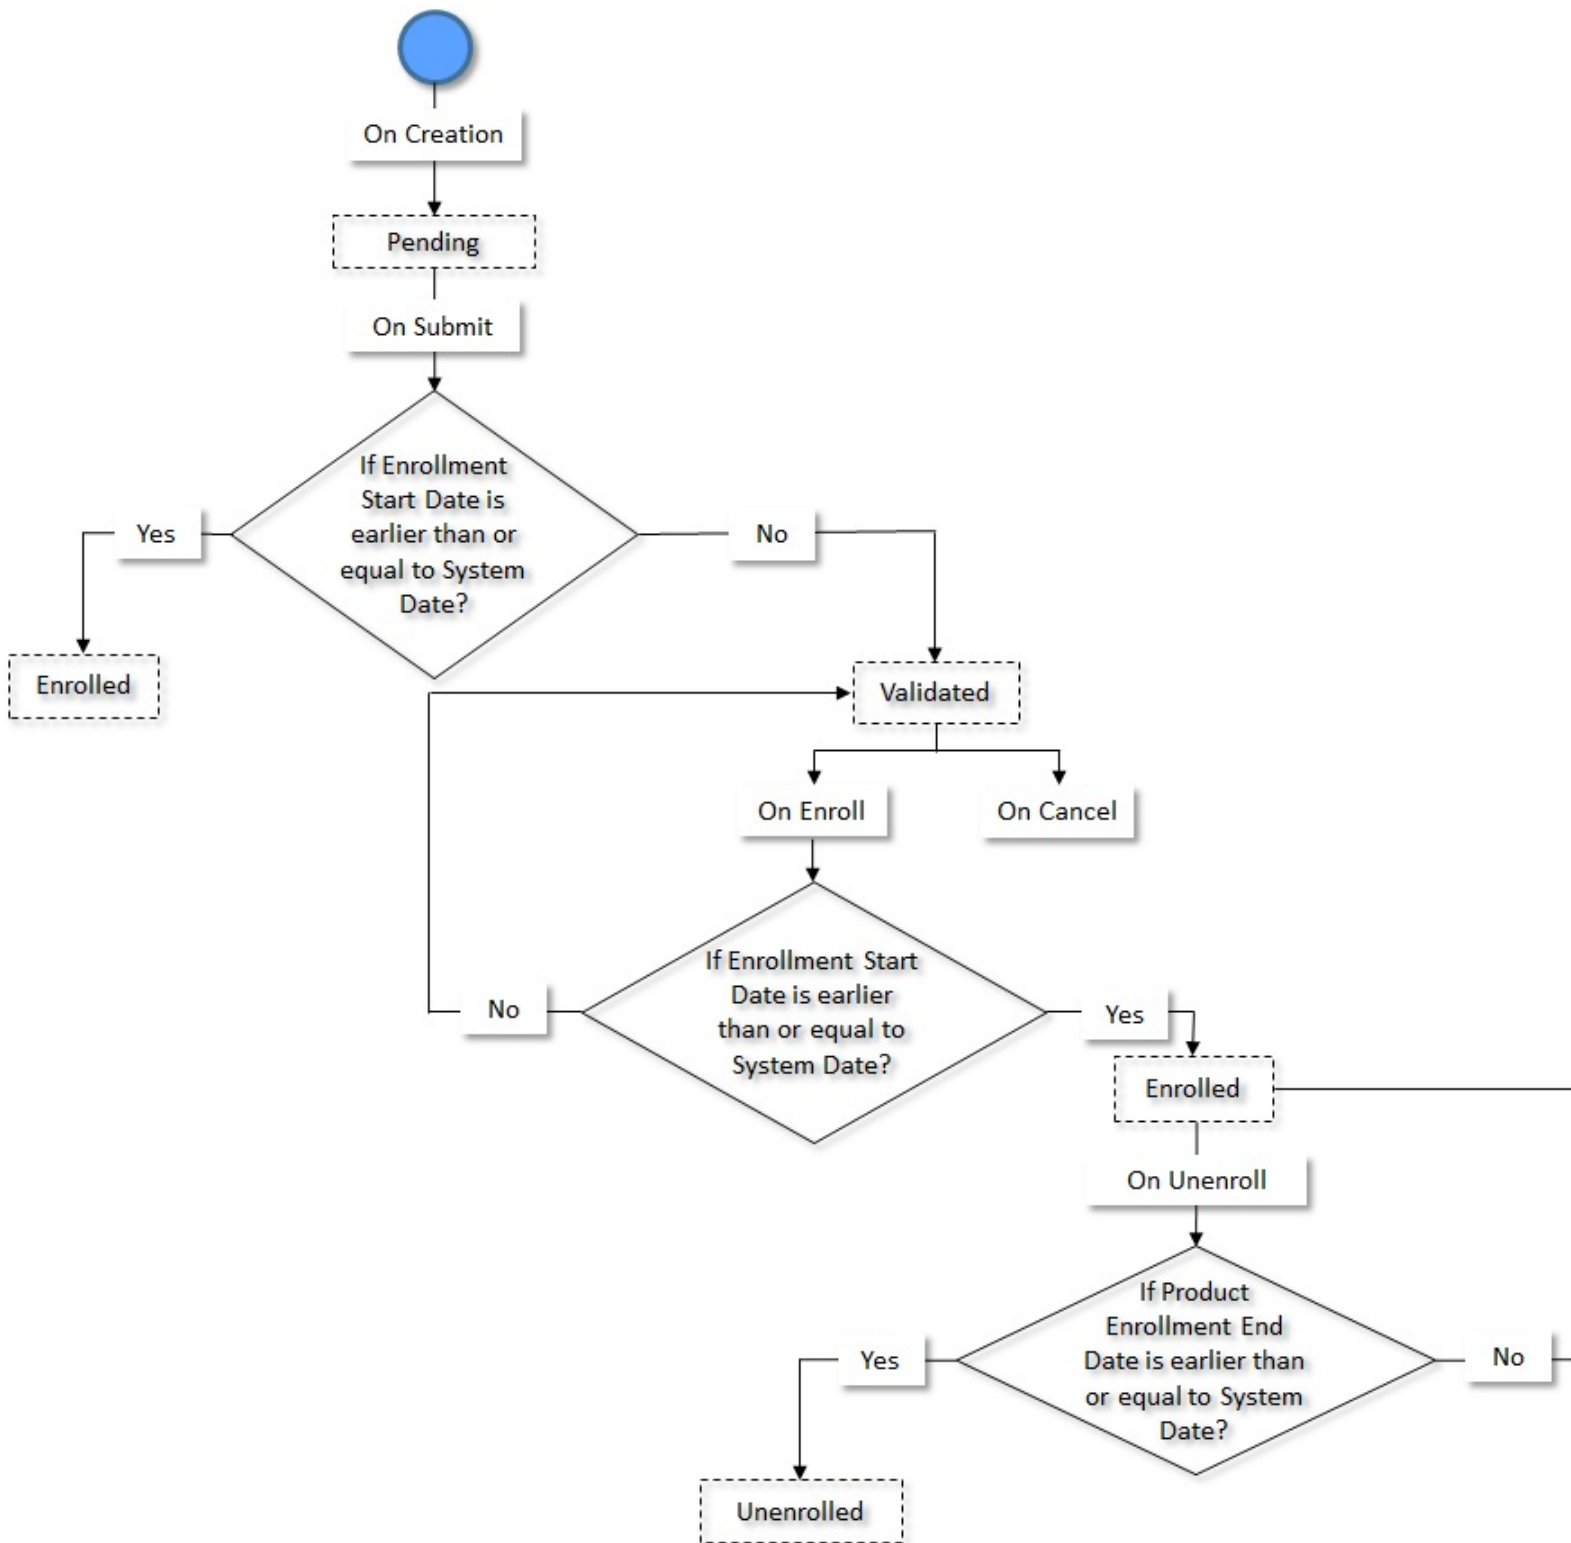

## Product Version Status Transition

## Product Enrollment Status Transition through User Interface

The following figure graphically indicates how a product enrollment moves from one status to another through the user interface:

## Product Enrollment Status Transition through a Batch Process

The following figure graphically indicates how a product enrollment moves from one status to another through the **Product Enrollment Monitor (C1-ENTRN)** batch:

## Product Service (Used for Searching)

The **Product Service** screen allows you to search for a product service using various search criteria. Through this screen, you can navigate to the following screen:

- [Product Service \(Used for Viewing\)](#) on page 2104

This screen consists of the following zone:

- [Search Product Service](#) on page 2097

For more information on...	See...
How to search for a product service	<a href="#">Searching for a Product Service</a> on page 2098
How to view the details of a product service	<a href="#">Viewing the Product Service Details</a> on page 2103

## Search Product Service

The **Product Service Search** zone allows you to search for a product service using various search criteria. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Product Service	Used to search for a product service based on the unique user-defined product service.	No
Description	Used to specify the description of a product service.	No
Start Date	Used to search for product service which starts from a particular date onwards.	No
End Date	Used to search for product service which is created till a particular date.	No
Price Item Information	Used to search for product service for which a price item information is created or updated in the system.	No

**Note:** You must specify at least one search criterion while searching for a product service.

- **Search Results** - On clicking the **Search** button, the search results are filtered based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Product Service	Displays the service code of a product service.
Description	Displays the description of product service. <b>Note:</b> It has a link. On clicking the link, the <b>Product Service</b> screen appears where you can view the details of the respective product service.
Start Date	Displays the date from when the product service is effective.
End Date	Displays the date till when the product service is effective.

On clicking the **Broadcast**  icon corresponding to a service code, the **Price Items** zone appears with the details of the respective product service.

### **Related Topics**

<b>For more information on...</b>	<b>See...</b>

<b>Associated Price Item</b> zone	<a href="#">Price Items</a> on page 2105

## **Associated Price Items**

The **Product Service Price Item** zone lists various price items that are associated with a service. It contains the following columns:

<b>Column Name</b>	<b>Column Description</b>
Price Item Information	Displays the price item information that is associated with a service.  <b>Note:</b> It has a link. On clicking the link, the <b>Price Item</b> screen appears where you can view the details of the respective price item.
Start Date	Displays the date from when the product service will begin.
End Date	Displays the date till when the product service will be available.

How to define a Product Service	<a href="#">Defining a Product Service</a> on page 2099
Viewing the Product Service Price Items	<a href="#">Viewing the Product Service Price Items</a> on page 2099

## **Searching for a Product Service**

### **Prerequisite**

To search for a product service, you should have:

- Product Service defined in the application.
- Price Item defined in the application.

### **Procedure**

To search for a product service:

1. From the **Main** menu, select **Pricing Management** and then click **Product Service**.  
A sub-menu appears.
2. Click the **Search** option from the **Product Service** sub-menu.  
The **Product Service** screen appears.
3. Enter the search criteria in the [Search Product Service](#) on page 2097 zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

#### 4. Click **Search**.

A list of product services that meet the search criteria appear in the **Search Results** section.

## Viewing the Product Service Price Items

### Procedure

To view the price items of the product:

1. Search for a product service in the **Product Service** screen.
2. In the **Search Results** section, click the **Broadcast**  icon corresponding to a service code whose details you want to view.

The **Price Items** zone appears. It contains the following columns:

Column Name	Column Description
Price Item	Displays the price item code that is set for each product service. <b>Note:</b> It has a link. On clicking the link, the <b>Price Item</b> screen appears where you can view the details of the respective price item.
Start Date	Displays the date from when the product service will begin.
End Date	Displays the date till when the product service will be available.

## Defining a Product Service

### Prerequisites

To define a product service, you should have:

- Characteristic Type defined in the application (where the characteristic entity is set to **Product Service**)
- Price Item business object defined in the application.

### **Procedure**

To define a product service:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Menu** list, select **Pricing Management**, and then click **Product Service**.  
The sub-menu appears.
3. Click the **Add** option from the **Product Service** sub-menu.

The **Product Service** screen appears. It contains the following sections:

- **Main** - Used to specify basic details of the product service.
- **Characteristics** - Used to define characteristics for a product service.
- **Price Items** - Used to define price item for a product service.

The **Main** section contains the following fields:

<b>Field Name</b>	<b>Field Description</b>	<b>Mandatory (Yes or No)</b>
Product Service	Used to specify the product service. <b>Note:</b> While defining a product service, ensure that at least one price item is associated with the product service.	Yes
Description	Used to specify the description of a product service.	Yes
Start Date	Used to specify the date from when the product service is effective. <b>Note:</b> The product service end date cannot be earlier than the product service start date.	Yes
End Date	Used to specify the date till when the product service is effective. <b>Note:</b> The product service end date cannot be earlier than the product service start date.	Yes

#### **Note:**

If the product service is used in one or more product versions, the product service's end date cannot be earlier than the product version's effective date.

4. Enter the required details in the **Main** section.

#### **Note:**

The Start Date field is mandatory.

5. Define the characteristics for a product service, if required.
6. Define the price item for a product service.
7. Click **Save**.

The product service is defined.

### Related Topics

For more information on...	See...
Defining the characteristics for a product service	<a href="#">Defining a Characteristics for a Product Service</a> on page 2102
Associating the product service with a Price Item	<a href="#">Associating a Product Service with a Price Item</a> on page 2101

## Associating a Product Service with a Price Item

### Prerequisites

To associate a product service with a price item, you should have:

- Price Item business object defined in the application.

### Procedure

To associate a product service with a price item:

1. Ensure that the **Price Items** section is expanded when you are defining, editing, or copying a product service.

The Price Item section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Price Item	Used to specify the price item which is associated with this product service.  <b>Note:</b> The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Price Item Search</b> window appears.	No
Start Date	Used to specify the date from when the product service is effective.	No
End Date	Used to specify the date till when the product service is effective.  <b>Note:</b> The price item end date cannot be earlier than the price item start date.	No

2. Enter the required details in the **Price Items** section.

**Note:** The product service is used in one or more product versions, and therefore the product service's start date cannot be later than the product version's effective date.

3. If you want to associate one or more price items with the product service, click the **Add**  icon and then repeat step 2. However, if you want to remove the price items from the product service, click the **Delete**  icon corresponding to the price item.
4. Click **Save**.

**Note:**

You cannot associate the same price item multiple times with the product service.

You can remove a price item from the product service even though the product version is in the Finalized status. A To Do Type named **C1-SVCU1** gets created whenever any modifications are made to the product service.

You can associate a price item with a product service only when the price item's date range is within the product service's date range.

If there are changes with respect to the price items associated with the product service, then you must create a new version for that product.

The product service is associated with the price item.

**Defining a Characteristics for a Product Service****Prerequisites**

To define characteristics for a product service, you should have:

- Characteristic Type defined in the application (where the characteristic entity is set to **Product Service**)

**Procedure**

To define characteristics for a product service:

1. Ensure that the **Characteristics** section is expanded when you are defining, editing, or copying a product service.

The **Characteristics** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the product service.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the product service.
Characteristic Type	Used to indicate the characteristic type. <b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Product Service</b>	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the product service.

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Value	<p>Used to specify the value for the characteristic type.</p> <p><b>Note:</b> If you select a predefined characteristic type, the <b>Search</b> (🔍) icon appears corresponding to the <b>Characteristic Value</b> field. On clicking the <b>Search</b> icon, you can search for a predefined characteristic value.</p> <p>On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required when you are defining a characteristic for the product service.</p>

- Enter the required details in the **Characteristics** section.
- If you want to define more than one characteristic for the product service, click the **Add** (+) icon and then repeat step 2. However, if you want to remove a characteristic from the product service, click the **Delete** (🗑️) icon corresponding to the characteristic.
- Select an appropriate characteristic type from the **Characteristic Type** list.

## Viewing the Product Service Details

### Procedure

To view the details of the product service:

- Search for a product service in the **Product Service** screen.
- In the **Search Results** section, click the link in the **Description** column corresponding to the service code whose details you want to view.

The **Product Service** screen appears. It contains the following zones:

- Product Service**
- Associated Price Items**

- View the product service details in the [Product Service](#) on page 2104 zone.

<b>Product Service Search</b> zone	<a href="#">Search Product Service</a> on page 2097
<b>Associated Price Items</b> zone	<a href="#">Price Items</a> on page 2105

## Product Service

The **Product Service** zone displays the details of the product service. It contains the following sections:

- **Main** - Displays the basic information about the product service. It contains the following fields:

Field Name	Field Description
Product Service	Displays the product service that is assigned to a product service.
Description	Displays the description of the product service.
Start Date	Displays the date when the product service starts.
End Date	Displays the date when the product service ends.

- **Characteristics** - Lists the characteristics defined for the product service. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the characteristic is effective for the product service.
Characteristic Type	Indicates the characteristic type.

Column Name	Column Description
Characteristic Value	Displays the value of the characteristic type.

- **Record Actions** - This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the product service.
Delete	Used to delete the product service.
Duplicate	Used to create a new product service using an existing product service information.

- **Record Information** - This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the product service is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.

## Price Items

The **Product Service Price Item** zone lists various price items that are associated with a service. It contains the following columns:

Column Name	Column Description
Price Item Information	Displays the price item information that is associated with a service.  <b>Note:</b> It has a link. On clicking the link, the <b>Price Item</b> screen appears where you can view the details of the respective price item.
Start Date	Displays the date from when the product service will begin.
End Date	Displays the date till when the product service will be available.

How to duplicate the details of the product service	<a href="#">Copying a Product Service</a> on page 2107

## Editing a Product Service

### Procedure

To edit a product service:

1. Search for the product service in the **Product Service**.
2. In the **Search Results** section, click the link in the **Description** column corresponding to the product service whose details you want to edit.  
The **Product Service** screen appears.
3. Click the **Edit** button in the **Product Service** zone.  
The **Product Service** screen appears.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

4. Modify the details of the product service in the main section, if required.
5. Modify the characteristics for a product service, if required.
6. Associate the price items with a product service, if required.
7. Click **Save**.

The changes made to the product service are saved.

### **Related Topics**

## **Deleting a Product Service**

### **Procedure**

To delete a product service:

1. Search for the product service in the **Product Service**.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

2. In the **Search Results** section, click the link in the **Description** column corresponding to the product service whose details you want to delete.  
The **Product Service** screen appears.
3. Click the **Delete** button in the **Product Service** zone.

A message appears confirming whether you want to delete the product service.

**Note:** If the product service is associated with the product version, then the product service cannot be deleted.

#### 4. Click **OK**.

The product service is deleted.

#### Related Topics

For more information on...	See...
How to search for a product service	<a href="#">Searching for a Product Service</a> on page 2098

## Copying a Product Service

Instead of creating a product service from scratch, you can create a new product service using an existing product service. This is possible through copying a product service. On copying a product service, the details including the algorithms and characteristics are copied to the new product service. You can then edit the details, if required.

#### Prerequisites

To define a product service, you should have:

- Characteristic Type defined in the application (where the characteristic entity is set to **Product Service**)
- Price Item business object defined in the application.

#### Procedure

To define a product service:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Menu** list, select **Pricing Management**, and then click **Product Service**.  
The sub-menu appears.
3. Click the **Search** option from the **Product Service** sub-menu.

The **Product Service** screen appears. It contains the following sections:

- **Main** - Used to specify basic details of the product service.
- **Characteristics** - Used to define characteristics for a product service.
- **Price Items** - Used to define price item for a product service.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Product Service	Used to specify the product service.	Yes
Description	Used to specify the description of a product service.	Yes
Start Date	Used to specify the date from when the product service is effective.	Yes
End Date	Used to specify the date till when the product service is effective.	Yes

**Tip:** Alternatively, you can click the **Duplicate** button in the **Record Actions** section, in the **Product Service** zone to create a copy of the product service.

4. Enter the required details in the **Main** section.
5. Define the characteristics for a product service, if required.

6. Define the price item for a product service, if required.
7. Click **Save**.

The new product service is defined.

## **Searching for a Product**

### **Prerequisite**

To search for a product, you should have:

- Product Type defined in the application.
- Product Category defined in the application.
- Division defined in the application.
- Relationship Type defined in the application.

### **Procedure**

To search for a product:

1. From the **Main** menu, select **Pricing Management** and then click **Product**.

A sub-menu appears.

- Click the **Search** option from the **Product** sub-menu.

The **Product** screen appears.

- Enter the search criteria in the **Search Product** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

- Click **Search**.

A list of products that meet the search criteria appear in the **Search Results** section.

## Defining a Product

### Prerequisites

To define a product, you should have:

- Product Type should be defined in the application.
- Product Category should be defined in the application.

### Procedure

To define a product:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Menu** list, select **Pricing Management**, and then click **Product**.  
The sub-menu appears.

The sub-menu appears.

3. Click the **Add** option from the **Product** sub-menu.

The **Product** screen appears. It contains the following sections:

- **Main** - Used to specify basic details of the product.
- **Divisions** - Used to define characteristics for a product.
- **Product to Product Relationship** - Used to define product to product relationship for a product.
- **Characteristics** - Used to define characteristics for a product.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Product	Used to specify the product.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Description	Used to specify the description of a product.	Yes
Status	Displays the status of the product. <b>Note:</b> Whenever a new product is added, it will have the status as <b>Draft</b> .	Yes
Product Type	Used to indicate the type of a product.	Yes
Product Category	Used to indicate the category of a product.	Yes
Start Date	Used to specify the date from when the product is effective.	Yes
End Date	Used to specify the date till when the product is effective.	No
Compliance Number	Used to specify the compliance number received from the legal department.	No
Product Manager To Do Role	Used to specify all the To Do raised against this product that are further assigned to this product manager To Do role.	No

4. Enter the required details in the **Main** section.

**Note:**  
You cannot add or edit a product version when the product is in the Retired status.  
The Start Date field is mandatory.

5. Associate a division with a product, if required.  
6. Define the characteristics for a product, if required.

**Note:**  
Ensure that the value is specified for the characteristic type option type in the C1-PRODCH feature configuration.  
Ensure that a valid value is specified for the characteristic type.

7. Define the price item for a product, if required.  
8. Click **Save**.

The product is defined.

## Associating a Product with a Division

### Prerequisites

To associate product with a division, you should have:

- Division defined in the application.

### Procedure

To associate product with a division:

1. Ensure that the **Divisions** section is expanded when you are defining, editing, or copying a product.

The Division section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Division	Used to specify the division of the product.	Yes

2. Enter the required details in the **Divisions** section.

#### Note:

At least one division must be associated with the product.

3. If you want to associate one or more divisions with the product, click the **Add** (+) icon and then repeat step 2.

#### Note:

However, if you want to remove the divisions from the product, click the **Delete** (🗑️) icon corresponding to the product.

4. Click **Save**.

#### Note:

Ensure that the division associated with the product is associated to the price list.

You cannot remove the division from the product because the price list associated to the product version which is effective on (mention date) is associated to the division.

The divisions are associated with the product.

## Defining a Product to Product Relationship

### Prerequisites

To define a product to product relationship, you should have:

- Relationship Type defined in the application.

### Procedure

To define a product to product relationship:

1. Ensure that the **Product to Product Relationship** section is expanded when you are defining, editing, or copying a product.

The Product to Product Relationship section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Product	Used to specify the product.	Yes
Relationship Type	Used to indicate the relationship type with the product. The valid values are: <ul style="list-style-type: none"> <li>• Child product</li> <li>• Parent product</li> </ul>	Yes
Effective Start Date	Used to specify the date from when the product to product relationship will begin.	No
Effective End Date	Used to specify the date till when the product to product relationship will be available.	No

2. Define the details of the product in the main section, if required.

**Note:**  
The product to product relationship start and end dates must be within the product's start and end dates.

3. Define the division for a product, if required.

**Note:**  
The division associated with the child product is not associated with the packaged product.

4. Define the product to product relationship for a product, if required.

**Note:**  
The child product that you want to add in the product version is not effective, as it must be in an active state.

5. Define the characteristics for a product, if required.
6. Click **Save**.

The product to product relationship is defined.

4. Click the **Add** link in the **Product Version** zone.

The **Product Version** screen appears.

5. Click the **Product Services** link mentioned in the **Sections** navigation panel.

The **Eligibility** section appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Criteria	Displays the criteria (  ) icon. By clicking the criteria icon, additional fields are displayed that allow you to enter various types of criteria.	Not applicable
Eligibility Type	Indicates the list of logical criteria that is checked during enrollment of the customer to the Product and Product Version. The valid value is: <ul style="list-style-type: none"> <li>• Eligibility Rule</li> </ul>	No
Start Date	Used to specify the date from when the eligibility criteria will be effective.	Yes (Conditional) <div style="border: 1px solid black; padding: 5px; margin-top: 5px;"> <p><b>Note:</b> This field is required when you have selected the eligibility criteria from the eligibility type dropdown.</p> </div>
End Date	Used to specify the date till when the eligibility criteria will be effective.	No
Description	Used to specify the description for the eligibility criteria.	No

Field Name	Field Description	Mandatory (Yes or No)
Sequence	Used to specify the order in which the product version eligibility criteria should be executed.	Yes
Parameter	Indicates the parameter (on the left hand side) which is used in the pricing eligibility criteria.	No
Operator	Displays the relational operator to define the relation between the parameter name and value.	Yes
Parameter Value Type	Indicates the parameter value against which you want to compare the parameter.	No
Parameter	Indicates the parameter (on the right hand side) against which you want to compare the parameter (on the left hand side).	No
Is True	Indicates what happens when the condition is true (satisfied). The valid values are: <ul style="list-style-type: none"> <li>• <b>Check Next Condition</b> - Indicates that the condition with consecutive sequence number should be executed.</li> <li>• <b>Rule Is False</b> - Indicates that the action specified in the <b>Rule False Action</b> field should be executed.</li> <li>• <b>Rule Is True</b> - Indicates that the action specified in the <b>Rule True Action</b> field should be executed.</li> </ul>	No
Is False	Indicates what happens when the condition is false (not satisfied). The valid values are: <ul style="list-style-type: none"> <li>• <b>Check Next Condition</b> - Indicates that the condition with consecutive sequence number should be executed.</li> <li>• <b>Rule Is False</b> - Indicates that the action specified in the <b>Rule False Action</b> field should be executed.</li> <li>• <b>Rule Is True</b> - Indicates that the action specified in the <b>Rule True Action</b> field should be executed.</li> </ul>	No
Is Insufficient	Indicates what happens when the data is insufficient. The valid values are: <ul style="list-style-type: none"> <li>• <b>Check Next Condition</b> - Indicates that the condition with consecutive sequence number should be executed.</li> <li>• <b>Rule Is False</b> - Indicates that the action specified in the <b>Rule False Action</b> field should be executed.</li> <li>• <b>Rule Is True</b> - Indicates that the action specified in the <b>Rule True Action</b> field should be executed.</li> </ul>	No

6. Enter the required details in the **Eligibility** section.
7. If you want to add more than one eligibility / criteria to the product version, click the **Add** (+) icon. However, if you want to remove a eligibility / criteria from the **Eligibility** section, click the **Delete** (🗑) icon corresponding to the criteria / sequence field.

8. Click **Save**.**Note:**

You cannot define eligibility criteria for the product version when the eligibility criteria is already defined for the price list.

You cannot define an eligibility criteria whose start date is earlier than the product version effective date.

You cannot define multiple eligibility criteria for the product version with the overlapping date range.

The eligibility is defined for the product version.

How to define characteristics for a product version	<a href="#">Defining Characteristics for a Product Version</a> on page 2126

**Defining Characteristics for a Product Version****Procedure**

To define characteristics for a product version:

1. Search for a product in the **Search Product** zone.
2. In the **Search Results** section, click the link in the **Description** column corresponding to the product whose details you want to view.

The **Product** screen appears. It consists of the following tabs:

- Product — Main
- Product — Log

3. Ensure that the **Main** tab is selected.
4. Click the **Add** link in the **Product Version** zone.

The **Product Version** screen appears.

5. Click the **Product Services** link mentioned in the **Sections** navigation panel.

The **Characteristics** section appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the product version.	Yes (Conditional)

**Note:** This field is required when you are defining a characteristic for the price item or price item bundle.

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Type	Used to indicate the characteristic type.  <b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to Price Item.	Yes (Conditional)  <b>Note:</b> This field is required when you are defining a characteristic for the price item or price item bundle.
Characteristic Value	Used to specify the value for the characteristic type.  <b>Note:</b> On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the Characteristic Value field.	Yes (Conditional)  <b>Note:</b> This field is required when you are defining a characteristic for the price item or price item bundle.

6. Enter the required details in the **Characteristics** section.
7. If you want to add more than one characteristic to the product version, click the **Add** (+) icon. However, if you want to remove a characteristic from the **Characteristics** section, click the **Delete** (🗑️) icon corresponding to the effective date field.
8. Click **Save**.

The characteristics are defined for the product version.

How to finalize a product version	<a href="#">Finalizing a Product Version</a> on page 2138
How to view the log of a product version	<a href="#">Viewing the Log of a Product Version</a> on page 2139

## Product Version - Main

The **Product Version - Main** tab displays information about the product version and services. It contains the following zones:

- [Product Version](#) on page 2128
- [Services](#) on page 2131
- [Add-on Product Services](#) on page 2131
- [Price Items](#) on page 2105
- [Eligibility Criteria](#) on page 2132

## Product Version

The **Product Version** zone displays the details of the product version. It contains the following sections:

- **Main** - Displays the basic information about the product version. It contains the following fields:

Field Name	Field Description
Product	Displays information about the product. <b>Note:</b> It has a link. On clicking the link, the <b>Product</b> screen appears where you can view the details of the product.
Effective Date	Displays the date from when the product version will be effective.
Product Type	Displays the type of product for which the product version is created.
Status	Displays the status of the product version.
Description	Displays the description of the product version.
Terms and Conditions	Displays the terms and conditions that are applicable for the product version.

- **Record Actions** - This section contains the following fields:

Button Name	Button Description
Edit	Used to edit the details of the product version. <b>Note:</b> The <b>Edit</b> button appears only when the product version status is <b>In Progress, Finalized, and Draft</b> .
Delete	Used to delete the details of the product version. <b>Note:</b> The <b>Delete</b> button appears only when the product version status is <b>In Progress, Finalized, and Draft</b> .
Duplicate	Used to create a new version using an existing product version. <b>Note:</b> The <b>Duplicate</b> button appears only when the product version status is <b>In Progress, Finalized, and Draft</b> .
Finalized	Used to finalize all the changes and make the product <b>Active</b> .

- **Record Information** - This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the product version is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.

- **Characteristics** - Lists the characteristics defined for the product version. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the product version is effective.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- Enter the required details in the [Products](#) on page 2130 zone.
- Enter the required details in the [Product Services](#) on page 2130 zone.

**Note:** Products and Product Services section is displayed only when the product type is selected as **Packaged** product from the [Search Product](#) on page 2108 zone in the **Product** screen.

- Enter the required details in the [Add-on Product Services](#) on page 2131 zone.
- Enter the required details in the [Services](#) on page 2131 zone.

**Note:** The services section appear only when the product type is selected as a **Standard** product from the [Search Product](#) on page 2108 zone in the **Product** screen.

- Enter the required details in the [Price List](#) on page 2132 zone.
- Enter the required details in the [Eligibility Criteria](#) on page 2132 zone.

## Products

The **Products** zone displays the details of the product. It contains the following fields:

Field Name	Field Description
Product	Displays the product service that is assigned to a product.
Effective Date	Displays the date from when the product is effective.
Description	Displays the description of the product

### Eligibility Criteria

The **Eligibility Criteria** zone displays the list of criteria that decide the enrolment of the product towards an entity. It contains the following columns:

Column Name	Column Description
Eligibility Type	Indicates the eligibility type of the product service. The valid values are: <ul style="list-style-type: none"> <li>Eligibility Rule</li> </ul>
Effective Start Date	Displays the date from when the eligibility type is effective.
Effective End Date	Displays the date till when the eligibility type is effective.
Description	Displays the description of the eligibility type.
Sequence	Displays the sequence number.

Column Name	Column Description
Parameter	<p>Displays the eligibility condition that is assigned to an entity.</p> <div style="border: 1px solid black; padding: 5px; background-color: #f0f0f0;"> <p><b>Note:</b></p> <p>The <b>Search</b> () icon appears corresponding to the <b>Approval Level</b> field. On clicking the search icon, the <b>Approval Level Search</b> search window appears.</p> </div>
Operator	<p>Indicates various types of conditional operators used for eligibility criteria purposes. The valid values are:</p> <ul style="list-style-type: none"> <li>• &lt;</li> <li>• &lt;=</li> <li>• &lt;&gt;</li> <li>• =</li> <li>• &gt;</li> <li>• &gt;=</li> <li>• Between</li> <li>• In</li> <li>• Like</li> <li>• Not In</li> </ul>
Parameter Value Type	<p>Indicates the value type of the parameter. The valid values are:</p> <ul style="list-style-type: none"> <li>• Parameter</li> <li>• Value</li> </ul>
Parameter	Indicates the actual value that is assigned for an entity.
Parameter Value	Displays the actual value of the parameter that is assigned for an entity.
Is True	<p>Indicates what should happen when the condition is true (satisfied). The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Check Next Condition</b> - Indicates that the condition with consecutive sequence number should be executed.</li> <li>• <b>Rule Is False</b> - Indicates that the action specified in the Rule False Action field should be executed.</li> <li>• <b>Rule Is True</b> - Indicates that the action specified in the Rule True Action field should be executed.</li> </ul>
Is False	<p>Indicates what should happen when the condition is false (not satisfied). The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Check Next Condition</b> - Indicates that the condition with consecutive sequence number should be executed.</li> <li>• <b>Rule Is False</b> - Indicates that the action specified in the Rule False Action field should be executed.</li> <li>• <b>Rule Is True</b> - Indicates that the action specified in the Rule True Action field should be executed.</li> </ul>

Column Name	Column Description
Is Insufficient	Indicates what should happen when the data is insufficient. The valid values are: <ul style="list-style-type: none"> <li>• <b>Check Next Condition</b> - Indicates that the condition with consecutive sequence number should be executed.</li> <li>• <b>Rule Is False</b> - Indicates that the action specified in the Rule False Action field should be executed.</li> <li>• <b>Rule Is True</b> - Indicates that the action specified in the Rule True Action field.</li> </ul>

## Product Version - Log

The **Product Version - Log** tab contains the following zone:

- [Product Version Log](#) on page 2134

### Product Version Log

The **Product Version - Log** zone lists the complete trail of actions performed on the product version. It contains the following columns:

Column Name	Column Description
Date Time	Displays the date and time when the action was performed on the product version.
Details	Displays the details about the action performed on the product version.
User	Displays the user who has performed the action on the product version.
Log Type	Displays the type of log.
Related Object	Displays the object or entity that is generated when the action is performed on the product version.
Status Reason	Displays the status reason of action performed on the product version.

## Editing a Product Version

### Procedure

To edit a product version:

1. Search for the product in the **Search Product** zone.
2. In the **Search Results** section, click the **Broadcast**  icon, corresponding to the product column.

The **Product Version List** zone appears.

- Click the link in the **Description** column, corresponding to the status column.

The **Product Version** screen appears.

- Click the **Edit** button in the **Product Version** zone.

The **Product Version** screen appears.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

- Modify the details of the product version in the main section, if required.

**Note:**

The effective date of a product version cannot be later than the product end date.

- Define, edit, or remove the products and/or services for a product version, if required.

**Note:**

You must select the Inclusion check box when the product service is defined as mandatory in the effective product version.

- Modify the price list for a product version, if required.
- Define, edit, or remove the eligibility for a product version, if required.
- Define, edit, or remove the characteristics for a product version, if required.
- Click **Save**.

**Note:**

You cannot edit the details of the product version except the characteristics when the product version is in the Finalized status.

The changes made to the product version are saved.

## Deleting a Product Version

### Procedure

To delete a product version:

1. Search for the product in the **Search Product** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

2. In the **Search Results** section, click the **Broadcast**  icon, corresponding to the product column.

The **Product Version List** zone appears.

