## **License Restrictions Warranty/Consequential Damages Disclaimer**

This software and related documentation are provided under a license agreement containing restrictions on use and disclosure, and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or de-compilation of this software, unless required by law for interoperability, is prohibited.

## **Warranty Disclaimer**

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

## **Restricted Rights Notice**

If this software or related documentation is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, the following notice is applicable:

## **U.S. GOVERNMENT RIGHTS**

Oracle programs, including any operating system, integrated software, any programs installed on the hardware, documentation, and/or technical data delivered to U.S. Government end users are “commercial computer software” or “commercial technical data” pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, use, duplication, disclosure, modification, and adaptation of the programs, including any operating system, integrated software, any programs installed on the hardware, documentation, and/or technical data shall be subject to license terms and restrictions as mentioned in Oracle License Agreement, and to the extent applicable, the additional rights set forth in FAR 52.227-19, Commercial Computer Software--Restricted Rights (June 1987). No other rights are granted to the U.S. Government.

## **Hazardous Applications Notice**

This software is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure the safe use of this software. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software in dangerous applications.

## **Third Party Content, Products, and Services Disclaimer**

This software and documentation may provide access to or information on content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third party content, products, or services.

## **Chapter IV: Customer 360° View.....175**

Prerequisites.....	177
Customer 360° View.....	177
360° Search.....	177
Searching for a Person.....	185
Searching for an Account.....	186
Searching for a Policy.....	187
Viewing the 360° Information of a Person.....	188
Viewing the 360° Information of an Account.....	190
Viewing the 360° Information of a Policy.....	191
Viewing the Pricing Information of a Parent Customer.....	192
Viewing the Pricing Information of a Bill Group.....	194
Customer 360° Information.....	196
Customer 360° Information - Person.....	201
Person Information.....	202
Person Characteristics.....	203
Child Persons.....	204
Person Hierarchy.....	204
Person Billing Hierarchy.....	205
Bill Group Derivation and Pricing Parameters.....	208
Bill Group Sorting.....	210
Customer Contacts.....	211
Bill Groups Created Via Customer Registration.....	212
Customer 360° Information - Account.....	212
Account List.....	213
Account Information.....	214
Account Characteristics.....	216
Administrative Contracts.....	216
Auto Pay Details.....	217
Account Financial and Collections Summary.....	217
Billing and Adjustment Summary.....	218
Open Bills.....	219
Billed Vs Paid.....	220
Timeline.....	223
Customer 360° Information - Policy.....	225
Policy List.....	226
Policy Information.....	227
Policy Persons.....	228
Policy Plans.....	228
Customer 360° Information - Pricing.....	229
Parent Customer Pricing Rules.....	231
Bill Group ASO Policy Pricing Rule Summary.....	234
Parent Customer Pricing Rule Summary.....	235
Bill Group ASO Policy Information.....	236
Bill Group ASO Policy Pricing Rules.....	237
Bill Group Pricing Groups.....	242
Pricing Rule Approval Transactions.....	243
Policy Plan Pricing Rule Summary.....	244
Policy Plan Information.....	245

Policy Plan Pricing Rules.....	246
Defining a Sort ID for a Bill Group.....	247
Editing a Sort ID of a Bill Group.....	248
Deleting a Sort ID of a Bill Group.....	249
Creating a Bill Group Sorting Upload Request.....	250
Defining the Derivation and Pricing Parameters for a Bill Group and Sort ID Combination.....	252
Editing the Derivation and Pricing Parameters of a Bill Group and Sort ID Combination..	255
Creating a Bill Group Derivation and Pricing Parameters Upload Request.....	256
Viewing the Pricing Rules Defined for a Policy of a Bill Group.....	258
Viewing the Pricing Groups of a Bill Group.....	259
Renewing a Self-Funded Policy of a Bill Group.....	260
Viewing the Bill Details.....	262
Viewing the Pricing Rules Defined for a Policy Plan.....	263
Bill Information.....	264
Bill Information.....	265
Adjustments.....	265
Settlement Activities.....	265
Bill Segment Summary.....	266
Bill Segment Details.....	266
Hold Details.....	267
Offset Details.....	268
Refund and Write Off Details.....	268

