1. Click the **Menu** link in the **Application** toolbar.

A list appears.

- From the **Main** menu, select **Transaction Feed Management** and then click **View Billed Transactions**.

The **View Billed Transactions** screen appears.

- Enter the search criteria in the **Search Bill** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

- Click **Search**.

A list of bills that meet the search criteria appears in the **Search Results** section.

## Transaction Details

---

The **Transaction Details** screen allows you to search for transactions using various search criteria. It also allows you to add and copy a transaction. This screen consists of the following zones:

- [Search](#) on page 905

### Search

The **Search** zone allows you to search for transactions using various search criteria. This zone contains the following two sections:

- **Search Criteria** — The fields in the **Search Criteria** section change depending on the query option selected. You can select either of the following query options:
  - **Uploaded** — Used to indicate that you want to search for a transaction which is recently uploaded in the system.
  - **Initial Price Item Determined** — Used to indicate that you want to search for a transaction for which a price item is determined in the system.
  - **Ignored** — Used to indicate that you want to search for a transaction which is ignored in the system.
  - **Error** — Used to indicate that you want to search for a transaction which could not pass through the validation, price item determination, or billable charge creation process.
  - **Cancelled** — Used to indicate that you want to search for a transaction which is cancelled in the system.
  - **Completed** — Used to indicate that you want to search for a transaction for which billable charge is completed in the system.
  - **Invalid** — Used to indicate that you want to search for a transaction which is invalid.
- **Search Results** — The **Search Results** section displays the records based on the specified search criteria. The columns in the search results change depending on the query option selected.

You can also add a transaction manually by clicking the **Add** link in the upper right corner of this zone.

## **Searching for an UPLD Transaction**

### **Procedure**

To search for an uploaded transaction:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Transaction Feed Management** and then click **Transaction Details**.  
The **Transaction Details** screen appears.

3. Select the **Uploaded** option from the **Search By** list to indicate that you want to search for a transaction which is recently uploaded in the system.

The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
External Reference Number	Used to search a transaction with a particular external reference number.	No
Division	Used to search transactions that belong to a particular division.  <b>Note:</b> You can only view those divisions to which you have access in the <b>Division</b> list.	No
Transaction Source	Used to search transactions received from a particular transaction source.	No
Transaction Record Type	Used to search transactions with a particular record type.	No
Account Identifier Type	Used to select the identifier type based on which you want to search transactions of an account.	No
Account Identifier	Used to search transactions which are performed for a particular account.	No
Transaction Date	Used to search transactions which are performed on a particular date.	No
Transaction Upload Date	Used to search transactions which are uploaded in the system on a particular date.	No
Transaction Header ID	Used to search transactions which are uploaded through a particular transaction feed.	No
Disaggregated	Used to indicate whether you want to search transactions which were disaggregated. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	No

4. Enter the search criteria in the **Search** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search**.

A list of transactions that meet the search criteria appears in the **Search Results** section. It contains the following columns:

Column Name	Column Description
Transaction ID	Displays the transaction ID. <b>Note:</b> It has a link. On clicking the link, the <b>Transaction Details</b> screen appears with the details of the respective transaction.
Transaction Source	Displays the transaction source from where the transaction was received.
Transaction Record Type	Displays the record type of the transaction.
Transaction Upload Date	Displays the date when the transaction was uploaded in the system.
Transaction Header ID	Indicates the transaction feed through which the transaction was uploaded in the system.
External Reference Number	Displays the external reference number of the transaction.
Disaggregation Status	Indicates whether the transaction was disaggregated. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>
Manual Entry	Indicates whether the transaction is manually added in the system. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>
Transaction Date	Displays the date when the transaction was performed.
Transaction Amount	Displays the transaction amount.
Transaction Volume	Displays the transaction volume.
Division	Indicates the division to which the transaction belongs.
Account Information	Indicates the account for which the transaction was performed. The string includes the account identifier type and account identifier.
Transaction Information	Displays additional information about the transaction. <b>Note:</b> It has a link. On clicking the link, the <b>Transaction Details</b> screen appears where you can view the details of the transaction.

6. View the legs of the transaction in the **Transaction Legs** zone, if required.

**Note:** You can only view the legs of an uploaded transaction which is partially disaggregated.

## Searching for an INPD Transaction

### Procedure

To search for a transaction for which a price item is determined:

1. Click the **Menu** link in the **Application** toolbar.

A list appears.

2. From the **Main** menu, select **Transaction Feed Management** and then click **Transaction Details**.

The **Transaction Details** screen appears.

3. Select the **Initial Price Item Determined** option from the **Search By** list to indicate that you want to search for a transaction for which a price item is determined in the system.

The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
External Reference Number	Used to search a transaction with a particular external reference number.	No
Division	Used to search transactions that belong to a particular division.  <b>Note:</b> You can only view those divisions to which you have access in the <b>Division</b> list.	No
Transaction Source	Used to search transactions received from a particular transaction source.	No
Transaction Record Type	Used to search transactions with a particular record type.	No
Account Identifier Type	Used to select the identifier type based on which you want to search transactions of an account.	No
Account Identifier	Used to search transactions which are performed for a particular account.	No
Transaction Date	Used to search transactions which are performed on a particular date.	No
Transaction Upload Date	Used to search transactions which are uploaded in the system on a particular date.	No
Price Item	Used to search transactions which are mapped to a particular price item.	No
Disaggregated	Used to indicate whether you want to search transactions which were disaggregated. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	No

4. Enter the search criteria in the **Search** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all the input fields except the date fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

##### 5. Click **Search**.

A list of transactions that meet the search criteria appears in the search results. The **Search Results** section contains the following columns:

Column Name	Column Description
Transaction ID	Displays the transaction ID. <b>Note:</b> It has a link. On clicking the link, the <b>Transaction Details</b> screen appears with the details of the respective transaction.
Transaction Source	Displays the transaction source from where the transaction was received.
Transaction Record Type	Displays the record type of the transaction.
Transaction Upload Date	Displays the date when the transaction was uploaded in the system.
External Reference Number	Displays the external reference number of the transaction.
Transaction Date	Displays the date when the transaction was performed.
Disaggregation Status	Indicates whether the transaction was disaggregated. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>
Transaction Amount	Displays the transaction amount.
Transaction Volume	Displays the transaction volume.
Division	Indicates the division to which the transaction belongs.
Account Information	Indicates the account for which the transaction was performed. The string includes the account identifier type and account identifier.
Rule	Indicates the rule which was met while determining initial price item for the transaction. <b>Note:</b> It has a link. On clicking the link, the <b>Rule</b> screen appears where you can view the details of the rule.
Transaction Information	Displays additional information about the transaction. <b>Note:</b> It has a link. On clicking the link, the <b>Transaction Details</b> screen appears where you can view the details of the transaction.

##### 6. View the legs of the transaction in the **Transaction Legs** zone, if required.

## Searching for an COMP Transaction

### Procedure

To search for a transaction for which billable charge is completed:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Transaction Feed Management** and then click **Transaction Details**.  
The **Transaction Details** screen appears.
3. Select the **Completed** option from the **Search By** list to indicate that you want to search for a transaction for which billable charge is completed in the system.

The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
External Reference Number	Used to search a transaction with a particular external reference number.	No
Division	Used to search transactions that belong to a particular division. <b>Note:</b> You can only view those divisions to which you have access in the <b>Division</b> list.	No
Transaction Source	Used to search transactions received from a particular transaction source.	No
Transaction Record Type	Used to search transactions with a particular record type.	No
Account Identifier Type	Used to select the identifier type based on which you want to search transactions of an account.	No
Account Identifier	Used to search transactions which are performed for a particular account.	No
Transaction Date	Used to search transactions which are performed on a particular date.	No
Transaction Upload Date	Used to search transactions which are uploaded in the system on a particular date.	No
Billable Charge ID	Used to search transactions which are included in a particular billable charge.	No

Field Name	Field Description	Mandatory (Yes or No)
Disaggregated	Used to indicate whether you want to search transactions which were disaggregated. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	No

4. Enter the search criteria in the **Search** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search**.

A list of transactions that meet the search criteria appears in the search results. The **Search Results** section contains the following columns:

Column Name	Column Description
Transaction ID	Displays the transaction ID. <b>Note:</b> It has a link. On clicking the link, the <b>Transaction Details</b> screen appears with the details of the respective transaction.
Transaction Source	Displays the transaction source from where the transaction was received.
Transaction Record Type	Displays the record type of the transaction.
External Reference Number	Displays the external reference number of the transaction.
Disaggregation Status	Indicates whether the transaction was disaggregated. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>
Transaction Date	Displays the date when the transaction was performed.
Transaction Amount	Displays the transaction amount.
Transaction Volume	Displays the transaction volume.
Division	Indicates the division to which the transaction belongs.
Account Information	Indicates the account for which the transaction was performed. The string includes the account identifier type and account identifier.
Rule	Indicates the rule which was met while determining initial price item for the transaction. <b>Note:</b> It has a link. On clicking the link, the <b>Rule</b> screen appears where you can view the details of the rule.

Column Name	Column Description
Transaction Information	Displays additional information about the transaction.  <b>Note:</b> It has a link. On clicking the link, the <b>Transaction Details</b> screen appears where you can view the details of the transaction.

- View the legs of the transaction in the **Transaction Legs** zone, if required.

## Searching for an INVL Transaction

### **Procedure**

To search for an invalid transaction:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Transaction Feed Management** and then click **Transaction Details**.  
The **Transaction Details** screen appears.
3. Select the **Invalid** option from the **Search By** list to indicate that you want to search for a transaction which is invalid.

The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
External Reference Number	Used to search a transaction with a particular external reference number.	No
Division	Used to search transactions that belong to a particular division. <b>Note:</b> You can only view those divisions to which you have access in the <b>Division</b> list.	No
Transaction Source	Used to search transactions received from a particular transaction source.	No
Transaction Record Type	Used to search transactions with a particular record type.	No
Account Identifier Type	Used to select the identifier type based on which you want to search transactions of an account.	No
Account Identifier	Used to search transactions which are performed for a particular account.	No
Transaction Date	Used to search transactions which are performed on a particular date.	No
Transaction Upload Date	Used to search transactions which are uploaded in the system on a particular date.	No
Transaction Header ID	Used to search transactions which are uploaded through a particular transaction feed.	No

Field Name	Field Description	Mandatory (Yes or No)
Disaggregated	Used to indicate whether you want to search transactions which were disaggregated. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	No

4. Enter the search criteria in the **Search** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search**.

A list of transactions that meet the search criteria appears in the search results. The **Search Results** section contains the following columns:

Column Name	Column Description
Transaction ID	Displays the transaction ID. <b>Note:</b> It has a link. On clicking the link, the <b>Transaction Details</b> screen appears with the details of the respective transaction.
Transaction Source	Displays the transaction source from where the transaction was received.
Transaction Record Type	Displays the record type of the transaction.
Transaction Upload Date	Displays the date when the transaction was uploaded in the system.
Transaction Header ID	Indicates the transaction feed through which the transaction was uploaded in the system.
External Reference Number	Displays the external reference number of the transaction.
Disaggregation Status	Indicates whether the transaction was disaggregated. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>
Transaction Date	Displays the date when the transaction was performed.
Transaction Amount	Displays the transaction amount.
Transaction Volume	Displays the transaction volume.
Division	Indicates the division to which the transaction belongs.
Account Information	Indicates the account for which the transaction was performed. The string includes the account identifier type and account identifier.
Transaction Information	Displays additional information about the transaction. <b>Note:</b> It has a link. On clicking the link, the <b>Transaction Details</b> screen appears where you can view the details of the transaction.

Column Name	Column Description
Error Message	Indicates the reason why the transaction is invalid.  <b>Note:</b> A generic message appears indicating that the error occurred due to one or more reasons. You can view all error messages logged for the transaction in the <b>Transaction Error Messages</b> zone.

- View the error messages logged for the transaction in the **Transaction Error Messages** zone, if required.

## Viewing the Transaction Legs

### Procedure

To view the legs of a transaction:

- Search for the transaction in the **Transaction Details** screen.
- In the **Search Results** section, click the **Broadcast**  icon corresponding to the transaction whose legs you want to view.

The **Transaction Legs** zone appears. It contains the following columns:

Column Name	Column Description
Transaction ID	Displays the transaction ID.
Transaction Leg Status	Indicates the status of the transaction leg. The valid values are: <ul style="list-style-type: none"> <li>Uploaded (UPLD)</li> <li>Initial Price Item Derived (INPD)</li> <li>Ignored (IGNR)</li> <li>Error (EROR)</li> <li>Completed (COMP)</li> </ul>
Account Information	Indicates the account which will bear the charges for the transaction. The string includes the account identifier type, account identifier, and division (to which the derived account belongs).
Initial Price Item Code	Indicates the initial price item to which the transaction is mapped.

Column Name	Column Description
Variance Parameter	Indicates the variance parameter which is used along with the final price item for determining price item pricing.  <b>Note:</b> This column appears only when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>False</b> .
Price Item Parameters	Displays a comma-separated list of parameter values. It indicates the price item parameters and their values which are used along with the final price item for determining price item pricing.  <b>Note:</b> This column appears only when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>True</b> .
Final Price Item Code	Indicates the final price item to which the transaction is mapped.
Rule	Indicates the rule which was met while determining initial price item for the transaction.  <b>Note:</b> It has a link. On clicking the link, the <b>Rule</b> screen appears where you can view the details of the rule.
Price Assignment ID	Indicates the effective pricing which is available for the account, price item or regular bundle (to which the price item belongs) or parent (regular) bundle (to which the regular bundle belongs) and/or variance parameter or price item parameters (parameter group) combination on the processing date.
Aggregate Transaction	Indicates whether the transaction leg is aggregated. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>
Billable Charge ID	Indicates the billable charge in which the transaction leg is included for billing.
Division	Indicates the division to which the derived account belongs. The derived account means the account which will bear the charges for the transaction.
Sequence Number	Displays the sequence number of the transaction leg.
Error Message	Indicates the reason why the price item pricing verification or billable charge creation process failed.

**Note:**

The **Broadcast**  icon appears corresponding to an UPLD, INPD, IGNR, EROR and COMP transaction. This is because you can only view legs of an UPLD, INPD, IGNR, EROR and COMP transaction.

You can only view the legs of an uploaded transaction which is partially disaggregated.

3. View the details of the transaction legs in the **Transaction Legs** zone.

## Viewing Error Messages

### Procedure

To view the error messages logged for a transaction:

1. Search for the transaction which is in the **Invalid (INVL)** or **Error (EROR)** status in the **Transaction Details** screen.
2. In the **Search Results** section, click the **Broadcast**  icon corresponding to the transaction whose error messages you want to view.

The **Transaction Error Messages** zone appears. It contains the following columns:

Column Name	Column Description
Error Message	Indicates the reason why the transaction is in the <b>Invalid (INVL)</b> or <b>Error (EROR)</b> status.

**Note:** The **Transaction Error Messages** zone appears when the transactions are in the **Invalid (INVL)** status and when the errors occur while executing the **Validate Transaction and Derive Price Item (C1-TXNIP)** batch. It does not appear when the errors occur while executing the **Price Item Pricing Verification (C1-TXNVP)** or **Service Quantity Calculation (C1-TXNSQ)** batch.

3. View the error messages in the **Transaction Error Messages** zone.

## Viewing the Transaction Details

### Procedure

To view the details of a transaction:

1. Search for the transaction in the **Transaction Details** screen.
2. In the **Search Results** section, click the link in the **Transaction ID** column corresponding to the transaction whose details you want to view.

The **Transaction Details** screen appears. It contains the following fields:

Field Name	Field Description
Transaction ID	Displays the transaction ID. <b>Note:</b> The transaction ID is generated automatically when the transaction is uploaded or manually created in the system.
Transaction Source	Displays the transaction source from where the transaction was received.
Division	Displays the division to which the transaction belongs.
Transaction Record Type	Displays the record type of the transaction.
Transaction Date	Displays the date when the transaction was performed.
Manual Entry	Indicates whether the transaction was manually entered in the system.
Credit/Debit Indicator	Indicates whether the transaction is a debit or credit transaction.
External Reference Number	Displays the external reference number of the transaction.
Customer Reference Number	Indicates the person who performed the transaction.
Account Identifier Type	Displays the type of account identifier.
Account Identifier	Indicates the account for which the transaction was performed.
Transaction Amount	Displays the transaction amount.
Transaction Currency	Indicates the currency in which the transaction was performed.
Transaction Volume	Displays the transaction volume.
Account ID	Indicates the account for which the transaction was performed.
Additional Amount 1, Additional Amount 2, ..., Additional Amount 10 <b>Note:</b> If the business label is defined for any of these user defined fields, the business label appears instead of the field name.	Displays additional information about the transaction.
Amount 1 Currency Code, Amount 2 Currency Code, ..., Amount 10 Currency Code <b>Note:</b> If the business label is defined for any of these user defined fields, the business label appears instead of the field name.	Displays additional information about the transaction.

Field Name	Field Description
Additional Date 1, Additional Date 2, ....., Additional Date 5 <b>Note:</b> If the business label is defined for any of these user defined fields, the business label appears instead of the field name.	Displays additional information about the transaction.
Additional Numeric Data 1, Additional Numeric Data 2, Additional Numeric Data 3, ....., Additional Numeric Data 20 <b>Note:</b> If the business label is defined for any of these user defined fields, the business label appears instead of the field name.	Displays additional information about the transaction.
Additional Data 1, Additional Data 2, Additional Data 3, ....., Additional Data 50 <b>Note:</b> If the business label is defined for any of these user defined fields, the business label appears instead of the field name.	Displays additional information about the transaction.

## Adding a Transaction

### Prerequisites

To add a transaction manually, you should have:

- Divisions, account identifier types, transaction sources, transaction record types, and currencies defined in the application

### Procedure

To add a transaction manually:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Transaction Feed Management** and then click **Transaction Details**.  
The **Transaction Details** screen appears.
3. Click the **Add** link in the upper right corner of the **Search** zone.  
The **Transaction Details** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Transaction Source	Used to specify the transaction source from where the transaction was received.	Yes
Division	Used to specify the division to which the transaction belongs.  <b>Note:</b> You can only view those divisions to which you have access in the <b>Division</b> list.	Yes
Transaction Record Type	Used to specify the record type of the transaction.	Yes
Transaction Date	Used to specify the date when the transaction was performed.	Yes
Manual Entry	Indicates that the transaction is manually entered in the system.	Not applicable
Credit/Debit Indicator	Used to indicate whether the transaction is a debit or credit transaction.	Yes
External Reference Number	Used to specify the external reference number of the transaction.	No
Customer Reference Number	Used to indicate the person who performed the transaction.	No
Account Identifier Type	Used to specify the type of account identifier.	Yes (Conditional)  <b>Note:</b> If you enter the account identifier as a search criteria, you have to select the account identifier type.
Account Identifier	Used to indicate the account for which the transaction was performed.	Yes (Conditional)  <b>Note:</b> If you specify the account identifier type as a search criteria, you have to enter the account identifier.
Transaction Amount	Used to specify the transaction amount.	Yes
Transaction Currency	Used to indicate the currency in which the transaction was performed.	Yes
Transaction Volume	Used to specify the transaction volume.	Yes
Additional Amount 1, Additional Amount 2, ..., Additional Amount 10	Used to specify additional information about the transaction.  <b>Note:</b> These fields appear only when you select the transaction source and record type from the respective list.	Yes (Conditional)  <b>Note:</b> This field is required when you are specifying the currency in the corresponding field.
	<b>Note:</b> If the business label is defined for any of these user defined fields, the business label appears instead of the field name.	

Field Name	Field Description	Mandatory (Yes or No)
Amount 1 Currency Code, Amount 2 Currency Code, ..., Amount 10 Currency Code  <b>Note:</b> If the business label is defined for any of these user defined fields, the business label appears instead of the field name.	Used to specify additional information about the transaction.  <b>Note:</b> These fields appear only when you select the transaction source and record type from the respective list.	Yes (Conditional)  <b>Note:</b> This field is required when you are specifying the amount in the corresponding field.
Additional Date 1, Additional Date 2, ..., Additional Date 5  <b>Note:</b> If the business label is defined for any of these user defined fields, the business label appears instead of the field name.	Used to specify additional information about the transaction.  <b>Note:</b> These fields appear only when you select the transaction source and record type from the respective list.	No
Additional Numeric Data 1, Additional Numeric Data 2, Additional Numeric Data 3, ....., Additional Numeric Data 20  <b>Note:</b> If the business label is defined for any of these user defined fields, the business label appears instead of the field name.	Used to specify additional information about the transaction.  <b>Note:</b> These fields appear only when you select the transaction source and record type from the respective list.	No
Additional Data 1, Additional Data 2, Additional Data 3, ..., Additional Data 50  <b>Note:</b> If the business label is defined for any of these user defined fields, the business label appears instead of the field name.	Used to specify additional information about the transaction.  <b>Note:</b> These fields appear only when you select the transaction source and record type from the respective list.	No

4. Enter the required details.
5. Click **Save**.

The transaction is added in the system. If the following option types are set in the **Dummy Header (C1-TXNDMYID)** feature configuration, the header details including the header ID are generated automatically for the manually added transaction:

- Dummy File Name
- Dummy Header ID
- Dummy Transaction Source
- Dummy Header Date

**Note:** The header ID remains same for all transactions which are manually created on a particular date. You can cancel manually added transactions using the Transaction Header ID.

## Copying a Transaction

Instead of adding a transaction from scratch, you can create a copy of similar transaction and then edit it accordingly.

### Prerequisites

To copy a transaction, you should have:

- Transaction (whose copy you want to create) available in the application
- Divisions, account identifier types, transaction sources, transaction record types, and currencies defined in the application

### Procedure

To copy a transaction:

1. Search for the transaction in the **Transaction Details** screen.
2. In the **Search Results** section, click the link in the **Transaction ID** column corresponding to the transaction whose copy you want to create.

The **Transaction Details** screen appears. Note that the fields are in the read-only mode.

3. Click **Copy**.

The **Transaction Details** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Transaction Source	Used to specify the transaction source from where the transaction was received.	Yes
Division	Used to specify the division to which the transaction belongs.  <b>Note:</b> You can only view those divisions to which you have access in the <b>Division</b> list.	Yes
Transaction Record Type	Used to specify the record type of the transaction.	Yes
Transaction Date	Used to specify the date when the transaction was performed.	Yes
Manual Entry	Indicates that the transaction is manually entered in the system.	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
Credit/Debit Indicator	Used to indicate whether the transaction is a debit or credit transaction.	Yes
External Reference Number	Used to specify the external reference number of the transaction.	No
Price Item Reference Number	Used to indicate the person who performed the transaction.	No
Account Identifier Type	Used to specify the type of account identifier.	Yes (Conditional) <b>Note:</b> If you enter the account identifier as a search criteria, you have to select the account identifier type.
Account Identifier	Used to indicate the account for which the transaction was performed.	Yes (Conditional) <b>Note:</b> If you specify the account identifier type as a search criteria, you have to enter the account identifier.
Transaction Amount	Used to specify the transaction amount.	Yes
Transaction Currency	Used to indicate the currency in which the transaction was performed.	Yes
Transaction Volume	Used to specify the transaction volume.	Yes
Additional Amount 1, Additional Amount 2, ..., Additional Amount 10  <b>Note:</b> If the business label is defined for any of these user defined fields, the business label appears instead of the field name.	Used to specify additional information about the transaction.	Yes (Conditional) <b>Note:</b> This field is required when you are specifying the currency in the corresponding field.
Amount 1 Currency Code, Amount 2 Currency Code, ..., Amount 10 Currency Code  <b>Note:</b> If the business label is defined for any of these user defined fields, the business label appears instead of the field name.	Used to specify additional information about the transaction.	Yes (Conditional) <b>Note:</b> This field is required when you are specifying the amount in the corresponding field.

Field Name	Field Description	Mandatory (Yes or No)
Additional Date 1, Additional Date 2, ..., Additional Date 5  <b>Note:</b> If the business label is defined for any of these user defined fields, the business label appears instead of the field name.	Used to specify additional information about the transaction.	No
Additional Numeric Data 1, Additional Numeric Data 2, Additional Numeric Data 3, ....., Additional Numeric Data 20  <b>Note:</b> If the business label is defined for any of these user defined fields, the business label appears instead of the field name.	Used to specify additional information about the transaction.	No
Additional Data 1, Additional Data 2, Additional Data 3, ..., Additional Data 50  <b>Note:</b> If the business label is defined for any of these user defined fields, the business label appears instead of the field name.	Used to specify additional information about the transaction.	No

4. Enter the required details.
5. Click **Save**.

The new transaction is added in the system.

## **Transaction Source**

The **Transaction Source** screen allows you to define, edit, delete, and copy a transaction source. This screen consists of the following zones:

- [Search Transaction Source](#) on page 932

## Search Transaction Source

The **Search Transaction Source** zone allows you to search for a transaction source. This zone contains the following two sections:

- **Search Criteria** — The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Transaction Source	Used to search a particular transaction source.	No
Description	Used to search transaction sources with a particular description.	No

- **Search Results** — On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Transaction Source	Displays the transaction source.
Description	Displays the description of the transaction source.
Account Identifier Type	Indicates the type of account identifier that will be received from the transaction source.
Edit	On clicking the <b>Edit</b>  icon, the <b>Transaction Source</b> screen appears where you can edit the details of the transaction source.
Delete	On clicking the <b>Delete</b>  icon, you can delete the transaction source. <b>Note:</b> You can only delete a transaction source which is not yet used.
Copy	On clicking the <b>Copy</b>  icon, the <b>Transaction Source</b> screen appears where you can create a transaction source using an existing transaction source.

You can create a new transaction source by clicking the **Add** link in the upper right corner of this zone.

## Searching for a Transaction Source

### Procedure

To search for a transaction source:

1. Click the **Admin** link in the **Application** toolbar.

A list appears.

- From the **Admin** menu, select **T** and then click **Transaction Source**.

The **Transaction Source** screen appears.

- Enter the search criteria in the **Search Transaction Source** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

- Click **Search**.

A list of transaction sources that meet the search criteria appears in the **Search Results** section.

## **Defining a Transaction Source**

### **Prerequisites**

To define a transaction source, you should have:

- Account identifier types defined in the application

### **Procedure**

To define a transaction source:

- Click the **Admin** link in the **Application** toolbar.

A list appears.

- From the **Admin** menu, select **T** and then click **Transaction Source**.

The **Transaction Source** screen appears.

- Click the **Add** link in the upper right corner of the **Search Transaction Source** zone.

The **Transaction Source** screen appears. It contains the following fields:

<b>Field Name</b>	<b>Field Description</b>	<b>Mandatory (Yes or No)</b>
Transaction Source	Used to specify the transaction source. <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"><b>Note:</b> You cannot specify any special character except underscore (_) in the transaction source.</div>	Yes
Description	Used to specify the description for the transaction source.	Yes
Account Identifier Type	Used to indicate the type of account identifier that will be received from the transaction source.	Yes

- Enter the required details.
- Click **Save**.

The transaction source is defined.

## Editing a Transaction Source

### Prerequisites

To edit a transaction source, you should have:

- Account identifier types defined in the application

### Procedure

To edit a transaction source:

1. Search for the transaction source in the **Transaction Source** screen.
2. In the **Search Results** section, click the **Edit** (✎) icon in the **Edit** column corresponding to the transaction source whose details you want to edit.

The **Transaction Source** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Transaction Source	Displays the transaction source.	Not applicable
Description	Used to specify the description for the transaction source.	Yes
Account Identifier Type	Used to indicate the type of account identifier that will be received from the transaction source.	Yes

3. Modify the required details.
4. Click **Save**.

The changes made to the transaction source are saved.

## Deleting a Transaction Source

### Procedure

To delete a transaction source:

1. Search for the transaction source in the **Transaction Source** screen.

- In the **Search Results** section, click the **Delete** () icon in the **Delete** column corresponding to the transaction source that you want to delete.

A message appears confirming whether you want to delete the transaction source.

**Note:** You can only delete a transaction source which is not yet used.

- Click **OK**.

The transaction source is deleted.

### Related Topics

For more information on...	See...
How to search for a transaction source	<a href="#">Searching for a Transaction Source</a> on page 932

## Copying a Transaction Source

Instead of creating a transaction source from scratch, you can create a new transaction source using an existing transaction source. This is possible through copying a transaction source. Once you create a copy of a transaction source, the record types defined for the original transaction source are also copied to the new transaction source.

### Prerequisites

To copy a transaction source, you should have:

- Transaction source (whose copy you want to create) defined in the application
- Account identifier types defined in the application

### Procedure

To copy a transaction source:

- Search for the transaction source in the **Transaction Source** screen.
- In the **Search Results** section, click the **Copy** () icon in the **Copy** column corresponding to the transaction source whose copy you want to create.

The **Transaction Source** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Transaction Source	Used to specify the transaction source. <b>Note:</b> You cannot specify any special character except underscore (_) in the transaction source.	Yes
Description	Used to specify the description for the transaction source.	Yes
Account Identifier Type	Used to indicate the type of account identifier that will be received from the transaction source.	Yes

- Enter the required details.
- Click **Save**.

The new transaction source is defined.

### Related Topics

<b>For more information on...</b>	<b>See...</b>
How to search for a transaction source	<a href="#">Searching for a Transaction Source</a> on page 932

## Transaction Record Type

The **Transaction Record Type** screen allows you to define, edit, delete, and copy a transaction record type. While defining a transaction record type, you need to define a rule type. This rule type is invoked for transactions with the transaction source and record type combination. While defining a rule type, you can select the transaction detail fields that you want to use as input or output parameters in a rule.

Besides using the transaction detail fields, the system allows you to use fields which are not part of the standard transaction details. These fields are referred to as temporary fields and are defined similar to other fields, but are not associated with any ORMB tables. You need to associate temporary fields with the rule type while defining a transaction record type. Once associated, you can use the temporary field as input or output parameter while defining a rule using the rule type.

**Note:** At present, you can only associate a temporary field with a rule type, but cannot use the temporary field in a rule which is created using the rule type. The latter part of the functionality will be available in a future release of Oracle Revenue Management and Billing.

The **Transaction Record Type** screen consists of the following zones:

- [Search Transaction Record Type](#) on page 936

## Search Transaction Record Type

The **Search Transaction Record Type** zone allows you to search for a transaction record type. This zone contains the following two sections:

- **Search Criteria** — The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Transaction Source	Used to search transaction record types defined for a particular transaction source.	No
Transaction Record Type	Used to search a particular transaction record type.	No
Description	Used to search transaction record types with a particular description.	No

- **Search Results** — On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Transaction Record Type	Displays the transaction record type.
Description	Displays the description of the transaction record type.
Transaction Source	Indicates the transaction source for which the transaction record type is defined.

Column Name	Column Description
Rule Type	Indicates the rule type that is invoked for the transaction record type.  <b>Note:</b> It has a link. On clicking the link, the <b>View Rule Type</b> screen appears where you can view the details of the respective rule type.
Edit	On clicking the <b>Edit</b> (  ) icon, the <b>Transaction Record Type</b> screen appears where you can edit the details of the transaction record type.
Delete	On clicking the <b>Delete</b> (  ) icon, you can delete the transaction record type.  <b>Note:</b> You can delete a transaction record type when: <ul style="list-style-type: none"> <li>• It is not yet used.</li> <li>• Rules are not yet defined using the rule type which is invoked by the transaction source and record type combination.</li> </ul>
Copy	On clicking the <b>Copy</b> (  ) icon, the <b>Transaction Record Type</b> screen appears where you can create a new transaction record type using an existing transaction record type.

You can create a new transaction record type by clicking the **Add** link in the upper right corner of this zone.

## Searching for a Transaction Record Type

### Procedure

To search for a transaction record type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **T** and then click **Transaction Record Type**.  
The **Transaction Record Type** screen appears.
3. Enter the search criteria in the **Search Transaction Record Type** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

4. Click **Search**.

The search results appear.

## Defining a Transaction Record Type

### Prerequisites

To define a transaction record type, you should have:

- Transaction sources defined in the application
- Validation algorithm defined using the C1-RULE-VAL algorithm type
- Transaction Information String algorithm defined using the C1-TXDETINFO algorithm type
- Fields (that you want to use as input or output parameter) defined in the application

### Procedure

To define a transaction record type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **T** and then click **Transaction Record Type**.  
The **Transaction Record Type** screen appears.
3. Click the **Add** link in the upper right corner of the **Search Transaction Record Type** zone.  
The **Transaction Record Type** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Transaction Source	Used to indicate the transaction source for which you want to define the transaction record type.  <b>Note:</b> The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Search Transaction Source</b> window appears.	Yes
Transaction Record Type	Used to specify the transaction record type.  <b>Note:</b> You cannot specify any special character except underscore (_) in the transaction record type.	Yes
Description	Used to specify the description for the transaction record type.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Rule Type	<p>Used to specify the rule type.</p> <p><b>Note:</b> You cannot specify any special character except underscore (_) in the rule type.</p>	Yes
Rule Type Description	Used to specify the description for the rule type.	Yes
Rule Validation Algorithm	<p>Used to specify the validation algorithm that will be triggered when a rule is defined using the rule type.</p> <p><b>Note:</b> This algorithm checks whether:</p> <ul style="list-style-type: none"> <li>• The values specified against the output parameters exist in the system</li> <li>• The same price item parameter (for example, PCD1_1_1_VAL) is not used multiple times for a division, account, and price item combination</li> </ul> <p>The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Algorithm Search</b> window appears.</p>	No
Info String Algorithm	<p>Used to specify the algorithm that will generate the information string which appears in the <b>Transaction Information</b> column throughout the application.</p> <p><b>Note:</b> This algorithm concatenates the fields (related to the transaction) and delimiters specified as parameters in the algorithm.</p> <p>The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Algorithm Search</b> window appears.</p>	No

Field Name	Field Description	Mandatory (Yes or No)
Maximum Accounts to be charged	<p>Used to indicate the maximum number of accounts which can bear the charges for a transaction. The valid values are:</p> <ul style="list-style-type: none"> <li>• 01</li> <li>• 02</li> <li>• 03</li> <li>• 04</li> <li>• 05</li> <li>• 06</li> <li>• 07</li> <li>• 08</li> <li>• 09</li> <li>• 10</li> </ul> <p><b>Note:</b> At present, the system supports maximum 10 accounts which can bear the charges for a transaction.</p>	Yes
Maximum Price Items to be mapped	<p>Used to indicate the maximum number of price items to which a transaction can be mapped for each account. The valid values are:</p> <ul style="list-style-type: none"> <li>• 01</li> <li>• 02</li> <li>• 03</li> <li>• 04</li> <li>• 05</li> <li>• 06</li> <li>• 07</li> <li>• 08</li> <li>• 09</li> <li>• 10</li> </ul> <p><b>Note:</b> At present, the system supports maximum 10 price items to which a transaction can be mapped for each account.</p>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Maximum Price Item Parameters	<p>Used to indicate the maximum number of parameters that can be used with each price item to determine the price item pricing. The valid values are:</p> <ul style="list-style-type: none"> <li>• 00</li> <li>• 01</li> <li>• 02</li> <li>• 03</li> <li>• 04</li> <li>• 05</li> <li>• 06</li> <li>• 07</li> <li>• 08</li> <li>• 09</li> <li>• 10</li> <li>• 11</li> <li>• 12</li> <li>• 13</li> <li>• 14</li> <li>• 15</li> </ul> <p><b>Note:</b> At present, the system supports maximum 15 parameters that can be used with each price item to determine the price item pricing.</p>	Yes

In addition, this screen contains the following two sections:

- **Input/Output Parameters** — Enables you to select the transaction detail fields that you can use as input or output parameter while defining a rule. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Rule Input/Output	Used to indicate whether you want to use the transaction detail field as input or output parameter.	No
Transaction Field	Displays the transaction field name.	Not applicable
Business Label	<p>Used to specify a business label for the user defined fields.</p> <p><b>Note:</b> The business label appears when you add, copy, or view a transaction in the <b>Transaction Details</b> screen. The label changes depending on the transaction source and record type combination that you have selected.</p>	No

**Note:** At present, you can use the following transaction fields as input or output parameter while defining a rule — Account Identifier (ACCT\_NBR), Account Identifier Type (ACCT\_NBR\_TYPE\_CD), Division (CIS\_DIVISION), Currency Code (CURRENCY\_CD), Customer Reference Number (CUST\_REF\_NBR), Do not Aggregate Switch (DO\_NOT\_AGG\_SW), External Reference Number (EXT\_TXN\_NBR), Credit/Debit Indicator (HOW\_TO\_USE\_TXN\_FLG), Manual Entry (MANUAL\_SW), Transaction Amount (TXN\_AMT), Transaction Date (TXN\_DTTM), Transaction Record Type (TXN\_REC\_TYPE\_CD), Transaction Source (TXN\_SOURCE\_CD), Transaction Upload Date (TXN\_UPLOAD\_DTTM), Transaction Volume (TXN\_VOL), Additional Amount 1 (UDF\_AMT\_1), Additional Amount 2 (UDF\_AMT\_2), Additional Amount 3 (UDF\_AMT\_3), Additional Amount 4 (UDF\_AMT\_4), Additional Amount 5 (UDF\_AMT\_5), Additional Amount 6 (UDF\_AMT\_6), Additional Amount 7 (UDF\_AMT\_7), Additional Amount 8 (UDF\_AMT\_8), Additional Amount 9 (UDF\_AMT\_9), Additional Amount 10 (UDF\_AMT\_10), Additional Data 1 (UDF\_CHAR\_1), Additional Data 2 (UDF\_CHAR\_2), Additional Data 3 (UDF\_CHAR\_3), Additional Data 4 (UDF\_CHAR\_4), Additional Data 5 (UDF\_CHAR\_5), Additional Data 6 (UDF\_CHAR\_6), Additional Data 7 (UDF\_CHAR\_7), Additional Data 8 (UDF\_CHAR\_8), Additional Data 9 (UDF\_CHAR\_9), Additional Data 10 (UDF\_CHAR\_10), Additional Data 11 (UDF\_CHAR\_11), Additional Data 12 (UDF\_CHAR\_12), Additional Data 13 (UDF\_CHAR\_13), Additional Data 14 (UDF\_CHAR\_14), Additional Data 15 (UDF\_CHAR\_15), Additional Data 16 (UDF\_CHAR\_16), Additional Data 17 (UDF\_CHAR\_17), Additional Data 18 (UDF\_CHAR\_18), Additional Data 19 (UDF\_CHAR\_19), Additional Data 20 (UDF\_CHAR\_20), Additional Data 21 (UDF\_CHAR\_21), Additional Data 22 (UDF\_CHAR\_22), Additional Data 23 (UDF\_CHAR\_23), Additional Data 24 (UDF\_CHAR\_24), Additional Data 25 (UDF\_CHAR\_25), Additional Data 26 (UDF\_CHAR\_26), Additional Data 27 (UDF\_CHAR\_27), Additional Data 28 (UDF\_CHAR\_28), Additional Data 29 (UDF\_CHAR\_29), Additional Data 30 (UDF\_CHAR\_30), Additional Data 31 (UDF\_CHAR\_31), Additional Data 32 (UDF\_CHAR\_32), Additional Data 33 (UDF\_CHAR\_33), Additional Data 34 (UDF\_CHAR\_34), Additional Data 35 (UDF\_CHAR\_35), Additional Data 36 (UDF\_CHAR\_36), Additional Data 37 (UDF\_CHAR\_37), Additional Data 38 (UDF\_CHAR\_38), Additional Data 39 (UDF\_CHAR\_39), Additional Data 40 (UDF\_CHAR\_40), Additional Data 41 (UDF\_CHAR\_41), Additional Data 42 (UDF\_CHAR\_42), Additional Data 43 (UDF\_CHAR\_43), Additional Data 44 (UDF\_CHAR\_44), Additional Data 45 (UDF\_CHAR\_45), Additional Data 46 (UDF\_CHAR\_46), Additional Data 47 (UDF\_CHAR\_47), Additional Data 48 (UDF\_CHAR\_48), Additional Data 49 (UDF\_CHAR\_49), Additional Data 50 (UDF\_CHAR\_50), Amount 1 Currency Code (UDF\_CURRENCY\_CD\_1), Amount 2 Currency Code (UDF\_CURRENCY\_CD\_2), Amount 3 Currency Code (UDF\_CURRENCY\_CD\_3), Amount 4 Currency Code (UDF\_CURRENCY\_CD\_4), Amount 5 Currency Code (UDF\_CURRENCY\_CD\_5), Amount 6 Currency Code (UDF\_CURRENCY\_CD\_6), Amount 7 Currency Code (UDF\_CURRENCY\_CD\_7), Amount 8 Currency Code (UDF\_CURRENCY\_CD\_8), Amount 9 Currency Code (UDF\_CURRENCY\_CD\_9), Amount 10 Currency Code (UDF\_CURRENCY\_CD\_10), Additional Date 1 (UDF\_DTTM\_1), Additional Date 2 (UDF\_DTTM\_2), Additional Date 3 (UDF\_DTTM\_3), Additional Date 4 (UDF\_DTTM\_4), Additional Date 5 (UDF\_DTTM\_5), Additional Numeric Data 1 (UDF\_NBR\_1), Additional Numeric Data 2 (UDF\_NBR\_2), Additional Numeric Data 3 (UDF\_NBR\_3), Additional Numeric Data 4 (UDF\_NBR\_4), Additional Numeric Data 5 (UDF\_NBR\_5), Additional Numeric Data 6 (UDF\_NBR\_6), Additional Numeric Data 7 (UDF\_NBR\_7), Additional Numeric Data 8 (UDF\_NBR\_8), Additional Numeric Data 9 (UDF\_NBR\_9), Additional Numeric Data 10 (UDF\_NBR\_10), Additional Numeric Data 11 (UDF\_NBR\_11), Additional Numeric Data 12 (UDF\_NBR\_12), Additional Numeric Data 13 (UDF\_NBR\_13), Additional Numeric Data 14 (UDF\_NBR\_14), Additional Numeric Data 15 (UDF\_NBR\_15), Additional Numeric Data 16 (UDF\_NBR\_16), Additional Numeric Data 17 (UDF\_NBR\_17), Additional Numeric Data 18 (UDF\_NBR\_18), Additional Numeric Data 19 (UDF\_NBR\_19), Additional Numeric Data 20 (UDF\_NBR\_20).

- **Temporary Fields** — Enables you to select non-transactional fields that you can use as input or output parameter while defining a rule. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Temporary Field	Used to indicate the non-transactional field that you want to use as input or output parameter.  <b>Note:</b> The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Transaction Record Type Tempo Field Search</b> window appears.	No

4. Enter the required details.

**Note:** You can search for a transaction source and algorithm by clicking the **Search**  icon corresponding to the respective field.

5. Select the check box corresponding to the transaction fields that you want to use as input or output parameters.
6. If required, you can select a non-transactional field as input or output parameter in the **Temporary Fields** section.

**Note:**  
You can search for a field by clicking the **Search**  icon corresponding to the respective field.

If you want to add more than one temporary field to the transaction record type, click the **Add**  icon and then repeat step 7. However, if you want to remove a temporary field from the transaction record type, click the **Delete**  icon corresponding to the temporary field.

7. Click **Save**.

The transaction record type is defined.

## **Editing a Transaction Record Type**

### **Prerequisites**

To edit a transaction record type, you should have:

- Validation algorithm defined using the C1-RULE-VAL algorithm type
- Transaction Information String algorithm defined using the C1-TXDETINFO algorithm type
- Fields (that you want to use as input or output parameter) defined in the application

### **Procedure**

To edit a transaction record type:

1. Search for the transaction record type in the **Transaction Record Type** screen.
2. In the **Search Results** section, click the **Edit**  icon in the **Edit** column corresponding to the transaction record type whose details you want to edit.

The **Transaction Record Type** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Transaction Source	Used to indicate the transaction source for which you want to define the transaction record type.  <b>Note:</b> The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Search Transaction Source</b> window appears.	Yes
Transaction Record Type	Used to specify the transaction record type.  <b>Note:</b> You cannot specify any special character except underscore (_) in the transaction record type.	Yes
Description	Used to specify the description for the transaction record type.	Yes
Rule Type	Used to specify the rule type.  <b>Note:</b> You cannot specify any special character except underscore (_) in the rule type.	Yes
Rule Type Description	Used to specify the description for the rule type.	Yes
Rule Validation Algorithm	Used to specify the validation algorithm that will be triggered when a rule is defined using the rule type.  <b>Note:</b> This algorithm checks whether: <ul style="list-style-type: none"> <li>• The values specified against the output parameters exist in the system</li> <li>• The same price item parameter (for example, PCD1_1_1_VAL) is not used multiple times for a division, account, and price item combination</li> </ul> The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Algorithm Search</b> window appears.	No

Field Name	Field Description	Mandatory (Yes or No)
Info String Algorithm	<p>Used to specify the algorithm that will generate the information string which appears in the <b>Transaction Information</b> column throughout the application.</p> <p><b>Note:</b> This algorithm concatenates the fields (related to the transaction) and delimiters specified as parameters in the algorithm.</p> <p>The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Algorithm Search</b> window appears.</p>	No
Maximum Accounts to be charged	<p>Used to indicate the maximum number of accounts which can bear the charges for a transaction. The valid values are:</p> <ul style="list-style-type: none"> <li>• 01</li> <li>• 02</li> <li>• 03</li> <li>• 04</li> <li>• 05</li> <li>• 06</li> <li>• 07</li> <li>• 08</li> <li>• 09</li> <li>• 10</li> </ul> <p><b>Note:</b> At present, the system supports maximum 10 accounts which can bear the charges for a transaction.</p>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Maximum Price Items to be mapped	<p>Used to indicate the maximum number of price items to which a transaction can be mapped for each account. The valid values are:</p> <ul style="list-style-type: none"><li>• 01</li><li>• 02</li><li>• 03</li><li>• 04</li><li>• 05</li><li>• 06</li><li>• 07</li><li>• 08</li><li>• 09</li><li>• 10</li></ul> <p><b>Note:</b> At present, the system supports maximum 10 price items to which a transaction can be mapped for each account.</p>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Maximum Price Item Parameters	<p>Used to indicate the maximum number of parameters that can be used with each price item to determine the price item pricing. The valid values are:</p> <ul style="list-style-type: none"> <li>• 00</li> <li>• 01</li> <li>• 02</li> <li>• 03</li> <li>• 04</li> <li>• 05</li> <li>• 06</li> <li>• 07</li> <li>• 08</li> <li>• 09</li> <li>• 10</li> <li>• 11</li> <li>• 12</li> <li>• 13</li> <li>• 14</li> <li>• 15</li> </ul> <p><b>Note:</b> At present, the system supports maximum 15 parameters that can be used with each price item to determine the price item pricing.</p>	Yes

In addition, this screen contains the following two sections:

- **Input/Output Parameters** — Enables you to select the transaction detail fields that you can use as input or output parameter while defining a rule. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Rule Input/Output	Used to indicate whether you want to use the transaction detail field as input or output parameter.	No
Transaction Field	Displays the transaction field name.	Not applicable
Business Label	<p>Used to specify a business label for the user defined fields.</p> <p><b>Note:</b> The business label appears when you add, copy, or view a transaction in the <b>Transaction Details</b> screen. The label changes depending on the transaction source and record type combination that you have selected.</p>	No

**Note:** At present, you can use the following transaction fields as input or output parameter while defining a rule — Account Identifier (ACCT\_NBR), Account Identifier Type (ACCT\_NBR\_TYPE\_CD), Division (CIS\_DIVISION), Currency Code (CURRENCY\_CD), Customer Reference Number (CUST\_REF\_NBR), Do not Aggregate Switch (DO\_NOT\_AGG\_SW), External Reference Number (EXT\_TXN\_NBR), Credit/Debit Indicator (HOW\_TO\_USE\_TXN\_FLG), Manual Entry (MANUAL\_SW), Transaction Amount (TXN\_AMT), Transaction Date (TXN\_DTTM), Transaction Record Type (TXN\_REC\_TYPE\_CD), Transaction Source (TXN\_SOURCE\_CD), Transaction Upload Date (TXN\_UPLOAD\_DTTM), Transaction Volume (TXN\_VOL), Additional Amount 1 (UDF\_AMT\_1), Additional Amount 2 (UDF\_AMT\_2), Additional Amount 3 (UDF\_AMT\_3), Additional Amount 4 (UDF\_AMT\_4), Additional Amount 5 (UDF\_AMT\_5), Additional Amount 6 (UDF\_AMT\_6), Additional Amount 7 (UDF\_AMT\_7), Additional Amount 8 (UDF\_AMT\_8), Additional Amount 9 (UDF\_AMT\_9), Additional Amount 10 (UDF\_AMT\_10), Additional Data 1 (UDF\_CHAR\_1), Additional Data 2 (UDF\_CHAR\_2), Additional Data 3 (UDF\_CHAR\_3), Additional Data 4 (UDF\_CHAR\_4), Additional Data 5 (UDF\_CHAR\_5), Additional Data 6 (UDF\_CHAR\_6), Additional Data 7 (UDF\_CHAR\_7), Additional Data 8 (UDF\_CHAR\_8), Additional Data 9 (UDF\_CHAR\_9), Additional Data 10 (UDF\_CHAR\_10), Additional Data 11 (UDF\_CHAR\_11), Additional Data 12 (UDF\_CHAR\_12), Additional Data 13 (UDF\_CHAR\_13), Additional Data 14 (UDF\_CHAR\_14), Additional Data 15 (UDF\_CHAR\_15), Additional Data 16 (UDF\_CHAR\_16), Additional Data 17 (UDF\_CHAR\_17), Additional Data 18 (UDF\_CHAR\_18), Additional Data 19 (UDF\_CHAR\_19), Additional Data 20 (UDF\_CHAR\_20), Additional Data 21 (UDF\_CHAR\_21), Additional Data 22 (UDF\_CHAR\_22), Additional Data 23 (UDF\_CHAR\_23), Additional Data 24 (UDF\_CHAR\_24), Additional Data 25 (UDF\_CHAR\_25), Additional Data 26 (UDF\_CHAR\_26), Additional Data 27 (UDF\_CHAR\_27), Additional Data 28 (UDF\_CHAR\_28), Additional Data 29 (UDF\_CHAR\_29), Additional Data 30 (UDF\_CHAR\_30), Additional Data 31 (UDF\_CHAR\_31), Additional Data 32 (UDF\_CHAR\_32), Additional Data 33 (UDF\_CHAR\_33), Additional Data 34 (UDF\_CHAR\_34), Additional Data 35 (UDF\_CHAR\_35), Additional Data 36 (UDF\_CHAR\_36), Additional Data 37 (UDF\_CHAR\_37), Additional Data 38 (UDF\_CHAR\_38), Additional Data 39 (UDF\_CHAR\_39), Additional Data 40 (UDF\_CHAR\_40), Additional Data 41 (UDF\_CHAR\_41), Additional Data 42 (UDF\_CHAR\_42), Additional Data 43 (UDF\_CHAR\_43), Additional Data 44 (UDF\_CHAR\_44), Additional Data 45 (UDF\_CHAR\_45), Additional Data 46 (UDF\_CHAR\_46), Additional Data 47 (UDF\_CHAR\_47), Additional Data 48 (UDF\_CHAR\_48), Additional Data 49 (UDF\_CHAR\_49), Additional Data 50 (UDF\_CHAR\_50), Amount 1 Currency Code (UDF\_CURRENCY\_CD\_1), Amount 2 Currency Code (UDF\_CURRENCY\_CD\_2), Amount 3 Currency Code (UDF\_CURRENCY\_CD\_3), Amount 4 Currency Code (UDF\_CURRENCY\_CD\_4), Amount 5 Currency Code (UDF\_CURRENCY\_CD\_5), Amount 6 Currency Code (UDF\_CURRENCY\_CD\_6), Amount 7 Currency Code (UDF\_CURRENCY\_CD\_7), Amount 8 Currency Code (UDF\_CURRENCY\_CD\_8), Amount 9 Currency Code (UDF\_CURRENCY\_CD\_9), Amount 10 Currency Code (UDF\_CURRENCY\_CD\_10), Additional Date 1 (UDF\_DTTM\_1), Additional Date 2 (UDF\_DTTM\_2), Additional Date 3 (UDF\_DTTM\_3), Additional Date 4 (UDF\_DTTM\_4), Additional Date 5 (UDF\_DTTM\_5), Additional Numeric Data 1 (UDF\_NBR\_1), Additional Numeric Data 2 (UDF\_NBR\_2), Additional Numeric Data 3 (UDF\_NBR\_3), Additional Numeric Data 4 (UDF\_NBR\_4), Additional Numeric Data 5 (UDF\_NBR\_5), Additional Numeric Data 6 (UDF\_NBR\_6), Additional Numeric Data 7 (UDF\_NBR\_7), Additional Numeric Data 8 (UDF\_NBR\_8), Additional Numeric Data 9 (UDF\_NBR\_9), Additional Numeric Data 10 (UDF\_NBR\_10), Additional Numeric Data 11 (UDF\_NBR\_11), Additional Numeric Data 12 (UDF\_NBR\_12), Additional Numeric Data 13 (UDF\_NBR\_13), Additional Numeric Data 14 (UDF\_NBR\_14), Additional Numeric Data 15 (UDF\_NBR\_15), Additional Numeric Data 16 (UDF\_NBR\_16), Additional Numeric Data 17 (UDF\_NBR\_17), Additional Numeric Data 18 (UDF\_NBR\_18), Additional Numeric Data 19 (UDF\_NBR\_19), Additional Numeric Data 20 (UDF\_NBR\_20).

- **Temporary Fields** — Enables you to select non-transactional fields that you can use as input or output parameter while defining a rule. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Temporary Field	Used to indicate the non-transactional field that you want to use as input or output parameter.  <b>Note:</b> The <b>Search</b> (  ) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Transaction Record Type Tempo Field Search</b> window appears.	No

### 3. Modify the required details.

**Note:**

You can search for an algorithm and field by clicking the **Search** () icon corresponding to the respective field.

You can edit and remove an input or output parameter from a rule type only when it is not yet used in a rule (which is created using the rule type).

If you want to add more than one temporary field to the transaction record type, click the **Add** () icon and then specify the details in the **Temporary Fields** section. However, if you want to remove a temporary field from the transaction record type, click the **Delete** () icon corresponding to the temporary field.

### 4. Click **Save**.

The changes made to the transaction record type are saved.

### **Related Topics**

For more information on...	See...
How to search for a transaction record type	<a href="#">Searching for a Transaction Record Type</a> on page 937

## Deleting a Transaction Record Type

### **Procedure**

To delete a transaction record type:

1. Search for the transaction record type in the **Transaction Record Type** screen.
2. In the **Search Results** section, click the **Delete** () icon in the **Delete** column corresponding to the transaction record type that you want to delete.

A message appears confirming whether you want to delete the transaction record type.

**Note:** You can only delete a transaction record type which is not yet used.

### 3. Click **OK**.

The transaction record type is deleted.

### **Related Topics**

<b>For more information on...</b>	<b>See...</b>
How to search for a transaction record type	<a href="#">Searching for a Transaction Record Type</a> on page 937

## Copying a Transaction Record Type

Instead of creating a transaction record type from scratch, you can create a new transaction record type using an existing transaction record type. This is possible through copying a transaction record type. Once you create a copy of a transaction record type, the input or output parameters and temporary fields are also copied to the new transaction record type. You can then edit the details, if required.

### Prerequisites

To copy a transaction record type, you should have:

- Transaction record type (whose copy you want to create) defined in the application
- Validation algorithm defined using the C1-RULE-VAL algorithm type
- Transaction Information String algorithm defined using the C1-TXDETINFO algorithm type
- Fields (that you want to use as input or output parameter) defined in the application

### Procedure

To copy a transaction record type:

1. Search for the transaction record type in the **Transaction Record Type** screen.
2. In the **Search Results** section, click the **Copy** ( icon in the **Copy** column corresponding to the transaction record type whose copy you want to create.

The **Transaction Record Type** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Transaction Source	Used to indicate the transaction source for which you want to define the transaction record type.  <b>Note:</b> The <b>Search</b> (  ) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Search Transaction Source</b> window appears.	Yes
Transaction Record Type	Used to specify the transaction record type.  <b>Note:</b> You cannot specify any special character except underscore (_) in the transaction record type.	Yes
Description	Used to specify the description for the transaction record type.	Yes
Rule Type	Used to specify the rule type.  <b>Note:</b> You cannot specify any special character except underscore (_) in the rule type.	Yes
Rule Type Description	Used to specify the description for the rule type.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Rule Validation Algorithm	<p>Used to specify the validation algorithm that will be triggered when a rule is defined using the rule type.</p> <p><b>Note:</b> This algorithm checks whether:</p> <ul style="list-style-type: none"> <li>• The values specified against the output parameters exist in the system</li> <li>• The same price item parameter (for example, PCD1_1_1_VAL) is not used multiple times for a division, account, and price item combination</li> </ul> <p>The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Algorithm Search</b> window appears.</p>	No
Info String Algorithm	<p>Used to specify the algorithm that will generate the information string which appears in the <b>Transaction Information</b> column throughout the application.</p> <p><b>Note:</b> This algorithm concatenates the fields (related to the transaction) and delimiters specified as parameters in the algorithm.</p> <p>The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Algorithm Search</b> window appears.</p>	No
Maximum Accounts to be charged	<p>Used to indicate the maximum number of accounts which can bear the charges for a transaction. The valid values are:</p> <ul style="list-style-type: none"> <li>• 01</li> <li>• 02</li> <li>• 03</li> <li>• 04</li> <li>• 05</li> <li>• 06</li> <li>• 07</li> <li>• 08</li> <li>• 09</li> <li>• 10</li> </ul> <p><b>Note:</b> At present, the system supports maximum 10 accounts which can bear the charges for a transaction.</p>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Maximum Price Items to be mapped	<p>Used to indicate the maximum number of price items to which a transaction can be mapped for each account. The valid values are:</p> <ul style="list-style-type: none"><li>• 01</li><li>• 02</li><li>• 03</li><li>• 04</li><li>• 05</li><li>• 06</li><li>• 07</li><li>• 08</li><li>• 09</li><li>• 10</li></ul> <p><b>Note:</b> At present, the system supports maximum 10 price items to which a transaction can be mapped for each account.</p>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Maximum Price Item Parameters	<p>Used to indicate the maximum number of parameters that can be used with each price item to determine the price item pricing. The valid values are:</p> <ul style="list-style-type: none"> <li>• 00</li> <li>• 01</li> <li>• 02</li> <li>• 03</li> <li>• 04</li> <li>• 05</li> <li>• 06</li> <li>• 07</li> <li>• 08</li> <li>• 09</li> <li>• 10</li> <li>• 11</li> <li>• 12</li> <li>• 13</li> <li>• 14</li> <li>• 15</li> </ul> <p><b>Note:</b> At present, the system supports maximum 15 parameters that can be used with each price item to determine the price item pricing.</p>	Yes

In addition, this screen contains the following two sections:

- **Input/Output Parameters** — Enables you to select the transaction detail fields that you can use as input or output parameter while defining a rule. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Rule Input/Output	Used to indicate whether you want to use the transaction detail field as input or output parameter.	No
Transaction Field	Displays the transaction field name.	Not applicable
Business Label	<p>Used to specify a business label for the user defined fields.</p> <p><b>Note:</b> The business label appears when you add, copy, or view a transaction in the <b>Transaction Details</b> screen. The label changes depending on the transaction source and record type combination that you have selected.</p>	No

**Note:** At present, you can use the following transaction fields as input or output parameter while defining a rule — Account Identifier (ACCT\_NBR), Account Identifier Type (ACCT\_NBR\_TYPE\_CD), Division (CIS\_DIVISION), Currency Code (CURRENCY\_CD), Customer Reference Number (CUST\_REF\_NBR), Do not Aggregate Switch (DO\_NOT\_AGG\_SW), External Reference Number (EXT\_TXN\_NBR), Credit/Debit Indicator (HOW\_TO\_USE\_TXN\_FLG), Manual Entry (MANUAL\_SW), Transaction Amount (TXN\_AMT), Transaction Date (TXN\_DTTM), Transaction Record Type (TXN\_REC\_TYPE\_CD), Transaction Source (TXN\_SOURCE\_CD), Transaction Upload Date (TXN\_UPLOAD\_DTTM), Transaction Volume (TXN\_VOL), Additional Amount 1 (UDF\_AMT\_1), Additional Amount 2 (UDF\_AMT\_2), Additional Amount 3 (UDF\_AMT\_3), Additional Amount 4 (UDF\_AMT\_4), Additional Amount 5 (UDF\_AMT\_5), Additional Amount 6 (UDF\_AMT\_6), Additional Amount 7 (UDF\_AMT\_7), Additional Amount 8 (UDF\_AMT\_8), Additional Amount 9 (UDF\_AMT\_9), Additional Amount 10 (UDF\_AMT\_10), Additional Data 1 (UDF\_CHAR\_1), Additional Data 2 (UDF\_CHAR\_2), Additional Data 3 (UDF\_CHAR\_3), Additional Data 4 (UDF\_CHAR\_4), Additional Data 5 (UDF\_CHAR\_5), Additional Data 6 (UDF\_CHAR\_6), Additional Data 7 (UDF\_CHAR\_7), Additional Data 8 (UDF\_CHAR\_8), Additional Data 9 (UDF\_CHAR\_9), Additional Data 10 (UDF\_CHAR\_10), Additional Data 11 (UDF\_CHAR\_11), Additional Data 12 (UDF\_CHAR\_12), Additional Data 13 (UDF\_CHAR\_13), Additional Data 14 (UDF\_CHAR\_14), Additional Data 15 (UDF\_CHAR\_15), Additional Data 16 (UDF\_CHAR\_16), Additional Data 17 (UDF\_CHAR\_17), Additional Data 18 (UDF\_CHAR\_18), Additional Data 19 (UDF\_CHAR\_19), Additional Data 20 (UDF\_CHAR\_20), Additional Data 21 (UDF\_CHAR\_21), Additional Data 22 (UDF\_CHAR\_22), Additional Data 23 (UDF\_CHAR\_23), Additional Data 24 (UDF\_CHAR\_24), Additional Data 25 (UDF\_CHAR\_25), Additional Data 26 (UDF\_CHAR\_26), Additional Data 27 (UDF\_CHAR\_27), Additional Data 28 (UDF\_CHAR\_28), Additional Data 29 (UDF\_CHAR\_29), Additional Data 30 (UDF\_CHAR\_30), Additional Data 31 (UDF\_CHAR\_31), Additional Data 32 (UDF\_CHAR\_32), Additional Data 33 (UDF\_CHAR\_33), Additional Data 34 (UDF\_CHAR\_34), Additional Data 35 (UDF\_CHAR\_35), Additional Data 36 (UDF\_CHAR\_36), Additional Data 37 (UDF\_CHAR\_37), Additional Data 38 (UDF\_CHAR\_38), Additional Data 39 (UDF\_CHAR\_39), Additional Data 40 (UDF\_CHAR\_40), Additional Data 41 (UDF\_CHAR\_41), Additional Data 42 (UDF\_CHAR\_42), Additional Data 43 (UDF\_CHAR\_43), Additional Data 44 (UDF\_CHAR\_44), Additional Data 45 (UDF\_CHAR\_45), Additional Data 46 (UDF\_CHAR\_46), Additional Data 47 (UDF\_CHAR\_47), Additional Data 48 (UDF\_CHAR\_48), Additional Data 49 (UDF\_CHAR\_49), Additional Data 50 (UDF\_CHAR\_50), Amount 1 Currency Code (UDF\_CURRENCY\_CD\_1), Amount 2 Currency Code (UDF\_CURRENCY\_CD\_2), Amount 3 Currency Code (UDF\_CURRENCY\_CD\_3), Amount 4 Currency Code (UDF\_CURRENCY\_CD\_4), Amount 5 Currency Code (UDF\_CURRENCY\_CD\_5), Amount 6 Currency Code (UDF\_CURRENCY\_CD\_6), Amount 7 Currency Code (UDF\_CURRENCY\_CD\_7), Amount 8 Currency Code (UDF\_CURRENCY\_CD\_8), Amount 9 Currency Code (UDF\_CURRENCY\_CD\_9), Amount 10 Currency Code (UDF\_CURRENCY\_CD\_10), Additional Date 1 (UDF\_DTTM\_1), Additional Date 2 (UDF\_DTTM\_2), Additional Date 3 (UDF\_DTTM\_3), Additional Date 4 (UDF\_DTTM\_4), Additional Date 5 (UDF\_DTTM\_5), Additional Numeric Data 1 (UDF\_NBR\_1), Additional Numeric Data 2 (UDF\_NBR\_2), Additional Numeric Data 3 (UDF\_NBR\_3), Additional Numeric Data 4 (UDF\_NBR\_4), Additional Numeric Data 5 (UDF\_NBR\_5), Additional Numeric Data 6 (UDF\_NBR\_6), Additional Numeric Data 7 (UDF\_NBR\_7), Additional Numeric Data 8 (UDF\_NBR\_8), Additional Numeric Data 9 (UDF\_NBR\_9), Additional Numeric Data 10 (UDF\_NBR\_10), Additional Numeric Data 11 (UDF\_NBR\_11), Additional Numeric Data 12 (UDF\_NBR\_12), Additional Numeric Data 13 (UDF\_NBR\_13), Additional Numeric Data 14 (UDF\_NBR\_14), Additional Numeric Data 15 (UDF\_NBR\_15), Additional Numeric Data 16 (UDF\_NBR\_16), Additional Numeric Data 17 (UDF\_NBR\_17), Additional Numeric Data 18 (UDF\_NBR\_18), Additional Numeric Data 19 (UDF\_NBR\_19), Additional Numeric Data 20 (UDF\_NBR\_20).

- **Temporary Fields** — Enables you to select non-transactional fields that you can use as input or output parameter while defining a rule. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Temporary Field	Used to indicate the non-transactional field that you want to use as input or output parameter.  <b>Note:</b> The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Transaction Record Type Tempo Field Search</b> window appears.	No

- Enter the required details.

**Note:** You can search for an algorithm by clicking the **Search**  icon corresponding to the respective field.

- Select the check box corresponding to the transaction fields that you want to use as input or output parameters.
- If required, you can select a non-transactional field as input or output parameter in the **Temporary Fields** section.

**Note:**  
You can search for a field by clicking the **Search**  icon corresponding to the respective field.  
  
If you want to add more than one temporary field to the transaction record type, click the **Add**  icon and then repeat step 5. However, if you want to remove a temporary field from the transaction record type, click the **Delete**  icon corresponding to the temporary field.

- Click **Save**.

The new transaction record type is defined.

## Transaction Aggregation Rule

The **Transaction Aggregation Rule** screen allows you to define transaction aggregation rule for an SQL. You can also edit and delete the transaction aggregation rule of an SQL. This screen consists of the following zones:

- [Transaction Aggregation Rules](#) on page 955

### Transaction Aggregation Rules

The **Transaction Aggregation Rules** zone lists transaction aggregation rules that are already defined in the system. You can define, edit, and delete a transaction aggregation rule through this zone.

This zone contains the following columns:

Column Name	Column Description
SQL Description	Displays the description of the service quantity identifier (SQI).
Aggregation Function	Indicates the formula used in the transaction aggregation rule defined for the SQI.
Function	Indicates the function used for aggregation.
Transaction Parameter	Indicates the transaction parameter used for aggregation.
Edit	On clicking the <b>Edit</b> (✎) icon, the <b>Transaction Aggregation Rule</b> screen appears where you can edit the aggregation rule.
Delete	On clicking the <b>Delete</b> (🗑) icon, you can delete the transaction aggregation rule.

You can define transaction aggregation rule for an SQI by clicking the **Add** link in the upper right corner of this zone. You can also change the layout of this zone. For more information on how to change the layout, see [Changing the Layout](#) on page 2336.

## **Defining Transaction Aggregation Rule for an SQI**

### **Prerequisites**

To define transaction aggregation rule for an SQI, you should have:

- SQI defined in the application

### **Procedure**

To define transaction aggregation rule for an SQI:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **T** and then click **Transaction Aggregation Rule**.  
The **Transaction Aggregation Rule** screen appears.
3. Click the **Add** link in the upper right corner of the **Transaction Aggregation Rules** zone.  
The **Transaction Aggregation Rule** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
SQL	Used to indicate the SQI for which you want to define the transaction aggregation rule.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Function	Used to indicate the function that you want to use for aggregation. The valid values are: <ul style="list-style-type: none"> <li>SUM()</li> <li>MIN()</li> <li>MAX()</li> <li>COUNT()</li> </ul>	Yes
Transaction Parameter	Used to indicate the transaction parameter that you want to use for aggregation. The valid values are: <ul style="list-style-type: none"> <li>TXN_AMT</li> <li>TXN_VOL</li> <li>UDF_AMT_1, UDF_AMT_2, UDF_AMT_3, ..., UDF_AMT_10</li> <li>UDF_NBR_1, UDF_NBR_2, UDF_NBR_3, ..., UDF_NBR_20</li> </ul>	Yes

- Enter the required details.
- Click **Save**.

The transaction aggregation rule is defined for the SQI.

## Editing Transaction Aggregation Rule of an SQI

### Procedure

To edit the transaction aggregation rule of an SQI:

- Click the **Admin** link in the **Application** toolbar.  
A list appears.
- From the **Admin** menu, select **T** and then click **Transaction Aggregation Rule**.  
The **Transaction Aggregation Rule** screen appears.
- Click the **Edit**  icon in the **Edit** column corresponding to the SQI whose transaction aggregation rule you want to edit.

The **Transaction Aggregation Rule** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
SQI	Indicates the SQI for which the transaction aggregation rule is defined.	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
Function	Used to indicate the function that you want to use for aggregation. The valid values are: <ul style="list-style-type: none"> <li>SUM()</li> <li>MIN()</li> <li>MAX()</li> <li>COUNT()</li> </ul>	Yes
Transaction Parameter	Used to indicate the transaction parameter that you want to use for aggregation. The valid values are: <ul style="list-style-type: none"> <li>TXN_AMT</li> <li>TXN_VOL</li> <li>UDF_AMT_1, UDF_AMT_2, UDF_AMT_3, ..., UDF_AMT_10</li> <li>UDF_NBR_1, UDF_NBR_2, UDF_NBR_3, ..., UDF_NBR_20</li> </ul>	Yes

4. Modify the required details.
5. Click **Save**.

The changes made to the transaction aggregation rule are saved.

<b>Transaction Aggregation Rule</b> screen	<a href="#">Transaction Aggregation Rule</a> on page 955
<b>Transaction Aggregation Rules</b> zone	<a href="#">Transaction Aggregation Rules</a> on page 955

## **Deleting Transaction Aggregation Rule of an SQI**

### **Procedure**

To delete the transaction aggregation rule of an SQI:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **T** and then click **Transaction Aggregation Rule**.  
The **Transaction Aggregation Rule** screen appears.
3. Click the **Delete** (🗑) icon in the **Delete** column corresponding to the SQI whose transaction aggregation rule you want to delete.  
A message appears confirming whether you want to delete the transaction aggregation rule.
4. Click **OK**.  
The transaction aggregation rule is deleted.

## Schedule

The **Schedule** screen allows you to define, edit, and delete a schedule. This screen consists of the following zones:

- [Search Schedule](#) on page 959

### Search Schedule

The **Search Schedule** zone allows you to search for a schedule. This zone contains the following two sections:

- **Search Criteria** — The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Schedule	Used to search a particular schedule.	No
Description	Used to search schedules with a particular .description	No

- **Search Results** — On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Schedule	Displays the schedule.
Description	Displays the description of the schedule.
View	On clicking the <b>View</b>  icon, the <b>View Schedule</b> screen appears where you can view the details of the schedule.
Edit	On clicking the <b>Edit</b>  icon, the <b>Edit Schedule</b> screen appears where you can edit the details of the schedule.
Delete	On clicking the <b>Delete</b>  icon, you can delete the schedule.
<div style="border: 1px solid black; padding: 5px;"> <b>Note:</b> You can only delete a schedule which is not yet used.         </div>	

You can create a new schedule by clicking the **Add** link in the upper right corner of this zone.

## Searching for a Schedule

### Procedure

To search for a schedule:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **S** and then click **Schedule**.  
The **Schedule** screen appears.
3. Enter the search criteria in the **Search Schedule** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

4. Click **Search**.  
The search results appear.

## Viewing the Schedule Details

### Procedure

To view the details of a schedule:

1. Search for the schedule in the **Schedule** screen.
2. In the **Search Results** section, click the **View**  icon in the **View** column corresponding to the schedule whose details you want to view.  
The **View Schedule** screen appears.
3. View the details of the schedule in the **View Schedule** screen.

## Defining a Schedule

### Procedure

To define a schedule:

1. Click the **Admin** link in the **Application** toolbar.

A list appears.

2. From the **Admin** menu, select **S** and then click **Schedule**.

The **Schedule** screen appears.

3. Click the **Add** link in the upper right corner of the **Search Schedule** zone.

The **Add Schedule** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Schedule	Used to specify the schedule code.	Yes
Description	Used to specify the description for the schedule.	Yes

In addition, this screen contains the following two sections:

- **Schedule Periods** — This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Start Date	Used to specify the start date of the schedule period. <b>Note:</b> The start date cannot be later than the end date.	Yes
End Date	Used to specify the end date of the schedule period. <b>Note:</b> The end date cannot be earlier than the start date.	Yes

**Note:** At least one schedule period must be defined in the schedule. Also, ensure that the schedule periods do not have overlapping days.

- **Schedule Types** — This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Schedule Type	Used to indicate the functionality where you want to use the schedule. You can use a schedule for more than one functionality.	Yes

4. Enter the required details.

- 5.

If you want to define more than one period in the schedule, click the **Add** () icon and then specify the details.

**Note:** However, if you want to remove a period from the schedule, click the **Delete** () icon corresponding to the period.

6. Click **Save**.

The schedule is defined.

## Editing a Schedule

### Procedure

To edit a schedule:

1. Search for the schedule in the **Schedule** screen.
2. In the **Search Results** section, click the **Edit**  icon in the **Edit** column corresponding to the schedule whose details you want to edit.

The **Edit Schedule** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Schedule	Displays the schedule code.	Not applicable
Description	Used to specify the description for the schedule.	Yes

In addition, this screen contains the following two sections:

- **Schedule Periods** — This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Start Date	Used to specify the start date of the schedule period.  <b>Note:</b> The start date cannot be later than the end date.	Yes
End Date	Used to specify the end date of the schedule period.  <b>Note:</b> The end date cannot be earlier than the start date.	Yes

**Note:** At least one schedule period must be defined in the schedule. Also, ensure that the schedule periods do not have overlapping days.

- **Schedule Types** — This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Schedule Type	Used to indicate the functionality where you want to use the schedule. You can use a schedule for more than one functionality.	Yes

3. Modify the required details.
4. If you want to define more than one period in the schedule, click the **Add** () icon and then specify the details.

**Note:** However, if you want to remove a period from the schedule, click the **Delete** () icon corresponding to the period.

5. Click **Save**.

The changes made to the schedule are saved.

## Disaggregation Request

Through the **Disaggregation Request Creation (C1-DISTG)** batch, you can only create a disaggregation request for an account. However, from the **Disaggregation Request** screen, you can create a disaggregation request for a person and account. When you create a disaggregation request for a person, the system does not create the disaggregation request for the person. Instead, the system creates the disaggregation request for all accounts of the person (where the person is the main customer) and its child persons.

The **Disaggregation Request** screen allows you to search for disaggregation requests using various search criteria. It also allows you to create and delete a disaggregation request. This screen consists of the following zone:

- [Search Disaggregation Request](#) on page 964

## Search Disaggregation Request

The **Search Disaggregation Request** zone allows you to search for a disaggregation request using various search criteria. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for a disaggregation request using the person, account, or accumulation group details. The valid values are: <ul style="list-style-type: none"> <li>• Person</li> <li>• Account</li> <li>• Accumulation Group</li> </ul> <p><b>Note:</b> By default, the <b>Person</b> option is selected.</p>	Yes
Person Name	Used to search disaggregation requests which are created for accounts belonging to persons with a particular name. <p><b>Note:</b> This field appears only when the <b>Person</b> option is selected from the <b>Search By</b> list.</p>	No
Person ID	Used to search disaggregation requests which are created for accounts of a particular person. <p><b>Note:</b> This field appears only when the <b>Person</b> option is selected from the <b>Search By</b> list.</p>	No
Request Date From	Used to search disaggregation requests which are created from a particular date onwards.	Yes
Person Identifier	Used to search disaggregation requests which are created for accounts of a particular person. <p><b>Note:</b> This field appears only when the <b>Person</b> option is selected from the <b>Search By</b> list.</p>	Yes (Conditional) <p><b>Note:</b> If you specify the person identifier type as a search criteria, you have to specify the person identifier.</p>
Request Date To	Used to search disaggregation requests which are created till a particular date.	Yes
Person Identifier Type	Used to indicate the person identifier type. <p><b>Note:</b> This field appears only when the <b>Person</b> option is selected from the <b>Search By</b> list.</p>	Yes (Conditional) <p><b>Note:</b> If you specify the person identifier as a search criteria, you have to select the person identifier type.</p>

Field Name	Field Description	Mandatory (Yes or No)
Processing Date From	Used to search disaggregation requests which are processed from a particular date onwards.	No
Request Source	Used to search disaggregation requests which are created automatically, manually, or through the batch process. The valid values are: <ul style="list-style-type: none"> <li>• AUTOMATIC</li> <li>• BATCH</li> <li>• MANUAL</li> </ul>	No
Processing Date To	Used to search disaggregation requests which are processed till a particular date.	No
Request Status	Used to search disaggregation requests with a particular status. The valid values are: <ul style="list-style-type: none"> <li>• COMPLETE</li> <li>• PENDING</li> </ul>	No
Request Type	Used to search disaggregation requests with a particular request type. The valid values are: <ul style="list-style-type: none"> <li>• Account</li> <li>• Billable Charge</li> <li>• Price Assignment</li> <li>• Price Item</li> </ul> <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"> <b>Note:</b> This field appears only when the <b>Person</b> or <b>Account</b> option is selected from the <b>Search By</b> list. </div>	No
Division	Used to search disaggregation requests which are created for accounts belonging to a particular division. <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"> <b>Note:</b>  You can only view those divisions to which you have access in the <b>Division</b> list.   This field appears only when the <b>Person</b> or <b>Account</b> option is selected from the <b>Search By</b> list. </div>	Yes (Conditional) <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"> <b>Note:</b> This field is required when you are searching for a disaggregation request using the account details. </div>
Account ID	Used to search disaggregation requests which are created for a particular account. <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"> <b>Note:</b> This field appears only when you select the <b>Account</b> option from the <b>Search By</b> list. </div>	No

a

Field Name	Field Description	Mandatory (Yes or No)
Account Identifier	Used when you want to search disaggregation requests created for an account.  <b>Note:</b> This field appears only when you select the <b>Account</b> option from the <b>Search By</b> list.  a	Yes (Conditional)  <b>Note:</b> If you specify account identifier type as a search criteria, you have to enter the account identifier.
Account Identifier Type	Used to select the account identifier type based on which you want to search disaggregation requests created for an account.  <b>Note:</b> This field appears only when you select the <b>Account</b> option from the <b>Search By</b> list.  a	Yes (Conditional)  <b>Note:</b> If you enter account identifier as a search criteria, you have to select the account identifier type.
Accumulation Type	Used to select the accumulation type based on which you want to search disaggregation requests created for an accumulation group.  <b>Note:</b> This field appears only when you select the <b>Accumulation Group</b> option from the <b>Search By</b> list.	No
Parent Accumulation Group ID	Used to select the parent accumulation group id based on which you want to disaggregation requests created for an accumulation group.	Yes (Conditional)  <b>Note:</b> If you enter accumulation type as a search criteria, you have to select the parent accumulation group id.

- **Search Results** - The **Search Results** section displays the records based on the specified search criteria. The columns in the search results change depending on the query option selected.

Column Name	Column Description
Request ID	Displays the disaggregation request ID.
Request Date	Displays the date when the disaggregation request was created.
Status	Indicates the status of the disaggregation request. The valid values are: <ul style="list-style-type: none"> <li>• COMPLETE</li> <li>• PENDING</li> </ul>
Person ID	Indicates the person for whom the disaggregation request is created.

Column Name	Column Description
Person Information	Displays additional information about the person. In addition, this column has a context menu which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Person</b> screen appears with the details of the respective person.
Account ID	Indicates the account for which the disaggregation request is created.
Account Information	Displays additional information about the account. In addition, this column has a context menu which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears with the details of the respective account.  This column appears only when you select the <b>Account</b> option from the <b>Search By</b> list.
Processing Date	Displays the date when the disaggregation request is processed.
Request Type	Displays the request type based on which the disaggregation request is processed.
Price Item	Displays the price item using which the disaggregation request is processed.
Pricing	Displays the pricing details using which the disaggregation request is processed.
Billable Charge ID	Displays the charge id billable for the processed disaggregation request.
Delete	On clicking the <b>Delete</b> button, you can delete the disaggregation request.  <b>Note:</b> You can only delete a disaggregation request which is in the <b>Pending</b> status.

You can create a disaggregation request manually by clicking the **Add** link in the upper right corner of this zone.

## **Searching for a Disaggregation Request**

### **Procedure**

To search for a disaggregation request:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Transaction Feed Management** and then click **Disaggregation Request**.  
The **Disaggregation Request** screen appears.
3. Enter the search criteria in the **Search Disaggregation Request** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

#### 4. Click **Search**.

A list of disaggregation requests that meet the search criteria appears in the **Search Results** section.

## Creating a Disaggregation Request

### Prerequisites

To create a disaggregation request manually, you should have:

- Divisions, person identifier types, account identifier types, bill cycles, and invoice currencies defined in the application
- Price list assigned to the person or account (in case you want to search a person or an account based on an assigned price list)

### Procedure

To create a disaggregation request manually:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Transaction Feed Management** and then click **Disaggregation Request**.  
The **Disaggregation Request** screen appears.
3. Click the **Add** link in the upper right corner of the **Search Disaggregation Request** zone.

The **Add Disaggregation Request** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Request Type	Used to indicate whether you want to create disaggregation request for a person or an account. The valid values are: <ul style="list-style-type: none"> <li>• Parent Accumulation Group</li> <li>• Person/Account</li> </ul>	Yes

4. Click **OK**.

The **Add Disaggregation Request** screen appears. It contains the following fields:

Request Type	Used to indicate whether you want to create disaggregation request for a person or an account. The valid values are: <ul style="list-style-type: none"> <li>Account</li> <li>Person</li> </ul>	
Division	Used to specify the division to which the person or account belongs. <b>Note:</b> You can only view those divisions to which you have access in the <b>Division</b> list.	Yes (Conditional) <b>Note:</b> This field is required when you are creating a disaggregation request for an account.
Account ID	Used to indicate the account for which you want to create a disaggregation request. <b>Note:</b> This field is enabled only when you select the <b>Account</b> option from the <b>Request Type</b> list.	No
Person ID	Used to indicate the person for whom you want to create a disaggregation request. <b>Note:</b> This field is enabled only when you select the <b>Person</b> option from the <b>Request Type</b> list.	No
Account Identifier Type	Used to specify the account identifier type based on which you want to search for an account. <b>Note:</b> This field is enabled only when you select the <b>Account</b> option from the <b>Request Type</b> list.	Yes (Conditional) <b>Note:</b> If you enter account identifier as a search criteria, you have to select the account identifier type.
Account Identifier	Used to indicate the account for which you want to create a disaggregation request. <b>Note:</b> This field is enabled only when you select the <b>Account</b> option from the <b>Request Type</b> list.	Yes (Conditional) <b>Note:</b> If you specify account identifier type as a search criteria, you have to enter the account identifier.
Person Identifier Type	Used to specify the person identifier type based on which you want to search for a person. <b>Note:</b> This field is enabled only when you select the <b>Person</b> option from the <b>Request Type</b> list.	Yes (Conditional) <b>Note:</b> If you enter person identifier as a search criteria, you have to select the person identifier type.

Person Identifier	Used to indicate the person for whom you want to create a disaggregation request. <b>Note:</b> This field is enabled only when you select the <b>Person</b> option from the <b>Request Type</b> list.	Yes (Conditional) <b>Note:</b> If you specify person identifier type as a search criteria, you have to enter the person identifier.
Bill Cycle	Used when you want to search accounts having a particular bill cycle. <b>Note:</b> This field is enabled only when you select the <b>Account</b> option from the <b>Request Type</b> list.	No
Person Name	Used to specify the name of the person.	No
Invoice Currency	Used when you want to search accounts having a particular invoice currency. <b>Note:</b> This field is enabled only when you select the <b>Account</b> option from the <b>Request Type</b> list.	No
With Assigned Price List	Used when you want to search for a person or an account to which a particular price list is assigned.	Yes (Conditional) <b>Note:</b> This field is required when you want to search for a person or an account based on an assigned price list.
Price List Assigned From	Used when you want to search for a person or an account based on an assigned price list which is effective within the specified date range.	Yes (Conditional) <b>Note:</b> This field is required when you want to search for a person or an account based on an assigned price list.
Price List Assigned To	Used when you want to search for a person or an account based on an assigned price list which is effective within the specified date range.	Yes (Conditional) <b>Note:</b> This field is required when you want to search for a person or an account based on an assigned price list.

5. Select the **Person** or **Account** option from the **Request Type** list depending on whether you want to search for a person or an account.
6. Enter the search criteria in the **Search** section.

**Note:**

Pagination is used to display limited number of records in the **Search Results** section. By default, 20 records are displayed in the **Search Results** section. You can change the number of records displayed per page, if required.

You can use the navigation buttons, such as **First** ( << ), **Previous** ( < ), **Next** ( > ), and **Last** ( >> ) to navigate between pages. You can also select the page to which you want to navigate from the **Go To** list.

The values appear in the **Page Limit** list only when you define values for the **PAGE\_NUMBER** lookup field.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

## 7. Click **Search**.

A list of persons or accounts that meet the search criteria appears in the **Search Results** section. It contains the following columns:

Column Name	Column Description
Account Identifier Type	Displays the primary account identifier type of the account. <b>Note:</b> The data appears in this column only when you search for an account.
Account Identifier	Displays the value of the primary account identifier type. <b>Note:</b> The data appears in this column only when you search for an account.
Division	Displays the division to which the person or account belongs.
Person Identifier Type	Displays the primary person identifier type of the person. <b>Note:</b> The data appears in this column only when you search for a person.
Person Identifier	Displays the value of the primary person identifier type. <b>Note:</b> The data appears in this column only when you search for a person.
Person Name	Displays the name of the person.
With Assigned Price List	Displays the price list assigned to the person or account. <b>Note:</b> The data appears in this column only when you search for a person or an account based on an assigned price list.
Price List Assigned From	Displays the date from when the price list is assigned to the person or account. <b>Note:</b> The data appears in this column only when you search for a person or an account based on an assigned price list.
Price List Assigned To	Displays the date till when the price list is assigned to the person or account. <b>Note:</b> The data appears in this column only when you search for a person or an account based on an assigned price list.

Column Name	Column Description
Account Info	Displays additional information about the account. <b>Note:</b> The data appears in this column only when you search for an account.
Bill Cycle	Indicates the bill cycle defined for the account. <b>Note:</b> The data appears in this column only when you search for an account.

**Note:**

Pagination is used to display limited number of records in the **Search Results** section. By default, 20 records are displayed in the **Search Results** section. You can change the number of records displayed per page, if required.

You can use the navigation buttons, such as **First** ( << ), **Previous** ( < ), **Next** ( > ), and **Last** ( >> ) to navigate between pages. You can also select the page to which you want to navigate from the **Go To** list.

The values appear in the **Page Limit** list only when you define values for the **PAGE\_NUMBER** lookup field.

8. Do either of the following:

If you want to...	Then...
Create disaggregation request for one or more persons or accounts	<ol style="list-style-type: none"> <li>1. In the <b>Search Results</b> section, select the check box corresponding to the person or account for which you want to create a disaggregation request.</li> <li>2. Click <b>Disaggregate</b>.</li> </ol> <p>If you have selected an account, the disaggregation request is created for the account. However, if you have selected a person, the disaggregation request is created for each account of the person (where the person is the main customer) and its child person.</p>
Create disaggregation request for all persons or accounts that meet the search criteria	<ol style="list-style-type: none"> <li>1. Click <b>Disaggregate All</b>.</li> </ol> <p>A message appears confirming whether you want to create disaggregation requests for all persons or accounts that meet the search criteria.</p> <ol style="list-style-type: none"> <li>2. Click <b>OK</b>.</li> </ol> <p>If the accounts are listed in the <b>Search Results</b> section, the disaggregation request is created for each account (listed on the respective page). However, if the persons are listed in the <b>Search Results</b> section, the disaggregation request is created for each account of the person (where the person is the main customer) and its child person.</p>

## Deleting a Disaggregation Request

### Procedure

To delete a disaggregation request:

1. Search for the disaggregation request in the **Disaggregation Request** screen.
2. In the **Search Results** section, click the **Delete** button available in the **Delete** column corresponding to the disaggregation request that you want to delete.

A message appears confirming whether you want to delete the disaggregation request.

#### **Note:**

You can only delete a disaggregation request which is in the **Pending** status.

If the disaggregation process is already started for a disaggregation request, we recommend you not to delete the disaggregation request from the system. Otherwise, erroneous results might occur.

3. Click **OK**.

The disaggregation request is deleted.

## On Demand Billing

---

### Topics:

- [Prerequisites](#)
- [CSV File Format for Banking Usage Data](#)
- [CSV File Format for Insurance Usage Data](#)
- [Usage Record Status Transition](#)
- [File Type](#)
- [On Demand Billing](#)
- [Usage Data Processing](#)

Oracle no longer supports the Off Cycle Billing feature introduced in Oracle Revenue Management and Billing Version 2.2.4.2. Instead, the On Demand Billing feature has been introduced to facilitate adhoc billing. Earlier, you were only able to carry out billing based on the bill cycle (defined for the account). In other words, you were able to generate a bill for a bill cycle using the billable charges whose start and end dates fall within the bill cycle. However, there might be situations where you have received certain billing information after the bill is generated for the bill cycle. In such scenarios, you would like to generate a separate bill for the newly created billable charges. The system now allows you to generate an adhoc bill. However, note that you cannot generate adhoc bills through the **Bill** screen.

A bill is generated using the billable charges. Now, in order to differentiate between the normal and adhoc billable charges, you need to set the **Adhoc Bill** flag for the billable charges. If the value of the **Adhoc Bill** flag is set to **Y**, the system will consider the billable charge during adhoc billing. And, if the value of the **Adhoc Bill** flag is set to **N**, the system will consider the billable charge during regular billing based on the bill cycle.

A new batch named **Adhoc Billing (C1-FABL)** is created which generates adhoc bills. Both, automatically generated and manually created billable charges (with the **Adhoc Bill** flag set to **Y**) are considered during adhoc billing.

With Oracle Revenue Management and Billing V2.4.0.0.0, the On Demand Billing feature has been enhanced to facilitate billing for multiple usage data files in one go. Till now you were only able to create billable charges and bill for only one usage data file at a time using the using the **On Demand Billing** screen. However, there might be situations where you want to upload multiple usage data files and generate billable charges for the usage records (of a single or multiple accounts) that you may want to group together based on certain criteria. For example, you may want to generate billable charges for all debit transactions of one or more accounts. In such scenarios, you can now upload multiple usage data files using a file group and create billable charges for the records uploaded through the **Usage Data Processing** screen. You can create file groups based on various criteria to upload multiple usage data files. For example, you may want to create a file group for uploading usage data files of accounts that need to be billed for the services to be charged for using the credit card facility. You can create a file group using the **On Demand Billing** screen. You can then upload one or more usage data files using the file group through the **Usage Data Processing** screen. Oracle Revenue Management and Billing provides you with a facility to upload usage data received from various product processors or banking applications for billing. You can upload a usage data file in the CSV format. The **Usage Data Processing** screen allows you to upload usage data files for both banking and insurance modules. You need to ensure that the CSV file is in the required format; otherwise the file will not be uploaded in the system. For more information about the CSV file format,

see CSV File Format for Banking and CSV File Format for Insurance. When you upload a usage data file, mapping algorithm parses the flat file in the CSV format and maps the columns in the CSV file to an XML schema named Interface. The validation process starts immediately after the file is uploaded in the system. During the validation process, the system and custom validations (if any) are executed. The status of each usage record is changed to Valid or Invalid depending on whether the usage record was validated successfully or not. Once a usage record is successfully validated, you can submit the valid records and create billable charges for them. Once the usage data files are uploaded and billable charges are generated through the **Usage Data Processing** screen, you can then create and freeze the bills using the **On Demand Billing** screen.

You can optionally configure the system to use the approval workflow process for a usage data file. On submitting a valid record, the approval workflow process routes the usage record to the approver for approval. The approver receives a notification to approve the valid records. The approver can either approve or reject one or more valid records. Once the approver approves a valid record, a billable charge is created for the usage record. However, if the approver rejects a valid record, a notification is sent to the submitter to resolve the usage record. The submitter can then correct the existing data or add missing data (based on the review comments), and can again submit the valid record for approval. Once the valid record is approved, a billable charge is created for the usage record.

The system generates the bills based on the Bill After Date. The Bill After Date indicates the date after which adhoc or normal bills must be generated. In case of adhoc billing, the Bill After Date is specified for a file group using which you can upload one or more usage data files.

While uploading usage data files for adhoc billing, you may or may not specify the Bill After Date for a file group. The system behaves in the following manner when:

- **Bill After Date — Specified:** Adhoc bill is generated for the usage data file and account combination when the Bill After Date is equal to or earlier than the current date.
- **Bill After Date — Not Specified:** During the upload process, the Bill After Date is set to the current date. And, adhoc bill is generated for the usage data file and account combination when the Bill After Date is equal to or earlier than the current date.

In case of regular billing, you may or may not specify the Bill After Date while uploading a usage data file. The system behaves in the following manner when:

- **Bill After Date — Specified:** Normal bill is generated for the account in the bill cycle in which the bill after date falls.
- **Bill After Date — Not Specified:** Normal bill is generated for the account based on the bill cycle defined for the account.

Once the adhoc or normal bills are generated for a usage data file, you can freeze and complete the bills. Oracle Revenue Management and Billing provides you with the ability to freeze and complete adhoc bills generated for a usage data file from the **On Demand Billing** screen.

During the on demand billing process, each usage record of a file goes through various statuses until it is billed to the person. For more information about the usage record statuses, see [Usage Record Status Transition](#) on page 984.

## Prerequisites

---

To setup the on demand billing process, you need to do the following:

- Ensure approver's user group has access to the **F1-DFLTS** application service
- Create a To Do Type for submitter named **C1-ODBSU** using the following information:

- **Navigation Option** — C1\_SUBMIT
- **Priority** — Priority 10 – Highest
- **Message Category** — 17000
- **Message Number** — 1470
- **Sort Keys** — Define the following sort keys for the To Do type:

Sort Key	Use as Default	Sort Order
Usage Data ID	Yes	Descending

- **Drill Keys** — Define the following drill keys for the To Do type:

Table Name	Field Name
CI_BCHG_STG	BCHG_HSTG_ID
CI_BCHG_STG	FILE_NAME
CI_BCHG_STG	BCHG_STG_STAT_FLG

- Create a To Do Type for approver named **C1-ODBAP** using the following information:

- **Navigation Option** — CI\_NDAP
- **Priority** — Priority 10 – Highest
- **Message Category** — 17000
- **Message Number** — 1470
- **Sort Keys** — Define the following sort keys for the To Do type:

Sort Key	Use as Default	Sort Order
Usage Data ID	Yes	Descending

- **Drill Keys** — Define the following drill keys for the To Do type:

Table Name	Field Name
CI_BCHG_STG	BCHG_HSTG_ID
CI_BCHG_STG	FILE_NAME

- Create a To Do role named **C1-ODBSU** for submitter and **C1-ODBAP** for approver
- Assign the **C1-ODBSU** To Do type to the **C1-ODBSU** To Do role
- Assign the **C1-ODBAP** To Do type to the **C1-ODBAP** To Do role
- Create a To Do role named **C1-ODFU** and assign users to this To Do role. The users who have the **C1-ODFU** To Do role will receive the To Do entries generated while executing the **Upload and Validate Usage Data File (C1-ODFU)** batch.

- Assign the **C1-ODFU** To Do type to the **C1-ODFU** To Do role
- Create a To Do role named **C1-ODBCH** and assign users to this To Do role. The users who have the **C1-ODBCH** To Do role will receive the To Do entries generated while executing the **Billable Charge Creation (C1-ODBCH)** batch.
- Assign the **C1-ODBCH** To Do type to the **C1-ODBCH** To Do role
- Create a To Do role named **C1-FABL** and assign users to this To Do role. The users who have the **C1-FABL** To Do role will receive the To Do entries generated while executing the **Adhoc Billing (C1-FABL)** batch.
- Assign the **C1-FABL** To Do type to the **C1-FABL** To Do role
- Create a To Do role named **C1-FCADH** and assign users to this To Do role. The users who have the **C1-FCADH** To Do role will receive the To Do entries generated while executing the **Freeze and Complete Adhoc Bills (C1-FCADH)** batch.
- Assign the **C1-FCADH** To Do type to the **C1-FCADH** To Do role
- Set e-mail address for the users who are going to use the **On Demand Billing** screen (otherwise To Do entry will not be generated on executing the above batches)
- Create a mapping algorithm using the **C1-CSVPMALGO** algorithm type
- Create a validation algorithm using the **C1-VLDALGO** algorithm type
- Create an extract algorithm using the **C1-EXTALGO** algorithm type
- Create a To Do algorithm using the **C1\_ODBDALGO** algorithm type and set the following parameters in the algorithm:
  - **To Do Role for Submitter** — Used to indicate that users with the specified To Do role can only resolve the records which are rejected by the approver.
  - **To Do Type for Submitter** — Used to indicate that a To Do entry of the specified To Do type must be created when the approver rejects the records.
  - **To Do Role for Approver** — Used to indicate that users with the specified To Do role can only approve the records submitted by the submitter.
  - **To Do Type for Approver** — Used to indicate that a To Do entry of the specified To Do type must be created when the submitter submits the valid records for approval.
- Define the required file types in the system
- Define values for the following lookup fields:
  - ODB\_CAN\_RSN\_FLG
  - ODB\_REJ\_RSN\_FLG
  - PAGE\_NUMBER
- If you want to create billable charges with future date for a contract, then ensure that the **Use Calendar Billing** option is set to **Allow Advanced Billing** in the respective contract type.
- Create an algorithm using the **C1-ODDFILEIN** algorithm type and attach it to the **Upload File Information** system event in the **Algorithms** tab of the **Installation Options — Framework** screen.

Besides this, you need to setup the following feature configurations:

- On Demand Billing (C1-ODBFC)
- Multi Parameter Based Pricing (C1\_PPARAM\_FLG)

### **Related Topics**

## CSV File Format for Banking Usage Data

Before uploading a usage data file for banking, you need to ensure that the CSV file contains the following columns:

Column Name	Description	Mandatory (Yes or No)
DATA IDENTIFIER	Used to specify the serial number of the usage record.	No
ACCOUNT ID TYPE	Used to specify the account identifier type.	Yes
ACCOUNT IDENTIFIER	Used to indicate the account to which the usage record belongs.	Yes
START DATE	Used to specify the date from when the price item was used. <b>Note:</b> You must specify the date in the YYYY-MM-DD format.	No
END DATE	Used to specify the date till when the price item was used. <b>Note:</b> You must specify the date in the YYYY-MM-DD format.	No
DIVISION	Used to specify the division to which the usage record belongs.	Yes
DESCRIPTION	Used to specify the description for the usage record. It is shown on the billable charge.	Yes
BILL LINE DESCRIPTION1, BILL LINE DESCRIPTION2, ....., BILL LINE DESCRIPTION10	Used to specify the description for the line item (charge).	Yes (Conditional) <b>Note:</b> This data is required when the charge amount is specified.
AMOUNT1, AMOUNT2, ....., AMOUNT10	Used to specify the charge amount.	Yes (Conditional) <b>Note:</b> This data is required when the bill line description or currency is specified.

Column Name	Description	Mandatory (Yes or No)
CURRENCY1, CURRENCY2, CURRENCY10 .....	Used to specify the currency in which the amount is charged.  <b>Note:</b> If you specify a currency other than the account's invoice currency, the system will do the currency conversion if the appropriate exchange rate is available in the system.	Yes (Conditional)  <b>Note:</b> This data is required when the charge amount is specified.
MEMO ONLY1, MEMO ONLY2, MEMO ONLY10 .....	Used to indicate whether the charge should be included in the bill amount or not. The valid values are: <ul style="list-style-type: none"> <li>• true</li> <li>• false</li> </ul> <b>Note:</b> By default, the value will be set to <b>false</b> if the column does not contain any value.	No
SUMMARY1, SUMMARY2, SUMMARY10 .....	Used to indicate whether the charge should be included in the summary line or not. The valid values are: <ul style="list-style-type: none"> <li>• true</li> <li>• false</li> </ul> <b>Note:</b> By default, the value will be set to <b>true</b> if the column does not contain any value.	No
SHOW ON BILL1, SHOW ON BILL2, SHOW ON BILL10 .....	Used to indicate whether the charge should appear on the person's printed bill or not. The valid values are: <ul style="list-style-type: none"> <li>• true</li> <li>• false</li> </ul> <b>Note:</b> By default, the value will be set to <b>true</b> if the column does not contain any value.	No
GL DISTRIBUTION CODE 1, GL DISTRIBUTION CODE 2, GL DISTRIBUTION CODE 10 .....	Used to specify the distribution code which indicates the GL account associated with the charge.	Yes (Conditional)  <b>Note:</b> This data is required when <b>false</b> is specified in the <b>Memo Only</b> column corresponding to the bill line description.
PRICE ITEM	Used to specify the price item code.	Yes
VARIANCE	Used to indicate the variance that must be used along with the price item for determining the price item pricing.	No

Column Name	Description	Mandatory (Yes or No)
PARAM TYPE1, PARAM TYPE2, ....., PARAM TYPE15	Used to indicate the price item parameter that must be used along with the price item for determining the price item pricing.  <b>Note:</b> If the data in these columns will be used for price item parameter mapping, you must not use the equal to (=) and tilde (~) symbols in these columns.	Yes (Conditional)  <b>Note:</b> This data is required when the parameter value is specified.
PARAM VALUE1, PARAM VALUE2, ....., PARAM VALUE15	Used to specify the parameter value.  <b>Note:</b> If the data in these columns will be used for price item parameter mapping, you must not use the equal to (=) and tilde (~) symbols in these columns.	Yes (Conditional)  <b>Note:</b> This data is required when the parameter type is specified.
SQI1, SQI2, ....., SQI10	Used to indicate the service quantity identifier that must be used for calculating the price item charges.	Yes (Conditional)  <b>Note:</b> This data is required when the service quantity is specified.
SQIVALUE1, SQIVALUE2, ....., SQIVALUE10	Used to specify the number of units of the service quantity.	Yes (Conditional)  <b>Note:</b> This data is required when the SQI is specified.
CHARTYPE1, CHARTYPE2, ....., CHARTYPE10	Used to indicate the characteristic that must be defined for the billable charge.	Yes (Conditional)  <b>Note:</b> This data is required when the characteristic value is specified.
CHARVAL1, CHARVAL2, ....., CHARVAL10	Used to specify the value of the characteristic type.	Yes (Conditional)  <b>Note:</b> This data is required when the characteristic type is specified.

**Note:**

The column names in the CSV file must be in the Upper case. Otherwise, erroneous results might occur when you upload the usage data file.

While uploading a file using a file type where business labels are defined for usage data fields, the CSV file should contain the business label in the respective column. Otherwise, the usage data file will not be uploaded in the system.

## CSV File Format for Insurance Usage Data

Before uploading a usage data file for insurance, you need to ensure that the CSV file contains the following columns:

Column Name	Description	Mandatory (Yes or No)
DATA IDENTIFIER	Used to specify the serial number of the usage record.	No

Column Name	Description	Mandatory (Yes or No)
START DATE	Used to specify the date from when the price item was used.  <b>Note:</b> You must specify the date in the YYYY-MM-DD format.	No
END DATE	Used to specify the date till when the price item was used.  <b>Note:</b> You must specify the date in the YYYY-MM-DD format.	No
CONTRACT ID	Used to specify the contract ID.	Yes
CHARGE TYPE	Used to indicate the charge type.	No
DESCRIPTION	Used to specify the description for the usage record. It is shown on the billable charge.	Yes
BILL LINE DESCRIPTION1, BILL LINE DESCRIPTION2, ....., BILL LINE DESCRIPTION10	Used to specify the description for the line item (charge).	Yes (Conditional)  <b>Note:</b> This data is required when the charge amount is specified.
AMOUNT1, AMOUNT2, ....., AMOUNT10	Used to specify the charge amount.	Yes (Conditional)  <b>Note:</b> This data is required when the bill line description or currency is specified.
CURRENCY1, CURRENCY2, ....., CURRENCY10	Used to specify the currency in which the amount is charged.  <b>Note:</b> If you specify a currency other than the account's invoice currency, the system will do the currency conversion if the appropriate exchange rate is available in the system.	Yes (Conditional)  <b>Note:</b> This data is required when the charge amount is specified.
MEMO ONLY1, MEMO ONLY2, ....., MEMO ONLY10	Used to indicate whether the charge should be included in the bill amount or not. The valid values are: <ul style="list-style-type: none"> <li>• true</li> <li>• false</li> </ul> <b>Note:</b> By default, the value will be set to <b>false</b> if the column does not contain any value.	No

Column Name	Description	Mandatory (Yes or No)
SUMMARY1, SUMMARY2, ....., SUMMARY10	Used to indicate whether the charge should be included in the summary line or not. The valid values are: <ul style="list-style-type: none"> <li>• true</li> <li>• false</li> </ul> <p><b>Note:</b> By default, the value will be set to <b>true</b> if the column does not contain any value.</p>	No
SHOW ON BILL1, SHOW ON BILL2, ....., SHOW ON BILL10	Used to indicate whether the charge should appear on the person's printed bill or not. The valid values are: <ul style="list-style-type: none"> <li>• true</li> <li>• false</li> </ul> <p><b>Note:</b> By default, the value will be set to <b>true</b> if the column does not contain any value.</p>	No
GL DISTRIBUTION CODE 1, GL DISTRIBUTION CODE 2, ....., GL DISTRIBUTION CODE 10	Used to specify the distribution code which indicates the GL account associated with the charge.	Yes (Conditional) <p><b>Note:</b> This data is required when <b>false</b> is specified in the <b>Memo Only</b> column corresponding to the bill line description.</p>
PRICE ITEM	Used to specify the price item code.	Yes
VARIANCE	Used to indicate the variance that must be used along with the price item for determining the price item pricing.	No
PARAM TYPE1, PARAM TYPE2, ....., PARAM TYPE15	Used to indicate the price item parameter that must be used along with the price item for determining the price item pricing. <p><b>Note:</b> If the data in these columns will be used for price item parameter mapping, you must not use the equal to (=) and tilde (~) symbols in these columns.</p>	Yes (Conditional) <p><b>Note:</b> This data is required when the parameter value is specified.</p>
PARAM VALUE1, PARAM VALUE2, ....., PARAM VALUE15	Used to specify the parameter value. <p><b>Note:</b> If the data in these columns will be used for price item parameter mapping, you must not use the equal to (=) and tilde (~) symbols in these columns.</p>	Yes (Conditional) <p><b>Note:</b> This data is required when the parameter type is specified.</p>
SQI1, SQI2, ....., SQI10	Used to indicate the service quantity identifier that must be used for calculating the price item charges.	Yes (Conditional) <p><b>Note:</b> This data is required when the service quantity is specified.</p>

Column Name	Description	Mandatory (Yes or No)
SQIVALUE1, SQIVALUE2, SQIVALUE10 .....,	Used to specify the number of units of the service quantity.	Yes (Conditional) <b>Note:</b> This data is required when the SQL is specified.
CHARTYPE1, CHARTYPE2, CHARTYPE10 .....,	Used to indicate the characteristic that must be defined for the billable charge.	Yes (Conditional) <b>Note:</b> This data is required when the characteristic value is specified.
CHARVAL1, CHARVAL2, CHARVAL10 .....,	Used to specify the value of the characteristic type.	Yes (Conditional) <b>Note:</b> This data is required when the characteristic type is specified.
RECURRING FLAG	Used to indicate whether recurring bill segments must be created at the intervals defined in the bill period or at the set invoice frequency.	No
BILL PERIOD	Used to indicate the bill period that you want to use for specifying the intervals at which the recurring bill segments must be created.	Yes (Conditional) <b>Note:</b> This data is required when the recurring flag is equal to Bill Period.
FREQUENCY	Used to indicate the invoice frequency at which the recurring bill segments must be created.	Yes (Conditional) <b>Note:</b> This data is required when the recurring flag is equal to Frequency.

**Note:**

The column names in the CSV file must be in the Upper case. Otherwise, erroneous results might occur when you upload the usage data file.

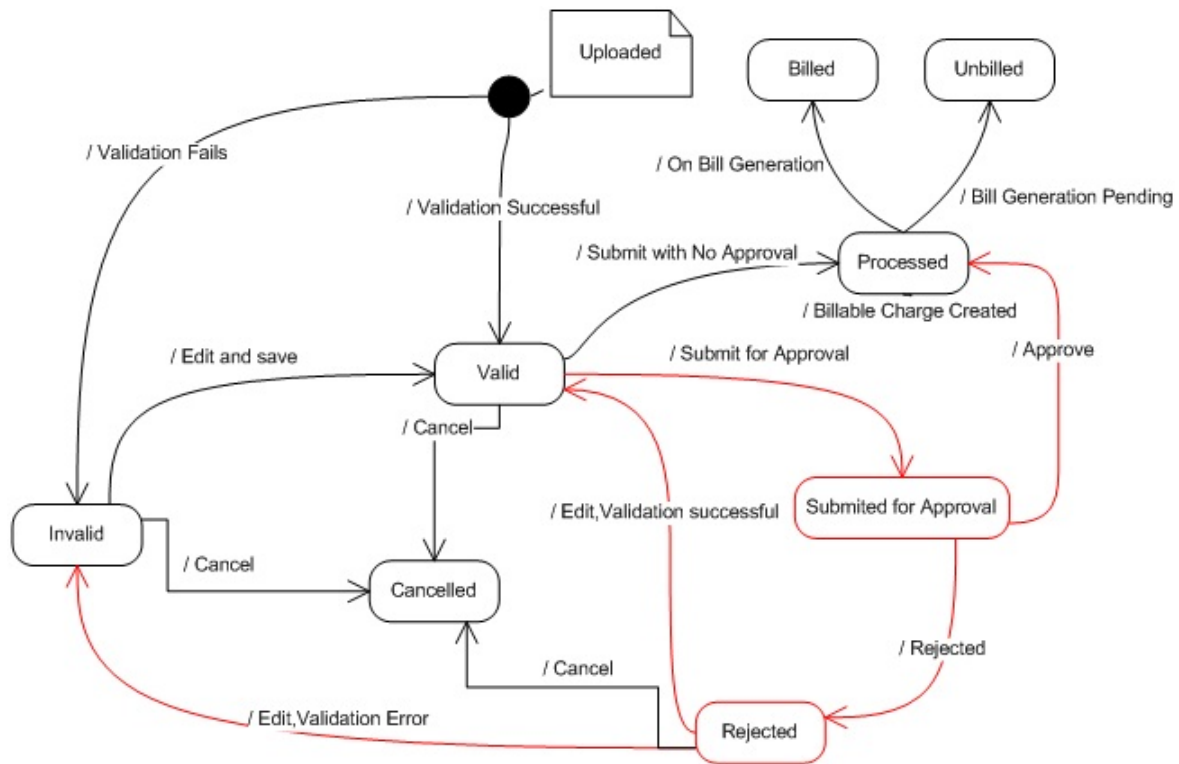

While uploading a file using a file type where business labels are defined for usage data fields, the CSV file should contain the business label in the respective column. Otherwise, the usage data file will not be uploaded in the system.

## Usage Record Status Transition

---

The following figure graphically indicates how a usage record moves from one status to another during the on demand billing process:

## File Type

Oracle Revenue Management and Billing allows you to define file types using which you can upload a usage or payment data file. It is the file type which helps the system to understand how to process the file. The feed type specified in the file type indicates the type of data that you can upload using the file type. You can upload the following types of data using a file type:

- Banking Usage Data
- Insurance Usage Data
- Payment Upload Data

The following table lists the algorithms that you need to specify while defining file types for uploading usage or payment data:

Feed Type	Algorithm	Mandatory (Yes or No)	Algorithm Type Shipped with the Product...	Algorithm Type Purpose
Payment Upload Data	Mapping algorithm	Yes	C1-CSVUPLPAY	Parses the flat file in the CSV format and maps the columns in the CSV file to various tables in the database.
Payment Upload Data	Validation algorithm	Yes	C1-PUPLVALID	Validates a payment data file.

Feed Type	Algorithm	Mandatory (Yes or No)	Algorithm Type Shipped with the Product...	Algorithm Type Purpose
Banking Usage Data	Mapping algorithm	Yes	C1-CSVPMALGO	Parses the flat file in the CSV format and maps the columns in the CSV file to an XML schema named <b>Interface</b> .
Banking Usage Data	Validation algorithm	No	C1-VLDALGO	Validates a usage data file.
Banking Usage Data	To Do algorithm	No	C1_ODBTDALGO	Initiates the approval process for usage records before creating the billable charges.
Banking Usage Data	Extract algorithm	No	C1-EXTALGO	Extracts the usage records along with the error messages (if any) in the CSV format.
Insurance Usage Data	Mapping algorithm	Yes	C1-CSVPMALGO	Parses the flat file in the CSV format and maps the columns in the CSV file to an XML schema named <b>Interface</b> .
Insurance Usage Data	Validation algorithm	No	None	-
			<b>Note:</b> You need to design custom algorithm type to validate insurance usage data.	
Insurance Usage Data	To Do algorithm	No	C1_ODBTDALGO	Initiates the approval process for usage records before creating the billable charges.
Insurance Usage Data	Extract algorithm	No	C1-EXTALGO	Extracts the usage records along with the error messages (if any) in the CSV format.

The **File Type** screen allows you to define, edit, and delete a file type. This screen consists of the following zones:

- [File Types](#) on page 986

## File Types

The **File Types** zone lists the file types that are already defined in the system. You can define, edit and delete a file type through this zone.

This zone contains the following columns:

Column Name	Column Description
File Type	Displays the file type.
Description	Displays the description of the file type.

Column Name	Column Description
Feed Type	Indicates the type of data that you can upload using the file type. The valid values are: <ul style="list-style-type: none"> <li>Banking Usage Data</li> <li>Insurance Usage Data</li> <li>Payment Upload Data</li> </ul>
Mapping Algorithm	Indicates the mapping algorithm which is triggered when you upload a file.
Validation Algorithm	Indicates the validation algorithm which is triggered once the file is uploaded in the system.
To Do Algorithm	Indicates whether the usage records must be approved before creating the billable charges. If the algorithm is attached, it means the approval is required.
Extract Algorithm	Indicates the extract algorithm which extracts the usage records along with the error messages (if any) in the CSV format.
Edit	On clicking the <b>Edit</b> (  ) icon, the <b>File Type</b> screen appears where you can edit the details of the file type. <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> You can edit the details of a file type only when no files are uploaded using the file type.</p> </div>
Delete	On clicking the <b>Delete</b> (  ) icon, you can delete the file type. <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> You can only delete a file type which is not yet used for uploading a file.</p> </div>

You can define a file type by clicking the **Add** link in the upper right corner of this zone. You can also change the layout of this zone. For more information on how to change the layout, see [Changing the Layout](#) on page 2336.

## Defining a File Type

### Prerequisites

To define a file type, you should have:

- Mapping algorithm defined using the **C1-CSVUPLPAY** or **C1-CSVPMALGO** algorithm type
- Validation algorithm defined using the **C1-PUPLVALID** or **C1-VLDALGO** algorithm type.
- Extract algorithm defined using the **C1-EXTALGO** algorithm type
- To Do algorithm defined using the **C1\_ODBDALGO** algorithm type

### Procedure

To define a file type:

1. Click the **Admin** link in the **Application** toolbar.

A list appears.

- From the **Admin** menu, select **F** and then click **File Type**.

The **File Type** screen appears.

- Click the **Add** link in the upper right corner of the **File Types** zone.

The **File Type** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
File Type	Used to specify the file type.	Yes
Description	Used to specify the description for the file type.	Yes
Feed Type	Used to indicate the type of data that you can upload using the file type. The valid values are: <ul style="list-style-type: none"> <li>• Banking Usage Data</li> <li>• Insurance Usage Data</li> <li>• Payment Upload Data</li> </ul>	Yes
Disable Move to Staging	Used to indicate whether you want to disable the <b>Move to Staging</b> functionality in the <b>Payment Upload</b> screen. <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"> <b>Note:</b> This field appears only when you select the <b>Payment Upload Data</b> option from the <b>Feed Type</b> list.         </div>	No

Field Name	Field Description	Mandatory (Yes or No)
Mapping Algorithm	<p>Used to attach a mapping algorithm which is triggered when you upload a file.</p> <p><b>Note:</b></p> <p>The <b>C1-CSVUPLPAY</b> algorithm type is designed for uploading payment data and the <b>C1-CSVPMALGO</b> algorithm type is designed for uploading usage data. The <b>C1-CSVUPLPAY</b> algorithm type does the following:</p> <ol style="list-style-type: none"> <li>1. Validates whether the file is in the CSV format</li> <li>2. Validates whether at least one payment record is available in the CSV file</li> <li>3. Parses the flat file in the CSV format and maps the columns in the CSV file to various tables in the database</li> <li>4. Uploads the payments records in the pre-staging area</li> </ol> <p>However, the <b>C1-CSVPMALGO</b> algorithm type does the following:</p> <ol style="list-style-type: none"> <li>1. Validates whether the file is in the CSV format</li> <li>2. Validates whether the CSV file contains data in the required format</li> <li>3. Validates whether the following data is available for each usage record: <ul style="list-style-type: none"> <li>• Account Identifier Type</li> <li>• Account Identifier</li> <li>• Division</li> <li>• Price Item</li> <li>• Description</li> </ul> </li> <li>4. Parses the flat file in the CSV format and maps the columns in the CSV file to an XML schema named <b>Interface</b></li> </ol> <p>The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Algorithm Search</b> window appears.</p>	Yes

Field Name	Field Description	Mandatory (Yes or No)
To Do Algorithm	<p>Used to indicate whether the usage records must be approved before creating the billable charges. If the algorithm is attached, it means the approval is required.</p> <div style="border: 1px solid black; padding: 5px; background-color: #f0f0f0;"> <p><b>Note:</b></p> <p>The <b>C1_ODBTDALGO</b> algorithm type contains the following parameters:</p> <ul style="list-style-type: none"> <li>• <b>To Do Role For Submitter</b> — Used to indicate that users with the specified To Do role can only resolve the records which are rejected by the approver.</li> <li>• <b>To Do Type For Submitter</b> — Used to indicate that a To Do using the specified To Do type must be created when the approver rejects the records.</li> <li>• <b>To Do Role For Approver</b> — Used to indicate that users with the specified To Do role can only approve the records submitted by the submitter.</li> <li>• <b>To Do Type For Approver</b> — Used to indicate that a To Do using the specified To Do type must be created when the submitter submits the valid records for approval.</li> </ul> <p>This field is disabled when you select the <b>Payment Upload Data</b> option from the <b>Feed Type</b> list.</p> <p>The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Algorithm Search</b> window appears.</p> </div>	No

Field Name	Field Description	Mandatory (Yes or No)
Validation Algorithm	<p>Used to attach a validation algorithm which is triggered once the file is uploaded in the system.</p> <p><b>Note:</b></p> <p>The <b>C1-PUPLVALID</b> algorithm type is designed for validating a payment data file. It has some pre-defined validations based on which the status of the payment record is set to <b>Valid</b>, <b>Invalid</b>, or <b>Error</b>. For more information about the pre-defined validations, see <a href="#">Upload Payment Records in the Pre-Staging Area</a> on page 1066.</p> <p>However, the <b>C1-VLDALGO</b> algorithm type is designed for validating a banking usage data file. It checks whether account identifier specified for each usage record contains any special characters. You can define any custom validations in this algorithm, if required. You cannot use an algorithm created using the <b>C1-VLDALGO</b> algorithm type to validate an insurance usage data file. If you want to validate an insurance usage data file, you need to create a custom algorithm type.</p> <p>The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Algorithm Search</b> window appears.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required when you select the <b>Payment Upload Data</b> option from the <b>Feed Type</b> list.</p>
Extract Algorithm	<p>Used to attach an extract algorithm which extracts the usage records along with the error messages (if any) in the CSV format.</p> <p><b>Note:</b> This field is disabled when you select the <b>Payment Upload Data</b> option from the <b>Feed Type</b> list.</p> <p>The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Algorithm Search</b> window appears.</p>	No

In addition, it contains the following two sections:

- **Map Divisions** — Used to indicate the divisions for which you want to use the file type.

Field Name	Field Description	Mandatory (Yes or No)
Division	<p>Used to indicate the division.</p> <p><b>Note:</b> You can only view those divisions to which you have access in the <b>Division</b> list.</p>	No

**Note:** This section does not appear when you select the **Payment Upload Data** option from the **Feed Type** list.

- **Custom Labels** — Used to specify business labels for the usage data fields. The usage data fields will change depending on whether you have selected the **Banking Usage Data** or **Insurance Usage Data** option from the **Feed Type** list.

**Note:**

This section does not appear when you select the **Payment Upload Data** option from the **Feed Type** list.

If you have defined the business label for a usage data field, the CSV file should contain business label in the respective column. Otherwise, the usage data file will not be uploaded in the system.

4. Enter the required details.

**Note:**

You can search for an algorithm by clicking the **Search** () icon corresponding to the respective field.

If you want to associate more than one division with the file type, click the **Add** () icon and then specify the details in the **Map Divisions** section. However, if you want to remove a division from the file type, click the **Delete** () icon corresponding to the division.

5. Click **Save**.

The file type is defined.

**Editing a File Type****Prerequisites**

To edit a file type, you should have:

- Mapping algorithm defined using the **C1-CSVUPLPAY** or **C1-CSVPMALGO** algorithm type
- Validation algorithm defined using the **C1-PUPLVALID** or **C1-VLDALGO** algorithm type.
- Extract algorithm defined using the **C1-EXTALGO** algorithm type
- To Do algorithm defined using the **C1\_ODBTDALGO** algorithm type

**Note:** You can edit the details of a file type only when no files are uploaded using the file type.

**Procedure**

To edit a file type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **File Type**.  
The **File Type** screen appears.
3. Click the **Edit** () icon in the **Edit** column corresponding to the file type whose details you want to edit.

The **File Type** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
File Type	Used to specify the file type.	Yes
Description	Used to specify the description for the file type.	Yes
Feed Type	Used to indicate the type of data that you can upload using the file type. The valid values are: <ul style="list-style-type: none"> <li>• Banking Usage Data</li> <li>• Insurance Usage Data</li> <li>• Payment Upload Data</li> </ul>	Yes
Disable Move to Staging	Used to indicate whether you want to disable the <b>Move to Staging</b> functionality in the <b>Payment Upload</b> screen. <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"> <b>Note:</b> This field appears only when you select the <b>Payment Upload Data</b> option from the <b>Feed Type</b> list. </div>	No

Field Name	Field Description	Mandatory (Yes or No)
Mapping Algorithm	<p>Used to attach a mapping algorithm which is triggered when you upload a file.</p> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>The <b>C1-CSVUPLPAY</b> algorithm type is designed for uploading payment data and the <b>C1-CSVPMALGO</b> algorithm type is designed for uploading usage data. The <b>C1-CSVUPLPAY</b> algorithm type does the following:</p> <ol style="list-style-type: none"> <li>1. Validates whether the file is in the CSV format</li> <li>2. Validates whether at least one payment record is available in the CSV file</li> <li>3. Parses the flat file in the CSV format and maps the columns in the CSV file to various tables in the database</li> <li>4. Uploads the payments records in the pre-staging area</li> </ol> <p>However, the <b>C1-CSVPMALGO</b> algorithm type does the following:</p> <ol style="list-style-type: none"> <li>1. Validates whether the file is in the CSV format</li> <li>2. Validates whether the CSV file contains data in the required format</li> <li>3. Validates whether the following data is available for each usage record: <ul style="list-style-type: none"> <li>• Account Identifier Type</li> <li>• Account Identifier</li> <li>• Division</li> <li>• Price Item</li> <li>• Description</li> </ul> </li> <li>4. Parses the flat file in the CSV format and maps the columns in the CSV file to an XML schema named <b>Interface</b></li> </ol> <p>The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Algorithm Search</b> window appears.</p> </div>	Yes

Field Name	Field Description	Mandatory (Yes or No)
To Do Algorithm	<p>Used to indicate whether the usage records must be approved before creating the billable charges. If the algorithm is attached, it means the approval is required.</p> <p><b>Note:</b></p> <p>The <b>C1_ODBTDALGO</b> algorithm type contains the following parameters:</p> <ul style="list-style-type: none"> <li>• <b>To Do Role For Submitter</b> — Used to indicate that users with the specified To Do role can only resolve the records which are rejected by the approver.</li> <li>• <b>To Do Type For Submitter</b> — Used to indicate that a To Do using the specified To Do type must be created when the approver rejects the records.</li> <li>• <b>To Do Role For Approver</b> — Used to indicate that users with the specified To Do role can only approve the records submitted by the submitter.</li> <li>• <b>To Do Type For Approver</b> — Used to indicate that a To Do using the specified To Do type must be created when the submitter submits the valid records for approval.</li> </ul> <p>This field is disabled when you select the <b>Payment Upload Data</b> option from the <b>Feed Type</b> list.</p> <p>The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Algorithm Search</b> window appears.</p>	No

Field Name	Field Description	Mandatory (Yes or No)
Validation Algorithm	<p>Used to attach a validation algorithm which is triggered once the file is uploaded in the system.</p> <p><b>Note:</b></p> <p>The <b>C1-PUPLVALID</b> algorithm type is designed for validating a payment data file. It has some pre-defined validations based on which the status of the payment record is set to <b>Valid</b>, <b>Invalid</b>, or <b>Error</b>. For more information about the pre-defined validations, see <a href="#">Upload Payment Records in the Pre-Staging Area</a> on page 1066.</p> <p>However, the <b>C1-VLDALGO</b> algorithm type is designed for validating a banking usage data file. It checks whether account identifier specified for each usage record contains any special characters. You can define any custom validations in this algorithm, if required. You cannot use an algorithm created using the <b>C1-VLDALGO</b> algorithm type to validate an insurance usage data file. If you want to validate an insurance usage data file, you need to create a custom algorithm type.</p> <p>The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Algorithm Search</b> window appears.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required when you select the <b>Payment Upload Data</b> option from the <b>Feed Type</b> list.</p>
Extract Algorithm	<p>Used to attach an extract algorithm which extracts the usage records along with the error messages (if any) in the CSV format.</p> <p><b>Note:</b> This field is disabled when you select the <b>Payment Upload Data</b> option from the <b>Feed Type</b> list.</p> <p>The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Algorithm Search</b> window appears.</p>	No

In addition, it contains the following two sections:

- **Map Divisions** — Used to indicate the divisions for which you want to use the file type.

Field Name	Field Description	Mandatory (Yes or No)
Division	<p>Used to indicate the division.</p> <p><b>Note:</b> You can only view those divisions to which you have access in the <b>Division</b> list.</p>	No

**Note:** This section does not appear when the feed type is set to **Payment Upload Data**.

- **Custom Labels** — Used to specify business labels for the usage data fields. The usage data fields will change depending on whether you have selected the **Banking Usage Data** or **Insurance Usage Data** option from the **Feed Type** list.

**Note:**

This section does not appear when the feed type is set to **Payment Upload Data**.

If you have defined the business label for a usage data field, the CSV file should contain business label in the respective column. Otherwise, the usage data file will not be uploaded in the system.

4. Modify the required details.

**Note:**

You can search for an algorithm by clicking the **Search**  icon corresponding to the respective field.

If you want to associate more than one division with the file type, click the **Add**  icon and then specify the details in the **Map Divisions** section. However, if you want to remove a division from the file type, click the

**Delete**  icon corresponding to the division.

5. Click **Save**.

The changes made to the file type are saved.

**Deleting a File Type****Procedure**

To delete a file type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **File Type**.  
The **File Type** screen appears.
3. Click the **Delete**  icon in the **Delete** column corresponding to the file type that you want to delete.

A message appears confirming whether you want to delete the file type.

**Note:** You can only delete a file type which is not yet used for uploading a file.

4. Click **OK**.

The file type is deleted.

## On Demand Billing

---

The **On Demand Billing** screen allows you to search for a file group based on various search criteria. Through this screen, you can:

- Define a file group
- Edit a file group
- Delete a file group
- Close a file group
- Generate adhoc bills for a file group
- Freeze and complete adhoc bills of a file group
- View all bills generated for a file group
- View usage data files of a file group
- Cancel a usage data file

This screen consists of the following zones:

- [Search](#) on page 998

### Search

The **Search** zone allows you to search for file groups for which bills are processed and/or generated in the system. This zone contains the following two sections:

- **Search Criteria** — The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
File Group	Used to specify the file group.	No
Description	Used to specify the description for the file group.	No
User ID	Used to specify the name of the user who has uploaded the usage data files in the file group.	No
Bill After Date	Used to specify the date after which the bills must be generated for the file group.	No
Status	Used to indicate the status of the file group. The valid values are: <ul style="list-style-type: none"> <li>• Closed</li> <li>• Open</li> </ul>	No

**Note:** You must specify at least one search criterion while searching for a file group.

- **Search Results** — On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
File Group	<p>Displays the name of the file group.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>File Group</b> screen appears where you can view the details of the file group.</p>
Bill After Date	Displays the date after which the bills must be generated for the file group.
Default Usage Start Date	Displays the date from when the price item was used.
Default Usage End Date	Displays the date till when the price item was used.
Status	<p>Displays the status of the file group. The valid values are:</p> <ul style="list-style-type: none"> <li>• Open</li> <li>• Close</li> </ul>
Close	<p>On clicking the <b>Close</b> (✖) icon, you can close a file group.</p> <p><b>Note:</b> You can only close a file group in which all the records of the usage data files are either in the processed or cancelled status.</p>
Generate Bill	On clicking the <b>Generate Bill</b> (📄) icon, you can generate bills for a file group.
Complete Bill	On clicking the <b>Complete Bill</b> (✅) icon, you can freeze and complete the bills of a file group.
Total	Displays the total number of records that are uploaded through the file group.
Valid	Displays the number of records which are successfully validated in the system.
Invalid	Displays the number of records which could not pass through the validation process in the system.
Submitted	Displays the number of valid records which are submitted for approval.
Processed	Displays the number of valid records for which billable charges are already created.
Rejected	Displays the number of records which are rejected by the approver.
Cancelled	Displays the number of records which are cancelled in the system.
Unbilled	Displays the number of records for which billable charges are created, but are not yet billed to the person.
Billed	Displays the number of records for which billable charges are created and billed to the person.
Bills	<p>Displays the number of bills generated for the file group.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>View Bill Data</b> screen appears where you can view all bills generated for the usage data file.</p>
Last Batch Status	<p>Indicates the batch that was last executed on the file group and its current status.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Batch Run Tree</b> screen appears where you can view the execution details of the batch.</p>

**Group Files**

The **Group Files** zone allows you to view the usage data files uploaded using a file group. This zone contains the following two sections:

- **Search Criteria** — the **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
File Name	Used to specify the name of the usage data file.	No
File Type	Used to specify the type of usage data file.	No
File Upload From Date	Used to specify the start date of the period during which the usage data file that you want to search was uploaded in the system.	No
File Upload To Date	Used to specify the end date of the period during which the usage data file that you want to search was uploaded in the system.	No

- **Search Results** — On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
File Information	Displays the name of the usage data file of the file group and its related details.
Total	Displays the total number of records that are uploaded through the usage data file.
Valid	Displays the number of records which are successfully validated in the system.
Invalid	Displays the number of records which could not pass through the validation process in the system.
Submitted	Displays the number of valid records which are submitted for approval.
Rejected	Displays the number of records which are rejected by the approver.

Column Name	Column Description
Processed	Displays the number of valid records for which billable charges are already created.
Cancelled	Displays the number of records of a usage data file which are cancelled.
UnBilled	Displays the number of records for which billable charges are created, but are not yet billed to the person.
Billed	Displays the number of records for which billable charges are created and billed to the person.
Cancel	On clicking the <b>Cancel</b> (  ) icon, you can cancel a file.

By default, the **Group Files** zone does not appear in the **On Demand Billing** screen. It appears only when you click the **Broadcast**  icon corresponding to the file group in the **Search Results** section.

**Note:** By default, the **Group Files** zone displays a list of usage data files that are uploaded using the file group in the **Search Results** section. However, you can filter the list of usage data files by specifying a search criteria in the **Search Criteria** section.

### Related Topics

## Searching for a File Group

### Procedure

To search for a file group:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Financial** and then click **On Demand Billing**.  
The **On Demand Billing** screen appears.
3. Enter the search criteria in the **Search** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

4. Click **Search**.  
A list of file groups that meet the search criteria appears in the **Search Results** section.

## Defining a File Group

### **Prerequisites**

To define a file group, you should have:

- Access to the divisions for which you want to define the file group

### **Procedure**

To define a file group:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Financial** and then click **On Demand Billing**.  
The **On Demand Billing** screen appears.
3. Click the **Add** link in the upper right corner of the **Search** zone.

The **File Group** screen appears. It contains the following fields:

<b>Field Name</b>	<b>Field Description</b>	<b>Mandatory (Yes or No)</b>
File Group	Used to specify the file group.	Yes
Description	Used to specify the description for the file group.	Yes
Bill After Date	Used to specify the date after which the bill must be generated for the file group.	Yes
Default Usage Start Date	Used to specify the date from when the price item was used. The default usage start date is used when the start date is not specified for a record in the usage data file. By default, the current date appears in this field. You can change the default usage start date, if required.  <b>Note:</b> The default usage start date cannot be later than the default usage end date.	Yes
Default Usage End Date	Used to specify the date till when the price item was used. The default usage end date is used when the end date is not specified for a record in the usage data file. By default, the current date appears in this field. You can change the default usage end date, if required.  <b>Note:</b> The default usage end date cannot be earlier than the default usage start date.	Yes

In addition, the **File Group** screen contains the following section:

**Map Divisions**— The **Map Divisions** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Division	Used to indicate the division for which you want to define the file group.	No

**Note:** If you do not associate division(s) with the file group, the file group is not available for uploading a usage data file. This means only those file groups for which you have specified division(s) can be used for uploading a usage data file.

- Enter the required details.
- If you want to define the file group for more than one division, click the **Add** (+) icon and then repeat step 5.

**Note:** However, if you want to remove a division from the file group, click the **Delete** (🗑️) icon corresponding to the division.

- Click **Save**.

The file group is defined.

## Editing a File Group

### Procedure

To edit a file group:

**Note:** You can edit the details of a file group only when no usage data files of this group have been uploaded in the system or all the records in the usage data files of a file group are cancelled.

- Click the **Menu** link in the **Application** toolbar.  
A list appears.
- Select **Financial** and then click **On Demand Billing**.  
The **On Demand Billing** screen appears.
- Search for the file group in the **On Demand Billing** screen.
- In the **Search Results** section, click the link in the **File Group** column corresponding to the file group whose details you want to edit.

The **File Group** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
File Group	Displays the file group.	Not applicable
Description	Used to specify the description for the file group.	Yes
Bill After Date	Used to specify the date after which the bill must be generated for the file group	Yes
Usage Start Date	Used to specify the date from when the price item was used. The default usage start date is used when the start date is not specified for a record in the usage data file.  <b>Note:</b> The default usage start date cannot be later than the default usage end date.	Yes
Usage End Date	Used to specify the date till when the price item was used. The default usage end date is used when the end date is not specified for a record in the usage data file.  <b>Note:</b> The default usage end date cannot be earlier than the default usage start date.	Yes

In addition, the **Add/Edit File Group** screen contains the following section:

- **Map Divisions**— The **Map Divisions** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Division	Used to indicate the division for which you want to define the file group.	No  <b>Note:</b> If you do not associate division(s) with the file group, the file group is not available for uploading a usage data file. This means only those file groups for which you have specified division(s) can be used for uploading a usage data file.

5. Modify the required details.

**Note:** If you want to define the file group for more than one division, click the **Add** () icon and then specify the details. However, if you want to remove a division from the file group, click the **Delete** () icon corresponding to it.

6. Click **Save**.

The changes made to the file group are saved.

## Deleting a File Group

### **Procedure**

To delete a file group:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. Select **Financial** and then click **On Demand Billing**.  
The **On Demand Billing** screen appears.
3. Search for the file group in the **On Demand Billing** screen.
4. In the **Search Results** section, click the link in the **File Group** column corresponding to the file group that you want to delete.  
The **File Group** screen appears.
5. Click **Delete**.  
The file group is deleted.

**Note:** The delete button appears only if the file group is not yet used. In other words, you cannot delete a file group that you have used for uploading usage data files.

### **Related Topics**

## Closing a File Group

### **Procedure**

To close a file group:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Financial** and then click **On Demand Billing**.  
The **On Demand Billing** screen appears.
3. Search for the file group in the **On Demand Billing** screen.
4. In the **Search Results** section, click the **Close** (✖) icon in the **Close** column corresponding to the file group that you want to close.

The status of the file group is changed to **Closed**.

**Note:** You can only close a file group in which all the records of the usage data files are either in the processed, cancelled, or rejected status. However, you may close a file group in which all the records are not in the cancelled and/or processed status, but in that case a to do entry is sent to the approver for approval of the pending records.

## Generating Adhoc Bills for a File Group

The **On Demand Billing** screen allows you to generate adhoc bills for a file group. However, you can generate bills only after you close the file group for which you want to generate adhoc bills.

### Procedure

To generate adhoc bills for a file group:

1. Search for the file group in the **On Demand Billing** screen.
2. In the **Search Results** section, click the **Generate Bill**  icon corresponding to the file group for which you want to generate the adhoc bills.

The **Generate Bill** window appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Cutoff Date	Used to specify the cutoff date for the bill.	Yes
Accounting Date	Used to specify the accounting date of the bill.	Yes

3. Enter the required details.
4. Click **OK**.

The adhoc bills are generated for the usage data files of a file group. An adhoc bill is generated for a usage data file and account combination when the bill after date is equal to or earlier than the current date. The status of the usage records is changed to **Billed**. If the total number of billable charges created for a usage data file exceeds the online bill creation limit, a batch job is created using the **Adhoc Billing (C1-FABL)** batch. A message appears indicating the batch job ID. This batch job creates adhoc bills for the usage data file.

**Note:**

You can change the online bill creation limit, whenever required, using the **On Demand Billing (C1-ODBFC)** feature configuration. For more information on the **Adhoc Billing (C1-FABL)** batch, see *Oracle Revenue Management and Billing Batch Execution Guide*.

If an adhoc bill with the **Pending** status already exists for a usage data file and account combination, then the existing bill is deleted and regenerated. However, you can generate the bill again for a file group only after manually deleting the bill from the **Bill** screen.

On successful completion of the **Adhoc Billing (C1-FABL)** batch, a To Do entry is created using the **C1-FABL To Do** type. You can view this To Do entry only when you are assigned a To Do role which is mapped to the **C1-FABL To Do** type. This To Do indicates whether the batch was successfully executed or not. If the batch was successfully executed, it indicates the following:

- Number of billable charges which were processed
- Number of billable charges for which the bill after date is a future date
- Number of adhoc bills generated for the usage data file
- Number of billable charges which could not be processed successfully

Once the batch is executed successfully, the status of the usage records in a usage data file of a file group is changed to **Billed**.

**Related Topics**

For more information on...	See...
How to search for a file group	<a href="#">Searching for a File Group</a> on page 1001

**Freezing All Bills of a File Group**

Oracle Revenue Management and Billing provides you with the ability to freeze and complete adhoc bills generated for the usage data files of a file group from the **On Demand Billing** screen. You can either freeze and complete all or selected adhoc bills, whenever required. However, you cannot freeze and complete normal or regular bills from the **On Demand Billing** screen.

**Procedure**

To freeze and complete all adhoc bills generated for a file group:

1. Search for the file group in the **On Demand Billing** screen.
2. In the **Search Results** section, click the **Freeze and Complete** () icon corresponding to the file group whose adhoc bills you want to freeze and complete.

The **Complete Bill** window appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Bill Date	Used to specify the date on which the bill was completed.	Yes
Accounting Date	Used to specify the accounting date of the bill.	Yes

3. Enter the required details.

- Click **OK** in the message box.

A batch job is created using the **Freeze and Complete Adhoc Bills (C1-FCADH)** batch. A message appears indicating the batch job ID. This batch job freezes and completes all adhoc bills of the usage data file which are in the **Pending** status. The system does not freeze and complete pending adhoc bills which have bill segments in the **Error** status. For more information on the **Freeze and Complete Adhoc Bills (C1-FCADH)** batch, see *Oracle Revenue Management and Billing Batch Execution Guide*.

**Note:**

On successful completion of the **Freeze and Complete Adhoc Bills (C1-FCADH)** batch, a To Do entry is created using the **C1-FCADH To Do** type. You can view this To Do entry only when you are assigned a To Do role which is mapped to the **C1-FCADH To Do** type. This To Do indicates whether the batch was successfully executed or not. If the batch was successfully executed, it indicates the following:

- Number of bills which were picked up for completion
- Number of bills which were completed
- Number of bills which could not be completed successfully

Once the batch is executed successfully, the status of the bills is changed to **Complete**.

### **Related Topics**

<b>For more information on...</b>	<b>See...</b>
How to search for a file group	<a href="#">Searching for a File Group</a> on page 1001

## **Freezing Selected Bills of a File Group**

Oracle Revenue Management and Billing provides you with the ability to freeze and complete adhoc bills generated for a file group from the **On Demand Billing** screen. You can either freeze and complete all or selected adhoc bills, whenever required. However, you cannot freeze and complete normal or regular bills from the **On Demand Billing** screen.

### **Procedure**

To freeze and complete selected adhoc bills of a file group:

- Search for the file group in the **On Demand Billing** screen.
- In the **Search Results** section, click the link in the **Bills** column corresponding to the file group whose adhoc bills you want to freeze and complete.

The **View Bill Data** screen appears.

- Select the check box corresponding to the pending adhoc bill that you want to freeze and complete.

**Note:** The check box does not appear corresponding to the completed adhoc bills and pending adhoc bills which have bill segments in the **Error** status.

- Click **Freeze/Complete**.

The **Complete Bill** window appears. It contains the following fields:

<b>Field Name</b>	<b>Field Description</b>	<b>Mandatory (Yes or No)</b>
Bill Date	Used to specify the date on which the bill was completed.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Accounting Date	Used to specify the accounting date of the bill.	Yes

- Enter the required details.
- Click **OK** in the message box.

The status of the bills is changed to **Complete**.

**Note:**

The **Freeze/Complete** button is not available in the **View Bill Data** screen when:

- All bills generated for a file group are in the **Complete** status
- Multiple bills are generated for a usage data file of a file group and one or more bill segments of each bill are in the **Error** status

In other words, the **Freeze/Complete** button is available in the **View Bill Data** screen only when there is at least one pending bill for a file group where none of the bill segments are in the **Error** status.

## Viewing All Bills Generated for a File Group

### Procedure

To view all bills generated for a file group:

- Search for the file group in the **On Demand Billing** screen.
- In the **Search Results** section, click the link in the **Bills** column corresponding to the file group whose bills you want to view.

The **View Bill Data** screen appears. It contains the following fields:

Field Name	Field Description
File Group	Displays the name of the file group.
Description	Displays the description of the file group.
Bill Generation Date	Used to specify the date when the bills were generated for the file group.
Billing Method	Indicates the type of billing used for the file group. The valid values are: <ul style="list-style-type: none"> <li>Adhoc Billing</li> </ul>
Bill Status	Used to indicate the status of the bill. The valid values are: <ul style="list-style-type: none"> <li>Pending</li> <li>Complete</li> </ul>

In addition, this screen contains the following columns:

Column Name	Column Description
Bill ID	Displays the bill ID. <b>Note:</b> It has a link. On clicking the link, the <b>Bill</b> screen appears with the details of the respective bill.
Alternate Bill ID	Displays the alternate bill ID.
Bill Status	Displays the status of the bill. The valid values are: <ul style="list-style-type: none"> <li>• Pending</li> <li>• Complete</li> </ul>
Bill Date	Displays the date when the bill was completed.
Accounting Date	Displays the accounting date for which the financial transaction of the bill is created.
Invoice Amount	Displays the total amount billed to the person.
Invoice Currency	Displays the currency in which the amount is billed to the person.
Invoice Account ID	Indicates the account for which the bill is created. <b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account.
Display Bill	On clicking this link, you can view the details of the respective bill. <b>Note:</b> This link appears only for the bills that are in the <b>Complete</b> status. The facility to view the generated bills in PDF format is available only if Oracle Documaker is integrated with Oracle Revenue Management and Billing.

**Note:**

Pagination is used to display limited number of records in the **Search Results** section. You can change the number of records displayed per page, if required. You can use the navigation buttons, such as **First** ( << ), **Previous** ( < ), **Next** ( > ), and **Last** ( >> ) to navigate between pages. You can also select the page to which you want to navigate from the **Go To** list.

3. Click **Search**.
4. View the bills generated for the usage data file in the **View Bill Data** screen.
5. If required, you can change the number of records displayed per page.

**Note:** By default, the number of records that appear in each page depends on the minimum value defined in the **PAGE\_NUMBER** lookup field. For example, if the **PAGE\_NUMBER** lookup field has four values — 10, 20, 30, and 40, then the number of records displayed in each page, by default, would be 10.

6. If required, you can click the **First** ( << ), **Previous** ( < ), **Next** ( > ), and **Last** ( >> ) buttons to navigate between pages.
7. If required, you can freeze and complete adhoc bills which are generated for the usage data file.

**Note:**

The **Freeze/Complete** button is not available in the **View Bill Data** screen when:

- All bills generated for a usage data file are in the **Complete** status
- Multiple bills are generated for a usage data file and one or more bill segments of each bill are in the **Error** status

In other words, the **Freeze/Complete** button is available in the **View Bill Data** screen only when there is at least one pending bill for a usage data file where none of the bill segments are in the **Error** status.

**Usage Data Processing**

The **Usage Data Processing** screen allows you to search for a usage data file based on various search criteria. Through this screen, you can:

- Upload a usage data file
- Cancel a usage data file

- View all records uploaded through a usage data file
- View the valid, invalid, and cancelled records of a usage data file
- View the valid records of a usage data file which are submitted for approval
- View the valid records of a usage data file for which billable charges are already created
- View the rejected, billed and unbilled records of a usage data file
- Submit the valid records of a usage data file and create billable charges for them
- Approve or reject one or more valid records of a usage data file
- Revalidate the valid and invalid records of a usage data file
- Edit the valid, invalid and rejected records of a usage data file
- Export the usage data of a usage data file into a CSV file

This screen consists of the following zones:

- [Search](#) on page 1012

## Search

The **Search** zone allows you to search for usage data files that are uploaded and/or processed in the system. This zone contains the following two sections:

- **Search Criteria** — the **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
File Name	Used to specify the name of the usage data file.	No
File Type	Used to indicate the type of usage data file.	No
File Upload From Date	Used when you want to search for usage data files that were uploaded from a particular date onwards.	No
To	Used when you want to search for usage data files that were uploaded till a particular date.	No
User ID	Used to specify the name of the user who has uploaded the usage data file.	No
Billing Method	Used to specify the type of billing used for the usage data file. The valid values are: <ul style="list-style-type: none"> <li>• Adhoc Billing</li> <li>• Regular Billing</li> </ul>	No
File Group	Used to specify the file group of the usage data file.	No

**Note:** You must specify at least one search criterion while searching for a usage data file.

- **Search Results** — On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
File Information	Displays the name of the usage data file and its related details.

Column Name	Column Description
Revalidate	<p>On clicking the <b>Revalidate</b> () icon, you can execute the validation process once again on the valid, invalid, and rejected records.</p> <p><b>Note:</b> The <b>Revalidate</b> icon appears only when the usage records are in the <b>Valid</b>, <b>Invalid</b>, and/or <b>Rejected</b> status. In other words, you cannot revalidate a usage data file for which billable charges are created or when the bills are generated for a usage data file.</p>
Cancel	<p>On clicking the <b>Cancel</b> () icon, you can cancel all valid, invalid, and rejected records of the usage data file.</p> <p><b>Note:</b> The <b>Cancel</b> icon appears only when the usage records are in the <b>Valid</b>, <b>Invalid</b>, and/or <b>Rejected</b> status. In other words, you cannot cancel a usage data file for which billable charges are created or when the bills are generated for a usage data file.</p>
Submit	<p>On clicking the <b>Submit</b> () icon, you can submit the valid records and create billable charges for them. If the valid usage records need to be approved before creating the billable charges, a To Do entry is created for the approver to approve the valid records.</p> <p><b>Note:</b> The <b>Submit</b> icon appears only when all the records of a usage data file are in the <b>Valid</b> status. In other words, if a usage data file contains records in the <b>Invalid</b> status, you cannot create billable charges for a usage data file.</p>
Approve	<p>On clicking the <b>Approve</b> () icon, the approver can approve all valid records of the usage data file.</p> <p><b>Note:</b> The <b>Approve</b> icon appears only when the usage data file (with all usage records in the <b>Valid</b> status) is uploaded using a file type to which the To Do algorithm (for enabling approval workflow) is attached.</p>
Total	<p>Displays the total number of records that are uploaded through the usage data file.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Usage Data</b> screen appears where you can view all records uploaded through the usage data file.</p>
Valid	<p>Displays the number of records which are successfully validated in the system.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Usage Data</b> screen appears where you can view and edit all valid records of the usage data file.</p>
Invalid	<p>Displays the number of records which could not pass through the validation process in the system.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Usage Data</b> screen appears where you can view and edit all invalid records of the usage data file.</p>

Column Name	Column Description
Submitted	Displays the number of valid records which are submitted for approval. <b>Note:</b> It has a link. On clicking the link, the <b>Usage Data</b> screen appears where you can view all submitted records of the usage data file.
Rejected	Displays the number of records which are rejected by the approver. <b>Note:</b> It has a link. On clicking the link, the <b>Usage Data</b> screen appears where you can view and edit all rejected records of the usage data file.
Processed	Displays the number of valid records for which billable charges are already created. <b>Note:</b> It has a link. On clicking the link, the <b>Usage Data</b> screen appears where you can view all processed records of the usage data file.
Billed	Displays the number of records for which billable charges are created and billed to the person. <b>Note:</b> It has a link. On clicking the link, the <b>Usage Data</b> screen appears where you can view all billed records of the usage data file.
Unbilled	Displays the number of records for which billable charges are created, but are not yet billed to the person. <b>Note:</b> It has a link. On clicking the link, the <b>Usage Data</b> screen appears where you can view all unbilled records of the usage data file.
Cancelled	Displays the number of records which are cancelled in the system. <b>Note:</b> It has a link. On clicking the link, the <b>Usage Data</b> screen appears where you can view all cancelled records of the usage data file.
Batch Run Status	Indicates the batch that was last executed on the usage data file and its current status. <b>Note:</b> It has a link. On clicking the link, the <b>Batch Run Tree</b> screen appears where you can view the execution details of the batch.

You can upload a usage data file by clicking the **Upload** link in the upper right corner of this zone.

## Searching for a Usage Data File

### Procedure

To search for a usage data file:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Financial** and then click **Usage Data Processing**.  
The **Usage Data Processing** screen appears.
3. Enter the search criteria in the **Search** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

4. Click **Search**.  
A list of usage data files that meet the search criteria appears in the **Search Results** section.

## Uploading a Usage Data File

### Prerequisites

To upload a usage data file, you should have:

- File types defined in the application
- Usage data in the required CSV file format
- File group using which you want to upload the usage data files is in **Open** status

### Procedure

To upload a usage data file:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Financial** and then click **Usage Data Processing**.  
The **Usage Data Processing** screen appears.
3. Click the **Upload** link in the upper right corner of the **Search** zone.

The **Upload Usage Data File** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Billing Method	Used to specify the type of billing you want to use for the usage data file. The valid values are: <ul style="list-style-type: none"> <li>• Adhoc Billing</li> <li>• Regular Billing</li> </ul>	Yes
File Group	Used to specify the file group to which you want to add the usage data file.  <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This field appears only when you select the <b>Adhoc Billing</b> option from the <b>File Group</b> list. You can only view those file groups that are in the open status and to which you have access in the <b>File Group</b> list.</p> </div>	Yes (Conditional)  <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> If you select the billing method as <b>Adhoc Billing</b>, you have to specify the file group to which you want to add the usage data file.</p> </div>
Bill After Date	Used to specify the date after which the bills must be generated for the usage data file. By default, the current date appears in this field.  <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> If you have selected the billing method as <b>Adhoc Billing</b>, this field appears in read-only mode and displays the bill after date as defined for the selected file group. If you have selected the billing method as <b>Regular Billing</b> then this field is enabled displaying the current date.</p> </div>	Yes (Conditional)  <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> If you select the billing method as <b>Regular Billing</b>, you have to specify the bill after date.</p> </div>

Field Name	Field Description	Mandatory (Yes or No)
Default Usage Start Date	<p>Used to specify the date from when the price item was used. The default usage start date is used when the start date is not specified for a record in the usage data file. By default, the current date appears in this field. You can change the default usage start date, if required.</p> <p><b>Note:</b> If you have selected the billing method as <b>Adhoc Billing</b>, this field appears in read-only mode and displays the default usage start date as defined for the selected file group. If you have selected the billing method as <b>Regular Billing</b> then this field is enabled displaying the current date. The default usage start date cannot be later than the default usage end date.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> If you select the billing method as <b>Regular Billing</b>, you have to specify the default usage start date.</p>
Default Usage End Date	<p>Used to specify the date till when the price item was used. The default usage end date is used when the end date is not specified for a record in the usage data file. By default, the current date appears in this field. You can change the default usage end date, if required.</p> <p><b>Note:</b> If you have selected the billing method as <b>Adhoc Billing</b>, this field appears in read-only mode and displays the default usage end date as defined for the selected file group. If you have selected the billing method as <b>Regular Billing</b> then this field is enabled displaying the current date. The default usage end date cannot be earlier than the default usage start date.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> If you select the billing method as <b>Regular Billing</b>, you have to specify the default usage end date.</p>
File Type	Used to specify the type of usage data file.	Yes
Replace Existing File	Used to indicate whether you want to replace any existing file in the system. You must select this check box when you want to upload the same file once again.	No
File Name	<p>Used to specify the name and path of the usage data file that you want to upload.</p> <p><b>Note:</b> You can also click the <b>Browse</b> button corresponding to this field to browse to the location where the usage data file is available in the system.</p>	Yes

4. Enter the required details.
5. Click the **Browse** button corresponding to the **File Name** field.  
The **Choose File to Upload** dialog box appears.
6. Browse to the location where the usage data file that you want to upload is available.
7. Click **Open**.  
The usage data file name and path appears in the **File Name** field.
8. Click **Upload**.

A message appears indicating that the usage data file has been uploaded successfully. If an error occurs while parsing, the usage data file is not uploaded in the system.

**Note:**

The validation process starts immediately after the file is uploaded in the system. If a usage record is successfully validated, the status of the usage record is changed to **Valid**. And, if a usage record could not pass through the validation process, the status of the usage record is changed to **Invalid**. You can view the details of the uploaded file and its records in the **Usage Data Processing** screen.

If the usage data file size exceeds the file size limit set in the **C1-ODBFC** feature configuration, a batch job is created using the **Upload and Validate Usage Data File (C1-ODFU)** batch. A message appears indicating the batch job ID. This batch job uploads and validates the usage data file. You can change the file size limit using the **On Demand Billing (C1-ODBFC)** feature configuration. For more information on the **Upload and Validate Usage Data File (C1-ODFU)** batch, see *Oracle Revenue Management and Billing Batch Execution Guide*.

The number of usage records that are parsed and mapped in an XML file depends on the value defined for the **Staging XML Size** option type in the **On Demand Billing (C1-ODBFC)** feature configuration. For example, if the **Staging XML Size** option type is set to 100 and a usage data file contains 500 records, then the system creates 5 XML files — each containing 100 records.

If a batch job is created automatically, the number of usage records that are validated in each work unit depends on the value defined for the **Validation Chunk Size** option type in the **On Demand Billing (C1-ODBFC)** feature configuration.

On successful completion of the **Upload and Validate Usage Data File (C1-ODFU)** batch, a To Do entry is created using the **C1-ODFU To Do** type. You can view this To Do entry only when you are assigned a To Do role which is mapped to the **C1-ODFU To Do** type. This To Do indicates whether the batch was successfully executed or not. If the batch was successfully executed, it indicates the following:

- Number of records that were uploaded in the system
- Number of records which were successfully validated
- Number of records which could not pass through the validation process
- Number of records which failed to validate due to some technical reasons

9. Click **OK** in the message box.

Once a usage record is successfully validated, the status of the usage record is changed to **Valid**. And, if a usage record could not pass through the validation process, the status of the usage record is changed to **Invalid**.

**Replacing an Existing File****Prerequisites**

To replace an existing usage data file, you should have:

- File types defined in the application
- Usage data in the required CSV file format

- File group using which you want to upload the usage data files is in **Open** status

### Procedure

To replace an existing usage data file:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. Select **Financial** and then click **Usage Data Processing**.

The **Usage Data Processing** screen appears.

3. Click the **Upload** link in the upper right corner of the **Search** zone.

The **Upload Usage Data File** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Billing Method	Used to specify the type of billing you want to use for the usage data file. The valid values are: <ul style="list-style-type: none"> <li>• Adhoc Billing</li> <li>• Regular Billing</li> </ul>	Yes
File Group	Used to specify the file group to which you want to add the usage data file.  <b>Note:</b> This field appears only when you select the <b>Adhoc Billing</b> option from the <b>File Group</b> list. You can only view those file groups that are in the open status and to which you have access in the <b>File Group</b> list.	Yes (Conditional)  <b>Note:</b> If you select the billing method as <b>Adhoc Billing</b> , you have to specify the file group to which you want to add the usage data file.
Bill After Date	Used to specify the date after which the bills must be generated for the usage data file. By default, the current date appears in this field.  <b>Note:</b> If you have selected the billing method as <b>Adhoc Billing</b> , this field appears in read-only mode and displays the bill after date as defined for the selected file group. If you have selected the billing method as <b>Regular Billing</b> then this field is enabled displaying the current date.	Yes (Conditional)  <b>Note:</b> If you select the billing method as <b>Regular Billing</b> , you have to specify the bill after date.
Default Usage Start Date	Used to specify the date from when the price item was used. The default usage start date is used when the start date is not specified for a record in the usage data file. By default, the current date appears in this field. You can change the default usage start date, if required.  <b>Note:</b> If you have selected the billing method as <b>Adhoc Billing</b> , this field appears in read-only mode and displays the default usage start date as defined for the selected file group. If you have selected the billing method as <b>Regular Billing</b> then this field is enabled displaying the current date. The default usage start date cannot be later than the default usage end date.	Yes (Conditional)  <b>Note:</b> If you select the billing method as <b>Regular Billing</b> , you have to specify the default usage start date.

Field Name	Field Description	Mandatory (Yes or No)
Default Usage End Date	Used to specify the date till when the price item was used. The default usage end date is used when the end date is not specified for a record in the usage data file. By default, the current date appears in this field. You can change the default usage end date, if required.  <b>Note:</b> If you have selected the billing method as <b>Adhoc Billing</b> , this field appears in read-only mode and displays the default usage end date as defined for the selected file group. If you have selected the billing method as <b>Regular Billing</b> then this field is enabled displaying the current date. The default usage end date cannot be earlier than the default usage start date.	Yes (Conditional)  <b>Note:</b> If you select the billing method as <b>Regular Billing</b> , you have to specify the default usage end date.
File Type	Used to specify the type of usage data file.	Yes
Replace Existing File	Used to indicate that you want to replace any existing file in the system.	Yes
File Name	Used to specify the name and path of the usage data file that you want to upload.  <b>Note:</b> You can also click the <b>Browse</b> button corresponding to this field to browse to the location where the usage data file is available in the system.	Yes

- Select the **Replace Existing File** check box.

**Note:** You can replace an existing file only when the usage records of a usage data file are in any of the statuses:

- **Valid** and/or **Invalid**
- **Rejected**
- **Cancelled**

In other words, you cannot replace a file when the billable charges are already created for the usage records of a usage data file, or are pending for approval with the approver.

- Click the **Browse** button corresponding to the **File Name** field.

The **Choose File to Upload** dialog box appears.

- Browse to the location where the usage data file that you want to replace is available.
- Click **Open**.

The usage data file name and path appears in the **File Name** field.

- Click **Upload**.

A message appears indicating that the usage data file has been uploaded successfully. If an error occurs while parsing, the usage data file is not uploaded in the system.

**Note:**

The validation process starts immediately after the file is uploaded in the system. If a usage record is successfully validated, the status of the usage record is changed to **Valid**. And, if a usage record could not pass through the validation process, the status of the usage record is changed to **Invalid**. You can view the details of the uploaded file and its records in the **Usage Data Processing** screen.

If the usage data file size exceeds the file size limit set in the **C1-ODBFC** feature configuration, a batch job is created using the **Upload and Validate Usage Data File (C1-ODFU)** batch. A message appears indicating the batch job ID. This batch job uploads and validates the usage data file. You can change the file size limit using the **On Demand Billing (C1-ODBFC)** feature configuration. For more information on the **Upload and Validate Usage Data File (C1-ODFU)** batch, see *Oracle Revenue Management and Billing Batch Execution Guide*.

The number of usage records that are parsed and mapped in an XML file depends on the value defined for the **Staging XML Size** option type in the **On Demand Billing (C1-ODBFC)** feature configuration. For example, if the **Staging XML Size** option type is set to 100 and a usage data file contains 500 records, then the system creates 5 XML files — each containing 100 records.

If a batch job is created automatically, the number of usage records that are validated in each work unit depends on the value defined for the **Validation Chunk Size** option type in the **On Demand Billing (C1-ODBFC)** feature configuration.