3. Click the link in the **Description** column, corresponding to the status column.

The **Product Version** screen appears.

4. Click the **Delete** button in the **Product Version** zone.

A message appears confirming whether you want to delete the product version.

5. Click **OK**.

**Note:**

You cannot delete the product version which is in the Finalized status.

The product version is deleted.

## Copying a Product Version

Instead of creating a product version from scratch, you can create a new product version using an existing product version. This is possible through copying a product version. On copying a product version, the details including the algorithms and characteristics are copied to the new product version. You can then edit the details, if required.

### Prerequisites

To copy a product version, you should have:

- Product and Product Type defined in the application.
- Product Status and Service Code defined in the application.
- Product Category, Division, and Product To Do Role defined in the application.
- Eligibility Type, Characteristic Type, Price List, and Terms and Conditions defined in the application.
- Parameter, Operator, Parameter Value Type, Is True, Is False, and Is Sufficient defined in the application.

**Procedure**

To copy a product version:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Menu** list, select **Pricing Management**, and then click **Product**.  
The sub-menu appears.
3. Click the **Search** option from the **Product** sub-menu.  
The **Product** screen appears.
4. In the **Search Results** section, click the **Broadcast**  icon corresponding to the product column whose version you want to copy.  
The **Product Version List** zone appears.
5. Click the link in the **Description** column, to view the details of the product version.  
The **Product Version** screen appears.
6. Click the **Duplicate** button in the **Record Actions** section.

The **Product Version** screen appears. It contains the following sections:

- **Main** - Used to specify basic details of the product version.
- **Products and Services** - Used to define the products and services for a product version.
- **Price List**  
- Used to define the Price List for the product version.
- **Eligibility**  
- Used to define the Eligibility for the product version.
- **Characteristics**  
- Used to define the Characteristics for the product version.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Product Type	Displays the product type.	Not applicable
Product	Displays the product code.	Not applicable
Effective Date	Used to specify the effective date from when the product version will be effective.	Yes
Status	Used to specify the status of the version. <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"><b>Note:</b> It is a read-only field, and cannot be edited.</div>	Yes
Description	Used to specify the description for the version.	No

Field Name	Field Description	Mandatory (Yes or No)
Terms and Conditions	Used to specify the terms and conditions for the version.  <b>Note:</b> Click the <b>Search</b>  icon appearing corresponding to the <b>Terms and Conditions</b> field. On clicking the <b>Search</b> icon, you can search for a predefined terms and conditions.	Yes

7. Enter the required details in the **Products and Services** and/or **Product Services** section.

**Note:** If the product type is **Packaged** then **Products and Services** section appears. If the product type is **Standard** then **Product Services** section appears. If the product type is **Information Only** neither of these sections are displayed.

8. Enter the required details in the **Price List** section.
9. Enter the required details in the **Eligibility** section.
10. Enter the required details in the **Characteristics** section.
11. Click **Save**.

The new product service is defined.

## **Finalizing a Product Version**

### **Prerequisites**

To finalize a product version, you should have:

- Product Version status as In Progress

### **Procedure**

To finalize a product version:

1. Search for the product in the **Product Search** screen.

2. In the **Search Results** section, click the **Broadcast**  icon corresponding to the product whose details you want to view.  
The **Product Version List** screen appears.
3. In the **Product Version List** zone, click the link in the **Description** column, for that product version, whose product version log you want to view.  
The **Product Version** screen appears.
4. Click the **Finalize** button in the **Product Version** zone.  
The status of the product version is changed to **Finalized**.

**Note:**

You cannot finalize the product version when its effective date is earlier than the product start date.

**Note:**

The **Finalize** button appears only when the product version is in the **In Progress** status.

## Product (Used for Viewing)

---

The **Product** screen allows you to:

- View the details of the product
- View the division of the product
- View the product to product relationship
- View the characteristics of the product
- View the product version list of the product
- Edit the details of the product
- Retire a product
- Add a product version to the product

This screen contains the following tabs:

- [Product - Main](#) on page 2140
- [Product - Log](#) on page 2142

For more information on...	See...
How to edit the details of product	<a href="#">Editing a Product</a> on page 2143

How to define a product version	<a href="#">Defining a Product Version</a> on page 2117

### Product - Main

The **Product - Main** tab displays information about the product, division, product to product relationship, characteristics, and product version. It contains the following zones:

- [Product Details](#) on page 2140
- [Product Version List](#) on page 2110

#### Product Details

The **Product Details** zone displays the details of the product. It contains the following sections:

- **Main** - Displays the basic information about the product. It contains the following fields:

Field Name	Field Description
Product	Displays information about the product. <b>Note:</b> It has a link. On clicking the link, the <b>Product</b> screen appears where you can view the details of the product.
Description	Displays the description of the product version.
Status	Displays the status of the product version.
Product Type	Displays the type of product for which the product version is created.
Product Category	Displays the category to which the product is associated.
Start Date	Displays the date from when the product is effective.
End Date	Displays the date from till when the product is effective.
Compliance Number	Displays the number supplied by the legal department
Product Manager To Do Role	Displays all the To Dos that are raised against this product, and are assigned to this particular To Do Role.

- **Record Actions** - This section contains the following fields:

Button Name	Button Description
Edit	Used to edit the details of the product. <b>Note:</b> The <b>Edit</b> button appears only when the product status is <b>Active</b> and <b>Draft</b> .
Duplicate	Used to create a new product using an existing product. <b>Note:</b> The <b>Duplicate</b> button appears only when the product status is <b>Active</b> and <b>Draft</b> .
Retire	Used to indicate that the product is no longer available for use. <b>Note:</b> The <b>Retire</b> button appears only when the product status is <b>Active</b> .
Active	Used to activate the product. <b>Note:</b> The <b>Active</b> button appears only when the product status is <b>Draft</b> .

- **Record Information** - This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the product version is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.

- **Divisions** - Displays the division defined for the product. It contains the following columns:

Column Name	Column Description
Division	Displays the division to which the product belongs.  <b>Note:</b> It has a link. On clicking the link, the <b>Division</b> screen appears where you can view the details of the division.

- **Product to Product Relationship** - Lists the characteristics defined for the product version. It contains the following columns:

Column Name	Column Description
Product	Displays the product with whom the relationship has to be made.
Relationship Type	Displays the type of relationship.
Effective Start Date	Displays the date from when the product to product relationship will be effective.
Effective End Date	Displays the date till when the product to product relationship will be effective.

- **Characteristics** - Lists the characteristics defined for the product version. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the characteristics for the product will be effective.
Characteristic Type	Displays the characteristic type.
Characteristic Value	Displays the characteristic value.

### Product Version List

The **Product Version List** zone lists the information related to the product version.

Column Name	Column Description
Effective Date	Displays the date from when the product version is effective.
Description	Displays the description of the product version.  <b>Note:</b> It has a link. On clicking the link, the <b>Product Version</b> screen appears where you can view the details of the respective product version.
Status	Displays the status of the product version.

### Related Topics

For more information on...	See...
How to search for a product	<a href="#">Searching for a Product</a> on page 2110
How to define a new product version	<a href="#">Defining a Product Version</a> on page 2117

### Product - Log

The **Product - Log** tab contains the following zone:

- [Product Log](#) on page 2143

## Product Log

The **Product Log** zone lists the complete trail of actions performed on the product. It contains the following columns:

Column Name	Column Description
Date/Time	Displays the date and time when the action was performed on the product.
Details	Displays the details about the action performed on the product.
User	Displays the user who has performed the action on the product.
Log Type	Displays the type of log.
Related Object	Displays the object or entity that is generated when the action is performed on the product.
Status Reason	Displays the status reason of action performed on the product.

## Editing a Product

### Procedure

To edit a product:

1. Search for the product in the **Search Product** zone.
2. In the **Search Results** section, click the link in the **Description** column, corresponding to the product column whose details you want to edit.

The **Product** screen appears.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

3. Click the **Edit** button in the **Record Actions** zone.

The **Product** screen appears.

4. Modify the details of the product in the main section, if required.

**Note:**

The product start date cannot be later than its product version's effective date.

The product end date cannot be earlier than its product version's effective date.

You cannot update the product type field because a product version is already defined for the product.

You cannot add or edit a product version when the product is in the Retired status.

5. Define, edit, or remove the divisions for a product, if required.

**Note:**

You cannot remove the division from the product because an account from this division is already enrolled to the product.

You cannot remove the division from the packaged product because the child product is associated to the division.

6. Define, edit, or remove the product to product relationship for a product, if required.

- Define, edit, or remove the characteristics for a product, if required.

**Note:**

You cannot change the value of the characteristic when the product is in the Active status. To change the value of the characteristic, the characteristic type should not be of **C1-STOPE** type.

- Click **Save**.

The changes made to the product are saved.

**Copying a Product**

Instead of creating a product from scratch, you can create a new product using an existing product. This is possible through copying a product. On copying a product, the details including the algorithms and characteristics are copied to the new product. You can then edit the details, if required.

**Prerequisites**

To copy a product, you should have:

- Product, Product Type, Product Category, and Product Manager's To Do Role defined in the application.
- Division defined in the application.
- Relationship Type and Characteristic Type defined in the application.

**Procedure**

To copy a product:

- Search for a product in the **Product** screen.
- In the **Search Results** section, click the link in the **Description** column, corresponding to the product column, whose details you want to copy.

The **Product** screen appears.

- Click the **Duplicate** button in the **Record Actions** section.

The **Product** screen appears.

- Enter the required product details in the **Main** section, if required.
- Define, edit, or remove the divisions for a product, if required.
- Define, edit, or remove the product to product relationship for a product, if required.
- Define, edit, or remove the characteristics for a product, if required.
- Click **Save**.

The new product is defined.

## Activating a Product

### Prerequisites

To activate a product, you should have:

- Product must have the status as Draft.
- Product Version Status should be Finalized.

### Procedure

To activate a product:

1. Search for a product in the **Product** screen.
2. In the **Search Results** section, click the link in the **Description** column, corresponding to the product column that needs to be activated.

The **Product** screen appears.

3. Click the **Active** button in the **Record Actions** section.

#### **Note:**

You can activate a product only when there is at least one product version in the Finalized status.

The product is activated, as the status is changed from **Draft** to **Active**.

How to create a copy of a product	<a href="#">Copying a Product</a> on page 2144
How to retire a product	<a href="#">Retiring a Product</a> on page 2145

## Retiring a Product

### Prerequisites

To retire a product, you should have:

- Product Status must be Active.
- Product End Date less than equal to current date.

### Procedure

To retire a product:

1. Search for a product in the **Product** screen.

- In the **Search Results** section, click the link in the **Description** column, corresponding to the product column that needs to be activated.

The **Product** screen appears.

- Click the **Retire** button in the **Record Actions** section.

The **Retire Product** screen appears.

- Mention the **End Date** of the product.

**Note:**

The enrollments for the product, which you are retiring, are still effective.

- Click **Save**.

The product is retired, as the status is changed from **Active** to **Retired**.

**Note:**

On retiring the product, the end date of the effective product enrollments is set to the system date.

## Viewing the Log of a Product

### Procedure

To view the log of a Product:

- Search for the product in the **Product** screen.
- In the **Search Results** section, click the link in the **Description** column corresponding to the product, whose log you want to view.

The **Product** screen appears. It consists of the following tabs:

- [Product - Main](#) on page 2140
- [Product - Log](#) on page 2142

- Click the **Log** tab.

The **Log** tab appears.

- View the complete trail of actions performed on the product version in the **Product Log** zone.

## Search Enrollment

The **Search Enrollment** zone allows you to search for the enrolled products using various search criteria. It contains the following sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for an enrolled product using the option of Product Enrollment. The valid values are: <ul style="list-style-type: none"> <li>• Product Enrollment</li> </ul> <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"><b>Note:</b> By default, the <b>Product Enrollment</b> option is selected.</div>	Yes
Enrollment ID	Used to search an enrollment, based on the enrollment ID.	No
Account ID	Used to search an enrollment, based on the account ID.	No
Person ID	Used to search an enrollment, based on the person ID.	No
Product	Used to search an enrollment, based on the product ID.	No

Field Name	Field Description	Mandatory (Yes or No)
Status	Used to search an enrollment with a particular status. The valid values are: <ul style="list-style-type: none"> <li>• Canceled</li> <li>• Enrolled</li> <li>• Error</li> <li>• Pending</li> <li>• Unenrolled</li> <li>• Validated</li> </ul>	No
Start Date	Used to search enrollments which are initiated from a specific date.	No
Enrollment Channel	Used to search enrollments based on a enrollment source. The valid values are: <ul style="list-style-type: none"> <li>• Oracle Revenue Management and Billing</li> </ul>	No
End Date	Used to search enrollments which are initiated till a specific date.	No

**Note:** You must specify at least one search criterion while searching for an enrollment.

- **Search Results** - On clicking the **Search** button, the search results are filtered based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Enrollment ID	Displays the enrollment ID of the enrolled product. <b>Note:</b> It has a link. On clicking the link, the <b>Product Enrollment</b> screen appears where you can view the details of the respective enrolled product.
Account Information	Displays the account ID of the enrolled product. <b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account.
Start Date	Displays the date from when the enrolled product is effective.
End Date	Displays the date till when the enrolled product is effective.

On clicking the **Broadcast**  icon corresponding to an enrollment ID, the **Enrolled Products** zone appears with the details of the products that are enrolled.

- **Enrolled Products** - The **Enrolled Products** section contains the following columns:

Column Name	Column Description
Product Type	Displays the type of product which is enrolled.
Product	Displays the name of the enrolled product.

Column Name	Column Description
Version Description	Displays the description of the enrolled product version. <b>Note:</b> It has a link. On clicking the link, the <b>Product Version</b> screen appears where you can view the details of the respective enrolled product.
Start Date	Displays the date from when the enrolled product is effective.
End Date	Displays the date till when the enrolled product is effective.

- **Enrolled Services** - The **Enrolled Services** section contains the following columns:

Column Name	Column Description
Service Code	Displays the type of service which is enrolled.
Description	Displays the description of the enrolled service. <b>Note:</b> It has a link. On clicking the link, the <b>Product Service</b> screen appears where you can view the details of the respective enrolled service.
Start Date	Displays the date from when the enrolled service is effective.
End Date	Displays the date till when the enrolled service is effective.

## Searching for a Product Enrollment

### Prerequisite

To search for a product enrollment, you should have:

- Enrollment Details defined in the application.
- Account ID and Person ID defined in the application.
- Product and Status defined in the application.
- Enrollment defined in the application.

### Procedure

To search for a product enrollment:

1. From the **Main** menu, select **Pricing Management** and then click **Product Enrollment**.  
A sub-menu appears.
2. Click the **Search** option from the **Product Enrollment** sub-menu.

The **Product Enrollment** screen appears.

3. Enter the search criteria in the [Search Enrollment](#) on page 2147 zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

4. Click **Search**.

A list of enrolled products that meet the search criteria appear in the **Search Results** section.

**Note:** If you have specified any other search criterion other than the product enrollment ID, the system generates a message saying that the product enrollment ID is invalid.

## Enrolling an Account for One or More Products and Services

### Prerequisites

To enroll an account for one or more products and services, you should have:

- Account Information defined in the application.
- Enrollment Channel defined in the application.
- Product defined in the application.
- Characteristic Type defined in the application.

### Procedure

To enroll an account for one or more products and services:

1. Click the **Menu** link in the **Application** toolbar.

A list appears.

2. From the **Menu** list, select **Pricing Management**, and then click **Product Enrollment**.

The sub-menu appears.

3. Click the **Add** option from the **Product Enrollment** sub-menu.

The **Product Enrollment** screen appears. It contains the following sections:

- **Main** - Used to specify basic details of the account for product enrollment. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Enrollment ID	Used to specify the enrollment ID once the product is defined for an enrollment.  <b>Note:</b> Enrollment ID is displayed only when the product is added for enrollment.	Yes
Account ID	Used to specify the account ID.  <b>Note:</b> You can search for an account by clicking the <b>Search</b>  icon corresponding to the <b>Account Information</b> field.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Status	Displays the status of the product. <b>Note:</b> The product enrollment will always have the status as <b>Pending</b> .	No
Start Date	Used to specify the date from when the product enrollment is effective.	Yes
End Date	Used to specify the date till when the product enrollment is effective.	Yes
Enrollment Channel	Used to specify the source for product enrollment.	Yes
Comments	Used to specify the comments for product enrollment.	No

- **Product and Services** - Used to define products and services for a product. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Product	Used to specify the product for enrollment. <b>Note:</b> You can search for a product by clicking the <b>Search</b> (🔍) icon corresponding to the <b>Product</b> field.	No
Start Date	Used to specify the date from when the product is effective.	No
End Date	Used to specify the date till when the product is effective.	No
Inclusion	Used to indicate whether the product is used for enrollment.	No
Standard Product	Displays the standard product which is included within the main product.	No
Start Date	Used to specify the date from when the standard product is effective.	No
End Date	Used to specify the date till when the standard product is effective.	No
Inclusion	Used to indicate whether the standard product is used for enrollment.	No
Services	Displays the service that is a part of the standard product.	No
Start Date	Used to specify the date from when the service is effective.	No
End Date	Used to specify the date till when the service is effective.	No
Inclusion	Used to indicate whether the service is used for enrollment. <b>Note:</b> The inclusion check-box is already checked, if the service has been marked as <b>Mandatory</b> in the <b>Product Version</b> zone.	No
Add on Services	Displays the add-on service which is a part of the packaged product.	No

Field Name	Field Description	Mandatory (Yes or No)
Start Date	Used to specify the date from when the add-on service is effective.	No
End Date	Used to specify the date till when the add-on service is effective.	No
Inclusion	Used to indicate whether the add-on service is used for enrollment.	No

- **Product Priority** - Used to define the product priority for product enrollment.

Field Name	Field Description	Mandatory (Yes or No)
Enrollment ID	Displays the enrollment ID.	No
Packaged Products	Displays the packaged product which is added for enrollment.	No
Standard Products	Displays the standard product which is added for enrollment.	No
Product Enrolled Start Date	Displays the date from when the product's enrolled date is effective.	No
Product Enrolled End Date	Displays the date till when the product's enrolled date is effective.	No
Priority	Displays the priority of the product in terms of enrollment.	No

- **Characteristics** - Used to define the characteristics for a product enrollment.

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic will be effective.	No
Characteristics Type	Used to indicate the characteristic type for a characteristic.	No
Characteristics Value	Used to indicate the characteristic value.	No

4. Enter the required details in the **Main** section.

**Note:**

The Start Date field is mandatory.

5. Enter the required details in the **Product and Services** section.

**Note:**

At least one product service must be added in the product version.

6. Enter the required details in the **Product Priority** section.

**Note:**

Ensure that priority for the product is specified.

7. Enter the required details in the **Characteristics** section.
8. Click **Save**.

**Note:**

You cannot enroll for a product where none of its product versions are effective within the enrollment date range.

You cannot enroll for a product where the product start date is later than the enrollment start date.

The enrollment start and end dates should be within the start and end dates of the product.

At least one product must be selected while enrolling products for an account.

At least one price item associated with the product service must be effective during enrollment.

The account is added for enrollment.

## Defining Characteristics for a Product Enrollment

### Procedure

To define characteristics for a product enrollment:

1. Search for an enrollment in the **Search Enrollment** zone.
2. Click the **Add** button in the **Page Title** area of **Product Enrollment** zone.

The **Product Enrollment** screen appears.

3. Click the **Characteristic** link from the **Section** group, located in the left-most area of the screen.

The **Characteristics** section appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic will be effective for enrollment.	No
Characteristics Type	Used to indicate the characteristic type for a characteristic.	No
Characteristics Value	Used to indicate the characteristic value.	No

4. Enter the required details in the **Characteristics** section.
5. If you want to add more than one characteristic to the product enrollment, click the **Add** (+) icon. However, if you want to remove a characteristic from the enrollment, click the **Delete** (🗑️) icon corresponding to the effective date field.
6. Click **Save**.

The characteristics are defined for the product enrollment.

## Product Enrollment (Used for Viewing)

The **Product Enrollment** screen allows you to:

- View the details and characteristics of the enrollment
- Edit and delete the details of the enrollment
- Create a copy of the enrollment
- Submit the product for enrollment
- Unenroll the product from enrollment

This screen contains the following tabs:

- [Product Enrollment - Main](#) on page 2159
- [Product Enrollment - Log](#) on page 2163

For more information on...	See...
How to view the standard products included in an enrolled product	<a href="#">Viewing the Standard Products Included in an Enrolled Product</a> on page 2153

How to unenroll a product enrollment	<a href="#">Unenrolling a Product Enrollment</a> on page 2166
How to copy a product enrollment	<a href="#">Copying a Product Enrollment</a> on page 2165

## Product Enrollment - Main

The **Product Enrollment - Main** tab displays information about the product enrollment, services, and its priority. It contains the following zones:

- [Product Enrollment](#) on page 2159
- [Enrolled Products](#) on page 2160
- [Enrolled Services](#) on page 2161
- [Enrolled Standard Products](#) on page 2161
- [Enrolled Add-on Services](#) on page 2151
- [Product Priority](#) on page 2162

## Product Enrollment

The **Product Enrollment** zone displays the details of the enrollment. It contains the following sections:

- **Main** - Displays the basic information about the enrollment. It contains the following fields:

Field Name	Field Description
Enrollment ID	Displays the enrollment ID.
Account Information	Displays information about the account. In addition, this column has a context menu (  ) which helps in navigating to other screens in the application.
Status	Displays the status of the enrollment.
Start Date	Displays the date from when product enrollment is effective.
End Date	Displays the date till when product enrollment is effective.
Enrollment Channel	Indicates the channel which is used for product enrollment.
Comments	Displays the comments that are added for product enrollment.

- **Record Actions** - This section contains the following fields:

Button Name	Button Description
Edit	Used to edit the details of the product enrollment.  <b>Note:</b> The <b>Edit</b> button appears only when the product enrollment status is <b>Enrolled</b> , <b>Cancelled</b> , and <b>Pending</b> status.

Button Name	Button Description
Duplicate	Used to create a new product enrollment using an existing enrollment. <b>Note:</b> The <b>Duplicate</b> button appears only when the product enrollment status is <b>Enrolled, Cancelled, Pending, and Unenrolled</b> .
Delete	Used to delete a product enrollment. <b>Note:</b> The <b>Delete</b> button appears only when the product enrollment status is <b>Cancelled</b> .
Unenroll	Used to unenroll already conducted product enrollment. <b>Note:</b> The <b>Unenroll</b> button appears only when the product enrollment status is <b>Enrolled</b> .
Submit	Used to submit the product for an enrollment. <b>Note:</b> The <b>Submit</b> button appears only when the product enrollment status is <b>Pending</b> .

- **Record Information** - This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the product enrollment is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.

- **Characteristics** - Lists the characteristics defined for the product version. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the characteristics are effective for product enrollment.
Characteristic Type	Displays the characteristic type.
Characteristic Value	Displays the characteristic value.

### Enrolled Products

The **Enrolled Products** zone displays the products that have been enrolled. It contains the following columns:

Columns Name	Column Description
Product Type	Displays the type of the product.
Product	Displays the name of the product.
Version Description	Displays the description of the enrolled product version. <b>Note:</b> It has a link. On clicking the link, the <b>Product Version</b> screen appears where you can view the details of the respective product version.
Start Date	Displays the date from when the enrollment is effective.

Columns Name	Column Description
End Date	Displays the date till when the enrollment is effective.

**Note:** By default, the **Enrolled Services** zone does not appear. It appears only when the product type is **Standard** and you click the **Broadcast**  icon corresponding to the product type column.

### Enrolled Services

The **Enrolled Services** zone displays the services that have been enrolled. It contains the following columns:

Columns Name	Column Description
Service Code	Displays the code of the enrolled service.
Description	Displays the description of the enrolled service. <b>Note:</b> It has a link. On clicking the link, the <b>Product Service</b> screen appears where you can view the details of the respective product.
Start Date	Displays the date from when the service enrollment is effective.
End Date	Displays the date till when the service enrollment is effective.

### Enrolled Standard Products

The **Enrolled Standard Products** zone displays the standard products that have been enrolled. It contains the following columns:

Columns Name	Column Description
Product	Displays the name of the enrolled product.
Version Description	Displays the version description of the enrolled service. <b>Note:</b> It has a link. On clicking the link, the <b>Product Version</b> screen appears with the version details of the respective product.
Start Date	Displays the date from when the enrolled standard product is effective.
End Date	Displays the date till when the enrolled standard product is effective.

**Note:** By default, the **Enrolled Standard Products** zone does not appear. It appears when the product type is **Packaged**, and the **Broadcast**  icon is clicked, corresponding to the product type column.

### Related Topics

### Enrolled Add-on Product Services

The **Enrolled Add-on Product Services** zone displays the standard products that have been enrolled. It contains the following columns:

Columns Name	Column Description
Product Service	Displays the add-on product enrolled service.
Description	Displays the description of the add-on product enrolled service. <b>Note:</b> It has a link. On clicking the link, the <b>Product Service</b> screen appears with the service details of the respective product.
Start Date	Displays the date from when the enrolled add-on product service is effective.
End Date	Displays the date till when the enrolled add-on product service is effective.

**Note:** By default, the **Enrolled Add-on Product Services** zone does not appear. It appears when the product type is **Packaged**, and the **Broadcast**  icon is clicked, corresponding to the product type column.

How to copy a product enrollment	<a href="#">Copying a Product Enrollment</a> on page 2165

### Product Priority

The **Product Priority** zone displays the products that have been assigned a priority for enrollment. It contains the following columns:

Columns Name	Column Description
Product Type	Displays the add-on product enrolled service.
Priority	Displays the priority assigned to the product in terms of enrollment.
Product	Displays the product that has an enrollment priority. <b>Note:</b> It has a link. On clicking the link, the <b>Product</b> screen appears with the product details of the respective product.
Start Date	Displays the date from when the product priority is effective.
End Date	Displays the date till when the product priority is effective.

## Product Enrollment - Log

The **Product Enrollment - Log** tab contains the following zone:

- [Enrollment Log](#) on page 2163

### Enrollment Log

The **Enrollment Log** zone lists the complete trail of actions performed in the product enrollment. It contains the following columns:

Column Name	Column Description
Creation Date Time	Displays the date and time when the action was performed in the product enrollment.
Details	Displays the details about the action performed in the product enrollment.
User	Displays the user who has performed the action in the product enrollment.
Log Type	Displays the type of log.
Related Object	Displays the object or entity that is generated when the action is performed in the product enrollment.
Status Reason	Displays the status reason of action performed in the product enrollment.

## Viewing the Standard Products Included in an Enrolled Product

### Procedure

To view the standard product included in an enrolled product:

1. Search for an enrolled product in the **Product** screen.
2. In the **Search Results** section, click the link in the **Enrollment ID** column whose details you want to view.  
The **Product Enrollment** screen appears.

**Note:** To view the standard products that are included in an enrolled product, the product must be a **Packaged** product.

3. In the **Enrolled Products** zone, click the **Broadcast**  icon corresponding to the product type, whose enrolled standard products you want to view.  
The **Enrolled Standard Products** zone appears.
4. View the list of the standard products that are enrolled in the **Enrolled Standard Products** screen.

**Note:** The **Enrolled Standard Products** zone appears only when the product is of **Business** type, displayed in the **Enrolled Products** zone.

### Related Topics

<b>Enrolled Standard Products</b> zone	<a href="#">Enrolled Standard Products</a> on page 2161
How to search for enrolled products	<a href="#">Searching for a Product Enrollment</a> on page 2151

## Editing a Product Enrollment

### Procedure

To edit a product enrollment:

1. Search for the product in the **Search Enrollment** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

2. Click the link in the **Enrollment ID** column, corresponding to the broadcast icon.  
The **Product Enrollment** screen appears.
3. Click the **Edit** button in the **Product Enrollment** zone.  
The **Product Enrollment** screen appears.
4. Modify the details of the product version in the main section, if required.
5. Define, edit, or remove the products and/or services for a product enrollment, if required.
6. Modify the product priority for a product enrollment, if required.

**Note:**  
The priority for the enrolled product must be greater than zero (0).

7. Define, edit, or remove the characteristics for a product enrollment, if required.
8. Click **Save**.

**Note:**

You cannot edit the details of the product enrollment when it is in the enrolled status.

The changes made to the product enrollment are saved.

You cannot enroll for more than one product with the same product type and priority combination.

## Copying a Product Enrollment

Instead of creating a product enrollment from scratch, you can create a new product enrollment using an existing enrollment. This is possible through copying a product enrollment. On copying a product enrollment, the details including the algorithms and characteristics are copied to the new product. You can then edit the details, if required.

### Prerequisites

To copy a product enrollment, you should have:

- Account ID, Account Start and End Date, and Enrollment Channel defined in the application.
- Product and Characteristic Type defined in the application.

### Procedure

To copy a product enrollment:

1. Search for a product in the **Product Enrollment** screen.
2. In the **Search Results** section, click the link in the **Description** column, corresponding to the product column, whose details you want to copy.

The **Product Enrollment** screen appears.

3. Click the **Duplicate** button in the **Record Actions** section.

The **Product Enrollment** screen appears.

4. Enter the required product details in the **Main** section, if required.
5. Define, edit, or remove the products and services, if required.
6. Define, edit, or remove the product priority, if required.
7. Define, edit, or remove the characteristics, if required.
8. Click **Save**.

The new product enrollment is defined.

How to define the characteristics for a product enrollment	<a href="#">Defining Characteristics for a Product Enrollment</a> on page 2158

## Enrolling a Product Enrollment

### Prerequisites

To enroll a product for an enrollment, you should have:

- Status of the product defined as Pending or Validated.
- Account Information defined in the application.
- Enrollment Channel defined in the application.
- Product defined in the application.
- Characteristic Type defined in the application.

### **Procedure**

To enroll a product for an enrollment:

1. Search for the product in the **Search Enrollment** zone.
2. Click the link in the **Enrollment ID** column, corresponding to the broadcast icon.

The **Product Enrollment** screen appears.

3. Click the **Submit** button in the **Product Enrollment** zone.

The product status gets changed to **Enroll**.

**Note:** Once the submit button is clicked the ORMB application validates the account information, enrollment channel, product, and characteristic type field to ensure that they contain appropriate data. If any information is missing then an error message is displayed.

### **Related Topics**

<b>For more information on...</b>	<b>See...</b>
How to enroll an account for one or more products and services	<a href="#">Enrolling an Account for One or More Products and Services</a> on page 2154

How to copy a product enrollment	<a href="#">Copying a Product Enrollment</a> on page 2165

## **Unenrolling a Product Enrollment**

### **Prerequisites**

To unenroll a product for an enrollment, you should have:

- Status of the product defined as enrolled.
- Account Information defined in the application.
- Enrollment Channel defined in the application.
- Product defined in the application.
- Characteristic Type defined in the application.

### **Procedure**

To unenroll a product for an enrollment:

1. Search for the product in the **Search Enrollment** zone.
2. Click the link in the **Enrollment ID** column, corresponding to the broadcast icon.

The **Product Enrollment** screen appears.

3. Click the **Unenroll** button in the **Product Enrollment** zone.

The Unenroll Product Enrollment Pre Transition window appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Enrollment ID	Displays the enrollment ID of the enrolled product.	Not applicable
Status	Displays the status of the enrolled product.	Not applicable
Start Date	Displays the start date of the enrolled product.	Not applicable
End Date	Displays the end date of the enrolled product.	No

**Note:** If the user manually performs the unenrollment process, the application will simply change the product enrollment status from **Enroll** to **Unenroll**. If in-case the **End Date** is not mentioned during the enrollment, the application keeps the **End Date** in an **Open** state. If the user does not performs the unenrollment process, then a batch named **C1-EXTRN** gets executed. This batch performs a check to ensure that the product end date and the business date make a match. If they both match, then all of the enrollments with relation to the product are unenrolled.

#### 4. Click **Save**.

The product enrollment status is changed to **Unenroll**.

## Viewing the Log of a Product Enrollment

### **Procedure**

To view the log of a Product Enrollment:

1. Search for the product enrollment in the **Product Enrollment** screen.
2. In the **Search Results** section, click the **Enrollment ID** link corresponding to the broadcast icon, whose product enrollment log you want to view.

The **Product Enrollment** screen appears. It consists of the following tabs:

- [Product Enrollment - Main](#) on page 2159
- [Product Enrollment - Log](#) on page 2163

3. Click the **Log** tab.

The **Log** tab appears.

4. View the complete trail of actions performed on the product enrollment in the **Product Enrollment Log** zone.

# Chapter 36

---

## Subscription Billing

---

### Topics:

- *Prerequisites*
- *Subscription Type (Used for Searching)*
- *Subscription Type (Used for Viewing)*
- *Account Subscription (Used for Searching)*
- *Account Subscription (Used for Viewing)*

Oracle Revenue Management and Billing (ORMB) facilitates the service based billing wherein the customers pay a subscription price to have access to a product or service. For example, the customer may subscribe for newspaper service, cable service, internet service, video service (like Netflix, Amazon Prime Video), cloud service, and so on. The consumers may have to pay one or more charges with respect to the subscribed service. These charges can be one-time or recurring charges in nature.

In **ORMB**, you can carry out service based billing for an account by creating subscription on the account. While creating an account subscription, you need to specify the subscription type using which you want to create the account subscription. It is the subscription type which helps the system to determine:

- The business object using which the account subscription must be created in the system.
- The division and contract type for which the subscription type is created.
- The default duration for which the account subscription or service charge must be renewed when the automatic renewal option is selected.
- Whether the service charges should be prorated when the account subscription is suspended for a particular duration, or when one or more services or the entire account subscription is terminated.
- Whether already billed charges should be adjusted on the next bill in case of suspension and termination.
- The adjustment type using which the adjustments must be created when the account subscription is edited, suspended, or resumed.
- The adjustment type using which the adjustments must be created when one or more services or the entire account subscription is terminated.
- The services which the consumer can subscribe when the account subscription is created using the subscription type.
- The charges which can be charged when the consumer subscribes for a particular service.
- The distribution code for each charge which indicates the GL account to which the corresponding financial transaction must be posted.
- Whether the monthly recurring revenue is exempted for the service.
- The algorithm which must be executed when the account subscription is terminated, suspended, or resumed.

While creating an account subscription, the system allows you to use only those subscription types for the account which are defined for the division to which the account belongs and which are associated with the contract type whose

contract exists on the account. You can specify whether the account subscription must be automatically renewed for the default duration (which is specified in the subscription type). In case of subscription renewal, you can specify whether there is any cost escalation at the time of renewal. You can add services and its charges in the account subscription depending on the subscription type. The system allows you to indicate whether the charge is a one-time charge or a recurring charge. You can specify the frequency at which the recurring charges should be created for the subscribed services. In case of service charge renewal, you can specify whether there is any cost escalation at the time of renewal.

Once an account subscription is created, the status of the account subscription is set to **Draft**. You can then edit, delete, submit, or cancel the account subscription, if required. You can optionally configure approval workflow for the account subscription. On submitting an account subscription when the approval workflow is off, the status of the account subscription is changed to Active. However, on submitting an account subscription when the approval workflow is on, an approval transaction is created for the account subscription. Only when the approver approves the approval transaction, the status of the account subscription is changed to Active. Note that the status of the account subscription is changed to Active only when the subscription start date is past dated. However, if the subscription start date is a future date, the status of the account subscription is changed to **Validated** irrespective of whether the approval workflow is on or off.

A new batch named **Account Subscription Periodic Monitor (C1-ASUBM)** batch is introduced in this release. It monitors or checks whether there are any account subscriptions in the **Validated** status. If there is an account subscription in the **Validated** status and its subscription start date is earlier than or equal to batch business date, the status of the account subscription is changed to **Active**. You can then edit the details, if required. However, while editing, you can only change end dates and add the services and charges in the account subscription. You cannot remove a service or charge from the account subscription once it is in the Active status. For more information on batch, see **Oracle Revenue Management and Billing Batch Guide**.