## **Chapter V: Pricing Management.....271**

Types of Pricing.....	273
Multi Parameter Based Pricing.....	273
Price Assignment Search Mechanism.....	277
Person Relationship Type Sequence.....	279
Pricing Eligibility.....	281
Persisting Interest Rate for Rate Type Price Items.....	282
Persisting Fee for Fee Type Price Items.....	283
Repricing.....	283
Two-Dimensional Pricing.....	288
Types of Price Item Bundle.....	288
Regular Bundle.....	288
Ratio Bundle.....	290
Phantom Bundle.....	292
Parameter.....	294
Parameter (Used for Searching).....	294
Search Parameter.....	294
Searching for a Parameter.....	297
Defining a Parameter.....	297
Editing a Parameter.....	303
Deleting a Parameter.....	309
Copying a Parameter.....	310
Viewing the Parameter Details.....	315
Parameter (Used for Viewing).....	316
Parameter.....	316
Price Item.....	318
Price Item (Used for Searching).....	319
Search Price Item.....	319
Searching for a Price Item or Price Item Bundle.....	322
Defining a Price Item or Price Item Bundle.....	322
Associating a Parameter with a Price Item or Price Item Bundle.....	326

Defining Valid Predefined Parameter Values for a Price Item or Price Item Bundle.....	328
Associating a Price Item or Price Item Bundle with a Division.....	329
Defining Division-Specific SQIs for a Price Item or Price Item Bundle.....	330
Defining Division-Specific Characteristics for a Price Item or Price Item Bundle..	331
Defining Division-Specific Accrual Type Criteria for a Price Item or Price Item Bundle.....	333
Defining a Characteristic for a Price Item or Price Item Bundle.....	334
Copying a Price Item or Price Item Bundle.....	335
Viewing the Price Item or Price Item Bundle Details.....	338
Price Item (Used for Viewing).....	339
Price Item.....	340
Parameters.....	342
Predefined Parameter Values for Price Item.....	342
Divisions.....	343
Division-Specific SQIs for Price Item.....	343
Division-Specific Characteristics for Price Item.....	344
Division-Specific Accrual Type Criteria for Price Item.....	344
Price Item Relationship.....	345
Editing a Price Item or Price Item Bundle.....	346
Price Item Relationship.....	349
Assigned Price Items.....	350
Viewing the Price Items or Price Item Bundles Associated with a Parent Price Item.....	353
Viewing the Price Items or Price Item Bundles Added to a Price Item Bundle.....	353
Associating a Price Item or Price Item Bundle with a Parent Price Item.....	353
Adding a Price Item or Price Item Bundle to a Price Item Bundle.....	356
Setting the Parameters for a Price Item or Price Item Bundle.....	358
Defining Relationship-Specific Characteristics for a Price Item or Price Item Bundle.....	360
Disassociating a Price Item or Price Item Bundle from a Parent Price Item.....	361
Removing a Price Item or Price Item Bundle from a Price Item Bundle.....	362
Filtering the Price Items or Price Item Bundles Associated with a Parent Price Item.....	362
Filtering the Price Items or Price Item Bundles Added to a Price Item Bundle.....	363
Price Item Assignments.....	364
Active Price Lists where Price Item is Assigned.....	364
Persons to whom Price Item is Assigned.....	364
Accounts where Price Item is Assigned.....	365
Viewing the Price Lists, Persons, or Accounts where a Price Item is Assigned.....	365
Price List.....	366
Price List (Used for Searching).....	367
Search Price List.....	367
Price List Price Items.....	370
Searching for a Price List.....	371
Viewing Price Items Assigned to a Price List.....	372
Defining a Price List.....	373
Defining the Price List Hierarchy.....	375
Defining a Characteristic for a Price List.....	376
Associating a Price List with a Division.....	378
Defining Eligibility Criteria for a Price List.....	378
Copying a Price List.....	380
Viewing the Price List Details.....	381
Price List (Used for Viewing).....	382
Price List.....	382
Eligibility Criteria.....	384