On successful completion of the **Upload and Validate Usage Data File (C1-ODFU)** batch, a To Do entry is created using the **C1-ODFU To Do** type. You can view this To Do entry only when you are assigned a To Do role which is mapped to the **C1-ODFU To Do** type. This To Do indicates whether the batch was successfully executed or not. If the batch was successfully executed, it indicates the following:

- Number of records that were uploaded in the system
- Number of records which were successfully validated
- Number of records which could not pass through the validation process
- Number of records which failed to validate due to some technical reasons

9. Click **OK** in the message box.

Once a usage record is successfully validated, the status of the usage record is changed to **Valid**. And, if a usage record could not pass through the validation process, the status of the usage record is changed to **Invalid**.

**Viewing All Records of a Usage Data File****Procedure**

To view all records of a usage data file:

1. Search for the usage data file in the **Usage Data Processing** screen.
2. In the **Search Results** section, click the link in the **Total** column corresponding to the usage data file whose records you want to view.

The **Usage Data** screen appears. It contains the following two sections:

- **Search Criteria** — This section allows you to filter the usage records based on the various search criteria. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
File Name	Displays the name of the usage data file.	Not applicable
File Type	Indicates the type of the usage data file.	Not applicable
Default Usage Start Date	Displays the usage start date entered while uploading the usage data file.	Not applicable
Default Usage End Date	Displays the usage end date entered while uploading the usage data file.	Not applicable
Usage Record Status	Used to specify the status of the usage record. The valid values are: <ul style="list-style-type: none"> <li>• Valid</li> <li>• Invalid</li> <li>• Submitted for Approval</li> <li>• Processed</li> <li>• Rejected</li> <li>• Cancelled</li> </ul>	No
Division	Used to specify the division to which the usage record belongs.	No
Account Identifier Type	Used to specify the identifier type based on which you want to search for the usage records.	Yes (Conditional) <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"> <b>Note:</b> If you enter the account identifier as a search criteria, you have to enter the account identifier type. </div>
Account Identifier	Used to indicate the account whose usage records you want to view.	Yes (Conditional) <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"> <b>Note:</b> If you enter the account identifier type as a search criteria, you have to enter the account identifier. </div>

- **Search Results** — By default, all records of the usage data file are listed in the **Search Results** section. You can filter the search results based on the specified criteria. the **Search Results** section contains the following columns:

Column Name	Column Description
BILLABLE CHARGE ID	Indicates the billable charge which is generated for the usage record. <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"> <b>Note:</b> This column appears only for the valid records for which billable charges have been created. </div>
ACCOUNT ID TYPE	Indicates the account identifier type.

Column Name	Column Description
ACCOUNT IDENTIFIER	Indicates the account to which the usage record belongs.
ACCOUNT INFORMATION	Displays information about the account.
DIVISION	Indicates the division to which the usage record belongs.
CONTRACT ID	Displays the contract ID. <b>Note:</b> This column appears only if usage data files are uploaded for the insurance module.
CHARGE TYPE	Indicates the charge type. <b>Note:</b> This column appears only if usage data files are uploaded for the insurance module.
START DATE	Displays the date from when the price item was used. <b>Note:</b> If the start date is not available, the default usage start date appears in this column.
END DATE	Displays the date till when the price item was used. <b>Note:</b> If the end date is not available, the default usage end date appears in this column.
DESCRIPTION	Displays the description of the usage record. It is shown on the billable charge.
PRICE ITEM	Displays the price item code.
VARIANCE	Indicates the variance that must be used along with the price item for determining the price item pricing. <b>Note:</b> This column appears only when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>False</b> .
PARAM TYPE1, PARAM TYPE2, ....., PARAM TYPE15	Indicates the price item parameter that must be used along with the price item for determining the price item pricing. <b>Note:</b> These columns appear only when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>True</b> .
PARAM VALUE1, PARAM VALUE2, ....., PARAM VALUE15	Displays the value of the price item parameter. <b>Note:</b> These columns appear only when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>True</b> .
SQI1, SQI2, ....., SQI10	Indicates the service quantity identifier that must be used for calculating the price item charges.

Column Name	Column Description
SQIVALUE1, SQIVALUE2, ....., SQIVALUE10	Displays the number of units of the service quantity.
BILL LINE DESCRIPTION1, BILL LINE DESCRIPTION2, ....., BILL LINE DESCRIPTION10	Displays the description of the line item (charge).
AMOUNT1, AMOUNT2, ....., AMOUNT10	Displays the charge amount.
CURRENCY1, CURRENCY2, ....., CURRENCY10	Displays the currency in which the amount is charged.
MEMO ONLY1, MEMO ONLY2, ....., MEMO ONLY10	Indicates whether the charge should be included in the bill amount or not.
SUMMARY1, SUMMARY2, ....., SUMMARY10	Indicates whether the charge should be included in the summary line or not.
SHOW ON BILL1, SHOW ON BILL2, ....., SHOW ON BILL10	Indicates whether the charge should appear on the person's printed bill or not.
GL DISTRIBUTION CODE 1, GL DISTRIBUTION CODE 2, ....., GL DISTRIBUTION CODE 10	Displays the distribution code which indicates the GL account associated with the charge.
CHARTYPE1, CHARTYPE2, ....., CHARTYPE10	Indicates the characteristic that must be defined for the billable charge.
CHARVAL1, CHARVAL2, ....., CHARVAL10	Displays the value of the characteristic type.

**Note:**

If you have defined business labels for usage data fields, the columns will appear with the business labels defined for the respective column.

Only those columns that contain data in the CSV file appear in the **Usage Data** screen. For example, if information about characteristics is provided in the CHARTYPE4 and CHARVAL4 columns of the CSV file, then only the CHARTYPE4 and CHARVAL4 columns appear in the **Usage Data** screen. Similarly, if information about the line item (charge) is provided in the BILL LINE DESCRIPTION6, AMOUNT6, CURRENCY6, MEMO ONLY6, SUMMARY6, SHOW ON BILL6, and GL DISTRIBUTION CODE 6 columns of the CSV file, then only the BILL LINE DESCRIPTION6, AMOUNT6, CURRENCY6, MEMO ONLY6, SUMMARY6, SHOW ON BILL6, AND GL DISTRIBUTION CODE 6 columns appear in the **Usage Data** screen.

**Note:**

Pagination is used to display limited number of records in the **Search Results** section. You can change the number of records displayed per page, if required. You can use the navigation buttons, such as **First** ( <<< ), **Previous** ( < ), **Next** ( > ), and **Last** ( >>> ) to navigate between pages. You can also select the page to which you want to navigate from the **Go To** list.

**Note:** You can download details of all the records of a usage data file in a CSV file format using the **Export TO Excel** link provided in the **Search** section.

3. View the records of the usage data file in the **Usage Data** screen.
4. If required, you can change the number of records displayed per page.

**Note:** By default, the number of records that appear in each page depends on the minimum value defined in the **PAGE\_NUMBER** lookup field. For example, if the **PAGE\_NUMBER** lookup field has four values — 10, 20, 30, and 40, then the number of records displayed in each page, by default, would be 10.

5. If required, you can click the **First** ( <<< ), **Previous** ( < ), **Next** ( > ), and **Last** ( >>> ) buttons to navigate between pages.
6. If required, you can filter the usage records in the **Usage Data** screen.
7. If required, you can click the **Export TO Excel** link to download details of all the records of a usage data file in a CSV file format.

**Related Topics**

For more information on...	See...
How to search for a usage data file	<a href="#">Searching for a Usage Data File</a> on page 1015
How to filter the usage records	<a href="#">Filtering Usage Records</a> on page 1062

**Viewing Valid Records of a Usage Data File****Procedure**

To view valid records of a usage data file:

1. Search for the usage data file in the **Usage Data Processing** screen.
2. In the **Search Results** section, click the link in the **Valid** column corresponding to the usage data file whose valid records you want to view.

The **Usage Data** screen appears. It contains the following two sections:

- **Search Criteria** — This section allows you to filter the valid records based on the various search criteria. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
File Name	Displays the name of the usage data file.	Not applicable
File Type	Indicates the type of the usage data file.	Not applicable
Default Usage Start Date	Displays the usage start date entered while uploading the usage data file.	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
Default Usage End Date	Displays the usage end date entered while uploading the usage data file.	Not applicable
Status	Indicates that all valid records are displayed in the <b>Usage Data</b> screen.	Not applicable
Division	Used to specify the division to which the valid record belongs.	No
Account Identifier Type	Used to specify the identifier type based on which you want to search for the valid records.	Yes (Conditional) <b>Note:</b> If you enter the account identifier as a search criteria, you have to enter the account identifier type.
Account Identifier	Used to indicate the account whose valid records you want to view.	Yes (Conditional) <b>Note:</b> If you enter the account identifier type as a search criteria, you have to enter the account identifier.

- **Search Results** — By default, all valid records of the usage data file are listed in the **Search Results** section. You can filter the search results based on the specified criteria. the **Search Results** section contains the following columns:

Column Name	Column Description
ACCOUNT ID TYPE	Indicates the account identifier type.
ACCOUNT IDENTIFIER	Indicates the account to which the usage record belongs.
ACCOUNT INFORMATION	Displays information about the account.
DIVISION	Indicates the division to which the usage record belongs.
CONTRACT ID	Displays the contract ID. <b>Note:</b> This column appears only if usage data files are uploaded for the insurance module.
CHARGE TYPE	Indicates the charge type. <b>Note:</b> This column appears only if usage data files are uploaded for the insurance module.
START DATE	Displays the date from when the price item was used. <b>Note:</b> If the start date is not available, the default usage start date appears in this column.

Column Name	Column Description
END DATE	Displays the date till when the price item was used.  <b>Note:</b> If the end date is not available, the default usage end date appears in this column.
DESCRIPTION	Displays the description of the usage record. It is shown on the billable charge.
PRICE ITEM	Displays the price item code.
VARIANCE	Indicates the variance that must be used along with the price item for determining the price item pricing.  <b>Note:</b> This column appears only when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>False</b> .
PARAM TYPE1, PARAM TYPE2, ....., PARAM TYPE15	Indicates the price item parameter that must be used along with the price item for determining the price item pricing.  <b>Note:</b> These columns appear only when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>True</b> .
PARAM VALUE1, PARAM VALUE2, ....., PARAM VALUE15	Displays the value of the price item parameter.  <b>Note:</b> These columns appear only when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>True</b> .
SQI1, SQI2, ....., SQI10	Indicates the service quantity identifier that must be used for calculating the price item charges.
SQIVALUE1, SQIVALUE2, ....., SQIVALUE10	Displays the number of units of the service quantity.
BILL LINE DESCRIPTION1, BILL LINE DESCRIPTION2, ....., BILL LINE DESCRIPTION10	Displays the description of the line item (charge).
AMOUNT1, AMOUNT2, ....., AMOUNT10	Displays the charge amount.
CURRENCY1, CURRENCY2, ....., CURRENCY10	Displays the currency in which the amount is charged.
MEMO ONLY1, MEMO ONLY2, ....., MEMO ONLY10	Indicates whether the charge should be included in the bill amount or not.

Column Name	Column Description
SUMMARY1, SUMMARY2, ....., SUMMARY10	Indicates whether the charge should be included in the summary line or not.
SHOW ON BILL1, SHOW ON BILL2, ....., SHOW ON BILL10	Indicates whether the charge should appear on the person's printed bill or not.
GL DISTRIBUTION CODE 1, GL DISTRIBUTION CODE 2, ....., GL DISTRIBUTION CODE 10	Displays the distribution code which indicates the GL account associated with the charge.
CHARTYPE1, CHARTYPE2, ....., CHARTYPE10	Indicates the characteristic that must be defined for the billable charge.
CHARVAL1, CHARVAL2, ....., CHARVAL10	Displays the value of the characteristic type.

**Note:**

If you have defined business labels for usage data fields, the columns will appear with the business labels defined for the respective column.

Only those columns that contain data in the CSV file appear in the **Usage Data** screen. For example, if information about characteristics is provided in the CHARTYPE4 and CHARVAL4 columns of the CSV file, then only the CHARTYPE4 and CHARVAL4 columns appear in the **Usage Data** screen. Similarly, if information about the line item (charge) is provided in the BILL LINE DESCRIPTION6, AMOUNT6, CURRENCY6, MEMO ONLY6, SUMMARY6, SHOW ON BILL6, and GL DISTRIBUTION CODE 6 columns of the CSV file, then only the BILL LINE DESCRIPTION6, AMOUNT6, CURRENCY6, MEMO ONLY6, SUMMARY6, SHOW ON BILL6, AND GL DISTRIBUTION CODE 6 columns appear in the **Usage Data** screen.

**Note:**

Pagination is used to display limited number of records in the **Search Results** section. You can change the number of records displayed per page, if required. You can use the navigation buttons, such as **First** ( <<< ), **Previous** ( < ), **Next** ( > ), and **Last** ( >>> ) to navigate between pages. You can also select the page to which you want to navigate from the **Go To** list.

3. View the valid records of the usage data file in the **Usage Data** screen.
4. If required, you can change the number of records displayed per page.

**Note:** By default, the number of records that appear in each page depends on the minimum value defined in the **PAGE\_NUMBER** lookup field. For example, if the **PAGE\_NUMBER** lookup field has four values — 10, 20, 30, and 40, then the number of records displayed in each page, by default, would be 10.

5. If required, you can click the **First** ( <<< ), **Previous** ( < ), **Next** ( > ), and **Last** ( >>> ) buttons to navigate between pages.
6. If required, you can filter the valid records in the **Usage Data** screen.

## Viewing Invalid Records of a Usage Data File

### Procedure

To view invalid records of a usage data file:

1. Search for the usage data file in the **Usage Data Processing** screen.
2. In the **Search Results** section, click the link in the **Invalid** column corresponding to the usage data file whose invalid records you want to view.

The **Usage Data** screen appears. It contains the following two sections:

- **Search Criteria** — This section allows you to filter the invalid records based on the various search criteria. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
File Name	Displays the name of the usage data file.	Not applicable
File Type	Indicates the type of the usage data file.	Not applicable
Default Usage Start Date	Displays the usage start date entered while uploading the usage data file.	Not applicable
Default Usage End Date	Displays the usage end date entered while uploading the usage data file.	Not applicable
Status	Indicates that all invalid records are displayed in the <b>Usage Data</b> screen.	Not applicable
Division	Used to specify the division to which the invalid record belongs.	No
Account Identifier Type	Used to specify the identifier type based on which you want to search for the invalid records.	Yes (Conditional) <b>Note:</b> If you enter the account identifier as a search criteria, you have to enter the account identifier type.
Account Identifier	Used to indicate the account whose invalid records you want to view.	Yes (Conditional) <b>Note:</b> If you enter the account identifier type as a search criteria, you have to enter the account identifier.

- **Search Results** — By default, all invalid records of the usage data file are listed in the **Search Results** section. You can filter the search results based on the specified criteria. the **Search Results** section contains the following columns:

Column Name	Column Description
ACCOUNT ID TYPE	Indicates the account identifier type.
ACCOUNT IDENTIFIER	Indicates the account to which the usage record belongs.
ACCOUNT INFORMATION	Displays information about the account.
DIVISION	Indicates the division to which the usage record belongs.
CONTRACT ID	Displays the contract ID. <b>Note:</b> This column appears only if usage data files are uploaded for the insurance module.
CHARGE TYPE	Indicates the charge type. <b>Note:</b> This column appears only if usage data files are uploaded for the insurance module.
START DATE	Displays the date from when the price item was used. <b>Note:</b> If the start date is not available, the default usage start date appears in this column.
END DATE	Displays the date till when the price item was used. <b>Note:</b> If the end date is not available, the default usage end date appears in this column.
DESCRIPTION	Displays the description of the usage record. It is shown on the billable charge.
PRICE ITEM	Displays the price item code.
VARIANCE	Indicates the variance that must be used along with the price item for determining the price item pricing. <b>Note:</b> This column appears only when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>False</b> .
PARAM TYPE1, PARAM TYPE2, ....., PARAM TYPE15	Indicates the price item parameter that must be used along with the price item for determining the price item pricing. <b>Note:</b> These columns appear only when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>True</b> .
PARAM VALUE1, PARAM VALUE2, ....., PARAM VALUE15	Displays the value of the price item parameter. <b>Note:</b> These columns appear only when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>True</b> .
SQI1, SQI2, ....., SQI10	Indicates the service quantity identifier that must be used for calculating the price item charges.

Column Name	Column Description
SQIVALUE1, SQIVALUE2, ..... SQIVALUE10	Displays the number of units of the service quantity.
BILL LINE DESCRIPTION1, BILL LINE DESCRIPTION2, ..... BILL LINE DESCRIPTION10	Displays the description of the line item (charge).
AMOUNT1, AMOUNT2, ..... AMOUNT10	Displays the charge amount.
CURRENCY1, CURRENCY2, ..... CURRENCY10	Displays the currency in which the amount is charged.
MEMO ONLY1, MEMO ONLY2, ..... MEMO ONLY10	Indicates whether the charge should be included in the bill amount or not.
SUMMARY1, SUMMARY2, ..... SUMMARY10	Indicates whether the charge should be included in the summary line or not.
SHOW ON BILL1, SHOW ON BILL2, ..... SHOW ON BILL10	Indicates whether the charge should appear on the person's printed bill or not.
GL DISTRIBUTION CODE 1, GL DISTRIBUTION CODE 2, ....., GL DISTRIBUTION CODE 10	Displays the distribution code which indicates the GL account associated with the charge.
CHARTYPE1, CHARTYPE2, ..... CHARTYPE10	Indicates the characteristic that must be defined for the billable charge.
CHARVAL1, CHARVAL2, ..... CHARVAL10	Displays the value of the characteristic type.

**Note:**

If you have defined business labels for usage data fields, the columns will appear with the business labels defined for the respective column.

Only those columns that contain data in the CSV file appear in the **Usage Data** screen. For example, if information about characteristics is provided in the CHARTYPE4 and CHARVAL4 columns of the CSV file, then only the CHARTYPE4 and CHARVAL4 columns appear in the **Usage Data** screen. Similarly, if information about the line item (charge) is provided in the BILL LINE DESCRIPTION6, AMOUNT6, CURRENCY6, MEMO ONLY6, SUMMARY6, SHOW ON BILL6, and GL DISTRIBUTION CODE 6 columns of the CSV file, then only the BILL LINE DESCRIPTION6, AMOUNT6, CURRENCY6, MEMO ONLY6, SUMMARY6, SHOW ON BILL6, AND GL DISTRIBUTION CODE 6 columns appear in the **Usage Data** screen.

**Note:**

Pagination is used to display limited number of records in the **Search Results** section. You can change the number of records displayed per page, if required. You can use the navigation buttons, such as **First** ( << ), **Previous** ( < ), **Next** ( > ), and **Last** ( >> ) to navigate between pages. You can also select the page to which you want to navigate from the **Go To** list.

- View the invalid records of the usage data file in the **Usage Data** screen.
- If required, you can change the number of records displayed per page.

**Note:** By default, the number of records that appear in each page depends on the minimum value defined in the **PAGE\_NUMBER** lookup field. For example, if the **PAGE\_NUMBER** lookup field has four values — 10, 20, 30, and 40, then the number of records displayed in each page, by default, would be 10.

- If required, you can click the **First** ( << ), **Previous** ( < ), **Next** ( > ), and **Last** ( >> ) buttons to navigate between pages.
- If required, you can filter the invalid records in the **Usage Data** screen.

**Viewing Submitted Records of a Usage Data File****Procedure**

To view submitted records of a usage data file:

- Search for the usage data file in the **Usage Data Processing** screen.
- In the **Search Results** section, click the link in the **Submitted** column corresponding to the usage data file whose submitted records you want to view.

The **Usage Data** screen appears. It contains the following two sections:

- Search Criteria** — This section allows you to filter the submitted records based on the various search criteria. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
File Name	Displays the name of the usage data file.	Not applicable
File Type	Indicates the type of the usage data file.	Not applicable
Default Usage Start Date	Displays the usage start date entered while uploading the usage data file.	Not applicable
Default Usage End Date	Displays the usage end date entered while uploading the usage data file.	Not applicable
Usage Record Status	Indicates that all records submitted for approval are displayed in the <b>Usage Data</b> screen.	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
Division	Used to specify the division to which the submitted record belongs.	No
Account Identifier Type	Used to specify the identifier type based on which you want to search for the submitted records.	Yes (Conditional) <b>Note:</b> If you enter the account identifier as a search criteria, you have to enter the account identifier type.
Account Identifier	Used to indicate the account whose submitted records you want to view.	Yes (Conditional) <b>Note:</b> If you enter the account identifier type as a search criteria, you have to enter the account identifier.

- **Search Results** — By default, all submitted records of the usage data file are listed in the **Search Results** section. You can filter the search results based on the specified criteria. the **Search Results** section contains the following columns:

Column Name	Column Description
BILLABLE CHARGE ID	Indicates the billable charge which is generated for the usage record.
ACCOUNT ID TYPE	Indicates the account identifier type.
ACCOUNT IDENTIFIER	Indicates the account to which the usage record belongs.
ACCOUNT INFORMATION	Displays information about the account.
DIVISION	Indicates the division to which the usage record belongs.
CONTRACT ID	Displays the contract ID. <b>Note:</b> This column appears only if usage data files are uploaded for the insurance module.
CHARGE TYPE	Indicates the charge type. <b>Note:</b> This column appears only if usage data files are uploaded for the insurance module.
START DATE	Displays the date from when the price item was used. <b>Note:</b> If the start date is not available, the default usage start date appears in this column.
END DATE	Displays the date till when the price item was used. <b>Note:</b> If the end date is not available, the default usage end date appears in this column.

Column Name	Column Description
DESCRIPTION	Displays the description of the usage record. It is shown on the billable charge.
PRICE ITEM	Displays the price item code.
VARIANCE	Indicates the variance that must be used along with the price item for determining the price item pricing.  <b>Note:</b> This column appears only when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>False</b> .
PARAM TYPE1, PARAM TYPE2, ....., PARAM TYPE15	Indicates the price item parameter that must be used along with the price item for determining the price item pricing.  <b>Note:</b> These columns appear only when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>True</b> .
PARAM VALUE1, PARAM VALUE2, ....., PARAM VALUE15	Displays the value of the price item parameter.  <b>Note:</b> These columns appear only when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>True</b> .
SQI1, SQI2, ....., SQI10	Indicates the service quantity identifier that must be used for calculating the price item charges.
SQIVALUE1, SQIVALUE2, ....., SQIVALUE10	Displays the number of units of the service quantity.
BILL LINE DESCRIPTION1, BILL LINE DESCRIPTION2, ....., BILL LINE DESCRIPTION10	Displays the description of the line item (charge).
AMOUNT1, AMOUNT2, ....., AMOUNT10	Displays the charge amount.
CURRENCY1, CURRENCY2, ....., CURRENCY10	Displays the currency in which the amount is charged.
MEMO ONLY1, MEMO ONLY2, ....., MEMO ONLY10	Indicates whether the charge should be included in the bill amount or not.
SUMMARY1, SUMMARY2, ....., SUMMARY10	Indicates whether the charge should be included in the summary line or not.
SHOW ON BILL1, SHOW ON BILL2, ....., SHOW ON BILL10	Indicates whether the charge should appear on the person's printed bill or not.

Column Name	Column Description
GL DISTRIBUTION CODE 1, GL DISTRIBUTION CODE 2, ..., GL DISTRIBUTION CODE 10	Displays the distribution code which indicates the GL account associated with the charge.
CHARTYPE1, CHARTYPE2, ....., CHARTYPE10	Indicates the characteristic that must be defined for the billable charge.
CHARVAL1, CHARVAL2, ....., CHARVAL10	Displays the value of the characteristic type.

**Note:**

If you have defined business labels for usage data fields, the columns will appear with the business labels defined for the respective column.

Only those columns that contain data in the CSV file appear in the **Usage Data** screen. For example, if information about characteristics is provided in the CHARTYPE4 and CHARVAL4 columns of the CSV file, then only the CHARTYPE4 and CHARVAL4 columns appear in the **Usage Data** screen. Similarly, if information about the line item (charge) is provided in the BILL LINE DESCRIPTION6, AMOUNT6, CURRENCY6, MEMO ONLY6, SUMMARY6, SHOW ON BILL6, and GL DISTRIBUTION CODE 6 columns of the CSV file, then only the BILL LINE DESCRIPTION6, AMOUNT6, CURRENCY6, MEMO ONLY6, SUMMARY6, SHOW ON BILL6, AND GL DISTRIBUTION CODE 6 columns appear in the **Usage Data** screen.

**Note:**

Pagination is used to display limited number of records in the **Search Results** section. You can change the number of records displayed per page, if required. You can use the navigation buttons, such as **First** () , **Previous** () , **Next** () , and **Last** () to navigate between pages. You can also select the page to which you want to navigate from the **Go To** list.

- View the submitted records of the usage data file in the **Usage Data** screen.
- If required, you can change the number of records displayed per page.

**Note:** By default, the number of records that appear in each page depends on the minimum value defined in the **PAGE\_NUMBER** lookup field. For example, if the **PAGE\_NUMBER** lookup field has four values — 10, 20, 30, and 40, then the number of records displayed in each page, by default, would be 10.

- If required, you can click the **First** () , **Previous** () , **Next** () , and **Last** () buttons to navigate between pages.

## Viewing Processed Records of a Usage Data File

### Procedure

To view processed records of a usage data file:

1. Search for the usage data file in the **Usage Data Processing** screen.
2. In the **Search Results** section, click the link in the **Processed** column corresponding to the usage data file whose processed records you want to view.

The **Usage Data** screen appears. It contains the following two sections:

- **Search Criteria** — This section allows you to filter the processed records based on the various search criteria. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
File Name	Displays the name of the usage data file.	Not applicable
File Type	Indicates the type of the usage data file.	Not applicable
Default Usage Start Date	Displays the usage start date entered while uploading the usage data file.	Not applicable
Default Usage End Date	Displays the usage end date entered while uploading the usage data file.	Not applicable
Usage Record Status	Indicates that all processed records are displayed in the <b>Usage Data</b> screen.	Not applicable
Division	Used to specify the division to which the processed record belongs.	No
Account Identifier Type	Used to specify the identifier type based on which you want to search for the processed records.	Yes (Conditional) <b>Note:</b> If you enter the account identifier as a search criteria, you have to enter the account identifier type.
Account Identifier	Used to indicate the account whose processed records you want to view.	Yes (Conditional) <b>Note:</b> If you enter the account identifier type as a search criteria, you have to enter the account identifier.

- **Search Results** — By default, all processed records of the usage data file are listed in the **Search Results** section. You can filter the search results based on the specified criteria. the **Search Results** section contains the following columns:

Column Name	Column Description
BILLABLE CHARGE ID	Indicates the billable charge which is generated for the usage record.
ACCOUNT ID TYPE	Indicates the account identifier type.
ACCOUNT IDENTIFIER	Indicates the account to which the usage record belongs.

Column Name	Column Description
ACCOUNT INFORMATION	Displays information about the account.
DIVISION	Indicates the division to which the usage record belongs.
CONTRACT ID	Displays the contract ID. <b>Note:</b> This column appears only if usage data files are uploaded for the insurance module.
CHARGE TYPE	Indicates the charge type. <b>Note:</b> This column appears only if usage data files are uploaded for the insurance module.
START DATE	Displays the date from when the price item was used. <b>Note:</b> If the start date is not available, the default usage start date appears in this column.
END DATE	Displays the date till when the price item was used. <b>Note:</b> If the end date is not available, the default usage end date appears in this column.
DESCRIPTION	Displays the description of the usage record. It is shown on the billable charge.
PRICE ITEM	Displays the price item code.
VARIANCE	Indicates the variance that must be used along with the price item for determining the price item pricing. <b>Note:</b> This column appears only when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>False</b> .
PARAM TYPE1, PARAM TYPE2, ....., PARAM TYPE15	Indicates the price item parameter that must be used along with the price item for determining the price item pricing. <b>Note:</b> These columns appear only when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>True</b> .
PARAM VALUE1, PARAM VALUE2, ....., PARAM VALUE15	Displays the value of the price item parameter. <b>Note:</b> These columns appear only when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>True</b> .
SQI1, SQI2, ....., SQI10	Indicates the service quantity identifier that must be used for calculating the price item charges.
SQVALUE1, SQVALUE2, ....., SQVALUE10	Displays the number of units of the service quantity.

Column Name	Column Description
BILL LINE DESCRIPTION1, BILL LINE DESCRIPTION2, ....., BILL LINE DESCRIPTION10	Displays the description of the line item (charge).
AMOUNT1, AMOUNT2, ....., AMOUNT10	Displays the charge amount.
CURRENCY1, CURRENCY2, ....., CURRENCY10	Displays the currency in which the amount is charged.
MEMO ONLY1, MEMO ONLY2, ....., MEMO ONLY10	Indicates whether the charge should be included in the bill amount or not.
SUMMARY1, SUMMARY2, ....., SUMMARY10	Indicates whether the charge should be included in the summary line or not.
SHOW ON BILL1, SHOW ON BILL2, ....., SHOW ON BILL10	Indicates whether the charge should appear on the person's printed bill or not.
GL DISTRIBUTION CODE 1, GL DISTRIBUTION CODE 2, ....., GL DISTRIBUTION CODE 10	Displays the distribution code which indicates the GL account associated with the charge.
CHARTYPE1, CHARTYPE2, ....., CHARTYPE10	Indicates the characteristic that must be defined for the billable charge.
CHARVAL1, CHARVAL2, ....., CHARVAL10	Displays the value of the characteristic type.

**Note:**

If you have defined business labels for usage data fields, the columns will appear with the business labels defined for the respective column.

Only those columns that contain data in the CSV file appear in the **Usage Data** screen. For example, if information about characteristics is provided in the CHARTYPE4 and CHARVAL4 columns of the CSV file, then only the CHARTYPE4 and CHARVAL4 columns appear in the **Usage Data** screen. Similarly, if information about the line item (charge) is provided in the BILL LINE DESCRIPTION6, AMOUNT6, CURRENCY6, MEMO ONLY6, SUMMARY6, SHOW ON BILL6, and GL DISTRIBUTION CODE 6 columns of the CSV file, then only the BILL LINE DESCRIPTION6, AMOUNT6, CURRENCY6, MEMO ONLY6, SUMMARY6, SHOW ON BILL6, AND GL DISTRIBUTION CODE 6 columns appear in the **Usage Data** screen.

**Note:**

Pagination is used to display limited number of records in the **Search Results** section. You can change the number of records displayed per page, if required. You can use the navigation buttons, such as **First** ( << ), **Previous** ( < ), **Next** ( > ), and **Last** ( >> ) to navigate between pages. You can also select the page to which you want to navigate from the **Go To** list.

- View the processed records of the usage data file in the **Usage Data** screen.
- If required, you can change the number of records displayed per page.

**Note:** By default, the number of records that appear in each page depends on the minimum value defined in the **PAGE\_NUMBER** lookup field. For example, if the **PAGE\_NUMBER** lookup field has four values — 10, 20, 30, and 40, then the number of records displayed in each page, by default, would be 10.

- If required, you can click the **First** ( << ), **Previous** ( < ), **Next** ( > ), and **Last** ( >> ) buttons to navigate between pages.
- If required, you can filter the processed records in the **Usage Data** screen.

**Viewing Cancelled Records of a Usage Data File****Procedure**

To view cancelled records of a usage data file:

- Search for the usage data file in the **Usage Data Processing** screen.
- In the **Search Results** section, click the link in the **Cancelled** column corresponding to the usage data file whose cancelled records you want to view.

The **Usage Data** screen appears. It contains the following two sections:

- Search Criteria** — This section allows you to filter the cancelled records based on the various search criteria. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
File Name	Displays the name of the usage data file.	Not applicable
File Type	Indicates the type of the usage data file.	Not applicable
Default Usage Start Date	Displays the usage start date entered while uploading the usage data file.	Not applicable
Default Usage End Date	Displays the usage end date entered while uploading the usage data file.	Not applicable
Usage Record Status	Indicates that all cancelled records are displayed in the <b>Usage Data</b> screen.	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
Division	Used to specify the division to which the cancelled record belongs.	No
Account Identifier Type	Used to specify the identifier type based on which you want to search for the cancelled records.	Yes (Conditional) <b>Note:</b> If you enter the account identifier as a search criteria, you have to enter the account identifier type.
Account Identifier	Used to indicate the account whose cancelled records you want to view.	Yes (Conditional) <b>Note:</b> If you enter the account identifier type as a search criteria, you have to enter the account identifier.

- **Search Results** — By default, all cancelled records of the usage data file are listed in the **Search Results** section. You can filter the search results based on the specified criteria. the **Search Results** section contains the following columns:

Column Name	Column Description
BILLABLE CHARGE ID	Indicates the billable charge which is generated for the usage record. <b>Note:</b> This column appears only if you have cancelled a valid record for which billable charges have been created.
ACCOUNT ID TYPE	Indicates the account identifier type.
ACCOUNT IDENTIFIER	Indicates the account to which the usage record belongs.
ACCOUNT INFORMATION	Displays information about the account.
DIVISION	Indicates the division to which the usage record belongs.
CONTRACT ID	Displays the contract ID. <b>Note:</b> This column appears only if usage data files are uploaded for the insurance module.
CHARGE TYPE	Indicates the charge type. <b>Note:</b> This column appears only if usage data files are uploaded for the insurance module.
START DATE	Displays the date from when the price item was used. <b>Note:</b> If the start date is not available, the default usage start date appears in this column.

Column Name	Column Description
END DATE	Displays the date till when the price item was used.  <b>Note:</b> If the end date is not available, the default usage end date appears in this column.
DESCRIPTION	Displays the description of the usage record. It is shown on the billable charge.
PRICE ITEM	Displays the price item code.
VARIANCE	Indicates the variance that must be used along with the price item for determining the price item pricing.  <b>Note:</b> This column appears only when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>False</b> .
PARAM TYPE1, PARAM TYPE2, ....., PARAM TYPE15	Indicates the price item parameter that must be used along with the price item for determining the price item pricing.  <b>Note:</b> These columns appear only when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>True</b> .

**Viewing Rejected Records of a Usage Data File****Procedure**

To view rejected records of a usage data file:

1. Search for the usage data file in the **Usage Data Processing** screen.
2. In the **Search Results** section, click the link in the **Rejected** column corresponding to the usage data file whose rejected records you want to view.

The **Usage Data** screen appears. It contains the following two sections:

- **Search Criteria** — This section allows you to filter the rejected records based on the various search criteria. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
File Name	Displays the name of the usage data file.	Not applicable
File Type	Indicates the type of the usage data file.	Not applicable
Default Usage Start Date	Displays the usage start date entered while uploading the usage data file.	Not applicable
Default Usage End Date	Displays the usage end date entered while uploading the usage data file.	Not applicable
Status	Indicates that all rejected records are displayed in the <b>Usage Data</b> screen.	Not applicable
Division	Used to specify the division to which the rejected record belongs.	No
Account Identifier Type	Used to specify the identifier type based on which you want to search for the rejected records.	Yes (Conditional) <b>Note:</b> If you enter the account identifier as a search criteria, you have to enter the account identifier type.
Account Identifier	Used to indicate the account whose rejected records you want to view.	Yes (Conditional) <b>Note:</b> If you enter the account identifier type as a search criteria, you have to enter the account identifier.

- **Search Results** — By default, all rejected records of the usage data file are listed in the **Search Results** section. You can filter the search results based on the specified criteria. the **Search Results** section contains the following columns:

Column Name	Column Description
ACCOUNT ID TYPE	Indicates the account identifier type.
ACCOUNT IDENTIFIER	Indicates the account to which the usage record belongs.
ACCOUNT INFORMATION	Displays information about the account.
DIVISION	Indicates the division to which the usage record belongs.
CONTRACT ID	Displays the contract ID.  <b>Note:</b> This column appears only if usage data files are uploaded for the insurance module.
CHARGE TYPE	Indicates the charge type.  <b>Note:</b> This column appears only if usage data files are uploaded for the insurance module.
START DATE	Displays the date from when the price item was used.  <b>Note:</b> If the start date is not available, the default usage start date appears in this column.
END DATE	Displays the date till when the price item was used.  <b>Note:</b> If the end date is not available, the default usage end date appears in this column.
DESCRIPTION	Displays the description of the usage record. It is shown on the billable charge.
PRICE ITEM	Displays the price item code.
VARIANCE	Indicates the variance that must be used along with the price item for determining the price item pricing.  <b>Note:</b> This column appears only when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>False</b> .
PARAM TYPE 1, PARAM TYPE 2, ....., PARAM TYPE 15	Indicates the price item parameter that must be used along with the price item for determining the price item pricing.  <b>Note:</b> These columns appear only when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>True</b> .

Column Name	Column Description
PARAM VALUE 1, PARAM VALUE 2, ....., PARAM VALUE 15	Displays the value of the price item parameter. <b>Note:</b> These columns appear only when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>True</b> .
SQI1, SQI2, ....., SQI10	Indicates the service quantity identifier that must be used for calculating the price item charges.
SQIVALUE1, SQIVALUE2, ....., SQIVALUE10	Displays the number of units of the service quantity.
BILL LINE DESCRIPTION1, BILL LINE DESCRIPTION2, ....., BILL LINE DESCRIPTION10	Displays the description of the line item (charge).
AMOUNT1, AMOUNT2, ....., AMOUNT10	Displays the charge amount.
CURRENCY 1, CURRENCY 2, ....., CURRENCY 10	Displays the currency in which the amount is charged.
MEMO ONLY 1, MEMO ONLY 2, ....., MEMO ONLY 10	Indicates whether the charge should be included in the bill amount or not.
SUMMARY 1, SUMMARY 2, ....., SUMMARY 10	Indicates whether the charge should be included in the summary line or not.
SHOW ON BILL 1, SHOW ON BILL 2, ....., SHOW ON BILL 10	Indicates whether the charge should appear on the person's printed bill or not.
GL DISTRIBUTION CODE 1, GL DISTRIBUTION CODE 2, ....., GL DISTRIBUTION CODE 10	Displays the distribution code which indicates the GL account associated with the charge.
CHARTYPE 1, CHARTYPE 2, ....., CHARTYPE 10	Indicates the characteristic that must be defined for the billable charge.
CHARVAL 1, CHARVAL 2, ....., CHARVAL 10	Displays the value of the characteristic type.
REASON	Indicates the reason why the usage record was rejected by the approver.
COMMENTS	Displays additional information entered while rejecting a usage record.

**Note:**

If you have defined business labels for usage data fields, the columns will appear with the business labels defined for the respective column.

Only those columns that contain data in the CSV file appear in the **Usage Data** screen. For example, if information about characteristics is provided in the CHARTYPE4 and CHARVAL4 columns of the CSV file, then only the CHARTYPE4 and CHARVAL4 columns appear in the **Usage Data** screen. Similarly, if information about the line item (charge) is provided in the BILL LINE DESCRIPTION6, AMOUNT6, CURRENCY6, MEMO ONLY6, SUMMARY6, SHOW ON BILL6, and GL DISTRIBUTION CODE 6 columns of the CSV file, then only the BILL LINE DESCRIPTION6, AMOUNT6, CURRENCY6, MEMO ONLY6, SUMMARY6, SHOW ON BILL6, AND GL DISTRIBUTION CODE 6 columns appear in the **Usage Data** screen.

**Note:**

Pagination is used to display limited number of records in the **Search Results** section. You can change the number of records displayed per page, if required. You can use the navigation buttons, such as **First** ( <<< ), **Previous** ( < ), **Next** ( > ), and **Last** ( >>> ) to navigate between pages. You can also select the page to which you want to navigate from the **Go To** list.

3. View the rejected records of the usage data file in the **Usage Data** screen.
4. If required, you can change the number of records displayed per page.

**Note:** By default, the number of records that appear in each page depends on the minimum value defined in the **PAGE\_NUMBER** lookup field. For example, if the **PAGE\_NUMBER** lookup field has four values — 10, 20, 30, and 40, then the number of records displayed in each page, by default, would be 10.

5. If required, you can click the **First** ( <<< ), **Previous** ( < ), **Next** ( > ), and **Last** ( >>> ) buttons to navigate between pages.
6. If required, you can filter the rejected records in the **Usage Data** screen.

**Viewing Billed Records of a Usage Data File****Procedure**

To view billed records of a usage data file:

1. Search for the usage data file in the **Usage Data Processing** screen.
2. In the **Search Results** section, click the link in the **Billed** column corresponding to the usage data file whose billed records you want to view.

The **Usage Data** screen appears. It contains the following two sections:

- **Search Criteria** — This section allows you to filter the billed records based on the various search criteria. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
File Name	Displays the name of the usage data file.	Not applicable
File Type	Indicates the type of the usage data file.	Not applicable
Default Usage Start Date	Displays the usage start date entered while uploading the usage data file.	Not applicable
Default Usage End Date	Displays the usage end date entered while uploading the usage data file.	Not applicable
Usage Record Status	Indicates that all billed records are displayed in the <b>Usage Data</b> screen.	Not applicable
Division	Used to specify the division to which the billed record belongs.	No
Account Identifier Type	Used to specify the identifier type based on which you want to search for the billed records.	Yes (Conditional) <b>Note:</b> If you enter the account identifier as a search criteria, you have to enter the account identifier type.
Account Identifier	Used to indicate the account whose billed records you want to view.	Yes (Conditional) <b>Note:</b> If you enter the account identifier type as a search criteria, you have to enter the account identifier.

- **Search Results** — By default, all billed records of the usage data file are listed in the **Search Results** section. You can filter the search results based on the specified criteria. the **Search Results** section contains the following columns:

Column Name	Column Description
BILLABLE CHARGE ID	Indicates the billable charge which is generated for the usage record.
ACCOUNT ID TYPE	Indicates the account identifier type.
ACCOUNT IDENTIFIER	Indicates the account to which the usage record belongs.
ACCOUNT INFORMATION	Displays information about the account.
DIVISION	Indicates the division to which the usage record belongs.
CONTRACT ID	Displays the contract ID. <b>Note:</b> This column appears only if usage data files are uploaded for the insurance module.
CHARGE TYPE	Indicates the charge type. <b>Note:</b> This column appears only if usage data files are uploaded for the insurance module.

Column Name	Column Description
START DATE	Displays the date from when the price item was used.  <b>Note:</b> If the start date is not available, the default usage start date appears in this column.
END DATE	Displays the date till when the price item was used.  <b>Note:</b> If the end date is not available, the default usage end date appears in this column.
DESCRIPTION	Displays the description of the usage record. It is shown on the billable charge.
PRICE ITEM	Displays the price item code.
VARIANCE	Indicates the variance that must be used along with the price item for determining the price item pricing.  <b>Note:</b> This column appears only when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>False</b> .
PARAM TYPE1, PARAM TYPE2, ....., PARAM TYPE15	Indicates the price item parameter that must be used along with the price item for determining the price item pricing.  <b>Note:</b> These columns appear only when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>True</b> .
PARAM VALUE1, PARAM VALUE2, ....., PARAM VALUE15	Displays the value of the price item parameter.  <b>Note:</b> These columns appear only when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>True</b> .
SQI1, SQI2, ....., SQI10	Indicates the service quantity identifier that must be used for calculating the price item charges.
SQIVALUE1, SQIVALUE2, ....., SQIVALUE10	Displays the number of units of the service quantity.
BILL LINE DESCRIPTION1, BILL LINE DESCRIPTION2, ....., BILL LINE DESCRIPTION10	Displays the description of the line item (charge).
AMOUNT1, AMOUNT2, ....., AMOUNT10	Displays the charge amount.
CURRENCY1, CURRENCY2, ....., CURRENCY10	Displays the currency in which the amount is charged.

Column Name	Column Description
MEMO ONLY1, MEMO ONLY2, ....., MEMO ONLY10	Indicates whether the charge should be included in the bill amount or not.
SUMMARY1, SUMMARY2, ....., SUMMARY10	Indicates whether the charge should be included in the summary line or not.
SHOW ON BILL1, SHOW ON BILL2, ....., SHOW ON BILL10	Indicates whether the charge should appear on the person's printed bill or not.
GL DISTRIBUTION CODE 1, GL DISTRIBUTION CODE 2, ....., GL DISTRIBUTION CODE 10	Displays the distribution code which indicates the GL account associated with the charge.
CHARTYPE1, CHARTYPE2, ....., CHARTYPE10	Indicates the characteristic that must be defined for the billable charge.
CHARVAL1, CHARVAL2, ....., CHARVAL10	Displays the value of the characteristic type.

**Note:**

If you have defined business labels for usage data fields, the columns will appear with the business labels defined for the respective column.

Only those columns that contain data in the CSV file appear in the **Usage Data** screen. For example, if information about characteristics is provided in the CHARTYPE4 and CHARVAL4 columns of the CSV file, then only the CHARTYPE4 and CHARVAL4 columns appear in the **Usage Data** screen. Similarly, if information about the line item (charge) is provided in the BILL LINE DESCRIPTION6, AMOUNT6, CURRENCY6, MEMO ONLY6, SUMMARY6, SHOW ON BILL6, and GL DISTRIBUTION CODE 6 columns of the CSV file, then only the BILL LINE DESCRIPTION6, AMOUNT6, CURRENCY6, MEMO ONLY6, SUMMARY6, SHOW ON BILL6, AND GL DISTRIBUTION CODE 6 columns appear in the **Usage Data** screen.

**Note:**

Pagination is used to display limited number of records in the **Search Results** section. You can change the number of records displayed per page, if required. You can use the navigation buttons, such as **First** () , **Previous** () , **Next** () , and **Last** () to navigate between pages. You can also select the page to which you want to navigate from the **Go To** list.

3. View the billed records of the usage data file in the **Usage Data** screen.
4. If required, you can change the number of records displayed per page.

**Note:** By default, the number of records that appear in each page depends on the minimum value defined in the **PAGE\_NUMBER** lookup field. For example, if the **PAGE\_NUMBER** lookup field has four values — 10, 20, 30, and 40, then the number of records displayed in each page, by default, would be 10.

5. If required, you can click the **First** () , **Previous** () , **Next** () , and **Last** () buttons to navigate between pages.
6. If required, you can filter the billed records in the **Usage Data** screen.

**Viewing Unbilled Records of a Usage Data File****Procedure**

To view unbilled records of a usage data file:

1. Search for the usage data file in the **Usage Data Processing** screen.
2. In the **Search Results** section, click the link in the **Unbilled** column corresponding to the usage data file whose unbilled records you want to view.

The **Usage Data** screen appears. It contains the following two sections:

- **Search Criteria** — This section allows you to filter the unbilled records based on the various search criteria. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
File Name	Displays the name of the usage data file.	Not applicable
File Type	Indicates the type of the usage data file.	Not applicable
Default Usage Start Date	Displays the usage start date entered while uploading the usage data file.	Not applicable
Default Usage End Date	Displays the usage end date entered while uploading the usage data file.	Not applicable
Usage Record Status	Indicates that all unbilled records are displayed in the <b>Usage Data</b> screen.	Not applicable
Division	Used to specify the division to which the unbilled record belongs.	No
Account Identifier Type	Used to specify the identifier type based on which you want to search for the unbilled records.	Yes (Conditional) <b>Note:</b> If you enter the account identifier as a search criteria, you have to enter the account identifier type.
Account Identifier	Used to indicate the account whose unbilled records you want to view.	Yes (Conditional) <b>Note:</b> If you enter the account identifier type as a search criteria, you have to enter the account identifier.

- **Search Results** — By default, all unbilled records of the usage data file are listed in the **Search Results** section. You can filter the search results based on the specified criteria. the **Search Results** section contains the following columns:

Column Name	Column Description
BILLABLE CHARGE ID	Indicates the billable charge which is generated for the usage record.
ACCOUNT ID TYPE	Indicates the account identifier type.
ACCOUNT IDENTIFIER	Indicates the account to which the usage record belongs.
ACCOUNT INFORMATION	Displays information about the account.
DIVISION	Indicates the division to which the usage record belongs.
CONTRACT ID	Displays the contract ID.  <b>Note:</b> This column appears only if usage data files are uploaded for the insurance module.
CHARGE TYPE	Indicates the charge type.  <b>Note:</b> This column appears only if usage data files are uploaded for the insurance module.
START DATE	Displays the date from when the price item was used.  <b>Note:</b> If the start date is not available, the default usage start date appears in this column.
END DATE	Displays the date till when the price item was used.  <b>Note:</b> If the end date is not available, the default usage end date appears in this column.
DESCRIPTION	Displays the description of the usage record. It is shown on the billable charge.
PRICE ITEM	Displays the price item code.
VARIANCE	Indicates the variance that must be used along with the price item for determining the price item pricing.  <b>Note:</b> This column appears only when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>False</b> .
PARAM TYPE1, PARAM TYPE2, ....., PARAM TYPE15	Indicates the price item parameter that must be used along with the price item for determining the price item pricing.  <b>Note:</b> These columns appear only when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>True</b> .

Column Name	Column Description
PARAM VALUE1, PARAM VALUE2, ....., PARAM VALUE15	Displays the value of the price item parameter. <b>Note:</b> These columns appear only when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>True</b> .
SQI1, SQI2, ....., SQI10	Indicates the service quantity identifier that must be used for calculating the price item charges.
SQIVALUE1, SQIVALUE2, ....., SQIVALUE10	Displays the number of units of the service quantity.

**Submitting a Valid Record****Procedure**

To submit a valid record:

1. Search for the usage data file in the **Usage Data Processing** screen.
2. In the **Search Results** section, click the **Submit** ( 🖱️ ) icon corresponding to the usage data file whose valid records you want to submit.

The system behaves in the following manner when:

- **Billing Method — Adhoc Billing, Approval Workflow — Off, and Bill After Date — Current or Future Date:** A billable charge is created for each valid usage record. The **Adhoc Bill** flag is set to **Y** and

the **Bill After Date** is stamped on the billable charge. If the total number of valid records in a usage data file exceeds the transaction limit, a batch job is created using the **Billable Charge Creation (C1-ODBCH)** batch. A message appears indicating the batch job ID. This batch job creates a billable charge for each valid usage record. The status of the usage record is changed to **Processed**.

- **Billing Method — Adhoc Billing, Approval Workflow — On, and Bill After Date — Current or Future Date:** A To Do entry is created for the approver to approve the valid records. The status of the usage record is changed to **Submitted**.
- **Billing Method — Regular Billing, Approval Workflow — Off, and Bill After Date — Specified:** A billable charge is created for each valid usage record. The **Adhoc Bill** flag is set to **N** and the **Bill After Date** is stamped on the billable charge. If the total number of valid records in a usage data file exceeds the transaction limit, a batch job is created using the **Billable Charge Creation (C1-ODBCH)** batch. A message appears indicating the batch job ID. This batch job creates a billable charge for each valid usage record. The status of the usage record is changed to **Processed**. The bills will be generated for the account in the bill cycle in which the bill after date falls.
- **Billing Method — Regular Billing, Approval Workflow — Off, and Bill After Date — Not Specified:** A billable charge is created for each valid usage record. The **Adhoc Bill** flag is set to **N** in the billable charge. If the total number of valid records in a usage data file exceeds the transaction limit, a batch job is created using the **Billable Charge Creation (C1-ODBCH)** batch. A message appears indicating the batch job ID. This batch job creates a billable charge for each valid usage record. The status of the usage record is changed to **Processed**. The bills will be generated for the account based on the bill cycle defined for the account.
- **Billing Method — Regular Billing and Approval Workflow — On:** A To Do entry is created for the approver to approve the valid records. The status of the usage record is changed to **Submitted**.

**Note:**

You can change the transaction limit, whenever required, using the **On Demand Billing (C1-ODBFC)** feature configuration. For more information on the **Billable Charge Creation (C1-ODBCH)** batch, see *Oracle Revenue Management and Billing Batch Execution Guide*.

If you want to create billable charges for valid usage records where start date is a future date, then ensure that the **Use Calendar Billing** option is set to **Allow Advanced Billing** in the respective contract type.

If a batch job is created automatically, the number of valid records for which billable charges are created in each work unit depends on the value defined for the **Billable Charge Chunk Size** option type in the **On Demand Billing (C1-ODBFC)** feature configuration.

In case an account belongs to an invoicing group, the billable charge is created for the member account and the bill is generated for the master account.

On successful completion of the **Billable Charge Creation (C1-ODBCH)** batch, a To Do entry is created using the **C1-ODBCH To Do** type. You can view this To Do entry only when you are assigned a To Do role which is mapped to the **C1-ODBCH To Do** type. This To Do indicates whether the batch was successfully executed or not. If the batch was successfully executed, it indicates the following:

- Number of records for which billable charges were created
- Number of records for which billable charges could not be created successfully

3. If a batch job is created automatically, click **OK** in the message box.

## Approving a Valid Record

You can view the number of records which are pending for approval in the **Submitted** column corresponding to the usage data file in the **Usage Data Processing** screen. The approver can review, and accordingly approve or reject the usage record based on the observations.

**Note:** The system will not allow you to approve or reject a usage record submitted by you.

### Procedure

To approve a valid record:

1. Do either of the following:

If you want to...	Then...
Approve the usage record from the <b>Usage Data Processing</b> screen	<ol style="list-style-type: none"> <li>1. Search for the usage data file in the <b>Usage Data Processing</b> screen.</li> <li>2. In the <b>Search Results</b> section, click the <b>Approve</b> (  ) icon corresponding to the usage data file whose records you want to review.</li> </ol>
Approve the usage record from the <b>To Do List</b> screen	<ol style="list-style-type: none"> <li>1. From the <b>Main Menu</b>, select <b>To Do</b> and then click <b>To Do List</b>. The <b>To Do Type for User Search</b> window appears.</li> <li>2. Select the type of To Do entries you want to view. The <b>To Do List</b> screen appears.</li> <li>3. Select <b>Open</b> from the <b>Filter by</b> list to view all unassigned To Dos.</li> <li>4. Click the <b>Submitted Message</b> link corresponding to the To Do entry whose records you want to review.</li> </ol>

The **Usage Data** screen appears.

2. Review the usage records which you want approve or reject.
3. Do either of the following:

If you want to...	Then...
Approve one or more usage records	<ol style="list-style-type: none"> <li>1. If the usage record is accurate, then select the check box corresponding to the usage record.</li> <li>2. Click <b>Approve</b>. The system behaves in the following manner when: <ul style="list-style-type: none"> <li>• <b>Billing Method — Adhoc Billing and Bill After Date — Current or Future Date:</b> A billable charge is created for each valid record which is approved. **Rejecting a Valid Record**

You can view the number of records which are pending for approval in the **Submitted** column corresponding to the usage data file in the **Usage Data Processing** screen. The approver can review, and accordingly approve or reject the usage record based on the observations.

**Note:** The system will not allow you to approve or reject a usage record submitted by you.

**Procedure**

To reject a valid record:

1. Do either of the following:

If you want to...	Then...
Reject the usage record from the <b>Usage Data Processing</b> screen	<ol style="list-style-type: none"> <li>1. Search for the usage data file in the <b>Usage Data Processing</b> screen.</li> <li>2. In the <b>Search Results</b> section, click the <b>Approve</b> ( ✓ ) icon corresponding to the usage data file whose records you want to review.</li> </ol>
Reject the usage record from the <b>To Do List</b> screen	<ol style="list-style-type: none"> <li>1. From the <b>Main Menu</b>, select <b>To Do</b> and then click <b>To Do List</b>. The <b>To Do Type for User Search</b> window appears.</li> <li>2. Select the type of To Do entries you want to view. The <b>To Do List</b> screen appears.</li> <li>3. Select <b>Open</b> from the <b>Filter by</b> list to view all unassigned To Dos.</li> <li>4. Click the <b>Submitted Message</b> link corresponding to the To Do entry whose records you want to review.</li> </ol>

The **Usage Data** screen appears.

2. Review the usage records which you want approve or reject.
3. Do either of the following:

If you want to...	Then...
Reject one or more usage records	<ol style="list-style-type: none"> <li>1. If the usage record is not appropriate, then select the check box corresponding to the usage record.</li> <li>2. Click <b>Reject</b>.</li> </ol>
Reject all usage records	<ol style="list-style-type: none"> <li>1. Click <b>Reject All</b>.</li> </ol>

The **Rejection Reason** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Reason	Used to indicate the reason why you want to reject the usage record.	Yes
Comments	Used to specify additional information while rejecting the usage record.	Yes

4. Select the reason for rejecting the usage record and enter the comments in the respective field.

**Note:** The **ODB\_REJ\_RSN\_FLG** lookup field values appear in the **Reason** list.

5. Click **OK**.

The status of the usage record is changed to **Rejected**. A To Do entry is created for the submitter to include correct or missing data.

## Cancelling a Usage Data File

There might be situations when incorrect usage data file is uploaded in the system. In such case, the system provides you with an ability to cancel the file. Once the usage data file is cancelled, the status of the file and all usage records in the file is changed to **Cancelled**. However, note that you can cancel a usage data file only when there are no records (in other words, zero records) in the **Processed** and **Submitted** statuses.

**Procedure**

To cancel a usage data file:

1. Do either of the following:

If you want to...	Then...
Cancel the usage data file from the <b>Usage Data Processing</b> screen	<ol style="list-style-type: none"> <li>1. Search for the usage data file in the <b>Usage Data Processing</b> screen.</li> <li>2. In the <b>Search Results</b> section, click the <b>Cancel</b> (  ) icon corresponding to the usage data file that you want to cancel.</li> </ol>
Cancel the usage data file from the <b>On Demand Billing</b> screen	<ol style="list-style-type: none"> <li>1. From the <b>Main Menu</b>, select <b>Financial</b> and then click <b>On Demand Billing</b>. The <b>On Demand Billing</b> screen appears.</li> <li>2. Search for the file group whose usage data file you want to cancel. The search results appears.</li> <li>3. Click the <b>Broadcast</b> (  ) icon corresponding to the required file group. The <b>Group Files</b> zone appears. The <b>Group Files</b> zone lists the usage data files that are uploaded using the file group.</li> <li>4. Click the <b>Cancel</b> (  ) icon corresponding to the usage data file that you want to cancel.</li> </ol>

A message appears confirming whether you want to cancel the usage data file.

2. Click **OK**.

The **Cancel Reason** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Reason	Used to indicate the reason why you want to cancel the usage data file.	Yes
Comments	Used to specify additional information while cancelling the usage data file.	Yes

3. Select the reason for cancelling the usage data file and enter the comments in the respective field.

**Note:** The **ODB\_CAN\_RSN\_FLG** lookup field values appear in the **Reason** list.

4. Click **OK**.

The status of the usage data file is changed to **Cancelled**.

## Revalidating a Usage Data File

There might be situations when you want to execute the validation process once again on the usage data file. For example, initially when the usage data file was uploaded, accounts didn't have an active contract and therefore the status of the usage records was set to **Invalid**. Later, a contract was created and activated for each account (whose usage records are available in the usage data file). In such case, you need to execute the validation process once again on the usage data file. However, note that when you revalidate a usage data file, only the records in the **Valid** and **Invalid** status are revalidated.

### Procedure

To revalidate a usage data file:

1. Search for the usage data file in the **Usage Data Processing** screen.
2. Click the **Revalidate** () icon corresponding to the usage data file on which you want to execute the validation process once again.

The valid and invalid records are revalidated, and accordingly the status of records is changed. A message appears indicating that the validation process has completed successfully.

**Note:**

If the usage data file size exceeds the file size limit set in the **On Demand Billing (C1-ODBFC)** feature configuration, a batch job is created using the **Upload and Validate Usage Data File (C1-ODFU)** batch. A message appears indicating the batch job ID. This batch job revalidates the usage data file. For more information on the **Upload and Validate Usage Data File (C1-ODFU)** batch, see *Oracle Revenue Management and Billing Batch Execution Guide*.

If a batch job is created automatically, the number of usage records that are revalidated in each work unit depends on the value defined for the **Validation Chunk Size** option type in the **On Demand Billing (C1-ODBFC)** feature configuration.

On successful completion of the **Upload and Validate Usage Data File (C1-ODFU)** batch, a To Do entry is created using the **C1-ODFU To Do** type. You can view this To Do entry only when you are assigned a To Do role which is mapped to the **C1-ODFU To Do** type. This To Do indicates whether the batch was successfully executed or not. If the batch was successfully executed, it indicates the following:

- Number of records which were successfully validated
- Number of records which could not pass through the validation process
- Number of records which failed to validate due to some technical reasons

3. Click **OK** in the message box.

Once a usage record is successfully validated, the status of the usage record is changed to **Valid**. And, if a usage record could not pass through the validation process, the status of the usage record is changed to **Invalid**.

**Related Topics**

**Editing a Valid, Invalid, or Rejected Usage Record**

If the usage record validation fails or the approver rejects the usage record due to some reason, the status of the record is changed to **Invalid** or **Rejected**, respectively. You need to then correct the existing data or add the missing data. The system allows you to edit the valid, invalid, and rejected usage records.

**Procedure**

To edit a valid, invalid or rejected usage record:

1. Search for the usage data file in the **Usage Data Processing** screen.
2. Depending on whether you want to edit a valid, invalid, or rejected record, click the link in the **Valid**, **Invalid**, or **Rejected** column corresponding to the usage data file whose records you want to edit.

The **Usage Data** screen appears. The columns in the **Search Results** section are editable.

**Note:**

In case of rejected records, all columns except the **Reason** and **Comments** columns are editable.

In case of invalid record, the field with incorrect or missing data is highlighted with the red color. This helps to easily identify the reason why the validation process failed.

3. Enter the correct or missing data in the respective field.
4. Click **Save**.

All valid, invalid, or rejected usage records are validated once again. Once the validation process has completed successfully, the status of the records is changed accordingly.

## Exporting Usage Data into CSV file

Oracle Revenue Management and Billing provides you the facility to export the usage data into a CSV file. However, you can download the usage data in a CSV file only if the billable charges are not yet created. In other words, you can download the usage data only when all the records of a usage data file are in the valid and/or invalid status. Once the usage data is downloaded, you can edit the usage records and reupload the usage data file.

**Note:** When you download the usage data file using the **Export To Excel** option, the downloaded file is saved on your system with a unique ID. Once you make the required changes in the downloaded usage data file, you need to save the modified file with the same name as it exists in Oracle Revenue Management and Billing, and then upload the file into the system to replace the existing file.

#### Procedure

To export usage data into CSV file:

1. Search for the usage data file in the **Usage Data Processing** screen.
2. In the **Search Results** section, click the link in the **Total** column corresponding to the usage data file whose usage records you want to export.  
The **Usage Data** screen appears.
3. Click the **Export TO Excel** link in the **Search** section to download details of all the valid and/or invalid records of a usage data file in a CSV file format.  
A message appears indicating that all valid and invalid records will be exported.
4. Click **OK**.

The system prompts you to save the file.

## Filtering Usage Records

#### Procedure

To filter records of a usage data file:

1. Search for the usage data file in the **Usage Data Processing** screen.

- Depending on whether you want to filter total, valid, invalid, submitted, processed, rejected, cancelled, billed, or unbilled usage records, click the link in the respective column corresponding to the usage data file.

The **Usage Data** screen appears.

- Enter the search criteria based on which you want to filter the records.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

- Click **Search**.

The search results are filtered based on the specified criteria.

# Chapter 13

---

## Upload Validated Payment Data

---

### Topics:

- [Payment Upload Process](#)
- [Prerequisites](#)
- [CSV File Format](#)
- [Payment Data File Status Transition](#)
- [Payment Record Status Transition](#)
- [Error Messages](#)
- [Payment Upload](#)

Oracle Revenue Management and Billing until now provided you with an ability to interface payments from an external source, such as remittance processor. The system supported two mechanisms to upload payment data — one using which you can populate payment upload staging records and another using which you can populate payment event upload staging records. The system now enables you to validate the payment records before you move them to the staging area. The system provides the pre-staging area where you can upload and validate the payment records. The system provides a user interface which helps you to upload a payment data file in the pre-staging area. It also helps you to perform various tasks, such as:

- Track the status of the payment records and the payment data file
- Move the payment records to the staging area
- Cancel a payment data file
- View the log of a payment data file

You can upload a payment data file in the CSV format. You need to ensure that the CSV file is in the required format; otherwise the file will not be uploaded in the system. For more information about the CSV file format, see [CSV File Format](#) on page 1069. At present, the system supports only the CSV file format. This is because the payment data mapping algorithm type shipped with the product is designed to support the CSV format. If you want to use any other file format, you need to define custom mapping algorithm type that supports the required file format.

The file type using which you upload a payment data file indicates the mapping and validation algorithms that you want to use for the payment data file. On uploading a payment data file, the mapping algorithm parses the CSV file and uploads the payments records in the pre-staging area. The validation process starts immediately after the file is uploaded in the system. During the validation process, the system and custom validations (if any) are executed. Once the validation process is complete, you can move the payment records from the pre-staging to staging area. Once the payment records are moved to the staging area, the system creates payment events, tenders, payments and payment segments through a batch process. For more information about the payment upload process, see [Payment Upload Process](#) on page 1066.

During the payment upload process, a payment data file and each record of the file goes through various statuses until the payment events and payments are created. For more information about the payment data file and payment record statuses, see [Payment Data File Status Transition](#) on page 1071 and [Payment Record Status Transition](#) on page 1071, respectively.

## Payment Upload Process

---

The payment upload process includes the following sub-processes:

- [Upload Payment Records in the Pre-Staging Area](#) on page 1066
- [Move Payment Records to the Staging Area](#) on page 1067
- [Create Payment Events and Payments](#) on page 1067

### Upload Payment Records in the Pre-Staging Area

Oracle Revenue Management and Billing allows you to validate the payment records before you move them to the staging area. You can upload and validate the payment records in the pre-staging area. You can upload a payment data file in the CSV format. You need to ensure that the CSV file is in the required format; otherwise the file will not be uploaded in the system. For more information about the CSV file format, see [CSV File Format](#) on page 1069.

While uploading a payment data file, you need to specify the file type using which you want to upload the payment data file. The file type indicates the mapping and validation algorithms that you want to use for the payment data file. Therefore, while defining a file type using which you want to upload a payment data file, you need to:

- Set the feed type to **Payment Upload Data**
- Attach mapping algorithm which is created using the **C1-CSVUPLPAY** algorithm type
- Attach validation algorithm which is created using the **C1-PUPLVALID** algorithm type

On uploading a payment data file, the mapping algorithm does the following:

1. Validates whether the file is in the CSV format
2. Validates whether at least one payment record is available in the CSV file
3. Parses the flat file in the CSV format and maps the columns in the CSV file to various tables in the database
4. Uploads the payments records in the pre-staging area

The validation process starts immediately after the payment data file is uploaded in the system. During the validation process, the system and custom validations (if any) are executed. The system checks whether:

- The data is available in the **Tender ID, Tender Amount, Payment Amount, Date Received, Bank Account, and Payment Type** columns in the CSV file.
- The data is available in the **Match Type and Match Value** columns in the CSV file.

**Note:** This validation is done only when the **Is Match Type Validation Required (Y/N)** parameter is set to **Y** in the validation algorithm.

- The payee and payor accounts specified in the payment record exists in the system.
- The payee account with the specified account identifier type and account identifier combination exists in the system.
- A valid currency code is specified in the payment record.

**Note:** If the currency code is not specified, the currency is set to the payor account's invoice currency.

- The payment type (i.e. tender type) specified in the payment record exists in the system.
- The account identifier type specified in the payment record exists in the system.

**Note:** This validation is done only when the payee account ID is not specified in the payment record.

- The match type specified in the payment record exists in the system.

**Note:** This validation is done only when the **Is Match Type Validation Required (Y/N)** parameter is set to **Y** in the validation algorithm.

- The characteristic type specified in the payment record exists in the system.
- The characteristic value matches any predefined value when the characteristic value type is set to **Predefined Value**.
- The characteristic value is specified in the payment record when the characteristic type is specified and vice-versa.

You can upload a file by clicking the **Upload** link in the **Payment Upload** screen. On uploading a payment data file, the payment records are copied to the pre-staging area and the status of the payment data file is set to **Pending**. The validation process starts immediately after the payment data file is uploaded in the system. If a payment record is successfully validated, the status of the payment record is set to **Valid**. If a payment record contains incorrect or missing data, the status of the payment record is set to either **Invalid** or **Error** depending on the scenario. For more information about the scenarios when a payment record is set to the **Invalid** or **Error** status, see [Payment Record Status Transition](#) on page 1071.

Once the validation process is completed, the status of the payment data file is changed to **Validated**. Once the payment records are uploaded and validated in the pre-staging area, you can do either of the following:

- Move the payment records to the staging area
- Cancel a payment data file
- Replace the existing payment data file

**Note:** If a payment data file contains an invalid record, you need to correct or add missing data in the CSV file and then upload the file once again. Unless, a payment data file has no invalid records, you cannot move any record of the payment data file to the staging area.

## Move Payment Records to the Staging Area

Once the payment records are uploaded and validated in the pre-staging area, you can move the records to the staging area. The system allows you to move only valid and error records of a payment data file to the staging area. If a payment data file contains an invalid record, you cannot move any record of the payment data file to the staging area. In such scenario, you need to correct the invalid payment records and upload the same file once again in the system. In addition, if you have cancelled a payment data file, you cannot move any records (including valid and error records) of the payment data file to the staging area.

You can move the payment records to the staging area by clicking the **Move to Staging** icon corresponding to the payment data file in the **Payment Upload** screen. The **Move to Staging** icon appears only when:

- The status of the payment data file is **Validated**.
- There are no invalid records in the payment data file.
- The **Disable Move to Staging** check box is not selected in the respective file type.

On clicking the **Move to Staging** icon, the payment records are copied (and not moved) from the pre-staging to staging area and the status of the payment data file is changed to **In Staging**. In addition, the status of the payment records in the pre-staging area is changed to **In Staging** and the status of the deposit control, tender control, and payment tender staging records is set to **Pending**. Once you move the payment records to the staging area, you can edit the payment staging records, if required.

## Create Payment Events and Payments

Once the payment records are moved to the staging area, the system creates payment events for the payment data file in the background when the **Payment Upload (PUPL)** batch is invoked. You can configure the **Payment Upload (PUPL)** batch such that it is executed at regular intervals. When the **Payment Upload (PUPL)** batch is invoked, the

system checks whether there are any deposit control, tender control, payment tender, and payment staging records in the **Pending** status. If there are staging records in the **Pending** status, the system creates the following entities:

- Deposit Control
- Tender Control
- Payment Events
- Payment Tenders
- Payments
- Payment Segments
- Financial Transactions (when the payments are frozen)

The status of the deposit control, tender control, payment tender, and payment staging records is changed to **Complete**. If any error occurs while creating payment event for a payment record, the status of the deposit control, tender control, payment tender, and payment staging records is changed to **Error**. In addition, the status of the payment record in the pre-staging area is changed to **Error in Staging**.

Traditionally, the **Payment Upload (PUPL)** batch considered staging records which are in the **Error** or **Pending** status. If a staging record is in the **Error** status, the system used to reset the status to **Pending** and then further processed the staging record. This system behavior still exists for staging records which are not uploaded through the **Payment Upload** process. If the staging records are uploaded through the **Payment Upload** process, you need to manually correct the staging records and change the status of deposit control, tender control, payment tender, and payment staging records to **Pending**. The corrected staging records will then be processed when the **Payment Upload (PUPL)** batch is invoked at subsequent interval.

## Prerequisites

---

To setup the payment upload process, you need to do the following:

- Define the required match types with the appropriate payment distribution override and manual distribution algorithms.
- Define the required tender types in the system.
- Define the required currency codes in the system.
- Define the required tender sources in the system.
- Define the required characteristic types where the characteristic entity is set to **Payment**.
- Create a mapping algorithm using the **C1-CSVUPLPAY** algorithm type.
- Create a validation algorithm using the **C1-PUPLVALID** algorithm type.
- Define the required file types where the feed type is set to **Payment Upload Data**.
- Assign the **PUPL To Do** type to a To Do role whose users must receive the To Do generated while executing the **Payment Upload (PUPL)** batch.
- Set the batch control type of the **Payment Upload (PUPL)** batch to **Timed** and define the following attributes:
  - Time Interval
  - Timer Active
  - User ID
  - Batch Language
  - Email Address

## CSV File Format

Before uploading a payment data file, you need to ensure that the CSV file contains the following columns:

Column Name	Description	Mandatory (Yes or No)
Account ID	Used to specify the payee account ID.	Yes
Match Type	Used to specify the match type using which you want to match the payment.	Yes (Conditional) <b>Note:</b> This data is required when the match value is specified.
Match Value	Used to specify the entity (such as bill, contract, and so on) against which you want to match the payment.	Yes (Conditional) <b>Note:</b> This data is required when the match type is specified.
Tender ID	Used to specify the payment tender ID. <b>Note:</b> If the tender ID is same for two or more payment records, the system will create multiple payments against one tender. In other words, there will be multiple payments which are created through the payment event.	Yes
Tender Amount	Used to specify the tender amount. <b>Note:</b> You must not specify the value less than or equal to 0. The precision specified for the tender amount must not exceed the decimal places defined for the currency in the system.	Yes
Payment Amount	Used to specify the amount paid through the tender. <b>Note:</b> You must not specify the value less than or equal to 0. The precision specified for the payment amount must not exceed the decimal places defined for the currency in the system.	Yes
Date Received	Used to specify the date when the payment is made. <b>Note:</b> You must specify the date in the MM/DD/YYYY format.	Yes
Bank Account	Used to specify the external source ID which is associated with the tender source.	Yes

Column Name	Description	Mandatory (Yes or No)
Payment Type	Used to specify the type of tender through which the payment is made.	Yes
Check Number	Used to specify the check number if the payment is made through check.	No
Currency	Used to specify the currency in which the payment is made. <b>Note:</b> If the currency is not specified, it is set to the payor account's invoice currency.	No
Account ID Type	Used to specify the account identifier type.	Yes (Conditional) <b>Note:</b> This data is required when the account identifier is specified.
Account Identifier	Used to specify the account for which the payment is made.	Yes (Conditional) <b>Note:</b> This data is required when the account identifier type is specified.
Payment Char Type1, Payment Char Type2, ....., Payment Char Type5	Used to indicate the characteristic that must be defined for the payment.	Yes (Conditional) <b>Note:</b> This data is required when the characteristic value is specified.
Payment Char Value1, Payment Char Value2, ....., Payment Char Value5	Used to specify the value for the characteristic type.	Yes (Conditional) <b>Note:</b> This data is required when the characteristic type is specified.
MICR ID	Used to specify the MICR code.	No
Payor ID	Used to specify the payor account ID. <b>Note:</b> If the payor account ID is not specified, the payor account ID is set to the payee account ID assuming that the payor and payee are the same.	No

**Note:**

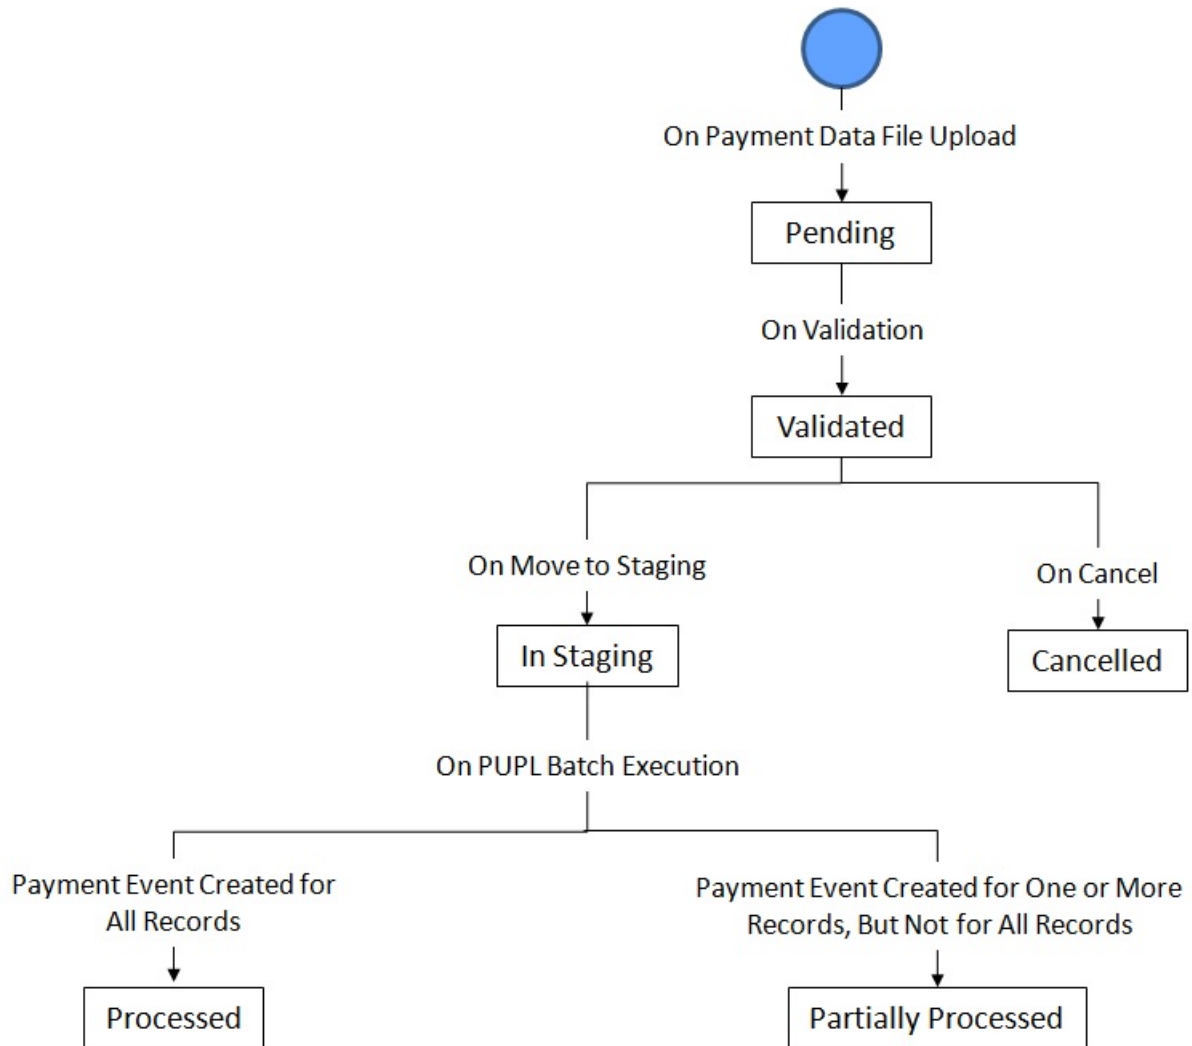

If a payment data file contains column names other than those mentioned in the above table, the system will not upload the payment data file.

If a payment data file contains more than 1000 payment records, the system will not allow you to upload the payment data file in the system. Therefore, ensure that a payment data file contains less than 1000 payment records.

## Payment Data File Status Transition

---

The following figure graphically indicates how a payment data file moves from one status to another during the payment upload process:

## Payment Record Status Transition

---

The following figure graphically indicates how a payment record moves from one status to another during the payment upload process:

The following table lists the scenarios when a payment record is set to **Invalid** or **Error** status:

Scenario	Payment Record Status
The system could not find the payee account ID for a given account identifier type and account identifier combination when the payee account ID is not specified in the payment record.	Invalid
The payee account ID specified in the payment record does not exist in the system.	Invalid
The payee account ID, account identifier type, or account identifier are not specified in the payment record.	Invalid
The match type is not specified in the payment record.	Invalid
The match type specified in the payment record does not exist in the system.	Error
The match value is not specified in the payment record.	Invalid
The currency code does not exist in the system.	Invalid
The tender amount is either zero or not specified in the payment record.	Invalid
The payment amount is either zero or not specified in the payment record.	Invalid
The bank account is not specified in the payment record.	Invalid
The payment type (i.e. tender type) does not exist in the system.	Invalid

Scenario	Payment Record Status
The payment type is not specified in the payment record.	Invalid
The tender ID is not specified in the payment record.	Invalid
The date received is not specified in the payment record.	Invalid
The payor account ID specified in the payment record does not exist in the system.	Invalid
The characteristic type specified in the payment record does not exist in the system.	Invalid
If a characteristic type is specified, but the characteristic value is not specified in the payment record.	Invalid
If a characteristic value is specified, but the characteristic type is not specified in the payment record.	Invalid
The characteristic value does not match any predefined value when the characteristic value type is set to <b>Predefined Value</b> .	Invalid

**Note:** The system does the match type and match value related validations only when the **Is Match Type Validation Required (Y/N)** parameter is set to **Y** in the validation algorithm.

## Error Messages

The following table lists the errors that may occur during the payment upload process. It also indicates how you can resolve these errors.

Message Number	Error Message	Message Category	Possible Issues
80110	File cannot be reuploaded as some records have already been processed.	11111	The possible issues could be: <ul style="list-style-type: none"> <li>You are trying to replace an existing file whose payment records are already moved to the staging area and/or for which payment events are already created.</li> </ul>
1463	This file already exists in the system. Please check.	17000	The possible issues could be: <ul style="list-style-type: none"> <li>You are trying to upload a file which is already uploaded in the system without selecting the <b>Replace Existing File</b> check box.</li> </ul>
1465	Please upload a file in the CSV format.	17000	The possible issues could be: <ul style="list-style-type: none"> <li>You are trying to upload a file which is not in the CSV format.</li> </ul>
80113	Duplicate Header for column %1 in file.	11111	The possible issues could be: <ul style="list-style-type: none"> <li>The file has two or more columns with the same header.</li> </ul>

Message Number	Error Message	Message Category	Possible Issues																																				
80111	Length of value %1 too long for Field %2. Maximum length: %3 Found %4.	11111	<p>The possible issues could be:</p> <ul style="list-style-type: none"> <li>The length of value specified in the column exceeds the maximum field length. The following table lists the maximum length of each field:</li> </ul> <table border="1"> <thead> <tr> <th>Column Name</th> <th>Maximum Length</th> </tr> </thead> <tbody> <tr> <td>Account ID</td> <td>10</td> </tr> <tr> <td>Match Type</td> <td>8</td> </tr> <tr> <td>Match Value</td> <td>30</td> </tr> <tr> <td>Tender ID</td> <td>12</td> </tr> <tr> <td>Tender Amount</td> <td>15</td> </tr> <tr> <td>Payment Amount</td> <td>15</td> </tr> <tr> <td>Date Received</td> <td>10</td> </tr> <tr> <td>Bank Account</td> <td>30</td> </tr> <tr> <td>Payment Type</td> <td>4</td> </tr> <tr> <td>Check Number</td> <td>10</td> </tr> <tr> <td>Currency</td> <td>3</td> </tr> <tr> <td>Account ID Type</td> <td>8</td> </tr> <tr> <td>Account Identifier</td> <td>30</td> </tr> <tr> <td>Payment Char Type1, Payment Char Type2, ....., Payment Char Type5</td> <td>8</td> </tr> <tr> <td>Payment Char Value1, Payment Char Value2, ....., Payment Char Value5</td> <td>254</td> </tr> <tr> <td>MICR ID</td> <td>30</td> </tr> <tr> <td>Payor ID</td> <td>10</td> </tr> </tbody> </table>	Column Name	Maximum Length	Account ID	10	Match Type	8	Match Value	30	Tender ID	12	Tender Amount	15	Payment Amount	15	Date Received	10	Bank Account	30	Payment Type	4	Check Number	10	Currency	3	Account ID Type	8	Account Identifier	30	Payment Char Type1, Payment Char Type2, ....., Payment Char Type5	8	Payment Char Value1, Payment Char Value2, ....., Payment Char Value5	254	MICR ID	30	Payor ID	10

## Payment Upload

---

The **Payment Upload** screen allows you to search for a payment data file using various search criteria. Through this screen, you can:

- Upload a payment data file
- Cancel a payment data file
- View the records uploaded through a payment data file
- View the log of a payment data file
- Move the payment records to the staging area
- Edit a payment staging record
- Replace an existing payment data file
- View the reasons why the payment record is in the **Error** or **Invalid** status

This screen consists of the following zones:

- [Search Payment Data File](#) on page 1078
- [Payment Data Records](#) on page 1080
- [Payment Data File Log](#) on page 1081

## Search Payment Data File

The **Search Payment Data File** zone allows you to search for a payment data file which is uploaded and/or processed in the system. This zone contains the following two sections:

- **Search Criteria** — the **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
File Name	Used to search a particular payment data file.	No
User ID	Used to search payment data files which are uploaded by a particular user.	No
Upload From Date	Used to search payment data files which are uploaded from a particular date onwards.  <b>Note:</b> By default, the date is set to the current date minus 7 days. You can change the date, if required.	No
To	Used to search payment data files which are uploaded till a particular date.  <b>Note:</b> By default, the date is set to the current date. You can change the date, if required.	No
File Type	Used to search payment data files which are uploaded using a particular file type.	No
File Status	Used to search payment data files with a particular status. The valid values are: <ul style="list-style-type: none"> <li>• Cancelled</li> <li>• In Staging</li> <li>• Partially Processed</li> <li>• Pending</li> <li>• Processed</li> <li>• Validated</li> </ul>	No

**Note:** You must specify at least one search criterion while searching for a payment data file.

- **Search Results** — On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
File Name	Displays the name of the payment data file.
File Type	Indicates the type of the payment data file.
Upload Date	Displays the date and time when the payment data file was uploaded in the system.

Column Name	Column Description
Status	Indicates the status of the payment data file. The valid values are: <ul style="list-style-type: none"> <li>Cancelled</li> <li>In Staging</li> <li>Partially Processed</li> <li>Pending</li> <li>Processed</li> <li>Validated</li> </ul>
Total	Displays the total number of records that are uploaded through the payment data file.
Valid	Displays the number of records which are successfully validated in the system.
Invalid	Displays the number of records which could not pass through the validation process in the system.
Error	Displays the number of records where the data is incorrect.
In Staging	Displays the number of records which are copied from the pre-staging to staging area.
Processed	Displays the number of records for which payment events are created.
Staging Error	Displays the number of records for which payment events could not be created.
Cancel	On clicking the <b>Cancel</b> (  ) icon, you can cancel the payment data file. <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> The <b>Cancel</b> icon appears only when the status of the payment data file is <b>Validated</b>. In other words, you cannot cancel a payment data file when its records are moved to the staging area or when the payment events are created for the payment data file.</p> </div>
Move to Staging	On clicking the <b>Move to Staging</b> (  ) icon, you can move the valid and error records of the payment data file to the staging area. <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b></p> <p>The <b>Move to Staging</b> icon appears only when:</p> <ul style="list-style-type: none"> <li>The status of the payment data file is <b>Validated</b>.</li> <li>There are no invalid records in the payment data file.</li> <li>The <b>Disable Move to Staging</b> check box is not selected in the respective file type.</li> </ul> </div>

You can upload a payment data file by clicking the **Upload** link in the upper right corner of this zone. On clicking the **Broadcast** () icon corresponding to the payment data file, the **Payment Data Records** and **Payment Data File Log** zones appear.

## Payment Data Records

The **Payment Data Records** zone lists the records of the payment data file. This zone contains the following columns:

Column Name	Column Description
Payor Account ID	Indicates the account which made the payment.
Payee Account ID	Indicates the account for which the payment was made.
Match Type	Indicates the match type using which the payment must be matched.
Match Value	Indicates the entity (such as bill, contract, and so on) against which the payment must be matched.
Pay Tender ID	Displays the payment tender ID.
Tender Amount	Displays the tender amount.
Payment Amount	Displays the amount paid through the tender.
Currency	Indicates the currency in which the payment was made.
Date Received	Displays the date when the payment was made.
Bank Account	Displays the bank account from which the payment was made.
Tender Type	Indicates the type of tender through which the payment was made.
Check Number	Displays the check number if the payment was made through check.
MICR ID	Displays the MICR code.
Status	Indicates the status of the payment record. The valid values are: <ul style="list-style-type: none"> <li>• Valid</li> <li>• Invalid</li> <li>• Error</li> <li>• In Staging</li> <li>• Processed</li> <li>• Error in Staging</li> </ul>

Column Name	Column Description
Payment Information Event	<p>Displays information about the payment event which is created for the payment record.</p> <p><b>Note:</b></p> <p>It has a link. On clicking the link, the <b>Payment Event</b> screen appears with the details of the respective payment event.</p> <p>The data appears in this column only when the status of the payment record is <b>Processed</b>.</p>
Payment Staging Record	<p>On clicking the <b>Edit</b> (✎) icon, the <b>Payment Upload Staging</b> screen appears where you can edit the details of the payment staging record.</p> <p><b>Note:</b> The <b>Edit</b> icon appears only when the status of the payment record is <b>In Staging</b>.</p>
Error Message	<p>On clicking the <b>View</b> (👁) icon, the <b>Error Messages</b> window appears where you can view the reasons why the status of the payment record is <b>Invalid</b> or <b>Error</b>.</p> <p><b>Note:</b> The <b>View</b> icon appears only when the status of the payment record is <b>Error</b> or <b>Invalid</b>.</p>

**Note:** Pagination is used to display limited number of records in the **Payment Data Records** zone. By default, 20 records are displayed in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

By default, the **Payment Data Records** zone does not appear in the **Payment Upload** screen. It appears only when you click the **Broadcast** (📡) icon corresponding to the payment data file in the **Search Payment Data File** zone.

## **Payment Data File Log**

The **Payment Data File Log** zone lists the complete trail of actions performed on the payment data file. This zone contains the following columns:

Column Name	Column Description
Date/Time	Displays the date and time when the action was performed on the payment data file.
Log Details	Displays the details about the action performed on the payment data file.
User	Indicates the user who has performed the action on the payment data file.

By default, the **Payment Data File Log** zone does not appear in the **Payment Upload** screen. It appears only when you click the **Broadcast** (📡) icon corresponding to the payment data file in the **Search Payment Data File** zone.

## Searching for a Payment Data File

### Prerequisites

To search for a payment data file, you should have:

- File types defined in the application (where the feed type is set to Payment Upload Data)

### Procedure

To search for a payment data file:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Financial** and then click **Payment Upload**.  
The **Payment Upload** screen appears.
3. Enter the search criteria in the **Search Payment Data File** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

4. Click **Search**.

A list of payment data files that meet the search criteria appears in the **Search Results** section.

### Related Topics

<b>Payment Upload</b> screen	<a href="#">Payment Upload</a> on page 1077
<b>Search Payment Data File</b> zone	<a href="#">Search Payment Data File</a> on page 1078

## Uploading a Payment Data File

### Prerequisites

To upload a payment data file, you should have:

- File types defined in the application (where the feed type is set to Payment Upload Data)
- Payment data in the required CSV file format

### Procedure

To upload a payment data file:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Financial** and then click **Payment Upload**.  
The **Payment Upload** screen appears.

- Click the **Upload** link in the upper right corner of the **Search Payment Data File** zone.

The **Upload Payment Data File** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
File Type	Used to indicate the type of payment data file.  <b>Note:</b> The list includes only those file types where the feed type is set to <b>Payment Upload Data</b> .	Yes
File Name	Used to specify the name and path of the payment data file that you want to upload.  <b>Note:</b> You can also click the <b>Browse</b> button corresponding to this field to browse to the location where the payment data file is available in the system.	Yes
Replace Existing File	Used to indicate whether you want to replace any existing file in the system. You must select this check box when you want to upload the same file once again.	No

- Select the type of payment data file from the **File Type** list.
- Click the **Browse** button corresponding to the **File Name** field.

The **Choose File to Upload** dialog box appears.

- Browse to the location where the payment data file that you want to upload is available.
- Click **Open**.

The payment data file name and path appears in the **File Name** field.

- Click **Upload**.

A message appears indicating that the payment data file is uploaded successfully. If an error occurs while parsing, the payment data file is not uploaded in the system.

**Note:** If a payment data file contains more than 1000 payment records, the system will not allow you to upload the payment data file in the system. Therefore, ensure that a payment data file contains less than 1000 payment records.

- Click **OK** in the message box.

On uploading the payment data file, the payment records are copied to the pre-staging area and the status of the payment data file is set to **Pending**. The validation process starts immediately after the payment data file is uploaded in the system. If a payment record is successfully validated, the status of the payment record is set to **Valid**. If a payment record contains incorrect or missing data, the status of the payment record is set to either **Invalid** or **Error** depending on the scenario. For more information about the scenarios when a payment record is set to the **Invalid** or **Error** status, see [Payment Record Status Transition](#) on page 1071.

Once the validation process is completed, the status of the payment data file is changed to **Validated**. If a payment data file contains an invalid record, you need to correct or add missing data in the CSV file and then upload the file once again. Unless, a payment data file has no invalid records, you cannot move any record of the payment data file to the staging area.

## Replacing an Existing File

### Prerequisites

To replace an existing payment data file, you should have:

- File types defined in the application (where the feed type is set to Payment Upload Data)
- Payment data in the required CSV file format

### Procedure

To replace an existing payment data file:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Financial** and then click **Payment Upload**.  
The **Payment Upload** screen appears.
3. Click the **Upload** link in the upper right corner of the **Search Payment Data File** zone.  
The **Upload Payment Data File** screen appears.
4. Select the type of payment data file from the **File Type** list.
5. Click the **Browse** button corresponding to the **File Name** field.  
The **Choose File to Upload** dialog box appears.
6. Browse to the location where the payment data file that you want to upload is available.
7. Click **Open**.  
The payment data file name and path appears in the **File Name** field.
8. Select the **Replace Existing File** check box.

**Note:** You can replace an existing file only when the payment data file is in the **Validated** status. In other words, you cannot replace a file whose payment records are already moved to the staging area and/or for which payment events are already created.

9. Click **Upload**.

A message appears indicating that the payment data file is uploaded successfully. If an error occurs while parsing, the payment data file is not uploaded in the system.

10. Click **OK** in the message box.

Once the payment data file is successfully uploaded, the status of the payment data file is set to **Pending**. The validation process starts immediately after the payment data file is uploaded in the system. If a payment record is successfully validated, the status of the payment record is changed to **Valid**. If a payment record contains incorrect or missing data, the status of the payment record is changed to either **Invalid** or **Error** depending on the scenario. For more information about the scenarios when a payment record is set to the **Invalid** or **Error** status, see [Payment Record Status Transition](#) on page 1071. You can view the details of the uploaded payment data file and its records in the **Payment Upload** screen.

Once the validation process is completed, the payment records are copied to the pre-staging area and the status of the payment data file is changed to **Validated**. If a payment data file contains an invalid record, you need to

correct or add missing data in the CSV file and then upload the file once again. Unless, a payment data file has no invalid records, you cannot move any record of the payment data file to the staging area.

## Canceling a Payment Data File

There might be situations when incorrect payment data file is uploaded in the system. In such case, the system provides you with an ability to cancel the file. However, note that you can cancel a payment data file only when it is in the **Validated** status. In other words, you cannot cancel a payment data file when its records are moved to the staging area or when the payment events are created for the payment data file.

### Procedure

To cancel a payment data file:

1. Search for the payment data file in the **Payment Upload** screen.
2. In the **Search Results** section, click the **Cancel** () icon in the **Cancel** column corresponding to the payment data file that you want to cancel.

A message appears confirming whether you want to cancel the payment data file.

**Note:** The **Cancel** icon appears only when the status of the payment data file is **Validated**.

3. Click **OK**.

The status of the payment data file is changed to **Cancelled**.

## Moving the Payment Records to the Staging Area

### Procedure

To move the payment records to the staging area:

1. Search for the payment data file in the **Payment Upload** screen.
2. In the **Search Results** section, click the **Move to Staging** () icon in the **Move to Staging** column corresponding to the payment data file whose records you want to move to the staging area.

A message appears confirming whether you want to move all payment records to the payment upload staging area.

**Note:**

The **Move to Staging** icon appears only when:

- The status of the payment data file is **Validated**.
- There are no invalid records in the payment data file.
- The **Disable Move to Staging** check box is not selected in the respective file type.

The system allows you to move only valid and error records of a payment data file to the staging area. If a payment data file contains an invalid record, you cannot move any record of the payment data file to the staging area.

3. Click **OK** in the message box.

A message appears indicating that the payment records are successfully copied from the pre-staging to staging area.

4. Click **OK** in the message box.

The status of the payment data file is changed to **In Staging**. In addition, the status of the payment records in the pre-staging area is changed to **In Staging** and the status of the deposit control, tender control, and payment tender staging records is set to **Pending**.

**Related Topics**

For more information on...	See...
How to search for a payment data file	<a href="#">Searching for a Payment Data File</a> on page 1082

**Editing a Payment Staging Record**

You can edit a payment record only when it is moved from the pre-staging to staging area. On editing a payment record in the staging area, the system does not reflect the changes in the pre-staging area. It only reflects the changes in the staging area.

**Procedure**

To edit a payment staging record:

1. Search for the payment data file in the **Payment Upload** screen.
2. In the **Search Results** section, click the **Broadcast**  icon corresponding to the payment data file whose staging records you want to edit.

The **Payment Data Records** and **Payment Data File Log** zones appear.

3. In the **Payment Data Records** zone, click the **Edit**  icon in the **Payment Staging Record** column corresponding to the payment record whose details you want to edit in the staging area.

The **Payment Upload Staging** screen appears. It contains the following tabs:

- **Tender Details** — Enables you to view and edit the tender control staging details.
- **Payment Advice** — Enables you to view and edit the payment staging details.
- **Payment Characteristics** — Enables you to view and edit the payment characteristic staging details.

**Note:** The **Edit** icon appears only when the status of the payment record is **In Staging**.

4. Modify the required details.
5. Click the **Save** link in the **Application** toolbar.

The changes made to the payment staging record are saved.

## Viewing the Records of a Payment Data File

### Procedure

To view the records of a payment data file:

1. Search for the payment data file in the **Payment Upload** screen.
2. In the **Search Results** section, click the **Broadcast**  icon corresponding to the payment data file whose records you want to view.

The **Payment Data Records** and **Payment Data File Log** zones appear.

3. View the details of the payment records, which are uploaded through the payment data file, in the **Payment Data Records** zone.

### Related Topics

## Viewing the Error Messages

The system allows you to view the reasons why the payment record in a payment data file is in the **Error** or **Invalid** status.

### Procedure

To view the error messages:

1. Search for the payment data file in the **Payment Upload** screen.
2. In the **Search Results** section, click the **Broadcast**  icon corresponding to the payment data file whose payment records are in the **Error** or **Invalid** status.

The **Payment Data Records** and **Payment Data File Log** zones appear.

3. In the **Payment Data Records** zone, click the **View**  icon in the **Error Message** column corresponding to the payment record which is in the **Error** or **Invalid** status.

The **Error Messages** window appears. It lists the reasons why the payment record is in the **Error** or **Invalid** status. If the payment record is in the **Invalid** status, you need to correct or add missing data in the CSV file and then upload the file once again. Unless, a payment data file has no invalid records, you cannot move any record of the payment data file to the staging area.

**Note:** The **View** icon appears only when the status of the payment record is **Error** or **Invalid**.

4. View the reasons in the **Error Messages** window.
5. Click **OK**.

# Chapter 14

---

## Freeze Payments on Notification

---

### Topics:

- [Freeze Payments on Notification Process](#)
- [Prerequisites](#)
- [Automatic Payment or Refund Clearing Staging Record Status Transition](#)
- [EDI 824 File Format](#)
- [Sample EDI 824 File Format](#)
- [Automatic Payment and Refund Upload Reason](#)
- [Automatic Payment and Refund Clearing Staging](#)

Oracle Revenue Management and Billing facilitates you to create automatic payments and refunds when the automatic payment option is enabled for an account. A clearing record is created for each automatic payment and refund in the system. You can then send the automatic payment and refund clearing records to the auto clearing house for verification. The system provides the mechanism to extract the automatic payment clearing records in a flat file. You can then send the flat file to the auto clearing house for verification. However, the implementation team will have to write the custom logic to extract the automatic refund clearing records in a file which you can then send to the auto clearing house for verification.

Once the auto clearing house reviews the automatic payment clearing records, the system allows you to upload review comments received in the EDI 824 file format. On uploading an EDI 824 file, an automatic payment clearing staging record is created for each valid automatic payment clearing ID. The data received from the auto clearing house is stored in the following staging tables:

- CI\_APAY\_STAGE\_UP
- CI\_APAY\_STAGE\_UP\_REM
- CI\_APAY\_STGUP\_CHAR

The implementation team will have to write the custom logic to upload review comments for automatic refund clearing records in the above mentioned staging tables. The review comments for automatic payment clearing records can be received in the form of reason (i.e. upload reason) and error codes (i.e. payment cancelation reason or NOC reason) which will help you to determine whether the automatic payment must be frozen or cancelled in the system. Similarly, the review comments for automatic refund clearing records can be received in the form of reason (i.e. upload reason) and error codes (i.e. void status reason) which will help you to determine whether the refund request must be voided and refund adjustments must be cancelled in the system.

Once the review comments are received from the auto clearing house, you can do the following:

- Freeze or cancel the automatic payments
- Void the refund requests and cancel the refund adjustments

For more detailed information about the freeze payments on notification process, see [Freeze Payments on Notification Process](#) on page 1091.

The system allows you to define upload reasons, payment cancelation reasons, NOC reasons, and void status reasons. The system also allows you to edit and delete the automatic payment and refund clearing staging records through the user interface. However, you can edit an automatic payment or refund clearing staging record only when it is in the **Pending** or **Error** status, and you can

delete an automatic payment or refund clearing staging record only when it is in the **Pending** status. During the freeze payments on notification process, the automatic payment and refund clearing staging records go through various statuses in its lifecycle. For more information about the statuses, see [Automatic Payment or Refund Clearing Staging Record Status Transition](#) on page 1095.

For more information on how to setup the freeze payments on notification process, see [Prerequisites](#) on page 1094.

## Freeze Payments on Notification Process

---

The Freeze Payments on Notification process includes the following sub-processes:

1. [Creating Automatic Payments and Refunds](#) on page 1091
2. [Generating a Flat File](#) on page 1091
3. [Uploading Response from Auto Clearing House \(ACH\)](#) on page 1091
4. [Freezing or Canceling Automatic Payments](#) on page 1092
5. [Voiding Refund Requests and Canceling Refund Adjustments](#) on page 1093
6. [Generating To Do Entries](#) on page 1093
7. [Creating Tender Controls](#) on page 1093

Note that during the freeze payments on notification process, you need to execute the following batches in the specified order:

1. Create Automatic Payments and Refunds (APAYCRET)
2. Activate Automatic Payments (ACTVTAPY)
3. Extract Automatic Payments (APAYACH)
4. Upload Response from Auto Clearing House (C1-APACK)
5. Freeze or Cancel Automatic Payments (APAYRA)
6. Cancel Automatic Refunds (AREFRA)
7. To Do Creation for Automatic Payment Exception Records (APAYUPTD)
8. Create Tender Controls for Automatic Payments (BALAPY)

For more information about these batches, see *Oracle Revenue Management and Billing Batch Guide*.

### Creating Automatic Payments and Refunds

If you have configured the automatic payment option for an account, the system calculates the automatic payment amount and extract date during the bill completion and stamps these details against the bill in the **CI\_BILL\_ACH** table. The **Create Automatic Payments and Refunds (APAYCRET)** batch allows you to create automatic payment and refund request depending on whether the automatic payment amount is in debit or credit. It also creates a clearing record for each automatic payment and refund in the **CI\_APAY\_CLR\_STG** and **CI\_ADJ\_CLR\_STG** tables, respectively. For more information about the batch, see *Oracle Revenue Management and Billing Batch Guide*.

### Generating a Flat File

Unless you activate a clearing record, you cannot extract the clearing record in a flat file. The **Activate Automatic Payments (ACTVTAPY)** batch allows you to activate a clearing record. It stamps the **APAYACH** batch control and incremental batch run number on the clearing record.

Once the clearing records are activated, you can extract the clearing records in a flat file. The **Extract Automatic Payments (APAYACH)** batch allows you to extract the clearing records with the latest batch run number in a flat file. The flat file is then sent to the auto clearing house for review. For more information about these batches, see *Oracle Revenue Management and Billing Batch Guide*.

**Note:** At present, you cannot activate and extract the automatic refund clearing records using the **Activate Automatic Payments (ACTVTAPY)** and **Extract Automatic Payments (APAYACH)** batches, respectively. The implementation team will have to write the custom logic to activate and extract automatic refund clearing records in a flat file.

### Uploading Response from Auto Clearing House (ACH)

Once the auto clearing house reviews the automatic payment clearing records, the review comments can be shared in the EDI 824 file format. An EDI 824 file may contain the review comments for one or more automatic payment clearing records. You can upload these EDI 824 files and store the review comments in the staging area using the **Upload Response from Auto Clearing House (C1-APACK)** batch.

On uploading an EDI 824 file, the system checks whether the automatic payment clearing ID specified in each record exists in the system. If so, it creates an automatic payment clearing staging record for the automatic payment clearing

ID in the **CI\_APAY\_STAGE\_UP** table. If the acknowledgement code in the record is set to **TE** or **TR**, the system considers that the auto clearing house has rejected the automatic payment clearing record. The reason code (i.e. upload reason) specified in the **Reject Upload Reason** parameter of the **C1-APAY** algorithm is stored corresponding to the automatic payment clearing staging record in the **CI\_APAY\_STAGE\_UP\_REM** table. In addition, the error code (i.e. payment cancelation reason) is stored corresponding to the automatic payment clearing staging record in the **CI\_APAY\_STAGE\_UP\_REM** table.

However, if the acknowledgement code is blank or if the acknowledgement code is set to a value other than **TE** or **TR**, the system considers that the auto clearing house has accepted the automatic payment clearing record. The reason code (i.e. upload reason) specified in the **Success Upload Reason** parameter of the **C1-APAY** algorithm is stored corresponding to the automatic payment clearing staging record in the **CI\_APAY\_STAGE\_UP\_REM** table. In addition, the error code (i.e. NOC reason) is stored corresponding to the automatic payment clearing staging record in the **CI\_APAY\_STAGE\_UP\_REM** table. In this case, the record may contain more than one error code.

The status of the automatic payment clearing staging record is set to **Pending**. If the error code (i.e. payment cancelation reason or NOC reason) is invalid, the status of the automatic payment clearing staging record is set to **Error**. An exception is logged in the **CI\_APAY\_STGUP\_EXC** table. In addition, if the status of the NOC reason is **Inactive** in the system, the status of the automatic payment clearing staging record is set to **Error** and an exception is logged in the **CI\_APAY\_STGUP\_EXC** table.

The system sets the automatic payment distribution and freeze date (i.e. **APAY\_DIST\_FRZ\_DT**) for each automatic payment clearing record (for which automatic payment clearing staging record is added in the system) to the payment date (which is stored on the payment event). For more information about the batch, see *Oracle Revenue Management and Billing Batch Guide*.

**Note:** An additional table named **CI\_APAY\_STGUP\_CHAR** is available which the implementation team can use to store additional information about the automatic payment clearing staging record in the form of characteristics.

To ensure that the EDI 824 files are uploaded successfully, you need to set the following parameters in an algorithm which is created using the **C1-APAY** algorithm type:

- **Line Separator** - Used to indicate the character specified in the EDI 824 files to represent the end of line.
- **Field Separator** - Used to indicate the character specified in the EDI 824 files to represent the end of data record.
- **Reject Upload Reason** - Used to indicate the upload reason which you want to use when the auto clearing house has rejected the automatic payment clearing record.
- **Success Upload Reason** - Used to indicate the upload reason which you want to use when the auto clearing house has accepted the automatic payment clearing record with or without Notice to Change (NOC).

**Note:** You must specify an upload reason which is already defined in the system.

For more information about the EDI 824 file format, see [EDI 824 File Format](#) on page 1095.

## Freezing or Canceling Automatic Payments

Once the review comments are received in the form of reason and error codes for an automatic payment clearing record, you need to freeze or cancel the automatic payment based on the reason code. You can freeze or cancel automatic payments through the **Freeze or Cancel Automatic Payments (APAYRA)** batch.

On executing the **Freeze or Cancel Automatic Payments (APAYRA)** batch, the system checks whether the reason code (i.e. upload reason) and error code (i.e. payment cancelation reason or NOC reason) specified in the automatic payment clearing staging record exist in the system. This batch considers only those automatic payment clearing staging records which are in the **Pending** status and for which payment freeze date is specified in the automatic payment clearing record. If the reason code and error code exist in the system, the system executes the algorithms attached to the reason code in the specified sequence. If the type of reason code is **Cancel**, the attached algorithm cancels the automatic payment and payment event. If the type of reason code is **Success**, the attached algorithm freezes the automatic payment on the payment freeze date. However, if the type of reason code is **Success** and the error code is specified along with the reason code, the attached algorithm freezes the automatic payment on the payment freeze date, stores error codes (i.e.

NOC reasons) as payment tender characteristics and then creates a To Do entry to notify user about these NOC reasons. Finally, the status of the automatic payment clearing staging record is changed to **Complete**.

If the reason code and/or error code (i.e. upload reason, payment cancelation reason, or NOC reason) specified in the automatic payment clearing staging record does not exist in the system, the status of the automatic payment clearing staging record is changed to **Error**. In addition, if the status of the NOC reason is **Inactive** in the system, the status of the automatic payment clearing staging record is changed to **Error**. For more information about the batch, see *Oracle Revenue Management and Billing Batch Guide*.

## Voiding Refund Requests and Canceling Refund Adjustments

Once the auto clearing house reviews the automatic refund clearing records and shares the review comments, the implementation team will have to store the review comments in the following staging tables:

- **CI\_APAY\_STAGE\_UP** – Used to store the automatic payment or refund clearing staging record for an automatic payment or refund clearing record, respectively. The status of the automatic payment or refund clearing staging record must be set to **Pending**.
- **CI\_APAY\_STAGE\_UP\_REM** – Used to store the reason and error codes of each automatic payment or refund clearing staging record.
- **CI\_APAY\_STGUP\_CHAR** – Used to store additional information about the automatic payment or refund clearing staging record in the form of characteristics.

The review comments must be received in the form of reason (i.e. upload reason) and error codes (i.e. void status reason) for an automatic refund clearing record. On executing the **Cancel Automatic Refunds (AREFRA)** batch, it checks whether the reason and error codes specified in the automatic refund clearing staging record exist in the system. If the reason and error codes exist in the system, the system executes the algorithms attached to the reason code in the specified sequence. If the type of reason code is **Cancel**, the attached algorithm changes the status of the refund request to **Voided** and the corresponding refund adjustments are canceled. If the type of reason code is **Success**, no changes are made to the refund request and refund adjustments. Finally, the status of the automatic refund clearing staging record is changed to **Complete**.

If the reason code and/or error code (i.e. upload reason, void status reason) specified in the automatic refund clearing staging record does not exist in the system, the status of the automatic refund clearing staging record is changed to **Error**.

## Generating To Do Entries

If an exception occurs while executing the **Freeze or Cancel Automatic Payments (APAYRA)** batch, you can notify the user about such exception. The **To Do Creation for Automatic Payment Exception Records (APAYUPTD)** batch allows you to create a To Do using the APAYUPTD To Do type when an exception is logged for an automatic payment clearing staging record in the **CI\_APAY\_STGUP\_EXC** table. The system creates one To Do entry for all exceptions that have occurred for an automatic payment clearing staging record. For more information about these batches, see *Oracle Revenue Management and Billing Batch Guide*.

**Note:** At present, a To Do is not created when an exception is logged for an automatic refund clearing staging record in the **CI\_APAY\_STGUP\_EXC** table while executing the **Cancel Automatic Refunds (AREFRA)** batch.

## Creating Tender Controls

Once you freeze the automatic payments, you need to create tender and deposit controls. The **Create Tender Controls for Automatic Payments (BALAPY)** batch allows you to create tender and deposit controls for each automatic payment which is frozen, but not yet linked to any tender control. One tender control is created for the **APAYACH** batch control and batch run number combination. The payment tenders of these automatic payments are then linked to the tender control.

This batch also balances the open tender control records and changes the status of the tender and deposit controls, accordingly. For more information about the batch, see *Oracle Revenue Management and Billing Batch Guide*.

## Prerequisites

---

To setup the freeze payments on notification process, you need to do the following:

- Define the automatic payment instructions for the account for which you want to enable the automatic payment option.

**Note:** You can either define non-rule based effective dated automatic payment instructions in the **Auto Pay** tab of the **Account** screen or define rule based effective dated automatic payment instructions through the **Auto Pay Rule** screen.

- Set the **Autopay Creation Option** field to **Freeze Payment on Notification** in the **Billing** tab of the **Installation Options** screen.
- Create an automatic payment creation algorithm using the **APAY-CREATE** algorithm type and attach it to the **Automatic Payment Creation** system event in the **Algorithms** tab of the **Installation Options - Framework** screen.
- Create an automatic refund creation algorithm using the **C1-AREF-CRET** algorithm type and attach it to the **Automatic Adjustment Creation** system event in the **Algorithms** tab of the **Installation Options - Framework** screen.
- Create a date calculation algorithm using the **APAY-DTCALC** algorithm type and attach it to the **Autopay Date Calculation Alg** spot of the auto pay route type which is specified on the account's automatic payment instruction.
- Define the required upload reasons in the system.
- Define the required payment cancelation reasons in the system.
- Define values for the **APAY\_UPL\_NOC\_LOOKUP** lookup field.

**Note:** The **APAY\_UPL\_NOC\_LOOKUP** lookup field is used to define NOC reasons. The NOC reason specified in the automatic payment clearing staging record must exist in this lookup field and its status must be **Active**. Otherwise, the status of the automatic payment clearing staging record is changed to **Error**.

- Define voided status reasons for the **C1-RefundReq** business object.
- Create an automatic payment success algorithm using the **C1-APAY-SUCC** algorithm type and attach it to the reason code where the reason type is set to **Success**.

**Note:** You must attach the automatic payment success algorithm to an upload reason which you want to use while freezing automatic payments.

- Create an automatic payment cancel algorithm using the **C1-APAY-CAN** algorithm type and attach it to the reason code where the reason type is set to **Cancel**.

**Note:** You must attach the automatic payment cancel algorithm to an upload reason which you want to use while canceling automatic payments.

- Create a void automatic refund algorithm using the **C1-AREF-VOID** algorithm type and attach it to the reason code where the reason type is set to **Cancel**.

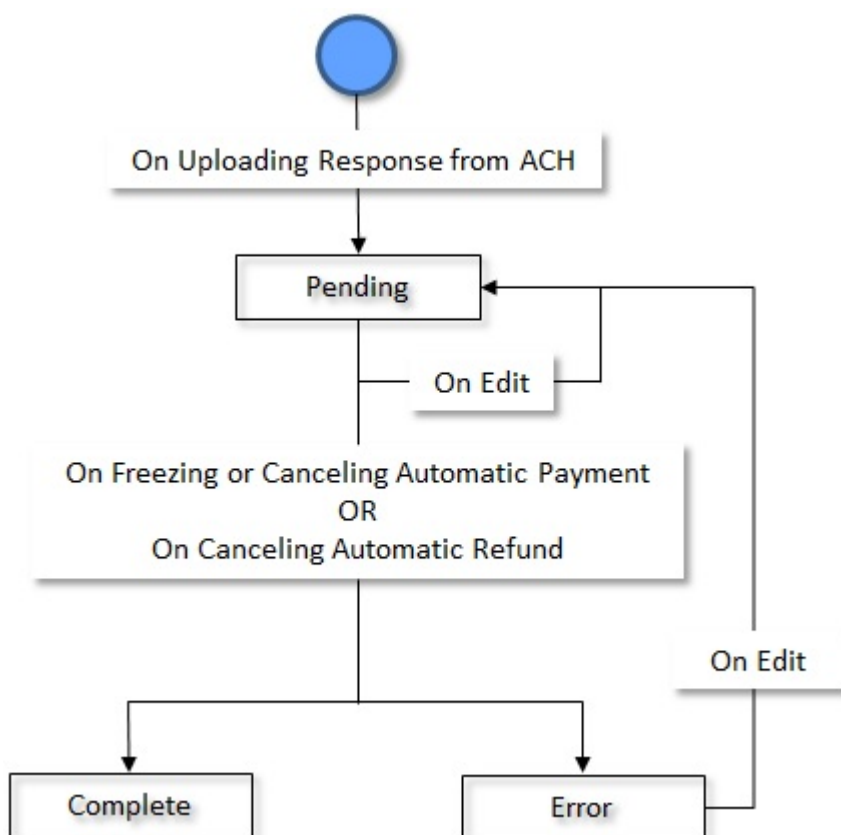

**Note:** You must attach the void automatic refund algorithm to an upload reason which you want to use while voiding automatic refunds.

- Create a characteristic type where the characteristic entity is set to **Payment Tender**. And, then specify this characteristic type as the value for the **Tender Characteristic Type** parameter in an algorithm which is created using the **C1-APAY-SUCC** algorithm type.

- Assign the **C1-ACH** To Do type to a To Do role whose users must receive the To Do entries generated when automatic payments are frozen with a Notice to Change (NOC).
- Assign the **APAYUPTD** To Do type to a To Do role whose users must receive the To Do entries generated when exceptions have occurred while executing the **Freeze or Cancel Automatic Payments (APAYRA)** batch.
- Define values for the following parameters in an algorithm which is created using the **C1-APAY** algorithm type:
  - Line Separator
  - Field Separator
  - Reject Upload Reason
  - Success Upload Reason

## Automatic Payment or Refund Clearing Staging Record Status Transition

The following figure graphically indicates how an automatic payment or refund clearing staging record moves from one status to another during the freeze payments on notification process:

## EDI 824 File Format

Before uploading the EDI 824 file, you need to ensure that the file contains the following tags and attributes:

Tag	Attribute	Description	Mandatory (Yes or No)
OTI	Reference Number	Used to specify the automatic payment clearing ID. It indicates the automatic payment clearing record for which the review comments are received from the auto clearing house.	Yes
OTI	Acknowledgement Code	Used to indicate whether the automatic payment clearing record is accepted or rejected by the auto clearing house. If you want to reject the automatic payment clearing record, you must specify <b>TE</b> or <b>TR</b> as the acknowledgement code. However, if you want to approve the automatic payment clearing record, you can either specify any value other than <b>TE</b> or <b>TR</b> or leave this attribute blank.	No
TED	Error Code	Used to indicate either of the following: <ul style="list-style-type: none"> <li>The payment cancellation reason when the automatic payment clearing record is rejected by the auto clearing house.</li> </ul> <div style="border: 1px solid black; padding: 2px; margin: 5px 0;"><b>Note:</b> You must specify a payment cancellation reason which is already defined in the system.</div> <ul style="list-style-type: none"> <li>The Notice to Change (NOC) reason when the automatic payment clearing record is accepted by the auto clearing house with a Notice to Change (NOC).</li> </ul> <div style="border: 1px solid black; padding: 2px; margin: 5px 0;"><b>Note:</b> You must specify a NOC reason which is already defined in the <b>APAY_UPL_NOC_LOOKUP</b> lookup field.</div>	Yes (Conditional)  <div style="border: 1px solid black; padding: 2px; margin: 5px 0;"><b>Note:</b> This attribute is required when the automatic payment clearing record is rejected by the auto clearing house.</div>
TED	Error Description	Used to specify the reason why the automatic payment clearing record is either rejected or accepted with a Notice to Change (NOC).	No

## Sample EDI 824 File Format

```

OTI*TR*TN*411302586842\
TED*WA01*WRONG ACCOUNT\
OTI*TF*TN*411302525641\
OTI*TO*TN*806152348038\
TED*BR01*Bill Reopened\
OTI*TO*TN*806152307159\
OTI*TE*TN*806152307229\
TED*WA01*WRONG ACCOUNT\

```

Here, TR, TF, TO, and TE are acknowledgement codes. TR and TE indicate that the automatic payment clearing records are rejected. And, TF and TO indicate that the automatic payment clearing records are accepted with or without a Notice to Change (NOC).

Here, 411302586842, 411302525641, 806152348038, 806152307159, and 806152307229 are automatic payment clearing records, and WA01 and BR01 are error codes. WA01 is a payment cancellation reason and BR01 is a NOC reason. The string “WRONG ACCOUNT” and “Bill Reopened” are error descriptions.

For more information about the EDI 824 file format, see [EDI 824 File Format](#) on page 1095.

## Automatic Payment and Refund Upload Reason

Once the auto clearing house reviews the automatic payment and refund clearing records, an appropriate upload reason must be received for each clearing record. The upload reason indicates the following:

- Whether the automatic payment must be frozen or cancelled in the system
- Whether the automatic refund must be canceled in the system (i.e. the refund request must be voided and refund adjustments must be canceled)

The **Automatic Payment and Refund Upload Reason** screen allows you to define, edit, and delete an upload reason. It contains the following zone:

- [Upload Reasons](#) on page 1097

## Upload Reasons

The **Upload Reasons** zone lists upload reasons that are already defined in the system. It contains the following columns:

Column Name	Column Description
Upload Reason	Displays the upload reason.
Reason Type	Indicates the type of upload reason. The valid values are: <ul style="list-style-type: none"> <li>• Cancel</li> <li>• Success</li> </ul>
Eligible for Processing	Indicates whether the algorithms attached to the upload reason must be triggered while executing the <b>Freeze or Cancel Automatic Payments (APAYRA)</b> or <b>Cancel Automatic Refunds (AREFRA)</b> batch. The valid values are: <ul style="list-style-type: none"> <li>• Y</li> <li>• N</li> </ul>
Description	Displays the description of the upload reason.
Edit	On clicking the <b>Edit</b> (  ) icon, the <b>Automatic Payment and Refund Upload Reason</b> screen appears where you can edit the details of the upload reason.
Delete	On clicking the <b>Delete</b> (  ) icon, you can delete the upload reason.

You can define an upload reason by clicking the **Add** link in the upper right corner of this zone.

### Related Topics

How to define an upload reason	<a href="#">Defining an Upload Reason</a> on page 1098
How to edit an upload reason	<a href="#">Editing an Upload Reason</a> on page 1100
How to delete an upload reason	<a href="#">Deleting an Upload Reason</a> on page 1102

## Defining an Upload Reason

### Prerequisites

To define an upload reason, you should have:

- Automatic payment success algorithm defined using the **C1-APAY-SUCC** algorithm type
- Automatic payment cancel algorithm defined using the **C1-APAY-CAN** algorithm type
- Void automatic refund algorithm defined using the **C1-AREF-VOID** algorithm type

### Procedure

To define an upload reason:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **A** and then click **Automatic Payment and Refund Upload Reason**.  
The **Automatic Payment and Refund Upload Reason** screen appears.
3. Click the **Add** link in the upper right corner of the **Upload Reasons** zone.

The **Automatic Payment and Refund Upload Reason** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Upload Reason	Used to specify the upload reason.	Yes
Description	Used to specify the description for the upload reason.	Yes
Reason Type	Used to indicate the type of upload reason. The valid values are: <ul style="list-style-type: none"> <li>• <b>Cancel</b> — This type of upload reason indicates that you must cancel the automatic payment or refund in the system. In this case, the error code indicates the reason why the automatic payment is cancelled or the refund request is voided.</li> <li>• <b>Success</b> — This type of upload reason indicates that you must freeze the automatic payment on the payment freeze date. If the error code is specified, it indicates that you must freeze the automatic payment, and at the same time notify user that the automatic payment is accepted with a Notice to Change (NOC). The NOC reason is stored as payment tender characteristic in the system. You can specify more than one error code (i.e. NOC reasons) with this type of upload reason. On freezing an automatic payment, the user is notified about these NOC reasons through a To Do entry. The system creates one To Do entry using the <b>C1-ACH</b> To Do type for all NOC reasons specified in the automatic payment clearing staging record.</li> </ul>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Eligible for Processing	Used to indicate whether the algorithms attached to the upload reason must be triggered while executing the <b>Freeze or Cancel Automatic Payments (APAYRA)</b> or <b>Cancel Automatic Refunds (AREFRA)</b> batch.	No

In addition, this screen contains a grid where you can attach algorithms to the upload reason. It contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Sequence	Used to indicate the order in which the algorithm must be triggered.	Yes (Conditional) <b>Note:</b> This field is required when you are attaching an algorithm to the upload reason.
Algorithm	Used to attach an algorithm to the upload reason. If the type of the upload reason is set to <b>Success</b> , you must attach the automatic payment success algorithm. However, if the type of the upload reason is set to <b>Cancel</b> , you must attach either automatic payment cancel or void automatic refund algorithm depending on whether the upload reason will be used for automatic payment or automatic refund cancelation.  <b>Note:</b> The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Algorithm Code Search</b> window appears. On specifying the algorithm code, the description of the algorithm appears corresponding to the <b>Algorithm</b> field.	Yes (Conditional) <b>Note:</b> This field is required when you are attaching an algorithm to the upload reason.

- Enter the required details in the **Automatic Payment and Refund Upload Reason** screen.

**Note:** If you want to attach more than one algorithm to the upload reason, click the **Add**  icon and then specify the details. However, if you want to remove an algorithm from the upload reason, click the **Delete**  icon corresponding to the algorithm.

- Click **Save**.

The upload reason is defined.

### Related Topics

## Editing an Upload Reason

### Prerequisites

To edit an upload reason, you should have:

- Automatic payment success algorithm defined using the **C1-APAY-SUCC** algorithm type
- Automatic payment cancel algorithm defined using the **C1-APAY-CAN** algorithm type
- Void automatic refund algorithm defined using the **C1-AREF-VOID** algorithm type

### Procedure

To edit an upload reason:

1. Click the **Admin** link in the **Application** toolbar.

A list appears.

2. From the **Admin** menu, select **A** and then click **Automatic Payment and Refund Upload Reason**.

The **Automatic Payment and Refund Upload Reason** screen appears.

3. In the **Upload Reasons** zone, click the **Edit** (✎) icon in the **Edit** column corresponding to the upload reason whose details you want to edit.

The **Automatic Payment and Refund Upload Reason** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Upload Reason	Displays the upload reason.	Not applicable
Description	Used to specify the description for the upload reason.	Yes
Reason Type	Used to indicate the type of upload reason. The valid values are: <ul style="list-style-type: none"> <li>• <b>Cancel</b> — This type of upload reason indicates that you must cancel the automatic payment or refund in the system. In this case, the error code indicates the reason why the automatic payment is cancelled or the refund request is voided.</li> <li>• <b>Success</b> — This type of upload reason indicates that you must freeze the automatic payment on the payment freeze date. If the error code is specified, it indicates that you must freeze the automatic payment, and at the same time notify user that the automatic payment is accepted with a Notice to Change (NOC). The NOC reason is stored as payment tender characteristic in the system. You can specify more than one error code (i.e. NOC reasons) with this type of upload reason. On freezing an automatic payment, the user is notified about these NOC reasons through a To Do entry. The system creates one To Do entry using the <b>C1-ACH</b> To Do type for all NOC reasons specified in the automatic payment clearing staging record.</li> </ul>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Eligible for Processing	Used to indicate whether the algorithms attached to the upload reason must be triggered while executing the <b>Freeze or Cancel Automatic Payments (APAYRA)</b> or <b>Cancel Automatic Refunds (AREFRA)</b> batch.	No

In addition, this screen contains a grid where you can attach algorithms to the upload reason. It contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Sequence	Used to indicate the order in which the algorithm must be triggered.	Yes (Conditional) <b>Note:</b> This field is required when you are attaching an algorithm to the upload reason.
Algorithm	Used to attach an algorithm to the upload reason. If the type of the upload reason is set to <b>Success</b> , you must attach the automatic payment success algorithm. However, if the type of the upload reason is set to <b>Cancel</b> , you must attach either automatic payment cancel or void automatic refund algorithm depending on whether the upload reason will be used for automatic payment or automatic refund cancelation.  <b>Note:</b> The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Algorithm Code Search</b> window appears. On specifying the algorithm code, the description of the algorithm appears corresponding to the <b>Algorithm</b> field.	Yes (Conditional) <b>Note:</b> This field is required when you are attaching an algorithm to the upload reason.

- Modify the required details in the **Automatic Payment and Refund Upload Reason** screen.

**Note:** If you want to attach more than one algorithm to the upload reason, click the **Add**  icon and then specify the details. However, if you want to remove an algorithm from the upload reason, click the **Delete**  icon corresponding to the algorithm.

- Click **Save**.

The changes made to the upload reason are saved.

## Deleting an Upload Reason

### Procedure

To delete an upload reason:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **A** and then click **Automatic Payment and Refund Upload Reason**.  
The **Automatic Payment and Refund Upload Reason** screen appears.
3. In the **Upload Reasons** zone, click the **Delete** (🗑️) icon in the **Delete** column corresponding to the upload reason that you want to delete.  
A message appears confirming whether you want to delete the upload reason.
4. Click **OK**.  
The upload reason is deleted.

## Automatic Payment and Refund Clearing Staging

The **Automatic Payment and Refund Clearing Staging** screen allows you to search for automatic payment or refund clearing records using various search criteria. In addition, you can:

- View the automatic payment or refund clearing staging records associated to a clearing record
- View the upload reason and payment cancelation reason or NOC reason specified in the automatic payment clearing staging record
- View the upload reason and void status reason specified in the automatic refund clearing staging record
- View the characteristics defined for the automatic payment or refund clearing staging record
- Edit an automatic payment or refund clearing staging record
- Delete an automatic payment or refund clearing staging record

This screen contains the following zones:

- [Search Clearing Record](#) on page 1103
- [Associated Clearing Staging Records](#) on page 1105
- [Clearing Staging Upload Reasons](#) on page 1106
- [Clearing Staging Characteristics](#) on page 1106

## Search Clearing Record

The **Search Clearing Record** zone allows you to search for automatic payment and refund clearing records using various search criteria. It contains the following two sections:

- **Search Criteria** — the **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for the automatic payment or refund clearing records. The valid values are: <ul style="list-style-type: none"> <li>• Automatic Payment</li> <li>• Automatic Refund</li> </ul>	Yes
Clearing ID	Used to search a particular clearing record.	No
Account ID	Used to search clearing records which are created for a particular account. <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Account Search</b> window appears.</p> </div>	No
Person Name	Used to search clearing records which are created for accounts of a particular person.	No
Extract From Date	Used to search clearing records that are extracted on or after a particular date.	No
Extract To Date	Used to search clearing records that are extracted on or before a particular date.	No
Bill ID	Used to search clearing records which are created against a bill.	No
Alternate Bill ID	Used to search clearing records which are created against a bill with the specified alternate bill ID.	No
Batch Control	Used to search clearing records where the <b>APAYACH</b> batch control is stamped. The valid value is <b>APAYACH</b> .	No
Batch Run Number	Used to search clearing records which are activated in a particular batch run.	No

**Note:** You must specify at least one search criterion while searching for a clearing record.

- **Search Results** — On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Clearing ID	Displays the clearing ID.

Column Name	Column Description
Account Information	<p>Indicates the account for which the clearing record is created. In addition, this column has a context menu which helps in navigating to other screens in the application.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears with the details of the respective account.</p>
Bill Information	<p>Indicates the bill against which the clearing record is created. In addition, this column has a context menu which helps in navigating to other screens in the application.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Bill</b> screen appears with the details of the respective bill.</p>
Payment Amount	<p>Displays the payment amount.</p> <p><b>Note:</b> This column appears only when you select the <b>Automatic Payment</b> option from the <b>Search By</b> list.</p>
Pay Tender ID	<p>Displays the payment tender ID.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Payment Event</b> screen appears where you can view the details of the respective tender. This column appears only when you select the <b>Automatic Payment</b> option from the <b>Search By</b> list.</p>
Tender Status	<p>Indicates the current status of the payment tender. The valid values are:</p> <ul style="list-style-type: none"> <li>Valid</li> <li>Canceled</li> </ul> <p><b>Note:</b> This column appears only when you select the <b>Automatic Payment</b> option from the <b>Search By</b> list.</p>
Extract Date	<p>Displays the date when the clearing record is extracted in a flat file.</p>
Payment Freeze Date	<p>Displays the date when the automatic payment must be frozen in the system.</p> <p><b>Note:</b> This column appears only when you select the <b>Automatic Payment</b> option from the <b>Search By</b> list.</p>
External Source ID	<p>Indicates the tender source through which the payment was remitted.</p>
Entity Type	<p>Indicates the type of entity which is created for automatic refund. The valid value is:</p> <ul style="list-style-type: none"> <li>Refund Request</li> </ul> <p><b>Note:</b> This column appears only when you select the <b>Automatic Refund</b> option from the <b>Search By</b> list.</p>
Entity ID	<p>Displays the entity ID.</p> <p><b>Note:</b> This column appears only when you select the <b>Automatic Refund</b> option from the <b>Search By</b> list.</p>

Column Name	Column Description
Account Number	Indicates the bank account through which the automatic payment is made.
Batch Control	Indicates the batch control which is stamped on the clearing record.
Batch Run Number	Indicates the batch run in which the clearing record was activated.
Alternate Bill ID	Indicates the bill against which the clearing record is created.

## Associated Clearing Staging Records

The **Associated Clearing Staging Records** zone lists the automatic payment or refund clearing staging records which are added corresponding to the clearing record. You can edit and delete an automatic payment or refund clearing staging record through this zone. It contains the following columns:

Column Name	Column Description
Clearing Staging ID	Displays the clearing staging ID.
Clearing ID	Indicates the clearing record against which the clearing staging record is added.
Status	Indicates the status of the clearing staging record. The valid values are: <ul style="list-style-type: none"> <li>• Pending</li> <li>• Complete</li> <li>• Error</li> </ul>
Edit	On clicking the <b>Edit</b> (  ) icon, the <b>Edit Clearing Staging Record</b> screen appears where you can edit the details of the clearing staging record. <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> You can edit a clearing staging record only when it is in the <b>Pending</b> or <b>Error</b> status.</p> </div>
Delete	On clicking the <b>Delete</b> (  ) icon, you can delete the clearing staging record. <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> You can delete a clearing staging record only when it is in the <b>Pending</b> status.</p> </div>

By default, the **Associated Clearing Staging Records** zone does not appear in the **Automatic Payment and Refund Clearing Staging** screen. It appears only when you click the **Broadcast** () icon corresponding to the clearing record in the **Search Clearing Record** zone.

## Clearing Staging Upload Reasons

The **Clearing Staging Upload Reasons** zone lists the reason code (i.e. upload reason) and error code (i.e. payment cancellation reason, Notice to Change (NOC) reasons, or void status reason) specified in the automatic payment or refund clearing staging record. It contains the following columns:

Column Name	Column Description
Sequence	Indicates the sequence in which the upload reason should be considered while freezing or canceling the automatic payment or while canceling the automatic refund.
Clearing Staging ID	Displays the clearing staging ID.
Clearing ID	Indicates the clearing record against which the clearing staging record is added.
Upload Reason	Indicates whether the auto clearing house has accepted or rejected the clearing record.
Cancel Reason	Indicates the reason why the auto clearing house has rejected the clearing record. If the clearing record is created for an automatic payment, the payment cancellation reason appears in this column. However, if the clearing record is created for an automatic refund, the void status reason appears in this column.
NOC Reason	Indicates the reason why the auto clearing house has accepted the clearing record with a Notice to Change (NOC).
NOC Reason Description	Displays the description of the NOC reason.

By default, the **Clearing Staging Upload Reasons** zone does not appear in the **Automatic Payment and Refund Clearing Staging** screen. It appears only when you click the **Broadcast**  icon corresponding to the clearing staging record in the **Associated Clearing Staging Records** zone.

### Related Topics

## Clearing Staging Characteristics

The **Clearing Staging Characteristics** zone lists the characteristics defined for the automatic payment or refund clearing staging record. It contains the following columns:

Column Name	Column Description
Clearing Staging ID	Displays the clearing staging ID.
Clearing ID	Indicates the clearing record against which the clearing staging record is added.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the characteristic value.

By default, the **Clearing Staging Characteristics** zone does not appear in the **Automatic Payment and Refund Clearing Staging** screen. It appears only when you click the **Broadcast**  icon corresponding to the clearing staging record in the **Associated Clearing Staging Records** zone.

## Searching for a Clearing Record

### Procedure

To search for a clearing record:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Financial** and then click **Automatic Payment and Refund Clearing Staging**.  
The **Automatic Payment and Refund Clearing Staging** screen appears.
3. Enter the search criteria in the **Search Clearing Record** zone depending on whether you want to search for automatic payment or refund clearing records.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

4. Click **Search**.

A list of clearing records that meet the search criteria appears in the **Search Results** section.

## Editing a Clearing Staging Record

### Prerequisites

To edit a clearing staging record, you should have:

- Upload reasons defined in the application
- NOC reasons defined in the **APAY\_UPL\_NOC\_LOOKUP** lookup field.
- Payment cancelation reasons defined in the application
- Reasons defined for the **Voided** status of the **C1-RefundReq** business object in the **Status Reason** screen

**Note:** You can edit a clearing staging record only when it is in the **Pending** or **Error** status. On editing a clearing staging record which is in the **Error** status, the status of the clearing staging record is changed to **Pending**. Also, the exceptions logged for the clearing staging record are deleted from the **CI\_APAY\_STGUP\_EXC** table.

### Procedure

To edit a clearing staging record:

1. Search for the clearing record in the **Automatic Payment and Refund Clearing Staging** screen.
2. In the **Search Results** section, click the **Broadcast**  icon corresponding to the clearing record whose associated clearing staging record you want to edit.

The **Associated Clearing Staging Records** zone appears.

3. In the **Associated Clearing Staging Records** zone, click the **Edit**  icon in the **Edit** column corresponding to the clearing staging record whose details you want to edit.

The **Edit Clearing Staging Record** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Clearing Staging ID	Displays the clearing staging ID.	Not applicable
Clearing ID	Indicates the clearing record against which the clearing staging record is added.	Not applicable
Status	Indicates the status of the clearing staging record. The valid values are: <ul style="list-style-type: none"> <li>• Pending</li> <li>• Complete</li> <li>• Error</li> </ul>	Not applicable
Upload Date	Used to specify the date when the clearing staging record was uploaded or added in the system.	Yes

In addition, this screen contains the following two sections:

- **Upload Reasons** — Used to add, edit, or remove the reason code (i.e. upload reason) and error (sub reason) codes from the clearing staging record. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Upload Reason	Used to specify the upload reason. It indicates whether the auto clearing house has accepted or rejected the clearing record.	Yes
Reason Type	Used to indicate the type of upload reason. The valid values are: <ul style="list-style-type: none"> <li>• Cancel</li> <li>• Success</li> </ul>	Yes
Sub Reason Code	Used to specify either of the following: <ul style="list-style-type: none"> <li>• Payment cancelation reason or void status reason (for automatic refund) when the reason type is set to <b>Cancel</b></li> <li>• Notice to Change (NOC) reason when the reason type is set to <b>Success</b></li> </ul>	No
Sub Reason Description	Used to specify the description of the NOC reason.	No

**Note:** The upload reason, payment cancelation reason, void status reason, and NOC reasons must be already defined in the system. If you specify an invalid reason and sub reason codes, the status of the clearing staging record is changed to **Error** when you execute the **Freeze or Cancel Automatic Payments (APAYRA)** or **Cancel Automatic Refunds (AREFRA)** batch.

- **Characteristics** — Used to define characteristics for the clearing staging record.
4. Modify the required details in the **Edit Clearing Staging Record** screen.

**Note:** If you want to add more than one reason or sub reason code, click the **Add** (+) icon in the **Upload Reasons** section and then specify the required details. However, if you want to remove a reason or sub reason code, click the **Delete** (🗑️) icon corresponding to the reason.

5. Define characteristics for the clearing staging record, if required.
6. Click **Save**.

The changes made to the clearing staging record are saved.

### **Related Topics**

<b>Associated Clearing Staging Records</b> zone	<a href="#">Associated Clearing Staging Records</a> on page 1105
How to define characteristics for a clearing staging record	<a href="#">Defining Characteristics for a Clearing Staging Record</a> on page 1110

## **Defining Characteristics for a Clearing Staging Record**

### **Prerequisites**

To define characteristics for a clearing staging record, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Auto Payment Upload**)

### **Procedure**

To define characteristics for a clearing staging record:

1. Ensure that the **Characteristics** section is expanded when you are editing a clearing staging record.

The **Characteristics** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the clearing staging record.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the clearing staging record.
Characteristic Type	Used to indicate the characteristic type. <b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Auto Payment Upload</b> .	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the clearing staging record.
Characteristic Value	Used to specify the value for the characteristic type. <b>Note:</b> On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the clearing staging record.

2. Enter the required details in the **Characteristics** section.

**Note:** If you select a predefined characteristic type, the **Search**  icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

3. If you want to define more than one characteristic for the clearing staging record, click the **Add**  icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from the clearing staging record, click the **Delete**  icon corresponding to the characteristic.

### **Related Topics**

For more information on...	See...
How to edit a clearing staging record	<a href="#">Editing a Clearing Staging Record</a> on page 1109

## **Deleting a Clearing Staging Record**

### **Procedure**

To delete a clearing staging record:

1. Search for the clearing record in the **Automatic Payment and Refund Clearing Staging** screen.

2. In the **Search Results** section, click the **Broadcast**  icon corresponding to the clearing record whose associated clearing staging record you want to delete.

The **Associated Clearing Staging Records** zone appears.

3. In the **Associated Clearing Staging Records** zone, click the **Delete**  icon in the **Delete** column corresponding to the clearing staging record that you want to delete.

A message appears confirming whether you want to delete the clearing staging record.

**Note:** You can delete a clearing staging record only when it is in the **Pending** status.

4. Click **OK**.

The clearing staging record is deleted.

# Chapter 15

---

## Construct

---

### Topics:

- [Prerequisites](#)
- [Construct Status Transition](#)
- [Template](#)
- [Construct \(Used for Searching\)](#)
- [Construct \(Used for Viewing\)](#)
- [Billing and Settlement Hierarchy](#)

Oracle Revenue Management and Billing provides you with a flexible way to define the billing hierarchy using the construct based billing feature. In a construct, you can include:

- **Usage Accounts** - A set of usage accounts of different persons whose charges and/or adjustments must be billed through an invoice account. These persons need not belong to the same person hierarchy. The system allows you to select a set of usage accounts based on the criteria using the account selection template. The persons' and their child persons' usage accounts that meet the specified criteria are included in the construct.
- **Billable Charges** - A set of billable charges that you want to bill through an invoice account. The system will only consider billable charges of those usage accounts for which the construct is defined. The system allows you to select a set of billable charges based on the criteria using the billable charge selection template.
- **Adjustments** - A set of adjustments that you want to bill through an invoice account. The system will only consider adjustments of those usage accounts for which the construct is defined. The system allows you to select a set of adjustments based on the criteria using the adjustment selection template.

You can bill the charges and adjustments of usage accounts on the same invoice account. Or, you can bill the charges of usage accounts on one invoice account and the adjustments on another invoice account. Or, you can bill the charges or adjustments of the usage accounts on more than one invoice account. You can define different types of constructs. At present, the system supports only invoice and settlement construct. Here, settlement includes receivables and payables.

One usage account can belong to only one active construct and not to multiple active constructs at the same time. The system also allows you to exclude some usage accounts when you do not want to include all usage accounts that satisfy the criteria in the construct. While defining a construct, you can use an existing invoice account. The contracts for the invoice account are created only when you activate the construct. One contract is created for every target contract type set on usage accounts' contracts' contract type.

You can use a construct during the construct based billing process only when the construct is in the **Active** status. The following batches are designed to support the construct based billing process:

- **Construct Based - Pending Bill Generation (BILLOPEN)** – This batch is used to generate pending bills for accounts that meet the criteria.
- **Construct Based - Bill Segment Generation (BSGENREG)** – This batch is used to generate the bill segments on the pending bills.

- **Construct Based - Bill Completion (POSTPROC)** – This batch is used to generate post processing bill segments during the bill completion process. It changes the status of the bill to **Complete**.

During the bill generation process, all accounts that meet the criteria are considered for billing. These accounts may be usage or invoice accounts. All billable charges (with the **Adhoc** flag set to **No**) whose start date is earlier than or equal to the batch business date are considered during bill segment generation. If a billable charge satisfies the rule defined on any active construct, the bill segment is generated on the respective invoice account. And, if a billable charge does not satisfy the rule defined on any active construct, the bill segment is generated on the usage account. The post-processing bill segments, if any, are generated on the invoice or usage account depending on the type of price assignment.

**Note:** The construct based billing batches are currently not designed to consider billable charges whose end date is earlier than or equal to the batch business date.

For more information on how to setup the construct based billing process, refer to [Prerequisites](#) on page 1115.

## Prerequisites

---

To setup the construct based billing process, you need to do the following:

- Define the Target Contract Type characteristic for usage accounts' contracts' contract type.
- Create a default account creation algorithm using the C1-ACTCR-IC algorithm type.
- Create a default contract creation algorithm using the C1-CTMP-IC algorithm type.
- Create a usage account construct mapping algorithm using the C1-UACM-IC algorithm type.
- Associate the usage account construct mapping algorithm to a division whose usage accounts you want to include in any existing active construct.

**Note:** There might be situations when a usage account is created after the construct is activated. If you want to include such usage account in any existing active construct, you need to associate the usage account construct mapping algorithm to a division in which you are creating the usage account. If the usage account satisfies the criteria specified in any active construct, it is included in the construct once the usage account is created.

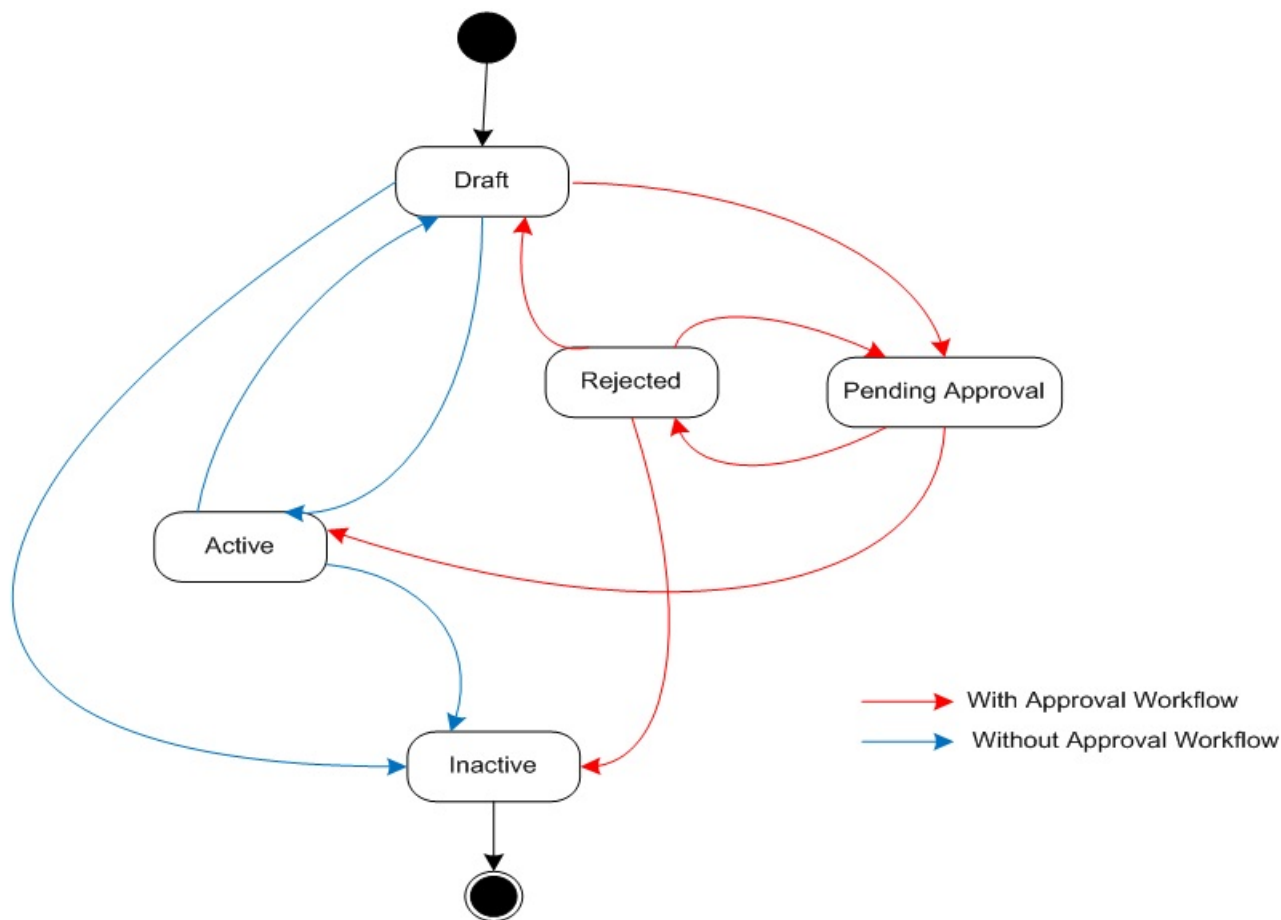

- Define the required templates, profiles and constructs in the application.
- Define values for the PAGE\_NUMBER lookup field.
- Define approval workflow group, approval workflow chain, approval workflow criteria, and approval workflow group chain linkage for construct.
- Configure the approval workflow settings for construct.
- Define approval workflow reasons which are required while rejecting a construct.
- Assign the **C1-IC\_AC** To Do type to a To Do role whose users must receive the To Do entries generated when the new invoice account is created while activating a construct.
- Transfer adjustments algorithm defined using the **C1-IC-AD-XFR** algorithm type.
- Define an algorithm of the BS-CRE-INVCN algorithm type and attach it on the **Create Algorithm** spot of the bill segment type.

**Note:** If you want to use the regular billing process, you need to attach an algorithm of the BS-CRE-PRICE algorithm type on the **Create Algorithm** spot of the bill segment type. However, if you want to use the construct based billing process, you need to attach an algorithm of the BS-CRE-INVCN algorithm type on **Create Algorithm** spot of the bill segment type.

## Construct Status Transition

---

The following figure graphically indicates how a construct moves from one status to another during its lifecycle:

## Template

Template is used to select a set of usage accounts, billable charges, or adjustments based on the criteria. In a template, you can define a SELECT statement to retrieve data from a table or view based on a condition. You can use the bind variables in the where clause (condition). The bind variables must be alphanumeric and prefixed with the colon (:). The values for these bind variables are specified while defining a construct.

You can validate the syntax of the SELECT statement. If the syntax of the SELECT statement is correct, a message appears indicating that the SQL statement was validated successfully. However, if the syntax of the SELECT statement is incorrect, an error message occurs. You need to then correct the SELECT statement accordingly. Otherwise, the system will not allow you to save the template.

You can define the following three types of templates:

- **Account Selection** - Used for selecting a set of usage accounts based on the criteria.
- **Adjustment Selection** - Used for selecting a set of adjustments based on the criteria.
- **Billable Charge Selection** - Used for selecting a set of billable charges based on the criteria.

You can only use templates which are active while defining or editing a construct. The **Template** screen allows you to define, edit, and delete a template. You can edit a template even if it is used in any construct. However, any changes made to a template will not be reflected in a construct where the template is already used unless you use the latest template in the construct. This screen consists of the following zones:

- [Search Template](#) on page 1117

## Search Template

The **Search Template** zone allows you to search for a template using various search criteria. This zone contains the following two sections:

- **Search Criteria** - Used to search by different search criteria. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Template	Used to specify the template name.	No
Description	Used to specify the description for the template.	No
Purpose	Used to indicate the purpose of the template. The valid values are: <ul style="list-style-type: none"> <li>• <b>Adjustment Selection</b> - Used for selecting a set of adjustments based on the criteria.</li> <li>• <b>Bill Segment Selection</b> - Used for selecting a set of bill segments based on the criteria.</li> <li>• <b>Billable Charge Selection</b> - Used for selecting a set of billable charges based on the criteria.</li> <li>• <b>Usage Account Selection</b> - Used for selecting a set of usage accounts based on the criteria.</li> <li>• <b>Usage and Invoice Account Selection</b> - Used for selecting a set of usage and invoice accounts based on the criteria.</li> </ul>	No
Status	Used to indicate the status of the template. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>	No

**Note:** You must specify at least one search criterion while searching for a template.

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Template	Displays the name of the template.
Description	Displays the description of the template.
Purpose	Indicates the purpose of the template. The valid values are: <ul style="list-style-type: none"> <li>• Adjustment Selection</li> <li>• Billable Segment Selection</li> <li>• Billable Charge Selection</li> <li>• Usage Account Selection</li> <li>• Usage and Invoice Account Selection</li> </ul>

Column Name	Column Description
Status	Indicates the status of the template. The valid values are: <ul style="list-style-type: none"> <li>Active</li> <li>Inactive</li> </ul>
View	On clicking the <b>View</b> (🔍) icon, the <b>View Template</b> screen appears where you can view the details of the template.
Edit	On clicking the <b>Edit</b> (✏️) icon, the <b>Template</b> screen appears where you can edit the details of the template. <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> If a template is used in any construct, a message appears confirming whether you want to edit the template.</p> </div>

You can create a new template by clicking the **Add** button in the upper right corner of this zone.

## **Searching for a Template**

### **Procedure**

To search for a template:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **T** and then click **Template**.  
The **Template** screen appears.
3. Enter the search criteria in the **Search Template** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

4. Click **Search**.

A list of templates that meet the search criteria appears in the **Search Results** section.

## Defining a Template

### Procedure

To define a template:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **T** and then click **Template**.  
A sub-menu appears.
3. Click the **Add** option from the **Template** sub-menu.

The **Template** screen appears. It consists of the following zone:

- **Search Template** — Used to specify basic details about the template. It consists of the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Template	Used to specify the template name.	Yes
Description	Used to search for a template by it's description.	Yes
Purpose	Used to indicate the purpose of the template. The valid values are: <ul style="list-style-type: none"> <li>• <b>Adjustment Selection</b> - Used for selecting a set of adjustments based on the criteria.</li> <li>• <b>Bill Segment Selection</b> - Used for selecting a set of bill segments based on the criteria.</li> <li>• <b>Billable Charge Selection</b> - Used for selecting a set of billable charges based on the criteria.</li> <li>• <b>Usage Account Selection</b> - Used for selecting a set of usage accounts based on the criteria.</li> <li>• <b>Usage and Invoice Account Selection</b> - Used for selecting a set of usage and invoice accounts based on the criteria.</li> </ul>	Yes
Status	Used to specify additional information about the template.	Yes

In addition, this tab contains the **Bind Variables** section where you can define the bind variables which are used in the where clause. The **Bind Variables** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Bind Variable	Used to specify the bind variable (which is used in the where clause).	Yes (Conditional) <b>Note:</b> This field is required when you are defining a bind variable.

Field Name	Field Description	Mandatory (Yes or No)
Data Type	Used to indicate the type of data that you want to store in the bind variable. The valid values are: <ul style="list-style-type: none"> <li>Date</li> <li>Numeric</li> <li>String</li> </ul>	Yes (Conditional) <b>Note:</b> This field is required when you are defining a bind variable.
Label	Used to specify the business label for the bind variable. The business label appears when you define and edit the criteria for selecting a set of usage accounts, adjustments, or billable charges.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a bind variable.
Zone	Used to specify the zone for the template. <b>Note:</b> The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Zone/Code Description</b> window appears.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a bind variable.

- Enter the required details in the **Main** tab.
- If you want to define more than one bind variable, click the **Add**  icon in the **Bind Variables** section and then enter the required details.

**Note:** However, if you want to remove a bind variable from the **Bind Variables** section, click the **Delete**  icon corresponding to the bind variable.

- If required, click **Validate** to validate the syntax of the SELECT statement.

**Note:** If the syntax of the SELECT statement is correct, a message appears indicating that the SQL statement was validated successfully. However, if the syntax of the SELECT statement is incorrect, an error message occurs. You need to then correct the SELECT statement accordingly. Otherwise, the system will not allow you to save the template.

- Define characteristics for the template, if required.
- Click **Validate and Save**.

The system validates the syntax of the SELECT statement and then accordingly saves the template.

## Defining Characteristics for a Template

### Prerequisites

To define characteristics for a template, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to Template)

### Procedure

To define characteristics for a template:

1. Click the **Characteristics** tab in the **Template** screen when you are creating or editing a template.

The **Characteristics** tab appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the template.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the template.
Characteristic Type	Used to indicate the characteristic type.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the template.
Characteristic Value	Used to specify the value for the characteristic type. <b>Note:</b> On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the template.

2. Enter the required details.
3. If you want to define more than one characteristic for the template, click the **Add** (+) icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from the template, click the **Delete** (🗑️) icon corresponding to the characteristic.

4. Click **Validate and Save**.

The characteristics are defined for the template.

## Editing a Template

### Procedure

To edit a template:

1. Click the **Admin** link in the **Application** toolbar.

A list appears.

- From the **Admin** menu, select **T** and then click **Template**.

The **Template** screen appears.

- In the **Search Results** section, click the **Edit** (  ) icon in the **Edit** column corresponding to the template whose details you want to edit.

**Note:** If a template is used in any construct, a message appears confirming whether you want to edit the template. You must click **OK** if you want to edit the template. Any changes made to a template will not be reflected in any construct where the template is already used unless you use the latest template in the construct.

The **Template** screen appears. It consists of the following tabs:

- **Main** - Used to specify basic details about the template.
- **Characteristics** - Used to define characteristics for the template.

The **Main** tab contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Template	Used to indicate the template name.	Not applicable
Description	Used to specify the description for the template.	Yes
Detailed Description	Used to specify additional information about the template.	No
Purpose	Used to indicate the purpose of the template. The valid values are: <ul style="list-style-type: none"> <li>• <b>Account Selection</b> - Used for selecting a set of usage accounts based on the criteria.</li> <li>• <b>Adjustment Selection</b> - Used for selecting a set of adjustments based on the criteria.</li> <li>• <b>Billable Charge Selection</b> - Used for selecting a set of billable charges based on the criteria.</li> <li>• <b>Usage Account Selection</b> - Used for selecting a set of usage accounts based on the criteria.</li> <li>• <b>Usage and Invoice Account Selection</b> - Used for selecting a set of usage and invoice accounts based on the criteria.</li> </ul>	Yes
Status	Used to indicate the status of the template. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>	Yes

Field Name	Field Description	Mandatory (Yes or No)								
Select	<p>Used to specify the column name. It indicates the data that you want to retrieve using the SELECT statement.</p> <p>The default value appears in this field when you select the purpose of the template. However, the default value changes depending on the purpose of template. You can edit the column name whenever required.</p> <table border="1"> <thead> <tr> <th>If you have set the purpose of the template to....</th> <th>Then, the default value is...</th> </tr> </thead> <tbody> <tr> <td>Account Selection</td> <td>ACCT_ID</td> </tr> <tr> <td>Adjustment Selection</td> <td>ADJ_ID</td> </tr> <tr> <td>Billable Charge Selection</td> <td>BILLABLE_CHG_ID</td> </tr> </tbody> </table>	If you have set the purpose of the template to....	Then, the default value is...	Account Selection	ACCT_ID	Adjustment Selection	ADJ_ID	Billable Charge Selection	BILLABLE_CHG_ID	Yes
If you have set the purpose of the template to....	Then, the default value is...									
Account Selection	ACCT_ID									
Adjustment Selection	ADJ_ID									
Billable Charge Selection	BILLABLE_CHG_ID									
From	Used to specify the table or view name. It indicates the table or view from which you want to retrieve the data.	Yes								
Where	<p>Used to specify the condition based on which you want to retrieve the data from the table or view. You can use the bind variables in the where clause using the following syntax:</p> <pre>{column_name}{operator} : {bind_variable}</pre> <p>The bind variables must be alphanumeric and prefixed with the colon (:). There should not be any space between the column name, operator, and the bind variable. For example, CURRENCY_CD=:CURRENCY. All bind variables used in the where clause must be defined in the <b>Bind Variables</b> section.</p>	No								

In addition, this tab contains the **Bind Variables** section where you can define the bind variables which are used in the where clause. The **Bind Variables** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Bind Variable	Used to specify the bind variable (which is used in the where clause).	Yes (Conditional) <b>Note:</b> This field is required when you are defining a bind variable.
Data Type	Used to indicate the type of data that you want to store in the bind variable. The valid values are: <ul style="list-style-type: none"> <li>• Date</li> <li>• Numeric</li> <li>• String</li> </ul>	Yes (Conditional) <b>Note:</b> This field is required when you are defining a bind variable.

Field Name	Field Description	Mandatory (Yes or No)
Label	Used to specify the business label for the bind variable. The business label appears when you define and edit the criteria for selecting a set of usage accounts, adjustments, or billable charges.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a bind variable.
Zone	Used to indicate a zone for the template. <b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Zone/Code Description</b> window appears.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a bind variable.

- Modify the details in the **Main** tab, if required.
- If you want to define more than one bind variable, click the **Add** (+) icon in the **Bind Variables** section and then enter the required details.

**Note:** However, if you want to remove a bind variable from the **Bind Variables** section, click the **Delete** (🗑️) icon corresponding to the bind variable.

- If required, click **Validate** to validate the syntax of the SELECT statement.

**Note:** If the syntax of the SELECT statement is correct, a message appears indicating that the SQL statement was validated successfully. However, if the syntax of the SELECT statement is incorrect, an error message occurs. You need to then correct the SELECT statement accordingly. Otherwise, the system will not allow you to save the template.

- Define, edit or remove characteristics from the template, if required.
- Click **Validate and Save**.

The system validates the syntax of the SELECT statement and then accordingly saves the changes [Defining Characteristics for a Template](#) on page 1120 made to the template.

## Deleting a Template

### Procedure

To delete a template:

- Click the **Admin** link in the **Application** toolbar.  
A list appears.
- From the **Admin** menu, select **T** and then click **Template**.  
The **Template** screen appears.
- In the **Search Results** section, click the **Delete** (🗑️) icon in the **Delete** column corresponding to the template that you want to delete.

A message appears confirming whether you want to delete the template.

**Note:** You can only delete a template which is not yet used in any construct.

4. Click **OK**.

The template is deleted.