The system allows you to suspend the account subscription for a particular duration. While suspending the account subscription, you need to specify the suspension reason and suspension condition indicating whether fees should be charged or not for the suspended period. Based on the suspension condition and proration options defined, the system will accordingly update or cancel billable charges.

The system also allows you to terminate a particular service or all services at the same time. While terminating a service, you can specify the termination charges, if any. If the termination charges are specified, the adjustments will be created and posted accordingly on the next bill.

## Prerequisites

---

To setup the subscription billing feature, you need to do the following:

- Define the required subscription billing types in the system.
- Define the required characteristic types where the characteristic entity is set to **Subscription Type**.
- Define the required characteristic types where the characteristic entity is set to **Account Subscription**.
- Define values for the option types in the feature configuration.
- Define values for the lookup field.
- Define predefined values for the characteristic type.
- Adjustment Type will be validated based on the adjustment type profile attached on the Contract Type.
- At least one subscription charge is mandatory, for each subscription service.
- An account with a division same as the division of the selected subscription type.
- An account with a unique contract ID on the contract type.
- At least one subscription service is mandatory, for each subscription type.

<b>Subscription Billing Overview</b>	<a href="#">Subscription Billing</a> on page 2169

## Subscription Type (Used for Searching)

---

The **Subscription Type** screen allows you to search for the subscription type details using various search criteria. It contains the following zone:

- [Search Subscription Type](#) on page 2171

Through this screen, you can navigate to the following screen:

- [Subscription Type \(Used for Viewing\)](#) on page 2177

### Search Subscription Type

The **Search Subscription Type** zone allows you to search for a subscription type using various search criteria. It contains the following two sections:

- **Search Criteria** – The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Subscription Type	Used to search by a subscription type.	Yes
Description	Used to search a subscription type with a particular description.	No
Division	Used to search a subscription type which is associated with a particular division.	No

Field Name	Field Description	Mandatory (Yes or No)
Contract Type	Used to specify the contract type to which the contract to which the subscription type belongs.  <div style="border: 1px solid black; padding: 5px;"> <b>Note:</b> The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Contract Type Search</b> window appears. </div>	No
Status	Used to search the subscription type with a particular status. The valid values are: <ul style="list-style-type: none"> <li>Active</li> <li>Inactive</li> </ul>	No

**Note:** You must specify at least one search criterion while searching for a subscription type.

- **Search Results** – On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Subscription Type Information	Displays the basic information about the subscription type.  <div style="border: 1px solid black; padding: 5px;"> <b>Note:</b> It has a link. On clicking the link, the <b>Subscription Type</b> screen appears where you can view the details of the respective subscription type. </div>
Status	Indicates the status of the subscription type. The valid values are: <ul style="list-style-type: none"> <li>Active</li> <li>Inactive</li> </ul>
Division	Displays the division to which the subscription type belongs.
Contract Type	Displays the contract type that you want to associate with the subscription type.

How to search for a subscription type	<a href="#">Searching for a Subscription Type</a> on page 2172
How to view the details of a subscription type	<a href="#">Viewing the Subscription Type Details</a> on page 2173

## **Searching for a Subscription Type**

### **Prerequisites**

To search for a subscription type, you should have:

- Subscription type business objects defined in the application
- Subscription Services defined in the application

### **Procedure**

To search for a subscription type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **S** and then click **Subscription Type**.  
The **Subscription Type** screen appears.
3. Enter the search criteria in the **Search Subscription Type** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

4. Click **Search**.  
A list of subscription types that meet the search criteria appears in the **Search Results** section.

**Note:** You must specify at least one search criterion while searching for a subscription type.

## Defining a Subscription Type

### Prerequisites

To define a subscription type, you should have:

- Subscription type business objects defined in the application
- Subscription Services defined in the application

### Procedure

To define a subscription type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **S** and then click **Subscription Type**.  
The **Subscription Type** screen appears.
3. Enter the search criteria in the **Search Subscription Type** zone.
4. Click **Add** button in the page title area of the **Subscription Type** screen.

The **Subscription Type** screen appears. It contains the following sections:

- **Main** – Used to specify basic details about the subscription services.
- **Subscription Services** – Used to specify the details of the subscription services.
- **Algorithms** – Used to specify the algorithms used in the subscription type.
- **Characteristics** – Used to define characteristics for the subscription type.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Subscription Type	Used to specify the subscription type.	Yes
Description	Used to specify the description for the subscription type.	Yes
Account Subscription Business Object	Used to indicate the business object using which you want to create a person when the corresponding account subscription is processed.	Yes
Detailed Description	Used to specify additional information about the subscription type.	No
Division	Used to indicate the division to which you want to associate the subscription type.	Yes
Contract Type	Used to indicate the <b>Contract Type</b> to which you want to associate the subscription type.  <div style="border: 1px solid black; padding: 5px; background-color: #f0f0f0;"> <p><b>Note:</b> The <b>Search</b> () icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Contract Type Search</b> window appears.</p> </div>	Yes
Renewal Duration Type	Used to indicate the renewal cycle. The valid values are: <ul style="list-style-type: none"> <li>• Day</li> <li>• Month</li> <li>• Week</li> <li>• Year</li> </ul>	Yes
Renewal Duration	Used to specify the duration of the renewal of the subscription.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Status	Used to indicate the status of the subscription type. The valid values are: <ul style="list-style-type: none"> <li>Active</li> <li>Inactive</li> </ul>	Yes
Prorate Charges	Indicates whether monthly subscription fee is prorated or not in the event the cancelation occurs in the middle of the month.	No
Adjust Billed Charges	Indicates the billed charges adjusted.  <b>Note:</b> This field appears only when you check the <b>Prorate Charges</b> check box.	No
Adjustment Type	Used to indicate the adjustment type using which the adjustment must be created.  <b>Note:</b> This field appears only when you check the <b>Prorate Charges</b> and <b>Adjust Billed Charges</b> check box.	No
Termination Adjustment Type	Used to indicate the adjustment type used for termination of the subscription service.  <b>Note:</b> The <b>Search</b> (  ) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Adjustment Type Search</b> window appears.	No

The **Subscription Services** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Subscription Service	Used to specify the type of the subscription service.	Yes
Monthly Recurring Revenue (MRR) Exempted	Used to indicate whether the service type is exempted from MRR calculation.	No
Subscription Charge	Used to indicate charges related to the subscription service.	Yes
Distribution Code	Used to indicate distribution code linked to the service that will be used on the billable charge.  <b>Note:</b> The <b>Search</b> (  ) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Distribution Code Search</b> window appears.	No

The **Algorithms** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
System Event	Used to indicate the system event.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Sequence	Used to specify the sequence number.	Yes
Algorithm	Used to associate an algorithm to the system event that you have selected.  <div style="border: 1px solid black; padding: 5px;"> <b>Note:</b> The <b>Search</b> () icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Algorithm Search</b> window appears. </div>	Yes

5. Enter the required details in the **Main** section.
6. Add algorithms for the subscription type, if required.
7. Define characteristics for the subscription type, if required.
8. Click **Save**.

The subscription type is defined.

How to define characteristics for a subscription type	<a href="#">Defining Characteristics for a Subscription Type</a> on page 2176

## Defining Characteristics for a Subscription Type

### **Prerequisites**

To define characteristics for a subscription type, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Subscription Type**)

### **Procedure**

To define characteristics for a subscription type:

1. Ensure that the **Characteristics** section is expanded when you are defining, editing, or copying a subscription type.

The **Characteristics** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective.	Yes (Conditional)  <div style="border: 1px solid black; padding: 5px;"> <b>Note:</b> This field is required when you are defining a characteristic for a subscription type. </div>

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Type	Used to specify the characteristic type.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for a subscription type.
Characteristic Value	Used to specify the value of characteristic type. <b>Note:</b> On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for a subscription type.

- Enter the required details in the **Characteristics** section.

**Note:** If you select a predefined characteristic type, the **Search**  icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

- If you want to define more than one characteristic for the subscription type, click the **Add**  icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from the subscription type, click the **Delete**  icon corresponding to the characteristic.

## Subscription Type (Used for Viewing)

The **Subscription Type** screen allows you to define, edit, copy, and delete subscription type. It contains the following zone:

- [Subscription Type](#) on page 2177

### Subscription Type

The **Subscription Type** zone displays the details of the subscription type. It contains the following sections:

- Main** – Displays basic information about the subscription type. It contains the following fields:

Field Name	Field Description
Subscription Type	Displays the subscription type.
Description	Displays the description for the subscription type.
Account Subscription Business Object	<p>Indicates the business object using which you want to create a person when the corresponding account subscription is processed. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.</p>
Detailed Description	Displays additional information about the subscription type.
Division	<p>Indicates the division to which you want to associate the subscription type.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Division</b> screen appears where you can view the details of the respective division.</p>
Contract Type	Indicates the <b>Contract Type</b> to which you want to associate the subscription type.
Renewal Duration Type	<p>Indicates the renewal cycle. The valid values are:</p> <ul style="list-style-type: none"> <li>• Day</li> <li>• Month</li> <li>• Week</li> <li>• Year</li> </ul>
Renewal Duration	Displays the duration of the renewal of the subscription.
Status	<p>Indicates the status of the subscription type. The valid values are:</p> <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul> <p><b>Note:</b> You cannot change the status of a <b>Subscription Type</b> to <b>Inactive</b> if there are account subscriptions that are created using the <b>Subscription Type</b> and are currently in the <b>Draft</b> or <b>Approval In Progress</b> status.</p>
Prorate Charges	Indicates whether monthly subscription fee is prorated or not in the event the cancelation occurs in the middle of the month.
Adjust Billed Charges	<p>Indicates the billed charges adjusted.</p> <p><b>Note:</b> This field appears only when you check the <b>Prorate Charges</b> check box.</p>

Field Name	Field Description
Adjustment Type	Indicates the adjustment type using which the adjustment must be created.  <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This field appears only when you check the <b>Prorate Charges</b> and <b>Adjust Billed Charges</b> check box. It has a link. On clicking the link, the <b>Adjustment Type</b> screen appears where you can view the details of the respective business object.</p> </div>
Termination Adjustment Type	Indicates the adjustment type used for termination of the subscription service.

- The **Subscription Services** section contains the following columns:

Column Name	Column Description
Subscription Service	Displays the type of the subscription service.
Monthly Recurring Revenue (MRR) Exempted	Indicates whether the service type is exempted from MRR calculation.
Subscription Charge	Indicates the charges related to the subscription service.
Distribution Code	Indicates the distribution code linked to the service that will be used on the billable charge.

- Characteristics** – Lists the characteristics defined for the subscription type. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the subscription is effective.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- Record Actions** – This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the subscription type.
Delete	Used to delete the subscription type.  <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> You can delete an subscription type only when you have not created an subscription type using the subscription type.</p> </div>
Duplicate	Used to create a new subscription type using an existing subscription type.

- Record Information** – This section contains the following field:

Field Name	Field Description
Business Object	Indicates the business object using which the subscription type is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.

- The **Algorithms** section contains the following columns:

Field Name	Field Description	Mandatory (Yes or No)
System Event	Displays the system event.	Yes
Sequence	Displays the sequence number.	Yes
Algorithm	Displays an algorithm associated to the system event that you have selected.  <b>Note:</b> It has a link. On clicking the link, the <b>Algorithm</b> screen appears where you can view the details of the respective subscription type.	Yes

## **Editing a Subscription Type**

### **Procedure**

To edit a subscription type:

- Search for the subscription type in the **Subscription Type** screen.
- In the **Search Results** section, click the link in the **Subscription Type Information** column corresponding to the subscription type whose details you want to edit.

The **Subscription Type** screen appears.

- Click the **Edit** button in the **Subscription Type** zone.

The **Subscription Type** screen appears. It contains the following sections:

- Main** – Used to specify basic details about the subscription services.
- Subscription Services** – Used to specify the details of the subscription services.
- Algorithms** – Used to specify the algorithms used in the subscription type.
- Characteristics** – Used to define characteristics for the subscription type.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Subscription Type	Used to specify the subscription type.	Yes
Description	Used to specify the description for the subscription type.	Yes
Account Subscription Business Object	Used to indicate the business object using which you want to create a person when the corresponding account subscription is processed.	Yes
Detailed Description	Used to specify additional information about the subscription type.	No
Division	Used to indicate the division to which you want to associate the subscription type.	Yes
Contract Type	Used to indicate the <b>Contract Type</b> to which you want to associate the subscription type.	Yes
Renewal Duration Type	Used to indicate the renewal cycle. The valid values are: <ul style="list-style-type: none"> <li>• Day</li> <li>• Month</li> <li>• Week</li> <li>• Year</li> </ul>	Yes
Renewal Duration	Used to specify the duration of the renewal of the subscription.	Yes
Status	Used to indicate the status of the subscription type. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>	Yes
Prorate Charges	Indicates whether monthly subscription fee is prorated or not in the event the cancelation occurs in the middle of the month.	No
Adjust Billed Charges	Indicates the billed charges adjusted.  <b>Note:</b> This field appears only when you check the <b>Prorate Charges</b> check box.	No
Adjustment Type	Used to indicate the adjustment type using which the adjustment must be created.  <b>Note:</b> This field appears only when you check the <b>Prorate Charges</b> and <b>Adjust Billed Charges</b> check box.	No
Termination Adjustment Type	Used to indicate the adjustment type used for termination of the subscription service.	No

The **Subscription Services** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Subscription Service	Used to specify the type of the subscription service.	Yes
Monthly Recurring Revenue (MRR) Exempted	Used to indicate whether the service type is exempted from MRR calculation.	No
Subscription Charge	Used to indicate charges related to the subscription service.	Yes
Distribution Code	Used to indicate distribution code linked to the service that will be used on the billable charge.	No

The **Algorithms** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
System Event	Used to indicate the system event.	Yes
Sequence	Used to specify the sequence number.	Yes
Algorithm	Used to associate an algorithm to the system event that you have selected.  <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> The <b>Search</b> () icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Algorithm Search</b> window appears.</p> </div>	Yes

4. Add algorithms for the subscription type, if required.
5. Define, edit, or remove characteristics from the subscription type, if required.
6. Click **Save**.

The changes made to the subscription type are saved.

## **Copying a Subscription Type**

### **Prerequisites**

To copy a subscription type, you should have:

- Subscription type (whose copy you want to create) defined in the application
- Account Subscription business objects defined in the application

### **Procedure**

To copy a subscription type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **S** and then click **Subscription Type**.  
The **Subscription Type** screen appears.
3. Enter the search criteria in the **Search Subscription Type** zone.
4. In the **Search Results** section, click the link in the **Subscription Type Information** column whose details you want to view.
5. Click the **Duplicate** button in the **Subscription Type** zone.

The **Subscription Type** screen appears. It contains the following sections:

- **Main** – Used to specify basic details about the subscription services.
- **Subscription Services** – Used to specify the details of the subscription services.
- **Algorithms** – Used to specify the algorithms used in the subscription type.
- **Characteristics** – Used to define characteristics for the subscription type.

## Searching for an Account Subscription

### Prerequisites

To search for an account subscription, you should have:

- Subscription type defined in the application
- Subscription Services defined in the application

### Procedure

To search for an account subscription:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Person Information** and then click **Account Subscription**.  
A sub-menu appears.
3. Click the **Search** option from the **Account Subscription** sub-menu.  
The **Account Subscription** screen appears.
4. Enter the search criteria in the **Search Account Subscription** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search**.

A list of account subscriptions that meet the search criteria appears in the **Search Results** section.

**Note:** You must specify at least one search criterion while searching for an account subscription.

## Defining an Account Subscription

### Prerequisites

To define an account subscription, you should have:

- Subscription type business objects defined in the application
- Subscription Services defined in the application

### Procedure

To define an account subscription:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Tools** and then click **Account Subscription**.  
A sub-menu appears.
3. Click the **Add** option from the **Account Subscription** sub-menu.

The **Account Subscription** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Subscription Type	Used to search a particular subscription type.  <b>Note:</b> The Search (  ) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the window appears.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Account ID	Used to search a particular subscription type.  <div style="border: 1px solid black; padding: 5px;"> <b>Note:</b> The Search () icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Account Search</b> window appears. </div>	Yes

**Tip:** Alternatively, you can access the **Account Subscription** screen by clicking the **Add** button in the page title area of the **Account Subscription** screen.

#### 4. Click **OK**.

The **Account Subscription** screen appears. It contains the following sections:

- **Main** – Used to specify basic details about the subscription services.
- **Subscription Services and Charges** – Used to specify the details of the subscription services.
- **Characteristics** – Used to define characteristics for the subscription type.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Subscription Type Information	Displays the basic information about the subscription type.	Not applicable
Account Information	Displays the basic information about the account linked to the subscription type.	Not applicable
Subscription Start Date	Used to specify the date from when the subscription is effective.  <div style="border: 1px solid black; padding: 5px;"> <b>Note:</b> The subscription start date cannot be later than the subscription end date. </div>	Yes
Subscription End Date	Used to specify the date till when the subscription is effective.  <div style="border: 1px solid black; padding: 5px;"> <b>Note:</b> The subscription end date cannot be earlier than the subscription start date. </div>	Yes
Automatic Renewal	Used to indicate whether you want to renew the subscription automatically.	No
Cost Escalation (in Percentage)	<div style="border: 1px solid black; padding: 5px;"> <b>Note:</b> This field appears only when <b>Automatic Renewal</b> check box is selected. </div>	No
Comments	Used to specify additional information about the account subscription.	No

The **Subscription Services and Charges** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Subscription Service	Used to specify the type of the subscription service.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Service Start Date	Used to indicate whether the service type is exempted from MRR calculation.	No
Subscription Charge	Used to indicate charges related to the subscription service.	Yes
Service End Date	Used to indicate distribution code linked to the service that will be used on the billable charge.	No
Subscription Charge	Used to specify the type of the subscription charges.	Yes

## Defining Characteristics for an Account Subscription

### Prerequisites

To define characteristics for an account subscription, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Account Subscription**)

### Procedure

To define characteristics for an account subscription:

1. Ensure that the **Characteristics** section is expanded when you are defining or editing an account subscription.

The **Characteristics** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for an account subscription.
Characteristic Type	Used to specify the characteristic type.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for an account subscription.
Characteristic Value	Used to specify the value of characteristic type. <b>Note:</b> On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for an account subscription.

2. Enter the required details in the **Characteristics** section.

**Note:** If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

3. If you want to define more than one characteristic for an account subscription, click the **Add** (+) icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from an account subscription, click the **Delete** (🗑️) icon corresponding to the characteristic.

## Account Subscription (Used for Viewing)

Once the subscription type is created, the **Account Subscription** screen allows you to:

- View the details of an account subscription
- View Edit the details of the subscription services
- Define, Edit and Delete the subscription services
- Suspend an account subscription
- Terminate an account subscription
- View the account subscription suspension history
- View the account subscription termination charges
- View the log of an account subscription
- Add a log entry an account subscription

This screen consists of the following tabs:

- [Account Subscription - Main](#) on page 2192
- [Account Subscription - Log](#) on page 2196

### Account Subscription - Main

The **Main** tab displays information about the account subscription and subscription services. It contains the following zones:

- [Account Subscription](#) on page 2192
- [Subscription Services](#) on page 2194
- [Account Subscription Suspension History](#) on page 2195
- [Account Subscription Termination Charges](#) on page 2196

### Account Subscription

The **Account Subscription** zone displays the details of the account subscription. It contains the following sections:

- **Main** – Displays the basic details of the account subscription. It contains the following fields:

Field Name	Field Description
Account Subscription Information	Displays the basic information about the account subscription.
Subscription Type Information	Displays the basic details about the subscription type.  <b>Note:</b> It has a link. On clicking the link, the <b>Subscription Type</b> screen appears where you can view the details of the respective subscription type.

Field Name	Field Description
Account Information	In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account.
Subscription Start Date	Displays the subscription start date.
Subscription End Date	Displays the subscription end date.
Automatic Renewal	Indicates whether the automatic renewal of the subscription is opted.
Status	Displays the status of the account subscription. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Canceled</li> <li>• Expired</li> <li>• Draft</li> <li>• Renewed</li> <li>• Suspended</li> <li>• Validated</li> <li>• Terminated</li> </ul>
Comments	Displays the additional information about the account subscription.

- **Characteristics** – This section lists the characteristics defined for the account subscription. It contains the following columns:

Field Name	Field Description
Effective Date	Indicates the date from when the characteristic is effective for the account subscription.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- **Record Actions** – This section contains the following buttons:

Field Name	Field Description
Edit	Used to edit the details of the account subscription.  <b>Note:</b> The <b>Edit</b> button appears only when the account subscription is in the <b>Active</b> or <b>Draft</b> status.
Suspend	Used to suspend the account subscription.  <b>Note:</b> The <b>Suspend</b> button appears only when the account subscription is in the <b>Active</b> status.
Terminate	Used to terminate the account subscription service. Used to suspend the account subscription.  <b>Note:</b> The <b>Terminate</b> button appears only when the account subscription is in the <b>Active</b> or <b>Suspended</b> status.

Field Name	Field Description
Delete	Used to delete the account subscription.  <b>Note:</b> The <b>Delete</b> button appears only when the account subscription is in the <b>Active</b> or <b>Suspended</b> status.
Submit	Used to submit the account subscription details.  <b>Note:</b> The <b>Submit</b> button appears only when the account subscription is in the <b>Draft</b> status.
Cancel	Used to cancel the account subscription.  <b>Note:</b> The <b>Cancel</b> button appears only when the account subscription is in the <b>Draft</b> and <b>Validated</b> status.
Resume	Used to resume the account subscription service.  <b>Note:</b> The <b>Resume</b> button appears only when the account subscription is in the <b>Suspended</b> status.

- **Record Information** – This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the account subscription is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.
Status Date Time	Displays the date and time when the account subscription status is updated.
Creation Date Time	Displays the date and time when the account subscription is created.

### Subscription Services

The **Subscription Services** zone displays the details of the subscription services. It contains the following columns:

Column Name	Column Description
Sequence	Displays the sequence number.
Subscription Service	Displays the type of subscription service.
Service Start Date	Displays the date from when the subscription service is effective.
Service End Date	Displays the date till when the subscription service is effective.
Termination Date	Displays the date on which the subscription service is terminated.
Termination Reason	Displays the reason for the termination of subscription service.
Edit	Used to edit the details of the subscription service.
Delete	Used to delete the subscription service.

## Subscription Service Charges

The **Subscription Service Charges** zone displays the details of the charges related to the subscription services. It contains the following columns:

Column Name	Column Description
Subscription Charge	Displays the charges related to the subscription service.
Charge Amount	Displays the charges related to the subscription charge.
Charge Start Date	Displays the date from when the charges are effective.
Charge End Date	Displays the date till when the charges are effective.
One-Time Charge	Indicates the one-time charges related to the subscription services. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>
Recurring Charge Frequency	Indicates the recurring charges paid for the subscription service. <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"><b>Note:</b> It appears only when one-time charge option is selected.</div>
Automatic Renewal	Indicates whether the subscription service charges are set to automatic renewal. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>
Cost Escalation (in Percentage)	Displays the percentage in which the subscription charge amount must increase when the automatic renewal of the subscription is triggered. <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"><b>Note:</b> This field appears only when <b>Automatic Renewal</b> check box is set to <b>Yes</b>.</div>
Description on Bill	Displays the description on the bill.

## Subscription Service Charge Entities

The **Subscription Service Charge Entities** zone displays the details of the subscription service charge entities. It contains the following columns:

Column Name	Column Description
Entity Type	Indicates the entity type used in the subscription service charge.
Entity Information	Displays the basic entity information. <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"><b>Note:</b> It has a link. On clicking the link, the <b>Billable Charge ID</b> screen appears where you can view the details of the respective contract.</div>

## Account Subscription Suspension History

The **Account Subscription Suspension History** zone displays the details of the account subscriptions which are suspended. It contains the following columns:

Column Name	Column Description
Suspension Start Date	Displays the suspension start date of the account subscription.

Column Name	Column Description
Suspension End Date	Displays the suspension end date of the account subscription.
Suspension Condition	Displays the condition for account subscription suspension.
Suspension Reason	Displays the reason for account subscription suspension.
Resume Date	Displays the date on which the account subscription is resumed.

### Account Subscription Termination Charges

The **Account Subscription Termination Charges** zone displays the details of the termination charges of the account subscription. It contains the following columns:

Column Name	Column Description
Termination Charge Type	Indicates the type of account subscription termination charges.
Charge Amount	Indicates the charges for the termination of the account subscription.
Adjustment Information	Displays the information about the adjustment that is created using the adjustment record.  <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> The <b>Search</b> () icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Adjustment Type Search</b> screen appears.</p> </div>

### Account Subscription - Log

The **Log** tab contains the following zone:

- [Account Subscription Log](#) on page 2196

### Account Subscription Log

The **Account Subscription Log** zone lists the complete trail of actions performed on the account subscription. It contains the following columns:

Column Name	Column Description
Creation Date Time	Displays the date and time when the action was performed on the account subscription.
Details	Displays the details about the action performed on the account subscription.
User	Indicates the user who has performed the action on the account subscription.
Log Type	Indicates the type of the log.
Related Object	Indicates the object or entity which is created when the action is performed on the account subscription.  <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> At present, no data appears in this column. The implementation team can build the custom logic to meet the business requirements.</p> </div>
Status Reason	Indicates the reason why the status of the account subscription is changed.  <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> At present, no data appears in this column. The implementation team can build the custom logic to meet the business requirements.</p> </div>

## Viewing the Log of an Account Subscription

### Procedure

To view the log of an account subscription:

1. Search for the account subscription in the **Account Subscription** screen.
2. In the **Search Results** section, click the link in the **Account Subscription Information** column corresponding to the account subscription whose log you want to view.

The **Account Subscription** screen appears.

3. Click the **Log** tab.

The **Log** tab appears.

4. View the complete trail of actions performed on the account subscription in the **Account Subscription Log** zone.

## Mass Pricing Update

---

### Topics:

- [Prerequisites](#)
- [Mass Pricing Update Request \(Without Approval\) Status Transition](#)
- [Mass Pricing Update Request \(With Approval\) Status Transition](#)
- [Algorithms Used in C1-MassPricingReq](#)
- [Request Type](#)
- [Mass Pricing Update Request \(Used for Searching\)](#)
- [Mass Pricing Update Request \(Used for Viewing\)](#)
- [Mass Pricing Update Request](#)

Oracle Revenue Management and Billing provides the ability for mass price item pricing update. In other words, the system enables you to update multiple active price item pricing assigned to a person, account, price list, or product at the same time. You can search for the price assignments which you want to update using the following fields:

- Price Item
- Price Item Parameters
- Account ID
- Person ID
- Division
- Update Date
- Pricing Entity Type

On specifying the search criteria, the system fetches the number of entities on which the price item pricing is defined and the number of price assignments on a particular type of pricing entity. Once you select one or more price item pricing, you can create the mass pricing update request by clicking the **Mass Pricing Update** button. While creating a mass pricing update request, you need to specify the mass pricing update request type using which you want to create the mass pricing update request. It is the mass pricing update request type which helps the system to determine:

- The business object using which the mass pricing update request should be created in the system.
- Whether the approval is required for the mass pricing update request.
- Whether the mass pricing update must be performed in the deferred mode when the number of price assignments in the mass pricing update request exceeds the defer processing count.

Once the mass pricing update request type is selected, you need to specify the mass pricing update criteria, mass pricing update type, and rate value. Once a mass pricing update request is created in the **Draft** status, you can submit the mass pricing update request. On submitting a mass pricing update request, the status of the mass pricing update request is changed to either **Deferred Processing** or **Updating Price Assignments** depending on whether the number of price assignments in the mass pricing update request exceeds the defer processing count. If the status is changed to **Deferred Processing**, you need to click the **Submit Batch** button. On clicking the **Submit Batch** button, the system automatically creates a batch job using the **C1-GENRQ** batch control. While creating the batch job, it uses the values defined for the **Thread Count** and **Thread Pool Name** option types in the **C1-MASPRI** feature configuration.

Once the batch job is executed, the status of the mass pricing update request is changed to **Updating Price Assignments**. If a price assignment is referred in past, the existing price assignment is end dated and a new price assignment is created. However, if a price assignment is not yet referred in the system, the existing price assignment is updated. Once the price assignment is newly created or updated, the status of the record in the mass pricing update request is changed to **Processed**. However, if a price assignment is referred for a future date, the status of the record in the mass pricing update request is changed to **Error**. In addition, if any error occurs while updating an existing price assignment or creating a new price assignment, the status of the record in the mass pricing update request is changed to **Error**. Finally, the status of the mass pricing update request is changed to **Processed**.

You can optionally configure the approval workflow for the mass pricing update request. If the **Approval Required** field is set to **Yes** in the mass pricing update request type, the status of the mass pricing update request is changed to **Approval In Progress** when you submit the mass pricing update request. Once the approver approves the mass pricing update request, the status of the mass pricing update request is changed to either **Deferred Processing** or **Updating Price Assignments** depending on whether the number of price assignments in the mass pricing update request exceeds the defer processing count. However, if the approver rejects a mass pricing update request, the status of the mass pricing update request is changed to **Rejected**.

For more information on how to setup the mass pricing update process, see [Prerequisites](#) on page 2211.

## Prerequisites

---

To setup the mass pricing update feature, you need to do the following:

- Define the required mass pricing update request types in the system.
- Set the **Mass Pricing Update (C1-MASPRI)** feature configuration
- Attach a currency conversion algorithm to the **Currency Conversion For Bill Segments** algorithm spot of the required divisions
- Define one To Do type for submitter and another To Do type for approver when the approval is required for a mass pricing update request
- Assign a To Do role to the required To Do types in the application

Updating Price Assignments	Enter	C1-MPRIUPDPA	C1-MPRIUPDPA	Refer to <a href="#">C1-MPRIUPDPA</a> on page 2215
Processed	-	-	-	-
Rejected	Enter	C1-MPRIRJTD	C1-MPRIRJTD	Refer to <a href="#">C1-MPRIRJTD</a> on page 2216

## C1-REQST-INF

This algorithm generates the request information string which appears throughout the application. It concatenates the following fields separated by a comma in the specified order:

1. Request Type Description
2. Request Status
3. Request ID

## C1-MPRIVALDN

This algorithm is invoked when you create a mass pricing update request. It checks the following:

- Whether the mass pricing update criteria is specified.
- Whether the mass pricing update type is specified when the mass pricing update criteria is set to **Increase Price** or **Decrease Price**.
- Whether the rate value is specified when the mass pricing update criteria is set to **Increase Price** or **Decrease Price**.
- Whether the currency is specified when the mass pricing update criteria is set to **Increase Price** or **Decrease Price** and the mass pricing update type is set to **Absolute**.
- If any of the above conditions are not met, the system does not allow you to create the mass pricing update request.

## C1-MPRISUBMT

This algorithm is invoked when you submit a mass pricing update request. If the approval workflow is configured on the respective mass pricing update request type, it changes the status of the mass pricing update request to **Approval in Progress**. However, if the approval workflow is not configured on the respective mass pricing update request type, it changes the status of the mass pricing update request to either **Deferred Processing** or **Updating Price Assignments** depending on whether the number of price assignments in the mass pricing update request exceeds the defer processing count.

## C1-MPRIAPTD

This algorithm is invoked when the status of the mass pricing update request is changed to **Approval in Progress**. It creates a To Do using the approval To Do type which is specified in the respective mass pricing update request type. Once a To Do is created, it is assigned to all users with an approval To Do role which is specified in the respective mass pricing update request type.

## F1-TODOCOMPL

This algorithm completes To Do entries that are created for the business object when the business object exits the given status. It finds and completes all open To Do entries where the business object's primary key is defined as a drill key. However, if the **Exclude To Do Entries From Auto Completion** characteristic is set to **Y** for the business object, the system does not automatically complete the respective To Do entry.

## F1-AT-RQJ

This algorithm transitions the current status of the business object to the specified status. It contains the following parameters:

- **Next Status** – Used when you want to override the default next status specified in the lifecycle.
- **Next Transition Condition** – Used when you want to override the default next transition condition specified in the lifecycle.

At a time, you can specify value for either the **Next Status** or **Next Transition Condition** parameter. If you don't specify any value for these parameters, the system will transition the business object to the default next status specified in its lifecycle.

## C1-MPRIDEFER

This algorithm is invoked when the status of the mass pricing update request is changed to **Running C1-GENRQ Batch**. It creates a batch job using the **C1-GENRQ** batch control. While creating the batch job, it uses the values defined in the **Thread Count** and **Thread Pool Name** option types of the **Mass Pricing Update (C1-MASPRI)** feature configuration. It also creates a log for the mass pricing update request which indicates the batch job ID.

## C1-MPRIAPRD

This algorithm is invoked when you approve a mass pricing update request. If the number of price assignments in the mass pricing update request exceeds the defer processing count, the status of the mass pricing update request is changed to **Deferred Processing**. However, if the number of price assignments in the mass pricing update request does not exceed the defer processing count, the status of the mass pricing update request is changed to **Updating Price Assignments**.

## C1-MPRIUPDPA

This algorithm is invoked when the status of the mass pricing update request is changed to **Updating Price Assignments**. If a price assignment is referred in past, this algorithm ends the existing price assignment and creates a new price assignment. However, if a price assignment is not yet referred in the system, this algorithm updates the existing price assignment. Once the price assignment is newly created or updated, the status of the record in the mass pricing update request is changed to **Processed**. However, if a price assignment is referred for a future date, the status of the record in

the mass pricing update request is changed to **Error**. In addition, if any error occurs while updating an existing price assignment or creating a new price assignment, the status of the record in the mass pricing update request is changed to **Error**. Note that if a price assignment is included multiple times in a mass pricing update request, the system will update the price assignment only once.

## C1-MPRIRJTD

This algorithm is invoked when the status of the mass pricing update request is changed to **Rejected**. It creates a To Do using the submitter To Do type which is specified in the respective mass pricing update request type. Once a To Do is created, it is assigned to all users with a submitter To Do role which is specified in the respective mass pricing update request type.

## Request Type

---

Oracle Revenue Management and Billing allows you to define a mass pricing update request type using which you can create mass pricing update requests. It is the mass pricing request type which helps the system to determine:

- The business object using which the mass pricing update request should be created in the system.
- Whether the approval is required for the mass pricing update request.
- Whether the mass pricing update must be performed in the deferred mode when the number of price assignments in the mass pricing update request exceeds the defer processing count.

The **Request Type** screen allows you to define, edit, copy, and delete a mass pricing update request type. It contains the following zones:

- [Request Type List](#) on page 2216
- [Request Type](#) on page 2217

## Request Type List

The **Request Type List** zone lists the mass pricing update request types that are already defined in the system. It contains the following columns:

Column Name	Column Description
Request Type	Displays the mass pricing update request type.
Description	Displays the description of the mass pricing update request type.
Edit	On clicking the <b>Edit</b> (  ) icon, the <b>Mass Pricing Request Type</b> screen appears where you can edit the details of the mass pricing update request type.
Duplicate	On clicking the <b>Duplicate</b> (  ) icon, the <b>Mass Pricing Request Type</b> screen appears where you can define a new mass pricing update request type using an existing mass pricing update request type.
Delete	On clicking the <b>Delete</b> (  ) icon, you can delete the mass pricing update request type.  <b>Note:</b> You can delete the mass pricing update request type only when you have not created a mass pricing update request using the mass pricing update request type.

On clicking the **Broadcast** () icon corresponding to a mass pricing update request type, the **Request Type** zone appears with the details of the respective mass pricing update request type.

You can define a new mass pricing update request type by clicking the **Addlink** in the upper right corner of the **Request Type List** zone.