Editing a Price List.....	385
Price List Price Item Pricing.....	387
Price List Price Items.....	388
Search Price Item.....	389
Viewing Price Items Assigned to a Price List.....	394
Removing a Price Item from a Price List.....	395
Viewing a Price Item Pricing.....	395
Editing a Price Item Pricing of a Price List.....	397
Assigning a Price Item to a Price List.....	401
Defining Characteristics for a Price Item Pricing.....	405
Defining Parameters for a Price Item Pricing.....	406
Defining TFM Information in a Price Item Pricing.....	407
Price List Assignment.....	409
Price List Assignments.....	409
Price List Price Items.....	411
Search Price List for Assignment.....	412
Viewing Price Lists Assigned to an Account.....	415
Viewing Price Lists Assigned to a Person.....	416
Viewing Price Items Assigned to a Price List.....	417
Assigning a Price List to an Account.....	418
Assigning a Price List to a Person.....	421
Defining Characteristics for a Price List Assignment.....	424
Editing the Price List Assignment Details of an Account.....	425
Editing the Price List Assignment Details of a Person.....	428
Price List Assignments.....	431
Accounts where Price List is Assigned.....	431
Persons to whom Price List is Assigned.....	432
Viewing Accounts and Persons where Price List is Assigned.....	433
Persons and Accounts Eligible for Price List Assignment.....	433
Eligible Accounts.....	434
Eligible Persons.....	434
Assigning a Price List to One or More Eligible Accounts.....	435
Assigning a Price List to One or More Eligible Persons.....	437
Defining Characteristics for a Price List Assignment.....	438
Pricing (Account).....	439
Effective Price Assignments for Account.....	440
Search Price Item.....	445
Viewing Effective Price Assignments of an Account.....	450
Filtering Effective Price Assignments of an Account.....	451
Exporting Effective Price Assignments of an Account.....	452
Copying a Price Item Pricing.....	455
Viewing a Price Item Pricing.....	456
Editing a Price Item Pricing of an Account.....	458
Overriding a Price Item Pricing of an Account.....	462
Assigning a Price Item to an Account.....	466
Defining Characteristics for a Price Item Pricing.....	470
Defining Parameters for a Price Item Pricing.....	471
Defining TFM Information in a Price Item Pricing.....	472
Pricing (Person).....	473
Effective Price Assignments for Person.....	474
Search Price Item.....	479
Viewing Effective Price Assignments of a Person.....	484
Filtering Effective Price Assignments of a Person.....	485
Exporting Effective Price Assignments of a Person.....	486
Copying a Price Item Pricing.....	489
Viewing a Price Item Pricing.....	490

Editing a Price Item Pricing of a Person.....	492
Overriding a Price Item Pricing of a Person.....	496
Assigning a Price Item to a Person.....	500
Defining Characteristics for a Price Item Pricing.....	504
Defining Parameters for a Price Item Pricing.....	505
Defining TFM Information in a Price Item Pricing.....	506
Price Item Pricing (Used for Viewing).....	507
Price Item Pricing.....	508
Rate and Price Component Summary.....	511
Rate Components.....	512
Price Components.....	512
Tiering Criteria.....	514
Pricing Eligibility Criteria.....	514
Two-Dimensional Pricing.....	516
Defining a Price Item Pricing.....	516
Viewing the Price Components of a Rate Component.....	519
Viewing the Tiering Criteria of a Price Component.....	520
Viewing the Pricing Eligibility Criteria of a Price Component.....	522
Defining a Price Component for a Rate Component.....	524
Defining a Tiering Criteria for a Price Component.....	527
Defining a Pricing Eligibility Criteria for a Price Component.....	530
Editing a Price Component.....	534
Deleting a Price Component.....	537
Editing a Tiering Criteria of a Price Component.....	540
Deleting a Tiering Criteria of a Price Component.....	544
Editing a Pricing Eligibility Criteria of a Price Component.....	547
Deleting a Pricing Eligibility Criteria of a Price Component.....	554
Deleting a Price Item Pricing.....	557
Editing a Price Item Pricing.....	560
Submitting a Price Item Pricing.....	566
Overriding a Price Item Pricing.....	569
Editing the Two-Dimensional Pricing.....	570
Pricing Simulation.....	572
Search Pricing.....	572
Simulation - Effective Pricing Information.....	576
Searching Pricing Simulation for Account or Price List.....	581
Viewing Pricing Simulation.....	582
Exporting Effective Price Simulation.....	583
Eligible Price List.....	585
Search Eligible Price Lists.....	585
Rate Definition.....	587
Rate Schedule Components.....	588
Create/Edit Rate Definition.....	589
Defining Tiering Setup of a Rate Component.....	590
Editing Tiering Setup of a Rate Component.....	591
Deleting Tiering Setup of a Rate Component.....	592
Tiering Criterion.....	592
Tiering Criterion List.....	593
Edit Tiering Criterion.....	593
Create Tiering Criterion.....	594
Creating a Tiering Criterion.....	594
Editing a Tiering Criterion.....	595
Variance Parameter.....	595
Filtering the Variance Parameters.....	595
Defining a Variance Parameter.....	596
Editing a Variance Parameter.....	597