## Construct (Used for Searching)

The **Construct** screen allows you to search for a construct using various search criteria. Through this screen, you can define, edit, view, copy, inactivate a construct. It contains the following zones:

- [Search Construct](#) on page 1125

### Search Construct

The **Search Construct** zone allows you to search for a construct using various search criteria. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Construct ID	Used to specify the construct ID.	No
Description	Used to specify the description for the construct.	No

Field Name	Field Description	Mandatory (Yes or No)
Construct Type	Used to indicate the type of the construct. The valid values are: <ul style="list-style-type: none"> <li>• Invoice Only</li> <li>• Invoice and Settlement</li> <li>• Settlement Only</li> </ul>	No
Status	Used to indicate the status of the construct. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Draft</li> <li>• Inactive</li> <li>• Pending Approval</li> <li>• Rejected</li> </ul>	No
Effective Start Date	Used to specify the date from when the construct is effective.	No
Effective End Date	Used to specify the date till when the construct is effective.	No
Usage Account Identifier Type	Used to indicate the usage account's identifier type based on which you want to search for a construct. <p><b>Note:</b> This field appears only when you select the <b>Invoice Only</b> or <b>Invoice and Settlement</b> option from the <b>Construct Type</b> list.</p>	No
Usage or Invoice Account Identifier Type	Used to indicate the usage or invoice account's identifier type based on which you want to search for a construct. <p><b>Note:</b> This field appears only when you select the <b>Settlement Only</b> option from the <b>Construct Type</b> list.</p>	No
Usage Account Identifier	Used to indicate the usage account which belongs to the construct. <p><b>Note:</b> This field appears only when you select the <b>Invoice Only</b> or <b>Invoice and Settlement</b> option from the <b>Construct Type</b> list.</p>	No
Usage or Invoice Account Identifier	Used to indicate the usage or invoice account which belongs to the construct. <p><b>Note:</b> This field appears only when you select the <b>Settlement Only</b> option from the <b>Construct Type</b> list.</p>	No

Field Name	Field Description	Mandatory (Yes or No)
Invoice Account Identifier Type	Used to indicate the invoice account's identifier type based on which you want to search for a construct.  <b>Note:</b> This field appears only when you select the <b>Invoice Only</b> or <b>Invoice and Settlement</b> option from the <b>Construct Type</b> list.	No
Settlement Account Identifier Type	Used to indicate the settlement account's identifier type based on which you want to search for a construct.  <b>Note:</b> This field appears only when you select the <b>Settlement Only</b> option from the <b>Purpose</b> list.	No
Invoice Account Identifier	Used to indicate the invoice account which is used in the construct.  <b>Note:</b> This field appears only when you select the <b>Invoice Only</b> or <b>Invoice and Settlement</b> option from the <b>Construct Type</b> list.	No
Settlement Account Identifier	Used to indicate the settlement account which is used in the construct.  <b>Note:</b> This field appears only when you select the <b>Settlement Only</b> option from the <b>Construct Type</b> list.	No

**Note:** You must specify at least one search criterion while searching for a construct.

- **Search Results** — On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Construct ID	Displays the construct ID.
Description	Displays the description of the construct.
Construct Type	Indicates the purpose of the construct. The valid values are: <ul style="list-style-type: none"> <li>• Invoice Only</li> <li>• Invoice and Settlement</li> <li>• Settlement Only</li> </ul>
Effective Start Date	Displays the date from when the construct is effective.
Effective End Date	Displays the date till when the construct is effective.

Column Name	Column Description
Status	Indicates the status of the construct. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Draft</li> <li>• Inactive</li> <li>• Pending Approval</li> <li>• Rejected</li> </ul>
Copy	On clicking the <b>Copy</b> (  ) icon, the <b>Construct</b> screen appears where you can create a construct using an existing construct.
View	On clicking the <b>View</b> (  ) icon, the <b>Construct</b> screen appears where you can view the details of the construct.
Edit	On clicking the <b>Edit</b> (  ) icon, the <b>Construct</b> screen appears where you can edit the details of the construct.
Inactivate	On clicking the <b>Inactivate</b> icon (  ) in the <b>Inactivate</b> column, the <b>Inactivate</b> window appears confirming whether you want to inactivate the selected construct. <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> You can only inactivate the construct which is in <b>Active</b> status. The <b>Inactivate</b> icon appears in the <b>Inactivate</b> column, only in front of the construct which is in <b>Active</b> status.</p> </div>

You can create a new construct by clicking the **Add** button in the upper right corner of the **Construct** screen.

## **Searching for a Construct**

### **Procedure**

To search for a construct:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select the **Invoice & Settlement Management** and then click **Construct**.  
A sub-menu appears.
3. Click the **Search** option from the **Construct** sub-menu.  
The **Construct** screen appears.

- Enter the search criteria in the **Search Construct** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

- Click **Search**.

A list of constructs that meet the search criteria appears in the **Search Results** section.

### **Related Topics**

<b>Construct</b> screen	<a href="#">Construct (Used for Viewing)</a> on page 1137
<b>Search Construct</b> zone	<a href="#">Search Construct</a> on page 1125

## **Defining a Construct**

### **Procedure**

To define a construct:

- Click the **Menu** link in the **Application** toolbar.  
A list appears.
- From the **Main** menu, select **Invoice & Settlement Management** and then click **Construct**.  
A sub-menu appears.
- Click the **Add** option from the **Construct** sub-menu.

The **Construct** screen appears. It consists of the following sections:

- **Main** — Used to specify basic details about the construct.
- **Characteristics** — Used to define characteristics for the construct.

The **Main** section contains the following fields:

<b>Field Name</b>	<b>Field Description</b>	<b>Mandatory (Yes or No)</b>
Construct Description	Used to specify the description for the construct.	Yes
Construct Type	Used to indicate the type of the construct. The valid values are: <ul style="list-style-type: none"> <li>• <b>Invoice</b> — Indicates that you want to use the construct for billing.</li> <li>• <b>Invoice and Settlement</b> — Indicates that you want to use the construct for billing and settlement.</li> <li>• <b>Settlement</b> — Indicates that you want to use the construct for settlement.</li> </ul> <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"> <p><b>Note:</b> Here, settlement includes receivables and payables</p> </div>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Status	Used to indicate the status of the construct. By default, the <b>Draft</b> option is selected from the list.	Not applicable
Effective Start Date	Used to specify the date from when the construct is effective.  <b>Note:</b> The effective from date cannot be later than the effective end date.	Yes
Effective End Date	Used to specify the date till when the construct is effective.  <b>Note:</b> The effective to date cannot be earlier than the effective start date.	No

**Tip:** Alternatively, you can access the **Construct** screen by clicking the **Add** button on the top-right of the **Construct** screen.

4. Enter the required details in the **Main** section.
5. Define characteristics for the construct, if required.
6. Do either of the following:

If you want to...	Then...
Save the construct in the draft version	<ol style="list-style-type: none"> <li>1. Click <b>Save as Draft</b>.</li> </ol> <p>The construct is created and the status of the construct is set to <b>Draft</b>. The construct ID is generated automatically when the construct is created.</p>
Activate the construct	<ol style="list-style-type: none"> <li>1. Click <b>Activate</b>.</li> </ol> <p>The construct is created and the status of the construct is set to <b>Active</b>. The construct ID is generated automatically when the construct is created.</p> <p><b>Note:</b> The <b>Activate</b> button appears while defining a construct only when the approval workflow process is not configured for construct.</p>
Send the construct for approval	<ol style="list-style-type: none"> <li>1. Click <b>Send for Approval</b>.</li> </ol> <p>The construct is created and the approval workflow request is raised for the construct. The status of the construct is set to <b>Pending Approval</b>. In addition, the construct ID is generated automatically when the construct is created.</p> <p><b>Note:</b> The <b>Send for Approval</b> button appears while defining a construct only when the approval workflow process is configured for construct.</p>

## Defining Characteristics for a Construct

### Prerequisites

To define characteristics for a construct, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to Construct)

### Procedure

To define characteristics for a construct:

1. Ensure that the **Characteristics** section is expanded in the **Construct** screen when you are creating or editing a construct. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the construct.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the construct.
Characteristic Type	Used to indicate the characteristic type.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the construct.
Characteristic Value	Used to specify the value for the characteristic type. <b>Note:</b> On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.  The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Predefined Characteristic Search</b> window appears.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the construct.

2. Enter the required details.

**Note:** If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

- If you want to define more than one characteristic for the construct, click the **Add** (+) icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from the construct, click the **Delete** (🗑️) icon corresponding to the characteristic.

### Related Topics

For more information on...	See...
How to define a construct	<a href="#">Defining a Construct</a> on page 1129
How to edit a construct	<a href="#">Editing a Construct</a> on page 1132

## Editing a Construct

You can only edit a construct in the **Draft**, **Active**, or **Rejected** status. If a bill is already generated through a construct and it is in the **Pending** status, you cannot edit the details of the construct. You can only edit the effective to date of a construct when all bills generated through the construct are in the **Completed** status. The effective to date must be later than the last completed bill's bill date. Otherwise, the system will not allow you to edit the effective to date of the construct.

### Procedure

To edit a template:

- Click the **Menu** link in the **Application** toolbar.  
A list appears.
- From the **Main** menu, select **Invoice & Settlement Management** and then click **Construct**.  
A sub-menu appears.
- Click on **Search**.  
The **Construct** screen appears.
- In the **Search Results** section, click the **Edit** (✏️) icon in the **Edit** column corresponding to the **Construct ID** whose details you want to edit.

**Note:** If a template is used in any construct, a message appears confirming whether you want to edit the template. You must click **OK** if you want to edit the template. Any changes made to a template will not be reflected in any construct where the template is already used unless you use the latest template in the construct.

The **Template** screen appears. It consists of the following tabs:

- Main** - Used to specify basic details about the template.
- Characteristics** - Used to define characteristics for the template.

The **Main** tab contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Template	Used to indicate the template name.	Not applicable
Description	Used to specify the description for the template.	Yes

Field Name	Field Description	Mandatory (Yes or No)								
Detailed Description	Used to specify additional information about the template.	No								
Purpose	Used to indicate the purpose of the template. The valid values are: <ul style="list-style-type: none"> <li>• <b>Account Selection</b> - Used for selecting a set of usage accounts based on the criteria.</li> <li>• <b>Adjustment Selection</b> - Used for selecting a set of adjustments based on the criteria.</li> <li>• <b>Billable Charge Selection</b> - Used for selecting a set of billable charges based on the criteria.</li> <li>• <b>Usage Account Selection</b> - Used for selecting a set of usage accounts based on the criteria.</li> <li>• <b>Usage and Invoice Account Selection</b> - Used for selecting a set of usage and invoice accounts based on the criteria.</li> </ul>	Yes								
Status	Used to indicate the status of the template. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>	Yes								
Select	Used to specify the column name. It indicates the data that you want to retrieve using the SELECT statement. The default value appears in this field when you select the purpose of the template. However, the default value changes depending on the purpose of template. You can edit the column name whenever required. <table border="1" data-bbox="548 1192 1156 1459"> <thead> <tr> <th>If you have set the purpose of the template to....</th> <th>Then, the default value is...</th> </tr> </thead> <tbody> <tr> <td>Account Selection</td> <td>ACCT_ID</td> </tr> <tr> <td>Adjustment Selection</td> <td>ADJ_ID</td> </tr> <tr> <td>Billable Charge Selection</td> <td>BILLABLE_CHG_ID</td> </tr> </tbody> </table>	If you have set the purpose of the template to....	Then, the default value is...	Account Selection	ACCT_ID	Adjustment Selection	ADJ_ID	Billable Charge Selection	BILLABLE_CHG_ID	Yes
If you have set the purpose of the template to....	Then, the default value is...									
Account Selection	ACCT_ID									
Adjustment Selection	ADJ_ID									
Billable Charge Selection	BILLABLE_CHG_ID									
From	Used to specify the table or view name. It indicates the table or view from which you want to retrieve the data.	Yes								

Field Name	Field Description	Mandatory (Yes or No)
Where	<p>Used to specify the condition based on which you want to retrieve the data from the table or view. You can use the bind variables in the where clause using the following syntax:</p> <pre>{column_name}{operator} : {bind_variable}</pre> <p>The bind variables must be alphanumeric and prefixed with the colon (:). There should not be any space between the column name, operator, and the bind variable. For example, CURRENCY_CD=:CURRENCY. All bind variables used in the where clause must be defined in the <b>Bind Variables</b> section.</p>	No

In addition, this tab contains the **Bind Variables** section where you can define the bind variables which are used in the where clause. The **Bind Variables** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Bind Variable	Used to specify the bind variable (which is used in the where clause).	Yes (Conditional) <b>Note:</b> This field is required when you are defining a bind variable.
Data Type	Used to indicate the type of data that you want to store in the bind variable. The valid values are: <ul style="list-style-type: none"> <li>• Date</li> <li>• Numeric</li> <li>• String</li> </ul>	Yes (Conditional) <b>Note:</b> This field is required when you are defining a bind variable.
Label	Used to specify the business label for the bind variable. The business label appears when you define and edit the criteria for selecting a set of usage accounts, adjustments, or billable charges.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a bind variable.
Zone	Used to indicate a zone for the template. <b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Zone/Code Description</b> window appears.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a bind variable.

5. Modify the details in the **Main** tab, if required.

**Note:** If you want to define more than one bind variable, click the **Add** (+) icon in the **Bind Variables** section and then enter the required details. However, if you want to remove a bind variable from the **Bind Variables** section, click the **Delete** (🗑️) icon corresponding to the bind variable.

6. If required, click **Validate** to validate the syntax of the SELECT statement.

**Note:** If the syntax of the SELECT statement is correct, a message appears indicating that the SQL statement was validated successfully. However, if the syntax of the SELECT statement is incorrect, an error message occurs. You need to then correct the SELECT statement accordingly. Otherwise, the system will not allow you to save the template.

7. Define, edit or remove characteristics from the template, if required.
8. Click **Validate and Save**.

The system validates the syntax of the SELECT statement and then accordingly saves the changes made to the template.

How to include adjustments in a construct	<a href="#">Including Adjustments in a Construct</a> on page 1150

## **Copying a Construct**

Instead of creating a construct from scratch, you can create a new construct using an existing construct. This is possible through copying a construct. On copying a construct, the usage accounts, billable charges, and adjustments' selection criteria and characteristics are copied to the new construct. You can then edit the details, if required.

### **Prerequisites**

To copy a construct, you should have:

- Construct (whose copy you want to create) defined in the application

### **Procedure**

To copy a construct:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Invoice & Settlement Management** and then click **Construct**.  
A sub-menu appears.
3. Click on **Search**.  
The **Construct** screen appears.
4. In the **Search Results** section, click the **Copy** () icon in the **Copy** column corresponding to the construct whose copy you want to create.

The **Construct** window appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Construct Description	Used to specify the description for the new construct.	Yes
Effective From	Used to specify the date from when the new construct is effective.  <b>Note:</b> The effective from date cannot be later than the effective to date.	Yes
Effective To	Used to specify the date till when the new construct is effective.  <b>Note:</b> The effective to date cannot be earlier than the effective from date.	No

5. Enter the required details in the **Main** section and the **Characteristics** section.

6. Click **Save and Next**.

The **Construct** screen appears.

7. Edit the details of the new construct, if required.

### Related Topics

## Viewing the Construct Details

### Procedure

To view the details of a construct:

1. Search for the construct in the **Construct** screen.
2. In the **Search Results** section, click the **View**  icon in the **View** column corresponding to the construct whose details you want to view.

The **Construct** screen appears. It contains the following sections:

- **Construct Information** — Displays basic details about the construct.
- **Include Usage/Invoice Accounts** — Indicates the persons and their usage accounts or the Invoice accounts for which the construct is defined.
- **Include Bill Segments** — Indicates the bill segments of the usage accounts
- **Include Billable Charges** — Indicates the billable charges of the usage accounts which are billed through a settlement account.
- **Exclude Usage/Invoice Accounts** — Indicates the usage accounts of the persons to which this construct is not applicable.
- **Include Adjustments** — Indicates the adjustments of the usage accounts which are billed through an invoice account.
- **Linked Accounts** — Indicates the linked accounts which are included in the construct.

- View the basic details about the construct in the **Construct Information** section.

## Construct (Used for Viewing)

---

The **Construct** screen allows you to view the details of the construct as well as the log entries. Through this screen, you can define, edit, delete various details of a construct and add log entries. It consists of the following tabs:

- [Construct - Main](#) on page 1137
- [Construct - Log](#) on page 1142

### Construct - Main

The **Main** tab displays the details of the construct. It contains the following zone:

- [Construct Information](#)
- [Include Usage/Invoice Accounts](#)
- [Include Billable Charges](#)
- [Include Adjustments](#)
- [Include Bill Segments](#) on page 1140
- [Linked Accounts](#)
- [Exclude Usage/Invoice Accounts](#)

### Construct Information

The **Construct Information** zone displays the basic details of the construct. It contains the following sections:

- Main** - The **Main** section contains the following fields:

Field Name	Field Description
Construct ID	Displays the construct ID.
Description	Displays the description of the construct.
Construct Type	Displays the type of the construct.
Status	Displays the status of the construct.
Effective Start Date	Displays the date from when the construct is effective.
Effective End Date	Displays date till when the construct is effective.

- Characteristics** - The **Characteristics** section contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the characteristic is effective for the construct.
Characteristic Type	Displays the characteristic type.

Column Name	Column Description
Characteristic Value	Displays the value of the characteristic type.

- **Record Actions** - The **Record Actions** section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the construct. <b>Note:</b> The <b>Edit</b> button appears only when the construct is in the <b>Draft</b> status.
Delete	Used to delete the construct. <b>Note:</b> The <b>Delete</b> button appears only when the construct is in the <b>Draft</b> status.
Submit	Used to submit the details of the construct. <b>Note:</b> The <b>Submit</b> button appears only when the construct is in the <b>Draft</b> status.

- **Record Information** - The **Record Information** section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the construct is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the construct business object.
Status Date Time	Displays the date and time when the construct status is updated
Create Date Time	Displays the date and time when the construct is created.

### **Include Usage/Invoice Accounts**

The **Include Usage/Invoice Accounts** zone displays the details of usage and invoice accounts. It contains the following columns:

Column Name	Column Description
Effective Start Date	Displays the date from when the construct is effective.
Effective End Date	Displays the date till when the construct is effective.
Priority	Displays the priority of an account.
Template	Displays the name of the template.
Criteria Description	Displays the description of the criteria.

Column Name	Column Description
Criteria	Indicates the bind variable for which you need to define the value.  <b>Note:</b> The bind variables change depending on the account selection template that you have selected. If a business label is defined for the bind variable, the business label appears in this field.
Edit	On clicking the <b>Edit</b> (  ) icon in the <b>Edit</b> column, the <b>Selection Criteria</b> screen appears where you can edit the details of the usage and invoice accounts.
Delete	On clicking the <b>Delete</b> (  ) icon in the <b>Delete</b> column, you can delete the usage and invoice accounts.

### Include Billable Charges

The **Include Billable Charges** zone displays the details of the billable charges which should be included in the construct. It contains the following columns:

Field Name	Field Description
Effective Start Date	Displays the date from when the construct is effective.
Effective End Date	Displays the date till when the construct is effective.
Priority	Displays the priority of an account.
Template	Displays the name of the template.
Criteria	Indicates the bind variable for which you need to define the value.  <b>Note:</b> The bind variables change depending on the account selection template that you have selected. If a business label is defined for the bind variable, the business label appears in this field.
Invoice Account Information	Displays the information of the account. In addition, a <b>Context Menu</b> (  ) appears corresponding to this field which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account.
Edit	On clicking the <b>Edit</b> (  ) icon in the <b>Edit</b> column, the <b>Selection Criteria</b> screen appears where you can edit the construct.
Delete	On clicking the <b>Delete</b> (  ) icon in the <b>Delete</b> column, you can delete the construct.

### Include Adjustments

The **Include Adjustments** zone displays the details of the adjustments which should be included in the construct. It contains the following columns:

Column Name	Column Description
Effective Start Date	Displays the date from when the construct is effective.
Effective End Date	Displays the date till when the construct is effective.
Priority	Displays the priority of an account.
Template	Displays the name of the template.
Criteria	Indicates the bind variable for which you need to define the value.  <b>Note:</b> The bind variables change depending on the account selection template that you have selected. If a business label is defined for the bind variable, the business label appears in this field.
Invoice Account Information	Displays the information of the account. In addition, a <b>Context Menu</b> (☰) appears corresponding to this field which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account.
Edit	On clicking the <b>Edit</b> (✎) icon in the <b>Edit</b> column, the <b>Selection Criteria</b> screen appears where you can edit the construct.
Delete	On clicking the <b>Delete</b> (🗑) icon in the <b>Delete</b> column, you can delete the construct.

### Include Bill Segments

The **Include Bill Segments** zone displays the details of the bill segments which should be included in the construct. It contains the following columns:

Field Name	Field Description
Effective Start Date	Displays the date from when the construct is effective.
Effective End Date	Displays the date till when the construct is effective.
Priority	Displays the priority of an account.

Field Name	Field Description
Template	Displays the name of the template.
Criteria	Indicates the bind variable for which you need to define the value.  <b>Note:</b> The bind variables change depending on the account selection template that you have selected. If a business label is defined for the bind variable, the business label appears in this field.
Settlement Account Information	Displays the information of the settlement account. In addition, a <b>Context Menu</b> (  ) appears corresponding to this field which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account.
Edit	On clicking the <b>Edit</b> (  ) icon in the <b>Edit</b> column, the <b>Selection Criteria</b> screen appears where you can edit the construct.
Delete	On clicking the <b>Delete</b> (  ) icon in the <b>Delete</b> column, you can delete the construct.

**Note:** The **Include Bill Segments** zone appears only when you select **Settlement** from the **Construct Type** field drop-down list while searching for a construct.

### Linked Accounts

The **Linked Accounts** zone displays the details of all the linked account details of a particular person/account hierarchy. It contains the following columns:

Column Name	Column Description
Effective Start Date	Displays the date from when the construct is effective.
Effective End Date	Displays the date till when the construct is effective.
Account ID	Displays the account ID.
Account Information	Displays the information of the account. In addition, a <b>Context Menu</b> (  ) appears corresponding to this field which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account.

### Exclude Usage/Invoice Accounts

The **Exclude Usage/Invoice Accounts** zone displays the details of usage and invoice accounts which you want to exclude from the construct. It contains the following columns:

Field Name	Field Description
Effective Start Date	Displays the date from when the construct is effective.
Effective End Date	Displays the date till when the construct is effective.
Account ID	Displays the account ID.
Account Information	Displays the information of the account. In addition, a <b>Context Menu</b> (  ) appears corresponding to this field which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account.
Edit	On clicking the <b>Edit</b> (  ) icon in the <b>Edit</b> column, the <b>Selection Criteria</b> screen appears where you can edit the construct.
Delete	On clicking the <b>Delete</b> (  ) icon in the <b>Delete</b> column, you can delete the construct.

## Construct - Log

The **Log** tab contains the following zone:

- [Construct Log](#) on page 1142

### Construct Log

The **Construct Log** zone lists the complete trail of actions performed on the construct. It contains the following columns:

Column Name	Column Description
Date/Time	Displays the date and time when the action was performed on the construct.
Details	Displays the details about the action performed on the construct..
User	Indicates the user who has performed the action on the construct..
Log Type	Indicates the type of the log.

Column Name	Column Description
Related Object	Indicates the object or entity which is created when the action is performed on the construct..  <b>Note:</b> At present, no data appears in this column. The implementation team can build the custom logic to meet the business requirements.
Status Reason	Indicates the reason why the status of the construct. is changed.  <b>Note:</b> At present, no data appears in this column. The implementation team can build the custom logic to meet the business requirements.

**Note:** You can manually add a log entry for the construct by clicking the **Add Log Entry** link in the upper right corner of the **Construct Log** zone.

## **Including Usage Accounts in a Construct**

While defining a construct, you need to indicate the persons and their usage accounts for which you want to define the construct. The system allows you to select a set of usage accounts based on the criteria using the account selection template.

**Note:** One usage account can belong to only one active construct and not to multiple active constructs at the same time.

### **Prerequisites**

To include usage accounts in a construct, you should have:

- Persons, usage accounts, and account selection templates defined in the application

### **Procedure**

To include usage accounts in a construct:

1. Ensure that **Include Usage/Invoice Accounts** zone is expanded while defining, editing, viewing or copying a construct on the **Construct** screen. It contains the following fields:

Field Name	Field Description
Effective Start Date	Displays the date from when the construct is effective.
Effective End Date	Displays the date till when the construct is effective.
Priority	Displays the priority of an account.
Template	Displays the name of the template.
Criteria Description	Displays the description of the criteria.

Field Name	Field Description
Criteria	Indicates the bind variable for which you need to define the value.  <b>Note:</b> The bind variables change depending on the account selection template that you have selected. If a business label is defined for the bind variable, the business label appears in this field.
Edit	On clicking the <b>Edit</b> (✎) icon in the <b>Edit</b> column, the <b>Payment Request Type</b> screen appears where you can edit the details of the payment request type.
Delete	On clicking the <b>Delete</b> (🗑) icon in the <b>Delete</b> column, you can delete the payment request type.

- Click the **Add** link at the top—right side of the **Include Usage/Invoice Accounts** zone.  
The **Selection Criteria** screen appears.
- Enter the required details and click **Save**.
- If you want to include more than one usage accounts, click **Save and Add New** button in the **Selection Criteria** screen and repeat step 3.
- The **Usage Accounts** are included in the construct.

## Including Usage and Invoice Accounts in a Construct

While defining a construct, you need to indicate the persons and their usage and invoice accounts for which you want to define the construct. The system allows you to select a set of usage and invoice accounts based on the criteria using the usage and invoice account selection template.

**Note:** One usage and invoice account can belong to only one active construct and not to multiple active constructs at the same time.

#### Prerequisites

To include usage and invoice accounts in a construct, you should have:

- Persons, usage and invoice accounts, and account selection templates defined in the application

#### Procedure

To include usage and invoice accounts in a construct:

- Ensure that **Include Usage/Invoice Accounts** zone is expanded while defining, editing, viewing or copying a construct on the **Construct** screen. It contains the following fields:

Field Name	Field Description
Effective Start Date	Displays the date from when the construct is effective.
Effective End Date	Displays the date till when the construct is effective.
Priority	Displays the priority of an account.

Field Name	Field Description
Template	Displays the name of the template.
Criteria Description	Displays the description of the criteria.
Criteria	Indicates the bind variable for which you need to define the value.  <b>Note:</b> The bind variables change depending on the account selection template that you have selected. If a business label is defined for the bind variable, the business label appears in this field.
Edit	On clicking the <b>Edit</b> (  ) icon in the <b>Edit</b> column, the <b>Selection Criteria</b> screen appears where you can edit the construct.
Delete	On clicking the <b>Delete</b> (  ) icon in the <b>Delete</b> column, you can delete the construct.

- Click the **Add** link at the top—right side of the **Include Usage/Invoice Accounts** zone.  
The **Selection Criteria** screen appears.
- Enter the required details and click **Save**.
- If you want to include more than one usage accounts, click **Save and Add New** button in the **Selection Criteria** screen and repeat step 3.

The **Usage and Invoice Accounts** are included in the construct.

## Excluding Usage Accounts from a Construct

The system will determine the usage accounts based on the criteria defined in the **Exclude Usage Accounts** section. There might be situations when you do not want to include all usage accounts that satisfy the criteria in the construct. In such cases, you can list the usage accounts that should be excluded from the construct.

### Procedure

To exclude usage accounts from a construct:

- Ensure that **Exclude Usage/Invoice Accounts** zone is expanded while defining, editing, viewing or copying a construct on the **Construct** screen. It contains the following fields:

Field Name	Field Description
Effective Start Date	Displays the date from when the construct is effective.
Effective End Date	Displays the date till when the construct is effective.
Effective End Date	Displays the date till when the construct is effective.
Account ID	Displays the account ID.

Field Name	Field Description
Account Information	Displays the information of the account. In addition, this column has a <b>Context Menu</b> (  ) which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account.
Edit	On clicking the <b>Edit</b> (  ) icon in the <b>Edit</b> column, the <b>Selection Criteria</b> screen appears where you can edit the construct.
Delete	On clicking the <b>Delete</b> (  ) icon in the <b>Delete</b> column, you can delete the construct.

- Click the **Add** link at the top—right side of the **Exclude Usage/Invoice Accounts** zone.

The **Exclude Usage Accounts** screen appears.

- Search for the usage account that you want to exclude from the construct.

**Note:** The **Search** () icon appears corresponding to this field. On clicking the **Search** icon, the **Account Search** window appears.

- If you want to exclude more than one usage account, click the **Add** () icon and then repeat the step 3.

**Note:** However, if you do not want a usage account to be excluded from the construct, click the **Delete** () icon corresponding to the excluded usage account.

- Enter the required details and click **Save**.

The **Usage Accounts** are excluded from the construct.

## **Including Billable Charges in a Construct**

While defining a construct, you need to indicate the billable charges that you want to bill through an invoice account. You can use an existing invoice account. The system allows you to select a set of billable charges based on the criteria using the billable charge selection template.

### **Prerequisites**

To include billable charges in a construct, you should have:

- Billable charge selection templates defined in the application
- Invoice account defined in the application (in case you want to use an existing invoice account)

### **Procedure**

To include billable charges in a construct:

1. Ensure that **Include Billable Charges** zone is expanded while defining, editing, viewing or copying a construct on the **Construct** screen. It contains the following fields:

Field Name	Field Description
Effective Start Date	Displays the date from when the construct is effective.
Effective End Date	Displays the date till when the construct is effective.
Priority	Displays the priority of an account.
Template	Displays the name of the template.
Criteria	Indicates the bind variable for which you need to define the value.  <b>Note:</b> The bind variables change depending on the account selection template that you have selected. If a business label is defined for the bind variable, the business label appears in this field.
Invoice Account Information	Displays the information of the account. In addition, this column has a <b>Context Menu</b> (  ) which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account.
Edit	On clicking the <b>Edit</b> (  ) icon in the <b>Edit</b> column, the <b>Selection Criteria</b> screen appears where you can edit the construct.
Delete	On clicking the <b>Delete</b> (  ) icon in the <b>Delete</b> column, you can delete the construct.

2. Click the **Add** link at the top—right side of the **Include Billable Charges** zone.  
The **Selection Criteria** screen appears.
3. Search for the billable charge selection template that you want to use for selecting a set of billable charges.
4. Enter the required details and click **Save**.
5. If you want to include more than one usage accounts, click **Save and Add New** button in the **Selection Criteria** screen and repeat step 4.

The **Usage And Invoice Accounts** are included in the construct.

## Including Bill Segments in a Construct

While defining a construct, you need to indicate the bill segments that you want to bill through a settlement account. You can use an existing settlement account. The system allows you to select multiple bill segments based on the criteria using the bill segment selection template.

### Prerequisites

To include bill segments in a construct, you should have:

- Bill segment selection templates defined in the application
- Settlement account defined in the application (in case you want to use an existing settlement account)

### **Procedure**

To include bill segments in a construct:

1. Ensure that **Include Bill Segments** zone is expanded while defining, editing, viewing or copying a construct on the **Construct** screen. It contains the following fields:

<b>Field Name</b>	<b>Field Description</b>
Effective Start Date	Displays the date from when the construct is effective.
Effective End Date	Displays the date till when the construct is effective.
Priority	Displays the priority of an account.
Template	Displays the name of the template.
Criteria	Indicates the bind variable for which you need to define the value.  <b>Note:</b> The bind variables change depending on the account selection template that you have selected. If a business label is defined for the bind variable, the business label appears in this field.
Settlement Account Information	Displays the information of the settlement account. In addition, this column has a context menu (☰) which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account.
Edit	On clicking the <b>Edit</b> (✎) icon in the <b>Edit</b> column, the <b>Selection Criteria</b> screen appears where you can edit the construct.
Delete	On clicking the <b>Delete</b> (🗑) icon in the <b>Delete</b> column, you can delete the construct.

2. Click the **Add** link at the top—right side of the **Include Bill Segments** zone.

The **Selection Criteria** screen appears.

3. Search for the bill segment selection template that you want to use for selecting bill segments.
4. Enter the required details and click **Save**.
5. If you want to include more than one bill segments, click **Save and Add New** button in the **Selection Criteria** screen and repeat step 4.

The bill segments are included from the construct.

## Including Adjustments in a Construct

While defining a construct, you need to indicate the adjustments that you want to bill through an invoice or settlement account. You can use an existing invoice or settlement account. The system allows you to select a set of adjustments based on the criteria using the adjustment selection template.

### Prerequisites

To include adjustments in a construct, you should have:

- Adjustment selection templates defined in the application
- Invoice or settlement account defined in the application (in case you want to use an existing invoice account)

### Procedure

To include adjustments in a construct:

1. Ensure that **Include Adjustments** zone is expanded while defining, editing, viewing or copying a construct in the **Construct** screen. It contains the following fields:

Column Name	Column Description
Effective Start Date	Displays the date from when the construct is effective.
Effective End Date	Displays the date till when the construct is effective.
Priority	Displays the priority of an account.
Template	Displays the name of the template.
Criteria	Indicates the bind variable for which you need to define the value.  <b>Note:</b> The bind variables change depending on the account selection template that you have selected. If a business label is defined for the bind variable, the business label appears in this field.
Invoice Account Information	Displays the information of the invoice account. In addition, this column has a context menu (☰) which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account.
Edit	On clicking the <b>Edit</b> (✎) icon in the <b>Edit</b> column, the <b>Selection Criteria</b> screen appears where you can edit the construct.
Delete	On clicking the <b>Delete</b> (🗑) icon in the <b>Delete</b> column, you can delete the construct.

2. Click the **Add** link at the top-right side of the **Include Adjustments** zone.  
The **Selection Criteria** screen appears.
3. Search for the adjustment selection template that you want to use for selecting a set of adjustments.
4. Enter the required details and click **Save**.
5. If you want to include more than one usage adjustments, click **Save and Add New** button in the **Selection Criteria** screen and repeat step 4.

The **Adjustments** are included in the construct.

## Activating a Construct

Only active constructs which are effective are used during the construct based billing process. Therefore, you need to activate a construct.

### Prerequisites

To activate a construct, you should have:

- Target contract type (characteristic type) defined on usage accounts' contracts' contract type
- Default account creation algorithm defined using the C1-ACTCR-IC algorithm type
- Default contract creation algorithm defined using the C1-CTMP-IC algorithm type
- Assign the **C1-IC\_AC** To Do type to a To Do role whose users must receive the To Do entries generated when the new invoice account is created while activating a construct

### Procedure

To activate a construct:

1. Search for the draft construct in the **Construct** screen.
2. In the **Search Results** section, click **View**  icon in the **View** column corresponding to the construct that you want to activate.

The **Construct** screen appears.

3. Click **Submit** button in the **Construct Information** zone.

A message appears confirming whether you want to activate a construct.

**Note:** If you click on **Edit**  icon or **Copy** icon  in the respective columns while searching for a construct, click on **Save and Next** button and then click **Submit** button in the **Construct Information** zone.

4. Click **OK**.

The construct is activated.

## Billing and Settlement Hierarchy

The **Billing and Settlement Hierarchy** screen allows you to search for a person/account hierarchy using various search criteria. Through this screen, you can search and view person/account hierarchy. It contains the following zones:

- [Search Hierarchy](#) on page 1152
- [Linked Accounts](#) on page 1141
- [Criteria](#) on page 1154

## Search Hierarchy

The **Search Hierarchy** zone allows you to search for a person or an account with its billing/settlement hierarchy using various search criteria. It contains the following two sections:

- **Search Criteria** — The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for an account with person's billing or settlement hierarchy or account's billing or settlement hierarchy. The valid values are: <ul style="list-style-type: none"> <li>• <b>Person-Billing Hierarchy</b></li> <li>• <b>Person-Settlement Hierarchy</b></li> <li>• <b>Account-Billing Hierarchy</b></li> <li>• <b>Account-Settlement Hierarchy</b></li> </ul>	Yes
Person ID	Used to search for accounts which belong to a particular person. <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> This field appears only when you select the <b>Person-Billing Hierarchy</b> and <b>Person-Settlement Hierarchy</b> option from the <b>Search By</b> list.</p> <p>The <b>Search</b> () icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Person Search</b> window appears.</p> </div>	Yes
As on Date	Used to search for billing information which is effective on the specified date.	No
Person Name	Used to search for accounts which belong to a particular person. <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> This field appears only when you select the <b>Person-Billing Hierarchy</b> and <b>Person-Settlement Hierarchy</b> option from the <b>Search By</b> list.</p> </div>	Yes
View Option	Used to indicate whether you want to view invoice or usage account billing details. The valid values are: <ul style="list-style-type: none"> <li>• <b>Invoice Account</b> — Used when you want to view the usage accounts billed through an invoice account.</li> <li>• <b>Usage Account</b> — Used when you want to view the invoice accounts through which a usage account is billed.</li> </ul> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> This field appears only when you select the <b>Account-Billing Hierarchy</b> and <b>Account-Settlement Hierarchy</b> option from the <b>Search By</b> list.</p> </div>	No

Field Name	Field Description	Mandatory (Yes or No)
Account ID	Used to specify the invoice or usage account ID.  <b>Note:</b> This field appears only when you select the <b>Account-Billing Hierarchy</b> and <b>Account-Settlement Hierarchy</b> option from the <b>Search By</b> list.	No

**Note:** You must specify at least one search criterion while searching for a person or an account.

- **Search Results** — On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Invoice Account Information	Displays the information of the invoice account.  <b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account.  This field appears only when you select the <b>Person-Billing Hierarchy</b> and <b>Account-Billing Hierarchy</b> (if <b>View Option</b> is selected as <b>Settlement Account</b> ) option from the <b>Search By</b> list.
Settlement Account Information	Displays the information of the settlement account.  <b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account.  This field appears only when you select the <b>Account-Billing Hierarchy</b> and <b>Account-Settlement Hierarchy</b> option from the <b>Search By</b> list.
Construct Information	Displays additional information about the construct.  <b>Note:</b> It has a link. On clicking the link, the <b>Construct</b> screen appears where you can view the details of the respective construct.
Effective Start Date	Displays the date from when the construct is effective.
Effective End Date	Displays the date till when the construct is effective.

On clicking the **Broadcast** icon () corresponding to the account, **Linked Accounts** zone and **Criteria** zone appears with the details of the respective account.

### Related Topics

For more information on...	See...
<b>Billing and Settlement Hierarchy</b> zone	<a href="#">Billing and Settlement Hierarchy</a> on page 1151

## Linked Accounts

The **Linked Accounts** zone displays various accounts linked to a person. It contains the following columns:

Field Name	Field Description
Account ID	Displays the account IDs of all the accounts linked to a person.  <b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account.
Account Category	Displays the category of an account.
Person Name	Displays the name of a particular person.  <b>Note:</b> It has a link. On clicking the link, the <b>Person</b> screen appears where you can view the details of the respective person.

**Note:**

The **Linked Accounts** zone does not appear automatically. It appears only when you click the **Broadcast**  icon in the search results section of the **Search Hierarchy** zone.

**Related Topics**

For more information on...	See...
<b>Billing and Settlement Hierarchy</b> screen	<a href="#">Billing and Settlement Hierarchy</a> on page 1151
<b>Search Hierarchy</b> zone	<a href="#">Search Hierarchy</a> on page 1152

**Criteria**

The **Criteria** zone displays the details of all the criteria of a particular person/account hierarchy. It contains the following columns:

Column Name	Column Description
Criteria Type	Displays the criteria type for billing to the account.
Priority	Displays the order in which the bill segments must be generated for a set of billable charges or adjustments on the invoice account.
Selection Criteria	Displays the selection criteria for the construct

How to view the details of the construct	<a href="#">Viewing the Construct Details</a> on page 1136

**Viewing Person Billing Hierarchy Details****Procedure**

To view the details of a construct with person billing hierarchy:

1. Search for the hierarchy in the **Billing and Settlement Hierarchy** screen.
2. Select **Account-Billing Hierarchy** option from the **Search By** list and **Usage Account** option from the **View Option** list in the **Search Hierarchy** zone.
3. Enter **Person Name** or **Person ID** and click **Search** button.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

4. In the **Search Results** section, click the **Broadcast**  icon corresponding to the construct whose details you want to view. The **Linked Accounts** and **Criteria** zones appear.

The details of all the active constructs with invoice only or invoice and settlement purposes are displayed.

5. View the details of the construct in the **Linked Accounts** zone and **Criteria** zone.

## Viewing Person Settlement Hierarchy Details

### Procedure

To view the details of a construct with person settlement hierarchy:

1. Search for the construct in the **Billing and Settlement Hierarchy** screen.
2. Select **Person-Settlement Hierarchy** option from the **Search By** list in the **Search Hierarchy** zone.
3. Enter **Person Name** or **Person ID** and click **Search** button.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

4. In the **Search Results** section, click the **Broadcast**  icon corresponding to the construct whose details you want to view. The **Linked Accounts** and **Criteria** zones appear.

The details of all the active constructs with settlement only types of construct are displayed.

5. View the details of the construct in the **Linked Accounts** zone and **Criteria** zone.

## Viewing Usage Accounts Billed through an Invoice Account

### Procedure

To view the usage accounts billed through an invoice account:

1. Click the **Menu** link in the **Actions/Navigation** area.  
A list appears.
2. Select the **Main Menu** option from the list.
3. From the **Main Menu**, select **Invoice & Settlement Management** and then click **Billing and Settlement Hierarchy**.

The **Billing and Settlement Hierarchy** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for an account with person's billing or settlement hierarchy or account's billing or settlement hierarchy. The valid values are: <ul style="list-style-type: none"> <li>• <b>Person-Billing Hierarchy</b></li> <li>• <b>Person-Settlement Hierarchy</b></li> <li>• <b>Account-Billing Hierarchy</b></li> <li>• <b>Account-Settlement Hierarchy</b></li> </ul>	Yes
Person ID	Used to search for accounts which belong to a particular person.  <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This field appears only when you select the <b>Person-Billing Hierarchy</b> and <b>Person-Settlement Hierarchy</b> option from the <b>Search By</b> list.  The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Person Search</b> window appears.</p> </div>	Yes
As on Date	Used to search for billing information which is effective on the specified date.	No
Person Name	Used to search for accounts which belong to a particular person.  <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This field appears only when you select the <b>Person-Billing Hierarchy</b> and <b>Person-Settlement Hierarchy</b> option from the <b>Search By</b> list.</p> </div>	Yes

Field Name	Field Description	Mandatory (Yes or No)
View Option	<p>Used to indicate whether you want to view invoice or usage account billing details. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Invoice Account</b> — Used when you want to view the usage accounts billed through an invoice account.</li> <li>• <b>Usage Account</b> — Used when you want to view the invoice accounts through which a usage account is billed.</li> </ul> <p><b>Note:</b> This field appears only when you select the <b>Account-Billing Hierarchy</b> and <b>Account-Settlement Hierarchy</b> option from the <b>Search By</b> list.</p>	No
Account ID	<p>Used to specify the invoice or usage account ID.</p> <p><b>Note:</b> This field appears only when you select the <b>Account-Billing Hierarchy</b> and <b>Account-Settlement Hierarchy</b> option from the <b>Search By</b> list.</p>	No

4. Select the **Invoice Account** option from the **View Option** list.
5. Enter the date and invoice account ID in the respective fields.
6. Click **Search**.

A list of usage accounts which are billed through the invoice account appears in the search results. The **Search Results** section contains the following columns:

Column Name	Column Description
Usage Account	<p>Indicates the usage account which is billed through the invoice account.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account.</p>
Construct Description	<p>Indicates the construct in which the usage account is included.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Construct</b> screen appears where you can view the details of the respective construct.</p>
Selection Criteria	Indicates the criteria used to select a set of usage account's charges or adjustments.

## **Viewing Invoice Accounts through which a Usage Account is Billed**

### **Procedure**

To view the invoice accounts through which a usage account is billed:

1. Search for the hierarchy in the **Billing and Settlement Hierarchy** screen.

2. Select **Account-Billing Hierarchy** option from the **Search By** list and **Usage Account** option from the **View Option** list in the **Search Hierarchy** zone.
3. Enter the **Account ID** and click **Search** button.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

4. Click **Search**.

A list of invoice accounts through which the usage account’s charges or adjustments are billed appears in the search results. The **Search Results** section contains the following fields:

Field Name	Field Description
Construct Description	Indicates the construct in which the usage account is included.  <b>Note:</b> It has a link. On clicking the link, the <b>Construct</b> screen appears where you can view the details of the respective construct.

In addition, this section contains the following columns:

Column Name	Column Description
Invoice Account	Indicates the invoice account through which the usage account’s charges or adjustments are billed.  <b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears with the details of the respective account.
Priority	Indicates the order in which the bill segments must be generated for a set of billable charges or adjustments on the invoice account.
Selection Criteria	Indicates the criteria used to select a set of billable charges or adjustments.

# Chapter 16

---

## Trial Billing

---

### Topics:

- [Trial Bill \(Used for Searching\)](#)
- [Trial Bill \(Used for Viewing\)](#)

Oracle Revenue Management and Billing facilitates you to generate trial bills before actual bill is generated for an account. This helps to review the trial bill and make the required corrections before the actual bill is generated. The Trial Billing feature is currently designed and developed for open item accounting and not for balance forward accounting.

The process of trial and actual billing is identical. The only difference is that you cannot freeze and complete the trial bills. Also, during trial billing, the account balance is not updated. It is updated only when the actual bill is generated. You can generate trial bill only in case of regular billing, and not in case of adhoc billing. The trial bills can be generated only through the batch process. To generate trial bills, you need to execute the following batches in the specified order:

1. **Pending Bill Generation (C1-PNDBL)** – This batch is used to generate pending trial or actual bills for accounts that meet the criteria.
2. **Bill Segment Generation (C1-BLGEN)** – This batch is used to generate bill segments for pending trial or actual bills.
3. **Bill Completion (C1-BLPPR)** – This batch is used to generate post-processing bill segments in the pending trial or actual bills during the bill completion process. The adjustments, if any, created on the accounts are swept onto the pending trial or actual bills. In addition, the bill routing information and bill messages are stamped on the pending trial or actual bills. If the adjustment currency is different from the account's invoice currency, the transfer adjustment is created on the pending actual bill. However, in case of pending trial bill, the currency conversion for adjustments is done, but the transfer adjustments are not created. Finally, the status of the actual bill is set to **Complete**, whereas the status of the trial bill remains as **Pending**.

**Note:** The adjustments which are in the **Freezable** status are not swept onto the trial bills. Only adjustments which are in the **Frozen** status are swept onto the trial bills.

The **Trial Bill** check box is added in the **Main** tab of the **Account** screen. If you leave the **Process All or Selected Accounts** parameter blank while executing the above batches, all accounts (that meet the criteria) irrespective of whether the **Trial Bill** check box is selected or not are considered for generating the trial bills. However, if the **Process All or Selected Accounts** parameter is set to **Y**, then only those accounts that meet the criteria and where the **Trial Bill** check box is selected are considered for generating the trial bills.

You can create an actual bill using a trial bill. While creating actual bills using trial bills, you need to specify the trial billing batch run number whose trial bills

you want to convert to the actual bills. To create actual bills using trial bills, you need to execute the following batches in the specified order:

1. **Pending Bill Generation (C1-PNDBL)** - This batch generates pending actual bill for accounts that meet the criteria.
2. **Bill Segment Generation (C1-BLGEN)** – This batch copies regular bill segments which are generated for the trial bill and stamps them onto the pending actual bill. It also copies the corresponding financial transactions (FTs).
3. **Bill Completion (C1-BLPPR)** – This batch copies post-processing bill segments which are generated for the trial bill and stamps them onto the pending actual bill. The bill routing information and bill messages are copied from the trial bill to the pending actual bill. The adjustment, if any, created on the account are swept onto the pending actual bill. They are not copied from the respective trial bill. If the adjustment currency is different from the account's invoice currency, the transfer adjustment is created on the pending actual bill. Finally, the status of the actual bill is set to **Complete**.

The actual bill ID, bill segment ID and FT ID are different from the trial bill ID, bill segment ID and FT ID, respectively. If an actual bill is created using a trial bill, the system will stamp the trial bill ID on the actual bill. This helps you to track the trial bill of an actual bill.

The system allows you to view a trial bill through a user interface. It also allows you to print the trial bill in the PDF format. You can print a trial bill only when Oracle Documaker is integrated with Oracle Revenue Management and Billing. For more information about the batches, see *Oracle Revenue Management and Billing Batch Guide*.

## Trial Bill (Used for Searching)

The **Trial Bill** screen allows you to search for a trial bill using various search criteria. It contains the following zone:

- [Search Trial Bill](#) on page 1163

Through this screen, you can navigate to the following screen:

- [Trial Bill \(Used for Viewing\)](#) on page 1166

### Search Trial Bill

The **Search Trial Bill** zone allows you to search for trial bills using various search criteria. It contains the following two sections:

- **Search Criteria** — The criteria are grouped as indicated by line separators between the criteria. Each group is independent from the other, and only one group is used at a time for searching. If you enter criteria in more than one group, the criteria from the first group is used for searching. For example, if you enter the criteria in the Account ID and Trial Bill Description fields (which are in different criteria groups), the system searches for trial bills using the account ID. The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for a trial bill using the trial bill details. The valid value is: <ul style="list-style-type: none"> <li>• Trial Bill Details</li> </ul> <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"> <b>Note:</b> By default, the <b>Trial Bill Details</b> option is selected.         </div>	Yes
Person ID	Used to search trial bills which are generated for a particular person. <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"> <b>Note:</b> The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Person Search</b> window appears.         </div>	No
Trial Bill ID	Used to search for a particular trial bill.	No
Account ID	Used to search trial bills which are generated for a particular account. <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"> <b>Note:</b> The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Account Search</b> window appears.         </div>	No
Division	Used to search trial bills which are generated for accounts belonging to a particular division.	No
From Trial Bill Date	Used to search trial bills which are generated from a particular date onwards.	No
Invoice Currency	Used to search trial bills which are generated in a particular invoice currency.	No
To Trial Bill Date	Used to search trial bills which are generated till a particular date.	No

Field Name	Field Description	Mandatory (Yes or No)
Batch Run Date	Used to search trial bills which are generated on a particular batch run date.	No
Trial Bill Description	Used to search trial bills which are generated in a particular batch run.	Yes (Conditional) <b>Note:</b> This field is required when you are searching for trial bills using the batch run date.

**Note:** You must specify at least one search criterion while searching for a trial bill.

- **Search Results** — On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Trial Bill Information	Displays additional information about the trial bill. <b>Note:</b> It has a link. On clicking the link, the <b>Trial Bill</b> screen appears where you can view the details of the respective trial bill.
Current Charges	Displays the trial bill amount.
Account Information	Indicates the account for which the trial bill is generated. In addition, this column has a context menu which helps in navigating to other screens in the application. <b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears with the details of the respective account.
Person Name	Indicates the person for whom the trial bill is generated.
Division	Indicates the division to which the account belongs.
Batch Run Date	Displays the date when the batch is executed to generate the trial bill.
Batch Run Number	Indicates the batch run in which the trial bill is generated.

How to search for a trial bill	<a href="#">Searching for a Trial Bill</a> on page 1164
How to view the details of a trial bill	<a href="#">Viewing the Trial Bill Details</a> on page 1165

## Searching for a Trial Bill

### Prerequisites

To search for a trial bill, you should have:

- Divisions and currencies defined in the application

### Procedure

To search for a trial bill:

1. Click the **Menu** link in the **Application** toolbar.

A list appears.

- From the **Main** menu, select **Financial** and then click **Trial Bill**.

The **Trial Bill** screen appears.

- Enter the search criteria in the **Search Trial Bill** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

- Click **Search**.

A list of trial bills that meet the search criteria appears in the **Search Results** section.

## Viewing the Trial Bill Details

### Procedure

To view the details of a trial bill:

- Search for the trial bill in the **Trial Bill** screen.
- In the **Search Results** section, click the link in the **Trial Bill Information** column corresponding to the trial bill whose details you want to view.  
The **Trial Bill** screen appears.
- View the basic details of the trial bill in the **Trial Bill** zone.
- View the segments of the trial bill in the **Trial Bill Segments** zone.
- View the calc lines of a trial bill segment in the **Trial Bill Segment Calc Lines** zone.
- View the service quantity details of a trial bill segment in the **Trial Bill Segment SQ Details** zone.
- View the financial details of a trial bill segment in the **Trial Bill Segment Financial Details** zone.

How to view the financial details of a trial bill segment	<a href="#">Viewing the Financial Details of a Trial Bill Segment</a> on page 1174

## Trial Bill (Used for Viewing)

The **Trial Bill** screen allows you to:

- View the details of a trial bill, such as the trial bill summary, trial bill messages, and trial bill characteristics
- View the segments of a trial bill
- View the calculation lines, service quantity details, and financial details of a trial bill segment

It contains the following zones:

- [Trial Bill](#) on page 1166
- [Trial Bill Segments](#) on page 1167
- [Trial Bill Segment Calc Lines](#) on page 1169
- [Trial Bill Segment SQ Details](#) on page 1170
- [Trial Bill Segment Financial Details](#) on page 1170

### Trial Bill

The **Trial Bill** zone displays the details of the trial bill. It contains the following sections:

- **Main** — This section provides basic information about the trial bill. It contains the following fields:

Field Name	Field Description
Trial Bill ID	Displays the trial bill ID.
Trial Bill Information	Displays additional information about the trial bill.
Trial Bill Description	Displays the description of the batch run in which the trial bill is generated.
Account Information	Indicates the account for which the trial bill is generated. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account.

- **Trial Bill Summary** — This section summarizes the financial impact of the bill. It contains the following fields:

Field Name	Field Description
New Charges	Displays the total amount of frozen bill segment financial transactions which are linked to the trial bill.
Adjustments	Displays the total amount of frozen and/or canceled adjustment financial transactions which are linked to the trial bill.
Corrections	Displays the total amount of canceled and/or rebilled bill segment financial transactions which are linked to the trial bill.
Total	Displays the sum of new charges, adjustments, and corrections.
No. of Bill Segments in Error	Indicates the number of bill segments in the trial bill which are in the <b>Error</b> status.

- **Trial Bill Messages** — This section lists the bill messages that are stamped on the trial bill. It contains the following columns:

Column Name	Column Description
Message Code	Displays the code that uniquely identifies the bill message.
Message on Bill	Displays the bill message.
Priority	Indicates the priority which determines the order in which the bill message must be printed on the trial bill.
Insert Code	Indicates whether the bill message must be sent separately along with the trial bill.

- **Characteristics** — This section lists characteristics defined for the trial bill. It contains the following columns:

Column Name	Column Description
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

In addition, this zone contains a button named **Display Trial Bill** which allows you to print a trial bill in the PDF format.

## Trial Bill Segments

The **Trial Bill Segments** zone lists the segments of the trial bill. You can filter the trial bill segments using various search criteria. This zone contains the following two sections:

- **Search Criteria** — The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Account ID	Used to search trial bill segments which are generated for a particular usage account.  <b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Account Search</b> window appears.	No

Field Name	Field Description	Mandatory (Yes or No)
Contract Type	Used to search trial bill segments which are generated against a particular type of contract.  <b>Note:</b> The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Contract Type Search</b> window appears.	No
Trial Bill Segment Type	Used to search for a particular type of trial bill segments. The valid values are: <ul style="list-style-type: none"> <li>• Post Processing</li> <li>• Regular</li> </ul>	No
Price Item	Used to search trial bill segments which are generated for a particular price item.  <b>Note:</b> The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Price Item Search</b> window appears.	No
Trial Bill Segment Status	Used to search trial bill segments in a particular status. The valid values are: <ul style="list-style-type: none"> <li>• Error</li> <li>• Freezable</li> </ul>	No

- **Search Results** — On clicking the **Search** button, the search results are filtered based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Trial Bill Segment ID	Displays the trial bill segment ID.
Status	Indicates the status of the trial bill segment. The valid values are: <ul style="list-style-type: none"> <li>• Error</li> <li>• Freezable</li> </ul>
Start Date	Displays the start date of the trial bill segment.
End Date	Displays the end date of the trial bill segment.
Calculated Amount (Pricing Currency)	Displays the trial bill segment amount in the pricing currency.
Price Item	Indicates the price item for which the trial bill segment is generated.
Pricing Parameters	Indicates the price item parameters which are used along with the price item for determining the price item pricing.
Rate Schedule	Indicates the rate schedule which is used for defining the price item pricing.
Price Assignment ID	Indicates the price item pricing which is used during calculation.

Column Name	Column Description
Billable Charge ID	Indicates the billable charge for which the trial bill segment is generated.  <b>Note:</b> It has a link. On clicking the link, the <b>Billable Charge</b> screen appears where you can view the details of the respective billable charge.
Construct ID	Indicates the construct through which the trial bill segment is generated.  <b>Note:</b> It has a link. On clicking the link, the <b>Construct</b> screen appears where you can view the details of the respective construct.

On clicking the **Broadcast**  icon corresponding to the trial bill segment, the **Trial Bill Segment Calc Lines**, **Trial Bill Segment SQ Details**, and **Trial Bill Segment Financial Details** zones appear with the details of the respective trial bill segment.

## Trial Bill Segment Calc Lines

The **Trial Bill Segment Calc Lines** zone lists the calculation lines which indicate how the system calculated the trial bill segment amount. It contains the following columns:

Column Name	Column Description
Sequence No.	Indicates the sequence in which the calculation line is created while calculating the trial bill segment amount.
Description on Bill	Displays the summarized information about the calculation line that will be printed on the trial bill.
Calculated Amount (Pricing Currency)	Displays the calculated charge amount associated with the calculation line in the pricing currency.
Calculated Amount (Invoice Currency)	Displays the calculated charge amount associated with the calculation line in the invoice currency.
Print	Indicates whether information about the calculation line will be printed on the person's trial bill. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>
Appears in Summary	Indicates whether the calculation line amount will appear in the summary of the trial bill. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>
Exchange Rate	Indicates the exchange rate which is used when the invoice currency is different from the pricing currency.
Price Component ID	Indicates the price component which is used during calculation.

Column Name	Column Description
Service Quantity Identifier	Indicates the service quantity identifier (SQI) of the service quantity which is priced on the calculation line.
Billable Service Quantity	Displays the SQI value used by the rates engine for calculation.
Base Amount	Displays the total amount derived from the cross-referenced lines that the current line then used to calculate the charge amount.
Rate Component Sequence	Indicates the sequence of the rate component on the effective rate version which is used while calculating the line.
Exempt Amount	Displays the amount of the calculated charge that the person does not have to pay due to tax exemption.
Distribution Code	Indicates the distribution code associated with the rate component.

By default, the **Trial Bill Segment Calc Lines** zone does not appear in the **Trial Bill** screen. It appears only when you click the **Broadcast**  icon corresponding to the trial bill segment in the **Trial Bill Segment** zone.

## Trial Bill Segment SQ Details

The **Trial Bill Segment SQ Details** zone lists the service quantity identifiers associated with the contract against which the trial bill segment is created. It contains the following columns:

Column Name	Column Description
SQI	Indicates the service quantity identifier.
Billable Service Quantity	Displays the SQI value used by the rates engine for calculation.

By default, the **Trial Bill Segment SQ Details** zone does not appear in the **Trial Bill** screen. It appears only when you click the **Broadcast**  icon corresponding to the trial bill segment in the **Trial Bill Segment** zone.

#### Related Topics

## Trial Bill Segment Financial Details

The **Trial Bill Segment Financial Details** zone lists the distribution codes which indicate the GL accounts that will be affected by the trial bill segment financial transaction. It contains the following columns:

Column Name	Column Description
Sequence No.	Indicates the sequence in which the distribution code will be considered for deriving the GL account.
Distribution Code	Indicates the distribution code associated with the rate component used for calculating the trial bill segment amount.

Column Name	Column Description
Amount	Displays the amount that will be debited or credited to the GL account.

By default, the **Trial Bill Segment Financial Details** zone does not appear in the **Trial Bill** screen. It appears only when you click the **Broadcast**  icon corresponding to the trial bill segment in the **Trial Bill Segment** zone.

## Printing a Trial Bill in the PDF Format

### Prerequisites

To print a trial bill in the PDF format, you should have:

- Oracle Documaker integrated with Oracle Revenue Management and Billing

### Procedure

To print a trial bill in the PDF format:

1. Search for the trial bill in the **Trial Bill** screen.
2. In the **Search Results** section, click the link in the **Trial Bill Information** column corresponding to the trial bill that you want to print in the PDF format.

The **Trial Bill** screen appears.

3. Click the **Display Trial Bill** button in the **Trial Bill** zone.

The trial bill is printed in the PDF format.

### Related Topics

<b>Trial Bill Segments</b> zone	<a href="#">Trial Bill Segments</a> on page 1167
How to filter the trial bill segments	<a href="#">Filtering the Trial Bill Segments</a> on page 1172

**Filtering the Trial Bill Segments****Prerequisites**

To filter the trial bill segments, you should have:

- Usage accounts, contract types, and price items defined in the application

**Procedure**

To filter the trial bill segments:

1. Search for the trial bill in the **Trial Bill** screen.
2. In the **Search Results** section, click the link in the **Trial Bill Information** column corresponding to the trial bill whose details you want to view.

The **Trial Bill** screen appears.

3. Enter the search criteria in the **Trial Bill Segments** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

4. Click **Search**.

The search results are filtered based on the specified criteria.

---

# Chapter 17

---

## Bill Tolerance

---

### Topics:

- [Prerequisites](#)

Oracle Revenue Management and Billing allows you to define tolerance limit for the bill amount. If the difference between the previous and current bill amount exceeds either positive or negative tolerance limit, a To Do entry is generated when you initiate the bill completion process. In addition, a To Do entry is generated for the first bill of an account during the bill completion process. Until you review and close the To Do entry, you cannot complete the bill. After you close the To Do entry, you need to initiate the bill completion process once again to freeze and complete the bill. Note that the To Do entries are generated only for regular bills and not for adhoc bills.

The **Bill Tolerance** feature is supported when you freeze and complete the regular bills through the user interface and through the charge based billing batch named **Bill Completion (C1-BLPPR)**. It is not yet supported when you freeze and complete the bill through the **BILLING** batch. In addition, this feature is not yet designed to work when bills are generated through the construct based billing batches.

For more information on how to setup the bill tolerance feature, refer to [Prerequisites](#) on page 1176.

## Prerequisites

---

To setup the bill tolerance feature, you need to do the following:

- Define an algorithm of the C1-BILL\_TOLR algorithm type and attach it to the **Pre-Bill Completion Review** system event on the respective customer class. This algorithm type has the following parameters:
  - **Positive Tolerance Percentage** – Used to specify the positive tolerance limit in percentage.
  - **Negative Tolerance Percentage** – Used to specify the negative tolerance limit in percentage.
  - **Positive Tolerance Amount** - Used to specify the positive tolerance limit in amount.
  - **Negative Tolerance Amount** - Used to specify the negative tolerance limit in amount.
  - **Tolerance To Do Type** – Used to indicate that To Do entry of the specified To Do type must be created when the bill amount difference exceeds either positive or negative tolerance limit. This parameter is mandatory.
  - **First Bill To Do Type** – Used to indicate that To Do entry of the specified To Do type must be created when the first bill is generated for an account. This parameter is mandatory.
  - **Tolerance To Do Role** - Used to indicate that users with the specified To Do role can only view the “%1 Bill Tolerance Limit Exceeded” To Do entry. This parameter is mandatory.
  - **First Bill To Do Role** - Used to indicate that users with the specified To Do role can only view the “%1 To-do generated for First Bill” To Do entry. This parameter is mandatory.

For example, if you set the **Positive Tolerance Percentage** parameter to 10 and the **Negative Tolerance Percentage** parameter to 15 in the algorithm, then in the following scenarios:

Current Bill Amount (USD)	Previous Bill Amount (USD)	Tolerance Amount Calculation	To Do Entry Generated (Yes or No)	Reason
120	100	$100+(100*10)/100=110$	Yes	Current Bill Amount is above Positive Tolerance Limit
115	105	$105+(105*10)/100=115.5$	No	Current Bill Amount is within Positive Tolerance Limit
80	100	$100-(100*15)/100=85$	Yes	Current Bill Amount is below Negative Tolerance Limit
95	110	$110-(110*15)/100=93.5$	No	Current Bill Amount is within Negative Tolerance Limit

If the tolerance limit is specified in both percentage and amount, the system calculates the tolerance amount using percentage and amount, considers the minimum value, and then creates the To Do entry accordingly. For example, if you set the **Positive Tolerance Percentage** parameter to 10, the **Positive Tolerance Amount** parameter to 15, the **Negative Tolerance Percentage** parameter to 5, and the **Negative Tolerance Amount** parameter to 25 in the algorithm, then in the following scenarios:

Current Bill Amount (USD)	Previous Bill Amount (USD)	Tolerance Amount Calculation	To Do Entry Generated (Yes or No)	Reason
120	100	$100+(100*10)/100=110$ (Derived using positive tolerance percentage)  $100+15=115$ (Derived using positive tolerance amount)  Minimum Value is 110 in Positive Scenario	Yes	Current Bill Amount is above Positive Tolerance Limit
180	200	$200-(200*5)/100=190$ (Derived using negative tolerance percentage)  $200-25=175$ (Derived using negative tolerance amount)  Minimum Value is 190 in Negative Scenario	Yes	Current Bill Amount is below Negative Tolerance Limit

During the tolerance amount calculation, the system checks whether the **Multi-Currency Accounts** feature is enabled or disabled. If the **Multi-Currency Accounts** feature is enabled, the system converts the previous and current bill amount in the division's base currency when the invoice currency is different from the division's base currency. Once the currency conversion is done, the tolerance amount is calculated and To Do entry is generated accordingly.

- Set the **Multi Price Parameter** option type of the **Multi Parameter Based Pricing (C1\_PPARM\_FLG)** feature configuration to **True** if you want to enable the currency conversion feature during tolerance amount calculation
- Define the Tolerance and First Bill To Do types using the following information:
  - **Navigation Option** - billMaint
  - **Priority** – Priority 10 – Highest
  - **Message Category** - 11105
  - **Message Number** – 11009
  - **Sort Keys** — Define the following sort keys for the To Do type:

Sort Key	Use as Default	Sort Order
Bill ID	Yes	Ascending

- **Drill Keys** — Define the following drill keys for the To Do type:

Table Name	Field Name
CI_BILL	BILL_ID

### Related Topics

For more information on...	See...
How to set the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration	<a href="#">Setting the C1_PPARM_FLG Feature Configuration</a> on page 2363

---

# Chapter 18

---

## GL Account Validation

---

### Topics:

- [Static GL Account Validation](#)
- [Dynamic GL Account Validation](#)

Oracle Revenue Management and Billing allows you to validate the GL account statically and dynamically. The static GL account validation means you can validate the GL account while creating or editing a distribution code. And, the dynamic GL account validation means you can validate the GL account while assigning it to trial and actual financial transactions through the batch process.

For more information about static GL account validation and dynamic GL account validation, refer to [Static GL Account Validation](#) on page 1180 and [Dynamic GL Account Validation](#) on page 1180, respectively.

## Static GL Account Validation

---

If you want to validate the GL account while creating or editing a distribution code, you need to select the **Validate GL Account** check box in the **Distribution Code** screen. If the GL account is valid, the following string appears below the check box while saving the distribution code:

“GL Account is validated on YYYY-MM-DD”

And, if the GL account is invalid, the following string appears below the check box while saving the distribution code:

“GL Account is invalid”

If you want to enable the static GL account validation feature on the **Distribution Code** screen, you need to define an algorithm of the **C1-GLVAL** or **C1-GLVAL-COB** algorithm type and attach the algorithm to the **GL Account Validation** system event in the **Algorithms** tab of the **Installation Options – Framework** screen. Both these algorithm types have one parameter named **GL Account Length**. You need to set the value of this parameter while creating the algorithm using the **C1-GLVAL** or **C1-GLVAL-COB** algorithm type. If you attach an algorithm of the **C1-GLVAL** algorithm type, the system checks whether the length of GL account is greater than or equal to the value defined in the **GL Account Length** parameter. If the length is greater than or equal to the specified length, the GL account is considered as valid. And, if the length is less than the specified length, the GL account is considered as invalid.

And, if you attach an algorithm of the **C1-GLVAL-COB** algorithm type, the system checks whether the length of GL account is equal to the value defined in the **GL Account Length** parameter. If the length is equal to the specified length, the GL account is considered as valid. And, if the length is less than or greater than the specified length, the GL account is considered as invalid.

## Dynamic GL Account Validation

---

If you want to validate GL account while assigning it to trial and actual financial transactions, you need to set the **Validate GL Account** parameter to **Y** while executing the batch. If the GL account is valid, the date when the GL account is validated is added in the **GLA\_VAL\_DT** column of the **CI\_TRL\_FT\_GL** or **CI\_FT\_GL** table, respectively, depending on whether the GL account is assigned to a trial or actual financial transaction.

If you want to enable the dynamic GL account validation feature in the **C1-GLASN** or **GLASSGN2** batch, you need to define an algorithm of the **C1-GLVAL** or **C1-GLVAL-COB** algorithm type and attach the algorithm to either of the following:

- The **GL Account Validation** algorithm entity in the **Algorithms** tab of the **Division** screen
- The **GL Account Validation** system event in the **Algorithms** tab of the **Installation Options – Framework** screen

If the GL account validation algorithm is defined at both these algorithm spots, the algorithm defined at the division level always takes precedence over the algorithm defined in the installation options during dynamic GL account validation.

---

# Chapter 19

---

## Upload Validated Adjustment Data

---

### Topics:

- [Prerequisites](#)
- [CSV File Format](#)
- [Adjustment Upload Request \(Without Approval\) Status Transition](#)
- [Adjustment Upload Request \(With Approval\) Status Transition](#)
- [Algorithms Used in C1-ADJUPLD](#)
- [Upload Request Type](#)
- [Adjustment Upload Request \(Used for Searching\)](#)
- [Adjustment Upload Request \(Used for Viewing\)](#)

Oracle Revenue Management and Billing until now provided you with an ability to upload adjustment data received from an external source system and create adjustments using the **C1-ADUP1** and **C1-ADUP2** batches. However, there was no user interface available through which you can upload an adjustment data file and create adjustments from the adjustment records. Now, the system provides a user interface which helps you to upload an adjustment data file.

You can upload an adjustment data file in the CSV format. You need to ensure that the CSV file is in the required format; otherwise the file will not be uploaded in the system. At present, the system supports only the CSV file format. For more information about the CSV file format, see [CSV File Format](#) on page 1183.

While uploading an adjustment data file, you need to specify the upload request type using which you want to upload the adjustment data file. It is the upload request type which helps the system to determine:

- Whether adjustments must be created in the real time (i.e. immediately) or in the deferred mode (i.e. in the background)
- Whether the size of the adjustment data file exceeds the maximum file size defined in the upload request type
- Whether the adjustment data file must be approved by the approver before creating adjustments

All records are validated before uploading an adjustment data file. During the validation process, the system and custom validations (if any) are executed. If there is any invalid record, the system does not allow you to upload the adjustment data file. The system indicates the reason why the adjustment record could not pass through the validation process. You need to first correct the adjustment record in the CSV file and then upload the adjustment data file.

An upload request of the specified upload request type is created when an adjustment data file is successfully uploaded in the system. You can track an adjustment data file through an upload request. During the adjustment upload process, an adjustment upload request goes through various statuses in its lifecycle. For more information about the adjustment upload request statuses, see [Adjustment Upload Request \(Without Approval\) Status Transition](#) on page 1184 and [Adjustment Upload Request \(With Approval\) Status Transition](#) on page 1185.

Note that the lifecycle of an adjustment upload request is driven by the business object using which the adjustment upload request is created. An adjustment upload request business object named **C1-ADJUPLD** is shipped with the product. The adjustment upload feature explained in this section is documented based on the lifecycle and logic defined in the **C1-ADJUPLD** business object.

If required, the implementation team can create a custom adjustment upload request business object.

Once the adjustment upload request is created, you can perform various tasks, such as:

- Track the status of an adjustment upload request
- View the details of an adjustment upload request
- View all records of an adjustment data file
- Cancel an adjustment data file
- Create adjustments for an adjustment data file
- Submit the adjustment data file for approval
- Approve or reject an adjustment data file based on the observations

## Prerequisites

---

To setup the adjustment upload process, you need to do the following:

- Define the required upload request types in the system
- Create a defer algorithm using the **C1-UPLDEFEVL** algorithm type
- Create an algorithm using the **C1-MTCIALG** algorithm type if you want to create adjustments using the Contract match type
- Create an algorithm using the **C1-MTCTALG** algorithm type if you want to create adjustments using the Contract Type match type
- Define the required characteristic types where the characteristic entity is set to Upload Request Type
- Define cancellation and rejection reasons for the **C1-ADJUPLD** business object
- Assign the **C1-ADJUP** To Do type to a To Do role whose users must receive To Do entries generated while submitting an upload request (i.e. an adjustment data file) for approval
- Set the batch control type of the **Upload Request Periodic Monitor (C1-UPLRQ)** batch to **Timed** and define the following attributes:
  - Time Interval
  - Timer Active
  - User ID
  - Batch Language
  - Email Address

## CSV File Format

---

Before uploading an adjustment data file, you need to ensure that the CSV file contains the following columns:

Column Name	Description	Mandatory (Yes or No)
Account Identifier Type	Used to specify the account identifier type.	Yes (Conditional) <b>Note:</b> This data is required when the match type is Contract Type and account ID is not specified.
Account Identifier	Used to specify the account identifier.	Yes (Conditional) <b>Note:</b> This data is required when the match type is Contract Type and account ID is not specified.
Account ID	Used to indicate the account for which the adjustment must be created.	Yes (Conditional) <b>Note:</b> This data is required when the match type is Contract Type and the account identifier type and account identifier are not specified.

Column Name	Description	Mandatory (Yes or No)
Match Type	Used to indicate the match type using which the adjustment must be created.	Yes
Match Value	Used to indicate the entity (such as contract, contract type, and so on) against which the adjustment must be created.	Yes
Adjustment Type	Used to indicate the adjustment type using which the adjustment must be created.  <b>Note:</b> The adjustment type must be included in the adjustment type profile which is attached to the contract type.	Yes
Adjustment Amount	Used to specify the adjustment amount.  <b>Note:</b> The adjustment amount precision must match the precision (decimal positions) defined for the currency.	Yes
Currency Code	Used to indicate the currency in which the adjustment must be created.	Yes
Comments	Used to specify additional information about the adjustment.	No
Bill ID	Used to indicate the bill on which the adjustment must be created.	No
Arrears Date	Used to specify the date from when the amount is outstanding on the bill.	No
Char Type 1, Char Type 2, ....., Char Type 5	Used to indicate the characteristic that must be defined for the adjustment.	Yes (Conditional)  <b>Note:</b> This data is required if the characteristic value is specified.
Char Value 1, Char Value 2, ....., Char Value 5	Used to specify the value for the characteristic type.	Yes (Conditional)  <b>Note:</b> This data is required if the characteristic type is specified.

**Note:** If an adjustment data file contains column names other than those mentioned in the above table, the system will not upload the adjustment data file.

## Adjustment Upload Request (Without Approval) Status Transition

The following figure graphically indicates how an adjustment upload request moves from one status to another when approval workflow is off:

**Adjustment Upload Request (With Approval) Status Transition**

The following figure graphically indicates how an adjustment upload request moves from one status to another when approval workflow is on:

## Algorithms Used in C1-ADJUPLD

The following table lists the algorithms which are attached to the **C1-ADJUPLD** business object:

System Event	Algorithm	Algorithm Type	Description
Information	C1-FLREQ-INF	C1-FLREQ-INF	<p>This algorithm formats the upload request information that appears throughout the system for the BO. The algorithm formats the information as follows: Upload Request type description, Status description, ID. This algorithm generates the upload request information string which appears throughout the application. This algorithm concatenates the following fields:</p> <ul style="list-style-type: none"> <li>• Upload Request Type Description</li> <li>• Upload Request Description</li> <li>• Upload Request ID</li> </ul>
Validation	C1-ADVALREQ	C1-ADVALREQ	<p>This algorithm will be called from a business service and is responsible for validating the uploaded CSV file and identify if any records are invalid. The validations to be performed are mentioned below: 1. Mandatory column data checks 2. Check for valid values for account, match type, match value, adjustment type, adjustment characteristics type, currency and amount. 3. This algorithm will also call the match type algorithm linked to the request type to derive and validate the value for contract ID. This algorithm validates the uploaded CSV file and identifies invalid records, if any. The validations performed are as follows:</p> <ul style="list-style-type: none"> <li>• Validating mandatory column data</li> <li>• Validating values for account, match type, match value, adjustment type, adjustment characteristics type, currency and amount.</li> <li>• Invoke the match type algorithm linked to the request type to derive and validate the value for contract ID.</li> </ul>

The following table lists the algorithms which are used in the lifecycle of the **C1-ADJUPLD** business object:

Status	System Event	Algorithm	Algorithm Type	Description
Draft	-	-	-	-
Cancelled	-	-	-	-

Status	System Event	Algorithm	Algorithm Type	Description
Create Adjustment	Enter	C1-ADJUPLDEF	C1-ADJUPLDEF	This algorithm will evaluate if request processing should be done in real time or deferred for offline processing. This will be invoked by the Enter Status algorithm when the Request object enters 'CREATE' or 'APPROVED' status. This algorithm evaluates and creates adjustment. It evaluates, if request should be processed in real time or deferred for offline processing. This algorithm is triggered by the <b>Enter</b> status algorithm when the request object is changed to <b>Create</b> or <b>Approved</b> status.
Deferred	Monitor	C1-ADJ-MNTR	C1-ADJ-MNTR	This algorithm will be invoked from the Upload Request Monitor batch. This will be responsible for BO transition from 'Deferred' to 'Creating' status. This algorithm is triggered from the <b>Upload Request Monitor</b> batch. This algorithm transitions the business object status from <b>Deferred</b> to <b>Creating</b> .
Pending for Approval	Enter	C1-ADJUPAPVL	C1-ADJUPAPVL	This algorithm will be responsible of creating To Do for the approver to approve or reject the uploaded file data. To Do will be created using the To Do Type linked to the request type to the approver(s) who are associated with the To Do Role linked to the request type. This will be invoked by the Enter Status algorithm when the Request object enters 'SUBMITTED - Pending For Approver' status. This algorithm creates the To Do using the To Do Type for the approver to approve or reject the uploaded file data. This To Do Type is linked to the request type to the approver(s) associated with the To Do Role linked to the request type. This algorithm is triggered by the <b>Enter</b> status algorithm when the request object enters <b>Submitted - Pending For Approver</b> status.

Status	System Event	Algorithm	Algorithm Type	Description
Approved	Enter	C1-ADJUPLDEF	C1-ADJUPLDEF	This algorithm will evaluate if request processing should be done in real time or deferred for offline processing. This will be invoked by the Enter Status algorithm when the Request object enters 'CREATE' or 'APPROVED' status. This algorithm evaluates if request should be processed in real time or deferred for offline processing. This algorithm is triggered by the <b>Enter</b> status algorithm when the request object is changed to <b>Create</b> or <b>Approved</b> status.
Rejected	-	-	-	-
Completed	-	-	-	-
Creating Adjustment	Enter	C1-ADJCRTION	C1-ADJCRTION	This algorithm is responsible for creating Adjustment for the uploaded file. The adjustment ID will be updated back in the request table to link the request with the adjustments. This algorithm creates an adjustment for the uploaded file. In addition, the adjustment ID is stamped on the adjustment and on the corresponding financial transaction.

## Upload Request Type

Oracle Revenue Management and Billing allows you to define an upload request type using which you can upload a file. An upload request of the specified upload request type is created on uploading the file. It is the upload request type which helps the system to understand how to process the file. If you upload a file which exceeds the maximum file size, the system will not allow you to upload the file.

The **Adjustment Upload Request Type (C1-AdjRequestType)** business object is used for the maintenance of upload request types for uploading CSV data. Configurations like upload file size, approval workflow can be configured using this object. If you are going to upload adjustment data files using an upload request type, you need to specify the match types (using which the adjustments must be created) in the upload request type. At present, the following two match types are shipped with the product:

- Contract
- Contract Type

You can also define custom match types, if required. You must use the **ADJ\_MATCH\_TYPE** lookup field to add a new match type. You need to attach an algorithm to each match type to determine the contract against which the adjustment must be created. At present, the following algorithm types and sample algorithms are shipped with the product:

Match Type	Algorithm Type	Sample Algorithm	Algorithm Description
Contract	C1-MTCIALG	C1-MTCIALG	This algorithm fetches contract ID for each adjustment record where the match type is set to <b>Contract (CONT)</b> .

Match Type	Algorithm Type	Sample Algorithm	Algorithm Description
Contract Type	C1-MTCTALG	C1-MTCTALG	This algorithm fetches contract ID based on the contract type and account ID for each adjustment record where the match type is set to <b>Contract Type (CNTY)</b> . If there are multiple active contracts of the specified contract type on the account, the contract ID with the latest start date will be fetched.

The **Upload Request Type (C1-UplRequestType)** business object will be used for the maintenance of upload request types for uploading CSV data. Configurations like upload file size, approval workflow can be configured using this object. The system enables you to upload data for the following using the **Upload Request** feature:

- Billable Charge (Adhoc and Regular)
- Hold Request
- Refund Request
- Write Off Request
- Policy Reinstatement
- Bill Group Sort ID
- Derivation and Pricing Parameters for a Bill Group and Sort ID Combination

It also enables you to update the following information:

- Contract rider of a contract
- Bill cycle of an account

It is the upload request type which helps the system to determine:

- Whether the file must be approved by the approver before creating or updating the entities
- Which business object must be used for creating the upload request
- Which business object must be used for creating or updating entities through an upload request
- Which foreign key reference must be used for generating information string for the entity
- A set of fields using which you can search records uploaded through an upload request

You can also define custom algorithm types and algorithms, if required. The **Upload Request Type** screen allows you to define, edit, copy, and delete an upload request type. This screen consists of the following zones:

- [Upload Request Type List](#) on page 1190
- [Upload Request Type](#) on page 1191

**Parent topic:** [Upload Request](#) on page 1665

## Upload Request Type List

The **Upload Request Type List** zone lists upload request types that are already defined in the system. It contains the following columns:

Column Name	Column Description
Upload Request Type	Displays the upload request type.
Description	Displays the description of the upload request type.
Edit	On clicking the <b>Edit</b>  icon, the <b>Upload Request Type</b> screen appears where you can edit the details of the upload request type.

Column Name	Column Description
Duplicate	On clicking the <b>Duplicate</b> (  ) icon, the <b>Upload Request Type</b> screen appears where you can define an upload request type using an existing upload request type.
Delete	On clicking the <b>Delete</b> (  ) icon, you can delete the upload request type.  <b>Note:</b> You can delete an upload request type only when you have not uploaded a file (i.e. created an upload request) using the upload request type.
Mapping	On clicking the <b>Mapping</b> (  ) icon, the mapping screen appears where you can map the columns of CSV file with the upload request type.

On clicking the **Broadcast** () icon corresponding to an upload request type, the **Upload Request Type** zone appears with the details of the respective upload request type.

## Upload Request Type

The **Upload Request Type** zone displays the details of the upload request type. This zone contains the following sections:

- **Main** – This section provides basic information about the upload request type. It contains the following fields:

Field Name	Field Description
Upload Request Type	Displays the upload request type.
Upload Request Business Object	Indicates the business object that will be used to create the upload request. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.
Description	Displays the description of the upload request type.
Detailed Description	Displays additional information about the upload request type.

Field Name	Field Description
Status	<p>Indicates the status of the upload request type. The valid values are:</p> <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>
File Size (KB)	<p>Displays the maximum size of file (in kilobytes) that you can upload using the upload request type. If you upload a file which exceeds the maximum file size, the system will not allow you to upload the file.</p> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This field appears only when you create upload request type using <b>Adjustment Upload Request Type</b> business object.</p> </div>
Defer Algorithm	<p>Indicates the algorithm that will be triggered when you create entities (for example, adjustments) or approve the uploaded file (for example, adjustment data file). This algorithm checks whether the number of records in the uploaded file exceeds the online record process limit. If the number of records in the uploaded file does not exceed the online record process limit, the system creates the entities in the real time (i.e. immediately). However, if the number of records in the uploaded file exceeds the online record process limit, the system creates the entities (for example, adjustments) in the real time (i.e. immediately). However, if the number of records in the uploaded file exceeds the online record process limit, the system creates the entities (for example, adjustments) in the deferred mode.</p> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b>  This field appears only when you create upload request type using <b>Adjustment Upload Request Type</b> business object.  It has a link. On clicking the link, the <b>Algorithm</b> screen appears where you can view the details of the respective algorithm.  In <b>Upload Request Type</b>, online and deferred mode is used for processing the file if approval is not required. The defer algorithm is invoked if the number of records to be processed on the respective business object is more than the count specified on the algorithm then the status for number of records is changed from <b>Validated</b> to <b>Deferred Processing</b> else the status is changed to <b>Processed</b>.</p> </div>
Approval Required	<p>Indicates whether approval is required for a file which is uploaded using the upload request type.</p>
Approval To Do Type	<p>Indicates that the To Do entry of the specified To Do type must be created when you submit the upload request for approval.</p> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b>  This field appears only when the <b>Approval Required</b> check box is selected.  It has a link. On clicking the link, the <b>To Do Type</b> screen appears with the details of the respective To Do type.</p> </div>

Field Name	Field Description
Approval To Do Role	<p>Indicates that users with the specified To Do role can only approve or reject the upload request submitted for approval.</p> <p><b>Note:</b> This field appears only when the <b>Approval Required</b> check box is selected. On selecting the <b>To Do Type</b>, the <b>To Do Roles</b> configured on the <b>To Do Type</b> is populated. It has a link. On clicking the link, the <b>To Do Role</b> screen appears with the details of the respective To Do role.</p>
FK Reference	<p>Indicates the foreign key reference which specifies the created upload request type.</p> <p><b>Note:</b> This field appears only when you create upload request type using <b>Upload Request Type</b> business object. It has a link. On clicking the link, the <b>Foreign Key Reference</b> screen appears with the details of the respective foreign key.</p>

In addition, this section has the following columns:

Column Name	Column Description
Match Type	<p>Indicates the match type using which the adjustments must be created when you upload a file using the upload request type. The valid values are:</p> <ul style="list-style-type: none"> <li>Contract</li> <li>Contract Type</li> </ul> <p><b>Note:</b> The <b>Match Type</b> column is displayed for <b>Adjustment Upload Request</b> Business Object.</p>
Algorithm	<p>Indicates the algorithm that will be triggered when you upload an adjustment data file. This algorithm determines the contract against which the adjustment must be created.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Algorithm</b> screen appears with the details of the respective algorithm. The <b>Algorithm</b> column is displayed for <b>Adjustment Upload Request</b> Business Object.</p>

- **Characteristics** – This section lists the characteristics defined for the upload request type. It contains the following columns:

Column Name	Column Description
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- **Record Actions** – This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the upload request type.
Delete	Used to delete the upload request type. <b>Note:</b> You can delete an upload request type only when you have not uploaded a file (i.e. created an upload request) using the upload request type.
Duplicate	Used to create a new upload request type using an existing upload request type.

- **Record Information** – This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the upload request type is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.

By default, the **Upload Request Type** zone does not appear in the **Upload Request Type** screen. It appears only when you click the **Broadcast**  icon corresponding to an upload request type in the **Upload Request Type List** zone.

## Defining an Upload Request Type

### Prerequisites

To define an upload request type, you should have:

- Upload request business objects defined in the application
- Defer algorithm for adjustment is defined using the **C1-UPLDEFEVL** algorithm type
- Defer algorithm for upload is defined using the **C1-DEFERUPLD** algorithm type
- Algorithm defined using the **C1-MTCIALG** algorithm type when you want to create adjustment using the **Contract** match type
- **C1-ADJUP** To Do type assigned to a To Do role whose users must receive To Do while submitting an adjustment upload request for approval

- **C1-BCUUR** To Do type assigned to a To Do role whose users must receive To Do while submitting a bill cycle update upload request for approval
- **C1-CRUUR** To Do type assigned to a To Do role whose users must receive To Do while submitting a contract rider update upload request for approval
- **C1-HLDUR** To Do type assigned to a To Do role whose users must receive To Do while submitting a hold upload request for approval
- **C1-REFUR** To Do type assigned to a To Do role whose users must receive To Do while submitting a refund upload request for approval
- **C1-WOUR** To Do type assigned to a To Do role whose users must receive To Do while submitting a write off upload request for approval
- **C1-BCUR** To Do type assigned to a To Do role whose users must receive To Do while submitting a billable charge upload request for approval
- **C1-RPUR** To Do type assigned to a To Do role whose users must receive To Do while submitting a reinstatement upload request for approval
- **C1-BGSRT** To Do type assigned to a To Do role whose users must receive To Do while submitting a bill group sorting upload request for approval
- **C1-BGDVP** To Do type assigned to a To Do role whose users must receive To Do while submitting a bill group derivation and pricing parameters upload request for approval

### **Procedure**

To define an upload request type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **U** and then click **Upload Request Type**.  
A sub-menu appears.
3. Click the **Add** option from the **Upload Request Type** sub-menu.

The **Select Business Object** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Upload Request Type Business Object	Used to indicate the business object that you want to use to create the upload request type.	Yes

**Tip:** Alternatively, you can access the **Select Business Object** screen by clicking the **Add** button in the **Page Title** area of the **Upload Request Type** screen.

**Note:** The **Select Business Object** screen appears only when there are multiple upload request type business objects defined in the application. If there is only one upload request type business object defined in the application, the **Upload Request Type** screen appears.

4. Select the required upload request type business object from the respective field.
5. Click **OK**.

The **Upload Request Type** screen appears. It contains the following sections:

- **Main** – Used to specify basic details about the upload request type.
- **Characteristics** – Used to define characteristics for the upload request type.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Upload Request Type	Used to specify the upload request type.	Yes
Upload Request Type Business Object	Indicates the upload request type business object used while defining the upload request type.	Not applicable
Upload Request Business Object	Used to indicate the business object that you want to use while creating the upload request.	Yes
Description	Used to specify the description for the upload request type.	Yes
Detailed Description	Used to specify additional information about the upload request type.	No
Status	Used to indicate the status of the upload request type. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>	Yes
File Size (KB)	Used to specify the maximum size of file (in kilobytes) that you can upload using the upload request type. If you upload a file which exceeds the maximum file size, the system will not allow you to upload the file. <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> This field appears when <b>Adjustment Upload Request Type</b> business object is selected.</p> </div>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Defer Algorithm	<p>Used to attach an algorithm that will be triggered when you create entities (for example, adjustments) or approve the uploaded file (for example, adjustment data file). This algorithm checks whether the number of records in the uploaded file exceeds the online record process limit (defined in the Defer algorithm). If the number of records in the uploaded file does not exceed the online record process limit, the system creates the entities (for example, adjustments) in the real time (i.e. immediately). However, if the number of records in the uploaded file exceeds the online record process limit, the system creates the entities (for example, adjustments) in the deferred mode.</p> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>Deferred mode means in the background when the <b>Upload Request Periodic Monitor (C1-UPLRQ)</b> batch is invoked. You can configure the <b>Upload Request Periodic Monitor (C1-UPLRQ)</b> batch such that it is executed at regular intervals. When the <b>Upload Request Periodic Monitor (C1-UPLRQ)</b> batch is invoked, the system checks whether there are any upload requests in the <b>Deferred</b> status. If there is an upload request in the <b>Deferred</b> status, the system creates the entities (for example, adjustments).</p> <p>This field appears when <b>Adjustment Upload Request Type</b> business object is selected.</p> <p>In <b>Upload Request Type</b>, online and deferred mode is used for processing the file if approval is not required. The defer algorithm is invoked if the number of records to be processed on the respective business object is more than the count specified on the algorithm then the status for number of records is changed from <b>Validated</b> to <b>Deferred Processing</b> else the status is changed to <b>Processed</b>.</p> </div> <div style="border: 1px solid black; padding: 5px; margin-top: 5px;"> <p><b>Note:</b> The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Algorithm Search</b> window appears.</p> </div>	Yes

Field Name	Field Description	Mandatory (Yes or No)																						
Entity Business Object	<p>Used to indicate for creating Business Object of the entity using the upload request type.</p> <p><b>Note:</b></p> <p>The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Business Object Search</b> window appears.</p> <p>This field appears when <b>Upload Request Type</b> business object is selected.</p>	No																						
Approval Required	Used to indicate whether approval is required for a file which is uploaded using the upload request type.	No																						
Approval To Do Type	<p>Used to indicate that To Do entry of the specified To Do type must be created when you submit the upload request for approval.</p> <p><b>Note:</b></p> <p>The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.</p> <p>The following table lists the To Do type using which the To Do must be generated for the different upload requests:</p> <table border="1"> <thead> <tr> <th>Upload Request</th> <th>To Do Type</th> </tr> </thead> <tbody> <tr> <td>Adjustment</td> <td>C1-ADJUP</td> </tr> <tr> <td>Bill Cycle Update</td> <td>C1-BCUUR</td> </tr> <tr> <td>Billable Charge</td> <td>C1-BCUR</td> </tr> <tr> <td>Contract Rider Update</td> <td>C1-CRUUR</td> </tr> <tr> <td>Hold Request</td> <td>C1-HLDUR</td> </tr> <tr> <td>Refund Request</td> <td>C1-REFUR</td> </tr> <tr> <td>Write Off Request</td> <td>C1-WOUR</td> </tr> <tr> <td>Policy Reinstatement</td> <td>C1-RPUR</td> </tr> <tr> <td>Bill Group Sorting</td> <td>C1-BGSRT</td> </tr> <tr> <td>Bill Group Derivation and Pricing Parameters</td> <td>C1-BGDVP</td> </tr> </tbody> </table>	Upload Request	To Do Type	Adjustment	C1-ADJUP	Bill Cycle Update	C1-BCUUR	Billable Charge	C1-BCUR	Contract Rider Update	C1-CRUUR	Hold Request	C1-HLDUR	Refund Request	C1-REFUR	Write Off Request	C1-WOUR	Policy Reinstatement	C1-RPUR	Bill Group Sorting	C1-BGSRT	Bill Group Derivation and Pricing Parameters	C1-BGDVP	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required when the <b>Approval Required</b> check box is selected.</p>
Upload Request	To Do Type																							
Adjustment	C1-ADJUP																							
Bill Cycle Update	C1-BCUUR																							
Billable Charge	C1-BCUR																							
Contract Rider Update	C1-CRUUR																							
Hold Request	C1-HLDUR																							
Refund Request	C1-REFUR																							
Write Off Request	C1-WOUR																							
Policy Reinstatement	C1-RPUR																							
Bill Group Sorting	C1-BGSRT																							
Bill Group Derivation and Pricing Parameters	C1-BGDVP																							

Field Name	Field Description	Mandatory (Yes or No)
Approval To Do Role	Used to indicate that users with the specified To Do role can only approve the upload request submitted for approval.	Yes (Conditional) <b>Note:</b> This field is required when the <b>Approval Required</b> check box is selected.
FK Reference	Used to indicate the FK Reference code to display the entity information. <b>Note:</b> The <b>Search</b> (  ) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Foreign Key Search</b> window appears. This field appears when <b>Upload Request Type</b> business object is selected.	No

In addition, this section contains the following fields in the grid:

**Note:** This field appears when **Adjustment Upload Request Type** business object is selected.

Field Name	Field Description	Mandatory (Yes or No)
Match Type	Used to indicate the match type using which you want to create adjustments when you upload a file using the upload request type. The valid values are: <ul style="list-style-type: none"> <li>Contract</li> <li>Contract Type</li> </ul>	Yes (Conditional) <b>Note:</b> This field is required when you select the <b>Adjustment Upload Request</b> option from the <b>Upload Request Business Object</b> list.
Algorithm	Used to attach an algorithm that will be triggered when you upload an adjustment data file. This algorithm determines the contract against which the adjustment must be created. <b>Note:</b> The <b>Search</b> (  ) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Algorithm Search</b> window appears.	Yes (Conditional) <b>Note:</b> This field is required when you select the match type from the respective field.

6. Enter the required details.

**Note:**

You can search for an algorithm by clicking the **Search** () icon corresponding to the respective field.

If you want to associate more than one match type with the upload request type, click the **Add** () icon and then specify the details. However, if you want to remove a match type from the upload request type, click the **Delete** () icon corresponding to the match type.

7. Define characteristics for the upload request type, if required.

8. Click **Save**.

The upload request type is defined.

<b>Upload Request Type</b> screen	<a href="#">Upload Request Type</a> on page 1189
<b>Upload Request Type List</b> zone	<a href="#">Upload Request Type List</a> on page 1190
How to define characteristics for an upload request type	<a href="#">Defining Characteristics for an Upload Request Type</a> on page 1200

**Defining Characteristics for an Upload Request Type****Prerequisites**

To define characteristics for an upload request type, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to Upload Request Type)

**Procedure**

To define characteristics for an upload request type:

1. Ensure that the **Characteristics** section is expanded when you are defining, editing, or copying an upload request type.

The **Characteristics** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Type	Used to indicate the characteristic type. <b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to Upload Request Type.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the upload request type.
Characteristic Value	Used to specify the value for the characteristic type. <b>Note:</b> On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the upload request type.

2. Enter the required details.

**Note:** If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

3. If you want to define more than one characteristic for the upload request type, click the **Add** (+) icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from the upload request type, click the **Delete** () icon corresponding to the characteristic.

## Editing an Upload Request Type

### Prerequisites

To edit an upload request type, you should have:

- Upload request business objects defined in the application
- Defer algorithm for adjustment is defined using the **C1-UPLDEFEVL** algorithm type
- Defer algorithm for upload is defined using the **C1-DEFERUPLD** algorithm type
- Algorithm defined using the **C1-MTCIALG** algorithm type when you want to create adjustment using the Contract match type
- Algorithm defined using the **C1-MTCTALG** algorithm type when you want to create adjustment using the Contract Type match type
- **C1-ADJUP** To Do type assigned to a To Do role whose users must receive To Do entries generated while submitting an adjustment upload request for approval
- **C1-UPLAPPENT** To Do type assigned to a To Do role whose users must receive To Do generated while submitting an upload request for approval

### Procedure

To edit an upload request type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **U** and then click **Upload Request Type**.  
A sub-menu appears.
3. In the **Upload Request Type List** zone, click the **Edit** () icon in the **Edit** column corresponding to the upload request type whose details you want to edit.

The **Upload Request Type** screen appears. It contains the following sections:

- **Main** – Used to specify basic details about the upload request type.
- **Characteristics** – Used to define characteristics for the upload request type.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Upload Request Type	Displays the upload request type.	Not applicable
Upload Request Type Business Object	Indicates the upload request type business object used while defining the upload request type.	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
Upload Request Business Object	Used to specify the business object that you want to use while creating the upload request.	Yes
Description	Used to specify the description for the upload request type.	Yes
Detailed Description	Used to specify additional information about the upload request type.	No
Status	Used to indicate the status of the upload request type. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>	Yes
File Size (KB)	Used to specify the maximum size of file (in kilobytes) that you can upload using the upload request type. If you upload a file which exceeds the maximum file size, the system will not allow you to upload the file. <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> This field appears when the business object is <b>Adjustment Upload Request Type</b>.</p> </div>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Defer Algorithm	<p>Used to attach an algorithm that will be triggered when you create entities (for example, adjustments) or approve the uploaded file (for example, adjustment data file). This algorithm checks whether the number of records in the uploaded file exceeds the online record process limit (defined in the Defer algorithm). If the number of records in the uploaded file does not exceed the online record process limit, the system creates the entities (for example, adjustments) in the real time (i.e. immediately). However, if the number of records in the uploaded file exceeds the online record process limit, the system creates the entities (for example, adjustments) in the deferred mode.</p> <div data-bbox="662 703 1177 1220" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> Deferred mode means in the background when the <b>Upload Request Periodic Monitor (C1-UPLRQ)</b> batch is invoked. You can configure the <b>Upload Request Periodic Monitor (C1-UPLRQ)</b> batch such that it is executed at regular intervals. When the <b>Upload Request Periodic Monitor (C1-UPLRQ)</b> batch is invoked, the system checks whether there are any upload requests in the <b>Deferred</b> status. If there is an upload request in the <b>Deferred</b> status, the system creates the entities (for example, adjustments).  This field appears when the business object is <b>Adjustment Upload Request Type</b>.</p> </div>	Yes
Entity Business Object	<p>Used to indicate for creating Business Object of the entity using the upload request type.</p> <div data-bbox="662 1325 1177 1482" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Business Object Search</b> window appears.</p> </div>	No
Approval Required	<p>Used to indicate whether approval is required for a file which is uploaded using the upload request type.</p>	No
Approval To Do Type	<p>Used to indicate that To Do entry of the specified To Do type must be created when you submit the upload request for approval.</p> <div data-bbox="662 1734 1177 1892" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.</p> </div>	<p>Yes (Conditional)</p> <div data-bbox="1193 1671 1463 1818" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This field is required when the <b>Approval Required</b> check box is selected.</p> </div>

Field Name	Field Description	Mandatory (Yes or No)
Approval To Do Role	Used to indicate that users with the specified To Do role can only approve the upload request submitted for approval.	Yes (Conditional) <b>Note:</b> This field is required when the <b>Approval Required</b> check box is selected.
FK Reference	Used to indicate the FK Reference code to display the entity information. <b>Note:</b> The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Foreign Key Search</b> window appears. This field appears when the business object is <b>Upload Request Type</b> .	No

In addition, this section contains the following fields in the grid:

**Note:** The below section appears when the business object is **Adjustment Upload Request Type**.

Field Name	Field Description	Mandatory (Yes or No)
Match Type	Used to indicate the match type using which you want to create adjustments when you upload a file using the upload request type. The valid values are: <ul style="list-style-type: none"> <li>Contract</li> <li>Contract Type</li> </ul>	Yes (Conditional) <b>Note:</b> This field is required when you select the <b>Adjustment Upload Request</b> option from the <b>Upload Request Business Object</b> list.
Algorithm	Used to attach an algorithm that will be triggered when you upload an adjustment data file. This algorithm determines the contract against which the adjustment must be created.	Yes (Conditional) <b>Note:</b> This field is required when you select the match type from the respective field.

**Tip:** Alternatively, you can click the **Edit** button in the **Upload Request Type** zone to edit the details of the upload request type.

#### 4. Modify the required details.

**Note:**

You can search for an algorithm by clicking the **Search**  icon corresponding to the respective field.

If you want to associate more than one match type with the upload request type, click the **Add**  icon and then specify the details. However, if you want to remove a match type from the upload request type, click the **Delete**  icon corresponding to the match type.

#### 5. Define, edit, or remove characteristics from the upload request type, if required.

6. Click **Save**.

The changes made to the upload request type are saved.

## Copying an Upload Request Type

Instead of creating an upload request type from scratch, you can create a new upload request type using an existing upload request type. This is possible through copying an upload request type. On copying an upload request type, the details including the match types (only for adjustments) and characteristics are copied to the new upload request type. You can then edit the details, if required.

### Prerequisites

To copy an upload request type, you should have:

- Upload request type (whose copy you want to create) defined in the application
- Upload request business objects defined in the application
- Defer algorithm defined using the **C1-UPLDEFEVL** algorithm type
- Defer algorithm for upload is defined using the **C1-DEFERUPLD** algorithm type
- Algorithm defined using the **C1-MTCIALG** algorithm type when you want to create adjustment using the Contract match type
- Algorithm defined using the **C1-MTCTALG** algorithm type when you want to create adjustment using the Contract Type match type
- **C1-ADJUP** To Do type assigned to a To Do role whose users must receive To Do entries generated while submitting an upload request for approval
- **C1-UPLAPPENT** To Do type assigned to a To Do role whose users must receive To Do generated while submitting an upload request for approval

### Procedure

To copy an upload request type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **U** and then click **Upload Request Type**.  
A sub-menu appears.
3. In the **Upload Request Type List** zone, click the **Duplicate**  icon in the **Duplicate** column corresponding to the upload request type whose copy you want to create.

The **Upload Request Type** screen appears. It contains the following sections:

- **Main** – Used to specify basic details about the upload request type.
- **Characteristics** – Used to define characteristics for the upload request type.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Upload Request Type	Used to specify the upload request type.	Yes
Upload Request Type Business Object	Indicates the upload request type business object used while defining the upload request type (whose copy you want to create).	Not applicable
Upload Request Business Object	Used to specify the business object that you want to use while creating the upload request.	Yes
Description	Used to specify the description for the upload request type.	Yes
Detailed Description	Used to specify additional information about the upload request type.	No
Status	Used to indicate the status of the upload request type. The valid values are: <ul style="list-style-type: none"> <li>Active</li> <li>Inactive</li> </ul>	Yes
File Size (KB)	Used to specify the maximum size of file (in kilobytes) that you can upload using the upload request type. If you upload a file which exceeds the maximum file size, the system will not allow you to upload the file. <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"> <p><b>Note:</b> This field appears when the business object is <b>Adjustment Upload Request Type</b>.</p> </div>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Defer Algorithm	<p>Used to attach an algorithm that will be triggered when you create entities (for example, adjustments) or approve the uploaded file (for example, adjustment data file). This algorithm checks whether the number of records in the uploaded file exceeds the online record process limit (defined in the Defer algorithm). If the number of records in the uploaded file does not exceed the online record process limit, the system creates the entities (for example, adjustments) in the real time (i.e. immediately). However, if the number of records in the uploaded file exceeds the online record process limit, the system creates the entities (for example, adjustments) in the deferred mode.</p> <div data-bbox="659 705 1175 1213" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>Deferred mode means in the background when the <b>Upload Request Periodic Monitor (C1-UPLRQ)</b> batch is invoked. You can configure the <b>Upload Request Periodic Monitor (C1-UPLRQ)</b> batch such that it is executed at regular intervals. When the <b>Upload Request Periodic Monitor (C1-UPLRQ)</b> batch is invoked, the system checks whether there are any upload requests in the <b>Deferred</b> status. If there is an upload request in the <b>Deferred</b> status, the system creates the entities (for example, adjustments).</p> <p>This field appears when the business object is <b>Adjustment Upload Request Type</b>.</p> </div>	Yes
Entity Business Object	<p>Used to indicate to create the copy of Business Object of the entity using the upload request type.</p> <div data-bbox="659 1325 1175 1591" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Business Object Search</b> window appears.</p> <p>This field appears when the business object is <b>Upload Request Type</b>.</p> </div>	No
Approval Required	Used to indicate whether approval is required for a file which is uploaded using the upload request type.	No

Field Name	Field Description	Mandatory (Yes or No)
Approval To Do Type	Used to indicate that To Do entry of the specified To Do type must be created when you submit the upload request for approval.  <b>Note:</b> The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.	Yes (Conditional)  <b>Note:</b> This field is required when the <b>Approval Required</b> check box is selected.
Approval To Do Role	Used to indicate that users with the specified To Do role can only approve the upload request submitted for approval.	Yes (Conditional)  <b>Note:</b> This field is required when the <b>Approval Required</b> check box is selected.
FK Reference	Used to indicate the FK Reference code to display the entity information.  <b>Note:</b> The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Foreign Key Search</b> window appears.  This field appears when the business object is <b>Upload Request Type</b> .	No

In addition, this section contains the following fields in the grid:

**Note:** The below section appears when the business object is **Adjustment Upload Request Type**.

Field Name	Field Description	Mandatory (Yes or No)
Match Type	Used to indicate the match type using which you want to create adjustments when you upload a file using the upload request type. The valid values are: <ul style="list-style-type: none"> <li>• Contract</li> <li>• Contract Type</li> </ul>	Yes (Conditional)  <b>Note:</b> This field is required when you select the <b>Adjustment Upload Request</b> option from the <b>Upload Request Business Object</b> list.
Algorithm	Used to attach an algorithm that will be triggered when you upload an adjustment data file. This algorithm determines the contract against which the adjustment must be created.	Yes (Conditional)  <b>Note:</b> This field is required when you select the match type from the respective field.

**Tip:** Alternatively, you can click the **Duplicate** button in the **Upload Request Type** zone to create a copy of the upload request type.

4. Enter the required details.

**Note:**

You can search for an algorithm by clicking the **Search**  icon corresponding to the respective field.

If you want to associate more than one match type with the upload request type, click the **Add**  icon and then specify the details. However, if you want to remove a match type from the upload request type, click the **Delete**  icon corresponding to the match type.

5. Define, edit, or remove characteristics from the upload request type, if required.
6. Click **Save**.

The new upload request type is defined.

How to define characteristics for an upload request type	<a href="#">Defining Characteristics for an Upload Request Type</a> on page 1200

**Mapping an Upload Request Type****Prerequisites**

To map an upload request type, you should have:

- Upload request type (whose columns you want to map with the CSV file) defined in the application
- Upload request business objects defined in the application

**Note:** Once an upload request type is used for creating an upload request, then mapping for the same cannot be edited. Duplicating the upload request type will not duplicate the mapping data. You have to add the mapping details manually after duplicating an upload request type.

**Procedure**

To map an upload request type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **U** and then click **Upload Request Type**.  
A sub-menu appears.
3. In the **Upload Request Type List** zone, click the **Mapping**  icon in the **Mapping** column corresponding to the upload request type whose columns you want to map with the CSV file.

The **Upload Request Type Mapping** screen appears. It contains the following field:

**Note:** The **Mapping** icon is applicable only for upload request type created using **Upload Request Type (C1-UplRequestType)** business object, and it is not applicable for upload request type created using **Adjustment Upload Request Type (C1-AdjRequestType)** business object.

Field Name	Field Description	Mandatory (Yes or No)
Upload Request Type	Indicates the upload request type.	Not applicable

The **Upload Request Type Mapping** screen also contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
CSV Column Header	Used to specify the rows correspond to the columns in CSV file.	Yes (Conditional) <b>Note:</b> This column is required when you search the <b>Data Records</b> zone in the <b>Upload Request</b> screen.
Use for Searching	Used to indicate whether the defined <b>CSV Column Header</b> is searchable or not. <b>Note:</b> Upto 10 rows can be selected as searchable rows.	Yes (Conditional) <b>Note:</b> This column is required to be selected to be shown in the <b>Data Records</b> zone in the <b>Upload Request</b> screen
Sequence Number	Used to specify the sequence of the searchable fields. <b>Note:</b> Searchable rows should have sequence less than or equal to 10.	Yes (Conditional) <b>Note:</b> This column is required to be selected to be shown sequentially in the <b>Data Records</b> zone in the <b>Upload Request</b> screen

- Enter the required details.

**Note:** If you want to add more than one column names mapped to the upload request type, click the **Add** (+) icon and then specify the details. However, if you want to remove a column name mapped to the upload request type, click the **Delete** (🗑️) icon corresponding to the column header.

- Click **Save**.

The columns are mapped to the CSV files for upload request type.

<b>Upload Request Type</b> zone	<a href="#">Upload Request Type</a> on page 1191

## **Deleting an Upload Request Type**

### **Procedure**

To delete an upload request type:

- Click the **Admin** link in the **Application** toolbar.

A list appears.

- From the **Admin** menu, select **U** and then click **Upload Request Type**.

A sub-menu appears.

- In the **Upload Request Type List** zone, click the **Delete** (🗑) icon in the **Delete** column corresponding to the upload request type that you want to delete.

A message appears confirming whether you want to delete the upload request type.

**Note:** You can delete an upload request type only when you have not uploaded a file (i.e. created an upload request) using the upload request type.

**Tip:** Alternatively, you can click the **Delete** button in the **Upload Request Type** zone to delete the upload request type.

- Click **OK**.

The upload request type is deleted.

## Viewing the Upload Request Type Details

### Procedure

To view the details of an upload request type:

- Click the **Admin** link in the **Application** toolbar.  
A list appears.
- From the **Admin** menu, select **U** and then click **Upload Request Type**.  
A sub-menu appears.
- Click the **Search** option from the **Upload Request Type** sub-menu.  
The **Upload Request Type** screen appears.
- In the **Upload Request Type List** zone, click the **Broadcast** (📡) icon corresponding to the upload request type whose details you want to view.  
The **Upload Request Type** zone appears.
- View the details of the upload request type in the **Upload Request Type** zone.

## Adjustment Upload Request (Used for Searching)

---

The **Adjustment Upload Request** screen allows you to search for an adjustment upload request using various search criteria. Through this screen, you can:

- Upload an adjustment data file
- Cancel an adjustment data file
- View the details of an adjustment upload request
- View all adjustment records which are uploaded through an adjustment data file
- Create adjustments for an adjustment data file
- Submit an adjustment data file for approval
- Approve or reject an adjustment data file
- View the log of an adjustment upload request
- Add a log entry for an adjustment upload request

This screen consists of the following zones:

- [Search Adjustment Upload Request](#) on page 1212
- [Adjustment Upload Request](#) on page 1220
- [Adjustment Data Records](#) on page 1223

### Search Adjustment Upload Request

The **Search Adjustment Upload Request** zone allows you to search for an adjustment upload request using various search criteria. This zone contains the following two sections:

- **Search Criteria** — The fields in the **Search Criteria** section change depending on the query option selected. At present, there is only one query option named **Upload Request**. On selecting the **Upload Request** query option, the **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Upload Request Type	Used to search adjustment upload requests which are created using a particular upload request type.	No

Field Name	Field Description	Mandatory (Yes or No)
Status	Used to search adjustment upload requests with a particular status. The valid values are: <ul style="list-style-type: none"> <li>• Approved</li> <li>• Cancelled</li> <li>• Completed</li> <li>• Create Adjustment</li> <li>• Creating Adjustment</li> <li>• Deferred</li> <li>• Pending</li> <li>• Rejected</li> <li>• Pending For Approval</li> </ul>	No
Upload From Date	Used to search adjustment upload requests which are created from a particular date onwards. <div style="border: 1px solid black; padding: 2px;"><b>Note:</b> By default, the current date appears in this field.</div>	No
To	Used to search adjustment upload requests which are created till a particular date. <div style="border: 1px solid black; padding: 2px;"><b>Note:</b> By default, the current date appears in this field.</div>	No
File Name	Used to search an adjustment upload request which is created while uploading an adjustment data file.	No

**Note:** You must specify at least one search criterion while searching for an adjustment upload request.

- **Search Results** — On clicking the **Refresh** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Upload Date	Displays the date and time when the adjustment data file is uploaded in the system.
Upload Request Information	Displays information about the adjustment upload request. <div style="border: 1px solid black; padding: 2px;"><b>Note:</b> It has a link. On clicking the link, the <b>Adjustment Upload Request</b> screen appears where you can view the details of the respective upload request.</div>
Status	Indicates the status of the adjustment upload request.
Upload Request Type	Indicates the upload request type using which the adjustment data file is uploaded in the system.
File Name	Displays the name of the adjustment data file.

You can upload an adjustment data file by clicking the **Upload** link in the upper right corner of this zone.

### **Related Topics**

## Searching for an Adjustment Upload Request

### Prerequisites

To search for an adjustment upload request, you should have:

- Upload request types defined in the application

### Procedure

To search for an adjustment upload request:

1. Click the **Menu** link in the **Actions/Navigation** area.  
A list appears.
2. Select the **Main Menu** option from the list.
3. From the **Main Menu**, select **Financial** and then click **Adjustment Upload Request**.

The **Adjustment Upload Request** screen appears.

4. Enter the search criteria in the **Search Adjustment Upload Request** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search**.

A list of adjustment upload requests that meet the search criteria appears in the **Search Results** section.

## Uploading an Adjustment Data File

### Prerequisites

To upload an adjustment data file, you should have:

- Upload request types defined in the application
- Adjustment data in the required CSV file format

### Procedure

To upload an adjustment data file:

1. Click the **Menu** link in the **Actions/Navigation** area.  
A list appears.
2. Select the **Main Menu** option from the list.
3. From the **Main Menu**, select **Financial** and then click **Adjustment Upload Request**.  
The **Adjustment Upload Request** screen appears.
4. Click the **Upload** link in the upper right corner of the **Search Adjustment Upload Request** zone.  
The **Upload Adjustment Data File** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Upload Request Type	Used to indicate the upload request type using which you want to upload the adjustment data file.  <b>Note:</b> The list includes only those upload request types which are in the <b>Active</b> status.	Yes
Replace Existing File	Used to indicate whether you want to replace any existing file in the system. You must select this check box when you want to upload the same file once again.  <b>Note:</b> You can replace an existing file only when the adjustment upload request is in the <b>Pending</b> or <b>Cancelled</b> status.	No
File Name	Used to specify the name and path of the adjustment data file that you want to upload.  <b>Note:</b> You can also click the <b>Browse</b> button corresponding to this field to browse to the location where the adjustment data file is available in the system.	Yes

5. Select the upload request type using which you want to upload the adjustment data file.
6. Click the **Browse** button corresponding to the **File Name** field.  
The **Choose File to Upload** dialog box appears.
7. Browse to the location where the adjustment data file that you want to upload is available.
8. Click **Open**.  
The adjustment data file name and path appears in the **File Name** field.
9. Click **Submit**.

A grid appears which helps you to preview all records in the adjustment data file. It contains the following columns:

Column Name	Column Description
Errors	Indicates the reason why the adjustment record is invalid. If there are multiple reasons, the comma-separated list of error messages appears in this column.  <b>Note:</b> This column appears only when you click the <b>Save</b> button.
Account Identifier Type	Indicates the account identifier type.

Column Name	Column Description
Account Identifier	Displays the value of the account identifier type.
Account ID	Indicates the account for which the adjustment must be created.
Match Type	Indicates the match type using which the adjustment must be created.
Match Value	Indicates the entity (such as contract, contract type, and so on) against which the adjustment must be created.
Adjustment Type	Indicates the adjustment type using which the adjustment must be created.
Adjustment Amount	Displays the adjustment amount.
Currency Code	Indicates the currency in which the adjustment must be created.
Comments	Displays additional information about the adjustment.
Bill ID	Indicates the bill on which the adjustment must be created.
Arrears Date	Displays the date from when the amount is outstanding on the bill.
Char Type 1	Indicates the characteristic that must be defined for the adjustment.
Char Value 1	Displays the value of the characteristic type.
Char Type 2	Indicates the characteristic that must be defined for the adjustment.
Char Value 2	Displays the value of the characteristic type.
Char Type 3	Indicates the characteristic that must be defined for the adjustment.
Char Value 3	Displays the value of the characteristic type.
Char Type 4	Indicates the characteristic that must be defined for the adjustment.
Char Value 4	Displays the value of the characteristic type.
Char Type 5	Indicates the characteristic that must be defined for the adjustment.
Char Value 5	Displays the value of the characteristic type.

**Note:** If you upload an adjustment data file which exceeds the maximum file size defined in the upload request type, the system will not allow you to upload the file.

#### 10. Click **Save**.

The validation process starts immediately. The adjustment record is considered as invalid when:

- Account ID, Account Identifier Type, Account Identifier, Adjustment Type, Currency, Bill ID, Characteristic Type, Characteristic Value, or Match Type is invalid.
- Match Type, Match Value, Adjustment Type, Adjustment Amount, Currency, or Characteristic Value is missing.
- Contract ID does not exist in the system.
- The contract is in the **Cancelled** status.
- Contract type does not exist in the system.
- Account Identifier Type, Account Identifier, or Account ID is missing when the match type is Contract Type.
- No active contract of the specified contract type is available.
- Adjustment amount precision does not match the precision (decimal positions) defined for the currency.
- The adjustment type is not included in the adjustment type profile which is attached to the contract type.

- The characteristic type is not associated with the adjustment type.

If there is an invalid record in the adjustment data file, you will not be able to upload the file.

## Replacing an Adjustment Data File

### Prerequisites

To replace an existing adjustment data file, you should have:

- Upload request types defined in the application
- Adjustment data in the required CSV file format

### Procedure

To replace an existing adjustment data file:

1. Click the **Menu** link in the **Actions/Navigation** area.  
A list appears.
2. Select the **Main Menu** option from the list.
3. From the **Main Menu**, select **Financial** and then click **Adjustment Upload Request**.  
The **Adjustment Upload Request** screen appears.
4. Click the **Upload** link in the upper right corner of the **Search Adjustment Upload Request** zone.

The **Adjustment Upload Data File** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Upload Request Type	Used to indicate the upload request type using which you want to upload the adjustment data file.  <b>Note:</b> The list includes only those upload request types which are in the <b>Active</b> status.	Yes
Replace Existing File	Used to indicate whether you want to replace any existing file in the system. You must select this check box when you want to upload the same file once again.  <b>Note:</b> You can replace an existing file only when the adjustment upload request is in the <b>Pending</b> or <b>Cancelled</b> status.	No

Field Name	Field Description	Mandatory (Yes or No)
File Name	Used to specify the name and path of the adjustment data file that you want to upload.  <b>Note:</b> You can also click the <b>Browse</b> button corresponding to this field to browse to the location where the adjustment data file is available in the system.	Yes

5. Select the upload request type using which you want to upload the adjustment data file.
6. Select the **Replace Existing File** check box to indicate that you want to replace an existing adjustment data file.
7. Click the **Browse** button corresponding to the **File Name** field.  
The **Choose File to Upload** dialog box appears.
8. Browse to the location where the adjustment data file that you want to upload is available.
9. Click **Open**.

The adjustment data file name and path appears in the **File Name** field.

10. Click **Submit**.

A grid appears which helps you to preview all records in the adjustment data file. It contains the following columns:

Column Name	Column Description
Errors	Indicates the reason why the adjustment record is invalid. If there are multiple reasons, the comma-separated list of error messages appears in this column.  <b>Note:</b> This column appears only when you click the <b>Save</b> button.
Account Identifier Type	Indicates the account identifier type.
Account Identifier	Displays the value of the account identifier type.
Account ID	Indicates the account for which the adjustment must be created.
Match Type	Indicates the match type using which the adjustment must be created.
Match Value	Indicates the entity (such as contract, contract type, and so on) against which the adjustment must be created.
Adjustment Type	Indicates the adjustment type using which the adjustment must be created.
Adjustment Amount	Displays the adjustment amount.
Currency Code	Indicates the currency in which the adjustment must be created.
Comments	Displays additional information about the adjustment.
Bill ID	Indicates the bill on which the adjustment must be created.
Arrears Date	Displays the date from when the amount is outstanding on the bill.
Char Type 1	Indicates the characteristic that must be defined for the adjustment.
Char Value 1	Displays the value of the characteristic type.
Char Type 2	Indicates the characteristic that must be defined for the adjustment.
Char Value 2	Displays the value of the characteristic type.
Char Type 3	Indicates the characteristic that must be defined for the adjustment.

Column Name	Column Description
Char Value 3	Displays the value of the characteristic type.
Char Type 4	Indicates the characteristic that must be defined for the adjustment.
Char Value 4	Displays the value of the characteristic type.
Char Type 5	Indicates the characteristic that must be defined for the adjustment.
Char Value 5	Displays the value of the characteristic type.

**Note:** If you upload an adjustment data file which exceeds the maximum file size defined in the upload request type, the system will not allow you to upload the file.

#### 11. Click **Save**.

The validation process starts immediately. The adjustment record is considered as invalid when:

- Account ID, Account Identifier Type, Account Identifier, Adjustment Type, Currency, Bill ID, Characteristic Type, Characteristic Value, or Match Type is invalid.
- Match Type, Match Value, Adjustment Type, Adjustment Amount, Currency, or Characteristic Value is missing.
- Contract ID does not exist in the system.
- The contract is in the **Cancelled** status.
- Contract type does not exist in the system.
- Account Identifier Type, Account Identifier, or Account ID is missing when the match type is Contract Type.
- No active contract of the specified contract type is available.
- Adjustment amount precision does not match the precision (decimal positions) defined for the currency.
- The adjustment type is not included in the adjustment type profile which is attached to the contract type.
- The characteristic type is not associated with the adjustment type.

If there is an invalid record in the adjustment data file, you will not be able to upload the file.

## Viewing the Adjustment Upload Request Details

### Procedure

To view the details of an adjustment upload request:

1. Search for an adjustment upload request in the **Adjustment Upload Request** screen.
2. In the **Search Results** section, click the link in the **Upload Request Information** column corresponding to the adjustment upload request whose details you want to view.

The **Adjustment Upload Request** screen appears. It contains the following two tabs:

- **Main** – This tab contains the following two zones:

- **Adjustment Upload Request** – Displays the details of the adjustment upload request.
  - **Adjustment Data Records** – Lists the adjustment records which are uploaded through the adjustment data file.
  - **Log** – This tab lists the complete trail of actions performed on the adjustment upload request.
3. View the details of the adjustment upload request in the **Adjustment Upload Request** zone.
  4. View the list of adjustment records which are uploaded through the adjustment data file in the **Adjustment Data Records** zone.

## Adjustment Upload Request (Used for Viewing)

---

The **Adjustment Upload Request** screen allows you to:

- Edit the details of an adjustment upload request
- Delete or cancel an adjustment upload request
- View the details of an adjustment upload request
- Submit an adjustment upload request for processing
- Approve or reject an adjustment upload request
- Request the submitter to resubmit an adjustment upload request for approval
- Withdraw an adjustment upload request
- View the log of an adjustment upload request
- Add a log entry for an adjustment upload request

It consists of the following tabs:

- [Adjustment Upload Request - Main](#) on page 1220
- 

### Adjustment Upload Request - Main

The **Main** tab displays information about the adjustment upload request. It contains the following zones:

- [Adjustment Upload Request](#) on page 1220
- [Adjustment Data Records](#) on page 1223

#### Adjustment Upload Request

The **Adjustment Upload Request** zone displays the details of the adjustment upload request. This zone contains the following sections:

- **Header** — This section provides basic information about the upload request. It contains the following fields:

Field Name	Field Description
Upload Request Information	<p>Displays information about the adjustment upload request. The information string contains the following comma-separated values:</p> <ul style="list-style-type: none"> <li>• Upload Request Type Description</li> <li>• Status Description</li> <li>• Upload Request ID</li> </ul> <p><b>Note:</b> This information string is generated using the <b>C1-FLREQ-INF</b> algorithm which is attached to the <b>Information</b> system event in the adjustment upload request business object. If you want to display a different information string, you need to define a custom algorithm type and attach the algorithm in the adjustment upload request business object.</p>
Status	<p>Indicates the status of the adjustment upload request. The valid values are:</p> <ul style="list-style-type: none"> <li>• Approved</li> <li>• Cancelled</li> <li>• Completed</li> <li>• Create Adjustment</li> <li>• Creating Adjustment</li> <li>• Deferred</li> <li>• Pending</li> <li>• Rejected</li> <li>• Pending for Approval</li> </ul>
Status Reason	<p>Indicates the reason why the adjustment data file is cancelled or rejected.</p> <p><b>Note:</b> This field appears only when the adjustment upload request is in the <b>Cancelled</b> or <b>Rejected</b> status.</p>
File Name	<p>Displays the name of the adjustment data file for which the adjustment upload request is created.</p>

- **Record Actions** — This section contains the following buttons:

Button Name	Button Description
Cancel File	<p>Used to cancel an adjustment data file.</p> <p><b>Note:</b> The <b>Cancel File</b> button appears only when the adjustment upload request is in the <b>Pending</b> status.</p>

Button Name	Button Description
Create Adjustment	Used to create adjustments for the records which are uploaded through the adjustment data file.  <b>Note:</b> The <b>Create Adjustment</b> button appears only when: <ul style="list-style-type: none"> <li>The adjustment upload request is in the <b>Pending</b> status.</li> <li>The approval workflow process is not configured for the upload request type using which the adjustment data file is uploaded.</li> </ul>
Submit for Approval	Used to submit the adjustment data file for approval.  <b>Note:</b> The <b>Submit for Approval</b> button appears only when: <ul style="list-style-type: none"> <li>The adjustment upload request is in the <b>Pending</b> status.</li> <li>The approval workflow process is configured for the upload request type using which the adjustment data file is uploaded.</li> </ul>
Approve	Used to approve the adjustment data file.  <b>Note:</b> The <b>Approve</b> button appears only when: <ul style="list-style-type: none"> <li>The adjustment upload request is in the <b>Pending for Approval</b> status.</li> <li>A user with the approval To Do role is reviewing the adjustment data file.</li> </ul>
Reject	Used to reject the adjustment data file.  <b>Note:</b> The <b>Reject</b> button appears only when: <ul style="list-style-type: none"> <li>The adjustment upload request is in the <b>Pending for Approval</b> status.</li> <li>A user with the approval To Do role is reviewing the adjustment data file.</li> </ul>

**Note:** The **Record Actions** section does not contain buttons when the status of the adjustment upload request is **Cancelled, Completed, Deferred, or Rejected**.

- **Record Information** — This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the adjustment upload request is created.  <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears with the details of the respective business object.
Status Date/Time	Displays the date and time when the adjustment upload request status is updated.
Create Date/Time	Displays the date and time when the adjustment upload request is created.

### Adjustment Data Records

The **Adjustment Data Records** zone lists the adjustment records which are uploaded through the adjustment data file. This zone contains the following columns:

Column Name	Column Description
Adjustment Information	<p>Displays information about the adjustment that is created using the adjustment record.</p> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>The data appears in this column only when the status of the adjustment upload request is <b>Completed</b>.</p> <p>It has a link. On clicking the link, the <b>Adjustment</b> screen appears with the details of the respective adjustment.</p> <p>The information string appears only when an algorithm of the <b>C1-ADI-INFO</b> algorithm type is attached to the <b>Adjustment Information</b> system event in the <b>Algorithms</b> tab of the <b>Installation Options — Framework</b> screen.</p> </div>
Account Identifier Type	Indicates the account identifier type.
Account Identifier	Displays the value of the account identifier type.
Account ID	Indicates the account for which the adjustment must be created.
Adjustment Match Value	Indicates the contract against which the adjustment must be created.
Adjustment Type	Indicates the adjustment type using which the adjustment must be created.
Adjustment Amount	Displays the adjustment amount.
Comments	Displays additional information about the adjustment.
Bill ID	Indicates the bill on which the adjustment must be created.
Arrears Date	Displays the date from when the amount is outstanding on the bill.
Char Type 1, Char Type 2, ....., Char Type 5	Indicates the characteristic that must be defined for the adjustment.
Char Value 1, Char Value 2, ....., Char Value 5	Displays the value of the characteristic type.

## Adjustment Upload Request - Log

The **Log** tab contains the following zone:

- [Adjustment Upload Request - Log](#) on page 1224

### Adjustment Upload Request Log

The **Upload Request Log** zone lists the complete trail of actions performed on the adjustment upload request. It contains the following columns:

Column Name	Column Description
Date/Time	Displays the date and time when the action was performed on the funding request.
Details	Displays the details of the action performed on the funding request.
User	Indicates the user who has performed the action on the funding request.
Log Type	Indicates the type of log.
Related Object	Indicates the object or entity which is created when the action is performed on the funding request.  <b>Note:</b> At present, no data appears in this column. The implementation team can build the custom logic to meet the business requirements.
Status Reason	Indicates the reason why the funding request was rejected by the approver.  <b>Note:</b> The data appears in this column only when the funding request is in the <b>Rejected</b> status.

**Note:** You can manually add a log entry for the adjustment upload request by clicking the **Add Log Entry** link in the upper right corner of the **Adjustment Upload Request Log** zone.

### Related Topics

## Cancelling an Adjustment Data File

There might be situations when incorrect adjustment data file is uploaded in the system. In such case, the system provides you with an ability to cancel the file. However, note that you can cancel an adjustment data file only when the adjustment upload request is in the **Pending** status.

### Prerequisites

To cancel an adjustment data file, you should have:

- Cancellation reasons defined in the application

**Note:** While cancelling an adjustment data file, you need to specify the reason why you want to cancel the adjustment data file. You can select the appropriate cancellation reason only when you have defined the reasons for the **Cancelled** status of the **C1-ADJUPLD** business object in the **Status Reason** screen.

### **Procedure**

To cancel an adjustment data file:

1. Search for the adjustment upload request (which is created while uploading the file that you want to cancel) in the **Adjustment Upload Request** screen.
2. In the **Search Results** section, click the link in the **Upload Request Information** column corresponding to the adjustment data file that you want to cancel.

The **Adjustment Upload Request** screen appears. It contains the following two tabs:

- **Main** – This tab contains the following two zones:
    - **Adjustment Upload Request** – Displays the details of the adjustment upload request.
    - **Adjustment Data Records** – Lists the adjustment records which are uploaded through the adjustment data file.
  - **Log** – This tab lists the complete trail of actions performed on the adjustment upload request.
3. Click **Cancel File** in the **Adjustment Upload Request** zone.

The **Cancellation Information** window appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Cancellation Reason	Used to indicate the reason why you want to cancel the adjustment data file.	Yes

**Note:** The **Cancel File** button appears only when the adjustment upload request is in the **Pending** status.

4. Select the cancellation reason from the list.
5. Click **Save**.

The adjustment data file is cancelled. In addition, the status of the adjustment upload request is changed to **Cancelled**.

### **Related Topics**

For more information on...	See...
How to search for an adjustment upload request	<a href="#">Searching for an Adjustment Upload Request</a> on page 1214
<b>Adjustment Upload Request</b> zone	<a href="#">Adjustment Upload Request</a> on page 1220

## **Creating Adjustments for an Adjustment Data File**

### **Procedure**

To create adjustments for an adjustment data file:

1. Search for the adjustment upload request (which is created while uploading the file for which you want to create adjustments) in the **Adjustment Upload Request** screen.

- In the **Search Results** section, click the link in the **Upload Request Information** column corresponding to the adjustment data file for which you want to create adjustments.

The **Adjustment Upload Request** screen appears. It contains the following two tabs:

- **Main** – This tab contains the following two zones:
    - **Adjustment Upload Request** – Displays the details of the adjustment upload request.
    - **Adjustment Data Records** – Lists the adjustment records which are uploaded through the adjustment data file.
  - **Log** – This tab lists the complete trail of actions performed on the adjustment upload request.
- Click **Create Adjustment** in the **Adjustment Upload Request** zone.

The Defer algorithm attached to the upload request type using which you have uploaded the adjustment data file is triggered. If the number of records in the adjustment data file does not exceed the online record process limit (defined in the Defer algorithm), the system creates adjustments in the real time (i.e. immediately). In addition, the adjustment information string appears corresponding to each adjustment record in the **Adjustment Data Records** zone and the status of the adjustment upload request is changed to **Completed**. However, if the number of records in the adjustment data file exceeds the online record process limit, the system creates adjustments in the deferred mode and the status of the adjustment upload request is changed to **Deferred**.

**Note:**

Deferred mode means in the background when the **Upload Request Periodic Monitor (C1-UPLRQ)** batch is invoked. You can configure the **Upload Request Periodic Monitor (C1-UPLRQ)** batch such that it is executed at regular intervals. When the **Upload Request Periodic Monitor (C1-UPLRQ)** batch is invoked, the system checks whether there are any adjustment upload requests in the **Deferred** status. If there is an adjustment upload request in the **Deferred** status, the system creates adjustments for the adjustment data file. Once the adjustments are created, the adjustment information string appears corresponding to each adjustment record in the **Adjustment Data Records** zone and the status of the adjustment upload request is changed to **Completed**.

The **Create Adjustment** button appears only when:

- The adjustment upload request is in the **Pending** status.
- The approval workflow process is not configured for the upload request type using which the adjustment data file is uploaded.

How to search for an adjustment upload request	<a href="#">Searching for an Adjustment Upload Request</a> on page 1214
<b>Adjustment Upload Request</b> zone	<a href="#">Adjustment Upload Request</a> on page 1220
<b>Adjustment Data Records</b> zone	<a href="#">Adjustment Data Records</a> on page 1223

## Submitting an Adjustment Data File for Approval

### Procedure

To submit an adjustment data file for approval:

- Search for the adjustment upload request (which is created while uploading the file that you want to submit for approval) in the **Adjustment Upload Request** screen.

- In the **Search Results** section, click the link in the **Upload Request Information** column corresponding to the adjustment data file that you want to submit for approval.

The **Adjustment Upload Request** screen appears. It contains the following two tabs:

- Main** – This tab contains the following two zones:
  - Adjustment Upload Request** – Displays the details of the adjustment upload request.
  - Adjustment Data Records** – Lists the adjustment records which are uploaded through the adjustment data file.
- Log** – This tab lists the complete trail of actions performed on the adjustment upload request.

- Click **Submit for Approval** in the **Adjustment Upload Request** zone.

The status of the adjustment upload request is changed to **Pending for Approval**. A To Do is created using the **C1-ADJUP** To Do type. Users having a To Do role to which the **C1-ADJUP** To Do type is associated can view the To Do from the **To Do List** screen. On clicking the **Submitted Message** link corresponding to the To Do, the **Adjustment Upload Request** screen appears where you can review the records of the adjustment data file.

**Note:**

The **Submit for Approval** button appears only when:

- The adjustment upload request is in the **Pending** status.
- The approval workflow process is configured for the upload request type using which the adjustment data file is uploaded.

### Related Topics

For more information on...	See...
<b>Adjustment Upload Request</b> zone	<a href="#">Adjustment Upload Request</a> on page 1220
How to search for an adjustment upload request	<a href="#">Searching for an Adjustment Upload Request</a> on page 1214

## Approving an Adjustment Data File

### Procedure

To approve an adjustment data file:

- Search for the adjustment upload request (which is created while uploading the file that you want to review) in the **Adjustment Upload Request** screen.
- In the **Search Results** section, click the link in the **Upload Request Information** column corresponding to the adjustment data file that you want to review.

The **Adjustment Upload Request** screen appears. It contains the following two tabs:

- Main** – This tab contains the following two zones:
  - Adjustment Upload Request** – Displays the details of the adjustment upload request.
  - Adjustment Data Records** – Lists the adjustment records which are uploaded through the adjustment data file.
- Log** – This tab lists the complete trail of actions performed on the adjustment upload request.

- Review the records of the adjustment data file in the **Adjustment Data Records** zone.
- If the adjustment data file is appropriate, then click **Approve** in the **Adjustment Upload Request** zone.

The Defer algorithm attached to the upload request type using which you have uploaded the adjustment data file is triggered. If the number of records in the adjustment data file does not exceed the online record process limit (defined in the Defer algorithm), the system creates adjustments in the real time (i.e. immediately). In addition, the adjustment information string appears corresponding to each adjustment record in the **Adjustment Data Records** zone and the status of the adjustment upload request is changed to **Completed**. However, if the number of records in the adjustment data file exceeds the online record process limit, the system creates adjustments in the deferred mode and the status of the adjustment upload request is changed to **Deferred**.

**Note:**

Deferred mode means in the background when the **Upload Request Periodic Monitor (C1-UPLRQ)** batch is invoked. You can configure the **Upload Request Periodic Monitor (C1-UPLRQ)** batch such that it is executed at regular intervals. When the **Upload Request Periodic Monitor (C1-UPLRQ)** batch is invoked, the system checks whether there are any adjustment upload requests in the **Deferred** status. If there is an adjustment upload request in the **Deferred** status, the system creates adjustments for the adjustment data file. Once the adjustments are created, the adjustment information string appears corresponding to each adjustment record in the **Adjustment Data Records** zone and the status of the adjustment upload request is changed to **Completed**.

The **Approve** button appears only when:

- The adjustment upload request is in the **Pending for Approval** status.
- A user with the approval To Do role is reviewing the adjustment data file.

**Related Topics**

For more information on...	See...
How to search for an adjustment upload request	<a href="#">Searching for an Adjustment Upload Request</a> on page 1214
<b>Adjustment Upload Request</b> zone	<a href="#">Adjustment Upload Request</a> on page 1220
<b>Adjustment Data Records</b> zone	<a href="#">Adjustment Data Records</a> on page 1223

**Rejecting an Adjustment Data File****Prerequisites**

To reject an adjustment data file, you should have:

- Rejection reasons defined in the application

**Note:**

While rejecting an adjustment data file, you need to specify the reason why you want to reject the adjustment data file. You can select the appropriate rejection reason only when you have defined the reasons for the **Rejected** status of the **C1-ADJUPLD** business object in the **Status Reason** screen.

The system does not allow the submitter to approve or reject the adjustment data file.

**Procedure**

To reject an adjustment data file:

1. Search for the adjustment upload request (which is created while uploading the file that you want to review) in the **Adjustment Upload Request** screen.
2. In the **Search Results** section, click the link in the **Upload Request Information** column corresponding to the adjustment data file that you want to review.

The **Adjustment Upload Request** screen appears. It contains the following two tabs:

- **Main** – This tab contains the following two zones:
    - **Adjustment Upload Request** – Displays the details of the adjustment upload request.
    - **Adjustment Data Records** – Lists the adjustment records which are uploaded through the adjustment data file.
  - **Log** – This tab lists the complete trail of actions performed on the adjustment upload request.
3. Review the records of the adjustment data file in the **Adjustment Data Records** zone.
  4. If the adjustment data file is not appropriate, then click **Reject** in the **Adjustment Upload Request** zone.

The **Rejection Information** window appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Rejection Reason	Used to indicate the reason why you want to reject the adjustment data file.	Yes

**Note:**

The **Reject** button appears only when:

- The adjustment upload request is in the **Pending for Approval** status.
- A user with the approval To Do role is reviewing the adjustment data file.

5. Select the rejection reason from the list.
6. Click **Save**.

The adjustment data file is rejected. In addition, the status of the adjustment upload request is changed to **Rejected**.

**Related Topics**

## Viewing the Log of an Adjustment Upload Request

**Procedure**

To view the log of an adjustment upload request:

1. Search for the adjustment upload request in the **Adjustment Upload Request** screen.
2. In the **Search Results** section, click the link in the **Upload Request Information** column corresponding to the adjustment upload request whose log you want to view.

The **Adjustment Upload Request** screen appears. It contains the following two tabs:

- **Main** – This tab contains the following two zones:
  - **Adjustment Upload Request** – Displays the details of the adjustment upload request.

- **Adjustment Data Records** – Lists the adjustment records which are uploaded through the adjustment data file.
  - **Log** – This tab lists the complete trail of actions performed on the adjustment upload request.
3. Click the **Log** tab.

The **Upload Request Log** zone in the **Log** tab contains the following columns:

Column Name	Column Description
Date/Time	Displays the date and time when the action was performed on the adjustment upload request.
Details	Displays the details about the action performed on the adjustment upload request.
User	Indicates the user who has performed the action on the adjustment upload request.
Log Type	Indicates the type of log.
Related Object	Indicates the object or entity which is generated when the action is performed on the adjustment upload request.
Status Reason	Indicates the reason why the adjustment upload request was rejected or cancelled.

**Note:** You can manually add a log entry for the adjustment upload request by clicking the **Add Log Entry** link in the upper right corner of the **Upload Request Log** zone.

### Related Topics

## Adding a Log Entry for an Adjustment Upload Request

### Procedure

To add a log entry for an adjustment upload request:

1. Search for the adjustment upload request in the **Adjustment Upload Request** screen.
2. In the **Search Results** section, click the link in the **Upload Request Information** column corresponding to the adjustment upload request whose log you want to edit.

The **Adjustment Upload Request** screen appears. It contains the following two tabs:

- **Main** – This tab contains the following two zones:
  - **Adjustment Upload Request** – Displays the details of the adjustment upload request.
  - **Adjustment Data Records** – Lists the adjustment records which are uploaded through the adjustment data file.
- **Log** – This tab lists the complete trail of actions performed on the adjustment upload request.

3. Click the **Log** tab.

The **Log** tab appears.

4. Click the **Add Log Entry** link in the upper right corner of the **Upload Request Log** zone.

The **Add Request Log** window appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Request Information	Displays information about the adjustment upload request.	Not applicable
Log Details	Used to specify additional comments on the adjustment upload request.	Yes

5. Enter the comments in the **Log Details** field.

6. Click **Save**.

The log entry is added in the **Upload Request Log** zone.

## Foreign Exchange Gain Loss

---

### Topics:

- [Foreign Exchange Gain Loss Calculation](#)
- [Prerequisites](#)
- [Foreign Exchange Gain Loss Scenarios](#)

In a multi-currency environment, financial transactions such as payments and adjustments created for an account can result in loss or gain due to fluctuations in the exchange rate at different point in time. This loss or gain is booked under the Foreign Exchange Gain Loss in the General Ledger and does not impact the account balance of the person.

The Foreign Exchange Gain or Loss might occur when:

- Exchange Rate for Invoice Currency to Division' Base Currency is different on Bill Completion Date and Payment Freeze Date

**Assumption:** In this case, the Invoice Currency and Payment Currency are same.

- Exchange Rate for Adjustment Currency to Division's Base Currency is different on Bill Completion Date and Adjustment Freeze Date

**Assumption:** In this case, the Adjustment Currency and Invoice Currency are same, but they are different from the Division's Base Currency.

- Exchange Rate for Adjustment Currency to Division's Base Currency is different on Bill Completion Date and Payment Freeze Date

**Assumption:** In this case, the Adjustment Currency, Payment Currency, and Invoice Currency are same, but they are different from the Division's Base Currency.

Oracle Revenue Management and Billing facilitates you to calculate the foreign exchange gain or loss and book it against an FXLG distribution code. However, you can calculate the foreign exchange gain or loss only when you have enabled the FT GL Extension feature. For more information on how the system calculates the foreign exchange gain loss, see [Foreign Exchange Gain Loss Calculation](#) on page 1234. For more information on how to setup the Foreign Exchange Gain Loss feature, see [Prerequisites](#) on page 1234.

**Note:** The system can calculate the foreign exchange gain or loss appropriately only when the Division's Base Currency is same on Bill Completion Date and Adjustment/Payment Freeze Date. Otherwise, erroneous results might occur.

## Foreign Exchange Gain Loss Calculation

---

During the Foreign Exchange Gain Loss calculation, the system considers the following types of financial transactions:

- Payments (i.e. Pay Segments)
- Credit adjustments which are created against a bill after the bill completion
- Write-off adjustments which are created against a bill
- Write Up adjustments which are automatically created when you match a payment against a bill using the Bill Weighted match type
- Write Down adjustments which are automatically created when you match a payment against a bill using the Bill Weighted match type

**Note:** The system does not consider financial transactions which are created due to payment and adjustment cancellation.

To understand how foreign exchange gain or loss is calculated, see [Foreign Exchange Gain Loss Scenarios](#) on page 1235.

You can calculate the foreign exchange gain loss only when you have enabled the FT GL Extension feature. Oracle Revenue Management and Billing provides you a batch named **Foreign Exchange Loss Gain (C1-FXLG)** which calculates the foreign exchange gain loss. This batch considers payment and adjustment FTs when:

- Division's Base Currency is different from the Payment or Adjustment Currency
- Payment or Adjustment Freeze Date is different from the Bill Completion Date
- Match Event ID exists in the financial transaction
- FXLG\_CALC\_STATUS column corresponding to the financial transaction in the CI\_FT table is set to N or NULL

Once the foreign exchange gain or loss is calculated, two entries are added corresponding to each financial transaction in the CI\_FT\_GL and CI\_FT\_GL\_EXT tables. One entry for foreign exchange gain loss is booked against the distribution code for FXLG and another entry for foreign exchange gain loss is booked against the distribution code which is used for contract balancing. The foreign exchange loss is recorded as positive entry and the foreign exchange gain is recorded as negative entry. In the CI\_FT\_GL table, the foreign exchange gain loss is recorded in the financial transaction currency. And, in the CI\_FT\_GL\_EXT table, the foreign exchange gain loss is recorded in the division's base currency.

You must execute the **Foreign Exchange Loss Gain (C1-FXLG)** batch prior to the **Assign GL Account to Financial Transaction (C1-GLASN)** or **Insert Records in CI\_FTTEMP (GLASSGN1)** batch. For more information about these batches, refer to *Oracle Revenue Management and Billing Batch Guide*.

## Prerequisites

---

To setup the Foreign Exchange Gain Loss feature, you need to do the following:

- Create an algorithm of the **FTFREZGLEXTN** algorithm type and attach it on the **FT Freeze** system event of the customer class for which you want to enable FT GL extension feature
- Set the following parameters of an algorithm which is created using the **FTFREZGLEXTN** algorithm type to **R** (i.e. arrears date):
  - Exchange Rate Date Type for Adjustments with Freeze At Will Option (Valid Values: A, R, F, C)
  - Exchange Rate Date Type for Adjustments with Freeze At Bill Completion Option (Valid Values: A, R, F, C, E)
  - Exchange Rate Date Type for Payments (Valid Values: A, R, F, C)

- Exchange Rate Date Type for Bill Segments (Valid Values: A, R, F, C)
- Create an algorithm of the **C1\_CURALGBS** algorithm type and attach it to the **Currency Conversion For Bill Segments** algorithm spot of the division for which you want to enable the currency conversion feature
- Create an algorithm of the **C1\_CURALGAD** algorithm type and attach it to the **Currency Conversion For Adjustments** algorithm spot of the division for which you want to enable the currency conversion feature
- Create an algorithm of the **C1\_CURALGPY** algorithm type and attach it to the **Currency Conversion For Payments** algorithm spot of the division for which you want to enable the currency conversion feature
- Set the **Bill Segment Freeze Option** to **Freeze At Bill Completion** in the **Billing** tab of the **Installation Options** screen
- Define the required exchange rates for currency conversion
- Define the distribution code against which you want to book the foreign exchange gain loss
- Set the **Adjustment Freeze Option** to **Freeze At Bill Completion** for adjustment types whose adjustments are presented and impacts the next bill of an account

## Foreign Exchange Gain Loss Scenarios

To understand how foreign exchange gain loss is calculated, refer to the following different scenarios:

- [Payment Scenarios](#) on page 1235
- [Credit Adjustment Scenarios](#) on page 1239
- [Write Off Adjustment Scenarios](#) on page 1240
- [Write Up/Down Adjustment Scenarios](#) on page 1242

### Payment Scenarios

The following scenarios indicate how foreign exchange gain or loss is calculated for payments which are matched against bills:

- Scenario 1 — Payment Freeze Date = Bill Completion Date; Payment Amount = Invoice Amount

	Bill Completion Date (01-01-2001)	Payment Freeze Date (01-01-2001)
Exchange Rate From	USD	USD
Exchange Rate To	INR	INR
Exchange Rate	50	50
Invoice/Payment Currency	USD	USD
Invoice Amount	1000	-

	<b>Bill Completion Date (01-01-2001)</b>	<b>Payment Freeze Date (01-01-2001)</b>
<b>Base Currency</b>	INR	INR
<b>Booked Revenue in Base Currency</b>	1000*50 = 50000	-
<b>Payment Amount</b>	-	1000
<b>Payment Amount in Base Currency on Bill Completion Date</b>	-	1000*50 = 50000
<b>Realized Revenue (Payment Amount) in Base Currency on Payment Freeze Date</b>	-	1000*50 = 50000
<b>Foreign Exchange Gain or Loss</b>	-	Not applicable

**Observation:** In the Scenario 1, the foreign exchange gain or loss is not applicable because Bill Completion Date and Payment Freeze Date are same.

- Scenario 2 — Payment Freeze Date Not Equal to Bill Completion Date; Exchange Rate is Same; Payment Amount = Invoice Amount

	<b>Bill Completion Date (01-01-2001)</b>	<b>Payment Freeze Date (01-02-2001)</b>
<b>Exchange Rate From</b>	USD	USD
<b>Exchange Rate To</b>	INR	INR
<b>Exchange Rate</b>	50	50
<b>Invoice/Payment Currency</b>	USD	USD
<b>Invoice Amount</b>	1000	-
<b>Base Currency</b>	INR	INR
<b>Booked Revenue in Base Currency</b>	1000*50 = 50000	-
<b>Payment Amount</b>	-	1000
<b>Payment Amount in Base Currency on Bill Completion Date</b>	-	1000*50 = 50000
<b>Realized Revenue (Payment Amount) in Base Currency on Payment Freeze Date</b>	-	1000*50 = 50000
<b>Foreign Exchange Gain or Loss</b>	-	50000-50000 = 0

**Observation:** In the Scenario 2, there is no foreign exchange gain or loss because the exchange rate is same on the Bill Completion Date and Payment Freeze Date.

- Scenario 3 — Payment Freeze Date Not Equal to Bill Completion Date; Exchange Rate is Different; Payment Amount = Invoice Amount

	<b>Bill Completion Date (01-01-2001)</b>	<b>Payment Freeze Date (01-02-2001)</b>
<b>Exchange Rate From</b>	USD	USD
<b>Exchange Rate To</b>	INR	INR
<b>Exchange Rate</b>	50	51

	<b>Bill Completion Date (01-01-2001)</b>	<b>Payment Freeze Date (01-02-2001)</b>
<b>Invoice/Payment Currency</b>	USD	USD
<b>Invoice Amount</b>	1000	-
<b>Base Currency</b>	INR	INR
<b>Booked Revenue in Base Currency</b>	$1000 * 50 = 50000$	-
<b>Payment Amount</b>	-	1000
<b>Payment Amount in Base Currency on Bill Completion Date</b>	-	$1000 * 50 = 50000$
<b>Realized Revenue (Payment Amount) in Base Currency on Payment Freeze Date</b>	-	$1000 * 51 = 51000$
<b>Foreign Exchange Gain or Loss</b>	-	$50000 - 51000 = -1000$

**Observation:** In the Scenario 3, there is foreign exchange gain of 1000 INR on 01-02-2001 because of difference in exchange rate.

- Scenario 4 — Payment Freeze Date Not Equal to Bill Completion Date; Exchange Rate is Same; Partial Payments; Total Payment Amount = Invoice Amount

	<b>Bill Completion Date (01-01-2001)</b>	<b>First Partial Payment Freeze Date (01-02-2001)</b>	<b>Second Partial Payment Freeze Date (01-03-2001)</b>
<b>Exchange Rate From</b>	USD	USD	USD
<b>Exchange Rate To</b>	INR	INR	INR
<b>Exchange Rate</b>	50	50	50
<b>Invoice/Payment Currency</b>	USD	USD	USD
<b>Invoice Amount</b>	1000	-	-
<b>Base Currency</b>	INR	INR	INR
<b>Booked Revenue in Base Currency</b>	$1000 * 50 = 50000$	-	-
<b>Payment Amount</b>	-	500	500
<b>Payment Amount in Base Currency on Bill Completion Date</b>	-	$500 * 50 = 25000$	$500 * 50 = 25000$
<b>Realized Revenue (Payment Amount) in Base Currency on Payment Freeze Date</b>	-	$500 * 50 = 25000$	$500 * 50 = 25000$
<b>Foreign Exchange Gain or Loss</b>	-	$25000 - 25000 = 0$	$25000 - 25000 = 0$

**Observation:** In the Scenario 4, there is no foreign exchange gain or loss because the exchange rate is same on the Bill Completion Date and Payment Freeze Date.

- Scenario 5 — Payment Freeze Date Not Equal to Bill Completion Date; Exchange Rate is Different; Partial Payments; Total Payment Amount = Invoice Amount

	<b>Bill Completion Date (01-01-2001)</b>	<b>First Payment Date (01-02-2001)</b>	<b>Partial Freeze Date (01-03-2001)</b>
<b>Exchange Rate From</b>	USD	USD	USD
<b>Exchange Rate To</b>	INR	INR	INR
<b>Exchange Rate</b>	50	51	48
<b>Invoice/Payment Currency</b>	USD	USD	USD
<b>Invoice Amount</b>	1000	-	-
<b>Base Currency</b>	INR	INR	INR
<b>Booked Revenue in Base Currency</b>	$1000 * 50 = 50000$	-	-
<b>Payment Amount</b>	-	800	200
<b>Payment Amount in Base Currency on Bill Completion Date</b>	-	$800 * 50 = 40000$	$200 * 50 = 10000$
<b>Realized Revenue (Payment Amount) in Base Currency on Payment Freeze Date</b>	-	$800 * 51 = 40800$	$200 * 48 = 9600$
<b>Foreign Exchange Gain or Loss</b>	-	$40000 - 40800 = -800$	$10000 - 9600 = 400$

**Observation:** In the Scenario 5, there is foreign exchange gain of 800 INR on 01-02-2001 and foreign exchange loss of 400 INR on 01-03-2001.

- Scenario 6 — Payment Freeze Date Not Equal to Bill Completion Date; Exchange Rate is Different; Payment Amount > Invoice Amount (i.e. Overpayment)

	<b>Bill Completion Date (01-01-2001)</b>	<b>Payment Freeze Date (01-02-2001)</b>
<b>Exchange Rate From</b>	USD	USD
<b>Exchange Rate To</b>	INR	INR
<b>Exchange Rate</b>	50	49
<b>Invoice/Payment Currency</b>	USD	USD
<b>Invoice Amount</b>	1000	-
<b>Base Currency</b>	INR	INR
<b>Booked Revenue in Base Currency</b>	$1000 * 50 = 50000$	-
<b>Payment Amount</b>	-	1200
<b>Payment Amount in Base Currency on Bill Completion Date</b>	-	$1000 * 50 = 50000$
<b>Realized Revenue (Payment Amount) in Base Currency on Payment Freeze Date</b>	-	$1000 * 49 = 49000$
<b>Foreign Exchange Gain or Loss</b>	-	$50000 - 49000 = 1000$

**Observation:** In the Scenario 6, there is foreign exchange loss of 1000 INR on 01-02-2001 because of difference in exchange rate. Note that the foreign exchange gain or loss is not calculated on the overpayment amount (i.e. 200 USD).

- Scenario 7 — Payment Freeze Date Not Equal to Bill Completion Date; Exchange Rate is Different; Partial Payments; Total Payment Amount > Invoice Amount (i.e. Overpayment)

	<b>Bill Completion Date (01-01-2001)</b>	<b>First Partial Payment Freeze Date (01-02-2001)</b>	<b>Second Partial Payment Freeze Date (01-03-2001)</b>
<b>Exchange Rate From</b>	USD	USD	USD
<b>Exchange Rate To</b>	INR	INR	INR
<b>Exchange Rate</b>	50	49	52
<b>Invoice/Payment Currency</b>	USD	USD	USD
<b>Invoice Amount</b>	1000	-	-
<b>Base Currency</b>	INR	INR	INR
<b>Booked Revenue in Base Currency</b>	$1000 * 50 = 50000$	-	-
<b>Payment Amount</b>	-	800	400
<b>Payment Amount in Base Currency on Bill Completion Date</b>	-	$800 * 50 = 40000$	$200 * 50 = 10000$
<b>Realized Revenue (Payment Amount) in Base Currency on Payment Freeze Date</b>	-	$800 * 49 = 39200$	$200 * 52 = 10400$
<b>Foreign Exchange Gain or Loss</b>	-	$40000 - 39200 = 800$	$10000 - 10400 = -400$

**Observation:** In the Scenario 7, there is foreign exchange loss of 800 INR on 01-02-2001 and foreign exchange gain of 400 INR on 01-03-2001. Note that the foreign exchange gain or loss is not calculated on the overpayment amount (i.e. 200 USD).

**Note:** If a payment is cancelled, reverse financial transactions are created. These financial transactions are not considered during the foreign exchange gain loss calculation.

## Credit Adjustment Scenarios

An adjustment which is posted against a bill after the bill completion is treated as payment towards the bill. The following scenarios indicate how foreign exchange gain or loss is calculated for credit adjustments which are created against a bill after the bill completion:

- Scenario 1 — Adjustment Freeze Date Not Equal to Bill Completion Date; Exchange Rate is Different

	<b>Bill Completion Date (04-30-2015)</b>	<b>Adjustment Freeze Date (05-10-2015)</b>
<b>Exchange Rate From</b>	USD	USD
<b>Exchange Rate To</b>	INR	INR
<b>Exchange Rate</b>	50	40
<b>Invoice/Adjustment Currency</b>	INR	INR
<b>Invoice Amount</b>	1000	-
<b>Base Currency</b>	USD	USD
<b>Booked Revenue in Base Currency</b>	$1000 / 50 = 20$	-

	<b>Bill Completion Date (04–30–2015)</b>	<b>Adjustment Freeze Date (05–10–2015)</b>
<b>Adjustment Amount</b>	-	400
<b>Adjustment Amount in Base Currency on Bill Completion Date</b>	-	$400/50 = 8$
<b>Realized Revenue (Adjustment Amount) in Base Currency on Adjustment Freeze Date</b>	-	$400/40 = 10$
<b>Foreign Exchange Gain or Loss</b>	-	$8-10 = -2$

**Observation:** In the Scenario 1, there is foreign exchange gain of 2 USD on 05–10–2015 because of difference in exchange rate.

- Scenario 2 — Adjustment Freeze Date Not Equal to Bill Completion Date; Exchange Rate is Different

	<b>Bill Completion Date (04–11–2014)</b>	<b>Adjustment Freeze Date (04–30–2014)</b>
<b>Exchange Rate From</b>	USD	USD
<b>Exchange Rate To</b>	INR	INR
<b>Exchange Rate</b>	55	60
<b>Invoice/Adjustment Currency</b>	INR	INR
<b>Invoice Amount</b>	2000	-
<b>Base Currency</b>	USD	USD
<b>Booked Revenue in Base Currency</b>	$2000/55 = 36.36$	-
<b>Adjustment Amount</b>	-	200
<b>Adjustment Amount in Base Currency on Bill Completion Date</b>	-	$200/55 = 3.63$
<b>Realized Revenue (Adjustment Amount) in Base Currency on Adjustment Freeze Date</b>	-	$200/60 = 3.33$
<b>Foreign Exchange Gain or Loss</b>	-	$3.63-3.33 = 0.30$

**Observation:** In the Scenario 2, there is foreign exchange loss of 0.30 USD on 04–30–2014 because of difference in exchange rate.

**Note:**

Multi-currency is not supported while creating credit adjustments against a bill after the bill completion. Therefore, the credit adjustment's currency must be same as the invoice currency.

If the amount of credit adjustment exceeds the bill amount, you need to match the excess amount against another bill while freezing the adjustment. Otherwise, the adjustment is not considered during foreign exchange gain loss calculation.

If a credit adjustment is cancelled, reverse financial transactions are created. These financial transactions are not considered during the foreign exchange gain loss calculation.

## Write Off Adjustment Scenarios

The following scenarios indicate how foreign exchange gain or loss is calculated for write off adjustments which are created against a bill:

- Scenario 1 — Adjustment Freeze Date Not Equal to Bill Completion Date; Exchange Rate is Different; Full Bill Amount is Written Off

	<b>Bill Completion Date (04-30-2015)</b>	<b>Adjustment Freeze Date (05-10-2015)</b>
<b>Exchange Rate From</b>	USD	USD
<b>Exchange Rate To</b>	INR	INR
<b>Exchange Rate</b>	50	60
<b>Invoice/Adjustment Currency</b>	INR	INR
<b>Invoice Amount</b>	1000	-
<b>Base Currency</b>	USD	USD
<b>Booked Revenue in Base Currency</b>	$1000/50 = 20$	-
<b>Adjustment Amount</b>	-	1000
<b>Adjustment Amount in Base Currency on Bill Completion Date</b>	-	$1000/50 = 20$
<b>Realized Revenue (Adjustment Amount) in Base Currency on Adjustment Freeze Date</b>	-	$1000/60 = 16.67$
<b>Foreign Exchange Gain or Loss</b>	-	$20 - 16.67 = 3.33$

**Observation:** In the Scenario 1, there is foreign exchange loss of 3.33 USD on 05-10-2015 because of difference in exchange rate.

- Scenario 2 — Adjustment Freeze Date Not Equal to Bill Completion Date; Exchange Rate is Different; Partial Bill Amount is Written Off

	<b>Bill Completion Date (01-30-2014)</b>	<b>Adjustment Freeze Date (03-03-2015)</b>
<b>Exchange Rate From</b>	USD	USD
<b>Exchange Rate To</b>	INR	INR
<b>Exchange Rate</b>	60	55
<b>Invoice/Adjustment Currency</b>	INR	INR
<b>Invoice Amount</b>	1000	-
<b>Base Currency</b>	USD	USD
<b>Booked Revenue in Base Currency</b>	$1000/60 = 16.67$	-
<b>Adjustment Amount</b>	-	600
<b>Adjustment Amount in Base Currency on Bill Completion Date</b>	-	$600/60 = 10$
<b>Realized Revenue (Adjustment Amount) in Base Currency on Adjustment Freeze Date</b>	-	$600/55 = 10.91$
<b>Foreign Exchange Gain or Loss</b>	-	$10 - 10.91 = -0.91$

**Observation:** In the Scenario 2, there is foreign exchange gain of 0.91 USD on 03-03-2015 because of difference in exchange rate.