**Related Topics**

For more information on...	See...
How to edit a mass pricing update request type	<a href="#">Editing a Mass Pricing Update Request Type</a> on page 2223

How to view the details of a mass pricing update request type	<a href="#">Viewing the Mass Pricing Update Request Type Details</a> on page 2229

**Request Type**

The **Request Type** zone displays the details of the mass pricing update request type. It contains the following sections:

- **Main** - Displays the basic information about the mass pricing update request type. It contains the following fields:

Field Name	Field Description
Request Type	Displays the mass pricing update request type.
Request Business Object	Indicates the business object using which you want to create a mass pricing update request. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.
Description	Displays the description for the mass pricing update request type.
Detailed Description	Displays the additional information about the mass pricing update request type.
Status	Indicates the status of the mass pricing update request type. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>
Defer Processing Count	Indicates whether the price item pricing should be updated in the deferred mode (i.e. in the background) when the number of price assignments in a mass pricing update request exceeds the defer processing count.  <b>Note:</b> Deferred mode means in the background when the <b>Generic Request Periodic Monitor (C1-GENRQ)</b> batch is invoked. You can configure the <b>Generic Request Periodic Monitor (C1-GENRQ)</b> batch such that it is executed at regular intervals. For more information about the <b>Generic Request Periodic Monitor (C1-GENRQ)</b> batch, refer to <i>Oracle Revenue Management and Billing Batch Guide</i> .  If the number of price assignments in a mass pricing update request does not exceed the defer processing count, the system will process the mass pricing update request in real time (i.e. immediately).
Approval Required	Indicates whether approval is required before updating the price item pricing through a mass pricing update request.

Field Name	Field Description
Approval Type	Indicates the type of approval. The valid value is: <ul style="list-style-type: none"> <li>Request Level Approval</li> </ul>
Approval To Do Type	Indicates that To Do entry of the specified To Do type must be created when you submit the mass pricing update request for approval. <p><b>Note:</b> This field appears only when the <b>Approval Required</b> option is selected. It has a link. On clicking the link, the <b>To Do Type</b> screen appears where you can view the details of respective To Do type.</p>
Approval To Do Role	Indicates that the users with the specified To Do role will receive the mass pricing update request when it is submitted for approval. <p><b>Note:</b> This field appears only when the <b>Approval Required</b> option is selected. It has a link. On clicking the link, the <b>To Do Role</b> screen appears where you can view the details of respective To Do role.</p>
Submitter To Do Type	Indicates that To Do entry of the specified To Do type must be created when an approver rejects a mass pricing update request. <p><b>Note:</b> This field appears only when the <b>Approval Required</b> option is selected. It has a link. On clicking the link, the <b>To Do Type</b> screen appears where you can view the details of respective To Do type.</p>
Submitter To Do Role	Indicates that the users with the specified To Do role will receive the mass pricing update request when it is rejected by an approver. <p><b>Note:</b> This field appears only when the <b>Approval Required</b> option is selected. It has a link. On clicking the link, the <b>To Do Role</b> screen appears where you can view the details of respective To Do role.</p>

- **Record Actions** - This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the mass pricing update request type.
Delete	Used to delete the mass pricing update request type. <p><b>Note:</b> You can delete a mass pricing update request type only when you have not created a mass pricing update request using the mass pricing update request type.</p>
Duplicate	Used to create a new mass pricing update request type using an existing mass pricing update request type.

- **Record Information** - This section contains the following field:

Field Name	Field Description
Business Object	Indicates the business object using which the mass pricing update request type is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.

By default, the **Request Type** zone does not appear in the **Request Type** screen. It appears only when you click the **Broadcast**  icon corresponding to a mass pricing update request type in the **Request Type List** zone.

You can define a new mass pricing update request type by clicking the **Add** link in the upper right corner of this zone.

## Defining a Mass Pricing Update Request Type

### Prerequisites

To define a mass pricing update request type, you should have:

- Mass pricing update request type business objects defined in the application.
- Mass pricing update request business objects defined in the application.
- One To Do type defined for submitter and another To Do type defined for approver when the approval is required for a mass pricing update request
- A To Do role assigned to the required To Do types in the application

### Procedure

To define a mass pricing update request type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **R** and then click **Request Type**.  
A sub-menu appears.
3. Click the **Add** option from the **Request Type** sub-menu.

The **Select Business Object** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Request Type Business Object	Used to indicate the business object using which you want to create the mass pricing update request type.  <b>Note:</b> You can create a mass pricing update request type using the <b>Mass Pricing Request Type (C1-MassPricingReqType)</b> business object.	Yes

**Note:** Alternatively, you can access this screen by clicking the **Add** link in the upper right corner of the **Request Type List** zone.

4. Select the **Mass Pricing Request Type** business object from the respective field.
5. Click **OK**.

The **Mass Pricing Update Request Type** screen appears. It contains the following section:

- **Main** - Used to specify basic details about the mass pricing update request type. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Request Type	Used to specify the mass pricing update request type.	Yes
Business Object	Indicates the business object using which you are defining the mass pricing update request type.	Not applicable
Request Business Object	Used to indicate the business object using which you want to create a mass pricing update request. The valid value is: <ul style="list-style-type: none"> <li>• Mass Pricing Request</li> </ul>	Yes
Description	Used to specify the description for the mass pricing update request type.	Yes
Detailed Description	Used to specify the additional information about the mass pricing update request type.	No
Status	Used to indicate the status of the mass pricing update request type. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Defer Processing Count	<p>Used to indicate whether the price item pricing should be updated in the deferred mode (i.e. in the background) when the number of price assignments in a mass pricing update request exceeds the defer processing count.</p> <div data-bbox="589 386 1081 932" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>Deferred mode means in the background when the <b>Generic Request Periodic Monitor (C1-GENRQ)</b> batch is invoked. You can configure the <b>Generic Request Periodic Monitor (C1-GENRQ)</b> batch such that it is executed at regular intervals. For more information about the <b>Generic Request Periodic Monitor (C1-GENRQ)</b> batch, refer to <i>Oracle Revenue Management and Billing Batch Guide</i>.</p> <p>If the number of price assignments in a mass pricing update request does not exceed the defer processing count, the system will process the mass pricing update request in real time (i.e. immediately).</p> </div>	No
Approval Required	Used to indicate whether approval is required before updating the price item pricing through a mass pricing update request.	No
Approval Type	<p>Used to indicate the type of approval. The valid value is:</p> <ul style="list-style-type: none"> <li>• Request Level Approval</li> </ul> <div data-bbox="589 1199 1081 1283" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This field appears only when the <b>Approval Required</b> option is selected.</p> </div>	<p>Yes (Conditional)</p> <div data-bbox="1101 1121 1463 1234" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This field is required only when the <b>Approval Required</b> option is selected.</p> </div>
Approval To Do Type	<p>Used to indicate that To Do entry of the specified To Do type must be created when you submit the mass pricing update request for approval.</p> <div data-bbox="589 1455 1081 1751" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.</p> <p>The <b>Approval To Do Type</b> field appears only when the <b>Approval Required</b> option is selected.</p> </div>	<p>Yes (Conditional)</p> <div data-bbox="1101 1358 1463 1472" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This field is required only when the <b>Approval Required</b> option is selected.</p> </div>

Field Name	Field Description	Mandatory (Yes or No)
Approval To Do Role	<p>Used to indicate that the users with the specified To Do role must receive the mass pricing update request for approval.</p> <p><b>Note:</b> This field appears only when the <b>Approval Required</b> option is selected. The list includes only those To Do roles which are associated to the specified approval To Do type.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required only when the <b>Approval Required</b> option is selected.</p>
Submitter To Do Type	<p>Used to indicate that To Do entry of the specified To Do type must be created when the approver rejects the mass pricing update request.</p> <p><b>Note:</b> The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears. The <b>Submitter To Do Type</b> field appears only when the <b>Approval Required</b> option is selected.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required only when the <b>Approval Required</b> option is selected.</p>
Submitter To Do Role	<p>Used to indicate that the users with the specified To Do role must receive a To Do when the approver rejects the mass pricing update request.</p> <p><b>Note:</b> This field appears only when the <b>Approval Required</b> option is selected. The list includes only those To Do roles which are associated to the specified submitter To Do type.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required only when the <b>Approval Required</b> option is selected.</p>

6. Enter the required details in the **Main** section.
7. Click **Save**.

The mass pricing update request type is defined.

<b>Request Type List</b> zone	<a href="#">Request Type List</a> on page 2216

## Editing a Mass Pricing Update Request Type

### Prerequisites

To edit a mass pricing update request type, you should have:

- Mass pricing update request business objects defined in the application.

### Procedure

To edit a mass pricing update request type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **R** and then click **Request Type**.  
A sub-menu appears.

3. Click the **Search** option from the **Request Type** sub-menu.  
The **Request Type** screen appears.

4. In the **Request Type List** zone, click the **Edit**  icon in the **Edit** column corresponding to the mass pricing update request type whose details you want to edit.

The **Mass Pricing Update Request Type** screen appears. It contains the following section:

- **Main** - Used to specify basic details about the mass pricing update request type. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Request Type	Used to specify the mass pricing update request type.	Yes
Business Object	Indicates the business object using which you are defining the mass pricing update request type.	Not applicable
Request Business Object	Used to indicate the business object using which you want to create a mass pricing update request. The valid value is: <ul style="list-style-type: none"> <li>• Mass Pricing Request</li> </ul>	Yes
Description	Used to specify the description for the mass pricing update request type.	Yes
Detailed Description	Used to specify the additional information about the mass pricing update request type.	No
Status	Used to indicate the status of the mass pricing update request type. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Defer Processing Count	<p>Used to indicate whether the price item pricing should be updated in the deferred mode (i.e. in the background) when the number of price assignments in a mass pricing update request exceeds the defer processing count.</p> <div data-bbox="591 386 1107 930" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>Deferred mode means in the background when the <b>Generic Request Periodic Monitor (C1-GENRQ)</b> batch is invoked. You can configure the <b>Generic Request Periodic Monitor (C1-GENRQ)</b> batch such that it is executed at regular intervals. For more information about the <b>Generic Request Periodic Monitor (C1-GENRQ)</b> batch, refer to <i>Oracle Revenue Management and Billing Batch Guide</i>.</p> <p>If the number of price assignments in a mass pricing update request does not exceed the defer processing count, the system will process the mass pricing update request in real time (i.e. immediately).</p> </div>	No
Approval Required	Indicates whether approval is required before updating the price item pricing through a mass pricing update request.	No
Approval Type	<p>Indicates the type of approval. The valid value is:</p> <ul style="list-style-type: none"> <li>• Request Level Approval</li> </ul> <div data-bbox="591 1167 1107 1251" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This field appears only when the <b>Approval Required</b> option is selected.</p> </div>	<p>Yes (Conditional)</p> <div data-bbox="1130 1121 1464 1230" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This field is required only when the <b>Approval Required</b> option is selected.</p> </div>
Approval To Do Type	<p>Indicates that To Do entry of the specified To Do type must be created when you submit the mass pricing update request for approval.</p> <div data-bbox="591 1390 1107 1654" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>The <b>Search</b>  icon appears corresponding to this field. ## Copying a Mass Pricing Update Request Type

Instead of creating a mass pricing update request type from scratch, you can create a new mass pricing update request type using an existing mass pricing update request type. This is possible through copying a mass pricing update request type. On copying a mass pricing update request type, the details including the characteristics are copied to the new mass pricing update request type. You can then edit the details, if required.

### Prerequisites

To copy a mass pricing update request type, you should have:

- Mass pricing update request type (whose copy you want to create) defined in the application.
- Mass pricing update request business objects defined in the application.

### Procedure

To copy a mass pricing update request type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **R** and then click **Request Type**.  
A sub-menu appears.

3. Click the **Search** option from the **Request Type** sub-menu.

The **Request Type** screen appears.

4. In the **Request Type List** zone, click the **Duplicate** () icon in the **Duplicate** column corresponding to the request type whose copy you want to create.

The **Mass Pricing Update Request Type** screen appears. It contains the following section:

- **Main** - Used to specify basic details about the mass pricing update request type. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Request Type	Used to specify the mass pricing update request type.	Yes
Business Object	Indicates the business object using which you are defining the mass pricing update request type.	Not applicable
Request Business Object	Used to indicate the business object using which you want to create a mass pricing update request. The valid value is: <ul style="list-style-type: none"> <li>• Mass Pricing Request</li> </ul>	Yes
Description	Used to specify the description for the mass pricing update request type.	Yes
Detailed Description	Used to specify the additional information about the mass pricing update request type.	No
Status	Used to indicate the status of the mass pricing update request type. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Defer Processing Count	<p>Used to indicate whether the price item pricing should be updated in the deferred mode (i.e. in the background) when the number of price assignments in a mass pricing update request exceeds the defer processing count.</p> <div data-bbox="591 386 1105 930" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>Deferred mode means in the background when the <b>Generic Request Periodic Monitor (C1-GENRQ)</b> batch is invoked. You can configure the <b>Generic Request Periodic Monitor (C1-GENRQ)</b> batch such that it is executed at regular intervals. For more information about the <b>Generic Request Periodic Monitor (C1-GENRQ)</b> batch, refer to <i>Oracle Revenue Management and Billing Batch Guide</i>.</p> <p>If the number of price assignments in a mass pricing update request does not exceed the defer processing count, the system will process the mass pricing update request in real time (i.e. immediately).</p> </div>	No
Approval Required	Used to indicate whether approval is required before updating the price item pricing through a mass pricing update request.	No
Approval Type	<p>Used to indicate the type of approval. The valid value is:</p> <ul style="list-style-type: none"> <li>• Request Level Approval</li> </ul> <div data-bbox="591 1199 1105 1283" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This field appears only when the <b>Approval Required</b> option is selected.</p> </div>	<p>Yes (Conditional)</p> <div data-bbox="1130 1121 1463 1230" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This field is required only when the <b>Approval Required</b> option is selected.</p> </div>
Approval To Do Type	<p>Used to indicate that To Do entry of the specified To Do type must be created when you submit the mass pricing update request for approval.</p> <div data-bbox="591 1423 1105 1686" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.</p> <p>The <b>Approval To Do Type</b> field appears only when the <b>Approval Required</b> option is selected.</p> </div>	<p>Yes (Conditional)</p> <div data-bbox="1130 1360 1463 1470" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This field is required only when the <b>Approval Required</b> option is selected.</p> </div>

Field Name	Field Description	Mandatory (Yes or No)
Approval To Do Role	<p>Used to indicate that the users with the specified To Do role must receive the mass pricing update request for approval.</p> <p><b>Note:</b> This field appears only when the <b>Approval Required</b> option is selected. The list includes only those To Do roles which are associated to the specified approval To Do type.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required only when the <b>Approval Required</b> option is selected.</p>
Submitter To Do Type	<p>Used to indicate that To Do entry of the specified To Do type must be created when the approver rejects the mass pricing update request.</p> <p><b>Note:</b> The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears. The <b>Submitter To Do Type</b> field appears only when the <b>Approval Required</b> option is selected.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required only when the <b>Approval Required</b> option is selected.</p>
Submitter To Do Role	<p>Used to indicate that the users with the specified To Do role must receive a To Do when the approver rejects the mass pricing update request.</p> <p><b>Note:</b> This field appears only when the <b>Approval Required</b> option is selected. The list includes only those To Do roles which are associated to the specified submitter To Do type.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required only when the <b>Approval Required</b> option is selected.</p>

**Tip:** Alternatively, you can copy a mass pricing update request type by clicking the **Duplicate** button in the **Request Type** zone.

- Enter the required details in the **Main** section.
- Click **Save**.

The new mass pricing update request type is defined.

## Deleting a Mass Pricing Update Request Type

### Procedure

To delete a mass pricing update request type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **R** and then click **Request Type**.  
A sub-menu appears.
3. Click the **Search** option from the **Request Type** sub-menu.  
The **Request Type** screen appears.
4. In the **Request Type List** zone, click the **Delete** (🗑️) icon in the **Delete** column corresponding to the mass pricing update request type that you want to delete.  
A message appears confirming whether you want to delete the mass pricing update request type.

**Note:** You can delete a mass pricing update request type only when you have not created a mass pricing update request using the mass pricing update request type.

**Tip:** Alternatively, you can delete a mass pricing update request type by clicking the **Delete** button in the **Request Type** zone.

5. Click **OK**.  
The mass pricing update request type is deleted.

## Search Mass Pricing Update Request

The **Search Mass Pricing Update Request** zone allows you to search for a mass pricing update request using various search criteria. It contains the following two sections:

- Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Created From	Used to search mass pricing update requests which are created from a particular date onwards.	No
Status	Used to search mass pricing update requests with a particular status. The valid values are: <ul style="list-style-type: none"> <li>Approval in Progress</li> <li>Deferred Processing</li> <li>Draft</li> <li>Processed</li> <li>Rejected</li> <li>Running C1-GENRQ Batch</li> </ul>	No

Field Name	Field Description	Mandatory (Yes or No)
Created Until	Used to search mass pricing update requests which are created till a particular date.	No
User ID	Used to search mass pricing update requests which are created by a particular user.	No
Request Type	Used to search mass pricing update requests which are created using a particular mass pricing update request type.	No
Request ID	Used to search a particular mass pricing update request.	No

**Note:** You must specify at least one search criterion while searching a mass pricing update request.

- **Search Result** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Result** section contains the following columns:

Column Name	Column Description
Creation Date Time	Displays the date and time when the mass pricing update request is created.
Request Information	Displays information about the mass pricing update request. <b>Note:</b> It has a link. On clicking the link, the <b>Mass Pricing Update Request</b> screen appears where you can view the details of the respective mass pricing update request.
Status	Indicates the status of the mass pricing update request. The valid values are: <ul style="list-style-type: none"> <li>• Approval in Progress</li> <li>• Deferred Processing</li> <li>• Draft</li> <li>• Processed</li> <li>• Rejected</li> <li>• Running C1-GENRQ Batch</li> </ul>
Created By	Indicates the user who has created the mass pricing update request.

**Note:** Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

## Searching for a Mass Pricing Update Request

### Prerequisites

To search for a mass pricing update request, you should have:

- Mass pricing update request types defined in the application

### Procedure

To search for a mass pricing update request:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Pricing Management** and then click **Mass Pricing Update Request**.  
A sub-menu appears.
3. Click the **Search** option from the **Mass Pricing Update Request** sub-menu.  
The **Mass Pricing Update Request** screen appears.
4. Enter the search criteria in the **Search Mass Pricing Update Request** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search**.

A list of mass pricing update requests that meet the search criteria appears in the **Search Results** section.

## Creating a Mass Pricing Update Request

### Prerequisites

To define a mass pricing update request, you should have:

- Mass pricing update request types defined in the application
- A currency conversion algorithm attached to the **Currency Conversion For Bill Segments** algorithm spot of the respective division

### Procedure

To define a mass pricing update request:

- Click the **Menu** link in the **Application** toolbar.  
A list appears.
- From the **Main** menu, select **Pricing Management** and then click **Mass Pricing Update Request**.  
A sub-menu appears.
- Click the **Add** option from the **Mass Pricing Update Request** sub-menu.  
The **Mass Pricing Update Request** screen appears.
- Search for the required price assignments which you want to update in the **Search Price Assignments** zone.
- Do either of the following:

If you want to...	Then...
Update all price assignments of a particular pricing entity type	<ol style="list-style-type: none"> <li>Select the check box corresponding to the respective pricing entity type.</li> <li>Click <b>Mass Pricing Update</b>.</li> </ol>
Update all price assignments of one or more pricing entity type	<ol style="list-style-type: none"> <li>Select the check box corresponding to the respective pricing entity types.</li> <li>Click <b>Mass Pricing Update</b>.</li> </ol>
Update all price assignments of all pricing entity types	<ol style="list-style-type: none"> <li>Select the check box corresponding to all pricing entity types.</li> </ol>

If you want to...	Then...
	<ol style="list-style-type: none"> <li>2. Click <b>Mass Pricing Update</b>.</li> </ol>
Update the price item pricing assigned to a particular person	<ol style="list-style-type: none"> <li>1. Select the check box corresponding to the <b>Customer Agreed</b> pricing entity type. The <b>Customer Agreed Price Assignments</b> zone appears.</li> <li>2. Select the check box corresponding to the required price item pricing that you want to update in the <b>Customer Agreed Price Assignments</b> zone.</li> <li>3. Click <b>Mass Pricing Update</b>.</li> </ol>
Update the price item pricing assigned to a particular account	<ol style="list-style-type: none"> <li>1. Select the check box corresponding to the <b>Account Agreed</b> pricing entity type. The <b>Account Agreed Price Assignments</b> zone appears.</li> <li>2. Select the check box corresponding to the required price item pricing that you want to update in the <b>Account Agreed Price Assignments</b> zone.</li> <li>3. Click <b>Mass Pricing Update</b>.</li> </ol>
Update the price item pricing assigned to a particular price list	<ol style="list-style-type: none"> <li>1. Select the check box corresponding to the <b>Price List</b> pricing entity type. The <b>Price list Price Assignments</b> zone appears.</li> <li>2. Select the check box corresponding to the required price item pricing that you want to update in the <b>Price list Price Assignments</b> zone.</li> <li>3. Click <b>Mass Pricing Update</b>.</li> </ol>
Update the price item pricing assigned to a particular price list associated to a particular product	<ol style="list-style-type: none"> <li>1. Select the check box corresponding to the <b>Product</b> pricing entity type. The <b>Product Price list Price Assignments</b> zone appears.</li> <li>2. Select the check box corresponding to the required price item pricing that you want to update in the <b>Product Price list Price Assignments</b> zone.</li> <li>3. Click <b>Mass Pricing Update</b>.</li> </ol>

The **Select Request Type** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Mass Pricing Update Request Type	Used to indicate the mass pricing update request type using which you want to create a mass pricing update request.	Yes

6. Select the required mass pricing update request type from the respective field.
7. Click **OK**.

The **Mass Pricing Update Request** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Request Information	Displays information about the mass pricing update request.	Not applicable
Mass Pricing Update Criteria	Used to indicate whether you want to increase or decrease the rate in the price item pricing or whether you want to forcibly end the price item pricing on the update date. The valid values are: <ul style="list-style-type: none"> <li>• Decrease Price</li> <li>• End Date Price</li> <li>• Increase Price</li> </ul>	Yes
Mass Pricing Update Type	Used to indicate whether you want to increase or decrease the rate by an absolute value or in percentage. The valid values are: <ul style="list-style-type: none"> <li>• Absolute</li> <li>• Percentage</li> </ul> <p><b>Note:</b> This field appears only when the mass pricing update criteria is set to <b>Increase Price</b> or <b>Decrease Price</b>.</p>	Yes (Conditional) <p><b>Note:</b> This field is required when the mass pricing update criteria is set to <b>Increase Price</b> or <b>Decrease Price</b>.</p>
Rate Value	Used to specify the rate by which you want to increase or decrease the price. <p><b>Note:</b> This field appears only when the mass pricing update criteria is set to <b>Increase Price</b> or <b>Decrease Price</b>. You cannot specify a negative value or zero in the <b>Rate Value</b> field.</p>	Yes (Conditional) <p><b>Note:</b> This field is required when the mass pricing update criteria is set to <b>Increase Price</b> or <b>Decrease Price</b>.</p>

Field Name	Field Description	Mandatory (Yes or No)
Currency	<p>Used to indicate the currency in which the rate is specified.</p> <p><b>Note:</b> This field appears only when the mass pricing update type is set to <b>Absolute</b>.</p> <p>If the pricing currency is different from the currency which is specified in the mass pricing update request, the system does the currency conversion using the algorithm which is attached to the <b>Currency Conversion For Bill Segments</b> algorithm spot of the respective division.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required when the mass pricing update type is set to <b>Absolute</b>.</p>
Update Date	<p>Displays the date when you want to update the price assignments. The system fetches the price assignments which are effective on the update date. If you want to forcibly end a price item pricing through the mass pricing update request, the end date in the price item pricing is set to the update date. However, if you want to increase or decrease the rate in a price item pricing through the mass pricing update request, the system behaves in the following manner:</p> <ul style="list-style-type: none"> <li>• If a price assignment is referred in past, the existing price assignment is end dated and a new price assignment is created.</li> <li>• If a price assignment is not yet referred in the system, the existing price assignment is updated.</li> </ul> <p><b>Note:</b> You cannot update a price assignment through a mass pricing update request when the start or end date of the price assignment is equal to the update date.</p>	Not applicable

8. Enter the required details in the **Mass Pricing Update Request** screen.

9. Click **Save**.

The mass pricing update request is defined in the **Draft** status. And, the status of all price assignment records in the mass pricing update request is set to **Pending**.

## Mass Pricing Update Request (Used for Viewing)

The **Mass Pricing Update Request** screen allows you to:

- View the details of a mass pricing update request
- Edit the details of a mass pricing update request
- Delete a mass pricing update request
- Submit a mass pricing update request for processing
- Approve or reject a mass pricing update request
- Submit a batch job for a mass pricing update request
- View the log of a mass pricing update request
- Add a log entry for a mass pricing update request

It consists of the following tabs:

- [Mass Pricing Update Request - Main](#) on page 2237
- [Mass Pricing Update Request - Log](#) on page 2240

### Mass Pricing Update Request - Main

The **Main** tab displays information about the mass pricing update request. It contains the following zones:

- [Mass Pricing Update Request](#) on page 2237
- [Price Assignments](#) on page 2239

### Mass Pricing Update Request

The **Mass Pricing Update Request** zone displays the details of the mass pricing update request. It contains the following sections:

- **Main** - Displays basic information about the mass pricing update request. It contains the following fields:

Field Name	Field Description
Request Information	Displays information about the mass pricing update request.
Mass Pricing Update Request Type	Indicates the mass pricing update request type using which the mass pricing update request is created.  <b>Note:</b> It has a link. On clicking the link, the <b>Request Type</b> screen appears where you can view the details of the respective mass pricing update request type.
Status	Indicates the status of the mass pricing update request. The valid values are: <ul style="list-style-type: none"> <li>• Approval in Progress</li> <li>• Deferred Processing</li> <li>• Draft</li> <li>• Processed</li> <li>• Rejected</li> <li>• Running C1-GENRQ Batch</li> </ul>

Field Name	Field Description
Mass Pricing Update Criteria	Indicates whether you want to increase or decrease the rate in the price item pricing or whether you want to forcibly end the price item pricing on the update date. The valid values are: <ul style="list-style-type: none"> <li>• Decrease Price</li> <li>• End Date Price</li> <li>• Increase Price</li> </ul>
Mass Pricing Update Type	Indicates whether you want to increase or decrease the rate by an absolute value or in percentage. The valid values are: <ul style="list-style-type: none"> <li>• Absolute</li> <li>• Percentage</li> </ul> <p><b>Note:</b> This field appears only when the mass pricing update criteria is set to <b>Increase Price</b> or <b>Decrease Price</b>.</p>
Rate Value	Displays the rate by which you want to increase or decrease the price. <p><b>Note:</b> This field appears only when the mass pricing update criteria is set to <b>Increase Price</b> or <b>Decrease Price</b>.</p>
Currency	Indicates the currency in which the rate is specified. <p><b>Note:</b> This field appears only when the mass pricing update type is set to <b>Absolute</b>.</p>
Update Date	Displays the date when you want to update the price assignments.

- **Statistics** - Displays summarized information about the records which are included in the mass pricing update request. It contains the following fields:

Field Name	Field Description
Total Records	Displays the total number of price assignments which are included in the mass pricing update request.
Processed Records	Displays the total number of price assignments which are successfully updated through the mass pricing update request.
Error Records	Displays the total number of price assignments which could not be updated through the mass pricing update request.

- **Record Actions** - This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the mass pricing update request. <p><b>Note:</b> The <b>Edit</b> button appears only when the mass pricing update request is in the <b>Draft</b> status.</p>

Button Name	Button Description
Delete	Used to delete the mass pricing update request.  <b>Note:</b> The <b>Delete</b> button appears only when the mass pricing update request is in the <b>Draft</b> status.
Submit	Used to submit the mass pricing update request for updating the price assignments.  <b>Note:</b> The <b>Submit</b> button appears only when the mass pricing update request is in the <b>Draft</b> status.
Submit Batch	Used to generate a batch job using the <b>Generic Request Periodic Monitor (C1-GENRQ)</b> batch control.  <b>Note:</b> The <b>Submit Batch</b> button appears only when the mass pricing update request is in the <b>Deferred Processing</b> status.
Approve	Used to approve the mass pricing update request.  <b>Note:</b> The <b>Approve</b> button appears only when: <ul style="list-style-type: none"> <li>The mass pricing update request is in the <b>Approval in Progress</b> status.</li> <li>A user with the approval To Do role is reviewing the mass pricing update request.</li> </ul>
Reject	Used to reject the mass pricing update request.  <b>Note:</b> The <b>Reject</b> button appears only when: <ul style="list-style-type: none"> <li>The mass pricing update request is in the <b>Approval in Progress</b> status.</li> <li>A user with the approval To Do role is reviewing the mass pricing update request.</li> </ul>

- **Record Information** - This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the mass pricing update request is created. In addition, a context menu appears corresponding to the <b>Business Object</b> field which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.
Status Date Time	Displays the date and time when the mass pricing update request status is updated.
Creation Date Time	Displays the date and time when the mass pricing update request is created.

### Price Assignments

The **Price Assignments** zone lists the price assignments which you want to update through the mass pricing update request. It contains the following columns:

Column Name	Column Description
Pricing Information	Displays information about the price item pricing.  <b>Note:</b> It has a link. On clicking the link, the <b>Price Item Pricing</b> screen appears where you can view the details of the respective price item pricing.
Pricing Parameters	Displays a comma-separated list of parameter values using which the price item pricing is defined.  <b>Note:</b> The order in which parameter values appear in this field is controlled by the display order (which is defined while associating a parameter with a price item).
Entity ID	Indicates the entity to which the price item pricing is assigned.
Pricing Entity Type	Indicates the type of entity on which the price assignment is done. The valid values are: <ul style="list-style-type: none"> <li>• Account Agreed</li> <li>• Customer Agreed</li> <li>• Price List</li> <li>• Product</li> </ul>
Mass Pricing Update Status	Indicates the status of the price assignment record which is included in the mass pricing update request. The valid values are: <ul style="list-style-type: none"> <li>• Pending</li> <li>• Processed</li> <li>• Error</li> </ul>

**Note:** Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

## Mass Pricing Update Request - Log

The **Log** tab contains the following zone:

- [Mass Pricing Update Request Log](#) on page 2240

### Mass Pricing Update Request Log

The **Mass Pricing Update Request Log** zone lists the complete trail of actions performed on the mass pricing update request. It contains the following columns:

Column Name	Column Description
Creation Date Time	Displays the date and time when the action was performed on the mass pricing update request.
Details	Displays the details of the action performed on the mass pricing update request.
User	Indicates the user who has performed the action on the mass pricing update request.
Log Type	Indicates the type of the log.

Column Name	Column Description
Related Object	Indicates the object or entity which is created when the action is performed on the mass pricing update request.  <b>Note:</b> At present, no data appears in this column. The implementation team can build the custom logic to meet the business requirements.
Status Reason	Indicates the reason why the status of the mass pricing update request is changed.  <b>Note:</b> At present, no data appears in this column. The implementation team can build the custom logic to meet the business requirements.

**Note:** You can manually add a log entry for the mass pricing update request by clicking the **Add Log Entry** link in the upper right corner of the **Mass Pricing Update Request Log** zone.

## Creating a Mass Pricing Update Request

### Prerequisites

To define a mass pricing update request, you should have:

- Mass pricing update request types defined in the application
- A currency conversion algorithm attached to the **Currency Conversion For Bill Segments** algorithm spot of the respective division

### Procedure

To define a mass pricing update request:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Pricing Management** and then click **Mass Pricing Update Request**.  
A sub-menu appears.
3. Click the **Add** option from the **Mass Pricing Update Request** sub-menu.  
The **Mass Pricing Update Request** screen appears.
4. Search for the required price assignments which you want to update in the **Search Price Assignments** zone.
5. Do either of the following:

If you want to...	Then...
Update all price assignments of a particular pricing entity type	<ol style="list-style-type: none"> <li>1. Select the check box corresponding to the respective pricing entity type.</li> </ol>

If you want to...	Then...
	<ol style="list-style-type: none"> <li>2. Click <b>Mass Pricing Update</b>.</li> </ol>
Update all price assignments of one or more pricing entity type	<ol style="list-style-type: none"> <li>1. Select the check box corresponding to the respective pricing entity types.</li> <li>2. Click <b>Mass Pricing Update</b>.</li> </ol>
Update all price assignments of all pricing entity types	<ol style="list-style-type: none"> <li>1. Select the check box corresponding to all pricing entity types.</li> <li>2. Click <b>Mass Pricing Update</b>.</li> </ol>
Update the price item pricing assigned to a particular person	<ol style="list-style-type: none"> <li>1. Select the check box corresponding to the <b>Customer Agreed</b> pricing entity type. The <b>Customer Agreed Price Assignments</b> zone appears.</li> <li>2. Select the check box corresponding to the required price item pricing that you want to update in the <b>Customer Agreed Price Assignments</b> zone.</li> <li>3. Click <b>Mass Pricing Update</b>.</li> </ol>
Update the price item pricing assigned to a particular account	<ol style="list-style-type: none"> <li>1. Select the check box corresponding to the <b>Account Agreed</b> pricing entity type. The <b>Account Agreed Price Assignments</b> zone appears.</li> <li>2. Select the check box corresponding to the required price item pricing that you want to update in the <b>Account Agreed Price Assignments</b> zone.</li> <li>3. Click <b>Mass Pricing Update</b>.</li> </ol>
Update the price item pricing assigned to a particular price list	<ol style="list-style-type: none"> <li>1. Select the check box corresponding to the <b>Price List</b> pricing entity type. The <b>Price list Price Assignments</b> zone appears.</li> <li>2. Select the check box corresponding to the required price item pricing that you want to update in the <b>Price list Price Assignments</b> zone.</li> <li>3. Click <b>Mass Pricing Update</b>.</li> </ol>
Update the price item pricing assigned to a particular price list associated to a particular product	<ol style="list-style-type: none"> <li>1. Select the check box corresponding to the <b>Product</b> pricing entity type.</li> </ol>

If you want to...	Then...
	<p>The <b>Product Price list Price Assignments</b> zone appears.</p> <ol style="list-style-type: none"> <li>2. Select the check box corresponding to the required price item pricing that you want to update in the <b>Product Price list Price Assignments</b> zone.</li> <li>3. Click <b>Mass Pricing Update</b>.</li> </ol>

The **Select Request Type** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Mass Pricing Update Request Type	Used to indicate the mass pricing update request type using which you want to create a mass pricing update request.	Yes

6. Select the required mass pricing update request type from the respective field.
7. Click **OK**.

The **Mass Pricing Update Request** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Request Information	Displays information about the mass pricing update request.	Not applicable
Mass Pricing Update Criteria	<p>Used to indicate whether you want to increase or decrease the rate in the price item pricing or whether you want to forcibly end the price item pricing on the update date. The valid values are:</p> <ul style="list-style-type: none"> <li>• Decrease Price</li> <li>• End Date Price</li> <li>• Increase Price</li> </ul>	Yes
Mass Pricing Update Type	<p>Used to indicate whether you want to increase or decrease the rate by an absolute value or in percentage. The valid values are:</p> <ul style="list-style-type: none"> <li>• Absolute</li> <li>• Percentage</li> </ul> <p><b>Note:</b> This field appears only when the mass pricing update criteria is set to <b>Increase Price</b> or <b>Decrease Price</b>.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required when the mass pricing update criteria is set to <b>Increase Price</b> or <b>Decrease Price</b>.</p>

Field Name	Field Description	Mandatory (Yes or No)
Rate Value	<p>Used to specify the rate by which you want to increase or decrease the price.</p> <p><b>Note:</b> This field appears only when the mass pricing update criteria is set to <b>Increase Price</b> or <b>Decrease Price</b>. You cannot specify a negative value or zero in the <b>Rate Value</b> field.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required when the mass pricing update criteria is set to <b>Increase Price</b> or <b>Decrease Price</b>.</p>
Currency	<p>Used to indicate the currency in which the rate is specified.</p> <p><b>Note:</b> This field appears only when the mass pricing update type is set to <b>Absolute</b>. If the pricing currency is different from the currency which is specified in the mass pricing update request, the system does the currency conversion using the algorithm which is attached to the <b>Currency Conversion For Bill Segments</b> algorithm spot of the respective division.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required when the mass pricing update type is set to <b>Absolute</b>.</p>
Update Date	<p>Displays the date when you want to update the price assignments. The system fetches the price assignments which are effective on the update date. If you want to forcibly end a price item pricing through the mass pricing update request, the end date in the price item pricing is set to the update date. However, if you want to increase or decrease the rate in a price item pricing through the mass pricing update request, the system behaves in the following manner:</p> <ul style="list-style-type: none"> <li>• If a price assignment is referred in past, the existing price assignment is end dated and a new price assignment is created.</li> <li>• If a price assignment is not yet referred in the system, the existing price assignment is updated.</li> </ul> <p><b>Note:</b> You cannot update a price assignment through a mass pricing update request when the start or end date of the price assignment is equal to the update date.</p>	<p>Not applicable</p>

8. Enter the required details in the **Mass Pricing Update Request** screen.

9. Click **Save**.

The mass pricing update request is defined in the **Draft** status. And, the status of all price assignment records in the mass pricing update request is set to **Pending**.

**Editing a Mass Pricing Update Request****Procedure**

To edit a mass pricing update request:

1. Search for the mass pricing update request in the **Mass Pricing Update Request** screen.
2. In the **Search Results** section, click the link in the **Request Information** column corresponding to the mass pricing update request whose details you want to edit.

The **Mass Pricing Update Request** screen appears.

3. Ensure that the **Main** tab is selected.
4. Click the **Edit** button in the **Mass Pricing Update Request** zone.

The **Mass Pricing Update Request** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Request Information	Displays information about the mass pricing update request.	Not applicable
Mass Pricing Update Criteria	Used to indicate whether you want to increase or decrease the rate in the price item pricing or whether you want to forcibly end the price item pricing on the update date. The valid values are: <ul style="list-style-type: none"> <li>• Decrease Price</li> <li>• End Date Price</li> <li>• Increase Price</li> </ul>	Yes
Mass Pricing Update Type	Used to indicate whether you want to increase or decrease the rate by an absolute value or in percentage. The valid values are: <ul style="list-style-type: none"> <li>• Absolute</li> <li>• Percentage</li> </ul> <p><b>Note:</b> The <b>Mass Pricing Update Type</b> field appears only when the mass pricing update criteria is set to <b>Increase Price</b> or <b>Decrease Price</b>.</p>	Yes (Conditional) <p><b>Note:</b> The <b>Mass Pricing Update Type</b> field is required when the mass pricing update criteria is set to <b>Increase Price</b> or <b>Decrease Price</b>.</p>

Field Name	Field Description	Mandatory (Yes or No)
Rate Value	<p>Used to specify the rate by which you want to increase or decrease the price.</p> <p><b>Note:</b> The <b>Rate Value</b> field appears only when the mass pricing update criteria is set to <b>Increase Price</b> or <b>Decrease Price</b>. You cannot specify a negative value or zero in the <b>Rate Value</b> field.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> The <b>Rate Value</b> field is required when the mass pricing update criteria is set to <b>Increase Price</b> or <b>Decrease Price</b>.</p>
Currency	<p>Used to indicate the currency in which the rate is specified.</p> <p><b>Note:</b> The <b>Currency</b> field appears only when the mass pricing update type is set to <b>Absolute</b>. If the pricing currency is different from the currency which is specified in the mass pricing update request, the system does the currency conversion using the algorithm which is attached to the <b>Currency Conversion For Bill Segments</b> algorithm spot of the respective division.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> The <b>Currency</b> field is required when the mass pricing update type is set to <b>Absolute</b>.</p>
Update Date	<p>Displays the date when you want to update the price assignments. The system fetches the price assignments which are effective on the update date. If you want to forcibly end a price item pricing through the mass pricing update request, the end date in the price item pricing is set to the update date. However, if you want to increase or decrease the rate in a price item pricing through the mass pricing update request, the system behaves in the following manner:</p> <ul style="list-style-type: none"> <li>• If a price assignment is referred in past, the existing price assignment is end dated and a new price assignment is created.</li> <li>• If a price assignment is not yet referred in the system, the existing price assignment is updated.</li> </ul> <p><b>Note:</b> You cannot update a price assignment through a mass pricing update request when the start or end date of the price assignment is equal to the update date.</p>	<p>Not applicable</p>

**Note:** The **Edit** button appears only when the mass pricing update request is in the **Draft** status.

5. Modify the required details in the **Mass Pricing Update Request** screen.
6. Click **Save**.

The changes made to the mass pricing update request are saved.

## Deleting a Mass Pricing Update Request

### Procedure

To delete a mass pricing update request:

1. Search for the mass pricing update request in the **Mass Pricing Update Request** screen.
2. In the **Search Results** section, click the link in the **Request Information** column corresponding to the mass pricing update request that you want to delete.

The **Mass Pricing Update Request** screen appears.

3. Ensure that the **Main** tab is selected.
4. Click the **Delete** button in the **Mass Pricing Update Request** zone.

A message appears confirming whether you want to delete the mass pricing update request.

**Note:** The **Delete** button in the **Mass Pricing Update Request** zone appears only when the mass pricing update request is in the **Draft** status.

**Note:** The **Delete** button appears only when the mass pricing update request is in the **Draft** status.

5. Click **OK**.

The mass pricing update request is deleted.

## Submitting a Mass Pricing Update Request

### Procedure

To submit a mass pricing update request:

1. Search for the mass pricing update request in the **Mass Pricing Update Request** screen.
2. In the **Search Results** section, click the link in the **Request Information** column corresponding to the mass pricing update request that you want to submit.

The **Mass Pricing Update Request** screen appears.

3. Ensure that the **Main** tab is selected.

4. Click the **Submit** button in the **Mass Pricing Update Request** zone.

The system behaves in the following manner:

If...	Then...
The <b>Approval Required</b> option is selected in the mass pricing update request type using which the mass pricing update request is created	The status of the mass pricing update request is changed to <b>Approval in Progress</b> . A To Do is created using the approval To Do type which is specified in the mass pricing update request type. Once a To Do is created, it is assigned to all users with an approval To Do role which is specified in the mass pricing update request type.
The <b>Approval Required</b> option is not selected in the mass pricing update request type and the number of price assignments in the mass pricing update request exceeds the defer processing count	The status of the mass pricing update request is changed to <b>Deferred Processing</b> .
The <b>Approval Required</b> option is not selected in the mass pricing update request type and the number of price assignments in the mass pricing update request does not exceed the defer processing count	<p>The status of the mass pricing update request is changed to <b>Updating Price Assignments</b>. If a price assignment is referred in past, the existing price assignment is end dated and a new price assignment is created. However, if a price assignment is not yet referred in the system, the existing price assignment is updated. Once the price assignment is newly created or updated, the status of the record in the mass pricing update request is changed to <b>Processed</b>. However, if a price assignment is referred for a future date, the status of the record in the mass pricing update request is changed to <b>Error</b>. In addition, if any error occurs while updating an existing price assignment or creating a new price assignment, the status of the record in the mass pricing update request is changed to <b>Error</b>. Finally, the status of the mass pricing update request is changed to <b>Processed</b>.</p> <div data-bbox="889 1255 1468 1373" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> If a price assignment is included multiple times in a mass pricing update request, the system will update the price assignment only once.</p> </div>

**Note:** The **Submit** button appears only when the mass pricing update request is in the **Draft** status.

## **Generating a Batch Job for a Mass Pricing Update Request**

### **Procedure**

To generate a batch job for a mass pricing update request:

1. Search for the mass pricing update request in the **Mass Pricing Update Request** screen.
2. In the **Search Results** section, click the link in the **Request Information** column corresponding to the mass pricing update request for which you want to submit a batch job.

The **Mass Pricing Update Request** screen appears.

3. Ensure that the **Main** tab is selected.
4. Click the **Submit Batch** button in the **Mass Pricing Update Request** zone.

A batch job is created using the **C1-GENRQ** batch control. While creating the batch job, it uses the values defined in the **Thread Count** and **Thread Pool Name** option types of the **Mass Pricing Update (C1-MASPRI)** feature configuration. In addition, a log is created for the mass pricing update request which indicates the batch job ID. Finally, the status of the mass pricing update request is changed to **Running C1-GENRQ Batch**.

**Note:** The **Submit Batch** button appears only when the mass pricing update request is in the **Deferred Processing** status.

## Approving a Mass Pricing Update Request

### Procedure

To approve a mass pricing update request:

1. Search for the mass pricing update request in the **Mass Pricing Update Request** screen.
2. In the **Search Results** section, click the link in the **Request Information** column corresponding to the mass pricing update request whose details you want to review.

The **Mass Pricing Update Request** screen appears.

3. Ensure that the **Main** tab is selected.
4. Click the **Approve** button in the **Mass Pricing Update Request** zone.

The system behaves in the following manner:

If...	Then...
The number of price assignments in the mass pricing update request exceeds the defer processing count	The status of the mass pricing update request is changed to <b>Deferred Processing</b> .

If...	Then...
<p>The number of price assignments in the mass pricing update request does not exceed the defer processing count</p>	<p>The status of the mass pricing update request is changed to <b>Updating Price Assignments</b>. If a price assignment is referred in past, the existing price assignment is end dated and a new price assignment is created. However, if a price assignment is not yet referred in the system, the existing price assignment is updated. Once the price assignment is newly created or updated, the status of the record in the mass pricing update request is changed to <b>Processed</b>. However, if a price assignment is referred for a future date, the status of the record in the mass pricing update request is changed to <b>Error</b>. In addition, if any error occurs while updating an existing price assignment or creating a new price assignment, the status of the record in the mass pricing update request is changed to <b>Error</b>. Finally, the status of the mass pricing update request is changed to <b>Processed</b>.</p> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> If a price assignment is included multiple times in a mass pricing update request, the system will update the price assignment only once.</p> </div>

**Note:**

The mass pricing update request is in the **Approval In Progress** status.

A user with the approval To Do role is reviewing the mass pricing update request.

The system will not allow you to approve or reject a mass pricing update request submitted by you.

## **Mass Pricing Update Request**

The **Mass Pricing Update Request** screen allows you to search for price assignments using various search criteria. The search results (i.e. price assignments) are grouped based on the pricing entity type, such as **Account Agreed**, **Customer Agreed**, **Price List**, and **Product**. You can then create a mass pricing update request for the following:

- All price assignments of a particular pricing entity type
- All price assignments of one or more pricing entity type
- All price assignments of all pricing entity types
- A price item pricing assigned to a particular person, account, or price list
- A price item pricing assigned to a price list which is associated to a product
- One or more price assignments of a person, account, or price list
- One or more price assignments of a price list which is associated to a product

It contains the following zones:

- [Search Price Assignments](#) on page 2253
- [Account Agreed Price Assignments](#) on page 2255

- [Customer Agreed Price Assignments](#) on page 2256
- [Price List Price Assignments](#) on page 2257
- [Product Price List Price Assignments](#) on page 2257

## Search Price Assignments

The **Search Price Assignments** zone allows you to search for active price assignments on different pricing entity type. It contains the following sections:

- **Search Criteria** – The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Price Item	Used to search pricing which is defined for a particular price item.  <b>Note:</b> The <b>Search</b>  icon appears corresponding to the <b>Price Item</b> field. On clicking the <b>Search</b> icon, the <b>Price Item Search</b> window appears.	Yes
Account ID	Used to search pricing which is assigned to a particular account.  <b>Note:</b> The <b>Search</b>  icon appears corresponding to the <b>Account ID</b> field. On clicking the <b>Search</b> icon, the <b>Account Search</b> window appears.	No
Person ID	Used to search pricing which is assigned to a particular person.  <b>Note:</b> The <b>Search</b>  icon appears corresponding to the <b>Person ID</b> field. On clicking the <b>Search</b> icon, the <b>Person Search</b> window appears.	No
Division	Used to search pricing which belongs to a particular division.  <b>Note:</b> You can only view those divisions to which you have access in the <b>Division</b> list.	Yes
Update Date	Used to search pricing which is effective on a particular date.  <b>Note:</b> By default, this field is set to the current date. The update date cannot be earlier than the system date.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Pricing Entity Type	<p>Used to search pricing which is defined on a particular type of entity. The valid values are:</p> <ul style="list-style-type: none"> <li>Account Agreed</li> <li>Customer Agreed</li> <li>Price List</li> <li>Product</li> </ul> <p><b>Note:</b> This field appears only when you click the <b>Advanced Search</b> link available in the right side of the <b>Search Price Assignments</b> zone.</p>	No

In addition, it contains the **Price Item Parameters** section which has the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Parameter	<p>Used to search pricing which is defined using a particular parameter.</p> <p><b>Note:</b> The <b>Search</b>  icon appears corresponding to the <b>Parameter</b> field. On clicking the <b>Search</b> icon, the <b>Parameter Search</b> window appears.</p>	No
Parameter Value	<p>Used to search pricing which is defined using a particular parameter value.</p> <p><b>Note:</b> If the value type of the parameter is <b>Adhoc</b> or <b>Predefined</b>, the <b>Search</b>  icon appears corresponding to the <b>Parameter Value</b> field. On clicking the <b>Search</b> icon, the <b>Parameter Value Search</b> window appears.</p>	Yes (Conditional)

**Note:** If you want to add more than one parameter while searching for price assignments, click the **Add**  icon and then specify the parameter and parameter value. However, if you want to remove a parameter and parameter value combination from the search criteria, click the **Delete**  icon corresponding to the parameter and parameter value combination.

- **Search Result** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Result** section contains the following columns:

Column Name	Column Description
Pricing Entity Type	Indicates the type of entity on which the price item pricing is defined. The valid values are: <ul style="list-style-type: none"> <li>Account Agreed</li> <li>Customer Agreed</li> <li>Price List</li> <li>Product</li> </ul>
Pricing Entity Count	Indicates the number of entities on which the price item pricing is defined.
Price Assignment Count	Indicates the number of price assignments on a particular type of pricing entity.

**Note:** Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

In addition, it contains the following button:

Button Name	Button Description
Mass Pricing Update	Used to create a mass pricing update request.

On clicking the **Broadcast**  icon corresponding to a pricing entity type, the **Account Agreed Price Assignments**, **Customer Agreed Price Assignments**, **Price List Price Assignments**, or **Product Price List Price Assignments** zone appears depending on the pricing entity type.

A check box appears corresponding to each pricing entity type. On selecting the check box, you can create a mass pricing update request for all price assignments which are done on the respective pricing entity type. You can also create a mass pricing update request for all price assignments which are done on one or more pricing entity types at the same time. In addition, you can select the check box corresponding to the column header. This indicates that you want to create a mass pricing update request for all price assignments which are done on all pricing entity types.

## Account Agreed Price Assignments

The **Account Agreed Price Assignments** zone lists the active pricing of a price item which is assigned to an account. It contains the following columns:

Column Name	Column Description
Account Information	Indicates the account to which the price item pricing is assigned. In addition, the <b>Account Information</b> column has a context menu which helps in navigating to other screens in the application. <p><b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account.</p>
Account Identifier Type	Indicates the primary identifier type of the account.
Account Identifier	Indicates the account to which the price item pricing is assigned.
Pricing Information	Displays information about the price item pricing. <p><b>Note:</b> It has a link. On clicking the link, the <b>Price Item Pricing</b> screen appears where you can view the details of respective price item pricing.</p>

Column Name	Column Description
Pricing Parameters	Displays a comma-separated list of parameter values using which the price item pricing is defined.  <b>Note:</b> The order in which parameter values appear in this field is controlled by the display order (which is defined while associating a parameter with a price item).

**Note:** Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

In addition, it contains the following button:

Button Name	Button Description
Mass Pricing Update	Used to create a mass pricing update request.

A check box appears corresponding to each price assignment. On selecting the check box, you can create a mass pricing update request for the price assignment. You can select multiple price assignments at the same time. You can also select the check box corresponding to the column header. This indicates that you want to create a mass pricing update request for all price assignments which are defined at the account level.

## Customer Agreed Price Assignments

The **Customer Agreed Price Assignments** zone lists the active pricing of a price item which is assigned to a person. It contains the following columns:

Column Name	Column Description
Person Information	Indicates the person to whom the price item pricing is assigned. In addition, the <b>Person Information</b> column has a context menu which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Person</b> screen appears where you can view the details of the respective person.
Person Identifier Type	Indicates the primary identifier type of a person.
Person Identifier	Indicates the person to whom the price item pricing is assigned.
Pricing Information	Displays information about the price item pricing.  <b>Note:</b> It has a link. On clicking the link, the <b>Price Item Pricing</b> screen appears where you can view the details of respective price item pricing.
Pricing Parameters	Displays a comma-separated list of parameter values using which the price item pricing is defined.  <b>Note:</b> The order in which parameter values appear in this field is controlled by the display order (which is defined while associating a parameter with a price item).

**Note:** Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

In addition, it contains the following button:

Button Name	Button Description
Mass Pricing Update	Used to create a mass pricing update request.

A check box appears corresponding to each price assignment. On selecting the check box, you can create a mass pricing update request for the price assignment. You can select multiple price assignments at the same time. You can also select the check box corresponding to the column header. This indicates that you want to create a mass pricing update request for all price assignments which are defined at the person level.

## Price List Price Assignments

The **Price List Price Assignments** zone lists the active pricing of a price item which is assigned to a price list. It contains the following columns:

Column Name	Column Description
Price List Information	Indicates the price list to which the price item pricing is assigned. In addition, this column has a context menu which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Price List</b> screen appears where you can view the details of the respective price list.
Pricing Information	Displays information about the price item pricing.  <b>Note:</b> It has a link. On clicking the link, the <b>Price Item Pricing</b> screen appears where you can view the details of respective price item pricing.
Pricing Parameters	Displays a comma-separated list of parameter values using which the price item pricing is defined.  <b>Note:</b> The order in which parameter values appear in this field is controlled by the display order (which is defined while associating a parameter with a price item).

**Note:** Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

In addition, it contains the following button:

Button Name	Button Description
Mass Pricing Update	Used to create a mass pricing update request.

A check box appears corresponding to each price assignment. On selecting the check box, you can create a mass pricing update request for the price assignment. You can select multiple price assignments at the same time. You can also select the check box corresponding to the column header. This indicates that you want to create a mass pricing update request for all price assignments which are defined in the price lists.

## Product Price List Price Assignments

The **Product Price List Price Assignments** zone lists the active pricing of a price item which is added in the price lists associated with the products. It contains the following columns:

Column Name	Column Description
Product	Displays information about the product.

Column Name	Column Description
Product Version	Displays information about the effective product version.
Price List Information	Indicates the price list associated with the product to which the price item pricing is assigned. In addition, this column has a context menu which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Price List</b> screen appears where you can view the details of respective price list.
Pricing Information	Displays information about the price item pricing.  <b>Note:</b> It has a link. On clicking the link, the <b>Price Item Pricing</b> screen appears where you can view the details of respective price item pricing.
Pricing Parameters	Displays a comma-separated list of parameter values using which the price item pricing is defined.  <b>Note:</b> The order in which parameter values appear in the <b>Pricing Parameters</b> field is controlled by the display order (which is defined while associating a parameter with a price item).

**Note:** Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

In addition, it contains the following button:

Button Name	Button Description
Mass Pricing Update	Used to create a mass pricing update request.

A check box appears corresponding to each price assignment. On selecting the check box, you can create a mass pricing update request for the price assignment. You can select multiple price assignments at the same time. You can also select the check box corresponding to the column header. This indicates that you want to create a mass pricing update request for all price assignments which are defined in the price lists associated with the products.

## Searching for Price Assignments on a Pricing Entity

### Prerequisites

To search for price assignments on a pricing entity, you should have:

- Price items, accounts, persons, and divisions defined in the application
- Price item associated with the required division
- Access to the required division

### Procedure

To search for price assignments on a pricing entity:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Pricing Management** and then click **Mass Pricing Update Request**.  
A sub-menu appears.
3. Click the **Add** option from the **Mass Pricing Update Request** sub-menu.

The **Mass Pricing Update Request** screen appears.

- Enter the search criteria in the **Search Price Assignments** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

- Click **Search**.

The number of price assignments on the following types of pricing entity are listed in the **Search Results** section:

- Account Agreed
- Customer Agreed
- Price List
- Product

## Viewing the Price Assignments Defined at the Account Level

### Procedure

To view the price assignments defined at the account level:

- Search for price assignments in the **Mass Pricing Update Request** screen.
- In the **Search Results** section, click the **Broadcast**  icon corresponding to the **Account Agreed** pricing entity type whose details you want to view.

The **Account Agreed Price Assignments** zone appears.

- View the price item pricing assigned to the accounts in the **Account Agreed Price Assignments** zone.

## Viewing the Price Assignments Defined at the Person Level

### Procedure

To view the price assignments defined at the person level:

- Search for price assignments in the **Mass Pricing Update Request** screen.
- In the **Search Results** section, click the **Broadcast**  icon corresponding to the **Customer Agreed** pricing entity type whose details you want to view.

The **Customer Agreed Price Assignments** zone appears.

- View the price item pricing assigned to the persons in the **Customer Agreed Price Assignments** zone.

## Viewing the Price Assignments Defined on the Price Lists

### Procedure

To view the price assignments defined on the price lists:

- Search for price assignments in the **Mass Pricing Update Request** screen.
- In the **Search Results** section, click the **Broadcast**  icon corresponding to the **Price List** pricing entity type whose details you want to view.

The **Price List Price Assignments** zone appears.

- View the price item pricing assigned to the price lists in the **Price List Price Assignments** zone.

---

## Price Item, Parameter, and SQI Upload

---

### Topics:

- [Uploading a Price Item File in the XML Format](#)
- [Uploading a Price Item File in the CSV Format](#)
- [XML File Format for Uploading Price Items](#)
- [Sample XML Format for Uploading Price Items](#)
- [CSV File Format for Uploading Price Items](#)
- [Sample CSV Format for Uploading Price Items](#)
- [Uploading a Parameter File in the XML Format](#)
- [Uploading a Parameter File in the CSV Format](#)
- [XML File Format for Uploading Parameters](#)
- [Sample XML Format for Uploading Parameters](#)
- [CSV File Format for Uploading Parameters](#)
- [Sample CSV Format for Uploading Parameters](#)
- [Uploading an SQI File in the XML Format](#)
- [Uploading an SQI File in the CSV Format](#)
- [XML File Format for Uploading Service Quantity Identifiers \(SQIs\)](#)

There might be situations when the customer wants to move the price item, parameter, and service quantity identifier information from the legacy system to Oracle Revenue Management and Billing (ORMB). In such situations, you can use the **Price Item, Parameter, and SQI Upload** feature in ORMB to create new price items or edit the existing price items using the **File Upload Interface** utility. You can also use the **Price Item, Parameter, and SQI Upload** feature to create new parameters and SQIs using the **File Upload Interface** utility. However, at present, you cannot edit the existing parameters and SQIs using the **Price Item, Parameter, and SQI Upload** feature. You can only edit the existing parameters and SQIs from the respective user interface.

**Note:** If you want to edit an existing price item in the system, you must provide all details of the price item and not just the details which you want to update. This is because the **File Upload Interface** utility supports the **Replace** operation and not the **Edit** operation while editing the price item.

You can upload the price item, parameter, and SQI files in the XML or CSV format using the **File Upload Interface** utility. You can specify the following in the XML and CSV files along with the basic details of the price item:

- Parameters and divisions which you want to associate with the price item
- Characteristics for the price item
- Division-specific characteristics for the price item
- Division-specific SQIs for the price item
- Details of the price item relationship

**Note:** While uploading the price item file, you need to ensure that the parameters and service quantity identifiers mentioned in the price item file are already present in the system.

You can upload the price items, parameters, and SQIs from the same file or from individual files based on the business requirements. For more information, refer to [Uploading Price Items, Parameters, and SQIs from the Same File](#) on page 2327.

At present, the system does not allow you to configure the approval process for the **Price Item, Parameter, and SQI Upload** feature. Therefore, you must ensure that the files are pre-approved before uploading them in the system.

- *Sample XML Format for Uploading Service Quantity Identifiers (SQIs)*
- *CSV File Format for Uploading Service Quantity Identifiers (SQIs)*
- *Sample CSV Format for Uploading SQIs*
- *Uploading Price Items, Parameters, and SQIs from the Same File*

## Uploading a Price Item File in the XML Format

To upload a price item file in the XML format using the **File Upload Interface** utility, you need to do the following:

1. Define a file request type for uploading price items in the XML format
2. Upload the price item file
3. Create or update the price items in the system

### Related Topics

For more information on...	See...
How to define a file request type for uploading price items in the XML format	<a href="#">Defining a File Request Type for Uploading Price Items in the XML Format</a> on page 2263
How to upload a price item file	<a href="#">Uploading a Price Item File</a> on page 2264
How to create or update the price items in the system	<a href="#">Creating or Updating Price Items</a> on page 2264

## Defining a File Request Type for Uploading Price Items in the XML Format

### Procedure

To define a file request type for uploading price items in the XML format:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **File Request Type**.  
A sub-menu appears.
3. Click the **Add** option from the **File Request Type** sub-menu.  
The **File Request Type** screen appears.
4. Enter the file request type and description in the respective fields.
5. Ensure that the **Extensible Markup Language** option is selected from the **File Format** list.
6. Attach an algorithm created using the **C1-FRHVA** algorithm type to the **File Validation Algorithm** field.
7. In the **Services** section, enter the required sequence number.
8. Select the **Business Object** option from the **Service Type** list.
9. Enter the **C1\_PRICEITEM\_BO** business object or custom price item business object in the **Service Name** field.
10. Attach an algorithm created using the **C1-PRCITM-PR** algorithm type to the **Pre-Processing Algorithm** field corresponding to the price item business object.

**Note:** For more information about the **C1-PRCITM-PR** algorithm, refer to [C1-PRCITM-PR](#).

11. Select the **Add** or **Replace** option from the **Operation** list depending on whether you want to create new price items or edit the existing price items using the file request type.
12. Click **Save**.

The file request type is defined for uploading price items in the XML format.

## Uploading a Price Item File

You can upload a price item file using the **File Transformation and Upload (C1-FTRAN)** batch. While executing this batch, you must specify a file request type which is defined for uploading the price item files in the XML format. For more information about the batch, refer to *Oracle Revenue Management and Billing Batch Guide*.

## Creating or Updating Price Items

You can create or edit the price items in the system using the **File Request Processing (C1-FREQP)** batch. While executing this batch, you must specify a file request type which is defined for uploading the price item files in the XML format. For more information about the batch, refer to *Oracle Revenue Management and Billing Batch Guide*.

## Uploading a Price Item File in the CSV Format

To upload a price item file in the CSV format using the **File Upload Interface** utility, you need to do the following:

1. Define a file request type for uploading price items in the CSV format
2. Upload the price item file
3. Create or update the price items in the system

### Related Topics

For more information on...	See...
How to define a file request type for uploading price items in the CSV format	<a href="#">Defining a File Request Type for Uploading Price Items in the CSV Format</a> on page 2264
How to upload a price item file	<a href="#">Uploading a Price Item File</a> on page 2265
How to create or update the price items in the system	<a href="#">Creating or Updating Price Items</a> on page 2265

## Defining a File Request Type for Uploading Price Items in the CSV Format

### Procedure

To define a file request type for uploading price items in the CSV format:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **File Request Type**.  
A sub-menu appears.
3. Click the **Add** option from the **File Request Type** sub-menu.  
The **File Request Type** screen appears.
4. Enter the file request type and description in the respective fields.
5. Select the **Data Transformation Required** option.  
The **File Format** field is enabled.
6. Select the **Comma Separated Values** option from the **File Format** list.
7. Enter `csv` in the **File Extension** field.
8. Attach an algorithm created using the **C1-FRHVA** algorithm type to the **File Validation Algorithm** field.
9. Attach an algorithm created using the **C1-FRTA** algorithm type to the **Data Transformation Algorithm** field.
10. In the **Services** section, enter the required sequence number.

11. Select the **Business Object** option from the **Service Type** list.
12. Enter the **C1\_PRICEITEM\_BO** business object or custom price item business object in the **Service Name** field.
13. Attach an algorithm created using the **C1-PRCITM-PR** algorithm type to the **Pre-Processing Algorithm** field corresponding to the price item business object.

**Note:** For more information about the **C1-PRCITM-PR** algorithm, refer to [C1-PRCITM-PR](#).

14. Select the **Add** or **Replace** option from the **Operation** list depending on whether you want to create new price items or edit the existing price items using the file request type.
15. If you have included a header in the CSV file, add the appropriate details in the **Header Transformation** section.
16. Similarly, if you have included a footer in the CSV file, add the appropriate details in the **Footer Transformation** section.
17. In the **Field Transformation** section, specify the following details:

Field Name	Field Description	Mandatory (Yes or No)
Sequence	Used to indicate the data field in the CSV record which you want to upload in the system.	Yes
Field Name	Used to indicate the field for which the data is uploaded in the system.	Yes
Map Field XPath	Used to specify the XPath of the field where you want to store the data field from the CSV record.	Yes

For example,

Sequence	Field Name	Map Field XPath
1	PRICEITEMCODE	C1_PRICEITEM_BO/priceItemCode
2	DESCRIPTION	C1_PRICEITEM_BO/description

18. Click **Save**.

The file request type is defined for uploading price items in the CSV format.

## Uploading a Price Item File

You can upload a price item file using the **File Transformation and Upload (C1-FTRAN)** batch. While executing this batch, you must specify a file request type which is defined for uploading the price item files in the CSV format. For more information about the batch, refer to *Oracle Revenue Management and Billing Batch Guide*.

## Creating or Updating Price Items

You can create or edit the price items in the system using the **File Request Processing (C1-FREQP)** batch. While executing this batch, you must specify a file request type which is defined for uploading the price item files in the CSV format. For more information about the batch, refer to *Oracle Revenue Management and Billing Batch Guide*.

## XML File Format for Uploading Price Items

Before uploading a price item file through the **File Upload Interface** utility, you need to ensure that the XML file contains the following tags:

Tag Name	Tag Description	Mandatory (Yes or No)
C1_PRICEITEM_BO	Used to specify the details of the price item or price item bundle whose record you want to create or update in the system.	Yes
priceItemCode	Used to specify the price item or price item bundle.	Yes
description	Used to specify the description for the price item or price item bundle.	Yes
priceItemAvailFor	Used to indicate whether the price item or price item bundle is used for only pricing or pricing and billing. The valid values are: <ul style="list-style-type: none"> <li>• <b>PRIC</b> - Enables you to use the price item or price item bundle for only pricing.</li> <li>• <b>PRBL</b> - Enables you to use the price item or price item bundle for pricing and billing.</li> </ul>	Yes
priceItemType	Used to indicate the type of the price item or price item bundle. If the price item or price item bundle is used for only pricing, the valid values are: <ul style="list-style-type: none"> <li>• FEES</li> <li>• RATE</li> </ul> However, if the price item or price item bundle is used for the pricing and billing, the valid value is: <ul style="list-style-type: none"> <li>• FEES</li> </ul>	Yes
piStatusFlag	Used to indicate the status of the price item or price item bundle. The valid values are: <ul style="list-style-type: none"> <li>• <b>ACTV</b> - Enables you to set the price item or price item bundle to <b>Active</b>.</li> <li>• <b>INAC</b> - Enables you to set the price item or price item bundle to <b>Inactive</b>.</li> </ul>	Yes
bundleSw	Used to indicate whether you want to define a price item bundle. The valid values are: <ul style="list-style-type: none"> <li>• Y</li> <li>• N</li> </ul>	Yes

Tag Name	Tag Description	Mandatory (Yes or No)
bundleTypeFlg	<p>Used to indicate the type of the price item bundle. If the price item bundle is available for pricing and billing, the valid values are:</p> <ul style="list-style-type: none"> <li>• <b>PHAN</b> - Enables you to create a phantom price item bundle.</li> <li>• <b>REGU</b> - Enables you to create a regular price item bundle.</li> <li>• <b>RTIO</b> - Enables you to create a ratio price item bundle.</li> </ul> <p>However, if the price item bundle is available for only pricing and the price item type is set to <b>FEES</b>, the valid value is:</p> <ul style="list-style-type: none"> <li>• <b>REGU</b> - Enables you to create a regular price item bundle.</li> </ul> <p><b>Note:</b> You cannot define a price item bundle when it is available for only pricing and when the price item type is set to <b>RATE</b>.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This data is required when you are creating a price item bundle.</p>
asgnGlobalPIsw	<p>Used to indicate whether the price item or price item bundle can be assigned to a global price list. The valid values are:</p> <ul style="list-style-type: none"> <li>• Y</li> <li>• N</li> </ul>	Yes
saType	Used to indicate the contract type that you want to associate with the price item or price item bundle.	<p>Yes (Conditional)</p> <p><b>Note:</b> This data is required when the price item or price item bundle is used for pricing and billing.</p>
priceItemParm	Used to specify the details of the parameter which you want to associate with the price item or price item bundle.	No

Tag Name	Tag Description	Mandatory (Yes or No)						
startDate	<p>You can use this tag within the following tags:</p> <table border="1" data-bbox="570 268 1154 835"> <thead> <tr> <th data-bbox="570 268 889 352">If this tag is used within...</th> <th data-bbox="889 268 1154 352">Then the purpose of the version tag is...</th> </tr> </thead> <tbody> <tr> <td data-bbox="570 352 889 531">priceItemParm</td> <td data-bbox="889 352 1154 531">Used to specify the date from when the parameter is effective for the price item or price item bundle.</td> </tr> <tr> <td data-bbox="570 531 889 835">priceItemRel</td> <td data-bbox="889 531 1154 835">Used to specify the date from when the price item or price item bundle is associated with the parent price item or added to the price item or price item bundle.</td> </tr> </tbody> </table>	If this tag is used within...	Then the purpose of the version tag is...	priceItemParm	Used to specify the date from when the parameter is effective for the price item or price item bundle.	priceItemRel	Used to specify the date from when the price item or price item bundle is associated with the parent price item or added to the price item or price item bundle.	<p>Yes (Conditional)</p> <div data-bbox="1175 260 1464 785" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This data is required when you want to do either of the following:</p> <ul style="list-style-type: none"> <li>Associate a parameter with the price item or price item bundle</li> <li>Associate a price item or price item bundle with the parent price item</li> <li>Add a price item or price item bundle to the price item bundle</li> </ul> </div>
If this tag is used within...	Then the purpose of the version tag is...							
priceItemParm	Used to specify the date from when the parameter is effective for the price item or price item bundle.							
priceItemRel	Used to specify the date from when the price item or price item bundle is associated with the parent price item or added to the price item or price item bundle.							
endDate	<p>You can use this tag within the following tags:</p> <table border="1" data-bbox="570 928 1154 1495"> <thead> <tr> <th data-bbox="570 928 889 1012">If this tag is used within...</th> <th data-bbox="889 928 1154 1012">Then the purpose of the version tag is...</th> </tr> </thead> <tbody> <tr> <td data-bbox="570 1012 889 1190">priceItemParm</td> <td data-bbox="889 1012 1154 1190">Used to specify the date till when the parameter is effective for the price item or price item bundle.</td> </tr> <tr> <td data-bbox="570 1190 889 1495">priceItemRel</td> <td data-bbox="889 1190 1154 1495">Used to specify the date till when the price item or price item bundle is associated with the parent price item or added to the price item or price item bundle.</td> </tr> </tbody> </table>	If this tag is used within...	Then the purpose of the version tag is...	priceItemParm	Used to specify the date till when the parameter is effective for the price item or price item bundle.	priceItemRel	Used to specify the date till when the price item or price item bundle is associated with the parent price item or added to the price item or price item bundle.	No
If this tag is used within...	Then the purpose of the version tag is...							
priceItemParm	Used to specify the date till when the parameter is effective for the price item or price item bundle.							
priceItemRel	Used to specify the date till when the price item or price item bundle is associated with the parent price item or added to the price item or price item bundle.							
priceParmCode	<p>Used to indicate the parameter that you want to associate with the price item or price item bundle.</p> <div data-bbox="570 1604 1154 1831" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>You must specify a parameter which is already defined in the system.</p> <p>The system allows you to specify only those parameters where the parameter usage is set to <b>Price Item</b>.</p> </div>	<p>Yes (Conditional)</p> <div data-bbox="1175 1575 1464 1717" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This data is required when you want to associate a parameter with the price item or price item bundle.</p> </div>						