**Note:** If a write off adjustment is cancelled, reverse financial transactions are created. These financial transactions are not considered during the foreign exchange gain loss calculation.

## Write Up/Down Adjustment Scenarios

If the lower or upper tolerance limit defined in the Bill Weighted Payment Distribution algorithm is met when a payment is matched against a bill using the Bill Weighted match type, the Write Up or Write Down adjustment is automatically created. The following scenarios indicate how foreign exchange gain or loss is calculated for write up or write down adjustments:

- Scenario 1 — Payment/Adjustment Freeze Date Not Equal to Bill Completion Date; Exchange Rate is Different; Payment Matched against a Bill with Two Bill Segments (BS1 — 50 INR; BS2 — 50 INR)

	Bill Completion Date (04–30–2015)	Payment Freeze Date (05–14–2015)	Write Up/Down Adjustment (Against BS1) Freeze Date (05–14–2015)	Write Up/Down Adjustment (Against BS2) Freeze Date (05–14–2015)
Exchange Rate From	USD	USD	USD	USD
Exchange Rate To	INR	INR	INR	INR
Exchange Rate	50	45	45	45
Invoice/Payment/Adjustment Currency	INR	INR	INR	INR
Invoice Amount	100	-	-	-
Base Currency	USD	USD	USD	USD
Booked Revenue in Base Currency	$100/50 = 2$	-	-	-
Payment/Adjustment Amount	-	95	2.5	2.5
Payment/Adjustment Amount in Base Currency on Bill Completion Date	-	$95/50 = 1.9$	$2.5/50 = 0.05$	$2.5/50 = 0.05$
Realized Revenue (Payment/Adjustment Amount) in Base Currency on Payment/Adjustment Freeze Date	-	$95/45 = 2.11$	$2.5/45 = 0.056$	$2.5/45 = 0.056$
Foreign Exchange Gain or Loss	-	$1.9 - 2.11 = -0.21$	$0.05 - 0.056 = -0.006$	$0.05 - 0.056 = -0.006$

**Observation:** In the Scenario 1, two Write Up adjustments are created — one against BS1 and another against BS2. While freezing the payment which is matched against the bill, there is foreign exchange gain of 0.21 USD

on 05-14-2015. However, while freezing the Write Up adjustments which are created against BS1 and BS2, there is foreign exchange gain of 0.006 and 0.006 USD, respectively, on 05-14-2015.

**Note:** If a write up or write down adjustment is cancelled, reverse financial transactions are created. These financial transactions are not considered during the foreign exchange gain loss calculation.

---

## Payment Request

---

### Topics:

- [Prerequisites](#)
- [Payment Request \(Without Approval\) Status Transition](#)
- [Payment Request \(With Approval\) Status Transition](#)
- [Algorithms Used in C1-PaymentRequest](#)
- [Algorithms Used in C1-PaymentTransferRequest](#)
- [Payment Request Type](#)
- [Payment Request \(Used for Searching\)](#)
- [Payment Request \(Used for Viewing\)](#)
- [Payment Event Summary](#)

Oracle Revenue Management and Billing facilitates you to create and transfer payments through a payment request. While creating a payment creation or transfer request, you need to specify the payment request type using which you want to create the payment request. It is the payment request type which helps the system to determine:

- Whether to create payment transfer or payment creation request
- Whether payment events and payments must be created in real time (i.e. immediately) or in the deferred mode
- Whether payment creation or transfer instructions must be approved by the approver before freezing the payments

While creating a payment creation request, you need to specify the tender amount and match type details. However, while creating a payment transfer request, you need to specify the transfer amount and match type details. The **Payment Request** feature supports the following match types :

- By Bill Regular (Match Entity: Account)
- By Bill (Match Entity: Bill)
- By Bill Weighted (Match Entity: Account)
- By Bill Segments (Match Entity: Account)
- By Suspense Contract (Match Entity: Account)
- By Settlement ID (Match Entity: Account)

You can specify multiple match types along with the entity (such as account or bill) in the payment request. Depending on the match type and match entity selected, the entities (such as unpaid bills, bill segments, or contracts) of the account are considered against which you can match the tender or transfer (payment) amount. Once you update the payment amount against the required entities, you can distribute the tender or payment amount.

On distributing the tender amount, the payment event, payments, payment segments, and payment tender are created. The payments are created in the **Freezable** status. If any error occurs while creating a payment, the payment is created in the **Error** status. If all payments of a payment event are in the **Freezable** status, the status of the payment event is set to **Balanced**. However, if any payment of a payment event is in the **Error** status, the status of the payment event is set to **Unbalanced**. On distributing the payment amount (during transfer), the new payments are created in the **Freezable** status. If any error occurs while creating a new payment, the payment is created in the **Error** status. The status of the payment event is set to **Unbalanced**. The old payments in the payment event that you want to transfer remains in the **Frozen** or **Error** status.

The system allows you to view the pay segments of a payment and edit the pay segment amount, if required. You can edit the pay segment amount before submitting the payment request for approval or before freezing the payments. If the approval is not required for the payment request, you can directly freeze the payments created through the payment request. However, if the approval is required for the payment request, you need to submit the payment request for approval. Based on the observations, the approver might approve or reject the payment request. On approving a payment creation request or freezing the payments, the status of the payments is changed from **Freezable** to **Frozen**. However, on approving a payment transfer request or freezing the payments, the system does the following:

- Changes the status of the old payments which are in the **Frozen** status to **Cancelled**
- Deletes the old payments which are in the **Error** status
- Changes the status of the new payments which are in the **Freezable** status to **Frozen**
- Changes the status of the payment event to **Balanced** when there are no payments in the **Error** status

On rejecting a payment creation request, the payment event, payments, payment segments, and payment tender which are created through the payment creation request are deleted. However, on rejecting a payment transfer request, the new payments which are created through the payment transfer request are deleted.

During the payment request process, a payment creation or transfer request goes through various statuses in its lifecycle. For more information about the payment request statuses, see [Payment Request \(Without Approval\) Status Transition](#) on page 1248 and [Payment Request \(With Approval\) Status Transition](#) on page 1249.

Note that the lifecycle of a payment creation and transfer requests is driven by the respective business object using which the payment creation and transfer requests are created. The **C1-PaymentRequest** and **C1-PaymentTransferRequest** business objects are shipped with the product. The payment request feature explained in this document is articulated based on the lifecycle and logic defined in the **C1-PaymentRequest** and **C1-PaymentTransferRequest** business objects.

For more information on how to setup the payment request process, see [Prerequisites](#) on page 1247.

## Prerequisites

To setup the payment request process, you need to do the following:

- Define the following match types:

Match Type	Description	Payment Distribution Override Algorithm	Manual Distribution Algorithm	Entity Type	Match Type Search Zone	Entity Flag
BILLR	By Bill Regular	C1-PDOV-PYBL	C1-MD-BILL	Account	C1_ACCTSRCH	Bill
BILLW	By Bill Weighted	C1-PDOV-WTBS	C1-MD-BILL	Account	C1_ACCTSRCH	Bill
BILL-WO	By Bill Weighted Outstanding Amount	C1-PDOV-WTOA		Account	C1_ACCT_SRCH	Bill
BILLSEG	By Bill Segment	C1-PDOV-PYBS	C1-MD-BSEG	Account	C1_ACCTSRCH	Bill Segment
BYSATY	By Suspense Contract	C1-PDOV-SATY	C1-MD-ONSA	Account	C1_ACCTSRCH	Contract
SETT-ID	By Settlement ID	C1-PDOV-PYSL	C1-MD-SID	Account	C1_ACCTSRCH	Settlement
BYBILL	By Bill	C1-PDOV-PYBL or C1-PDOV-WTBS	C1-MDBYBILL	Bill	CI_BILL	Bill
BILL-BS	By Bill - Pay By Bill Segment Oldest	C1-PDOV-BSDT		Account	C1_ACCT_SRCH	Bill

**Note:** The **C1-PDOV-BSDT** algorithm for the bill match type BILL-BS is used to distribute the amount among the bill segments of the bill in the order of bill segment start date.

**Note:** The **C1-PDOV-WTOA** algorithm for the bill match type BILL-WOA performs the bill weighted calculation based on the unpaid amount on the bill segment.

- Create a defer algorithm using the **C1-PAY-COUNT** algorithm type
- Define the required payment request types in the system
- Define the required characteristic types where the characteristic entity is set to **Payment Request Type**
- Define the required characteristic types where the characteristic entity is set to **Payment Tender**
- Define rejected status reasons for the **C1-PaymentRequest** business object
- Define rejected status reasons for the **C1-PaymentTransferRequest** business object
- Define payment cancelation or transfer reasons through the **Payment Cancel Reason** screen

- Assign the **C1-PAYRQ** To Do type to a To Do role whose users must receive To Do generated while submitting a payment request for approval
- Set the **Payment Portal Configuration (C1-PAYPORTAL)** feature configuration
- Set the **Payment Request-Sort Distribution data (C1-PYREQSRT)** feature configuration
- Set the batch control type of the **Payment Request Periodic Monitor (C1-PAYRQ)** batch to **Timed** and define the following attributes:
  - Time Interval
  - Timer Active
  - User ID
  - Batch Language
  - Email Address

## **Payment Request (Without Approval) Status Transition**

---

The following figure graphically indicates how a payment creation or transfer request moves from one status to another when the approval workflow is off:

## Payment Request (With Approval) Status Transition

The following figure graphically indicates how a payment creation or transfer request moves from one status to another when approval workflow is on:

## Algorithms Used in C1-PaymentRequest

The following table lists the algorithms which are attached to the **C1-PaymentRequest** business object:

System Event	Algorithm	Algorithm Type	Description
Information	C1-PAYRQ-INF	C1-PAYRQ-INF	This algorithm generates the payment request information string which appears throughout the application. This algorithm concatenates the following fields: <ul style="list-style-type: none"> <li>• Payment Request Type Description</li> <li>• Payment Request Status Description</li> <li>• Payment Request ID</li> </ul>
Post-Processing	C1-PAYREQPOS	C1-PAYREQPOS	This algorithm invokes the manual distribution algorithm of the match types that are newly added while editing a payment request. It also deletes the respective match type entities from the <b>C1_PAY_DISTRIBUTION</b> table when you remove a match type while editing a payment request.

System Event	Algorithm	Algorithm Type	Description
Validation	C1-PAYREQVAL	C1-PAYREQVAL	<p>This algorithm checks whether the mandatory data (such as payment date, payor account, tender type, tender amount, currency, match type, and match entity) is specified while creating a payment request. It also checks whether auto pay source, auto pay route type, and account number are specified when you select a tender type where the <b>Generate Auto Pay</b> option is selected. This algorithm is triggered when you click the <b>Manual Distribution</b> button.</p> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> You do not specify the tender and auto pay details while creating a payment transfer request.</p> </div>

The following table lists the algorithms which are used in the lifecycle of the **C1-PaymentRequest** business object:

Status	System Event	Algorithm	Algorithm Type	Description
Draft	Enter	C1-PAY-DFT	C1-PAY-DFT	This algorithm invokes the manual distribution algorithm of the match types that you have selected while creating a payment request.
Draft	Exit	C1-PAYDFTEXT	C1-PAYDFTEXT	This algorithm checks whether the sum of the distributed payment amount is equal to the tender or transfer amount. This algorithm is triggered when you click the <b>Distribute</b> button.
Approval In Progress	Enter	C1-PAY-PFA	C1-PAY-PFA	This algorithm creates the To Do using the To Do type specified in the payment request type using which the payment request is created. The To Do is sent to the users with the approval To Do role specified in the payment request type.
Approval In Progress	Exit	C1-PAYPFAEXT	C1-PAYPFAEXT	This algorithm checks whether the approver is associated with the approval To Do role specified in the payment request type. It does not allow the submitter to approve or reject the payment request.
Approval In Progress	Exit	F1-TODOCOMPL	F1-TODOCOMPL	This algorithm type completes To Do entries that are linked to an object when the object exits a given state. The system finds all open To Do entries with drill keys for the current business object's primary key, and completes them, unless the To Do entry's type has been configured with an Exclude To Do Type Characteristic Type indicating that it should not be automatically completed.

Status	System Event	Algorithm	Algorithm Type	Description
Approved	Enter	C1-PAY-APP	C1-PAY-APP	This algorithm changes the status of the payment request to <b>Freezing</b> when the approver clicks the <b>Approve</b> button.
Distribute	Enter	C1-PAY-DIST	C1-PAY-DIST	This algorithm invokes the defer algorithm specified in the payment request type using which the payment request is created. The defer algorithm checks whether the tender or transfer amount must be distributed in the real time (i.e. immediately) or in the deferred mode. If the tender or transfer amount must be distributed in the real time, the status of the payment request is changed to <b>Distributed</b> . However., if the tender or transfer amount must be distributed in the deferred mode, the status of the payment request is changed to <b>Deferred Distribution</b> .
Deferred Distribution	Monitor	C1-PAY-MONT	C1-PAY-MONT	This algorithm is invoked from the <b>Payment Request Periodic Monitor (C1-PAYRQ)</b> batch. It changes the status of the payment request from <b>Deferred Distribution</b> to <b>Distributed</b> .
Distributed	Enter	C1-PAYCREATE	C1-PAYCREATE	This algorithm creates the payment event, payments, payment segments, and payment tender. A payment is created for each record in the <b>C1_PAY_DISTRIBUTION</b> table where the payment amount is greater than or less than zero. The status of the payments is set to <b>Freezable</b> . If any error occurs while creating a payment, the status of the payment is set to <b>Error</b> . The payment event ID is updated corresponding to the payment request in the <b>C1_PAY_REQ</b> table. Finally, the status of the payment request is changed to <b>Distributed</b> .
Distributed	Exit	C1-FRZ-VALID	C1-FRZ-VALID	This algorithm is triggered when you click the <b>Submit for Approval</b> or <b>Freeze</b> button. It checks whether the sum of payment segment amount is equal to the payment amount for each payment.

Status	System Event	Algorithm	Algorithm Type	Description
Distributed	Exit	F1-TODOCOMPL	F1-TODOCOMPL	This algorithm completes To Do entries that are linked to an object when the object exits a given state. The system finds all open To Do entries with drill keys for the current business object's primary key, and completes them, unless the To Do entry's type has been configured with an Exclude To Do Type Characteristic Type indicating that it should not be automatically completed.
Freezing	Enter	C1-PAY-V-FRZ	C1-PAY-V-FRZ	This algorithm validates whether payment already exists on the entity. It checks the unpaid amount of the entity.
Freezing	Enter	C1-PAY-FRZ	C1-PAY-FRZ	<p>This algorithm fetches the payment event created through the payment request. If you are freezing the payments of a payment creation request, this algorithm does the following:</p> <ul style="list-style-type: none"> <li>• Changes the status of the payments which are in the <b>Freezable</b> status to <b>Frozen</b></li> <li>• Changes the status of the payment event to <b>Balanced</b> when there are no payments in the <b>Error</b> status</li> </ul> <p>However, if you are freezing the payments of a payment transfer request, this algorithm does the following:</p> <ul style="list-style-type: none"> <li>• Changes the status of the old payments which are in the <b>Frozen</b> status to <b>Cancelled</b></li> <li>• Deletes the old payments which are in the <b>Error</b> status</li> <li>• Changes the status of the new payments which are in the <b>Freezable</b> status to <b>Frozen</b></li> <li>• Changes the status of the payment event to <b>Balanced</b> when there are no payments in the <b>Error</b> status</li> </ul>
Processed	-	-	-	-

Status	System Event	Algorithm	Algorithm Type	Description
Rejected	Enter	C1-PAY-RJT	C1-PAY-RJT	This algorithm is triggered when the approver clicks the <b>Reject</b> button. If you are rejecting a payment creation request, this algorithm deletes the payment event, payments, payment segments, and payment tender which are created through the payment creation request. However, if you are rejecting a payment transfer request, this algorithm deletes the new payments which are created through the payment transfer request.
Discarded	Enter	C1-PAY-RJT	C1-PAY-RJT	This algorithm is triggered when the approver clicks the <b>Reject</b> button. If you are rejecting a payment creation request, this algorithm deletes the payment event, payments, payment segments, and payment tender which are created through the payment creation request. However, if you are rejecting a payment transfer request, this algorithm deletes the new payments which are created through the payment transfer request.
Distribute And Freeze	Enter	C1-ISFREEZE	C1-ISFREEZE	This algorithm invokes the distribute algorithm and set Flag in the payment request clob.

## Algorithms Used in C1-PaymentTransferRequest

The following table lists the algorithms which are attached to the **C1-PaymentTransferRequest** business object:

System Event	Algorithm	Algorithm Type	Description
Information	C1-PAYRQ-INF	C1-PAYRQ-INF	This algorithm generates the payment request information string which appears throughout the application. This algorithm concatenates the following fields: <ul style="list-style-type: none"> <li>• Payment Request Type Description</li> <li>• Payment Request Status Description</li> <li>• Payment Request ID</li> </ul>
Post-Processing	C1-PAYREQPOS	C1-PAYREQPOS	This algorithm invokes the manual distribution algorithm of the match types that are newly added while editing a payment request. It also deletes the respective match type entities from the <b>C1_PAY_DISTRIBUTION</b> table when you remove a match type while editing a payment request.

System Event	Algorithm	Algorithm Type	Description
Validation	C1-PAYREQVAL	C1-PAYREQVAL	<p>This algorithm checks whether the mandatory data (such as payment date, payor account, tender type, tender amount, currency, match type, and match entity) is specified while creating a payment request. It also checks whether auto pay source, auto pay route type, and account number are specified when you select a tender type where the <b>Generate Auto Pay</b> option is selected. This algorithm is triggered when you click the <b>Manual Distribution</b> button.</p> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> You do not specify the tender and auto pay details while creating a payment transfer request.</p> </div>

The following table lists the algorithms which are used in the lifecycle of the **C1-PaymentTransferRequest** business object:

Status	System Event	Algorithm	Algorithm Type	Description
Draft	Enter	C1-PAY-DFT	C1-PAY-DFT	This algorithm invokes the manual distribution algorithm of the match types that you have selected while creating a payment request.
Draft	Exit	C1-PAYDFTEXT	C1-PAYDFTEXT	This algorithm checks whether the sum of the distributed payment amount is equal to the tender or transfer amount. This algorithm is triggered when you click the <b>Distribute</b> button.
Approval In Progress	Enter	C1-PAY-PFA	C1-PAY-PFA	This algorithm creates the To Do using the To Do type specified in the payment request type using which the payment request is created. The To Do is sent to the users with the approval To Do role specified in the payment request type.
Approval In Progress	Exit	C1-PAYPFAEXT	C1-PAYPFAEXT	This algorithm checks whether the approver is associated with the approval To Do role specified in the payment request type. It does not allow the submitter to approve or reject the payment request.

Status	System Event	Algorithm	Algorithm Type	Description
Approval In Progress	Exit	F1-TODOCOMPL	F1-TODOCOMPL	This algorithm type completes To Do entries that are linked to an object when the object exits a given state. The system finds all open To Do entries with drill keys for the current business object's primary key, and completes them, unless the To Do entry's type has been configured with an Exclude To Do Type Characteristic Type indicating that it should not be automatically completed.
Approved	Enter	C1-PAY-APP	C1-PAY-APP	This algorithm changes the status of the payment request to <b>Freezing</b> when the approver clicks the <b>Approve</b> button.
Distribute	Enter	C1-PAY-DIST	C1-PAY-DIST	This algorithm invokes the defer algorithm specified in the payment request type using which the payment request is created. The defer algorithm checks whether the tender or transfer amount must be distributed in the real time (i.e. immediately) or in the deferred mode. If the tender or transfer amount must be distributed in the real time, the status of the payment request is changed to <b>Distributed</b> . However., if the tender or transfer amount must be distributed in the deferred mode, the status of the payment request is changed to <b>Deferred Distribution</b> .
Deferred Distribution	Monitor	C1-PAY-MONT	C1-PAY-MONT	This algorithm is invoked from the <b>Payment Request Periodic Monitor (C1-PAYRQ)</b> batch. It changes the status of the payment request from <b>Deferred Distribution</b> to <b>Distributed</b> .

Status	System Event	Algorithm	Algorithm Type	Description
Distributed	Enter	C1-PAYTRANS	C1-PAYTRANS	This algorithm is invoked when the status of the payment transfer request is changed to <b>Distributed</b> . A payment is created for each record in the <b>C1_PAY_DISTRIBUTION</b> table where the payment amount is greater than or less than zero. The status of the new payments is set to <b>Freezable</b> . If any error occurs while creating a payment, the status of the payment is set to <b>Error</b> . The payment event ID is updated corresponding to the payment request in the <b>C1_PAY_REQ</b> table. Finally, the status of the payment request is changed to <b>Distributed</b> .
Distributed	Exit	C1-FRZ-VALID	C1-FRZ-VALID	This algorithm is triggered when you click the <b>Submit for Approval</b> or <b>Freeze</b> button. It checks whether the sum of payment segment amount is equal to the payment amount for each payment.
Distributed	Exit	F1-TODOCOMPL	F1-TODOCOMPL	This algorithm type completes To Do entries that are linked to an object when the object exits a given state. The system finds all open To Do entries with drill keys for the current business object's primary key, and completes them, unless the To Do entry's type has been configured with an Exclude To Do Type Characteristic Type indicating that it should not be automatically completed.

## Payment Request Type

Oracle Revenue Management and Billing allows you to define a payment request type using which you can create a payment request. A payment request of the specified payment request type is created when you manually distribute the tender or payment amount. It is the payment request type which helps the system to determine:

- Whether to create payment transfer or payment creation request
- Whether payment events and payments must be created in real time (i.e. immediately) or in the deferred mode
- Whether payment creation or transfer instructions must be approved by the approver before freezing payments

The **Payment Request Type** screen allows you to define, edit, copy, and delete a payment request type. This screen consists of the following zones:

- [Payment Request Type List](#) on page 1259
- [Payment Request Type](#) on page 1260

## Payment Request Type List

The **Payment Request Type List** zone lists payment request types that are already defined in the system. It contains the following columns:

Column Name	Column Description
Payment Request Type	Displays the payment request type.
Description	Displays the description of the payment request type.
Edit	On clicking the <b>Edit</b>  icon, the <b>Payment Request Type</b> screen appears where you can edit the details of the payment request type.
Duplicate	On clicking the <b>Duplicate</b>  icon, the <b>Payment Request Type</b> screen appears where you can define a payment request type using an existing payment request type.

Column Name	Column Description
Delete	<p>On clicking the <b>Delete</b> (🗑️) icon, you can delete the payment request type.</p> <p><b>Note:</b> You can delete a payment request type only when you have not created a payment request using the payment request type.</p>

On clicking the **Broadcast** (📡) icon corresponding to a payment request type, the **Payment Request Type** zone appears with the details of the respective payment request type.

## Payment Request Type

The **Payment Request Type** zone displays the details of the payment request type. This zone contains the following sections:

- **Main** — This section provides basic information about the payment request type. It contains the following fields:

Field Name	Field Description
Payment Request Type	Displays the payment request type.
Payment Request Business Object	<p>Indicates the business object that will be used to create the payment request.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.</p>
Description	Displays the description of the payment request type.
Detailed Description	Displays additional information about the payment request type.
Status	<p>Indicates the status of the payment request type. The valid values are:</p> <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>
Transfer	Indicates whether the payment request type will be used to create payment transfer or payment creation request.

Field Name	Field Description
Defer Algorithm	<p>Indicates the algorithm that will be triggered when you distribute tender or payment amount. This algorithm checks whether the number of payment distribution records in the payment request exceeds the payment count (defined in the Defer algorithm). If the number of payment distribution records in the payment request does not exceed the payment count, the system distributes tender or payment amount and accordingly creates payment event and payments in real time (i.e. immediately). However, if the number of payment distribution records in the payment request exceeds the payment count, the system distributes tender or payment amount in the deferred mode.</p> <p><b>Note:</b></p> <p>Number of payment distribution records = (Number of bill segments present in each bill fetched using the Bill Weighted, Bill Regular, and Bill match type algorithm) + (Number of bill segments fetched using the Bill Segment match type algorithm) + (Number of contracts fetched using the Suspense Contract match type algorithm) + (Number of settlements fetched using the Settlement match type algorithm)</p> <p>It has a link. On clicking the link, the <b>Algorithm</b> screen appears where you can view the details of the respective algorithm.</p>
Approval Required	Indicates whether approval is required while freezing payments of the payment requests which are created using the payment request type.
Approval To Do Type	<p>Indicates that To Do of the specified To Do type must be created when you submit the payment request for approval.</p> <p><b>Note:</b></p> <p>This field appears only when the <b>Approval Required</b> check box is selected.</p> <p>It has a link. On clicking the link, the <b>To Do Type</b> screen appears with the details of the respective To Do type.</p>
Approval To Do Role	<p>Indicates that users with the specified To Do role can only approve the payment request submitted for approval.</p> <p><b>Note:</b></p> <p>This field appears only when the <b>Approval Required</b> check box is selected.</p> <p>It has a link. On clicking the link, the <b>To Do Role</b> screen appears where you can view the details of the respective To Do role.</p>

- **Characteristics** — This section lists the characteristics defined for the payment request type. It contains the following columns:

Column Name	Column Description
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- **Record Actions** — This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the payment request type.

Button Name	Button Description
Delete	Used to delete the payment request type.  <b>Note:</b> You can delete a payment request type only when you have not created a payment request using the payment request type.
Duplicate	Used to create a new payment request type using an existing payment request type.

- **Record Information** — This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the payment request type is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.

By default, the **Payment Request Type** zone does not appear in the **Payment Request Type** screen. It appears only when you click the **Broadcast**  icon corresponding to a payment request type in the **Payment Request Type List** zone.

## **Defining a Payment Request Type**

### **Prerequisites**

To define a payment request type, you should have:

- Payment request business objects defined in the application
- Defer algorithm defined using the **C1-PAY-COUNT** algorithm type
- **C1-PAYRQ** To Do type assigned to a To Do role whose users must receive To Do generated while submitting a payment request for approval

### **Procedure**

To define a payment request type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **P** and then click **Payment Request Type**.  
A sub-menu appears.
3. Click the **Add** option from the **Payment Request Type** sub-menu.

The **Select Business Object** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Payment Request Type Business Object	Used to indicate the business object that you want to use to create the payment request type.	Yes

**Tip:** Alternatively, you can access the **Select Business Object** screen by clicking the **Add** button in the **Page Title** area of the **Payment Request Type** screen.

**Note:** The **Select Business Object** screen appears only when there are multiple payment request type business objects defined in the application. If there is only one payment request type business object defined in the application, the **Payment Request Type** screen appears.

4. Select the required payment request type business object from the respective field.
5. Click **OK**.

The **Payment Request Type** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the payment request type.
- **Characteristics** - Used to define characteristics for the payment request type.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Payment Request Type	Used to specify the payment request type.	Yes
Business Object	Indicates the payment request type business object used while defining the payment request type.	Not applicable
Payment Request Business Object	Used to indicate the business object that you want to use while creating the payment request.	Yes
Description	Used to specify the description for the payment request type.	Yes
Detailed Description	Used to specify additional information about the payment request type.	No
Status	Used to indicate the status of the payment request type. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>	Yes
Transfer	Used to indicate whether the payment request type will be used to create payment transfer or payment creation request.	No

Field Name	Field Description	Mandatory (Yes or No)
Defer Algorithm	<p>Used to attach an algorithm that will be triggered when you distribute tender or payment amount. This algorithm checks whether the number of payment distribution records in the payment request exceeds the payment count (defined in the Defer algorithm). If the number of payment distribution records in the payment request does not exceed the payment count, the system distributes tender or payment amount and accordingly creates payment event and payments in real time (i.e. immediately). However, if the number of payment distribution records in the payment request exceeds the payment count, the system distributes tender or payment amount in the deferred mode.</p> <div data-bbox="505 642 1092 1367" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>Number of payment distribution records = (Number of bill segments present in each bill fetched using the Bill Weighted, Bill Regular, and Bill match type algorithm) + (Number of bill segments fetched using the Bill Segment match type algorithm) + (Number of contracts fetched using the Suspense Contract match type algorithm) + (Number of settlements fetched using the Settlement match type algorithm)</p> <p>Deferred mode means in the background when the <b>Payment Request Periodic Monitor (C1-PAYRQ)</b> batch is invoked. You can configure the <b>Payment Request Periodic Monitor (C1-PAYRQ)</b> batch such that it is executed at regular intervals. When the <b>Payment Request Periodic Monitor (C1-PAYRQ)</b> batch is invoked, the system checks whether there are any payment requests in the <b>Deferred Distribution</b> status. If there is a payment request in the <b>Deferred Distribution</b> status, the system distributes tender or payment amount and accordingly creates payment event and payments.</p> </div> <div data-bbox="505 1367 1092 1581" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Algorithm Search</b> window appears.</p> </div>	Yes
Approval Required	Used to indicate whether approval is required while freezing payments of the payment requests which are created using the payment request type.	No
Approval To Do Type	<p>Used to indicate that To Do of the specified To Do type must be created when you submit the payment request for approval.</p> <div data-bbox="505 1839 1092 1913" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This field appears only when the <b>Approval Required</b> check box is selected.</p> </div>	<p>Yes (Conditional)</p> <div data-bbox="1114 1776 1463 1881" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This field is required when the <b>Approval Required</b> check box is selected.</p> </div>

Field Name	Field Description	Mandatory (Yes or No)
Approval To Do Role	Used to indicate that users with the specified To Do role can only approve the payment request submitted for approval.  <b>Note:</b> This field appears only when the <b>Approval Required</b> check box is selected.	Yes (Conditional)  <b>Note:</b> This field is required when the <b>Approval Required</b> check box is selected.

6. Enter the required details.

**Note:** You can search for an algorithm and To Do type by clicking the **Search**  icon corresponding to the respective field.

7. Define characteristics for the payment request type, if required.  
8. Click **Save**.

The payment request type is defined.

<b>Payment Request Type</b> screen	<a href="#">Payment Request Type</a> on page 1259
<b>Payment Request Type List</b> zone	<a href="#">Payment Request Type List</a> on page 1259
How to define characteristics for a payment request type	<a href="#">Defining Characteristics for a Payment Request Type</a> on page 1265

## Defining Characteristics for a Payment Request Type

### Prerequisites

To define characteristics for a payment request type, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Payment Request Type**)

### Procedure

To define characteristics for a payment request type:

1. Ensure that the **Characteristics** section is expanded when you are defining, editing, or copying a payment request type.

The **Characteristics** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Type	Used to indicate the characteristic type.  <b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Payment Request Type</b> .	Yes (Conditional)  <b>Note:</b> This field is required when you are defining a characteristic for the payment request type.

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Value	Used to specify the value for the characteristic type.  <b>Note:</b> On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	Yes (Conditional)  <b>Note:</b> This field is required when you are defining a characteristic for the payment request type.

- Enter the required details.

**Note:** If you select a predefined characteristic type, the **Search**  icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

- If you want to define more than one characteristic for the payment request type, click the **Add**  icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from the payment request type, click the **Delete**  icon corresponding to the characteristic.

## Editing a Payment Request Type

### Prerequisites

To edit a payment request type, you should have:

- Payment request business objects defined in the application
- Defer algorithm defined using the **C1-PAY-COUNT** algorithm type
- C1-PAYRQ** To Do type assigned to a To Do role whose users must receive To Do generated while submitting a payment request for approval

### Procedure

To edit a payment request type:

- Click the **Admin** link in the **Application** toolbar.  
A list appears.
- From the **Admin** menu, select **P** and then click **Payment Request Type**.  
A sub-menu appears.
- Click the **Search** option from the **Payment Request Type** sub-menu.  
The **Payment Request Type** screen appears.

4. In the **Payment Request Type List** zone, click the **Edit** (✎) icon in the **Edit** column corresponding to the payment request type whose details you want to edit.

The **Payment Request Type** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the payment request type.
- **Characteristics** - Used to define characteristics for the payment request type.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Payment Request Type	Displays the payment request type.	Not applicable
Business Object	Indicates the payment request type business object used while defining the payment request type.	Not applicable
Payment Request Business Object	Used to indicate the business object that you want to use while creating the payment request.	Yes
Description	Used to specify the description for the payment request type.	Yes
Detailed Description	Used to specify additional information about the payment request type.	No
Status	Used to indicate the status of the payment request type. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>	Yes
Transfer	Used to indicate whether the payment request type will be used to create payment transfer or payment creation request.	No

Field Name	Field Description	Mandatory (Yes or No)
Defer Algorithm	<p>Used to attach an algorithm that will be triggered when you distribute tender or payment amount. This algorithm checks whether the number of payment distribution records in the payment request exceeds the payment count (defined in the Defer algorithm). If the number of payment distribution records in the payment request does not exceed the payment count, the system distributes tender or payment amount and accordingly creates payment event and payments in real time (i.e. immediately). However, if the number of payment distribution records in the payment request exceeds the payment count, the system distributes tender or payment amount in the deferred mode.</p> <p><b>Note:</b></p> <p>Number of payment distribution records = (Number of bill segments present in each bill fetched using the Bill Weighted, Bill Regular, and Bill match type algorithm) + (Number of bill segments fetched using the Bill Segment match type algorithm) + (Number of contracts fetched using the Suspense Contract match type algorithm) + (Number of settlements fetched using the Settlement match type algorithm)</p> <p>Deferred mode means in the background when the <b>Payment Request Periodic Monitor (C1-PAYRQ)</b> batch is invoked. You can configure the <b>Payment Request Periodic Monitor (C1-PAYRQ)</b> batch such that it is executed at regular intervals. When the <b>Payment Request Periodic Monitor (C1-PAYRQ)</b> batch is invoked, the system checks whether there are any payment requests in the <b>Deferred Distribution</b> status. If there is a payment request in the <b>Deferred Distribution</b> status, the system distributes tender or payment amount and accordingly creates payment event and payments.</p> <p><b>Note:</b></p> <p>The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Algorithm Search</b> window appears.</p>	Yes
Approval Required	Used to indicate whether approval is required while freezing payments of the payment requests which are created using the payment request type.	No
Approval To Do Type	<p>Used to indicate that To Do of the specified To Do type must be created when you submit the payment request for approval.</p> <p><b>Note:</b> This field appears only when the <b>Approval Required</b> check box is selected.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required when the <b>Approval Required</b> check box is selected.</p>

Field Name	Field Description	Mandatory (Yes or No)
Approval To Do Role	Used to indicate that users with the specified To Do role can only approve the payment request submitted for approval.  <b>Note:</b> This field appears only when the <b>Approval Required</b> check box is selected.	Yes (Conditional)  <b>Note:</b> This field is required when the <b>Approval Required</b> check box is selected.

**Tip:** Alternatively, you can click the **Edit** button in the **Payment Request Type** zone to edit the details of the payment request type.

5. Modify the required details.

**Note:** You can search for an algorithm and To Do type by clicking the **Search**  icon corresponding to the respective field.

6. Define, edit, or remove characteristics from the payment request type, if required.
7. Click **Save**.

The changes made to the payment request type are saved.

## **Copying a Payment Request Type**

Instead of creating a payment request type from scratch, you can create a new payment request type using an existing payment request type. This is possible through copying a payment request type. On copying a payment request type, the details including the characteristics are copied to the new payment request type. You can then edit the details, if required.

### **Prerequisites**

To copy a payment request type, you should have:

- Payment request type (whose copy you want to create) defined in the application
- Payment request business objects defined in the application
- Defer algorithm defined using the **C1-PAY-COUNT** algorithm type
- **C1-PAYRQ** To Do type assigned to a To Do role whose users must receive To Do generated while submitting a payment request for approval

### **Procedure**

To copy a payment request type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **P** and then click **Payment Request Type**.

A sub-menu appears.

- Click the **Search** option from the **Payment Request Type** sub-menu.

The **Payment Request Type** screen appears.

- In the **Payment Request Type List** zone, click the **Duplicate**  icon in the **Duplicate** column corresponding to the payment request type whose copy you want to create.

The **Payment Request Type** screen appears. It contains the following sections:

- Main** - Used to specify basic details about the payment request type.
- Characteristics** - Used to define characteristics for the payment request type.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Payment Request Type	Used to specify the payment request type.	Yes
Business Object	Indicates the payment request type business object used while defining the payment request type.	Not applicable
Payment Request Business Object	Used to indicate the business object that you want to use while creating the payment request.	Yes
Description	Used to specify the description for the payment request type.	Yes
Detailed Description	Used to specify additional information about the payment request type.	No
Status	Used to indicate the status of the payment request type. The valid values are: <ul style="list-style-type: none"> <li>Active</li> <li>Inactive</li> </ul>	Yes
Transfer	Used to indicate whether the payment request type will be used to create payment transfer or payment creation request.	No

Field Name	Field Description	Mandatory (Yes or No)
Defer Algorithm	<p>Used to attach an algorithm that will be triggered when you distribute tender or payment amount. This algorithm checks whether the number of payment distribution records in the payment request exceeds the payment count (defined in the Defer algorithm). If the number of payment distribution records in the payment request does not exceed the payment count, the system distributes tender or payment amount and accordingly creates payment event and payments in real time (i.e. immediately). However, if the number of payment distribution records in the payment request exceeds the payment count, the system distributes tender or payment amount in the deferred mode.</p> <div data-bbox="516 642 1089 688" style="border: 1px solid black; padding: 2px;"> <p><b>Note:</b></p> </div> <p>Number of payment distribution records = (Number of bill segments present in each bill fetched using the Bill Weighted, Bill Regular, and Bill match type algorithm) + (Number of bill segments fetched using the Bill Segment match type algorithm) + (Number of contracts fetched using the Suspense Contract match type algorithm) + (Number of settlements fetched using the Settlement match type algorithm)</p> <p>Deferred mode means in the background when the <b>Payment Request Periodic Monitor (C1-PAYRQ)</b> batch is invoked. You can configure the <b>Payment Request Periodic Monitor (C1-PAYRQ)</b> batch such that it is executed at regular intervals. If there is a payment request in the <b>Deferred Distribution</b> status, the system distributes tender or payment amount and accordingly creates payment event and payments.</p> <div data-bbox="516 1371 1089 1417" style="border: 1px solid black; padding: 2px;"> <p><b>Note:</b></p> </div> <p>The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Algorithm Search</b> window appears.</p>	Yes
Approval Required	Used to indicate whether approval is required while freezing payments of the payment requests which are created using the payment request type.	No
Approval To Do Type	<p>Used to indicate that To Do of the specified To Do type must be created when you submit the payment request for approval.</p> <div data-bbox="516 1839 1089 1913" style="border: 1px solid black; padding: 2px;"> <p><b>Note:</b> This field appears only when the <b>Approval Required</b> check box is selected.</p> </div>	<p>Yes (Conditional)</p> <div data-bbox="1112 1776 1466 1885" style="border: 1px solid black; padding: 2px;"> <p><b>Note:</b> This field is required when the <b>Approval Required</b> check box is selected.</p> </div>

Field Name	Field Description	Mandatory (Yes or No)
Approval To Do Role	Used to indicate that users with the specified To Do role can only approve the payment request submitted for approval.  <b>Note:</b> This field appears only when the <b>Approval Required</b> check box is selected.	Yes (Conditional)  <b>Note:</b> This field is required when the <b>Approval Required</b> check box is selected.

**Tip:** Alternatively, you can click the **Duplicate** button in the **Payment Request Type** zone to create a copy of the payment request type.

5. Enter the required details.

**Note:** You can search for an algorithm and To Do type by clicking the **Search**  icon corresponding to the respective field.

6. Define, edit, or remove characteristics from the payment request type, if required.
7. Click **Save**.

The new payment request type is defined.

## **Deleting a Payment Request Type**

### **Procedure**

To delete a payment request type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **P** and then click **Payment Request Type**.  
A sub-menu appears.
3. Click the **Search** option from the **Payment Request Type** sub-menu.  
The **Payment Request Type** screen appears.
4. In the **Payment Request Type List** zone, click the **Delete**  icon in the **Delete** column corresponding to the payment request type that you want to delete.  
A message appears confirming whether you want to delete the payment request type.

**Note:** You can delete a payment request type only when you have not created a payment request using the payment request type.

**Tip:** Alternatively, you can click the **Delete** button in the **Payment Request Type** zone to delete the payment request type.

5. Click **OK**.

The payment request type is deleted.

## Payment Request (Used for Searching)

The **Payment Request** screen allows you to search for a payment creation or transfer request using various search criteria. It also allows you to create payment creation and transfer requests. Through this screen, you can navigate to the following screens:

- [Payment Request \(Used for Viewing\)](#) on page 1278

This screen consists of the following zones:

- [Search Payment Request](#) on page 1274

## Search Payment Request

The **Search Payment Request** zone allows you to search for a payment request using various search criteria. This zone contains the following two sections:

- **Search Criteria** — The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for a payment request using request or payment details. The valid values are: <ul style="list-style-type: none"> <li>• Request Details</li> <li>• Payment Details</li> </ul> <p><b>Note:</b> By default, the <b>Request Details</b> option is selected.</p>	Yes
On or Before Creation Date/Time	Used to search payment requests which are created till a particular date and time. <p><b>Note:</b> By default, the current date and time appears in this field. This field appears only when you select the <b>Request Details</b> option from the <b>Search By</b> list.</p>	No
Payment Request Status	Used to search payment requests with a particular status. The valid values are: <ul style="list-style-type: none"> <li>• Approval In Progress</li> <li>• Deferred Distribution</li> <li>• Discarded</li> <li>• Distribute And Freeze</li> <li>• Distributed</li> <li>• Draft</li> <li>• Processed</li> <li>• Rejected</li> </ul> <p><b>Note:</b> This field appears only when you select the <b>Request Details</b> option from the <b>Search By</b> list.</p>	No
Payment Request Type	Used to search payment requests which are created using a particular payment request type. <p><b>Note:</b> This field appears only when you select the <b>Request Details</b> option from the <b>Search By</b> list.</p>	No

Field Name	Field Description	Mandatory (Yes or No)
User ID	Used to search payment requests which are created by a particular user.  <b>Note:</b> This field appears only when you select the <b>Request Details</b> option from the <b>Search By</b> list.	No
Payment Request ID	Used to search a particular payment request.  <b>Note:</b> This field appears only when you select the <b>Request Details</b> option from the <b>Search By</b> list.	No
Payment Event ID	Used to search a payment request through which a payment event is created.  <b>Note:</b> This field appears only when you select the <b>Payment Details</b> option from the <b>Search By</b> list. The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Payment Event Search</b> window appears.	No
Payor Account ID	Used to search payment requests which are created for a particular payor account.  <b>Note:</b> This field appears only when you select the <b>Payment Details</b> option from the <b>Search By</b> list. The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Account Search</b> window appears.	No
Payor Name	Used to search payment requests which are created for a particular payor.  <b>Note:</b> This field appears only when you select the <b>Payment Details</b> option from the <b>Search By</b> list.	No
Payment Date	Used to search payment requests through which payments are created on a particular date.  <b>Note:</b> This field appears only when you select the <b>Payment Details</b> option from the <b>Search By</b> list.	No
<b>Note:</b> You must specify at least one search criterion while searching for a payment request.		

- **Search Results** — On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Create Date/Time	Displays the date and time when the payment request was created in the system.
Payment Request Information	Displays information about the payment request. <b>Note:</b> It has a link. On clicking the link, the <b>Payment Request</b> screen appears where you can view the details of the respective payment request.
Status	Indicates the status of the payment request. The valid values are: <ul style="list-style-type: none"> <li>• Approval In Progress</li> <li>• Deferred Distribution</li> <li>• Distributed</li> <li>• Draft</li> <li>• Processed</li> <li>• Rejected</li> </ul>
Payment Event Information	Displays information about the payment event which is created through the payment request. <b>Note:</b> It has a link. On clicking the link, the <b>Payment Event</b> screen appears with the details of the respective payment event.
Created By	Indicates the user who has created the payment request.
Payor Account Information	Displays information about the payor's account for which the payment request is created. In addition, this column has a context menu which helps in navigating to other screens in the application. <b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account.

## Searching for a Payment Request

### Prerequisites

To search for a payment request, you should have:

- Payment request types defined in the application

### Procedure

To search for a payment request:

1. Click the **Menu** link in the **Application** toolbar.

A list appears.

- From the **Main** menu, select **Financial** and then click **Payment Request**.

A sub-menu appears.

- Click the **Search** option from the **Payment Request** sub-menu.

The **Payment Request** screen appears.

- Enter the search criteria in the **Search Payment Request** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

- Click **Search**.

A list of payment requests that meet the search criteria appears in the **Search Results** section.

## Viewing the Payment Request Details

### Procedure

To view the details of a payment request:

- Search for the payment request in the **Payment Request** screen.
- In the **Search Results** section, click the link in the **Payment Request Information** column corresponding to the payment request whose details you want to view.

The **Payment Request** screen appears. It consists of the following tabs:

- **Main** – This tab contains the following two zones:
    - **Payment Request** – Displays the details of the payment request.
    - **Payment Distribution** – Lists the payment distribution records of the payment request.
  - **Log** – This tab lists the complete trail of actions performed on the payment request.
- View the details of the payment request in the **Payment Request** zone.
  - View the payment distribution records of the payment request in the **Payment Distribution** zone.

## Payment Request (Used for Viewing)

---

Once you create a payment creation or transfer request, the **Payment Request** screen allows you to:

- Edit the details of a payment request
- Edit the payment amount against each entity
- Delete a payment request
- View the details of a payment request
- Distribute the tender or payment amount
- Edit the amount of a payment segment
- Freeze the payments created through a payment request
- Submit a payment request for approval before freezing payments
- Approve or reject a payment request
- View the log of a payment request
- Add a log entry for a payment request

This screen consists of the following tabs:

- **Main** – This tab contains the following two zones:
  - **Payment Request** – Displays the details of the payment request.
  - **Payment Distribution** – Lists the payment distribution records of the payment request.
- **Log** – This tab lists the complete trail of actions performed on the payment request.

### Payment Request

The **Payment Request** zone displays the details of the payment request. This zone contains the following sections:

- **Main** — This section provides basic information about the payment request. It contains the following fields:

Field Name	Field Description
Payment Request Information	Displays information about the payment request.
Payment Request Type	Indicates the payment request type using which the payment request is created.  <b>Note:</b> It has a link. On clicking the link, the <b>Payment Request Type</b> screen appears where you can view the details of the payment request type.
Payment Request Status	Indicates the status of the payment request. The valid values are: <ul style="list-style-type: none"> <li>• Approval In Progress</li> <li>• Deferred Distribution</li> <li>• Distributed</li> <li>• Draft</li> <li>• Processed</li> <li>• Rejected</li> </ul>

Field Name	Field Description
Status Reason	<p>Indicates the reason why the payment request is rejected.</p> <p><b>Note:</b> This field appears only when the payment request is in the <b>Rejected</b> status. It has a link. On clicking the link, the <b>Status Reason</b> screen appears where you can view the details of the rejected reason.</p>
Payor Account Information	<p>Displays information about the payor's account for which the payment request is created.</p> <p><b>Note:</b> This field appears only when you are viewing the details of a payment creation request. It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account.</p>
Payment Date	Displays the date when the payment event and payments are created.
Payment Event Information	<p>Displays information about the payment event. If you are viewing the details of a payment creation request, this field displays information about the payment event which is created through the payment creation request. However, if you are viewing the details of a payment transfer request, this field displays information about the payment event whose payments you want to transfer.</p> <p><b>Note:</b> This field does not appear when the payment request is in the <b>Rejected</b> status. If you are viewing the details of a payment creation request, this field does not appear when the payment creation request is in the <b>Draft</b> status. It has a link. On clicking the link, the <b>Payment Event</b> screen appears where you can view the details of the respective payment event.</p>
Transfer Amount	<p>Displays the total payment amount which you want to transfer.</p> <p><b>Note:</b> This field appears only when you are viewing the details of a payment transfer request.</p>
Transfer Reason	<p>Indicates the reason why you want to transfer the payment amount.</p> <p><b>Note:</b> This field appears only when you are viewing the details of a payment transfer request.</p>

- **Tender Details** — This section provides details about the tender used in the payment request. This section appears only when you are viewing the details of a payment creation request. It contains the following fields:

Field Name	Field Description
Tender Type	Indicates the type of tender through which the payment was made.
Tender Amount	Displays the tender amount.

Field Name	Field Description
Currency	Indicates the currency in which the payment was made.
Check Number	<p data-bbox="638 264 1349 296">Displays the check number if the payment is made through check.</p> <div data-bbox="638 310 1463 363" style="border: 1px solid black; padding: 2px;"> <p data-bbox="638 321 1365 352"><b>Note:</b> This field appears only when the tender type is set to <b>Check</b>.</p> </div>
Auto Pay Route Type Code	<p data-bbox="638 390 1463 453">Indicates when and how automatic payment request of the account is routed to a financial institution.</p> <div data-bbox="638 468 1463 552" style="border: 1px solid black; padding: 2px;"> <p data-bbox="638 478 1463 541"><b>Note:</b> This field appears only when you select a tender type where the <b>Generate Auto Pay</b> check box is selected.</p> </div>
Schedule Extract Date	<p data-bbox="638 579 1463 642">Displays the date when the automatic payment request is scheduled to be sent to a financial institution.</p> <div data-bbox="638 657 1463 741" style="border: 1px solid black; padding: 2px;"> <p data-bbox="638 667 1463 730"><b>Note:</b> This field appears only when you select a tender type where the <b>Generate Auto Pay</b> check box is selected.</p> </div>
Auto Pay Source Code	<p data-bbox="638 768 1463 800">Indicates the financial institution that receives the automatic payment request.</p> <div data-bbox="638 814 1463 898" style="border: 1px solid black; padding: 2px;"> <p data-bbox="638 825 1463 888"><b>Note:</b> This field appears only when you select a tender type where the <b>Generate Auto Pay</b> check box is selected.</p> </div>
Distribution and Freeze Date	<p data-bbox="638 926 1463 989">Displays the date when the automatic payment must be distributed and frozen in the system.</p> <div data-bbox="638 1003 1463 1087" style="border: 1px solid black; padding: 2px;"> <p data-bbox="638 1014 1463 1077"><b>Note:</b> This field appears only when you select a tender type where the <b>Generate Auto Pay</b> check box is selected.</p> </div>
Account Number	<p data-bbox="638 1115 1463 1178">Indicates the bank account number through which the automatic payment was made.</p> <div data-bbox="638 1192 1463 1276" style="border: 1px solid black; padding: 2px;"> <p data-bbox="638 1203 1463 1266"><b>Note:</b> This field appears only when you select a tender type where the <b>Generate Auto Pay</b> check box is selected.</p> </div>
Expires On	<p data-bbox="638 1304 1182 1335">Displays the date when the tender type will expire.</p> <div data-bbox="638 1350 1463 1434" style="border: 1px solid black; padding: 2px;"> <p data-bbox="638 1360 1463 1423"><b>Note:</b> This field appears only when you select a tender type where the <b>Generate Auto Pay</b> check box is selected.</p> </div>
Name	<p data-bbox="638 1472 1463 1535">Displays the name of the person as maintained in the financial institution's system.</p> <div data-bbox="638 1549 1463 1633" style="border: 1px solid black; padding: 2px;"> <p data-bbox="638 1560 1463 1623"><b>Note:</b> This field appears only when you select a tender type where the <b>Generate Auto Pay</b> check box is selected.</p> </div>

Field Name	Field Description
Tender Control Information	<p>Displays information about the tender control which is created when the payment event and payments are created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.</p> <p><b>Note:</b> This field appears only when the payment request is in the <b>Distributed, Approval In Progress, Processed</b> , or <b>Rejected</b> status. It has a link. On clicking the link, the <b>Tender Control</b> screen appears where you can view the details of the respective tender control.</p>
Deposit Control Information	<p>Displays information about the deposit control which is created when the payment event and payments are created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.</p> <p><b>Note:</b> This field appears only when the payment request is in the <b>Distributed, Approval In Progress, Processed</b>, or <b>Rejected</b> status. It has a link. On clicking the link, the <b>Deposit Control</b> screen appears where you can view the details of the respective deposit control.</p>
Pay Tender ID	<p>Displays the payment tender ID.</p> <p><b>Note:</b> This field appears only when the payment request is in the <b>Processed</b> status.</p>
Tender Status	<p>Indicates the current status of the tender. The valid values are:</p> <ul style="list-style-type: none"> <li>Valid</li> <li>Cancelled</li> </ul> <p><b>Note:</b> This field appears only when the payment request is in the <b>Processed</b> status.</p>
MICR ID	Displays the MICR code on the payment.
Ext. Reference ID	Displays the external reference number of the payment on the payment upload interface record.
Person ID	Indicates the person's account ID mentioned in the payment upload interface record.
Name	Indicates the person mentioned in the payment upload interface record.

- **Characteristics** — This section lists the characteristics defined for the payment tender. It appears only when you are viewing the details of a payment creation request. It contains the following columns:

Column Name	Column Description
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- **Match Types** — This section lists the match type details of the payment request. This section appears only when you are viewing the details of a payment creation request. It contains the following columns:

Column Name	Column Description
Match Type	Indicates the match type using which you want to match the payment.
Match By	Indicates the bill or account (whose entities, such as unpaid bills, unpaid bill segments, settlement IDs, or contracts) must be considered while matching the payment.

- **Payor Account Details** — This section appears only when you are viewing the details of a payment transfer request. It contains the following columns:

Column Name	Column Description
Payor Account Information	Displays information about the payor's account whose payments you want to transfer.

- **Payment Details** — This section appears only when you are viewing the details of a payment transfer request. It contains the **Show Payments** link. On clicking the link, the **Payment** screen appears where you can view the details of the payment that you want to transfer. In case, you want to transfer multiple payments, the **Payment Search** window appears with the list of payments selected for transfer. You can click the individual payment to view the details in the **Payment** screen. The **Show Payments** link does not appear when you are viewing the details of a payment transfer request which is in the **Processed** status. Instead, the following column appears in this section:

Column Name	Column Description
Payment(s)	Displays information about the payment which is cancelled.

- **Record Actions** — This section contains the following buttons:

Column Name	Column Description
Edit	Used to edit the details of the payment request. <b>Note:</b> The <b>Edit</b> button appears only when the payment request is in the <b>Draft</b> status.
Delete	Used to delete the payment request. <b>Note:</b> The <b>Delete</b> button appears only when the payment request is in the <b>Draft</b> status.
Distribute	Used to distribute the tender or payment amount. <b>Note:</b> The <b>Distribute</b> button appears only when the payment request is in the <b>Draft</b> status.
Submit for Approval	Used to submit the payment request for approval. <b>Note:</b> The <b>Submit for Approval</b> button appears only when: <ul style="list-style-type: none"> <li>• The payment request is in the <b>Distributed</b> status.</li> <li>• The <b>Approval Required</b> check box is selected in the payment request type using which the payment request is created.</li> </ul>

Column Name	Column Description
Freeze	Used to freeze the payments which are created through the payment request.  <b>Note:</b> The <b>Freeze</b> button appears only when: <ul style="list-style-type: none"> <li>The payment request is in the <b>Distributed</b> status.</li> <li>The <b>Approval Required</b> check box is not selected in the payment request type using which the payment request is created.</li> </ul>
Approve	Used to approve the payment request.  <b>Note:</b> The <b>Approve</b> button appears only when: <ul style="list-style-type: none"> <li>The payment request is in the <b>Approval In Progress</b> status.</li> <li>A user with the approval To Do role is reviewing the payment request.</li> </ul>
Reject	Used to reject the payment request.  <b>Note:</b> The <b>Reject</b> button appears only when: <ul style="list-style-type: none"> <li>The payment request is in the <b>Approval In Progress</b> status.</li> <li>A user with the approval To Do role is reviewing the payment request.</li> </ul>
Back to Draft	Used to change the status of the payment request to <b>Draft</b> .  <b>Note:</b> The <b>Back to Draft</b> button appears only when the payment request is in the <b>Distributed</b> status.
Discard	Used to discard the payment creation or transfer request.  <b>Note:</b> The <b>Discard</b> button appears only when the payment request is in the <b>Distributed</b> status.
Distribute And Freeze	Used to distribute and freeze the payments at the same time.  <b>Note:</b> the <b>Distribute And Freeze</b> button appears only when the payment request is in the <b>Draft</b> status.

- **Record Information** — This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the payment request is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.
Status Date/Time	Displays the date and time when the payment request status is updated
Create Date/Time	Displays the date and time when the payment request is created.

## Payment Distribution

The **Payment Distribution** zone lists the payment distribution records of the payment request. This zone contains the following columns:

Column Name	Column Description
Match Type	Indicates the match type using which the payment was matched.
Payee Account ID	Indicates the account for which the payment was made.  <b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account.
Match Value	Indicates the entity (such as bill ID, bill segment ID, contract ID, or settlement ID) against which the payment was matched.
Match Entity	Indicates the type of entity against which the payment was matched. The valid values are: <ul style="list-style-type: none"> <li>• Bill</li> <li>• Bill Segment</li> <li>• Contract</li> <li>• Settlement</li> </ul>
Amount	Displays the entity amount. In case of contract, the entity amount would be zero.
Write Off Adjustment Amount	Indicates the amount which is either write up or down when the payment against the bill is within the tolerance limit.  <b>Note:</b> The data appears in this column only when the match type is <b>Bill Weighted</b> and the payment amount is within the underpayment or overpayment tolerance limit. This column does not appear when the payment request is in the <b>Draft</b> or <b>Rejected</b> status.
Paid Amount	Displays the amount which is already paid against the entity.  <b>Note:</b> This column appears only when the payment request is in the <b>Draft</b> or <b>Rejected</b> status.
Unpaid Amount	Displays the amount which is eligible for payment against the entity.  <b>Note:</b> This column appears only when the payment request is in the <b>Draft</b> or <b>Rejected</b> status.
Payment Amount	Displays the payment amount. If the <b>Show Default</b> check box is not selected against a match type while creating the payment request, the payment amount against the respective match type entities is set to zero. However, if the <b>Show Default</b> check box is selected against a match type while creating the payment request, the payment amount appears against the respective match type entities. The tender amount is divided among the entities in the sequence of match types (where <b>Show Default</b> check box is selected) followed by the sequence of bill, bill segment, or contract start date. You can edit the payment amount, if required.
Payment Currency	Indicates the currency in which the payment was made.

Column Name	Column Description
Payment ID	<p>Displays the payment ID.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Payment</b> screen appears with the details of the respective payment. This column does not appear when the payment request is in the <b>Draft</b> or <b>Rejected</b> status.</p>
Payment Status	<p>Indicates the status of the payment. The valid values are:</p> <ul style="list-style-type: none"> <li>• Canceled</li> <li>• Error</li> <li>• Freezable</li> <li>• Frozen</li> <li>• Incomplete</li> </ul> <p><b>Note:</b> This column does not appear when the payment request is in the <b>Draft</b> or <b>Rejected</b> status.</p>
Error Message	<p>Indicates the reason why the payment is in the <b>Error</b> status.</p> <p><b>Note:</b> This column does not appear when the payment request is in the <b>Draft</b> or <b>Rejected</b> status.</p>
Detail	<p>On clicking the <b>Detail</b> button, the <b>Edit Payment Segment Amount</b> screen appears where you can edit the payment segment amount.</p> <p><b>Note:</b> This column does not appear when the payment request is in the <b>Draft</b> or <b>Rejected</b> status. The <b>Detail</b> button appears in the <b>Detail</b> column only when:</p> <ul style="list-style-type: none"> <li>• The payment request is in the <b>Distributed</b> or <b>Approval In Progress</b> status</li> <li>• The payment is in the <b>Freezable</b> status.</li> </ul> <p>However, a user with the approval To Do role will not be able to edit the payment segment amount.</p>
Redistribute	<p>On clicking the <b>Redistribute</b> button, you can redistribute the payment amount among the payment segments.</p> <p><b>Note:</b> This column appears only when the payment request is in the <b>Distributed</b> or <b>Distribute and Freeze</b> status. The <b>Redistribute</b> button appears in the <b>Redistribute</b> column only when:</p> <ul style="list-style-type: none"> <li>• The payment request is in the <b>Distributed</b> or <b>Approval In Progress</b> status</li> </ul>

You can edit the payment amount by clicking the **Update Payment Amount** button in the upper right corner of this zone.

## Creating a Payment Creation Request

### Prerequisites

To create a payment creation request, you should have:

- Payment request types defined in the application (where the **Transfer** check box is not selected)

### Procedure

To create a payment creation request:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Financial** and then click **Payment Request**.  
A sub-menu appears.
3. Click the **Add** option from the **Payment Request** sub-menu.

The **Select Payment Request Type** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Payment Request Type	Used to indicate the payment request type using which you want to create the payment request.  <b>Note:</b> The list includes only those payment request types where the <b>Transfer</b> check box is not selected.	Yes

**Tip:** Alternatively, you can access the **Select Payment Request Type** screen by clicking the **Add** button in the **Page Title** area of the **Payment Request** screen.

4. Select the required payment request type from the respective field.
5. Click **OK**.

The **Payment Request** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the payment request. This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Payment Request Type	Indicates the payment request type using which you want to create the payment request.	Not applicable
Payor Account Information	Used to indicate the payor account for which you want to create the payment request.  <b>Note:</b> On specify the account ID, additional information about the account appears corresponding to this field.  The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Account Search</b> window appears.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Payment Date	Used to specify the date when the payment was made.  <b>Note:</b> By default, the current date appears in this field.	Yes

- **Tender Details** - Used to specify the tender details in the payment request. This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Tender Type	Used to indicate the type of tender through which the payment was made.	Yes
Tender Amount	Used to specify the tender amount.	Yes
Currency	Used to indicate the currency in which the payment was made.	Yes
Check Number	Used to specify the check number if the payment is made through check.	No
Auto Pay Route Type Code	Used to indicate when and how automatic payment request of the account is routed to a financial institution.  <b>Note:</b> This field appears only when you select a tender type where the <b>Generate Auto Pay</b> check box is selected.	Yes (Conditional)  <b>Note:</b> This field is required only when you select a tender type where the <b>Generate Auto Pay</b> check box is selected.
Schedule Extract Date	Displays the date when the automatic payment request is scheduled to be sent to a financial institution.  <b>Note:</b> This field appears only when you select a tender type where the <b>Generate Auto Pay</b> check box is selected.	Not applicable
Auto Pay Source Code	Used to indicate the financial institution that receives the automatic payment request.  <b>Note:</b> This field appears only when you select a tender type where the <b>Generate Auto Pay</b> check box is selected.	Yes (Conditional)  <b>Note:</b> This field is required only when you select a tender type where the <b>Generate Auto Pay</b> check box is selected.
Distribution and Freeze Date	Displays the date when the automatic payment must be distributed and frozen in the system.  <b>Note:</b> This field appears only when you select a tender type where the <b>Generate Auto Pay</b> check box is selected.	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
Account Number	Used to indicate the bank account number through which the automatic payment was made.  <b>Note:</b> This field appears only when you select a tender type where the <b>Generate Auto Pay</b> check box is selected.	Yes (Conditional)  <b>Note:</b> This field is required only when you select a tender type where the <b>Generate Auto Pay</b> check box is selected.
Expires On	Used to specify the date when the tender type will expire.  <b>Note:</b> This field appears only when you select a tender type where the <b>Generate Auto Pay</b> check box is selected.	No
Name	Used to specify the name of the person as maintained in the financial institution's system.  <b>Note:</b> This field appears only when you select a tender type where the <b>Generate Auto Pay</b> check box is selected.	No
MICR ID	Used to specify the MICR code on the payment.	No
Ext. Reference ID	Used to specify the external reference number of the payment on the payment upload interface record.	No
Person ID	Used to indicate the person's account ID mentioned in the payment upload interface record.	No
Name	Used to indicate the person mentioned in the payment upload interface record.	No
Tender Control ID	<b>Note:</b> The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Tender Control Search</b> window appears.	

**Note:** If the auto pay instructions are defined for the payor account, by default, the auto pay data appears in the **Auto Pay Route Type Code**, **Auto Pay Source Code**, **Account Number**, **Expires On**, and **Name** fields.

- **Characteristics** - Used to define characteristics for the payment tender. This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Type	Used to indicate the characteristic type.  <b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Payment Tender</b> .	Yes (Conditional)  <b>Note:</b> This field is required when you are defining a characteristic for the payment tender.
Characteristic Value	Used to specify the value for the characteristic type.  <b>Note:</b> On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	Yes (Conditional)  <b>Note:</b> This field is required when you are defining a characteristic for the payment tender.

- **Match Types** - Used to define match types for the payment request. This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Match Type	Used to indicate the match type using which you want to match the payment.	Yes
Show Default	Used to indicate whether the default payment amount should be displayed against the match type entities.  <b>Note:</b> By default, the <b>Show Default</b> check box is selected when you select the match type.	No
Entity	Indicates the match type entity. The valid values are: <ul style="list-style-type: none"> <li>• <b>Account</b> — Enables you to select the account whose unpaid bills, unpaid bill segments, settlement IDs, or contracts must be considered while matching the payment.</li> <li>• <b>Bill</b> — Enables you to select the unpaid bill against which you want to match the payment.</li> </ul> <b>Note:</b> The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Account Search</b> window appears.	Not applicable
Entity ID	Used to specify the account or bill ID depending on the match type entity.	Yes

6. Enter the required details.

**Note:**

You can search for a payor account, auto pay route type, auto pay source, and entity by clicking the **Search**  icon corresponding to the respective field.

If you want to specify more than one match type within the payment request, click the **Add**  icon in the **Match Types** section and then specify the details. However, if you want to remove a match type from the payment request, click the **Delete**  icon corresponding to the match type.

7. Define characteristics for the payment tender, if required.

8. Click **Manual Distribution**.

The payment request is created and the status of the payment request is set to **Draft**. The **Payment Request** screen appears. Depending on the match type and match entity specified while creating the payment request, the following entities are listed in the **Payment Distribution** zone:

Match Type	Match Entity	Entities
By Bill Regular	Account	Unpaid bills of the account
By Bill Weighted	Account	Unpaid bills of the account
By Bill	Bill	Unpaid bill
By Bill Segments	Account	Unpaid bill segments
By Suspense Contract	Account	Contracts of the account  <b>Note:</b> Only contracts of the contract type where the <b>Eligible for Billing</b> flag is set to <b>No</b> and <b>Special Role</b> flag is set to <b>Suspense</b> are listed in the <b>Payment Distribution</b> zone. If no contracts with this specification exist for the account, the system checks whether there is any such contract type (where the <b>Eligible for Billing</b> flag is set to <b>No</b> and <b>Special Role</b> flag is set to <b>Suspense</b> ) defined for the division to which the account belongs. If there is any such contract type defined for the division, the system creates the contract for the account using the respective contract type and the same is listed in <b>Payment Distribution</b> zone.
By Settlement	Account	Unpaid bill segments where the settlement account is stamped

If the **Show Default** check box is not selected against a match type while creating the payment request, the payment amount against the respective match type entities is set to zero. However, if the **Show Default** check box is selected against a match type, the payment amount appears against the respective match type entities. The tender amount is divided among the entities in the sequence of match types (where **Show Default** check box is selected) followed by the sequence of bill, bill segment, or contract start date. You can then edit the payment amount, if required.

**Note:**

If a payment request is already created for a payee account and is currently in progress, the system will not allow you to create another payment request for the payee account until the previous payment request is in the **Processed** or **Rejected** status.

The system does not allow you to create a payment request for a payee account when the respective match type entities (such as unpaid bills, unpaid bill segments, contracts, or settlement IDs do not exists for the payee account.

**Defining Characteristics for a Payment Tender****Prerequisites**

To define characteristics for a payment tender, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Payment Tender**)

**Procedure**

To define characteristics for a payment tender:

1. Ensure that the **Characteristics** section is expanded when you are defining or editing a payment request.

The **Characteristics** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Type	Used to indicate the characteristic type. <b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Payment Tender</b> .	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the payment tender.
Characteristic Value	Used to specify the value for the characteristic type. <b>Note:</b> On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the payment tender.

2. Enter the required details.

**Note:** If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

3. If you want to define more than one characteristic for the payment tender, click the **Add** (+) icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from the payment tender, click the **Delete** (🗑️) icon corresponding to the characteristic.

## Editing the Payment Amount

### Procedure

To edit the payment amount against each entity:

1. Search for the payment request in the **Payment Request** screen.
2. In the **Search Results** section, click the link in the **Payment Request Information** column corresponding to the payment request whose details you want to edit.

The **Payment Request** screen appears.

3. Click the **Update Payment Amount** button in the upper right corner of the **Payment Distribution** zone.

The **Edit Payment Amount** screen appears. It contains the following two sections:

- **Search Criteria** — The **Search Criteria** section allows you to filter the payment distribution records using various search criteria. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Match Type	Used to search the entities which are considered using a particular match type. <b>Note:</b> By default, the <b>All</b> option is selected.	Yes
Entity ID	Used to search entities which belong to a particular account. <b>Note:</b> By default, the <b>All</b> option is selected.	Yes
Match Value	Used to search for a particular entity (such as bill, bill segment, contract, or settlement ID).	No
Sort By	Used to sort entity information as per the match type defined in the <b>C1-PYREQSRT</b> feature configuration.	No

- **Search Results** — On clicking the **Search** button, the search results are filtered based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Match Type	Indicates the match type using which the entity is considered.
Payee Information	Displays information about the account for which the payment was made.
Entity Information	Displays information about the entity against which the payment was matched.
Amount	Displays the entity amount. In case of contract, the entity amount would be zero.
Paid Amount	Displays the amount which is already paid against the entity.
Unpaid Amount	Displays the amount which is eligible for payment against the entity.
Payment Amount	Used to specify the payment amount.  <b>Note:</b> If the <b>Allow Overpayment</b> option type of the <b>C1-PAYPORTAL</b> feature configuration is set to <b>true</b> , you can specify the payment amount greater than the unpaid amount. In other words, you can make overpayment against an entity.
Payment Currency	Indicates the currency in which the payment was made.

In addition, the **Search Results** section contains the following fields:

Field Name	Field Description
Total Amount	Displays the tender or transfer amount.
Running Total	Displays the sum of payment amount specified against each entity.
Running Balance	Displays the difference between total amount and running total. The running balance is highlighted in the red color when the difference amount is non-zero.

**Note:** Pagination is used to display limited number of records in the **Edit Payment Amount** screen. You can change the number of records displayed per page, if required. You can use the navigation buttons, such as **First** ( << ), **Previous** ( < ), **Next** ( > ), and **Last** ( >> ) to navigate between pages. You can also select the page to which you want to navigate from the **Go To** list.

- Modify the payment amount against an entity, if required.

**Note:** The sum of payment amount should be equal to the tender or transfer (payment) amount.

- Click **Save**.

The changes made to the payment request are saved.

- Click **Close**.

The payment amount is updated in the **Payment Distribution** zone.

## Editing a Payment Request

### Procedure

To edit a payment request:

1. Search for the payment request in the **Payment Request** screen.
2. In the **Search Results** section, click the link in the **Payment Request Information** column corresponding to the payment request whose details you want to edit.

The **Payment Request** screen appears.

3. Click the **Edit** button in the **Payment Request** zone.

The **Payment Request** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the payment request. This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Payment Request Information	Displays information about the payment request.	Not applicable
Payment Request Type	Indicates the payment request type using which the payment request is created.	Not applicable
Payor Account Information	Used to indicate the payor account for which you want to create the payment request.  <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> On specify the account ID, additional information about the account appears corresponding to this field.</p> <p>The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Account Search</b> screen appears.</p> </div>	Yes
Payment Date	Used to specify the date when the payment was made.	Yes

- **Tender Details** - Used to specify the tender details in the payment request. This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Tender Type	Used to indicate the type of tender through which the payment was made.	Yes
Tender Amount	Used to specify the tender amount.	Yes
Currency	Used to indicate the currency in which the payment was made.	Yes
Check Number	Used to specify the check number if the payment is made through check.	No

Field Name	Field Description	Mandatory (Yes or No)
Auto Pay Route Type Code	Used to indicate when and how automatic payment request of the account is routed to a financial institution.  <b>Note:</b> This field appears only when you select a tender type where the <b>Generate Auto Pay</b> check box is selected.	Yes (Conditional)  <b>Note:</b> This field is required only when you select a tender type where the <b>Generate Auto Pay</b> check box is selected.
Schedule Extract Date	Displays the date when the automatic payment request is scheduled to be sent to a financial institution.  <b>Note:</b> This field appears only when you select a tender type where the <b>Generate Auto Pay</b> check box is selected.	Not applicable
Auto Pay Source Code	Used to indicate the financial institution that receives the automatic payment request.  <b>Note:</b> This field appears only when you select a tender type where the <b>Generate Auto Pay</b> check box is selected.	Yes (Conditional)  <b>Note:</b> This field is required only when you select a tender type where the <b>Generate Auto Pay</b> check box is selected.
Distribution and Freeze Date	Displays the date when the automatic payment must be distributed and frozen in the system.  <b>Note:</b> This field appears only when you select a tender type where the <b>Generate Auto Pay</b> check box is selected.	Not applicable
Account Number	Used to indicate the bank account number through which the automatic payment was made.  <b>Note:</b> This field appears only when you select a tender type where the <b>Generate Auto Pay</b> check box is selected.	Yes (Conditional)  <b>Note:</b> This field is required only when you select a tender type where the <b>Generate Auto Pay</b> check box is selected.
Expires On	Used to specify the date when the tender type will expire.  <b>Note:</b> This field appears only when you select a tender type where the <b>Generate Auto Pay</b> check box is selected.	No
Name	Used to specify the name of the person as maintained in the financial institution's system.  <b>Note:</b> This field appears only when you select a tender type where the <b>Generate Auto Pay</b> check box is selected.	No
MICR ID	Used to specify the MICR code on the payment.	No

Field Name	Field Description	Mandatory (Yes or No)
Ext. Reference ID	Used to specify the external reference number of the payment on the payment upload interface record.	No
Person ID	Used to indicate the person's account ID mentioned in the payment upload interface record.	No
Name	Used to indicate the person mentioned in the payment upload interface record.	No

**Note:** If the auto pay instructions are defined for the payor account, by default, the auto pay data appears in the **Auto Pay Route Type Code**, **Auto Pay Source Code**, **Account Number**, **Expires On**, and **Name** fields.

- **Characteristics** - Used to define characteristics for the payment tender. This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Type	Used to indicate the characteristic type. <b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Payment Tender</b> .	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the payment tender.
Characteristic Value	Used to specify the value for the characteristic type. <b>Note:</b> On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the payment tender.

- **Match Types** - Used to define match types for the payment request. This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Match Type	Used to indicate the match type using which you want to match the payment.	Yes
Show Default	Used to indicate whether the default payment amount should be displayed against the match type entities. <b>Note:</b> By default, the <b>Show Default</b> check box is selected when you select the match type.	No

Field Name	Field Description	Mandatory (Yes or No)
Entity	Indicates the match type entity. The valid values are: <ul style="list-style-type: none"> <li><b>Account</b> — Enables you to select the account whose unpaid bills, unpaid bill segments, settlement IDs, or contracts must be considered while matching the payment.</li> <li><b>Bill</b> — Enables you to select the unpaid bill against which you want to match the payment.</li> </ul>	Not applicable
Entity ID	Used to specify the account or bill ID depending on the match type entity.	Yes

**Note:** The **Edit** button appears only when the payment request is in the **Draft** status.

- Modify the details of the payment request, if required.

**Note:**

You can search for a payor account, auto pay route type, auto pay source, and entity by clicking the **Search**  icon corresponding to the respective field.

If you want to specify more than one match type within the payment request, click the **Add**  icon in the **Match Types** section and then specify the details. However, if you want to remove a match type from the payment request, click the **Delete**  icon corresponding to the match type.

You cannot edit an existing row in the **Match Types** section. If you want to edit the details of an existing row, you need to first remove the row and then add it again with the updated information.

- Define, edit, or remove characteristics from the payment request, if required.
- Click **Manual Distribution**.

The changes made to the payment request are saved. Depending on the information specified in the **Match Types** section, the entities are listed in the **Payment Distribution** zone. You can edit the payment amount against each entity, if required.

## Deleting a Payment Request

### **Procedure**

To delete a payment request:

1. Search for the payment request in the **Payment Request** screen.
2. In the **Search Results** section, click the link in the **Payment Request Information** column corresponding to the payment request that you want to delete.

The **Payment Request** screen appears.

3. Click the **Delete** button in the **Payment Request** zone.

A message appears confirming whether you want to delete the payment request.

**Note:** The **Delete** button appears only when the payment request is in the **Draft** status.

4. Click **OK**.

The payment request is deleted.

## **Distributing the Tender or Payment Amount**

### **Procedure**

To distribute the tender or payment amount:

1. Search for the payment request in the **Payment Request** screen.
2. In the **Search Results** section, click the link in the **Payment Request Information** column corresponding to the payment request whose tender or payment amount you want to distribute.

The **Payment Request** screen appears.

3. Click the **Distribute** button in the **Payment Request** zone.

The Defer algorithm attached to the payment request type using which you have created the payment request is triggered. This algorithm checks whether the number of payment distribution records in the payment request exceeds the payment count defined in the Defer algorithm. If the number of payment distribution records in the payment request does not exceed the payment count, the system distributes the tender or payment amount in real time (i.e. immediately). However, if the number of payment distribution records in the payment request exceeds the payment count, the system distributes the tender or payment amount in the deferred mode.

**Note:**

Number of payment distribution records = (Number of bill segments present in each bill fetched using the Bill Weighted, Bill Regular, and Bill match type algorithm) + (Number of bill segments fetched using the Bill Segment match type algorithm) + (Number of contracts fetched using the Suspense Contract match type algorithm) + (Number of settlements fetched using the Settlement match type algorithm)

Deferred mode means in the background when the **Payment Request Periodic Monitor (C1-PAYRQ)** batch is invoked. You can configure the **Payment Request Periodic Monitor (C1-PAYRQ)** batch such that it is executed at regular intervals. When the **Payment Request Periodic Monitor (C1-PAYRQ)** batch is invoked, the system checks whether there are any payment requests in the **Deferred Distribution** status. If there is a payment request in the **Deferred Distribution** status, the system distributes the tender or payment amount.

On distributing the tender amount, the payment event, payments, payment segments, and payment tenders are created. The payments are created in the **Freezable** status. If any error occurs while creating the payment, the payment is created in the **Error** status. If all payments of a payment event are in the **Freezable** status, the status of the payment event is set to **Balanced**. However, if any payment of a payment event is in the **Error** status, the status of the payment event is set to **Unbalanced**. On distributing the payment amount (during transfer), the new payments are created in the **Freezable** status. If any error occurs while creating the new payment, the payment is created in the **Error** status. The status of the payment event is set to **Unbalanced**. The old payments in the payment event that you want to transfer remains in the **Frozen** or **Error** status.

Once the tender or payment amount is successfully distributed, the status of the payment request is changed to **Distributed**.

**Note:**

The **Distribute** button appears only when the payment request is in the **Draft** status.

The sum of payment amount should be equal to the tender or transfer (payment) amount. Otherwise, the system will not allow you to distribute the tender or payment amount.

## **Distributing and Freezing the Tender or Payment Amount**

### **Procedure**

To distribute and freeze the tender or payment amount:

1. Search for the payment request in the **Payment Request** screen.
2. In the **Search Results** section, click the link in the **Payment Request Information** column corresponding to the payment request whose tender or payment amount you want to distribute and freeze.

The **Payment Request** screen appears.

3. Click the **Distribute And Freeze** button in the **Payment Request** zone.

The Defer algorithm attached to the payment request type using which you have created the payment request is triggered. This algorithm checks whether the number of payment distribution records in the payment request exceeds the payment count defined in the Defer algorithm. If the number of payment distribution records in the payment request does not exceed the payment count, the system distributes and freezes the tender or payment amount in real time (i.e. immediately). However, if the number of payment distribution records in the payment request exceeds the payment count, the system distributes and freezes the tender or payment amount in the deferred mode.

**Note:**

Number of payment distribution records = (Number of bill segments present in each bill fetched using the Bill Weighted, Bill Regular, and Bill match type algorithm) + (Number of bill segments fetched using the Bill Segment match type algorithm) + (Number of contracts fetched using the Suspense Contract match type algorithm) + (Number of settlements fetched using the Settlement match type algorithm)

Deferred mode means in the background when the **Payment Request Periodic Monitor (C1-PAYRQ)** batch is invoked. You can configure the **Payment Request Periodic Monitor (C1-PAYRQ)** batch such that it is executed at regular intervals. When the **Payment Request Periodic Monitor (C1-PAYRQ)** batch is invoked, the system checks whether there are any payment requests in the **Deferred Distribution** status. If there is a payment request in the **Deferred Distribution** status, the system distributes the tender or payment amount.

On distributing and freezing the tender amount, the payment event, payments, payment segments, and payment tenders are created. The payments are created in the **Frozen** status. If any error occurs while creating the payment, the payment is created in the **Error** status. If all payments of a payment event are in the **Frozen** status, the status of the payment event is set to **Balanced**. However, if any payment of a payment event is in the **Error** status, the status of the payment event is set to **Unbalanced**. On distributing the payment amount (during transfer), the new payments are created in the **Frozen** status. If any error occurs while creating the new payment, the payment is created in the **Error** status. The status of the payment event is set to **Unbalanced**. The old payments in the payment event that you want to transfer remains in the **Frozen** or **Error** status.

Once the tender or payment amount is successfully distributed and frozen, the status of the payment request is changed to **Processed**.

**Note:**

The **Distribute And Freeze** button appears only when the payment request is in the **Draft** status.

The sum of payment amount should be equal to the tender or transfer (payment) amount. Otherwise, the system will not allow you to distribute the tender or payment amount.

**Redistributing the Tender or Payment Amount****Procedure**

To redistribute the tender or payment amount:

1. Search for the payment request in the **Payment Request** screen.
2. In the **Search Results** section, click the link in the **Payment Request Information** column corresponding to the payment request whose tender or payment amount you want to redistribute.

The **Payment Request** screen appears.

3. In the **Payment Distribution** zone, click the **Redistribute** button in the **Redistribute** column corresponding to the payment distribution whose tender or payment amount you want to redistribute.

The required payment gets redistributed among the account's contracts.

**Note:** The **Redistribute** button appears only when the payment status is in **Incomplete, Error, or Freezable** status.

## Editing the Payment Segment Amount

Before you freeze the payments, the system allows you to edit the pay segment amount of the payments which are in the **Freezable** status. You can edit the amount only when there are multiple pay segments in a payment.

### Procedure

To edit the payment segment amount:

1. Search for the payment request in the **Payment Request** screen.
2. In the **Search Results** section, click the link in the **Payment Request Information** column corresponding to the payment request whose details you want to edit.

The **Payment Request** screen appears.

3. Click the **Detail** button in the **Payment Distribution** zone.

The **Edit Payment Segment Amount** screen appears. It contains the following fields:

Field Name	Field Description
Payment Event Information	Displays information about the payment event which is created through the payment request.
Payment Information	Displays information about the payment which is created through the payment event.
Payee Account Information	Displays information about the account for which the payment is made.
Match Value	Displays information about the entity against which the payment is matched.
Payment Amount	Displays the total payment amount.
Running Total	Displays the sum of payment amount specified against each pay segment.
Running Balance	Displays the difference between total payment amount and running total. The running balance is highlighted in the red color when the difference amount is non-zero.

In addition, this section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Sr No	Indicates the sequence number of the pay segment.	Not applicable

Column Name	Column Description	Mandatory (Yes or No)
Entity Information	Displays information about the entity (such as bill segment or contract) against which the pay segment is created.	Not applicable
Total Amount	Displays the entity amount. If the pay segment is created against a contract, the system considers all bill segments of the bill which are created against the contract and calculates the total bill segment amount.	Not applicable
Unpaid Amount	Displays the amount which is eligible for payment. If the pay segment is created against a contract, the system considers all bill segments of the bill which are created against the contract and calculates the total unpaid bill segment amount.	Not applicable
Payment Amount	Used to specify the payment amount that you want to distribute against the pay segment.  <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This field is non-editable when:</p> <ul style="list-style-type: none"> <li>• There is only one pay segment in a payment.</li> <li>• A user with the approval To Do role is reviewing the pay segment amount.</li> </ul> </div>	Yes
Payment Currency	Indicates the currency in which the payment was made.	Not applicable
Pay Segment ID	Displays the pay segment ID.	Not applicable

**Note:**

The **Detail** button appears in the **Detail** column only when:

- The payment request is in the **Distributed** or **Approval In Progress** status
- The payment is in the **Freezable** status.

Pagination is used to display limited number of records in the **Edit Payment Segment Amount** screen. You can change the number of records displayed per page, if required. You can use the navigation buttons, such as **First** () , **Previous** () , **Next** () , and **Last** () to navigate between pages. You can also select the page to which you want to navigate from the **Go To** list.

4. Modify the payment amount against a pay segment, if required.

**Note:** The sum of payment segment amount should be equal to the payment amount.

5. Click **Redistribute**.

The payment amount is redistributed among the pay segments.

**Note:** The **Redistribute** button is disabled when the **Payment Amount** field is non-editable.

6. Click **Close**.

## Freezing Payments Created Through a Payment Request

### Procedure

To freeze the payments created through a payment request:

1. Search for the payment request in the **Payment Request** screen.
2. In the **Search Results** section, click the link in the **Payment Request Information** column corresponding to the payment request whose payments you want to freeze.

The **Payment Request** screen appears.

3. If required, you can edit the amount of a payment segment before freezing the payments.
4. Click the **Freeze** button in the **Payment Request** zone.

The system behaves in the following manner:

If you are...	Then
Freezing the payments created through a payment creation request	The status of the payments which are in the <b>Freezable</b> status is changed to <b>Frozen</b> . In addition, the status of the payment request is changed to <b>Processed</b> .
Freezing the payments created through a payment transfer request	The status of the old payments which are in the <b>Frozen</b> status is changed to <b>Cancelled</b> . The old payments which are in the <b>Error</b> status are deleted. The status of the new payments which are in the <b>Freezable</b> status is changed to <b>Frozen</b> . The status of the payment event is changed to <b>Balanced</b> when there are no new payments in the <b>Error</b> status. In addition, the status of the payment request is changed to <b>Processed</b> .

### Note:

The **Freeze** button appears only when:

- The payment request is in the **Distributed** status.
- The **Approval Required** check box is not selected in the payment request type using which the payment request is created.

For each payment, ensure that the sum of payment segment amount is equal to the payment amount. Otherwise, the system will not allow you to freeze the payments created through the payment request.

## Submitting a Payment Request for Approval

### Procedure

To submit a payment request for approval:

1. Search for the payment request in the **Payment Request** screen.
2. In the **Search Results** section, click the link in the **Payment Request Information** column corresponding to the payment request that you want to submit for approval.

The **Payment Request** screen appears.

3. If required, you can edit the amount of a payment segment before submitting the payment request for approval.
4. Click the **Submit for Approval** button in the **Payment Request** zone.

The status of the payment request is changed to **Approval In Progress**. A To Do is created using the **C1-PAYRQ** To Do type. Users having a To Do role to which the **C1-PAYRQ** To Do type is associated can view the To Do from the **To Do List** screen.

### **Note:**

The **Submit for Approval** button appears only when:

- The payment request is in the **Distributed** status.
- The **Approval Required** check box is selected in the payment request type using which the payment request is created.

For each payment, ensure that the sum of payment segment amount is equal to the payment amount. Otherwise, the system will not allow you to submit the payment request for approval.

## Approving a Payment Request

You can view the number of payment requests which are pending for approval in the **Payment Request** screen. The approver can review, and accordingly approve or reject the payment request based on the observations.

**Note:** The system will not allow you to approve or reject a payment request submitted by you.

### Procedure

To approve a payment request:

1. Do either of the following:

If you want to	Then
Approve a payment request through the <b>Payment Request</b> screen	<ol style="list-style-type: none"> <li>1. Search for the payment request in the <b>Payment Request</b> screen.</li> <li>2. In the <b>Search Results</b> section, click the link in the <b>Payment Request Information</b> column corresponding to the payment request which you want to review.</li> </ol>
Approve a payment request from the <b>To Do List</b> screen	<ol style="list-style-type: none"> <li>1. Click the <b>Menu</b> link in the <b>Application</b> toolbar. A list appears.</li> <li>2. From the <b>Main</b> menu, select <b>To Do</b> and then click <b>To Do List</b>. The <b>To Do Type for User Search</b> window appears.</li> <li>3. Enter <b>C1-PAYRQ</b> in the <b>To Do Type</b> field.</li> <li>4. Click the <b>Search</b> button corresponding to the <b>To Do Type</b> field. The <b>To Do List</b> screen appears.</li> <li>5. Select the <b>Open</b> option from the <b>Filter by</b> list to view all unassigned To Dos.</li> <li>6. Click the link in the <b>Message</b> column corresponding to the To Do of the payment request that you want to review.</li> </ol>

The **Payment Request** screen appears.

2. Review the payment request details.
3. Click the **Approve** button in the **Payment Request** zone.

The system behaves in the following manner:

If you are...	Then
Approving a payment creation request	The status of the payments which are in the <b>Freezable</b> status is changed to <b>Frozen</b> . In addition, the status of the payment request is changed to <b>Processed</b> .
Approving a payment transfer request	The status of the old payments which are in the <b>Frozen</b> status is changed to <b>Cancelled</b> . The old payments which are in the <b>Error</b> status are deleted. The status of the new payments which are in the <b>Freezable</b> status is changed to <b>Frozen</b> . The status of the payment event is changed to <b>Balanced</b> when there are no new payments in the <b>Error</b> status. In addition, the status of the payment request is changed to <b>Processed</b> .

**Note:** The **Approve** button appears only when:

- The payment request is in the **Approval In Progress** status.
- A user with the approval To Do role is reviewing the payment request.

## **Rejecting a Payment Request**

### **Prerequisites**

To reject a payment request, you should have:

- Rejection reasons defined in the application

### **Note:**

While rejecting a payment request, you need to specify the reason why you want to reject the payment request. If you are rejecting a payment creation request, you can select the appropriate rejection reason only when you have defined the reasons for the **Rejected** status of the **C1-PaymentRequest** business object in the **Status Reason** screen. However, if you are rejecting a payment transfer request, you can select the appropriate rejection reason only when you have defined the reasons for the **Rejected** status of the **C1-PaymentTransferRequest** business object in the **Status Reason** screen.

The system will not allow you to approve or reject a payment request submitted by you.

### **Procedure**

To reject a payment request:

1. Do either of the following:

<b>If you want to...</b>	<b>Then...</b>
Reject a payment request through the <b>Payment Request</b> screen	<ol style="list-style-type: none"> <li>1. Search for the payment request in the <b>Payment Request</b> screen.</li> <li>2. In the <b>Search Results</b> section, click the link in the <b>Payment Request Information</b> column corresponding to the payment request which you want to review.</li> </ol>
Reject a payment request from the <b>To Do List</b> screen	<ol style="list-style-type: none"> <li>1. Click the <b>Menu</b> link in the <b>Application</b> toolbar. A list appears.</li> <li>2. From the <b>Main</b> menu, select <b>To Do</b> and then click <b>To Do List</b>.</li> </ol>

If you want to...	Then...
	<p>The <b>To Do Type for User Search</b> window appears.</p> <ol style="list-style-type: none"> <li>Enter <b>C1-PAYRQ</b> in the <b>To Do Type</b> field.</li> <li>Click the <b>Search</b> button corresponding to the <b>To Do Type</b> field.</li> </ol> <p>The <b>To Do List</b> screen appears.</p> <ol style="list-style-type: none"> <li>Select the <b>Open</b> option from the <b>Filter by</b> list to view all unassigned To Dos.</li> <li>Click the link in the <b>Message</b> column corresponding to the To Do of the payment request that you want to review.</li> </ol>

The **Payment Request** screen appears.

- Review the payment request details.
- If required, you can review the payment segment amount of each payment by clicking the **Detail** button in the **Detail** column corresponding to the payment in the **Payment Distribution** zone.
- Click the **Reject** button in the **Payment Request** zone.

The **Status Reason** window appears. It contains following fields:

Field Name	Field Description	Mandatory (Yes or No)
Status Reason	Used to indicate the reason why you want to reject the payment request.	Yes

**Note:** The **Reject** button appears only when:

- The payment request is in the **Approval In Progress** status.
- A user with the approval To Do role is reviewing the payment request.

- Select the rejection reason from the **Status Reason** list.
- Click **Save**.

If the approver rejects a payment creation request, the payment event, payments, payment segments, and payment tender which are created through the payment creation request are deleted. However, if the approver rejects a payment transfer request, the new payments which are created through the payment transfer request are deleted. In addition, the status of the payment creation or transfer request is changed to **Rejected**.

### Related Topics

For more information on...	See...
How to search for a payment request	<a href="#">Searching for a Payment Request</a> on page 1276
<b>Payment Request</b> screen	<a href="#">Payment Request (Used for Viewing)</a> on page 1278
<b>Payment Request</b> zone	<a href="#">Payment Request</a> on page 1278

## Discarding a Payment Request

1. Search for the payment request in the **Payment Request** screen.
2. In the **Search Results** section, click the link in the **Payment Request Information** column corresponding to the payment request which you want to discard.
3. Click the **Discard** button in the **Payment Request** zone.

### Note:

The **Discard** button appears only when the payment request is in **Distributed** status.

If the approver discards a payment creation request, the payment event, payments, payment segments, and payment tender which are created through the payment creation request are deleted. However, if the approver discards a payment transfer request, the new payments which are created through the payment transfer request are deleted. In addition, the status of the payment creation or transfer request is changed to **Discarded**.

Discarding a payment request is similar to rejecting a payment request. However, you can only reject a payment request, when approval workflow is on while creating a payment request but discarding a payment request can be done in both the cases, when the approval workflow is on or off.

## Viewing the Log of a Payment Request

### Procedure

To view the log of a payment request:

1. Search for the payment request in the **Payment Request** screen.
2. In the **Search Results** section, click the link in the **Payment Request Information** column corresponding to the payment request whose log you want to view.

The **Payment Request** screen appears. It consists of the following tabs:

- **Main** – This tab contains the following two zones:
    - **Payment Request** – Displays the details of the payment request.
    - **Payment Distribution** – Lists the payment distribution records of the payment request.
  - **Log** – This tab lists the complete trail of actions performed on the payment request.
3. Click the **Log** tab.

The **Payment Request Log** zone in the **Log** tab contains the following columns:

Column Name	Column Description
Date/Time	Displays the date and time when the action was performed on the payment request.
Details	Displays the details about the action performed on the payment request.
User	Indicates the user who has performed the action on the payment request.
Log Type	Indicates the type of log.
Related Object	Indicates the object or entity which is generated when the action is performed on the payment request.
Status Reason	Indicates the reason why the payment request was rejected.

**Note:** You can manually add a log entry for the payment request by clicking the **Add Log Entry** link in the upper right corner of the **Payment Request Log** zone.

## Adding a Log Entry for a Payment Request

### Procedure

To add a log entry for a payment request:

1. Search for the payment request in the **Payment Request** screen.
2. In the **Search Results** section, click the link in the **Payment Request Information** column corresponding to the payment request whose log you want to edit.

The **Payment Request** screen appears. It consists of the following tabs:

- **Main** – This tab contains the following two zones:
  - **Payment Request** – Displays the details of the payment request.
  - **Payment Distribution** – Lists the payment distribution records of the payment request.
- **Log** – This tab lists the complete trail of actions performed on the payment request.

3. Click the **Log** tab.

The **Log** tab appears.

4. Click the **Add Log Entry** link in the upper right corner of the **Payment Request Log** zone.

The **Add Payment Request Log** window appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Payment Request Information	Displays information about the payment request.	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
Log Details	Used to specify additional comments on the payment request.	Yes

5. Enter the comments in the **Log Details** field.

6. Click **Save**.

The log entry is added in the **Payment Request Log** zone.

## **Payment Event Summary**

---

The **Payment Event Summary** screen allows you to search for a payment event using various search criteria. Through this screen, you can:

- View the payments created through a payment event
- View payment segments of a payment
- Transfer one or more payments of a payment event to another payee account
- Cancel a payment event
- Delete a payment event
- Cancel a payment of a payment event
- Delete a payment of a payment event
- Refund a payment which is matched against the suspense or excess credit contract

This screen consists of following zones:

- [Search Payment Event](#) on page 1310
- [Payments](#) on page 1313
- [Payment Segments](#) on page 1315

### **Search Payment Event**

The **Search Payment Event** zone allows you to search for a payment event using various search criteria. This zone contains the following two sections:

- **Search Criteria** — The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	<p>Used to indicate whether you want to search for a payment event using the payor, payment event, tender, or contract details. The valid values are:</p> <ul style="list-style-type: none"> <li>• Payor Account/Payment Event</li> <li>• Tender Details</li> <li>• Suspense/Excess Credit Contract</li> </ul> <p><b>Note:</b> By default, the <b>Payor Account/Payment Event</b> option is selected.</p>	Yes
Payment Event ID	<p>Used to search a particular payment event.</p> <p><b>Note:</b> This field appears only when you select the <b>Payor Account/Payment Event</b> option from the <b>Search By</b> list. The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Payment Event Search</b> window appears.</p>	No
Payor Account ID	<p>Used to search payment events which are created for a particular payor account.</p> <p><b>Note:</b> This field appears only when you select the <b>Payor Account/Payment Event</b> option from the <b>Search By</b> list. The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Account Search</b> window appears.</p>	No
Payor Name	<p>Used to search payment events which are created for a particular payor.</p> <p><b>Note:</b> This field appears only when you select the <b>Payor Account/Payment Event</b> option from the <b>Search By</b> list.</p>	No
Payment Date	<p>Used to search payment events which are created on a particular date.</p> <p><b>Note:</b> This field appears only when you select the <b>Payor Account/Payment Event</b> option from the <b>Search By</b> list.</p>	No
Tender Type	<p>Used to search payment events where a particular tender type is used.</p> <p><b>Note:</b> This field appears only when you select the <b>Tender Details</b> option from the <b>Search By</b> list.</p>	No

Field Name	Field Description	Mandatory (Yes or No)
Check Number	Used to search a payment event which includes payments made through a particular check.  <b>Note:</b> This field appears only when you select the <b>Tender Details</b> option from the <b>Search By</b> list.	No
MICR ID	Used to search payment events which include payments made with a particular MICR code.  <b>Note:</b> This field appears only when you select the <b>Tender Details</b> option from the <b>Search By</b> list.	No
Contract ID	Used to search payment events which include payments made against a particular suspense or excess credit contract.  <b>Note:</b> This field appears only when you select the <b>Suspense/ Excess Credit Contract</b> option from the <b>Search By</b> list. The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Contract Search</b> window appears.	No

**Note:** You must specify at least one search criterion while searching for a payment event.

- **Search Results** — On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Payment Event Information	Displays additional information about the payment event.  <b>Note:</b> It has a link. On clicking the link, the <b>Payment Event</b> screen appears where you can view the details of the respective payment event.
Transfer	On clicking the <b>Transfer</b> button, you can transfer all payments (which are in either <b>Frozen</b> and <b>Error</b> status) of the payment event to another payee account.  <b>Note:</b> The <b>Transfer</b> button appears only when: <ul style="list-style-type: none"> <li>• One or more payments of the payment event are in the <b>Frozen</b> or <b>Error</b> status.</li> <li>• There is no payment transfer request which is currently in progress for the payment event.</li> </ul>

Column Name	Column Description
Cancel	<p>On clicking the <b>Cancel</b> button, you can cancel all payments (which are in the <b>Frozen</b> status) of the payment event.</p> <p><b>Note:</b> The <b>Cancel</b> button appears only when:</p> <ul style="list-style-type: none"> <li>• One or more payments of the payment event are in the <b>Frozen</b> status.</li> <li>• One or more payments of the payment event are not in the <b>Freezable</b> or <b>Error</b> status.</li> <li>• There is no payment transfer request which is currently in progress for the payment event.</li> </ul>
Delete	<p>On clicking the <b>Delete</b> button, you can delete the payment event.</p> <p><b>Note:</b> The <b>Delete</b> button appears only when the payments of a payment event are in the <b>Freezable</b>, <b>Error</b> or <b>Incomplete</b> status.</p>
Additional Information	Displays information about the status of the payment event.
Payment Date	Displays the date when the payment was made.
Payor Name	<p>Indicates the person who has made the payment.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Person</b> screen appears where you can view the details of the respective person.</p>
Payor Account ID	<p>Indicates the account which made the payment.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account.</p>
Tender Amount	Displays the tender amount.
Payment Event ID	Displays the payment event ID.

## Payments

The **Payments** zone lists all payments created through the payment event. This zone contains the following columns:

Column Name	Column Description
Payment ID	<p>Displays the payment ID.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Payment</b> screen appears with the details of the respective payment.</p>

Column Name	Column Description
Payee Account Information	<p>Displays information about the account for which the payment was made. In addition, this column has a context menu which helps in navigating to other screens in the application.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears with the details of the respective account.</p>
Payment Amount	Displays the amount paid through the tender.
Payment Currency	Indicates the currency in which the payment was made.
Payment Status	<p>Indicates the status of the payment. The valid values are:</p> <ul style="list-style-type: none"> <li>• Incomplete</li> <li>• Error</li> <li>• Freezable</li> <li>• Frozen</li> <li>• Canceled</li> </ul>
Match Type	Indicates the match type using which the payment was matched.
Match Value	Indicates the entity (such as bill, bill segment, or contract) against which the payment was matched.
Error Message	Indicates the reason why the payment is in the <b>Error</b> status.
Payor Account ID	Indicates the account which made the payment.
Refund Amount	Displays the amount which is already refunded to the payor account.

In addition, this zone contains the following buttons:

Button Name	Button Description
Transfer	<p>Used to transfer the payment to another payee account.</p> <p><b>Note:</b> You can transfer a payment only when it is in the <b>Frozen</b> or <b>Error</b> status.</p>
Cancel	<p>Used to cancel the payment.</p> <p><b>Note:</b> You can cancel a payment only when it is in the <b>Frozen</b> status.</p>
Delete	<p>Used to delete the payment.</p> <p><b>Note:</b> You can delete a payment only when it is in the <b>Freezable</b> or <b>Error</b> status.</p>
Refund	<p>Used to refund the payment amount to the payor account.</p> <p><b>Note:</b> You can refund the payment amount to the payor account only when:</p> <ul style="list-style-type: none"> <li>• The payment is matched against the suspense or excess credit contract.</li> <li>• The payment is in the <b>Frozen</b> status.</li> </ul>

## Payment Segments

The **Payment Segments** zone lists payment segments of a payment. This zone contains the following columns:

Column Name	Column Description
Pay Segment ID	Displays the payment segment ID. <b>Note:</b> It has a link. On clicking the link, the <b>Pay Segments</b> tab of the <b>Payment</b> screen appears where you view the details of the payment segment.
Contract Information	Displays information about the contract against which the payment segment is created. In addition, this column has a context menu which helps in navigating to other screens in the application. <b>Note:</b> It has a link. On clicking the link, the <b>Contract</b> screen appears where you can view the details of the respective contract.
Payment Amount	Displays the payment segment amount.
Match Event ID	Indicates the match event which is created for the payment segment. <b>Note:</b> It has a link. On clicking the link, the <b>Match Event</b> screen appears where you can view the details of the respective match event.

## Searching for a Payment Event

### Prerequisites

To search for a payment event, you should have:

- Tender types defined in the application

### Procedure

To search for a payment event:

1. Click the **Menu** link in the **Actions/Navigation** area.  
A list appears.
2. Select the **Main Menu** option from the list.

- From the **Main Menu**, select **Financial** and then click **Payment Event Summary**.

The **Payment Event Summary** screen appears.

- Enter the search criteria in the **Search Payment Event** zone.

**Note:**

You can search for a payment event and payor account by clicking the **Search**  icon corresponding to the respective field.

ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

- Click **Search**.

A list of payment events that meet the search criteria appears in the **Search Results** section.

## Creating a Payment Transfer Request

The system allows you to transfer payments through a payment request. You can transfer all payments or individual payment of a payment event. You can only transfer payments which are in the **Frozen** or **Error** status.

### Prerequisites

To create a payment transfer request, you should have:

- Payment request types defined in the application (where the **Transfer** check box is selected)
- Payment cancel reasons defined in the application (where the **Payment Transfer** check box is selected)

### Procedure

To create a payment transfer request:

- Search for the payment event (whose payments you want to transfer) in the **Payment Event Summary** screen.
- Do either of the following:

If you want to...	Then...
Transfer all payments of a payment event	<ol style="list-style-type: none"> <li>In the <b>Search Results</b> section, click the <b>Transfer</b> button in the <b>Transfer</b> column corresponding to the payment event whose payments you want to transfer.</li> </ol>

If you want to...	Then...
	<p><b>Note:</b> The <b>Transfer</b> button appears only when:</p> <ul style="list-style-type: none"> <li>• One or more payments of the payment event are in the <b>Frozen</b> or <b>Error</b> status.</li> <li>• There is no payment transfer request which is currently in progress for the payment event.</li> </ul>
Transfer one or more payments of a payment event	<ol style="list-style-type: none"> <li>1. In the <b>Search Results</b> section, click the <b>Broadcast</b>  icon corresponding to the payment event whose payments you want to view.  The <b>Payments</b> zone appears.</li> <li>2. Select the check box corresponding to the payments that you want to transfer.</li> <li>3. Click the <b>Transfer</b> button in the <b>Payments</b> zone.</li> </ol> <p><b>Note:</b> You can transfer a payment only when it is in the <b>Frozen</b> or <b>Error</b> status.</p>

The **Select Payment Request Type** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Payment Request Type	Used to indicate the payment request type using which you want to create the payment request.  <b>Note:</b> The list includes only those payment request types where the <b>Transfer</b> check box is selected.	Yes

3. Select the required payment request type from the respective field.

4. Click **OK**.

- **Main** - Used to specify basic details about the payment request. This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Payment Request Type	Indicates the payment request type using which you want to create the payment request.	Not applicable
Payment Event Information	Displays information about the payment event whose payments you want to transfer.	Not applicable
Transfer Amount	Displays the total payment amount which you want to transfer.	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
Payment Date	Used to specify the date when the payment was transferred.  <b>Note:</b> By default, the current date appears in this field.	Yes
Transfer Reason	Used to indicate the reason why you want to transfer the payments.  <b>Note:</b> The list includes only those payment cancel reasons where the <b>Payment Transfer</b> check box is selected.	Yes

- **Payor Account Details** — This section contains the following columns:

Column Name	Column Description
Payor Account Information	Displays information about the payor's account whose payments you want to transfer.

- **Payment Details** — This section contains the following columns:

Column Name	Column Description
Payment(s)	Displays information about the payment that you want to transfer.

- **Match Types** - Used to define match types for the payment request. This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Match Type	Used to indicate the match type using which you want to match the payment.	Yes
Show Default	Used to indicate whether the default payment amount should be displayed against the match type entities.  <b>Note:</b> By default, the <b>Show Default</b> check box is selected when you select the match type.	No
Entity	Indicates the match type entity. The valid values are: <ul style="list-style-type: none"> <li>• <b>Account</b> — Enables you to select the account whose unpaid bills, unpaid bill segments, settlement IDs, or contracts must be considered while matching the payment.</li> <li>• <b>Bill</b> — Enables you to select the unpaid bill against which you want to match the payment.</li> </ul>	Not applicable
Entity ID	Used to specify the account or bill ID depending on the match type entity.	Yes

5. Enter the required details.

**Note:**

You can search for an entity (such as account or bill) by clicking the **Search**  icon corresponding to the respective field.

If you want to specify more than one match type within the payment request, click the **Add**  icon in the **Match Types** section and then specify the details. However, if you want to remove a match type from the payment request, click the **Delete**  icon corresponding to the match type.

**6. Click Manual Distribution.**

The payment request is created and the status of the payment request is set to **Draft**. The **Payment Request** screen appears. Depending on the match type and match entity specified while creating the payment request, the following entities are listed in the **Payment Distribution** zone:

Match Type	Match Entity	Entities
By Bill Regular	Account	Unpaid bills of the account
By Bill Weighted	Account	Unpaid bills of the account
By Bill	Bill	Unpaid bill
By Bill Segments	Account	Unpaid bill segments
By Suspense Contract	Account	Contracts of the account <div data-bbox="852 949 1469 1348" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> Only contracts of the contract type where the <b>Eligible for Billing</b> flag is set to <b>No</b> and <b>Special Role</b> flag is set to <b>Suspense</b> are listed in the <b>Payment Distribution</b> zone. If no contracts with this specification exist for the account, the system checks whether there is any such contract type (where the <b>Eligible for Billing</b> flag is set to <b>No</b> and <b>Special Role</b> flag is set to <b>Suspense</b>) defined for the division to which the account belongs. If there is any such contract type defined for the division, the system creates the contract for the account using the respective contract type and the same is listed in <b>Payment Distribution</b> zone.</p> </div>
By Settlement	Account	Unpaid bill segments where the settlement account is stamped

If the **Show Default** check box is not selected against a match type while creating the payment request, the payment amount against the respective match type entities is set to zero. However, if the **Show Default** check box is selected against a match type, the payment amount appears against the respective match type entities. The transfer amount is divided among the entities in the sequence of match types (where **Show Default** check box is selected) followed by the sequence of bill, bill segment, or contract start date. You can then edit the payment amount, if required.

**Note:**

If a payment request is already created for a payee account and is currently in progress, the system will not allow you to create another payment request for the payee account until the previous payment request is in the **Processed** or **Rejected** status.

The system does not allow you to create a payment request for a payee account when the respective match type entities (such as unpaid bills, unpaid bill segments, contracts, or settlement IDs) do not exist for the payee account.

**Canceling a Payment Event****Prerequisites**

To cancel a payment event, you should have:

- Payment cancel reasons defined in the application

**Procedure**

To cancel a payment event:

1. Search for the payment event in the **Payment Event Summary** screen.
2. In the **Search Results** section, click the **Cancel** button in the **Cancel** column corresponding to the payment event that you want to cancel.

The **Cancel** window appears. It contains the following fields:

<b>Field Name</b>	<b>Field Description</b>	<b>Mandatory (Yes or No)</b>
Cancel Reason	Used to indicate the reason why you want to cancel the payment event.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Bank	Used to indicate the bank which should be charged for the cancellation.	Yes
Bank Account	Used to indicate the bank account which should be charged for the cancellation.	Yes

**Note:** The **Cancel** button appears only when:

- One or more payments of the payment event are in the **Frozen** status.
- One or more payments of the payment event are not in the **Freezable** or **Error** status.
- There is no payment transfer request which is currently in progress for the payment event.

3. Select the cancel reason, bank, and bank account from the respective fields.
4. Click **OK**.

The payment tender and all payments in the payment event are cancelled.

## Deleting a Payment Event

You can delete a payment event only when the payment(s) of the payment event are in the **Freezable**, **Error**, or **Incomplete** status. On deleting a payment event, the payment event, payments, payment segments, and payment tender are deleted.

#### Procedure

To delete a payment event:

1. Search for the payment event in the **Payment Event Summary** screen.
2. In the **Search Results** section, click the **Delete** button in the **Delete** column corresponding to the payment event that you want to delete.

A message appears confirming whether you want to delete the payment event.

**Note:** The **Delete** button appears only when the payments of a payment event are in the **Freezable**, **Error**, or **Incomplete** status.

3. Click **OK**.

The payment event is deleted.

# Chapter 22

---

## Account Receivable Central

---

### Topics:

- [Single Offset](#)
- [Mass Offset](#)
- [Cross Currency Offset](#)
- [Hold](#)
- [Refund](#)
- [Write Off](#)
- [Dispute](#)
- [Account Receivable Central](#)

The Account Receivable Central is a portal which facilitates user to perform Single/Mass/Cross Currency offset operation for a bill's outstanding amount with another bill or multiple bills. You can also refund/write off amount to the account using refund requests and write off requests respectively.

Account Receivable Central also enables to put bill(s) on hold for the funding purpose. It allows you to have a complete overview of the bills. Based on the search criteria, the system returns a list of bills that meet the search criteria.

Account Receivable Central is used for:

- **Single Offset** - Enables single debit bill to be offset against multiple credit bills in the same currency and vice versa.
- **Mass Offset** - Enables credit/debit bills to be offset against multiple debit and credit bills in the same currency.
- **Cross Currency Offset** - Enables single debit bills to be offset against multiple credit bills in currencies other than the bill selected for offset and vice versa.
- **Hold** - Enables bill(s) to be put on hold fully (the bill outstanding amount) or partially (the bill outstanding amount in partial) for a specific period for funding.
- **Refund** - Enables you to refund amount of credit bill or bill line item (credit bill segment or adjustment) to the account through a refund request.
- **Write Off** - Enables you to write off amount to the account through a write off request.
- **Dispute** - Enables you to dispute amount of credit/debit bill or bill item (credit/debit bill segment or adjustment) to the account through a dispute request.

The bill(s) for offsetting can belong to the same person or multiple persons depending upon the option **Allow Offsetting across Persons** set in the feature configuration **C1-OFFSETREQ** which allows offsetting in the system.

## Single Offset

Single Offset enables you to search and add bill to an offset request from the **Account Receivable Central** screen. Single Offset enables single debit bill to be offset against multiple credit bills in the same currency and vice versa. The offset request is created and an offset request ID is generated for the request.

You can search and select credit/debit bills (with outstanding amount) for offsetting belonging to the same or different person. All the selected bills with their outstanding balance are displayed. The display of bills is controlled by **C1-OFFSETREQ** feature configuration. The feature configuration identifies whether offsetting is allowed for bills across persons. To offset bills belonging to different persons, set the **Allow Offsetting Across Persons** option type to **Y**. The bills are displayed having same currency with the default offset amount on the offset request after adding the bills. You can select one or multiple or all the bills displayed and add to the offset request. After you add a debit bill from **Account Receivable Central**, you cannot add more debit bills to the offset request.

Upon adding a bill to the offset request, the default offset amount algorithm **C1-OFST-AMT** configured in the offset request type is invoked. The bills in the offset request are processed based on the logic of oldest bill first. The default offset amount is populated against the selected debit and credit bills. You can also edit the offset amount from the offset request, if required. The offset adjustments for offset requests are created and distributed based on the match type set in the offset distribution algorithm.

You can configure the offset request type to be submitted for offset distribution with or without approval. Upon submitting the offset request for approval, a To Do type is created and sent to the approver for offset request approval. The status of the offset request changes from **Submitted** to **Approval In Progress** in case of offset request with approval and in case of offset request without approval it changes to **Processed**. The approver can either approve or reject the offset request. Once the approver approves the offset request, selected bills are offset and adjustments are created for the bills. The status of the offset request changes from **Approval In Progress** to **Processed**. You can also view the details of the adjustment(s) created. However, if the approver rejects an offset request, a rejection reason should be provided.

A log maintained for offset requests logs complete trail of actions performed on offset request except the actions performed while editing the offset request. On submitting, the offset request status changes to **Processed** or **Approval In Progress** depending on the configuration of the offset request type and the **Unapply** button is enabled which cancels the adjustments. Upon cancelling the adjustments, the enter status algorithm cancels the offset adjustments and the status of the request changes to **Unapplied Offset**.

**Note:** The **Unapply** button appears only when the offset request is in the **Processed** status

Bill Information	Original Outstanding Amount	Offset Amount	Remaining Bill Balance	Comments
Bill 1	\$1200	—\$800	\$400	Bill 1 amount \$1200 is offset against Bill 2.
Bill 2	—\$1000	\$500	—\$500	From Bill 2, \$500 is offset against from Bill 1.
Bill 3	—\$300	\$300	0	From Bill 3, \$300 is offset against from Bill 1.

## Mass Offset

Mass offset functions is similar to single offset, the only difference is that mass offset enables credit/debit bills to be offset against multiple debit and credit bills in the same currency.

Upon selection of a debit/credit bill from **Account Receivable Central**, you can add more credit/debit bill(s) from the search bills result in offset request. You can filter the bills using the **Bill Type** filter on the bill search zone to select debit/credit bills to be added to the offset request. While offsetting the credit/debit amount across multiple bills, the oldest bill is offset first.

A log maintained for offset requests logs complete trail of actions performed on offset request. Once you submit the offset request, the offset request status changes to **Processed** or **Approval In Progress** depending on the configuration of the offset request type. When the offset request status changes to **Processed** adjustments are created and the **Unapply** button is enabled which cancels the adjustments. Upon unapplying the offset request, the enter status algorithm cancels the offset adjustments and the status of the request changes to **Unapplied Offset**.

Bill Information	Original Outstanding Amount	Offset Amount	Remaining Bill Balance	Comments
Bill 1	\$2000	—\$700	\$1300	The Offset amount \$400 is offset against Bill 2.
Bill 2	—\$400	\$400	0	Bill 2 is offset against \$400 from Bill Outstanding amount of Bill 1 i.e. \$2000.
Bill 3	—\$300	\$300	0	Bill 3 is offset against \$300 from Bill Outstanding amount of Bill 1 i.e. \$1600.

## Cross Currency Offset

Enables single debit bills to be offset against multiple credit bills in currencies other than the bill selected for offset and vice versa. Cross-currency offset enables you to offset credit/debit bills with different currencies. You can add credit/debit bills to the debit/credit bill added from **Account Receivable Central**. After you add a debit bill from **Account Receivable Central**, you cannot add more debit bills to the offset request. While offsetting the credit/debit amount across multiple bills, the oldest bill is offset first.

The **C1-OFFSUBENT** algorithm validates whether the sum of debit offset amount is equal to sum of credit offset amount for all bills selected in the offset request. After validation, status of the offset request changes to **Processed** or **Approval In Progress** depending on the configuration of the offset request type.

Bill Information	Outstanding Amount	Outstanding Amount (in Offset currency)	Offset Amount	Remaining Bill Balance	Comments
Bill 1	\$300	\$300	—\$130.1	\$169.9	Outstanding amount \$300 is offset against \$130.1 (£100). (Exchange rate: 1£=1.3\$)
Bill 2	—£100	—\$130.1	\$130.1	0	Outstanding amount £100 (\$130.1) of Bill 2 is offset against \$300 from Bill 1.

**Note:** In case of multiple exchange rates with same date and different timestamps, the latest timestamp is considered.

**Note:** The adjustments are created in the currency of the bill.

## Hold

Account Receivable Central enables bill(s) to be put on hold which belongs to a person's account or all accounts of a particular person. When a bill is put on hold, specific reason must be specified; no funding related activities can be performed for the specified period.

Funding related activities are put on hold from the start date of the hold request. The hold exists till the hold request release date; however you can also release individual bills.

You can only put bills on hold which has **Completed** status. When a person/account is on hold, all the subsequent bills under them are also on hold irrespective of bill status. You can select the bill amount in a bill to be put on hold i.e. you can put the particular bill on hold with partial or full bill amount.

Hold request type is used to define the hold request. In the hold request type, the **Hold Process** is set to **Funding**, which puts hold on only the funding activities of the selected bill belonging to a person or account.

## Refund

---

Enables you to refund amount of credit bill to account through a refund request. For creating a refund request you need to specify the refund request type using which you want to create the refund request. The refund request can be defined with (single level/multi-level) or without approval workflow. An approval profile should be defined for the approval workflow. While defining the refund request type, the adjustment type should be defined for creating refund adjustments.

## Write Off

---

Enables you to write off the amount to the account through a write off request. For creating a write off request you need to specify the write off request type. The write off request can be defined with (single level/multi-level) or without approval workflow. An approval profile should be defined for the approval workflow. While defining the write off request type, the adjustment type should be defined for creating write off adjustments.

## Dispute

---

Enables you to dispute amount of credit/debit bill to an account through a dispute request. For creating a dispute request you need to specify the dispute request type using which you want to create the dispute request. The dispute request can be defined with (single level/multi-level) or without approval workflow. An approval profile should be defined for the approval workflow. While defining the dispute request type, the adjustment type should be defined for creating dispute adjustments.

## Account Receivable Central

---

The **Account Receivable Central** screen allows you to search for bills using various search criteria. This screen consists of the following zones:

- [Search Bill](#) on page 1328

Through the **Account Receivable Central** screen, you can navigate to the following screens:

- [Offset Request \(Used for Viewing\)](#) on page 1379
- [Hold Request \(Used for Viewing\)](#) on page 1620
- [Refund Request](#) on page 1526
- [Write Off Request](#) on page 1559
- [Dispute Request \(Used for Viewing\)](#) on page 1940

## Search Bill

The **Search Bill** zone allows you to search for bills in the **Accounts Receivable Central** screen using various search criteria. This zone contains the following two sections:

- **Search Criteria** — The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	<p>Used to indicate whether you want to search bills using bill details, using account details or using person details whose account is linked to a particular bill. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Person Details</b></li> <li>• <b>Account Details</b></li> <li>• <b>Bill Details</b></li> </ul> <p><b>Note:</b> By default, the <b>Person Details</b> option is selected.</p>	Yes
Person ID	<p>Used to select the person ID based on which you want to search for bills of a person.</p> <p><b>Note:</b> This field appears only when you select the <b>Person Details</b> option from the <b>Search By</b> list. The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Account Search</b> window appears.</p>	No
Person Hierarchy	<p>Used to indicate whether to display hierarchy of the person linked to a particular bill.</p> <p><b>Note:</b> This field appears only when you select the <b>Person Details</b> option from the <b>Search By</b> list.</p>	No
Person Identifier Type	<p>Used to select the identifier type based on which you want to search for bills of a person.</p> <p><b>Note:</b> This field appears only when you select the <b>Person Details</b> option from the <b>Search By</b> list.</p>	Yes (Conditional)
Person Identifier	<p>Used to specify the value of the person identifier type.</p> <p><b>Note:</b> This field appears only when you select the <b>Person Details</b> option from the <b>Search By</b> list.</p>	Yes (Conditional)
Bills on Hold	<p>Used to indicate whether the bill is on hold. The valid values are:</p> <ul style="list-style-type: none"> <li>• No</li> <li>• Yes</li> </ul>	No

Field Name	Field Description	Mandatory (Yes or No)
Bill Balance	Used to search bills with a particular balance amount. The valid values are: <ul style="list-style-type: none"> <li>• Equal to Zero</li> <li>• Greater Than Zero</li> <li>• Less Than Zero</li> <li>• Not Equal to Zero</li> </ul>	No
Pending Bills	Used to indicate whether the bill is pending.	No
Account ID	Used to search for bills of a particular account. <b>Note:</b> This field appears only when you select the <b>Account Details</b> option from the <b>Search By</b> list.	No
Account Identifier Type	Used to specify the account identifier type of the account whose bill you want to search. <b>Note:</b> This field appears only when you select the <b>Account Details</b> option from the <b>Search By</b> list.	No
Account Identifier	Used to select the account identifier based on which you want to search for bills of a particular account. <b>Note:</b> This field appears only when you select the <b>Account Details</b> option from the <b>Search By</b> list.	No
Bill ID	Used to search a particular bill. <b>Note:</b> This field appears only when you select the <b>Bill Details</b> option from the <b>Search By</b> list.	No
Alternate Bill ID	Used to search a particular bill using the alternate bill ID. <b>Note:</b> This field appears only when you select the <b>Bill Details</b> option from the <b>Search By</b> list.	No
Invoice Currency	Used to search for bills which are billed in a particular currency. <b>Note:</b> This field appears only when you select the <b>Bill Details</b> option from the <b>Search By</b> list.	No
Bill Date From	Used to search bills which are created from a particular date onwards.	No
To	Used to search bills which are created till a particular date.	No
Bill Outstanding Amount From	Used to search bills with a particular minimum outstanding amount.	

Field Name	Field Description	Mandatory (Yes or No)
To	Used to search bills with a particular maximum outstanding amount.	

**Note:** You must specify at least one search criterion while searching for a bill when you select the **Person Details** or **Account Details** option from the **Search By** list.

- **Search Results** — On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Bill Information	Displays additional information about the bill. In addition, this column has a context menu which helps in navigating to other screens in the application. <b>Note:</b> It has a link. On clicking the link, the <b>Bill</b> screen appears with the details of the respective bill.
Original Bill Amount	Displays the bill amount when the bill was generated.
Outstanding Amount	Displays the current bill balance amount.
Bill Date	Used to specify the date on which the bill was generated.
Hold Amount	Displays the amount from the bill that is on hold.
Account Information	Displays additional information about the account. In addition, this column has a context menu which helps in navigating to other screens in the application. A tool tip appears when you hover over this column corresponding to the bill. It indicates the Current Balance, Excess Payment and Unapplied Payments and their values. <b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective bill.
Person Information	Displays additional information about the person. In addition, this column has a context menu which helps in navigating to other screens in the application. <b>Note:</b> It has a link. On clicking the link, the <b>Person</b> screen appears with the details of the respective bill.

This zone contains following buttons:

Button Name	Button Description
Single Offset	Used to add the selected bill with same currency to an offset request.
Mass Offset	Used to add the selected bills with same currency to an offset request.
Cross Currency Offset	Used to add the selected bills with different currency to an offset request.
Hold	Used to add the selected bill to hold request to be put on hold.
Write Off	Used to add the selected bill to a write off request.
Refund	Used to add the selected bill to a refund request.
Dispute	Used to add the selected bill to a dispute request.

## Bill Information

The **Bill Information** screen allows you to view detail information of a particular bill.

This screen consists of the following zones:

- [Hold Details](#) on page 1332
- [Offset Details](#) on page 1332
- [Garnishment Details](#) on page 1333
- [Bill Line Items](#) on page 1333

## Offset Details

The **Offset Details** zone displays details of the offset request. This zone contains following columns:

Column Name	Column Description
Offset Request Information	Displays additional information about the offset request. <b>Note:</b> It has a link. On clicking the link, the <b>Offset Request</b> screen appears where you can view the details of the respective offset request.
Offset Amount	Displays the total offset amount.
Creation Mode	Displays the mode of creation for offset request . The valid values are: <ul style="list-style-type: none"> <li>• Automatic</li> <li>• Manual</li> </ul>

## Hold Details

The **Hold Details** zone displays details of the hold request on a bill. This zone contains following columns:

Column Name	Column Description
Hold Request Information	Displays additional information about the hold request. <b>Note:</b> It has a link. On clicking the link, the <b>Hold Request</b> screen appears where you can view the details of the respective hold request.
Status	Indicates the status of the hold request.
Entity	Displays the type of entity.
Hold Entity	Displays additional information about the bill which is put on hold. <b>Note:</b> It has a link. On clicking the link, the <b>Bill</b> screen appears where you can view the details of the respective bill.
Start Date	Displays the start date of the hold request.
End Date	Displays the end date of the hold request.

## Garnishment Details

The **Garnishment Details** zone displays details garnishment details of the offset request. This zone contains following columns:

Column Name	Column Description
Garnishment Contract	Displays additional information about the contract created against the garnishment adjustments. In addition, this column has a context menu which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Contract</b> screen appears where you can view the details of the respective contract.
Garnishment Amount	Displays the total garnishment amount.

## Bill Line Items

The **Bill Line Items** zone displays information about the selected bill's bill line item. This zone contains the following fields:

Field Name	Field Description
Bill Line Item	Displays the bill line item (bill segment/adjustment) of the selected bills.
Bill Line Item Information	Displays the information about the bill line item.  <b>Note:</b> It has a link. On clicking the link, the <b>Bill Segment</b> screen or <b>Adjustments</b> screen appears with the details of the respective bill line item or adjustments.
Amount	Displays the amount of the bill line item.
Contract Information	Displays additional information about the contract against which the bill segment or adjustment is created. In addition, this column has a context menu which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Contract</b> screen appears where you can view the details of the respective contract.

## Searching for a Bill

### Procedure

To search for a bill:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Financial** and then click **Account Receivable Central**.  
The **Account Receivable Central** screen appears.

3. Enter the search criteria in the **Search Bill** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

**Note:** The wild card search for searching bill in the **Search Bill** zone is applicable only when you select the **Bill Details** option from the **Search By** list.

4. Click **Search**.

A list of bills that meet the search criteria appears in the **Search Results** section.

## Viewing the Bill Details

#### Procedure

To view the details of a bill:

1. Search for the bill in the **Account Receivable Central** screen.
2. In the **Search Results** section, click the **Show Context Menu** () icon corresponding to the bill whose details you want to view.  
A menu appears.
3. Click the **Go To Bill Information** menu option.  
The **Bill Information** screen appears.
4. View the details of the bills in the **Bill Information** screen.

## Offset Request

---

### Topics:

- [Single Offset](#)
- [Mass Offset](#)
- [Cross Currency Offset](#)
- [Prerequisites](#)
- [Offset Request \(Without Approval\) Status Transition](#)
- [Offset Request \(With Approval\) Status Transition](#)
- [Algorithms Used in C1-OffsetRequest](#)
- [Additional Algorithms Used in Offset Request](#)
- [Offset Request Type](#)
- [Offset Request \(Used for Searching\)](#)
- [Offset Request \(Used for Viewing\)](#)

Oracle Revenue Management and Billing allows you to offset the credit and debit bills across accounts of the person and/or its hierarchy. However, you can offset bills across person's hierarchy only when the **Allow Offsetting Across Persons** option type of the **C1-OFFSETREQ** feature configuration is set to **Y**.

You can offset a credit bill with a debit bill and vice-versa. You can offset one or more credit bills with one or more debit bills and vice-versa. You can offset the credit and debit bills in the same currency or in the different currencies. The system enables you to offset bills through an offset request. You can create an offset request from the following screens:

- [Account Receivable Central](#) on page 1328
- [Offset Request \(Used for Searching\)](#) on page 1372

You can create the following types of offset request from both the above screens:

- [Single Offset](#) on page 1337
- [Mass Offset](#) on page 1338
- [Cross Currency Offset](#) on page 1341

While creating an offset request, you need to specify an offset request type using which you want to create the offset request. It is the offset request type which helps the system to determine:

- The business object using which the offset request should be created in the system.
- The default adjustment type using which the transfer or offset adjustment should be created in the system.
- The algorithm which helps to calculate default offset amount when a bill is added to the offset request.
- Whether approval is required while offsetting bills through an offset request.
- Whether an offset request must be processed in the deferred mode or in real time (i.e. immediately)
- The maximum search period (in days) that you want to allow while searching bills in an offset request.
- Whether the transfer or offset adjustments should be created while offsetting bills through an offset request.

In addition, while creating an offset request, you need to specify a primary bill for which you want to create the offset request. A primary bill can be a debit

or credit bill. Once the primary bill is added to an offset request, you can never remove it from the offset request.

Once you specify an offset request type and primary bill, the offset request is created in the **Draft** status. You can then add one or more debit or credit bills in the same or different currencies to the offset request depending on whether you want to create single, mass, or cross currency offset request. These bills are called as secondary bills. You can remove a secondary bill from the offset request when it is in the **Draft** status.

Once both the debit and credit bills are added to an offset request, the default offset amount is calculated for each bill. You can then update the offset amount of a bill, if required. Once the offset amount is specified for each bill, you can submit the offset request. On submitting an offset request, the system checks whether the number of financial transactions created for the bills (which are selected in the offset request) exceeds the defer processing count (defined in the respective offset request type). If the number of financial transactions does not exceed the defer processing count, the system creates the transfer or offset adjustments in the **Frozen** status. However, if the number of financial transactions exceeds the defer processing count, the system changes the status of the offset request to **Deferred Processing**. On executing the **Offset Request Periodic Monitor (C1-OFSRQ)** batch, the system considers the offset requests which are in the **Deferred Processing** status. The batch then creates the transfer or offset adjustments for these offset requests in the **Frozen** status.

You can optionally configure the approval process for the offset request. The approver can either approve or reject an offset request based on the observations. The system also enables you to unapply (i.e. cancel) an offset request. On canceling an offset request, the transfer or offset adjustments created for bills through the offset request are canceled.

An offset request goes through various statuses in its lifecycle. For more information about the offset request statuses, see [Offset Request \(Without Approval\) Status Transition](#) on page 1344 and [Offset Request \(With Approval\) Status Transition](#) on page 1345. Note that the lifecycle of an offset request is driven by business object using which the offset request is created. An offset request business object named **C1-OffsetRequest** is shipped with the product. The offset request feature explained in this document is articulated based on the lifecycle and logic defined in the **C1-OffsetRequest** business object.

For more information on how to setup the offset request feature, see [Prerequisites](#) on page 1343.

## Single Offset

Single offset means you can offset one credit bill against multiple debit bills and vice-versa in the same currency. For example, the following bills are created for Garry Smith:

Account	Bill	Due Date	Bill Segment	Contract Type Priority	Bill Segment Amount	Outstanding Bill Amount	Hold Amount
A1	Bill 1	06-18-2018	BS1	10	-\$100	-\$100	-\$20
	Bill 2	06-12-2018	BS2	10	\$30	\$30 (This is because \$20 is already paid.)	\$10
			BS3	20	\$20		
	Bill 3	06-22-2018	BS4	10	\$30	\$30	\$10
	Bill 4	06-28-2018	BS5	20	\$30	\$40	-
			BS6	30	\$10		

The system enables you to offset these bills through a single offset request. While creating a single offset request, you can add the Bill 1 as the primary bill against which you can offset the debit bills – Bill 2, Bill 3, and Bill 4. Note that you can only add completed bills to an offset request. The system then calculates the total credit and debit bill amount which is available for offsetting, as shown below:

Sum of credit bills' amount which is available for offsetting:

$$(-\$100 - (-\$20)) = (-\$100 + \$20) = -\$80$$

Sum of debit bills' amount which is available for offsetting:

$$((\$30 - \$10) + (\$30 - \$10) + (\$40)) = \$80$$

The system considers the credit or debit bills' total whichever is less as the default offset amount. You can change the offset amount of a bill, if required. However, you need to ensure the following:

- Offset amount of the selected bill is not equal to zero
- Total debit offset amount is equal to total credit offset amount in the offset request
- Negative offset amount is specified for the debit bill and positive offset amount is specified for the credit bill
- Offset amount is less than or equal to the current outstanding amount of the bill

**Note:** If you add or remove a bill from the offset request after updating the offset amount, the system overrides the offset amount with the default offset amount. In such scenarios, you have to update the offset amount of the bills once again.

On submitting or approving a single offset request, the system creates the transfer or offset adjustments using the adjustment type which is specified in the offset request. If the **Transfer Adjustment** option is selected in the respective offset request type, the system creates the transfer adjustments in the **Frozen** status. Considering the above example, the system will create the following transfer adjustments for the offset request:

Transfer	Transfer Adjustments
1	<ul style="list-style-type: none"> <li>\$20 transfer adjustment is created for Bill 1 and matched to -\$100 bill segment cancellation (BS1) FT 1</li> <li>-\$20 transfer adjustment is created for Bill 2 and matched to \$30 bill segment (BS2) FT 2</li> </ul>
2	<ul style="list-style-type: none"> <li>\$20 transfer adjustment is created for Bill 1 and matched to -\$100 bill segment cancellation (BS1) FT 1</li> <li>-\$20 transfer adjustment is created for Bill 3 and matched to \$30 bill segment (BS4) FT 4</li> </ul>
3	<ul style="list-style-type: none"> <li>\$30 transfer adjustment is created for Bill 1 and matched to -\$100 bill segment cancellation (BS1) FT 1</li> <li>-\$30 transfer adjustment is created for Bill 4 and matched to \$30 bill segment (BS5) FT 5</li> </ul>
4	<ul style="list-style-type: none"> <li>\$10 transfer adjustment is created for Bill 1 and matched to -\$100 bill segment cancellation (BS1) FT 1</li> <li>-\$10 transfer adjustment is created for Bill 4 and matched to \$10 bill segment (BS6) FT 6</li> </ul>

However, if the **Transfer Adjustment** option is not selected in the respective offset request type, the system creates the offset adjustments in the **Frozen** status. Considering the above example, the system will create the following offset adjustments for the offset request:

- \$80 offset adjustment is created for Bill 1 and matched to -\$100 Bill Segment Cancellation (BS1) FT 1
- \$20 offset adjustment is created for Bill 2 and matched to \$30 bill segment (BS2) FT 2
- \$20 offset adjustment is created for Bill 3 and matched to \$30 bill segment (BS4) FT 4
- \$30 offset adjustment is created for Bill 4 and matched to \$30 bill segment (BS5) FT 5
- \$10 offset adjustment is created for Bill 4 and matched to \$10 bill segment (BS6) FT 6

Similarly, the transfer or offset adjustments are created when the bills are offset across accounts of the person and its hierarchy. The system distributes the amount from the credit bill starting with the oldest due date. For more information on how the offset amount is distributed, see [CI-OFST-DIST](#) on page 1349.

You can create a single offset request through the **Account Receivables Central** and **Offset Request** screens. For more information on how to create a single offset request, see [Creating an Offset Request](#) on page 1376.

## Mass Offset

Mass offset means you can offset one or more credit bills against one or more debit bills and vice-versa in the same currency. For example, the following bills are created for Juliet Hurd:

Account	Bill	Due Date	Bill Segment	Contract Type Priority	Bill Segment Amount	Outstanding Bill Amount	Hold Amount
A11	Bill 1	01-15-2019	BS1	10	-\$50	-\$100	-
			BS2	20	-\$50		

Account	Bill	Due Date	Bill Segment	Contract Type Priority	Bill Segment Amount	Outstanding Bill Amount	Hold Amount
	Bill 2	01-20-2019	BS3	10	-\$50	-\$50	-
	Bill 3	01-18-2019	BS4	10	\$30	\$50	-
			BS5	10	\$20		
A12	Bill 4	01-21-2019	BS6	10	\$30	\$30	-
	Bill 5	01-25-2019	BS7	20	\$30	\$40	-
			BS8	30	\$10		
A13	Bill 6	01-29-2019	BS9	10	\$20	\$20	-

The system enables you to offset these bills through a mass offset request. While creating a mass offset request, you can add the Bill 1 as the primary bill. Once the offset request is created, you can add another credit bill (i.e. Bill 2) and the debit bills – Bill 3, Bill 4, Bill 5, and Bill 6. Note that you can only add completed bills to an offset request. The system then calculates the total credit and debit bill amount which is available for offsetting, as shown below:

Sum of credit bills' amount which is available for offsetting:

$$(-\$100 + (-\$50)) = (-\$100 - \$50) = -\$150$$

Sum of debit bills' amount which is available for offsetting:

$$(\$50 + \$30 + \$40 + \$20) = \$140$$

The system considers the credit or debit bills' total whichever is less as the default offset amount. In this case, the default offset amount is set to \$140. You can change the offset amount of a bill, if required. However, you need to ensure the following:

- Offset amount of the selected bill is not equal to zero
- Total debit offset amount is equal to total credit offset amount in the offset request
- Negative offset amount is specified for the debit bill and positive offset amount is specified for the credit bill
- Offset amount is less than or equal to the current outstanding amount of the bill

**Note:** If you add or remove a bill from the offset request after updating the offset amount, the system overrides the offset amount with the default offset amount. In such scenarios, you have to update the offset amount of the bills once again.

On submitting or approving a mass offset request, the system creates the transfer or offset adjustments using the adjustment type which is specified in the offset request. If the **Transfer Adjustment** option is selected in the respective offset request type, the system creates the transfer adjustments in the **Frozen** status. Considering the above example, the system will create the following transfer adjustments for the offset request:

Transfer	Transfer Adjustments
1	<ul style="list-style-type: none"> <li>• \$30 transfer adjustment is created for Bill 1 and matched to -\$50 bill segment cancellation (BS1) FT 1</li> <li>• -\$30 transfer adjustment is created for Bill 3 and matched to \$30 bill segment (BS4) FT 4</li> </ul>

Transfer	Transfer Adjustments
2	<ul style="list-style-type: none"> <li>• \$20 transfer adjustment is created for Bill 1 and matched to -\$50 bill segment cancellation (BS1) FT 1</li> <li>• -\$20 transfer adjustment is created for Bill 3 and matched to \$20 bill segment (BS5) FT 5</li> </ul>
3	<ul style="list-style-type: none"> <li>• \$30 transfer adjustment is created for Bill 1 and matched to -\$50 bill segment cancellation (BS2) FT 2</li> <li>• -\$30 transfer adjustment is created for Bill 4 and matched to \$30 bill segment (BS6) FT 6</li> </ul>
4	<ul style="list-style-type: none"> <li>• \$20 transfer adjustment is created for Bill 1 and matched to -\$50 bill segment cancellation (BS2) FT 2</li> <li>• -\$20 transfer adjustment is created for Bill 5 and matched to \$30 bill segment (BS7) FT 7</li> </ul>
5	<ul style="list-style-type: none"> <li>• \$10 transfer adjustment is created for Bill 2 and matched to -\$50 bill segment cancellation (BS3) FT 3</li> <li>• -\$10 transfer adjustment is created for Bill 5 and matched to \$30 bill segment (BS7) FT 7</li> </ul>
6	<ul style="list-style-type: none"> <li>• \$10 transfer adjustment is created for Bill 2 and matched to -\$50 bill segment cancellation (BS3) FT 3</li> <li>• -\$10 transfer adjustment is created for Bill 5 and matched to \$10 bill segment (BS8) FT 8</li> </ul>
7	<ul style="list-style-type: none"> <li>• \$20 transfer adjustment is created for Bill 2 and matched to -\$50 bill segment cancellation (BS3) FT 3</li> <li>• -\$20 transfer adjustment is created for Bill 6 and matched to \$20 bill segment (BS9) FT 9</li> </ul>

However, if the **Transfer Adjustment** option is not selected in the respective offset request type, the system creates the offset adjustments in the **Frozen** status. Considering the above example, the system will create the following offset adjustments for the offset request:

- \$50 offset adjustment is created for Bill 1 and matched to -\$50 Bill Segment Cancellation (BS1) FT 1
- \$50 offset adjustment is created for Bill 1 and matched to -\$50 Bill Segment Cancellation (BS2) FT 2
- \$40 offset adjustment is created for Bill 2 and matched to -\$50 Bill Segment Cancellation (BS3) FT 3
- -\$30 offset adjustment is created for Bill 3 and matched to \$30 bill segment (BS4) FT 4
- -\$20 offset adjustment is created for Bill 3 and matched to \$20 bill segment (BS5) FT 5
- -\$30 offset adjustment is created for Bill 4 and matched to \$30 bill segment (BS6) FT 6
- -\$30 offset adjustment is created for Bill 5 and matched to \$30 bill segment (BS7) FT 7
- -\$10 offset adjustment is created for Bill 5 and matched to \$10 bill segment (BS8) FT 8
- -\$20 offset adjustment is created for Bill 6 and matched to \$20 bill segment (BS9) FT 9

Similarly, the transfer or offset adjustments are created when the bills are offset across accounts of the person hierarchy. The system distributes the amount from the credit bill starting with the oldest due date. For more information on how the offset amount is distributed, see [CI-OFST-DIST](#) on page 1349.

You can create a mass offset request through the **Account Receivables Central** and **Offset Request** screens. For more information on how to create a mass offset request, see [Creating an Offset Request](#) on page 1376.

## Cross Currency Offset

Cross currency offset means you can offset one credit bill against multiple debit bills and vice-versa in the different currencies. For example, the following bills are created for Mark Forbes:

Account	Bill	Due Date	Bill Segment	Contract Type Priority	Bill Segment Amount	Outstanding Bill Amount	Hold Amount
A1	Bill 1	09-18-2018	BS1	10	-\$250	-\$250	-
	Bill 2	09-12-2018	BS2	10	€10	€30	-
			BS3	20	€20		
	Bill 3	09-22-2018	BS4	10	€50	€50	-
	Bill 4	09-28-2018	BS5	20	€30	€70	-
			BS6	30	€40		

The system enables you to offset these bills through a cross currency offset request. While creating a cross currency offset request, you can add the Bill 1 as the primary bill against which you can offset the debit bills – Bill 2, Bill 3, and Bill 4. Note that you can only add completed bills to an offset request. In a cross currency offset request, you can offset the bills which are in the currency different from the primary bill. For example, if you have added a primary bill with credit balance in USD, you can only add the debit bills in the currency other than USD. The system then calculates the total credit and debit bill amount which is available for offsetting, as shown below:

Sum of credit bills' amount which is available for offsetting:

-\$250

Sum of credit bills' amount which is available for offsetting (in offset currency):

-€227

Sum of debit bills' amount which is available for offsetting:

(30€+50€+70€)=€150

Sum of debit bills' amount which is available for offsetting (in offset currency):

\$33+\$55+\$77=\$165

The system considers the credit or debit bills' total (in the primary bill's currency) whichever is less as the default offset amount. In this case, the default offset amount is set to \$165. You can change the offset amount of a bill, if required. However, you need to ensure the following:

- Offset amount of the selected bill is not equal to zero
- Total debit offset amount is equal to total credit offset amount in the offset request
- Negative offset amount is specified for the debit bill and positive offset amount is specified for the credit bill
- Offset amount is less than or equal to the current outstanding amount of the bill

**Note:** If you add or remove a bill from the offset request after updating the offset amount, the system overrides the offset amount with the default offset amount. In such scenarios, you have to update the offset amount of the bills once again.

On submitting or approving a cross currency offset request, the system creates the transfer or offset adjustments using the adjustment type which is specified in the offset request. If the **Transfer Adjustment** option is selected in the respective offset request type, the system creates the transfer adjustments in the **Frozen** status. Considering the above example, the system will create the following transfer adjustments for the offset request:

Transfer	Transfer Adjustments
1	<ul style="list-style-type: none"> <li>\$11 transfer adjustment is created for Bill 1 and matched to -\$250 bill segment cancellation (BS1) FT 1</li> <li>-€10 transfer adjustment is created for Bill 2 and matched to €10 bill segment (BS2) FT 2</li> </ul>
2	<ul style="list-style-type: none"> <li>\$22 transfer adjustment is created for Bill 1 and matched to -\$250 bill segment cancellation (BS1) FT 1</li> <li>-€20 transfer adjustment is created for Bill 2 and matched to €20 bill segment (BS3) FT 3</li> </ul>
3	<ul style="list-style-type: none"> <li>\$55 transfer adjustment is created for Bill 1 and matched to -\$250 bill segment cancellation (BS1) FT 1</li> <li>-€50 transfer adjustment is created for Bill 3 and matched to €50 bill segment (BS4) FT 4</li> </ul>
4	<ul style="list-style-type: none"> <li>\$33 transfer adjustment is created for Bill 1 and matched to -\$250 bill segment cancellation (BS1) FT 1</li> <li>-€30 transfer adjustment is created for Bill 4 and matched to €30 bill segment (BS5) FT 5</li> </ul>
5	<ul style="list-style-type: none"> <li>\$44 transfer adjustment is created for Bill 1 and matched to -\$250 bill segment cancellation (BS1) FT 1</li> <li>-€40 transfer adjustment is created for Bill 4 and matched to €40 bill segment (BS6) FT 6</li> </ul>

However, if the **Transfer Adjustment** option is not selected in the respective offset request type, the system creates the offset adjustments in the **Frozen** status. Considering the above example, the system will create the following offset adjustments for the offset request:

- \$165 offset adjustment is created for Bill 1 and matched to -\$250 Bill Segment Cancellation (BS1) FT 1
- €10 offset adjustment is created for Bill 2 and matched to €10 bill segment (BS2) FT 2
- €20 offset adjustment is created for Bill 2 and matched to €20 bill segment (BS3) FT 3
- €50 offset adjustment is created for Bill 3 and matched to €50 bill segment (BS4) FT 4
- €30 offset adjustment is created for Bill 4 and matched to €30 bill segment (BS5) FT 5
- €40 offset adjustment is created for Bill 4 and matched to €40 bill segment (BS6) FT 6

Similarly, the transfer or offset adjustments are created when the bills are offset across accounts of the person and its hierarchy. The system distributes the amount from the credit bill starting with the oldest due date. For more information on how the offset amount is distributed, see [C1-OFST-DIST](#) on page 1349.

To use the cross currency offset request feature, you need to do the following:

- Define the required exchange rates in the system.
- Define a currency conversion algorithm for bill segments using the **C1\_CURALGBS** or **C1\_EXCRTBS** algorithm type and attach it to the **Currency Conversion For Bill Segments** algorithm spot of the required divisions.

- Define a currency conversion algorithm for adjustments using the **C1\_CURALGAD** or **C1\_EXCRTAD** algorithm type and attach it to the **Currency Conversion For Adjustments** algorithm spot of the required divisions.

You can create a cross currency offset request through the **Account Receivables Central** and **Offset Request** screens. For more information on how to create a cross currency offset request, see [Creating an Offset Request](#) on page 1376.

## Prerequisites

---

To setup the offset request feature, you need to do the following:

- Define the required offset adjustment types where the **A/P Request Type Code** field is not set to **REFUND**.
- Define a default offset amount algorithm using the **C1-OFST-AMT** algorithm type.
- Assign the **C1-OFSRQ** To Do type to a To Do role whose users must receive a To Do while submitting an offset request for approval.
- Assign the **C1-OFSSB** To Do type to a To Do role whose users must not approve an offset request.
- Define the required offset request types in the system.
- Define the required characteristic types where the characteristic entity is set to **Offset Request Type**.
- Define the required characteristic types where the characteristic entity is set to **Offset Request**.
- Define the values for the **CAN\_RSN\_CD\_FLG** lookup field.
- Set the parameters of the **C1-UPD-FUND**, **C1-DFRUNAPLY**, **C1-WTBS-CRBL**, and **C1-OFST-DIST** algorithms.
- Define the status reasons for the **Rejected** and **Unapplied Offset** statuses of the **C1-OffsetRequest** business object in the **Status Reason** screen.
- Set the **Allow Offsetting Across Persons** option type of the **C1-OFFSETREQ** feature configuration.
- Define the required exchange rates in the system.
- Define a currency conversion algorithm for bill segments using the **C1\_CURALGBS** or **C1\_EXCRTBS** algorithm type.
- Attach a currency conversion algorithm to the **Currency Conversion For Bill Segments** algorithm spot of the required divisions.
- Define a currency conversion algorithm for adjustments using the **C1\_CURALGAD** or **C1\_EXCRTAD** algorithm type.
- Attach a currency conversion algorithm to the **Currency Conversion For Adjustments** algorithm spot of the required divisions.
- Set the batch control type of the **Offset Request Periodic Monitor (C1-OFSRQ)** batch to **Timed** and define the following attributes:
  - Time Interval
  - Timer Active
  - User ID
  - Batch Language
  - Email Address

For more information about the **Offset Request Periodic Monitor (C1-OFSRQ)** batch, see *Oracle Revenue Management and Billing Batch Guide*.

## C1-OFFST-INF

This algorithm generates the offset request information string which appears throughout the application. It concatenates the following fields separated by a comma in the specified order:

1. Offset Request Type Description
2. Offset Request Status Description
3. Offset Request ID

## F1-TODOCOMPL

This algorithm completes To Do entries that are created for the business object when the business object exits the given status. It finds and completes all open To Do entries where the business object's primary key is defined as a drill key. However, if the **Exclude To Do Entries From Auto Completion** characteristic is set to **Y** for the business object, the system does not automatically complete the respective To Do entry.

## C1-OFFSUBENT

This algorithm is invoked when you click the **Submit** button. It validates the following:

- Whether the outstanding amount of the selected bills is not zero
- Whether the selected bills are in the **Complete** status
- Whether the overridden offset amount of a bill is not zero
- Whether the sum of the debit bills' offset amount is equal to the sum of the credit bills' offset amount
- Whether at least one debit and credit bills are selected in the offset request

If the validation is successful, it checks whether the **Approval Required** option is selected in the respective offset request type. If the **Approval Required** option is selected in the respective offset request type, it changes the status of the offset request to **Approval In Progress**. However, if the **Approval Required** option is not selected in the respective offset request type, it checks whether the number of financial transactions created for the bills, which are selected in the offset request, exceeds the defer processing count. If the number of financial transactions does not exceed the defer processing count, the system changes the status of the offset request to **Creating Adjustment**. However, if the number of financial transactions exceeds the defer processing count, the system changes the status of the offset request to **Deferred Processing**.

## C1-OFFAPPENT

This algorithm is invoked when the status of the offset request is changed to **Approval In Progress**. It creates a To Do using the approval To Do type which is specified in the respective offset request type. Once a To Do is created, it is assigned to all users with the approval To Do role which is specified in the respective offset request type. In addition, it creates a log entry for the offset request when the To Do is created.

## C1-OFFAPPEXT

This algorithm checks whether the approver is associated with the approval To Do role which is specified in the respective offset request type. If so, it allows the approver to approve or reject the offset request. It also ensures that the submitter does not approve or reject the offset request.

## C1-OFSAPRENT

This algorithm is invoked when you click the **Approve** button. It checks whether the number of financial transactions created for the bills, which are selected in the offset request, exceeds the defer processing count. If the number of financial transactions does not exceed the defer processing count, the system changes the status of the offset request to **Creating Adjustment**. However, if the number of financial transactions exceeds the defer processing count, the system changes the status of the offset request to **Deferred Processing**.

## F1-AT-RQJ

This algorithm transitions the current status of the business object to the specified status. It contains the following parameters:

- **Next Status** – Used when you want to override the default next status specified in the lifecycle.
- **Next Transition Condition** – Used when you want to override the default next transition condition specified in the lifecycle.

At a time, you can specify value for either the **Next Status** or **Next Transition Condition** parameter. If you don't specify any value for these parameters, the system will transition the business object to the default next status specified in its lifecycle.

## C1-OFST-DIST

This algorithm is invoked when the status of the offset request is changed to **Creating Adjustment**. It creates offset adjustments using the adjustment type specified in the offset request and sets the status of the offset adjustments to **Frozen**. If the **Transfer Adjustment** option is selected in the respective offset request type, it creates transfer adjustments in the **Frozen** status.

This algorithm distributes the offset amount of a bill in the following manner:

1. **Internal Offsetting Within Each Bill** - This happens when a bill contains both debit and credit line items. The internal offsetting happens either at the bill segment or contract level depending on the value specified in the **Match Type Entity (Valid Values: BILL, BSEG, SA)** parameter. If the **Match Type Entity (Valid Values: BILL, BSEG, SA)** parameter is set to **BILL** or **SA**, the internal offsetting happens at the contract level. However, if the **Match Type Entity (Valid Values: BILL, BSEG, SA)** parameter is set to **BSEG**, the internal offsetting happens at the bill segment level. In the bill, the internal offsetting is done starting from a credit contract with highest payment priority against a debit contract with highest payment priority by creating transfer adjustments. This continues until the sum of credit or debit amount within a bill is exhausted.
2. **Offsetting Across Debit and Credit Bills** - This offsetting is always done from the credit bills to the debit bills with the objective to reduce the debit bill balance. This algorithm checks whether any match event is created for the bill. If so, it creates the offset adjustments against the bill using the existing match event. If there are no match events created for the bill, this algorithm creates match events using the value specified in the **Match Type Entity (Valid Values: BILL, BSEG, SA)** parameter. It distributes the amount from the credit bill starting with the oldest due date. This continues until the credit bill balance is exhausted.

It contains the following parameters:

- **Match Type** - Used to specify the match type using which you want to distribute the offset amount. You must specify a match type where the payment distribution override algorithm is attached.

**Note:** If a bill which is offset is partially paid using a match type, this algorithm uses the same match type for offset distribution. However, if no payment is received for a bill which is offset, this algorithm uses the match type which is specified in the **Match Type** parameter for offset distribution.

- **Match Type Entity (Valid Values: BILL, BSEG, SA)** - Used to indicate the entity, such as bill, bill segment, or contract, against which you want to create match event. It is used to create match events for bills which are unpaid. The valid values are:
  - **BILL** - Used when you want to stamp same match event on all financial transactions of the bill.
  - **BSEG** - Used when you want to stamp unique match event on each bill segment or adjustment financial transaction.
  - **SA** - Used when you want to stamp same match event on all financial transactions which are created for the same contract.
- **Credit Bill Distribution Algorithm** - Used to specify an algorithm which helps to create offset adjustments for a credit bill at the bill segment level. This parameter is required when the **Transfer Adjustment** option is not selected in the respective offset request type.

**Note:** The **C1-WTBS-CRBL** algorithm type is shipped with the product. You can attach an algorithm created using the **C1-WTBS-CRBL** algorithm type to the **Credit Bill Distribution Algorithm** parameter. For more information, see [C1-WTBS-CRBL](#) on page 1351.

## C1-UPD-HOLD

This algorithm updates the hold request whenever a bill on hold is offset through an offset request. If the remaining outstanding amount of a bill after offsetting is not zero and is less than the current hold amount, this algorithm updates the hold amount to the current hold amount plus remaining outstanding bill balance. For example, if the original outstanding amount is 80\$, hold amount is 40\$, offset amount is 20\$, then the remaining outstanding amount (i.e.  $80\$ - 40\$ - 20\$ = 20\$$ ) is less than the current hold amount (i.e. 40\$). Therefore, this algorithm updates the hold amount of the bill in the hold request to 60\$ (i.e.  $40\$ + 20\$$ ).

However, if the remaining outstanding amount of a bill after offsetting is zero and the bill is included in any active hold request, the hold end date of the bill in the hold request is changed to the system date.

In both the above scenarios, this algorithm creates a log entry for the offset and hold requests. The bill whose hold details (i.e. either hold amount or hold end date) are updated through the offset request is maintained in its log. Similarly, the old and updated hold amount and hold end date of the bill are maintained in the respective hold request log.

## C1-UPD-FUND

If a bill which is offset through an offset request is present in a funding request which is in the **Draft** status, this algorithm updates the funding amount of the bill in the funding request. If entire sum of the funding and garnishment amount of a bill is offset through the offset request, the bill is excluded from the funding request.

It contains the following parameter:

- **Funding Exclusion Reason Code** - Used to indicate the reason why you want to exclude the bill from the funding request. This parameter is mandatory while excluding a bill from a funding request. You must specify a value which is already defined in the **CAN\_RSN\_CD\_FLG** lookup field.

## C1-DFRUNAPLY

This algorithm is invoked when you click the **Unapply** button. It checks whether the number of transfer or offset adjustments created through the offset request exceeds the online record process limit defined in this algorithm. If the number of transfer or offset adjustments does not exceed the online record process limit, the system cancels the frozen transfer or offset adjustments immediately and then changes the status of the offset request to **Unapplied Offset**. However, if the number of transfer or offset adjustments exceeds the online record process limit, the system changes the status of the offset request to **Defer Unapplied**.

It contains the following parameter:

- **Online Record Process Limit** - Used to indicate the maximum number of transfer or offset adjustments you can process in the real time (i.e. immediately).

## C1-UNAPOFST

This algorithm is invoked when the **Offset Request Periodic Monitor (C1-OFSRQ)** batch is executed. It cancels all transfer or offset adjustments created through the offset request and then changes the status of the offset request to **Unapplied Offset**.

## C1-UPDT-FUND

Once the transfer or offset adjustments of a bill are canceled, it checks whether the bill is included in any funding request which is in the **Draft** status. If so, it updates the funding amount of the bill in the respective funding request.

## C1-WTBS-CRBL

THIS ALGORITHM IS ONLY USED IF YOU PRACTICE OPEN-ITEM ACCOUNTING AND THE ACCOUNT'S CUSTOMER CLASS INDICATES OPEN-ITEM ACCOUNTING IS PRACTICED.

This algorithm is used to offset the bill segments of a credit bill. It considers the bill segments of a credit bill for offsetting based on the following parameter:

- **Bill Segment Date Type** – Used to indicate whether the system should consider the bill segments of a credit bill based on the freeze date or coverage start date. The valid values are:
  - **F** – Used when you want to consider the bill segments of a credit bill based on the order of the freeze date.
  - **C** – Used when you want to consider the bill segments of a credit bill based on the order of the coverage start date. Note that you can use this option only when the coverage start date is stamped corresponding to the financial transactions in the **C1\_FT\_EXT** table.

It creates a unique match event for each bill segment and adjustment financial transaction.

## Additional Algorithms Used in Offset Request

---

Besides using the algorithms attached to the lifecycle, the system uses the following algorithms for the **Offset Request** feature:

- [C1-OFST-AMT](#) on page 1351
- [C1-WTBS-CRBL](#) on page 1351

## C1-OFST-AMT

This algorithm calculates the default offset amount whenever a bill is added to the offset request. The default offset amount is equal to the sum of outstanding amount of the debit or credit bills whichever is less. For example, if the following bills are added to the offset request:

- Bill 1 (-100\$) where due date is set to 01-01-2018
- Bill 2 (-100\$) where due date is set to 01-01-2019
- Bill 3 (25\$) where due date is set to 01-01-2018
- Bill 4 (25\$) where due date is set to 06-01-2018

In such case, the system sets the default offset amount of Bill 1 to 50\$.

**Note:** This algorithm does not calculate the default offset amount until both the debit and credit bills are added to the offset request.

## C1-WTBS-CRBL

THIS ALGORITHM IS ONLY USED IF YOU PRACTICE OPEN-ITEM ACCOUNTING AND THE ACCOUNT'S CUSTOMER CLASS INDICATES OPEN-ITEM ACCOUNTING IS PRACTICED.

This algorithm is used to offset the bill segments of a credit bill. It considers the bill segments of a credit bill for offsetting based on the following parameter:

- **Bill Segment Date Type** – Used to indicate whether the system should consider the bill segments of a credit bill based on the freeze date or coverage start date. The valid values are:
  - **F** – Used when you want to consider the bill segments of a credit bill based on the order of the freeze date.
  - **C** – Used when you want to consider the bill segments of a credit bill based on the order of the coverage start date. Note that you can use this option only when the coverage start date is stamped corresponding to the financial transactions in the **C1\_FT\_EXT** table.

It creates a unique match event for each bill segment and adjustment financial transaction.

## Offset Request Type

---

Oracle Revenue Management and Billing allows you to define an offset request type using which you can create an offset request. It is the offset request type which helps the system to determine the following:

- The business object using which the offset request should be created in the system.
- The default adjustment type using which the transfer or offset adjustments should be created in the system.
- The algorithm which helps to calculate default offset amount when a bill is added to the offset request.
- Whether approval is required while offsetting bills through an offset request.
- Whether an offset request must be processed in the deferred mode or in real time (i.e. immediately)
- The maximum search period (in days) that you want to allow while searching bills in an offset request.
- Whether transfer or offset adjustments should be created while offsetting bills through an offset request.

The **Offset Request Type** screen allows you to define, edit, delete, and copy an offset request type. It contains the following zones:

- [Offset Request Type List](#) on page 1352
- [Offset Request Type](#) on page 1353

### Offset Request Type List

The **Offset Request Type List** zone lists the offset request types that are already defined in the system. It contains the following columns:

Column Name	Column Description
Offset Request Type	Displays the offset request type.
Description	Displays the description of the offset request type.
Edit	On clicking the <b>Edit</b> (  ) icon, the <b>Offset Request Type</b> screen appears where you can edit the details of the offset request type.
Duplicate	On clicking the <b>Duplicate</b> (  ) icon, the <b>Offset Request Type</b> screen appears where you can define a new offset request type using an existing offset request type.

Column Name	Column Description
Delete	<p>On clicking the <b>Delete</b> (🗑️) icon, you can delete the offset request type.</p> <p><b>Note:</b> You can delete an offset request type only when an offset request is not created using the offset request type.</p>

On clicking the **Broadcast** (📡) icon corresponding to an offset request type, the **Offset Request Type** zone appears with the details of the respective offset request type.

How to edit an offset request type	<a href="#">Editing an Offset Request Type</a> on page 1361
How to copy an offset request type	<a href="#">Copying an Offset Request Type</a> on page 1367
How to delete an offset request type	<a href="#">Deleting an Offset Request Type</a> on page 1366
How to view the details of an offset request type	<a href="#">Viewing the Offset Request Type Details</a> on page 1371

## Offset Request Type

The **Offset Request Type** zone displays the details of the offset request type. It contains the following sections:

- **Main** - Displays basic information about the offset request type. It contains the following fields:

Field Name	Field Description
Offset Request Type	Displays the offset request type.
Description	Displays the description of the offset request type.
Offset Request Business Object	<p>Indicates the business object using which an offset request should be created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.</p>
Detailed Description	Displays additional information about the offset request type.
Status	<p>Indicates the status of the offset request type. The valid values are:</p> <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>
Adjustment Type	<p>Indicates the adjustment type using which the transfer or offset adjustments should be created.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Adjustment Type</b> screen appears where you can view the details of the respective adjustment type.</p>
Default Offset Amount Algorithm	<p>Indicates the algorithm using which the default offset amount should be calculated while adding a bill in an offset request.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Algorithm</b> screen appears where you can view the details of the respective algorithm.</p>

Field Name	Field Description
Defer Processing Count	Displays the count which helps to determine whether an offset request must be processed in the deferred mode (i.e. in the background) or in real time (i.e. immediately).
Approval Required	Indicates whether approval is required while offsetting bills through an offset request.
Approval To Do Type	Indicates that the To Do entry of the specified To Do type must be created when an offset request is submitted for approval.  <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> It has a link. On clicking the link, the <b>To Do Type</b> screen appears where you can view the details of the respective To Do Type. This field appears only when the <b>Approval Required</b> option is selected.</p> </div>
Approval To Do Role	Indicates that users with the specified To Do role can only approve an offset request which is submitted for approval.  <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> It has a link. On clicking the link, the <b>To Do Role</b> screen appears where you can view the details of the respective To Do Role. This field appears only when the <b>Approval Required</b> option is selected.</p> </div>
Submitter To Do Type	Indicates the submitter To Do type. At present, the submitter To Do type is not used to create To Do entry when the approver rejects an offset request. It is only used to fetch the roles associated with the submitter To Do type while defining or editing the offset request type.  <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> It has a link. On clicking the link, the <b>To Do Type</b> screen appears where you can view the details of the respective To Do type.</p> </div>
Submitter To Do Role	Indicates that users with the specified To Do role cannot approve an offset request which is submitted for approval.  <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> It has a link. On clicking the link, the <b>To Do Role</b> screen appears where you can view the details of the respective To Do role.</p> </div>
Bill Search Period	Displays the maximum search period (in days) which is allowed while searching bills in an offset request.
Transfer Adjustment	Indicates whether transfer adjustments should be created while offsetting bills through an offset request.

- **Characteristics** - Lists the characteristics defined for the offset request type. It contains the following columns:

Column Name	Column Description
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- **Record Actions** - This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the offset request type.
Delete	Used to delete the offset request type. <b>Note:</b> You can delete an offset request type only when an offset request is not created using the offset request type.
Duplicate	Used to create a new offset request type using an existing offset request type.

- **Record Information** - This section contains the following field:

Field Name	Field Description
Business Object	Indicates the business object using which the offset request type is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.

By default, the **Offset Request Type** zone does not appear in the **Offset Request Type** screen. It appears only when you click the **Broadcast**  icon corresponding to an offset request type in the **Offset Request Type List** zone.

## **Defining an Offset Request Type**

### **Prerequisites**

To define an offset request type, you should have:

- Offset request type business objects defined in the application
- Offset request business objects defined in the application
- Adjustment types defined in the application (where the **A/P Request Type Code** field is not set to **REFUND**)
- Default offset amount algorithm defined using the **C1-OFST-AMT** algorithm type
- Required To Do role assigned to the **C1-OFSRQ** and **C1-OFSSB** To Do types in the application
- Required match type entity specified in the **Match Type Entity (Valid Values: BILL, BSEG, SA)** parameter of the **C1-OFST-DIST** algorithm

### **Procedure**

To define an offset request type:

1. Click the **Admin** link in the **Application** toolbar.

A list appears.

- From the **Admin** menu, select **O** and then click **Offset Request Type**.

A sub-menu appears.

- Click the **Add** option from the **Offset Request Type** sub-menu.

The **Select Business Object** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Offset Request Type Business Object	Used to indicate the business object using which you want to create the offset request type.	Yes

**Tip:** Alternatively, you can access the **Select Business Object** screen by clicking the **Add** button in the **Page Title** area of the **Offset Request Type** screen.

**Note:** The **Select Business Object** screen appears only when there are multiple offset request type business objects defined in the application. If there is only one offset request type business object defined in the application, the **Offset Request Type** screen appears.

- Select the required offset request type business object from the respective field.
- Click **OK**.

The **Offset Request Type** screen appears. It contains the following sections:

- Main** - Used to specify basic details about the offset request type.
- Characteristics** - Used to define characteristics for the offset request type.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Offset Request Type	Used to specify the offset request type.	Yes
Business Object	Indicates the business object using which you are defining the offset request type.	Not applicable
Description	Used to specify the description for the offset request type.	Yes
Offset Request Business Object	Used to indicate the business object using which you want to create the respective offset request.	Yes
Detailed Description	Used to specify additional information about the offset request type.	No
Status	Used to indicate the status of the offset request type. The valid values are: <ul style="list-style-type: none"> <li>Active</li> <li>Inactive</li> </ul>	Yes

**Note:** You cannot change the status of an offset request type to **Inactive** when the corresponding offset request is in a status other than **Processed**, **Rejected**, or **Unapplied Offset**.

Field Name	Field Description	Mandatory (Yes or No)
Adjustment Type	<p>Used to indicate the adjustment type using which transfer or offset adjustments should be created. By default, the specified adjustment type appears when you create an offset request. You can then change the adjustment type, if required, while editing an offset request.</p> <div data-bbox="591 420 1198 800" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>The <b>Search</b>  icon appears corresponding to the <b>Adjustment Type</b> field. On clicking the <b>Search</b> icon, the <b>Adjustment Type Search</b> window appears.</p> <p>On specifying the adjustment type, the description of the adjustment type appears corresponding to the <b>Adjustment Type</b> field.</p> <p>You can only specify an adjustment type where the <b>A/P Request Type Code</b> field is not set to <b>REFUND</b>.</p> </div>	Yes
Default Offset Amount Algorithm	<p>Used to attach an algorithm using which you want to calculate default offset amount while adding a bill in an offset request.</p> <div data-bbox="591 940 1198 1346" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>The <b>Search</b>  icon appears corresponding to the <b>Default Offset Amount Algorithm</b> field. On clicking the <b>Search</b> icon, the <b>Algorithm Search</b> window appears.</p> <p>On specifying the algorithm, the description of the algorithm appears corresponding to the <b>Default Offset Amount Algorithm</b> field.</p> <p>You must specify an algorithm which is created using the <b>C1-OFST-AMT</b> algorithm type in the <b>Default Offset Amount Algorithm</b> field.</p> </div>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Defer Processing FT Count	<p>Used to indicate whether an offset request must be processed in the deferred mode or in real time (i.e. immediately). If the number of financial transactions created for the bills which are selected in the offset request exceeds the defer processing count, the system will process the offset request in the deferred mode. However, if the number of financial transactions created for the bills which are selected in the offset request does not exceed the defer processing count, the system will process the offset request in real time (i.e. immediately).</p> <div data-bbox="591 575 1198 1010" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>You cannot specify a negative value in this field.</p> <p>Deferred mode means in the background when the <b>Offset Request Periodic Monitor (C1-OFSRQ)</b> batch is invoked. You can configure the <b>Offset Request Periodic Monitor (C1-OFSRQ)</b> batch such that it is executed at regular intervals. For more information about the <b>Offset Request Periodic Monitor (C1-OFSRQ)</b> batch, refer to <i>Oracle Revenue Management and Billing Batch Guide</i>.</p> <p>If you set the defer processing count to zero (0), the system resets the default value to 50.</p> </div>	No
Approval Required	Used to indicate whether approval is required while offsetting bills through an offset request.	No
Approval To Do Type	<p>Used to indicate that To Do entry of the specified To Do type must be created when you submit an offset request for approval.</p> <div data-bbox="591 1230 1198 1724" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>The <b>Search</b>  icon appears corresponding to the <b>Approval To Do Type</b> field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.</p> <p>On specifying the To Do type, the description of the To Do type appears corresponding to the <b>Approval To Do Type</b> field.</p> <p>This field appears only when the <b>Approval Required</b> option is selected.</p> <p>The <b>C1-OFSRQ</b> To Do type is shipped with the product. You can use the <b>C1-OFSRQ</b> To Do type or a custom To Do type, if required.</p> </div>	<p>Yes (Conditional)</p> <div data-bbox="1219 1167 1463 1314" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This field is required when the <b>Approval Required</b> option is selected.</p> </div>

Field Name	Field Description	Mandatory (Yes or No)
Approval To Do Role	<p>Used to indicate that users with the specified To Do role can only approve an offset request submitted for approval.</p> <p><b>Note:</b> The list includes only those To Do roles which are associated with the approval To Do type. This field appears only when the <b>Approval Required</b> option is selected.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required when the <b>Approval Required</b> option is selected.</p>
Submitter To Do Type	<p>At present, the submitter To Do type is not used to create To Do entry when the approver rejects an offset request. It is only used to fetch the roles associated with the submitter To Do type.</p> <p><b>Note:</b> The <b>Search</b>  icon appears corresponding to the <b>Submitter To Do Type</b> field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears. On specifying the To Do type, the description of the To Do type appears corresponding to the <b>Submitter To Do Type</b> field. The <b>C1-OFSSB</b> To Do type is shipped with the product. You can use the <b>C1-OFSSB</b> To Do type or a custom To Do type, if required.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required when the <b>Approval Required</b> option is selected.</p>
Submitter To Do Role	<p>Used to indicate that users with the specified To Do role cannot approve an offset request submitted for approval.</p> <p><b>Note:</b> The list includes only those To Do roles which are associated with the submitter To Do type.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required when the <b>Approval Required</b> option is selected.</p>
Bill Search Period	<p>Used to specify the maximum search period (in days) that you want to allow while searching bills in an offset request.</p> <p><b>Note:</b> If you do not specify any value, by default, it is set to <b>30</b>.</p>	<p>No</p>

Field Name	Field Description	Mandatory (Yes or No)
Transfer Adjustment	<p>Used to indicate whether transfer adjustments should be created while offsetting bills through an offset request.</p> <p><b>Note:</b></p> <p>By default, the <b>Transfer Adjustment</b> option is selected. This impacts the system performance when the match type entity is set to <b>BSEG</b> and volume of bill segments in the selected bills is high. Alternatively, the system enables you to create offset adjustments while offsetting bills through an offset request whenever the volume of bill segments in the selected bills is high. To create the offset adjustments while offsetting bills through an offset request, you need to ensure that the <b>Transfer Adjustment</b> option is not selected in the respective offset request type.</p>	No

6. Enter the required details in the **Main** section.
7. Define characteristics for the offset request type, if required.
8. Click **Save**.

The offset request type is defined.

## Defining a Characteristic for an Offset Request Type

### Prerequisites

To define a characteristic for an offset request type, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Offset Request Type**).

### Procedure

To define a characteristic for an offset request type:

1. Ensure that the **Characteristics** section is expanded when you are defining, editing, or copying an offset request type.

The **Characteristics** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Type	Used to indicate the characteristic type.  <b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Offset Request Type</b> .	Yes (Conditional)  <b>Note:</b> This field is required when you are defining a characteristic for the offset request type.
Characteristic Value	Used to specify the value for the characteristic type.  <b>Note:</b> If you select a predefined characteristic type, the <b>Search</b>  icon appears corresponding to the <b>Characteristic Value</b> field. On clicking the <b>Search</b> icon, the <b>Predefined Characteristic Search</b> window appears.  On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	Yes (Conditional)  <b>Note:</b> This field is required when you are defining a characteristic for the offset request type.

- Enter the required details in the **Characteristics** section.
- If you want to define more than one characteristic for the offset request type, click the **Add**  icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from the offset request type, click the **Delete**  icon corresponding to the characteristic.

## Editing an Offset Request Type

### Prerequisites

To edit an offset request type, you should have:

- Offset request business objects defined in the application
- Adjustment types defined in the application (where the **A/P Request Type Code** field is not set to **REFUND**)
- Default offset amount algorithm defined using the **C1-OFST-AMT** algorithm type
- Required To Do role assigned to the **C1-OFSRQ** and **C1-OFSSB** To Do types in the application
- Required match type entity specified in the **Match Type Entity (Valid Values: BILL, BSEG, SA)** parameter of the **C1-OFST-DIST** algorithm

### Procedure

To edit an offset request type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **O** and then click **Offset Request Type**.  
A sub-menu appears.
3. Click the **Search** option from the **Offset Request Type** sub-menu.  
The **Offset Request Type** screen appears.
4. In the **Offset Request Type List** zone, click the **Edit** (✎) icon in the **Edit** column corresponding to the offset request type whose details you want to edit.

The **Offset Request Type** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the offset request type.
- **Characteristics** - Used to define characteristics for the offset request type.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Offset Request Type	Displays the offset request type.	Not applicable
Business Object	Indicates the business object which is used while defining the offset request type.	Not applicable
Description	Used to specify the description for the offset request type.	Yes
Offset Request Business Object	Used to indicate the business object using which you want to create the respective offset request.	Yes
Detailed Description	Used to specify additional information about the offset request type.	No
Status	Used to indicate the status of the offset request type. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> You cannot change the status of an offset request type to <b>Inactive</b> when the corresponding offset request is in a status other than <b>Processed</b>, <b>Rejected</b>, or <b>Unapplied Offset</b>.</p> </div>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Adjustment Type	<p>Used to indicate the adjustment type using which transfer or offset adjustments should be created. By default, the specified adjustment type appears when you create an offset request. You can then change the adjustment type, if required, while editing an offset request.</p> <div data-bbox="591 417 1198 800" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>The <b>Search</b>  icon appears corresponding to the <b>Adjustment Type</b> field. On clicking the <b>Search</b> icon, the <b>Adjustment Type Search</b> window appears.</p> <p>On specifying the adjustment type, the description of the adjustment type appears corresponding to the <b>Adjustment Type</b> field.</p> <p>You can only specify an adjustment type where the <b>A/P Request Type Code</b> field is not set to <b>REFUND</b>.</p> </div>	Yes
Default Offset Amount Algorithm	<p>Used to attach an algorithm using which you want to calculate default offset amount while adding a bill in an offset request.</p> <div data-bbox="591 936 1198 1346" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>The <b>Search</b>  icon appears corresponding to the <b>Default Offset Amount Algorithm</b> field. On clicking the <b>Search</b> icon, the <b>Algorithm Search</b> window appears.</p> <p>On specifying the algorithm, the description of the algorithm appears corresponding to the <b>Default Offset Amount Algorithm</b> field.</p> <p>You must specify an algorithm which is created using the <b>C1-OFST-AMT</b> algorithm type in the <b>Default Offset Amount Algorithm</b> field.</p> </div>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Defer Processing FT Count	<p>Used to indicate whether an offset request must be processed in the deferred mode or in real time (i.e. immediately). If the number of financial transactions created for the bills which are selected in the offset request exceeds the defer processing count, the system will process the offset request in the deferred mode. However, if the number of financial transactions created for the bills which are selected in the offset request does not exceed the defer processing count, the system will process the offset request in real time (i.e. immediately).</p> <div data-bbox="591 575 1198 1010" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>You cannot specify a negative value in this field.</p> <p>Deferred mode means in the background when the <b>Offset Request Periodic Monitor (C1-OFSRQ)</b> batch is invoked. You can configure the <b>Offset Request Periodic Monitor (C1-OFSRQ)</b> batch such that it is executed at regular intervals. For more information about the <b>Offset Request Periodic Monitor (C1-OFSRQ)</b> batch, refer to <i>Oracle Revenue Management and Billing Batch Guide</i>.</p> <p>If you set the defer processing count to zero (0), the system resets the default value to 50.</p> </div>	No
Approval Required	Used to indicate whether approval is required while offsetting bills through an offset request.	No
Approval To Do Type	<p>Used to indicate that To Do entry of the specified To Do type must be created when you submit an offset request for approval.</p> <div data-bbox="591 1230 1198 1724" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>The <b>Search</b>  icon appears corresponding to the <b>Approval To Do Type</b> field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.</p> <p>On specifying the To Do type, the description of the To Do type appears corresponding to the <b>Approval To Do Type</b> field.</p> <p>This field appears only when the <b>Approval Required</b> option is selected.</p> <p>The <b>C1-OFSRQ</b> To Do type is shipped with the product. You can use the <b>C1-OFSRQ</b> To Do type or a custom To Do type, if required.</p> </div>	<p>Yes (Conditional)</p> <div data-bbox="1219 1167 1463 1314" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This field is required when the <b>Approval Required</b> option is selected.</p> </div>

Field Name	Field Description	Mandatory (Yes or No)
Approval To Do Role	<p>Used to indicate that users with the specified To Do role can only approve an offset request submitted for approval.</p> <p><b>Note:</b> The list includes only those To Do roles which are associated with the approval To Do type. This field appears only when the <b>Approval Required</b> option is selected.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required when the <b>Approval Required</b> option is selected.</p>
Submitter To Do Type	<p>At present, the submitter To Do type is not used to create To Do entry when the approver rejects an offset request. It is only used to fetch the roles associated with the submitter To Do type.</p> <p><b>Note:</b> The <b>Search</b>  icon appears corresponding to the <b>Submitter To Do Type</b> field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears. On specifying the To Do type, the description of the To Do type appears corresponding to the <b>Submitter To Do Type</b> field. The <b>C1-OFSSB</b> To Do type is shipped with the product. You can use the <b>C1-OFSSB</b> To Do type or a custom To Do type, if required.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required when the <b>Approval Required</b> option is selected.</p>
Submitter To Do Role	<p>Used to indicate that users with the specified To Do role cannot approve an offset request submitted for approval.</p> <p><b>Note:</b> The list includes only those To Do roles which are associated with the submitter To Do type.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required when the <b>Approval Required</b> option is selected.</p>
Bill Search Period	<p>Used to specify the maximum search period (in days) that you want to allow while searching bills in an offset request.</p> <p><b>Note:</b> If you do not specify any value, by default, it is set to <b>30</b>.</p>	<p>No</p>

Field Name	Field Description	Mandatory (Yes or No)
Transfer Adjustment	Used to indicate whether transfer adjustments should be created while offsetting bills through an offset request.  <b>Note:</b> This impacts the system performance when the match type entity is set to <b>BSEG</b> and volume of bill segments in the selected bills is high. Alternatively, the system enables you to create offset adjustments while offsetting bills through an offset request whenever the volume of bill segments in the selected bills is high. To create the offset adjustments while offsetting bills through an offset request, you need to ensure that the <b>Transfer Adjustment</b> option is not selected in the respective offset request type.	No

**Tip:** Alternatively, you can access this screen by clicking the **Edit** button in the **Offset Request Type** zone.

5. Modify the required details in the **Main** section.
6. Define, edit, or remove characteristics from the offset request type, if required.
7. Click **Save**.

The changes made to the offset request type are saved.

## Deleting an Offset Request Type

### **Procedure**

To delete an offset request type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **O** and then click **Offset Request Type**.  
A sub-menu appears.
3. Click the **Search** option from the **Offset Request Type** sub-menu.  
The **Offset Request Type** screen appears.
4. In the **Offset Request Type List** zone, click the **Delete** (🗑) icon in the **Delete** column corresponding to the offset request type that you want to delete.  
A message appears confirming whether you want to delete the offset request type.

**Note:** You can delete an offset request type only when an offset request is not created using the offset request type.

**Tip:** Alternatively, you can delete an offset request type by clicking the **Delete** button in the **Offset Request Type** zone.

5. Click **OK**.

The offset request type is deleted.

## **Copying an Offset Request Type**

Instead of creating an offset request type from scratch, you can create a new offset request type using an existing offset request type. This is possible through copying an offset request type. On copying an offset request type, the details including the characteristics are copied to the new offset request type. You can then edit the details, if required.

### **Prerequisites**

To copy an offset request type, you should have:

- Offset request type (whose copy you want to create) defined in the application
- Offset request business objects defined in the application
- Adjustment types defined in the application (where the **A/P Request Type Code** field is not set to **REFUND**)
- Default offset amount algorithm defined using the **C1-OFST-AMT** algorithm type
- Required To Do role assigned to the **C1-OFSRQ** and **C1-OFSSB** To Do types in the application
- Required match type entity specified in the **Match Type Entity (Valid Values: BILL, BSEG, SA)** parameter of the **C1-OFST-DIST** algorithm

### **Procedure**

To copy an offset request type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **O** and then click **Offset Request Type**.  
A sub-menu appears.
3. Click the **Search** option from the **Offset Request Type** sub-menu.  
The **Offset Request Type** screen appears.
4. In the **Offset Request Type List** zone, click the **Duplicate** () icon in the **Duplicate** column corresponding to the offset request type whose copy you want to create.

The **Offset Request Type** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the offset request type.
- **Characteristics** - Used to define characteristics for the offset request type.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Offset Request Type	Used to specify the offset request type.	Yes
Business Object	Indicates the business object which is used while defining the offset request type.	Not applicable
Description	Used to specify the description for the offset request type.	Yes
Offset Request Business Object	Used to indicate the business object using which you want to create the respective offset request.	Yes
Detailed Description	Used to specify additional information about the offset request type.	No
Status	<p>Used to indicate the status of the offset request type. The valid values are:</p> <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul> <p><b>Note:</b> You cannot change the status of an offset request type to <b>Inactive</b> when the corresponding offset request is in a status other than <b>Processed, Rejected, or Unapplied Offset</b>.</p>	Yes
Adjustment Type	<p>Used to indicate the adjustment type using which transfer or offset adjustments should be created. By default, the specified adjustment type appears when you create an offset request. You can then change the adjustment type, if required, while editing an offset request.</p> <p><b>Note:</b></p> <p>The <b>Search</b>  icon appears corresponding to the <b>Adjustment Type</b> field. On clicking the <b>Search</b> icon, the <b>Adjustment Type Search</b> window appears.</p> <p>On specifying the adjustment type, the description of the adjustment type appears corresponding to the <b>Adjustment Type</b> field.</p> <p>You can only specify an adjustment type where the <b>A/P Request Type Code</b> field is not set to <b>REFUND</b>.</p>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Default Offset Amount Algorithm	<p>Used to attach an algorithm using which you want to calculate default offset amount while adding a bill in an offset request.</p> <div data-bbox="591 352 1198 764" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>The <b>Search</b>  icon appears corresponding to the <b>Default Offset Amount Algorithm</b> field. On clicking the <b>Search</b> icon, the <b>Algorithm Search</b> window appears.</p> <p>On specifying the algorithm, the description of the algorithm appears corresponding to the <b>Default Offset Amount Algorithm</b> field.</p> <p>You must specify an algorithm which is created using the <b>C1-OFST-AMT</b> algorithm type in the <b>Default Offset Amount Algorithm</b> field.</p> </div>	Yes
Defer Processing FT Count	<p>Used to indicate whether an offset request must be processed in the deferred mode or in real time (i.e. immediately). If the number of financial transactions created for the bills which are selected in the offset request exceeds the defer processing count, the system will process the offset request in the deferred mode. However, if the number of financial transactions created for the bills which are selected in the offset request does not exceed the defer processing count, the system will process the offset request in real time (i.e. immediately).</p> <div data-bbox="591 1125 1198 1558" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>You cannot specify a negative value in this field.</p> <p>Deferred mode means in the background when the <b>Offset Request Periodic Monitor (C1-OFSRQ)</b> batch is invoked. You can configure the <b>Offset Request Periodic Monitor (C1-OFSRQ)</b> batch such that it is executed at regular intervals. For more information about the <b>Offset Request Periodic Monitor (C1-OFSRQ)</b> batch, refer to <i>Oracle Revenue Management and Billing Batch Guide</i>.</p> <p>If you set the defer processing count to zero (0), the system resets the default value to 50.</p> </div>	No
Approval Required	Used to indicate whether approval is required while offsetting bills through an offset request.	No

Field Name	Field Description	Mandatory (Yes or No)
Approval To Do Type	<p>Used to indicate that To Do entry of the specified To Do type must be created when you submit an offset request for approval.</p> <p><b>Note:</b></p> <p>The <b>Search</b>  icon appears corresponding to the <b>Approval To Do Type</b> field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.</p> <p>On specifying the To Do type, the description of the To Do type appears corresponding to the <b>Approval To Do Type</b> field.</p> <p>This field appears only when the <b>Approval Required</b> option is selected.</p> <p>The <b>C1-OFSRQ</b> To Do type is shipped with the product. You can use the <b>C1-OFSRQ</b> To Do type or a custom To Do type, if required.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required when the <b>Approval Required</b> option is selected.</p>
Approval To Do Role	<p>Used to indicate that users with the specified To Do role can only approve an offset request submitted for approval.</p> <p><b>Note:</b></p> <p>The list includes only those To Do roles which are associated with the approval To Do type.</p> <p>This field appears only when the <b>Approval Required</b> option is selected.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required when the <b>Approval Required</b> option is selected.</p>
Submitter To Do Type	<p>At present, the submitter To Do type is not used to create To Do entry when the approver rejects an offset request. It is only used to fetch the roles associated with the submitter To Do type.</p> <p><b>Note:</b></p> <p>The <b>Search</b>  icon appears corresponding to the <b>Submitter To Do Type</b> field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.</p> <p>On specifying the To Do type, the description of the To Do type appears corresponding to the <b>Submitter To Do Type</b> field.</p> <p>The <b>C1-OFSSB</b> To Do type is shipped with the product. You can use the <b>C1-OFSSB</b> To Do type or a custom To Do type, if required.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required when the <b>Approval Required</b> option is selected.</p>

Field Name	Field Description	Mandatory (Yes or No)
Submitter To Do Role	Used to indicate that users with the specified To Do role cannot approve an offset request submitted for approval.  <b>Note:</b> The list includes only those To Do roles which are associated with the submitter To Do type.	Yes (Conditional)  <b>Note:</b> This field is required when the <b>Approval Required</b> option is selected.
Bill Search Period	Used to specify the maximum search period (in days) that you want to allow while searching bills in an offset request.  <b>Note:</b> If you do not specify any value, by default, it is set to <b>30</b> .	No
Transfer Adjustment	Used to indicate whether transfer adjustments should be created while offsetting bills through an offset request.  <b>Note:</b> This impacts the system performance when the match type entity is set to <b>BSEG</b> and volume of bill segments in the selected bills is high. Alternatively, the system enables you to create offset adjustments while offsetting bills through an offset request whenever the volume of bill segments in the selected bills is high. To create the offset adjustments while offsetting bills through an offset request, you need to ensure that the <b>Transfer Adjustment</b> option is not selected in the respective offset request type.	No

**Tip:** Alternatively, you can copy an offset request type by clicking the **Duplicate** button in the **Offset Request Type** zone.

5. Enter the required details in the **Main** section.
6. Define, edit, or remove characteristics from the offset request type, if required.
7. Click **Save**.

The new offset request type is defined.

## **Viewing the Offset Request Type Details**

### **Procedure**

To view the details of an offset request type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **O** and then click **Offset Request Type**.  
A sub-menu appears.
3. Click the **Search** option from the **Offset Request Type** sub-menu.  
The **Offset Request Type** screen appears.
4. In the **Offset Request Type List** zone, click the **Broadcast**  icon corresponding to the offset request type whose details you want to view.  
The **Offset Request Type** zone appears.
5. View the details of the offset request type in the **Offset Request Type** zone.

## Offset Request (Used for Searching)

The **Offset Request** screen allows you to search for an offset request using various search criteria. It also allows you to define an offset request. It contains the following zone:

- [Search Offset Request](#) on page 1372

Through this screen, you can navigate to the following screen:

- [Offset Request \(Used for Viewing\)](#) on page 1379

### Search Offset Request

The **Search Offset Request** zone allows you to search for an offset request using various search criteria. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for an offset request using the offset request or bill details. The valid values are: <ul style="list-style-type: none"> <li>• Request Details</li> <li>• Bill Details</li> </ul> <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"><b>Note:</b> By default, the <b>Request Details</b> option is selected.</div>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Offset Request ID	Used to search a particular offset request.  <b>Note:</b> This field appears when the <b>Request Details</b> option is selected from the <b>Search By</b> list.	No
Created From	Used to search offset requests which are created from a particular date onwards.  <b>Note:</b> This field appears when the <b>Request Details</b> option is selected from the <b>Search By</b> list.	No
User ID	Used to search offset requests which are created by a particular user.  <b>Note:</b> This field appears when the <b>Request Details</b> option is selected from the <b>Search By</b> list.	No
Created To	Used to search offset requests which are created till a particular date.  <b>Note:</b> This field appears when the <b>Request Details</b> option is selected from the <b>Search By</b> list.	No
Status	Used to search offset requests with a particular status. The valid values are: <ul style="list-style-type: none"> <li>• Approval In Progress</li> <li>• Defer Unapplied</li> <li>• Deferred Processing</li> <li>• Draft</li> <li>• Processed</li> <li>• Rejected</li> <li>• Unapplied Offset</li> </ul> <b>Note:</b> This field appears when the <b>Request Details</b> option is selected from the <b>Search By</b> list.	No
Person ID	Used to search offset requests which include bills of a particular person.  <b>Note:</b> This field appears when the <b>Request Details</b> option is selected from the <b>Search By</b> list.  The <b>Search</b>  icon appears corresponding to the <b>Person ID</b> field. On clicking the <b>Search</b> icon, the <b>Person Search</b> window appears.	No

Field Name	Field Description	Mandatory (Yes or No)
Offset Request Type	Used to search offset requests which are created using a particular offset request type.  <b>Note:</b> This field appears when the <b>Request Details</b> option is selected from the <b>Search By</b> list.	No
Account ID	Used to search offset requests which include bills of a particular account.  <b>Note:</b> This field appears when the <b>Request Details</b> option is selected from the <b>Search By</b> list.  The <b>Search</b>  icon appears corresponding to the <b>Account ID</b> field. On clicking the <b>Search</b> icon, the <b>Account Search</b> window appears.	No
Bill ID	Used to search offset requests which include a particular bill.  <b>Note:</b> This field appears when the <b>Bill Details</b> option is selected from the <b>Search By</b> list.  The <b>Search</b>  icon appears corresponding to the <b>Bill ID</b> field. On clicking the <b>Search</b> icon, the <b>Bill Search</b> window appears.	No
Bill Date From	Used to search offset requests which include bills created from a particular date onwards.  <b>Note:</b> This field appears when the <b>Bill Details</b> option is selected from the <b>Search By</b> list.	No
Alternate Bill ID	Used to search offset requests which include a particular bill.  <b>Note:</b> This field appears when the <b>Bill Details</b> option is selected from the <b>Search By</b> list.	No
Bill Date To	Used to search offset requests which include bills created till a particular date.  <b>Note:</b> This field appears when the <b>Bill Details</b> option is selected from the <b>Search By</b> list.	No
<b>Note:</b> You must specify at least one search criterion while searching for an offset request.		

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Creation Date Time	Displays the date and time when the offset request is created.
Offset Request Information	Displays information about the offset request. <b>Note:</b> It has a link. On clicking the link, the <b>Offset Request</b> screen appears where you can view the details of the respective offset request.
Offset Amount	Displays the total amount which is offset through the offset request.
Status	Indicates the status of the offset request. The valid values are: <ul style="list-style-type: none"> <li>• Approval In Progress</li> <li>• Defer Unapplied</li> <li>• Deferred Processing</li> <li>• Draft</li> <li>• Processed</li> <li>• Rejected</li> <li>• Unapplied Offset</li> </ul>
Created By	Indicates the user who has created the offset request.
Creation Mode	Indicates whether the offset request is created manually or automatically. The valid values are: <ul style="list-style-type: none"> <li>• Automatic</li> <li>• Manual</li> </ul>
Primary Bill	Indicates the bill for which the offset request is created. In addition, this column has a context menu which helps in navigating to other screens in the application. <b>Note:</b> It has a link. On clicking the link, the <b>Bill</b> screen appears where you can view the details of the respective bill.

**Note:** Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

## **Searching for an Offset Request**

### **Prerequisites**

To search for an offset request, you should have:

- Offset request types defined in the application

### **Procedure**

To search for an offset request:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Financial** and then click **Offset Request**.  
A sub-menu appears.
3. Click the **Search** option from the **Offset Request** sub-menu.  
The **Offset Request** screen appears.
4. Enter the search criteria in the **Search Offset Request** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search**.

A list of offset requests that meet the search criteria appears in the **Search Results** section.

## Creating an Offset Request

### Prerequisites

To create an offset request, you should have:

- Offset request types defined in the application
- Bills created in the application

### Procedure

To create an offset request:

1. Do either of the following:

If you want to...	Then...
Create a single offset request from the <b>Account Receivable Central</b> screen	<ol style="list-style-type: none"> <li>1. Click the <b>Menu</b> link in the <b>Application</b> toolbar. A list appears.</li> <li>2. From the <b>Main</b> menu, select <b>Financial</b> and then click <b>Account Receivable Central</b>. The <b>Account Receivable Central</b> screen appears.</li> <li>3. Search for the required bill in the <b>Search Bill</b> zone.</li> </ol>

If you want to...	Then...
	<ol style="list-style-type: none"> <li>4. In the <b>Search Results</b> section, select the check box corresponding to the bill which you want to offset through a single offset request.</li> <li>5. Click <b>Single Offset</b>.</li> </ol>
Create a mass offset request from the <b>Account Receivable Central</b> screen	<ol style="list-style-type: none"> <li>1. Click the <b>Menu</b> link in the <b>Application</b> toolbar. A list appears.</li> <li>2. From the <b>Main</b> menu, select <b>Financial</b> and then click <b>Account Receivable Central</b>. The <b>Account Receivable Central</b> screen appears.</li> <li>3. Search for the required bill in the <b>Search Bill</b> zone.</li> <li>4. In the <b>Search Results</b> section, select the check box corresponding to the bill which you want to offset through a mass offset request.</li> <li>5. Click <b>Mass Offset</b>.</li> </ol>
Create a cross currency offset request from the <b>Account Receivable Central</b> screen	<ol style="list-style-type: none"> <li>1. Click the <b>Menu</b> link in the <b>Application</b> toolbar. A list appears.</li> <li>2. From the <b>Main</b> menu, select <b>Financial</b> and then click <b>Account Receivable Central</b>. The <b>Account Receivable Central</b> screen appears.</li> <li>3. Search for the required bill in the <b>Search Bill</b> zone.</li> <li>4. In the <b>Search Results</b> section, select the check box corresponding to the bill which you want to offset through a cross currency offset request.</li> <li>5. Click <b>Cross Currency Offset</b>.</li> </ol>
Create a single, mass, or cross currency offset request from the <b>Offset Request</b> screen	<ol style="list-style-type: none"> <li>1. Click the <b>Menu</b> link in the <b>Application</b> toolbar. A list appears.</li> <li>2. From the <b>Main</b> menu, select <b>Financial</b> and then click <b>Offset Request</b>. A sub-menu appears.</li> <li>3. Click the <b>Add</b> option from the <b>Offset Request</b> sub-menu.</li> </ol>

The **Add Offset Request** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Offset Request Type	Used to indicate the offset request type using which you want to create the offset request.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Bill	Used to indicate the bill which you want to offset through the offset request.  <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>The <b>Search</b>  icon appears corresponding to the <b>Bill</b> field. On clicking the <b>Search</b> icon, the <b>Bill Search</b> window appears. On specifying the bill, the information about the bill appears corresponding to the <b>Bill</b> field.</p> </div>	Yes

**Tip:** Alternatively, you can access this screen by clicking the **Add** button in the **Page Title** area of the **Offset Request** screen.

- Enter the required details in the **Add Offset Request** screen.
- Click **Save**.

The offset request is created in the **Draft** status. The **Offset Request** screen appears where you can view the details of the offset request. By default, the adjustment type specified in the respective offset request type is used while creating the offset request. You can then change the adjustment type, if required.

- Add debit and/or credit bills in the offset request.
- Define characteristics for the offset request, if required.

## Viewing the Offset Request Details

### Procedure

To view the details of an offset request:

- Search for the offset request in the **Offset Request** screen.
- In the **Search Results** section, click the link in the **Offset Request Information** column corresponding to the offset request whose details you want to view.

The **Offset Request** screen appears.

- Ensure that the **Main** tab is selected.
- View the details of the offset request in the **Offset Request** zone.

### Related Topics

How to search for an offset request	<a href="#">Searching for an Offset Request</a> on page 1375
<b>Offset Request</b> screen	<a href="#">Offset Request (Used for Viewing)</a> on page 1379
<b>Offset Request</b> zone	<a href="#">Offset Request</a> on page 1379

## Offset Request (Used for Viewing)

The **Offset Request** screen allows you to:

- View the details of the offset request
- View the debit and credit bills which are added to the offset request
- View the offset or transfer adjustments which are created through the offset request
- Add a debit or credit bill to the offset request
- Edit the details of the offset request
- Define, edit, or remove the characteristics from the offset request
- Edit the offset amount for each debit and credit bill
- Remove a debit or credit bill from the offset request
- Delete the offset request
- Submit the offset request for approval
- Approve or reject the offset request
- Unapply (i.e. cancel) the offset request
- View the log of the offset request
- Add a log entry for the offset request

It consists of the following tabs:

- [Offset Request - Main](#) on page 1379
- [Offset Request - Log](#) on page 1388

### Offset Request - Main

The **Main** tab displays information about the offset request. It contains the following zones:

- [Offset Request](#) on page 1379
- [Selected Bills](#) on page 1382
- [Search Bill](#) on page 1383
- [Offset Request Adjustments](#) on page 1388

### Offset Request

The **Offset Request** zone displays the details of the offset request. It contains the following sections:

- **Main** - Displays basic information about the offset request. It contains the following fields:

Field Name	Field Description
Offset Request Information	Displays information about the offset request.

Field Name	Field Description
Offset Request Type	<p>Indicates the offset request type using which the offset request is created.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Offset Request Type</b> screen appears where you can view the details of the respective offset request type.</p>
Status	<p>Indicates the status of the offset request. The valid values are:</p> <ul style="list-style-type: none"> <li>• Approval In Progress</li> <li>• Defer Unapplied</li> <li>• Deferred Processing</li> <li>• Draft</li> <li>• Rejected</li> <li>• Processed</li> <li>• Unapplied Offset</li> </ul>
Status Reason	<p>Indicates the reason why the offset request is rejected or unapplied (i.e. canceled).</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Status Reason</b> screen appears where you can view the details of the respective status reason. This field appears only when the offset request is in the <b>Rejected, Defer Unapplied, or Unapplied Offset</b> status.</p>
Adjustment Type	<p>Indicates the adjustment type using which the offset or transfer adjustments should be created through the offset request.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Adjustment Type</b> screen appears where you can view the details of the respective adjustment type.</p>
Offset Amount	Displays the total amount which is offset through the offset request.
Comments	<p>Displays additional details specified while rejecting or unapplying (i.e. canceling) the offset request.</p> <p><b>Note:</b> This field appears only when the offset request is in the <b>Rejected, Defer Unapplied, or Unapplied Offset</b> status.</p>

- **Characteristics** - Lists the characteristics defined for the offset request. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the characteristic is effective for the offset request.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- **Record Actions** - This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the offset request. <b>Note:</b> The <b>Edit</b> button appears only when the offset request is in the <b>Draft</b> status.
Delete	Used to delete the offset request. <b>Note:</b> The <b>Delete</b> button appears only when the offset request is in the <b>Draft</b> status.
Submit	Used to submit the offset request. <b>Note:</b> The <b>Submit</b> button appears only when the offset request is in the <b>Draft</b> status.
Approve	Used to approve the offset request. <b>Note:</b> The <b>Approve</b> button appears only when: <ul style="list-style-type: none"> <li>The offset request is in the <b>Approval In Progress</b> status.</li> <li>A user with the approval To Do role is reviewing the offset request.</li> </ul>
Reject	Used to reject the offset request. <b>Note:</b> The <b>Reject</b> button appears only when: <ul style="list-style-type: none"> <li>The offset request is in the <b>Approval In Progress</b> status.</li> <li>A user with the approval To Do role is reviewing the offset request.</li> </ul>
Unapply	Used to unapply (i.e. cancel) the offset request. <b>Note:</b> The <b>Unapply</b> button appears only when the offset request is in the <b>Processed</b> status.

- **Record Information** - This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the offset request is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.
Status Date/Time	Displays the date and time when the offset request status is updated
Create Date/Time	Displays the date and time when the offset request is created.

### Selected Bills

The **Selected Bills** zone lists the debit and credit bills which are added to the offset request. It contains the following columns:

Column Name	Column Description
Bill Information	Indicates the debit or credit bill which is added to the offset request. In addition, this column has a context menu which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Bill</b> screen appears where you can view the details of the respective bill.
Bill Date	Displays the date when the debit or credit bill is created.
Outstanding Amount	Displays the outstanding amount (i.e. unpaid amount) of the debit or credit bill.
Hold Amount	Displays the amount of the debit or credit bill which is kept on hold through an hold request.
Offset Amount	Displays the amount which you want to offset from the debit or credit bill.
Remaining Bill Balance	Displays the remaining outstanding amount of the debit or credit bill (i.e. Outstanding Amount - Hold Amount - Offset Amount).  <b>Note:</b> This column does not appear when the offset request is in the <b>Processed</b> or <b>Unapplied Offset</b> status.
Updated Hold Amount	Displays the new hold amount (i.e. Current Hold Amount + Remaining Bill Balance) for the debit or credit bill which is derived when the remaining bill balance is less than the current hold amount.  <b>Note:</b> This column does not appear when the offset request is in the <b>Processed</b> or <b>Unapplied Offset</b> status.
Account Information	Indicates the account for which the debit or credit bill is created. In addition, this column has a context menu which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account.
Bill ID	Displays the bill ID.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

On clicking the **Broadcast**  icon corresponding to a bill, the **Offset Request Adjustments** zone appears where you can view the offset or transfer adjustments created for the bill through the offset request.

**Note:** The **Broadcast**  icon appears corresponding to a bill only when the offset request is in the **Processed** or **Unapplied Offset** status.

You can filter the list using various search criteria (such as, **Bill Balance**, **Bill ID**, and **Account ID**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (🔍) icon in the upper right corner of this zone.

You can change the layout of this zone. For more information on how to change the layout, see [Changing the Layout](#) on page 2336.

How to view the debit or credit bills added to an offset request	<a href="#">Viewing the Debit and Credit Bills Added to an Offset Request</a> on page 1389

### **Search Bill**

The bills listed in the **Search Bill** zone varies depending on the following scenarios:

<b>If...</b>	<b>Then...</b>
The single offset request is created through the <b>Account Receivable Central</b> screen and the <b>Allow Offsetting Across Persons</b> option type of the <b>C1-OFFSETREQ</b> feature configuration is set to <b>Y</b>	The <b>Search Bill</b> zone lists completed bills of all accounts of the main customer (whose bill is added as the primary bill in the offset request) and completed bills of all accounts of its effective child persons. If the primary bill is a debit bill, it lists credit bills of the main customer and its child persons. However, if the primary bill is a credit bill, it lists debit bills of the main customer and its child persons. Note that it lists only those bills which are in the same currency as that of the primary bill. For example, if the primary bill is in USD, then this zone lists all completed bills of the main customer and its child persons which are in USD.
The single offset request is created through the <b>Account Receivable Central</b> screen and the <b>Allow Offsetting Across Persons</b> option type of the <b>C1-OFFSETREQ</b> feature configuration is set to <b>N</b>	The <b>Search Bill</b> zone lists completed bills of all accounts of the main customer (whose bill is added as the primary bill in the offset request). If the primary bill is a debit bill, it lists credit bills of the main customer. However, if the primary bill is a credit bill, it lists debit bills of the main customer. Note that it lists only those bills which are in the same currency as that of the primary bill. For example, if the primary bill is in USD, then this zone lists all completed bills of the main customer which are in USD.
The mass offset request is created through the <b>Account Receivable Central</b> screen and the <b>Allow Offsetting Across Persons</b> option type of the <b>C1-OFFSETREQ</b> feature configuration is set to <b>Y</b>	The <b>Search Bill</b> zone lists completed debit and credit bills of all accounts of the main customer (whose bill is added as the primary bill in the offset request) and completed debit and credit bills of all accounts of its effective child persons. Note that it lists only those debit and credit bills which are in the same currency as that of the primary bill. For example, if the primary bill is in USD, then this zone lists all completed debit and credit bills of the main customer and its child persons which are in USD.

If...	Then...
<p>The mass offset request is created through the <b>Account Receivable Central</b> screen and the <b>Allow Offsetting Across Persons</b> option type of the <b>C1-OFFSETREQ</b> feature configuration is set to <b>N</b></p>	<p>The <b>Search Bill</b> zone lists completed debit and credit bills of all accounts of the main customer (whose bill is added as the primary bill in the offset request). Note that it lists only those debit and credit bills which are in the same currency as that of the primary bill. For example, if the primary bill is in USD, then this zone lists all completed debit and credit bills of the main customer which are in USD.</p>
<p>The cross currency offset request is created through the <b>Account Receivable Central</b> screen and the <b>Allow Offsetting Across Persons</b> option type of the <b>C1-OFFSETREQ</b> feature configuration is set to <b>Y</b></p>	<p>The <b>Search Bill</b> zone lists completed debit and credit bills of all accounts of the main customer (whose bill is added as the primary bill in the offset request) and completed debit and credit bills of all accounts of its effective child persons. Note that it lists only those debit and credit bills which are in the currency different from the primary bill. For example, if the primary bill is in USD, then this zone lists all completed debit and credit bills of the main customer and its child persons which are in the currency other than USD.</p>
<p>The cross currency offset request is created through the <b>Account Receivable Central</b> screen and the <b>Allow Offsetting Across Persons</b> option type of the <b>C1-OFFSETREQ</b> feature configuration is set to <b>N</b></p>	<p>The <b>Search Bill</b> zone lists completed debit and credit bills of all accounts of the main customer (whose bill is added as the primary bill in the offset request). It also allows you to filter the bills using various search criteria. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	<p>Used to indicate whether you want to search for a completed bill using the person, account, or bill details. The valid values are:</p> <ul style="list-style-type: none"> <li>• Person Details</li> <li>• Account Details</li> <li>• Bill Details</li> </ul> <p><b>Note:</b> By default, the <b>Person Details</b> option is selected.</p>	Yes
Person ID	<p>Used to search completed bills of a particular person.</p> <p><b>Note:</b> This field appears when the <b>Person Details</b> option is selected from the <b>Search By</b> list. The <b>Search</b>  icon appears corresponding to the <b>Person ID</b> field. On clicking the <b>Search</b> icon, the <b>Person Search</b> window appears.</p>	No
Bill Date From	<p>Used to search completed bills which are created from a particular date onwards.</p> <p><b>Note:</b> By default, it is set to a date which is calculated as follows: Bill Date To - Bill Search Period (Specified in Offset Request Type)</p>	Yes
Bills on Hold	<p>Used to indicate whether you want to search completed bills which are partially kept on hold. The valid values are:</p> <ul style="list-style-type: none"> <li>• No</li> <li>• Yes</li> </ul>	No
Bill Date To	<p>Used to search completed bills which are created till a particular date.</p> <p><b>Note:</b> By default, it is set to the current date.</p>	Yes

Field Name	Field Description	Mandatory (Yes or No)								
Bill Balance	<p>Used to indicate whether you want to search completed bills with a particular balance amount. The valid values are:</p> <ul style="list-style-type: none"> <li>• Equal to Zero</li> <li>• Greater Than Zero</li> <li>• Less Than Zero</li> <li>• Not Equal to Zero</li> </ul> <p><b>Note:</b> If a single or cross currency offset request is created through the <b>Account Receivable Central</b> screen, this field is disabled, and by default, it is set to the following:</p> <table border="1"> <thead> <tr> <th>If the primary bill is a...</th> <th>Then, it is set to...</th> </tr> </thead> <tbody> <tr> <td>Credit Bill</td> <td>Greater Than Zero</td> </tr> <tr> <td>Debit Bill</td> <td>Less Than Zero</td> </tr> <tr> <td></td> <td></td> </tr> </tbody> </table>	If the primary bill is a...	Then, it is set to...	Credit Bill	Greater Than Zero	Debit Bill	Less Than Zero			No
If the primary bill is a...	Then, it is set to...									
Credit Bill	Greater Than Zero									
Debit Bill	Less Than Zero									
Show Cross Currency Bills	<p>Used to indicate whether you want to search completed bills in the currencies different from the primary bill.</p> <p><b>Note:</b> This option is disabled when a single or cross currency offset request is created through the <b>Account Receivable Central</b> screen. By default, this option is selected when a cross currency offset request is created through the <b>Account Receivable Central</b> screen.</p>	No								
Account ID	<p>Used to search completed bills which created for a particular account.</p> <p><b>Note:</b> This field appears when the <b>Account Details</b> option is selected from the <b>Search By</b> list. The <b>Search</b>  icon appears corresponding to the <b>Account ID</b> field. On clicking the <b>Search</b> icon, the <b>Account Search</b> window appears.</p>	Yes								

Field Name	Field Description	Mandatory (Yes or No)
Bill ID	Used to search a particular completed bill.  <b>Note:</b> This field appears when the <b>Bill Details</b> option is selected from the <b>Search By</b> list.  The <b>Search</b>  icon appears corresponding to the <b>Bill ID</b> field. On clicking the <b>Search</b> icon, the <b>Bill Search</b> window appears.	No

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Bill Information	Display information about the completed debit or credit bill. In addition, this column has a context menu which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Bill</b> screen appears where you can view the details of the respective bill.
Bill Date	Displays the date when the debit or credit bill is created.
Due Date	Displays the date when the debit or credit bill is due for payment.
Outstanding Amount	Displays the outstanding amount (i.e. unpaid amount) of the debit or credit bill.
Hold Amount	Displays the amount of the debit or credit bill which is kept on hold through an hold request.
Outstanding Amount (Offset Currency)	Displays the outstanding amount (i.e. unpaid amount) of the debit or credit bill in the currency in which the bill amount would be offset.  <b>Note:</b> This column appears only when the offset request is a cross-currency offset request.
Account Information	Indicates the account for which the debit or credit bill is created. In addition, this column has a context menu which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account.

**Note:** Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

In addition, this section contains the following button:

Button Name	Button Description
Add	Used to add a bill to the offset request.

A check box appears corresponding to each bill. On selecting the check box, you can add the bill to the offset request. You can also select multiple bills at the same time. In addition, you can select the check box corresponding to the column header. This allows you to add all bills listed in the respective page to the offset request.

**Offset Request Adjustments**

The **Offset Request Adjustments** zone lists the offset or transfer adjustments which are created for the bill through the offset request. It appears only when the offset request is in the **Processed** status. It contains the following columns:

Column Name	Column Description
Adjustment Information	Displays information about the offset or transfer adjustment.  <b>Note:</b> It has a link. On clicking the link, the <b>Adjustment</b> screen appears where you can view the details of the respective adjustment.
From Bill ID	Indicates the bill from where the amount is offset.
To Bill ID	Indicates the bill against which the amount is offset.
Current Amount	Displays the adjustment amount.

**Offset Request - Log**

The **Log** tab contains the following zone:

- [Offset Request Log](#) on page 1388

**Offset Request Log**

The **Offset Request Log** zone lists the complete trail of actions performed on the offset request. It contains the following columns:

Column Name	Column Description
Creation Date Time	Displays the date and time when the action was performed on the offset request.
Details	Displays the details about the action performed on the offset request.
User	Indicates the user who has performed the action on the offset request.
Log Type	Indicates the type of the log.
Related Object	Indicates the object or entity which is created when the action is performed on the offset request.  <b>Note:</b> At present, no data appears in this column. The implementation team can build the custom logic to meet the business requirements.

Column Name	Column Description
Status Reason	Indicates the reason why the offset request is rejected or unapplied (i.e. canceled).

**Note:** You can manually add a log entry for the offset request by clicking the **Add Log Entry** link in the upper right corner of the **Offset Request Log** zone.

## Viewing the Debit and Credit Bills Added to an Offset Request

### Procedure

To view the debit and credit bills which are added to an offset request:

1. Search for the offset request in the **Offset Request** screen.
2. In the **Search Results** section, click the link in the **Offset Request Information** column corresponding to the offset request whose details you want to view.

The **Offset Request** screen appears.

3. Ensure that the **Main** tab is selected.
4. View the debit and credit bills added to the offset request in the **Selected Bills** zone.

### Related Topics

<b>Selected Bills</b> zone	<a href="#">Selected Bills</a> on page 1382

## Viewing the Adjustments Created Through an Offset Request

### Procedure

To view the adjustments created through an offset request:

1. Search for the offset request in the **Offset Request** screen.
2. In the **Search Results** section, click the link in the **Offset Request Information** column corresponding to the offset request whose details you want to view.

The **Offset Request** screen appears.

3. Ensure that the **Main** tab is selected.
4. In the **Selected Bills** zone, click the **Broadcast**  icon corresponding to the bill whose offset or transfer adjustments you want to view.

The **Offset Request Adjustments** zone appears.

**Note:** The **Broadcast**  icon appears corresponding to a bill only when the offset request is in the **Processed** or **Unapplied Offset** status.

- View the offset or transfer adjustments created for the bill through the offset request in the **Offset Request Adjustments** zone.

<b>Offset Request Adjustments</b> zone	<a href="#">Offset Request Adjustments</a> on page 1388

## Adding a Debit or Credit Bill to an Offset Request

### Prerequisites

To add a debit or credit bill to an offset request, you should have:

- Completed bills for accounts of the main customer (whose bill is added as the primary bill in the offset request)
- Completed bills for effective child persons of the main customer (whose bill is added as the primary bill in the offset request)
- The **Allow Offsetting Across Persons** option type of the **C1-OFFSETREQ** feature configuration set to **Y** or **N** based on the business requirements

### Procedure

To add a debit or credit bill to an offset request:

- Search for the offset request in the **Offset Request** screen.
- In the **Search Results** section, click the link in the **Offset Request Information** column corresponding to the offset request whose details you want to edit.

The **Offset Request** screen appears.

- Ensure that the **Main** tab is selected.
- Enter the search criteria in the **Search Bill** zone.

#### **Note:**

The **Search Bill** zone appears only when the offset request is in the **Draft** status.

The date range specified in the **Bill Date From** and **Bill Date To** fields should not exceed the number of days specified in the **Bill Search Period** field of the respective offset request type.

ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

- Click **Search**.

A list of completed bills that meet the search criteria appears in the **Search Results** section.

6. Select the check box corresponding to a completed bill that you want to add to the offset request.
7. Click the **Add** button in the **Search Bill** zone.

A message appears indicating that the bill is added to the offset request.

**Note:** You can only add a completed bill to an offset request when its outstanding amount is not equal to zero.

8. Click **OK**.

The completed bill is added to the offset request. You can view the completed bills which are added to the offset request in the **Selected Bills** zone.

**Note:** The default offset amount is calculated for each bill using the algorithm which is attached in the respective offset request type. For more information on how the default offset amount is calculated, see [CI-OFST-AMT](#) on page 1351.

## **Editing an Offset Request**

### **Prerequisites**

To edit an offset request, you should have:

- Adjustment types defined in the application (where the **A/P Request Type Code** field is not set to **REFUND**)

### **Procedure**

To edit an offset request:

1. Search for the offset request in the **Offset Request** screen.
2. In the **Search Results** section, click the link in the **Offset Request Information** column corresponding to the offset request whose details you want to edit.

The **Offset Request** screen appears.

3. Ensure that the **Main** tab is selected.
4. Click the **Edit** button in the **Offset Request** zone.

The **Offset Request** screen appears. It contains the following sections:

- **Main** - Used to specify the basic details about the offset request.
- **Characteristics** - Used to define characteristics for the offset request.
- **Offset Details** - Used to edit the offset amount of the bills which are added to the offset request. It also allows you to remove a bill from the offset request.

**Note:** You can only remove secondary debit or credit bills from the offset request. And, you cannot remove a primary debit or credit bill from the offset request throughout its lifecycle.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Offset Request Information	Displays information about the offset request.	Not applicable
Offset Request Type	Indicates the offset request type using which the offset request is created.	Not applicable
Adjustment Type	Used to indicate the adjustment type using which transfer or offset adjustments must be created through the offset request.  <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> The <b>Search</b>  icon appears corresponding to the <b>Adjustment Type</b> field. On clicking the <b>Search</b> icon, the <b>Adjustment Type Search</b> window appears. On specifying the adjustment type, the description of the adjustment type appears corresponding to the <b>Adjustment Type</b> field.</p> </div>	Yes
Comments	Used to specify additional information about the offset request.	No

**Note:** The **Edit** button appears only when the offset request is in the **Draft** status.

5. Modify the required details in the **Main** section.
6. Define, edit, or remove characteristics from the offset request, if required.
7. Edit the offset amount of a debit or credit bill, if required.
8. Remove a debit or credit bill from the offset request, if required.
9. Click **Save**.

The changes made to the offset request are saved.

## Defining a Characteristic for an Offset Request

### Prerequisites

To define a characteristic for an offset request, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Offset Request**)

### Procedure

To define a characteristic for an offset request:

1. Ensure that the **Characteristics** section is expanded when you are editing an offset request.

The **Characteristics** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the offset request.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the offset request.
Characteristic Type	Used to indicate the characteristic type. <b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Offset Request</b> .	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the offset request.
Characteristic Value	Used to specify the value for the characteristic type. <b>Note:</b> If you select a predefined characteristic type, the <b>Search</b>  icon appears corresponding to the <b>Characteristic Value</b> field. On clicking the <b>Search</b> icon, the <b>Predefined Characteristic Search</b> window appears.  On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the offset request.

2. Enter the required details in the **Characteristics** section.
3. If you want to define more than one characteristic for the offset request, click the **Add**  icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from the offset request, click the **Delete**  icon corresponding to the characteristic.

4. Click **Save**.

The characteristics are defined for the offset request.

How to edit an offset request	<a href="#">Editing an Offset Request</a> on page 1391

**Editing the Offset Amount of a Debit or Credit Bill****Prerequisites**

To edit the offset amount of a debit or credit bill, you should have:

- Required debit or credit bill added in the offset request

**Procedure**

To edit the offset amount of a debit or credit bill:

1. Ensure that the **Offset Details** section is expanded when you are editing an offset request.

The **Offset Details** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Total Debit Offset Amount	Displays the total offset amount of all debit bills which are included in the offset request.	Not applicable
Total Credit Offset Amount	Displays the total offset amount of all credit bills which are included in the offset request.	Not applicable
Total Offset Amount	Displays the sum of the total debit and credit offset amount.	Not applicable

In addition, this section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Bill ID	Indicates the debit or credit bill which is added to the offset request.	Not applicable
Outstanding Amount	Displays the outstanding amount (i.e. unpaid amount) of the debit or credit bill.	Not applicable
Due Date	Displays the date when the debit or credit bill is due for payment.	Not applicable
Hold Amount	Displays the amount of the debit or credit bill which is kept on hold through an hold request.	Not applicable
Outstanding Amount (Offset Currency)	Displays the outstanding amount (i.e. unpaid amount) of the debit or credit bill in the currency in which the bill amount would be offset.  <b>Note:</b> This field appears only when the offset request is a cross-currency offset request.	Not applicable
Offset Amount	Used to specify the amount which you want to offset from the debit or credit bill.	Yes
Remaining Bill Balance	Displays the remaining outstanding amount of the debit or credit bill (i.e. Outstanding Amount - Hold Amount - Offset Amount).	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
Updated Hold Amount	Displays the new hold amount (i.e. Current Hold Amount + Remaining Bill Balance) for the debit or credit bill which is derived when the remaining bill balance is less than the current hold amount.	Not applicable

The **Delete** () icon appears corresponding to the secondary debit or credit bills in the **Offset Details** section. It allows you to remove the respective bill from the offset request.

2. Modify the offset amount of the required debit or credit bill in the **Offset Details** section.
3. Click **Save**.

The changes made to the offset request are saved.

How to remove a debit or credit bill from an offset request	<a href="#">Removing a Debit or Credit Bill from an Offset Request</a> on page 1395

## Removing a Debit or Credit Bill from an Offset Request

### Procedure

To remove a debit or credit bill from an offset request:

1. Ensure that the **Offset Details** section is expanded when you are editing an offset request.
2. Click the **Delete** () icon corresponding to the debit or credit bill that you want to remove from the offset request.

A message appears confirming whether you want to delete the bill.

**Note:** The **Delete** () icon appears corresponding to the secondary debit or credit bills. It does not appear corresponding to the primary debit or credit bill. This is because you cannot remove a primary debit or credit bill from the offset request throughout its lifecycle.

3. Click **OK**.

The debit or credit bill is removed from the offset request.

## Deleting an Offset Request

### Procedure

To delete an offset request:

1. Search for the offset request in the **Offset Request** screen.
2. In the **Search Results** section, click the link in the **Offset Request Information** column corresponding to the offset request that you want to delete.

The **Offset Request** screen appears.

3. Ensure that the **Main** tab is selected.
4. Click the **Delete** button in the **Offset Request** zone.

A message appears confirming whether you want to delete the offset request.

<b>Note:</b> The <b>Delete</b> button appears only when the offset request is in the <b>Draft</b> status.
---

5. Click **OK**.

The offset request is deleted.

<b>Offset Request</b> screen	<a href="#">Offset Request (Used for Viewing)</a> on page 1379
<b>Offset Request</b> zone	<a href="#">Offset Request</a> on page 1379

## **Submitting an Offset Request**

### **Prerequisites**

To submit an offset request, you should have:

- At least one debit and credit bills added to the offset request
- Offset amount of each bill not equal to zero
- Total debit offset amount equal to total credit offset amount in the offset request
- Negative offset amount for each debit bill and positive offset amount for each credit bill
- Offset amount less than or equal to the current outstanding amount of the bill

### **Procedure**

To submit an offset request:

1. Search for the offset request in the **Offset Request** screen.
2. In the **Search Results** section, click the link in the **Offset Request Information** column corresponding to the offset request which you want to submit.

The **Offset Request** screen appears.

3. Ensure that the **Main** tab is selected.
4. Click the **Submit** button in the **Offset Request** zone.

The system behaves in the following manner:

<b>If...</b>	<b>Then</b>
The <b>Approval Required</b> option is selected in the respective offset request type	A To Do of the <b>C1-OFSRQ</b> To Do type is created and sent to the approver. The status of the offset request is then changed to <b>Approval In Progress</b> .

If...	Then
<p>The <b>Approval Required</b> option is not selected in the respective offset request type and the number of financial transactions created for the bills (which are selected in the offset request) exceeds the defer processing count (defined in the respective offset request type)</p>	<p>The status of the offset request is changed to <b>Deferred Processing</b>. On executing the <b>Offset Request Periodic Monitor (C1-OFSRQ)</b> batch, the system considers the offset requests which are in the <b>Deferred Processing</b> status. If the <b>Transfer Adjustment</b> option is selected in the respective offset request type, the system creates the transfer adjustments using the adjustment type which is specified in the offset request. The status of the transfer adjustments is set to <b>Frozen</b>. However, if the <b>Transfer Adjustment</b> option is not selected in the respective offset request type, the system creates the offset adjustments using the adjustment type which is specified in the offset request. The status of the offset adjustments is set to <b>Frozen</b>. Finally, the status of the offset request is changed to <b>Processed</b>.</p> <p><b>Note:</b> If a match event exists for the match type entity (i.e. bill, bill segment, or contract), the existing match event is stamped on the offset or transfer adjustment and on the corresponding bill segment or bill segment cancellation financial transaction. However, if a match event does not exist, a new match event is created and stamped on the offset or transfer adjustment and on the corresponding bill segment or bill segment cancellation financial transaction. In case of partial offset, the status of the corresponding match event is set to <b>Open</b>. However, if the entire match type entity amount is offset, the status of the corresponding match event is set to <b>Balanced</b>. For more information on how the offset amount is distributed, see <a href="#">C1-OFSRQ</a> on page 1349.</p>
<p>The <b>Approval Required</b> option is not selected in the respective offset request type and the number of financial transactions created for the bills (which are selected in the offset request) does not exceed the defer processing count (defined in the respective offset request type)</p>	<p>If the <b>Transfer Adjustment</b> option is selected in the respective offset request type, the system creates the transfer adjustments using the adjustment type which is specified in the offset request. How to search for an offset request	<a href="#">Searching for an Offset Request</a> on page 1375
<b>Offset Request</b> screen	<a href="#">Offset Request (Used for Viewing)</a> on page 1379
<b>Offset Request</b> zone	<a href="#">Offset Request</a> on page 1379

## Approving an Offset Request

You can view the number of offset requests which are pending for approval in the **Offset Request** screen. The approver can review, and accordingly approve or reject the offset request based on the observations.

**Note:** The system will not allow you to approve or reject an offset request submitted by you.

### Prerequisites

To approve an offset request, you should have:

- Approval To Do role assigned in the system

### Procedure

To approve an offset request:

1. Do either of the following:

If you want to...	Then...
Approve an offset request through the <b>Offset Request</b> screen	<ol style="list-style-type: none"> <li>1. Search for the offset request in the <b>Offset Request</b> screen.</li> <li>2. In the <b>Search Results</b> section, click the link in the <b>Offset Request Information</b> column corresponding to the offset request which you want to review.</li> </ol>
Approve an offset request through the <b>To Do List</b> screen	<ol style="list-style-type: none"> <li>1. Click the <b>Menu</b> link in the <b>Application</b> toolbar. A list appears.</li> <li>2. From the <b>Main</b> menu, select <b>To Do</b> and then click <b>To Do List</b>. The <b>To Do Type for User Search</b> window appears.</li> <li>3. Enter <b>C1-OFSRQ</b> in the <b>To Do Type</b> field.</li> <li>4. Click the <b>Search</b> button corresponding to the <b>To Do Type</b> field. The <b>To Do List</b> screen appears.</li> <li>5. Select the <b>Open</b> option from the <b>Filter by</b> list to view all unassigned To Dos.</li> <li>6. Click the link in the <b>Message</b> column corresponding to the To Do of the offset request that you want to review.</li> </ol>

The **Offset Request** screen appears.

2. Review the details in the **Offset Request** screen.
3. If the information in the offset request is accurate, click the **Approve** button in the **Offset Request** zone.

The system behaves in the following manner:

If...	Then
<p>The number of financial transactions created for the bills (which are selected in the offset request) exceeds the defer processing count (defined in the respective offset request type)</p>	<p>The status of the offset request is changed to <b>Deferred Processing</b>. On executing the <b>Offset Request Periodic Monitor (C1-OFSRQ)</b> batch, the system considers the offset requests which are in the <b>Deferred Processing</b> status. If the <b>Transfer Adjustment</b> option is selected in the respective offset request type, the system creates the transfer adjustments using the adjustment type which is specified in the offset request. The status of the transfer adjustments is set to <b>Frozen</b>. However, if the <b>Transfer Adjustment</b> option is not selected in the respective offset request type, the system creates the offset adjustments using the adjustment type which is specified in the offset request. The status of the offset adjustments is set to <b>Frozen</b>. Finally, the status of the offset request is changed to <b>Processed</b>.</p> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> If a match event exists for the match type entity (i.e. bill, bill segment, or contract), the existing match event is stamped on the offset or transfer adjustment and on the corresponding bill segment or bill segment cancelation financial transaction. However, if a match event does not exist, a new match event is created and stamped on the offset or transfer adjustment and on the corresponding bill segment or bill segment cancelation financial transaction. In case of partial offset, the status of the corresponding match event is set to <b>Open</b>. However, if the entire match type entity amount is offset, the status of the corresponding match event is set to <b>Balanced</b>. For more information on how the offset amount is distributed, see <a href="#">C1-OFST-DIST</a> on page 1349.</p> </div>

If...	Then
<p>The number of financial transactions created for the bills (which are selected in the offset request) does not exceed the defer processing count (defined in the respective offset request type)</p>	<p>If the <b>Transfer Adjustment</b> option is selected in the respective offset request type, the system creates the transfer adjustments using the adjustment type which is specified in the offset request. The status of the transfer adjustments is set to <b>Frozen</b>. However, if the <b>Transfer Adjustment</b> option is not selected in the respective offset request type, the system creates the offset adjustments using the adjustment type which is specified in the offset request. The status of the offset adjustments is set to <b>Frozen</b>. Finally, the status of the offset request is changed to <b>Processed</b>.</p> <p><b>Note:</b> If a match event exists for the match type entity (i.e. bill, bill segment, or contract), the existing match event is stamped on the offset or transfer adjustment and on the corresponding bill segment or bill segment cancellation financial transaction. However, if a match event does not exist, a new match event is created and stamped on the offset or transfer adjustment and on the corresponding bill segment or bill segment cancellation financial transaction. In case of partial offset, the status of the corresponding match event is set to <b>Open</b>. However, if the entire match type entity amount is offset, the status of the corresponding match event is set to <b>Balanced</b>. For more information on how the offset amount is distributed, see <a href="#">C1-OFS-DIST</a> on page 1349.</p>

**Note:** The **Approve** button appears only when:

- The offset request is in the **Approval In Progress** status.
- A user with the approval To Do role is reviewing the offset request.

## Rejecting an Offset Request

### Prerequisites

To reject an offset request, you should have:

- Reasons defined for the **Rejected** status of the **C1-OffsetRequest** business object in the **Status Reason** screen

**Note:** The system will not allow you to approve or reject an offset request submitted by you.

### Procedure

To reject an offset request:

1. Do either of the following:

If you want to...	Then...
Reject an offset request through the <b>Offset Request</b> screen	<ol style="list-style-type: none"> <li>1. Search for the offset request in the <b>Offset Request</b> screen.</li> <li>2. In the <b>Search Results</b> section, click the link in the <b>Offset Request Information</b> column corresponding to the offset request which you want to review.</li> </ol>
Reject an offset request through the <b>To Do List</b> screen	<ol style="list-style-type: none"> <li>1. Click the <b>Menu</b> link in the <b>Application</b> toolbar. A list appears.</li> <li>2. From the <b>Main</b> menu, select <b>To Do</b> and then click <b>To Do List</b>. The <b>To Do Type for User Search</b> window appears.</li> <li>3. Enter <b>C1-OFSRQ</b> in the <b>To Do Type</b> field.</li> <li>4. Click the <b>Search</b> button corresponding to the <b>To Do Type</b> field. The <b>To Do List</b> screen appears.</li> <li>5. Select the <b>Open</b> option from the <b>Filter by</b> list to view all unassigned To Dos.</li> <li>6. Click the link in the <b>Message</b> column corresponding to the To Do of the offset request that you want to review.</li> </ol>

The **Offset Request** screen appears.

2. Review the details in the **Offset Request** screen.
3. If the information in the offset request is incorrect, click the **Reject** button in the **Offset Request** zone.

The **Reject Offset Request** window appears. It contains following fields:

Field Name	Field Description	Mandatory (Yes or No)
Status Reason	Used to indicate the reason why you want to reject the offset request.	Yes
Comments	Used to specify additional information while rejecting the offset request.	No

**Note:** The **Reject** button appears only when:

- The offset request is in the **Approval In Progress** status.
- A user with the approval To Do role is reviewing the offset request.

4. Select the reason for rejecting the offset request from the **Status Reason** list.
5. Click **Save**.

The status of the offset request is changed to **Rejected**.

### **Related Topics**

Offset Request zone	<a href="#">Offset Request</a> on page 1379

## Unapplying an Offset Request

There might be situations when an incorrect offset request is processed in the system. In such case, the system provides you with an ability to unapply (i.e. cancel) the offset request. However, note that you can cancel an offset request only when the offset request is in the **Processed** status.

### Prerequisites

To cancel an offset request, you should have:

- Reasons defined for the **Unapplied Offset** status of the **C1-OffsetRequest** business object in the **Status Reason** screen

### Procedure

To cancel an offset request:

- Search for the offset request in the **Offset Request** screen.
- In the **Search Results** section, click the link in the **Offset Request Information** column corresponding to the offset request that you want to cancel.

The **Offset Request** screen appears.

- Click the **Unapply** button in the **Offset Request** zone.

The **Unapply Reason** window appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Unapply Reason	Used to indicate the reason why you want to cancel the offset request.	Yes
Comments	Used to specify additional information while canceling the offset request.	No

**Note:** The **Unapply** button appears only when the offset request is in the **Processed** status.

- Select the reason for canceling the offset request from the **Unapply Reason** list.
- Click **Save**.

The system behaves in the following manner:

If...	Then...
The number of transfer or offset adjustments does not exceed the online record process limit (which is defined in the <b>C1-DFRUNAPLY</b> algorithm)	The system cancels the frozen transfer or offset adjustments immediately and then changes the status of the offset request to <b>Unapplied Offset</b> .

If...	Then...
The number of transfer or offset adjustments exceeds the online record process limit (which is defined in the <b>C1-DFRUNAPLY</b> algorithm)	The system changes the status of the offset request to <b>Defer Unapplied</b> . On executing the <b>Offset Request Periodic Monitor (C1-OFSRQ)</b> batch, the system considers the offset requests which are in the <b>Defer Unapplied</b> status. The system then cancels the frozen transfer or offset adjustments of the offset request and changes the status of the offset request to <b>Unapplied Offset</b> .

## Viewing the Log of an Offset Request

### Procedure

To view the log of an offset request:

1. Search for the offset request in the **Offset Request** screen.
2. In the **Search Results** section, click the link in the **Offset Request Information** column corresponding to the offset request whose details you want to view.

The **Offset Request** screen appears.

3. Click the **Log** tab.

The **Log** tab appears.

4. View the complete trail of actions performed on the offset request in the **Offset Request Log** zone.

## Adding a Log Entry for an Offset Request

### Procedure

To add a log entry for an offset request:

1. Search for the offset request in the **Offset Request** screen.
2. In the **Search Results** section, click the link in the **Offset Request Information** column corresponding to the offset request for which you want to add a log entry.

The **Offset Request** screen appears.

3. Click the **Log** tab.

The **Log** tab appears.

4. Click the **Add Log Entry** link in the upper right corner of the **Offset Request Log** zone.

The **Add Request Log** window appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Request Information	Displays information about the offset request.	Not applicable
Log Details	Used to specify additional comments on the offset request.	Yes

5. Enter the comments in the **Log Details** field.

6. Click **Save**.

The log entry is added in the **Offset Request Log** zone.

# Chapter 24

---

## Funding Request

---

### Topics:

- [Prerequisites](#)
- [Funding Request \(Without Approval\) Status Transition](#)
- [Funding Request \(With Approval\) Status Transition](#)
- [Algorithms Used in C1-FundingReq](#)
- [Funding Request Type](#)
- [Funding Request \(Used for Searching\)](#)
- [Funding Request \(Used for Viewing\)](#)

Oracle Revenue Management and Billing provides the automatic payment facility for an account. The system automatically calculates the automatic payment amount during the bill completion and stamps these details against the bill in the **CI\_BILL\_ACH** table. However, there might be situations when you would like to do the following before stamping the automatic payment amount against the bill in the **CI\_BILL\_ACH** table:

- Hold certain amount on the bill through a hold request
- Offset the bill against another bill through an offset request
- Transfer the amount on the credit bill to one or more garnishment contracts of the account

The system enables you to change the automatic payment amount through the funding process. The funding process supports all three automatic payment creation options (i.e. Create At Bill Completion, Create On Extract Date, and Freeze Payment on Notification).

While creating a funding request, you need to specify a funding request type using which you want to create the funding request. It is the funding request type which helps the system to determine:

- The business object using which the funding request should be created in the system.
- The currency in which the total debit and credit amount should be calculated.
- The account funding currency characteristic type which must be defined on the account. This characteristic indicates that the funding amount of the account's bills should be calculated in the specified currency.
- The default funding adjustment type using which the A/P adjustment should be created against a credit bill.

**Note:** In the **Default Funding Adjustment Type** field, you can only specify an adjustment type where the **A/P Request Type Code** field is set to **REFUND**.

- The default garnishment adjustment type using which the garnishment adjustment should be created when the amount from the credit bill is transferred to the garnishment contract of the account.

**Note:** In the **Default Garnishment Adjustment Type** field, you can only specify an adjustment type where the **A/P Request Type Code** field is not set to **REFUND**.

- Whether the approval is required for the funding request.

- An algorithm which helps to calculate the threshold range for a bill based on the number of payments made for the bill in the specified period.
- Whether a funding request must be processed in the deferred mode when the number of bills in the funding request exceeds the defer processing count.
- The currency conversion algorithms which must be used while determining the approval hierarchy for the funding request.

**Note:** The **Funding Request (C1-FundingReq)** business object is shipped with the product.

Once you specify a funding request type, the funding request is created in the **Draft** status. You can then add one or more debit or credit bills in the funding request. Note that you can only add bills of those accounts for which the **Defer Auto Pay** option is selected on the customer class. Once the bills are added, you can submit a funding request. Before you submit a funding request, you can do the following:

- Hold certain amount on the bill through a hold request
- Offset the bill against another bill through an offset request
- Transfer the amount on the credit bill to one or more garnishment contracts of the account

**Note:** The garnishment contract is a contract which is created using a contract type where the **Special Role Flag** field is set to **Garnishment**.

The system calculates the funding amount in the following manner:

Bill Type	Funding Amount for the Bill
Debit Bill	Outstanding Bill Amount – Hold Amount (set on the bill in a hold request) – Offset Amount (set on the bill in an offset request)
Credit Bill	Outstanding Bill Amount – Hold Amount (set on the bill in a hold request) – Offset Amount (set on the bill in an offset request) – Garnishment Amount (set on the bill in the funding request)

You can delete, cancel, or submit a funding request which is in the **Draft** status. On canceling a funding request, the status of all records in the funding request is changed to **Excluded** and the status of the funding request is changed to **Canceled**. On submitting a funding request, the status of the funding request is changed to either **Deferred Processing** or **Create Funding** depending on whether the number of bills in the funding request exceeds the defer processing count. Once the **Funding Request Periodic Monitor (C1-FNDRQ)** batch is executed, it checks whether there are any funding requests in the **Deferred Processing** status. If so, it changes the status of the funding request to **Create Funding**.

Once the status of a funding request is changed to **Create Funding**, the system creates the A/P adjustment against a bill when the funding amount of the bill is in credit. It also creates non A/P adjustments using the garnishment adjustment type when the funding amount of a credit bill is transferred to the garnishment contracts of the account. However, if the funding amount of a bill is in debit, the funding amount is stamped as the automatic payment amount against the bill in the **CI\_BILL\_ACH** table. Then, on executing the **Create Automatic**

**Payments and Refunds (APAYCRET)** batch, the system creates automatic payment and payment event for such bill.

You can optionally configure the approval process for the funding request. If the **Approval Required** option is selected in the funding request type, the status of the funding request is changed to **Approval In Progress** on submitting the funding request. The system calculates the sum of total debit and credit amount in the funding request. Depending on whether the sum total is debit or credit, the system uses the debit or credit hierarchy in the approval profile (which is specified in the funding request type), respectively. If the sum total is less than the minimum threshold amount, the system automatically approves the funding request and changes the status of the funding request to either **Deferred Processing** or **Create Funding** depending on whether the number of bills in the funding request exceeds the defer processing count. However, if the sum total is equal to or greater than the threshold amount specified at the first level in the approval hierarchy, the system creates a To Do using the To Do type specified in the approval profile and assigns it to the users with the To Do role defined at the first level in the approval hierarchy.

Once the approver at the first level in the approval hierarchy approves the funding request, the system checks whether the sum total of the debit and credit amount is equal to or greater than the threshold amount specified at the next level in the approval hierarchy. If the sum total of the debit and credit amount is equal to or greater than the threshold amount specified at the next level in the approval hierarchy, the system changes the status of the funding request to **Approval In Progress**. However, if the sum total of the debit and credit amount is less than the threshold amount specified at the next level in the approval hierarchy, the system changes the status of the funding request to either **Deferred Processing** or **Create Funding** depending on whether the number of bills in the funding request exceeds the defer processing count.

If an approver rejects a funding request, the status of the funding request is changed to **Rejected**. And, if an approver requests to resubmit a funding request for approval, the status of the funding request is changed to **Draft**. You can then edit the funding request and resubmit it for approval. The system allows the submitter to withdraw the funding request when it is in the **Approval In Progress** status. On withdrawing a funding request, the status of the funding request is changed to **Draft**.

If a funding request is created automatically through a custom batch, the system allows you to manually exclude some bills from the funding request when it is in the **Draft** status. You can exclude a bill from a funding request by changing its status to **Excluded**.

For more information on how to setup the funding request process, see [Prerequisites](#) on page 1408.

## Prerequisites

---

To setup the funding request process, you need to do the following:

- Define the required funding request types in the system
- Define the required funding adjustment types where the **A/P Request Type Code** field is set to **REFUND**
- Define the required garnishment adjustment types where the **A/P Request Type Code** field is not set to **REFUND**
- Define the required characteristic types where the characteristic entity is set to **Funding Request Type**
- Define the required characteristic types where the characteristic entity is set to **Funding Request**
- Define the required approval profiles with the debit and credit approval hierarchy in the system
- Specify the **C1-FNDAP** To Do type in the approval profile which you want to use in the funding request's approval process
- Specify the **C1-FNDSB** as the submitter To Do type in the funding request types
- Define the status reasons for the **Rejected** status of the **C1-FundingRequest** business object in the **Status Reason** screen
- Assign the **C1-FNDAP** To Do type to a To Do role whose users must receive a To Do while submitting a funding request for approval
- Assign the **C1-FNDSB** To Do type to a To Do role whose users must receive a To Do when an approver requests to resubmit the funding request for approval
- Select the **Defer Auto Pay** option on the customer class of the accounts for which you want to use the funding process
- Define the values for the **CAN\_RSN\_CD\_FLG** lookup field
- Define the **Funding Currency** characteristic type where the characteristic entity is set to **Account**
- Define a currency conversion algorithm for payments using the **C1\_CURALGPY** or **C1\_EXCRTPY** algorithm type
- Define a currency conversion algorithm for adjustments using the **C1\_CURALGAD** or **C1\_EXCRTAD** algorithm type
- Attach the currency conversion algorithms to the **Currency Conversion For Adjustments** and **Currency Conversion For Payments** algorithm spots to the required divisions
- Set the batch control type of the **Funding Request Periodic Monitor (C1-FNDRQ)** batch to **Timed** and define the following attributes:
  - Time Interval
  - Timer Active
  - User ID
  - Batch Language
  - Email Address

## Funding Request (Without Approval) Status Transition

---

The following figure graphically indicates how a funding request moves from one status to another when the approval process is not configured in the funding request type:

## Funding Request (With Approval) Status Transition

The following figure graphically indicates how a funding request moves from one status to another when the approval process is configured in the funding request type:

## Algorithms Used in C1-FundingReq

The following table lists the algorithm which is attached to the **C1-FundingReq** business object:

System Event	Algorithm	Algorithm Type	Description
Information	C1-FUNDINFO	C1-FUNDINFO	Refer to <a href="#">C1-FUNDINFO</a> on page 1411

The following table lists the algorithms which are used in the lifecycle of the **C1-FundingReq** business object:

Status	System Event	Algorithm	Algorithm Type	Description

## C1-FUNDINFO

This algorithm generates the funding request information string which appears throughout the application. It concatenates the following fields separated by a comma in the specified order:

1. Funding Request Type Description
2. Funding Request Status Description
3. Funding Request ID

## C1-FUNDSUBMT

This algorithm is invoked when you submit a funding request. If the approval process is not configured in the funding request type, it changes the status of the funding request to either **Deferred Processing** or **Create Funding** depending on whether the number of bills in the funding request exceeds the defer processing count. If the approval process is configured in the funding request type, it calculates the sum of total debit and credit amount in the funding request. Depending on whether the sum total is debit or credit, it uses the debit or credit hierarchy in the approval profile (which is specified in the funding request type), respectively. If the sum total is less than the minimum threshold amount in the approval hierarchy, the funding request is automatically approved by the system and the status of the funding request is changed to either **Deferred Processing** or **Create Funding** depending on whether the number of bills in the funding

request exceeds the defer processing count. However, if the sum total is equal to or greater than the threshold amount specified at the first level in the approval hierarchy, the status of the funding request is changed to **Approval In Progress**.

**Note:** If the **Currency Conversion Required** option is selected in the approval profile, the system does currency conversion when the sum total of the debit and credit amount is in a currency which is different from the installation options currency. During the currency conversion of the sum total which is in debit, the system uses the currency conversion algorithm specified in the **Currency Conversion Payment Algorithm** field of the funding request type. However, during the currency conversion of the sum total which is in credit, the system uses the currency conversion algorithm specified in the **Currency Conversion Adjustment Algorithm** field of the funding request type.

## C1-FUNDAPP

This algorithm is invoked when the status of the funding request is changed to **Approval In Progress**. It creates a To Do using the To Do type specified in the approval profile and assigns it to the users with the To Do role defined at the first level in the approval hierarchy. In addition, a log entry is created for the funding request when the To Do is created.

**Note:** If a funding request needs approval from the subsequent level in the approval hierarchy, this algorithm creates a To Do and assigns it to the users with the To Do role defined at the subsequent level in the approval hierarchy.

## C1-FUNDAPRVD

This algorithm is invoked when you approve a funding request. It checks whether the sum total of the debit and credit amount is equal to or greater than the threshold amount specified at the next level in the approval hierarchy. If the sum total of the debit and credit amount is equal to or greater than the threshold amount specified at the next level in the approval hierarchy, the status of the funding request is changed to **Approval In Progress**. However, if the sum total of the debit and credit amount is less than the threshold amount specified at the next level in the approval hierarchy, the status of the funding request is changed to either **Deferred Processing** or **Create Funding** depending on whether the number of bills in the funding request exceeds the defer processing count.

**Note:** If the **Currency Conversion Required** option is selected in the approval profile, the system does currency conversion when the sum total of the debit and credit amount is in a currency which is different from the installation options currency. During the currency conversion of the sum total which is in debit, the system uses the currency conversion algorithm specified in the **Currency Conversion Payment Algorithm** field of the funding request type. However, during the currency conversion of the sum total which is in credit, the system uses the currency conversion algorithm specified in the **Currency Conversion Adjustment Algorithm** field of the funding request type.

## F1-TODOCOMPL

This algorithm completes To Do entries that are created for the business object when the business object exits the given status. It finds and completes all open To Do entries where the business object's primary key is defined as a drill key. However, if the **Exclude To Do Entries From Auto Completion** characteristic is set to **Y** for the business object, the system does not automatically complete the respective To Do entry.

## F1-AT-RQJ

This algorithm transitions the current status of the business object to the specified status. It contains the following parameters:

- **Next Status** – Used when you want to override the default next status specified in the lifecycle.
- **Next Transition Condition** – Used when you want to override the default next transition condition specified in the lifecycle.

At a time, you can specify value for either the **Next Status** or **Next Transition Condition** parameter. If you don't specify any value for these parameters, the system will transition the business object to the default next status specified in its lifecycle.

## C1-FNDRESUBM

This algorithm is invoked when the status of the funding request is changed to **Return to Submitter**. It changes the status of the funding request to **Draft**. The submitter can then make the required changes and resubmit the funding request for approval. In addition, it creates a To Do using the submitter To Do type which is specified in the funding request type. Once a To Do is created, it is assigned to all users with a submitter To Do role which is specified in the funding request type.

## C1-FUNDVAL

This algorithm is invoked when the status of the funding request is changed to **Create Funding**. It checks whether the funding amount of a debit bill is equal to the bill outstanding amount minus hold and offset amount set on the bill (i.e.  $\text{Funding Amount} = \text{Outstanding Bill Amount} - \text{Hold Amount} - \text{Offset Amount}$ ). Similarly, it checks whether the funding amount of a credit bill is equal to the bill outstanding amount minus hold, offset, and garnishment amount set on the bill (i.e.  $\text{Funding Amount} = \text{Outstanding Bill Amount} - \text{Hold Amount} - \text{Offset Amount} - \text{Garnishment Amount}$ ). If so, it executes the next algorithm. However, if the funding amount is incorrect, the status of the record in the funding request is changed to **Error**.

## C1-FUNDAPAY

If the funding amount of a bill is in debit, it stamps the funding amount as the automatic payment amount against the bill in the **CI\_BILL\_ACH** table. Then, on executing the **Create Automatic Payments and Refunds (APAYCRET)** batch, the system creates automatic payment and payment event for such bill.

It considers the records in the funding request which are in the **Pending** status. Once the **CI\_BILL\_ACH** table is updated, the status of the record in the funding request is changed to **Processed**. If any error occurs while updating the **CI\_BILL\_ACH** table, the status of the record in the funding request is changed to **Error**.

## C1-FUNDADJCR

If the funding amount of a bill is in credit, it creates the A/P adjustments using the funding adjustment type. It also creates non A/P adjustments using the garnishment adjustment type when the funding amount of a credit bill is transferred to the garnishment contracts of the account.

It considers the records in the funding request which are in the **Pending** status. Once the adjustments are created, the status of the record in the funding request is changed to **Processed**. If any error occurs while creating the adjustments, the status of the record in the funding request is changed to **Error**.

### Points to Note:

- The system uses the funding and garnishment adjustment types from the funding request.
- The main customer's address is used while creating the A/P adjustment for a credit bill.
- The garnishment adjustments are created against the garnishment contracts of the account. A garnishment contract is a contract which is created using a contract type where the **Special Role Flag** field is set to **Garnishment**.
- The system allows you to transfer funding amount to multiple garnishment contracts of the account. Accordingly, the number of non A/P adjustments will be created using the garnishment adjustment type.

It contains the following parameters:

- **Adjustment Type** - Used to indicate the adjustment type using which the adjustment should be created against the credit bill for internal offsetting.
- **Match Type Entity Flag** - Used to indicate the match type entity on which a new match event must be created when no payment exists for the credit bill. The valid values are:
  - **BILL** - Used when you want to create the same match event on all financial transactions of a bill.
  - **BSEG** - Used when you want to create a unique match event for each bill line item (such as, bill segment or adjustment).

- **SA** - Used when you want to create the same match event on the bill line items which are created against the same contract.

## C1-FUNDCANCL

This algorithm is invoked when you cancel a funding request. It excludes all debit and credit bills from the funding request and changes the status of each record in the funding request to **Excluded**. In addition, the status of the funding request is changed to **Canceled**.

## Funding Request Type

---

Oracle Revenue Management and Billing allows you to define a funding request type using which you can create a funding request. It is the funding request type which helps the system to determine the following:

- The business object using which the funding request should be created in the system.
- The currency in which the funding amount should be calculated.
- The default funding adjustment type using which the A/P adjustment should be created against a credit bill on submitting the funding request.

**Note:** In the **Default Funding Adjustment Type** field, you can only specify an adjustment type where the **A/P Request Type Code** field is set to **REFUND**.

- The default garnishment adjustment type using which the garnishment adjustment should be created when the amount from the credit bill is moved to the garnishment contract of the account.

**Note:** In the **Default Garnishment Adjustment Type** field, you can only specify an adjustment type where the **A/P Request Type Code** field is not set to **REFUND**.

- Whether the approval is required for the funding request.
- An algorithm which helps to calculate the threshold range for a bill based on the number of payments made for the bill in the specified period.
- Whether a funding request must be processed in the deferred mode when the number of bills in the funding request exceeds the defer processing count.

The **Funding Request Type** screen allows you to define, edit, delete, and copy a funding request type. It contains the following zones:

- [Funding Request Type List](#) on page 1414
- [Funding Request Type](#) on page 1415

## Funding Request Type List

The **Funding Request Type List** zone lists the funding request types that are already defined in the system. It contains the following columns:

Column Name	Column Description
Funding Request Type	Displays the funding request type.
Description	Displays the description of the funding request type.
Edit	On clicking the <b>Edit</b>  icon, the <b>Funding Request Type</b> screen appears where you can edit the details of the funding request type.

Column Name	Column Description
Duplicate	On clicking the <b>Duplicate</b> (  ) icon, the <b>Funding Request Type</b> screen appears where you can define a new funding request type using an existing funding request type.
Delete	On clicking the <b>Delete</b> (  ) icon, you can delete the funding request type.  <b>Note:</b> You can delete a funding request type only when you have not created a funding request using the funding request type.

On clicking the **Broadcast** () icon corresponding to a funding request type, the **Funding Request Type** zone appears with the details of the respective funding request type.

## Funding Request Type

The **Funding Request Type** zone displays the details of the funding request type. It contains of the following sections:

- **Main** - Displays the basic information about the funding request type. It contains the following fields:

Field Name	Field Description
Funding Request Type	Displays the funding request type.
Description	Displays the description of the funding request type.
Funding Request Business Object	Indicates the business object that will be used to create the funding request. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.
Detailed Description	Displays additional information about the funding request type.
Status	Indicates the status of the funding request type. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>
Funding Amount Currency	Indicates the currency in which the total debit and credit amount should be calculated in the funding request. The total debit and credit amount appears in the <b>Statistics</b> section of the <b>Funding Request</b> zone.
Account Funding Currency Characteristic Type	Indicates the characteristic type which should be defined on the account. This characteristic indicates that the funding amount of the account's bills should be converted in the specified currency.

Field Name	Field Description
Default Funding Adjustment Type	<p>Indicates the adjustment type using which the funding adjustments must be created.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Adjustment Type</b> screen appears where you can view the details of the respective adjustment type.</p>
Default Garnishment Adjustment Type	<p>Indicates the garnishment adjustment type using which the garnishment adjustments must be created.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Adjustment Type</b> screen appears with the details of the respective adjustment type.</p>
Threshold Range Algorithm	<p>Indicates the threshold range for a bill based on the payments done for the bill.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Algorithm</b> screen appears where you can view the details of the respective algorithm.</p>
Defer Processing Count	<p>Displays the number of bills to determine if the funding request will be processed in deferred mode.</p> <p><b>Note:</b> If the number of bills is less than the <b>Defer Processing Count</b>, the funding request will be processed in real time (i.e. immediately).</p>
Approval Required	<p>Indicates whether approval is required while creating the funding adjustments using the funding request type.</p>
Approval Profile	<p>Indicates the approval profile which must be used to define approval hierarchy for the funding request type.</p> <p><b>Note:</b> The <b>Approval Profile</b> field appears only when the <b>Approval Required</b> check box is selected. It has a link. On clicking the link, the <b>Approval Profile</b> screen appears where you can view the details of the respective approval profile.</p>
Submitter To Do Type	<p>Indicates the To Do type for the submitter when the funding request type is resubmitted by the approver.</p> <p><b>Note:</b> The <b>Submitter To Do Type</b> field appears only when the <b>Approval Required</b> check box is selected. It has a link. On clicking the link, the <b>To Do Type</b> screen appears where you can view the details of the respective To Do type.</p>

Field Name	Field Description
Submitter To Do Role	<p>Indicates the To Do role for the submitter when the funding request type is resubmitted by the approver.</p> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>The <b>Submitter To Do Role</b> field appears only when the <b>Approval Required</b> check box is selected.</p> <p>It has a link. On clicking the link, the <b>To Do Role</b> screen appears where you can view the details of the respective To Do role.</p> </div>
Currency Conversion Adjustment Algorithm	Indicates the currency conversion algorithm. It is used while determining the approval hierarchy for a funding request when the sum total of the debit and credit amount (i.e. which is in credit) is different from the installation options currency.
Currency Conversion Payment Algorithm	Indicates the currency conversion algorithm. It is used while determining the approval hierarchy for a funding request when the sum total of the debit and credit amount (i.e. which is in debit) is different from the installation options currency.

- **Characteristics** - The **Characteristics** section lists the characteristics defined for the funding request type. It contains the following columns:

Column Name	Column Description
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- **Record Actions** - The **Record Actions** section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the funding request type.
Delete	<p>Used to delete the funding request type.</p> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> You can delete a funding request type only when you have not created a funding request using the funding request type.</p> </div>
Duplicate	Used to create a new funding request type using an existing funding request type.

- **Record Information** - The **Record Information** section contains the following fields:

Field Name	Field Description
Business Object	<p>Indicates the business object using which the funding request type is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.</p> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.</p> </div>

By default, the **Funding Request Type** zone does not appear in the **Funding Request Type** screen. It appears only when you click the **Broadcast**  icon corresponding to the funding request type in the **Funding Request Type List** zone.

**Defining a Funding Request Type****Prerequisites**

To define a funding request type, you should have:

- Funding request type business objects defined in the application
- Funding request business objects defined in the application
- Currencies defined in the application
- Funding adjustment types defined in the application (where the **A/P Request Type Code** field is set to **REFUND**)
- Garnishment adjustment types defined in the application (where the **A/P Request Type Code** field is not set to **REFUND**)
- A threshold range algorithm defined using the **C1-FDRTTR** algorithm type
- Required approval profiles defined in the application
- A To Do role assigned to the **C1-FNDSB** To Do type in the application
- Funding currency characteristic type defined in the application (where the characteristic entity is set to **Account**)
- A currency conversion algorithm defined for payments and adjustments using the **C1\_CURALGPY** and **C1\_CURALGAD** algorithm type, respectively

**Procedure**

To define a funding request type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **Funding Request Type**.  
A sub-menu appears.
3. Click the **Add** option from the **Funding Request Type** sub-menu.

The **Select Business Object** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Funding Request Type Business Object	Used to indicate the business object using which you want to create the funding request type.	Yes

**Tip:** Alternatively, you can access the **Select Business Object** screen by clicking the **Add** button in the **Page Title** area of the **Funding Request Type** screen.

**Note:** The **Select Business Object** screen appears only when there are multiple funding request type business objects defined in the application. If there is only one funding request type business object defined in the application, the **Funding Request Type** screen appears.

4. Select the required funding request type business object from the respective field.
5. Click **OK**.

The **Funding Request Type** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the funding request type.
- **Characteristics** - Used to define characteristics for the funding request type.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Funding Request Type	Used to specify the funding request type.	Yes
Business Object	Indicates the business object using which you are defining the funding request type.	Not applicable
Description	Used to specify the description for the funding request type.	Yes
Funding Request Business Object	Used to indicate the business object using which you want to create the funding request.	Yes
Detailed Description	Used to specify additional information about the funding request type.	No
Status	<p>Used to indicate the status of the funding request type. The valid values are:</p> <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul> <p><b>Note:</b> You cannot change the status of a funding request type to <b>Inactive</b> when the corresponding funding request is in a status other than <b>Processed</b> or <b>Rejected</b>.</p>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Funding Amount Currency	<p>Used to indicate the currency in which the total debit and credit amount should be calculated in the funding request. The total debit and credit amount appears in the <b>Statistics</b> section of the <b>Funding Request</b> zone.</p> <div data-bbox="695 415 1154 1247" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>The list includes only those currencies which are defined in the system.</p> <p>If the currency specified in this field is different from the bill's currency, the system does currency conversion before calculating the total debit and credit amount in the funding request. The total debit amount is the sum of funding amount of all bills whose funding amount is in debit. However, the total credit amount is the sum of funding amount and garnishment amount of all bills whose funding amount is in credit. While calculating the total debit amount, the system uses the currency conversion algorithm attached to the <b>Currency Conversion For Payments</b> algorithm spot of the account's division. However, while calculating the total credit amount, the system uses the currency conversion algorithm attached to the <b>Currency Conversion For Adjustments</b> algorithm spot of the account's division.</p> </div>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Account Funding Currency Characteristic Type	<p>Used to indicate the characteristic type. This characteristic should be defined on the account. This characteristic indicates that the funding amount of the account's bills should be converted in the specified currency.</p> <div data-bbox="695 415 1149 1289" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>The <b>Search</b>  icon appears corresponding to the <b>Account Funding Currency Characteristic Type</b> field. On clicking the <b>Search</b> icon, the <b>Characteristic Type Search</b> window appears.</p> <p>You must specify a characteristic type where the characteristic entity is set to <b>Account</b>.</p> <p>The converted amount appears in the <b>Funding Currency Amount</b> column of the <b>Selected Bills</b> zone in the <b>Funding Request</b> screen.</p> <p>If the funding amount is in debit, the system uses the currency conversion algorithm attached to the <b>Currency Conversion For Payments</b> algorithm spot of the account's division. However, if the funding amount is in credit, the system uses the currency conversion algorithm attached to the <b>Currency Conversion For Adjustments</b> algorithm spot of the account's division.</p> </div>	Yes
Default Funding Adjustment Type	<p>Used to indicate the adjustment type using which the A/P adjustment should be created against a credit bill on submitting the funding request.</p> <div data-bbox="695 1461 1149 1854" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>The <b>Search</b>  icon appears corresponding to the <b>Default Funding Adjustment Type</b> field. On clicking the <b>Search</b> icon, the <b>Adjustment Type Search</b> window appears.</p> <p>In the <b>Default Funding Adjustment Type</b> field, you can only specify an adjustment type where the <b>A/P Request Type Code</b> field is set to <b>REFUND</b>.</p> </div>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Default Garnishment Adjustment Type	<p>Used to indicate the adjustment type using which the garnishment adjustment should be created when the amount from the credit bill is transferred to the garnishment contract of the account.</p> <div data-bbox="695 386 1149 779" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>The <b>Search</b>  icon appears corresponding to the <b>Default Garnishment Adjustment Type</b> field. On clicking the <b>Search</b> icon, the <b>Adjustment Type Search</b> window appears.</p> <p>In the <b>Default Garnishment Adjustment Type</b> field, you can only specify an adjustment type where the <b>A/P Request Type Code</b> field is not set to <b>REFUND</b>.</p> </div>	Yes
Threshold Range Algorithm	<p>Used to attach an algorithm which helps to calculate the threshold range for a bill based on the number of payments made for the bill in the specified period.</p> <div data-bbox="695 953 1149 1341" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>You must specify an algorithm which is created using the <b>C1-FDRTTR</b> algorithm type in the <b>Threshold Range Algorithm</b> field.</p> <p>The <b>Search</b>  icon appears corresponding to the <b>Threshold Range Algorithm</b> field. On clicking the <b>Search</b> icon, the <b>Algorithm Search</b> window appears.</p> </div>	No

Field Name	Field Description	Mandatory (Yes or No)
Defer Processing Count	<p>Used to indicate whether a funding request must be processed in the deferred mode (i.e. in the background) when the number of bills in the funding request exceeds the defer processing count.</p> <div data-bbox="695 386 1151 1010" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> You cannot specify a negative value in the <b>Defer Processing Count</b> field.</p> <p>Deferred mode means in the background when the <b>Funding Request Periodic Monitor (C1-FNDRQ)</b> batch is invoked. You can configure the <b>Funding Request Periodic Monitor (C1-FNDRQ)</b> batch such that it is executed at regular intervals. For more information about the <b>Funding Request Periodic Monitor (C1-FNDRQ)</b> batch, refer to <i>Oracle Revenue Management and Billing Batch Guide</i>.</p> <p>If the number of bills in a funding request does not exceed the defer processing count, the system will process the funding request in real time (i.e. immediately).</p> </div>	No
Approval Required	Used to indicate whether the approval is required before creating payments for debit bills and A/P adjustments for credit bills through the funding request.	No
Approval Profile	<p>Used to indicate the approval profile using which the system should determine the debit or credit hierarchy level from where the approval is required. The system considers the debit or credit hierarchy level where the funding amount of the debit or credit bill falls within the threshold limit.</p> <div data-bbox="695 1423 1151 1499" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This field appears only when the <b>Approval Required</b> option is selected.</p> </div>	<p>Yes (Conditional)</p> <div data-bbox="1170 1230 1463 1377" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This field is required when the <b>Approval Required</b> option is selected.</p> </div>

Field Name	Field Description	Mandatory (Yes or No)
Submitter To Do Type	<p>Used to indicate that To Do entry of the specified To Do type must be created when the approver rejects the funding request or raises the request for resubmitting the funding request.</p> <p><b>Note:</b> You must specify the <b>C1-FNDSB To Do</b> type in the <b>Submitter To Do Type</b> field.</p> <p>The <b>Search</b>  icon appears corresponding to the <b>Submitter To Do Type</b> field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.</p> <p>This field appears only when the <b>Approval Required</b> option is selected.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required when the <b>Approval Required</b> option is selected.</p>
Submitter To Do Role	<p>Used to indicate that the users with the specified To Do role must receive a To Do when the approver rejects the funding request or raises the request for resubmitting the funding request.</p> <p><b>Note:</b> This field appears only when the <b>Approval Required</b> option is selected.</p> <p>The list includes only those To Do roles which are associated to the specified submitter To Do type.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required when the <b>Approval Required</b> option is selected.</p>
Currency Conversion Adjustment Algorithm	<p>Used to indicate the currency conversion algorithm. It is used while determining the approval hierarchy for a funding request when the sum total of the debit and credit amount (i.e. which is in credit) is different from the installation options currency.</p> <p><b>Note:</b> This field appears only when the <b>Approval Required</b> option is selected.</p> <p>The <b>Search</b>  icon appears corresponding to the <b>Currency Conversion Adjustment Algorithm</b> field. On clicking the <b>Search</b> icon, the <b>Algorithm Search</b> window appears.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required when the <b>Currency Conversion Required</b> option is selected in the approval profile.</p>

Field Name	Field Description	Mandatory (Yes or No)
Currency Conversion Payment Algorithm	<p>Used to indicate the currency conversion algorithm. It is used while determining the approval hierarchy for a funding request when the sum total of the debit and credit amount (i.e. which is in debit) is different from the installation options currency.</p> <p><b>Note:</b> This field appears only when the <b>Approval Required</b> option is selected.</p> <p>The <b>Search</b>  icon appears corresponding to the <b>Currency Conversion Payment Algorithm</b> field. On clicking the <b>Search</b> icon, the <b>Algorithm Search</b> window appears.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required when the <b>Currency Conversion Required</b> option is selected in the approval profile.</p>

6. Enter the required details in the **Main** section.
7. Define characteristics for the funding request type, if required.
8. Click **Save**.

The funding request type is defined.

How to define a characteristic for a funding request type	<a href="#">Defining a Characteristic for a Funding Request Type</a> on page 1425

## Defining a Characteristic for a Funding Request Type

### Prerequisites

To define a characteristic for a funding request type, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Funding Request Type**)

### Procedure

To define a characteristic for a funding request type:

1. Ensure that the **Characteristics** section is expanded when you are defining, editing, or copying a funding request type.

The **Characteristics** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Type	Used to indicate the characteristic type.  <b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Funding Request Type</b> .	Yes (Conditional)  <b>Note:</b> This field is required when you are defining a characteristic for the funding request type.
Characteristic Value	Used to specify the value for the characteristic type.  <b>Note:</b> If you select a predefined characteristic type, the <b>Search</b>  icon appears corresponding to the <b>Characteristic Value</b> field. On clicking the <b>Search</b> icon, you can search for a predefined characteristic value.  On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	Yes (Conditional)  <b>Note:</b> This field is required when you are defining a characteristic for the funding request type.

2. Enter the required details in the **Characteristics** section.
3. If you want to define more than one characteristic for the funding request type, click the **Add**  icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from the funding request type, click the **Delete**  icon corresponding to the characteristic.

How to copy a funding request type	<a href="#">Copying a Funding Request Type</a> on page 1434

## Editing a Funding Request Type

### Prerequisites

To edit a funding request type, you should have:

- Funding request business objects defined in the application
- Currencies defined in the application
- Funding adjustment types defined in the application (where the **A/P Request Type Code** field is set to **REFUND**)

- Garnishment adjustment types defined in the application (where the **A/P Request Type Code** field is not set to **REFUND**)
- A threshold range algorithm defined using the **C1-FDRTTR** algorithm type
- Required approval profiles defined in the application
- A To Do role assigned to the **C1-FNDSB** To Do type in the application
- Funding currency characteristic type defined in the application (where the characteristic entity is set to **Account**)
- A currency conversion algorithm defined for payments and adjustments using the **C1\_CURALGPY** and **C1\_CURALGAD** algorithm type, respectively

### **Procedure**

To edit a funding request type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **Funding Request Type**.  
A sub-menu appears.
3. Click the **Search** option from the **Funding Request Type** sub-menu.  
The **Funding Request Type** screen appears.
4. In the **Funding Request Type List** zone, click the **Edit** () icon in the **Edit** column corresponding to the funding request type whose details you want to edit.

The **Funding Request Type** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the funding request type.
- **Characteristics** - Used to define characteristics for the funding request type.

The **Main** section contains the following fields:

<b>Field Name</b>	<b>Field Description</b>	<b>Mandatory (Yes or No)</b>
Funding Request Type	Displays the funding request type.	Not applicable
Business Object	Indicates the business object using which you are defining the funding request type.	Not applicable
Description	Used to specify the description for the funding request type.	Yes
Funding Request Business Object	Used to indicate the business object using which you want to create the funding request.	Yes
Detailed Description	Used to specify additional information about the funding request type.	No

Field Name	Field Description	Mandatory (Yes or No)
Status	<p>Used to indicate the status of the funding request type. The valid values are:</p> <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> You cannot change the status of a funding request type to <b>Inactive</b> when the corresponding funding request is in a status other than <b>Processed</b> or <b>Rejected</b>.</p> </div>	Yes
Funding Amount Currency	<p>Used to indicate the currency in which the total debit and credit amount should be calculated in the funding request. The total debit and credit amount appears in the <b>Statistics</b> section of the <b>Funding Request</b> zone.</p> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b></p> <p>The list includes only those currencies which are defined in the system.</p> <p>If the currency specified in this field is different from the bill's currency, the system does currency conversion before calculating the total debit and credit amount in the funding request. The total debit amount is the sum of funding amount of all bills whose funding amount is in debit. However, the total credit amount is the sum of funding amount and garnishment amount of all bills whose funding amount is in credit. While calculating the total debit amount, the system uses the currency conversion algorithm attached to the <b>Currency Conversion For Payments</b> algorithm spot of the account's division. However, while calculating the total credit amount, the system uses the currency conversion algorithm attached to the <b>Currency Conversion For Adjustments</b> algorithm spot of the account's division.</p> </div>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Account Funding Currency Characteristic Type	<p>Used to indicate the characteristic type. This characteristic should be defined on the account. This characteristic indicates that the funding amount of the account's bills should be converted in the specified currency.</p> <p><b>Note:</b></p> <p>The <b>Search</b>  icon appears corresponding to the <b>Account Funding Currency Characteristic Type</b> field. On clicking the <b>Search</b> icon, the <b>Characteristic Type Search</b> window appears.</p> <p>You must specify a characteristic type where the characteristic entity is set to <b>Account</b>.</p> <p>The converted amount appears in the <b>Funding Currency Amount</b> column of the <b>Selected Bills</b> zone in the <b>Funding Request</b> screen.</p> <p>If the funding amount is in debit, the system uses the currency conversion algorithm attached to the <b>Currency Conversion For Payments</b> algorithm spot of the account's division. However, if the funding amount is in credit, the system uses the currency conversion algorithm attached to the <b>Currency Conversion For Adjustments</b> algorithm spot of the account's division.</p>	Yes
Default Funding Adjustment Type	<p>Used to indicate the adjustment type using which the A/P adjustment should be created against a credit bill on submitting the funding request.</p> <p><b>Note:</b></p> <p>The <b>Search</b>  icon appears corresponding to the <b>Default Funding Adjustment Type</b> field. On clicking the <b>Search</b> icon, the <b>Adjustment Type Search</b> window appears.</p> <p>In the <b>Default Funding Adjustment Type</b> field, you can only specify an adjustment type where the <b>A/P Request Type Code</b> field is set to <b>REFUND</b>.</p>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Default Garnishment Adjustment Type	<p>Used to indicate the adjustment type using which the garnishment adjustment should be created when the amount from the credit bill is transferred to the garnishment contract of the account.</p> <div data-bbox="690 386 1149 779" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>The <b>Search</b>  icon appears corresponding to the <b>Default Garnishment Adjustment Type</b> field. On clicking the <b>Search</b> icon, the <b>Adjustment Type Search</b> window appears.</p> <p>In the <b>Default Garnishment Adjustment Type</b> field, you can only specify an adjustment type where the <b>A/P Request Type Code</b> field is not set to <b>REFUND</b>.</p> </div>	Yes
Threshold Range Algorithm	<p>Used to attach an algorithm which helps to calculate the threshold range for a bill based on the number of payments made for the bill in the specified period.</p> <div data-bbox="690 953 1149 1341" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>You must specify an algorithm which is created using the <b>C1-FDRTTR</b> algorithm type in the <b>Threshold Range Algorithm</b> field.</p> <p>The <b>Search</b>  icon appears corresponding to the <b>Threshold Range Algorithm</b> field. On clicking the <b>Search</b> icon, the <b>Algorithm Search</b> window appears.</p> </div>	No

Field Name	Field Description	Mandatory (Yes or No)
Defer Processing Count	<p>Used to indicate whether a funding request must be processed in the deferred mode (i.e. in the background) when the number of bills in the funding request exceeds the defer processing count.</p> <div data-bbox="690 386 1149 1010" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> You cannot specify a negative value in the <b>Defer Processing Count</b> field.</p> <p>Deferred mode means in the background when the <b>Funding Request Periodic Monitor (C1-FNDRQ)</b> batch is invoked. You can configure the <b>Funding Request Periodic Monitor (C1-FNDRQ)</b> batch such that it is executed at regular intervals. For more information about the <b>Funding Request Periodic Monitor (C1-FNDRQ)</b> batch, refer to <i>Oracle Revenue Management and Billing Batch Guide</i>.</p> <p>If the number of bills in a funding request does not exceed the defer processing count, the system will process the funding request in real time (i.e. immediately).</p> </div>	No
Approval Required	Used to indicate whether the approval is required before creating payments for debit bills and A/P adjustments for credit bills through the funding request.	No
Approval Profile	<p>Used to indicate the approval profile using which the system should determine the debit or credit hierarchy level from where the approval is required. The system considers the debit or credit hierarchy level where the funding amount of the debit or credit bill falls within the threshold limit.</p> <div data-bbox="690 1423 1149 1507" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This field appears only when the <b>Approval Required</b> option is selected.</p> </div>	<p>Yes (Conditional)</p> <div data-bbox="1170 1230 1463 1377" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This field is required when the <b>Approval Required</b> option is selected.</p> </div>

Field Name	Field Description	Mandatory (Yes or No)
Submitter To Do Type	<p>Used to indicate that To Do entry of the specified To Do type must be created when the approver rejects the funding request or raises the request for resubmitting the funding request.</p> <p><b>Note:</b> You must specify the <b>C1-FNDSB To Do</b> type in the <b>Submitter To Do Type</b> field.</p> <p>The <b>Search</b>  icon appears corresponding to the <b>Submitter To Do Type</b> field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.</p> <p>This field appears only when the <b>Approval Required</b> option is selected.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required when the <b>Approval Required</b> option is selected.</p>
Submitter To Do Role	<p>Used to indicate that the users with the specified To Do role must receive a To Do when the approver rejects the funding request or raises the request for resubmitting the funding request.</p> <p><b>Note:</b> This field appears only when the <b>Approval Required</b> option is selected.</p> <p>The list includes only those To Do roles which are associated to the specified submitter To Do type.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required when the <b>Approval Required</b> option is selected.</p>
Currency Conversion Adjustment Algorithm	<p>Used to indicate the currency conversion algorithm. It is used while determining the approval hierarchy for a funding request when the sum total of the debit and credit amount (i.e. which is in credit) is different from the installation options currency.</p> <p><b>Note:</b> This field appears only when the <b>Approval Required</b> option is selected.</p> <p>The <b>Search</b>  icon appears corresponding to the <b>Currency Conversion Adjustment Algorithm</b> field. On clicking the <b>Search</b> icon, the <b>Algorithm Search</b> window appears.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required when the <b>Currency Conversion Required</b> option is selected in the approval profile.</p>

Field Name	Field Description	Mandatory (Yes or No)
Currency Conversion Payment Algorithm	<p>Used to indicate the currency conversion algorithm. It is used while determining the approval hierarchy for a funding request when the sum total of the debit and credit amount (i.e. which is in debit) is different from the installation options currency.</p> <p><b>Note:</b> This field appears only when the <b>Approval Required</b> option is selected.</p> <p>The <b>Search</b>  icon appears corresponding to the <b>Currency Conversion Payment Algorithm</b> field. On clicking the <b>Search</b> icon, the <b>Algorithm Search</b> window appears.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required when the <b>Currency Conversion Required</b> option is selected in the approval profile.</p>

**Tip:** Alternatively, you can edit the details of a funding request type by clicking the **Edit** button in the **Funding Request Type** zone.

5. Modify the details in the **Main** section, if required.
6. Define, edit, or remove characteristics from the funding request type, if required.
7. Click **Save**.

The changes made to the funding request type are saved.

## **Deleting a Funding Request Type**

### **Procedure**

To delete a funding request type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **Funding Request Type**.  
A sub-menu appears.
3. Click the **Search** option from the **Funding Request Type** sub-menu.  
The **Funding Request Type** screen appears.

- In the **Funding Request Type List** zone, click the **Delete** (🗑️) icon in the **Delete** column corresponding to the funding request type that you want to delete.

A message appears confirming whether you want to delete the funding request type.

**Note:** You can delete a funding request type only when you have not created a funding request using the funding request type.

**Tip:** Alternatively, you can delete a funding request type by clicking the **Delete** button in the **Funding Request Type** zone.

- Click **OK**.

The funding request type is deleted.

## Copying a Funding Request Type

Instead of creating a funding request type from scratch, you can create a new funding request type using an existing funding request type. This is possible through copying a funding request type. On copying a funding request type, the details including the characteristics are copied to the new funding request type. You can then edit the details, if required.

### Prerequisites

To copy a funding request type, you should have:

- Funding request type (whose copy you want to create) defined in the application
- Funding request business objects defined in the application
- Currencies defined in the application
- Funding adjustment types defined in the application (where the **A/P Request Type Code** field is set to **REFUND**)
- Garnishment adjustment types defined in the application (where the **A/P Request Type Code** field is not set to **REFUND**)
- A threshold range algorithm defined using the **C1-FDRTTR** algorithm type
- Required approval profiles defined in the application
- A To Do role assigned to the **C1-FNDSB** To Do type in the application
- Funding currency characteristic type defined in the application (where the characteristic entity is set to **Account**)
- A currency conversion algorithm defined for payments and adjustments using the **C1\_CURALGPY** and **C1\_CURALGAD** algorithm type, respectively

### Procedure

To copy a funding request type:

- Click the **Admin** link in the **Application** toolbar.

A list appears.

- From the **Admin** menu, select **F** and then click **Funding Request Type**.

A sub-menu appears.

- Click the **Search** option from the **Funding Request Type** sub-menu.

The **Funding Request Type** screen appears.

- In the **Funding Request Type List** zone, click the **Duplicate** () icon in the **Duplicate** column corresponding to the funding request type whose copy you want to create.

The **Funding Request Type** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the funding request type.
- **Characteristics** - Used to define characteristics for the funding request type.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Funding Request Type	Used to specify the funding request type.	Yes
Business Object	Indicates the business object using which you are defining the funding request type.	Not applicable
Description	Used to specify the description for the funding request type.	Yes
Funding Request Business Object	Used to indicate the business object using which you want to create the funding request.	Yes
Detailed Description	Used to specify additional information about the funding request type.	No
Status	Used to indicate the status of the funding request type. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> You cannot change the status of a funding request type to <b>Inactive</b> when the corresponding funding request is in a status other than <b>Processed</b> or <b>Rejected</b>.</p> </div>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Funding Amount Currency	<p>Used to indicate the currency in which the total debit and credit amount should be calculated in the funding request. The total debit and credit amount appears in the <b>Statistics</b> section of the <b>Funding Request</b> zone.</p> <div data-bbox="695 422 1149 1247" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>The list includes only those currencies which are defined in the system.</p> <p>If the currency specified in this field is different from the bill's currency, the system does currency conversion before calculating the total debit and credit amount in the funding request. The total debit amount is the sum of funding amount of all bills whose funding amount is in debit. However, the total credit amount is the sum of funding amount and garnishment amount of all bills whose funding amount is in credit. While calculating the total debit amount, the system uses the currency conversion algorithm attached to the <b>Currency Conversion For Payments</b> algorithm spot of the account's division. However, while calculating the total credit amount, the system uses the currency conversion algorithm attached to the <b>Currency Conversion For Adjustments</b> algorithm spot of the account's division.</p> </div>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Account Funding Currency Characteristic Type	<p>Used to indicate the characteristic type. This characteristic should be defined on the account. This characteristic indicates that the funding amount of the account's bills should be converted in the specified currency.</p> <p><b>Note:</b></p> <p>The <b>Search</b>  icon appears corresponding to the <b>Account Funding Currency Characteristic Type</b> field. On clicking the <b>Search</b> icon, the <b>Characteristic Type Search</b> window appears.</p> <p>You must specify a characteristic type where the characteristic entity is set to <b>Account</b>.</p> <p>The converted amount appears in the <b>Funding Currency Amount</b> column of the <b>Selected Bills</b> zone in the <b>Funding Request</b> screen.</p> <p>If the funding amount is in debit, the system uses the currency conversion algorithm attached to the <b>Currency Conversion For Payments</b> algorithm spot of the account's division. However, if the funding amount is in credit, the system uses the currency conversion algorithm attached to the <b>Currency Conversion For Adjustments</b> algorithm spot of the account's division.</p>	Yes
Default Funding Adjustment Type	<p>Used to indicate the adjustment type using which the A/P adjustment should be created against a credit bill on submitting the funding request.</p> <p><b>Note:</b></p> <p>The <b>Search</b>  icon appears corresponding to the <b>Default Funding Adjustment Type</b> field. On clicking the <b>Search</b> icon, the <b>Adjustment Type Search</b> window appears.</p> <p>In the <b>Default Funding Adjustment Type</b> field, you can only specify an adjustment type where the <b>A/P Request Type Code</b> field is set to <b>REFUND</b>.</p>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Default Garnishment Adjustment Type	<p>Used to indicate the adjustment type using which the garnishment adjustment should be created when the amount from the credit bill is transferred to the garnishment contract of the account.</p> <div data-bbox="695 386 1146 779" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>The <b>Search</b>  icon appears corresponding to the <b>Default Garnishment Adjustment Type</b> field. On clicking the <b>Search</b> icon, the <b>Adjustment Type Search</b> window appears.</p> <p>In the <b>Default Garnishment Adjustment Type</b> field, you can only specify an adjustment type where the <b>A/P Request Type Code</b> field is not set to <b>REFUND</b>.</p> </div>	Yes
Threshold Range Algorithm	<p>Used to attach an algorithm which helps to calculate the threshold range for a bill based on the number of payments made for the bill in the specified period.</p> <div data-bbox="695 953 1146 1341" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>You must specify an algorithm which is created using the <b>C1-FDRTTR</b> algorithm type in the <b>Threshold Range Algorithm</b> field.</p> <p>The <b>Search</b>  icon appears corresponding to the <b>Threshold Range Algorithm</b> field. On clicking the <b>Search</b> icon, the <b>Algorithm Search</b> window appears.</p> </div>	No

Field Name	Field Description	Mandatory (Yes or No)
Defer Processing Count	<p>Used to indicate whether a funding request must be processed in the deferred mode (i.e. in the background) when the number of bills in the funding request exceeds the defer processing count.</p> <div data-bbox="695 386 1149 1010" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> You cannot specify a negative value in the <b>Defer Processing Count</b> field.</p> <p>Deferred mode means in the background when the <b>Funding Request Periodic Monitor (C1-FNDRQ)</b> batch is invoked. You can configure the <b>Funding Request Periodic Monitor (C1-FNDRQ)</b> batch such that it is executed at regular intervals. For more information about the <b>Funding Request Periodic Monitor (C1-FNDRQ)</b> batch, refer to <i>Oracle Revenue Management and Billing Batch Guide</i>.</p> <p>If the number of bills in a funding request does not exceed the defer processing count, the system will process the funding request in real time (i.e. immediately).</p> </div>	No
Approval Required	Used to indicate whether the approval is required before creating payments for debit bills and A/P adjustments for credit bills through the funding request.	No
Approval Profile	<p>Used to indicate the approval profile using which the system should determine the debit or credit hierarchy level from where the approval is required. The system considers the debit or credit hierarchy level where the funding amount of the debit or credit bill falls within the threshold limit.</p> <div data-bbox="695 1423 1149 1507" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This field appears only when the <b>Approval Required</b> option is selected.</p> </div>	<p>Yes (Conditional)</p> <div data-bbox="1174 1234 1466 1381" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This field is required when the <b>Approval Required</b> option is selected.</p> </div>

Field Name	Field Description	Mandatory (Yes or No)
Submitter To Do Type	<p>Used to indicate that To Do entry of the specified To Do type must be created when the approver rejects the funding request or raises the request for resubmitting the funding request.</p> <p><b>Note:</b> You must specify the <b>C1-FNDSB To Do</b> type in the <b>Submitter To Do Type</b> field.</p> <p>The <b>Search</b>  icon appears corresponding to the <b>Submitter To Do Type</b> field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.</p> <p>This field appears only when the <b>Approval Required</b> option is selected.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required when the <b>Approval Required</b> option is selected.</p>
Submitter To Do Role	<p>Used to indicate that the users with the specified To Do role must receive a To Do when the approver rejects the funding request or raises the request for resubmitting the funding request.</p> <p><b>Note:</b> This field appears only when the <b>Approval Required</b> option is selected.</p> <p>The list includes only those To Do roles which are associated to the specified submitter To Do type.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required when the <b>Approval Required</b> option is selected.</p>
Currency Conversion Adjustment Algorithm	<p>Used to indicate the currency conversion algorithm. It is used while determining the approval hierarchy for a funding request when the sum total of the debit and credit amount (i.e. which is in credit) is different from the installation options currency.</p> <p><b>Note:</b> This field appears only when the <b>Approval Required</b> option is selected.</p> <p>The <b>Search</b>  icon appears corresponding to the <b>Currency Conversion Adjustment Algorithm</b> field. On clicking the <b>Search</b> icon, the <b>Algorithm Search</b> window appears.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required when the <b>Currency Conversion Required</b> option is selected in the approval profile.</p>

Field Name	Field Description	Mandatory (Yes or No)
Currency Conversion Payment Algorithm	<p>Used to indicate the currency conversion algorithm. It is used while determining the approval hierarchy for a funding request when the sum total of the debit and credit amount (i.e. which is in debit) is different from the installation options currency.</p> <p><b>Note:</b> This field appears only when the <b>Approval Required</b> option is selected.</p> <p>The <b>Search</b>  icon appears corresponding to the <b>Currency Conversion Payment Algorithm</b> field. On clicking the <b>Search</b> icon, the <b>Algorithm Search</b> window appears.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required when the <b>Currency Conversion Required</b> option is selected in the approval profile.</p>

**Tip:** Alternatively, you can copy a funding request type by clicking the **Duplicate** button in the **Funding Request Type** zone.

5. Enter the required details in the **Main** section.
6. Define, edit, or remove characteristics from the funding request type, if required.
7. Click **Save**.

The new funding request type is defined.

## Viewing the Funding Request Type Details

### Procedure

To view the details of a funding request type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **Funding Request Type**.  
A sub-menu appears.
3. Click the **Search** option from the **Funding Request Type** sub-menu.  
The **Funding Request Type** screen appears.

- In the **Funding Request Type List** zone, click the **Broadcast**  icon corresponding to the funding request type whose details you want to view.

The **Funding Request Type** zone appears.

- View the details of the funding request type in the **Funding Request Type** zone.

## Funding Request (Used for Searching)

The **Funding Request** screen allows you to search for a funding request using various search criteria. It also allows you to create a funding request. It contains the following zone:

- [Search Funding Request](#) on page 1442

Through this screen, you can navigate to the following screen:

- [Funding Request \(Used for Viewing\)](#) on page 1447

## Search Funding Request

The **Search Funding Request** zone allows you to search for a funding request using various search criteria. It contains the following two sections:

- Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for a funding request using the funding request or bill details. The valid values are: <ul style="list-style-type: none"> <li>Request Details</li> <li>Bill Details</li> </ul> <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"><b>Note:</b> By default, the <b>Request Details</b> option is selected.</div>	Yes
Created From	Used to search funding requests which are created from a particular date onwards. <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"><b>Note:</b> This field appears only when the <b>Request Details</b> option is selected from the <b>Search By</b> list.</div>	No

Field Name	Field Description	Mandatory (Yes or No)
Status	<p>Used to search funding requests with a particular status. The valid values are:</p> <ul style="list-style-type: none"> <li>• Approval In Progress</li> <li>• Deferred Processing</li> <li>• Draft</li> <li>• Processed</li> <li>• Rejected</li> </ul> <p><b>Note:</b> This field appears only when the <b>Request Details</b> option is selected from the <b>Search By</b> list.</p>	No
Created To	<p>Used to search funding requests which are created till a particular date.</p> <p><b>Note:</b> This field appears only when the <b>Request Details</b> option is selected from the <b>Search By</b> list.</p>	No
User ID	<p>Used to search funding requests which are created by a particular user.</p> <p><b>Note:</b> This field appears only when the <b>Request Details</b> option is selected from the <b>Search By</b> list.</p>	No
Funding Request Type	<p>Used to search funding requests which are created using a particular funding request type.</p> <p><b>Note:</b> This field appears only when the <b>Request Details</b> option is selected from the <b>Search By</b> list.</p>	No
Person Name	<p>Used to search funding requests which includes bills of a particular person.</p> <p><b>Note:</b> This field appears only when the <b>Request Details</b> option is selected from the <b>Search By</b> list.</p>	No
Funding Request ID	<p>Used to search a particular funding request.</p> <p><b>Note:</b> This field appears only when the <b>Request Details</b> option is selected from the <b>Search By</b> list.</p>	No
Creation Mode	<p>Used to search funding requests which are created in a particular mode. The valid values are:</p> <ul style="list-style-type: none"> <li>• Automatic</li> <li>• Manual</li> </ul> <p><b>Note:</b> This field appears only when the <b>Request Details</b> option is selected from the <b>Search By</b> list.</p>	No

Field Name	Field Description	Mandatory (Yes or No)
Bill ID	Used to search funding requests which include a particular bill.  <b>Note:</b> This field appears only when the <b>Bill Details</b> option is selected from the <b>Search By</b> list.  The <b>Search</b>  icon appears corresponding to the <b>Bill ID</b> field. On clicking the <b>Search</b> icon, the <b>Bill Search</b> window appears.	No
Bill Date From	Used to search funding requests which include bills that are created from a particular date onwards.  <b>Note:</b> This field appears only when the <b>Bill Details</b> option is selected from the <b>Search By</b> list.	No
Alternate Bill ID	Used to search funding requests which include a particular bill.  <b>Note:</b> This field appears only when the <b>Bill Details</b> option is selected from the <b>Search By</b> list.	No
Bill Date To	Used to search funding requests which include bills that are created till a particular date.  <b>Note:</b> This field appears only when the <b>Bill Details</b> option is selected from the <b>Search By</b> list.	No
Division	Used to search funding requests which includes bills of accounts which belong to a particular division.  <b>Note:</b> This field appears only when the <b>Bill Details</b> option is selected from the <b>Search By</b> list.  You can only view those divisions to which you have access in the <b>Division</b> list.	No

**Note:** You must specify at least one search criterion while searching for a funding request.

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Create Date Time	Displays the date and time when the funding request is created.
Funding Request Information	Displays information about the funding request.  <b>Note:</b> It has a link. On clicking the link, the <b>Funding Request</b> screen appears where you can view the details of the respective funding request.

Column Name	Column Description
Status	Indicates the status of the funding request. The valid values are: <ul style="list-style-type: none"> <li>• Approval In Progress</li> <li>• Deferred Processing</li> <li>• Draft</li> <li>• Processed</li> <li>• Rejected</li> </ul>
Total Debit Amount	Displays the total amount of the debit bills which are added in the funding request.
Total Credit Amount	Displays the total amount of the credit bills which are added in the funding request.
Created By	Indicates the user who has created the funding request.
Creation Mode	Indicates how the funding request is created. The valid values are: <ul style="list-style-type: none"> <li>• Automatic</li> <li>• Manual</li> </ul>

**Note:** Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

How to search for a funding request	<a href="#">Searching for a Funding Request</a> on page 1445

## Searching for a Funding Request

### Prerequisites

To search for a funding request, you should have:

- Funding request types defined in the application

### Procedure

To search for a funding request:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Financial** and then click **Funding Request**.  
A sub-menu appears.
3. Click the **Search** option from the **Funding Request** sub-menu.  
The **Funding Request** screen appears.
4. Enter the search criteria in the **Search Funding Request** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

### 5. Click **Search**.

A list of funding requests that meet the search criteria appears in the **Search Results** section.

## Creating a Funding Request

### Prerequisites

To create a funding request, you should have:

- Funding request types defined in the application

### Procedure

To create a funding request:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Financial** and then click **Funding Request**.  
A sub-menu appears.
3. Click the **Add** option from the **Funding Request** sub-menu.

The **Add Funding Request** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Funding Request Type	Used to indicate the funding request type using which you want to create the funding request.	Yes

**Tip:** Alternatively, you can access this screen by clicking the **Add** button in the **Page Title** area of the **Funding Request** screen.

4. Select the required funding request type from the respective field.
5. Click **OK**.

The funding request is created in the **Draft** status.

## Viewing the Funding Request Details

### Procedure

To view the details of a funding request:

1. Search for the funding request in the **Funding Request** screen.
2. In the **Search Results** section, click the link in the **Funding Request Information** column corresponding to the funding request whose details you want to view.

The **Funding Request** screen appears.

3. Ensure that the **Main** tab is selected.
4. View the details of the funding request in the **Funding Request** zone.
5. View the credit and/or debit bills added in the funding request in the **Selected Bills** zone.

## Funding Request (Used for Viewing)

---

The **Funding Request** screen allows you to:

- Edit the details of a funding request
- Delete or cancel a funding request
- View the details of a funding request
- Submit a funding request for processing
- Approve or reject a funding request
- Request the submitter to resubmit a funding request for approval
- Withdraw a funding request
- View the log of a funding request
- Add a log entry for a funding request

It consists of the following tabs:

- [Funding Request - Main](#) on page 1447
- [Funding Request - Bills](#) on page 1455
- [Funding Request - Log](#) on page 1459

### Funding Request - Main

The **Main** tab displays information about the funding request. It contains the following zones:

- [Funding Request](#) on page 1448
- [Search Bill](#) on page 1451

## Funding Request

The **Funding Request** zone displays the details of the funding request. It contains the following sections:

- **Main** - Displays basic information about the funding request. It contains the following fields:

Field Name	Field Description
Funding Request Information	Displays information about the funding request.
Funding Request Type	Indicates the funding request type using which the funding request is created.  <b>Note:</b> It has a link. On clicking the link, the <b>Funding Request Type</b> screen appears where you can view the details of the respective funding request type.
Status	Indicates the status of the funding request. The valid values are: <ul style="list-style-type: none"> <li>• Approval In Progress</li> <li>• Deferred Processing</li> <li>• Draft</li> <li>• Processed</li> <li>• Rejected</li> </ul>
Status Reason	Indicates the reason why the funding request is rejected.  <b>Note:</b> This field appears only when the funding request is in the <b>Rejected</b> status. It has a link. On clicking the link, the <b>Status Reason</b> screen appears where you can view the details of the respective status reason.
Funding Adjustment Type	Indicates the adjustment type using which the A/P adjustment is created against a credit bill.  <b>Note:</b> It has a link. On clicking the link, the <b>Adjustment Type</b> screen appears where you can view the details of the respective adjustment type.
Garnishment Adjustment Type	Indicates the adjustment type using which the garnishment adjustment is created when the amount from the credit bill is transferred to the garnishment contract of the account.  <b>Note:</b> It has a link. On clicking the link, the <b>Adjustment Type</b> screen appears where you can view the details of the respective adjustment type.
Comments	Displays additional information entered while rejecting the funding request.  <b>Note:</b> This field appears only when the funding request is in the <b>Rejected</b> status.

Field Name	Field Description
Creation Mode	Indicates whether the funding request is created automatically or manually. The valid values are: <ul style="list-style-type: none"> <li>• Automatic</li> <li>• Manual</li> </ul>

- **Statistics** - Displays analytical information about the funding request. It contains the following fields:

Field Name	Field Description
Total Records	Displays the total number of debit or credit bills which are added in the funding request.
Total Records Processed	Displays the total number of debit or credit bills for which payments or adjustments are successfully created in the system.
Total Records Excluded	Displays the total number of debit or credit bills which are excluded from the automatic funding request.
Total Records In Error	Displays the total number of debit or credit bills for which payments or adjustments was not successfully created in the system.
Total Payment Incoming Events Created	Displays the total number of payment events created against the debit bills in the funding request.
Total Adjustments Created	Displays the total number of adjustments created against the credit bills in the funding request.
Total Credit Funding Amount	Displays the sum of funding amount and garnishment amount of all bills whose funding amount is in credit. The sum total is calculated in the funding amount currency which is specified in the funding request type. <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> If the credit bill's currency is different from the funding amount currency, the system does the currency conversion before calculating the sum total. The system uses the currency conversion algorithm attached to the <b>Currency Conversion For Adjustments</b> algorithm spot of the account's division.</p> </div>
Total Debit Funding Amount	Displays the sum of funding amount of all bills whose funding amount is in debit. The sum total is calculated in the funding amount currency which is specified in the funding request type. <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> If the debit bill's currency is different from the funding amount currency, the system does the currency conversion before calculating the sum total. The system uses the currency conversion algorithm attached to the <b>Currency Conversion For Payments</b> algorithm spot of the account's division.</p> </div>

- **Record Actions** - This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the funding request. <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> The <b>Edit</b> button appears only when the funding request is in the <b>Draft</b> status.</p> </div>

Button Name	Button Description
Delete	Used to delete the funding request. <b>Note:</b> The <b>Delete</b> button appears only when the funding request is in the <b>Draft</b> status.
Submit	Used to submit the funding request. <b>Note:</b> The <b>Submit</b> button appears only when the funding request is in the <b>Draft</b> status.
Cancel	Used to cancel the funding request. <b>Note:</b> The <b>Cancel</b> button appears only when the funding request is in the <b>Draft</b> status.
Approve	Used to approve the funding request. <b>Note:</b> The <b>Approve</b> button appears only when: <ul style="list-style-type: none"> <li>The funding request is in the <b>Approval In Progress</b> status.</li> <li>A user with the approval To Do role is reviewing the funding request.</li> </ul>
Reject	Used to reject the funding request. <b>Note:</b> The <b>Reject</b> button appears only when: <ul style="list-style-type: none"> <li>The funding request is in the <b>Approval In Progress</b> status.</li> <li>A user with the approval To Do role is reviewing the funding request.</li> </ul>
Re Submit	Used to request for resubmitting the funding request. <b>Note:</b> The <b>Re Submit</b> button appears only when: <ul style="list-style-type: none"> <li>The funding request is in the <b>Approval In Progress</b> status.</li> <li>A user with the approval To Do role is reviewing the funding request.</li> </ul>
Withdraw	Used to withdraw the funding request. <b>Note:</b> The <b>Withdraw</b> button appears only when: <ul style="list-style-type: none"> <li>The funding request is in the <b>Approval In Progress</b> status.</li> <li>A user with the submitter To Do role is viewing the funding request.</li> </ul>

- **Record Information** - This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the funding request is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.
Status Date/Time	Displays the date and time when the funding request status is updated
Create Date/Time	Displays the date and time when the funding request is created.

- **Characteristics** - Lists the characteristics defined for the funding request. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the characteristic is effective for the funding request.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

### **Search Bill**

The **Search Bill** zone allows you to search for a bill using various search criteria. It appears only when the funding request is in the **Draft** status and the creation mode is set to **Manual**. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	<p>Used to indicate whether you want to search for a bill using the person, account, or bill details. The valid values are:</p> <ul style="list-style-type: none"> <li>• Bill Details</li> <li>• Account Details</li> <li>• Person Details</li> </ul> <p><b>Note:</b> By default, the <b>Bill Details</b> option is selected.</p>	Yes
Bill ID	<p>Used to search a particular bill.</p> <p><b>Note:</b> This field appears only when the <b>Bill Details</b> option is selected from the <b>Search By</b> list.</p> <p>The <b>Search</b>  icon appears corresponding to the <b>Bill ID</b> field. On clicking the <b>Search</b> icon, the <b>Bill Search</b> window appears.</p>	No
Bill Date From	<p>Used to search bills which are created from a particular date onwards.</p> <p><b>Note:</b> This field appears only when the <b>Bill Details</b> option is selected from the <b>Search By</b> list.</p> <p>By default, the current date appears in this field.</p>	Yes
Alternate Bill ID	<p>Used to search a particular bill.</p> <p><b>Note:</b> This field appears only when the <b>Bill Details</b> option is selected from the <b>Search By</b> list.</p>	No
Bill Date To	<p>Used to search bills which are created till a particular date.</p> <p><b>Note:</b> This field appears only when the <b>Bill Details</b> option is selected from the <b>Search By</b> list.</p> <p>By default, the current date appears in this field.</p>	Yes
Bill Balance	<p>Used to indicate whether you want to search bills with debit or credit balance. The valid values are:</p> <ul style="list-style-type: none"> <li>• Credit</li> <li>• Debit</li> </ul> <p><b>Note:</b> This field appears only when the <b>Bill Details</b> option is selected from the <b>Search By</b> list.</p>	No

Field Name	Field Description	Mandatory (Yes or No)
Bill Due Date From	<p>Used to search bills which are due from a particular date onwards.</p> <p><b>Note:</b> This field appears only when the <b>Bill Details</b> option is selected from the <b>Search By</b> list.</p>	No
Division	<p>Used to search bills of accounts which belong to a particular division.</p> <p><b>Note:</b> You can only view those divisions to which you have access in the <b>Division</b> list. This field appears only when the <b>Bill Details</b> option is selected from the <b>Search By</b> list.</p>	No
Bill Due Date To	<p>Used to search bills which are due till a particular date.</p> <p><b>Note:</b> This field appears only when the <b>Bill Details</b> option is selected from the <b>Search By</b> list.</p>	No
Account ID	<p>Used to search bills of a particular account.</p> <p><b>Note:</b> This field appears only when the <b>Account Details</b> option is selected from the <b>Search By</b> list.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required when the <b>Account Details</b> option is selected from the <b>Search By</b> list.</p>
Person ID	<p>Used to search bills which belong to a particular person.</p> <p><b>Note:</b> This field appears only when the <b>Person Details</b> option is selected from the <b>Search By</b> list.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required when:</p> <ul style="list-style-type: none"> <li>• The <b>Person Details</b> option is selected from the <b>Search By</b> list.</li> <li>• The person name is not specified in the search criteria.</li> </ul>
Person Name	<p>Used to search bills which are created for accounts of a particular person.</p> <p><b>Note:</b> This field appears only when the <b>Person Details</b> option is selected from the <b>Search By</b> list.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required when:</p> <ul style="list-style-type: none"> <li>• The <b>Person Details</b> option is selected from the <b>Search By</b> list.</li> <li>• The person ID is not specified in the search criteria.</li> </ul>

Field Name	Field Description	Mandatory (Yes or No)
Country	Used to search bills of persons who reside in a particular country.  <b>Note:</b> This field appears only when the <b>Person Details</b> option is selected from the <b>Search By</b> list.	No

**Note:** You must specify at least one search criterion while searching for a bill.

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description						
Bill Information	Displays additional information about the bill. In addition, this column has a context menu which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Bill</b> screen appears where you can view the details of the respective bill.						
Due Date	Displays the date when the bill is due for payment.						
Outstanding Amount	Displays the unpaid amount of the bill.						
Hold Amount	Displays the amount of the bill which is kept on hold through a hold request.						
Funding Amount	Displays the bill amount which can be used for the funding process. It is calculated in the following manner: <table border="1" data-bbox="573 1052 1463 1360"> <thead> <tr> <th>Bill Type</th> <th>Funding Amount for the Bill</th> </tr> </thead> <tbody> <tr> <td>Debit Bill</td> <td>Outstanding Bill Amount – Hold Amount (set on the bill in a hold request) – Offset Amount (set on the bill in an offset request)</td> </tr> <tr> <td>Credit Bill</td> <td>Outstanding Bill Amount – Hold Amount (set on the bill in a hold request) – Offset Amount (set on the bill in an offset request) – Garnishment Amount (set on the bill in a funding request)</td> </tr> </tbody> </table>	Bill Type	Funding Amount for the Bill	Debit Bill	Outstanding Bill Amount – Hold Amount (set on the bill in a hold request) – Offset Amount (set on the bill in an offset request)	Credit Bill	Outstanding Bill Amount – Hold Amount (set on the bill in a hold request) – Offset Amount (set on the bill in an offset request) – Garnishment Amount (set on the bill in a funding request)
Bill Type	Funding Amount for the Bill						
Debit Bill	Outstanding Bill Amount – Hold Amount (set on the bill in a hold request) – Offset Amount (set on the bill in an offset request)						
Credit Bill	Outstanding Bill Amount – Hold Amount (set on the bill in a hold request) – Offset Amount (set on the bill in an offset request) – Garnishment Amount (set on the bill in a funding request)						
Person Name	Indicates the person to whom the bill belongs. In addition, this column has a context menu which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Person</b> screen appears where you can view the details of the respective person.						
Bill ID	Displays the bill ID.						
Defer Auto Pay	Indicates whether the <b>Defer Auto Pay</b> option is selected on the customer class of the account for which the bill is created. The valid values are: <ul style="list-style-type: none"> <li>• N</li> <li>• Y</li> </ul>						

**Note:** Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

In addition, this section contains the following button:

Button Name	Button Description
Add	Used to add a bill to the funding request.

A check box appears corresponding to each bill. On selecting the check box, you can add the bill to the funding request. You can also select multiple bills at the same time. In addition, you can select the check box corresponding to the column header. This allows you to add all bills listed in the respective page to the funding request.

### Related Topics

How to add a debit or credit bill to a funding request	<a href="#">Adding a Debit or Credit Bill to a Funding Request</a> on page 1460

## Funding Request - Bills

The **Bills** tab lists the bills which are added in the funding request. It contains the following zones:

- [Currency Statistics](#) on page 1455
- [Selected Bills](#) on page 1456
- [Funding Payment Details](#) on page 1459

**Note:** This zone appears only when the funding request is in the **Processed** status and the funding amount of the bill is in debit.

- [Funding Adjustments](#) on page 1459

**Note:** This zone appears only when the funding request is in the **Processed** status and the funding amount of the bill is in credit.

### Currency Statistics

A funding request might include bills in different currencies. The **Currency Statistics** zone lists the sum total of various amount of bills which are created in the same currency. It contains the following columns:

Column Name	Column Description
Currency Code	Indicates the currency in which the sum total is calculated.  <b>Note:</b> Here, the system lists those currencies in which the bills added to the funding request are created.
Total Outstanding Amount	Displays the sum of outstanding amount of all bills which are created in the respective currency.
Total Hold Amount	Displays the sum of hold amount of all bills which are created in the respective currency.
Total Garnishment Amount	Displays the sum of garnishment amount of all bills which are created in the respective currency.
Total Debit Funding Amount	Displays the sum of funding amount (which is in debit) of all bills which are created in the respective currency.
Total Credit Funding Amount	Displays the sum of funding amount (which is in credit) of all bills which are created in the respective currency.

## Selected Bills

The **Selected Bills** zone lists the debit and credit bills which are added to the funding request. It contains the following columns:

Column Name	Column Description						
Bill Date	Displays the date when the bill is created.						
Person Identifier	Displays the primary identifier of the person for whom the bill is created.						
Person Country	Indicates the country where the person is located.						
Invoice Account Identifier	Displays the primary identifier of the account for which the bill is created.						
Funding Amount	<p>Displays the bill amount which can be used for the funding process. It is calculated in the following manner:</p> <table border="1"> <thead> <tr> <th>Bill Type</th> <th>Funding Amount for the Bill</th> </tr> </thead> <tbody> <tr> <td>Debit Bill</td> <td>Outstanding Bill Amount – Hold Amount (set on the bill in a hold request) – Offset Amount (set on the bill in an offset request)</td> </tr> <tr> <td>Credit Bill</td> <td>Outstanding Bill Amount – Hold Amount (set on the bill in a hold request) – Offset Amount (set on the bill in an offset request) – Garnishment Amount (set on the bill in a funding request)</td> </tr> </tbody> </table> <p><b>Note:</b> The funding amount is calculated in the bill's currency.</p>	Bill Type	Funding Amount for the Bill	Debit Bill	Outstanding Bill Amount – Hold Amount (set on the bill in a hold request) – Offset Amount (set on the bill in an offset request)	Credit Bill	Outstanding Bill Amount – Hold Amount (set on the bill in a hold request) – Offset Amount (set on the bill in an offset request) – Garnishment Amount (set on the bill in a funding request)
Bill Type	Funding Amount for the Bill						
Debit Bill	Outstanding Bill Amount – Hold Amount (set on the bill in a hold request) – Offset Amount (set on the bill in an offset request)						
Credit Bill	Outstanding Bill Amount – Hold Amount (set on the bill in a hold request) – Offset Amount (set on the bill in an offset request) – Garnishment Amount (set on the bill in a funding request)						
Currency Code	Indicates the currency in which the funding amount is calculated.						
Hold Amount	Displays the amount of the bill which is kept on hold through a hold request.						
Offset Amount	Displays the amount of the bill which is offset against another bill through an offset request.						
Garnishment Amount	Displays the amount of the credit bill which is transferred to the garnishment contracts of the account through the funding request.						
Original Outstanding Amount	Displays the original outstanding amount when the bill was added in the funding request.						
Bill ID	<p>Displays the bill ID.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Bill</b> screen appears where you can view the details of the respective bill.</p>						
Open Bills	<p>Indicates whether there are any unpaid bills of the person. The valid values are:</p> <ul style="list-style-type: none"> <li>• Y</li> <li>• N</li> </ul>						

Column Name	Column Description
Garnishment Contract	<p>Indicates whether the garnishment contract exists for the account. The valid values are:</p> <ul style="list-style-type: none"> <li>• Y</li> <li>• N</li> </ul> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b></p> <p>This column appears only when the funding request is in the <b>Draft</b> status.</p> <p>The data appears in this column only when a credit bill is added to the funding request.</p> <p>It has a link. On clicking the link, the <b>Edit Garnishment Details</b> screen appears where you can transfer the funding amount from the credit bill to one or more garnishment contracts of the account.</p> </div>
Garnishment	<p>On clicking the <b>View</b>  icon, the <b>View Garnishment Details</b> screen appears where you can view the funding amount transferred to the different garnishment contracts of the account.</p> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b></p> <p>This column does not appear when the funding request is in the <b>Draft</b> status.</p> <p>The <b>View</b>  icon appears in this column only when the funding request is in the <b>Processed</b> status.</p> </div>
Record Status	<p>Indicates the status of the bill record in the funding request. The valid values are:</p> <ul style="list-style-type: none"> <li>• Excluded</li> <li>• Invalid</li> <li>• Masked</li> <li>• Pending</li> <li>• Processed</li> <li>• Valid</li> <li>• Error</li> </ul>
Threshold Range	<p>Indicates the threshold range for a bill which is calculated based on the number of payments made for the bill in the specified period.</p>
Person Name	<p>Indicates the person whose bill is added in the funding request.</p>
Bill Information	<p>Displays the information about the bill.</p>
Split Banking	<p>Indicates whether the split automatic payment feature is used for the account. The valid values are:</p> <ul style="list-style-type: none"> <li>• Y</li> <li>• N</li> </ul>
Funding Currency Amount	<p>Displays the funding amount which is converted in the funding currency defined on the account.</p>

**Note:** Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

In addition, this section contains the following button:

Button Name	Button Description
Delete	Used to delete a bill from the funding request. <b>Note:</b> The <b>Delete</b> button appears only when the funding request is created manually and it is in the <b>Draft</b> status.
Edit	Used to exclude a debit or credit bill from the funding request. <b>Note:</b> The <b>Edit</b> button appears only when the funding request is created automatically and it is in the <b>Draft</b> status.
Hold	Used to create a hold request for one or more bills. However, you cannot select more than 20 bills. On activating or releasing a hold request, the funding amount is automatically updated in the funding request. <b>Note:</b> The <b>Hold</b> button appears only when the funding request is in the <b>Draft</b> status.
Offset	Used to create an offset request for a bill. On processing or unapplying an offset request, the funding amount is automatically updated in the funding request. <b>Note:</b> The <b>Offset</b> button appears only when the funding request is in the <b>Draft</b> status.

A check box appears corresponding to each bill when the funding request is in the **Draft** status. On selecting the check box, you can delete the bill from the funding request. You can also select multiple bills at the same time. In addition, you can select the check box corresponding to the column header. This allows you to delete all bills listed in the respective page from the funding request.

On clicking the **Broadcast**  icon corresponding to a debit or credit bill, the **Funding Payment Details** or **Funding Adjustments** zone appears, respectively.

**Note:** The **Broadcast** icon does not appear when the funding request is in the **Draft** status.

You can filter the list using various search criteria (such as, **Bill ID**, **Alternate Bill ID**, **Record Status**, **Bill Balance**, **Funding Amount From**, **Person ID**, **Funding Amount To**, **Currency**, **Funding Amount Threshold Range**, and **Country**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters**  icon in the upper right corner of this zone.

## Adding a Debit or Credit Bill to a Funding Request

In a funding request, you can only add the debit or credit bills of the accounts for which the **Defer Auto Pay** option is selected on the respective customer class.

### Procedure

To add a debit or credit bill to a funding request:

1. Search for the funding request in the **Funding Request** screen.
2. In the **Search Results** section, click the link in the **Funding Request Information** column corresponding to the funding request whose details you want to edit.

The **Funding Request** screen appears.

3. Ensure that the **Main** tab is selected.
4. Enter the search criteria in the **Search Bill** zone.

#### **Note:**

The **Search Bill** zone appears only when the funding request is in the **Draft** status.

ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search**.

A list of bills that meet the search criteria appears in the **Search Results** section.

6. Select the check box corresponding to a bill that you want to add to the funding request.
7. Click the **Add** button in the **Search Bill** zone.

A message appears indicating that the bill is added to the funding request.

**Note:** You can only add a debit or credit bill of an account for which the **Defer Auto Pay** option is selected on the respective customer class.

8. Click **OK**.

The bill is added to the funding request. The status of the bill record in the funding request is set to **Pending**.

## **Deleting a Debit or Credit Bill from a Funding Request**

### **Procedure**

To delete a debit or credit bill from a funding request:

1. Search for the funding request in the **Funding Request** screen.
2. In the **Search Results** section, click the link in the **Funding Request Information** column corresponding to the funding request whose details you want to edit.

The **Funding Request** screen appears.

3. Click the **Bills** tab.

The **Bills** tab appears.

4. In the **Selected Bills** zone, select the check box corresponding to a bill that you want to delete from the funding request.

5. Click the **Delete** button in the **Selected Bills** zone.

A message appears confirming whether you want to delete the bill from the funding request.

**Note:** The **Delete** button appears only when the funding request is in the **Draft** status.

6. Click **OK**.

The debit or credit bill is deleted from the funding request.

## Excluding a Bill from a Funding Request

If the funding request is manually created through the user interface, you add or delete bills from the funding request when it is in the **Draft** status. However, if the funding request is automatically created through a custom logic, the system allows you to exclude the required bills from the funding request when it is in the **Draft** status. In such case, the status of the record in the funding request is changed to **Excluded**. The excluded bills can then be included in some other funding request.

### Prerequisites

To exclude a bill from a funding request, you should have:

- Values defined for the **CAN\_RSN\_CD\_FLG** lookup field

### Procedure

To exclude a bill from a funding request:

1. Search for the funding request in the **Funding Request** screen.
2. In the **Search Results** section, click the link in the **Funding Request Information** column corresponding to the funding request whose details you want to edit.

The **Funding Request** screen appears.

3. Click the **Bills** tab.

The **Bills** tab appears.

4. In the **Selected Bills** zone, select the check box corresponding to a bill that you want to exclude from the funding request.
5. Click the **Edit** button in the **Selected Bills** zone.

The **Edit Funding Request Details** screen appears. It contains the following field:

Field Name	Field Description
Funding Request Information	Displays the information about the funding request.

In addition, this screen contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Bill Information	Displays the information about the bill.	Not applicable
Garnishment Amount	Displays the funding amount which is transferred to the garnishment contracts of the account.	Not applicable

Field Name	Field Description	Mandatory (Yes or No)						
Funding Amount	<p>Displays the bill amount which can be used for the funding process. It is calculated in the following manner:</p> <table border="1"> <thead> <tr> <th>Bill Type</th> <th>Funding Amount for the Bill</th> </tr> </thead> <tbody> <tr> <td>Debit Bill</td> <td>Outstanding Bill Amount – Hold Amount (set on the bill in a hold request) – Offset Amount (set on the bill in an offset request)</td> </tr> <tr> <td>Credit Bill</td> <td>Outstanding Bill Amount – Hold Amount (set on the bill in a hold request) – Offset Amount (set on the bill in an offset request) – Garnishment Amount (set on the bill in a funding request)</td> </tr> </tbody> </table>	Bill Type	Funding Amount for the Bill	Debit Bill	Outstanding Bill Amount – Hold Amount (set on the bill in a hold request) – Offset Amount (set on the bill in an offset request)	Credit Bill	Outstanding Bill Amount – Hold Amount (set on the bill in a hold request) – Offset Amount (set on the bill in an offset request) – Garnishment Amount (set on the bill in a funding request)	Not applicable
Bill Type	Funding Amount for the Bill							
Debit Bill	Outstanding Bill Amount – Hold Amount (set on the bill in a hold request) – Offset Amount (set on the bill in an offset request)							
Credit Bill	Outstanding Bill Amount – Hold Amount (set on the bill in a hold request) – Offset Amount (set on the bill in an offset request) – Garnishment Amount (set on the bill in a funding request)							
Status	<p>Used to indicate the status of the record in the funding request. The valid values are:</p> <ul style="list-style-type: none"> <li>• Excluded</li> <li>• Invalid</li> <li>• Masked</li> <li>• Pending</li> <li>• Processed</li> <li>• Valid</li> </ul>	Yes						
Cancel Reason	<p>Used to indicate the reason why you want to exclude the bill from the funding request.</p> <p><b>Note:</b> The list includes only those values which are defined in the <b>CAN_RSN_CD_FLG</b> lookup field.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required when you want to exclude the bill from the funding request.</p>						

**Note:** The **Edit** button appears only when the creation mode of the funding request is set to **Automatic** and the funding request is in the **Draft** status.

6. Select the **Excluded** option from the **Status** field.
7. Select the required cancel reason from the respective field.
8. Click **Save**.

The bill is excluded from the funding request. The status of the bill record in the funding request is set to **Excluded**.

## Editing a Funding Request

### Prerequisites

To edit a funding request, you should have:

- Funding adjustment types defined in the application (where the **A/P Request Type Code** field is set to **REFUND**)
- Garnishment adjustment types defined in the application (where the **A/P Request Type Code** field is not set to **REFUND**)

### Procedure

To edit a funding request:

1. Search for the funding request in the **Funding Request** screen.
2. In the **Search Results** section, click the link in the **Funding Request Information** column corresponding to the funding request whose details you want to edit.

The **Funding Request** screen appears.

3. Click the **Edit** button in the **Funding Request** zone.

The **Edit Funding Request** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the funding request.
- **Characteristics** - Used to define a characteristic for the funding request.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Funding Request Information	Displays information about the funding request.	Not applicable
Funding Adjustment Type	<p>Used to indicate the adjustment type using which the A/P adjustment should be created against a credit bill.</p> <p><b>Note:</b></p> <p>The <b>Search</b>  icon appears corresponding to the <b>Funding Adjustment Type</b> field. On clicking the <b>Search</b> icon, the <b>Adjustment Type Search</b> window appears.</p> <p>In the <b>Funding Adjustment Type</b> field, you can only specify an adjustment type where the <b>A/P Request Type Code</b> field is set to <b>REFUND</b>.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required while creating an A/P adjustment against a credit bill.</p>

Field Name	Field Description	Mandatory (Yes or No)
Garnishment Adjustment Type	<p>Used to indicate the adjustment type using which the garnishment adjustment should be created when the amount from the credit bill is transferred to the garnishment contract of the account.</p> <p><b>Note:</b></p> <p>The <b>Search</b>  icon appears corresponding to the <b>Garnishment Adjustment Type</b> field. On clicking the <b>Search</b> icon, the <b>Adjustment Type Search</b> window appears.</p> <p>In the <b>Garnishment Adjustment Type</b> field, you can only specify an adjustment type where the <b>A/P Request Type Code</b> field is not set to <b>REFUND</b>.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required while creating garnishment adjustments for a credit bill.</p>
Comments	Used to specify additional information about the funding request.	No

**Note:** The **Edit** button appears only when the funding request is in the **Draft** status.

4. Modify the details of the funding request, if required.
5. Define, edit, or remove characteristics from the funding request, if required.
6. Click **Save**.

The changes made to the funding request are saved.

How to define a characteristic for a funding request	<a href="#">Defining a Characteristic for a Funding Request</a> on page 1465

## **Defining a Characteristic for a Funding Request**

### **Prerequisites**

To define a characteristic for a funding request, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Funding Request**)

### **Procedure**

To define a characteristic for a funding request:

1. Ensure that the **Characteristics** section is expanded when you are editing a funding request.

The **Characteristics** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the funding request.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the funding request.
Characteristic Type	Used to indicate the characteristic type. <b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Funding Request</b> .	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the funding request.
Characteristic Value	Used to specify the value for the characteristic type. <b>Note:</b> If you select a predefined characteristic type, the <b>Search</b>  icon appears corresponding to the <b>Characteristic Value</b> field. On clicking the <b>Search</b> icon, you can search for a predefined characteristic value.  On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the funding request.

- Enter the required details in the **Characteristics** section.
- If you want to define more than one characteristic for the funding request, click the **Add**  icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from the funding request, click the **Delete**  icon corresponding to the characteristic.