Tag Name	Tag Description	Mandatory (Yes or No)
overridePriceParmLabel	Used to specify a business label for the parameter. If the business label is defined for a parameter, the business label appears instead of the parameter name.	No
displayOrder	Used to indicate the order in which the parameter and its value should be displayed in the price item parameter information string across the application.	Yes (Conditional) <b>Note:</b> This data is required when you want to associate a parameter with the price item or price item bundle.
parmUsageFlg	Used to indicate whether you want to use the parameter for aggregation and/or for defining the price item pricing. The valid values are: <ul style="list-style-type: none"> <li>• <b>AGG</b> - Indicates that you want to use the parameter for aggregating transactions.</li> <li>• <b>PRI</b> - Indicates that you want to use the parameter for aggregating transactions and defining the price item pricing.</li> </ul>	Yes (Conditional) <b>Note:</b> This data is required when you want to associate a parameter with the price item or price item bundle.
isRequired	Used to indicate whether the parameter is mandatory while defining the price item pricing. The valid values are: <ul style="list-style-type: none"> <li>• Y</li> <li>• N</li> </ul>	No
priorityNum	Used to indicate the priority in which optional parameters should be considered while determining best fit price for the price item or price item bundle.	Yes (Conditional) <b>Note:</b> This data is required when you want to associate an optional parameter with the price item or price item bundle.
priceItemParmVal	Used to specify a list of predefined parameter values which are valid for the price item or price item bundle. <b>Note:</b> The data should be added in this tag only when the value type of the parameter is set to <b>Predefined</b> .	No
priceParmVal	Used to indicate the predefined parameter value which you can use for the price item or price item bundle while defining the pricing.	Yes (Conditional) <b>Note:</b> This data is required when you want to define valid predefined parameter values for the price item or price item bundle.
divPriceitem	Used to specify a list of divisions which you want to associate with the price item or price item bundle.	Yes

Tag Name	Tag Description	Mandatory (Yes or No)
division	Used to indicate the division to which you want to associate the price item or price item bundle.	Yes
priceItemSqi	Used to specify a list of division-specific SQIs for the price item or price item bundle.	No
serviceQuantityIdentifier	Used to indicate the SQI to which you want to associate the price item or price item bundle in the division.	Yes (Conditional) <b>Note:</b> This data is required when you want to define a division-specific SQI for the price item or price item bundle.
sqlFragment	At present, the data from this tag is not stored in the system. If you want to use this tag, you need to implement a custom logic to meet the requirements.	Not applicable
sqiCalcAlgCd	At present, the data from this tag is not stored in the system. If you want to use this tag, you need to implement a custom logic to meet the requirements.	Not applicable
allowIncrUpdateSw	At present, the data from this tag is not stored in the system. If you want to use this tag, you need to implement a custom logic to meet the requirements.	Not applicable
divPriceItemChar	Used to specify a list of division-specific characteristics for the price item or price item bundle.	No

Tag Name	Tag Description	Mandatory (Yes or No)								
characteristicType	<p>You can use this tag within the following tags:</p> <table border="1" data-bbox="570 268 1146 1014"> <thead> <tr> <th data-bbox="570 268 889 352">If this tag is used within...</th> <th data-bbox="889 268 1146 352">Then the purpose of the version tag is...</th> </tr> </thead> <tbody> <tr> <td data-bbox="570 352 889 594">divPriceItemChar</td> <td data-bbox="889 352 1146 594">Used to specify a characteristic type when you are defining a division-specific characteristic for the price item or price item bundle.</td> </tr> <tr> <td data-bbox="570 594 889 741">priceItemChar</td> <td data-bbox="889 594 1146 741">Used to specify a characteristic type for the price item or price item bundle.</td> </tr> <tr> <td data-bbox="570 741 889 1014">priceItemRelCharacteristic</td> <td data-bbox="889 741 1146 1014">Used to specify a characteristic type when you are defining a relationship-specific characteristic for the price item or price item bundle.</td> </tr> </tbody> </table> <p><b>Note:</b> You must specify a characteristic type which is already defined in the system. If you are defining a characteristic for:</p> <ul data-bbox="597 1157 1146 1503" style="list-style-type: none"> <li>• <b>A Price Item</b> - You must specify a characteristic type where the characteristic entity is set to <b>Price Item</b>.</li> <li>• <b>A Price Item in a specific division</b> - You must specify a characteristic type where the characteristic entity is set to <b>Division/Price Item Combination</b>.</li> <li>• <b>A Price Item Relationship</b> - You must specify a characteristic type where the characteristic entity is set to <b>Price Item Relationship</b>.</li> </ul>	If this tag is used within...	Then the purpose of the version tag is...	divPriceItemChar	Used to specify a characteristic type when you are defining a division-specific characteristic for the price item or price item bundle.	priceItemChar	Used to specify a characteristic type for the price item or price item bundle.	priceItemRelCharacteristic	Used to specify a characteristic type when you are defining a relationship-specific characteristic for the price item or price item bundle.	<p>Yes (Conditional)</p> <p><b>Note:</b> This data is required when you want to do the following:</p> <ul data-bbox="1198 380 1466 852" style="list-style-type: none"> <li>• Define a characteristic for the price item or price item bundle</li> <li>• Define a division-specific characteristic for the price item or price item bundle</li> <li>• Define a relationship-specific characteristic for the price item or price item bundle</li> </ul>
If this tag is used within...	Then the purpose of the version tag is...									
divPriceItemChar	Used to specify a characteristic type when you are defining a division-specific characteristic for the price item or price item bundle.									
priceItemChar	Used to specify a characteristic type for the price item or price item bundle.									
priceItemRelCharacteristic	Used to specify a characteristic type when you are defining a relationship-specific characteristic for the price item or price item bundle.									

Tag Name	Tag Description	Mandatory (Yes or No)								
effectiveDate	<p>You can use this tag within the following tags:</p> <table border="1" data-bbox="570 268 1154 1045"> <thead> <tr> <th data-bbox="570 268 889 352">If this tag is used within...</th> <th data-bbox="889 268 1154 352">Then the purpose of the version tag is...</th> </tr> </thead> <tbody> <tr> <td data-bbox="570 352 889 594">divPriceItemChar</td> <td data-bbox="889 352 1154 594">Used to specify the date from when the price item or price item bundle characteristic is effective for the division.</td> </tr> <tr> <td data-bbox="570 594 889 804">priceItemChar</td> <td data-bbox="889 594 1154 804">Used to specify the date from when the characteristic is effective for the price item or price item bundle.</td> </tr> <tr> <td data-bbox="570 804 889 1045">priceItemRelCharacteristic</td> <td data-bbox="889 804 1154 1045">Used to specify the date from when the relationship-specific characteristic is effective for the price item or price item bundle.</td> </tr> </tbody> </table>	If this tag is used within... If this tag is used within...	Then the purpose of the version tag is...									
divPriceItemChar	Used to specify the value for characteristic type when you are defining a division-specific characteristic for the price item or price item bundle.									
priceItemChar	Used to specify the value for the characteristic type when you are defining a characteristic for the price item or price item bundle.									
priceItemRelCharacteristic	Used to specify the value for the characteristic type when you are defining a relationship-specific characteristic for the price item or price item bundle.									
priceItemChar	Used to specify a list of characteristics for the price item or price item bundle.	No								
priceItemRel	Used to specify a list of price items or price item bundles that you want to associate with the parent price item or add to the price item bundle.	No								
priceItemChildCd	Used to indicate the price item or price item bundle that you want to associate with the parent price item or add to the price item bundle.	<p data-bbox="1175 1392 1370 1419">Yes (Conditional)</p> <div data-bbox="1175 1444 1463 1816" style="border: 1px solid black; padding: 5px;"> <p data-bbox="1175 1444 1463 1539"><b>Note:</b> This data is required when you want to do either of the following:</p> <ul data-bbox="1203 1560 1463 1791" style="list-style-type: none"> <li data-bbox="1203 1560 1463 1686">• Associate a price item or price item bundle with the parent price item</li> <li data-bbox="1203 1707 1463 1791">• Add a price item or price item bundle to the price item bundle</li> </ul> </div>								

Tag Name	Tag Description	Mandatory (Yes or No)
startDate	Used to specify the date from when you want to associate the price item or price item bundle with the parent price item or add the price item or price item bundle to the price item bundle.	Yes (Conditional) <div data-bbox="1175 260 1464 642" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This data is required when you want to do either of the following:</p> <ul style="list-style-type: none"> <li>Associate a price item or price item bundle with the parent price item</li> <li>Add a price item or price item bundle to the price item bundle</li> </ul> </div>
endDate	Used to specify the date till when you want to associate the price item or price item bundle with the parent price item or add the price item or price item bundle to the price item bundle.	No
priceItemReTypeFlg	Used to indicate how the price item or price item bundle is related to the parent price item or price item bundle. The valid values are: <ul style="list-style-type: none"> <li><b>BNDL</b> - Enables you to set the relationship type to <b>Bundle</b>.</li> <li><b>CG</b> - Enables you to set the relationship type to <b>Custom</b>.</li> <li><b>DENB</b> - Enables you to set the relationship type to <b>Denominator</b>.</li> <li><b>NUMB</b> - Enables you to set the relationship type to <b>Numerator</b>.</li> <li><b>OTHR</b> - Enables you to set the relationship type to <b>Other</b>.</li> <li><b>PROD</b> - Enables you to set the relationship type to <b>Price Item</b>.</li> <li><b>SVC</b> - Enables you to set the relationship type to <b>Service</b>.</li> <li><b>SVCG</b> - Enables you to set the relationship type to <b>Service Group</b>.</li> </ul> <div data-bbox="570 1566 1156 1864" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> You must use the <b>OTHR, CG, PROD, SVC,</b> or <b>SVCG</b> relationship type while associating a price item or price item bundle to the parent price item. However, you must use the <b>BNDL</b> relationship type while adding a price item or price item bundle in the regular and phantom price item bundles. However, you can use the <b>DENB</b> and <b>NUMB</b> relationship type while adding a price item or price item bundle in the ratio price item bundles.</p> </div>	Yes (Conditional) <div data-bbox="1175 869 1464 1251" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This data is required when you want to do either of the following:</p> <ul style="list-style-type: none"> <li>Associate a price item or price item bundle with the parent price item</li> <li>Add a price item or price item bundle to the price item bundle</li> </ul> </div>

Tag Name	Tag Description	Mandatory (Yes or No)
priceItemParmGroup	Used to specify the parameter and its value based on which you want to determine pricing for the price item or price item bundle.	No
priceParmCode	Used to specify the parameter using which you want to determine the pricing for the price item or price item bundle.  <b>Note:</b> You must specify a parameter which is associated with the price item or price item bundle and whose parameter usage is set to <b>Pricing</b> . You cannot specify any special character except underscore (_) in the parameter name.	Yes (Conditional)  <b>Note:</b> This data is required when you want to determine the pricing for the price item or price item bundle using a parameter.
priceParmVal	Used to specify the parameter value using which you want to determine the pricing for the price item or price item bundle.  <b>Note:</b> You can specify any special characters except ampersand (&), comma (,), underscore (_), equal to (=), tilde (~), and semi-colon(;) in the parameter value.	Yes (Conditional)  <b>Note:</b> This data is required when you want to determine the pricing for the price item or price item bundle using a parameter.
priceItemRelCharacteristic	Used to specify a list of relationship-specific characteristics for the price item or price item bundle.	No

**Note:** When you want to edit the existing price items using the **File Upload Interface** utility, you need to provide all details of the price item and not just the details which you want to update. This is because the system supports replace operation and not the edit operation while editing the price items.

## Sample XML Format for Uploading Price Items

Using the below example, you can create the following price items:

Price Items	Related Price Item	Relationship Type
Overdraft Returned	-	-
Additional Negative Balance Fees	-	-
Overdraft Assistance	Overdraft Returned	Service
	Additional Negative Balance Fees	Service Group

**Note:** The system will create the above price items only when the required contract types, parameters, predefined parameter values, divisions, SQIs, characteristic types, predefined characteristic values are defined in the application.

## CSV File Format for Uploading Price Items

Before uploading a price item file through the **File Upload Interface** utility, you need to ensure that the CSV file contains the following data:

Data	Description	Mandatory (Yes or No)
Price Item	Used to specify the price item or price item bundle.	Yes
Description	Used to specify the description for the price item or price item bundle.	Yes

Data	Description	Mandatory (Yes or No)
Price Item Usage	<p>Used to indicate whether the price item or price item bundle is used for only pricing or pricing and billing. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>PRIC</b> - Enables you to use the price item or price item bundle for only pricing.</li> <li>• <b>PRBL</b> - Enables you to use the price item or price item bundle for pricing and billing.</li> </ul>	Yes
Price Item Type	<p>Used to indicate the type of the price item or price item bundle. If the price item or price item bundle is used for only pricing, the valid values are:</p> <ul style="list-style-type: none"> <li>• FEES</li> <li>• RATE</li> </ul> <p>However, if the price item or price item bundle is used for the pricing and billing, the valid value is:</p> <ul style="list-style-type: none"> <li>• FEES</li> </ul>	Yes
Status	<p>Used to indicate the status of the price item or price item bundle. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>ACTV</b> - Enables you to set the price item or price item bundle to <b>Active</b>.</li> <li>• <b>INAC</b> - Enables you to set the price item or price item bundle to <b>Inactive</b>.</li> </ul>	Yes
Bundle	<p>Used to indicate whether you want to define a price item bundle. The valid values are:</p> <ul style="list-style-type: none"> <li>• Y</li> <li>• N</li> </ul>	Yes

Data	Description	Mandatory (Yes or No)
Bundle Type	<p>Used to indicate the type of the price item bundle. If the price item bundle is available for pricing and billing, the valid values are:</p> <ul style="list-style-type: none"> <li>• <b>PHAN</b> - Enables you to create a phantom price item bundle.</li> <li>• <b>REGU</b> - Enables you to create a regular price item bundle.</li> <li>• <b>RTIO</b> - Enables you to create a ratio price item bundle.</li> </ul> <p>However, if the price item bundle is available for only pricing and the price item type is set to <b>FEES</b>, the valid value is:</p> <ul style="list-style-type: none"> <li>• <b>REGU</b> - Enables you to create a regular price item bundle.</li> </ul> <p><b>Note:</b> You cannot define a price item bundle when it is available for only pricing and when the price item type is set to <b>RATE</b>.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This data is required when you are creating a price item bundle.</p>
Global Price List	<p>Used to indicate whether the price item or price item bundle can be assigned to a global price list. The valid values are:</p> <ul style="list-style-type: none"> <li>• Y</li> <li>• N</li> </ul>	Yes
Contract Type	<p>Used to indicate the contract type that you want to associate with the price item or price item bundle.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This data is required when the price item or price item bundle is used for pricing and billing.</p>
<b>Price Item Parameter Information</b>		
Effective Start Date	<p>Used to specify the date from when the parameter is effective for the price item or price item bundle.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This data is required when you want to associate a parameter with the price item or price item bundle.</p>
Effective End Date	<p>Used to specify the date till when the parameter is effective for the price item or price item bundle.</p>	No

Data	Description	Mandatory (Yes or No)
Parameter	<p>Used to indicate the parameter that you want to associate with the price item or price item bundle.</p> <div data-bbox="488 306 1040 562" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> You must specify a parameter which is already defined in the system.  The system allows you to specify only those parameters where the parameter usage is set to <b>Price Item</b>.</p> </div>	<p>Yes (Conditional)</p> <div data-bbox="1097 275 1430 422" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This data is required when you want to associate a parameter with the price item or price item bundle.</p> </div>
Business Label	<p>Used to specify a business label for the parameter. If the business label is defined for a parameter, the business label appears instead of the parameter name.</p>	No
Display Order	<p>Used to indicate the order in which the parameter and its value should be displayed in the price item parameter information string across the application.</p>	<p>Yes (Conditional)</p> <div data-bbox="1097 800 1430 947" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This data is required when you want to associate a parameter with the price item or price item bundle.</p> </div>
Parameter Usage	<p>Used to indicate whether you want to use the parameter for aggregation and/or for defining the price item pricing. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>AGG</b> - Indicates that you want to use the parameter for aggregating transactions.</li> <li>• <b>PRI</b> - Indicates that you want to use the parameter for aggregating transactions and defining the price item pricing.</li> </ul>	<p>Yes (Conditional)</p> <div data-bbox="1097 1024 1430 1171" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This data is required when you want to associate a parameter with the price item or price item bundle.</p> </div>
Mandatory	<p>Used to indicate whether the parameter is mandatory while defining the price item pricing. The valid values are:</p> <ul style="list-style-type: none"> <li>• Y</li> <li>• N</li> </ul>	No
Priority	<p>Used to indicate the priority in which optional parameters should be considered while determining best fit price for the price item or price item bundle.</p>	<p>Yes (Conditional)</p> <div data-bbox="1097 1654 1430 1801" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This data is required when you want to associate an optional parameter with the price item or price item bundle.</p> </div>
<b>Predefined Parameter Values for Price Item</b>		

Data	Description	Mandatory (Yes or No)
Predefined Parameter Value for Price Item	Used to indicate the predefined parameter value which you can use for the price item or price item bundle while defining the pricing.	Yes (Conditional) <b>Note:</b> This data is required when you want to define valid predefined parameter values for the price item or price item bundle.
<b>Division Information</b>		
Division	Used to indicate the division to which you want to associate the price item or price item bundle.	Yes
<b>Division-Specific SQIs for Price Item</b>		
SQI	Used to indicate the SQI to which you want to associate the price item or price item bundle in the division.	Yes (Conditional) <b>Note:</b> This data is required when you want to define a division-specific SQI for the price item or price item bundle.
<b>Division-Specific Characteristics for Price Item</b>		
Characteristic Type	Used to specify the characteristic type. <b>Note:</b> You must specify a characteristic type which is already defined in the system. You must specify a characteristic type where the characteristic entity is set to <b>Division/Price Item Combination</b> .	Yes (Conditional) <b>Note:</b> This data is required when you are defining a division-specific characteristic for the price item or price item bundle.
Effective Date	Used to specify the date from when the price item or price item bundle characteristic is effective for the division.	Yes (Conditional) <b>Note:</b> This data is required when you are defining a division-specific characteristic for the price item or price item bundle.
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional) <b>Note:</b> This data is required when you are defining a division-specific characteristic for the price item or price item bundle.
<b>Price Item Characteristics</b>		

Data	Description	Mandatory (Yes or No)
Characteristic Type	Used to specify the characteristic type. <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b>                You must specify a characteristic type which is already defined in the system.                You must specify a characteristic type where the characteristic entity is set to <b>Price Item</b>.</p> </div>	Yes (Conditional) <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This data is required when you are defining a characteristic for the price item or price item bundle.</p> </div>
Effective Date	Used to specify the date from when the characteristic is effective for the price item or price item bundle.	Yes (Conditional) <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This data is required when you are defining a characteristic for the price item or price item bundle.</p> </div>
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional) <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This data is required when you are defining a characteristic for the price item or price item bundle.</p> </div>
<b>Price Item Relationship</b>		
Price Item	Used to indicate the price item or price item bundle that you want to associate with the parent price item or add to the price item bundle.	Yes (Conditional) <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This data is required when you want to do either of the following:</p> <ul style="list-style-type: none"> <li>• Associate a price item or price item bundle with the parent price item</li> <li>• Add a price item or price item bundle to the price item bundle</li> </ul> </div>
Effective Start Date	Used to specify the date from when you want to associate the price item or price item bundle with the parent price item or add the price item or price item bundle to the price item bundle.	Yes (Conditional) <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This data is required when you want to do either of the following:</p> <ul style="list-style-type: none"> <li>• Associate a price item or price item bundle with the parent price item</li> <li>• Add a price item or price item bundle to the price item bundle</li> </ul> </div>

Data	Description	Mandatory (Yes or No)
Effective End Date	Used to specify the date till when you want to associate the price item or price item bundle with the parent price item or add the price item or price item bundle to the price item bundle.	No
Relationship Type	<p>Used to indicate how the price item or price item bundle is related to the parent price item or price item bundle. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>BNDL</b> - Enables you to set the relationship type to <b>Bundle</b>.</li> <li>• <b>CG</b> - Enables you to set the relationship type to <b>Custom</b>.</li> <li>• <b>DENB</b> - Enables you to set the relationship type to <b>Denominator</b>.</li> <li>• <b>NUMB</b> - Enables you to set the relationship type to <b>Numerator</b>.</li> <li>• <b>OTHR</b> - Enables you to set the relationship type to <b>Other</b>.</li> <li>• <b>PROD</b> - Enables you to set the relationship type to <b>Price Item</b>.</li> <li>• <b>SVC</b> - Enables you to set the relationship type to <b>Service</b>.</li> <li>• <b>SVCG</b> - Enables you to set the relationship type to <b>Service Group</b>.</li> </ul> <p><b>Note:</b> You must use the <b>OTHR, CG, PROD, SVC,</b> or <b>SVCG</b> relationship type while associating a price item or price item bundle to the parent price item. However, you must use the <b>BNDL</b> relationship type while adding a price item or price item bundle in the regular and phantom price item bundles. However, you can use the <b>DENB</b> and <b>NUMB</b> relationship type while adding a price item or price item bundle in the ratio price item bundles.</p>	<p>Yes (Conditional)</p> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> This data is required when you want to do either of the following:</p> <ul style="list-style-type: none"> <li>• Associate a price item or price item bundle with the parent price item</li> <li>• Add a price item or price item bundle to the price item bundle</li> </ul> </div>

Data	Description	Mandatory (Yes or No)
Price Item Parameter=Parameter Value	<p>Used to specify the parameter and its value using which you want to determine the pricing for the child price item or price item bundle.</p> <p><b>Note:</b> You must specify a parameter which is associated with the price item or price item bundle and whose parameter usage is set to <b>Pricing</b>. You cannot specify any special character except underscore ( _ ) in the parameter name. You can specify any special characters except ampersand (&amp;), comma (,), underscore ( _ ), equal to (=), tilde (~), and semi-colon(;) in the parameter value. You cannot specify more than 50 parameter and parameter value combinations while uploading the price item file in the CSV format.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This data is required when you want to determine the pricing for the child price item or price item bundle using a parameter.</p>
<b>Relationship-Specific Characteristics for Price Item</b>		
Characteristic Type	<p>Used to specify the characteristic type.</p> <p><b>Note:</b> You must specify a characteristic type which is already defined in the system. You must specify a characteristic type where the characteristic entity is set to <b>Price Item Relationship</b>.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This data is required when you are defining a relationship-specific characteristic for the price item or price item bundle.</p>
Effective Date	<p>Used to specify the date from when the relationship-specific characteristic is effective for the price item or price item bundle.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This data is required when you are defining a relationship-specific characteristic for the price item or price item bundle.</p>
Characteristic Value	<p>Used to specify the value for the characteristic type.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This data is required when you are defining a relationship-specific characteristic for the price item or price item bundle.</p>

## Sample CSV Format for Uploading Price Items

Using the below example, you can create the following price items:

Price Item	Related Price Item	Relationship Type
Overdraft Returned	-	-
Additional Negative Balance Fees	-	-
Overdraft Assistance	Overdraft Returned	Service
	Additional Negative Balance Fees	Service Group

**Note:** The system will create the above price items only when the required contract types, parameters, predefined parameter values, divisions, SQIs, characteristic types, predefined characteristic values are defined in the application.

In addition, the file request type which is used for uploading the price item file in the CSV format must contain the following field transformation details:

Sequence	Field Name	Map Field XPath
1	Price Item	C1_PRICEITEM_BO/priceItemCode
2	Description	C1_PRICEITEM_BO/description
3	Price Item Usage	C1_PRICEITEM_BO/priceItemAvailFor
4	Price Item Type	C1_PRICEITEM_BO/priceItemType

Sequence	Field Name	Map Field XPath
5	Status	C1_PRICEITEM_BO/piStatusFlag
6	Bundle	C1_PRICEITEM_BO/bundleSw
7	Bundle Type	C1_PRICEITEM_BO/bundleTypeFlg
8	Global Price List	C1_PRICEITEM_BO/asgnGlobalPISw

**Uploading a Parameter File in the XML Format**

To upload a parameter file in the XML format using the **File Upload Interface** utility, you need to do the following:

1. Define a file request type for uploading parameters in the XML format

2. Upload the parameter file
3. Create the parameters in the system

## **Defining a File Request Type for Uploading Parameters in the XML Format**

### **Procedure**

To define a file request type for uploading parameters in the XML format:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **File Request Type**.  
A sub-menu appears.
3. Click the **Add** option from the **File Request Type** sub-menu.  
The **File Request Type** screen appears.
4. Enter the file request type and description in the respective fields.
5. Ensure that the **Extensible Markup Language** option is selected from the **File Format** list.
6. Attach an algorithm created using the **C1-FRHVA** algorithm type to the **File Validation Algorithm** field.
7. In the **Services** section, enter the required sequence number.
8. Select the **Business Object** option from the **Service Type** list.
9. Enter the **C1\_PRICE\_PARM** business object or custom parameter business object in the **Service Name** field.
10. Attach an algorithm created using the **C1-PRICEUPL** algorithm type to the **Pre-Processing Algorithm** field corresponding to the parameter business object.

**Note:** For more information about the **C1-PRICEUPL** algorithm, refer to [C1-PRICEUPL](#).

11. Select the **Add** option from the **Operation** list.

**Note:** At present, you cannot edit the existing parameters using the **Price Item, Parameter, and SQI Upload** feature. You can only edit the existing parameters from the user interface.

12. Click **Save**.

The file request type is defined for uploading parameters in the XML format.

## **Uploading a Parameter File**

You can upload a parameter file using the **File Transformation and Upload (C1-FTRAN)** batch. While executing this batch, you must specify a file request type which is defined for uploading the parameter files in the XML format. For more information about the batch, refer to *Oracle Revenue Management and Billing Batch Guide*.

## Creating Parameters

You can create the parameters in the system using the **File Request Processing (C1-FREQP)** batch. While executing this batch, you must specify a file request type which is defined for uploading the parameter files in the XML format. For more information about the batch, refer to *Oracle Revenue Management and Billing Batch Guide*.

## Uploading a Parameter File in the CSV Format

---

To upload a parameter file in the CSV format using the **File Upload Interface** utility, you need to do the following:

1. Define a file request type for uploading parameters in the CSV format
2. Upload the parameter file
3. Create the parameters in the system

How to create the parameters in the system	<a href="#">Creating Parameters</a> on page 2303

## Defining a File Request Type for Uploading Parameters in the CSV Format

### Procedure

To define a file request type for uploading parameters in the CSV format:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **File Request Type**.  
A sub-menu appears.
3. Click the **Add** option from the **File Request Type** sub-menu.  
The **File Request Type** screen appears.
4. Enter the file request type and description in the respective fields.
5. Select the **Data Transformation Required** option.  
The **File Format** field is enabled.
6. Select the **Comma Separated Values** option from the **File Format** list.
7. Enter `csv` in the **File Extension** field.
8. Attach an algorithm created using the **C1-FRHVA** algorithm type to the **File Validation Algorithm** field.
9. Attach an algorithm created using the **C1-FRTA** algorithm type to the **Data Transformation Algorithm** field.
10. In the **Services** section, enter the required sequence number.
11. Select the **Business Object** option from the **Service Type** list.
12. Enter the **C1\_PRICE\_PARM** business object or custom parameter business object in the **Service Name** field.
13. Attach an algorithm created using the **C1-PRICEUPL** algorithm type to the **Pre-Processing Algorithm** field corresponding to the parameter business object.

**Note:** For more information about the **C1-PRICEUPL** algorithm, refer to [C1-PRICEUPL](#).

14. Select the **Add** option from the **Operation** list.

**Note:** At present, you cannot edit the existing parameters using the **Price Item, Parameter, and SQI Upload** feature. You can only edit the existing parameters from the user interface.

15. If you have included a header in the CSV file, add the appropriate details in the **Header Transformation** section.
16. Similarly, if you have included a footer in the CSV file, add the appropriate details in the **Footer Transformation** section.
17. In the **Field Transformation** section, specify the following details:

Field Name	Field Description	Mandatory (Yes or No)
Sequence	Used to indicate the data field in the CSV record which you want to upload in the system.	Yes
Field Name	Used to indicate the field for which the data is uploaded in the system.	Yes
Map Field XPath	Used to specify the XPath of the field where you want to store the data field from the CSV record.	Yes

For example,

Sequence	Field Name	Map Field XPath
1	PRICEPARMCODE	C1_PRICE_PARM/priceParmCode
2	DESCRIPTION	C1_PRICE_PARM/description

18. Click **Save**.

The file request type is defined for uploading parameters in the CSV format.

## Uploading a Parameter File

You can upload a parameter file using the **File Transformation and Upload (C1-FTRAN)** batch. While executing this batch, you must specify a file request type which is defined for uploading the parameter files in the CSV format. For more information about the batch, refer to *Oracle Revenue Management and Billing Batch Guide*.

## Creating Parameters

You can create the parameters in the system using the **File Request Processing (C1-FREQP)** batch. While executing this batch, you must specify a file request type which is defined for uploading the parameter files in the CSV format. For more information about the batch, refer to *Oracle Revenue Management and Billing Batch Guide*.

## XML File Format for Uploading Parameters

Before uploading a parameter file through the **File Upload Interface** utility, you need to ensure that the XML file contains the following tags:

Tag Name	Tag Description	Mandatory (Yes or No)														
C1_PRICE_PARM	Used to specify the details of the parameter whose record you want to create or update in the system.	Yes														
pricingEligibilitySw	<p>Used to indicate whether the parameter can be used while defining the pricing eligibility criteria. The valid values are:</p> <ul style="list-style-type: none"> <li>• Y</li> <li>• N</li> </ul> <p><b>Note:</b> You must ensure that this tag contains N when the <b>sourceEntityFlg</b> tag contains <b>TRN</b>.</p>	No														
priceItemSw	<p>Used to indicate whether the parameter can be associated with a price item or price item bundle. The valid values are:</p> <ul style="list-style-type: none"> <li>• Y</li> <li>• N</li> </ul> <p><b>Note:</b> You must ensure that this tag contains N when a parameter is defined using the following source entity and source type combinations:</p> <table border="1"> <thead> <tr> <th>Source Entity</th> <th>Source Type</th> </tr> </thead> <tbody> <tr> <td>ACCT</td> <td>BAL</td> </tr> <tr> <td>ACCT</td> <td>CNT</td> </tr> <tr> <td>PERS</td> <td>BAL</td> </tr> <tr> <td>PERS</td> <td>CNT</td> </tr> <tr> <td>ALGO</td> <td>—</td> </tr> <tr> <td>SQI</td> <td>—</td> </tr> </tbody> </table>	Source Entity	Source Type	ACCT	BAL	ACCT	CNT	PERS	BAL	PERS	CNT	ALGO	—	SQI	—	No
Source Entity	Source Type															
ACCT	BAL															
ACCT	CNT															
PERS	BAL															
PERS	CNT															
ALGO	—															
SQI	—															
priceListEligibilitySw	<p>Used to indicate whether the parameter can be used while defining the price list eligibility criteria. The valid values are:</p> <ul style="list-style-type: none"> <li>• Y</li> <li>• N</li> </ul> <p><b>Note:</b> You must ensure that this tag contains N when the <b>sourceEntityFlg</b> tag contains <b>TRN</b>.</p>	No														

Tag Name	Tag Description	Mandatory (Yes or No)
productEligibilitySw	<p>Used to indicate whether the parameter can be used while defining the product eligibility criteria. The valid values are:</p> <ul style="list-style-type: none"> <li>• Y</li> <li>• N</li> </ul> <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"> <p><b>Note:</b> You must ensure that this tag contains N when the <b>sourceEntityFlg</b> tag contains <b>ALGO</b>, <b>SQI</b>, or <b>TRN</b>.</p> </div>	No
priceParmCode	<p>Used to specify the parameter name.</p> <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"> <p><b>Note:</b> You cannot specify any special character except underscore (_) in the parameter name.</p> </div>	Yes
description	Used to specify the description for the parameter.	Yes
priceParmTypeFlag	<p>Used to indicate the type of value that you want to store in the parameter. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>ADV</b> - Enables you to store an adhoc value in the parameter.</li> <li>• <b>DFV</b> - Enables you to store a predefined value in the parameter.</li> <li>• <b>FKV</b> - Enables you to store a reference value in the parameter.</li> </ul>	Yes
sourceEntityFlg	<p>Used to indicate the entity from where the parameter value should be derived. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>ACCT</b> - Enables you to derive the parameter value from the account.</li> <li>• <b>ALGO</b> - Enables you to derive the parameter value from an algorithm.</li> <li>• <b>PERS</b> - Enables you to derive the parameter value from the person.</li> <li>• <b>PRD</b> - Enables you to derive the parameter value from the product.</li> <li>• <b>SQI</b> - Enables you to derive the parameter value from a service quantity identifier.</li> <li>• <b>TRN</b> - Enables you to derive the parameter value from a transaction.</li> </ul>	Yes

Tag Name	Tag Description	Mandatory (Yes or No)																																				
sourceTypeCode	<p>Used to indicate the source, such as field, characteristic, usage amount, usage counter, SQI, or algorithm, from where the parameter value should be derived.</p> <p><b>Note:</b></p> <p>You must ensure that this tag contains no value when the <b>sourceEntityFlg</b> tag contains <b>TRN</b>.</p> <p>You must ensure that this tag contains the following information depending on the source entity and source type combination:</p> <table border="1" data-bbox="570 575 1154 2003"> <thead> <tr> <th data-bbox="570 575 719 653">Source Entity</th> <th data-bbox="719 575 886 653">Source Type</th> <th data-bbox="886 575 1154 653">Source Type Code</th> </tr> </thead> <tbody> <tr> <td data-bbox="570 653 719 800">ACCT</td> <td data-bbox="719 653 886 800">CHAR</td> <td data-bbox="886 653 1154 800">A characteristic type where the characteristic entity is set to <b>Account</b>.</td> </tr> <tr> <td data-bbox="570 800 719 884">ACCT</td> <td data-bbox="719 800 886 884">FLD</td> <td data-bbox="886 800 1154 884">A field from the <b>CI_ACCT</b> table.</td> </tr> <tr> <td data-bbox="570 884 719 999">ACCT</td> <td data-bbox="719 884 886 999">BAL</td> <td data-bbox="886 884 1154 999">A value from the <b>BAL_FLG</b> lookup field.</td> </tr> <tr> <td data-bbox="570 999 719 1115">ACCT</td> <td data-bbox="719 999 886 1115">CNT</td> <td data-bbox="886 999 1154 1115">A value from the <b>CNT_FLG</b> lookup field.</td> </tr> <tr> <td data-bbox="570 1115 719 1262">PERS</td> <td data-bbox="719 1115 886 1262">CHAR</td> <td data-bbox="886 1115 1154 1262">A characteristic type where the characteristic entity is set to <b>Person</b>.</td> </tr> <tr> <td data-bbox="570 1262 719 1346">PERS</td> <td data-bbox="719 1262 886 1346">FLD</td> <td data-bbox="886 1262 1154 1346">A field from the <b>CI_PER</b> table.</td> </tr> <tr> <td data-bbox="570 1346 719 1461">PERS</td> <td data-bbox="719 1346 886 1461">BAL</td> <td data-bbox="886 1346 1154 1461">A value from the <b>BAL_FLG</b> lookup field.</td> </tr> <tr> <td data-bbox="570 1461 719 1577">PERS</td> <td data-bbox="719 1461 886 1577">CNT</td> <td data-bbox="886 1461 1154 1577">A value from the <b>CNT_FLG</b> lookup field.</td> </tr> <tr> <td data-bbox="570 1577 719 1724">PRD</td> <td data-bbox="719 1577 886 1724">CHAR</td> <td data-bbox="886 1577 1154 1724">A characteristic type where the characteristic entity is set to <b>Product</b>.</td> </tr> <tr> <td data-bbox="570 1724 719 1839">PRD</td> <td data-bbox="719 1724 886 1839">FLD</td> <td data-bbox="886 1724 1154 1839">A field from the <b>C1_PRODUCT</b> table.</td> </tr> <tr> <td data-bbox="570 1839 719 2003">SQI</td> <td data-bbox="719 1839 886 2003">—</td> <td data-bbox="886 1839 1154 2003">A service quantity identifier which is already defined in the system.</td> </tr> </tbody> </table>	Source Entity	Source Type	Source Type Code	ACCT	CHAR	A characteristic type where the characteristic entity is set to <b>Account</b> . ## Sample XML Format for Uploading Parameters

Using the below example, you can create the following parameters:

- Country
- Currency

**Note:** The system will create the above parameters only when the required fields, characteristic types, usage amount, usage counter, validation algorithm, referenced tables, and referenced fields are defined in the application.