How to edit a funding request	<a href="#">Editing a Funding Request</a> on page 1464

## Deleting a Funding Request

### Procedure

To delete a funding request:

- Search for the funding request in the **Funding Request** screen.

- In the **Search Results** section, click the link in the **Funding Request Information** column corresponding to the funding request that you want to delete.

The **Funding Request** screen appears.

- Click the **Delete** button in the **Funding Request** zone.

A message appears confirming whether you want to delete the funding request.

**Note:** The **Delete** button appears only when the funding request is in the **Draft** status.

- Click **OK**.

The funding request is deleted.

## **Canceling a Funding Request**

### **Prerequisites**

To cancel a funding request, you should have:

- Reasons defined for the **Canceled** status of the **C1-FundingRequest** business object in the **Status Reason** screen

### **Procedure**

To cancel a funding request:

- Search for the funding request in the **Funding Request** screen.
- In the **Search Results** section, click the link in the **Funding Request Information** column corresponding to the funding request that you want to cancel.

The **Funding Request** screen appears.

- Click the **Cancel** button in the **Funding Request** zone.

The **Funding Request** window appears. It contains the following field:

<b>Field Name</b>	<b>Field Description</b>	<b>Mandatory (Yes or No)</b>
Status Reason	Used to indicate the reason why you want to cancel the funding request.  <b>Note:</b> The list includes only those reasons which are defined for the <b>Canceled</b> status of the <b>C1-FundingRequest</b> business object in the <b>Status Reason</b> screen.	Yes

**Note:** The **Cancel** button appears only when the funding request is in the **Draft** status.

- Select the cancellation reason from the **Status Reason** list.
- Click **Save**.

The status of all records in the funding request is changed to **Excluded** and the status of the funding request is changed to **Canceled**. The excluded bills can then be included in some other funding request.

## Submitting a Funding Request

### Prerequisites

To submit a funding request, you should have:

- At least one debit or credit bill in the funding request
- Funding and garnishment adjustment types defined in the funding request
- Funding adjustment type defined in the application (where the **A/P Request Type Code** field is set to **REFUND**)
- Garnishment adjustment type defined in the application (where the **A/P Request Type Code** field is not set to **REFUND**)

### Procedure

To submit a funding request:

1. Search for the funding request in the **Funding Request** screen.
2. In the **Search Results** section, click the link in the **Funding Request Information** column corresponding to the funding request that you want to submit.

The **Funding Request** screen appears.

3. Click the **Submit** button in the **Funding Request** zone.

The system behaves in the following manner:

If...	Then...				
<p>The <b>Approval Required</b> option is selected in the funding request type using which the funding request is created</p>	<p>It calculates the sum of total debit and credit amount in the funding request. Depending on whether the sum total is debit or credit, it uses the debit or credit hierarchy in the approval profile (which is specified in the funding request type), respectively. Depending on the sum total amount, the system behaves in the following manner:</p>				
	<table border="1"> <thead> <tr> <th data-bbox="886 466 1175 506">If...</th> <th data-bbox="1180 466 1466 506">Then...</th> </tr> </thead> <tbody> <tr> <td data-bbox="886 512 1175 894"> <p>The sum total is less than the minimum threshold amount in the approval hierarchy</p> </td> <td data-bbox="1180 512 1466 894"> <p>The system automatically approves the funding request and changes the status of the funding request to either <b>Deferred Processing</b> or <b>Create Funding</b> depending on whether the number of bills in the funding request exceeds the defer processing count.</p> </td> </tr> </tbody> </table>	If...	Then...	<p>The sum total is less than the minimum threshold amount in the approval hierarchy</p>	<p>The system automatically approves the funding request and changes the status of the funding request to either <b>Deferred Processing</b> or <b>Create Funding</b> depending on whether the number of bills in the funding request exceeds the defer processing count.</p>
	If...	Then...			
<p>The sum total is less than the minimum threshold amount in the approval hierarchy</p>	<p>The system automatically approves the funding request and changes the status of the funding request to either <b>Deferred Processing</b> or <b>Create Funding</b> depending on whether the number of bills in the funding request exceeds the defer processing count.</p>				
<p>The sum total is equal to or greater than the threshold amount specified at the first level in the approval hierarchy</p>	<p>The system changes the status of the funding request to <b>Approval In Progress</b>. It creates a To Do using the To Do type specified in the approval profile and assigns it to the users with the To Do role defined at the first level in the approval hierarchy. In addition, it creates a log entry for the funding request when the To Do is created.</p>				

If...	Then...
<p>The <b>Approval Required</b> option is not selected in the funding request type using which the funding request is created</p>	<p>The system changes the status of the funding request to either <b>Deferred Processing</b> or <b>Create Funding</b> depending on whether the number of bills in the funding request exceeds the defer processing count.</p> <p>Once the <b>Funding Request Periodic Monitor (C1-FNDRQ)</b> batch is executed, it checks whether there are any funding requests in the <b>Deferred Processing</b> status. If so, it changes the status of the funding request to <b>Create Funding</b>.</p> <p>Once the status of a funding request is changed to <b>Create Funding</b>, the system creates the A/P adjustment against a bill when the funding amount of the bill is in credit. It also creates non A/P adjustments using the garnishment adjustment type when the funding amount of a credit bill is transferred to the garnishment contracts of the account. However, if the funding amount of a bill is in debit, the funding amount is stamped as the automatic payment amount against the bill in the <b>CI_BILL_ACH</b> table. Then, on executing the <b>Create Automatic Payments and Refunds (APAYCRET)</b> batch, the system creates automatic payment and payment event for such bill.</p> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> The funding and garnishment adjustments are created in the <b>Frozen</b> status.</p> </div>

**Note:** The **Submit** button appears only when the funding request is in the **Draft** status.

## Approving a Funding Request

You can view the number of funding requests which are pending for approval in the **Funding Request** screen. The approver can review, and accordingly approve, reject, or ask the submitter to resubmit the funding request based on the observations.

**Note:** The system will not allow you to approve, reject or resubmit a funding request submitted by you.

### Procedure

To approve a funding request:

1. Do either of the following:

If you want to...	Then...
Approve a funding request through the <b>Funding Request</b> screen	<ol style="list-style-type: none"> <li>1. Search for the funding request in the <b>Funding Request</b> screen.</li> <li>2. In the <b>Search Results</b> section, click the link in the <b>Funding Request Information</b> column corresponding to the funding request which you want to review.</li> </ol>
Approve a funding request from the <b>To Do List</b> screen	<ol style="list-style-type: none"> <li>1. Click the <b>Menu</b> link in the <b>Application</b> toolbar. A list appears.</li> <li>2. From the <b>Main</b> menu, select <b>To Do</b> and then click <b>To Do List</b>. The <b>To Do Type for User Search</b> window appears.</li> <li>3. Enter <b>C1-FNDAP</b> in the <b>To Do Type</b> field.</li> <li>4. Click the <b>Search</b> button corresponding to the <b>To Do Type</b> field. The <b>To Do List</b> screen appears.</li> <li>5. Select the <b>Open</b> option from the <b>Filter by</b> list to view all unassigned To Dos.</li> <li>6. Click the link in the <b>Message</b> column corresponding to the To Do of the funding request that you want to review.</li> </ol>

The **Funding Request** screen appears.

2. Review the details in the **Funding Request** screen.
3. If the information in the funding request is accurate, then click the **Approve** button in the **Funding Request** zone.

The system behaves in the following manner:

If...	Then...
The sum total of the debit and credit amount is equal to or greater than the threshold amount specified at the next level in the approval hierarchy	The system changes the status of the funding request to <b>Approval In Progress</b> . It creates a To Do using the To Do type specified in the approval profile and assigns it to the users with the To Do role defined at the next level in the approval hierarchy. In addition, it creates a log entry for the funding request when the To Do is created.

If...	Then...
<p>The sum total of the debit and credit amount is less than the threshold amount specified at the next level in the approval hierarchy</p>	<p>The system changes the status of the funding request to either <b>Deferred Processing</b> or <b>Create Funding</b> depending on whether the number of bills in the funding request exceeds the defer processing count.</p> <p>Once the <b>Funding Request Periodic Monitor (C1-FNDRQ)</b> batch is executed, it checks whether there are any funding requests in the <b>Deferred Processing</b> status. If so, it changes the status of the funding request to <b>Create Funding</b>.</p> <p>Once the status of a funding request is changed to <b>Create Funding</b>, the system creates the A/P adjustment against a bill when the funding amount of the bill is in credit. It also creates non A/P adjustments using the garnishment adjustment type when the funding amount of a credit bill is transferred to the garnishment contracts of the account. However, if the funding amount of a bill is in debit, the funding amount is stamped as the automatic payment amount against the bill in the <b>CI_BILL_ACH</b> table. Then, on executing the <b>Create Automatic Payments and Refunds (APAYCRET)</b> batch, the system creates automatic payment and payment event for such bill.</p> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> The funding and garnishment adjustments are created in the <b>Frozen</b> status.</p> </div>

**Note:** The **Approve** button appears only when:

- The funding request is in the **Approval In Progress** status.
- A user with the approval To Do role is reviewing the funding request.

## Rejecting a Funding Request

### Prerequisites

To reject a funding request, you should have:

- Reasons defined for the **Rejected** status of the **C1-FundingRequest** business object in the **Status Reason** screen

**Note:** The system will not allow you to approve, reject or resubmit a funding request submitted by you.

### Procedure

To reject a funding request:

1. Do either of the following:

If you want to...	Then...
Reject a funding request through the <b>Funding Request</b> screen	<ol style="list-style-type: none"> <li>1. Search for the funding request in the <b>Funding Request</b> screen.</li> <li>2. In the <b>Search Results</b> section, click the link in the <b>Funding Request Information</b> column corresponding to the funding request which you want to review.</li> </ol>
Reject a funding request from the <b>To Do List</b> screen	<ol style="list-style-type: none"> <li>1. Click the <b>Menu</b> link in the <b>Application</b> toolbar. A list appears.</li> <li>2. From the <b>Main</b> menu, select <b>To Do</b> and then click <b>To Do List</b>. The <b>To Do Type for User Search</b> window appears.</li> <li>3. Enter <b>C1-FNDAP</b> in the <b>To Do Type</b> field.</li> <li>4. Click the <b>Search</b> button corresponding to the <b>To Do Type</b> field. The <b>To Do List</b> screen appears.</li> <li>5. Select the <b>Open</b> option from the <b>Filter by</b> list to view all unassigned To Dos.</li> <li>6. Click the link in the <b>Message</b> column corresponding to the To Do of the funding request that you want to review.</li> </ol>

The **Funding Request** screen appears.

2. Review the details in the **Funding Request** screen.
3. If the information in the funding request is incorrect, then click the **Reject** button in the **Funding Request** zone.

The **Reject Funding Request** window appears. It contains following fields:

Field Name	Field Description	Mandatory (Yes or No)
Status Reason	Used to indicate the reason why you want to reject the funding request.  <div style="border: 1px solid black; padding: 5px;"> <b>Note:</b> The list includes only those reasons which are defined for the <b>Rejected</b> status of the <b>C1-FundingRequest</b> business object in the <b>Status Reason</b> screen.         </div>	Yes
Comments	Used to specify additional information while rejecting the funding request.	No

**Note:** The **Reject** button appears only when:

- The funding request is in the **Approval In Progress** status.
- A user with the approval To Do role is reviewing the funding request.

4. Select the rejection reason from the **Status Reason** list.
5. Click **Save**.

The status of the funding request is changed to **Rejected**.

## **Requesting to Resubmit a Funding Request**

### **Procedure**

To request for resubmitting a funding request:

1. Do either of the following:

<b>If you want to...</b>	<b>Then...</b>
Request for resubmitting a funding request through the <b>Funding Request</b> screen	<ol style="list-style-type: none"> <li>1. Search for the funding request in the <b>Funding Request</b> screen.</li> <li>2. In the <b>Search Results</b> section, click the link in the <b>Funding Request Information</b> column corresponding to the funding request which you want to review.</li> </ol>
Request for resubmitting a funding request from the <b>To Do List</b> screen	<ol style="list-style-type: none"> <li>1. Click the <b>Menu</b> link in the <b>Application</b> toolbar. A list appears.</li> <li>2. From the <b>Main</b> menu, select <b>To Do</b> and then click <b>To Do List</b>. The <b>To Do Type for User Search</b> window appears.</li> <li>3. Enter <b>C1-FNDAP</b> in the <b>To Do Type</b> field.</li> <li>4. Click the <b>Search</b> button corresponding to the <b>To Do Type</b> field. The <b>To Do List</b> screen appears.</li> </ol>

If you want to...	Then...
	<ol style="list-style-type: none"> <li>5. Select the <b>Open</b> option from the <b>Filter by</b> list to view all unassigned To Dos.</li> <li>6. Click the link in the <b>Message</b> column corresponding to the To Do of the funding request that you want to review.</li> </ol>

The **Funding Request** screen appears.

2. Review the details in the **Funding Request** screen.
3. If the information in the funding request is incomplete and you want the submitter to make the required changes and resubmit it, click the **Re Submit** button in the **Funding Request** zone.

The **Resubmit Funding Request** window appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Comments	Used to specify the changes which the submitter should make in the funding request before resubmitting it for approval.	Yes

**Note:** The **Re Submit** button appears only when:

- The funding request is in the **Approval In Progress** status.
- A user with the approval To Do role is reviewing the funding request.

4. Enter the comments in the respective field and then click **Save**.

A To Do is created using the submitter To Do type and assigned to all users with a submitter To Do role specified in the funding request type. In addition, the status of the funding request is changed to **Draft**.

### **Related Topics**

## **Withdrawing a Funding Request**

### **Prerequisites**

To withdraw a funding request, you should have:

- Submitter To Do role (which is specified in the funding request type) associated with the **C1-FNDAP** To Do type

### **Procedure**

To withdraw a funding request:

1. Search for the funding request in the **Funding Request** screen.

2. In the **Search Results** section, click the link in the **Funding Request Information** column corresponding to the funding request that you want to withdraw.

The **Funding Request** screen appears.

3. If you want to make some changes in the funding request which is already sent for approval, click the **Withdraw** button in the **Funding Request** zone.

The status of the funding request is changed to **Draft**. The submitter can then make the required changes and resubmit the funding request for approval. The To Do for approver is automatically closed when the submitter withdraws the funding request. Note that the To Do for approver is automatically closed only when the submitter To Do role is associated with the To Do type specified in the approval profile.

**Note:** The **Withdraw** button appears only when:

- The funding request is in the **Approval In Progress** status.
- A user with the submitter To Do role is viewing the funding request.

## **Transferring the Funding Amount of a Credit Bill to a Garnishment Contract**

### **Prerequisites**

To transfer the funding amount of a credit bill to a garnishment contract, you should have:

- At least one garnishment contract on the account

**Note:** The garnishment contract is a contract which is created using a contract type where the **Special Role Flag** field is set to **Garnishment**.

### **Procedure**

To transfer the funding amount of a credit bill to a garnishment contract:

1. Search for the funding request in the **Funding Request** screen.
2. In the **Search Results** section, click the link in the **Funding Request Information** column corresponding to the funding request whose details you want to edit.

The **Funding Request** screen appears.

3. Click the **Bills** tab.

The **Bills** tab appears.

4. In the **Selected Bills** zone, click the link on the value **Y** in the **Garnishment Contract** column corresponding to a credit bill whose funding amount you want to transfer to a garnishment contract of the account.

The **Edit Garnishment Details** screen appears. It contains the following field:

Field Name	Field Description
Bill Information	Indicates the credit bill whose funding amount you want to transfer to a garnishment contract of the account.

In addition, this screen contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Garnishment Contract	Used to indicate the garnishment contract of the account.	Yes
Garnishment Amount	Used to specify the amount that you want to transfer to the garnishment contract.	Yes

- Enter the required details in the **Edit Garnishment Details** screen.
- If you want to transfer the funding amount of the credit bill to more than one garnishment contract of the account, click the **Add (+)** icon and then repeat step 5.

**Note:** However, if you want to remove a garnishment record from the funding request, click the **Delete** (🗑️) icon corresponding to the garnishment record.

- Click **Save**.

The changes made to the funding request are saved.

## Viewing the Garnishment Details of a Credit Bill

### Procedure

To view the garnishment details of a credit bill:

- Search for the funding request in the **Funding Request** screen.
- In the **Search Results** section, click the link in the **Funding Request Information** column corresponding to the funding request whose details you want to view.  
The **Funding Request** screen appears.
- Click the **Bills** tab.  
The **Bills** tab appears.
- In the **Selected Bills** zone, click the **Broadcast** (📡) icon in the **Garnishment** column corresponding to the credit bill whose garnishment details you want to view.

The **View Garnishment Details** screen appears. It contains the following field:

Field Name	Field Description
Bill Info	Indicates the credit bill whose garnishment details you are viewing.

In addition, this screen contains the following columns:

Column Name	Column Description
Garnishment Contract	Indicates the garnishment contract of the account against which amount from the credit bill is transferred.
Garnishment Amount	Displays the amount which is transferred to the garnishment contract.

**Note:**

The **Garnishment** column does not appear when the funding request is in the **Draft** status.

The **View** () icon appears in the **Garnishment** column only when the funding request is in the **Processed** status.

## Viewing the Payments Created Through a Funding Request

### Procedure

To view the payments created through a funding request:

1. Search for the funding request in the **Funding Request** screen.
2. In the **Search Results** section, click the link in the **Funding Request Information** column corresponding to the funding request whose details you want to view.

The **Funding Request** screen appears.

3. Click the **Bills** tab.

The **Bills** tab appears.

4. In the **Selected Bills** zone, click the **Broadcast**

 icon corresponding to a debit bill whose payment details you want to view.

The **Funding Payments Details** zone appears.

**Note:** The **Broadcast** () icon appears only when the funding request is in the **Processed** status.

5. View the payments created for the debit bill through the funding request in the **Funding Payments Details** zone.

**Note:** The data appears in the **Funding Payments Details** zone only when the **Create Automatic Payments and Refunds (APAYCRET)** batch is executed to create the automatic payment and payment event for the debit bill. For more information about the batch, refer to *Oracle Revenue Management and Billing Batch Guide*.

## Viewing the Adjustments Created Through a Funding Request

### Procedure

To view the adjustments created through a funding request:

1. Search for the funding request in the **Funding Request** screen.
2. In the **Search Results** section, click the link in the **Funding Request Information** column corresponding to the funding request whose details you want to view.

The **Funding Request** screen appears.

3. Click the **Bills** tab.

The **Bills** tab appears.

4. In the **Selected Bills** zone, click the **Broadcast**  icon corresponding to a credit bill whose adjustment details you want to view.

The **Funding Adjustments** zone appears.

**Note:** The **Broadcast**  icon appears only when the funding request is in the **Processed** status.

5. View the A/P adjustments and garnishment adjustments (if any) created for the credit bill through the funding request in the **Funding Adjustments** zone.

## Viewing the Log of a Funding Request

### Procedure

To view the log of a funding request:

1. Search for the funding request in the **Funding Request** screen.
2. In the **Search Results** section, click the link in the **Funding Request Information** column corresponding to the funding request whose log you want to view.

The **Funding Request** screen appears.

3. Click the **Log** tab.

The **Log** tab appears.

4. View the complete trail of actions performed on the funding request in the **Funding Request Log** zone.

## Adding a Log Entry for a Funding Request

### Procedure

To add a log entry for a funding request:

1. Search for the funding request in the **Funding Request** screen.
2. In the **Search Results** section, click the link in the **Funding Request Information** column corresponding to the funding request whose log you want to edit.

The **Funding Request** screen appears.

3. Click the **Log** tab.

The **Log** tab appears.

4. Click the **Add Log Entry** link in the upper right corner of the **Funding Request Log** zone.

The **Add Request Log** window appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Request Information	Displays information about the funding request.	Not applicable
Log Details	Used to specify additional comments on the funding request.	Yes

5. Enter the comments in the **Log Details** field.

6. Click **Save**.

The log entry is added in the **Funding Request Log** zone.

## Refund/Write Off Request

---

### Topics:

- [Refund Request \(Without Approval\) Status Transition](#)
- [Refund Request \(With Approval\) Status Transition](#)
- [Write Off Request \(Without Approval\) Status Transition](#)
- [Write Off Request \(With Approval\) Status Transition](#)
- [Algorithms Used in C1-RefundReq](#)
- [Algorithms Used in C1-WORequest](#)
- [Prerequisites](#)
- [Refund/Write Off Request Type](#)
- [Refund/Write Off Request](#)
- [Refund Request](#)
- [Write Off Request](#)

Oracle Revenue Management and Billing allows you to refund and write off amount to the account. If the amount received from the payor account is matched against the suspense or excess credit contract, the system facilitates you to refund the amount to the payor. In addition, you can refund the amount of a credit bill line item, such as credit bill segment or adjustment, if required. To refund the amount to the account holder, you need to create refund adjustments through a refund request. While creating a refund request, you need to specify the refund request type using which you want to create the refund request. It is the refund request type which helps the system to determine:

- Whether the refund request must be approved before creating refund adjustments in the system
- Approval profile using which the refund request must be approved
- Whether multi-level or single-level approval is required while creating refund adjustments in the system
- Tolerance limit for refund (i.e. minimum refund amount)
- Adjustment type using which the write up adjustment must be created when the total refund amount is less than the minimum refund amount
- Default adjustment type using which refund adjustments must be created

The system allows you to create refund adjustments only using those adjustment types where A/P request type is defined. Once the refund adjustments are created, the A/P Extract process will extract the information and accordingly refund the amount to the payor. During the refund request process, a refund request goes through various statuses in its lifecycle. For more information about the refund request statuses, see [Refund Request \(Without Approval\) Status Transition](#) on page 1483 and [Refund Request \(With Approval\) Status Transition](#) on page 1483.

Note that the lifecycle of a refund request is driven by the business object using which the refund request is created. A refund request business object named **C1-RefundReq** is shipped with the product. The refund request feature explained in this document is articulated based on the lifecycle and logic defined in the **C1-RefundReq** business object.

Similarly, the system facilitates you to write off the amount to the account through a write off request. While creating a write off request, you need to specify the write off request type using which you want to create the write off request. It is the write off request type which helps the system to determine:

- Whether the write off request must be approved before creating write off adjustments in the system
- Approval profile using which the write off request must be approved

- Whether multi-level or single-level approval is required while creating write off adjustments in the system
- Default adjustment type using which write off adjustments must be created

The system allows you to create write off adjustments only using those adjustment types where A/P request type is not defined. During the write off request process, a write off request goes through various statuses in its lifecycle. For more information about the write off request statuses, see [Write Off Request \(Without Approval\) Status Transition](#) on page 1484 and [Write Off Request \(With Approval\) Status Transition](#) on page 1485.

Note that the lifecycle of a write off request is driven by the business object using which the write off request is created. A write off request business object named **C1-WORequest** is shipped with the product. The write off request feature explained in this document is articulated based on the lifecycle and logic defined in the **C1-WORequest** business object.

For more information on how to setup the refund and write off request processes, see [Prerequisites](#) on page 1495.

## Algorithms Used in C1-RefundReq

The following table lists the algorithms which are attached to the **C1-RefundReq** business object:

System Event	Algorithm	Algorithm Type	Description
Information	C1-REFREQINF	C1-REFREQINF	<p>This algorithm generates the refund and write off request information string which appears throughout the application. It concatenates the following fields:</p> <ul style="list-style-type: none"> <li>• Refund or Write Off Request Type Description</li> <li>• Refund or Write Off Request Status Description</li> <li>• Refund or Write Off Request ID</li> </ul>
Post-Processing	C1-REFWOPOSP	C1-REFWOPOSP	<p>This algorithm recalculates and updates the total refund amount in the <b>Refund Request</b> zone when you change the refund amount against an entity while editing a refund request.</p>
Validation	C1-REFUNDVAL	C1-REFUNDVAL	<p>This algorithm validates the following for each entity that you have selected in the refund request:</p> <ul style="list-style-type: none"> <li>• The mandatory data, such as refund amount and adjustment type, is specified.</li> <li>• The refund amount is not less than zero.</li> <li>• The refund amount is not greater than the entity amount.</li> <li>• The refund amount is not greater than the eligible refund amount.</li> <li>• The partial refund is not done at the payment event or bill level.</li> </ul>

The following table lists the algorithms which are used in the lifecycle of the **C1-RefundReq** business object:

Status	System Event	Algorithm	Algorithm Type	Description
Draft	Enter	C1-REF-DFT	C1-REF-DFT	<p>This algorithm fetches the account's main customer's name and address and displays in the <b>Refund Request</b> zone. In addition, when you refund the payments from the <b>Payment Event Summary</b> screen, this algorithm does the following:</p> <ul style="list-style-type: none"> <li>• The total eligible refund amount is calculated and accordingly displayed in the <b>Refund Request</b> screen.</li> <li>• The default refund adjustment type specified in the refund request type is fetched and displayed against the selected payment event or payments.</li> <li>• On selecting a payment event for refund, if all payments in the payment event are matched against the same suspense or excess credit contract, the payment event is added in the <b>Refund Details</b> zone. However, if the payments in the payment event are matched against different suspense or excess credit contracts, the payments of the payment event are added in the <b>Refund Details</b> zone.</li> </ul>
Submitted	Enter	C1-REFUNDSUB	C1-REFUNDSUB	<p>This algorithm checks the following:</p> <ul style="list-style-type: none"> <li>• Whether the approval is required for the refund request. If the approval is required for a refund request, the status of the refund request is changed to <b>Approval In Progress</b>. However, if the approval is not required for a refund request, the status of the refund request is changed to <b>Creating Adjustment</b>.</li> <li>• At least one entity, such as payment event, payment, or credit bill line item (such as credit bill segment or adjustment) is selected in the refund request.</li> <li>• Whether the approval profile attached to the refund request type has the credit hierarchy and C1-REFRQ To Do type defined.</li> </ul>

Status	System Event	Algorithm	Algorithm Type	Description
Approval In Progress	Enter	C1-REFUNDAPP	C1-REFUNDAPP	<p>This algorithm creates the following:</p> <ul style="list-style-type: none"> <li>• A To Do using the To Do type specified in the approval profile which is attached to the refund request type. The To Do is sent to the appropriate users in the approval hierarchy depending on whether hierarchical approval is required or not.</li> <li>• A log entry is added when a To Do is created using the To Do type.</li> </ul>
Approved	Enter	C1-REFAPPRVD	C1-REFAPPRVD	<p>This algorithm is triggered when the approver clicks the <b>Approve</b> button. It checks whether the approval is required from users at the next level in the approval hierarchy. If the approval is required from the next level in the approval hierarchy, the status of the refund request is changed to <b>Approval In Progress</b> and the algorithm attached to the <b>Approval In Progress</b> status is invoked. If further approval is not required, the status of the refund request is changed to <b>Creating Adjustment</b>.</p>
Rejected	-	-	-	-

Status	System Event	Algorithm	Algorithm Type	Description
Creating Adjustment	Enter	C1-REFADJCRI	C1-REFADJCRI	<p>This algorithm does the following:</p> <ul style="list-style-type: none"> <li>Creates the refund adjustments for the refund request. These refund adjustments are created in the <b>Frozen</b> status. The adjustment ID is displayed corresponding to the entity in the <b>Refund Details</b> zone.</li> <li>Stamps the bill ID of credit line item on the adjustment and the corresponding financial transaction.</li> <li>If a match event is present for the credit bill line item and for payments which are matched against the excess credit contract, the existing match event is stamped on the refund or write up adjustment and the corresponding financial transaction. However, when a match event is not present for payments which are matched against the suspense contract or if the match event does not exist, a new match event is created and stamped on the refund or write up adjustment and the corresponding financial transaction.</li> <li>If you are doing a partial refund for any entity, the corresponding match event status is set to <b>Open</b>. However, if you are refunding the entire eligible amount, the corresponding match event status is set to <b>Balanced</b>.</li> <li>The details of the refund adjustments are added in the <b>A/P Check Request (CL_ADJ_APREQ)</b> table.</li> <li>If a write up adjustment is created, the write up adjustment type specified in the refund request type is displayed corresponding to the entity in the <b>Refund Details</b> zone.</li> </ul>
Processed	-	-	-	-

Status	System Event	Algorithm	Algorithm Type	Description
Voided	Enter	C1-REFVOID	C1-REFVOID	<p>This algorithm is invoked on click of the <b>Void</b> button for a refund request which is in processed state.</p> <p>The algorithm cancels all the frozen adjustments created for the refund request.</p> <p>The algorithm fetches the adjustment cancel reason required for cancelling the adjustments in the status reason characteristics (<b>F1_BUS_OBJ_STATUS_RSN_CHAR</b> table). If the reason is not found, it will use the status reason selected by the user</p>

## Algorithms Used in C1-WORequest

The following table lists the algorithms which are attached to the **C1-WORequest** business object:

System Event	Algorithm	Algorithm Type	Description
Information	C1-REFREQINF	C1-REFREQINF	<p>This algorithm generates the refund and write off request information string which appears throughout the application. It concatenates the following fields:</p> <ul style="list-style-type: none"> <li>• Refund or Write Off Request Type Description</li> <li>• Refund or Write Off Request Status Description</li> <li>• Refund or Write Off Request ID</li> </ul>
Post-Processing	C1-WOPOSP	C1-WOPOSP	<p>This algorithm recalculates and updates the total write off amount in the <b>Write Off Request</b> zone when you change the write off amount against an entity while editing a write off request.</p>

System Event	Algorithm	Algorithm Type	Description
Validation	C1-WOBOVAL	C1-WOBOVAL	<p>This algorithm validates the following for each entity that you have selected in the write off request:</p> <ul style="list-style-type: none"> <li>• The mandatory data, such as write off amount and adjustment type, is specified.</li> <li>• The write off amount is not less than zero.</li> <li>• The write off amount is not greater than the entity amount.</li> <li>• The write off amount is not greater than the eligible write off amount.</li> <li>• The partial write off is not done at the bill level.</li> <li>• The A/P Request Type is not defined in the selected adjustment type.</li> </ul>

The following table lists the algorithms which are used in the lifecycle of the **C1-WORequest** business object:

Status	System Event	Algorithm	Algorithm Type	Description
Draft	-	-	-	-
Submitted	Enter	C1-WOSUBMIT	C1-WOSUBMIT	<p>This algorithm checks the following:</p> <ul style="list-style-type: none"> <li>• Whether the approval is required for the write off request. If the approval is required for a write off request, the status of the write off request is changed to <b>Approval In Progress</b>. However, if the approval is not required for a write off request, the status of the write off request is changed to <b>Creating Adjustment</b>.</li> <li>• At least one debit bill line item (such as debit bill segment or adjustment) is selected in the write off request.</li> <li>• Whether the approval profile attached to the write off request type has the debit hierarchy and C1-WOREQ To Do type defined.</li> </ul>

Status	System Event	Algorithm	Algorithm Type	Description
Approval In Progress	Enter	C1-WOAPPROVL	C1-WOAPPROVL	<p>This algorithm creates the following:</p> <ul style="list-style-type: none"> <li>• A To Do using the To Do type specified in the approval profile which is attached to the write off request type. The To Do is sent to the appropriate users in the approval hierarchy depending on whether hierarchical approval is required or not.</li> <li>• A log entry is added when a To Do is created using the To Do type.</li> </ul>
Approved	Enter	C1-WOAPPROVD	C1-WOAPPROVD	<p>This algorithm is triggered when the approver clicks the <b>Approve</b> button. It checks whether the approval is required from users at the next level in the approval hierarchy. If the approval is required from the next level in the approval hierarchy, the status of the write off request is changed to <b>Approval In Progress</b> and the algorithm attached to the <b>Approval In Progress</b> status is invoked. If further approval is not required, the status of the write off request is changed to <b>Creating Adjustment</b>.</p>
Rejected	-	-	-	-

Status	System Event	Algorithm	Algorithm Type	Description
Creating Adjustment	Enter	C1-WOAJCRT	C1-WOAJCRT	<p>This algorithm does the following:</p> <ul style="list-style-type: none"> <li>Creates the write off adjustments for the write off request. These write off adjustments are created in the <b>Frozen</b> status. The adjustment ID is displayed corresponding to the entity in the <b>Write Off Details</b> zone.</li> <li>Stamps the bill ID of debit line item on the adjustment and the corresponding financial transaction.</li> <li>If a match event is present for the debit bill line item, the existing match event is stamped on the write off adjustment and the corresponding financial transaction. However, if the match event does not exist, a new match event is created and stamped on the write off adjustment and the corresponding financial transaction.</li> <li>If you are doing a partial write off for any entity, the corresponding match event status is set to <b>Open</b>. However, if the entire eligible amount is written off, the corresponding match event status is set to <b>Balanced</b>.</li> </ul>
Processed	-	-	-	-
Cancelled	Enter	C1-WOCANCEL	C1-WOCANCEL	<p>This algorithm is invoked on click of the <b>Cancel</b> button for a write off request which is in the <b>Processed</b> state.</p> <p>This algorithm cancels all the frozen adjustments created for the write off request.</p> <p>The algorithm fetches the adjustment cancel reason required for cancelling the adjustments in the status reason characteristics (<b>F1_BUS_OBJ_STATUS_RSN_CHAR</b> table). If the reason is not found, it will use the status reason selected by the user.</p>

## Prerequisites

---

To setup the refund request process, you need to do the following:

- Define the required adjustment types (for creating refund adjustments) where A/P request type is defined
- Define the required adjustment types (for creating write up adjustments) where A/P request type is not defined
- Define the required characteristic types where the characteristic entity is set to **Refund Write Off Request Type**
- Define the required characteristic types where the characteristic entity is set to **Refund Write Off Request**
- Define voided and rejected status reasons for the **C1-RefundReq** business object
- Assign the **C1-REFRQ** To Do type to a To Do role whose users must receive To Do generated while submitting a refund request for approval
- Define the required approval profiles with the credit hierarchy and **C1-REFRQ** To Do type
- Define an algorithm of the **C1-ADI-INFO** algorithm type and attach to the **Adjustment Information** system event in the **Algorithms** tab of the **Installation Options — Framework** screen
- Define the required refund request types in the system

To setup the write off request process, you need to do the following:

- Define the required adjustment types (for creating write off adjustments) where A/P request type is not defined
- Define the required characteristic types where the characteristic entity is set to **Refund Write Off Request Type**
- Define the required characteristic types where the characteristic entity is set to **Refund Write Off Request**
- Define cancelled and rejected status reasons for the **C1-WOREquest** business object
- Assign the **C1-WOREQ** To Do type to a To Do role whose users must receive To Do generated while submitting a write off request for approval
- Define the required approval profiles with the debit hierarchy and **C1-WOREQ** To Do type
- Define an algorithm of the **C1-ADI-INFO** algorithm type and attach to the **Adjustment Information** system event in the **Algorithms** tab of the **Installation Options — Framework** screen
- Define the required write off request types in the system

## Refund/Write Off Request Type

---

Oracle Revenue Management and Billing allows you to define:

- **Refund Request Type** — It is used to create a refund request. You can define multiple refund request types in the system. A refund request type helps the system to determine:
  - Whether the refund request must be approved before creating refund adjustments in the system
  - Approval profile using which the refund request must be approved
  - Whether multi-level or single-level approval is required while creating refund adjustments in the system
  - Tolerance limit for refund (i.e. minimum refund amount)
  - Adjustment type using which the write up adjustment must be created when the total refund amount is less than the minimum refund amount
  - Default adjustment type using which refund adjustments must be created

- **Write Off Request Type** — It is used to create a write off request. You can define multiple write off request types in the system. A write off request type helps the system to determine:
  - Whether the write off request must be approved before creating write off adjustments in the system
  - Approval profile using which the write off request must be approved
  - Whether multi-level or single-level approval is required while creating write off adjustments in the system
  - Default adjustment type using which write off adjustments must be created

While defining a refund or write off request type where approval workflow is required, you need to select the **Approval Required** check box. If the **Approval Required** check box is selected, the refund or write off request (which is created using the refund or write off request type) is sent for approval before creating the refund or write off adjustments. However, if the **Approval Required** check box is not selected, the refund or write off adjustments are created immediately on submitting a refund or write off request. The approval process is configured through the approval profile. The approval profile allows you to define the approval hierarchy. You can define a debit and credit hierarchy in the approval profile using the threshold amount. The debit approval hierarchy is used for approving write off request and credit approval hierarchy is used for approving refund request. Therefore, while defining an approval profile for refund, you need to define credit hierarchy and set the To Do Type to **C1-REFRQ**. However, while defining an approval profile for write off, you need to define debit hierarchy and set the To Do Type to **C1-WOREQ**.

You can define an approval hierarchy where users with different To Do role at each level can approve or reject the refund or write off request. For example, you can define an approval profile called A1 with two levels of approval. At the first level, a user with the *Manager* To Do role will approve or reject the refund or write off request, and at the second level, a user with the *Senior Manager* To Do role will approve or reject the refund or write off request. On submitting a refund or write off request where approval is required, a notification in the form of To Do is sent to all users with the To Do role defined at the first level in the hierarchy. Once the request is approved at the first level, a notification is sent to all users with the To Do role defined at the next level in the hierarchy. This process continues till the approval is received from all levels in the hierarchy. Once users at all levels approve the refund or write off request, the refund or write off adjustments are created. However, if an approver at any level in the hierarchy rejects the request, the refund or write off adjustments are not created.

The approval hierarchy is controlled by the threshold amount. For example, you define an approval profile called A1 with two levels of approval — First Level (Threshold Amount: 300, To Do Role: *Manager*) and Second Level (Threshold Amount: 500, To Do Role: *Senior Manager*). Now, if the total refund or write off amount is equal to 300 or less than 500, then the approval is required only from the first level in the hierarchy and not from the second level in the hierarchy. However, if the total refund or write off amount is equal to or greater than 500, then the approval is required from the first level and then from the second level in the hierarchy. But, if the total refund or write off amount is less than 300, then the approval is not required from any levels in the hierarchy. The system will automatically approve the refund or write off request and create the refund or write off adjustments.

The system supports both single-level and multi-level approval process while approving refund or write off request. If the **Hierarchical Approval** check box is selected while defining a refund or write off request type, the approval hierarchy defined in the approval profile is followed based on the threshold limit. However, if the **Hierarchical Approval** check box is not selected while defining a refund or write off request type, the approval is required only from the approval level where the total refund or write off amount falls within the threshold limit. Let us understand this with the help of some examples.

### **Example 1**

Refund Request Type	Approval Profile	Approval Hierarchy	Hierarchical Approval								
R1	Refund Analyst	<p><b>Credit Hierarchy</b></p> <table border="1"> <thead> <tr> <th>Threshold Amount</th> <th>To Do Role</th> </tr> </thead> <tbody> <tr> <td>\$500</td> <td>Senior Analyst</td> </tr> <tr> <td>\$750</td> <td>Manager</td> </tr> <tr> <td>\$1500</td> <td>Senior Manager</td> </tr> </tbody> </table>	Threshold Amount	To Do Role	\$500	Senior Analyst	\$750	Manager	\$1500	Senior Manager	Yes
Threshold Amount	To Do Role										
\$500	Senior Analyst										
\$750	Manager										
\$1500	Senior Manager										
R2	Refund Analyst	<p><b>Credit Hierarchy</b></p> <table border="1"> <thead> <tr> <th>Threshold Amount</th> <th>To Do Role</th> </tr> </thead> <tbody> <tr> <td>\$500</td> <td>Senior Analyst</td> </tr> <tr> <td>\$750</td> <td>Manager</td> </tr> <tr> <td>\$1500</td> <td>Senior Manager</td> </tr> </tbody> </table>	Threshold Amount	To Do Role	\$500	Senior Analyst	\$750	Manager	\$1500	Senior Manager	No
Threshold Amount	To Do Role										
\$500	Senior Analyst										
\$750	Manager										
\$1500	Senior Manager										

The following table indicates how the system will behave in different refund scenarios:

Refund Request	Refund Request Type	Total Refund Amount (\$)	Comments
RR1	R1	200	This refund request is automatically approved by the system because the total refund amount is less than \$500.
RR2	R1	750	<p>The To Do is sent for approval to the following users in the specified order:</p> <ol style="list-style-type: none"> <li>1. Users with the Senior Analyst To Do role</li> <li>2. Users with the Manager To Do role</li> </ol> <p>This is because the total refund amount is either equal to \$750 or less than \$1500 and hierarchical approval is required.</p>
RR3	R1	2000	<p>The To Do is sent for approval to the following users in the specified order:</p> <ol style="list-style-type: none"> <li>1. Users with the Senior Analyst To Do role</li> <li>2. Users with the Manager To Do role</li> <li>3. Users with the Senior Manager To Do role</li> </ol> <p>This is because the total refund amount is greater than \$1500 and hierarchical approval is required.</p>
RR4	R2	200	This refund request is automatically approved by the system because the total refund amount is less than \$500.

Refund Request	Refund Request Type	Total Refund Amount (\$)	Comments
RR5	R2	750	The To Do is sent for approval to users with the Manager To Do role. This is because the total refund amount is either equal to \$750 or less than \$1500 and hierarchical approval is not required.
RR6	R2	2000	The To Do is sent for approval to users with the Senior Manager To Do role. This is because the total refund amount is greater than \$1500 and hierarchical approval is not required.

**Example 2**

Write Off Request Type	Approval Profile	Approval Hierarchy	Hierarchical Approval	
W1	Write Off Analyst	<b>Debit Hierarchy</b>	Yes	
		<b>Threshold Amount</b>		<b>To Do Role</b>
		\$100		Senior Analyst
		\$200		Manager
		\$300		Senior Manager
W2	Write Off Analyst	<b>Debit Hierarchy</b>	No	
		<b>Threshold Amount</b>		<b>To Do Role</b>
		\$100		Senior Analyst
		\$200		Manager
		\$300		Senior Manager

The following table indicates how the system will behave in different write off scenarios:

Write Off Request	Write Off Request Type	Total Write Off Amount (\$)	Comments
WO1	W1	90	This write off request is automatically approved by the system because the total write off amount is less than \$100.
WO2	W1	250	<p>The To Do is sent for approval to the following users in the specified order:</p> <ol style="list-style-type: none"> <li>1. Users with the Senior Analyst To Do role</li> <li>2. Users with the Manager To Do role</li> </ol> <p>This is because the total write off amount is either equal to \$200 or less than \$300 and hierarchical approval is required.</p>

Write Off Request	Write Off Request Type	Total Write Off Amount (\$)	Comments
WO3	W1	500	<p>The To Do is sent for approval to the following users in the specified order:</p> <ol style="list-style-type: none"> <li>1. Users with the Senior Analyst To Do role</li> <li>2. Users with the Manager To Do role</li> <li>3. Users with the Senior Manager To Do role</li> </ol> <p>This is because the total write off amount is greater than \$300 and hierarchical approval is required.</p>
WO4	W2	90	This write off request is automatically approved by the system because the total write off amount is less than \$100.
WO5	W2	250	The To Do is sent for approval to users with the Manager To Do role. This is because the total write off amount is either equal to \$200 or less than \$300 and hierarchical approval is not required.
WO6	W2	500	The To Do is sent for approval to users with the Senior Manager To Do role. This is because the total write off amount is greater than \$300 and hierarchical approval is not required.

The **Refund/Write Off Request Type** screen allows you to define, edit, delete, and copy a refund and write off request type. This screen consists of the following zones:

- [Refund/Write Off Request Type List](#) on page 1499
- [Refund/Write Off Request Type](#) on page 1500

## Refund/Write Off Request Type List

The **Refund/Write Off Request Type List** zone lists refund and write off request types that are already defined in the system. It contains the following columns:

Column Name	Column Description
Refund/Write Off Request Type	Displays the refund or write off request type.
Description	Displays the description of the refund or write off request type.
Edit	On clicking the <b>Edit</b> (  ) icon, the <b>Refund/Write Off Request Type</b> screen appears where you can edit the details of the refund and write off request type.
Duplicate	On clicking the <b>Duplicate</b> (  ) icon, the <b>Refund/Write Off Request Type</b> screen appears where you can define a refund and write off request type using an existing refund and write off request type.
Delete	<p>On clicking the <b>Delete</b> () icon, you can delete the refund or write off request type.</p> <div style="border: 1px solid black; padding: 5px; margin-top: 5px;"> <p><b>Note:</b> You can delete a refund or write off request type only when you have not created a refund or write off request using the refund or write off request type.</p> </div>

On clicking the **Broadcast**  icon corresponding to refund or write off request type, the **Refund/Write Off Request Type** zone appears with the details of the respective refund or write off request type.

## Refund/Write Off Request Type

The **Refund/Write Off Request Type** zone displays the details of the refund or write off request type. This zone consists of the following sections:

- **Main** — This section provides basic information about the refund or write off request type. It contains the following fields:

Field Name	Field Description
Refund/Write Off Request Type	Displays the refund or write off request type.
Refund/Write Off Request Business Object	Indicates the business object that will be used to create the refund or write off request.  <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears with the details of the respective business object.
Description	Displays the description of the refund or write off request type.
Detailed Description	Displays additional information about the refund or write off request type.
Status	Indicates the status of the refund or write off request type. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>
Action	Indicates whether the request type is created for refund or write off. The valid values are: <ul style="list-style-type: none"> <li>• Refund</li> <li>• Write Off</li> </ul>
Minimum Refund Amount	Displays the minimum refund amount.  <b>Note:</b> This field appears only when the <b>Action</b> field is set to <b>Refund</b> .

Field Name	Field Description
Write Up Adjustment Type	Indicates the adjustment type using which the write up adjustment must be created when the total refund amount is less than the minimum refund amount.  <b>Note:</b> This field appears only when the <b>Action</b> field is set to <b>Refund</b> .
Approval Required	Indicates whether approval is required while creating the refund or write off adjustments using the refund or write off request type.
Approval Profile	Indicates the approval profile which must be used to define approval hierarchy for the refund or write off request type.  <b>Note:</b> This field appears only when the <b>Approval Required</b> check box is selected. It has a link. On clicking the link, the <b>Approval Profile</b> screen appears with the details of the respective approval profile.
Hierarchical Approval	Indicates whether multi-level or single approval is required while creating the refund or write off adjustments using the refund or write off request type.  <b>Note:</b> This field appears only when the <b>Approval Required</b> check box is selected.
Adjustment Type	Indicates the adjustment type using which the refund or write off adjustments must be created.  <b>Note:</b> It has a link. On clicking the link, the <b>Adjustment Type</b> screen appears with the details of the respective adjustment type.

- **Characteristics** — This section lists the characteristics defined for the refund or write off request type. It contains the following columns:

Column Name	Column Description
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- **Record Actions** — This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the refund or write off request type.
Delete	Used to delete the refund or write off request type.  <b>Note:</b> You can delete a refund or write off request type only when you have not created a refund or write off request using the refund or write off request type.
Duplicate	Used to create a new refund or write off request type using an existing refund or write off request type.

- **Record Information** — This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the refund or write off request type is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.

By default, the **Refund/Write Off Request Type** zone does not appear in the **Refund/Write Off Request Type** screen. It appears only when you click the **Broadcast**  icon corresponding to the refund or write off request type in the **Refund/Write Off Request Type List** zone.

## Defining a Refund or Write Off Request Type

### Prerequisites

To define a refund or write off request type, you should have:

- Refund or Write Off request business objects defined in the application
- Approval profiles defined in the application
- Adjustment types with and without A/P request type defined in the application

### Procedure

To define a refund or write off request type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **R** and then click **Refund/Write Off Request Type**.  
A sub-menu appears.
3. Click the **Add** option from the **Refund/Write Off Request Type** sub-menu.

The **Select Business Object** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Refund/Write Off Request Type Business Object	Used to indicate the business object that you want to use to create the refund or write off request type.	Yes

**Tip:** Alternatively, you can access the **Select Business Object** screen by clicking the **Add** button in the **Page Title** area of the **Refund/Write Off Request Type** screen.

**Note:** The **Select Business Object** screen appears only when there are multiple refund and write off request type business objects defined in the application. If there is only one refund and write off request type business object defined in the application, the **Refund/Write Off Request Type** screen appears.

4. Select the required refund and write off request type business object from the respective field.
5. Click **OK**.

The **Refund/Write Off Request Type** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the refund or write off request type.
- **Characteristics** - Used to define characteristics for the refund or write off request type.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Refund/Write Off Request Type	Used to specify the refund or write off request type.	Yes
Business Object	Indicates the refund and write off request type business object used while defining the refund or write off request type.	Not applicable
Refund/Write Off Request Business Object	Used to indicate the business object that you want to use while creating the refund or write off request.	Yes
Description	Used to specify the description for the refund or write off request type.	Yes
Detailed Description	Used to specify additional information about the refund or write off request type.	No
Status	Used to indicate the status of the refund or write off request type. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> You cannot change the status of a refund or write off request type to <b>Inactive</b> if there are refund or write off requests which are created using the refund or write off request type and are currently in the <b>Draft</b> or <b>Approval In Progress</b> status.</p> </div>	Yes
Action	Used to indicate whether the request type is created for refund or write off. The valid values are: <ul style="list-style-type: none"> <li>• Refund</li> <li>• Write Off</li> </ul>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Minimum Refund Amount	<p>Used to specify the minimum refund amount. This field is used to define tolerance limit for refund. If the total refund amount in a refund request is less than the minimum refund amount, the system creates a write up adjustment. However, if the total refund amount in a refund request is equal to or greater than the minimum refund amount, the system creates a refund adjustment.</p> <p><b>Note:</b> This field appears only when the <b>Action</b> field is set to <b>Refund</b>.</p>	Yes
Write Up Adjustment Type	<p>Used to indicate the adjustment type using which the write up adjustment must be created when the total refund amount is less than the minimum refund amount.</p> <p><b>Note:</b> This field appears only when the <b>Action</b> field is set to <b>Refund</b>. You can create write up adjustments only using those adjustment types where A/P request type is not defined.</p>	Yes
Approval Required	<p>Used to indicate whether approval is required while creating the refund or write off adjustments using the refund or write off request type.</p>	No
Approval Profile	<p>Used to indicate the approval profile which must be used to define approval hierarchy for the refund or write off request type.</p> <p><b>Note:</b> This field appears only when the <b>Approval Required</b> check box is selected.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required when the <b>Approval Required</b> check box is selected.</p>
Hierarchical Approval	<p>Used to indicate whether multi-level or single-level approval is required while creating the refund or write off adjustments using the refund or write off request type.</p> <p><b>Note:</b> This field appears only when the <b>Approval Required</b> check box is selected.</p>	No

Field Name	Field Description	Mandatory (Yes or No)
Refund Adjustment Type	<p>Used to indicate the adjustment type using which the refund adjustments must be created. This default adjustment type appears when you select the payments or credit bill line items for refund. You can then change the adjustment type, if required, while editing a refund request.</p> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>This field appears only when the <b>Action</b> field is set to <b>Refund</b>.</p> <p>The list includes only those adjustment types where A/P request type is defined.</p> </div>	Yes
Write Off Adjustment Type	<p>Used to indicate the adjustment type using which the write off adjustments must be created. This default adjustment type appears when you select the debit bill line items for write off. You can then change the adjustment type, if required, while editing a write off request.</p> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>This field appears only when the <b>Action</b> field is set to <b>Write Off</b>.</p> <p>You can create write off adjustments only using those adjustment types where A/P request type is not defined.</p> </div>	Yes

6. Enter the required details depending on whether you want to define refund or write off request type.

**Note:** You can search for an adjustment type by clicking the **Search**  icon corresponding to the respective field.

7. Define characteristics for the refund or write off request type, if required.
8. Click **Save**.

The refund or write off request type is defined.

## Defining Characteristics for a Refund or Write Off Request Type

### Prerequisites

To define characteristics for a refund or write off request type, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Refund Write Off Request Type**)

### Procedure

To define characteristics for a refund or write off request type:

- Ensure that the **Characteristics** section is expanded when you are defining, editing, or copying a refund or write off request type.

The **Characteristics** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Type	Used to indicate the characteristic type. <b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Refund Write Off Request Type</b> .	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the refund or write off request type.
Characteristic Value	Used to specify the value for the characteristic type. <b>Note:</b> On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the refund or write off request type.

- Enter the required details in the **Characteristics** section.

**Note:** If you select a predefined characteristic type, the **Search** () icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

- If you want to define more than one characteristic for the refund or write off request type, click the **Add** () icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from the refund or write off request type, click the **Delete** () icon corresponding to the characteristic.

## Editing a Refund or Write Off Request Type

### Prerequisites

To edit a refund or write off request type, you should have:

- Refund or Write Off request business objects defined in the application

- Approval profiles defined in the application
- Adjustment types with and without A/P request type defined in the application

### **Procedure**

To edit a refund or write off request type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **R** and then click **Refund/Write Off Request Type**.  
A sub-menu appears.
3. Click the **Search** option from the **Refund/Write Off Request Type** sub-menu.  
The **Refund/Write Off Request Type** screen appears.
4. In the **Refund/Write Off Request Type List** zone, click the **Edit**  icon in the **Edit** column corresponding to the refund or write off request type whose details you want to edit.

The **Refund/Write Off Request Type** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the refund or write off request type.
- **Characteristics** - Used to define characteristics for the refund or write off request type.

The **Main** section contains the following fields:

<b>Field Name</b>	<b>Field Description</b>	<b>Mandatory (Yes or No)</b>
Refund/Write Off Request Type	Displays the refund or write off request type.	Not applicable
Business Object	Indicates the refund and write off request type business object used while defining the refund or write off request type.	Not applicable
Refund/Write Off Request Business Object	Used to indicate the business object that you want to use while creating the refund or write off request.	Yes
Description	Used to specify the description for the refund or write off request type.	Yes
Detailed Description	Used to specify additional information about the refund or write off request type.	No
Status	<p>Used to indicate the status of the refund or write off request type. The valid values are:</p> <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> You cannot change the status of a refund or write off request type to <b>Inactive</b> if there are refund or write off requests which are created using the refund or write off request type and are currently in the <b>Draft</b> or <b>Approval In Progress</b> status.</p> </div>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Action	<p>Indicates whether the request type is created for refund or write off. The valid values are:</p> <ul style="list-style-type: none"> <li>• Refund</li> <li>• Write Off</li> </ul>	Not applicable
Minimum Refund Amount	<p>Used to specify the minimum refund amount. This field is used to define tolerance limit for refund. If the total refund amount in a refund request is less than the minimum refund amount, the system creates a write up adjustment. However, if the total refund amount in a refund request is equal to or greater than the minimum refund amount, the system creates a refund adjustment.</p> <div style="border: 1px solid black; padding: 2px;"> <p><b>Note:</b> This field appears only when the <b>Action</b> field is set to <b>Refund</b>.</p> </div>	Yes
Write Up Adjustment Type	<p>Used to indicate the adjustment type using which the write up adjustment must be created when the total refund amount is less than the minimum refund amount.</p> <div style="border: 1px solid black; padding: 2px;"> <p><b>Note:</b> This field appears only when the <b>Action</b> field is set to <b>Refund</b>. You can create write up adjustments only using those adjustment types where A/P request type is not defined.</p> </div>	Yes
Approval Required	Used to indicate whether approval is required while creating the refund or write off adjustments using the refund or write off request type.	No
Approval Profile	<p>Used to indicate the approval profile which must be used to define approval hierarchy for the refund or write off request type.</p> <div style="border: 1px solid black; padding: 2px;"> <p><b>Note:</b> This field appears only when the <b>Approval Required</b> check box is selected.</p> </div>	<p>Yes (Conditional)</p> <div style="border: 1px solid black; padding: 2px;"> <p><b>Note:</b> This field is required when the <b>Approval Required</b> check box is selected.</p> </div>

Field Name	Field Description	Mandatory (Yes or No)
Hierarchical Approval	Used to indicate whether multi-level or single-level approval is required while creating the refund or write off adjustments using the refund or write off request type.  <b>Note:</b> This field appears only when the <b>Approval Required</b> check box is selected.	No
Refund Adjustment Type	Used to indicate the adjustment type using which the refund adjustments must be created. This default adjustment type appears when you select the payments or credit bill line items for refund. You can then change the adjustment type, if required, while editing a refund request.  <b>Note:</b> This field appears only when the <b>Action</b> field is set to <b>Refund</b> . The list includes only those adjustment types where A/P request type is defined.	Yes
Write Off Adjustment Type	Used to indicate the adjustment type using which the write off adjustments must be created. This default adjustment type appears when you select the debit bill line items for write off. You can then change the adjustment type, if required, while editing a write off request.  <b>Note:</b> This field appears only when the <b>Action</b> field is set to <b>Write Off</b> . You can create write off adjustments only using those adjustment types where A/P request type is not defined.	Yes

**Tip:** Alternatively, you can click the **Edit** button in the **Refund/Write Off Request Type** zone to edit the details of the refund or write off request type.

5. Modify the required details in the **Main** section.

**Note:** You can search for an adjustment type by clicking the **Search**  icon corresponding to the respective field.

6. Define, edit, or remove characteristics from the refund or write off request type, if required.
7. Click **Save**.

The changes made to the refund or write off request type are saved.

How to define characteristics for a refund or write off request type	<a href="#">Defining Characteristics for a Refund or Write Off Request Type</a> on page 1505

**Copying a Refund or Write Off Request Type**

Instead of creating a refund or write off request type from scratch, you can create a new refund or write off request type using an existing refund or write off request type. This is possible through copying a refund or write off request type. On copying a refund or write off request type, the details including the characteristics are copied to the new refund or write off request type. You can then edit the details, if required.

**Prerequisites**

To copy a refund or write off request type, you should have:

- Refund or Write Off request type (whose copy you want to create) defined in the application
- Refund or Write Off request business objects defined in the application
- Approval profiles defined in the application
- Adjustment types with and without A/P request type defined in the application

**Procedure**

To copy a refund or write off request type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **R** and then click **Refund/Write Off Request Type**.  
A sub-menu appears.
3. Click the **Search** option from the **Refund/Write Off Request Type** sub-menu.  
The **Refund/Write Off Request Type** screen appears.
4. In the **Refund/Write Off Request Type List** zone, click the **Duplicate** () icon in the **Duplicate** column corresponding to the refund or write off request type whose copy you want to create.

The **Refund/Write Off Request Type** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the refund or write off request type.
- **Characteristics** - Used to define characteristics for the refund or write off request type.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Refund/Write Off Request Type	Used to specify the refund or write off request type.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Business Object	Indicates the refund and write off request type business object used while defining the refund or write off request type.	Not applicable
Refund/Write Off Request Business Object	Used to indicate the business object that you want to use while creating the refund or write off request.	Yes
Description	Used to specify the description for the refund or write off request type.	Yes
Detailed Description	Used to specify additional information about the refund or write off request type.	No
Status	<p>Used to indicate the status of the refund or write off request type. The valid values are:</p> <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> You cannot change the status of a refund or write off request type to <b>Inactive</b> if there are refund or write off requests which are created using the refund or write off request type and are currently in the <b>Draft</b> or <b>Approval In Progress</b> status.</p> </div>	Yes
Action	<p>Used to indicate whether the request type is created for refund or write off. The valid values are:</p> <ul style="list-style-type: none"> <li>• Refund</li> <li>• Write Off</li> </ul>	Yes
Minimum Refund Amount	<p>Used to specify the minimum refund amount. This field is used to define tolerance limit for refund. If the total refund amount in a refund request is less than the minimum refund amount, the system creates a write up adjustment. However, if the total refund amount in a refund request is equal to or greater than the minimum refund amount, the system creates a refund adjustment.</p> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> This field appears only when the <b>Action</b> field is set to <b>Refund</b>.</p> </div>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Write Up Adjustment Type	<p>Used to indicate the adjustment type using which the write up adjustment must be created when the total refund amount is less than the minimum refund amount.</p> <div data-bbox="743 386 1166 642" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This field appears only when the <b>Action</b> field is set to <b>Refund</b>. You can create write up adjustments only using those adjustment types where A/P request type is not defined.</p> </div>	Yes
Approval Required	Used to indicate whether approval is required while creating the refund or write off adjustments using the refund or write off request type.	No
Approval Profile	<p>Used to indicate the approval profile which must be used to define approval hierarchy for the refund or write off request type.</p> <div data-bbox="743 961 1166 1073" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This field appears only when the <b>Approval Required</b> check box is selected.</p> </div>	Yes (Conditional) <div data-bbox="1190 867 1463 1010" style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> This field is required when the <b>Approval Required</b> check box is selected.</p> </div>
Hierarchical Approval	<p>Used to indicate whether multi-level or single-level approval is required while creating the refund or write off adjustments using the refund or write off request type.</p> <div data-bbox="743 1283 1166 1394" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This field appears only when the <b>Approval Required</b> check box is selected.</p> </div>	No
Refund Adjustment Type	<p>Used to indicate the adjustment type using which the refund adjustments must be created. This default adjustment type appears when you select the payments or credit bill line items for refund. You can then change the adjustment type, if required, while editing a refund request.</p> <div data-bbox="743 1692 1166 1911" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This field appears only when the <b>Action</b> field is set to <b>Refund</b>. The list includes only those adjustment types where A/P request type is defined.</p> </div>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Write Off Adjustment Type	Used to indicate the adjustment type using which the write off adjustments must be created. This default adjustment type appears when you select the debit bill line items for write off. You can then change the adjustment type, if required, while editing a write off request.  <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This field appears only when the <b>Action</b> field is set to <b>Write Off</b>. You can create write off adjustments only using those adjustment types where A/P request type is not defined.</p> </div>	Yes

**Tip:** Alternatively, you can click the **Duplicate** button in the **Refund/Write Off Request Type** zone to create a copy of the refund or write off request type.

- Enter the required details in the **Main** section.

**Note:** You can search for an adjustment type by clicking the **Search**  icon corresponding to the respective field.

- Define, edit, or remove characteristics from the refund or write off request type, if required.
- Click **Save**.

The new refund or write off request type is defined.

## Searching for a Refund or Write Off Request

### Prerequisites

To search for a refund or write off request, you should have:

- Refund or Write Off request types defined in the application

### Procedure

To search for a refund or write off request:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Financial** and then click **Refund/Write Off Request**.  
A sub-menu appears.
3. Click the **Search** option from the **Refund/Write Off Request** sub-menu.  
The **Refund/Write Off Request** screen appears.
4. Enter the search criteria in the **Search Refund/Write Off Request** zone depending on whether you want to search for a refund or write off request.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search**.

A list of refund or write off requests that meet the search criteria appears in the **Search Results** section.

## Creating a Refund Request

### Prerequisites

To create a refund request, you should have:

- Refund request types defined in the application

### Procedure

To create a refund request:

1. Do either of the following:

If you want to...	Then...
Define a refund request from the <b>Account Receivable Central</b> screen	<ol style="list-style-type: none"> <li>1. Click the <b>Main</b> link in the <b>Application</b> toolbar. A list appears.</li> <li>2. From the <b>Main</b> menu, select <b>Financial</b> and then click <b>Account Receivable Central</b>.</li> <li>3. Search for the bill in the <b>Account Receivable Central</b> screen.</li> <li>4. In the <b>Search Results</b> section, select the required bill and then click <b>Refund</b>.</li> </ol> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> Only one bill at a time is allowed to select for <b>Refund Request</b> from the <b>Account Receivable Central</b> screen.</p> </div>
Define a refund request from the <b>Refund Request</b> screen	<ol style="list-style-type: none"> <li>1. Click the <b>Main</b> link in the <b>Application</b> toolbar. A list appears.</li> <li>2. From the <b>Main</b> menu, select <b>Financial</b> and then click <b>Refund/Write Off Request</b>.  A sub-menu appears.</li> <li>3. Click the <b>Add</b> option from the <b>Refund/Write Off Request</b> sub-menu.</li> </ol>

The **Select Request Type** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Action	<p>Displays the type of request (refund or write off) to be created.</p> <p><b>Note:</b> This field is pre-populated if the refund request is created from the <b>Account Receivable Central</b> screen. This field is editable if the refund request is created from the <b>Refund/Write Off Request</b> screen.</p>	Not applicable
Refund/Write Off Request Type	<p>Used to indicate the request type using which you want to create the refund or write off request.</p> <p><b>Note:</b> The refund request types are listed when you set the <b>Action</b> field to <b>Refund</b> and the write off request types are listed when you set the <b>Action</b> field to <b>Write Off</b>.</p>	Yes
Account	<p>Used to indicate the account for which you want to create the refund or write off request.</p> <p><b>Note:</b> This field is pre-populated if the refund request is created from the <b>Account Receivable Central</b> screen. This field is editable if the refund request is created from the <b>Refund/Write Off Request</b> screen. You can search for an account by clicking the <b>Search</b>  icon corresponding to the respective field.</p>	Yes

**Tip:**  
Alternatively, you can access the **Select Request Type** screen:

- By clicking the **Add** button in the **Page Title** area of **Refund/Write Off Request** screen.
- By selecting the payment which you want to refund in the **Payment Event Summary** screen and then clicking the **Refund** button. Note that the system will allow you to refund only those payments which are in the **Frozen** status and matched against the suspense or excess credit contract.

2. Select the required refund request type from the respective field.
3. Click **Save**.

The refund request is defined and the status of the refund request is set to **Draft**. The **Refund Request** screen appears where you can view the details of the refund request. It contains the following tabs:

**Note:** The refund request can be created only for bill with outstanding amount lesser than zero.

- **Main** – Displays information about the refund request. It contains the following zones:
    - **Refund Request** – Displays the details of the refund request.
    - **Refund Details** – Lists the entities, such as payment events, payments, and/or credit bill line items (such as credit bill segments and adjustments), of the account which must be refunded.
  - **Payments** — Used to search payment events or individual payments that you want to refund. This tab appears only when the refund request is in the **Draft** status.
  - **Bills** — Used to search bills with credit line items, such as credit bill segments and adjustments, that you want to refund. This tab appears only when the refund request is in the **Draft** status.
  - **Log** – Lists the complete trail of actions performed on the refund request.
4. Add payment events, payments, or credit bill line items that you want to refund.
  5. Edit the refund amount of each entity, if required.
  6. Define characteristics for the refund request, if required.
  7. Override the address if you want to sent the refund to an address other than the account’s main customer address.

## Refund Request

Once you create a refund request, the **Refund Request** screen allows you to:

- Edit and delete a refund request
- View the details of a refund request
- Submit a refund request for approval
- Approve or reject a refund request
- View the log of a refund request
- Add a log entry for a refund request
- Void a refund request

This screen consists of the following tabs:

- **Main** – Displays information about the refund request. It contains the following zones:
  - **Refund Request** – Displays the details of the refund request.
  - **Refund Details** – Lists the entities, such as payment events, payments, and/or credit bill line items (such as credit bill segments and adjustments), of the account which must be refunded.
  - **Bill Line Items** — Displays the details of the bill which must be refunded.

**Note:** This zone appears when you click the Broadcast  icon corresponding to the entity type as **Bill** in the **Refund Details** zone.

- **Bills** — Used to search bills with credit line items, such as credit bill segments and adjustments, that you want to refund. It contains the following zones:
  - **Search Bills** — Lists completed bills of the account which are either with credit balance or have one or more credit line items, such as bill segments and adjustments. You can filter the bills using various search criteria.

- **Bill Line Items** — Lists the debit and credit bill segments and adjustments of the bill.

This tab appears only when the refund request is in the **Draft** status.

- **Payments** — Used to search payment events or individual payments that you want to refund. It contains the following zones:
  - **Search Payment Event** — Lists the payment events which are created for the account. You can filter the payment events using various search criteria.
  - **Payments** — Lists all payments created through the payment event.

This tab appears only when the refund request is in the **Draft** status.

- **Log** – Lists the complete trail of actions performed on the refund request.

## Refund Request - Main

The **Main** tab displays information about the refund request. It contains the following zones:

- [Refund Request](#) on page 1527
- [Refund Details](#) on page 1529
- [Bill Line Items](#) on page 1530

## Refund Request

The **Refund Request** zone displays the details of the refund request. This zone contains the following sections:

- **Main** — This section provides basic information about the refund request. It contains the following fields:

Field Name	Field Description
Refund Request Information	Displays information about the refund request.
Refund Request Type	Indicates the refund request type using which the refund request is created.  <b>Note:</b> It has a link. On clicking the link, the <b>Refund/Write Off Request Type</b> screen appears where you can view the details of the refund request type.
Status	Indicates the status of the refund request. The valid values are: <ul style="list-style-type: none"> <li>• Draft</li> <li>• Approval In Progress</li> <li>• Rejected</li> <li>• Processed</li> <li>• Voided</li> </ul>
Status Reason	Indicates the reason why the refund request is rejected or voided.  <b>Note:</b> This field appears only when the refund request is in the <b>Rejected</b> or <b>Voided</b> status. It has a link. On clicking the link, the <b>Status Reason</b> screen appears where you can view the details of the rejected or voided reason.

Field Name	Field Description
Account Information	Indicates the account for which the refund request is created. <b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account.
Person Name	Indicates the person for whom the refund request is created.
Override Address	Indicates whether the account's mailing address is overridden.
Address 1	Displays the house number and apartment name.
Address 2	Displays the street name.
Address 3	Indicates the landmark, if available.
Address 4	Displays the village, town, or city name.
City	Displays the city name.
State	Displays the state name.
Country	Displays the country name.
Postal	Displays the postal or zip code.
Comments	Displays additional information about the refund request.
Total Refund Amount	Displays the total refund amount.

- **Characteristics** — Lists the characteristics defined for the refund request. It contains the following fields:

Field Name	Field Description
Effective Date	Indicates the date from when the characteristic is effective for the refund request.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- **Record Actions** — This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the refund request. <b>Note:</b> The <b>Edit</b> button appears only when the refund request is in the <b>Draft</b> status.
Delete	Used to delete the refund request. <b>Note:</b> The <b>Delete</b> button appears only when the refund request is in the <b>Draft</b> status.
Submit	Used to submit the refund request for approval. <b>Note:</b> The <b>Submit</b> button appears only when the refund request is in the <b>Draft</b> status.

Button Name	Button Description
Approve	Used to approve the refund request.  <b>Note:</b> The <b>Approve</b> button appears only when: <ul style="list-style-type: none"> <li>The refund request is in the <b>Approval In Progress</b> status.</li> <li>A user with the approval To Do role is reviewing the refund request.</li> </ul>
Reject	Used to reject the refund request.  <b>Note:</b> The <b>Reject</b> button appears only when: <ul style="list-style-type: none"> <li>The refund request is in the <b>Approval In Progress</b> status.</li> <li>A user with the approval To Do role is reviewing the refund request.</li> </ul>
Void	Used to void the refund request.  <b>Note:</b> The <b>Void</b> button appears only when the refund request is in the <b>Processed</b> status.

- **Record Information** — This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the refund request is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.
Status Date/Time	Displays the date and time when the refund request status is updated
Create Date/Time	Displays the date and time when the refund request is created.

### Refund Details

The **Refund Details** zone lists the payment events, payments, and credit bill line items (such as bill segments and adjustments) that you have added to the refund request. This zone contains the following columns:

Column Name	Column Description
Entity ID	Displays the entity ID.
Entity Type	Indicates whether the entity is a payment event, payment, bill, bill segment, or an adjustment.
Currency	Indicates the currency in which the entity was created.
Entity Amount	Displays the entity amount.
Refund Amount	Displays the amount that must be refunded.  <b>Note:</b> By default, the amount which is eligible for refund appears in this column. You can edit the amount, if required. However, you cannot specify the amount greater than the eligible amount.

Column Name	Column Description
Contract Information	<p>Displays additional information about the contract against which the bill segment or adjustment is created or against which the payment is matched. In addition, this column has a context menu which helps in navigating to other screens in the application.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Contract</b> screen appears where you can view the details of the respective contract.</p>
Adjustment Type	<p>Indicates the adjustment type using which the refund adjustment must be created.</p> <p><b>Note:</b> By default, the adjustment type specified in the refund request type appears in this column. You can change the adjustment type, if required, by editing the refund request.</p>
Adjustment Information	<p>Displays information about the refund adjustment.</p> <p><b>Note:</b></p> <p>It has a link. On clicking the link, the <b>Adjustment</b> screen appears where you can view the details of the respective adjustment.</p> <p>The data appears in this column only when the status of the refund request is <b>Processed</b>.</p> <p>The information string appears only when an algorithm of the <b>C1-ADI-INFO</b> algorithm type is attached to the <b>Adjustment Information</b> system event in the <b>Algorithms</b> tab of the <b>Installation Options — Framework</b> screen.</p>

**Note:** On clicking the Broadcast  icon corresponding to the entity type as **Bill**, the **Bill Line Items** zone appears with the details of the respective bill.

In addition to above columns, this screen contains following buttons:

Button Name	Button Description
Edit	Used to edit the details of bill line items.
Delete	Used to delete the bill line items.

### Bill Line Items

The **Bill Line Items** zone lists the debit and credit bill segments and adjustments of the bill. This zone contains the following columns:

Column Name	Column Description
Bill ID	Displays the bill ID.
Entity ID	Displays the bill segment or adjustment ID.
Entity Type	Indicates whether the entity is a bill, bill segment or an adjustment.
Currency	Displays the currency in which the entity was created.
Entity Amount	Displays the bill segment or adjustment amount.

Column Name	Column Description
Request Amount	Displays the bill segment or adjustment amount which is eligible for refund. In other words, it means entity amount minus amount refunded.  <b>Note:</b> If the bill segment or adjustment has debit balance, the eligible amount for refund would be zero.
Contract Information	Displays additional information about the contract against which the bill segment or adjustment is created. In addition, this column has a context menu which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Contract</b> screen appears where you can view the details of the respective contract.
Adjustment Type	Indicates the adjustment type using which the refund adjustment must be created.  <b>Note:</b> It has a link. On clicking the link, the <b>Adjustment Type</b> screen appears where you can view the details of the respective adjustment type.
Adjustment Information	Displays information about the refund adjustment.

By default, the **Bill Line Items** zone does not appear in the **Main** tab. It appears only when you click the **Broadcast**  icon corresponding to the bill in the **Refund Details** zone.

#### **Related Topics**

How to add a credit bill line item to the refund request	<a href="#">Adding a Credit Bill Line Item to the Refund Request</a> on page 1543

## **Refund Request - Bills**

The **Bills** tab allows you to search bills with credit line items, such as credit bill segments and adjustments, that you want to refund. It contains the following zones:

- [Search Bills](#) on page 1531
- [Bill Line Items](#) on page 1533

### **Search Bills**

The **Search Bills** zone lists completed bills of the account which are either with credit balance or have one or more credit line items, such as bill segments and adjustments. You can filter the bills using various search criteria. This zone contains the following two sections:

- **Search Criteria** — The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for a bill using bill or bill and price item details. The valid values are: <ul style="list-style-type: none"> <li>• Bill Details</li> <li>• Bill and Price Item Details</li> </ul> <div style="border: 1px solid black; padding: 2px;"> <b>Note:</b> By default, the <b>Bill Details</b> option is selected. </div>	Yes
Bill ID	Used to search a particular bill.	No
Bill Date From	Used to search bills which are created from a particular date onwards.	No
To	Used to search bills which are created till a particular date.	No
Price Item	Used to search bills which are created for a particular price item. <div style="border: 1px solid black; padding: 2px;"> <b>Note:</b>  This field appears only when you select <b>Bill and Price Item Details</b> option from the <b>Search By</b> list.  You can search for a price item by clicking the <b>search</b>  icon corresponding to the field. </div>	No

- **Search Results** — On clicking the **Search** button, the search results are filtered based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Bill ID	Displays the bill ID.
Bill Information	Displays additional information about the bill. In addition, this column has a context menu which helps in navigating to other screens in the application. <div style="border: 1px solid black; padding: 2px;"> <b>Note:</b> It has a link. On clicking the link, the <b>Bill</b> screen appears with the details of the respective bill. </div>
Amount	Displays the total bill amount.

If you want to refund a bill with credit balance and all credit line items, you need to select the check box corresponding to the bill and then click the **Add** button in the **Search Results** section. All credit bill segments and adjustments of the bill are added in the **Refund Details** zone on the **Main** tab. However, if you select a bill (with credit balance) which contains one or more debit line items or if you select a bill (with debit balance) which contains one or more credit line items, the system will not allow you to add the credit line items by directly adding the bill. In such case, you need to individually select the credit bill segments and adjustments of the bill and then add them to the refund request.

**Note:** If a refund request is currently in progress for a credit bill segment or adjustment of a bill, those bills of the account are not listed in the **Search Bills** zone. In addition, a bill with all debit line items are not listed in the **Search Bills** zone.

### Bill Line Items

The **Bill Line Items** zone lists the debit and credit bill segments and adjustments of the bill. This zone contains the following columns:

Column Name	Column Description
Entity ID	Displays the bill segment or adjustment ID.
Entity Type	Indicates whether the entity is a bill segment or an adjustment.
Entity Information	<p>Displays additional information about the bill segment or adjustment. If the entity is a bill segment, the context menu appears in the column which helps in navigating to other screens in the application.</p> <p><b>Note:</b> It has a link. If the entity is a bill segment, the <b>Bill Segment</b> screen appears where you can view the details of the respective bill segment on clicking the link. However, if the entity is an adjustment, the <b>Adjustment</b> screen appears with the details of the respective adjustment on clicking the link.</p>
Entity Amount	Displays the bill segment or adjustment amount.
Eligible Amount	<p>Displays the bill segment or adjustment amount which is eligible for refund. In other words, it means entity amount minus amount refunded.</p> <p><b>Note:</b> If the bill segment or adjustment has debit balance, the eligible amount for refund would be zero.</p>
Amount Refunded	Displays the amount which is already refunded to the account.
Contract Information	<p>Displays additional information about the contract against which the bill segment or adjustment is created. In addition, this column has a context menu which helps in navigating to other screens in the application.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Contract</b> screen appears where you can view the details of the respective contract.</p>

You can select one or more credit bill segments or adjustments and click the **Add** button in this zone to add selected credit bill segments or adjustments to the refund request.

By default, the **Bill Line Items** zone does not appear in the **Bills** tab. It appears only when you click the **Broadcast**  icon corresponding to the bill in the **Search Bills** zone.

## Refund Request - Payments

The **Payments** tab allows you to search payment events or individual payments that you want to refund. It contains the following zones:

- [Search Payment Event](#) on page 1534
- [Payments](#) on page 1535

### Search Payment Event

The **Search Payment Event** zone lists the payment events which are created for the account. You can filter the payment events using various search criteria. This zone contains the following two sections:

- **Search Criteria** — The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate that you want to search for a payment event using the payment details. The valid values are: <ul style="list-style-type: none"> <li>• Payment Details</li> </ul> <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"> <b>Note:</b> By default, the <b>Payment Details</b> option is selected.         </div>	Yes
Payment Event ID	Used to search a particular payment event.	No
Suspense/Excess Credit Contract	Used to search payment events which include payments made against a particular suspense or excess credit contract. <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"> <b>Note:</b> The suspense and excess credit contracts are listed only when these contracts are associated with the account         </div>	No
Check Number	Used to search a payment event which includes payment made through a particular check.	No
Payment Date	Used to search payment events which include payments created from a particular date onwards.	No
To	Used to search payment events which include payments created till a particular date.	No
MICR ID	Used to search payment events which include payments made with a particular MICR code.	No

- **Search Results** — On clicking the **Search** button, the search results are filtered based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Payment Event Information	Displays additional information about the payment event. <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"> <b>Note:</b> It has a link. On clicking the link, the <b>Payment Event</b> screen appears where you can view the details of the respective payment event.         </div>
Payment Date	Displays the date when the payments were created.
Tender Amount	Displays the tender amount.
Payment Event ID	Displays the payment event ID.

If you want to refund all payments of a payment event, you need to select the check box corresponding to the payment event and then click the **Add** button in the **Search Results** section. If all payments in the payment event are matched against the same suspense or excess credit contract, the payment event is added in the **Refund Details**

zone on the **Main** tab. However, if the payments in the payment event are matched against different suspense or excess credit contracts, the payments of the payment event are added in the **Refund Details** zone.

**Note:** If a refund request is currently in progress for a payment event or for any payment of a payment event, those payments events of the account are not listed in the **Search Payment Event** zone.

## Creating a Refund Request

### Prerequisites

To create a refund request, you should have:

- Refund request types defined in the application

### Procedure

To create a refund request:

1. Do either of the following:

If you want to...	Then...
Define a refund request from the <b>Account Receivable Central</b> screen	<ol style="list-style-type: none"> <li>1. Click the <b>Main</b> link in the <b>Application</b> toolbar. A list appears.</li> <li>2. From the <b>Main</b> menu, select <b>Financial</b> and then click <b>Account Receivable Central</b>.</li> <li>3. Search for the bill in the <b>Account Receivable Central</b> screen.</li> <li>4. In the <b>Search Results</b> section, select the required bill and then click <b>Refund</b>.</li> </ol>

If you want to...	Then...
	<p><b>Note:</b> Only one bill at a time is allowed to select for <b>Refund Request</b> from the <b>Account Receivable Central</b> screen.</p>
Define a refund request from the <b>Refund Request</b> screen	<ol style="list-style-type: none"> <li>1. Click the <b>Main</b> link in the <b>Application</b> toolbar. A list appears.</li> <li>2. From the <b>Main</b> menu, select <b>Financial</b> and then click <b>Refund/Write Off Request</b>. A sub-menu appears.</li> <li>3. Click the <b>Add</b> option from the <b>Refund/Write Off Request</b> sub-menu.</li> </ol>

The **Select Request Type** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Action	<p>Displays the type of request (refund or write off) to be created.</p> <p><b>Note:</b> This field is pre-populated if the refund request is created from the <b>Account Receivable Central</b> screen. This field is editable if the refund request is created from the <b>Refund/Write Off Request</b> screen.</p>	Not applicable
Refund/Write Off Request Type	<p>Used to indicate the request type using which you want to create the refund or write off request.</p> <p><b>Note:</b> The refund request types are listed when you set the <b>Action</b> field to <b>Refund</b> and the write off request types are listed when you set the <b>Action</b> field to <b>Write Off</b>.</p>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Account	<p>Used to indicate the account for which you want to create the refund or write off request.</p> <p><b>Note:</b></p> <p>This field is pre-populated if the refund request is created from the <b>Account Receivable Central</b> screen.</p> <p>This field is editable if the refund request is created from the <b>Refund/Write Off Request</b> screen.</p> <p>You can search for an account by clicking the <b>Search</b> (🔍) icon corresponding to the respective field.</p>	Yes

**Tip:**

Alternatively, you can access the **Select Request Type** screen:

- By clicking the **Add** button in the **Page Title** area of **Refund/Write Off Request** screen.
- By selecting the payment which you want to refund in the **Payment Event Summary** screen and then clicking the **Refund** button. Note that the system will allow you to refund only those payments which are in the **Frozen** status and matched against the suspense or excess credit contract.

2. Select the required refund request type from the respective field.
3. Click **Save**.

The refund request is defined and the status of the refund request is set to **Draft**. The **Refund Request** screen appears where you can view the details of the refund request. It contains the following tabs:

**Note:** The refund request can be created only for bill with outstanding amount lesser than zero.

- **Main** – Displays information about the refund request. It contains the following zones:
    - **Refund Request** – Displays the details of the refund request.
    - **Refund Details** – Lists the entities, such as payment events, payments, and/or credit bill line items (such as credit bill segments and adjustments), of the account which must be refunded.
  - **Payments** — Used to search payment events or individual payments that you want to refund. This tab appears only when the refund request is in the **Draft** status.
  - **Bills** — Used to search bills with credit line items, such as credit bill segments and adjustments, that you want to refund. This tab appears only when the refund request is in the **Draft** status.
  - **Log** – Lists the complete trail of actions performed on the refund request.
4. Add payment events, payments, or credit bill line items that you want to refund.
  5. Edit the refund amount of each entity, if required.
  6. Define characteristics for the refund request, if required.
  7. Override the address if you want to sent the refund to an address other than the account’s main customer address.

## Defining Characteristics for a Refund Request

### Prerequisites

To define characteristics for a refund request, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Refund Write Off Request**)

### Procedure

To define characteristics for a refund request:

1. Search for the refund request in the **Refund/Write Off Request** screen.
2. In the **Search Results** section, click the link in the **Refund/Write Off Request Information** column corresponding to the refund request whose details you want to edit.

The **Refund Request** screen appears.

3. Click the **Edit** button in the **Refund Request** zone.

The **Edit Refund Request** screen appears.

**Note:** The **Edit** button appears only when the refund request is in the **Draft** status.

4. Ensure that the **Characteristics** section is expanded when you are editing the refund request.

The **Characteristics** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the refund request.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the refund request.
Characteristic Type	Used to indicate the characteristic type. <b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Refund Write Off Request</b> .	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the refund request.

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Value	Used to specify the value for the characteristic type.  <b>Note:</b> On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	Yes (Conditional)  <b>Note:</b> This field is required when you are defining a characteristic for the refund request.

5. Enter the required details in the **Characteristics** section.

**Note:** If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

6. If you want to define more than one characteristic for the refund request, click the **Add** (+) icon and then repeat step 5.

**Note:** However, if you want to remove a characteristic from the refund request, click the **Delete** (🗑️) icon corresponding to the characteristic.

## Adding a Payment Event to the Refund Request

### Prerequisites

To add a payment event to the refund request, you should have:

- Payments made by the account for which you need to create the refund request

### Procedure

To add a payment event to the refund request:

1. Click the **Payments** tab in the **Refund Request** screen.

The **Payments** tab appears.

2. Filter the payment events, if required, in the **Search Payment Event** zone.

**Note:** You can only refund payments, which are matched against suspense or excess credit contracts, to the payor account. Therefore, you can only view payment events which includes payments matched against suspense or excess credit contracts. If a refund request is currently in progress for a payment event or for any payment of a payment event, those payments events of the account are not listed in the **Search Payment Event** zone.

3. Select the check box corresponding to the payment event, whose payments you want to refund, in the **Search Results** section.

**Note:** You can add more than one payment event to the refund request at the same time.

4. Click **Add**.

A message appears indicating that the selected payment events are added to the refund request.

5. Click **OK**.

Note that the entity is added in the **Refund Details** zone on the **Main** tab.

**Note:**

You can only refund payments which are in the **Frozen** status.

If all payments in the payment event are matched against the same suspense or excess credit contract, the payment event is added in the **Refund Details** zone. However, if the payments in the payment event are matched against different suspense or excess credit contracts, the payments of the payment event are added in the **Refund Details** zone.

## Adding a Payment to the Refund Request

**Prerequisites**

To add a payment to the refund request, you should have:

- Payments made by the account for which you need to create the refund request

**Procedure**

To add a payment to the refund request:

1. Click the **Payments** tab in the **Refund Request** screen.

The **Payments** tab appears.

2. Filter the payment events, if required, in the **Search Payment Event** zone.

**Note:** You can only refund payments, which are matched against suspense or excess credit contracts, to the payor account. Therefore, you can only view payment events which includes payments matched against suspense or excess credit contracts. If a refund request is currently in progress for a payment event or for any payment of a payment event, those payments events of the account are not listed in the **Search Payment Event** zone.

3. In the **Search Results** section, click the **Broadcast**  icon corresponding to the payment event whose payments you want to view.

The **Payments** zone appears.

4. Select the check box corresponding to the payment that you want to refund.

**Note:** You can add more than one payment to the refund request at the same time.

5. Click **Add**.

A message appears indicating that the selected payments are added to the refund request.

6. Click **OK**.

Note that the payments are added in the **Refund Details** zone on the **Main** tab.

**Note:** You can only refund payments which are in the **Frozen** status.

**Adding a Credit Bill to the Refund Request**

You can refund the credit bills to the account.

**Prerequisites**

To add a credit bill to the refund request, you should have:

- Completed bills for the account with one or more credit line items

**Procedure**

To add a credit bill to the refund request:

1. Click the **Bills** tab in the **Refund Request** screen.

The **Bills** tab appears.

2. Filter the bills, if required, in the **Search Bills** zone.

**Note:** If a refund request is currently in progress for a credit bill segment or adjustment of a bill, those bills of the account are not listed in the **Search Bills** zone. In addition, a bill with all debit line items are not listed in the **Search Bills** zone.

3. Do either of the following:

If...	Then...
A bill has all credit line items and you want to add the credit bill to the refund request	<ol style="list-style-type: none"> <li>1. In the <b>Search Bills</b> zone, select the bills that you want to refund.</li> <li>2. Click the <b>Add</b> button available at the upper left corner of the <b>Search Bills</b> zone.</li> </ol> <p><b>Note:</b> Default adjustment type selected in the write off request type should be non A/P.</p>
A bill has credit balance and one or more debit line items and you want to add the credit bill to the refund request	<ol style="list-style-type: none"> <li>1. In the <b>Search Bills</b> zone, select the bills that you want to refund.</li> <li>2. Click the <b>Add</b> button available at the upper left corner of the <b>Search Bills</b> zone.</li> </ol> <p><b>Note:</b> Default adjustment type selected in the write off request type should be non A/P.</p>

4. Click **Add**.

A message appears indicating that the selected bills are added to the refund request.

**Note:** If you select a bill (with credit balance) which contains one or more debit line items or if you select a bill (with debit balance) which contains one or more credit line items, the system will not allow you to add the credit line items by directly adding the bill. In such case, you need to individually select the credit bill segments and adjustments of the bill and then add them to the refund request.

5. Click **OK**.

Note that all the credit bill segments or adjustments of the bills are added in the **Refund Details** zone on the **Main** tab.

**Note:**

Irrespective of whether you select a credit bill, or credit bill segments or adjustments, the credit bill segments or adjustments are added in the **Refund Details** zone. The credit bill is not added to the **Refund Details** zone.

The system will not allow you to add a debit line item to the **Refund Details** zone.

## Adding a Credit Bill Line Item to the Refund Request

You can refund the credit bill line items, such as bill segments and adjustments, to the account. While adding a credit bill line item to the refund request, you can either:

- Directly add all credit line items of a bill to the refund request by adding the bill which has all bill segments and adjustments in credit
- Individually add a credit bill segment or adjustment of a bill (with one or more credit line items) to the refund request

**Prerequisites**

To add a credit bill line item to the refund request, you should have:

- Completed bills for the account with one or more credit line items

**Procedure**

To add a credit bill line item to the refund request:

1. Click the **Bills** tab in the **Refund Request** screen.

The **Bills** tab appears.

2. Filter the bills, if required, in the **Search Bills** zone.

**Note:** If a refund request is currently in progress for a credit bill segment or adjustment of a bill, those bills of the account are not listed in the **Search Bills** zone. In addition, a bill with all debit line items are not listed in the **Search Bills** zone.

3. Do either of the following:

If...	Then...
A bill has all credit line items and you want to add a particular credit bill line item to the refund request	<ol style="list-style-type: none"> <li data-bbox="846 226 1401 380">1. In the <b>Search Bills</b> zone, click the <b>Broadcast</b>  icon corresponding to the bill whose line items you want to view. The <b>Bill Line Items</b> zone appears.</li> <li data-bbox="846 411 1401 499">2. Select the check box corresponding to the credit bill segment or adjustment that you want to refund.</li> </ol>
A bill has credit balance and one or more debit line items	<ol style="list-style-type: none"> <li data-bbox="846 558 1401 711">1. In the <b>Search Bills</b> zone, click the <b>Broadcast</b>  icon corresponding to the bill whose line items you want to view. The <b>Bill Line Items</b> zone appears.</li> <li data-bbox="846 743 1401 831">2. Select the check box corresponding to the credit bill segment or adjustment that you want to refund.</li> </ol>
A bill has debit balance and one or more credit line items	<ol style="list-style-type: none"> <li data-bbox="846 890 1401 1043">1. In the <b>Search Bills</b> zone, click the <b>Broadcast</b>  icon corresponding to the bill whose line items you want to view. The <b>Bill Line Items</b> zone appears.</li> <li data-bbox="846 1075 1401 1163">2. Select the check box corresponding to the credit bill segment or adjustment that you want to refund.</li> </ol>

4. Click **Add**.

A message appears indicating that the selected bill segments or adjustments are added to the refund request.

**Note:** If you select a bill (with credit balance) which contains one or more debit line items or if you select a bill (with debit balance) which contains one or more credit line items, the system will not allow you to add the credit line items by directly adding the bill. In such case, you need to individually select the credit bill segments and adjustments of the bill and then add them to the refund request.

5. Click **OK**.

Note that the credit bill segments or adjustments are added in the **Refund Details** zone on the **Main** tab.

**Note:**

Irrespective of whether you select a credit bill, or credit bill segments or adjustments, the credit bill segments or adjustments are added in the **Refund Details** zone. The credit bill is not added to the **Refund Details** zone.

The system will not allow you to add a debit line item to the **Refund Details** zone.

## Editing a Refund Request

### Prerequisites

To edit a refund request, you should have:

- Adjustment types with A/P request type defined in the application

### Procedure

To edit a refund request:

1. Search for the refund request in the **Refund/Write Off Request** screen.
2. In the **Search Results** section, click the link in the **Refund/Write Off Request Information** column corresponding to the refund request whose details you want to edit.

The **Refund Request** screen appears.

3. Click the **Edit** button in the **Refund Request** zone.

The **Edit Refund Request** screen appears. It contains the following section:

Field Name	Field Description	Mandatory (Yes or No)
Refund Request Information	Displays information about the refund request.	Not applicable
Account Information	Indicates the account for which the refund request is created.	Not applicable
Person Name	Used to indicate the person for whom the refund request is created.	No
Override Address	Used to indicate whether the account's mailing address must be overridden.  <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> By default, the account's main customer's address appears in the following fields — Address 1, Address 2, Address 3, Address 4, City, Country, State, and Postal. You can override the address in these fields, if required.</p> </div>	No
Address 1	Used to specify the house number and apartment name.	No
Address 2	Used to specify the street name.	No
Address 3	Used to specify any landmark, if available.	No
Address 4	Used to specify the village, town, or city name.	No
City	Used to specify the city name.	No
Country	Used to specify the country name.	No

Field Name	Field Description	Mandatory (Yes or No)
State	Used to specify the state name.	No
Postal	Used to specify the postal or zip code.	No
Comments	Used to specify additional information about the refund request.	No

In addition, this screen contains the following two sections:

- **Characteristics** — Used to define characteristics for the refund request. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the refund request.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the refund request.
Characteristic Type	Used to indicate the characteristic type. <b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Refund Write Off Request</b> .	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the refund request.
Characteristic Value	Used to specify the value for the characteristic type. <b>Note:</b> On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the refund request.

4. Modify the details of the refund request, if required.
5. Define, edit, or remove characteristics from the refund request, if required.
6. Click **Save**.

The changes made to the refund request are saved.

## Editing the Refund Details

### Prerequisites

To edit the refund details, you should have:

- Adjustment types with A/P request type defined in the application

### Procedure

To edit the refund details:

1. Search for the refund request in the **Refund/Write Off Request** screen.
2. In the **Search Results** section, click the link in the **Refund/Write Off Request Information** column corresponding to the refund request whose bill line item details you want to edit.

The **Refund Request** screen appears. You can edit the bill line items by either of the following ways:

If...	Then
Select the bill whose details you want to edit in the <b>Refund Details</b> zone and click the <b>Edit</b> button available in the upper left corner of this zone.	The <b>Edit Request Details</b> screen appears.
In the <b>Refund Details</b> zone, click the <b>Broadcast</b>  icon corresponding to the bill whose line items details you want to edit.	<p>The <b>Bill Line Items</b> zone appears.</p> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This zone appears only when the Entity Type is <b>Bill</b>.</p> </div> <ol style="list-style-type: none"> <li>1. Select the bill line item whose details you want to edit in the <b>Bill Line Items</b> zone and click the <b>Edit</b> button available in the upper left corner of this zone.</li> </ol> <p>The <b>Edit Request Details</b> screen appears.</p>

**Note:** A bill line item from the refund request can be edited only when the refund request is in the **Draft** status.

The **Edit Request Details** screen contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Request ID	Displays the refund request ID.	Not applicable
Account Information	Displays additional information about the account.	Not applicable
Adjustment Type	<p>Indicates the adjustment type of the refund request type.</p> <p>You can search for an adjustment type by clicking the <b>Search</b>  icon corresponding to the field.</p>	No

In addition to these fields, this screen contains following columns:

Column Name	Column Description
Entity Type	Indicates the entity type. The valid values are <ul style="list-style-type: none"> <li>• Adjustments</li> <li>• Bill</li> <li>• Bill Segment</li> <li>• Payment Event</li> <li>• Payment</li> </ul>
Entity ID	Displays the entity ID.
Entity Amount	Displays the entity amount.
Currency	Displays the currency in which the entity was created.
Request Amount	Displays the amount that must be refunded.
Adjustment Type	Indicates the adjustment type using which the refund adjustment must be created. <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b></p> <p>You can search for an account by clicking the <b>Search</b>  icon corresponding to the field.</p> </div>
Bill ID	Displays the bill ID.

In addition to the above columns, the screen has following button:

Button Name	Button Description
Override	Used to override an adjustment type of the refund request.

**Note:**

In the **Bill Line Items** zone, click the **Broadcast**  icon corresponding to the bill line item which you want to delete

Pagination is used to display limited number of records in the **Search Results** section. By default, 10 records are displayed in the **Search Results** section. You can change the number of records displayed per page, if required.

You can use the navigation buttons, such as **First** () , **Previous** () , **Next** () , and **Last** () to navigate between pages. You can also select the page to which you want to navigate from the **Go To** list.

The values appear in the **Page Limit** list only when you define values for the **PAGE\_NUMBER** lookup field.

3. Modify the details of the bill line items.
4. Click **Save**.

The changes made to the refund bill line items are saved.

## Rejecting a Refund Request

### Prerequisites

To reject a refund request, you should have:

- Rejection reasons defined in the application

### **Note:**

While rejecting a refund request, you need to specify the reason why you want to reject the refund request. You can select the appropriate rejection reason only when you have defined the reasons for the **Rejected** status of the **C1-RefundReq** business object in the **Status Reason** screen.

The system will not allow you to approve or reject a refund request submitted by you.

### Procedure

To reject a refund request:

1. Do either of the following:

If you want to...	Then...
Reject a refund request through the <b>Refund/Write Off Request</b> screen	<ol style="list-style-type: none"> <li>1. Search for the refund request in the <b>Refund/Write Off Request</b> screen.</li> <li>2. In the <b>Search Results</b> section, click the link in the <b>Refund/Write Off Request Information</b> column corresponding to the refund request which you want to review.</li> </ol>
Reject a refund request from the <b>To Do List</b> screen	<ol style="list-style-type: none"> <li>1. Click the <b>Menu</b> link in the <b>Application</b> toolbar. A list appears.</li> <li>2. From the <b>Main</b> menu, select <b>To Do</b> and then click <b>To Do List</b>.  The <b>To Do Type for User Search</b> window appears.</li> </ol>

If you want to...	Then...
	<ol style="list-style-type: none"> <li>3. Enter <b>C1-REFRQ</b> in the <b>To Do Type</b> field.</li> <li>4. Click the <b>Search</b> button corresponding to the <b>To Do Type</b> field. The <b>To Do List</b> screen appears.</li> <li>5. Select the <b>Open</b> option from the <b>Filter by</b> list to view all unassigned To Dos.</li> <li>6. Click the link in the <b>Message</b> column corresponding to the To Do of the refund request that you want to review.</li> </ol>

The **Refund Request** screen appears.

2. Review the refund request details.
3. Click the **Reject** button in the **Refund Request** zone.

The **Reject Refund Request** window appears. It contains following fields:

Field Name	Field Description	Mandatory (Yes or No)
Status Reason	Used to indicate the reason why you want to reject the refund request.	Yes
Comments	Used to specify additional information while rejecting the refund request.	No

**Note:** The **Reject** button appears only when:

- The refund request is in the **Approval In Progress** status.
- A user with the approval To Do role is reviewing the refund request.

4. Select the rejection reason from the **Status Reason** list.
5. Click **Save**.

The status of the refund request is changed to **Rejected**.

## Viewing the Log of a Refund Request

### Procedure

To view the log of a refund request:

1. Search for the refund request in the **Refund/Write Off Request** screen.
2. In the **Search Results** section, click the link in the **Refund/Write Off Request Information** column corresponding to the refund request whose log you want to view.

The **Refund Request** screen appears. It consists of the following tabs:

- **Main** – Displays information about the refund request. It contains the following zones:
  - **Refund Request** – Displays the details of the refund request.
  - **Refund Details** – Lists the entities, such as payment events, payments, and/or credit bill line items (such as credit bill segments and adjustments), of the account which must be refunded.
  - **Bill Line Items** — Displays the details of the bill which must be refunded.

**Note:**

This zone appears when you click the Broadcast  icon corresponding to the entity type as **Bill** in the **Refund Details** zone.

- **Payments** — Used to search payment events or individual payments that you want to refund. This tab appears only when the refund request is in the **Draft** status.
  - **Bills** — Used to search bills with credit line items, such as credit bill segments and adjustments, that you want to refund. This tab appears only when the refund request is in the **Draft** status.
  - **Log** – Lists the complete trail of actions performed on the refund request.
3. Click the **Log** tab.
  4. View the log of the refund request in the **Refund Request Log** zone.

**Note:** You can manually add a log entry for the refund request by clicking the **Add Log Entry** link in the upper right corner of the **Refund Request Log** zone.

<b>Refund Request Log</b> zone	<a href="#">Refund Request Log</a> on page 1536

## **Adding a Log Entry for a Refund Request**

### **Procedure**

To add a log entry for a refund request:

1. Search for the refund request in the **Refund/Write Off Request** screen.
2. In the **Search Results** section, click the link in the **Refund/Write Off Request Information** column corresponding to the refund request whose log you want to edit.

The **Refund Request** screen appears. It consists of the following tabs:

- **Main** – Displays information about the refund request. It contains the following zones:
  - **Refund Request** – Displays the details of the refund request.

- **Refund Details** – Lists the entities, such as payment events, payments, and/or credit bill line items (such as credit bill segments and adjustments), of the account which must be refunded.
  - **Payments** — Used to search payment events or individual payments that you want to refund. This tab appears only when the refund request is in the **Draft** status.
  - **Bills** — Used to search bills with credit line items, such as credit bill segments and adjustments, that you want to refund. This tab appears only when the refund request is in the **Draft** status.
  - **Log** – Lists the complete trail of actions performed on the refund request.
3. Click the **Log** tab.  
The **Log** tab appears.
  4. Click the **Add Log Entry** link in the upper right corner of the **Refund Request Log** zone.  
The **Add Request Log** window appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Request Information	Displays information about the refund request.	Not applicable
Log Details	Used to specify additional comments on the refund request.	Yes

5. Enter the comments in the **Log Details** field.
6. Click **Save**.  
The log entry is added in the **Refund Request Log** zone.

## **Voiding a Refund Request**

There might be situations when incorrect refund request is processed in the system. In such case, the system provides you with an ability to void or cancel the refund request. However, note that you can void a refund request only when the refund request is in the **Processed** status.

#### **Prerequisites**

To void a refund request, you should have:

- Void reasons defined in the application

**Note:** While voiding a refund request, you need to specify the reason why you want to void the refund request. You can select the appropriate void reason only when you have defined the reasons for the **Voided** status of the **C1-RefundReq** business object in the **Status Reason** screen.

#### **Procedure**

To void a refund request:

1. Search for the refund request in the **Refund/Write Off Request** screen.
2. In the **Search Results** section, click the link in the **Refund/Write Off Request Information** column corresponding to the refund request that you want to void.

The **Refund Request** screen appears.

- Click the **Void** button in the **Refund Request** zone.

The **Void Reason** window appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Status Reason	Used to indicate the reason why you want to void the refund request.	Yes
Comments	Used to specify additional information while voiding the refund request.	No

**Note:** The **Void** button appears only when the refund request is in the **Processed** status.

- Select the void reason from the **Status Reason** list.
- Click **Save**.

The status of the refund request is changed to **Voided**.

**Note:** The **C1-REFVOID** algorithm cancels all the frozen adjustments created for the refund request which is in the **Processed** state.

## Write Off Request

Once you create a write off request, the **Write Off Request** screen allows you to:

- Edit and delete a write off request
- View the details of a write off request
- Submit a write off request for approval
- Approve or reject a write off request
- View the log of a write off request
- Add a log entry for a write off request
- Cancel a write off request

This screen consists of the following tabs:

- Main** – Displays information about the write off request. It contains the following zones:
  - Write Off Request** – Displays the details of the write off request.
  - Write Off Details** – Lists the debit bill line items (such as debit bill segments and adjustments) of the account which must be written off.
  - Bill Line Items** — Displays the details of the bill which must be written off.

**Note:**

This zone appears when you click the Broadcast  icon corresponding to the entity type as **Bill** in the **Write Off Details** zone.

- **Bills** — Used to search bills with debit line items, such as debit bill segments and adjustments, that you want to write off. It contains the following zones:
  - **Search Bills** — Lists completed bills of the account which are either with debit balance or have one or more debit line items, such as bill segments and adjustments. You can filter the bills using various search criteria.
  - **Bill Line Items** — Lists the debit and credit bill segments and adjustments of the bill.

This tab appears only when the write off request is in the **Draft** status.

- **Log** – Lists the complete trail of actions performed on the write off request.

## Write Off Request - Main

The **Main** tab displays information about the write off request. It contains the following zones:

- [Write Off Request](#) on page 1560
- [Write Off Details](#) on page 1562
- [Bill Line Items](#) on page 1563

## Write Off Request

The **Write Off Request** zone displays the details of the write off request. This zone contains the following sections:

- **Main** — This section provides basic information about the write off request. It contains the following fields:

Field Name	Field Description
Write Off Request Information	Displays information about the write off request.
Write Off Request Type	Indicates the write off request type using which the write off request is created.  <b>Note:</b> It has a link. On clicking the link, the <b>Refund/Write Off Request Type</b> screen appears where you can view the details of the write off request type.
Status	Indicates the status of the write off request. The valid values are: <ul style="list-style-type: none"> <li>• Draft</li> <li>• Approval In Progress</li> <li>• Rejected</li> <li>• Processed</li> <li>• Cancelled</li> </ul>

Field Name	Field Description
Status Reason	Indicates the reason why the write off request is rejected or cancelled.  <b>Note:</b> This field appears only when the write off request is in the <b>Rejected</b> or <b>Cancelled</b> status. It has a link. On clicking the link, the <b>Status Reason</b> screen appears where you can view the details of the rejected or cancelled reason.
Account Information	Indicates the account for which the write off request is created.  <b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account.
Comments	Displays additional information about the write off request.
Total Write Off Amount	Displays the total write off amount.

- **Characteristics** — Lists the characteristics defined for the write off request. It contains the following fields:

Field Name	Field Description
Effective Date	Indicates the date from when the characteristic is effective for the write off request.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- **Record Actions** — This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the write off request.  <b>Note:</b> The <b>Edit</b> button appears only when the write off request is in the <b>Draft</b> status.
Delete	Used to delete the write off request.  <b>Note:</b> The <b>Delete</b> button appears only when the write off request is in the <b>Draft</b> status.
Submit	Used to submit the write off request for approval.  <b>Note:</b> The <b>Submit</b> button appears only when the write off request is in the <b>Draft</b> status.
Approve	Used to approve the write off request.  <b>Note:</b> The <b>Approve</b> button appears only when: <ul style="list-style-type: none"> <li>• The write off request is in the <b>Approval In Progress</b> status.</li> <li>• A user with the approval To Do role is reviewing the write off request.</li> </ul>

Button Name	Button Description
Reject	Used to reject the write off request.  <b>Note:</b> The <b>Reject</b> button appears only when: <ul style="list-style-type: none"> <li>The write off request is in the <b>Approval In Progress</b> status.</li> <li>A user with the approval To Do role is reviewing the write off request.</li> </ul>
Cancel	Used to cancel the write off request.  <b>Note:</b> The <b>Cancel</b> button appears only when the write off request is in the <b>Processed</b> status.

- **Record Information** — This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the write off request is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.
Status Date/Time	Displays the date and time when the write off request status is updated
Create Date/Time	Displays the date and time when the write off request is created.

### Write Off Details

The **Write Off Details** zone lists the debit bill line items (such as bill segments and adjustments) that you have added to the write off request. This zone contains the following columns:

Column Name	Column Description
Entity ID	Displays the entity ID.
Entity Type	Indicates whether the entity is a bill, bill segment or an adjustment.
Currency	Indicates the currency in which the entity was created.
Entity Amount	Displays the entity amount.
Write Off Amount	Displays the amount that must be written off.  <b>Note:</b> By default, the amount which is eligible for write off appears in this column. You can edit the amount, if required. However, you cannot specify the amount greater than the eligible amount.
Contract Information	Displays additional information about the contract against which the bill segment or adjustment is created. In addition, this column has a context menu which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Contract</b> screen appears where you can view the details of the respective contract.

Column Name	Column Description
Adjustment Type	<p>Indicates the adjustment type using which the write off adjustment must be created.</p> <p><b>Note:</b> By default, the adjustment type specified in the write off request type appears in this column. You can change the adjustment type, if required, by editing the write off request.</p>
Adjustment Information	<p>Displays information about the write off adjustment.</p> <p><b>Note:</b></p> <p>It has a link. On clicking the link, the <b>Adjustment</b> screen appears where you can view the details of the respective adjustment.</p> <p>The data appears in this column only when the status of the write off request is <b>Processed</b>.</p> <p>The information string appears only when an algorithm of the <b>C1-ADI-INFO</b> algorithm type is attached to the <b>Adjustment Information</b> system event in the <b>Algorithms</b> tab of the <b>Installation Options — Framework</b> screen.</p>

**Note:**

On clicking the **Broadcast**  icon corresponding to the entity type as **Bill**, the **Bill Line Items** zone appears with the details of the respective bill.

In addition to above columns, this screen contains following buttons:

Button Name	Button Description
Edit	Used to edit the details of bill line items.
Delete	Used to delete the bill line items.

**Bill Line Items**

The **Bill Line Items** zone lists the debit and credit bill segments and adjustments of the bill. This zone contains the following columns:

Column Name	Column Description
Bill ID	Displays the bill ID.
Entity ID	Displays the bill segment or adjustment ID.
Entity Type	Indicates whether the entity is a bill, bill segment or an adjustment.
Currency	Displays the currency in which the entity was created.
Entity Amount	Displays the bill segment or adjustment amount.
Request Amount	<p>Displays the bill segment or adjustment amount which is eligible for refund. In other words, it means entity amount minus amount refunded.</p> <p><b>Note:</b> If the bill segment or adjustment has debit balance, the eligible amount for refund would be zero.</p>

Column Name	Column Description
Contract Information	<p>Displays additional information about the contract against which the bill segment or adjustment is created. In addition, this column has a context menu which helps in navigating to other screens in the application.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Contract</b> screen appears where you can view the details of the respective contract.</p>
Adjustment Type	<p>Indicates the adjustment type using which the refund adjustment must be created.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Adjustment Type</b> screen appears where you can view the details of the respective adjustment type.</p>
Adjustment Information	Displays information about the refund adjustment.

By default, the **Bill Line Items** zone does not appear in the **Main** tab. It appears only when you click the **Broadcast**  icon corresponding to the bill in the **Write Off Details** zone.

## Write Off Request - Bills

The **Bills** tab allows you to search bills with debit line items, such as debit bill segments and adjustments, that you want to write off. It contains the following zones:

- [Search Bill](#)
- [Bill Line Items](#) on page 1565

### Search Bills

The **Search Bills** zone lists completed bills of the account which are either with debit balance or have one or more debit line items, such as bill segments and adjustments. You can filter the bills using various search criteria. This zone contains the following two sections:

- **Search Criteria** — The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	<p>Used to indicate that you want to search for a bill using the bill details. The valid values are:</p> <ul style="list-style-type: none"> <li>• Bill Details</li> <li>• Bill and Price Item Details</li> </ul> <p><b>Note:</b> By default, the <b>Bill Details</b> option is selected.</p>	Yes
Bill ID	Used to search a particular bill.	No
Bill Date From	Used to search bills which are created from a particular date onwards.	No

Field Name	Field Description	Mandatory (Yes or No)
To	Used to search bills which are created till a particular date.	No
Price Item	Used to search bills which are created for a particular price item.  <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This field appears only when you select <b>Bill and Price Item Details</b> option from the <b>Search By</b> list. You can search for a price item by clicking the <b>search</b>  icon corresponding to the field.</p> </div>	No

- **Search Results** — On clicking the **Search** button, the search results are filtered based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Bill ID	Displays the bill ID.
Bill Information	Displays additional information about the bill. In addition, this column has a context menu which helps in navigating to other screens in the application.  <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> It has a link. On clicking the link, the <b>Bill</b> screen appears with the details of the respective bill.</p> </div>
Amount	Displays the total bill amount.

If you want to write off a bill with debit balance and all debit line items, you need to select the check box corresponding to the bill and then click the **Add** button in the **Search Results** section. All debit bill segments and adjustments of the bill are added in the **Write Off Details** zone on the **Main** tab. However, if you select a bill (with debit balance) which contains one or more credit line items or if you select a bill (with credit balance) which contains one or more debit line items, the system will not allow you to add the debit line items by directly adding the bill. In such case, you need to individually select the debit bill segments and adjustments of the bill and then add them to the write off request.

**Note:** If a write off request is currently in progress for a debit bill segment or adjustment of a bill, those bills of the account are not listed in the **Search Bills** zone. In addition, a bill with all credit line items are not listed in the **Search Bills** zone.

### **Bill Line Items**

The **Bill Line Items** zone lists the debit and credit bill segments and adjustments of the bill. This zone contains the following columns:

Column Name	Column Description
Entity ID	Displays the bill segment or adjustment ID.

Column Name	Column Description
Entity Type	Indicates whether the entity is a bill segment or an adjustment.
Entity Information	Displays additional information about the bill segment or adjustment. If the entity is a bill segment, the context menu appears in the column which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. If the entity is a bill segment, the <b>Bill Segment</b> screen appears where you can view the details of the respective bill segment on clicking the link. However, if the entity is an adjustment, the <b>Adjustment</b> screen appears with the details of the respective adjustment on clicking the link.
Entity Amount	Displays the bill segment or adjustment amount.
Eligible Amount	Displays the bill segment or adjustment amount which is eligible for write off. In other words, it means entity amount minus amount written off.  <b>Note:</b> If the bill segment or adjustment has credit balance, the eligible amount for write off would be zero.
Amount Written Off	Displays the amount which is already written off to the account.
Contract Information	Displays additional information about the contract against which the bill segment or adjustment is created. In addition, this column has a context menu which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Contract</b> screen appears where you can view the details of the respective contract.

You can select one or more debit bill segments or adjustments and click the **Add** button in this zone to add selected debit bill segments or adjustments to the write off request.

By default, the **Bill Line Items** zone does not appear in the **Bills** tab. It appears only when you click the **Broadcast**  icon corresponding to the bill in the **Search Bills** zone.

## Creating a Write Off Request

### Prerequisites

To create a write off request, you should have:

- Write off request types defined in the application

### Procedure

To create a write off request:

1. Do either of the following:

If you want to...	Then...
Define a write off request from the <b>Account Receivable Central</b> screen	<ol style="list-style-type: none"> <li>1. Click the <b>Main</b> link in the <b>Application</b> toolbar. A list appears.</li> <li>2. From the <b>Main</b> menu, select <b>Financial</b> and then click <b>Account Receivable Central</b>.</li> <li>3. Search for the bill in the <b>Account Receivable Central</b> screen.</li> <li>4. In the <b>Search Results</b> section, select the required bill and then click <b>Write Off</b>.</li> </ol> <p><b>Note:</b> Only one bill at a time is allowed to select for <b>Write Off Request</b> from the <b>Account Receivable Central</b> screen.</p>
Define a write off request from the <b>Write Off Request</b> screen	<ol style="list-style-type: none"> <li>1. Click the <b>Main</b> link in the <b>Application</b> toolbar. A list appears.</li> <li>2. From the <b>Main</b> menu, select <b>Financial</b> and then click <b>Refund/Write Off Request</b>.</li> </ol>

If you want to...	Then...
	<p>A sub-menu appears.</p> <p>3. Click the <b>Add</b> option from the <b>Refund/Write Off Request</b> sub-menu.</p>

The **Select Request Type** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Action	<p>Displays the type of request (refund or write off) to be created.</p> <div data-bbox="651 585 1123 877" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>This field is pre-populated if the write off request is created from the <b>Account Receivable Central</b> screen.</p> <p>This field is editable if the write off request is created from the <b>Refund/Write Off Request</b> screen.</p> </div>	Yes
Refund/Write Off Request Type	<p>Used to indicate the request type using which you want to create the refund or write off request.</p> <div data-bbox="651 1016 1123 1163" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> The refund request types are listed when you set the <b>Action</b> field to <b>Refund</b> and the write off request types are listed when you set the <b>Action</b> field to <b>Write Off</b>.</p> </div>	Yes
Account	<p>Used to indicate the account for which you want to create the refund or write off request.</p> <div data-bbox="651 1268 1123 1665" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>This field is pre-populated if the write off request is created from the <b>Account Receivable Central</b> screen.</p> <p>This field is editable if the write off request is created from the <b>Refund/Write Off Request</b> screen.</p> <p>You can search for an account by clicking the <b>Search</b>  icon corresponding to the respective field.</p> </div>	Yes

**Tip:** Alternatively, you can access the **Select Request Type** screen by clicking the **Add** button in the **Page Title** area of the **Refund/Write Off Request** screen.

2. Select the required write off request type and account from the respective fields.
3. Click **Save**.

The write off request is defined and the status of the write off request is set to **Draft**. The **Write Off Request** screen appears with the details of the write off request. It contains the following tabs:

**Note:** The write off request can be created only for bill with outstanding amount greater than zero.

- **Main** – Displays information about the write off request. It contains the following zones:
    - **Write Off Request** – Displays the details of the write off request.
    - **Write Off Details** – Lists the debit bill line items (such as debit bill segments and adjustments) of the account which must be written off.
  - **Bills** — Used to search bills with debit line items, such as debit bill segments and adjustments, that you want to write off. This tab appears only when the write off request is in the **Draft** status.
  - **Log** – Lists the complete trail of actions performed on the write off request.
4. Add debit bill line items that you want to write off.
  5. Edit the write off amount of each entity, if required.
  6. Define characteristics for the write off request, if required.

How to define characteristics for a write off request	<a href="#">Defining Characteristics for a Write Off Request</a> on page 1569

## Defining Characteristics for a Write Off Request

### Prerequisites

To define characteristics for a write off request, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Refund Write Off Request**)

### Procedure

To define characteristics for a write off request:

1. Search for the write off request in the **Refund/Write Off Request** screen.
2. In the **Search Results** section, click the link in the **Refund/Write Off Request Information** column corresponding to the write off request whose details you want to edit.

The **Write Off Request** screen appears.

3. Click the **Edit** button in the **Write Off Request** zone.

The **Edit Write Off Request** screen appears.

**Note:** The **Edit** button appears only when the write off request is in the **Draft** status.

4. Ensure that the **Characteristics** section is expanded when you are editing the write off request.

The **Characteristics** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the write off request.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the write off request.
Characteristic Type	Used to indicate the characteristic type. <b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Refund Write Off Request</b> .	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the write off request.
Characteristic Value	Used to specify the value for the characteristic type. <b>Note:</b> On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the write off request.

5. Enter the required details in the **Characteristics** section.

**Note:** If you select a predefined characteristic type, the **Search**  icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

6. If you want to define more than one characteristic for the write off request, click the **Add**  icon and then repeat step 5.

**Note:** However, if you want to remove a characteristic from the write off request, click the **Delete**  icon corresponding to the characteristic.

## **Adding a Debit Bill to the Write Off Request**

### **Prerequisites**

To add a debit bill to the write off request, you should have:

- Completed bills for the account with one or more debit line items

### **Procedure**

To add a debit bill to the write off request:

1. Click the **Bills** tab in the **Write Off Request** screen.

The **Bills** tab appears.

- Filter the bills, if required, in the **Search Bills** zone.

**Note:** If a write off request is currently in progress for a debit bill segment or adjustment of a bill, those bills of the account are not listed in the **Search Bills** zone. In addition, a bill with all credit line items are not listed in the **Search Bills** zone.

- Do either of the following:

If...	Then...
A bill has all debit line items and you want to add the debit bill to the write off request	<ol style="list-style-type: none"> <li>In the <b>Search Bills</b> zone, select the bills that you want to write off.</li> <li>Click the <b>Add</b> button available at the upper left corner of the <b>Search Bills</b> zone.</li> </ol> <p><b>Note:</b> Default adjustment type selected in the write off request type should be non A/P.</p>
A bill has debit balance and one or more credit line items and you want to add the debit bill to the write off request	<ol style="list-style-type: none"> <li>In the <b>Search Bills</b> zone, select the bills that you want to write off.</li> <li>Click the <b>Add</b> button available at the upper left corner of the <b>Search Bills</b> zone.</li> </ol> <p><b>Note:</b> Default adjustment type selected in the write off request type should be non A/P.</p>

- Click **Add**.

A message appears indicating that the selected bills are added to the write off request.

**Note:** If you select a bill (with credit balance) which contains one or more debit line items or if you select a bill (with debit balance) which contains one or more credit line items, the system will not allow you to add the debit line items by directly adding the bill. In such case, you need to individually select the debit bill segments and adjustments of the bill and then add them to the write off request.

- Click **OK**.

Note that the debit bill segments or adjustments are added in the **Write Off Details** zone on the **Main** tab.

**Note:**

Irrespective of whether you select a debit bill, or debit bill segments or adjustments, the debit bill segments or adjustments are added in the **Write Off Details** zone. The debit bill is not added to the **Write Off Details** zone.

The system will not allow you to add a credit line item to the **Write Off Details** zone.

## Adding a Debit Bill Line Item to the Write Off Request

You can write off the debit bill line items, such as bill segments and adjustments, of the account. While adding a debit bill line item to the write off request, you can either:

- Directly add all debit line items of a bill to the write off request by adding the bill which has all bill segments and adjustments in debit
- Individually add a debit bill segment or adjustment of a bill (with one or more debit line items) to the write off request

### **Prerequisites**

To add a debit bill line item to the write off request, you should have:

- Completed bills for the account with one or more debit line items

### **Procedure**

To add a debit bill line item to the write off request:

1. Click the **Bills** tab in the **Write Off Request** screen.

The **Bills** tab appears.

2. Filter the bills, if required, in the **Search Bills** zone.

**Note:** If a write off request is currently in progress for a debit bill segment or adjustment of a bill, those bills of the account are not listed in the **Search Bills** zone. In addition, a bill with all credit line items are not listed in the **Search Bills** zone.

3. Do any of the following:

If...	Then...
A bill has all debit line items and you want to add a particular debit bill line item to the write off request	<ol style="list-style-type: none"> <li>1. In the <b>Search Bills</b> zone, click the <b>Broadcast</b>  icon corresponding to the bill whose line items you want to view. The <b>Bill Line Items</b> zone appears.</li> <li>2. Select the check box corresponding to the debit bill segment or adjustment that you want to write off.</li> </ol>
A bill has debit balance and one or more credit line items	<ol style="list-style-type: none"> <li>1. In the <b>Search Bills</b> zone, click the <b>Broadcast</b>  icon corresponding to the bill whose line items you want to view. The <b>Bill Line Items</b> zone appears.</li> <li>2. Select the check box corresponding to the debit bill segment or adjustment that you want to write off.</li> </ol>
A bill has credit balance and one or more debit line items	<ol style="list-style-type: none"> <li>1. In the <b>Search Bills</b> zone, click the <b>Broadcast</b>  icon corresponding to the bill whose line items you want to view. The <b>Bill Line Items</b> zone appears.</li> </ol>

If...	Then...
	2. Select the check box corresponding to the debit bill segment or adjustment that you want to write off.

4. Click **Add**.

A message appears indicating that the selected bill segments or adjustments are added to the write off request.

**Note:** If you select a bill (with credit balance) which contains one or more debit line items or if you select a bill (with debit balance) which contains one or more credit line items, the system will not allow you to add the debit line items by directly adding the bill. In such case, you need to individually select the debit bill segments and adjustments of the bill and then add them to the write off request.

5. Click **OK**.

Note that the debit bill segments or adjustments are added in the **Write Off Details** zone on the **Main** tab.

**Note:**

Irrespective of whether you select a debit bill, or debit bill segments or adjustments, the debit bill segments or adjustments are added in the **Write Off Details** zone. The debit bill is not added to the **Write Off Details** zone.

The system will not allow you to add a credit line item to the **Write Off Details** zone.

## Editing a Write Off Request

### Prerequisites

To edit a write off request, you should have:

- Adjustment types without A/P request type defined in the application

### Procedure

To edit a write off request:

1. Search for the write off request in the **Refund/Write Off Request** screen.
2. In the **Search Results** section, click the link in the **Refund/Write Off Request Information** column corresponding to the write off request whose details you want to edit.

The **Write Off Request** screen appears.

3. Click the **Edit** button in the **Write Off Request** zone.

The **Edit Write Off Request** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Write Off Request Information	Displays information about the write off request.	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
Account Information	Indicates the account for which the write off request is created.	Not applicable
Comments	Used to specify additional information about the write off request.	No

In addition, this screen contains the following two sections:

- **Characteristics** — Used to define characteristics for the write off request. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the write off request.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the write off request.
Characteristic Type	Used to indicate the characteristic type. <b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Refund Write Off Request</b> .	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the write off request.
Characteristic Value	Used to specify the value for the characteristic type. <b>Note:</b> On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the write off request.

4. Modify the details of the write off request, if required.
5. Define, edit, or remove characteristics from the write off request, if required.
6. Click **Save**.

The changes made to the write off request are saved.

## Editing the Write Off Details

### Prerequisites

To edit the write off details, you should have:

- Adjustment types with A/P request type defined in the application

### Procedure

To edit the write off details:

1. Search for the write off request in the **Refund/Write Off Request** screen.
2. In the **Search Results** section, click the link in the **Refund/Write Off Request Information** column corresponding to the write off request whose bill line item details you want to edit.

The **Write Off Request** screen appears. You can edit the bill line items of the write off request by using either of the following ways:

If...	Then...
Select the bill whose details you want to edit in the <b>Write Off Details</b> zone and click the <b>Edit</b> button available in the upper left corner of this zone.	The <b>Edit Request Details</b> screen appears.
In the <b>Write Off Details</b> zone, click the <b>Broadcast</b>  icon corresponding to the bill whose line items details you want to edit.	The <b>Bill Line Items</b> zone appears. <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> This zone appears only when the Entity Type is <b>Bill</b>.</p> <ol style="list-style-type: none"> <li>1. Select the bill line item whose details you want to edit in the <b>Bill Line Items</b> zone and click the <b>Edit</b> button available in the upper left corner of this zone.</li> </ol> <p>The <b>Edit Request Details</b> screen appears.</p> </div>

**Note:** A bill line item from the write off request can be edited only when the write off request is in the **Draft** status.

The **Edit Request Details** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Request ID	Displays the write off request ID.	Not applicable
Account Information	Displays additional information about the account.	Not applicable
Adjustment Type	Indicates the adjustment type of the write off request type.  You can search for an adjustment type by clicking the <b>Search</b>  icon corresponding to the field.	No

In addition to these fields, this screen contains following columns:

Column Name	Column Description
Entity Type	Indicates the entity type. The valid values are <ul style="list-style-type: none"> <li>• Adjustments</li> <li>• Bill</li> <li>• Bill Segment</li> <li>• Payment Event</li> <li>• Payment</li> </ul>
Entity ID	Displays the entity ID.
Entity Amount	Displays the entity amount.
Currency	Displays the currency in which the entity was created.
Request Amount	Displays the amount that must be write off.
Adjustment Type	Indicates the adjustment type using which the write off adjustment must be created. <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b></p> <p>You can search for an account by clicking the <b>Search</b>  icon corresponding to the field.</p> </div>
Bill ID	Displays the bill ID.

In addition to the above columns, the screen has following button:

Button Name	Button Description
Override	Used to override an adjustment type of the write off request.

<p><b>Note:</b></p> <p>Pagination is used to display limited number of records in the <b>Search Results</b> section. By default, 10 records are displayed in the <b>Search Results</b> section. You can change the number of records displayed per page, if required.</p> <p>You can use the navigation buttons, such as <b>First</b> () , <b>Previous</b> () , <b>Next</b> () , and <b>Last</b> () to navigate between pages. You can also select the page to which you want to navigate from the <b>Go To</b> list.</p> <p>The values appear in the <b>Page Limit</b> list only when you define values for the <b>PAGE_NUMBER</b> lookup field.</p>
---

3. Modify the details of the bill line items.
4. Click **Save**.

The changes made to the write off bill line items are saved.

## Approving a Write Off Request

You can view the number of write off requests which are pending for approval in the **Refund/Write Off Request** screen. The approver can review, and accordingly approve or reject the write off request based on the observations.

**Note:** The system will not allow you to approve or reject a write off request submitted by you.

### Procedure

To approve a write off request:

1. Do either of the following:

If you want to...	Then...
Approve a write off request through the <b>Refund/Write Off Request</b> screen	<ol style="list-style-type: none"> <li>1. Search for the write off request in the <b>Refund/Write Off Request</b> screen.</li> <li>2. In the <b>Search Results</b> section, click the link in the <b>Refund/Write Off Request Information</b> column corresponding to the write off request which you want to review.</li> </ol>
Approve a write off request from the <b>To Do List</b> screen	<ol style="list-style-type: none"> <li>1. Click the <b>Menu</b> link in the <b>Application</b> toolbar. A list appears.</li> <li>2. From the <b>Main</b> menu, select <b>To Do</b> and then click <b>To Do List</b>. The <b>To Do Type for User Search</b> window appears.</li> <li>3. Enter <b>C1-WOREQ</b> in the <b>To Do Type</b> field.</li> <li>4. Click the <b>Search</b> button corresponding to the <b>To Do Type</b> field. The <b>To Do List</b> screen appears.</li> <li>5. Select the <b>Open</b> option from the <b>Filter by</b> list to view all unassigned To Dos.</li> </ol>

If you want to...	Then...
	6. Click the link in the <b>Message</b> column corresponding to the To Do of the write off request that you want to review.

The **Write Off Request** screen appears.

2. Review the write off request details.
3. Click the **Approve** button in the **Write Off Request** zone.

The system behaves in the following manner:

If...	Then...
The <b>Hierarchical Approval</b> check box is selected in the write off request type using which the write off request is created and the total write off amount is greater than the threshold amount specified at the next level in the approval hierarchy	A To Do of the <b>C1-WOREQ</b> To Do type is created and sent to the approver at the next level in the approval hierarchy, and the status of the write off request remains as <b>Approval In Progress</b> .
The <b>Hierarchical Approval</b> check box is selected in the write off request type using which the write off request is created and the total write off amount is less than the threshold amount specified at the next level in the approval hierarchy	<p>The write off adjustments are created using the specified adjustment types and the status of the write off request is changed to <b>Processed</b>.</p> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> The write off adjustments are created in the <b>Frozen</b> status. If a match event is present for the debit bill line items (such as bill segments and adjustments), the existing match event is stamped on the write off adjustments and on the corresponding financial transactions. However, if the match events does not exist, a new match event is created and stamped on the write off adjustments and on the corresponding financial transactions. If you are doing a partial write off for any entity, the corresponding match event status is set to <b>Open</b>. However, if the entire eligible amount is written off, the corresponding match event status is set to <b>Balanced</b>.</p> </div>
The <b>Hierarchical Approval</b> check box is not selected in the write off request type using which the write off request is created	<p>The write off adjustments are created using the specified adjustment types and the status of the write off request is changed to <b>Processed</b>.</p> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> The write off adjustments are created in the <b>Frozen</b> status. If a match event is present for the debit bill line items (such as bill segments and adjustments), the existing match event is stamped on the write off adjustments and on the corresponding financial transactions. ## **Rejecting a Write Off Request**

### **Prerequisites**

To reject a write off request, you should have:

- Rejection reasons defined in the application

### **Note:**

While rejecting a write off request, you need to specify the reason why you want to reject the write off request. You can select the appropriate rejection reason only when you have defined the reasons for the **Rejected** status of the **C1-WORequest** business object in the **Status Reason** screen.

The system will not allow you to approve or reject a write off request submitted by you.

### **Procedure**

To reject a write off request:

1. Do either of the following:

<b>If you want to...</b>	<b>Then...</b>
Reject a write off request through the <b>Refund/Write Off Request</b> screen	<ol style="list-style-type: none"> <li>1. Search for the write off request in the <b>Refund/Write Off Request</b> screen.</li> <li>2. In the <b>Search Results</b> section, click the link in the <b>Refund/Write Off Request Information</b> column corresponding to the write off request which you want to review.</li> </ol>
Reject a write off request from the <b>To Do List</b> screen	<ol style="list-style-type: none"> <li>1. Click the <b>Menu</b> link in the <b>Application</b> toolbar. A list appears.</li> <li>2. From the <b>Main</b> menu, select <b>To Do</b> and then click <b>To Do List</b>.  The <b>To Do Type for User Search</b> window appears.</li> </ol>

If you want to...	Then...
	<ol style="list-style-type: none"> <li>3. Enter <b>C1-WOREQ</b> in the <b>To Do Type</b> field.</li> <li>4. Click the <b>Search</b> button corresponding to the <b>To Do Type</b> field. The <b>To Do List</b> screen appears.</li> <li>5. Select the <b>Open</b> option from the <b>Filter by</b> list to view all unassigned To Dos.</li> <li>6. Click the link in the <b>Message</b> column corresponding to the To Do of the write off request that you want to review.</li> </ol>

The **Write Off Request** screen appears.

2. Review the write off request details.
3. Click the **Reject** button in the **Write Off Request** zone.

The **Reject Write Off Request** window appears. It contains following fields:

Field Name	Field Description	Mandatory (Yes or No)
Status Reason	Used to indicate the reason why you want to reject the write off request.	Yes
Comments	Used to specify additional information while rejecting the write off request.	No

**Note:** The **Reject** button appears only when:

- The write off request is in the **Approval In Progress** status.
- A user with the approval To Do role is reviewing the write off request.

4. Select the rejection reason from the **Status Reason** list.
5. Click **Save**.

The status of the write off request is changed to **Rejected**.

## Adding a Log Entry for a Write Off Request

### Procedure

To add a log entry for a write off request:

1. Search for the write off request in the **Refund/Write Off Request** screen.
2. In the **Search Results** section, click the link in the **Refund/Write Off Request Information** column corresponding to the write off request whose log you want to edit.

The **Write Off Request** screen appears. It consists of the following tabs:

- **Main** – Displays information about the write off request. It contains the following zones:
  - **Write Off Request** – Displays the details of the write off request.
  - **Write Off Details** – Lists the debit bill line items (such as debit bill segments and adjustments) of the account which must be written off.

- **Bills** — Used to search bills with debit line items, such as debit bill segments and adjustments, that you want to write off. This tab appears only when the write off request is in the **Draft** status.
  - **Log** – Lists the complete trail of actions performed on the write off request.
3. Click the **Log** tab.

The **Log** tab appears.

4. Click the **Add Log Entry** link in the upper right corner of the **Write Off Request Log** zone.

The **Add Request Log** window appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Request Information	Displays information about the write off request.	Not applicable
Log Details	Used to specify additional comments on the write off request.	Yes

5. Enter the comments in the **Log Details** field.
  6. Click **Save**.
- The log entry is added in the **Write Off Request Log** zone.

## **Canceling a Write Off Request**

There might be situations when incorrect write off request is processed in the system. In such case, the system provides you with an ability to cancel the write off request. However, note that you can cancel a write off request only when the write off request is in the **Processed** status.

### **Prerequisites**

To cancel a write off request, you should have:

- Cancel reasons defined in the application

**Note:** While cancelling a write off request, you need to specify the reason why you want to cancel the write off request. You can select the appropriate cancel reason only when you have defined the reasons for the **Cancelled** status of the **C1-WORequest** business object in the **Status Reason** screen.

### **Procedure**

To cancel a write off request:

1. Search for the write off request in the **Refund/Write Off Request** screen.
2. In the **Search Results** section, click the link in the **Refund/Write Off Request Information** column corresponding to the write off request that you want to cancel.

The **Write Off Request** screen appears.

3. Click the **Cancel** button in the **Write Off Request** zone.

The **Cancel Reason** window appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Status Reason	Used to indicate the reason why you want to cancel the write off request.	Yes
Comments	Used to specify additional information while cancelling the write off request.	No

**Note:** The **Cancel** button appears only when the write off request is in the **Processed** status.

4. Select the cancel reason from the **Status Reason** list.
5. Click **Save**.

The status of the write off request is changed to **Cancelled**.

**Note:** The **C1-WOCANCEL** algorithm cancels all the frozen adjustments created for the write off request which is in the **Processed** state.

- [Hold Request \(Used for Viewing\)](#)

Oracle Revenue Management and Billing allows you to hold the amount for Person, Account or Bills. Hold is a way to prevent certain types of activities from taking place for a customer over a given period of time. The activities that need to be on Hold vary according to the reason for hold, such as due to a climate disaster the collection activity remains on Hold until disaster period is over.

Hold Request is a object which contains list of processes to be kept on hold for certain entities such as account, person, and bill for certain period of time. The hold period is defined as the duration between Hold Request Start Date and End Date. Each Hold Request contains an entity and processes on hold. There could exists multiple hold requests for an entity for different hold reasons and processes.

Following are the hold request entities:

- **Person:** If the person is on hold then all entities linked to that person where the person is financially responsible, such as accounts and its bills will be on hold.
- **Account:** If the account is on hold then all the bills of that account will be on hold.
- **Bill:** A bill will be on complete or partial hold.

In Hold Request, following mentioned processes can be on hold:

- **Auto Pay** — If the auto payment process is on hold then, then auto pay for the bills of the account added in hold request will be on hold till the request is released. However, you can do the manual payments. On activation of the hold request, **Defer Auto Pay Date** field (in Account screen) is populated with some future date. If billing process is on hold then auto payment process would also go on hold.
- **Bill Generation** — If the bill generation process is on hold then, then new bills will not be created for the account added in hold request till request is released. On activation of the hold request, **Bill After** date field (in Account screen) is populated with either hold request end date or some future date until that date billing is kept on hold. Whenever hold request is released for billing process then **Bill After** date field will be populated as system date.

**Note:** During the tenure of a hold request if customer does not require pending bills to be used for bill generation, bill in pending for accounts under hold are identified during activation of hold request which can be deleted by execution of the **C1-DELBI** batch . For more information about the batch, refer to *Oracle Revenue Management and Billing Batch Guide*

- **Overdue** — If the overdue process is on hold then bills associated with accounts in the hold request will be on hold for overdue process. It means existing overdue will be cancelled. New overdue process will get created once hold request is released. On activation of the hold request, **Postpone Credit Review** field (in Account screen) is populated with either hold request end date or some future date. When hold request is released, **Postpone Credit Review** field would be set as system date. If the overdue process is on hold then request for policy termination due to non payment will be on hold.
- **Funding** — A list of bills identified for a full bill amount or a partial bill amount will be kept on hold for a funding process.

**Note:**

For Funding process, Person, Bill, and Account entities can be put on hold. However, for processes like Auto pay, Bill Generation, and Overdue, only Account entity can be put on hold.

Processes and Entities start dates and end dates are expected to be within the limit of Hold Request Start Date and End Date.

You need to specify the hold request type while creating a hold request. Hold request type helps the system to determine:

- Whether to allow the partial hold for bill or not
- Whether hold request must be approved by the approver before keeping entities and processes on hold

It is possible for a given entity, such as a person or account, to be affected by hold request with differing periods or at differing levels. For example, if there is a hold request added for a person manually and another hold request is there due to some other reason for an account belongs to the person who is already on hold. The system assumes that both hold requests are in effect for the account and that the period of accounts starts from the start of the earlier hold request record (for the account) until the later of the two release dates.

During the hold request process, a hold request goes through various statuses in its lifecycle. For more information about the hold request statuses, see [Hold Request \(Without Approval\) Status Transition](#) on page 1589 and [Hold Request \(With Approval\) Status Transition](#) on page 1589

Note that the lifecycle of a hold request is driven by the business object using which the hold request is created. A hold request business object named **C1-HoldRequest** is shipped with the product. The hold request feature explained in this document is articulated based on the lifecycle and logic defined in the **C1-HoldRequest** business object. In addition, you can configure the search feature by setting **Fkref** feature configuration for each entity, such as person, account and bill.

For more information on how to setup the hold request processes, see [Prerequisites](#) on page 1596.

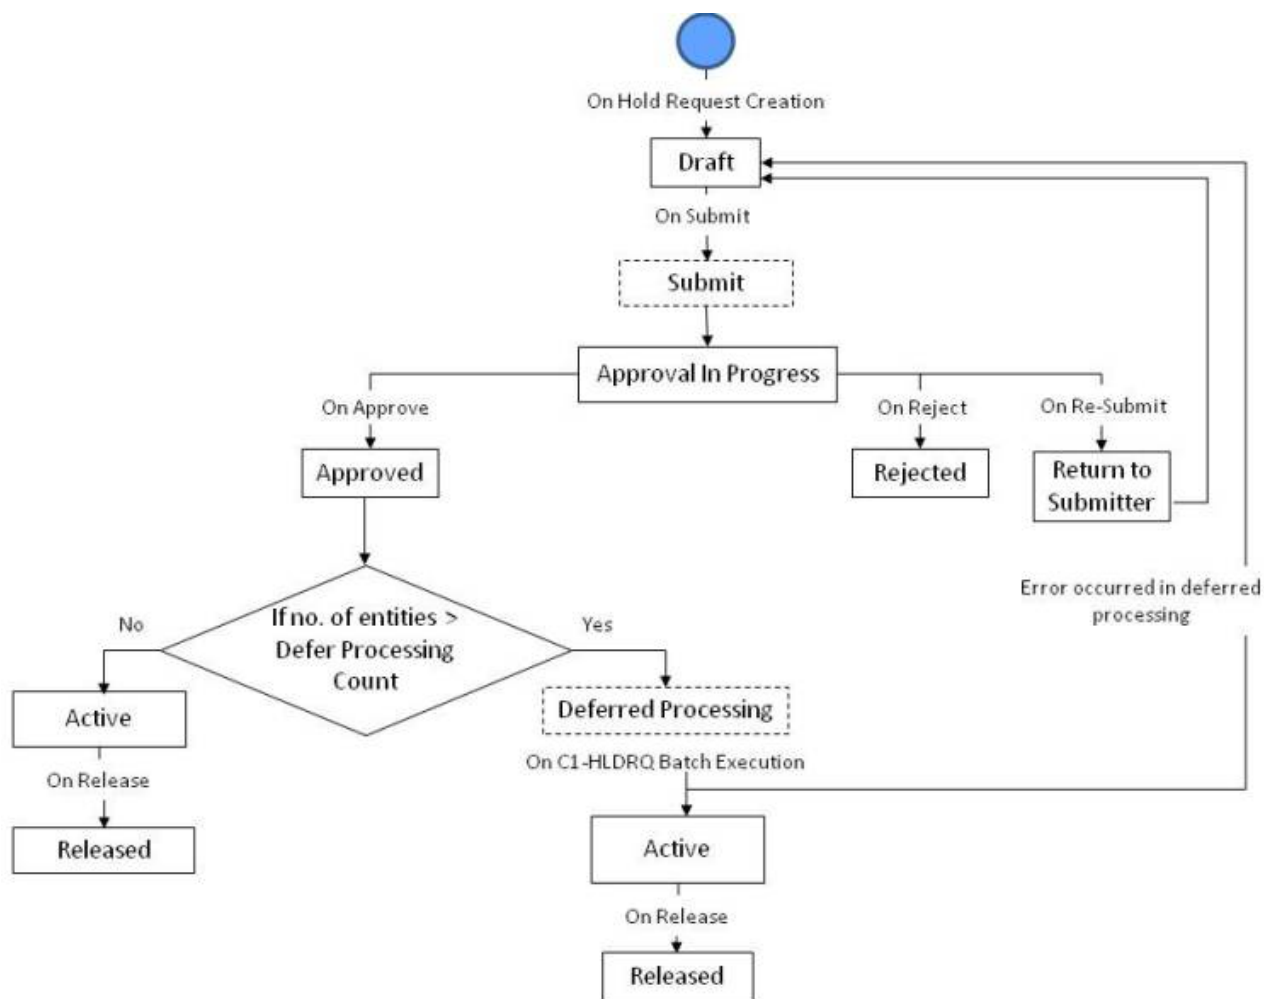

## Hold Request (Without Approval) Status Transition

The following figure graphically indicates how a hold request moves from one status to another when approval workflow is off:

## Hold Request (With Approval) Status Transition

The following figure graphically indicates how a hold request moves from one status to another when approval workflow is on:

## Algorithms Used in C1-HoldRequest

The following table lists the algorithms which are attached to the **C1-HoldRequest** business object:

System Event	Algorithm	Algorithm Type	Description
Information	C1-HOLD-INF	C1-HOLD-INF	This algorithm generates hold request information string which appears throughout the application. This algorithm concatenates the following fields: <ul style="list-style-type: none"> <li>• Hold Request Type</li> <li>• Status</li> <li>• Entity</li> <li>• Hold Request ID</li> </ul>

System Event	Algorithm	Algorithm Type	Description
Validation	C1-HLDVALDN	C1-HLDVALDN	<p>This algorithm validates following during different statuses:</p> <p>For <b>Draft</b> status, it checks the following:</p> <ul style="list-style-type: none"> <li>• At least one Process is present in the request. Entity selection is optional</li> <li>• No duplicate entity and process is allowed in a single request.</li> <li>• Same entity cannot be placed on hold with the same <b>Hold Reason</b> in multiple Hold Requests.</li> <li>• Request start date is earlier than or equal to process and entity start date.</li> <li>• Request End Date is later than or equal to process and entity end date.</li> <li>• At least one process start date is earlier than or equal to any entity start date.</li> <li>• At least one process end date is later than or equal to any entity end date.</li> <li>• For Bill and Person entity, <b>Bill Generation</b>, <b>Overdue</b>, and <b>Auto Pay</b> processes cannot be selected as the hold processes in a hold request.</li> <li>• For Bill entity, it checks if hold amount is less than or equal to bill outstanding amount</li> <li>• For Bill entity, to add a new bill to the request, the selected bill should be with a non-zero outstanding amount.</li> <li>• Each Entities start date should lie within at least one process start date and end date in a request.</li> </ul> <p>For <b>Active</b> state following are some additional validations:</p> <ul style="list-style-type: none"> <li>• Hold Process or Entities cannot be deleted.</li> <li>• Hold Request or Entity or Process Start Date cannot be modified.</li> <li>• Hold Reason cannot be modified</li> <li>• Hold Request or Process or Entity End Date can be updated as either equal or greater than system date.</li> <li>• Process can be added with start date as system date.</li> <li>• Entity cannot be added in hold request.</li> <li>• If entity or process end date is in past then it cannot be updated.</li> </ul>

The following table lists the algorithms which are used in the lifecycle of the **C1-HoldRequest** business object:

Status	System Event	Algorithm	Algorithm Type	Description
Draft	Enter	C1-HLDARCTRN	C1-HLDARCTRN	This algorithm transitions the request to active status when the request is created from <b>Account Receivable Central</b> and <b>Delinquency Control</b> .
Draft	Exit	F1-TODOCOMPL	F1-TODOCOMPL	This algorithm type completes To Do entries that are linked to an object when the object exits a given state. The system finds all open To Do entries with drill keys for primary key of the current business object, and completes them, unless the To Do entry's type has been configured with an Exclude To Do Type Characteristic Type indicating that it should not be automatically completed.
Submit	Enter	C1-HOLDSUBMT	C1-HOLDSUBMT	This algorithm checks the following: <ul style="list-style-type: none"> <li>Whether the approval is required for the hold request. If the approval is required for a hold request, the status of the hold request is changed to <b>Approval In Progress</b>. However, if the approval is not required for a hold request, the status of the hold request is changed to <b>Active</b> or <b>Deferred Processing</b> depending on the Defer Processing Count specified in the hold request type.</li> </ul>

Status	System Event	Algorithm	Algorithm Type	Description
Active	Enter	C1-HOLDACTV	C1-HOLDACTV	<p>This algorithm is invoked on Active button and validates following:</p> <ul style="list-style-type: none"> <li>• Entities Start Date is on or after Hold Request Start Date</li> <li>• Entities End Date is on or before Hold Request End Date</li> <li>• For an Entity Bill, Hold Amount is not more than bill outstanding amount or Bill outstanding amount is not equal to zero.</li> <li>• Updates and processes entities start date to system date.</li> <li>• It updates following mentioned date to minimum of Entity End Date or Process End Date: <ul style="list-style-type: none"> <li>• Bill After Date - For Bill Generation Process.</li> <li>• Postpone Credit review Date Until- For Overdue Process.</li> <li>• Defer Auto Pay Date - For Auto pay process.</li> </ul> </li> <li>• <b>Parameter-Alert Type</b>-Using this Alert Type alerts are shown in the dashboard. A alert will have hyperlink which will enable user to navigate to <b>Alerts</b> tab on account.</li> <li>• Start Dates and End Dates of Alert types are maintained based on the Hold Requests associated with the account.</li> </ul> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> If entity end date is empty, process end date will be considered. If process end date and entity is empty, Hold Request End Date will be considered.</p> </div>

Status	System Event	Algorithm	Algorithm Type	Description
Deferred Processing	Monitor	F1-AT-RQJ	F1-AT-RQJ	This algorithm type transitions business object current state to the input Next Status or to the status related to the input Next Transition Condition. Only one of the soft parameters may be specified. If both soft parameters are not specified, the business object will be transitioned to the default next status specified on lifecycle. Algorithms of this algorithm type may be defined for any business object status as its monitor algorithm.
Approval In Progress	Enter	C1-HOLDAPP	C1-HOLDAPP	This algorithm creates To Do based on 'Approval To Do Type configured in Hold Request Type.
Approval In Progress	Exit	F1-TODOCOMPL	F1-TODOCOMPL	This algorithm type completes To Do entries that are linked to an object when the object exits a given state. The system finds all open To Do entries with drill keys for the current business object's primary key, and completes them, unless the To Do entry's type has been configured with an Exclude To Do Type Characteristic Type indicating that it should not be automatically completed.
Approved	Enter	C1-HOLDAPRVD	C1-HOLDAPRVD	This algorithm is triggered when the approver clicks the <b>Approve</b> button. It checks whether the approval is required from users at the next level in the approval profile hierarchy. If the approval is required from the next level in the approval hierarchy, the status of the hold request is changed to <b>Approval In Progress</b> . If further approval is not required, the status of the hold request is changed to <b>Active</b> or <b>Deferred Processing</b> depending on the Defer Processing Count specified in the hold request type.

Status	System Event	Algorithm	Algorithm Type	Description
Return to Submitter	Enter	C1-HLDRESUBM	C1-HLDRESUBM	This algorithm is triggered when the approver clicks the <b>Re Submit</b> button. A To Do is created and sent to the submitter. It transitions the status of the hold request from <b>Approval In Progress</b> to <b>Draft</b> . The submitter can make required changes to the request details and submit it again. The To Do Type and To Do Role for submitter is specified in hold request type.
Rejected	-	-	-	-
Released	Enter	C1-RELENTITY	C1-RELENTITY	This algorithm is invoked on <b>Release</b> button and updates following date to system date for all entities in the Hold Request: <ul style="list-style-type: none"> <li>• Bill After Date - For Bill Generation Process</li> <li>• Postpone Credit review Date Until- For Overdue Process</li> <li>• Defer Auto Pay Date - For Auto pay process</li> <li>• Parameter-Alert Type-Using this Alert Type alerts are shown in the dashboard. A alert will have hyperlink which will enable user to navigate to Alerts tab on account</li> <li>• Start Dates and End Dates of Alert types are maintained based on the Hold Requests associated with the account.</li> </ul>
Released	Enter	C1-RLSHOLD	C1-RLSHOLD	This algorithm is invoked on click of <b>Release</b> button in hold request and updates the following: <ul style="list-style-type: none"> <li>• Hold Request End Date is updated to System Date</li> <li>• Processes End Date is updated to System Date</li> <li>• Entities End Date is updated to System Date</li> <li>• Hold request status is changed to <b>Released</b> after <b>Hold Release Reason</b> is accepted.</li> </ul>

## Prerequisites

---

To setup the hold request process, you need to do the following:

- Define the release status reasons for the **C1-HoldRequest** business object
- Define the required hold reasons in the system
- Define rejected status reasons for the **C1-HoldRequest** business object
- Assign the **C1-HLDAP** To Do type to a To Do role whose users must receive To Do generated while submitting a hold request for approval
- Assign the **C1-HOLSB** To Do type to a To Do role whose users must receive To Do generated while resubmitting a hold request
- Define the required hold request types in the system
- Define the required characteristic types where the characteristic entity is set to **Hold Request**
- Define the required characteristic types where the characteristic entity is set to **Hold Request Type**
- Set the batch control type of the **Hold Request Periodic Monitor (C1-HLDRQ)** and **Hold Request Monitor (C1-HLMON)** batches to Timed and define the following attributes:
  - Time Interval
  - Timer Active
  - User ID
  - Batch Language
  - Email Address

**Note:** For more information about the batch, refer to *Oracle Revenue Management and Billing Batch Guide*

## Hold Request Type

---

Oracle Revenue Management and Billing allows you to define a hold request type using which you can create a hold request.

The **Hold Request Type** screen allows you to define, edit, copy, and delete a hold request type. This screen consists of the following zones:

- [Hold Request Type List](#) on page 1596
- [Hold Request Type](#) on page 1597

### Hold Request Type List

The **Hold Request Type List** zone lists hold request types that are already defined in the system. It contains the following columns:

Column Name	Column Description
Hold Request Type	Displays the hold request type.
Description	Displays the description of the hold request type.

Column Name	Column Description
Edit	On clicking the <b>Edit</b> (✎) icon, the <b>Hold Request Type</b> screen appears where you can edit the details of the hold request type.
Duplicate	On clicking the <b>Duplicate</b> (📄📄) icon, the <b>Hold Request Type</b> screen appears where you can define a hold request type using an existing hold request type.
Delete	On clicking the <b>Delete</b> (🗑) icon, you can delete the hold request type.  <b>Note:</b> You can delete a hold request type only when you have not created a hold request using the hold request type.

On clicking the **Broadcast** (📡) icon corresponding to the hold request type, the **Hold Request Type** zone appears with the details of the respective hold request type.

### Related Topics

How to delete a hold request type	<a href="#">Deleting a Hold Request Type</a> on page 1605
How to view the details of a hold request type	<a href="#">Viewing the Hold Request Type Details</a> on page 1609

## Hold Request Type

The **Hold Request Type** zone displays the details of the hold request type. This zone consists of the following sections:

- **Main** — This section provides basic information about the hold request type. It contains the following fields:

Field Name	Field Description
Hold Request Type	Displays the hold request type.
Description	Displays the description of the hold request type.
Hold Request Business Object	Indicates the business object that will be used to create the hold request.  <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.
Detailed Description	Displays additional information about the hold request type.
Status	Indicates the status of the hold request type. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>
Allow Partial Hold for Bill	Indicates whether the partial hold amount is allowed for a bill.

Field Name	Field Description
Defer Processing Count	<p>Displays the number of entities to determine if the hold request will be processed in deferred mode.</p> <p><b>Note:</b> If the number of entities is less than the <b>Defer Processing Count</b>, the hold request will be processed in real time (i.e. immediately).</p>
Approval Required	Indicates whether approval is required while creating the hold request using hold request type.
Approval To Do Type	<p>Indicates that To Do of the specified To Do type must be created when you submit the hold request for approval.</p> <p><b>Note:</b> This field appears only when the <b>Approval Required</b> check box is selected. It has a link. On clicking the link, the <b>To Do Type</b> screen appears with the details of the respective To Do type.</p>
Approval To Do Role	<p>Indicates that users with the specified To Do role can only approve the hold request submitted for approval.</p> <p><b>Note:</b> This field appears only when the <b>Approval Required</b> check box is selected. It has a link. On clicking the link, the <b>To Do Role</b> screen appears where you can view the details of the respective To Do role.</p>
Submitter To Do Type	<p>Indicates the To Do type of the submitter.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>To Do Type</b> screen appears where you can view the details of the respective To Do type.</p>
Submitter To Do Role	<p>Indicates the To Do role of the submitter.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>To Do Role</b> screen appears where you can view the details of the respective To Do role.</p>

- **Hold Processes** —This section displays the list of processes to be kept on hold for the hold request type.
- **Characteristics** — This section lists the characteristics defined for the hold request type. It contains the following columns:

Column Name	Column Description
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- **Record Actions** — This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the hold request type.
Delete	Used to delete the hold request type. <b>Note:</b> You can delete a hold request type only when you have not created a hold request using the hold request type.
Duplicate	Used to create a new hold request type using an existing hold request type.

- **Record Information** — This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the hold request type is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.

By default, the **Hold Request Type** zone does not appear in the **Hold Request Type** screen. It appears only when you click the **Broadcast**  icon corresponding to the hold request type in the **Hold Request Type List** zone.

### **Related Topics**

For more information on...	See...
How to define a hold request type	<a href="#">Defining a Hold Request Type</a> on page 1599
How to edit a hold request type	<a href="#">Editing a Hold Request Type</a> on page 1603
How to copy a hold request type	<a href="#">Copying a Hold Request Type</a> on page 1606

## **Defining a Hold Request Type**

### **Prerequisites**

To define a hold request type, you should have:

- Hold request business objects defined in the application

### **Procedure**

To define a hold request type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **H** and then click **Hold Request Type**.  
A sub-menu appears.
3. Click the **Add** option from the **Hold Request Type** sub-menu.

The **Select Business Object** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Hold Request Type Business Object	Used to indicate the business object that you want to use to create the hold request type.	Yes

**Tip:** Alternatively, you can access the **Select Business Object** screen by clicking the **Add** button in the **Page Title** area of the **Hold Request Type** screen.

**Note:** The **Select Business Object** screen appears only when there are multiple hold request type business objects defined in the application. If there is only one hold request type business object defined in the application, the **Hold Request Type** screen appears.

4. Select the required hold request type business object from the respective field.
5. Click **OK**.

The **Hold Request Type** screen appears. It contains the following sections:

- **Main** — Used to specify basic details about the hold request type.
- **Hold Processes** — Used to define the processes to hold for the hold request type.
- **Characteristics** — Used to define characteristics for the hold request type.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Hold Request Type	Used to specify the hold request type.	Yes
Business Object	Indicates the hold request type business object used while defining the hold request type.	Not applicable
Description	Used to specify the description for the hold request type.	Yes
Hold Request Business Object	Used to indicate the business object that you want to use while creating the hold request.	Yes
Detailed Description	Used to specify additional information about the hold request type.	No
Status	Used to indicate the status of the hold request type. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> You cannot change the status of a hold request type to <b>Inactive</b> if there are hold requests which are created using the hold request type and are currently in the <b>Draft</b> or <b>Approval In Progress</b> status.</p> </div>	Yes
Allow Partial Hold for Bill	Used to indicate whether the partial hold amount will be accepted for a bill.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Defer Processing Count	Used to indicate the number of entities to determine if the hold request will be processed in deferred mode.  <b>Note:</b> If the number of entities is less than the <b>Defer Processing Count</b> , the hold request will be processed in real time (i.e. immediately). Defer processing count should be a numerical value without decimal points.	No
Approval Required	Used to indicate whether approval is required while creating the hold request using hold request type.	No
Approval To Do Type	Used to indicate that To Do of the specified To Do type must be created when you submit the hold request for approval.  <b>Note:</b> This field appears only when the <b>Approval Required</b> check box is selected.	Yes (Conditional)  <b>Note:</b> This field is required when the <b>Approval Required</b> check box is selected
Approval To Do Role	Used to indicate that users with the specified To Do role can only approve the hold request submitted for approval.  <b>Note:</b> This field appears only when the <b>Approval Required</b> check box is selected.	Yes (Conditional)  <b>Note:</b> This field is required when the <b>Approval Required</b> check box is selected
Submitter To Do Type	Used to indicate the To Do type for the submitter.	No
Submitter To Do Role	Used to indicate the To Do role for the submitter.	No

**Note:**

**Deferred** mode means in the background when the **Hold Request Periodic Monitor (C1-HLDRQ)** batch is invoked. You can configure the **Hold Request Periodic Monitor (C1-HLDRQ)** batch such that it is executed at regular intervals. When the **Hold Request Periodic Monitor (C1-HLDRQ)** batch is invoked, the system checks whether there are any hold requests in the **Deferred** status. If there is an hold request in the **Deferred** status, then its status is changed to **Active**.

6. Enter the required details.

**Note:** You can search for **To Do Type** by clicking the **Search**  icon corresponding to the respective field.

7. Define processes to hold for the hold request type.

**Note:**

At least one hold process needs to be selected for defining a hold request type.

8. Define characteristics for the hold request type, if required.

9. Click **Save**.

The hold request type is defined.

**Related Topics**

For more information on...	See...
<b>Hold Request Type</b> screen	<a href="#">Hold Request Type</a> on page 1596
<b>Hold Request Type List</b> zone	<a href="#">Hold Request Type List</a> on page 1596
How to define characteristics for a hold request type	<a href="#">Defining Characteristics for a Hold Request Type</a> on page 1602

**Defining Characteristics for a Hold Request Type****Prerequisites**

To define characteristics for a hold request type, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Hold Request Type**)

**Procedure**

To define characteristics for a hold request type:

- Ensure that the **Characteristics** section is expanded when you are defining, editing, or copying a hold request type.

The **Characteristics** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Type	Used to indicate the characteristic type. <b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Hold Request Type</b> .	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the hold request type.
Characteristic Value	Used to specify the value for the characteristic type. <b>Note:</b> On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the hold request type.

- Enter the required details.

**Note:** If you select a predefined characteristic type, the **Search** () icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

3. If you want to define more than one characteristic for the hold request type, click the **Add** () icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from the hold request type, click the **Delete** () icon corresponding to the characteristic.

How to define a hold request type	<a href="#">Defining a Hold Request Type</a> on page 1599
How to edit a hold request type	<a href="#">Editing a Hold Request Type</a> on page 1603
How to copy a hold request type	<a href="#">Copying a Hold Request Type</a> on page 1606

## Editing a Hold Request Type

### Prerequisites

To edit a hold request type, you should have:

- Hold request business objects defined in the application

### Procedure

To edit a hold request type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **H** and then click **Hold Request Type**.  
A sub-menu appears.
3. Click the **Search** option from the **Hold Request Type** sub-menu.  
The **Hold Request Type** screen appears.
4. In the **Hold Request Type List** zone, click the **Edit** () icon in the **Edit** column corresponding to the hold request type whose details you want to edit.