## CSV File Format for Uploading Parameters

Before uploading a parameter file through the **File Upload Interface** utility, you need to ensure that the CSV file contains the following data:

Data	Description	Mandatory (Yes or No)
Parameter	Used to specify the parameter name. <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <b>Note:</b> You cannot specify any special character except underscore ( _ ) in the parameter name.           </div>	Yes
Description	Used to specify the description for the parameter.	Yes
Value Type	Used to indicate the type of value that you want to store in the parameter. The valid values are: <ul style="list-style-type: none"> <li>• <b>ADV</b> - Enables you to store an adhoc value in the parameter.</li> <li>• <b>DFV</b> - Enables you to store a predefined value in the parameter.</li> <li>• <b>FKV</b> - Enables you to store a reference value in the parameter.</li> </ul>	Yes
Source Entity	Used to indicate the entity from where the parameter value should be derived. The valid values are: <ul style="list-style-type: none"> <li>• <b>ACCT</b> - Enables you to derive the parameter value from the account.</li> <li>• <b>ALGO</b> - Enables you to derive the parameter value from an algorithm.</li> <li>• <b>PERS</b> - Enables you to derive the parameter value from the person.</li> <li>• <b>PRD</b> - Enables you to derive the parameter value from the product.</li> <li>• <b>SQI</b> - Enables you to derive the parameter value from a service quantity identifier.</li> <li>• <b>TRN</b> - Enables you to derive the parameter value from a transaction.</li> </ul>	Yes
Source Type	Used to indicate the type of source from where the parameter value should be derived. The valid values are: <ul style="list-style-type: none"> <li>• <b>CHAR</b> - Enables you to derive the parameter value from a characteristic.</li> <li>• <b>FLD</b> - Enables you to derive the parameter value from a field.</li> <li>• <b>BAL</b> - Enables you to derive the parameter value from a usage amount.</li> <li>• <b>CNT</b> - Enables you to derive the parameter value from a usage counter.</li> </ul> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <b>Note:</b>            You must not specify the source type when the source entity is set to <b>ALGO, SQI, or TRN</b>.             You must not specify the source type as <b>BAL or CNT</b> when the source entity is set to <b>PRD</b>.         </div>	Yes

Data	Description	Mandatory (Yes or No)																																				
Source Type Code	<p>Used to indicate the source, such as field, characteristic, usage amount, usage counter, SQI, or algorithm, from where the parameter value should be derived.</p> <p><b>Note:</b></p> <p>You must not specify the source type code when the source entity is set to <b>TRN</b>.</p> <p>You must specify the source type code depending on the following source entity and source type combination:</p> <table border="1" data-bbox="440 590 1149 1738"> <thead> <tr> <th data-bbox="440 590 618 674">Source Entity</th> <th data-bbox="618 590 821 674">Source Type</th> <th data-bbox="821 590 1149 674">Source Type Code</th> </tr> </thead> <tbody> <tr> <td data-bbox="440 674 618 789">ACCT</td> <td data-bbox="618 674 821 789">CHAR</td> <td data-bbox="821 674 1149 789">A characteristic type where the characteristic entity is set to <b>Account</b>.</td> </tr> <tr> <td data-bbox="440 789 618 873">ACCT</td> <td data-bbox="618 789 821 873">FLD</td> <td data-bbox="821 789 1149 873">A field from the <b>CI_ACCT</b> table.</td> </tr> <tr> <td data-bbox="440 873 618 957">ACCT</td> <td data-bbox="618 873 821 957">BAL</td> <td data-bbox="821 873 1149 957">A value from the <b>BAL_FLG</b> lookup field.</td> </tr> <tr> <td data-bbox="440 957 618 1041">ACCT</td> <td data-bbox="618 957 821 1041">CNT</td> <td data-bbox="821 957 1149 1041">A value from the <b>CNT_FLG</b> lookup field.</td> </tr> <tr> <td data-bbox="440 1041 618 1146">PERS</td> <td data-bbox="618 1041 821 1146">CHAR</td> <td data-bbox="821 1041 1149 1146">A characteristic type where the characteristic entity is set to <b>Person</b>.</td> </tr> <tr> <td data-bbox="440 1146 618 1230">PERS</td> <td data-bbox="618 1146 821 1230">FLD</td> <td data-bbox="821 1146 1149 1230">A field from the <b>CI_PER</b> table.</td> </tr> <tr> <td data-bbox="440 1230 618 1314">PERS</td> <td data-bbox="618 1230 821 1314">BAL</td> <td data-bbox="821 1230 1149 1314">A value from the <b>BAL_FLG</b> lookup field.</td> </tr> <tr> <td data-bbox="440 1314 618 1398">PERS</td> <td data-bbox="618 1314 821 1398">CNT</td> <td data-bbox="821 1314 1149 1398">A value from the <b>CNT_FLG</b> lookup field.</td> </tr> <tr> <td data-bbox="440 1398 618 1503">PRD</td> <td data-bbox="618 1398 821 1503">CHAR</td> <td data-bbox="821 1398 1149 1503">A characteristic type where the characteristic entity is set to <b>Product</b>.</td> </tr> <tr> <td data-bbox="440 1503 618 1587">PRD</td> <td data-bbox="618 1503 821 1587">FLD</td> <td data-bbox="821 1503 1149 1587">A field from the <b>C1_PRODUCT</b> table.</td> </tr> <tr> <td data-bbox="440 1587 618 1738">SQI</td> <td data-bbox="618 1587 821 1738">—</td> <td data-bbox="821 1587 1149 1738">A service quantity identifier which is already defined in the system.</td> </tr> </tbody> </table>	Source Entity	Source Type	Source Type Code	ACCT	CHAR	A characteristic type where the characteristic entity is set to <b>Account</b> . SQI	—	A service quantity identifier which is already defined in the system.																																				

Data	Description	Mandatory (Yes or No)
Validation Algorithm	Used to indicate the algorithm using which you want to validate the adhoc parameter value.  <div style="border: 1px solid black; padding: 2px;"> <b>Note:</b> You must specify a validation algorithm only when the value type is set to <b>Adhoc</b>.           </div>	No
Reference Entity	Used to indicate the table whose primary key (column) you want to set as the reference entity.	Yes (Conditional)  <div style="border: 1px solid black; padding: 2px;"> <b>Note:</b> This data is required only when the value type is set to <b>Reference</b>.           </div>
Field Name	Used to indicate the column which is the primary key of the table. The parameter value is then validated against the primary column of the table.	Yes (Conditional)  <div style="border: 1px solid black; padding: 2px;"> <b>Note:</b> This data is required only when the value type is set to <b>Reference</b>.           </div>
<b>Predefined Parameter Values</b>		
Parameter Value	Used to specify the parameter value.  <div style="border: 1px solid black; padding: 2px;"> <b>Note:</b> You can specify any special characters except ampersand (&amp;), comma (,), underscore (_), equal to (=), tilde (~), and semi-colon(;) in the predefined parameter value.           </div>	Yes (Conditional)  <div style="border: 1px solid black; padding: 2px;"> <b>Note:</b> This data is required only when the value type is set to <b>Predefined</b>.           </div>
Description	Used to specify the description for the parameter value.	Yes (Conditional)  <div style="border: 1px solid black; padding: 2px;"> <b>Note:</b> This data is required only when the value type is set to <b>Predefined</b>.           </div>
<b>Parameter Usage Information</b>		

Data	Description	Mandatory (Yes or No)														
Price Item	<p>Used to indicate whether the parameter can be associated with a price item or price item bundle. The valid values are:</p> <ul style="list-style-type: none"> <li>• Y</li> <li>• N</li> </ul> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b></p> <p>You must specify the value as <b>N</b> when a parameter is defined using the following source entity and source type combinations:</p> <table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="width: 50%;">Source Entity</th> <th style="width: 50%;">Source Type</th> </tr> </thead> <tbody> <tr> <td>ACCT</td> <td>BAL</td> </tr> <tr> <td>ACCT</td> <td>CNT</td> </tr> <tr> <td>PERS</td> <td>BAL</td> </tr> <tr> <td>PERS</td> <td>CNT</td> </tr> <tr> <td>ALGO</td> <td>—</td> </tr> <tr> <td>SQI</td> <td>—</td> </tr> </tbody> </table> </div>	Source Entity	Source Type	ACCT	BAL	ACCT	CNT	PERS	BAL	PERS	CNT	ALGO	—	SQI	—	No
Source Entity	Source Type															
ACCT	BAL															
ACCT	CNT															
PERS	BAL															
PERS	CNT															
ALGO	—															
SQI	—															
Pricing Eligibility Criteria	<p>Used to indicate whether the parameter can be used while defining the pricing eligibility criteria. The valid values are:</p> <ul style="list-style-type: none"> <li>• Y</li> <li>• N</li> </ul>	No														
Price List Eligibility Criteria	<p>Used to indicate whether the parameter can be used while defining the price list eligibility criteria. The valid values are:</p> <ul style="list-style-type: none"> <li>• Y</li> <li>• N</li> </ul> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> You must specify the value as <b>N</b> when the source entity is set to <b>TRN</b>.</p> </div>	No														
Product Eligibility Criteria	<p>Used to indicate whether the parameter can be used while defining the product eligibility criteria. The valid values are:</p> <ul style="list-style-type: none"> <li>• Y</li> <li>• N</li> </ul> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> You must specify the value as <b>N</b> when the source entity is set to <b>ALGO</b>, <b>SQI</b>, or <b>TRN</b>.</p> </div>	No

## Sample CSV Format for Uploading Parameters

Using the below example, you can create the following parameters:

- Country
- Currency

**Note:** The system will create the above parameters only when the required fields, characteristic types, usage amount, usage counter, validation algorithm, referenced tables, and referenced fields are defined in the application.

Sequence	Field Name	Map Field XPath
1	Parameter	C1_PRICE_PARM_BO/priceParmCode
2	Description	C1_PRICE_PARM_BO/description
3	Value Type	C1_PRICE_PARM_BO/priceParmTypeFlag
4	Source Entity	C1_PRICE_PARM_BO/sourceEntityFlg
5	Source Type	C1_PRICE_PARM_BO/sourceTypeFlg
6	Source Type Code	C1_PRICE_PARM_BO/sourceTypeCode
7	Validation Algorithm	C1_PRICE_PARM_BO/validationAlgoCd
8	Reference Entity	C1_PRICE_PARM_BO/referredTable
9	Field Name	C1_PRICE_PARM_BO/referredField
10	Parameter Values	C1_PRICE_PARM_BO/0/priceParmValue/ priceParmVal
11	Description	C1_PRICE_PARM_BO/0/priceParmValue/descr
12	Parameter Values	C1_PRICE_PARM_BO/1/priceParmValue/ priceParmVal
13	Description	C1_PRICE_PARM_BO/1/priceParmValue/descr
14	Parameter Values	C1_PRICE_PARM_BO/2/priceParmValue/ priceParmVal
15	Description	C1_PRICE_PARM_BO/2/priceParmValue/descr
16	Parameter Values	C1_PRICE_PARM_BO/3/priceParmValue/ priceParmVal
17	Description	C1_PRICE_PARM_BO/3/priceParmValue/descr

## Uploading an SQI File in the XML Format

---

To upload an SQI file in the XML format using the **File Upload Interface** utility, you need to do the following:

1. Define a file request type for uploading SQIs in the XML format
2. Upload the SQI file
3. Create the SQIs in the system

**Related Topics**

For more information on...	See...
How to define a file request type for uploading SQIs in the XML format	<a href="#">Defining a File Request Type for Uploading SQIs in the XML Format</a> on page 2321
How to upload an SQI file	<a href="#">Uploading an SQI File</a> on page 2322
How to create the SQIs in the system	<a href="#">Creating SQIs</a> on page 2322

## Defining a File Request Type for Uploading SQIs in the XML Format

**Procedure**

To define a file request type for uploading SQIs in the XML format:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **File Request Type**.  
A sub-menu appears.

3. Click the **Add** option from the **File Request Type** sub-menu.  
The **File Request Type** screen appears.
4. Enter the file request type and description in the respective fields.
5. Ensure that the **Extensible Markup Language** option is selected from the **File Format** list.
6. Attach an algorithm created using the **C1-FRHVA** algorithm type to the **File Validation Algorithm** field.
7. In the **Services** section, enter the required sequence number.
8. Select the **Business Service** option from the **Service Type** list.
9. Enter the **C1-SQIUPLOAD** business service or custom SQI business service in the **Service Name** field.
10. Select the **Add** option from the **Operation** list.

**Note:** At present, you cannot edit the existing SQIs using the **Price Item, Parameter, and SQI Upload** feature. You can only edit the existing SQIs from the user interface.

11. Click **Save**.

The file request type is defined for uploading SQIs in the XML format.

## Uploading an SQI File

You can upload an SQI file using the **File Transformation and Upload (C1-FTRAN)** batch. While executing this batch, you must specify a file request type which is defined for uploading the SQI files in the XML format. For more information about the batch, refer to *Oracle Revenue Management and Billing Batch Guide*.

## Creating SQIs

You can create the SQIs in the system using the **File Request Processing (C1-FREQP)** batch. While executing this batch, you must specify a file request type which is defined for uploading the SQI files in the XML format. For more information about the batch, refer to *Oracle Revenue Management and Billing Batch Guide*.

## Uploading an SQI File in the CSV Format

---

To upload an SQI file in the CSV format using the **File Upload Interface** utility, you need to do the following:

1. Define a file request type for uploading SQIs in the CSV format
2. Upload the SQI file
3. Create the SQIs in the system

### Related Topics

For more information on...	See...
How to define a file request type for uploading SQIs in the CSV format	<a href="#">Defining a File Request Type for Uploading SQIs in the CSV Format</a> on page 2322
How to upload an SQI file	<a href="#">Uploading an SQI File</a> on page 2324
How to create the SQIs in the system	<a href="#">Creating SQIs</a> on page 2324

## Defining a File Request Type for Uploading SQIs in the CSV Format

### Procedure

To define a file request type for uploading SQIs in the CSV format:

1. Click the **Admin** link in the **Application** toolbar.

A list appears.

- From the **Admin** menu, select **F** and then click **File Request Type**.

A sub-menu appears.

- Click the **Add** option from the **File Request Type** sub-menu.

The **File Request Type** screen appears.

- Enter the file request type and description in the respective fields.
- Select the **Data Transformation Required** option.  
The **File Format** field is enabled.
- Select the **Comma Separated Values** option from the **File Format** list.
- Enter `csv` in the **File Extension** field.
- Attach an algorithm created using the **C1-FRHVA** algorithm type to the **File Validation Algorithm** field.
- Attach an algorithm created using the **C1-FRTA** algorithm type to the **Data Transformation Algorithm** field.
- In the **Services** section, enter the required sequence number.
- Select the **Business Service** option from the **Service Type** list.
- Enter the **C1-SQIUPLOAD** business service or custom SQI business service in the **Service Name** field.
- Select the **Add** option from the **Operation** list.

**Note:** At present, you cannot edit the existing SQIs using the **Price Item, Parameter, and SQI Upload** feature. You can only edit the existing SQIs from the user interface.

- If you have included a header in the CSV file, add the appropriate details in the **Header Transformation** section.
- Similarly, if you have included a footer in the CSV file, add the appropriate details in the **Footer Transformation** section.
- In the **Field Transformation** section, specify the following details:

Field Name	Field Description	Mandatory (Yes or No)
Sequence	Used to indicate the data field in the CSV record which you want to upload in the system.	Yes
Field Name	Used to indicate the field for which the data is uploaded in the system.	Yes
Map Field XPath	Used to specify the XPath of the field where you want to store the data field from the CSV record.	Yes

For example,

Sequence	Field Name	Map Field XPath
1	DECIMALPOSITIONS	C1-SQIUPLOAD/decimalPositions
2	DESCRIPTION	C1-SQIUPLOAD/description

- Click **Save**.

The file request type is defined for uploading SQIs in the CSV format.

## Uploading an SQI File

You can upload an SQI file using the **File Transformation and Upload (C1-FTRAN)** batch. While executing this batch, you must specify a file request type which is defined for uploading the SQI files in the CSV format. For more information about the batch, refer to *Oracle Revenue Management and Billing Batch Guide*.

## Creating SQIs

You can create the SQIs in the system using the **File Request Processing (C1-FREQP)** batch. While executing this batch, you must specify a file request type which is defined for uploading the SQI files in the CSV format. For more information about the batch, refer to *Oracle Revenue Management and Billing Batch Guide*.

## XML File Format for Uploading Service Quantity Identifiers (SQIs)

Before uploading an SQI file through the **File Upload Interface** utility, you need to ensure that the XML file contains the following tags:

Tag Name	Tag Description	Mandatory (Yes or No)
C1-SQIUPLOAD	Used to specify the details of the SQI whose record you want to create or update in the system.	Yes
serviceQuantityIdentifier	Used to specify the service quantity identifier (SQI).	Yes (Conditional) <b>Note:</b> This data is required when you want to define an SQI.
description	Used to specify the description for the SQI.	Yes (Conditional) <b>Note:</b> This data is required when you want to define an SQI.
decimalPositions	Used to specify the appropriate number of decimal positions for the SQI. <b>Note:</b> If you do not specify the value in this tag, by default, it is set to zero (0). You can specify maximum precision of 18 decimal positions for an SQI.	No

### Related Topics

Sample XML Format for Uploading Service Quantity Identifiers (SQIs)	<a href="#">Sample XML Format for Uploading Service Quantity Identifiers (SQIs)</a> on page 2325

## Sample XML Format for Uploading Service Quantity Identifiers (SQIs)

Using the below example, you can create the following SQIs:

- ACCTBAL
- AVGDBAL
- OVDLMT

```
<root>
<request>
<payload>
<C1-SQIUPLOAD>
  <serviceQuantityIdentifier>ACCTBAL</serviceQuantityIdentifier>
  <description>Account Balance</description>
  <decimalPositions>18</decimalPositions>
</C1-SQIUPLOAD>
<C1-SQIUPLOAD>
  <serviceQuantityIdentifier>AVGDBAL</serviceQuantityIdentifier>
  <description>Average Daily Balance</description>
  <decimalPositions>18</decimalPositions>
</C1-SQIUPLOAD>
<C1-SQIUPLOAD>
  <serviceQuantityIdentifier>OVDLMT</serviceQuantityIdentifier>
  <description>Overdraft Limit</description>
  <decimalPositions>18</decimalPositions>
</C1-SQIUPLOAD>
</payload>
</request>
</root>
```

## Uploading Price Items, Parameters, and SQIs from the Same File

If the price item, parameter, and SQI information is given in the same file, you need to use a file request type where the following business objects and business service are added in the **Services** section:

- C1\_PRICE\_PARM
- C1-SQIUPLOAD
- C1\_PRICEITEM\_BO

Note that the **C1\_PRICE\_PARM** business object and the **C1-SQIUPLOAD** business service should have higher sequence compared to the **C1\_PRICEITEM\_BO** business object in such file request type. Otherwise, erroneous results might occur.

## Product and Product Version Upload

---

Oracle Revenue Management and Billing enables you to create new products and edit the existing products using the **File Upload Interface** utility. You can upload the product file in the XML or CSV format using the **File Upload Interface** utility. You can specify the following in the XML and CSV files along with the basic details of the product:

- Divisions which you want to associate with the product
- Characteristics for the product
- Details of the product to product relationship

The system also enables you to create new product versions and edit the existing product versions using the **File Upload Interface** utility. You can upload product versions along with the product or separately based on the requirements. You can specify the following in the XML and CSV files along with the basic details of the product version:

- Characteristics for the product version
- Eligibility criteria for the product version
- Services and price list which you want to add in the product version
- Standard products and their services which you want to add in the product version (in case of packaged product)

# Chapter 40

---

## Price List and Price Item Pricing Upload

---

Oracle Revenue Management and Billing enables you to create new price lists and edit the existing price lists using the **File Upload Interface** utility. You can upload the price list file in the XML or CSV format using the **File Upload Interface** utility.

You can specify the following in the XML and CSV files along with the basic details of the price list:

- Divisions which you want to associate with the price list
- Characteristics for the price list
- Eligibility criteria for the price list
- Hierarchy details for the price list

To upload the price list file in the XML format using the **File Upload Interface** utility, you need to do the following:

1. Define a file request type with the following specifications:
  - Set the **File Format** field to **Extensible Markup Language**.
  - Attach an algorithm created using the **C1-FRHVA** algorithm type to the **File Validation Algorithm** field.
  - Add the **C1\_PRICEASSIGN\_SERVICE** business service in the **Services** section.
  - Set the **Operation** field to **Add** or **Replace** depending on whether you want to create new price lists or edit the existing price lists using the file request type.
2. Execute the **File Transformation and Upload Batch (C1-FTRAN)** batch to upload the price list file.
3. Execute the **File Request Processing (C1-FREQP)** batch to create or edit the price lists in the system.

**Note:** For more information about the XML file format, refer to *Oracle Revenue Management and Billing Banking User Guide* or *Oracle Revenue Management and Billing Insurance User Guide*.

To upload the price list file in the CSV format using the **File Upload Interface** utility, you need to do the following:

1. Define a file request type with the following specifications:
  - Set the **File Format** field to **Comma Separated Values**.
  - Select the **Data Transformation Required** option.

- Attach an algorithm created using the **C1-FRHVA** algorithm type to the **File Validation Algorithm** field.
- Attach an algorithm created using the **C1-FRTA** algorithm type to the **Data Transformation Algorithm** field.
- Add the **C1\_PRICEASSIGN\_SERVICE** business service in the **Services** section.
- Set the **Operation** field to **Add** or **Replace** depending on whether you want to create new price lists or edit the existing price lists using the file request type.
- Specify the following details in the Field Transformation section:
  - **Sequence** – Used to specify the data field in the CSV record which should be uploaded in the system.
  - **Field Name** – Used to indicate the field for which the data is uploaded in the system.
  - **Map Field XPath** – Used to specify the XPath of the field where you want to store the data field from the CSV record.

For example,

Sequence	Field Name	Map Field XPath
1	PRICELISTID	C1_PRICEASSIGN_SERVICE/0/pricelist/priceListId
2	DESCRIPTION	C1_PRICEASSIGN_SERVICE/0/pricelist/description

This means that the system should upload the first value (i.e. price list ID) and second value (i.e. price list description) from the CSV record in the **priceListId** and **description** fields using the **C1\_PRICEASSIGN\_SERVICE** business service.

2. Execute the **File Transformation and Upload Batch (C1-FTRAN)** batch to upload the price list file.
3. Execute the **File Request Processing (C1-FREQP)** batch to create or edit the price lists in the system.

**Note:** For more information about the CSV file format, refer to *Oracle Revenue Management and Billing Banking User Guide* or *Oracle Revenue Management and Billing Insurance User Guide*.

The system also enables you to create new price item pricing for an account, customer, or price list and edit the existing price item pricing assigned to an account, customer, or price list using the **File Upload Interface** utility. You can upload price item pricing along with the price list or separately based on the requirements.

You can specify the following in the XML and CSV files along with the basic details of price item pricing:

- Person, account, or price list to which you want to assign the price item pricing
- Characteristics for the price item pricing

- Price item parameters based on which you want to define the price item pricing
- Basic details for the price components
- Tiering criteria for the price component (if the **Tiering Type** of the corresponding rate component is set to **STEP** or **Threshold**)
- Eligibility criteria for the price component (if the **Tiering Type** of the corresponding rate component is set to **STEP** or **Threshold**)

To upload the price assignments file in the XML format using the **File Upload Interface** utility, you need to do the following:

1. Define a file request type with the following specifications:
  - Set the **File Format** field to **Extensible Markup Language**.
  - Attach an algorithm created using the **C1-FRHVA** algorithm type to the **File Validation Algorithm** field.
  - Add the **C1\_PRICEASSIGN\_SERVICE** business service in the **Services** section.
  - Set the **Operation** field to **Add** or **Replace** depending on whether you want to create new price item pricing or edit the existing price item pricing using the file request type.
2. Execute the **File Transformation and Upload Batch (C1-FTRAN)** batch to upload the price assignments file.
3. Execute the **File Request Processing (C1-FREQP)** batch to create or edit the price item pricing in the system.

**Note:** For more information about the XML file format, refer to *Oracle Revenue Management and Billing Banking User Guide* or *Oracle Revenue Management and Billing Insurance User Guide*.

To upload the price assignments file in the CSV format using the **File Upload Interface** utility, you need to do the following:

1. Define a file request type with the following specifications:
  - Set the **File Format** field to **Comma Separated Values**.
  - Select the **Data Transformation Required** option.
  - Attach an algorithm created using the **C1-FRHVA** algorithm type to the **File Validation Algorithm** field.
  - Attach an algorithm created using the **C1-FRTA** algorithm type to the **Data Transformation Algorithm** field.
  - Add the **C1\_PRICEASSIGN\_SERVICE** business service in the **Services** section.
  - Set the **Operation** field to **Add** or **Replace** depending on whether you want to create new price item pricing or edit the existing price item pricing using the file request type.
  - Specify the following details in the Field Transformation section:
    - **Sequence** – Used to specify the data field in the CSV record which should be uploaded in the system.

- **Field Name** – Used to indicate the field for which the data is uploaded in the system.
  - **Map Field XPath** – Used to specify the XPath of the field where you want to store the data field from the CSV record.
2. Execute the **File Transformation and Upload Batch (C1-FTRAN)** batch to upload the price assignments file.
  3. Execute the **File Request Processing (C1-FREQP)** batch to create or edit the price item pricing in the system.

**Note:** For more information about the CSV file format, refer to *Oracle Revenue Management and Billing Banking User Guide* or *Oracle Revenue Management and Billing Insurance User Guide*.

## Most Commonly Used Tasks

---

**Topics:**

- [Changing the Layout](#)

This section lists some of the common tasks that are performed while using various functionality in the application.

## Changing the Layout

---

You can change the layout of the zone by:

- [Removing a Column from the Zone](#) on page 2336
- [Adding a Column to the Zone](#) on page 2336
- [Rearranging Columns in the Zone](#) on page 2336

### Adding a Column to the Zone

Once you have removed the columns from the zone, you can add them back to the zone. To add a column to the zone:

1. Click the **Column Configuration**  icon in the upper right corner of the zone.

A panel appears at the bottom of the zone with a list of column names.

**Note:** The column names with the white background in the panel are currently not displayed in the zone.

2. Drag and drop the column name from the panel to the location where you want to add the column in the zone.  
The white background of the column name in the panel changes to the grey background indicating that the column is currently displayed in the zone.
3. If you want to add another column name from the panel to the zone, repeat the second step. Click the **Refresh** button, data will be displayed to the columns added in the zone.

#### Related Topics

For more information on...	See...
How to change the layout of the zone	<a href="#">Changing the Layout</a> on page 2336

### Rearranging Columns in the Zone

You can change the order in which the columns are displayed in the zone. To change the position of a column in the zone:

1. Click the column name whose position you want to change in the zone.
2. Drag and drop the column name between the columns where you want to place the selected column.

The position of the column changes in the zone.

#### Related Topics

For more information on...	See...
How to change the layout of the zone	<a href="#">Changing the Layout</a> on page 2336

### Removing a Column from the Zone

To remove a column from the zone:

Click the **Delete**  icon corresponding to the column name that you want to remove from the zone.

The column is removed from the zone and is currently displayed with white background in the panel.

**Note:** Alternatively you can remove the column from the zone by clicking the Delete (🗑️) icon corresponding to the column name in the panel.

# Appendix

# B

---

## Administration

---

**Topics:**

- [UI Maps](#)
- [Feature Configurations](#)

This section lists some of the administrative tasks.

## UI Maps

---

This section explains how to create the UI maps for viewing and modifying data of the business objects within the approval workflow group.

### Creating Display UI Map for an Approval Workflow Group

The system provides you with the ability to automatically generate a Display UI map, and associate it with the approval workflow group. Alternatively, you can create a Display UI map manually, and attach it to the approval workflow group.

#### **Procedure**

To create a Display UI map manually:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **U** and then click **UI Map**.  
A sub-menu appears.
3. Click the **Search** option from the **UI Map** sub-menu.  
The **UI Map** screen appears.
4. In the **Main** tab, enter the name and description of the Display UI map.

**Note:** The system uses the CM\_<Approval Workflow Group Code>\_AppTxn\_Display naming convention while automatically generating a Display UI map. Therefore, do not use this naming convention while creating a Display UI map manually.

5. Select **Complete HTML Document** from the **UI Map Type** list.
6. Click the **Schema** tab.  
The **Schema** tab appears.
7. Add the following schema in the **Scheme Editor** zone:

```
<schema>
  <<Business Object Name> type="group">
    <includeBO name="<Business Object Name>" />
  </<Business Object Name>>
</schema>
```

In the above schema, you must replace <Business Object Name> with the name of the business object. For example, if you want to create a Display UI map for account, you must use the following schema:

```
<schema>
  <account type="group">
    <includeBO name="Account" />
  </account>
</schema>
```

8. Click the **Save** link in the **Actions/Navigation** area.  
The **Display Only** and **Input Map** buttons are enabled on the dashboard.
9. Click the **Display Only** button.  
The HTML code is generated in the **HTML Editor** zone.
10. Click the **Save** link in the **Actions/Navigation** area.  
The changes are saved.

**Related Topics**

For more information on...	See...
How to define an approval workflow group	<a href="#">Defining an Approval Workflow Group</a> on page 646
How to edit an approval workflow group	<a href="#">Editing an Approval Workflow Group</a> on page 656

**Creating Input UI Map for an Approval Workflow Group**

The system provides you with the ability to automatically generate an Input UI map, and associate it with the approval workflow group. Alternatively, you can create an Input UI map manually, and attach it to the approval workflow group.

**Procedure**

To create an Input UI map manually:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **U** and then click **UI Map**.  
A sub-menu appears.
3. Click the **Search** option from the **UI Map** sub-menu.  
The **UI Map** screen appears.
4. In the **Main** tab, enter the name and description of the Input UI map.

**Note:** The system uses the CM\_<Approval Workflow Group Code>\_AppTxn\_Input naming convention while automatically generating an Input UI map. Therefore, do not use this naming convention while creating an Input UI map manually.

5. Select **Complete HTML Document** from the **UI Map Type** list.
6. Click the **Schema** tab.  
The **Schema** tab appears.
7. Add the following schema in the **Scheme Editor** zone:

```
<schema>
  <approvalTransactionId/>
  <action/>
  <<Business Object Name> type="group">
    <includeBO name="<Business Object Name>" />
  </<Business Object Name>>
</schema>
```

In the above schema, you must replace <Business Object Name> with the name of the business object. For example, if you want to create an Input UI map for account, you must use the following schema:

```
<schema>
  <approvalTransactionId/>
  <action/>
  <account type="group">
    <includeBO name="Account" />
  </account>
</schema>
```

The `<approvalTransactionId/>` tag is used in the schema to retrieve the approval transaction ID of the respective business object. The `<action/>` tag is used in the schema to retrieve the action performed by the submitter.

- Click the **Save** link in the **Actions/Navigation** area.

The **Display Only** and **Input Map** buttons are enabled on the dashboard.

- Click the **Input Map** button.

The HTML code is generated in the **HTML Editor** zone.

- Add the following tag in the head tag:

```
<script language="javascript" type="text/javascript" src="code/
approvalWorkflow.js"></script>
```

- Add the text highlighted in bold within the tag as shown below:

```
<td>
<input onClick="performAction('<Approval Workflow Group Code>');"
oraMdLabel="SAVE_BTN_LBL" class="oraButton" type="button">
<input onClick="oraSubmitMap('CANCEL', false);" oraMdLabel="CANCEL_LBL"
class="oraButton" type="button">
</td>
```

In the above HTML code, you must replace `<Approval Workflow Group Code>` with the code of the approval workflow group for which you are creating a UI map.

- Click the **Save** link in the **Actions/Navigation** area.

The changes are saved.

## **Feature Configurations**

This section explains how to set various feature configurations which are required for implementing various features in the Banking module.

### **Setting the C1\_ACCTINFO Feature Configuration**

#### **Prerequisites**

To set the **C1\_ACCTINFO** feature configuration, you should have:

- Account Type characteristic type defined in the application (where the characteristic entity is set to Account)
- Invoice Group Account characteristic type defined in the application (where the characteristic entity is set to Account)

#### **Procedure**

To set the **C1\_ACCTINFO** feature configuration:

- Click the **Admin** link in the **Application** toolbar.

A list appears.

- From the **Admin** menu, select **F** and then click **Feature Configuration**.

A sub-menu appears.

- Click the **Search** option from the **Feature Configuration** sub-menu.

The **Feature Configuration Search** window appears.

- Enter **C1\_ACCTINFO** in the **Feature Name** field.

- Click the **Search** button corresponding to the **Feature Name** field.

The **Feature Configuration** screen appears. It contains the following option types:

Option Type	Description	Mandatory (Yes or No)
Account Type	Used to specify the characteristic type. This characteristic type is used to define the type of account in the <b>Account</b> screen.  <b>Note:</b> By default, the <b>C1_F_ATY</b> characteristic type is specified. If you want to use account types other than the ones defined in the <b>C1_F_ATY</b> characteristic type, you need to create a new predefined characteristic type and add the required account types as its characteristic values. Then, specify the newly created characteristic type as the value for this option type.	Yes
Invoice Group Account	Used to specify the characteristic type. This characteristic type is used to indicate whether the account is a master or member account in the <b>Account</b> screen.  <b>Note:</b> By default, the <b>C1_F_IGA</b> characteristic type is specified. If you want to use any other characteristic type other than <b>C1_F_IGA</b> , you need to create a new predefined characteristic type and add two characteristic values — Y and N. Then, specify the newly created characteristic type as the value for this option type.	Yes

- Enter the values for the required option types in the **Feature Configuration** screen.

- Click the **Save** button in the **Page Title** area.

The changes made to the feature configuration are saved.

### **Related Topics**

For more information on...	See...
Invoicing Group	<a href="#">Invoicing Group</a> on page 191

## **Setting the C1\_AXENTITY Feature Configuration**

### **Procedure**

To set the **C1\_AXENTITY** feature configuration:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **Feature Configuration**.  
A sub-menu appears.
3. Click the **Search** option from the **Feature Configuration** sub-menu.  
The **Feature Configuration Search** window appears.
4. Enter **C1\_AXENTITY** in the **Feature Name** field.
5. Click the **Search** button corresponding to the **Feature Name** field.