The **Hold Request Type** screen appears. It contains the following sections:

- **Main** — Used to specify basic details about the hold request type.
- **Hold Processes** — Used to define the processes to hold for the hold request type.
- **Characteristics** — Used to define characteristics for the hold request type.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Hold Request Type	Displays the hold request type.	Not applicable
Business Object	Indicates the hold request type business object used while defining the hold request type.	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
Description	Used to specify the description for the hold request type.	Yes
Hold Request Business Object	Used to indicate the business object that you want to use while creating the hold request.	Yes
Detailed Description	Used to specify additional information about the hold request type.	No
Status	<p>Used to indicate the status of the hold request type. The valid values are:</p> <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul> <p><b>Note:</b> You cannot change the status of a hold request type to <b>Inactive</b> if there are hold requests which are created using the hold request type and are currently in the <b>Draft</b> or <b>Approval In Progress</b> status.</p>	Yes
Allow Partial Hold for Bill	Used to indicate whether the partial hold amount will be accepted for a bill.	Yes
Defer Processing Count	<p>Used to indicate the number of entities to determine if the hold request will be processed in deferred mode.</p> <p><b>Note:</b> If the number of entities is less than the <b>Defer Processing Count</b>, the hold request will be processed in real time (i.e. immediately). Defer processing count should be a numerical value without decimal points.</p>	No
Approval Required	Used to indicate whether approval is required while creating the hold request using hold request type.	No
Approval To Do Type	<p>Used to indicate that To Do of the specified To Do type must be created when you submit the hold request for approval.</p> <p><b>Note:</b> This field appears only when the <b>Approval Required</b> check box is selected.</p>	Yes (Conditional)  <b>Note:</b> This field is required when the <b>Approval Required</b> check box is selected

Field Name	Field Description	Mandatory (Yes or No)
Approval To Do Role	Used to indicate that users with the specified To Do role can only approve the hold request submitted for approval.  <b>Note:</b> This field appears only when the <b>Approval Required</b> check box is selected.	Yes (Conditional)  <b>Note:</b> This field is required when the <b>Approval Required</b> check box is selected
Submitter To Do Type	Used to indicate the To Do type for the submitter.	No
Submitter To Do Role	Used to indicate the To Do role for the submitter.	No

**Note:**

**Deferred** mode means in the background when the **Hold Request Periodic Monitor (C1-HLDRQ)** batch is invoked. You can configure the **Hold Request Periodic Monitor (C1-HLDRQ)** batch such that it is executed at regular intervals. When the **Hold Request Periodic Monitor (C1-HLDRQ)** batch is invoked, the system checks whether there are any hold requests in the **Deferred** status. If there is an hold request in the **Deferred** status, then its status is changed to **Active**.

**Tip:** Alternatively, you can click the **Edit** button in the **Hold Request Type** zone to edit the details of the hold request type.

5. Modify the details, if required.
6. Define, edit, or remove characteristics from the hold request type, if required.
7. Click **Save**.

The changes made to the hold request type are saved.

**Deleting a Hold Request Type****Procedure**

To delete a hold request type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **H** and then click **Hold Request Type**.

A sub-menu appears.

- Click the **Search** option from the **Hold Request Type** sub-menu.

The **Hold Request Type** screen appears.

- In the **Hold Request Type List** zone, click the **Delete** () icon in the **Delete** column corresponding to the hold request type that you want to delete.

A message appears confirming whether you want to delete the hold request type.

**Note:** You can delete a hold request type only when you have not defined a hold request using the hold request type.

**Tip:** Alternatively, you can click the **Delete** button in the **Hold Request Type** zone to delete the hold request type.

- Click **OK**.

The hold request type is deleted.

## **Copying a Hold Request Type**

Instead of creating a hold request type from scratch, you can create a new hold request type using an existing hold request type. This is possible through copying a hold request type. On copying a hold request type, the details including the characteristics are copied to the new hold request type. You can then edit the details, if required.

### **Prerequisites**

To copy a hold request type, you should have:

- Hold request type (whose copy you want to create) defined in the application
- Hold request business objects defined in the application

### **Procedure**

To copy a hold request type:

- Click the **Admin** link in the **Application** toolbar.

A list appears.

- From the **Admin** menu, select **H** and then click **Hold Request Type**.

A sub-menu appears.

- Click the **Search** option from the **Hold Request Type** sub-menu.

The **Hold Request Type** screen appears.

- In the **Hold Request Type List** zone, click the **Duplicate** () icon in the **Duplicate** column corresponding to the hold request type whose copy you want to create.

The **Hold Request Type** screen appears. It contains the following sections:

- **Main** — Used to specify basic details about the hold request type.
- **Hold Processes** — Used to define the processes to hold for the hold request type.
- **Characteristics** — Used to define characteristics for the hold request type.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Hold Request Type	Used to specify the hold request type.	Yes
Business Object	Indicates the hold request type business object used while defining the hold request type.	Not applicable
Description	Used to specify the description for the hold request type.	Yes
Hold Request Business Object	Used to indicate the business object that you want to use while creating the hold request.	Yes
Detailed Description	Used to specify additional information about the hold request type.	No
Status	Used to indicate the status of the hold request type. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> You cannot change the status of a hold request type to <b>Inactive</b> if there are hold requests which are created using the hold request type and are currently in the <b>Draft</b> or <b>Approval In Progress</b> status.</p> </div>	Yes
Allow Partial Hold for Bill	Used to indicate whether the partial hold amount will be accepted for a bill.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Defer Processing Count	<p>used to indicate the number of bills to determine if the hold request will be processed in deferred mode.</p> <p><b>Note:</b> Deferred mode means in the background when the <b>Hold Request Periodic Monitor (C1-HLDRQ)</b> batch is invoked. You can configure the <b>Hold Request Periodic Monitor (C1-HLDRQ)</b> batch such that it is executed at regular intervals. When the <b>Hold Request Periodic Monitor (C1-HLDRQ)</b> batch is invoked, the system checks whether there are any hold requests in the <b>Deferred</b> status. If there is an hold request in the <b>Deferred</b> status, then its status is changed to <b>Active</b>.</p> <p>If the number of bills is less than the Defer Processing Count, the hold request will be processed in real time (i.e. immediately).</p> <p>Defer processing count should be a numerical value without decimal points.</p>	No
Approval Required	Used to indicate whether approval is required while creating the hold request using hold request type.	No
Approval To Do Type	<p>Used to indicate that To Do of the specified To Do type must be created when you submit the hold request for approval.</p> <p><b>Note:</b> This field appears only when the <b>Approval Required</b> check box is selected.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required when the <b>Approval Required</b> check box is selected</p>
Approval To Do Role	<p>Used to indicate that users with the specified To Do role can only approve the hold request submitted for approval.</p> <p><b>Note:</b> This field appears only when the <b>Approval Required</b> check box is selected.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required when the <b>Approval Required</b> check box is selected</p>
Submitter To Do Type	Used to indicate the To Do type for the submitter.	No
Submitter To Do Role	Used to indicate the To Do role for the submitter.	No

**Tip:** Alternatively, you can click the **Duplicate** button in the **Hold Request Type** zone to create a copy of the hold request type.

5. Enter the required details.
6. Define, edit or remove processes from the hold request type, if required.
7. Define, edit, or remove characteristics from the hold request type, if required.
8. Click **Save**.

The new hold request type is defined.

## Hold Request (Used for Searching)

The **Hold Request** screen allows you to search for a hold request using various search criteria. It also allows you to create a hold request. Through this screen, you can navigate to the following screen:

- [Hold Request \(Used for Viewing\)](#) on page 1620

This screen consists of the following zone:

- [Search Hold Request](#) on page 1610

### Search Hold Request

The **Search Hold Request** zone allows you to search for hold requests using various search criteria. This zone contains the following two sections:

- **Search Criteria** — The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for a hold request using request or bill details. The valid values are: <ul style="list-style-type: none"> <li>• Request Details</li> <li>• Bill Details</li> </ul> <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"><b>Note:</b> By default, the <b>Request Details</b> option is selected.</div>	Yes
Hold Request Type	Used to search hold requests which are created using a particular hold request type. <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"><b>Note:</b> This field appears only when you select the <b>Request Details</b> option from the <b>Search By</b> list.</div>	No
Hold Process	Used to search hold requests which are created using a particular hold process. <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"><b>Note:</b> This field appears only when you select the <b>Request Details</b> option from the <b>Search By</b> list.</div>	No
Status	Used to search hold requests with a particular status. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Draft</li> <li>• Released</li> <li>• Approval In Progress</li> <li>• Deferred Processing</li> <li>• Rejected</li> </ul> <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"><b>Note:</b> This field appears only when you select the <b>Request Details</b> option from the <b>Search By</b> list.</div>	No

Field Name	Field Description	Mandatory (Yes or No)
Account ID	<p>Used to search hold requests which are created for a particular account.</p> <div data-bbox="597 289 1125 531" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This field appears only when you select the <b>Request Details</b> option from the <b>Search By</b> list. You can search for an account by clicking the <b>Search</b>  icon corresponding to the field.</p> </div>	No
Entity	<p>Used to search hold request with a particular entity. The valid values are:</p> <ul style="list-style-type: none"> <li>• Account</li> <li>• Person</li> <li>• Bill</li> </ul> <div data-bbox="597 779 1125 856" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This field appears only when you select the <b>Request Details</b> option from the <b>Search By</b> list.</p> </div>	No
User ID	<p>Used to search hold requests which are created by a particular user.</p> <div data-bbox="597 968 1125 1045" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This field appears only when you select the <b>Request Details</b> option from the <b>Search By</b> list.</p> </div>	
Start Date	<p>Used to search hold requests which are created from a particular date onwards.</p> <div data-bbox="597 1157 1125 1234" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This field appears only when you select the <b>Request Details</b> option from the <b>Search By</b> list.</p> </div>	No
End Date	<p>Used to search hold requests which are created till a particular date.</p> <div data-bbox="597 1346 1125 1423" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This field appears only when you select the <b>Request Details</b> option from the <b>Search By</b> list.</p> </div>	No
Hold Request ID	<p>Used to search a particular hold request.</p> <div data-bbox="597 1507 1125 1585" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This field appears only when you select the <b>Request Details</b> option from the <b>Search By</b> list.</p> </div>	No

Field Name	Field Description	Mandatory (Yes or No)
Person ID	Used to search hold requests which are created for a particular person.  <b>Note:</b> This field appears only when you select the <b>Request Details</b> option from the <b>Search By</b> list. You can search for a person by clicking the <b>Search</b>  icon corresponding to the field.	No
Bill ID	Used to search hold requests which includes bill segments or adjustments of a particular bill.  <b>Note:</b> This field appears only when you select the <b>Bill Details</b> option from the <b>Search By</b> list. You can search for a bill by clicking the <b>Search</b>  icon corresponding to the field.	No
Bill Date From	Used to search hold requests which includes bill segments or adjustments of bills which are created from a particular date onwards.  <b>Note:</b> This field appears only when you select the <b>Bill Details</b> option from the <b>Search By</b> list.	No
To	Used to search hold requests which includes bill segments or adjustments of bills which are created till a particular date.  <b>Note:</b> This field appears only when you select the <b>Bill Details</b> option from the <b>Search By</b> list.	No

**Note:** You must specify at least one search criterion while searching for a hold request.

- **Search Results** — On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Create Date/Time	Displays the date and time when the hold request is created.
Hold Request Information	Displays information about the hold request.  <b>Note:</b> It has a link. On clicking the link, the <b>Hold Request</b> screen appears where you can view the details of the respective hold request.

Column Name	Column Description
Status	Indicates the status of the hold request. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Draft</li> <li>• Released</li> </ul>
Start Date	Displays the date when the hold request is created.
End Date	Displays the date when the hold request is released.
Hold Processes	Displays the hold processes using which hold request is created.
Hold Reason	Displays the hold reason for the hold request.
Created By	Indicates the user who has created the hold request.

## **Searching for a Hold Request**

### **Prerequisites**

To search for a hold request, you should have:

- Hold request types defined in the application

### **Procedure**

To search for a hold request:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Financial** and then click **Hold Request**.  
A sub-menu appears.
3. Click the **Search** option from the **Hold Request** sub-menu.  
The **Hold Request** screen appears.
4. Enter the search criteria in the **Search Hold Request** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search**.

A list of hold requests that meet the search criteria appears in the **Search Results** section.

## Creating a Hold Request

### Prerequisites

To create a hold request, you should have:

- Hold request types defined in the application.

### Procedure

To create a hold request:

1. Do either of the following:

<b>If you want to...</b>	<b>Then...</b>
Define a hold request from the <b>Account Receivable Central</b> screen	<ol style="list-style-type: none"> <li>1. Click the <b>Menu</b> link in the <b>Application</b> toolbar. A list appears.</li> <li>2. From the <b>Main</b> menu, select <b>Financial</b> and then click <b>Account Receivable Central</b>.  The <b>Account Receivable Central</b> screen appears.</li> <li>3. Search for the bill in the <b>Account Receivable Central</b> screen.</li> <li>4. In the <b>Search Results</b> section, select the required bill and then click <b>Hold</b>.</li> </ol> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> Bills are selected to be on hold from <b>Account Receivable Central</b>. Only one bill at a time is allowed to select for <b>Hold Request</b> from <b>Account Receivable Central</b></p> </div>
Define a hold request from the <b>Delinquency Central</b> screen	<ol style="list-style-type: none"> <li>1. Click the <b>Menu</b> link in the <b>Application</b> toolbar. A list appears.</li> <li>2. From the <b>Main</b> menu, select <b>Credit &amp; Collection</b> and then click <b>Delinquency Central</b>.  The <b>Delinquency Central</b> screen appears.</li> <li>3. Search for the overdue process in the <b>Delinquency Central</b> screen.</li> </ol>

If you want to...	Then...
	<p><b>4.</b> In the <b>Search Results</b> section, select the required overdue process and then click <b>Create Hold Request</b>.</p> <div style="border: 1px solid black; padding: 5px; background-color: #f0f0f0;"> <p><b>Note:</b> Accounts are selected to be on hold from <b>Delinquency Central</b> screen Only one account at a time is allowed to select for <b>Hold Request</b> from <b>Delinquency Central</b> screen.</p> </div>
Define a hold request from the <b>Hold Request</b> screen	<ol style="list-style-type: none"> <li><b>1.</b> Click the <b>Menu</b> link in the <b>Application</b> toolbar. A list appears.</li> <li><b>2.</b> From the <b>Main</b> menu, select <b>Financial</b> and then click <b>Hold Request</b>. A sub-menu appears.</li> <li><b>3.</b> Click the <b>Add</b> option from the <b>Hold Request</b> sub-menu.</li> </ol>

The **Add Hold Request** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Hold Request Type	Used to indicate the request type using which you want to create the hold request.	Yes

**Tip:** Alternatively, you can access the **Add Hold Request** screen by clicking the **Add** button in the **Page Title** area of the **Hold Request** screen.

- 2.** Select the required hold request type from the respective fields.
- 3.** Click **OK**.

The hold request is defined and the status of the hold request is set to **Draft**. The **Hold Request** screen appears where you can view the details of the hold request. It contains the following sections:

- **Main** – Used to specify basic details about the hold request. This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Hold Request Type	Indicates the hold request type using which you want to create the hold request.	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
Start Date	Used to specify the date from when the hold request is effective.  <b>Note:</b> The hold request start date cannot be later than the hold request end date. By default, system date appears in this field.	Yes
End Date	Used to specify the date till when the hold request is effective.  <b>Note:</b> The hold request end date cannot be earlier than the hold request start date.	Yes
Hold Reason	Used to indicate the reason why you want to hold the entity.  <b>Note:</b> The hold reason must exist in the <b>HOLD_REASON_FLG</b> lookup field and its status must be <b>Active</b> .	Yes
Entity	Used to indicate the type of the entity for which you want to create the hold request. The valid values are: <ul style="list-style-type: none"><li>• Account</li><li>• Bill</li><li>• Person</li></ul> <b>Note:</b> If bill is kept on hold using <b>Account Receivable Central</b> screen, then this field will display <b>Bill</b> as an entity and <b>Hold Entities</b> section will display information about this bill.	Yes
Comments	Used to specify the additional information about hold request.	No

- **Hold Entities** — Used to specify details of the selected hold entity. This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Hold Entity ID	<p>Used to specify the hold entity ID.</p> <div data-bbox="695 258 1138 686" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>You can search for an entity ID by clicking the <b>search</b>  icon corresponding to the field</p> <p>If the hold entity is account, you must specify the account ID in this field. If the hold entity is person, you must specify the person ID in this field. And, if the hold entity is bill, you must specify the bill ID in this field.</p> </div>	Yes
Start Date	<p>Used to specify the date from when you want to hold the entity.</p> <div data-bbox="695 793 1138 1163" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>By default, system date appears in this field</p> <p>The hold entity start date must be between the hold request start and end dates and between at least one process's start and end dates.</p> <p>The hold entity start date cannot be later than the hold entity end date.</p> </div>	Yes
End Date	<p>Used to specify the date till when you want to hold the entity.</p> <div data-bbox="695 1268 1138 1528" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>The hold entity end date must be between hold request start and end dates and between the process's start and end dates.</p> <p>The hold entity end date cannot be earlier than the hold entity start date.</p> </div>	No
Hold Amount	<p>Displays the amount which is kept on hold.</p> <div data-bbox="695 1640 1138 1717" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This column appears only when the hold entity is <b>Bill</b>.</p> </div>	Not applicable

- **Hold Processes** — Used to indicate the processes to be on hold for the hold request. By default, processes are defined on the hold request type. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Hold Process	Used to indicate the process that needs to be kept on hold.	Yes
Start Date	Used to specify the date from when process is to be on hold for the hold request.  <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> By default, system date appears in this field  The hold process start date must be between the hold request start and end dates.</p> </div>	Yes
End Date	Used to specify the date till when the process is to be on hold.	No

- **Characteristics** — Used to define the characteristics for the hold request. This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the hold request.	Yes (Conditional)  <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This field is required when you are defining a characteristic for the hold request.</p> </div>
Characteristic Type	Used to indicate the characteristic type.  <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Hold Request</b>.</p> </div>	Yes (Conditional)  <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This field is required when you are defining a characteristic for the hold request.</p> </div>
Characteristic Value	Used to specify the value for the characteristic type.  <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.</p> </div>	Yes (Conditional)  <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This field is required when you are defining a characteristic for the hold request.</p> </div>

#### 4. Enter the required details

**Note:**

Processes and Entities start dates and end dates are expected to be within the limit of Hold Request Start Date and End date.

You can search for a hold entity by clicking the **search**  icon corresponding to the respective field.

5. Add entities and processes for the hold request.
6. Define characteristics for the hold request, if required.
7. Click **Save**.

The hold request is created and the status of the hold request is set to **Draft**. The **Hold Request** screen appears with the details of hold request.

**Note:** It is recommended that user should set the **C1-HLMON** batch every time the hold request is generated. Otherwise, alert would be shown in the dashboard which may not give the proper representation of active hold requests.

## Viewing the Hold Request Details

### Procedure

To view the details of a hold request:

1. Search for the hold request in the **Hold Request** screen.
2. In the **Search Results** section, click the link in the **Hold Request Information** column corresponding to the hold request whose details you want to view.

The **Hold Request** screen appears. It consists of the following tabs:

- **Main** – Displays information about the hold request. It contains the following zones:
  - **Hold Request** – Displays the details of the hold request.
  - **Hold Entities** – Lists the entities, such as person, accounts, or bills that are on hold request.
  - **Search Account** — Searches the accounts to be put on hold.

**Note:** This zone appears only when hold request is for **Account** and its status is **Draft**.

- **Search Bill** — Searches the bills to be put on hold.

**Note:** This zone appears only when hold request is for **Bill** and its status is **Draft**.

- **Search Person** — Searches the persons to be put on hold.

**Note:** This zone appears only when hold request is for **Person** and its status is **Draft**.

- **Log** – Lists the complete trail of actions performed on the hold request.
3. View the details of the hold request in the **Hold Request** zone.
  4. View the hold request entities (such as person, accounts, or bills) in the **Hold Entities** zone.

## Hold Request (Used for Viewing)

---

Once you create a hold request, the **Hold Request** screen allows you to:

- Add entities in a hold request
- Add processes in a hold request
- Edit the details of a hold request
- Edit the hold amount against each entity. This is valid for only bill.
- Delete a hold request
- View the details of a hold request
- Submit a hold request for approval
- Approve or reject a hold request
- Resubmit a hold request for approval
- Activate and Release a hold request
- View the log of a hold request
- Add a log entry for a hold request

This screen consists of the following tabs:

- **Main** – Displays information about the hold request. It contains the following zones:
  - **Hold Request** – Displays the details of the hold request.
  - **Hold Entities** – Lists the entities, such as person, accounts, or bills that are on hold request.
  - **Search Account** — Searches the accounts to be put on hold.

**Note:** This zone appears only when hold request is for **Account** and its status is **Draft**.

**Note:** This zone appears only when hold request is for **Person** and its status is **Draft**.

- **Log** — Lists complete trail of actions performed on the hold request. This tab contains the following zone:
  - **Hold Request Log** — Displays the actions performed on the hold request.

### Hold Request - Main

The **Main** tab on the **Hold Request** contains the following zones:

- [Hold Request](#) on page 1621
- [Hold Entities](#) on page 1623
- [Search Account](#) on page 1624

**Note:** This zone appears only when hold request is for **Account** and its status is **Draft** .

- [Search Bill](#) on page 1627

**Note:** This zone appears only when hold request is for **Bill** and its status is **Draft** .

- [Search Person](#) on page 1628

**Note:** This zone appears only when hold request is for **Person** and its status is **Draft** .

## Hold Request

The **Hold Request** zone displays the details of the hold request. This zone contains the following sections:

- **Main** — This section provides basic information about the hold request. It contains the following fields:

Field Name	Field Description
Hold Request Information	Displays information about the hold request.
Hold Request Type	Indicates the hold request type using which the hold request is created. <b>Note:</b> It has a link. On clicking the link, the <b>Hold Request Type</b> screen appears where you can view the details of the hold request type.
Status	Indicates the status of the hold request.
Status Reason	Indicates the reason why the hold request is released. <b>Note:</b> This field appears only when the hold request is in the <b>Released</b> status. It has a link. On clicking the link, the <b>Status Reason</b> screen appears where you can view the details of the released reason.
Start Date	Displays the date when the hold request is created.
End Date	Displays the date when the hold request is released.
Hold Reason	Displays the reason of hold request.
Entity	Displays the hold request entity.
Comments	Displays the additional information for a hold request.

- **Hold Processes** — Lists the processes that are on hold in the hold request. It contains the following columns:

Column Name	Column Description
Hold Process	Lists the processes that are on hold.
Start Date	Displays the date from when the process is to be on hold for hold request.
End Date	Displays the date till when the process is to be on hold for hold request.

- **Characteristics** — Lists the characteristics defined for the hold request. It contains the following fields:

Field Name	Field Description
Effective Date	Displays the date from when hold request is effective.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- **Record Actions** — This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the hold request. <b>Note:</b> The <b>Edit</b> button appears only when the hold request is in the <b>Draft</b> or <b>Active</b> status.
Delete	Used to delete the hold request. <b>Note:</b> The <b>Delete</b> button appears only when the hold request is in the <b>Draft</b> status.
Submit	Used to activate the hold request. <b>Note:</b> The <b>Submit</b> button appears only when the hold request is in the <b>Draft</b> status.
Re Submit	Used to re-submit the hold request. <b>Note:</b> the <b>Re Submit</b> button appears only when the hold request is in the <b>Approval In Progress</b> status.
Approve	Used to approve the hold request. <b>Note:</b> the <b>Approve</b> button appears only when the hold request is in the <b>Approval In Progress</b> status.
Reject	Used to reject the hold request. <b>Note:</b> the <b>Reject</b> button appears only when the hold request is in the <b>Approval In Progress</b> status.
Release	Used to release the hold request. <b>Note:</b> The <b>Release</b> button appears only when the hold request is in the <b>Active</b> status.

- **Record Information** — This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the hold request is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.

Field Name	Field Description
Status Date/Time	Displays the date and time when the hold request status is updated.
Create Date/Time	Displays the date and time when the hold request is created.

### Hold Entities

The **Hold Entities** zone on the **Hold Request** screen lists the entities that are on hold request. This zone contains the following columns:

Column Name	Column Description
Person Information	<p>Displays information about the person. In addition, this column has a context menu which helps in navigating to other screens in the application.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Person</b> screen appears with details of the respective person.</p>
Account Information	<p>Displays information about the account. In addition, this column has a context menu which helps in navigating to other screens in the application.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears with details of the respective account.</p>
Bill Information	<p>Displays information about the bill. In addition, this column has a context menu which helps in navigating to other screens in the application.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Bill</b> screen appears with details of the respective bill.</p>
Start Date	Displays the date from when the entity is on hold.
End Date	<p>Displays the date till when the entity is on hold.</p> <p><b>Note:</b> When hold request for entity is released, then its end date gets updated to the release date only when its end date lies between the hold request start date and end date .</p>
Hold Amount	<p>Displays the amount on hold.</p> <p><b>Note:</b> This column appears only when the entity bill is on hold.</p>
Bill After Date	<p>Displays the date after which bills can be generated.</p> <p><b>Note:</b> This column appears only when the entity account is on hold.</p>
Postpone Credit Review Until	<p>Displays the date till when overdue process is to be on hold.</p> <p><b>Note:</b> This column appears only when the entity account is on hold.</p>
Defer Auto Pay Date	<p>Displays the date from when auto pay process is to be put on deferred mode.</p> <p><b>Note:</b> This column appears only when the entity account is on hold.</p>

**Note:**

You can directly edit the start and end date of the hold entities by selecting the corresponding column and then click the **Edit** button available on the upper left corner of the **Hold Entities** zone.

You can directly delete the hold entities by selecting the corresponding column and then click the **Delete** button available on the upper left corner of the **Hold Entities** zone.

## Deleting Hold Request Entities

### Procedure

To delete hold request entities:

1. Search for the hold request in the **Hold Request** screen.
2. In the **Search Results** section, click the link in the **Hold Request Information** column corresponding to the hold request whose details you want to delete.

The **Hold Request** screen appears.

3. Select the entities to delete in the **Hold Entities** zone and click the **Delete** button available in the upper left corner.

A message appears confirming whether you want to delete the hold entity.

#### **Note:**

The **Delete** button appears only when the hold request is in the **Draft** or **Active** status.

4. Click **OK**.

The hold entities are deleted.

**Note:** No deletion is allowed on entities of hold requests which are in active status and are added from **Account Receivable Central** or **Delinquency Central**.

## Deleting a Hold Request

### Procedure

To delete a hold request:

1. Search for the hold request in the **Hold Request** screen.
2. In the **Search Results** section, click the link in the **Hold Request Information** column corresponding to the hold request that you want to delete.

The **Hold Request** screen appears.

3. Click the **Delete** button in the **Hold Request** zone.

A message appears confirming whether you want to delete the hold request.

**Note:** The **Delete** button appears only when the hold request is in the **Draft** status.

4. Click **OK**.

The hold request is deleted.

**Note:**

You can delete a hold request only when its status is **Draft**.

Bills added from ARC cannot be deleted from the **Hold Request** screen.

## **Submitting a Hold Request**

### **Prerequisites**

To submit a hold request, you should have:

- Hold Request Types, Hold Processes and Hold Entities defined in the request.

### **Procedure**

To submit a hold request:

1. Search for the hold request in the **Hold Request** screen.
2. In the **Search Results** section, click the link in the **Hold Request Information** column corresponding to the *hold request* that you want to submit.

The **Hold Request** screen appears.

3. Click the **Submit** button in the **Hold Request** zone.

The system behaves in the following manner:

<b>If...</b>	<b>Then</b>
The <b>Approval Required</b> check box is selected in the hold request type using which the hold request is created.	A To Do of the <b>C1-HLDAP</b> To Do type is created and sent to the approver and the status of the hold request is changed to <b>Approval In Progress</b> .
The <b>Approval Required</b> check box is not selected in the hold request type using which the hold request is created.	The hold request is created using the specified hold request types and the status of the hold request is changed to <b>Active</b> or <b>Deferred Processing</b> as specified in the hold request type.

**Note:**

The **Submit** button appears only when the hold request is in the **Draft** status.

Once the request is activated, the **Release** button appears in the **Record Actions** section.

If hold request start date is in past and its status is draft then, on activation of the hold request, the start date is changed to the system date.

For Active hold request, **C1-DELBI** batch will delete all pending bill segments and bills under account for bill generation process.

For more information about the **Delete Pending Bill segments and Bills (C1-DELBI) batch**, refer to Oracle Revenue Management and Billing Batch Guide.

**Approving a Hold Request**

You can view the number of hold requests which are pending for approval in the **Hold Request** screen. The approver can review, and accordingly approve, reject or resubmit the hold request based on the observations.

**Note:** The system will not allow you to approve, reject or resubmit a hold request submitted by you.

**Procedure**

To approve a hold request:

1. Do either of the following:

If you want to...	Then...
Approve a hold request through the <b>Hold Request</b> screen	<ol style="list-style-type: none"> <li>1. Search for the hold request in the <b>Hold Request</b> screen.</li> <li>2. In the <b>Search Results</b> section, click the link in the <b>Hold Request Information</b> column corresponding to the hold request which you want to review.</li> </ol>
Approve a hold request from the <b>To Do List</b> screen	<ol style="list-style-type: none"> <li>1. Click the <b>Menu</b> link in the <b>Application</b> toolbar. A list appears.</li> <li>2. From the <b>Main</b> menu, select <b>To Do</b> and then click <b>To Do List</b>. The <b>To Do Type for User Search</b> window appears.</li> </ol>

If you want to...	Then...
	<ol style="list-style-type: none"> <li>3. Enter <b>C1-HLDAP</b> in the <b>To Do Type</b> field.</li> <li>4. Click the <b>Search</b> button corresponding to the <b>To Do Type</b> field. The <b>To Do List</b> screen appears.</li> <li>5. Select the <b>Open</b> option from the <b>Filter by</b> list to view all unassigned To Dos.</li> <li>6. Click the link in the <b>Message</b> column corresponding to the To Do of the hold request that you want to review.</li> </ol>

The **Hold Request** screen appears.

2. Review the hold request details.
3. Click the **Approve** button in the **Hold Request** zone.

The system behaves in the following manner:

If you are...	Then...
Approving a Hold request	The status of the hold request is changed to <b>Active</b> or <b>Deferred Processing</b> as specified in the hold request type.

**Note:**

The **Approve** button appears only when the hold request is in the **Approval In Progress** status.

You can also resubmit the hold request if any changes are required in the hold request. Upon clicking the **Resubmit** button, provide the comments to make the required changes for the hold request.

## Releasing a Hold Request

### Procedure

To release a hold request:

1. Search for the hold request in the **Hold Request** screen.
2. In the **Search Results** section, click the link in the **Hold Request Information** column corresponding to the hold request whose details you want to edit.

The **Hold Request** screen appears.

- Click the **Release** button in the **Hold Request** zone.

The **Release Reason** window appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Release Reason	Used to indicate the reason for releasing the hold request.	Yes
Comments	Used to specify the additional comments on the release reason	No

- Ensure the required release reason.
- click **Save**.

The hold request is released.

**Note:**

The **Release** button appears only when the hold request is in the **Active** status.

Once the hold request is in **Released** status, the **End Date** of processes and entities gets updated.

## Rejecting a Hold Request

### Prerequisites

To reject a hold request, you should have:

- Rejection reasons defined in the application

**Note:**

While rejecting a hold request, you need to specify the reason why you want to reject the hold request. You can select the appropriate rejection reason only when you have defined the reasons for the **Rejected** status of the **C1-HoldRequest** business object in the **Status Reason** screen.

The system will not allow you to approve, reject or resubmit a hold request submitted by you.

### Procedure

To reject a hold request:

- Do either of the following:

If you want to	Then
Reject a hold request through the <b>Hold Request</b> screen	<ol style="list-style-type: none"> <li>Search for the hold request in the <b>Hold Request</b> screen.</li> <li>In the <b>Search Results</b> section, click the link in the <b>Hold Request Information</b> column</li> </ol>

If you want to	Then
	corresponding to the hold request which you want to review.
Reject a hold request from the <b>To Do List</b> screen	<ol style="list-style-type: none"> <li>1. Click the <b>Menu</b> link in the <b>Application</b> toolbar. A list appears.</li> <li>2. From the <b>Main</b> menu, select <b>To Do</b> and then click <b>To Do List</b>. The <b>To Do Type for User Search</b> window appears.</li> <li>3. Enter <b>C1-HLDAP</b> in the <b>To Do Type</b> field.</li> <li>4. Click the <b>Search</b> button corresponding to the <b>To Do Type</b> field. The <b>To Do List</b> screen appears.</li> <li>5. Select the <b>Open</b> option from the <b>Filter by</b> list to view all unassigned To Dos.</li> <li>6. Click the link in the <b>Message</b> column corresponding to the To Do of the hold request that you want to review.</li> </ol>

The **Hold Request** screen appears.

2. Review the hold request details.
3. Click the **Reject** button in the **Hold Request** zone.

The **Reject Hold Request** window appears. It contains following fields:

Field Name	Field Description	Mandatory (Yes or No)
Status Reason	Used to indicate the reason why you want to reject the hold request.	Yes
Comments	Used to specify additional information while rejecting the hold request.	No

**Note:** The **Reject** button appears only when:

- The hold request is in the **Approval In Progress** status.
- A user with the approval To Do role is reviewing the hold request.

4. Select the rejection reason from the **Status Reason** list.
5. Click **Save**.

The status of the hold request is changed to **Rejected**.

## Resubmitting a Hold Request

### Prerequisites

To resubmit a hold request, you should have:

- Entities added in the hold request which is submitted for approval.

While resubmitting, To Do will be sent to the submitter of the request using the submitter To Do Role mapped on the hold request type and the request will be moved to Draft status. The submitter can do necessary changes and re submit the request. Log will be maintained when the approver sends the request back to submitter.

### Procedure

To resubmit a hold request:

1. Search for the hold request in the **Hold Request** screen.
2. In the **Search Results** section, click the link in the **Hold Request Information** column corresponding to the hold request that you want to resubmit.

The **Hold Request** screen appears.

3. Click the **Re Submit** button in the **Hold Request** zone.

The **Resubmit Hold Request** screen appears.

**Note:** The **Re Submit** button appears only when the hold request is in the **Approval In Progress** status.

A To Do of the **C1-HOLSB** To Do type is created and sent to the request submitter using the submitter TO DO Role and the status of the hold request is changed to **Draft**.

4. Enter the comments in the respective field and click **Save**.

## Viewing the Log of a Hold Request

### Procedure

To view the log of a hold request:

1. Search for the hold request in the **Hold Request** screen.

- In the **Search Results** section, click the link in the **Hold Request Information** column corresponding to the hold request whose log you want to view.

The **Hold Request** screen appears. It consists of the following tabs:

- Main** – Displays information about the hold request. It contains the following zones:

- Hold Request** – Displays the details of the hold request.
- Hold Entities** – Lists the hold entities records of the hold request.
- Search Account** – Searches the accounts to be put on hold.

**Note:** This zone appears only when hold request is for **Account** and its status is **Draft**.

- Search Bill** – Searches the bills to be put on hold.

**Note:** This zone appears only when hold request is for **Bill** and its status is **Draft**.

- Search Person** – Searches the persons to be put on hold.

**Note:** This zone appears only when hold request is for **Person** and its status is **Draft**.

- Log** – Lists the complete trail of actions performed on the hold request. This tab contains the following zone:

- Hold Request Log** – Displays the trail of actions performed on the particular hold request.

- Click the **Log** tab.

The **Hold Request Log** zone in the **Log** tab contains the following columns:

Column Name	Column Description
Date/Time	Displays the date and time when the action was performed on the hold request.
Details	Displays the details about the action performed on the hold request.
User	Indicates the user who has performed the action on the hold request.
Log Type	Indicates the type of log.
Related Object	Indicates the object or entity which is generated when the action is performed on the hold request.
Status Reason	Indicates the reason why the hold request was rejected or voided.

**Note:** You can manually add a log entry for the hold request by clicking the **Add Log Entry** link in the upper right corner of the **Hold Request Log** zone.

## Adding a Log Entry for a Hold Request

### Procedure

To add a log entry for a hold request:

1. Search for the hold request in the **Hold Request** screen.
2. In the **Search Results** section, click the link in the **Hold Request Information** column corresponding to the hold request whose log you want to edit.

The **Hold Request** screen appears. It consists of the following tabs:

- **Main** – Displays information about the hold request. It contains the following zones:

- **Hold Request** – Displays the details of the hold request.
- **Hold Entities** – Lists the hold entities records of the hold request.
- **Search Account** – Searches the accounts to be put on hold.

**Note:** This zone appears only when hold request is for **Account** and its status is **Draft**.

- **Search Bill** – Searches the bills to be put on hold.

**Note:** This zone appears only when hold request is for **Bill** and its status is **Draft**.

- **Search Person** – Searches the persons to be put on hold.

**Note:** This zone appears only when hold request is for **Person** and its status is **Draft**.

- **Log** – Lists the complete trail of actions performed on the hold request. This tab contains the following zone:
  - **Hold Request Log** – Displays the trail of actions performed on the particular hold request.

3. Click the **Log** tab.

The **Log** tab appears.

4. Click the **Add Log Entry** link in the upper right corner of the **Hold Request Log** zone.

The **Add Hold Request Log** window appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Hold Request Information	Displays information about the hold request.	Not applicable
Log Details	Used to specify additional comments on the hold request.	Yes

5. Enter the comments in the **Log Details** field.
6. Click **Save**.

The log entry is added in the **Hold Request Log** zone.

## Delinquency Central

---

### Topics:

- [Prerequisites](#)
- [Delinquency Central \(Used for Viewing\)](#)
- [Overdue Process Information for Account: {Account ID}](#)

Oracle Revenue Management and Billing provides a complete overview of the overdue bills belonging to the delinquent accounts of a particular person using the **Delinquency Central**. User can review the overdue bills and perform following actions from the delinquency central:

- Initiate customer contact
- Initiate hold on overdue process
- Create payment arrangement for an account
- Create promise to pay for person's account

The Delinquency Central assists you in identifying all the overdue processes, overdue bills & delinquent accounts using an overdue monitoring process.

For more information on how to setup the delinquency central, see [Prerequisites](#) on page 1650.

### **Related Topics**

<b>For more information on...</b>	<b>See...</b>
<b>Delinquency Central</b> screen	<a href="#">Delinquency Central (Used for Viewing)</a> on page 1650
<b>Overdue Process Information for Account: {Account ID}</b>	<a href="#">Overdue Process Information for Account: {Account ID}</a> on page 1657

## Prerequisites

---

To setup delinquency central, you need to do the following:

- Define the required characteristic types where the characteristic entity is set to overdue event.
- Define the overdue event type and overdue process template in the system.
- Promise To Pay type defined in the application.
- Customer contact type defined in the application.
- Hold request type defined in the application.

## Delinquency Central (Used for Viewing)

---

The **Delinquency Central** screen allows you to:

- Search for an overdue process
- View the details of an overdue process
- View the details of an overdue event
- Create customer contact
- Create a hold request for an overdue process
- Create a payment arrangement for an account
- Create a promise to pay for a person's account
- Create a payment agreement request for an account

This screen consists of the following zones:

- [Search Overdue Process](#)
- [Overdue Events](#)

### Search Overdue Process

The **Search Overdue Process** zone allows you to search for overdue processes using various search criteria. This zone contains the following two sections:

- **Search Criteria** — The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	<p>Used to indicate whether you want to search for overdue processes using person, account, bill or overdue process. The valid values are:</p> <ul style="list-style-type: none"> <li>• Person</li> <li>• Account</li> <li>• Bill</li> <li>• Overdue Process</li> </ul> <p><b>Note:</b> By default, the <b>Person</b> option is selected.</p>	No

Field Name	Field Description	Mandatory (Yes or No)
Person ID	Used to search for overdue processes which belong to a particular person.  <b>Note:</b> This field appears only when you select the <b>Person</b> option from the <b>Search By</b> list.	No
Person Identifier Type	Used to search for overdue processes with a particular person identifier type.  <b>Note:</b> This field appears only when you select the <b>Person</b> option from the <b>Search By</b> list.	Yes (Conditional)  <b>Note:</b> If you enter the person identifier as a search criteria, you have to select the person identifier type.
Person Identifier	Used to search for overdue processes with a specific value of the person identifier type.  <b>Note:</b> This field appears only when you select the <b>Person</b> option from the <b>Search By</b> list.	Yes
Account ID	Used to search for overdue processes created for a particular account.  <b>Note:</b> This field appears only when you select the <b>Account</b> option from the <b>Search By</b> list.	No
Account Identifier Type	Used to search for overdue processes with a particular account identifier type.  <b>Note:</b> This field appears only when you select the <b>Account</b> option from the <b>Search By</b> list.	Yes (Conditional)  <b>Note:</b> If you enter the account identifier as a search criteria, you have to select the account identifier type.
Account Identifier	Used to search for overdue processes with a particular account identifier.  <b>Note:</b> This field appears only when you select the <b>Account</b> option from the <b>Search By</b> list.	Yes
Bill ID	Used to search for overdue processes with a particular bill.  <b>Note:</b> This field appears only when you select the <b>Bill</b> option from the <b>Search By</b> list.	No
Alternate Bill ID	Used to search for overdue processes using an alternate bill ID.  <b>Note:</b> This field appears only when you select the <b>Bill</b> option from the <b>Search By</b> list.	No

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Type / Value	Used to search for overdue processes with a particular characteristic type and its value.  <b>Note:</b> This field appears only when you select the <b>Bill</b> option from the <b>Search By</b> list.	No
Overdue Process Template	Used to search for overdue processes with a particular overdue process template.  <b>Note:</b> This field appears only when you select the <b>Overdue Process</b> option from the <b>Search By</b> list.	No
Start Date	Used to search for overdue processes with a particular start date.  <b>Note:</b> This field appears only when you select the <b>Overdue Process</b> option from the <b>Search By</b> list.	Yes
End Date	Used to search overdue process with a particular end date.  <b>Note:</b> This field appears only when you select the <b>Overdue Process</b> option from the <b>Search By</b> list.	Yes
Status	Used to search for overdue processes with a particular status. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul> <b>Note:</b> This field appears only when you select the <b>Overdue Process</b> option from the <b>Search By</b> list.	No
On Hold	Used to search for overdue processes that are on hold.  <b>Note:</b> This field appears only when you select the <b>Overdue Process</b> option from the <b>Search By</b> list.	No
Overdue Amount From	Used to search for overdue processes with a particular lower limit of the overdue amount.  <b>Note:</b> This field appears only when you select the <b>Overdue Process</b> option from the <b>Search By</b> list.	No
To	Used to search for overdue processes with a particular higher limit of the overdue amount.  <b>Note:</b> This field appears only when you select the <b>Overdue Process</b> option from the <b>Search By</b> list.	No

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Type / Value	Used to search for overdue processes with a particular characteristic type and value.  <b>Note:</b> This field appears only when you select the <b>Overdue Process</b> option from the <b>Search By</b> list.	No

- In addition to above search parameters, the screen consists of following fields in the **Person Details** or **Account Details** section:

Column Name	Column Description
Main Customer	Displays the name of the main customer to whom the account belongs.  <b>Note:</b> This field appears only when you select the <b>Account</b> option from the <b>Search By</b> list.
Person Name	Displays the name of the person to whom the account belongs.  <b>Note:</b> This field appears only when you select the <b>Person</b> option from the <b>Search By</b> list.
Person Identifier Type	Displays the person identifier type.  <b>Note:</b> This field appears only when you select the <b>Person</b> or <b>Account</b> option from the <b>Search By</b> list.
Person Identifier	Displays the value of the person identifier type.  <b>Note:</b> This field appears only when you select the <b>Person</b> or <b>Account</b> option from the <b>Search By</b> list.
Account Identifier Type	Displays the account identifier type.  <b>Note:</b> This field appears only when you select the <b>Account</b> option from the <b>Search By</b> list.
Account Identifier	Displays the value of the account identifier type.  <b>Note:</b> This field appears only when you select the <b>Account</b> option from the <b>Search By</b> list.
Overdue	Displays whether the person account(s)/bill(s) are overdue. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul> <b>Note:</b> This field appears only when you select the <b>Person</b> or <b>Account</b> option from the <b>Search By</b> list.
Number of Active Overdue processes	Displays the number of overdue processes linked to the person's account that are in active status.  <b>Note:</b> This field appears only when you select the <b>Person</b> or <b>Account</b> option from the <b>Search By</b> list.

Column Name	Column Description
Number of Hold(s) on Account(s)	Displays the number of hold requests on the particular account.
Number of Overdue Bills	Displays the total number of bills that are overdue. <b>Note:</b> This field appears only when you select the <b>Person</b> or <b>Account</b> option from the <b>Search By</b> list.
Total Overdue Amount	Displays the total overdue amount for an account.
Last Payment Date	Displays date of the last payment made by the person. <b>Note:</b> This field appears only when you select the <b>Person</b> or <b>Account</b> option from the <b>Search By</b> list.
Last Payment Amount	Displays the amount last paid by the person. <b>Note:</b> This field appears only when you select the <b>Person</b> or <b>Account</b> option from the <b>Search By</b> list.
Number Of Payment Arrangements	Displays the number of payment arrangements for the person's account. <b>Note:</b> This field appears only when you select the <b>Person</b> or <b>Account</b> option from the <b>Search By</b> list.
Total Number of Overdue Process on Hold	Displays the total number of overdue process that are on hold. <b>Note:</b> This field appears only when you select the <b>Person</b> or <b>Account</b> option from the <b>Search By</b> list.
Number of Promise To Pay	Displays the number of promise to pay belonging to the person. <b>Note:</b> This field appears only when you select the <b>Person</b> or <b>Account</b> option from the <b>Search By</b> list.
Number of Broken Promise To Pay	Displays the total number of promise to pay that are broken. <b>Note:</b> This field appears only when you select the <b>Person</b> or <b>Account</b> option from the <b>Search By</b> list.

- **Search Results** — On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Overdue Process	Display additional information about the overdue process. <b>Note:</b> It has a link. On clicking the link, the <b>Overdue Process</b> screen appears where you can view the details of the overdue process.
Overdue Process Template	Displays the template that was used to create overdue process's events.

Column Name	Column Description
Account Information	Display additional information about the account. In addition, this column has a context menu which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears with the details of the account.
Person Information	Display additional information about the person. In addition, this column has a context menu which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Person</b> screen appears with the details of the person.
Overdue Amount	Displays the overdue amount under that overdue process.
On Hold	Displays whether the overdue process is on hold.
Overdue Process Details	On clicking the <b>View</b>  icon, the <b>Overdue Process Details</b> screen appears where you can view details of the overdue process.

On clicking the **Broadcast**  icon corresponding to the overdue process, the **Overdue Events** zone appears with the details of the respective overdue process.

## Overdue Events

The **Overdue Events** zone displays the details of the events of the overdue process on the **Delinquency Central** screen.

Column Name	Column Description
Event	Displays information about the event of the overdue process.
Event Status	Displays the status of the event.
Dependency on Other Events	Displays whether the event is dependent on other events. The valid values are: <ul style="list-style-type: none"> <li>No</li> <li>Yes</li> </ul>
Trigger Date	Displays the trigger date of the event.

## Searching for an Overdue Process

### Prerequisites

To search for an overdue process, you should have:

- Overdue process defined in the application.

### Procedure

To search for an overdue process:

1. Click the **Menu** link in the **Application** toolbar
2. From the **Main** menu, select **Credits & Collection** and then click **Delinquency Central**.

The **Delinquency Central** screen appears.

3. Enter the search criteria in the **Search Overdue Process** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

4. Click **Search**.

A list of overdue processes that meet the search criteria appear in the **Search Results** section.

## Viewing Events of an Overdue Process

### Procedure

To view events of an overdue process:

1. Search for the overdue process in the **Delinquency Central** screen.
2. In the **Search Results** section, click the **Broadcast**  icon corresponding to the overdue process whose event details you want to view.

The **Overdue Events** zone appears.

3. View the overdue event details of the overdue process in the **Overdue Events** zone.

### Related Topics

## Viewing the Overdue Process Details

### **Procedure**

To view the details of an overdue process:

1. Search for the overdue process in the **Delinquency Central** screen.
2. In the **Search Results** section, click the link in the **Overdue Process Information** column corresponding to the overdue process whose details you want to view.

The **Overdue Process** screen appears. It consists of the following tabs:

- **Main** – Displays the basic details of the overdue process.
  - **Events** – Displays the events details of the overdue process.
  - **Log** – Displays a complete trail of actions performed on the overdue process.
  - **Characteristics** – Displays the characteristics of the overdue process.
3. View the event details of the overdue process in the **Overdue Process** screen.

## Overdue Process Information for Account: {Account ID}

---

The **Overdue Process Information for Account: {Account ID}** screen allows you to view detail information of the account which is linked to the overdue process.

This screen consists of the following zones:

- [Person Information](#) on page 1658
- [Account Information](#) on page 1658
- [Customer Contact Details](#) on page 1658
- [Promise To Pay](#) on page 1658
- [Hold Details](#) on page 1659
- [Overdue Bills](#) on page 1659
- [Payment Arrangement](#) on page 1660
- [Search Bill](#) on page 1660
- [Searching for a Bill](#) on page 1661
- [Adding the Customer Contact Details](#) on page 1662
- [Creating a Hold Request for an Overdue Process](#) on page 1662
- [Creating a Payment Agreement Request for an Overdue Process](#)

- [Defining a Promise To Pay for an Overdue Process](#) on page 1663

## Person Information

The **Person Information** zone displays details of the person whose account is linked to the overdue process. This zone contains following columns:

Column Name	Column Description
Person Name	Displays the name of the person whose account is linked to the overdue process.
Phone Number	Displays the phone number of the person.
Address	Displays the address of the person.

## Account Information

The **Account Information** zone displays the details of the account that is linked with the overdue process. This zone contains following columns:

Column Name	Column Description
Account ID	Displays the account ID.
Account Identifier Type	Displays the account identifier type.
Account Identifier	Displays the value of the account identifier type.
Last Payment Date	Displays the date of the last payment made from the account that is linked with the overdue process.
Last Payment Amount	Displays the amount last paid from the account.

## Customer Contact Details

The **Customer Contact Details** zone displays the contact details of the customer whose account is linked with the overdue process. This zone contains following columns:

Column Name	Column Description
Contact Date/Time	Displays the date and time when the customer was contacted.
Customer Contact Information	Displays additional information about the customer contact. <b>Note:</b> It has a link. On clicking the link, the <b>Customer Contact</b> screen appears where you can view the details of the respective customer contact.
Preferred Contact Method	Displays the preferred method of contacting the customer.
Comments	Displays the comments that are placed against each customer.

## Promise To Pay

The **Promise To Pay** zone displays promise to pay created for an account which is linked to the overdue process. This zone contains following columns:

Column Name	Column Description
Promise To Pay Information	Displays additional information of promise to pay. <b>Note:</b> It has a link. On clicking the link, the <b>Promise To Pay</b> screen appears where you can view the details of promise to pay.
Scheduled Amount	Displays the amount to be paid on the <b>Scheduled Date</b> .
Scheduled Date	Displays the date when the payment is expected as per promise to pay.
Status	Displays the status of promise to pay.
Created By	Displays the user ID who has created the promise to pay.

## Hold Details

The **Hold Details** zone displays the details of the person whose account is linked to the overdue process. This zone contains the following columns:

Column Name	Column Description
Hold Request Information	Displays additional information about the hold request. <b>Note:</b> It has a link. On clicking the link, the <b>Hold Request</b> screen appears where you can view the details of the hold request.
Status	Displays the status of the hold request.
Entity	Displays the hold request entity.
Entity Information	Displays the information about the entity on hold. <b>Note:</b> It has a link. On clicking the link, the <b>Account, Bill</b> or <b>Person</b> screen appears, where you can view details of the respective account, bill or person.
Start Date	Displays the date when the hold request is created.
End Date	Displays the end date of the hold request.

## Overdue Bills

The **Overdue Bills** zone displays details of the overdue bills. This zone contains following columns:

Column Name	Column Description
Bill Information	Displays additional information about the bill. <b>Note:</b> It has a link. On clicking the link, the <b>Bill</b> screen appears where you can view the details of the respective bill.
Original Bill Amount	Displays the bill amount when the bill was generated.
Due Date	Displays the due date of the bill.
Overdue Amount	Displays the amount that is overdue in the bill.
Days Past Due	Displays the number of days past after the bill date.

## Payment Arrangement

The **Payment Arrangement** zone displays the details of the payment arrangement that is created for an account linked to the overdue process. This zone contains following columns:

Column Name	Column Description
Contract Information	Displays the payment arrangement contract information . In addition, this column has a context menu which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Contract</b> screen appears where you can view the details of the respective contract.
Payoff Balance	Displays the total amount that is paid against the payment arrangement contract.
Arrange Amount	Displays the amount that is paid in installments as per the payment arrangement contract.
Number of Installments	Displays the number of installments used to calculate the <b>Arrange Amount</b> .

## Search Bill

The **Search Bill** zone allows you to search for a bill. This zone contains the following fields:

- **Search Criteria** — The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Person Name	Used to specify the name of the person for whom the bill is generated.	No
Person ID	Used to specify the person ID.	No
Bills of Persons in Hierarchy	Used to indicate whether you want to search for a bills generated against a person's hierarchy.	No
Bill Cycle	Used to indicate bills where a particular bill cycle is defined.	No
Bill Currency	Used to indicate the bill currency.	No
Billing Method	Used to indicate the billing method. The valid values are: <ul style="list-style-type: none"> <li>• Ad-Hoc Billing</li> <li>• Regular Billing</li> </ul>	No
Bill ID	Used to specify the bill ID.	No
Alternate Bill ID	Used to search a particular bill using the alternate bill ID.	No
Account ID	Used to indicate the account against which the bill is generated.	No
On or After Bill Date	Used to specify the date when the bill was completed.	No
Account Identifier Type	Used to search for bills where the account against which it is generated, a particular account identifier type is defined.	No

Field Name	Field Description	Mandatory (Yes or No)
Account Identifier	Used to search for a bill generated against an account with a particular account identifier.	No

**Note:** You must specify at least one search criterion while searching for the bill.

- **Search Results** — On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Person Name	Displays the name of the person against whom the bill is generated.
Bill ID	Displays the bill ID.
Bill Status	Displays the status of the bill. The valid values are: <ul style="list-style-type: none"> <li>• Pending</li> <li>• Complete</li> </ul>
Bill Date	Displays the date when the bill was completed.
Due Date	Displays the due date of the bill.
Current Charges	Displays the bill amount.
Bill Information	Displays additional information about the bill.

## Searching for a Bill

### Procedure

To search for a bill:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Credits & Collections** and then click **Delinquency Central**.  
The **Delinquency Central** screen appears.
3. Select the **Bill** option from the **Search By** list.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

4. Click **Search**.  
A list of bills that meet the search criteria appear in the **Search Results** section.

## Adding the Customer Contact Details

### Procedure

To add customer contact details:

1. Search for an overdue process in the **Delinquency Central** screen.
2. In the **Search Results** section, select the check box corresponding to the overdue process linked to the account for which you want to add the customer contact.
3. Click **Contact Customer**.

The **Customer Contact** screen appears.

4. Enter the required details.

The fields **Person ID**, **Contact Date/Time** and **User ID** are auto-populated.

5. Click **Save**.

The customer is contacted based on the value set for **Preferred Contact Method** field on the **Customer Contact** screen.

## Creating a Hold Request for an Overdue Process

### Procedure

To create a hold request for an overdue process:

1. Search for an overdue process in the **Delinquency Central** screen.
2. In the **Search Results** section, select the check box corresponding to the **Overdue Process Information** column for whom you want to create a hold request for an overdue process.
3. Click **Create Hold Request** button.

The **Add Hold Request** screen appears. It contains the following field:

Field Name	Field Description	Mandatory
Hold Request Type	Used to indicate the hold request type that is used for creating a hold request.	Yes

4. Select the required hold request type from the **Hold Request Type** field.
  5. Click **OK**.
- The **Hold Request** screen appears.
6. Enter the required details for an overdue process.
  7. Click **Save**.

A hold request is defined for an overdue process where the status of the hold request is set as **Draft**.

**Note:**

The **Hold Request** screen appears where you can view the details of the hold request.

**Creating a Payment Arrangement for an Overdue Process****Procedure**

To create a payment arrangement for an overdue process:

1. Search for the overdue process in the **Delinquency Central** screen.
2. In the **Search Results** section, select the check box corresponding to the **Overdue Process Information** column for whom you want to create a payment arrangement for an overdue process.
3. Click the **Create Payment Arrangement** button.

The **Payment Arrangement** screen appears. It contains the following tabs:

- **Main**
- **History**

4. Enter the required details in the **Payment Arrangement** screen.
5. Click the **Save** button in the **Page Title** area of the **Payment Arrangement** screen.

A payment arrangement is created with the respective payment arrangement contract.

**Note:** The **Payment Arrangement** screen appears with the details of the payment arrangement.

**Related Topics**

**Defining a Promise To Pay for an Overdue Process****Procedure**

To create a promise to pay for an overdue process:

1. Search for the overdue process in the **Delinquency Central** screen.
2. In the **Search Results** section, select the check box corresponding to the **Overdue Process Information** column for whom you want to define a promise to pay for an overdue process.
3. Click the **Create Promise To Pay** button.

A message appears confirming that the promise to pay will be created for the account for which the overdue process is initiated.

**4. Click OK.**

The **Promise To Pay** screen appears.

**5. Enter the required details in the Promise To Pay screen.**

**6. Click the Save button in the Page Title area of the Promise To Pay screen.**

A promise to pay is created with the scheduled payment details.

# Chapter 28

---

## Upload Request

---

### Topics:

- [Upload Request \(Without Approval\) Status Transition](#)
- [Upload Request \(With Approval\) Status Transition](#)
- [Prerequisites](#)
- [Algorithms Used in C1-BillCycleUpdateUplReq](#)
- [Algorithms Used in C1-ContractRiderUpdateUplReq](#)
- [Algorithms Used in C1-HoldUploadRequest](#)
- [Algorithms Used in C1-RefundUploadRequest](#)
- [Algorithms Used in C1-WriteOffUploadRequest](#)
- [Algorithms Used in C1-BillableChargeUploadRequest](#)
- [Algorithms Used in C1-ReinstatementUploadRequest](#)
- [Algorithms Used in C1-BillGrpSortUploadRequest](#)
- [Algorithms Used in C1-BillLevelUploadRequest](#)
- [CSV File Format for Account Bill Cycle Upload Request](#)
- [CSV File Format for Contract Rider Upload Request](#)
- [CSV File Format for Billable Charge Upload](#)
- [CSV File Format for Hold Upload Request](#)
- [CSV File Format for Refund Request Upload](#)

Oracle Revenue Management and Billing provides a generic upload feature which enables you to upload various types of data. The system enables you to upload data for the following using the **Upload Request** feature:

- Billable Charge (Adhoc and Regular)
- Hold Request
- Refund Request
- Write Off Request
- Policy Reinstatement
- Bill Group Sort ID
- Derivation and Pricing Parameters for a Bill Group and Sort ID Combination

It also enables you to update the following information:

- Contract rider of a contract
- Bill cycle of an account

While uploading data for the above supported entities, you need to specify the upload request type using which you want to upload the file. It is the upload request type which helps the system to determine:

- Whether the file must be approved by the approver before creating or updating the entities
- Which business object must be used for creating the upload request
- Which business object must be used for creating or updating entities through an upload request
- Which foreign key reference must be used for generating information string for the entity
- A set of fields using which you can search records uploaded through an upload request

You can upload a data file in the CSV format. You cannot upload data for more than one entity type through the same CSV file. For example, you cannot upload data for billable charges and hold requests using a single CSV file. An upload request of the specified upload request type is created when the file is successfully uploaded in the system. You can track a file through an upload request.

Once an upload request is created, the status of the upload request is set to **Draft**. The status of each record uploaded through an upload request is set to **Pending**. However, if the mandatory data is not available or data required for deriving

- [CSV File Format for Write Off Request Upload](#)
- [CSV File Format for Reinstatement Upload Request](#)
- [CSV File Format for Bill Group Sorting Upload Request](#)
- [CSV File Format for Bill Group Derivation and Pricing Parameters Upload Request](#)
- [Upload Request Type](#)
- [Upload Request \(Used for Searching\)](#)
- [Upload Request \(Used for Viewing\)](#)

mandatory data is incorrect in the record, the status of record is set to **Invalid**. You can then edit, delete, or validate the upload request. During the validation process, the system and custom validations (if any) are executed. The status of each record is changed to **Valid** or **Invalid** depending on whether the record was validated successfully or not.

Once the upload request is validated, you can either cancel or submit the upload request for further processing. On submitting an upload request, the system checks whether the number of valid records in the uploaded file exceed the online record process limit defined in the Defer Upload Request algorithm. If the number of valid records in the uploaded file does not exceed the online record process limit, the system creates or updates the entities in the real time (i.e. immediately). However, if the number of valid records in the uploaded file exceeds the online record process limit, the system creates or updates the entities in the deferred mode (i.e. when the **Upload Request Periodic Monitor (C1-UPLRQ)** batch is invoked).

You can optionally configure the system to use the approval workflow process for an upload request. If the **Approval Required** flag is set to **Yes** in an upload request type, then on submitting the respective upload request, the approval workflow process creates a To Do for the approver to review the upload request. Once the approver approves the upload request, the system checks whether the number of valid records in the uploaded file exceed the online record process limit defined in the Defer Upload Request algorithm. If the number of valid records in the uploaded file does not exceed the online record process limit, the system creates or updates the entities in the real time (i.e. immediately). However, if the number of valid records in the uploaded file exceeds the online record process limit, the system creates or updates the entities in the deferred mode (i.e. when the **Upload Request Periodic Monitor (C1-UPLRQ)** batch is invoked. However, if the approver rejects the upload request, the status of the upload request is set to **Rejected**.

During the upload process, an upload request goes through various statuses in its lifecycle. Note that the lifecycle of an upload request is driven by the business object using which the upload request is created. In this release, we have shipped the following upload request business objects:

- Update Bill Cycle Upload Request (C1-BillCycleUpdateUplReq)
- Billable Charge Upload Request (C1-BillableChargeUploadRequest)
- Update Contract Rider Upload Request (C1-ContractRiderUpdateUplReq)
- Hold Request Upload Request (C1-HoldUploadRequest)
- Refund Request Upload Request (C1-RefundUploadRequest)
- Write Off Request Upload Request (C1-WriteOffUploadRequest)
- Reinstatement Upload Request (C1-ReinstatementUploadRequest)
- Bill Group Sorting Upload Request (C1-BillGrpSortUploadRequest)
- Bill Group Derivation and Pricing Parameters Upload Request(C1-BillLevelUploadRequest)

During the upload request process, an upload request creation goes through various statuses in its lifecycle. For more information about the upload request statuses, see [Upload Request \(Without Approval\) Status Transition](#) on page 1668 and [Upload Request \(With Approval\) Status Transition](#) on page 1669.

**Note:** The lifecycle of an upload request creation is driven by the respective business object using which the request is created. The upload request feature explained in this document is articulated based on the lifecycle and logic defined in the business objects.

For more information on how to setup the upload request process, see [Prerequisites](#) on page 1670.

## Upload Request (Without Approval) Status Transition

The following figure graphically indicates how an upload request moves from one status to another when the approval workflow is off:

## Upload Request (With Approval) Status Transition

The following figure graphically indicates how an upload request moves from one status to another when the approval workflow is on:

## Prerequisites

---

To setup the upload request process, you need to do the following:

- Define the required upload request types in the system.
- Define the required characteristic types where the characteristic entity is set to **Upload Request Type**.
- Define the required characteristic types where the characteristic entity is set to **Upload Request**.
- Define the values for the following parameters in the **C1-REN-VALID** algorithm:
  - Policy Status after Processing Reinstatement Upload Request
  - Policy Reinstatement Status for Reason Verification
- Define the value for the **Online Record Process Limit** parameter in the **C1-DEFERUPLD** algorithm.
- Define the value for the **Policy Status after Processing Reinstatement Upload Request** parameter in the **C1-REN-PROC** algorithm.
- Assign the **C1-BCUUR** To Do type to a To Do role whose users must receive the To Do for approving a bill cycle update upload request.
- Assign the **C1-CRUUR** To Do type to a To Do role whose users must receive the To Do for approving a contract rider update upload request.
- Assign the **C1-HLDUR** To Do type to a To Do role whose users must receive the To Do for approving a hold upload request.
- Assign the **C1-REFUR** To Do type to a To Do role whose users must receive the To Do for approving a refund upload request.
- Assign the **C1-WOUR** To Do type to a To Do role whose users must receive the To Do for approving a write off upload request.
- Assign the **C1-BCUR** To Do type to a To Do role whose users must receive the To Do for approving a billable charge upload request.
- Assign the **C1-RPUR** To Do type to a To Do role whose users must receive the To Do for approving a reinstatement upload request.
- Create a To Do type named **C1-BGSRT** using the following information:
  - **Navigation Option** - c1upldrqTabMenu
  - **Sort Keys** - Define the following sort keys for the To Do type:

Sort Key	Use as Default	Sort Order
Upload Request ID	Yes	Descending

- **Drill Keys** - Define the following drill keys for the To Do type:

Table Name	Field Name
C1_UPLOAD_REQ	Upload Request ID

- Assign the **C1-BGSRT** To Do type to a To Do role whose users must receive the To Do for approving a bill group sorting upload request.
- Create a To Do type named **C1-BGDVP** using the following information:
  - **Navigation Option** - c1upldrqTabMenu

- **Sort Keys** - Define the following sort keys for the To Do type:

Sort Key	Use as Default	Sort Order
Upload Request ID	Yes	Descending

- **Drill Keys** - Define the following drill keys for the To Do type:

Table Name	Field Name
C1_UPLOAD_REQ	Upload Request ID

- Assign the **C1-BGDVP** To Do type to a To Do role whose users must receive the To Do for approving a bill group derivation and pricing parameters upload request.
- Set the batch control type of the **Upload Request Periodic Monitor (C1-UPLRQ)** batch to **Timed** and define the following attributes:
  - Time Interval
  - Timer Active
  - User ID
  - Batch Language
  - Email Address

## Algorithms Used in C1-BillCycleUpdateUplReq

The following table lists the algorithms which are used in the lifecycle of the **C1-BillCycleUpdateUplReq** business object:

Status	System Event	Algorithm	Algorithm Type	Description
Draft	Enter	C1-BCU-DERIV	C1-BCU-DERIV	<p>This algorithm reads the data in the <b>BO_DATA_AREA</b> column of the <b>C1_UPL_REQUEST</b> table and accordingly inserts the records in the <b>C1_UPLOAD_REQ_DTLS</b> table. In addition, the status of each record in the <b>C1_UPLOAD_REQ_DTLS</b> table is set to <b>Pending</b>.</p> <p>It derives the account ID using the account identifier type and account identifier combination whenever the account ID is not specified in the record. Once the account ID is derived, the corresponding record is updated in the <b>C1_UPLOAD_REQ_DTLS</b> table. If the system could not derive the account ID using the account identifier type and account identifier combination, the status of the record in the <b>C1_UPLOAD_REQ_DTLS</b> table is changed to <b>Invalid</b>.</p>

Status	System Event	Algorithm	Algorithm Type	Description
Validated	Enter	C1-BCU-VALID	C1-BCU-VALID	<p>This algorithm is invoked when the user clicks the <b>Validate</b> button. It validates the records which are in the <b>Pending</b> status. It checks whether the account ID and bill cycle specified in the record are valid. If the account ID and bill cycle are valid and if the bill cycle is associated with the division to which the account belongs, the status of the record in the <b>C1_UPLOAD_REQ_DTLS</b> table is changed to <b>Valid</b>.</p> <p>If the account ID is invalid, it derives the account ID using the account identifier type and account identifier combination and updates the record accordingly. In addition, it changes the status of the record in the <b>C1_UPLOAD_REQ_DTLS</b> table to <b>Valid</b>. However, if the system could not derive the account ID using the account identifier type and account identifier combination, or if the bill cycle is invalid, or if the bill cycle is not associated with the division to which the account belongs, the status of the record in the <b>C1_UPLOAD_REQ_DTLS</b> table is changed to <b>Invalid</b>.</p> <p>It also checks whether there are two or more records with the same account ID. If so, it validates and changes the status of one record to <b>Valid</b> and the status of the remaining records is changed to <b>Invalid</b>.</p>
Submitted	Monitor	F1-AT-RQJ	F1-GEN-BOMNJ	<p>This algorithm transitions the current status to the specified status. You can specify the status to which you want the business object to transition in the following parameters:</p> <ul style="list-style-type: none"> <li>• Next Status</li> <li>• Next Transition Condition</li> </ul> <p>At a time, you can specify value for either the <b>Next Status</b> or <b>Next Transition Condition</b> parameter. If you don't specify any value for these parameters, the system will transition the business object to the default next status specified in its lifecycle.</p>

Status	System Event	Algorithm	Algorithm Type	Description
Submitted	Enter	C1-UPLSUBENT	C1-UPLSUBENT	This algorithm is invoked when the user clicks the <b>Submit</b> button. It checks whether the approval is required for the upload request. If the approval is required for an upload request, the status of the upload request is changed to <b>Approval In Progress</b> . However, if the approval is not required for an upload request, the status of the upload request remains in the <b>Submitted</b> status.
Submitted	Enter	C1-DEFERUPLD	C1-DEFERUPLD	This algorithm is invoked when the status of the upload request is changed to <b>Submitted</b> or <b>Approved</b> . It checks whether the upload request must be processed in the real time (i.e. immediately) or in the deferred mode (i.e. in the background). If the number of valid records in the upload request does not exceed the online record process limit, the system changes the status of the upload request to <b>Processing</b> . However, if the number of valid records in the upload request exceeds the online record process limit, the system changes the status of the upload request to <b>Deferred Processing</b> .  It contains the following parameter: <ul style="list-style-type: none"> <li>• <b>Online Record Process Limit</b> <ul style="list-style-type: none"> <li>– Used to indicate the maximum number of valid records you can process in the real time (i.e. immediately).</li> </ul> </li> </ul>
Approval In Progress	Enter	C1-UPLAPPENT	C1-UPLAPPENT	This algorithm creates a To Do using the To Do type specified in the upload request type. The To Do is sent to the appropriate users with the To Do role which is specified in the upload request type. In addition, a log entry is added when a To Do is created using the To Do type.
Approval In Progress	Exit	C1-UPLAPPEXT	C1-UPLAPPEXT	This algorithm checks whether the approver is associated with the approval To Do role specified in the upload request type. If not, it does not allow the approver to approve or reject the upload request. In addition, it does not allow the submitter to approve or reject the upload request.

Status	System Event	Algorithm	Algorithm Type	Description
Approval In Progress	Exit	F1-TODOCOMPL	F1-TODOCOMPL	This algorithm completes To Do entries that are created for the business object when the business object exits the given status. It finds and completes all open To Do entries where the business object's primary key is defined as a drill key. However, if the <b>Exclude To Do Entries From Auto Completion</b> characteristic is defined for the business object, then the system does not automatically complete the respective To Do entry.
Approved	Enter	C1-DEFERUPLD	C1-DEFERUPLD	This algorithm is invoked when the status of the upload request is changed to <b>Submitted</b> or <b>Approved</b> . It checks whether the upload request must be processed in the real time (i.e. immediately) or in the deferred mode (i.e. in the background). If the number of valid records in the upload request does not exceed the online record process limit, the system changes the status of the upload request to <b>Processing</b> . However, if the number of valid records in the upload request exceeds the online record process limit, the system changes the status of the upload request to <b>Deferred Processing</b> .  It contains the following parameter: <ul style="list-style-type: none"> <li>• <b>Online Record Process Limit</b> <ul style="list-style-type: none"> <li>– Used to indicate the maximum number of valid records you can process in the real time (i.e. immediately).</li> </ul> </li> </ul>
Approved	Monitor	F1-AT-RQJ	F1-GEN-BOMNJ	This algorithm transitions the current status to the specified status. You can specify the status to which you want the business object to transition in the following parameters: <ul style="list-style-type: none"> <li>• Next Status</li> <li>• Next Transition Condition</li> </ul> At a time, you can specify value for either the <b>Next Status</b> or <b>Next Transition Condition</b> parameter. If you don't specify any value for these parameters, the system will transition the business object to the default next status specified in its lifecycle.

Status	System Event	Algorithm	Algorithm Type	Description
Deferred Processing	Monitor	F1-AT-RQJ	F1-GEN-BOMNJ	<p>This algorithm transitions the current status to the specified status. You can specify the status to which you want the business object to transition in the following parameters:</p> <ul style="list-style-type: none"> <li>• Next Status</li> <li>• Next Transition Condition</li> </ul> <p>At a time, you can specify value for either the <b>Next Status</b> or <b>Next Transition Condition</b> parameter. If you don't specify any value for these parameters, the system will transition the business object to the default next status specified in its lifecycle.</p>
Processing	Enter	C1-BCU-PROC	C1-BCU-PROC	<p>This algorithm fetches a list of records which are in the <b>Valid</b> status. For each valid record, the system reads the account ID and bill cycle, and updates the bill cycle information of the account using the entity business object defined in the upload request type. If the record is successfully processed, the status of the record is changed to <b>Processed</b>. However, if the record could not be processed successfully due to any reason, the status of the record is changed to <b>Error</b>. Finally, the status of the upload request is changed to <b>Processed</b>.</p>
Processing	Monitor	F1-AT-RQJ	F1-GEN-BOMNJ	<p>This algorithm transitions the current status to the specified status. You can specify the status to which you want the business object to transition in the following parameters:</p> <ul style="list-style-type: none"> <li>• Next Status</li> <li>• Next Transition Condition</li> </ul> <p>At a time, you can specify value for either the <b>Next Status</b> or <b>Next Transition Condition</b> parameter. If you don't specify any value for these parameters, the system will transition the business object to the default next status specified in its lifecycle.</p>

## Algorithms Used in C1-ContractRiderUpdateUplReq

The following table lists the algorithms which are used in the lifecycle of the **C1-ContractRiderUpdateUplReq** business object:

Status	System Event	Algorithm	Algorithm Type	Description
Draft	Enter	C1-CR-DERIV	C1-CR-DERIV	<p>This algorithm reads the data in the <b>BO_DATA_AREA</b> column of the <b>C1_UPL_REQUEST</b> table and accordingly inserts the records in the <b>C1_UPLOAD_REQ_DTLS</b> table. In addition, the status of each record in the <b>C1_UPLOAD_REQ_DTLS</b> table is set to <b>Pending</b>.</p> <p>It derives the account ID using the account identifier type and account identifier combination whenever the account ID is not specified in the record. Once the account ID is derived, the corresponding record is updated in the <b>C1_UPLOAD_REQ_DTLS</b> table. If the system could not derive the account ID using the account identifier type and account identifier combination, the status of the record in the <b>C1_UPLOAD_REQ_DTLS</b> table is changed to <b>Invalid</b>.</p>

Status	System Event	Algorithm	Algorithm Type	Description
Validated	Enter	C1-CR-VALID	C1-CR-VALID	<p>This algorithm is invoked when the user clicks the <b>Validate</b> button. It validates the records which are in the <b>Pending</b> status. It checks whether the account ID, contract ID, contract type, and bill factor specified in the record are valid. If the account ID, contract ID, contract type, and bill factor are valid, if the specified contract belongs to the account, and if the <b>Contract Rider Applicability</b> flag on the bill factor is set to <b>Y</b>, the status of the record in the <b>C1_UPLOAD_REQ_DTLS</b> table is changed to <b>Valid</b>.</p> <p>If the account ID is invalid, it derives the account ID using the account identifier type and account identifier combination and updates the record accordingly. In addition, it changes the status of the record in the <b>C1_UPLOAD_REQ_DTLS</b> table to <b>Valid</b>. However, if the system could not derive the account ID using the account identifier type and account identifier combination, or if the bill factor is invalid, or if the specified contract does not belong to the account, or if the <b>Contract Rider Applicability</b> flag on the bill factor is set to <b>N</b>, the status of the record in the <b>C1_UPLOAD_REQ_DTLS</b> table is changed to <b>Invalid</b>.</p> <p>It also checks whether there are two or more records with the same account ID and contract type combination. If so, it validates and changes the status of one record to <b>Valid</b> and the status of the remaining records is changed to <b>Invalid</b>.</p>
Submitted	Enter	C1-UPLSUBENT	C1-UPLSUBENT	<p>This algorithm is invoked when the user clicks the <b>Submit</b> button. It checks whether the approval is required for the upload request. If the approval is required for an upload request, the status of the upload request is changed to <b>Approval In Progress</b>. However, if the approval is not required for an upload request, the status of the upload request remains in the <b>Submitted</b> status.</p>

Status	System Event	Algorithm	Algorithm Type	Description
Submitted	Enter	C1-DEFERUPLD	C1-DEFERUPLD	<p>This algorithm is invoked when the status of the upload request is changed to <b>Submitted</b> or <b>Approved</b>. It checks whether the upload request must be processed in the real time (i.e. immediately) or in the deferred mode (i.e. in the background). If the number of valid records in the upload request does not exceed the online record process limit, the system changes the status of the upload request to <b>Processing</b>. However, if the number of valid records in the upload request exceeds the online record process limit, the system changes the status of the upload request to <b>Deferred Processing</b>.</p> <p>It contains the following parameter:</p> <ul style="list-style-type: none"> <li>• <b>Online Record Process Limit</b> <ul style="list-style-type: none"> <li>– Used to indicate the maximum number of valid records you can process in the real time (i.e. immediately).</li> </ul> </li> </ul>
Submitted	Monitor	F1-AT-RQJ	F1-GEN-BOMNJ	<p>This algorithm transitions the current status to the specified status. You can specify the status to which you want the business object to transition in the following parameters:</p> <ul style="list-style-type: none"> <li>• Next Status</li> <li>• Next Transition Condition</li> </ul> <p>At a time, you can specify value for either the <b>Next Status</b> or <b>Next Transition Condition</b> parameter. If you don't specify any value for these parameters, the system will transition the business object to the default next status specified in its lifecycle.</p>
Approval In Progress	Enter	C1-UPLAPPENT	C1-UPLAPPENT	<p>This algorithm creates a To Do using the To Do type specified in the upload request type. The To Do is sent to the appropriate users with the To Do role which is specified in the upload request type. In addition, a log entry is added when a To Do is created using the To Do type.</p>

Status	System Event	Algorithm	Algorithm Type	Description
Approval In Progress	Exit	C1-UPLAPPEXT	C1-UPLAPPEXT	This algorithm checks whether the approver is associated with the approval To Do role specified in the upload request type. If not, it does not allow the approver to approve or reject the upload request. In addition, it does not allow the submitter to approve or reject the upload request.
Approval In Progress	Exit	F1-TODOCOMPL	F1-TODOCOMPL	This algorithm completes To Do entries that are created for the business object when the business object exits the given status. It finds and completes all open To Do entries where the business object's primary key is defined as a drill key. However, if the <b>Exclude To Do Entries From Auto Completion</b> characteristic is defined for the business object, then the system does not automatically complete the respective To Do entry.
Approved	Enter	C1-DEFERUPLD	C1-DEFERUPLD	<p>This algorithm is invoked when the status of the upload request is changed to <b>Submitted</b> or <b>Approved</b>. It checks whether the upload request must be processed in the real time (i.e. immediately) or in the deferred mode (i.e. in the background). Status	System Event	Algorithm	Algorithm Type	Description
Approved	Monitor	F1-AT-RQJ	F1-GEN-BOMNJ	<p>This algorithm transitions the current status to the specified status. You can specify the status to which you want the business object to transition in the following parameters:</p> <ul style="list-style-type: none"> <li>• Next Status</li> <li>• Next Transition Condition</li> </ul> <p>At a time, you can specify value for either the <b>Next Status</b> or <b>Next Transition Condition</b> parameter. If you don't specify any value for these parameters, the system will transition the business object to the default next status specified in its lifecycle.</p>
Deferred Processing	Monitor	F1-AT-RQJ	F1-GEN-BOMNJ	<p>This algorithm transitions the current status to the specified status. You can specify the status to which you want the business object to transition in the following parameters:</p> <ul style="list-style-type: none"> <li>• Next Status</li> <li>• Next Transition Condition</li> </ul> <p>At a time, you can specify value for either the <b>Next Status</b> or <b>Next Transition Condition</b> parameter. If you don't specify any value for these parameters, the system will transition the business object to the default next status specified in its lifecycle.</p>

Status	System Event	Algorithm	Algorithm Type	Description
Processing	Enter	C1-CR-PROC	C1-CR-PROC	This algorithm fetches a list of records which are in the <b>Valid</b> status. For each valid record, the system reads the account ID and contract ID, and updates the contract rider information of the contract using the entity business object defined in the upload request type. If the contract ID is not specified in the record, then the system derives the active contract of the specified contract type on the account, and then updates the contract rider information of the contract. If the record is successfully processed, the status of the record is changed to <b>Processed</b> . However, if the record could not be processed successfully due to any reason, the status of the record is changed to <b>Error</b> . Finally, the status of the upload request is changed to <b>Processed</b> .
Processing	Monitor	F1-AT-RQJ	F1-GEN-BOMNJ	This algorithm transitions the current status to the specified status. You can specify the status to which you want the business object to transition in the following parameters: <ul style="list-style-type: none"> <li>• Next Status</li> <li>• Next Transition Condition</li> </ul> At a time, you can specify value for either the <b>Next Status</b> or <b>Next Transition Condition</b> parameter. If you don't specify any value for these parameters, the system will transition the business object to the default next status specified in its lifecycle.

## Algorithms Used in C1-HoldUploadRequest

The following table lists the algorithms which are used in the lifecycle of the **C1-HoldUploadRequest** business object:

Status	System Event	Algorithm	Algorithm Type	Description
Draft	Enter	C1-HLD-DERIV	C1-HLD-DERIV	<p>This algorithm reads the data in the <b>BO_DATA_AREA</b> column of the <b>C1_UPL_REQUEST</b> table and accordingly inserts the records in the <b>C1_UPLOAD_REQ_DTLS</b> table. In addition, the status of each record in the <b>C1_UPLOAD_REQ_DTLS</b> table is set to <b>Pending</b>.</p> <p>If the hold entity is <b>ACCT</b> and the entity ID is not specified in the record, it derives the account ID using the account identifier type and account identifier combination. Similarly, if the hold entity is <b>PERS</b> and the entity ID is not specified in the record, it derives the person ID using the person identifier type and person identifier combination. Once the account ID or person ID is derived, the corresponding record is updated in the <b>C1_UPLOAD_REQ_DTLS</b> table. If the system could not derive the account ID using the account identifier type and account identifier combination or if the system could not derive the person ID using the person identifier type and person identifier combination, the status of the record in the <b>C1_UPLOAD_REQ_DTLS</b> table is changed to <b>Invalid</b>.</p>

Status	System Event	Algorithm	Algorithm Type	Description
Validated	Enter	C1-HLD-VALID	C1-HLD-VALID	<p>This algorithm is invoked when the user clicks the <b>Validate</b> button. It validates the records which are in the <b>Pending</b> status. It checks whether the data provided for creating a hold request is valid. If the entity ID and hold data are valid, the status of the record in the <b>C1_UPLOAD_REQ_DTLS</b> table is changed to <b>Valid</b>.</p> <p>If the hold entity is <b>ACCT</b> and the entity ID is invalid, it derives the account ID using the account identifier type and account identifier combination and updates the record accordingly. Similarly, if the hold entity is <b>PERS</b> and the entity ID is invalid, it derives the person ID using the person identifier type and person identifier combination and updates the record accordingly. In addition, it changes the status of the record in the <b>C1_UPLOAD_REQ_DTLS</b> table to <b>Valid</b>. However, if the system could not derive the account ID using the account identifier type and account identifier combination, or if the system could not derive the person ID using the person identifier type and person identifier combination, or if the hold data is invalid, the status of the record in the <b>C1_UPLOAD_REQ_DTLS</b> table is changed to <b>Invalid</b>.</p>
Submitted	Enter	C1-UPLSUBENT	C1-UPLSUBENT	<p>This algorithm is invoked when the user clicks the <b>Submit</b> button. It checks whether the approval is required for the upload request. If the approval is required for an upload request, the status of the upload request is changed to <b>Approval In Progress</b>. However, if the approval is not required for an upload request, the status of the upload request remains in the <b>Submitted</b> status.</p>

Status	System Event	Algorithm	Algorithm Type	Description
Submitted	Enter	C1-DEFERUPLD	C1-DEFERUPLD	<p>This algorithm is invoked when the status of the upload request is changed to <b>Submitted</b> or <b>Approved</b>. It checks whether the upload request must be processed in the real time (i.e. immediately) or in the deferred mode (i.e. in the background). If the number of valid records in the upload request does not exceed the online record process limit, the system changes the status of the upload request to <b>Processing</b>. However, if the number of valid records in the upload request exceeds the online record process limit, the system changes the status of the upload request to <b>Deferred Processing</b>.</p> <p>It contains the following parameter:</p> <ul style="list-style-type: none"> <li>• <b>Online Record Process Limit</b> <ul style="list-style-type: none"> <li>– Used to indicate the maximum number of valid records you can process in the real time (i.e. immediately).</li> </ul> </li> </ul>
Submitted	Monitor	F1-AT-RQJ	F1-GEN-BOMNJ	<p>This algorithm transitions the current status to the specified status. ## Algorithms Used in C1-RefundUploadRequest

The following table lists the algorithms which are used in the lifecycle of the **C1-RefundUploadRequest** business object:

Status	System Event	Algorithm	Algorithm Type	Description
Validated	Enter	C1-RF-VALID	C1-RF-VALID	This algorithm validates the data uploaded in an upload request for creating refund requests before the request is submitted for processing.
Draft	Enter	C1-RF-DERIV	C1-RF-DERIV	This algorithm reads the <b>BO_DATA_AREA</b> in the request's primary table, derives additional data that is required for creating refund requests and inserts the records in <b>C1_UPLOAD_REQ_DTLS</b> table.
Submitted	Enter	C1-UPLSUBENT	C1-UPLSUBENT	This algorithm is invoked when the user clicks the <b>Submit</b> button. It checks whether the approval is required for the upload request. If the approval is required for an upload request, the status of the upload request is changed to <b>Approval In Progress</b> . However, if the approval is not required for an upload request, the status of the upload request remains in the <b>Submitted</b> status.

Status	System Event	Algorithm	Algorithm Type	Description
Submitted	Enter	C1-DEFERUPLD	C1-DEFERUPLD	<p>This algorithm is invoked when the status of the upload request is changed to <b>Submitted</b> or <b>Approved</b>. It checks whether the upload request must be processed in the real time (i.e. immediately) or in the deferred mode (i.e. in the background). If the number of valid records in the upload request does not exceed the online record process limit, the system changes the status of the upload request to <b>Processing</b>. However, if the number of valid records in the upload request exceeds the online record process limit, the system changes the status of the upload request to <b>Deferred Processing</b>.</p> <p>It contains the following parameter:</p> <ul style="list-style-type: none"> <li>• <b>Online Record Process Limit</b> <ul style="list-style-type: none"> <li>– Used to indicate the maximum number of valid records you can process in the real time (i.e. immediately).</li> </ul> </li> </ul>
Submitted	Monitor	F1-AT-RQJ	F1-GEN-BOMNJ	<p>This algorithm transitions the current status to the specified status. You can specify the status to which you want the business object to transition in the following parameters:</p> <ul style="list-style-type: none"> <li>• Next Status</li> <li>• Next Transition Condition</li> </ul> <p>At a time, you can specify value for either the <b>Next Status</b> or <b>Next Transition Condition</b> parameter. If you don't specify any value for these parameters, the system will transition the business object to the default next status specified in its lifecycle.</p>
Approval In Progress	Enter	C1-UPLAPPENT	C1-UPLAPPENT	<p>This algorithm creates a To Do using the To Do type specified in the upload request type. The To Do is sent to the appropriate users with the To Do role which is specified in the upload request type. In addition, a log entry is added when a To Do is created using the To Do type.</p>

Status	System Event	Algorithm	Algorithm Type	Description
Approval In Progress	Exit	C1-UPLAPPEXT	C1-UPLAPPEXT	This algorithm checks whether the approver is associated with the approval To Do role specified in the upload request type. If not, it does not allow the approver to approve or reject the upload request. In addition, it does not allow the submitter to approve or reject the upload request.
Approval In Progress	Exit	F1-TODOCOMPL	F1-TODOCOMPL	This algorithm completes To Do entries that are created for the business object when the business object exits the given status. It finds and completes all open To Do entries where the business object's primary key is defined as a drill key. However, if the <b>Exclude To Do Entries From Auto Completion</b> characteristic is defined for the business object, then the system does not automatically complete the respective To Do entry.
Approved	Enter	C1-DEFERUPLD	C1-DEFERUPLD	<p>This algorithm is invoked when the status of the upload request is changed to <b>Submitted</b> or <b>Approved</b>. It checks whether the upload request must be processed in the real time (i.e. immediately) or in the deferred mode (i.e. in the background). If the number of valid records in the upload request does not exceed the online record process limit, the system changes the status of the upload request to <b>Processing</b>. However, if the number of valid records in the upload request exceeds the online record process limit, the system changes the status of the upload request to <b>Deferred Processing</b>.</p> <p>It contains the following parameter:</p> <ul style="list-style-type: none"> <li>• <b>Online Record Process Limit</b> <ul style="list-style-type: none"> <li>– Used to indicate the maximum number of valid records you can process in the real time (i.e. immediately).</li> </ul> </li> </ul>

Processing	Enter	C1-RF-PROC	C1-RF-PROC	<p>This algorithm fetches the list of records that are in <b>Valid</b> status for a given request ID and invokes the entity business object for creating the refund requests. If successfully processed, then the record status will be updated to <b>Processed</b>, otherwise the record status will be updated to <b>Error</b> and error details will be logged in the exception table.</p>

Status	System Event	Algorithm	Algorithm Type	Description
Processing	Monitor	F1-AT-RQJ	F1-GEN-BOMNJ	<p>This algorithm transitions the current status to the specified status. You can specify the status to which you want the business object to transition in the following parameters:</p> <ul style="list-style-type: none"> <li>• Next Status</li> <li>• Next Transition Condition</li> </ul> <p>At a time, you can specify value for either the <b>Next Status</b> or <b>Next Transition Condition</b> parameter. If you don't specify any value for these parameters, the system will transition the business object to the default next status specified in its lifecycle.</p>

## Algorithms Used in C1-WriteOffUploadRequest

The following table lists the algorithms which are used in the lifecycle of the **C1-WriteOffUploadRequest** business object:

Status	System Event	Algorithm	Algorithm Type	Description
Draft	Enter	C1-WO-DERIV	C1-WO-DERIV	This algorithm reads the <b>BO_DATA_AREA</b> in the request's primary table, derives additional data that is required for creating write off requests and inserts the records in <b>C1_UPLOAD_REQ_DTLS</b> table.
Submitted	Enter	C1-UPLSUBENT	C1-UPLSUBENT	This algorithm is invoked when the user clicks the <b>Submit</b> button. It checks whether the approval is required for the upload request. If the approval is required for an upload request, the status of the upload request is changed to <b>Approval In Progress</b> . However, if the approval is not required for an upload request, the status of the upload request remains in the <b>Submitted</b> status.

Status	System Event	Algorithm	Algorithm Type	Description
Submitted	Enter	C1-DEFERUPLD	C1-DEFERUPLD	<p>This algorithm is invoked when the status of the upload request is changed to <b>Submitted</b> or <b>Approved</b>. It checks whether the upload request must be processed in the real time (i.e. immediately) or in the deferred mode (i.e. in the background). If the number of valid records in the upload request does not exceed the online record process limit, the system changes the status of the upload request to <b>Processing</b>. However, if the number of valid records in the upload request exceeds the online record process limit, the system changes the status of the upload request to <b>Deferred Processing</b>.</p> <p>It contains the following parameter:</p> <ul style="list-style-type: none"> <li>• <b>Online Record Process Limit</b> <ul style="list-style-type: none"> <li>– Used to indicate the maximum number of valid records you can process in the real time (i.e. immediately).</li> </ul> </li> </ul>
Submitted	Monitor	F1-AT-RQJ	F1-GEN-BOMNJ	<p>This algorithm transitions the current status to the specified status. You can specify the status to which you want the business object to transition in the following parameters:</p> <ul style="list-style-type: none"> <li>• Next Status</li> <li>• Next Transition Condition</li> </ul> <p>At a time, you can specify value for either the <b>Next Status</b> or <b>Next Transition Condition</b> parameter. If you don't specify any value for these parameters, the system will transition the business object to the default next status specified in its lifecycle.</p>
Approval In Progress	Enter	C1-UPLAPPENT	C1-UPLAPPENT	<p>This algorithm creates a To Do using the To Do type specified in the upload request type. The To Do is sent to the appropriate users with the To Do role which is specified in the upload request type. In addition, a log entry is added when a To Do is created using the To Do type.</p>

Status	System Event	Algorithm	Algorithm Type	Description
Approval In Progress	Exit	C1-UPLAPPEXT	C1-UPLAPPEXT	This algorithm checks whether the approver is associated with the approval To Do role specified in the upload request type. If not, it does not allow the approver to approve or reject the upload request. In addition, it does not allow the submitter to approve or reject the upload request.
Approval In Progress	Exit	F1-TODOCOMPL	F1-TODOCOMPL	This algorithm completes To Do entries that are created for the business object when the business object exits the given status. It finds and completes all open To Do entries where the business object's primary key is defined as a drill key. However, if the <b>Exclude To Do Entries From Auto Completion</b> characteristic is defined for the business object, then the system does not automatically complete the respective To Do entry.
Approved	Enter	C1-DEFERUPLD	C1-DEFERUPLD	<p>This algorithm is invoked when the status of the upload request is changed to <b>Submitted</b> or <b>Approved</b>. It checks whether the upload request must be processed in the real time (i.e. immediately) or in the deferred mode (i.e. in the background). If the number of valid records in the upload request does not exceed the online record process limit, the system changes the status of the upload request to <b>Processing</b>. However, if the number of valid records in the upload request exceeds the online record process limit, the system changes the status of the upload request to <b>Deferred Processing</b>.</p> <p>It contains the following parameter:</p> <ul style="list-style-type: none"> <li>• <b>Online Record Process Limit</b> <ul style="list-style-type: none"> <li>– Used to indicate the maximum number of valid records you can process in the real time (i.e. immediately).</li> </ul> </li> </ul>

## Algorithms Used in C1-ReinstatementUploadRequest

The following table lists the algorithms which are used in the lifecycle of the **C1-ReinstatementUploadRequest** business object:

Status	System Event	Algorithm	Algorithm Type	Description
Draft	Enter	C1-CRTUPLDTL	C1-CRTUPLDTL	This algorithm reads the data in the <b>BO_DATA_AREA</b> column of the <b>C1_UPL_REQUEST</b> table and accordingly inserts the records in the <b>C1_UPLOAD_REQ_DTLS</b> table. In addition, the status of each record in the <b>C1_UPLOAD_REQ_DTLS</b> table is set to <b>Pending</b> .
Draft	Enter	C1-REN-DERIV	C1-REN-DERIV	This algorithm reads the data in the <b>BO_DATA_AREA</b> column of the <b>C1_UPLOAD_REQ_DTLS</b> table and then derives the policy ID using the source system and policy number combination whenever the policy ID is not specified in the record. Once the policy ID is derived, the corresponding record is updated in the <b>C1_UPLOAD_REQ_DTLS</b> table. If the system could not derive the policy ID using the source system and policy number combination, the status of the record in the <b>C1_UPLOAD_REQ_DTLS</b> table is changed to <b>Invalid</b> .

Status	System Event	Algorithm	Algorithm Type	Description
Validated	Enter	C1-REN-VALID	C1-REN-VALID	<p>This algorithm is invoked when the user clicks the <b>Validate</b> button. It validates the records which are in the <b>Pending</b> status. It checks whether the policy ID and reinstatement reason specified in the record is valid. If the policy ID and reinstatement reason are valid, the status of the record in the <b>C1_UPLOAD_REQ_DTLS</b> table is changed to <b>Valid</b>.</p> <p>If the policy ID is invalid, it derives the policy ID using the source system and policy number combination and updates the record accordingly. In addition, it changes the status of the record in the <b>C1_UPLOAD_REQ_DTLS</b> table to <b>Valid</b>. However, if the system could not derive the policy ID using the source system and policy number combination, or if the reinstatement reason is invalid, the status of the record in the <b>C1_UPLOAD_REQ_DTLS</b> table is changed to <b>Invalid</b>.</p> <p>It also checks whether there are two or more policies with the same policy ID. If so, it validates and changes the status of one record to <b>Valid</b> and the status of the remaining records is changed to <b>Invalid</b>. It contains the following parameters:</p> <ul style="list-style-type: none"> <li>• <b>Policy Status after Processing Reinstatement Upload Request</b> – Used to specify the status to which you want to transition the policy when the reinstatement upload request is processed.</li> <li>• <b>Policy Reinstatement Status for Reason Verification</b> – Used to validate the reinstatement reason. The reason should be a valid reason for the specified status.</li> </ul>

Status	System Event	Algorithm	Algorithm Type	Description
Submitted	Monitor	F1-AT-RQJ	F1-GEN-BOMNJ	<p>This algorithm transitions the current status to the specified status. ## C1-BLSRTUPLD

This algorithm reads the data in the **BO\_DATA\_AREA** column of the **C1\_UPL\_REQUEST** table and accordingly inserts the records in the **C1\_UPLOAD\_REQ\_DTLS** table. In addition, the status of each record in the **C1\_UPLOAD\_REQ\_DTLS** table is set to **Pending**.

## C1-BLSRTDERV

This algorithm reads the data in the **BO\_DATA\_AREA** column of the **C1\_UPLOAD\_REQ\_DTLS** table and then derives the bill group (person) ID using the bill group (person) identifier type and bill group (person) identifier combination whenever the bill group ID is not specified in the record. Once the bill group ID is derived, the corresponding record is updated in the **C1\_UPLOAD\_REQ\_DTLS** table. If the system could not derive the bill group ID using the bill group identifier type and bill group identifier combination, the status of the record in the **C1\_UPLOAD\_REQ\_DTLS** table is changed to **Invalid**.

## C1-BLSRTVALD

This algorithm is invoked when the user clicks the **Validate** button. It validates the records which are in the **Pending** status. It checks the following:

- The parent customer's person type is set to **Parent Customer** in the system.
- All mandatory information is available in the bill group sort record.
- The end date is not earlier than the start date and the start date is not later than the end date.
- Either the bill group (person) identifier type and bill group (person) identifier or the bill group (person) ID is available in the bill group sort record.
- The bill group identifier type is available when the bill group identifier is specified and vice versa.
- A bill group with the specified bill group ID exists in the system.
- The bill group is the child person of the parent customer.
- The bill group's person type is set to **Bill Group** in the system.
- The relationship between the bill group and parent customer is effective on the system date.
- The bill group is related to the parent customer using a relationship type which is specified in the **Person Relationship Type** option type of the **C1-ASOBLLNG** feature configuration.
- A duplicate record with the bill group ID and sort ID combination does not exist in the **C1\_BILL\_LVL** table.

- A duplicate record with the bill group ID and sort ID combination does not exist in the **C1\_UPLOAD\_REQ\_DTLS** table.

If the above mentioned validations are successful, the status of the record in the **C1\_UPLOAD\_REQ\_DTLS** table is changed to **Valid**. However, if any of the above validation fails, the status of the record in the **C1\_UPLOAD\_REQ\_DTLS** table is changed to **Invalid**.

## F1-AT-RQJ

This algorithm transitions the current status of the business object to the specified status. It contains the following parameters:

- **Next Status** – Used when you want to override the default next status specified in the lifecycle.
- **Next Transition Condition** – Used when you want to override the default next transition condition specified in the lifecycle.

At a time, you can specify value for either the **Next Status** or **Next Transition Condition** parameter. If you don't specify any value for these parameters, the system will transition the business object to the default next status specified in its lifecycle.

## C1-UPLSUBENT

This algorithm is invoked when the user clicks the **Submit** button. It checks whether the approval is required for the upload request. If the approval is required for an upload request, the status of the upload request is changed to **Approval In Progress**. However, if the approval is not required for an upload request, the status of the upload request remains in the **Submitted** status.

## C1-DEFERUPLD

This algorithm is invoked when the status of the upload request is changed to **Submitted** or **Approved**. It checks whether the upload request must be processed in the real time (i.e. immediately) or in the deferred mode (i.e. in the background). If the number of valid records in the upload request does not exceed the online record process limit, the system changes the status of the upload request to **Processing**. However, if the number of valid records in the upload request exceeds the online record process limit, the system changes the status of the upload request to **Deferred Processing**.

It contains the following parameter:

- **Online Record Process Limit** – Used to indicate the maximum number of valid records you can process in the real time (i.e. immediately).

## C1-UPLAPPENT

This algorithm creates a To Do using the To Do type specified in the upload request type. The To Do is sent to the appropriate users with the To Do role which is specified in the upload request type. In addition, a log entry is added when a To Do is created using the To Do type.

## C1-UPLAPPEXT

This algorithm checks whether the approver is associated with the approval To Do role specified in the upload request type. If not, it does not allow the approver to approve or reject the upload request. In addition, it does not allow the submitter to approve or reject the upload request.

## F1-TODOCOMPL

This algorithm completes To Do entries that are created for the business object when the business object exits the given status. It finds and completes all open To Do entries where the business object's primary key is defined as a drill key. However, if the **Exclude To Do Entries From Auto Completion** characteristic is set to **Y** for the business object, the system does not automatically complete the respective To Do entry.

## C1-BLSRTPROC

This algorithm fetches a list of records which are in the **Valid** status. For each valid record with a unique combination of the bill group (person) ID and sort ID, it creates one bill group sort record using the entity business object defined in the upload request type. If the record is successfully processed, the status of the record is changed to **Processed**. However, if the record could not be processed successfully due to any reason, the status of the record is changed to **Error**. Finally, the status of the upload request is changed to **Processed**.

## Algorithms Used in C1-BillLevelUploadRequest

The following table lists the algorithms which are used in the lifecycle of the **C1-BillLevelUploadRequest** business object:

Status	System Event	Algorithm	Algorithm Type	Description
Draft	Enter	C1-BLVUPLDTL	C1-BLVUPLDTL	Refer to <a href="#">C1-BLVUPLDTL</a> on page 1710.
Draft	Enter	C1-BLVLDERIV	C1-BLVLDERIV	Refer to <a href="#">C1-BLVLDERIV</a> on page 1710.
Validated	Enter	C1-BLVLVALID	C1-BLVLVALID	Refer to <a href="#">C1-BLVLVALID</a> on page 1710.
Canceled	—	—	—	—
Submitted	Monitor	F1-AT-RQJ	F1-GEN-BOMNJ	Refer to <a href="#">F1-AT-RQJ</a> on page 1349.

Processed	—	—	—	—

## C1-BLVUPLDTL

This algorithm reads the data in the **BO\_DATA\_AREA** column of the **C1\_UPL\_REQUEST** table and accordingly inserts the records in the **C1\_UPLOAD\_REQ\_DTLS** table. In addition, the status of each record in the **C1\_UPLOAD\_REQ\_DTLS** table is set to **Pending**.

## C1-BLVLDERIV

This algorithm reads the data in the **BO\_DATA\_AREA** column of the **C1\_UPLOAD\_REQ\_DTLS** table and then derives the bill group (person) ID using the bill group (person) identifier type and bill group (person) identifier combination whenever the bill group ID is not specified in the record. Once the bill group ID is derived, the corresponding record is updated in the **C1\_UPLOAD\_REQ\_DTLS** table. If the system could not derive the bill group ID using the bill group identifier type and bill group identifier combination, the status of the record in the **C1\_UPLOAD\_REQ\_DTLS** table is changed to **Invalid**.

## C1-BLVLVALID

This algorithm is invoked when the user clicks the **Validate** button. It validates the records which are in the **Pending** status. It checks the following:

- The parent customer's person type is set to **Parent Customer** in the system.
- All mandatory information is available in the bill group derivation and pricing parameters record.
- Either the bill group (person) identifier type and bill group (person) identifier or the bill group (person) ID is available in the bill group derivation and pricing parameters record.
- The bill group identifier type is available when the bill group identifier is specified and vice versa.
- The number of characters specified in each field does not exceed the maximum field length.
- A bill group with the specified bill group ID exists in the system.
- The bill group is the child person of the parent customer.
- The bill group's person type is set to **Bill Group** in the system.
- The relationship between the bill group and parent customer is effective on the system date.
- The bill group is related to the parent customer using the relationship type which is specified in the **Person Relationship Type** option type of the **C1-ASOBLLNG** feature configuration.
- A duplicate record with the source system, parameter 1, parameter 2, parameter 3, parameter 4, and effective date combination does not exist in the **C1\_BILL\_LVL** table.
- A duplicate record with the source system, parameter 1, parameter 2, parameter 3, parameter 4, and effective date combination does not exist in the **C1\_UPLOAD\_REQ\_DTLS** table.
- The source system exists in the extendable lookup which is specified in the **Source System Extendable Lookup** parameter.
- The bill group sort record with the bill group ID and sort ID combination already exists in the system.
- The effective date specified in the record is within the date range of the effective bill group sort record.

If the above mentioned validations are successful, the status of the record in the **C1\_UPLOAD\_REQ\_DTLS** table is changed to **Valid**. However, if any of the above validation fails, the status of the record in the **C1\_UPLOAD\_REQ\_DTLS** table is changed to **Invalid**.

It contains the following parameter:

- **Source System Extendable Lookup** – Used to specify the source system extendable lookup business object. The bill group derivation and pricing parameters records should contain the source system which is already defined in this extendable lookup.

## F1-AT-RQJ

This algorithm transitions the current status of the business object to the specified status. It contains the following parameters:

- **Next Status** – Used when you want to override the default next status specified in the lifecycle.
- **Next Transition Condition** – Used when you want to override the default next transition condition specified in the lifecycle.

At a time, you can specify value for either the **Next Status** or **Next Transition Condition** parameter. If you don't specify any value for these parameters, the system will transition the business object to the default next status specified in its lifecycle.

## C1-UPLSUBENT

This algorithm is invoked when the user clicks the **Submit** button. It checks whether the approval is required for the upload request. If the approval is required for an upload request, the status of the upload request is changed to **Approval In Progress**. However, if the approval is not required for an upload request, the status of the upload request remains in the **Submitted** status.

## C1-DEFERUPLD

This algorithm is invoked when the status of the upload request is changed to **Submitted** or **Approved**. It checks whether the upload request must be processed in the real time (i.e. immediately) or in the deferred mode (i.e. in the background). If the number of valid records in the upload request does not exceed the online record process limit, the system changes the status of the upload request to **Processing**. However, if the number of valid records in the upload request exceeds the online record process limit, the system changes the status of the upload request to **Deferred Processing**.

It contains the following parameter:

- **Online Record Process Limit** – Used to indicate the maximum number of valid records you can process in the real time (i.e. immediately).

## C1-UPLAPPENT

This algorithm creates a To Do using the To Do type specified in the upload request type. The To Do is sent to the appropriate users with the To Do role which is specified in the upload request type. In addition, a log entry is added when a To Do is created using the To Do type.

## C1-UPLAPPEXT

This algorithm checks whether the approver is associated with the approval To Do role specified in the upload request type. If not, it does not allow the approver to approve or reject the upload request. In addition, it does not allow the submitter to approve or reject the upload request.

## F1-TODOCOMPL

This algorithm completes To Do entries that are created for the business object when the business object exits the given status. It finds and completes all open To Do entries where the business object's primary key is defined as a drill key. However, if the **Exclude To Do Entries From Auto Completion** characteristic is set to **Y** for the business object, the system does not automatically complete the respective To Do entry.

## C1-BLVLVLP

This algorithm fetches a list of records which are in the **Valid** status. For each valid record with a unique combination of the source system, parameter 1, parameter 2, parameter 3, parameter 4, and effective date, it creates one bill group derivation and pricing parameters record using the entity business object defined in the upload request type. If the record

is successfully processed, the status of the record is changed to **Processed**. However, if the record could not be processed successfully due to any reason, the status of the record is changed to **Error**. Finally, the status of the upload request is changed to **Processed**.

## CSV File Format for Account Bill Cycle Upload Request

Before uploading the account bill cycle file, you need to ensure that the CSV file contains the following columns:

Column Name	Description	Mandatory (Yes or No)
Account Identifier Type	Used to specify the account identifier type.	Yes (Conditional) <b>Note:</b> This data is required when the account ID is not specified.
Account Identifier	Used to specify the identifier of the account whose bill cycle you want to update.	Yes (Conditional) <b>Note:</b> This data is required when the account ID is not specified.
Account ID	Used to indicate the account whose bill cycle you want to update. <b>Note:</b> If you do not specify the account ID, the system derives the account ID using the account identifier type and account identifier combination.	No
Bill Cycle	Used to specify the bill cycle. <b>Note:</b> You must specify a valid bill cycle which is associated with the division to which the account belongs.	Yes

## CSV File Format for Contract Rider Upload Request

Before uploading a contract rider file, you need to ensure that the CSV file contains the following columns:

Column Name	Description	Mandatory (Yes or No)
Account Identifier Type	Used to specify the account identifier type.	Yes (Conditional) <b>Note:</b> This data is required when the account ID and contract ID are not specified.
Account Identifier	Used to specify the identifier of the account whose contract you want to update.	Yes (Conditional) <b>Note:</b> This data is required when the account ID and contract ID are not specified.

Column Name	Description	Mandatory (Yes or No)
Account ID	Used to indicate the account whose contract you want to update.	Yes (Conditional)  <b>Note:</b> This data is required when the account identifier type, account identifier, and contract ID are not specified.
Contract Type	Used to indicate the type of the contract whose details you want to update.  <b>Note:</b> You must specify a contract type which already exists in the system.	Yes (Conditional)  <b>Note:</b> This data is required when the contract ID is not specified.
Contract ID	Used to indicate the contract whose contract rider information you want to update.  <b>Note:</b> If you do not specify the contract ID, the system derives the active contract using the account ID and contract type combination.	No
Start Date	Used to specify the date from when the bill factor is effective for the contract.  <b>Note:</b> The start date cannot be later than the end date.	Yes
End Date	Used to specify the date till when the bill factor is effective for the contract.  <b>Note:</b> The end date cannot be earlier than the start date.	No
Bill Factor	Used to specify the bill factor.  <b>Note:</b> You must specify a valid bill factor where the <b>Contract Rider Applicability</b> flag is set to <b>Y</b> .	Yes

## CSV File Format for Billable Charge Upload

Before uploading a billable charge file, you need to ensure that the CSV file contains the following columns:

Column Name	Description	Mandatory (Yes or No)
Account Identifier Type	Used to specify the account identifier type.	Yes (Conditional)  <b>Note:</b> This data is required when the <b>Account ID</b> is not specified.

Column Name	Description	Mandatory (Yes or No)
Account Identifier	Used to specify the account identifier of the account for which you want to create the billable charge.	Yes (Conditional) <b>Note:</b> This data is required when the <b>Account ID</b> is not specified.
Account ID	Used to specify the account for which you want to create the billable charge.	Yes (Conditional) <b>Note:</b> This data is required when the <b>Account Identifier Type</b> and <b>Account Identifier</b> is not specified.
Contract ID	Used to specify the contract against which you want to create the billable charge.	Yes (Conditional) <b>Note:</b> This data is required when you want to create the billable charge against a specific contract on the account. If this data is not specified then billable charge is created against a contract with highest priority.
Start Date	Used to specify the start date of billable charge.	Yes
End Date	Used to specify the end date of billable charge.	Yes
Charge Type	Used to specify the charge type for which you want to create a billable charge.	No
Description On Bill	Used to specify description for a billable charge.	Yes
Recurring Flag	Used to indicate whether recurring bill segments must be created at the intervals defined in the bill period or at the set policy invoice frequency. The valid values are: <ul style="list-style-type: none"> <li>• BP</li> <li>• FR</li> </ul>	Yes (Conditional) <b>Note:</b> This data is required if <b>Frequency</b> or <b>Bill Period</b> is specified.
Frequency	Used to specify the invoice frequency at which the recurring bill segments must be created.	Yes (Conditional) <b>Note:</b> This data is required if <b>Recurring Flag</b> is FR.
Bill Period	Used to specify the bill period that you want to use for specifying the intervals at which the recurring bill segments must be created.	Yes (Conditional) <b>Note:</b> This data is required if <b>Recurring Flag</b> is BP.
Bill After	Used to specify the date after which the bill must be generated for the billable charge.	No
Adhoc Bill	Used to indicate whether the billable charge should be considered during adhoc or regular billing.	No

Column Name	Description	Mandatory (Yes or No)
Description on Bill1, Description on Bill2, ....., Description on Bill5	Used to specify description for the billable charge lines.	Yes (Conditional) <b>Note:</b> This data is required when the charge amount is specified.
Currency1, Currency2, ....., Currency5	Used to specify the currency in which the amount is charged. <b>Note:</b> If you specify a currency other than the account's invoice currency, the system will do the currency conversion if the appropriate exchange rate is available in the system.	Yes (Conditional) <b>Note:</b> This data is required when the charge amount is specified.
Amount1, Amount2, ....., Amount5	Used to specify the charge amount.	Yes (Conditional) <b>Note:</b> This data is required when the description on bill or currency is specified.
Show On Bill1, Show on Bill2, ....., Show On Bill5	Used to indicate whether the charge should appear on the person's printed bill or not. The valid values are: <ul style="list-style-type: none"> <li>• true</li> <li>• false</li> </ul> <b>Note:</b> By default, the value will be set to <b>true</b> if the column does not contain any value.	No
Summary1, Summary2, ....., Summary5	Used to indicate whether the charge should be included in the summary line or not. The valid value are: <ul style="list-style-type: none"> <li>• true</li> <li>• false</li> </ul> <b>Note:</b> By default, the value will be set to <b>true</b> if the column does not contain any value.	No
Memo Only1, Memo Only2, ....., Memo Only5	Used to indicate whether the charge should be included in the bill amount or not. The valid values are: <ul style="list-style-type: none"> <li>• true</li> <li>• false</li> </ul> <b>Note:</b> By default, the value will be set to <b>false</b> if the column does not contain any value.	No

Column Name	Description	Mandatory (Yes or No)
GL Distribution Code1, GL Distribution Code2, ....., GL distribution Code5	Used to specify the distribution code which indicates the GL account associated with the charge.	Yes (Conditional)  <b>Note:</b> This data is required when <b>false</b> is specified in the <b>Memo Only</b> column corresponding to the bill line description.
Price Item	Used to specify the price item code.	Yes (Conditional)  <b>Note:</b> This data is required when <b>Variance Parameter</b> or, <b>Price Item Parameter</b> and <b>Price Item Parameter Value</b> is specified.
Variance Parameter	Used to indicate the variance that must be used along with the price item for determining the price item pricing.	Yes (Conditional)  <b>Note:</b> This data is required when <b>Price Item</b> is specified and <b>Price Item Parameter</b> and <b>Price Item Parameter Value</b> are not specified.
Price Item Parameter1, Price Item Parameter2, ....., Price Item Parameter15	Used to indicate the price item parameter that must be used along with the price item for determining the price item pricing.  <b>Note:</b> If the data in these columns will be used for price item parameter mapping, you must not use the equal to (=) and tilde (~) symbols in these columns.	Yes (Conditional)  <b>Note:</b> This data is required when <b>Price Item</b> is specified and <b>Variance Parameter</b> is not specified.
Price Item Parameter Value1, Price Item Parameter Value2, ....., Price Item Parameter Value15	Used to specify the parameter value.  <b>Note:</b> If the data in these columns will be used for price item parameter mapping, you must not use the equal to (=) and tilde (~) symbols in these columns.	Yes (Conditional)  <b>Note:</b> This data is required when <b>Price Item</b> is specified and <b>Variance Parameter</b> is not specified.
SQI1, SQI2, ....., SQI5	Used to indicate the service quantity identifier that must be used for calculating the price item charges.	Yes (Conditional)  <b>Note:</b> This data is required when the service quantity is specified.
SQI Value1, SQI Value2, ....., SQI Value5	Used to specify the number of units of the service quantity.	Yes (Conditional)  <b>Note:</b> This data is required when the SQI is specified.

Column Name	Description	Mandatory (Yes or No)
Effective Date1, Effective Date2, ....., Effective Date20	Used to indicate the effective date of the characteristics.	Yes (Conditional)  <b>Note:</b> This data is required when <b>Char Type</b> or <b>Char Val</b> is specified.
Char Type1, Char Type2, ....., Char Type20	Used to indicate the characteristic that must be defined for the billable charge.	Yes (Conditional)  <b>Note:</b> This data is required when <b>Effective Date</b> or <b>Char Val</b> is specified.
Char Value1, Char Value2, ....., Char Value20	Used to specify the value of the characteristic type.	Yes (Conditional)  <b>Note:</b> This data is required when <b>Effective Date</b> or <b>Char Type</b> is specified.

## CSV File Format for Hold Upload Request

Before uploading a hold request file, you need to ensure that the CSV file contains the following columns:

Column Name	Description	Mandatory (Yes or No)
Hold Request Type	Used to specify the hold request type.  <b>Note:</b> You must specify a valid hold request type which is in the <b>Active</b> status.	Yes
Start Date	Used to specify the date from when the hold request is effective.  <b>Note:</b> The hold request start date cannot be later than the hold request end date.	Yes
End Date	Used to specify the date till when the hold request is effective.  <b>Note:</b> The hold request end date cannot be earlier than the hold request start date.	Yes
Hold Reason	Used to indicate the reason why you want to hold the entity.  <b>Note:</b> The hold reason must exist in the <b>HOLD_REASON_FLG</b> lookup field and its status must be <b>Active</b> .	Yes

Column Name	Description	Mandatory (Yes or No)
Hold Entity	Used to indicate the type of the entity for which you want to create the hold request. The valid values are: <ul style="list-style-type: none"> <li>• ACCT</li> <li>• BILL</li> <li>• PERS</li> </ul>	Yes
Account Identifier Type	Used to specify the account identifier type.	Yes (Conditional) <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"><b>Note:</b> This data is required when the hold entity is <b>ACCT</b> and the entity ID is not specified.</div>
Account Identifier	Used to specify the identifier of the account for which you want to create the hold request.	Yes (Conditional) <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"><b>Note:</b> This data is required when the hold entity is <b>ACCT</b> and the entity ID is not specified.</div>
Person Identifier Type	Used to specify the person identifier type.	Yes (Conditional) <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"><b>Note:</b> This data is required when the hold entity is <b>PERS</b> and the entity ID is not specified.</div>
Person Identifier	Used to specify the identifier of the person for which you want to create the hold request.	Yes (Conditional) <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"><b>Note:</b> This data is required when the hold entity is <b>PERS</b> and the entity ID is not specified.</div>
Hold Entity ID	Used to specify the entity ID. <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"><b>Note:</b> If the hold entity is <b>ACCT</b>, you must specify the account ID in this field. If the hold entity is <b>PERS</b>, you must specify the person ID in this field. And, if the hold entity is <b>BILL</b>, you must specify the bill ID in this field.  If you do not specify the account ID, the system derives the account ID using the account identifier type and account identifier combination. Similarly, if you do not specify the person ID, the system derives the person ID using the person identifier type and person identifier combination.</div>	Yes (Conditional) <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"><b>Note:</b> This data is required when the hold entity is <b>BILL</b>.</div>
Comments	Used to specify additional information about the hold request.	No

Column Name	Description	Mandatory (Yes or No)
Hold Entity Start Date	<p>Used to specify the date from when you want to hold the entity.</p> <p><b>Note:</b></p> <p>The hold entity start date must be between the hold request start and end dates and between at least one process's start and end dates.</p> <p>The hold entity start date cannot be later than the hold entity end date.</p>	Yes
Hold Entity End Date	<p>Used to specify the date till when you want to hold the entity.</p> <p><b>Note:</b></p> <p>The hold entity end date must be between hold request start and end dates and between the process's start and end dates.</p> <p>The hold entity end date cannot be earlier than the hold entity start date.</p>	No
Hold Funding	<p>Used to indicate whether you want to hold the funding process for the entity. The valid values are:</p> <ul style="list-style-type: none"> <li>• Y</li> <li>• N</li> </ul> <p><b>Note:</b> You can hold the funding process only when the hold entity is <b>PERS</b> or <b>BILL</b>.</p>	No
Hold Funding Start Date	<p>Used to specify the date from when you want to hold the funding process.</p> <p><b>Note:</b></p> <p>The hold funding start date must be between the hold request start and end dates.</p> <p>The hold funding start date cannot be later than the hold funding end date.</p>	Yes (Conditional)
Hold Funding End Date	<p>Used to specify the date till when you want to hold the funding process.</p> <p><b>Note:</b></p> <p>The hold funding end date must be between the hold request start and end dates.</p> <p>The hold funding end date cannot be earlier than the hold funding start date.</p>	No

Column Name	Description	Mandatory (Yes or No)
Hold Overdue	Used to indicate whether you want to hold the overdue process for the entity. The valid values are: <ul style="list-style-type: none"> <li>• Y</li> <li>• N</li> </ul>	No
Hold Overdue Start Date	Used to specify the date from when you want to hold the overdue process. <p><b>Note:</b></p> <p>The hold overdue start date must be between the hold request start and end dates.</p> <p>The hold overdue start date cannot be later than the hold overdue end date.</p>	Yes (Conditional) <p><b>Note:</b> This data is required when the overdue process must be kept on hold.</p>
Hold Overdue End Date	Used to specify the date till when you want to hold the overdue process. <p><b>Note:</b></p> <p>The hold overdue end date must be between the hold request start and end dates.</p> <p>The hold overdue end date cannot be earlier than the hold overdue start date.</p>	No
Hold Bill Generation	Used to indicate whether you want to hold the bill generation process for the entity. The valid values are: <ul style="list-style-type: none"> <li>• Y</li> <li>• N</li> </ul>	No
Hold Bill Generation Start Date	Used to specify the date from when you want to hold the bill generation process. <p><b>Note:</b></p> <p>The hold bill generation start date must be between the hold request start and end dates.</p> <p>The hold bill generation start date cannot be later than the hold bill generation end date.</p>	Yes (Conditional) <p><b>Note:</b> This data is required when the bill generation process must be kept on hold.</p>
Hold Bill Generation End Date	Used to specify the date till when you want to hold the bill generation process. <p><b>Note:</b></p> <p>The hold bill generation end date must be between the hold request start and end dates.</p> <p>The hold bill generation end date cannot be earlier than the hold bill generation start date.</p>	No

Column Name	Description	Mandatory (Yes or No)
Hold Auto Pay	Used to indicate whether you want to hold the automatic payment process for the entity. The valid values are: <ul style="list-style-type: none"> <li>• Y</li> <li>• N</li> </ul>	No
Hold Autopay Start Date	Used to specify the date from when you want to hold the automatic payment process. <p><b>Note:</b></p> <p>The hold autopay start date must be between the hold request start and end dates.</p> <p>The hold autopay start date cannot be later than the hold autopay end date.</p>	Yes (Conditional) <p><b>Note:</b> This data is required when the automatic payment process must be kept on hold.</p>
Hold Autopay End Date	Used to specify the date till when you want to hold the automatic payment process. <p><b>Note:</b></p> <p>The hold autopay end date must be between the hold request start and end dates.</p> <p>The hold autopay end date cannot be earlier than the hold autopay start date.</p>	No
Effective Date1, Effective Date2, ....., Effective Date5	Used to specify the date from when the characteristic is effective for the hold request.	Yes (Conditional) <p><b>Note:</b> This data is required when the characteristic type or characteristic value is specified.</p>
Char Type1, Char Type2, ....., Char Type5	Used to indicate the characteristic that must be defined for the hold request. <p><b>Note:</b> You must specify a characteristic type where the characteristic entity is set to <b>Hold Request</b>.</p>	Yes (Conditional) <p><b>Note:</b> This data is required when the effective date or characteristic value is specified.</p>
Char Val1, Char Val2, ....., Char Val5	Used to specify the value for the characteristic type.	Yes (Conditional) <p><b>Note:</b> This data is required when the effective date or characteristic type is specified.</p>

## CSV File Format for Refund Request Upload

Before uploading a refund request file, you need to ensure that the CSV file contains the following columns:

Column Name	Description	Mandatory (Yes or No)
Refund Request Type	Used to specify the refund request type.	Yes
Account Identifier Type	Used to specify the account identifier type.	Yes (Conditional) <b>Note:</b> This data is required when the <b>Account ID</b> is not specified.
Account Identifier	Used to specify the account identifier of the account for which you want to create the refund request.	Yes (Conditional) <b>Note:</b> This data is required when the <b>Account ID</b> is not specified.
Account ID	Used to specify the account for which you want to create the refund request.	Yes (Conditional) <b>Note:</b> This data is required when the <b>Account Identifier Type</b> and <b>Account Identifier</b> are not specified.
Entity Type	Used to specify the entity type.	Yes
Entity ID	Used to specify the entity ID.	Yes
Adjustment Type	Used to specify the adjustment type using which the refund adjustments are created.	No
Refund Amount	Used to specify the amount that you want to refund.	Yes
Comments	Used to specify the comments which are added on the refund request.	No
Effective Date1, Effective Date2, ....., Effective Date5	Used to indicate the effective date of the characteristics.	Yes (Conditional) <b>Note:</b> This data is required when <b>Char Type</b> or <b>Char Val</b> is specified.
Char Type1, Char Type2, ....., Char Type5	Used to indicate the characteristic that must be defined for the refund request.	Yes (Conditional) <b>Note:</b> This data is required when <b>Effective Date</b> or <b>Char Val</b> is specified.
Char Val1, Char Val2, ....., Char Val5	Used to specify the value of the characteristic type.	Yes (Conditional) <b>Note:</b> This data is required when <b>Effective Date</b> or <b>Char Type</b> is specified.

## CSV File Format for Write Off Request Upload

Before uploading a write off request file, you need to ensure that the CSV file contains the following columns:

Column Name	Description	Mandatory (Yes or No)
Write Off Request Type	Used to specify the write off request type.	Yes
Account Identifier Type	Used to specify the account identifier type.	Yes (Conditional) <b>Note:</b> This data is required when the <b>Account ID</b> is not specified.
Account Identifier	Used to specify the account identifier of the account for which you want to create the write off request.	Yes (Conditional) <b>Note:</b> This data is required when the <b>Account ID</b> is not specified.
Account ID	Used to specify the account for which you want to create the write off request.	Yes (Conditional) <b>Note:</b> This data is required when the <b>Account Identifier Type</b> and <b>Account Identifier</b> are not specified.
Entity Type	Used to specify the entity type.	Yes
Entity ID	Used to specify the entity ID.	Yes
Adjustment Type	Used to specify the adjustment type using which the write off adjustments are created.	No
Write Off Amount	Used to specify the amount that you want to write off.	Yes
Comments	Used to specify the comments which are added on the write off request.	No
Effective Date1, Effective Date2, ....., Effective Date5	Used to indicate the effective date of the characteristics.	Yes (Conditional) <b>Note:</b> This data is required when <b>Char Type</b> or <b>Char Val</b> is specified.
Char Type1, Char Type2, ....., Char Type5	Used to indicate the characteristic that must be defined for the write off request.	Yes (Conditional) <b>Note:</b> This data is required when <b>Effective Date</b> or <b>Char Val</b> is specified.
Char Val1, Char Val2, ....., Char Val5	Used to specify the value of the characteristic type.	Yes (Conditional) <b>Note:</b> This data is required when <b>Effective Date</b> or <b>Char Type</b> is specified.

## CSV File Format for Reinstatement Upload Request

Before uploading a policy reinstatement file, you need to ensure that the CSV file contains the following columns:

Column Name	Description	Mandatory (Yes or No)
Policy ID	Used to indicate the policy which you want to reinstate.  <b>Note:</b> If you do not specify the policy ID, the system derives the policy ID using the source system and policy number combination.	No
Source System	Used to indicate the external system from where the policy is originated.	Yes (Conditional)  <b>Note:</b> This data is required when the policy ID is not specified.
Policy Number	Used to indicate the policy number.	Yes (Conditional)  <b>Note:</b> This data is required when the policy ID is not specified.
Reinstatement Reason	Used to indicate the reason why you want to reinstate the policy.  <b>Note:</b> You must specify a reason which is defined for the status specified in the <b>Policy Reinstatement Status for Reason Verification</b> parameter of the <b>C1-REN-VALID</b> algorithm.	Yes

## CSV File Format for Bill Group Sorting Upload Request

Before uploading a bill group sorting file, you need to ensure that the CSV file contains the following values in the specified order separated by a comma:

Sr. No.	Value	Description	Mandatory (Yes or No)
1	Bill Group ID	Used to indicate the bill group (i.e. person) for whom you want to define the sort ID.  <b>Note:</b> You must specify an effective child person of the parent customer for whom you are creating the bill group sorting upload request. In addition, note that you must specify a child person whose person type is set to <b>Bill Group</b> and who is related to the parent customer using a relationship type which is specified in the <b>Person Relationship Type</b> option type of the <b>C1-ASOBLLNG</b> feature configuration.	Yes (Conditional)  <b>Note:</b> This data is required when the bill group (i.e. person) identifier type and bill group (i.e. person) identifier are not specified.
2	Bill Group Identifier Type	Used to specify the bill group (i.e. person) identifier type.	Yes (Conditional)  <b>Note:</b> This data is required when the bill group (i.e. person) ID is not specified.

Sr. No.	Value	Description	Mandatory (Yes or No)
3	Bill Group Identifier	Used to specify identifier of the bill group (i.e. person) for whom you want to define the sort ID.	Yes (Conditional) <b>Note:</b> This data is required when the bill group (i.e. person) ID is not specified.
4	Sort ID	Used to specify the sort ID.	Yes
5	Description	Used to specify the description for the sort ID.	Yes
6	Start Date	Used to specify the date from when the sort ID is effective for the bill group. <b>Note:</b> The start date cannot be later than the end date.	Yes
7	End Date	Used to specify the date till when the sort ID is effective for the bill group. <b>Note:</b> The end date cannot be earlier than the start date.	No

## CSV File Format for Bill Group Derivation and Pricing Parameters Upload Request

Before uploading a bill group derivation and pricing parameters file, you need to ensure that the CSV file contains the following values in the specified order separated by a comma:

Sr. No.	Value	Description	Mandatory (Yes or No)
1	Source System	Used to indicate the source system from where the claim and enrollment transactions are received. <b>Note:</b> You must specify a source system which already exists in the extendable lookup which is specified in the <b>Source System Extendable Lookup</b> parameter of the <b>C1-BLVLVALID</b> algorithm.	Yes
2	Parameter 1	Used to specify the employee attribute based on which you want to derive the bill group. <b>Note:</b> You must not specify the ampersand (&) character in the parameter 1.	Yes

Sr. No.	Value	Description	Mandatory (Yes or No)
3	Parameter 2	Used to specify the employee attribute based on which you want to derive the bill group.  <b>Note:</b> You must not specify the ampersand (&) character in the parameter 2.	No
4	Parameter 3	Used to specify the employee attribute based on which you want to derive the bill group.  <b>Note:</b> You must not specify the ampersand (&) character in the parameter 3.	No
5	Parameter 4	Used to specify the employee attribute based on which you want to derive the bill group.  <b>Note:</b> You must not specify the ampersand (&) character in the parameter 4.	No
6	Effective Date	Used to specify the date from when the derivation and pricing parameters are effective for the bill group and sort ID combination.  <b>Note:</b> The effective date must be within the date range of the sort ID defined for the bill group.	Yes
7	Bill Group ID	Used to indicate the bill group (i.e. person) for whom you want to define the derivation and pricing parameters.  <b>Note:</b> You must specify an effective child person of the parent customer for whom you are creating the bill group derivation and pricing parameters upload request. In addition, note that you must specify a child person whose person type is set to <b>Bill Group</b> and who is related to the parent customer using a relationship type which is specified in the <b>Person Relationship Type</b> option type of the <b>C1-ASOBLNG</b> feature configuration.	Yes (Conditional)  <b>Note:</b> This data is required when the bill group (i.e. person) identifier type and bill group (i.e. person) identifier are not specified.
8	Bill Group Identifier Type	Used to specify the bill group (i.e. person) identifier type.	Yes (Conditional)  <b>Note:</b> This data is required when the bill group (i.e. person) ID is not specified.
9	Bill Group Identifier	Used to specify identifier of the bill group (i.e. person) for whom you want to define the derivation and pricing parameters.	Yes (Conditional)  <b>Note:</b> This data is required when the bill group (i.e. person) ID is not specified.

Sr. No.	Value	Description	Mandatory (Yes or No)
10	Sort ID	Used to indicate the sort ID of the bill group for which you want to define the derivation and pricing parameters.	Yes

## Upload Request Type

Oracle Revenue Management and Billing allows you to define an upload request type using which you can upload a file. An upload request of the specified upload request type is created on uploading the file. It is the upload request type which helps the system to understand how to process the file. If you upload a file which exceeds the maximum file size, the system will not allow you to upload the file.

The **Adjustment Upload Request Type (C1-AdjRequestType)** business object is used for the maintenance of upload request types for uploading CSV data. Configurations like upload file size, approval workflow can be configured using this object. If you are going to upload adjustment data files using an upload request type, you need to specify the match types (using which the adjustments must be created) in the upload request type. At present, the following two match types are shipped with the product:

- Contract
- Contract Type

You can also define custom match types, if required. You must use the **ADJ\_MATCH\_TYPE** lookup field to add a new match type. You need to attach an algorithm to each match type to determine the contract against which the adjustment must be created. At present, the following algorithm types and sample algorithms are shipped with the product:

Match Type	Algorithm Type	Sample Algorithm	Algorithm Description
Contract	C1-MTCIALG	C1-MTCIALG	This algorithm fetches contract ID for each adjustment record where the match type is set to <b>Contract (CONT)</b> .
Contract Type	C1-MTCTALG	C1-MTCTALG	This algorithm fetches contract ID based on the contract type and account ID for each adjustment record where the match type is set to <b>Contract Type (CNTY)</b> . If there are multiple active contracts of the specified contract type on the account, the contract ID with the latest start date will be fetched.

The **Upload Request Type (C1-UplRequestType)** business object will be used for the maintenance of upload request types for uploading CSV data. Configurations like upload file size, approval workflow can be configured using this object. The system enables you to upload data for the following using the **Upload Request** feature:

- Billable Charge (Adhoc and Regular)
- Hold Request
- Refund Request
- Write Off Request
- Policy Reinstatement

- Bill Group Sort ID
- Derivation and Pricing Parameters for a Bill Group and Sort ID Combination

It also enables you to update the following information:

- Contract rider of a contract
- Bill cycle of an account

It is the upload request type which helps the system to determine:

- Whether the file must be approved by the approver before creating or updating the entities
- Which business object must be used for creating the upload request
- Which business object must be used for creating or updating entities through an upload request
- Which foreign key reference must be used for generating information string for the entity
- A set of fields using which you can search records uploaded through an upload request

You can also define custom algorithm types and algorithms, if required. The **Upload Request Type** screen allows you to define, edit, copy, and delete an upload request type. This screen consists of the following zones:

- [Upload Request Type List](#) on page 1190
- [Upload Request Type](#) on page 1191

**Parent topic:** [Upload Request](#) on page 1665

## Upload Request Type List

The **Upload Request Type List** zone lists upload request types that are already defined in the system. It contains the following columns:

Column Name	Column Description
Upload Request Type	Displays the upload request type.
Description	Displays the description of the upload request type.
Edit	On clicking the <b>Edit</b> (  ) icon, the <b>Upload Request Type</b> screen appears where you can edit the details of the upload request type.
Duplicate	On clicking the <b>Duplicate</b> (  ) icon, the <b>Upload Request Type</b> screen appears where you can define an upload request type using an existing upload request type.
Delete	On clicking the <b>Delete</b> (  ) icon, you can delete the upload request type.  <b>Note:</b> You can delete an upload request type only when you have not uploaded a file (i.e. created an upload request) using the upload request type.
Mapping	On clicking the <b>Mapping</b> (  ) icon, the mapping screen appears where you can map the columns of CSV file with the upload request type.

On clicking the **Broadcast** () icon corresponding to an upload request type, the **Upload Request Type** zone appears with the details of the respective upload request type.

## Upload Request Type

The **Upload Request Type** zone displays the details of the upload request type. This zone contains the following sections:

- **Main** – This section provides basic information about the upload request type. It contains the following fields:

Field Name	Field Description
Upload Request Type	Displays the upload request type.
Upload Request Business Object	Indicates the business object that will be used to create the upload request. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.
Description	Displays the description of the upload request type.
Detailed Description	Displays additional information about the upload request type.
Status	Indicates the status of the upload request type. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>
File Size (KB)	Displays the maximum size of file (in kilobytes) that you can upload using the upload request type. If you upload a file which exceeds the maximum file size, the system will not allow you to upload the file.  <b>Note:</b> This field appears only when you create upload request type using <b>Adjustment Upload Request Type</b> business object.

Field Name	Field Description
Defer Algorithm	<p>Indicates the algorithm that will be triggered when you create entities (for example, adjustments) or approve the uploaded file (for example, adjustment data file). This algorithm checks whether the number of records in the uploaded file exceeds the online record process limit. If the number of records in the uploaded file does not exceed the online record process limit, the system creates the entities in the real time (i.e. immediately). However, if the number of records in the uploaded file exceeds the online record process limit, the system creates the entities (for example, adjustments) in the real time (i.e. immediately). However, if the number of records in the uploaded file exceeds the online record process limit, the system creates the entities (for example, adjustments) in the deferred mode.</p> <p><b>Note:</b></p> <p>This field appears only when you create upload request type using <b>Adjustment Upload Request Type</b> business object.</p> <p>It has a link. On clicking the link, the <b>Algorithm</b> screen appears where you can view the details of the respective algorithm.</p> <p>In <b>Upload Request Type</b>, online and deferred mode is used for processing the file if approval is not required. The defer algorithm is invoked if the number of records to be processed on the respective business object is more than the count specified on the algorithm then the status for number of records is changed from <b>Validated</b> to <b>Deferred Processing</b> else the status is changed to <b>Processed</b>.</p>
Approval Required	Indicates whether approval is required for a file which is uploaded using the upload request type.
Approval To Do Type	<p>Indicates that the To Do entry of the specified To Do type must be created when you submit the upload request for approval.</p> <p><b>Note:</b></p> <p>This field appears only when the <b>Approval Required</b> check box is selected.</p> <p>It has a link. On clicking the link, the <b>To Do Type</b> screen appears with the details of the respective To Do type.</p>
Approval To Do Role	<p>Indicates that users with the specified To Do role can only approve or reject the upload request submitted for approval.</p> <p><b>Note:</b></p> <p>This field appears only when the <b>Approval Required</b> check box is selected.</p> <p>On selecting the <b>To Do Type</b>, the <b>To Do Roles</b> configured on the <b>To Do Type</b> is populated.</p> <p>It has a link. On clicking the link, the <b>To Do Role</b> screen appears with the details of the respective To Do role.</p>

Field Name	Field Description
FK Reference	<p>Indicates the foreign key reference which specifies the created upload request type.</p> <p><b>Note:</b> This field appears only when you create upload request type using <b>Upload Request Type</b> business object. It has a link. On clicking the link, the <b>Foreign Key Reference</b> screen appears with the details of the respective foreign key.</p>

In addition, this section has the following columns:

Column Name	Column Description
Match Type	<p>Indicates the match type using which the adjustments must be created when you upload a file using the upload request type. The valid values are:</p> <ul style="list-style-type: none"> <li>Contract</li> <li>Contract Type</li> </ul> <p><b>Note:</b> The <b>Match Type</b> column is displayed for <b>Adjustment Upload Request Business Object</b>.</p>
Algorithm	<p>Indicates the algorithm that will be triggered when you upload an adjustment data file. This algorithm determines the contract against which the adjustment must be created.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Algorithm</b> screen appears with the details of the respective algorithm. The <b>Algorithm</b> column is displayed for <b>Adjustment Upload Request Business Object</b>.</p>

- **Characteristics** – This section lists the characteristics defined for the upload request type. It contains the following columns:

Column Name	Column Description
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- **Record Actions** – This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the upload request type.
Delete	<p>Used to delete the upload request type.</p> <p><b>Note:</b> You can delete an upload request type only when you have not uploaded a file (i.e. created an upload request) using the upload request type.</p>
Duplicate	Used to create a new upload request type using an existing upload request type.

- **Record Information** – This section contains the following fields:

Field Name	Field Description
Business Object	<p>Indicates the business object using which the upload request type is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.</p>

By default, the **Upload Request Type** zone does not appear in the **Upload Request Type** screen. It appears only when you click the **Broadcast**  icon corresponding to an upload request type in the **Upload Request Type List** zone.

## Defining an Upload Request Type

### Prerequisites

To define an upload request type, you should have:

- Upload request business objects defined in the application
- Defer algorithm for adjustment is defined using the **C1-UPLDEFEVL** algorithm type
- Defer algorithm for upload is defined using the **C1-DEFERUPLD** algorithm type
- Algorithm defined using the **C1-MTCIALG** algorithm type when you want to create adjustment using the **Contract** match type
- **C1-ADJUP** To Do type assigned to a To Do role whose users must receive To Do while submitting an adjustment upload request for approval
- **C1-BCUUR** To Do type assigned to a To Do role whose users must receive To Do while submitting a bill cycle update upload request for approval
- **C1-CRUUR** To Do type assigned to a To Do role whose users must receive To Do while submitting a contract rider update upload request for approval
- **C1-HLDUR** To Do type assigned to a To Do role whose users must receive To Do while submitting a hold upload request for approval
- **C1-REFUR** To Do type assigned to a To Do role whose users must receive To Do while submitting a refund upload request for approval
- **C1-WOUR** To Do type assigned to a To Do role whose users must receive To Do while submitting a write off upload request for approval

- **C1-BCUR** To Do type assigned to a To Do role whose users must receive To Do while submitting a billable charge upload request for approval
- **C1-RPUR** To Do type assigned to a To Do role whose users must receive To Do while submitting a reinstatement upload request for approval
- **C1-BGSRT** To Do type assigned to a To Do role whose users must receive To Do while submitting a bill group sorting upload request for approval
- **C1-BGDVP** To Do type assigned to a To Do role whose users must receive To Do while submitting a bill group derivation and pricing parameters upload request for approval

### **Procedure**

To define an upload request type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **U** and then click **Upload Request Type**.  
A sub-menu appears.
3. Click the **Add** option from the **Upload Request Type** sub-menu.

The **Select Business Object** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Upload Request Type Business Object	Used to indicate the business object that you want to use to create the upload request type.	Yes

**Tip:** Alternatively, you can access the **Select Business Object** screen by clicking the **Add** button in the **Page Title** area of the **Upload Request Type** screen.

**Note:** The **Select Business Object** screen appears only when there are multiple upload request type business objects defined in the application. If there is only one upload request type business object defined in the application, the **Upload Request Type** screen appears.

4. Select the required upload request type business object from the respective field.
5. Click **OK**.

The **Upload Request Type** screen appears. It contains the following sections:

- **Main** – Used to specify basic details about the upload request type.
- **Characteristics** – Used to define characteristics for the upload request type.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Upload Request Type	Used to specify the upload request type.	Yes
Upload Request Type Business Object	Indicates the upload request type business object used while defining the upload request type.	Not applicable
Upload Request Business Object	Used to indicate the business object that you want to use while creating the upload request.	Yes
Description	Used to specify the description for the upload request type.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Detailed Description	Used to specify additional information about the upload request type.	No
Status	Used to indicate the status of the upload request type. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>	Yes
File Size (KB)	Used to specify the maximum size of file (in kilobytes) that you can upload using the upload request type. If you upload a file which exceeds the maximum file size, the system will not allow you to upload the file. <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> This field appears when <b>Adjustment Upload Request Type</b> business object is selected.</p> </div>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Defer Algorithm	<p>Used to attach an algorithm that will be triggered when you create entities (for example, adjustments) or approve the uploaded file (for example, adjustment data file). This algorithm checks whether the number of records in the uploaded file exceeds the online record process limit (defined in the Defer algorithm). If the number of records in the uploaded file does not exceed the online record process limit, the system creates the entities (for example, adjustments) in the real time (i.e. immediately). However, if the number of records in the uploaded file exceeds the online record process limit, the system creates the entities (for example, adjustments) in the deferred mode.</p> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>Deferred mode means in the background when the <b>Upload Request Periodic Monitor (C1-UPLRQ)</b> batch is invoked. You can configure the <b>Upload Request Periodic Monitor (C1-UPLRQ)</b> batch such that it is executed at regular intervals. When the <b>Upload Request Periodic Monitor (C1-UPLRQ)</b> batch is invoked, the system checks whether there are any upload requests in the <b>Deferred</b> status. If there is an upload request in the <b>Deferred</b> status, the system creates the entities (for example, adjustments).</p> <p>This field appears when <b>Adjustment Upload Request Type</b> business object is selected.</p> <p>In <b>Upload Request Type</b>, online and deferred mode is used for processing the file if approval is not required. The defer algorithm is invoked if the number of records to be processed on the respective business object is more than the count specified on the algorithm then the status for number of records is changed from <b>Validated</b> to <b>Deferred Processing</b> else the status is changed to <b>Processed</b>.</p> </div> <div style="border: 1px solid black; padding: 5px; margin-top: 5px;"> <p><b>Note:</b> The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Algorithm Search</b> window appears.</p> </div>	Yes

Field Name	Field Description	Mandatory (Yes or No)																						
Entity Business Object	<p>Used to indicate for creating Business Object of the entity using the upload request type.</p> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Business Object Search</b> window appears.</p> <p>This field appears when <b>Upload Request Type</b> business object is selected.</p> </div>	No																						
Approval Required	Used to indicate whether approval is required for a file which is uploaded using the upload request type.	No																						
Approval To Do Type	<p>Used to indicate that To Do entry of the specified To Do type must be created when you submit the upload request for approval.</p> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.</p> <p>The following table lists the To Do type using which the To Do must be generated for the different upload requests:</p> <table border="1" data-bbox="667 1108 1135 1816"> <thead> <tr> <th data-bbox="667 1108 899 1157">Upload Request</th> <th data-bbox="899 1108 1135 1157">To Do Type</th> </tr> </thead> <tbody> <tr> <td data-bbox="667 1157 899 1205">Adjustment</td> <td data-bbox="899 1157 1135 1205">C1-ADJUP</td> </tr> <tr> <td data-bbox="667 1205 899 1253">Bill Cycle Update</td> <td data-bbox="899 1205 1135 1253">C1-BCUUR</td> </tr> <tr> <td data-bbox="667 1253 899 1302">Billable Charge</td> <td data-bbox="899 1253 1135 1302">C1-BCUR</td> </tr> <tr> <td data-bbox="667 1302 899 1392">Contract Rider Update</td> <td data-bbox="899 1302 1135 1392">C1-CRUUR</td> </tr> <tr> <td data-bbox="667 1392 899 1440">Hold Request</td> <td data-bbox="899 1392 1135 1440">C1-HLDUR</td> </tr> <tr> <td data-bbox="667 1440 899 1488">Refund Request</td> <td data-bbox="899 1440 1135 1488">C1-REFUR</td> </tr> <tr> <td data-bbox="667 1488 899 1537">Write Off Request</td> <td data-bbox="899 1488 1135 1537">C1-WOUR</td> </tr> <tr> <td data-bbox="667 1537 899 1627">Policy Reinstatement</td> <td data-bbox="899 1537 1135 1627">C1-RPUR</td> </tr> <tr> <td data-bbox="667 1627 899 1675">Bill Group Sorting</td> <td data-bbox="899 1627 1135 1675">C1-BGSRT</td> </tr> <tr> <td data-bbox="667 1675 899 1766">Bill Group Derivation and Pricing Parameters</td> <td data-bbox="899 1675 1135 1766">C1-BGDVP</td> </tr> </tbody> </table> </div>	Upload Request	To Do Type	Adjustment	C1-ADJUP	Bill Cycle Update	C1-BCUUR	Billable Charge	C1-BCUR	Contract Rider Update	C1-CRUUR	Hold Request	C1-HLDUR	Refund Request	C1-REFUR	Write Off Request	C1-WOUR	Policy Reinstatement	C1-RPUR	Bill Group Sorting	C1-BGSRT	Bill Group Derivation and Pricing Parameters	C1-BGDVP	<p>Yes (Conditional)</p> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This field is required when the <b>Approval Required</b> check box is selected.</p> </div>
Upload Request	To Do Type																							
Adjustment	C1-ADJUP																							
Bill Cycle Update	C1-BCUUR																							
Billable Charge	C1-BCUR																							
Contract Rider Update	C1-CRUUR																							
Hold Request	C1-HLDUR																							
Refund Request	C1-REFUR																							
Write Off Request	C1-WOUR																							
Policy Reinstatement	C1-RPUR																							
Bill Group Sorting	C1-BGSRT																							
Bill Group Derivation and Pricing Parameters	C1-BGDVP																							

Field Name	Field Description	Mandatory (Yes or No)
Approval To Do Role	Used to indicate that users with the specified To Do role can only approve the upload request submitted for approval.	Yes (Conditional) <b>Note:</b> This field is required when the <b>Approval Required</b> check box is selected.
FK Reference	Used to indicate the FK Reference code to display the entity information. <b>Note:</b> The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Foreign Key Search</b> window appears. This field appears when <b>Upload Request Type</b> business object is selected.	No

In addition, this section contains the following fields in the grid:

**Note:** This field appears when **Adjustment Upload Request Type** business object is selected.

Field Name	Field Description	Mandatory (Yes or No)
Match Type	Used to indicate the match type using which you want to create adjustments when you upload a file using the upload request type. The valid values are: <ul style="list-style-type: none"> <li>Contract</li> <li>Contract Type</li> </ul>	Yes (Conditional) <b>Note:</b> This field is required when you select the <b>Adjustment Upload Request</b> option from the <b>Upload Request Business Object</b> list.
Algorithm	Used to attach an algorithm that will be triggered when you upload an adjustment data file. This algorithm determines the contract against which the adjustment must be created. <b>Note:</b> The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Algorithm Search</b> window appears.	Yes (Conditional) <b>Note:</b> This field is required when you select the match type from the respective field.

6. Enter the required details.

**Note:**

You can search for an algorithm by clicking the **Search**  icon corresponding to the respective field.

If you want to associate more than one match type with the upload request type, click the **Add**  icon and then specify the details. However, if you want to remove a match type from the upload request type, click the **Delete**  icon corresponding to the match type.

7. Define characteristics for the upload request type, if required.

8. Click **Save**.

The upload request type is defined.

<b>Upload Request Type List</b> zone	<a href="#">Upload Request Type List</a> on page 1190
How to define characteristics for an upload request type	<a href="#">Defining Characteristics for an Upload Request Type</a> on page 1200

**Defining Characteristics for an Upload Request Type****Prerequisites**

To define characteristics for an upload request type, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to Upload Request Type)

**Procedure**

To define characteristics for an upload request type:

1. Ensure that the **Characteristics** section is expanded when you are defining, editing, or copying an upload request type.

The **Characteristics** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Type	Used to indicate the characteristic type. <b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to Upload Request Type.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the upload request type.
Characteristic Value	Used to specify the value for the characteristic type. <b>Note:</b> On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the upload request type.

2. Enter the required details.

**Note:** If you select a predefined characteristic type, the **Search**  icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

3. If you want to define more than one characteristic for the upload request type, click the **Add**  icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from the upload request type, click the **Delete** () icon corresponding to the characteristic.

## Editing an Upload Request Type

### Prerequisites

To edit an upload request type, you should have:

- Upload request business objects defined in the application
- Defer algorithm for adjustment is defined using the **C1-UPLDEFEVL** algorithm type
- Defer algorithm for upload is defined using the **C1-DEFERUPLD** algorithm type
- Algorithm defined using the **C1-MTCIALG** algorithm type when you want to create adjustment using the Contract match type
- Algorithm defined using the **C1-MTCTALG** algorithm type when you want to create adjustment using the Contract Type match type
- **C1-ADJUP** To Do type assigned to a To Do role whose users must receive To Do entries generated while submitting an adjustment upload request for approval
- **C1-UPLAPPENT** To Do type assigned to a To Do role whose users must receive To Do generated while submitting an upload request for approval

### Procedure

To edit an upload request type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **U** and then click **Upload Request Type**.  
A sub-menu appears.
3. In the **Upload Request Type List** zone, click the **Edit** () icon in the **Edit** column corresponding to the upload request type whose details you want to edit.

The **Upload Request Type** screen appears. It contains the following sections:

- **Main** – Used to specify basic details about the upload request type.
- **Characteristics** – Used to define characteristics for the upload request type.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Upload Request Type	Displays the upload request type.	Not applicable
Upload Request Type Business Object	Indicates the upload request type business object used while defining the upload request type.	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
Upload Request Business Object	Used to specify the business object that you want to use while creating the upload request.	Yes
Description	Used to specify the description for the upload request type.	Yes
Detailed Description	Used to specify additional information about the upload request type.	No
Status	Used to indicate the status of the upload request type. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>	Yes
File Size (KB)	Used to specify the maximum size of file (in kilobytes) that you can upload using the upload request type. If you upload a file which exceeds the maximum file size, the system will not allow you to upload the file. <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> This field appears when the business object is <b>Adjustment Upload Request Type</b>.</p> </div>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Defer Algorithm	<p>Used to attach an algorithm that will be triggered when you create entities (for example, adjustments) or approve the uploaded file (for example, adjustment data file). This algorithm checks whether the number of records in the uploaded file exceeds the online record process limit (defined in the Defer algorithm). If the number of records in the uploaded file does not exceed the online record process limit, the system creates the entities (for example, adjustments) in the real time (i.e. immediately). However, if the number of records in the uploaded file exceeds the online record process limit, the system creates the entities (for example, adjustments) in the deferred mode.</p> <div data-bbox="662 703 1177 1220" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>Deferred mode means in the background when the <b>Upload Request Periodic Monitor (C1-UPLRQ)</b> batch is invoked. You can configure the <b>Upload Request Periodic Monitor (C1-UPLRQ)</b> batch such that it is executed at regular intervals. When the <b>Upload Request Periodic Monitor (C1-UPLRQ)</b> batch is invoked, the system checks whether there are any upload requests in the <b>Deferred</b> status. If there is an upload request in the <b>Deferred</b> status, the system creates the entities (for example, adjustments).</p> <p>This field appears when the business object is <b>Adjustment Upload Request Type</b>.</p> </div>	Yes
Entity Business Object	<p>Used to indicate for creating Business Object of the entity using the upload request type.</p> <div data-bbox="662 1325 1177 1482" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Business Object Search</b> window appears.</p> </div>	No
Approval Required	<p>Used to indicate whether approval is required for a file which is uploaded using the upload request type.</p>	No
Approval To Do Type	<p>Used to indicate that To Do entry of the specified To Do type must be created when you submit the upload request for approval.</p> <div data-bbox="662 1734 1177 1892" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.</p> </div>	<p>Yes (Conditional)</p> <div data-bbox="1193 1671 1463 1818" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This field is required when the <b>Approval Required</b> check box is selected.</p> </div>

Field Name	Field Description	Mandatory (Yes or No)
Approval To Do Role	Used to indicate that users with the specified To Do role can only approve the upload request submitted for approval.	Yes (Conditional) <b>Note:</b> This field is required when the <b>Approval Required</b> check box is selected.
FK Reference	Used to indicate the FK Reference code to display the entity information. <b>Note:</b> The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Foreign Key Search</b> window appears. This field appears when the business object is <b>Upload Request Type</b> .	No

In addition, this section contains the following fields in the grid:

**Note:** The below section appears when the business object is **Adjustment Upload Request Type**.

Field Name	Field Description	Mandatory (Yes or No)
Match Type	Used to indicate the match type using which you want to create adjustments when you upload a file using the upload request type. The valid values are: <ul style="list-style-type: none"> <li>Contract</li> <li>Contract Type</li> </ul>	Yes (Conditional) <b>Note:</b> This field is required when you select the <b>Adjustment Upload Request</b> option from the <b>Upload Request Business Object</b> list.
Algorithm	Used to attach an algorithm that will be triggered when you upload an adjustment data file. This algorithm determines the contract against which the adjustment must be created.	Yes (Conditional) <b>Note:</b> This field is required when you select the match type from the respective field.

**Tip:** Alternatively, you can click the **Edit** button in the **Upload Request Type** zone to edit the details of the upload request type.

#### 4. Modify the required details.

**Note:**

You can search for an algorithm by clicking the **Search**  icon corresponding to the respective field.

If you want to associate more than one match type with the upload request type, click the **Add**  icon and then specify the details. However, if you want to remove a match type from the upload request type, click the **Delete**  icon corresponding to the match type.

#### 5. Define, edit, or remove characteristics from the upload request type, if required.

## 6. Click **Save**.

The changes made to the upload request type are saved.

## Deleting an Upload Request Type

### Procedure

To delete an upload request type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **U** and then click **Upload Request Type**.  
A sub-menu appears.
3. In the **Upload Request Type List** zone, click the **Delete** (🗑) icon in the **Delete** column corresponding to the upload request type that you want to delete.  
A message appears confirming whether you want to delete the upload request type.

**Note:** You can delete an upload request type only when you have not uploaded a file (i.e. created an upload request) using the upload request type.

**Tip:** Alternatively, you can click the **Delete** button in the **Upload Request Type** zone to delete the upload request type.

4. Click **OK**.

The upload request type is deleted.

## Copying an Upload Request Type

Instead of creating an upload request type from scratch, you can create a new upload request type using an existing upload request type. This is possible through copying an upload request type. On copying an upload request type, the details including the match types (only for adjustments) and characteristics are copied to the new upload request type. You can then edit the details, if required.

**Prerequisites**

To copy an upload request type, you should have:

- Upload request type (whose copy you want to create) defined in the application
- Upload request business objects defined in the application
- Defer algorithm defined using the **C1-UPLDEFEVL** algorithm type
- Defer algorithm for upload is defined using the **C1-DEFERUPLD** algorithm type
- Algorithm defined using the **C1-MTCIALG** algorithm type when you want to create adjustment using the Contract match type
- Algorithm defined using the **C1-MTCTALG** algorithm type when you want to create adjustment using the Contract Type match type
- **C1-ADJUP** To Do type assigned to a To Do role whose users must receive To Do entries generated while submitting an upload request for approval
- **C1-UPLAPPENT** To Do type assigned to a To Do role whose users must receive To Do generated while submitting an upload request for approval

**Procedure**

To copy an upload request type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **U** and then click **Upload Request Type**.  
A sub-menu appears.
3. In the **Upload Request Type List** zone, click the **Duplicate**  icon in the **Duplicate** column corresponding to the upload request type whose copy you want to create.

The **Upload Request Type** screen appears. It contains the following sections:

- **Main** – Used to specify basic details about the upload request type.
- **Characteristics** – Used to define characteristics for the upload request type.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Upload Request Type	Used to specify the upload request type.	Yes
Upload Request Type Business Object	Indicates the upload request type business object used while defining the upload request type (whose copy you want to create).	Not applicable
Upload Request Business Object	Used to specify the business object that you want to use while creating the upload request.	Yes
Description	Used to specify the description for the upload request type.	Yes
Detailed Description	Used to specify additional information about the upload request type.	No

Field Name	Field Description	Mandatory (Yes or No)
Status	<p>Used to indicate the status of the upload request type. The valid values are:</p> <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>	Yes
File Size (KB)	<p>Used to specify the maximum size of file (in kilobytes) that you can upload using the upload request type. If you upload a file which exceeds the maximum file size, the system will not allow you to upload the file.</p> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This field appears when the business object is <b>Adjustment Upload Request Type</b>.</p> </div>	Yes
Defer Algorithm	<p>Used to attach an algorithm that will be triggered when you create entities (for example, adjustments) or approve the uploaded file (for example, adjustment data file). This algorithm checks whether the number of records in the uploaded file exceeds the online record process limit (defined in the Defer algorithm). If the number of records in the uploaded file does not exceed the online record process limit, the system creates the entities (for example, adjustments) in the real time (i.e. immediately). However, if the number of records in the uploaded file exceeds the online record process limit, the system creates the entities (for example, adjustments) in the deferred mode.</p> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>Deferred mode means in the background when the <b>Upload Request Periodic Monitor (C1-UPLRQ)</b> batch is invoked. You can configure the <b>Upload Request Periodic Monitor (C1-UPLRQ)</b> batch such that it is executed at regular intervals. When the <b>Upload Request Periodic Monitor (C1-UPLRQ)</b> batch is invoked, the system checks whether there are any upload requests in the <b>Deferred</b> status. If there is an upload request in the <b>Deferred</b> status, the system creates the entities (for example, adjustments).</p> <p>This field appears when the business object is <b>Adjustment Upload Request Type</b>.</p> </div>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Entity Business Object	Used to indicate to create the copy of Business Object of the entity using the upload request type.  <b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Business Object Search</b> window appears.  This field appears when the business object is <b>Upload Request Type</b> .	No
Approval Required	Used to indicate whether approval is required for a file which is uploaded using the upload request type.	No
Approval To Do Type	Used to indicate that To Do entry of the specified To Do type must be created when you submit the upload request for approval.  <b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.	Yes (Conditional)  <b>Note:</b> This field is required when the <b>Approval Required</b> check box is selected.
Approval To Do Role	Used to indicate that users with the specified To Do role can only approve the upload request submitted for approval.	Yes (Conditional)  <b>Note:</b> This field is required when the <b>Approval Required</b> check box is selected.
FK Reference	Used to indicate the FK Reference code to display the entity information.  <b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Foreign Key Search</b> window appears.  This field appears when the business object is <b>Upload Request Type</b> .	No

In addition, this section contains the following fields in the grid:

**Note:** The below section appears when the business object is **Adjustment Upload Request Type**.

Field Name	Field Description	Mandatory (Yes or No)
Match Type	Used to indicate the match type using which you want to create adjustments when you upload a file using the upload request type. The valid values are: <ul style="list-style-type: none"> <li>Contract</li> <li>Contract Type</li> </ul>	Yes (Conditional) <b>Note:</b> This field is required when you select the <b>Adjustment Upload Request</b> option from the <b>Upload Request Business Object</b> list.
Algorithm	Used to attach an algorithm that will be triggered when you upload an adjustment data file. This algorithm determines the contract against which the adjustment must be created.	Yes (Conditional) <b>Note:</b> This field is required when you select the match type from the respective field.

**Tip:** Alternatively, you can click the **Duplicate** button in the **Upload Request Type** zone to create a copy of the upload request type.

- Enter the required details.

**Note:**

You can search for an algorithm by clicking the **Search**  icon corresponding to the respective field.