The **Feature Configuration** screen appears. It contains the following option types:

Option Type	Description	Mandatory (Yes or No)
Approval Transaction Compare New or Missing Entry Color	Used to indicate the color in which the new additions must be highlighted. This helps in comparing the existing and new data while approving, rejecting, or cancelling approval workflow requests. You must specify hexadecimal value in this option type.	Yes
Approval Transaction Compare Value Changed Color	Used to indicate the color in which the existing data modifications must be highlighted. This helps in comparing the existing and new data while approving, rejecting, or cancelling approval workflow requests. You must specify hexadecimal value in this option type.	Yes
Approval Transaction Entity Access Algorithms	Used to specify the algorithm which controls access to the existing and new maintenance objects based on the access group and division. By default, the C1-APPTXN algorithm is specified. If you create new maintenance objects and want the access control for these new maintenance objects to be based on the access group and division, you have to create a custom algorithm and then attach it to this option type. In such case, you would define this option type twice — one with the default algorithm (that is, C1-APPTXN) and another with the custom algorithm.	Yes
Approval Transaction Fields to be Disabled in Input UI Maps	Used to indicate the fields that you want to disable whenever the input UI maps are regenerated.	Yes
Approval Transaction Resolve To Do Type	Used to indicate the type of To Do that must be created when an approver at any level in the hierarchy rejects a request.	Yes
Display UI XSL	Used to indicate the XSL file that you want to use while regenerating the Display UI maps.	Yes
Input UI XSL	Used to indicate the XSL file that you want to use while regenerating the Input UI maps.	Yes

6. Enter the values for the required option types in the **Feature Configuration** screen.

- Click the **Save** button in the **Page Title** area.

The changes made to the feature configuration are saved.

## Setting the C1\_DIVFUNCT Feature Configuration

### Procedure

To set the **C1\_DIVFUNCT** feature configuration:

- Click the **Admin** link in the **Application** toolbar.  
A list appears.
- From the **Admin** menu, select **F** and then click **Feature Configuration**.  
A sub-menu appears.
- Click the **Search** option from the **Feature Configuration** sub-menu.  
The **Feature Configuration Search** window appears.
- Enter **C1\_DIVFUNCT** in the **Feature Name** field.
- Click the **Search** button corresponding to the **Feature Name** field.

The **Feature Configuration** screen appears. It contains the following option types:

Option Type	Description	Mandatory (Yes or No)
Enforce division-specific validations	Used to indicate whether the division-specific validations must be triggered on the <b>Person</b> , <b>Account</b> and <b>Contract</b> screens. The valid values are: <ul style="list-style-type: none"> <li>• Y</li> <li>• N</li> </ul>	Yes

- Enter the values for the required option types in the **Feature Configuration** screen.

- Click the **Save** button in the **Page Title** area.

The changes made to the feature configuration are saved.

## Setting the C1\_EXCHRATE Feature Configuration

### **Procedure**

To set the **C1\_EXCHRATE** feature configuration:

- Click the **Admin** link in the **Application** toolbar.  
A list appears.
- From the **Admin** menu, select **F** and then click **Feature Configuration**.  
A sub-menu appears.
- Click the **Search** option from the **Feature Configuration** sub-menu.  
The **Feature Configuration Search** window appears.
- Enter **C1\_EXCHRATE** in the **Feature Name** field.
- Click the **Search** button corresponding to the **Feature Name** field.

The **Feature Configuration** screen appears. It contains the following option types:

Option Type	Description	Mandatory (Yes or No)
End Date Required for Division Override	Used to indicate whether the end date is mandatory for a division-specific exchange rate. The valid values are: <ul style="list-style-type: none"> <li>Y</li> <li>N</li> </ul> By default, the value of this option type is set to <b>N</b> .	Yes

- Enter the values for the required option types in the **Feature Configuration** screen.
- Click the **Save** button in the **Page Title** area.

The changes made to the feature configuration are saved.

### **Related Topics**

For more information on...	See...
How to define an exchange rate	<a href="#">Defining an Exchange Rate</a> on page 776

## Setting the C1\_EXP\_OVRD Feature Configuration

### **Procedure**

To set the **C1\_EXP\_OVRD** feature configuration:

- Click the **Admin** link in the **Application** toolbar.

A list appears.

- From the **Admin** menu, select **F** and then click **Feature Configuration**.

A sub-menu appears.

- Click the **Search** option from the **Feature Configuration** sub-menu.

The **Feature Configuration Search** window appears.

- Enter **C1\_EXP\_OVRD** in the **Feature Name** field.

- Click the **Search** button corresponding to the **Feature Name** field.

The **Feature Configuration** screen appears. It contains the following option types:

Option Type	Description	Mandatory (Yes or No)
Expire Override Switch	Used to indicate whether you want to automatically expire an agreed pricing when the agreed pricing of a person or an account without end date is overridden. The valid values are: <ul style="list-style-type: none"> <li>• Y</li> <li>• N</li> </ul>	Yes

- Enter the values for the required option types in the **Feature Configuration** screen.
- Click the **Save** button in the **Page Title** area.

The changes made to the feature configuration are saved.

## Setting the C1\_FINTRANOP Feature Configuration

### Procedure

To set the **C1\_FINTRANOP** feature configuration:

- Click the **Admin** link in the **Application** toolbar.
- From the **Admin** menu, select **F** and then click **Feature Configuration**.

A list appears.

A sub-menu appears.

- Click the **Search** option from the **Feature Configuration** sub-menu.

The **Feature Configuration Search** window appears.

- Enter **C1\_FINTRANOP** in the **Feature Name** field.

- Click the **Search** button corresponding to the **Feature Name** field.

The **Feature Configuration** screen appears. It contains the following option types:

Option Type	Description	Mandatory (Yes or No)
Bill Segment Regeneration on Freeze	<p>Used to indicate whether you want to regenerate the bill segments before freezing them. The valid value is:</p> <ul style="list-style-type: none"> <li>• Y</li> </ul> <p>If you do not want to regenerate the bill segments before freezing them, you must leave this option type blank.</p> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> If the <b>Freeze and Complete</b> check box is selected for the bill cycle and the <b>Bill Segment Regeneration on Freeze</b> option type is set to <b>Y</b>, then the bill segments are regenerated and the status of the bill segments is set to <b>Frozen</b>. However, if the <b>Freeze and Complete</b> check box is not selected for the bill cycle, then the bill segments are always regenerated irrespective of whether the <b>Bill Segment Regeneration on Freeze</b> option type is set to <b>Y</b> or not.</p> </div>	No
Billable Charges Date	<p>Used to indicate whether you want to consider the billable charges whose start or end date is earlier than or equal to the cut-off date. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>S</b> — Used when you want to consider the billable charges whose start date is earlier than or equal to the cut-off date.</li> <li>• <b>E</b> — Used when you want to consider the billable charges whose end date is earlier than or equal to the cut-off date.</li> </ul> <p>If you do not set the value of this option type, by default, the system considers the billable charges whose start date is earlier than or equal to the cut-off date.</p>	No

6. Enter the values for the required option types in the **Feature Configuration** screen.

7. Click the **Save** button in the **Page Title** area.

The changes made to the feature configuration are saved.

## Setting the C1\_FM Feature Configuration

### Procedure

To set the **C1\_FM** feature configuration:

1. Click the **Admin** link in the **Application** toolbar.

A list appears.

2. From the **Admin** menu, select **F** and then click **Feature Configuration**.

A sub-menu appears.

- Click the **Search** option from the **Feature Configuration** sub-menu.

The **Feature Configuration Search** window appears.

- Enter **C1\_FM** in the **Feature Name** field.

- Click the **Search** button corresponding to the **Feature Name** field.

The **Feature Configuration** screen appears. It contains the following option types:

Option Type	Description	Mandatory (Yes or No)
First Batch in Transaction Aggregation Cycle	Used to specify the first mandatory batch that you want to be executed in the transaction aggregation cycle.  <b>Note:</b> At present, the system does not support any value other than <b>C1-TXNIP</b> for this option type.	Yes
Last Batch in Transaction Aggregation Cycle	Used to specify the last mandatory batch that you want to be executed in the transaction aggregation cycle.  <b>Note:</b> At present, the system does not support any value other than <b>C1-TXNCU</b> for this option type.	Yes
Disaggregation - Price Assignment	Used to indicate whether the disaggregation request should be automatically created for a person or account when a price item is assigned to the person or account or the existing price item pricing assigned to the person or account is modified. The valid values are:  <ul style="list-style-type: none"> <li>• true</li> <li>• false</li> </ul> <b>Note:</b> You can use this feature only when an algorithm which is created using the <b>TXNDISAGGPRA</b> algorithm type is attached to the <b>Post-Processing</b> system event of the <b>C1_PRASGN_BO</b> business object.	No

Option Type	Description	Mandatory (Yes or No)
Allow Duplicate Summary ID	<p>Used to indicate whether the transaction legs can have duplicate summary ID while creating an aggregated billable charge using the <b>Service Quantity Calculation (C1-TXNSQ)</b> batch. The valid values are:</p> <ul style="list-style-type: none"> <li>• true</li> <li>• false</li> </ul> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b></p> <p>If you set this option type to <b>false</b>, the system does not create the aggregated billable charge when one or more transaction legs have the same summary ID.</p> <p>If you do not specify the value for this option type, by default, the value is set to <b>false</b>.</p> </div>	No

Option Type	Description	Mandatory (Yes or No)
Parallel Query Degree	<p>Used to specify the degree of parallelism that you want to use while creating chunks (i.e. work units) in various Transaction Feed Management (TFM) batches. The valid values are:</p> <ul style="list-style-type: none"> <li>• 1</li> <li>• 2</li> <li>• 3</li> <li>• 4</li> <li>• 5</li> <li>• 6</li> <li>• 7</li> </ul> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b></p> <p>With the parallel query feature, multiple threads on the database can work together simultaneously to process a single SQL statement which is used to create chunks. This helps to improve the batch performance.</p> <p>The system calculates the number of threads on the database that can be used to execute the SQL statement by setting 2 to the power of the specified parallel query degree. For example, if you set the parallel query degree to 4, the system uses 16 (i.e. 2<sup>4</sup>) threads on the database to create work units.</p> <p>You must set the parallel query degree depending on the infrastructure available on the site. If you do not specify the value for this option type, by default, the parallel query degree is set to 2.</p> </div>	No
Price Item Determination Batch Description	<p>Used to specify the description for the batch which is used for validating the transaction and deriving the price item in the transaction aggregation cycle. For example, <b>Validate Transaction and Derive Price Item</b>. This description appears in the error message when the transaction aggregation batches are not executed in the specified sequence.</p>	Yes

Option Type	Description	Mandatory (Yes or No)
Remove Duplicates from Accumulated Rule Output	<p>Used to indicate whether duplicate transaction legs must be created during the transaction aggregation cycle through the rule output accumulation process. The valid values are:</p> <ul style="list-style-type: none"> <li>• true</li> <li>• false</li> </ul> <p><b>Note:</b> If you do not specify the value for this option type, by default, the value is set to <b>false</b>.</p>	No
Rule Output Accumulation	<p>Used to indicate whether the system should accumulate the output parameters of all rules where the criteria returns <b>Rule Is True</b> irrespective of whether the rule true action is set to <b>Next Dependent, Next Rule by Priority, or Success</b> and then create transaction legs using the accumulated output parameters. The valid values are:</p> <ul style="list-style-type: none"> <li>• true</li> <li>• false</li> </ul> <p><b>Note:</b> If you do not specify the value for this option type, by default, the value is set to <b>false</b>.</p>	No
Show Default Values in Price Item Pricing	<p>Used to indicate whether the default values must appear in the <b>Ignore Transaction, Aggregate Transaction, and Aggregation Schedule</b> fields while defining the price item pricing. The valid values are:</p> <ul style="list-style-type: none"> <li>• Y</li> <li>• N</li> </ul>	Yes
Use Materialized Views	<p>Used to indicate whether the price item pricing information must be cached in the <b>CI_PRC_AGRD, CI_PRC_PL, and CI_PRC_INH_PL</b> tables. The valid values are:</p> <ul style="list-style-type: none"> <li>• true</li> <li>• false</li> </ul>	Yes
Maximum Price Item Parameters Cache Size	<p>Used to indicate the maximum number of price items whose parameter information can be cached in the memory.</p>	Yes
Maximum Price Item Parameter Groups Cache Size	<p>Used to indicate the maximum number of price item parameter groups whose information can be cached in the memory.</p>	Yes

Option Type	Description	Mandatory (Yes or No)
SQ Recalculation Required	<p>Used to indicate whether the SQIs in an aggregated billable charge must be recalculated while executing the <b>CI-TXNCU</b> batch. The valid values are:</p> <ul style="list-style-type: none"> <li>• Y</li> <li>• N</li> </ul> <p><b>Note:</b> If you do not specify the value for this option type or if you set the value to <b>N</b>, the system will not recalculate the SQIs in an aggregated billable charge.</p>	No
Transaction Detail Account Validation	<p>Used to indicate whether the account must be validated during the transaction validation process. The valid values are:</p> <ul style="list-style-type: none"> <li>• Y</li> <li>• N</li> </ul> <p><b>Note:</b></p> <p>If you set this option type to <b>N</b>, the system overrides the transaction's account identifier type, account identifier, and division with the first derived account's account identifier type, account identifier, and division, respectively.</p> <p>If you do not specify the value for this option type, the system will validate the account during the transaction validation process.</p>	No
Populate Summary Table Batch Description	<p>Used to specify the description for the batch which is used for adding a summary record in the <b>CI_TXN_DTL_PRITM_SUMMARY</b> table. For example, <b>Populate CI_TXN_DTL_PRITM_SUMMARY Table</b>. This description appears in the error message when the transaction aggregation batches are not executed in the specified sequence.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This data is required when the <b>Use CI-TXNPS During Transaction Aggregation</b> option type is set to <b>true</b>.</p>
Find Price Item Pricing Batch Description	<p>Used to specify the description for the batch which is used for finding the price item pricing for transactions in the transaction aggregation cycle. For example, <b>Price Item Pricing Verification</b>. This description appears in the error message when the transaction aggregation batches are not executed in the specified sequence.</p>	Yes

Option Type	Description	Mandatory (Yes or No)
Update Transaction Status Batch Description	Used to specify the description for the batch which is used for updating the status of the transactions (for which the error has occurred) in the transaction aggregation cycle. For example, <b>Update Status</b> . This description appears in the error message when the transaction aggregation batches are not executed in the specified sequence.	Yes
Service Quantity Calculation Batch Description	Used to specify the description for the batch which is used for creating the billable charges for transactions in the transaction aggregation cycle. For example, <b>Service Quantity Calculation</b> . This description appears in the error message when the transaction aggregation batches are not executed in the specified sequence.	Yes
Transaction Completion Batch Description	Used to specify the description for the batch which is used for updating the status of the transactions in the transaction aggregation cycle. For example, <b>Mark Completion</b> . This description appears in the error message when the transaction aggregation batches are not executed in the specified sequence.	Yes
Cleanup Unwanted Data Batch Description	Used to specify the description for the batch which is used for updating or deleting billable charges created for transactions in the transaction aggregation cycle. For example, <b>Clean Up</b> . This description appears in the error message when the transaction aggregation batches are not executed in the specified sequence.	Yes

Option Type	Description	Mandatory (Yes or No)
Use C1-TXNPS During Transaction Aggregation	<p>Used to indicate whether you want to use an alternative transaction aggregation process when the aggregation ratio is low. The valid values are:</p> <ul style="list-style-type: none"> <li>• true</li> <li>• false</li> </ul> <p><b>Note:</b> If you set this option type to <b>true</b>, you need to execute the following batches in the specified order in the transaction aggregation cycle:</p> <ol style="list-style-type: none"> <li>1. Flush All Caches (F1-FLUSH)</li> <li>2. Refresh Pricing (C1-TXNRP)</li> <li>3. Header Validation (C1-TXNHV)</li> <li>4. Validate Transaction and Derive Price Item (C1-TXNIP)</li> <li>5. Populate CI_TXN_DTL_PRITM_SUMMARY Table (C1-TXNPS)</li> <li>6. Price Item Pricing Verification (C1-TXNVP)</li> <li>7. Update Status (C1-TXNEX)</li> <li>8. Service Quantity Calculation (C1-TXNSQ)</li> <li>9. Mark Completion (C1-TXNCM)</li> <li>10. Clean Up (C1-TXNCU) with the <b>Request Type</b> parameter set to <b>EROR</b></li> </ol>	No

6. Enter the values for the required option types in the **Feature Configuration** screen.

7. Click the **Save** button in the **Page Title** area.

The changes made to the feature configuration are saved.

## Setting the C1\_MASPRI Feature Configuration

### Procedure

To set the **C1\_MASPRI** feature configuration:

1. Click the **Admin** link in the **Application** toolbar.

A list appears.

- From the **Admin** menu, select **F** and then click **Feature Configuration**.

A sub-menu appears.

- Click the **Search** option from the **Feature Configuration** sub-menu.

The **Feature Configuration Search** window appears.

- Enter **C1\_MASPRI** in the **Feature Name** field.

- Click the **Search** button corresponding to the **Feature Name** field.

The **Feature Configuration** screen appears. It contains the following option types:

Option Type	Description	Mandatory (Yes or No)
Thread Count	Used to specify the number of threads you want to spawn in parallel. It is used while creating a batch job for a mass pricing update request using the <b>C1-GENRQ</b> batch control.	Yes
Thread Pool Name	Used to specify the thread pool on which you want to execute the batch. It is used while creating a batch job for a mass pricing update request using the <b>C1-GENRQ</b> batch control.	Yes

- Enter the values for the required option types in the **Feature Configuration** screen.

- Click the **Save** button in the **Page Title** area.

The changes made to the feature configuration are saved.

## **Setting the C1\_MLTCURACC Feature Configuration**

### **Prerequisites**

To set the **C1\_MLTCURACC** feature configuration, you should have:

- Adjustment types defined in the application

### **Procedure**

To set the **C1\_MLTCURACC** feature configuration:

- Click the **Admin** link in the **Application** toolbar.  
A list appears.
- From the **Admin** menu, select **F** and then click **Feature Configuration**.  
A sub-menu appears.

- Click the **Search** option from the **Feature Configuration** sub-menu.

The **Feature Configuration Search** window appears.

- Enter **C1\_MLTCURACC** in the **Feature Name** field.

- Click the **Search** button corresponding to the **Feature Name** field.

The **Feature Configuration** screen appears. It contains the following option types:

Option Type	Description	Mandatory (Yes or No)												
Allow Multi-Currency Accounts	<p>Used to indicate whether you want to enable or disable the Multi-Currency Accounts feature. To enable the feature, set the <b>Allow Multi-Currency Accounts</b> option type to <b>Y</b>. By default, the value is set to <b>N</b>.</p> <p><b>Note:</b></p> <p>If the <b>Allow Multi-Currency Accounts</b> option type is set to <b>N</b>, the <b>Invoice Currency</b> field is disabled in the <b>Account</b> screen. By default, the base currency of the account's division appears in the <b>Invoice Currency</b> field. If the base currency is not defined for the account's division, the currency code specified in the <b>Installation Options - Framework</b> screen appears in the <b>Invoice Currency</b> field.</p> <p>If the <b>Allow Multi-Currency Accounts</b> option type is set to <b>Y</b>, the following fields are enabled in the application:</p> <table border="1"> <thead> <tr> <th>Screen Name</th> <th>Field Name</th> </tr> </thead> <tbody> <tr> <td>Account</td> <td>Invoice Currency</td> </tr> <tr> <td>Billable Charge</td> <td>Currency (for Bill Line)</td> </tr> <tr> <td>Adjustment</td> <td>Currency</td> </tr> <tr> <td>Payment Event Add</td> <td>Payment Currency</td> </tr> <tr> <td>Rate Component</td> <td>Allow Currency Conversion</td> </tr> </tbody> </table>	Screen Name	Field Name	Account	Invoice Currency	Billable Charge	Currency (for Bill Line)	Adjustment	Currency	Payment Event Add	Payment Currency	Rate Component	Allow Currency Conversion	Yes
Screen Name	Field Name													
Account	Invoice Currency													
Billable Charge	Currency (for Bill Line)													
Adjustment	Currency													
Payment Event Add	Payment Currency													
Rate Component	Allow Currency Conversion													
Transfer Adjustment Type	Used to specify the adjustment type using which you want to create the transfer adjustment.	Yes												
Reason Code for Cancelling Original Adjustment	Used to specify the reason code that you want to use while cancelling the original adjustment.	Yes												

6. Enter the values for the required option types in the **Feature Configuration** screen.

7. Click the **Save** button in the **Page Title** area.

The changes made to the feature configuration are saved.

## Setting the C1-ODBFC Feature Configuration

### **Procedure**

To set the **C1-ODBFC** feature configuration:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **Feature Configuration**.  
A sub-menu appears.
3. Click the **Search** option from the **Feature Configuration** sub-menu.  
The **Feature Configuration Search** window appears.
4. Enter **C1-ODBFC** in the **Feature Name** field.
5. Click the **Search** button corresponding to the **Feature Name** field.

The **Feature Configuration** screen appears. It contains the following option types:

Option Type	Description	Mandatory (Yes or No)
Average Record Size	Used to specify the average size of a usage record in bytes. By default, the value is set to 500. You can change the value, if required.	Yes
Billable Charge Chunk Size	Used to specify the number of billable charges you want to create in each work unit. By default, the value is set to 500. You can change the value, if required.	Yes
File Size Limit	Used to specify the size of a usage data file in bytes. By default, the value is set to 100000. You can change the value, if required.	Yes
Online Bill Creation Limit	Used to determine whether adhoc bills must be generated for a usage data file online or through the background process. If the total number of billable charges created for a usage data file exceeds the online bill creation limit, adhoc bills are generated for the usage data file through a batch process. By default, the value is set to 500. You can change the value, if required.	Yes
Staging XML Size	Used to specify the number of usage records you want to parse and map in each XML file. By default, the value is set to 500. You can change the value, if required.	Yes
Thread Count	Used to specify the number of threads you want to spawn in parallel.	No
Thread Pool Name	Used to specify the thread pool on which you want to execute the batch.	No
Transaction Limit	Used to determine whether billable charges for a usage data file must be created online or through the background process. If the total number of valid or approved records in a usage data file exceeds the transaction limit, billable charges are created for the valid or approved records through a batch process.	No

Option Type	Description	Mandatory (Yes or No)
Validation Chunk Size	Used to specify the number of usage records you want to validate or revalidate in each work unit. By default, the value is set to 500. You can change the value, if required.	Yes

- Enter the value for the option types in the **Feature Configuration** screen.
- Click the **Save** button in the **Page Title** area.

The changes made to the feature configuration are saved.

## **Setting the C1-OFFSETREQ Feature Configuration**

The **C1-OFFSETREQ** feature configuration enables the system to determine whether the completed debit or credit bills of the effective child persons of the main customer (whose bill is added as the primary bill in the offset request) should be listed when you search for a bill in the offset request.

### **Procedure**

To set the **C1-OFFSETREQ** feature configuration:

- Click the **Admin** link in the **Application** toolbar.  
A list appears.
- From the **Admin** menu, select **F** and then click **Feature Configuration**.  
A sub-menu appears.
- Click the **Search** option from the **Feature Configuration** sub-menu.  
The **Feature Configuration Search** window appears.
- Enter **C1-OFFSETREQ** in the **Feature Name** field.
- Click the **Search** button corresponding to the **Feature Name** field.

The **Feature Configuration** screen appears. It contains the following option types:

Option Type	Description	Mandatory (Yes or No)
Allow Offsetting Across Persons	Used to indicate whether you want to offset bills across main customer's hierarchy. The valid values are: <ul style="list-style-type: none"> <li>• <b>Y</b> - Used when you want to offset one or more bills of the main customer against one or more bills of the same or other accounts of the main customer or against one or more bills of the accounts of its effective child persons.</li> <li>• <b>N</b> - Used when you want to offset one or more bills of the main customer against one or more bills of the same or other accounts of the main customer.</li> </ul>	Yes

6. Enter the values for the required option types in the **Feature Configuration** screen.
7. Click the **Save** button in the **Page Title** area.

The changes made to the feature configuration are saved.

## Setting the C1-PAYPORTAL Feature Configuration

### Procedure

To set the **C1-PAYPORTAL** feature configuration:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **Feature Configuration**.  
A sub-menu appears.
3. Click the **Search** option from the **Feature Configuration** sub-menu.  
The **Feature Configuration Search** window appears.
4. Enter **C1-PAYPORTAL** in the **Feature Name** field.
5. Click the **Search** button corresponding to the **Feature Name** field.

The **Feature Configuration** screen appears. It contains the following option types:

Option Type	Description	Mandatory (Yes or No)
Allow Overpayment	Used to indicate whether you want to allow overpayment against an entity while editing the payment amount. The valid values are: <ul style="list-style-type: none"> <li>• true</li> <li>• false</li> </ul>	Yes

Option Type	Description	Mandatory (Yes or No)
FK Reference for Bill	Used to indicate the foreign key reference which generates the information string for a bill in the <b>Edit Payment Amount</b> screen.  <b>Note:</b> The C1-BLACT foreign key reference for bill is shipped with the product. You can also create a custom foreign key reference, if required.	Yes
FK Reference for Bill Segment	Used to indicate the foreign key reference which generates the information string for a bill segment in the <b>Edit Payment Amount</b> screen.  <b>Note:</b> The C1-BSEG foreign key reference for bill segment is shipped with the product. You can also create a custom foreign key reference, if required.	Yes
FK Reference for Contract	Used to indicate the foreign key reference which generates the information string for a contract in the <b>Edit Payment Amount</b> screen.  <b>Note:</b> The C1_F_SA foreign key reference for contract is shipped with the product. You can also create a custom foreign key reference, if required.	Yes
FK Reference for Settlement	Used to indicate the foreign key reference which generates the information string for a settlement ID in the <b>Edit Payment Amount</b> screen.  <b>Note:</b> At present, no foreign key reference for settlement ID is shipped with the product. Only the settlement ID appears in the information string. You can create a foreign key reference for settlement ID and specify it in this field.	No

- Enter the values for the required option types in the **Feature Configuration** screen.
- Click the **Save** button in the **Page Title** area.

The changes made to the feature configuration are saved.

## Setting the C1\_PERACCT Feature Configuration

### Procedure

To set the **C1\_PERACCT** feature configuration:

- Click the **Admin** link in the **Application** toolbar.

A list appears.

- From the **Admin** menu, select **F** and then click **Feature Configuration**.

A sub-menu appears.

- Click the **Search** option from the **Feature Configuration** sub-menu.

The **Feature Configuration Search** window appears.

- Enter **C1\_PERACCT** in the **Feature Name** field.

- Click the **Search** button corresponding to the **Feature Name** field.

The **Feature Configuration** screen appears. It contains the following option types:

Option Type	Description	Mandatory (Yes or No)
Create Person Account Together	Used to indicate whether you want to create a person and account for that person simultaneously. The valid values are: <ul style="list-style-type: none"> <li>Y</li> <li>N</li> </ul>	Yes

- Enter the values for the required option types in the **Feature Configuration** screen.

- Click the **Save** button in the **Page Title** area.

The changes made to the feature configuration are saved.

## Setting the C1\_PER\_REL Feature Configuration

You can define person to person relationship type sequence in the **C1\_PER\_REL** feature configuration. This sequence is used while searching for effective price item pricing at the parent customer level.

### Procedure

To set the **C1\_PER\_REL** feature configuration:

- Click the **Admin** link in the **Application** toolbar.

A list appears.

- From the **Admin** menu, select **F** and then click **Feature Configuration**.

A sub-menu appears.

- Click the **Search** option from the **Feature Configuration** sub-menu.

The **Feature Configuration Search** window appears.

- Enter **C1\_PER\_REL** in the **Feature Name** field.

- Click the **Search** button corresponding to the **Feature Name** field.

The **Feature Configuration** screen appears. It contains the following option types:

Option Type	Description	Mandatory (Yes or No)
Person to Person Relationship Type	Used to indicate the person to person relationship type.  <b>Note:</b> If you want to define more than one relationship type in the feature configuration, you need to specify the sequence in which the relationship type should be considered while searching effective price item pricing at the parent customer level.	Yes

6. Enter the values for the required option types in the **Feature Configuration** screen.

7. Click the **Save** button in the **Page Title** area.

The changes made to the feature configuration are saved.

## Setting the C1\_PPARM\_FLG Feature Configuration

### Procedure

To set the **C1\_PPARM\_FLG** feature configuration:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **Feature Configuration**.  
A sub-menu appears.
3. Click the **Search** option from the **Feature Configuration** sub-menu.  
The **Feature Configuration Search** window appears.
4. Enter **C1\_PPARM\_FLG** in the **Feature Name** field.
5. Click the **Search** button corresponding to the **Feature Name** field.

The **Feature Configuration** screen appears. It contains the following option types:

Option Type	Description	Mandatory (Yes or No)
Multi Price Parameter	Used to indicate whether you want to use the multi parameter based pricing feature. The valid values are: <ul style="list-style-type: none"> <li>• <b>True</b> — Indicates that you want to enable the multi parameter based pricing feature.</li> <li>• <b>False</b> — Indicates that you want to disable the multi parameter based pricing feature.</li> </ul>	Yes

6. Enter the values for the required option types in the **Feature Configuration** screen.

- Click the **Save** button in the **Page Title** area.

The changes made to the feature configuration are saved.

## Setting the C1\_PRASNORDR Feature Configuration

### Procedure

To set the **C1\_PRASNORDR** feature configuration:

- Click the **Admin** link in the **Application** toolbar.  
A list appears.
- From the **Admin** menu, select **F** and then click **Feature Configuration**.  
A sub-menu appears.
- Click the **Search** option from the **Feature Configuration** sub-menu.  
The **Feature Configuration Search** window appears.
- Enter **C1\_PRASNORDR** in the **Feature Name** field.
- Click the **Search** button corresponding to the **Feature Name** field.

The **Feature Configuration** screen appears. It contains the following option types:

Option Type	Description	Mandatory (Yes or No)
Price Assignment Algorithm	Used to specify the algorithm which contains the default search order for global customers. The valid search order values are: <ul style="list-style-type: none"> <li>AGREED_PRICELIST</li> <li>AGREED_FIRST</li> </ul> You can change this default search order, whenever required. You can also create a custom search order, if required.	Yes

- Enter the values for the required option types in the **Feature Configuration** screen.
- Click the **Save** button in the **Page Title** area.

The changes made to the feature configuration are saved.

## Setting the C1\_PR\_REC Feature Configuration

**Procedure**

To set the **C1\_PR\_REC** feature configuration:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **Feature Configuration**.  
A sub-menu appears.
3. Click the **Search** option from the **Feature Configuration** sub-menu.  
The **Feature Configuration Search** window appears.
4. Enter **C1\_PR\_REC** in the **Feature Name** field.
5. Click the **Search** button corresponding to the **Feature Name** field.

The **Feature Configuration** screen appears. It contains the following option types:

Option Type	Description	Mandatory (Yes or No)
Effective Pricing RecordSet Limit	Used to specify the number of records that can be displayed in the <b>Search Results</b> section of the <b>Effective Price Assignment</b> zone. The value must be an integer and not in decimals. The maximum number of records that can be displayed are 5000.  <b>Note:</b> If you enter the value as <b>0</b> or if you do not specify the value for the <b>Effective Pricing RecordSet Limit</b> option type, no records will be displayed in the <b>Search Results</b> section.	Yes

6. Enter the values for the required option types in the **Feature Configuration** screen.
7. Click the **Save** button in the **Page Title** area.

The changes made to the feature configuration are saved.

**Setting the C1-PYREQSRT Feature Configuration****Procedure**

To set the **C1-PYREQSRT** feature configuration:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **Feature Configuration**.

A sub-menu appears.

- Click the **Search** option from the **Feature Configuration** sub-menu.

The **Feature Configuration Search** window appears.

- Enter **C1-PYREQSRT** in the **Feature Name** field.
- Click the **Search** button corresponding to the **Feature Name** field.

The **Feature Configuration** screen appears. It contains the following option types:

Option Type	Description	Mandatory (Yes or No)
Bill	Used to sort columns by the selected option type. The table fields in CI_BILL table are used to set the values for the option type <b>Bill</b> . It also enables sorting by order. Its valid values are: <ul style="list-style-type: none"> <li>Ascending</li> <li>Descending</li> </ul>	No
Bill Segment	Used to sort columns by the selected option type. The table fields in CI_BSEG table are used to set the values for the option type <b>Bill Segment</b> . It also enables sorting by order. Its valid values are: <ul style="list-style-type: none"> <li>Ascending</li> <li>Descending</li> </ul>	No
Contract	Used to sort columns by the selected option type. The table fields in CI_SA table are used to set the values for the option type <b>Contract</b> . It also enables sorting by order. Its valid values are: <ul style="list-style-type: none"> <li>Ascending</li> <li>Descending</li> </ul>	No

**Note:** Above options types are configured for the **Sort By** field for sorting columns on the **Edit Payment Amount** screen.

- Enter the values for the required option types in the **Feature Configuration** screen.
- Click the **Save** button in the **Page Title** area.

The changes made to the feature configuration are saved.

## Setting the C1\_RLENG Feature Configuration

### Procedure

To set the **C1\_RLENG** feature configuration:

- Click the **Admin** link in the **Application** toolbar.  
A list appears.
- From the **Admin** menu, select **F** and then click **Feature Configuration**.

A sub-menu appears.

- Click the **Search** option from the **Feature Configuration** sub-menu.

The **Feature Configuration Search** window appears.

- Enter **C1\_RLENG** in the **Feature Name** field.
- Click the **Search** button corresponding to the **Feature Name** field.

The **Feature Configuration** screen appears. It contains the following option types:

Option Type	Description	Mandatory (Yes or No)
Logging Rules for Transaction Feed	Used to indicate whether a log should be generated when you execute the <b>Transaction Validation and Initial Product Determination (C1-TXNIP)</b> batch. The valid values are: <ul style="list-style-type: none"> <li>• True</li> <li>• False</li> </ul> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <b>Note:</b> This log indicates the rules that were executed for each transaction and whether each rule passed or failed during the execution.           </div>	Yes
Maximum Number of Rules in Cache	Used to indicate the maximum number of rules whose entry should be created in the log file.	Yes

- Enter the values for the required option types in the **Feature Configuration** screen.
- Click the **Save** button in the **Page Title** area.

The changes made to the feature configuration are saved.

## **Setting the C1-TXNDMYID Feature Configuration**

For manually added transactions, the system can generate header details including the header ID automatically if you set the option types in the **C1-TXNDMYID** feature configuration.

### **Procedure**

To set the **C1-TXNDMYID** feature configuration:

- Click the **Admin** link in the **Application** toolbar.  
A list appears.
- From the **Admin** menu, select **F** and then click **Feature Configuration**.  
A sub-menu appears.
- Click the **Search** option from the **Feature Configuration** sub-menu.  
The **Feature Configuration Search** window appears.
- Enter **C1-TXNDMYID** in the **Feature Name** field.
- Click the **Search** button corresponding to the **Feature Name** field.

The **Feature Configuration** screen appears. It contains the following option types:

Option Type	Description	Mandatory (Yes or No)
Dummy File Name	Used to specify the dummy file name.	Yes
Dummy Header ID	Used to specify the dummy header ID.	Yes
Dummy Transaction Source	Used to specify the dummy transaction source.	Yes
Dummy Header Date	Used to specify the dummy header date.	Yes

6. Enter the values for the required option types in the **Feature Configuration** screen.
7. Click the **Save** button in the **Page Title** area.

The changes made to the feature configuration are saved.