If you want to associate more than one match type with the upload request type, click the **Add**  icon and then specify the details. However, if you want to remove a match type from the upload request type, click the **Delete**  icon corresponding to the match type.

- Define, edit, or remove characteristics from the upload request type, if required.
- Click **Save**.

The new upload request type is defined.

## Mapping an Upload Request Type

### Prerequisites

To map an upload request type, you should have:

- Upload request type (whose columns you want to map with the CSV file) defined in the application
- Upload request business objects defined in the application

**Note:** Once an upload request type is used for creating an upload request, then mapping for the same cannot be edited. Duplicating the upload request type will not duplicate the mapping data. You have to add the mapping details manually after duplicating an upload request type.

### Procedure

To map an upload request type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **U** and then click **Upload Request Type**.  
A sub-menu appears.
3. In the **Upload Request Type List** zone, click the **Mapping**  icon in the **Mapping** column corresponding to the upload request type whose columns you want to map with the CSV file.

The **Upload Request Type Mapping** screen appears. It contains the following field:

**Note:** The **Mapping** icon is applicable only for upload request type created using **Upload Request Type (C1-UplRequestType)** business object, and it is not applicable for upload request type created using **Adjustment Upload Request Type (C1-AdjRequestType)** business object.

Field Name	Field Description	Mandatory (Yes or No)
Upload Request Type	Indicates the upload request type.	Not applicable

The **Upload Request Type Mapping** screen also contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
CSV Column Header	Used to specify the rows correspond to the columns in CSV file.	Yes (Conditional) <b>Note:</b> This column is required when you search the <b>Data Records</b> zone in the <b>Upload Request</b> screen.
Use for Searching	Used to indicate whether the defined <b>CSV Column Header</b> is searchable or not. <b>Note:</b> Upto 10 rows can be selected as searchable rows.	Yes (Conditional) <b>Note:</b> This column is required to be selected to be shown in the <b>Data Records</b> zone in the <b>Upload Request</b> screen
Sequence Number	Used to specify the sequence of the searchable fields. <b>Note:</b> Searchable rows should have sequence less than or equal to 10.	Yes (Conditional) <b>Note:</b> This column is required to be selected to be shown sequentially in the <b>Data Records</b> zone in the <b>Upload Request</b> screen

4. Enter the required details.

**Note:** If you want to add more than one column names mapped to the upload request type, click the **Add** (+) icon and then specify the details. However, if you want to remove a column name mapped to the upload request type, click the **Delete** (🗑️) icon corresponding to the column header.

5. Click **Save**.

The columns are mapped to the CSV files for upload request type.

## Viewing the Upload Request Type Details

### **Procedure**

To view the details of an upload request type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **U** and then click **Upload Request Type**.  
A sub-menu appears.
3. Click the **Search** option from the **Upload Request Type** sub-menu.  
The **Upload Request Type** screen appears.
4. In the **Upload Request Type List** zone, click the **Broadcast** (📡) icon corresponding to the upload request type whose details you want to view.  
The **Upload Request Type** zone appears.
5. View the details of the upload request type in the **Upload Request Type** zone.

### **Related Topics**

## Upload Request (Used for Searching)

The **Upload Request** screen allows you to upload, validate and process the transaction data. Through this screen, you can navigate to the following screen:

- [Upload Request \(Used for Viewing\)](#) on page 1756

This screen consists of the following zone:

- [Search Upload Request](#) on page 1750

## Search Upload Request

The **Search Upload Request** zone allows you to search for a upload request using various search criteria. This zone contains the following two sections:

- **Search Criteria** – The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for an upload request using <b>Request Details</b> .	Yes
Upload Date From	Used to search upload requests which are created from a particular date.	No
To	Used to search upload requests which are created till a particular date.	No
Status	Used to search upload requests with a particular status. The valid values are: <ul style="list-style-type: none"> <li>• Approval In Progress</li> <li>• Canceled</li> <li>• Deferred Processing</li> <li>• Draft</li> <li>• Processed</li> <li>• Rejected</li> <li>• Validated</li> </ul>	No
Upload Request Type	Used to search upload requests which are created using a particular upload request type.	No
User ID	Used to search upload requests which are created by a particular user.	No
Upload Request ID	Used to search a particular upload request.	No
File Name	Used to search a particular file name.	No

**Note:** You must specify at least one search criterion while searching for an upload request.

- **Search Results** – On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Upload Date	Displays the date and time when the upload request was created in the system.
Payment Request Information	Displays information about the upload request. <div style="border: 1px solid black; padding: 5px; margin-top: 5px;"> <p><b>Note:</b> It has a link. On clicking the link, the <b>Upload Request</b> screen appears where you can view the details of the respective upload request.</p> </div>

Column Name	Column Description
Status	Indicates the status of the upload request. The valid values are: <ul style="list-style-type: none"> <li>• Approval In Progress</li> <li>• Canceled</li> <li>• Deferred Processing</li> <li>• Draft</li> <li>• Processed</li> <li>• Rejected</li> <li>• Validated</li> </ul>
Upload Request Type	Displays the upload request type using which the upload request is created.
Entity Business Object	Displays the business object code of the entity.
File Name	Displays the uploaded file name.
Total Records	Displays the total number of records in the uploaded csv file.
Created By	Indicates the user who has created the upload request.

## **Searching for an Upload Request**

### **Prerequisites**

To search for an upload request, you should have:

- Upload request types defined in the application

### **Procedure**

To search for an upload request:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Tools** and then click **Upload Request**.  
A sub-menu appears.
3. Click the **Search** option from the **Upload Request** sub-menu.  
The **Upload Request** screen appears.
4. Enter the search criteria in the **Search Upload Request** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

#### 5. Click **Search**.

A list of upload requests that meet the search criteria appears in the **Search Results** section.

## Viewing the Upload Request Details

### Procedure

To view the details of an upload request:

1. Search for the upload request in the **Upload Request** screen.
2. In the **Search Results** section, click the link in the **Upload Request Information** column corresponding to the upload request whose details you want to view.

The **Upload Request** screen appears. It consists of the following tabs:

- **Main** – This tab contains the following two zones:
    - **Upload Request** – Displays the details of the upload request.
    - **Data Records** – Lists the details of data records uploaded in the csv file.
  - **Log** – This tab lists the complete trail of actions performed on the upload request.
3. View the details of the upload request in the **Upload Request** zone.
  4. View the data records in the csv file of the upload request in the **Data Records** zone.

## Creating an Upload Request

### Prerequisites

To create an upload request, you should have:

- Upload request types defined in the application

### **Procedure**

To create an upload request:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Tools** and then click **Upload Request**.  
A sub-menu appears.
3. Click the **Add** option from the **Upload Request** sub-menu.

The **Select Upload Request Type** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Upload Request Type	<p>Used to indicate the upload request type using which you want to create the upload request.</p> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> The following upload request types are shipped with the product:</p> <ul style="list-style-type: none"> <li>• ADJ_UPL_REQ_TYPE_APVL</li> <li>• ADJ_UPL_REQ_TYPE_WO_APVL</li> <li>• BC_UPL_REQ_TYPE</li> <li>• BILL_CYCLE_UPD_UPL_REQ_TYPE</li> <li>• BILL_LVL_UPL_REQ_TYPE</li> <li>• BILL_SRT_UPL_REQ_TYPE</li> <li>• HOLD_UPL_REQ_TYPE</li> <li>• REFUND_UPL_REQ_TYPE</li> <li>• REIN_UPL_REQ_TYPE</li> <li>• SA_RIDER_UPD_UPL_REQ_TYPE</li> <li>• WO_UPL_REQ_TYPE</li> </ul> </div>	Yes

**Tip:** Alternatively, you can access the **Select Upload Request Type** screen by clicking the **Upload** button in the **Page Title** area of the **Upload Request** screen.

**Note:** The **Select Upload Request Type** screen appears only when there are multiple upload request types defined in the application. If there is only one upload request type defined in the application, the **{XXX} Upload Request** screen appears.

4. Select the required upload request type from the respective field.
5. Click **OK**.

The **{XXX} Upload Request** screen appears. Here, {XXX} changes depending on the upload request type that you have selected. It contains the following sections:

- **Main** – Used to specify basic details about the upload request.
- **Characteristics** – Used to define characteristics for the upload request.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Upload Request Type	Indicates the upload request type using which the upload request will be created.	Not applicable
Parent Customer	<p>Used to indicate the person for whom you want to create the bill group sorting or bill group derivation and pricing parameters upload request.</p> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This field appears only when you are creating an upload request using an upload request type where the upload request business object is set to <b>C1-BillGrpSortUploadRequest</b> or <b>C1-BillLevelUploadRequest</b>. The system allows you to create a bill group sorting or bill group derivation and pricing parameters upload request for a person whose person type is set to <b>Parent Customer</b>. The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Person Search</b> window appears.</p> </div>	Yes
File Name	<p>Used to specify the name and path of the file that you want to upload.</p> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> You can also click the <b>Browse</b> button corresponding to this field to browse to the location where the file is available in the system.</p> </div>	Yes
Replace Existing File	Used to indicate whether you want to replace any existing file in the system. You must select this check box when you want to upload the same file once again.	No
Comments	Used to specify additional information about the upload request.	No

6. Click the **Browse** button corresponding to the **File Name** field.  
The **Choose File to Upload** dialog box appears.
7. Browse to the location where the file that you want to upload is available in the system.
8. Click **Open**.  
The file name along with the path appears in the **File Name** field.
9. Select the **Replace Existing File** check box depending on whether you want to upload the same file once again in the system.
10. Define characteristics for the upload request, if required.

**11. Click Save.**

A message appears indicating the number of records which are successfully uploaded. Then, an upload request is created in the **Draft** status. If the required identifier (such as account ID, person ID, policy ID, or bill group ID) is available in the record, the status of the record is set to **Pending**. However, if the required identifier could not be derived from the system, the status of the record is set to **Invalid**.

Upload Request screen	<a href="#">Upload Request (Used for Searching)</a> on page 1749
How to define characteristics for an upload request	<a href="#">Defining Characteristics for an Upload Request</a> on page 1755

**Defining Characteristics for an Upload Request****Prerequisites**

To define characteristics for an upload request, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Upload Request**)

**Procedure**

To define characteristics for an upload request:

- Ensure that the **Characteristics** section is expanded when you are defining or editing an upload request.

The **Characteristics** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the upload request.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the upload request.
Characteristic Type	Used to indicate the characteristic type. <b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Upload Request</b> .	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the upload request.
Characteristic Value	Used to specify the value for the characteristic type. <b>Note:</b> On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the upload request.

- Enter the required details in the **Characteristics** section.

**Note:** If you select a predefined characteristic type, the **Search** () icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

3. If you want to define more than one characteristic for the upload request, click the **Add** () icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from the upload request, click the **Delete** () icon corresponding to the characteristic.

## **Upload Request (Used for Viewing)**

Once you create an upload request, the **Upload Request** screen allows you to:

- Edit the details of an upload request
- Delete an upload request
- View the details of an upload request
- Validate an upload request
- Cancel an upload request
- Submit an upload request
- Approve or reject an upload request
- View the data uploaded to a request
- View the log of an upload request
- Add a log entry for an upload request

This screen consists of the following tabs:

- **Main** – This tab contains the following two zones:
  - **Upload Request** – Displays the details of the upload request.
  - **Data Records** – Lists the data records of the upload request.
- **Log** – This tab lists the complete trail of actions performed on the upload request.

### **Upload Request - Main**

The **Main** tab contains the following zones:

- [Upload Request](#) on page 1756
- [Data Records](#) on page 1759

### **Upload Request**

The **Upload Request** zone displays the details of the upload request. This zone contains the following sections:

- **Main** – This section provides basic information about the upload request. It contains the following fields:

Field Name	Field Description
Upload Request Information	Displays information about the upload request.
Upload Request Type	Indicates the upload request type using which the upload request is created.  <b>Note:</b> It has a link. On clicking the link, the <b>Upload Request Type</b> screen appears where you can view the details of the upload request type.
Status	Indicates the status of the payment request. The valid values are: <ul style="list-style-type: none"> <li>• Approval In Progress</li> <li>• Approved</li> <li>• Cancelled</li> <li>• Deferred Processing</li> <li>• Draft</li> <li>• Processed</li> <li>• Rejected</li> <li>• Submitted</li> <li>• Validated</li> </ul>
File Name	Displays name of the uploaded file.

- **Statistics** – This section lists the statistics of records in the upload request. It contains the following fields:

Field Name	Field Description
Total Records	Displays total number of records in CSV file.
Valid Records	Displays the count of valid data records.
Error Records	Displays the count of data records in error status.
Pending Records	Displays the count of data records pending after successful derivation.
Invalid Records	Displays the count of data records after unsuccessful derivation.
Processed Records	Displays the count of data records after processing.

- **Characteristics** – This section lists the characteristics defined for the upload request. It contains the following columns:

Column Name	Column Description
Effective Date	Indicates the date from when the characteristic is effective for the upload request.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- **Record Actions** – This section contains the following buttons:

Column Name	Column Description
Edit	Used to edit the details of the upload request. <b>Note:</b> The <b>Edit</b> button appears when the upload request is in the <b>Draft</b> or <b>Validated</b> status.
Delete	Used to delete the upload request. <b>Note:</b> The <b>Delete</b> button appears only when the upload request is in the <b>Draft</b> status.
Validate	Used to validate the upload request. <b>Note:</b> The <b>Validate</b> button appears only when the upload request is in the <b>Draft</b> status.
Cancel	Used to cancel the upload request. <b>Note:</b> The <b>Cancel</b> button appears only when the upload request is in the <b>Validated</b> status.
Submit	Used to submit the upload request for approval. <b>Note:</b> The <b>Submit</b> button appears only when: <ul style="list-style-type: none"> <li>The upload request is in the <b>Validated</b> status.</li> <li>The <b>Approval Required</b> check box is selected in the upload request type using which the upload request is created.</li> </ul>
Approve	Used to approve the upload request. <b>Note:</b> The <b>Approve</b> button appears only when: <ul style="list-style-type: none"> <li>The upload request is in the <b>Approval In Progress</b> status.</li> <li>A user with the approval To Do role is reviewing the upload request.</li> </ul>
Reject	Used to reject the upload request. <b>Note:</b> The <b>Reject</b> button appears only when: <ul style="list-style-type: none"> <li>The upload request is in the <b>Approval In Progress</b> status.</li> <li>A user with the approval To Do role is reviewing the upload request.</li> </ul>

- **Record Information** – This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the upload request is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.

Field Name	Field Description
Status Date/Time	Displays the date and time when the upload request status is updated
Create Date/Time	Displays the date and time when the upload request is created.

### Data Records

The **Data Records** zone lists the data records of the upload request. This zone contains the following two sections:

- **Search Criteria** – The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search Criteria 1, Search Criteria 2, .....,Search Criteria 10  <b>Note:</b> We have used generic field labels here. However, these labels will change depending on the mapping defined in the respective upload request type.	Used to search for data from the CSV file with respect to the field.	No
Record Status	Used to indicate whether you want to search data records for an upload request. The valid values are: <ul style="list-style-type: none"> <li>• Error</li> <li>• Invalid</li> <li>• Pending</li> <li>• Processed</li> <li>• Valid</li> </ul>	No

- **Search Results** – On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
View	On clicking the <b>View</b>  icon, the <b>Data Record Details</b> window appears where you can view the details of the data records.
Search Result 1, Search Result 2, ....., Search Result 10  <b>Note:</b> We have used generic field labels here. However, these labels will change depending on the mapping defined in the respective upload request type.	Displays data from the CSV file.

Column Name	Column Description
Record Status	Indicates the status of the data record. The valid values are: <ul style="list-style-type: none"> <li>• Error</li> <li>• Invalid</li> <li>• Pending</li> <li>• Processed</li> <li>• Valid</li> </ul>
Message(s)	Displays message for the data record respective to it's status.
Entity ID	Displays entity ID of the upload request. <b>Note:</b> The entity ID is displayed only for data records with <b>Processed</b> status.
Entity Information	Displays entity information for the <b>FK Reference</b> selected in <b>Upload Request Type</b> screen. <b>Note:</b> The entity information is displayed only for data records with <b>Processed</b> status.

**Note:** By default the **Search Results** section displays data records for all the statuses though data is not added or selected to any of the fields and are searched through the **Search Criteria** section.

## Upload Request - Log

The **Log** tab contains the following zone:

- [Upload Request Log](#) on page 1760

### Upload Request Log

The **Upload Request Log** zone on the **Upload Request** screen lists the complete trail of actions performed on the upload request. This zone contains the following columns:

Column Name	Column Description
Date/Time	Displays the date and time when the action was performed on the upload request.
Details	Displays the details about the action performed on the upload request.
User	Indicates the user who has performed the action on the upload request.
Log Type	Indicates the type of log.
Related Object	Indicates the object or entity which is generated when the action is performed on the upload request.
Status Reason	Displays the status reason of action performed on the upload request.

**Note:** You can manually add a log entry for the upload request by clicking the **Add Log Entry** link in the upper right corner of the **Upload Request Log** zone.

The **Add Upload Request Log** window appears. Enter **Log Details** and click **Save**. The upload request log is added.

## **Editing an Upload Request**

### **Procedure**

To edit an upload request:

1. Search for the upload request in the **Upload Request** screen.
2. In the **Search Results** section, click the link in the **Upload Request Information** column corresponding to the upload request whose details you want to edit.

The **Upload Request** screen appears.

3. Click the **Edit** button in the **Upload Request** zone.

**Note:** The **Edit** button appears only when the upload request is in the **Draft** or **Validated** status.

The entity **Upload Request** screen appears. It contains the following sections:

- **Main** – Used to specify basic details about the upload request. This section contains the following fields:

<b>Field Name</b>	<b>Field Description</b>	<b>Mandatory (Yes or No)</b>
Upload Request Type	Displays the upload request type using which the upload request is created.	Not applicable
File Name	Displays name of the uploaded CSV file.	Not applicable
Comments	Used to indicate the comments for upload request.	No

- **Characteristics** – Used to define characteristics for the upload request. This section contains the following fields:

<b>Field Name</b>	<b>Field Description</b>	<b>Mandatory (Yes or No)</b>
Effective Date	Used to specify the date from when the characteristic is effective for the upload request.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the upload request.
Characteristic Type	Used to indicate the characteristic type. <b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Upload Request</b> .	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the Upload request.

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Value	Used to specify the value for the characteristic type.  <b>Note:</b> On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	Yes (Conditional)  <b>Note:</b> This field is required when you are defining a characteristic for the Upload request.

4. Modify the details of the upload request, if required.
5. Define, edit, or remove characteristics from the upload request, if required.
6. Click **Save**.

The changes made to the upload request are saved.

## Deleting an Upload Request

### Procedure

To delete an upload request:

1. Search for the upload request in the **Upload Request** screen.
2. In the **Search Results** section, click the link in the **Upload Request Information** column corresponding to the upload request that you want to delete.

The **Upload Request** screen appears.

3. Click the **Delete** button in the **Upload Request** zone.

A message appears confirming whether you want to delete the upload request.

**Note:** The **Delete** button appears only when the upload request is in the **Draft** status.

4. Click **OK**.

The upload request is deleted.

## Validating an Upload Request

### Prerequisites

To validate an upload request, you should have:

- Upload Request Types defined in the request.

### Procedure

To validate an upload request:

1. Search for the upload request in the **Upload Request** screen.
2. In the **Search Results** section, click the link in the **Upload Request Information** column corresponding to the upload request that you want to validate.

The **Upload Request** screen appears.

3. Click the **Validate** button in the **Upload Request** zone.

**Note:** The **Validate** button appears only when the upload request is in the **Draft** status.

For more information about the **Upload Request Periodic Monitor (C1-UPLRQ)** batch, refer to Oracle Revenue Management and Billing Batch Guide.

The status of the upload request is changed to **Validated**.

## Cancelling an Upload Request

### Prerequisites

To cancel an upload request, you should have:

- Cancellation reasons defined in the application

**Note:** While cancelling an upload request, you need to specify the reason why you want to cancel the upload request. You can select the appropriate cancellation reason only when you have defined the reasons for the **Canceled** status of the **C1-UplRequestType** business object in the **Status Reason** screen.

### Procedure

To cancel an upload request:

1. Search for the upload request in the **Upload Request** screen.

- In the **Search Results** section, click the link in the **Upload Request Information** column corresponding to the upload request that you want to cancel.

The **Upload Request** screen appears.

- Click the **Cancel** button in the **Upload Request** zone.

The **Cancel Reason** window appears. It contains following fields:

Field Name	Field Description	Mandatory (Yes or No)
Cancel Reason	Used to indicate the reason why you want to cancel the upload request.	Yes
Comments	Used to specify additional information while cancelling the upload request.	No

**Note:** The **Cancel** button appears only when the upload request is in the **Validated** status.

- Select the cancellation reason from the **Cancel Reason** list.
- Click **Save**.

The status of the upload request is changed to **Canceled**.

### **Related Topics**

## **Submitting an Upload Request**

### **Procedure**

To submit an upload request:

- Search for the upload request in the **Upload Request** screen.
- In the **Search Results** section, click the link in the **Upload Request Information** column corresponding to the upload request that you want to submit.

The **Upload Request** screen appears.

- Click the **Submit** button in the **Upload Request** zone.

The system behaves in the following manner:

If...	Then...																				
<p>The <b>Approval Required</b> check box is selected in the upload request type using which the upload request is created</p>	<p>A To Do of the specified To Do type is created and sent to the approver for approval. ## Approving an Upload Request

You can view the number of upload requests which are pending for approval in the **Upload Request** screen. The approver can review, and accordingly approve or reject the upload request based on the observations.

**Note:** The system will not allow you to approve or reject an upload request submitted by you.

### Procedure

To approve an upload request:

1. Do either of the following:

If you want to...	Then...
Approve a upload request through the <b>Upload Request</b> screen	<ol style="list-style-type: none"> <li>1. Search for the upload request in the <b>Upload Request</b> screen.</li> <li>2. In the <b>Search Results</b> section, click the link in the <b>Upload Request Information</b> column corresponding to the upload request which you want to review.</li> </ol>
Approve a upload request from the <b>To Do List</b> screen	<ol style="list-style-type: none"> <li>1. Click the <b>Menu</b> link in the <b>Application</b> toolbar. A list appears.</li> <li>2. From the <b>Main</b> menu, select <b>To Do</b> and then click <b>To Do List</b>. The <b>To Do Type for User Search</b> window appears.</li> <li>3. Enter the required To Do type in the respective field.</li> <li>4. Click the <b>Search</b> button corresponding to the <b>To Do Type</b> field. The <b>To Do List</b> screen appears.</li> <li>5. Select the <b>Open</b> option from the <b>Filter by</b> list to view all unassigned To Dos.</li> <li>6. Click the link in the <b>Message</b> column corresponding to the To Do of the upload request that you want to review.</li> </ol>

The **Upload Request** screen appears.

2. Review the upload request details.
3. Click the **Approve** button in the **Upload Request** zone.

The system behaves in the following manner:

If...	Then...																				
<p>The number of valid records in the upload request does not exceed the online record process limit defined in the <b>C1-DEFERUPLD</b> algorithm</p>	<p>The following table lists the behavior for the different upload requests:</p> <table border="1" data-bbox="889 348 1464 1455"> <thead> <tr> <th data-bbox="889 348 1133 396">Upload Request</th> <th data-bbox="1133 348 1464 396">Behavior</th> </tr> </thead> <tbody> <tr> <td data-bbox="889 396 1133 478">Bill Cycle Update</td> <td data-bbox="1133 396 1464 478">The bill cycle information is updated for the accounts.</td> </tr> <tr> <td data-bbox="889 478 1133 560">Billable Charge</td> <td data-bbox="1133 478 1464 560">The billable charges are created.</td> </tr> <tr> <td data-bbox="889 560 1133 674">Contract Rider Update</td> <td data-bbox="1133 560 1464 674">The contract rider information is updated for the contracts.</td> </tr> <tr> <td data-bbox="889 674 1133 756">Hold Request</td> <td data-bbox="1133 674 1464 756">The hold requests are created.</td> </tr> <tr> <td data-bbox="889 756 1133 837">Refund Request</td> <td data-bbox="1133 756 1464 837">The refund requests are created.</td> </tr> <tr> <td data-bbox="889 837 1133 919">Write Off Request</td> <td data-bbox="1133 837 1464 919">The write off requests are created.</td> </tr> <tr> <td data-bbox="889 919 1133 1226">Policy Reinstatement</td> <td data-bbox="1133 919 1464 1226">The policies are reinstated and the status of the policies is changed to the one defined in the <b>Policy Status after Processing Reinstatement Upload Request</b> parameter of the <b>C1-REN-VALID</b> algorithm.</td> </tr> <tr> <td data-bbox="889 1226 1133 1308">Bill Group Sorting</td> <td data-bbox="1133 1226 1464 1308">The sort ID is defined for the respective bill group.</td> </tr> <tr> <td data-bbox="889 1308 1133 1455">Bill Group Derivation and Pricing Parameters</td> <td data-bbox="1133 1308 1464 1455">The derivation and pricing parameters are defined for the respective bill group and sort ID combination.</td> </tr> </tbody> </table> <p>In addition, the status of the upload request is changed to <b>Processed</b>.</p>	Upload Request	Behavior	Bill Cycle Update	The bill cycle information is updated for the accounts. ## Rejecting an Upload Request

### Prerequisites

To reject an upload request, you should have:

- Rejection reasons defined in the application

### **Note:**

While rejecting an upload request, you need to specify the reason why you want to reject the upload request. You can select the appropriate rejection reason only when you have defined the reasons for the **Rejected** status of the **C1-UplRequestType** business object in the **Status Reason** screen.

The system will not allow you to approve or reject an upload request submitted by you.

### Procedure

To reject an upload request:

1. Do either of the following:

<b>If you want to</b>	<b>Then</b>
Reject an upload request through the <b>Upload Request</b> screen	<ol style="list-style-type: none"> <li>1. Search for the upload request in the <b>Upload Request</b> screen.</li> <li>2. In the <b>Search Results</b> section, click the link in the <b>Upload Request Information</b> column corresponding to the upload request which you want to review.</li> </ol>
Reject an upload request from the <b>To Do List</b> screen	<ol style="list-style-type: none"> <li>1. Click the <b>Menu</b> link in the <b>Application</b> toolbar. A list appears.</li> <li>2. From the <b>Main</b> menu, select <b>To Do</b> and then click <b>To Do List</b>. The <b>To Do Type for User Search</b> window appears.</li> <li>3. Enter the required To Do type in the respective field.</li> <li>4. Click the <b>Search</b> button corresponding to the <b>To Do Type</b> field. The <b>To Do List</b> screen appears.</li> <li>5. Select the <b>Open</b> option from the <b>Filter by</b> list to view all unassigned To Dos.</li> </ol>

If you want to	Then
	6. Click the link in the <b>Message</b> column corresponding to the To Do of the upload request that you want to review.

The **Upload Request** screen appears.

- Review the upload request details.
- Click the **Reject** button in the **Upload Request** zone.

The **Reject Upload Request** window appears. It contains following fields:

Field Name	Field Description	Mandatory (Yes or No)
Status Reason	Used to indicate the reason why you want to reject the upload request.	Yes
Comments	Used to specify additional information while rejecting the upload request.	No

**Note:** The **Reject** button appears only when:

- The upload request is in the **Approval In Progress** status.
- A user with the approval To Do role is reviewing the upload request.

- Select the rejection reason from the **Status Reason** list.
- Click **Save**.

The status of the upload request is changed to **Rejected**.

## Viewing the Data Record Details

### Procedure

To view the details of a data record:

- Search for the data record in the **Data Records** zone in the **Upload Request** screen.
- In the **Search Results** section, click the **View**  icon in the **View** column corresponding to the data record whose details you want to view.

The **Data Record Details** window appears. It contains the following fields:

Field Name	Field Description
Sr. No.	Displays the sequential number of data.

Field Name	Field Description
CSV Column Header	Displays name of the column in uploaded CSV file.
CSV Column Value	Displays value in the column in uploaded CSV file.

- View the details of the data record in the **Data Record Details** window.

<b>Data Record</b> zone	<a href="#">Data Records</a> on page 1759

## Viewing the Log of an Upload Request

### Procedure

To view the log of an upload request:

- Search for the upload request in the **Upload Request** screen.
- In the **Search Results** section, click the link in the **Upload Request Information** column corresponding to the upload request whose log you want to view.

The **Upload Request** screen appears. It consists of the following tabs:

- Main** – Displays information about the upload request. It contains the following zones:
  - Upload Request** – Displays the details of the upload request.
  - Data Records** – Lists the data records of the upload request.
- Log** – Lists the complete trail of actions performed on the upload request. This tab contains the following zone:
  - Upload Request Log** – Displays the trail of actions performed on the particular upload request.

- Click the **Log** tab.

The **Upload Request Log** zone in the **Log** tab contains the following columns:

Column Name	Column Description
Date/Time	Displays the date and time when the action was performed on the upload request.
Details	Displays the details about the action performed on the upload request.
User	Indicates the user who has performed the action on the upload request.
Log Type	Indicates the type of log.
Related Object	Indicates the object or entity which is generated when the action is performed on the upload request.
Status Reason	Indicates the reason why the upload request was rejected.

**Note:** You can manually add a log entry for the upload request by clicking the **Add Log Entry** link in the upper right corner of the **Upload Request Log** zone.

### Related Topics

How to add a log entry for an Upload request	<a href="#">Adding a Log Entry for an Upload Request</a> on page 1774

## Adding a Log Entry for an Upload Request

### Procedure

To add a log entry for an upload request:

1. Search for the upload request in the **Upload Request** screen.
2. In the **Search Results** section, click the link in the **Upload Request Information** column corresponding to the upload request whose log you want to edit.

The **Upload Request** screen appears. It consists of the following tabs:

- **Main** – Displays information about the upload request. It contains the following zones:
  - **Upload Request** – Displays the details of the upload request.
  - **Data Records** – Lists the data records of the upload request.
- **Log** – Lists the complete trail of actions performed on the upload request. This tab contains the following zone:
  - **Upload Request Log** – Displays the trail of actions performed on the particular upload request.

3. Click the **Log** tab.

The **Log** tab appears.

4. Click the **Add Log Entry** link in the upper right corner of the **Upload Request Log** zone.

The **Add Upload Request Log** window appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Upload Request Information	Displays information about the upload request.	Not applicable
Log Details	Used to specify additional comments on the upload request.	Yes

5. Enter the comments in the **Log Details** field.
6. Click **Save**.

The log entry is added in the **Upload Request Log** zone.

## General Ledger (GL) Accounting Template

---

### Topics:

- [GL Accounting Template \(Without Approval\) Status Transition](#)
- [GL Accounting Template \(With Approval\) Status Transition](#)
- [Algorithms Used in C1- GLAT](#)
- [Prerequisites](#)
- [GL Accounting Template \(Used for Searching\)](#)
- [GL Accounting Template \(Used for Viewing\)](#)

Oracle Revenue Management and Billing until now created FT GL entries while generating the financial transactions for adjustments, payments, and bill segments. The FT GL entries were created using the distribution codes from the adjustment type, rate component, billable charge pass through line, or contract type depending on the type of financial transaction. Now, the system enables you to override the distribution code used for creating FT GL entries using the GL Accounting Template feature.

The system allows you to define a GL Accounting template for each process and sub processes combination for a date range. Based on the parameters defined in the **FT Generation** algorithms, the system either uses the standard process or GL Accounting Template for FT GL creation. The GL Accounting template for the specified process and sub processes combination which is effective on the accounting date is used for FT GL creation.

There should be at least one debit and credit lines in the GL Accounting template. You can define maximum 10 lines in the GL Accounting template. Each line should contain the following information:

- Whether the line should be used to create a debit FT GL entry or credit FT GL entry
- Conditional algorithm (created using the **C1-GLATLC** algorithm type) to indicate whether the line should be used to create the FT GL entry or not
- Distribution code to indicate the GL Account against which the FT GL entry should be created
- User defined amount, such as Amount 01, Amount 02, or Amount 03

The line with the Amount 01 user defined amount is used to create balancing FT GL entry against the contract type. The line with the Amount 02, Amount 03, ..., and Amount 10 user defined amount is used to create FT GL entries for bill segment calculation lines, non-calculated adjustments, adjustment calculation lines, or payments. In case of bill segments and calculated adjustments, the lines with the Amount 02, Amount 03, ..., Amount 10 user defined amount are mapped to calculation line amounts based on the rate component sequence.

You can optionally configure the system to use the approval workflow process while activating or deactivating the GL Accounting templates. If you want to enable the approval workflow process, you need to define algorithms using the following algorithm types:

- C1-GLATAPPEN
- C1-GLATSUB

If the **Approval Required (Y or N)** parameter in an algorithm created using the **C1-GLATSUB** algorithm type is set to **Y**, then on submitting or deactivating the GL Accounting template, the approval workflow process creates a To Do

for the approver to review the GL Accounting template. Once the approver approves a GL Accounting template, the status of the GL Accounting template is set to **Active** or **Inactive**.

We are supporting the following process and sub processes combinations while creating the GL Accounting template:

Process	BS	AD	PS
Sub Process 1	Contract Type	Adjustment Type	Bank Account
Sub Process 2	Division	Contract Type	Contract Type
Sub Process 3	Rate Schedule	Division	Division
Sub Process 4	-	-	-
Sub Process 5	-	-	-

For example, you can define the following the GL Accounting templates using the above supported process and sub processes combinations:

GL Accounting Template	Process	Sub Process 1	Sub Process 2	Sub Process 3
GLAT1	BS	CT1	D1	RS1
GLAT2	BS	CT2	D1	RS1
GLAT3	BS	CT3	D2	RS2
GLAT4	PS	BA1	CT1	D1
GLAT5	PS	BA2	CT2	D2
GLAT6	AD	AT1	CT1	D1
GLAT7	AD	AT1	CT2	D2

While creating the GL Accounting template for BS and AD processes, you need to ensure that the line with the Amount 1 user defined amount is a debit line. However, while creating the GL Accounting template for PS process, you need to ensure that the line with the Amount 1 user defined amount is a credit line.

Based on the customer requirements, you can define GL Accounting template for various custom process and sub processes combinations.

The **Create Additional FT GL Entries** parameter is added in the **Assign GL Account to Financial Transaction (C1-GLASN)** and **Assign GL Account to Financial Transaction (GLASSGN2)** batches. If you set this parameter to **Y**, the **C1-GLCE** algorithm is invoked. Based on the parameters defined in the algorithm, the system checks whether there is a GL Accounting template which is effective on the accounting date for the specified process and sub processes combination. If the effective GL Accounting template is available, the system creates additional FT GL entries for the financial transactions. If the financial transaction's currency is different from the division's base currency, the algorithm will create FT GL extension for the respective financial transaction.

Two new parameters are added in the **ADJT-NM**, **ADJT-AC**, **ADJT-TA**, **ADJT-TC**, **ADJT-AD**, **ADJT-GL**, **PSEG-NM**, **PSEG-AC**, **PSEG-CA**, **BSBF-BA**, **BSBF-LO** algorithm types:

- **Use GL Accounting Template (Y or N)** - Indicates whether the FT GL entries should be created using the lines in the GL Accounting template. The valid values are **Y** and **N**.
- **Show the GL Accounting Template Error When Header Record Not Found (Y or N)** - Indicates whether you want to show error message when the effective GL Accounting template is not available for the process and sub processes combination. If you set the value of this parameter to **N**, the algorithm uses the standard process for FT GL creation when the effective GL Accounting template is not available.

The following table explains how the algorithms created using the following algorithm types create FT GL entries:

Algorithm Type	Use GL Accounting Template (Y or N)	Calculated Adjustment Distribution Code Source (AT - Adjustment Type, CL - Calc Lines)	Algorithm Behaviour
ADJT-NM, ADJT-AC, ADJT-TA, ADJT-TC, ADJT-AD, and ADJT-GL	N	CL	Creates FT GL for the adjustment calculation line using the distribution code on the respective rate component and the balancing FT GL using the distribution code on contract type.
ADJT-NM, ADJT-AC, ADJT-TA, ADJT-TC, ADJT-AD, and ADJT-GL	Y	CL	Creates debit and credit FT GL entries using the lines in the GL Accounting template.
ADJT-NM, ADJT-AC, ADJT-TA, ADJT-TC, ADJT-AD, and ADJT-GL	N	AT	Creates FT GL for the adjustment using the distribution code on the respective adjustment type and the balancing FT GL using the distribution code on contract type.
ADJT-NM, ADJT-AC, ADJT-TA, ADJT-TC, ADJT-AD, and ADJT-GL	Y	AT	Creates debit and credit FT GL entries using the lines in the GL Accounting template.

If the **Use GL Accounting Template (Y or N)** parameter is set to **N** in the algorithms created using the **PSEG-NM**, **PSEG-AC**, and **PSEG-CA** algorithm types, the system creates FT GL for the payment segment using the distribution code on the respective payment segment type and the balancing FT GL using the distribution code on contract type. However, if the **Use GL Accounting Template (Y or N)** parameter is set to **Y**, the system creates debit and credit FT GL entries using the lines in the GL Accounting template.

If the **Use GL Accounting Template (Y or N)** parameter is set to **N** in the algorithms created using the **BSBF-BA** and **BSBF-LO** algorithm types, the system behaves in the following manner:

<b>If the bill segment is...</b>	<b>Then, the system...</b>
Created from a billable charge with SQI and/or price item details	Creates FT GL for the bill segment calculation line using the distribution code on the respective rate component and the balancing FT GL using the distribution code on contract type.
Created from a pass through billable charge	Creates FT GL for the pass through line using the distribution code on the respective pass through line and the balancing FT GL using the distribution code on contract type.
Created from a billable charge with pass through charges, SQI, and price item details	Creates... <ul style="list-style-type: none"> <li>• FT GL for the bill segment calculation line using the distribution code on the respective rate component</li> <li>• FT GL for the pass through line using the distribution code on the respective pass through line</li> <li>• Balancing FT GL using the distribution code on contract type</li> </ul>
A post processing bill segment	Creates FT GL for the post processing FT using the distribution code on the respective rate component and the balancing FT GL using the distribution code on contract type.

However, if the **Use GL Accounting Template (Y or N)** parameter is set to **Y** in the algorithms created using the **BSBF-BA** and **BSBF-LO** algorithm types, the system behaves in the following manner:

<b>If the bill segment is...</b>	<b>Then, the system...</b>
Created from a billable charge with SQI and/or price item details	Creates debit and credit FT GL entries using the lines in the GL Accounting template.
Created from a pass through billable charge	Does not use the GL Accounting template. It creates FT GL for the pass through line using the distribution code on the respective pass through line and the balancing FT GL using the distribution code on contract type.

If the bill segment is...	Then, the system...
Created from a billable charge with pass through charges, SQI, and price item details	Creates... <ul style="list-style-type: none"> <li>• FT GL for bill segment calculation line using the lines in the GL Accounting template.</li> <li>• FT GL for the pass through line using the distribution code on the respective pass through line.</li> <li>• Balancing FT GL using the line in the GL Accounting template.</li> </ul>
A post processing bill segment	Creates debit and credit FT GL entries using the lines in the GL Accounting template.

## GL Accounting Template (Without Approval) Status Transition

---

The following figure graphically indicates how a GL Accounting Template moves from one status to another when approval workflow is off:

## GL Accounting Template (With Approval) Status Transition

---

The following figure graphically indicates how a GL Accounting Template moves from one status to another when approval workflow is on:

## Algorithms Used in C1- GLAT

The following table lists the algorithms which are attached to the **C1-GLAT** business object:

System Event	Algorithm	Algorithm Type	Description
Information	C1-GLAT-INF	C1-GLAT-INF	This algorithm generates the GLAT information string which appears throughout the application. This algorithm concatenates the following fields: <ul style="list-style-type: none"> <li>GLAT Description</li> <li>GLAT Status Description</li> <li>GLAT ID</li> </ul>

The following table lists the algorithms which are used in the lifecycle of the **C1-GLAT** business object:

Status	System Event	Algorithm	Algorithm Type	Description
Draft	Exit	F1-TODOCOMPL	F1-TODOCOMPL	This algorithm type completes To Do entries that are linked to an object when the object exits a given state. The system finds all open To Do entries with drill keys for the current business object's primary key, and completes them, unless the To Do entry's type has been configured with an Exclude To Do Type Characteristic Type indicating that it should not be automatically completed.
Submitted	Enter	C1-GLATSUB	C1-GLATSUB	This algorithm checks the following: <ul style="list-style-type: none"> <li>If soft parameter value is set to Y then approval workflow will be triggered.</li> </ul>
Approval in Progress	Enter	C1-GLATAPPEN	C1-GLATAPPEN	This algorithm creates the To Do based on the Approval To Do Type configured in algorithm.
Approval in Progress	Exit	C1-GLATAPPEX	C1-GLATAPPEX	This algorithm checks whether an approver is associated with the approval To Do Role specified in the <b>C1-GLATAAPEN</b> Algorithm. It does not allow the submitter to approve or reject the GLAT request.
Approval in Progress	Exit	F1-TODOCOMPL	F1-TODOCOMPL	This algorithm type completes To Do entries that are linked to an object when the object exits a given state. The system finds all open To Do entries with drill keys for the current business object's primary key, and completes them, unless the To Do entry's type has been configured with an Exclude To Do Type Characteristic Type indicating that it should not be automatically completed.
Active	-	-	-	-
Deactivation Submitted	Enter	C1-GLATSUB	C1-GLATSUB	This algorithm checks the following: <ul style="list-style-type: none"> <li>If soft parameter value is set to Y then approval workflow will be triggered.</li> </ul>
Deactivation Approval In Progress	Enter	C1-GLATAPPEN	C1-GLATAPPEN	This algorithm creates the To Do based on the Approval To Do Type configured in algorithm.

Status	System Event	Algorithm	Algorithm Type	Description
Deactivation Approval In Progress	Exit	C1-GLATAPPEX	C1-GLATAPPEX	This algorithm checks whether an approver is associated with the approval To Do Role specified in the <b>C1-GLATAAPEN</b> Algorithm. It does not allow the submitter to approve or reject the GLAT request.
Deactivation Approval In Progress	Exit	F1-TODOCOMPL	F1-TODOCOMPL	This algorithm type completes To Do entries that are linked to an object when the object exits a given state. The system finds all open To Do entries with drill keys for the current business object's primary key, and completes them, unless the To Do entry's type has been configured with an Exclude To Do Type Characteristic Type indicating that it should not be automatically completed.
Rejected	Exit	F1-TODOCOMPL	F1-TODOCOMPL	This algorithm type completes To Do entries that are linked to an object when the object exits a given state. The system finds all open To Do entries with drill keys for the current business object's primary key, and completes them, unless the To Do entry's type has been configured with an Exclude To Do Type Characteristic Type indicating that it should not be automatically completed.
Inactive	-	-	-	-

## Prerequisites

To setup the GL Accounting Template, you need to do the following:

- Define rejected status reasons for the **C1-GLAT** business object
- Define deactivated status reasons for the **C1-GLAT** business object
- Assign the **C1-GLAT** To Do type to a To Do role whose users must receive To Do generated while submitting a template for approval
- Define the required algorithms, for approval and To Do type role and configurations

## GL Accounting Template (Used for Searching)

The **GL Accounting Template** screen allows you to search for a template using various search criteria. It also allows you to create template. Through this screen, you can navigate to the following screen:

- [GL Accounting Template \(Used for Viewing\)](#) on page 1789

This screen consists of the following zones:

- [Search GL Accounting Template](#) on page 1784
- [GL Accounting Template Lines](#) on page 1785

## Search GL Accounting Template

The **Search GL Accounting Template** zone allows you to search for GL accounting templates using various search criteria. This zone contains the following two sections:

- **Search Criteria** — The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Template ID	Used to search a particular template.	No
Description	Used to specify the description of a template.	No
Status	Used to indicate the status of the template. The valid values are: <ul style="list-style-type: none"> <li>• Draft</li> <li>• Approval In Progress</li> <li>• Deactivation Approval In Progress</li> <li>• Active</li> <li>• Inactive</li> <li>• Rejected</li> </ul>	No
Process	Used to search a particular process.	No
Sub Process 1	Used to search a particular Sub Process 1.	No
Sub Process 2	Used to search a particular Sub Process 2.	No
Sub Process 3	Used to search a particular Sub Process 3.	No
Sub Process 4	Used to search a particular Sub Process 4.	No
Sub Process 5	Used to search a particular Sub Process 5.	No
Effective Start Date	Used to search templates which are effective from a particular date.	No
Effective End Date	Used to search templates which are effective till a particular date.	No

**Note:** You must specify at least one search criterion while searching for a template.

- **Search Results** — On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Process	Displays the process.
GL Accounting Template Request Information	Displays information about the template. <div style="border: 1px solid black; padding: 5px; margin-top: 5px;"> <p><b>Note:</b> It has a link. On clicking the link, the <b>GL Accounting Template</b> screen appears where you can view the details of the respective template.</p> </div>
Description	Displays the description of process.

Column Name	Column Description
Sub Process 1	Displays the Sub Process 1.
Sub Process 2	Displays the Sub Process 2.
Sub Process 3	Displays the Sub Process 3.
Sub Process 4	Displays the Sub Process 4.
Sub Process 5	Displays the Sub Process 5.
Effective Start Date	Displays the date from when the template is effective.
Effective End Date	Displays the date till when the template is effective.
Status	Displays the status of template.

How to create a GL Accounting Template	<a href="#">Creating a GL Accounting Template</a> on page 1786
GL Accounting Template Lines zone	<a href="#">GL Accounting Template Lines</a> on page 1785

## GL Accounting Template Lines

The **GL Accounting Template Lines** zone displays the details of the template lines. This zone contains the following columns:

Column Name	Column Description
Credit/Debit	Displays whether the template lines are of credit or debit.
Conditional Algorithm	Displays the algorithm that specified that template line is valid or not.
Distribution Code	Displays the distribution code which indicates the template associated with the charge.
User Defined Amount Field	Displays the amount to be used in a template line.

**Note:** By default, the **GL Accounting Template Lines** zone does not appear in the **GL Accounting Template** screen. It appears only when you click the **Broadcast**  icon corresponding to the template in the **Search Results** section.

## Searching for a GL Accounting Template

### Procedure

To search for a GL Accounting template:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **G** and then click **GL Accounting Template**.  
The **GL Accounting Template** screen appears.
3. Enter the search criteria in the **Search GL Accounting Template** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

4. Click **Search**.

A list of templates that meet the search criteria appears in the **Search Results** section.

## Creating a GL Accounting Template

### Prerequisites

To create a GL Accounting template, you should have:

- Conditional Algorithms and Distribution codes defined in the application.

### Procedure

To create a GL Accounting template:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **G** and then click **GL Accounting Template**.  
The **GL Accounting Template** screen appears.
3. Click the **Add** button in the **Page Title** area of the **GL Accounting Template** screen.

The **GL Accounting Template** screen appears. It contains the following sections:

- **Main** — Used to specify basic details about the template. This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Process	Used to specify a particular process.	Yes
Description	Used to indicate the description of a process.	Yes
Sub Process 1	Used to specify a Sub Process 1.	Yes (Conditional) <b>Note:</b> This field is required if <b>Process</b> is <b>Bill Segment or Payment Segment or Adjustments</b>
Sub Process 2	Used to specify a Sub Process 2.	Yes (Conditional) <b>Note:</b> This field is required if <b>Process</b> is <b>Bill Segment or Payment Segment or Adjustments</b>
Sub Process 3	Used to specify a Sub Process 3.	Yes (Conditional) <b>Note:</b> This field is required if <b>Process</b> is <b>Bill Segment or Payment Segment or Adjustments.</b>
Sub Process 4	Used to specify a Sub Process 4.	No
Sub Process 5	Used to specify a Sub Process 5.	No
Effective Start Date	Used to specify date for a template which is effective from a particular date.	Yes
Effective End Date	Used to specify date for a template which is effective till a particular date.	No

- **GL Accounting Template Lines** —Used to specify the template lines in a GL accounting template. This section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Sequence No	Used to specify the sequence number.	Yes
Credit/Debit	Used to indicate whether template lines are of credit or debit.	Yes
Conditional Algorithm	Used to specify the algorithm which specifies that template line is valid or not.	No
Distribution Code	Used to indicate the distribution code which indicates the template associated with the charge.	Yes
User Defined Amount Field	Used to indicate the amount to be used in a template line.	Yes

#### 4. Enter the required details

**Note:**

You can search for a conditional algorithm and distribution code by clicking the **search**  icon corresponding to the respective field.

At least one credit and one debit line is required while defining a template.

System will not allow to add a template having same set of process, sub processes and effective date. If there is a template already created and its status is Inactive, then only template can be created with same set of process, sub processes and effective date.

Each conditional line must have unique User Defined Amount Field value.

5. Add template lines for a template defined.
6. Click **Save**.

The GL Accounting template is created and the status of the template is set to **Draft**. The **GL Accounting Template** screen appears with the details of template.

**Viewing the GL Accounting Template Details****Procedure**

To view the details of a GL Accounting Template:

1. Search for the template in the **GL Accounting Template** screen.
2. In the **Search Results** section, click the link in the **GL Accounting Template Information** column corresponding to the template whose details you want to view.

The **GL Accounting Template** screen appears. It consists of the following tabs:

- **Main** – Displays information about the template. It contains the following zone:
  - **GL Accounting Template** – Displays the details of the template.
- **Log** – Lists the complete trail of actions performed on the template. This tab contains the following zone:
  - **GL Accounting Template Log** – Displays the trail of actions performed on the particular template.

3. View the details of the template in the **GL Accounting Template** zone.

**Related Topics**

How to view a GL Accounting Template Lines	<a href="#">Viewing the GL Accounting Template Lines Details</a> on page 1789

## Viewing the GL Accounting Template Lines Details

### **Procedure**

To view the details of a GL Accounting Template Lines:

1. Search for the template in the **GL Accounting Template** screen.
2. In the **Search Results** section, click the **Broadcast**  icon corresponding to the template in the **Search Results** section.

The **GL Accounting Template Lines** zone appears in the **GL Accounting Template** screen.

3. View the details of the template lines in the **GL Accounting Template Lines** zone.

### **Related Topics**

<b>GL Accounting Template</b> screen	<a href="#">GL Accounting Template (Used for Searching)</a> on page 1783
<b>GL Accounting Template</b> zone	<a href="#">GL Accounting Template</a> on page 1789
<b>GL Accounting Template Lines</b> zone	<a href="#">GL Accounting Template Lines</a> on page 1785

## GL Accounting Template (Used for Viewing)

Once you create a template, the **GL Accounting Template** screen allows you to:

- View the details of a template
- Edit the details of a template
- Delete a template
- Submit a template for approval
- Approve or reject a template
- Deactivate a template

This screen consists of the following tabs:

- **Main** – Displays information about the template. It contains the following zone:
  - **GL Accounting Template** – Displays the details of the template.
- **Log** — Lists the complete trail of actions performed on the template. This tab contains the following zone:
  - **GL Accounting Template Log** – Displays the trail of actions performed on the particular template.

### **GL Accounting Template - Main**

The **Main** tab on the **GL Accounting Template** contains the following zone:

[GL Accounting Template](#) on page 1789

#### **GL Accounting Template**

The **GL Accounting Template** zone displays the details of the template. This zone contains the following sections:

- **Main** — This section provides basic information about the GL Accounting template. It contains the following fields:

Field Name	Field Description
GL Accounting Template Information	Displays information about the template
Status	Indicates the status of the template.
Process	Displays the process.
Description	Displays the description of the process.
Sub Process 1	Displays the Sub Process 1.
Sub Process 2	Displays the Sub Process 2.
Sub Process 3	Displays the Sub Process 3.
Sub Process 4	Displays the Sub Process 4.
Sub Process 5	Displays the Sub Process 5.
Effective Start Date	Displays the date from when the template is effective.
Effective End Date	Displays the date till when the template is effective.

- **GL Accounting Template Lines** — Lists the GL Accounting template lines. It contains the following columns:

Column Name	Column Description
Sequence No	Displays the sequence number.
Credit/Debit	Displays whether the template lines are of credit or debit.
Conditional Algorithm	Displays the algorithm that specified that template line is valid or not.
Distribution Code	Displays the distribution code which indicates the template associated with the charge.
User Defined Amount Field	Displays the amount to be used in a template line.

- **Record Actions** — This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the template. <b>Note:</b> The <b>Edit</b> button appears only when the template is in the <b>Draft</b> or <b>Rejected</b> status.
Delete	Used to delete the template. <b>Note:</b> The <b>Delete</b> button appears only when the template is in the <b>Draft</b> or <b>Rejected</b> status.
Submit	Used to activate the template. <b>Note:</b> The <b>Submit</b> button appears only when the template is in the <b>Draft</b> or <b>Rejected</b> status.

Button Name	Button Description
Approve	Used to approve the template. <b>Note:</b> the <b>Approve</b> button appears only when the template is in the <b>Approval In Progress</b> or <b>Deactivation Approval In Progress</b> status.
Reject	Used to reject the template. <b>Note:</b> the <b>Reject</b> button appears only when the template is in the <b>Approval In Progress</b> or <b>Deactivation Approval In Progress</b> status.
Deactivate	Used to deactivate the active template. <b>Note:</b> The <b>Deactivate</b> button appears only when the template is in the <b>Active</b> status.

- **Record Information** — This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the template is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.

## GL Accounting Template - Log

The **Log** tab on the **GL Accounting Template** screen contains the following zone:

[GL Accounting Template Log](#) on page 1791

### GL Accounting Template Log

The **GL Accounting Template Log** zone on the **GL Accounting Template** screen lists the complete trail of actions performed on the GL Accounting template. This zone contains the following columns:

Column Name	Column Description
Date/Time	Displays the date and time when the action was performed on the template.
Details	Displays the details about the action performed on the template.
User	Indicates the user who has performed the action on the template.
Log Type	Indicates the type of log.
Related Object	Indicates the object or entity which is generated when the action is performed on the template.
Status Reason	Displays the status reason of action performed on the template.

**Note:** You can manually add a log entry for the template by clicking the **Add Log Entry** link in the upper right corner of the **GL Accounting Template Log** zone.

The **Add GL Accounting Template Log** window appears. Enter **Log Details** and click **Save**. The GL Accounting Template log is added.

**Related Topics**

For more information on...	See...
How to view the log of a GL Accounting Template	<a href="#">Viewing the Log of a GL Accounting Template</a> on page 1799

**Editing a GL Accounting Template****Procedure**

To edit a GL Accounting Template:

1. Search for the template in the **GL Accounting Template** screen.
2. In the **Search Results** section, click the link in the **GL Accounting Template Information** column corresponding to the template whose details you want to edit.

The **GL Accounting Template** screen for editing appears.

3. Click the **Edit** button in the **GL Accounting Template** zone.

**Note:** The **Edit** button appears only when the template is in the **Draft** or **Rejected** status.

The **GL Accounting Template** screen appears. It contains the following sections:

- **Main** — Used to specify basic details about the template. This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Process	Used to specify a particular process.	Yes
Description	Used to indicate the description of a process.	Yes
Sub Process 1	Used to specify a Sub Process 1.	Yes (Conditional) <b>Note:</b> This field is required if <b>Process</b> is <b>Bill Segment</b> or <b>Payment Segment</b> or <b>Adjustments</b>
Sub Process 2	Used to specify a Sub Process 2.	Yes (Conditional) <b>Note:</b> This field is required if <b>Process</b> is <b>Bill Segment</b> or <b>Payment Segment</b> or <b>Adjustments</b>
Sub Process 3	Used to specify a Sub Process 3.	Yes (Conditional) <b>Note:</b> This field is required if <b>Process</b> is <b>Bill Segment</b> or <b>Payment Segment</b> or <b>Adjustments</b> .
Sub Process 4	Used to specify a Sub Process 4.	No
Sub Process 5	Used to specify a Sub Process 5.	No
Effective Start Date	Used to specify date for a template which is effective from a particular date.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Effective End Date	Used to specify date for a template which is effective till a particular date.	No

- **GL Accounting Template Lines** — Used to specify the template lines in a GL accounting template. This section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Sequence No	Used to specify the sequence number.	Yes
Credit/Debit	Used to indicate whether template lines are of credit or debit.	Yes
Conditional Algorithm	Used to specify the algorithm which specifies that template line is valid or not.	No
Distribution Code	Used to indicate the distribution code which indicates the template associated with the charge.	Yes
User Defined Amount Field	Used to indicate the amount to be used in a template line.	Yes

**Note:**

If you want to specify more than one template lines, click the **Add** (+) icon corresponding to the sequence No and then specify the details.

However, if you want to remove a template line from the template, click the **Delete** (🗑️) icon corresponding to the sequence No.

You can search for a conditional algorithm and distribution code by clicking the **search** (🔍) icon corresponding to the respective field.

At least one credit and one debit line is required while defining a template.

4. Modify the details of the template, if required.
5. Click **Save**.

The changes made to the GL Accounting template are saved.

<b>GL Accounting Template</b> zone	<a href="#">GL Accounting Template</a> on page 1789

## **Deleting a GL Accounting Template**

### **Procedure**

To delete a GL Accounting Template:

1. Search for the template in the **GL Accounting Template** screen.
2. In the **Search Results** section, click the link in the **GL Accounting Template Information** column corresponding to the template that you want to delete.

The **GL Accounting Template** screen appears.

3. Click the **Delete** button in the **GL Accounting Template** zone.

A message appears confirming whether you want to delete the template.

**Note:** The **Delete** button appears only when the template is in the **Draft** or **Rejected** status.

4. Click **OK**.

The GL Accounting template is deleted.

**Note:**

You can delete a template only when its status is **Draft**.

### **Related Topics**

## **Submitting a GL Accounting Template**

### **Prerequisites**

To submit a GL Accounting Template, you should have:

- Process and GL Accounting template lines defined in the template.

### **Procedure**

To submit a GL Accounting Template:

1. Search for the template in the **GL Accounting Template** screen.
2. In the **Search Results** section, click the link in the **GL Accounting Template Information** column corresponding to the template that you want to submit.

The **GL Accounting Template** screen appears.

3. Click the **Submit** button in the **GL Accounting Template** zone.

The system behaves in the following manner:

If...	Then...
Approval Required Flag is set to Yes in the <b>C1-GLATSUB</b> algorithm.	A To Do of the <b>C1-GLAT</b> To Do type is created and sent to the approver and the status of the template is changed to <b>Approval In Progress</b> .
Approval Required Flag is set to No in the <b>C1-GLATSUB</b> algorithm.	The template is created using the specified process and the status of the template is changed to <b>Active</b> .

**Note:**

The **Submit** button appears only when the template is in the **Draft** or **Rejected** status.

**Related Topics**

For more information on...	See...
How to search for a GL Accounting Template	<a href="#">Searching for a GL Accounting Template</a> on page 1786

**Approving a GL Accounting Template**

You can view the number of GL Accounting templates which are pending for approval in the **GL Accounting Template** screen. The approver can review, and accordingly approve or reject the template based on the observations.

**Note:** The system will not allow you to approve or reject a template submitted by you.

**Procedure**

To approve a template:

1. Do either of the following:

If you want to...	Then...
Approve a GL Accounting Template through the <b>GL Accounting template</b> screen	<ol style="list-style-type: none"> <li>1. Search for the template in the <b>GL Accounting template</b> screen.</li> <li>2. In the <b>Search Results</b> section, click the link in the <b>GL Accounting Template Information</b> column corresponding to the template which you want to review.</li> </ol>
Approve a GL Accounting Template from the <b>To Do List</b> screen	<ol style="list-style-type: none"> <li>1. Click the <b>Menu</b> link in the <b>Application</b> toolbar. A list appears.</li> <li>2. From the <b>Main</b> menu, select <b>To Do</b> and then click <b>To Do List</b>. The <b>To Do Type for User Search</b> window appears.</li> <li>3. Enter <b>C1-GLAT</b> in the <b>To Do Type</b> field.</li> <li>4. Click the <b>Search</b> button corresponding to the <b>To Do Type</b> field. The <b>To Do List</b> screen appears.</li> </ol>

If you want to...	Then...
	<ol style="list-style-type: none"> <li>5. Select the <b>Open</b> option from the <b>Filter by</b> list to view all unassigned To Dos.</li> <li>6. Click the link in the <b>Message</b> column corresponding to the To Do of the GL Accounting template that you want to review.</li> </ol>

The **GL Accounting Template** screen appears.

2. Review the template details.
3. Click the **Approve** button in the **GL Accounting Template** zone.

The system behaves in the following manner:

If you are...	Then...
Approving a GL Accounting template	The status of the template is changed to <b>Active</b> as specified in the GL Accounting template.

**Note:** The **Approve** button appears only when the template is in the **Approval In Progress** or **Deactivation Approval In Progress** status.

### **Related Topics**

## **Rejecting a GL Accounting Template**

### **Prerequisites**

To reject a GL Accounting template, you should have:

- Rejection reasons defined in the application

### **Note:**

While rejecting a GL Accounting template, you need to specify the reason why you want to reject the template. You can select the appropriate rejection reason only when you have defined the reasons for the **Rejected** status of the **C1-GLAT** business object in the **Status Reason** screen.

The system will not allow you to approve or reject a template submitted by you.

### **Procedure**

To reject a GL Accounting template

1. Do either of the following:

If you want to	Then
Reject a GL Accounting template through the <b>GL Accounting Template</b> screen	<ol style="list-style-type: none"> <li>1. Search for the template in the <b>GL Accounting Template</b> screen.</li> <li>2. In the <b>Search Results</b> section, click the link in the <b>GL Accounting Template Information</b> column corresponding to the template which you want to review.</li> </ol>
Reject a GL Accounting template from the <b>To Do List</b> screen	<ol style="list-style-type: none"> <li>1. Click the <b>Menu</b> link in the <b>Application</b> toolbar. A list appears.</li> <li>2. From the <b>Main</b> menu, select <b>To Do</b> and then click <b>To Do List</b>. The <b>To Do Type for User Search</b> window appears.</li> <li>3. Enter <b>C1-GLAT</b> in the <b>To Do Type</b> field.</li> <li>4. Click the <b>Search</b> button corresponding to the <b>To Do Type</b> field. The <b>To Do List</b> screen appears.</li> <li>5. Select the <b>Open</b> option from the <b>Filter by</b> list to view all unassigned To Dos.</li> <li>6. Click the link in the <b>Message</b> column corresponding to the To Do of the template that you want to review.</li> </ol>

The **GL Accounting Template** screen appears.

2. Review the template details.
3. Click the **Reject** button in the **GL Accounting Template** zone.

The **Reject GLAT Request** window appears. It contains following fields:

Field Name	Field Description	Mandatory (Yes or No)
Status Reason	Used to indicate the reason why you want to reject the template	Yes
Comments	Used to specify additional information while rejecting the template.	No

**Note:** The **Reject** button appears only when:

- The template is in the **Approval In Progress** or **Deactivation Approval In Progress** status.
- A user with the approval To Do role is reviewing the template.

4. Select the rejection reason from the **Status Reason** list.
5. Click **Save**.

The status of the template is changed to **Rejected**.

## Deactivating a GL Accounting Template

### Prerequisites

To deactivate a GL Accounting template, you should have:

- Deactivation reasons defined in the application.

### **Note:**

While deactivating a GL Accounting template, you need to specify the reason why you want to deactivate the template. You can select the appropriate deactivation reason only when you have defined the reasons for the deactivation status of the **C1-GLAT** business object in the **Status Reason** screen.

### Procedure

To deactivate a GL Accounting template:

1. Search for the template in the **GL Accounting Template** screen.
2. In the **Search Results** section, click the link in the **GL Accounting Template Information** column corresponding to the template that you want to deactivate.

The **GL Accounting Template** screen appears.

3. Click the **Deactivate** button in the **GL Accounting Template** zone.

**Note:** The **Deactivate** button appears only when the template is in the **Active** status.

The **Deactivate GLAT Request** window appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Status Reason	Used to indicate the reason for deactivating a template	Yes
Comments	Used to specify the additional comments on the deactivation of template.	No

4. Click **OK**.

The GL Accounting template status is changed to **Deactivation Approval In Progress**.

## Viewing the Log of a GL Accounting Template

### Procedure

To view the log of a GL Accounting template:

1. Search for the template in the **GL Accounting template** screen.
2. In the **Search Results** section, click the link in the **GL Accounting Template Information** column corresponding to the template whose log you want to view.

The **GL Accounting Template** screen appears. It consists of the following tabs:

- **Main** – Displays information about the template. It contains the following zone:
  - **GL Accounting Template** – Displays the details of the template.
- **Log** – Lists the complete trail of actions performed on the template. This tab contains the following zone:
  - **GL Accounting Template Log** – Displays the trail of actions performed on the particular template.

3. Click the **Log** tab.

The **GL Accounting Template Log** zone in the **Log** tab contains the following columns:

Column Name	Column Description
Date/Time	Displays the date and time when the action was performed on the template.
Details	Displays the details about the action performed on the template.
User	Indicates the user who has performed the action on the template.
Log Type	Indicates the type of log.
Related Object	Indicates the object or entity which is generated when the action is performed on the template.
Status Reason	Indicates the reason why the template was rejected or voided.

**Note:** You can manually add a log entry for the template by clicking the **Add Log Entry** link in the upper right corner of the **GL Accounting Template Log** zone.

### Related Topics

## Adding a Log Entry for a GL Accounting Template

### Procedure

To add a log entry for a GL Accounting Template:

1. Search for the template in the **GL Accounting Template** screen.
2. In the **Search Results** section, click the link in the **GL Accounting Template Information** column corresponding to the template whose log you want to edit.

The **GL Accounting Template** screen appears. It consists of the following tabs:

- **Main** – Displays information about the template. It contains the following zone:
  - **GL Accounting Template** – Displays the details of the template.
- **Log** – Lists the complete trail of actions performed on the template. This tab contains the following zone:
  - **GL Accounting Template Log** – Displays the trail of actions performed on the particular template.

3. Click the **Log** tab.

The **Log** tab appears.

4. Click the **Add Log Entry** link in the upper right corner of the **GL Accounting Template Log** zone.

The **Add GL Accounting Template Log** window appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
GL Accounting Template Information	Displays information about the template.	Not applicable
Log Details	Used to specify additional comments on the template.	Yes

5. Enter the comments in the **Log Details** field.
6. Click **Save**.

The log entry is added in the **GL Accounting Template Log** zone.

- [Accrual Type \(Used for Viewing\)](#)
- [Accrual \(Used for Searching\)](#)
- [Accrual \(Used for Viewing\)](#)

Oracle Revenue Management and Billing enables you to calculate and create accrual for accounts. An accrual allows an entity to record expenses and revenues for which it expects to expend cash or receive cash, respectively, in a future reporting period.

The accrual is an adjustment which is created for the following:

- Revenues that have been earned but are not yet recorded in the books of accounts.
- Expenses that have been incurred but are not yet recorded in the book of accounts.

The system also enables you to reverse the accrual for accounts. You need to define whether the accounts belonging to a division are eligible for accrual or not. If a division is eligible for accrual, by default, all accounts belonging to the division are eligible for accrual. However, you can exclude an account from accrual, if required. To enable the accruals feature, you need to define the following:

- **Accrual Cycle** – You must specify the following information in the accrual cycle:
  - Dates when accrual should be calculated and created for the accounts where the accrual cycle is defined.
  - Accrual reversal period for each accrual date.

If a division is eligible for accrual, you need to specify the accrual cycle for the division. By default, all accounts belonging to a division will inherit the accrual cycle of the division. However, you can override the accrual cycle of an account

- **Accrual Type** – You must specify the following information in the accrual type:
  - Type of the accrual object that you want to create for posting the accrual amount. At present, the product enables you to create adjustments to record accruals for accounts in the system.
  - Whether you want to calculate the accrual based on the historical or actual data. If you want to calculate the accrual based on the historical data, you need to specify the number of historical bills that you want to consider for accrual calculation. The system will only consider the completed historical bills during accrual calculation. Besides specifying the historical bill count, you also need to specify the type of day (i.e. Business Day or Calendar Day) which is used to calculate the accrual amount. However, if you want to calculate the accrual based on the actual data, you need to specify whether trial bill or unbilled pass through billable charges

created through the Transaction Feed Management process should be considered to calculate the accrual amount.

- Whether you want to calculate accrual at the bill or bill segment level.
- Cancel reason that you want to use while reversing the accrual
- Algorithms that you want to use during the accrual calculation, creation, and reversal
- Whether any objects, such as adjustments created using a particular adjustment type, bill segments created for a particular price item, or adjustments' or bill segments' financial transactions where a particular distribution code is used, must be excluded during the accrual calculation.
- Divisions to which you want to associate the accrual type.

The accrual process includes the following sub-processes:

- **Accrual Calculation** – In this process, accounts that are eligible for accrual will have its accrual amount calculated on the basis of the accrual type configuration.
- **Accrual Creation** – In this process, on the basis of the calculated accrual amount and information configured on the accrual type, the accrual adjustment will be created.
- **Accrual Reversal** – In this process, reversal of accrual adjustments will be done to prevent double posting of revenue, once billing is done. On the basis of the accrual reversal schedule, an account with accrual adjustments will be selected for accrual reversal processing. For every frozen adjustment, a cancellation is done in order to reverse journal entries.

During the accrual process, an accrual goes through various statuses in its lifecycle. You can execute accrual process either using user interface (UI), or batch. For more information about the accrual statuses, see, [Accrual Created through UI \(Without Approval\) Status Transition](#) on page 1803 [Accrual Created through UI \(With Approval\) Status Transition](#) on page 1803 [Accrual Created through Batch \(Without Approval\) Status Transition](#) on page 1804 and [Accrual Created through Batch \(With Approval\) Status Transition](#) on page 1805

Note that the lifecycle of an accrual is driven by the business object using which the accrual is created. An accrual business object named **C1\_ACCRUALS** is shipped with the product. The accrual feature explained in this document is articulated based on the lifecycle and logic defined in the **C1\_ACCRUALS** business object.

## Accrual Created through UI (Without Approval) Status Transition

---

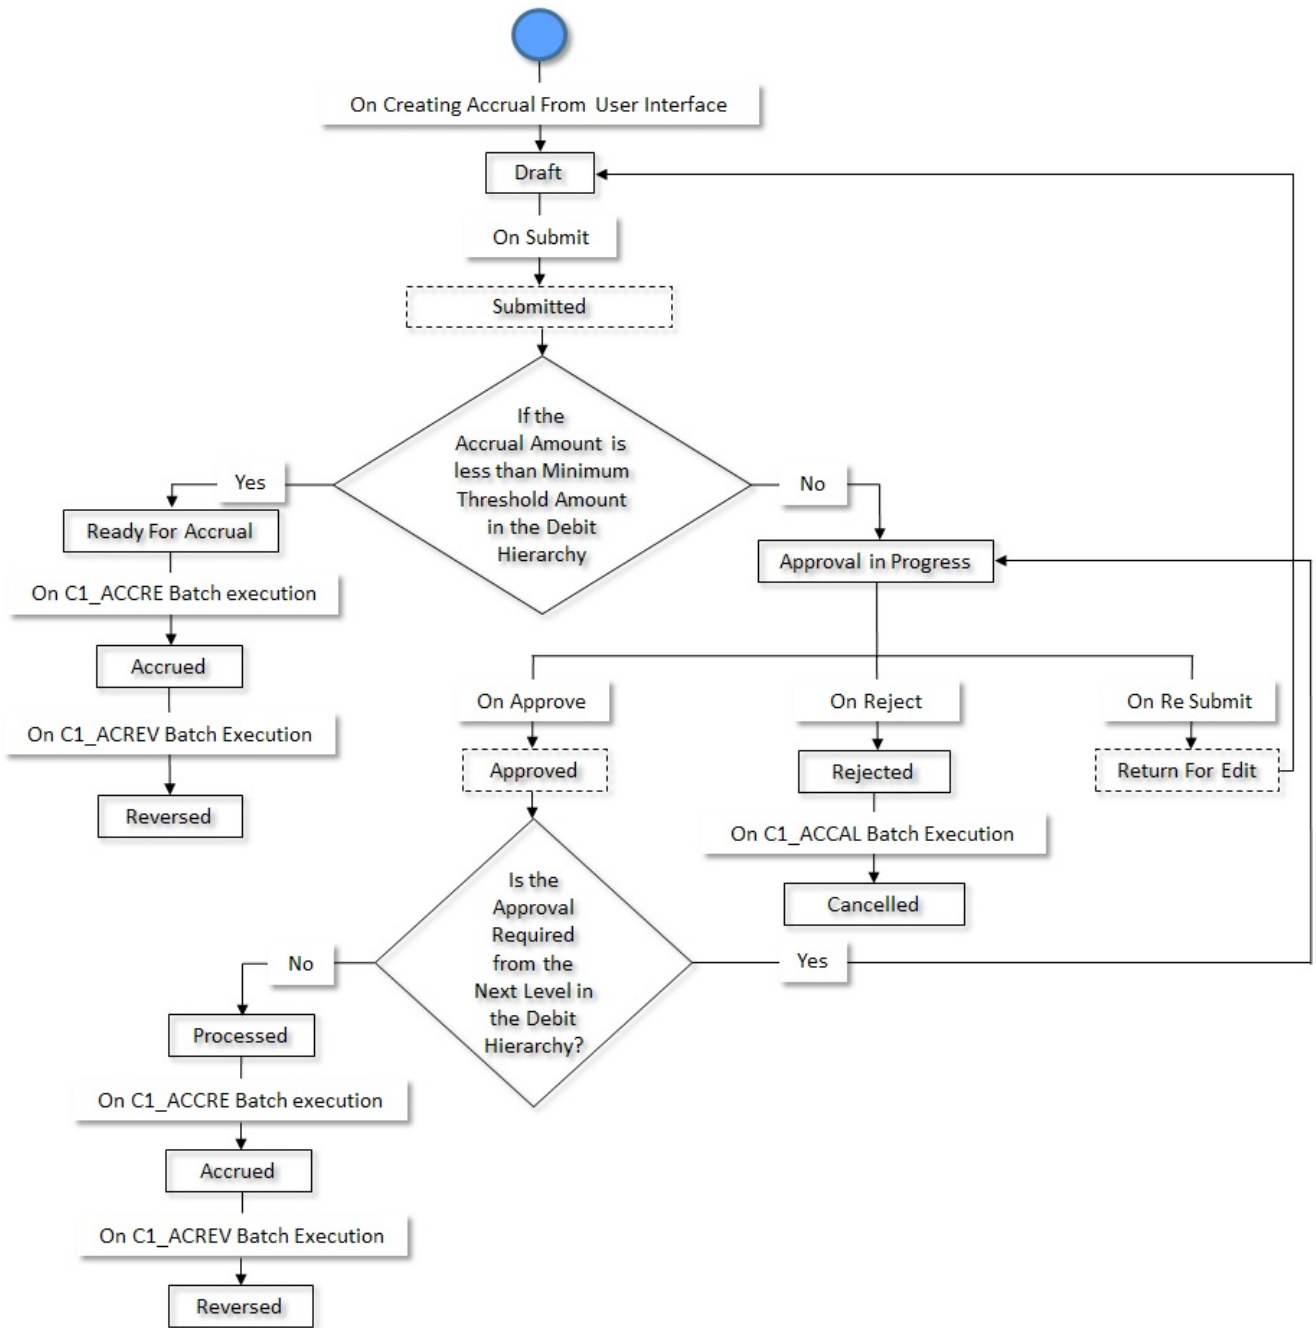

The following figure graphically indicates how an accrual created from the user interface moves from one status to another when approval workflow is off:

## Accrual Created through UI (With Approval) Status Transition

---

The following figure graphically indicates how an accrual created from the user interface moves from one status to another when the approval workflow is on:

## Accrual Created through Batch (Without Approval) Status Transition

The following figure graphically indicates how an accrual created through the batch moves from one status to another when the approval workflow is off:

**Note:** For more information about the batches, refer *Oracle Revenue Management and Billing Batch Guide*.

## Accrual Created through Batch (With Approval) Status Transition

The following figure graphically indicates how an accrual created through the batch moves from one status to another when the approval workflow is on:

**Note:** For more information about the batches, refer *Oracle Revenue Management and Billing Batch Guide*.

## Accrual Processes

An accrual allows an entity to record expenses and revenues for which it expects to expend cash or receive cash, respectively, in a future reporting period. Following are the accrual processes to implement accrual in the application:

- [Account's Eligibility Check for Accrual](#) on page 1807
- [Accrual Calculation](#) on page 1807
- [Accrual Creation](#) on page 1808
- [Accrual Reversal](#) on page 1809

## Account's Eligibility Check for Accrual

The accrual eligibility process checks a number of account attributes to ensure that the accounts are eligible for accrual. The following table lists the internal process that identifies an account's eligibility for accrual. There will be a switch/indicator in the division and account levels that captures the information as given below:

Division Accrual (Yes/No)	Account Accrual (Yes/No)	Eligibility for Accrual (Yes/No)	Description
Yes	No	No	Account has the highest priority over division.
Yes	Blank	Yes	Division has the highest priority in the absence of account information.
Yes	Yes	Yes	Account has the highest priority over division.
No	Yes	No	If the division is set to no, ignore the account level switch.
No	No	No	If the division is set to no, ignore the account level switch.
No	Blank	No	If the division is set to no, ignore the account level switch.

Following accounts are considered for accrual eligibility:

1. The Invoicing Group's (IG) Master Account is the only account which is eligible for accrual.
2. The Invoice Construct Usage Account is not eligible for accrual.
3. You can only process the accrual eligible accounts for calculation purposes.

## Accrual Calculation

The accrual calculation process calculates the accrual amount of only those accounts that are eligible for accrual. Depending upon the accrual type of those eligible accounts, an algorithm is created to calculate the accrual amount that is based on the following parameters:

- [Calculate Accrual at the Bill Level Based on Historical Data](#) on page 1807
- [Calculate Accrual at the Bill Segment Level Based on Historical Data](#) on page 1808
- [Calculate Accrual at the Bill Level Based on Actual Data](#) on page 1808
- [Calculate Accrual at the Bill Segment Level Based on Actual Data](#) on page 1808

**Note:** By default, all the adjustments (for bill level and bill segment level) are included in the accrual calculation. However, some adjustments from the calculation lines are excluded, through the look up references provided in the application.

### Calculate Accrual at the Bill Level Based on Historical Data

The accounts eligible for accrual have their accrual amount calculated at the bill level based on the historical data. The number of historical bills to be considered for accrual calculation is based on the value configured in the accrual type of the eligible account.

For example, if there are two historical bills, the system considers the last two completed bills for accrual calculation. The accrual amount is the average of the bill segments and frozen adjustments on the last two bills. If the option from the Type of Day field is set as Business Day, the system does not consider the weekends and holidays during the accrual calculation. However, if the option from the Type of Day field is set as Calendar Day, the system considers the weekends and holidays during the accrual calculation.

### Calculate Accrual at the Bill Segment Level Based on Historical Data

The accounts eligible for accrual have their accrual amount calculated at the bill segment level based on the historical data. The number of historical bills to be considered for accrual calculation is based on the value configured in the accrual type of the eligible account.

For example, if there are two historical bills, then the system considers the last two completed bills for accrual calculation. The accrual amount is the average of bill segments on the last two bills. If the option from the Type of Day field is set as Business Day, the system does not consider the weekends and holidays during the accrual calculation. However, if the option from the Type of Day is set as Calendar Day, the system considers the weekends and holidays during the accrual calculation.

### Calculate Accrual at the Bill Level Based on Actual Data

The accounts eligible for accrual have their accrual amount calculated at the bill level based on the actual data. The actual data can be sourced from a trial bill or rated Transaction Feed Management transaction. The accrual source to be considered is based on the value configured in the accrual type of the account.

Following scenarios indicate how the accrual amount is calculated:

- If the accrual source is transaction feed and accrual amount is calculated at bill level; the accrual amount is the sum of unbilled pass through billable charges created for the account either manually or automatically through the Transaction Feed Management process and frozen adjustments of the account.
- If the accrual source is transaction feed and accrual amount is calculated at bill segment level; the accrual amount is the sum of unbilled pass through billable charges created for the account automatically through the Transaction Feed Management process.

### Calculate Accrual at the Bill Segment Level Based on Actual Data

The accounts eligible for accrual have their accrual amount calculated at the bill segment level based on the actual data. The actual data can be sourced from a trial bill or rated Transaction Feed Management transaction. The accrual source to be considered is based on the value configured in the accrual type of the account.

Following scenarios indicate how the accrual amount is calculated:

- If the accrual source is trial bill and accrual amount is calculated at bill level; the accrual amount is the sum of bill segments and frozen adjustments on the latest trial bill.
- If the accrual source is trial bill and accrual amount is calculated at bill segment level; the accrual amount is the sum of bill segments on the latest trial bill.

## Accrual Creation

The accrual creation takes place based on the calculated accrual amount and accrual type information which is used to create an accrual adjustment. You can create the adjustments for accruals through the **C1\_ACCRE** batch process. The accruals which are either in the **Ready for Accrual** or **Processed** status are considered in this batch process. Based on the adjustment type defined in the accrual type, the system accordingly creates the accrual adjustment for the account. The status of the accrual is changed to **Accrued**.

#### Note:

For more information about the batch, refer to *Oracle Revenue Management and Billing Batch Guide*.

The system also enables you to manually create the accrual for an account. You can optionally configure the approval workflow process for accruals. The approval process is configured through the approval profile. The approval profile allows you to define the approval hierarchy. The debit approval hierarchy is used for approving the accrual. You can define an approval hierarchy where users with different To Do role at each level can approve or reject the accrual. This process continues till the approval is received from all levels in the hierarchy. Once users at all levels approve the accrual, the status of the accrual is changed to **Processed**. However, if an approver at any level in the hierarchy rejects the accrual, the status of the accrual is changed to **Rejected**.

## Accrual Reversal

The reversal of accrual adjustments is done to prevent double posting of revenue, once the billing is done. On the basis of the accrual reversal schedule, an account with accrual adjustments is selected for the accrual reversal processing. For every frozen adjustment, a cancellation is done in order to reverse journal entries.

You can reverse the accrual through the **C1\_ACREV** batch process. On reversing the accrual, the accrual adjustments are cancelled and the status of the accrual is changed to **Reversed**.

**Note:** For more information about the batch, refer to *Oracle Revenue Management and Billing Batch Guide*.

## Accrual Cycle (Used for Searching)

The **Accrual Cycle** screen allows you to search for an accrual cycle using various search criteria. It contains the following zone:

- [Search Accrual Cycle](#) on page 1809

## Search Accrual Cycle

The **Search Accrual Cycle** zone allows you to search an accrual cycle using various search criteria. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Accrual Cycle	Used to search a particular accrual cycle.	No
Description	Used to search an accrual cycle with a particular description.	No

**Note:** You should specify at least one search criterion while searching for an accrual cycle.

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Accrual Cycle	Displays the name of accrual cycle.
Accrual Cycle Information	Displays information about the accrual cycle.

**Note:** It has a link. On clicking the link, the **Accrual Cycle** screen appears where you can view the details of the respective accrual cycle.

### Related Topics

For more information on...	See...
How to search for an accrual cycle	<a href="#">Searching for an Accrual Cycle</a> on page 1810
How to view the accrual cycle information	<a href="#">Viewing the Accrual Cycle Details</a> on page 1810
How to define an accrual cycle	<a href="#">Defining an Accrual Cycle</a> on page 1811

## Searching for an Accrual Cycle

### Procedure

To search for an accrual cycle:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **A** and then click **Accrual Cycle**.  
The **Accrual Cycle** screen appears.
3. Enter the search criteria in the **Search Accrual Cycle** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

4. Click **Search**.

A list of accrual cycles that meet the search criteria appear in the **Search Results** section.

### Related Topics

For more information on...	See...
Accrual Cycle screen	<a href="#">Accrual Cycle (Used for Viewing)</a> on page 1812
Accrual Cycle zone	<a href="#">Accrual Cycle</a> on page 1812

## Viewing the Accrual Cycle Details

### Procedure

To view the details of an accrual cycle:

1. Search for an accrual cycle in the **Accrual Cycle** screen.
2. In the **Search Results** section, click the link in the **Accrual Cycle Information** column corresponding to the accrual cycle whose details you want to view.

The **Accrual Cycle** screen appears. It consists of the following tab:

- **Main** – Displays information about the accrual cycle. It contains the following zone:
  - **Accrual Cycle** – Displays the details of the accrual cycle.

3. View the details of the accrual cycle in the **Accrual Cycle** zone.

### Related Topics

## Defining an Accrual Cycle

### Prerequisites

To define an accrual cycle, you should have:

- Accrual business object defined in the application.

### Procedure

To define an accrual cycle:

1. Click the **Admin** link in the **Application** toolbar.

A list appears.

2. From the **Admin** menu, select **A** and then click **Accrual Cycle**.

The **Accrual Cycle** screen appears.

3. Click the **Add** button in the **Page Title** area of the **Accrual Cycle** screen.

The **Accrual Cycle** screen appears. It contains the following sections:

- **Main** – Used to specify basic details about the accrual cycle. This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Accrual Cycle	Used to specify the name for an accrual cycle.	Yes
Description	Used to specify the description for an accrual cycle.	Yes

- **Schedule Periods** – Used to specify the schedule period for an accrual cycle.

4. Enter the required details in the **Main** section.
5. Define the schedule periods for an accrual cycle.
6. Click **Save**.

The accrual cycle is defined.

### Related Topics

How to add a schedule period in an accrual cycle	<a href="#">Adding a Schedule Period in an Accrual Cycle</a> on page 1811

## Adding a Schedule Period in an Accrual Cycle

### Procedure

To add a schedule period in an accrual cycle, you should have:

1. Click the **Admin** link in the **Application** toolbar.

A list appears.

2. From the **Admin** menu, select **A** and then click **Accrual Cycle**.

The **Accrual Cycle** screen appears.

- Ensure that the **Schedule Periods** section is expanded when you are adding a schedule period in an accrual cycle.

The **Schedule Periods** section contains the following fields:

Column Name	Column Description	Mandatory (Yes or No)
Accrual Date	Used to indicate the date from when the accrual creation process for an applicable account is initiated.	Yes
Reversal Start Date	Used to indicate the date from when the accrual reversal process starts.  <b>Note:</b> The <b>Reversal Start Date</b> must be later than the <b>Accrual Date</b> .	Yes
Reversal End Date	Used to indicate the date till when the accrual reversal process ends.  <b>Note:</b> The <b>Reversal End Date</b> cannot be earlier than the reversal start date	Yes

- Enter the required details in the **Schedule Periods** section.
- If you want to define more than one schedule period for an accrual type, click the **Add** (+) icon and then repeat step 4.

**Note:** However, if you want to remove a schedule period from an accrual type, click the **Delete** (🗑️) icon corresponding to the **Accrual Date** field.

- Click **Save**.

The schedule periods are defined for an accrual cycle.

### Related Topics

How to define an accrual cycle	<a href="#">Defining an Accrual Cycle</a> on page 1811
How to edit an accrual cycle	<a href="#">Editing an Accrual Cycle</a> on page 1813

## Accrual Cycle (Used for Viewing)

Once you create an accrual cycle, the **Accrual Cycle** screen allows you to:

- View the details of an accrual cycle
- Edit an accrual cycle
- Delete an accrual cycle

This screen contains the following zone:

- [Accrual Cycle](#) on page 1812

### Accrual Cycle

The **Accrual Cycle** zone displays the details of an accrual cycle. This zone contains the following sections:

- **Main** – Displays basic information about an accrual cycle. It contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Accrual Cycle	Displays the name of the accrual cycle.	No
Description	Used to search an accrual cycle with a particular description.	No

- **Schedule Periods** – This section contains the following columns:

Column Name	Column Description
Accrual Date	Displays the date on which the accrual creation process for an applicable account is initiated.
Reversal Start Date	Displays the date from when the accrual reversal process starts.
Reversal End Date	Displays the date till when the accrual reversal process ends.

- **Record Actions** – This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of an accrual cycle.
Delete	Used to delete an accrual cycle.

- **Record Information** – This section contains the following field:

Field Name	Field Description
Business Object	Indicates the business object using which an accrual cycle is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.

### Related Topics

How to define an accrual cycle	<a href="#">Adding an Accrual</a>

## Editing an Accrual Cycle

### Procedure

To edit an accrual cycle:

1. Search for the accrual cycle in the **Accrual Cycle** screen.
2. In the **Search Results** section, click the link in the **Accrual Cycle Information** column corresponding to the accrual cycle whose details you want to edit.

The **Accrual Cycle** screen appears.

3. Click the **Edit** button in the **Accrual Cycle** zone.

The **Accrual Cycle** screen appears. It contains the following section:

- **Main** – Used to specify basic details about the accrual cycle. This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Accrual Cycle	Used to specify the name for accrual cycle.	Yes
Description	Used to specify the description about an accrual cycle.	Yes

- **Schedule Periods** – Used to specify the schedule period for an accrual cycle. This section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Accrual Date	Used to indicate the date from when the accrual creation process for an applicable account is initiated.	Yes
Reversal Start Date	Used to indicate the date from when the accrual reversal process starts.  <b>Note:</b> The <b>Reversal Start Date</b> must be later than the <b>Accrual Date</b> .	Yes
Reversal End Date	Used to indicate the date till when the accrual reversal process ends.  <b>Note:</b> The <b>Reversal End Date</b> must be later than the <b>Reversal Start Date</b> .	Yes

**Note:** If you want to associate more than one schedule period to the accrual type, click the **Add** (+) icon and then specify the details. However, if you want to remove a schedule period from the accrual type, click the **Delete** (🗑️) icon corresponding to the **Accrual Date** field.

4. Modify the description of the accrual cycle in the **Main** section.
5. Add, edit, or remove the schedule period information in the accrual cycle.
6. Click **Save**.

The changes made to the accrual cycle are saved.

<b>Accrual Cycle</b> zone	<a href="#">Accrual Cycle</a> on page 1812

## **Deleting an Accrual Cycle**

### **Procedure**

To delete an accrual cycle:

1. Search for the accrual cycle in the **Accrual Cycle** screen.
2. In the **Search Results** section, click the link in the **Accrual Cycle Information** column corresponding to the accrual cycle that you want to delete.

The **Accrual Cycle** screen appears.

3. Click the **Delete** button in the **Accrual Cycle** zone.

A message appears confirming whether you want to delete the accrual cycle.

4. Click **OK**.

The accrual cycle is deleted.

## Accrual Type (Used for Searching)

The **Accrual Type** screen allows you to search for an accrual type using various search criteria. It contains the following zone:

- [Search Accrual Type](#) on page 1815

### Search Accrual Type

The **Search Accrual Type** zone allows you to search an accrual type using various search criteria. It contains the following two sections:

- **Search Criteria** – The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Accrual Type	Used to search a particular accrual type.	No
Description	Used to search an accrual type with a particular description.	No
Accrual Criteria	Used to indicate the accrual criteria on the basis of which accrual will be calculated. The valid values are: <ul style="list-style-type: none"> <li>• Actual</li> <li>• Historical</li> </ul>	No
Posting Method	Used to indicate the posting method on the basis of which accrual will be calculated. The valid values are: <ul style="list-style-type: none"> <li>• Bill Level</li> <li>• Bill Segment Level</li> </ul>	No

**Note:** You must provide at least one search criterion while searching for an accrual type.

- **Search Results** – On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Accrual Type	Displays the accrual type.
Accrual Type Information	Displays information about the accrual type. <b>Note:</b> It has a link. On clicking the link, the <b>Accrual Type</b> screen appears where you can view the details of the respective accrual type.
Accrual Criteria	Indicates the accrual criteria used for the accrual calculation.
Posting Method	Indicates the posting method used for the accrual calculation.
Type of Day	Indicates the type of day which is used as reference while calculating the accrual based on the historical data.

## Searching for an Accrual Type

### Procedure

To search for an accrual type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **A** and then click **Accrual Type**.  
The **Accrual Type** screen appears.
3. Enter the search criteria in the **Search Accrual Type** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

4. Click **Search**.  
A list of accrual types that meet the search criteria appears in the **Search Results** section.

## Viewing the Accrual Type Details

### Procedure

To view the details of an accrual type:

1. Search for an accrual type in the **Accrual Type** screen.
2. In the **Search Results** section, click the link in the **Accrual Type Information** column corresponding to the accrual type whose details you want to view.

The **Accrual Type** screen appears. It contains the following tab:

- **Main** – Displays information about the accrual type. It contains the following zone:
  - [Accrual Type](#) on page 1826

3. View the details of the accrual type in the **Accrual Type** zone.

### Related Topics

For more information on...	See...

## Defining an Accrual Type

### Prerequisites

To define an accrual type, you should have:

- Accrual Type business object defined in the application.
- Accrual business object defined in the application.
- Adjustment Types defined in the application (where the **Print by Default** and **Influence Next Bill Balance** checkbox is not selected).

### Procedure

To define an accrual type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **A** and then click **Accrual Type**.  
The **Accrual Type** screen appears.
3. Click the **Add** button in the **Page Title** area of the **Accrual Type** screen.

The **Accrual Type** screen appears. It contains the following sections:

- **Main** – Used to specify basic details about the accrual type. This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Accrual Type	Used to specify the name for an accrual type.	Yes
Description	Used to specify the description for an accrual type.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Accrual Object	Used to indicate the type of the accrual object that you want to create for posting the accrual amount.  <b>Note:</b> At present, you can only create adjustments to record the accruals for the accounts in the application.	Yes
Adjustment Type	Used to indicate the adjustment type using which the adjustment must be created.  <b>Note:</b> This field appears only when you select the <b>Adjustment</b> option from the <b>Accrual Object</b> field.  The <b>Search</b>  icon appears corresponding to the <b>Adjustment Type</b> field. On clicking the <b>Search</b> icon, the <b>Adjustment Type Search</b> window appears.  On specifying the adjustment type, the description of the adjustment type appears corresponding to the <b>Adjustment Type</b> field.	No
Accrual Criteria	Used to indicate the accrual criteria that you want to use for accrual calculation. The valid values are: <ul style="list-style-type: none"> <li>• Actual</li> <li>• Historical</li> </ul>	Yes
Accrual Source	Used to indicate the source of data that you want to use for calculating the accruals that are based on the actual data. The valid values are: <ul style="list-style-type: none"> <li>• Transaction Feed</li> <li>• Trial Bill</li> </ul> <b>Note:</b> This field appears only when you select the <b>Actual</b> option from the <b>Accrual Criteria</b> field.	Yes (Conditional)  <b>Note:</b> This field is required if you select the <b>Actual</b> option from the <b>Accrual Criteria</b> field.
Historical Bill Count	Used to specify the number of historical bills that you want to consider for accrual calculation.  <b>Note:</b> This field appears only when you select the <b>Historical</b> option from the <b>Accrual Criteria</b> field.	Yes (Conditional)  <b>Note:</b> This field is required if you select the <b>Historical</b> option from the <b>Accrual Criteria</b> field.

Field Name	Field Description	Mandatory (Yes or No)
Accrual Request Business Object	<p>Used to indicate the business object that you want to use while creating the accrual request.</p> <p><b>Note:</b></p> <p>The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Business Object Search</b> window appears.</p> <p>On specifying the business object, the description of the business object appears corresponding to the <b>Accrual Request Business Object</b> field.</p>	No
Approval Required	Used to indicate whether approval is required for creating the accrual requests using the accrual type.	No
Approval Profile	<p>Used to indicate the approval profile which must be used to define the approval hierarchy for the accrual type.</p> <p><b>Note:</b> This field appears only when <b>Approval Required</b> checkbox is selected.</p>	Yes (Conditional) <p><b>Note:</b> This field is required when the <b>Approval Required</b> checkbox is selected</p>
Hierarchical Approval	<p>Used to indicate whether multi-level or single-level approval is required while creating the accrual adjustments using the accrual type.</p> <p><b>Note:</b> This field appears only when <b>Approval Required</b> checkbox is selected.</p>	Yes (Conditional) <p><b>Note:</b> This field is required when the <b>Approval Required</b> checkbox is selected</p>
Submitter To Do Type	<p>Used to indicate the To Do type for the submitter when the accrual type is resubmitted by the approver.</p> <p><b>Note:</b></p> <p>This field appears only when <b>Approval Required</b> checkbox is selected.</p> <p>The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.</p> <p>On specifying the submitter To Do type, the description of the submitter To Do type appears corresponding to the <b>Submitter To Do Type</b> field.</p>	Yes (Conditional) <p><b>Note:</b> This field is required when the <b>Approval Required</b> checkbox is selected</p>
Submitter To Do Role	<p>Used to indicate the To Do role for the submitter when the accrual type is resubmitted by the approver.</p> <p><b>Note:</b> This field appears only when <b>Approval Required</b> checkbox is selected.</p>	Yes (Conditional) <p><b>Note:</b> This field is required when the <b>Approval Required</b> checkbox is selected</p>

Field Name	Field Description	Mandatory (Yes or No)
Type of Day	Used to indicate the type of day that you want to use to calculate the accrual amount. <ul style="list-style-type: none"> <li>• Business Day</li> <li>• Calendar Day</li> </ul>	Yes
Posting Method	Used to indicate the posting method that you want to use for calculating the accrual amount. The valid values are: <ul style="list-style-type: none"> <li>• Bill Level</li> <li>• Bill Segment Level</li> </ul>	Yes
Cancel Reason	Used to specify the cancel reason that you want to use while reversing the accrual.	Yes (Conditional)  <b>Note:</b> This field is required when <b>Adjustment</b> option is selected from the <b>Accrual Object</b> field.
Contract Type	Used to indicate the contract type that you want to use for accrual calculation.  <b>Note:</b> The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Contract Type Search</b> window appears.	Yes

- **Algorithms** – Used to specify the algorithms that you want to use for an accrual type.
  - **Objects to Exclude** – Used to specify the objects that you want to exclude from an accrual type.
  - **Divisions** – Used to specify the division to which you want to associate with an accrual type.
  - **Characteristics** – Used to specify the characteristics for an accrual type.
4. Enter the required details in the **Main** section.
  5. Associate the required algorithms with an accrual type.
  6. Add the required entities that must be excluded in an accrual type.
  7. Associate the required division with an accrual type.
  8. Define characteristics in an accrual type, if required.
  9. Click **Save**.

The accrual type is defined

## Associating an Algorithm with an Accrual Type

### Prerequisites

To associate algorithms with an accrual type, you should have:

- Algorithms defined in the application.

### Procedure

To associate algorithms with an accrual type:

- Search for the accrual type in the **Accrual Type** screen.
- In the **Search Results** section, click the link in the **Accrual Type Information** column corresponding to the accrual type whose details you want to edit.

The **Accrual Type** screen appears.

- Click the **Edit** button in the **Accrual Type** zone.

The **Accrual Type** screen appears.

- Ensure that the **Algorithms** section is expanded when you are editing the accrual type.

Field Name	Field Description	Mandatory (Yes or No)
System Event	Used to indicate the system event when you want to execute the algorithm. The valid values are: <ul style="list-style-type: none"> <li><b>Accrual Calculation</b></li> <li><b>Accrual Creation</b></li> <li><b>Accrual Eligibility</b></li> <li><b>Accrual Post Calculation</b></li> <li><b>Accrual Post Processing</b></li> <li><b>Accrual Pre Processing</b></li> <li><b>Accrual Reversal</b></li> <li><b>Accrual Reversal Post Processing</b></li> <li><b>Accrual Reversal Pre Processing</b></li> <li><b>Accrual Calculation</b></li> </ul>	Yes  <b>Note:</b> This field is required when you are associating an algorithm with the accrual type.
Sequence	Used to specify the order in which the algorithms with the same system event must be executed.	Yes (Conditional)  <b>Note:</b> This field is required when you are associating an algorithm with the accrual type.

Field Name	Field Description	Mandatory (Yes or No)
Algorithm	<p>Used to specify the algorithm that you want to execute on the system event.</p> <p><b>Note:</b></p> <p>Once you select the system event, the <b>Search</b>  icon appears corresponding to the <b>Algorithm</b> field. On clicking the <b>Search</b>  icon, the <b>Algorithm Search</b> window appears.</p> <p>On specifying the algorithm, the description of the algorithm appears corresponding to the <b>Algorithm</b> field.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required when you are associating an algorithm with the accrual type.</p>

Enter the following details in the **Algorithms** section:

System Event	Algorithm	Mandatory (Yes or No)	For more information, see...
Accrual Calculation	- <b>Note:</b> An algorithm type for validating a discount arrangement transaction is not shipped with the product. You can create a custom algorithm type, if required.	Yes	Information will be available soon...
Accrual Creation	- <b>Note:</b> An accumulation billable charge post processing algorithm type is not shipped with the product. You can create a custom algorithm type, if required.	No	-
Accrual Eligibility	- <b>Note:</b> An accumulation billable charge pre processing algorithm type is not shipped with the product. You can create a custom algorithm type, if required.	No	-
Accrual Post Calculation	- <b>Note:</b> An accumulation post processing algorithm type is not shipped with the product. You can create a custom algorithm type, if required.	No	-
Accrual Post Processing	- <b>Note:</b> A accumulation pre processing algorithm type is not shipped with the product. You can create a custom algorithm type, if required.	No	-

System Event	Algorithm	Mandatory (Yes or No)	For more information, see...
Accrual Pre Processing	- <b>Note:</b> A pricing rule post processing algorithm type is not shipped with the product. You can create a custom algorithm type, if required.	No	-
Accrual Reversal	- <b>Note:</b> An algorithm type for validating a discount arrangement transaction is not shipped with the product. You can create a custom algorithm type, if required.	No	-
Accrual Reversal Post Processing	- <b>Note:</b> An algorithm type for validating a discount arrangement transaction is not shipped with the product. You can create a custom algorithm type, if required.		
Accrual Reversal Pre Processing	- <b>Note:</b> An algorithm type for validating a discount arrangement transaction is not shipped with the product. You can create a custom algorithm type, if required.		
Accrual Calculation	- <b>Note:</b> An algorithm type for validating a discount arrangement transaction is not shipped with the product. You can create a custom algorithm type, if required.		

**Note:** You must associate algorithms, such as **Accrual Calculation**, **Accrual Creation**, and **Accrual Reversal** to the system events in the accrual type.

5. Enter the required details in the **Algorithms** section.
6. If you want to associate more than one algorithm to the accrual type, click the **Add (+)** icon and then repeat step 5.

**Note:** However, if you want to disassociate an algorithm from the accrual type, click the **Delete (🗑)** icon corresponding to the algorithm.

7. Click **Save**.

The algorithm is associated with an accrual type.

## Excluding an Entity from an Accrual Type

### Procedure

To exclude an entity from an accrual type:

1. Search for the accrual type in the **Accrual Type** screen.
2. In the **Search Results** section, click the link in the **Accrual Type Information** column corresponding to the accrual type whose details you want to edit.

The **Accrual Type** screen appears.

3. Click the **Edit** button in the **Accrual Type** zone.

The **Accrual Type** screen appears.

4. Ensure that the **Objects To Exclude** section is expanded when you are editing the accrual type.

Field Name	Field Description	Mandatory (Yes or No)
Entity Type	Used to indicate the entity type.	No
Sequence	Used to specify the order in which the entities must be excluded from the accrual type.	No
Entity	Used to indicate a valid value for the selected entity type.	Yes (Conditional)

**Note:** This field is required if you select an option from the **Entity Type** field.

5. Enter the required details in the **Objects To Exclude** section.

**Note:** If you select a predefined entity type, the **Search**  icon appears corresponding to the **Entity** field. On clicking the **Search** icon, you can search for a predefined entity value.

6. If you want to exclude more than one entity in the accrual type, click the **Add**  icon and then repeat step 5.

**Note:** However, if you want to remove an excluded entity from the accrual type, click the **Delete**  icon corresponding to the entity.

7. Click **Save**.

The entity is defined which must be excluded in an accrual type.

## Associating a Division with an Accrual Type

### Prerequisites

To associate an accrual type with a division, you should have:

- Divisions defined in the application.

### Procedure

To associate an accrual type with a division:

1. Search for the accrual type in the **Accrual Type** screen.
2. In the **Search Results** section, click the link in the **Accrual Type Information** column corresponding to the accrual type whose details you want to edit.

The **Accrual Type** screen appears.

3. Click the **Edit** button in the **Accrual Type** zone.

The **Accrual Type** screen appears.

4. Ensure that the **Divisions** section is expanded when you are editing the accrual type.

The **Divisions** section contains the following fields:

Fields Name	Fields Description	Mandatory (Yes or No)
Effective Date	Used to indicate the date from when the division is effective for the accrual type.	No
Division	Used to indicate division to which you want to associate the accrual type.	Yes (Conditional)

**Note:** This field is required when you have specified the **Effective Date** field.

5. Enter the required details in the **Divisions** section.
6. If you want to associate more than one division to the accrual type, click the **Add (+)** icon and then repeat step 5.

**Note:** However, if you want to disassociate a division from the accrual type, click the **Delete (🗑)** icon corresponding to the division.

7. Click **Save**.

The division is associated with an accrual type.

## Accrual Type (Used for Viewing)

The **Accrual Type** screen allows you to:

- View the details of an accrual type.
- Edit an accrual type.
- Delete an accrual type.

This screen contains the following zone:

- [Accrual Type](#) on page 1826

## Accrual Type

The **Accrual Type** zone displays the details of an accrual type. This zone consists of the following sections:

- **Main** – This section provides basic information about the accrual type. It contains the following columns:

Column Name	Column Description
Accrual Type	Displays the name of an accrual type.
Description	Displays the description of an accrual type.
Accrual Object	Indicates the accrual object.
Adjustment Type	Indicates the adjustment type using which the adjustment is created.
Accrual Criteria	Indicates the accrual criteria used for calculation.
Accrual Source	Indicates the source of data that you want to use while calculating the accruals that are based on actual data.  <b>Note:</b> This field appears only when <b>Actual</b> option is selected from the <b>Accrual Criteria</b> field while creating an accrual type.
Historical Bill Count	Displays the number of historical bills which are considered for accrual calculation.  <b>Note:</b> This field appears only when <b>Historical</b> option is selected from the <b>Accrual Criteria</b> field while creating an accrual type.
Type of Day	Displays the type of day that is used to calculate the accrual amount.
Posting Method	Displays the posting method that is used to calculate the accrual amount.
Cancel Reason	Displays the reason of cancelation that is used while reversing the accrual.
Contract Type	Displays the contract type.

- **Algorithms** – Displays the algorithms that are associated with the accrual type. This section contains the following columns:

Column Name	Column Description
System Event	Indicates the system event on which the algorithm is executed.
Sequence	Displays the order in which the algorithms for each system is executed.
Algorithm	Indicates the algorithm which is associated with the accrual type.  <b>Note:</b> It has a link. On clicking the link, <b>Algorithm</b> screen appears with the details of the respective algorithm.

- **Objects to Exclude** – Displays the objects which are excluded from the accrual type. This section contains the following columns:

Column Name	Column Description
Entity Type	Indicates the entity type.
Sequence	Displays the order in which the entities are excluded from the accrual type.
Entity	Displays the value for the entity type.

- **Divisions** – Displays the divisions which are associated with the accrual type. This section contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the division is effective for the accrual type.
Division	Displays the division associated to the accrual type.

- **Characteristics** – Displays the characteristics for the accrual type. This section contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the characteristic is effective for the accrual type.
Characteristic Type	Displays the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- **Record Actions** – This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of an accrual type.
Delete	Used to delete an accrual type.

- **Record Information** – This section contains the following field:

Field Name	Field Description
Business Object	Indicates the business object using which an accrual type is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.

## Editing an Accrual Type

### Prerequisites

To edit an accrual type, you should have:

- Adjustment Types defined in the application (where the **Print by Default** and **Influence Next Bill Balance** checkbox is not selected).

### Procedure

To edit an accrual type:

- Search for the accrual type in the **Accrual Type** screen.
- In the **Search Results** section, click the link in the **Accrual Type Information** column corresponding to the accrual type whose details you want to edit.

The **Accrual Type** screen appears.

- Click the **Edit** button in the **Record Actions** section.

The **Accrual Type** screen appears. It contains the following section:

- Main** – Used to specify basic details about the accrual type. This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Accrual Type	Used to specify the name for an accrual type.	Yes
Description	Used to specify the description for an accrual type.	Yes
Accrual Object	Used to indicate the type of the accrual object that you want to create for posting the accrual amount.  <b>Note:</b> At present, you can only create adjustments to record the accruals for the accounts in the application.	Yes
Adjustment Type	Used to indicate the adjustment type using which the adjustment must be created.  <b>Note:</b> This field appears only when you select the <b>Adjustment</b> option from the <b>Accrual Object</b> field.  The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Adjustment Type Search</b> window appears.  On specifying the adjustment type, the description of the adjustment type appears corresponding to the <b>Adjustment Type</b> field.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Accrual Criteria	Used to indicate the accrual criteria that you want to use for the accrual calculation. The valid values are: <ul style="list-style-type: none"> <li>Actual</li> <li>Historical</li> </ul>	Yes
Accrual Source	Used to indicate the source of data that you want to use for calculating the accruals that are based on the actual data. The valid values are: <ul style="list-style-type: none"> <li>Transaction Feed</li> <li>Trial Bill</li> </ul> <p><b>Note:</b> This field appears only when you select the <b>Actual</b> option from the <b>Accrual Criteria</b> field.</p>	Yes (Conditional) <p><b>Note:</b> This field is required if you select the <b>Actual</b> option from the <b>Accrual Criteria</b> field.</p>
Historical Bill Count	Used to specify the number of historical bills that you want to consider for accrual calculation. <p><b>Note:</b> This field appears only when you select the <b>Historical</b> option from the <b>Accrual Criteria</b> field.</p>	Yes (Conditional) <p><b>Note:</b> This field is required if you select the <b>Historical</b> option from the <b>Accrual Criteria</b> field.</p>
Accrual Request Business Object	Used to indicate the business object that you want to use while creating the accrual request. <p><b>Note:</b></p> <p>The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Business Object Search</b> window appears.</p> <p>On specifying the business object, the description of the business object appears corresponding to the <b>Accrual Request Business Object</b> field.</p>	No
Approval Required	Used to indicate whether approval is required while creating accrual requests which are created using the accrual type.	Yes
Approval Profile	Used to indicate the approval profile which must be used to define approval hierarchy for the accrual type. <p><b>Note:</b> This field appears only when <b>Approval Required</b> checkbox is selected.</p>	Yes <p><b>Note:</b> This field is required when the <b>Approval Required</b> checkbox is selected.</p>
Hierarchical Approval	Used to indicate whether multi-level or single-level approval is required while creating the accrual adjustments using the accrual type. <p><b>Note:</b> This field appears only when <b>Approval Required</b> check box is selected.</p>	Yes (Conditional) <p><b>Note:</b> This field is required when the <b>Approval Required</b> checkbox is selected.</p>

Field Name	Field Description	Mandatory (Yes or No)
Submitter To Do Type	Used to indicate the To Do type for the submitter when the accrual type is resubmitted by the approver.  <b>Note:</b> This field appears only when <b>Approval Required</b> checkbox is selected.  The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.	Yes (Conditional)  <b>Note:</b> This field is required when the <b>Approval Required</b> checkbox is selected.
Submitter To Do Role	Used to indicate the To Do role for the submitter when the accrual type is resubmitted by the approver.  <b>Note:</b> This field appears only when <b>Approval Required</b> checkbox is selected.	Yes (Conditional)  <b>Note:</b> This field is required when the <b>Approval Required</b> checkbox is selected.
Type of Day	Used to indicate the type of day that you want to use to calculate the accrual amount.  <ul style="list-style-type: none"> <li>• Business Day</li> <li>• Calendar Day</li> </ul>	Yes
Posting Method	Used to indicate the posting method that you want to use for calculating the accrual amount. The valid values are:  <ul style="list-style-type: none"> <li>• Bill Level</li> <li>• Bill Segment Level</li> </ul>	Yes
Cancel Reason	Used to specify the cancel reason that you want to use while reversing the accrual.	Yes (Conditional)  <b>Note:</b> This field is required when <b>Adjustment</b> option is selected from the <b>Accrual Object</b> field.
Contract Type	Used to indicate the contract type that you want to use for accrual calculation.  <b>Note:</b> The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Contract Type Search</b> window appears.	Yes

- **Algorithms** – Used to specify the algorithms that you want to use for accrual type. This section contains the following fields:

Fields Name	Fields Description	Mandatory (Yes or No)
System Event	Used to indicate the system event when you want to execute the algorithm. The valid values are: <ul style="list-style-type: none"> <li>• <b>Accrual Calculation</b></li> <li>• <b>Accrual Creation</b></li> <li>• <b>Accrual Eligibility</b></li> <li>• <b>Accrual Post Calculation</b></li> <li>• <b>Accrual Post Processing</b></li> <li>• <b>Accrual Pre Processing</b></li> <li>• <b>Accrual Reversal</b></li> <li>• <b>Accrual Reversal Post Processing</b></li> <li>• <b>Accrual Reversal Pre Processing</b></li> <li>• <b>Accrual Calculation</b></li> </ul>	Yes
Sequence	Used to specify the order in which the algorithms with the same system event must be executed.	Yes (Conditional) <b>Note:</b> This field is required when you are associating an algorithm with the accrual type.
Algorithm	Used to specify the algorithm that you want to execute on the system event. <b>Note:</b> The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Algorithm Search</b> window appears.	Yes (Conditional) <b>Note:</b> This field is required when you are associating an algorithm with the accrual type.

Enter the following details in the **Algorithms** section:

System Event	Algorithm	Mandatory (Yes or No)	For more information, see...
Accrual Calculation	- <b>Note:</b> An algorithm type for validating a discount arrangement transaction is not shipped with the product. You can create a custom algorithm type, if required.	Yes	Information will be available soon...
Accrual Creation	- <b>Note:</b> An accumulation billable charge post processing algorithm type is not shipped with the product. You can create a custom algorithm type, if required.	No	-

System Event	Algorithm	Mandatory (Yes or No)	For more information, see...
Accrual Eligibility	- <b>Note:</b> An accumulation billable charge pre processing algorithm type is not shipped with the product. You can create a custom algorithm type, if required.	No	-
Accrual Post Calculation	- <b>Note:</b> An accumulation post processing algorithm type is not shipped with the product. You can create a custom algorithm type, if required.	No	-
Accrual Post Processing	- <b>Note:</b> A accumulation pre processing algorithm type is not shipped with the product. You can create a custom algorithm type, if required.	No	-
Accrual Pre Processing	- <b>Note:</b> A pricing rule post processing algorithm type is not shipped with the product. You can create a custom algorithm type, if required.	No	-
Accrual Reversal	- <b>Note:</b> An algorithm type for validating a discount arrangement transaction is not shipped with the product. You can create a custom algorithm type, if required.	No	-
Accrual Reversal Post Processing	- <b>Note:</b> An algorithm type for validating a discount arrangement transaction is not shipped with the product. You can create a custom algorithm type, if required.		
Accrual Reversal Pre Processing	- <b>Note:</b> An algorithm type for validating a discount arrangement transaction is not shipped with the product. You can create a custom algorithm type, if required.		

System Event	Algorithm	Mandatory (Yes or No)	For more information, see...
Accrual Calculation	- <b>Note:</b> An algorithm type for validating a discount arrangement transaction is not shipped with the product. You can create a custom algorithm type, if required.		

**Note:**

If you want to associate more than one algorithm with the accrual type, click the **Add** (+) icon and then specify the details. However, if you want to remove an algorithm from the accrual type, click the **Delete** (🗑️) icon corresponding to the algorithm.

- **Objects to Exclude** – Used to specify the objects that you want to exclude from accrual type. This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Entity Type	Used to indicate the entity type.	No
Sequence	Used to specify the order in which the entities must be excluded from the accrual type.	No
Entity	Used to indicate the valid value for the entity type that you have selected.	Yes (Conditional) <b>Note:</b> This field is required if you select the value for <b>Entity Type</b> field.

**Note:**

If you want to associate more than one entity with the accrual type, click the **Add** (+) icon and then specify the details. However, if you want to remove an entity from the accrual type, click the **Delete** (🗑️) icon corresponding to the entity type.

- **Divisions** – Used to specify division to which you want to associate the accrual type. This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to indicate the date from when the division is effective for the accrual type.	No
Division	Used to indicate division to which you want to associate the accrual type.	Yes (Conditional) <b>Note:</b> This field is required when you have specified the <b>Effective Date</b> field.

**Note:**

If you want to associate more than one division with the accrual type, click the **Add** (+) icon and then specify the details. However, if you want to remove a division from the accrual type, click the **Delete** (🗑️) icon corresponding to the division.

- **Characteristics** – Used to specify the characteristics for the accrual type. This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for an accrual type.
Characteristic Type	Used to specify the characteristic type. <b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Accrual Type</b> .	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for an accrual type.
Characteristic Value	Used to specify the value of characteristic type. <b>Note:</b> Once you select the characteristic type, the <b>Search</b> (🔍) icon appears corresponding to the <b>Characteristic Value</b> field. On clicking the <b>Search</b> (🔍) icon, the <b>Predefined Characteristic</b> window appears. On specifying the characteristic, the description of the characteristic appears corresponding to the <b>Characteristic Value</b> field.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for an accrual type.

**Note:**

If you want to associate more than one characteristic with the accrual type, click the **Add** (+) icon and then specify the details. However, if you want to remove a characteristic from the accrual type, click the **Delete** (🗑️) icon corresponding to the characteristic.

4. Modify the required details in the **Main** section.
5. Associate the required algorithms with the accrual type.
6. Add, edit, or remove the required objects in the accrual type.
7. Add, edit, or remove the required divisions in the accrual type.
8. Add, edit, or remove the characteristics in the accrual type.

9. Click **Save**.

The changes made to an accrual type are saved.

<b>Accrual Type</b> screen	<a href="#">Accrual Type (Used for Viewing)</a> on page 1826
<b>Accrual Type</b> zone	<a href="#">Accrual Type</a> on page 1826

## Deleting an Accrual Type

**Procedure**

To delete an accrual type:

1. Search for the accrual type in the **Accrual Type** screen.
2. In the **Search Results** section, click the link in the **Accrual Type Information** column corresponding to the *accrual type* that you want to delete.

The **Accrual Type** screen appears.

3. Click the **Delete** button in the **Accrual Type** zone.

A message appears confirming whether you want to delete an accrual type.

4. Click **OK**.

An accrual type is deleted.

## Accrual (Used for Searching)

The **Accrual** screen allows you to search for an accrual detail using various search criteria. This screen consists of the following zone:

- [Search Accrual](#) on page 1835

### Search Accrual

The **Search Accrual** zone allows you to search an accrual detail using various search criteria. This zone contains the following two sections:

- **Search Criteria** – The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for an accrual using the search parameter. The valid value is: <ul style="list-style-type: none"> <li>• <b>Accrual Details</b></li> </ul>	Not applicable
Account ID	Used to indicate whether you want to search for accruals belonging to a particular account. <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Account Search</b> window appears.</p> </div>	No
Division	Used to indicate whether you want to search for accruals belonging to a particular division.	No
Accrual Type	Used to search for accruals which are created using a particular accrual type.	No
Posting Method	Used to indicate whether you want to search for accruals which use a particular posting method for calculating the accrual amount. The valid values are: <ul style="list-style-type: none"> <li>• <b>Bill Level</b></li> <li>• <b>Bill Segment Level</b></li> </ul>	No
Accrual Cycle	Used to search for accruals which are created using a particular accrual cycle.	No
Creation Date From	Used to indicate whether you want to search for accruals which are created from a particular date onwards.	No
Accrual Creation Mode	Used to indicate whether you want to search for accruals which are created using a particular creation mode. The valid values are: <ul style="list-style-type: none"> <li>• <b>Batch</b></li> <li>• <b>Manual</b></li> </ul>	No
Creation Date To	Used to search accruals which are created till a particular date.	No
Status	Used to search for accruals with a particular status. The valid values are: <ul style="list-style-type: none"> <li>• <b>Ready For Accrual</b></li> <li>• <b>Accrued</b></li> <li>• <b>Reversed</b></li> <li>• <b>Approval In Progress</b></li> <li>• <b>Cancelled</b></li> <li>• <b>Draft</b></li> <li>• <b>Ignore</b></li> <li>• <b>Processed</b></li> <li>• <b>Rejected</b></li> </ul>	No

**Note:** You must specify at least one search criterion while searching for an accrual.

- **Search Results** – On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Accrual Information	Displays information about the accrual. <b>Note:</b> It has a link. On clicking the link, the <b>Accrual</b> screen appears with the details of the respective accrual.
Division	Indicates the division to which the accrual account belongs.
Accrual Type	Indicates the type of the accrual.
Posting Method	Indicates the posting method used for accrual.
Accrual Creation Mode	Indicates the creation mode used for an accrual.
Status	Displays the status of the accrual.
Create Date/Time	Displays the date and time when the accrual is created.

## **Searching for an Accrual**

### **Procedure**

To search for an accrual :

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Financial** and then click **Accrual**.  
A sub-menu appears.
3. Click the **Search** option from the **Accrual** sub-menu.  
The **Accrual** screen appears.
4. Enter the search criteria in the **Search Accrual** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search**.

A list of accruals that meet the search criteria appears in the **Search Results** section.

Accrual screen	<a href="#">Accrual (Used for Viewing)</a> on page 1842
Accrual zone	<a href="#">Accrual</a> on page 1842

**Viewing the Accrual Details****Procedure**

To view the details of an accrual:

1. Search for the accrual in the **Accrual** screen.
2. In the **Search Results** section, click the link in the **Accrual Information** column corresponding to the accrual whose details you want to view.

The **Accrual** screen appears. It consists of the following tabs:

- [Accrual - Main](#) on page 1842
- [Accrual - Log](#) on page 1845

3. Ensure that the **Main** tab is selected.
4. View the details of the accrual in the **Accrual** zone.

**Related Topics**

For more information on...	See...
How to search for an accrual	<a href="#">Searching for an Accrual</a> on page 1837
Accrual screen	<a href="#">Accrual (Used for Viewing)</a> on page 1842
Accrual zone	<a href="#">Accrual</a> on page 1842

**Defining an Accrual****Prerequisites**

To define an accrual, you should have:

- Batch **C1\_ACCRE** defined in the application, if an accrual creation takes place through a batch.
- Algorithm **C1\_ACCR\_CRE** defined for accrual creation in the application.
- Algorithm **C1\_ACCR\_CAL** defined for accrual calculation in the application.
- Algorithm **C1\_ACCR\_REV** defined for accrual reversal in the application.
- Account ID defined in the application.
- Characteristic type defined in the application (where the characteristic entity is set to **Accrual**).
- Price Item defined in the application.

**Procedure**

To add an accrual:

1. Click the **Menu** link in the **Application** toolbar.

A list appears.

- From the **Main** menu, select **Financial** and then click **Accrual**.

A sub-menu appears.

- Click the **Add** option from the **Accrual** sub menu.

The **Accrual** screen appears. It contains the following sections:

- **Main** – Used to specify basic details about the accrual.
- **Characteristics** – Used to specify the characteristics for an accrual.
- **Accrual Details** – Used to specify the accrual details for an accrual.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Account ID	Used to search a particular account.  <b>Note:</b> The <b>Search</b>  icon appears corresponding to the <b>Account ID</b> field. On clicking the <b>Search</b> icon, the <b>Account Search</b> window appears.  On specifying the account information, the description of the account appears corresponding to the <b>Account ID</b> field.	Yes
Contract	Used to specify the accrual contract of the account.  <b>Note:</b> It is a read-only field and cannot be edited.	Not applicable
Accrual Cycle	Used to specify the accrual cycle for the account.  <b>Note:</b> It is a read-only field and cannot be edited.	Not applicable
Posting Method	Used to specify the posting method used for an accrual.  <b>Note:</b> It is a read-only field and cannot be edited.	Not applicable
Accrual Type	Used to specify the type of an accrual.  <b>Note:</b> It is a read-only field and cannot be edited.	Not applicable
Accrual Creation Mode	Used to specify the creation method of an accrual.  <b>Note:</b> It is a read-only field and cannot be edited.	Not applicable
Currency	Used to specify the currency used for calculating the accrual.  <b>Note:</b> It is a read-only field and cannot be edited.	Not applicable
Comments	Used to specify the comments for an accrual.	No

**Tip:** Alternatively, you can access the **Accrual** screen by clicking the **Add** button in the **Page Title** area of the **Accrual** screen.

**Note:**

You must specify the reversal end date which must be later than the reversal start date.

You must specify the accrual date which lies earlier than the reversal start date.

4. Define characteristics for an accrual, if required.
5. Define the accrual details for an accrual.
6. Click **Save**.
7. An accrual is defined.

**Related Topics**

For more information on...	See...
Defining the characteristics for an accrual	<a href="#">Defining a Characteristic for an Accrual</a> on page 1840
Adding the details for an accrual	<a href="#">Adding the Details for an Accrual</a> on page 1841

**Defining a Characteristic for an Accrual****Prerequisites**

To define a characteristic for an accrual, you should have:

- Characteristic type defined in the application (where the characteristic entity is set to **Accrual**).

**Procedure**

To define a characteristic for an accrual:

1. Ensure that the **Characteristics** section is expanded when you are defining or editing an accrual.

The **Characteristics** section contains the following fields in the grid:

Column Name	Column Description	Mandatory (Yes or No)
Accrual Detail Sequence	Used to specify the sequence in which the accrual processing must be executed.  <b>Note:</b> It is a read-only field and cannot be edited.	Not applicable
Effective Date	Used to specify the date from when the characteristic is effective for an accrual.	Yes (Conditional)  <b>Note:</b> This field is required when you are defining a characteristic for an accrual.
Characteristic Type	Used to indicate the characteristic type.  <b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Accrual</b> .	Yes (Conditional)  <b>Note:</b> This field is required when you are defining a characteristic for an accrual.

Column Name	Column Description	Mandatory (Yes or No)
Characteristic Value	Used to specify the value for the characteristic type.  <b>Note:</b> If you select a predefined characteristic type, the <b>Search</b> (🔍) icon appears corresponding to the <b>Characteristic Value</b> field. On clicking the <b>Search</b> icon, the <b>Predefined Characteristic Search</b> window appears.  On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	Yes (Conditional)  <b>Note:</b> This field is required when you are defining a characteristic for an accrual.

- Enter the required details in the **Characteristics** section.
- If you want to define more than one characteristic for an accrual., click the **Add** (+) icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from an accrual, click the **Delete** (🗑️) icon corresponding to the characteristic.

- Click **Save**.

The characteristics are defined for an accrual..

## Adding the Details for an Accrual

### Procedure

To define the details for an accrual:

- Ensure that **Accrual Details** section is expanded when you are defining or editing an accrual.

The **Accrual Details** section contains the following fields in the grid:

Column Name	Column Description	Mandatory (Yes or No)
Accrual Detail Sequence	Used to specify the detailed sequence in which the accrual processing must be executed.	Not applicable
Price Item	Used to indicate the price item for an accrual.  <b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Price Item</b> field. On clicking the <b>Search</b> icon, the <b>Price Item Search</b> window appears.	Yes (Conditional)  <b>Note:</b> This field is required when the price item information is not defined for the accrual contract.
Amount	Used to specify the accrual amount.	Yes

Column Name	Column Description	Mandatory (Yes or No)
Override Reason	Used to specify the override reason for the accrual.	No

- Enter the required details in the **Accrual Details** section.
- Click **Save**.

The accrual details are defined for an accrual.

### **Related Topics**

## **Accrual (Used for Viewing)**

Once you create an accrual, the **Accrual** screen allows you to:

- View the details of an accrual
- Edit an accrual
- Submit an accrual
- Delete an accrual
- Approve, Reject, and Re-Submit an accrual
- View the accrual calculation lines

This screen contains the following tabs:

- [Accrual - Main](#) on page 1842
- [Accrual Log](#) on page 1845

### **Accrual - Main**

The **Main** tab displays information about the reconciliation. It contains the following zones:

- [Accrual](#) on page 1842
- [Accrual Details](#) on page 1844
- [Accrual Calculation Lines](#) on page 1844

### **Accrual**

The **Accrual** zone displays the details of an accrual. It contains the following sections:

- Main** – Displays basic information about the accrual. It contains the following columns:

Column Name	Column Description
Accrual Information	Displays information about the accrual.
Account Information	Displays information about the account. In addition, this column has a context menu which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account

Column Name	Column Description
Contract Information	Displays information about the contract. In addition, this column has a context menu which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Contract</b> screen appears where you can view the details of the respective contract.
Division	Displays the division which is associated with the accrual.
Status	Displays the status of the accrual.
Accrual Cycle	Displays the cycle of the accrual.
Accrual Date	Displays the accrual date.
Reversal Start Date	Displays the date from when the reversal is effective for the accrual.
Reversal End Date	Displays the date till when the reversal is effective for the accrual.
Accrual Type	Displays the type of the accrual.
Accrual Creation Mode	Displays the creation mode of the accrual.
Posting Method	Displays the posting method that is used for calculating the accrual.
Accrual Amount	Displays the accrual amount.

- **Characteristics** – Lists the characteristics defined for the reconciliation. It contains the following columns:

Column Name	Column Description
Accrual Detail Sequence	Displays the sequence of the accrual.
Effective Date	Displays the date from when the characteristic is effective.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- **Record Actions** – This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of an accrual.
Delete	Used to delete an accrual.

- **Record Information** – This section contains the following field:

Field Name	Field Description
Business Object	Indicates the business object using which an accrual is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.
Create Date/Time	Displays the date and time when the accrual is created.

### **Related Topics**

For more information on...	See...
How to search for an accrual	<a href="#">Searching for an Accrual</a> on page 1837

How to define an accrual	<a href="#">Defining an Accrual</a> on page 1838

### Accrual Details

The **Accrual Details** zone displays the details of an accrual. It contains the following columns:

Column Name	Column Description
Sequence	Displays the sequence of the accrual.
Price Item	Displays the price item that is defined at the bill segment level for the accrual calculation.  <b>Note:</b> It contains a link. On clicking the link, the <b>Price Item</b> screen appears where you can view the details of the respective accrual adjustment.
Amount	Displays the accrual amount.
Override Reason	Displays the override reason for an accrual.
Adjustment Information	Displays the information about the adjustment that is created using the accrual creation batch.  <b>Note:</b> It contains a link. On clicking the link, the <b>Adjustment</b> screen appears where you can view the details of the respective adjustment.

### Related Topics

### Accrual Calculation Lines

The **Accrual Calculation** zone displays the accrual calculation lines generated after the accrual creation batch is executed. It contains the following columns:

Column Name	Column Description
Entity Information	Displays entity information.  <b>Note:</b> It has a link. On clicking the link, the <b>Adjustment</b> screen appears where you can view the details of the respective entity.
Entity Type	Displays the entity type.
Inclusion Amount	Displays the inclusion amount.
Bill Cycle Days	Displays the bill cycle days.

Column Name	Column Description
Historical Calculation Days	Displays the historical calculation days.
Bill Information	Displays the bill information. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Bill</b> screen appears where you can view the details of the respective bill.
Recurring Charge Calculation Days	Displays the recurring charge calculation days.  <b>Note:</b> This column appears only when the accrual status is <b>Draft</b> .
Recurring Charge Total Days	Displays the recurring charge calculation days.  <b>Note:</b> This column appears only when the accrual status is <b>Draft</b> .

## **Accrual - Log**

The **Log** tab lists the complete trail of actions performed on the accrual. It consists of the following zone:

- [Accrual Log](#) on page 1845

### **Accrual Log**

The **Accrual Log** zone lists the complete trail of actions performed on the accrual. This zone contains the following columns:

Column Name	Column Description
Date/Time	Displays the date and time when the action was performed on the accrual.
Details	Displays the details about the action performed on the accrual.
User	Indicates the user who has performed the action on the accrual.
Log Type	Indicates the type of log.
Related Object	Indicates the object or entity which is generated when the action is performed on the accrual.

#### **Note:**

You can manually add a log entry for the accrual by clicking the **Add Log Entry** link in the upper right corner of the **Accrual Log** zone.

### **Related Topics**

How to add a log entry for an accrual	<a href="#">Adding a Log Entry for an Accrual</a> on page 1846

## Viewing the Log of an Accrual

### Procedure

To view the log of an accrual:

1. Search for an accrual in the **Accrual** screen.
2. In the **Search Results** section, click the link in the **Accrual Information** column corresponding to the accrual whose log you want to view.

The **Accrual** screen appears. It consists of the following tabs:

- [Accrual - Main](#) on page 1842
- [Accrual - Log](#) on page 1845

3. Click the **Log** tab.

The **Log** tab appears.

4. View the complete trail of actions performed on the accrual in the **Accrual** zone.

### Related Topics

## Adding a Log Entry for an Accrual

### Procedure

To add a log entry for an accrual:

1. Search for the accrual in the **Accrual** screen.
2. In the **Search Results** section, click the link in the **Accrual Information** column corresponding to the accrual whose log you want to edit.

The **Accrual** screen appears. It consists of the following tabs:

- [Accrual - Main](#) on page 1842
- [Accrual - Log](#) on page 1845

3. Click the **Log** tab.

The **Log** tab appears.

4. Click the **Add Log Entry** link in the upper right corner of the **Accrual Log** zone.

The **Add Accrual Log** window appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Accrual Information	Displays the information about the accrual.	Not applicable
Log Details	Used to specify additional comments for the accrual.	Yes

- Enter the comments in the **Log Details** field.
- Click **Save**.

The log entry is added in the **Accrual Log** zone.

## Approving an Accrual

### Prerequisites

To approve an accrual, you should have:

- Accrual status as **Approval in Progress**.

### Procedure

To approve an accrual:

- Search for the accrual in the **Accrual** screen.
- In the **Search Results** section, click the link in the **Accrual Information** column corresponding to the accrual whose details you want to view.

The **Accrual** screen appears. It consists of the following tabs:

- [Accrual - Main](#) on page 1842
  - [Accrual - Log](#) on page 1845
- Ensure that the **Main** tab is selected.
  - Click the **Approve** button in the **Accrual** zone.

The status of the accrual is changed to **Processed**.

**Note:** The **Approve** button appears only when the accrual is in the **Approval in Progress** status.

### Related Topics

## Rejecting an Accrual

### Prerequisites

To reject an accrual, you should have:

- Accrual status as **Approval in Progress**.

**Procedure**

To reject an accrual:

1. Search for the accrual in the **Accrual** screen.
2. In the **Search Results** section, click the link in the **Accrual Information** column corresponding to the accrual whose details you want to view.

The **Accrual** screen appears. It consists of the following tabs:

- [Accrual - Main](#) on page 1842
  - [Accrual - Log](#) on page 1845
3. Ensure that the **Main** tab is selected.
  4. Click the **Reject** button in the **Accrual** zone.

The status of the accrual is changed to **Rejected**.

**Note:** The **Reject** button appears only when the accrual is in the **Approval in Progress** status.

**Related Topics**

For more information on...	See...

**Resubmitting an Accrual****Prerequisites**

To resubmit an accrual, you should have:

- Accrual status as **Approval in Progress**.

**Procedure**

To resubmit an accrual:

1. Search for the accrual in the **Accrual** screen.
2. In the **Search Results** section, click the link in the **Accrual Information** column corresponding to the accrual whose details you want to view.

The **Accrual** screen appears. It consists of the following tabs:

- [Accrual - Main](#) on page 1842
  - [Accrual - Log](#) on page 1845
3. Ensure that the **Main** tab is selected.
  4. Click the **Resubmit** button in the **Accrual** zone.

The status of the accrual is changed to **Accrued**.

**Note:** The **Resubmit** button appears only when the accrual is in the **Approval in Progress** status.

**Related Topics**

## Editing an Accrual

### Prerequisites

To define an accrual, you should have:

- Algorithm **C1\_ACCR\_CAL** defined for accrual calculation in the application.
- Algorithm **C1\_ACCR\_REV** defined for accrual reversal in the application.

### Procedure

To edit an accrual:

1. Search for the accrual in the **Accrual** screen.
2. In the **Search Results** section, click the link in the **Accrual Information** column corresponding to the accrual whose details you want to edit.

The **Accrual** screen appears.

3. Click the **Edit** button in the **Accrual** zone

The **Accrual** screen appears. It contains the following sections:

- **Main** – Used to specify basic details about the accrual. This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Account ID	Used to search a particular account. <b>Note:</b> It is a read-only field and cannot be edited.	Yes
Contract	Used to specify the accrual contract of the account. <b>Note:</b> It is a read-only field and cannot be edited.	Not applicable
Accrual Cycle	Used to specify the accrual cycle for the account. <b>Note:</b> It is a read-only field and cannot be edited.	Not applicable
Posting Method	Used to specify the posting method used for an accrual. <b>Note:</b> It is a read-only field and cannot be edited.	Not applicable
Accrual Type	Used to specify the type of an accrual. <b>Note:</b> It is a read-only field and cannot be edited.	Not applicable
Accrual Creation Mode	Used to specify the creation method of an accrual. <b>Note:</b> It is a read-only field and cannot be edited.	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
Currency	Used to specify the currency used for calculating the accrual.  <b>Note:</b> It is a read-only field and cannot be edited.	Not applicable
Comments	Used to specify the comments for an accrual.	No

**Note:**

You must specify the reversal end date which must be later than the reversal start date.

You must specify the accrual date which lies earlier than the reversal start date.

- Add, edit, or remove the characteristics for an accrual, if required.
- Add, edit, or remove the details for an accrual.
- Click **Save**.

The changes made to the accrual are saved.

**Related Topics**

**Deleting an Accrual****Procedure**

To delete an accrual:

- Search for the accrual in the **Accrual** screen.
- In the **Search Results** section, click the link in the **Accrual Information** column corresponding to the accrual that you want to delete.

The **Accrual** screen appears.

- Click the **Delete** button in the **Accrual** zone.

A message appears confirming whether you want to delete the accrual.

**Note:** The **Delete** button appears only when the accrual status is **Draft**.

- Click **OK**.

The accrual is deleted.

# Chapter 31

---

## Payment Agreement Request

---

### Topics:

- [Payment Agreement Request \(Without Approval\) Status Transition](#)
- [Payment Agreement Request \(With Approval\) Status Transition](#)
- [Prerequisites](#)
- [Algorithms Used in C1-PaymentAgreementRequest](#)
- [Payment Agreement Request Type](#)
- [Payment Agreement Request \(Used for Searching\)](#)
- [Payment Agreement Request \(Used for Viewing\)](#)

Oracle Revenue Management and Billing provides the ability to schedule payments in installments for a set of unpaid bills of an account through a payment agreement request. Let us understand this with the help of an example. The following bills of the account A1 are unpaid:

- B1 (Bill Amount – 100\$, Unpaid Amount - 75\$)
- B2 (Bill Amount – 250\$, Unpaid Amount – 125\$)
- B3 (Bill Amount – 150\$, Unpaid Amount – 150\$)

Through a payment agreement request, you can schedule payments for these three bills in various installments. For example, you can schedule the following payments for the account A1:

Schedule Date	Schedule Amount
01-Jan-2017	100
15-Jan-2017	100
01-Feb-2017	100
15-Feb-2017	50

While creating a payment agreement request, you need to specify the payment agreement request type using which you want to create the payment agreement request. It is the payment agreement request type which helps the system to determine:

- The business object using which the payment agreement request should be created
- Whether the approval is required for the payment agreement request

You can only add completed bills of the account which are unpaid in a payment agreement request. Once a payment agreement request is created for an account, the status of the payment agreement request is set to **Draft**. You can then edit or delete the payment agreement request, if required. Once you add the unpaid bills of the account, you can submit the payment agreement request. On submitting a payment agreement request, the status of the payment agreement request is set to **Active**.

You can optionally configure the system to use the approval workflow process for a payment agreement request. If the **Approval Required** flag is set to **Yes** in a payment agreement request type, then on submitting the respective payment agreement request, the approval workflow process creates a To Do for the approver to review the payment agreement request. Once the approver approves the payment agreement request, the status of the payment agreement request is set to **Active**. The approver can approve, reject, or resubmit the payment

agreement request. When the payment agreement request is resubmitted to the submitter, the status of the payment agreement request is set to **Draft**.

Even if the approval workflow is configured for a payment agreement request type, you can skip the approval workflow for a payment agreement request. The system enables you to skip the approval workflow for a payment agreement request until you exceed the maximum limit defined in the **C1-PASUBMIT** algorithm. You can define the following parameters in the **C1-PA-SUBMIT** algorithm:

- Number of days to consider in past to check whether any payment agreement request with a particular status exist in the specified duration (for example, 365)
- Maximum number of payment agreement requests which can be activated without approval (for example, 1)
- Status in which payment agreement request should exist in the specified duration (for example, Broken Promise)

In the above example, on clicking the **Submit** button, the system will check how many payment agreement requests for the account in the last 365 days exist in the **Broken Promise** status. If the system finds one or more than one payment agreement requests in the **Broken Promise** status in the last 365 days, the approval workflow process creates a To Do for the approver to review the payment agreement request. However, if the system does not find any payment agreement request in the **Broken Promise** status in the last 365 days, the payment agreement request is not sent for approval and the status of the payment agreement request is directly changed to **Active**.

When the **Payment Agreement Request Periodic Monitor (C1-PAREQ)** batch is invoked, the system checks whether there are any payment agreement requests in the **Active** status. If there is a payment agreement request in the **Active** status, the system checks whether the total unpaid amount of the bills is equal to zero and whether each bill is fully matched. If so, the status of the payment agreement request is changed to **Kept Promise**. However, if the total unpaid amount of the bills is not equal to zero, the system checks whether the current date is later than the schedule date and does not fall within the grace period. If so, the system checks whether total unpaid amount is greater than the total future schedule amount. If so, the status of the payment agreement request is changed to **Broken Promise**. However, if the current date is earlier than the schedule date or falls within the grace period, or the total unpaid amount is less than the total future schedule amount, the status of payment agreement request remains in **Active**. The system enables you to edit a payment agreement request which is in the **Active** status.

While defining a payment agreement request, you need to specify the payment method through which the payment will be done and whether the payment will be done through the payor or third party payor account. If the **Auto Pay** flag is set to **Yes** for a payment method, you need to also specify the automatic payment option using which the automatic payment should be created on the schedule date. One more batch named **Generate Auto Pay for Payment Agreement (C1-APPAB)** is introduced in this release. When the **Generate Auto Pay for Payment Agreement (C1-APPAB)** batch is invoked, the system checks whether there are any payment agreement requests in the **Active** status. If so, whether the account for which the payment agreement request is created is eligible for automatic payment and the defer auto pay date (if any) defined for the account is earlier than the batch business date. If so, the system checks whether the extract date of the unpaid bill (with the earliest due date) is earlier than the schedule date.

If so, the system creates the automatic payment for the unpaid bill on the schedule date. However, if the account is not eligible for automatic payment, or the defer auto pay date is equal to or later than batch business date, or the extract date is equal to or later than the schedule date, the automatic payment is not generated for the account.

During the payment agreement request process, a payment agreement request creation goes through various statuses in its lifecycle. For more information about the payment agreement request statuses, see [Payment Agreement Request \(Without Approval\) Status Transition](#) on page 1856 and [Payment Agreement Request \(With Approval\) Status Transition](#) on page 1856. If the payment agreement request type is without approval then payment agreement status will automatically move from draft to active. The approval configuration algorithm **C1-PA-APPEXT** decides whether the request will be sent for approval or not. If the payment agreement request type is with approval then payment agreement will be sent for approval depending on:

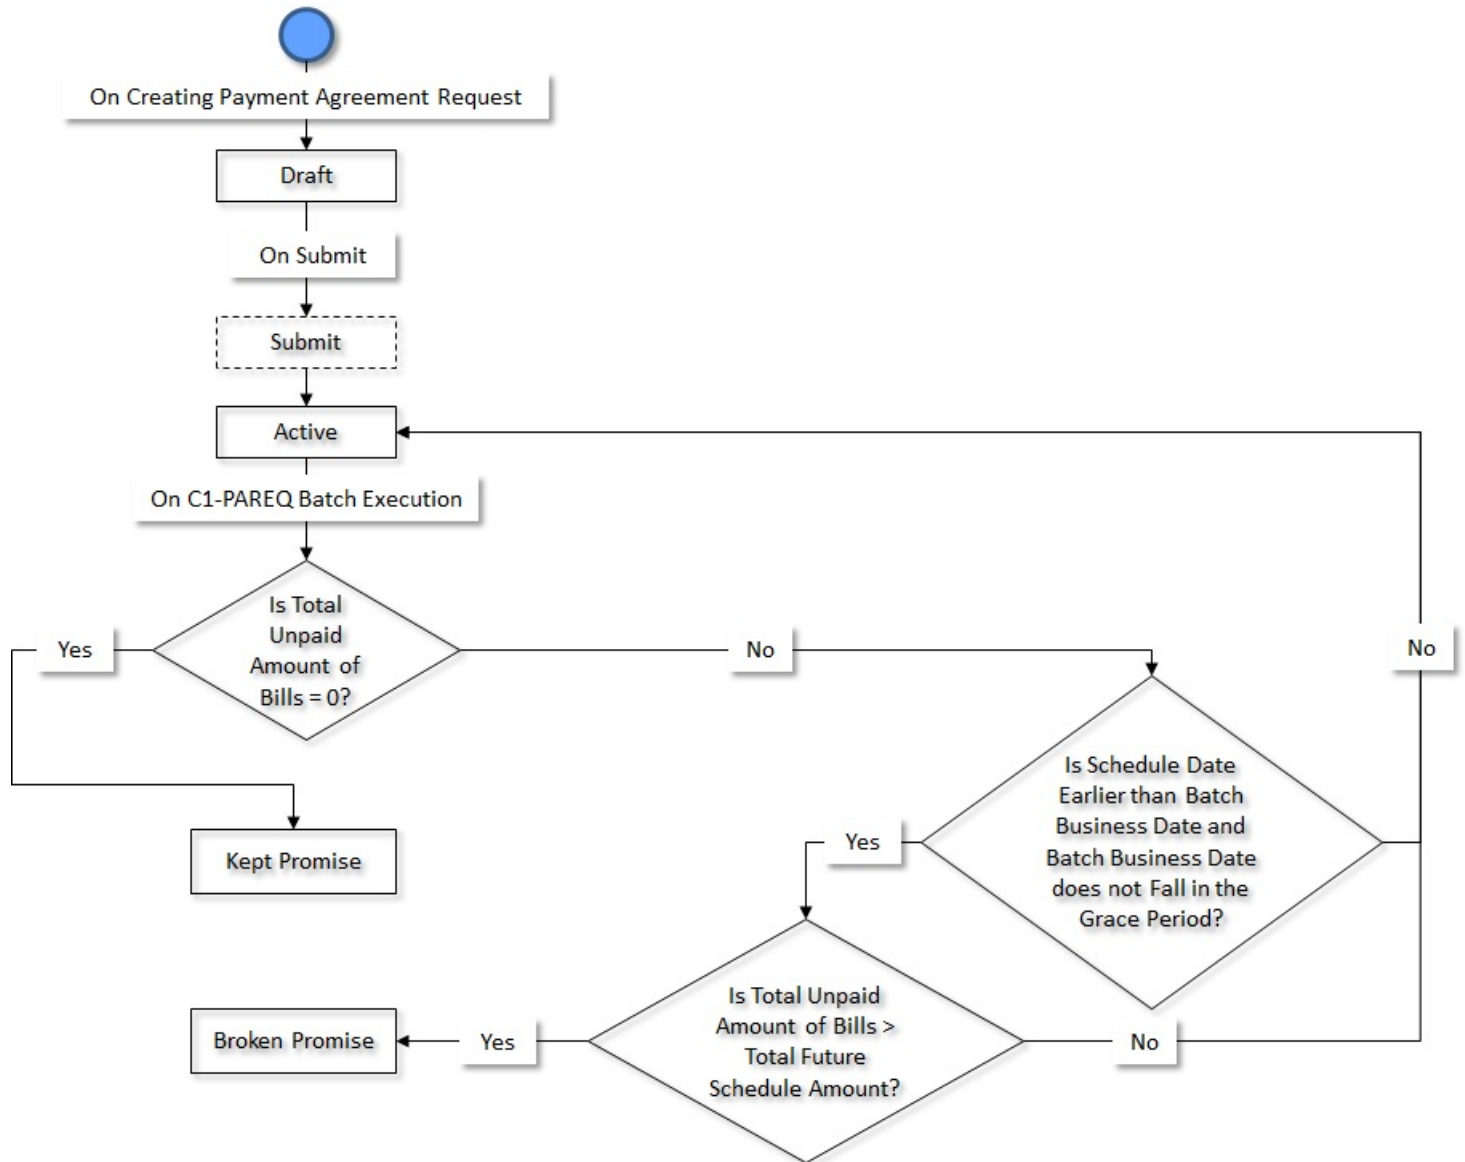

- The number of days checked for approval workflow
- Payment agreement statuses (active, broken, kept) to be considered
- The maximum number of payment agreements allowed

**Note:** The lifecycle of a payment agreement request creation is driven by the respective business object using which the request is created. The payment agreement request feature explained in this document is articulated based on the lifecycle and logic defined in the business objects.

For more information on how to setup the payment agreement request process, see [Prerequisites](#) on page 1857.

## Payment Agreement Request (Without Approval) Status Transition

The following figure graphically indicates how a payment agreement request moves from one status to another when approval workflow is off:

## Payment Agreement Request (With Approval) Status Transition

The following figure graphically indicates how a payment agreement request moves from one status to another when approval workflow is on:

## Prerequisites

To setup the payment agreement request process, you need to do the following:

- Define the required payment agreement request types in the system
- Define the required characteristic types where the characteristic entity is set to **Payment Agreement Request**

- Define the required characteristic types where the characteristic entity is set to **Payment Agreement Request Type**
- Define the required pay methods for **Payment Agreement Request**
- Define the required third party payors for **Payment Agreement Request**
- Create an algorithm using the **C1-PA-INFO** algorithm type if you want to create Payment Agreement Requests using the payment agreement request information.
- Define the kept promise status reason for the **C1-PaymentAgreementRequest** business object
- Define the broken promise status reason for the **C1-PaymentAgreementRequest** business object
- Defined rejected status reason for the **C1-PaymentAgreementRequest** business object
- Assign the **C1-PAREQ** To Do type to a To Do role whose users must receive To Do generated while submitting or resubmitting a payment agreement request for approval
- The **Payment Agreement Request Periodic Monitor (C1-PAREQ)** batch process to monitor the payment agreement request and move the request to next stage

## Algorithms Used in C1-PaymentAgreementRequest

The following table lists the algorithms which are attached to the **C1-PaymentAgreementRequest** business object:

System Event	Algorithm	Algorithm Type	Description
Information	C1-PA-INFO	C1-PA-INFO	Refer to <a href="#">C1-PA-INFO</a>
Pre-Processing	C1-PA-PRE	C1-PA-PRE	<a href="#">C1-PA-PRE</a>
Validation	C1-PA-VAL	C1-PA-VAL	<a href="#">C1-PA-VAL</a>

The following table lists the algorithms which are used in the lifecycle of the **C1-PaymentAgreementRequest** business object:

Status	System Event	Algorithm	Algorithm Type	Description
Submit	Enter	C1-PA-SUBMIT	C1-PA-SUBMIT	<a href="#">C1-PA-SUBMIT</a>
Approval In Progress	Enter	C1-PA-APPENT	C1-PA-APPENT	<a href="#">C1-PA-APPENT</a>
Approval In Progress	Exit	C1-PA-APPEXT	C1-PA-APPEXT	<a href="#">C1-PA-APPEXT</a>
Return to Submitter	Enter	C1-PA-RESUB	C1-PA-RESUB	<a href="#">C1-PA-RESUB</a>
Active	Monitor	C1-PA-MONTR	C1-PA-MONTR	<a href="#">C1-MONTR</a>
Active	Enter	C1-PA-ACTENT	C1-PA-ACTENT	<a href="#">C1-ACTENT</a>

## Payment Agreement Request Type

Oracle Revenue Management and Billing allows you to define, edit, copy and delete a payment agreement request type using which you can pay current unpaid debt bills in multiple installments whose payment amount is greater than zero. A payment agreement provide flexibility in payment of installment amount and schedule of payment.

The **C1-PaymentAgreementRequest** business object is created for payment agreement maintenance.

The **Payment Agreement Request Type** screen consists of the following zones:

- [Payment Agreement Request Type List](#) on page 1859
- [Payment Agreement Request Type](#) on page 1859

## Payment Agreement Request Type List

The **Payment Agreement Request Type List** zone lists payment agreement request types that are already defined in the system. It contains the following columns:

Column Name	Column Description
Payment Agreement Request Type	Displays the payment agreement request type.
Description	Displays the description of the payment agreement request type.
Edit	On clicking the <b>Edit</b> (  ) icon, the <b>Payment Agreement Request Type</b> screen appears where you can edit the details of the payment agreement request type.
Duplicate	On clicking the <b>Duplicate</b> (  ) icon, the <b>Payment Agreement Request Type</b> screen appears where you can define a payment agreement request type using an existing payment agreement request type.
Delete	On clicking the <b>Delete</b> (  ) icon, you can delete the payment agreement request type.  <b>Note:</b> You can delete a payment agreement request type only when you have not created a payment agreement request using the payment agreement request type.

On clicking the **Broadcast** () icon corresponding to a payment agreement request type, the **Payment Agreement Request Type** zone appears with the details of the respective payment agreement request type.

## Payment Agreement Request Type

The **Payment Agreement Request Type** zone displays the details of the payment agreement request type. This zone contains the following sections:

- **Main** – This section provides basic information about the payment agreement request type. It contains the following fields:

Field Name	Field Description
Payment Agreement Request Type	Displays the payment agreement request type.
Description	Displays the description of the payment agreement request type.
Payment Agreement Request Business Object	<p>Indicates the business object that will be used to create the payment agreement request. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.</p>
Detailed Description	Displays additional information about the payment agreement request type.
Status	<p>Indicates the status of the payment agreement request type. The valid values are:</p> <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>
Status Change Notification Type	<p>Indicates the notification type on the status change of payment agreement request type. The valid values are:</p> <ul style="list-style-type: none"> <li>• Alert</li> <li>• To Do</li> <li>• Both</li> </ul>
Approval Required	Indicates whether approval is required while creating payment agreement request using the payment agreement request type.
Approval To Do Type	<p>Indicates that the To Do entry of the specified To Do type must be created when you submit the payment agreement request for approval.</p> <p><b>Note:</b></p> <p>This field appears only when the <b>Approval Required</b> check box is selected. It has a link. On clicking the link, the <b>To Do Type</b> screen appears with the details of the respective To Do type.</p> <p>The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.</p>
Approval To Do Role	<p>Indicates that users with the specified To Do role can only approve or reject the payment agreement request submitted for approval.</p> <p><b>Note:</b></p> <p>This field appears only when the <b>Approval Required</b> check box is selected. It has a link. On clicking the link, the <b>To Do Role</b> screen appears with the details of the respective To Do role.</p>

Field Name	Field Description
Submitter To Do Type	<p>Indicates the To Do type for the submitter when the payment agreement request type is resubmitted by the approver.</p> <p><b>Note:</b> This field appears only when the <b>Approval Required</b> check box is selected. It has a link. On clicking the link, the <b>To Do Type</b> screen appears with the details of the respective To Do type.</p> <p>The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.</p>
Submitter To Do Role	<p>Indicates the To Do role of the submitter when the payment agreement request type is resubmitted by the approver.</p> <p><b>Note:</b> This field appears only when the <b>Approval Required</b> check box is selected. It has a link. On clicking the link, the <b>To Do Role</b> screen appears with the details of the respective To Do role.</p>

- **Characteristics** – This section lists the characteristics defined for the payment agreement request type. It contains the following columns:

Column Name	Column Description	Mandatory (Yes Or No)
Characteristic Type	Indicates the characteristic type.	No
Characteristic Value	Displays the value of the characteristic type.	No

- **Record Actions** – This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the payment agreement request type.
Delete	<p>Used to delete the payment agreement request type.</p> <p><b>Note:</b> You can delete a payment agreement request type only when you have not created a payment agreement request using the payment agreement request type.</p>
Duplicate	Used to create a new payment agreement request type using an existing payment agreement request type.

- **Record Information** – This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the payment agreement request type is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.

By default, the **Payment Agreement Request Type** zone does not appear in the **Payment Agreement Request Type** screen. It appears only when you click the **Broadcast**  icon corresponding to a payment agreement request type in the **Payment Agreement Request Type List** zone.

### Related Topics

How to view the details of a payment agreement request type	<a href="#">Viewing the Payment Agreement Request Type Details</a> on page 1871

## Defining a Payment Agreement Request Type

### Prerequisites

To define a payment agreement request type, you should have:

- Payment agreement request business objects defined in the application
- The Payment Agreement Request Information algorithm is defined using the **C1-PA-INFO** algorithm type
- **C1-PAREQ** To Do Type assigned to a To Do role whose users must receive To Do generated while submitting a payment agreement request for approval.

### Procedure

To define a payment agreement request type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **P** and then click **Payment Agreement Request Type**.  
A sub-menu appears.
3. Click the **Add** option from the **Payment Agreement Request Type** sub-menu.  
The **Select Business Object** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Payment Agreement Request Type Business Object	Used to indicate the business object that you want to use to create the payment agreement request type.	Yes

**Tip:** Alternatively, you can access the **Select Business Object** screen by clicking the **Add** button in the **Page Title** area of the **Payment Agreement Request Type** screen.

**Note:** The **Select Business Object** screen appears only when there are multiple payment agreement request type business objects defined in the application. If there is only one payment agreement request type business object defined in the application, the **Payment Agreement Request Type** screen appears.

4. Select the required payment agreement request type business object from the respective field.
5. Click **OK**.

The **Payment Agreement Request Type** screen appears. It contains the following sections:

- **Main** – Used to specify basic details about the payment agreement request type.
- **Characteristics** – Used to define characteristics for the payment agreement request type.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Payment Agreement Request Type	Used to specify the payment agreement request type.	Yes
Business Object	Indicates the payment agreement request type business object used while defining the payment agreement request type.	Not applicable
Description	Used to specify the description for the payment agreement request type.	Yes
Payment Agreement Request Business Object	Used to indicate the business object that you want to use while creating the payment agreement request.	Yes
Detailed Description	Used to specify additional information about the payment agreement request type.	No
Status	Used to indicate the status of the payment agreement request type. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>	Yes
Status Change Notification Type	Used to indicate the notification type on the status change of payment agreement request type. The valid values are: <ul style="list-style-type: none"> <li>• Alert</li> <li>• To Do</li> <li>• Both</li> </ul>	No

Field Name	Field Description	Mandatory (Yes or No)
Approval Required	Used to indicate whether approval is required for creating payment agreement request using the payment agreement request type.	No
Approval To Do Type	Used to indicate that To Do of the specified To Do type must be created when you submit the payment agreement request for approval. <b>Note:</b> This field appears only when the <b>Approval Required</b> check box is selected.	Yes (Conditional) <b>Note:</b> This field is required only when the <b>Approval Required</b> option is selected.
Approval To Do Role	Used to indicate that users with the specified To Do role can only approve the payment agreement request submitted for approval. <b>Note:</b> This field appears only when the <b>Approval Required</b> check box is selected.	Yes (Conditional) <b>Note:</b> This field is required only when the <b>Approval Required</b> option is selected. The list will include only those To Do roles which are associated with the To Do type specified in the <b>Approval To Do Type</b> field.
Submitter To Do Type	Used to indicate the To Do type for the submitter when the payment agreement request is resubmitted by the approver. <b>Note:</b> This field appears only when the <b>Approval Required</b> check box is selected.	Yes (Conditional) <b>Note:</b> This field is required only when the <b>Approval Required</b> option is selected.
Submitter To Do Role	Used to indicate the To Do role for the submitter when the payment agreement request is resubmitted by the approver. <b>Note:</b> This field appears only when the <b>Approval Required</b> check box is selected.	Yes (Conditional) <b>Note:</b> This field is required only when the <b>Approval Required</b> option is selected. The list will include only those To Do roles which are associated with the To Do type specified in the <b>Submitter To Do Type</b> field.

6. Enter the required details.
7. Define characteristics for the payment agreement request type, if required.
8. Click **Save**.

The payment agreement request type is defined.

How to define characteristics for a payment agreement request type	<a href="#">Defining Characteristics for a Payment Agreement Request Type</a> on page 1865

## Defining Characteristics for a Payment Agreement Request Type

### Prerequisites

To define characteristics for a payment agreement request type, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to Payment Agreement Request Type)

### Procedure

To define characteristics for a payment agreement request type:

- Ensure that the **Characteristics** section is expanded when you are defining, editing, or copying a payment agreement request type.

The **Characteristics** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Type	Used to indicate the characteristic type.  <b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to Payment Agreement Request Type.	Yes (Conditional)  <b>Note:</b> This field is required when you are defining a characteristic for the payment agreement request type.
Characteristic Value	Used to specify the value for the characteristic type.  <b>Note:</b> On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	Yes (Conditional)  <b>Note:</b> This field is required when you are defining a characteristic for the payment agreement request type.

- Enter the required details.

**Note:** If you select a predefined characteristic type, the **Search**  icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

- If you want to define more than one characteristic for the payment agreement request type, click the **Add**  icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from the payment agreement request type, click the **Delete**  icon corresponding to the characteristic.

## Editing a Payment Agreement Request Type

### Prerequisites

To edit a payment agreement request type, you should have:

- Payment agreement request business objects defined in the application
- The Payment Agreement Request Information algorithm is defined using the **C1-PA-INFO** algorithm type
- **C1-PAREQ** To Do Type assigned to a To Do role whose users must receive To Do generated while submitting a payment agreement request for approval.

### Procedure

To edit a payment agreement request type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **P** and then click **Payment Agreement Request Type**.  
A sub-menu appears.
3. Click the **Search** option from the **Payment Agreement Request Type** sub-menu.  
The **Payment Agreement Request Type** screen appears.
4. In the **Payment Agreement Request Type List** zone, click the **Edit** (✎) icon in the **Edit** column corresponding to the payment agreement request type whose details you want to edit.

The **Payment Agreement Request Type** screen appears. It contains the following sections:

- **Main** – Used to specify basic details about the payment agreement request type.
- **Characteristics** – Used to define characteristics for the payment agreement request type.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Payment Agreement Request Type	Displays the payment agreement request type.	Not applicable
Business Object	Indicates the payment agreement request type business object used while defining the payment agreement request type.	Not applicable
Description	Used to specify the description for the payment agreement request type.	Yes
Upload Request Business Object	Used to specify the business object that you want to use while creating the payment agreement request.	Yes
Detailed Description	Used to specify additional information about the payment agreement request type.	No

Field Name	Field Description	Mandatory (Yes or No)
Status	Used to indicate the status of the payment request type. The valid values are: <ul style="list-style-type: none"> <li>Active</li> <li>Inactive</li> </ul>	Yes