Deleting a Variance Parameter.....	597
Person to Person Relationship Type Sequence.....	598
Search Person Relationship Type Sequence for Price Item.....	599
Search Person Relationship Type Sequence for Division.....	600
Searching Relationship Type Sequence for a Division, Price Item, and Price Item Parameters.....	601
Defining Relationship Type Sequence for a Division, Price Item, and Price Item Parameters.....	602
Editing Relationship Type Sequence of a Division, Price Item, and Price Item Parameters.....	603
Deleting Relationship Type Sequence of a Division, Price Item, and Price Item Parameters.....	605
Viewing Relationship Type Sequence of a Division, Price Item, and Price Item Parameters.....	605
Searching Relationship Type Sequence for a Division.....	606
Defining Relationship Type Sequence for a Division.....	607
Editing Relationship Type Sequence of a Division.....	608
Deleting Relationship Type Sequence of a Division.....	609
Viewing Relationship Type Sequence of a Division.....	609
Multiple Parameter Based Post-Processing Pricing.....	610

## **Chapter VI: Division.....613**

Division.....	614
Division - Main.....	616
Division - Access Groups.....	617
Division - Price Items.....	618
Division - Price Lists.....	618
Division - Languages.....	619
Division - Invoice Currencies.....	619
Division - Person Identifier Types.....	619
Division - Algorithms.....	620
Division - Characteristics.....	620
Division - Bill Messages.....	621
Division - Party Char Types.....	621
Division - Bill Cycles.....	622
Division - Account Identifier Types.....	622
Division - Price Item Characteristics.....	622
Searching for a Division.....	623
Defining a Division.....	624
Associating an Access Group with a Division.....	627
Associating a Price Item with a Division.....	628
Associating a Price List with a Division.....	630
Associating a Language with a Division.....	631
Associating an Invoice Currency with a Division.....	632
Associating a Person Identifier Type with a Division.....	634
Associating an Algorithm with a Division.....	635
Defining a Characteristic for a Division.....	641
Associating a Bill Message with a Division.....	642
Associating a Party Characteristic Type with a Division.....	644
Associating a Bill Cycle with a Division.....	645
Associating an Account Identifier Type with a Division.....	646
Defining a Division-Specific Characteristic for a Price Item.....	647
Associating a To Do Type and To Do Role with a Division.....	648

<b>Chapter VII: Approval Workflow.....</b>	<b>651</b>
Most Commonly Used Terms.....	653
Approval Workflow Process.....	653
Prerequisites.....	655
Approval Transaction.....	657
Search Approval Transaction.....	657
Approval Transaction Log.....	661
Searching for an Approval Transaction.....	662
Viewing the Log of an Approval Transaction.....	662
Comparison: New versus Existing.....	663
Approving an Approval Transaction.....	663
Rejecting an Approval Transaction.....	664
Canceling an Approval Transaction.....	665
Modifying an Approval Transaction.....	666
Withdrawing an Approval Transaction.....	667
Resolving an Approval Transaction.....	667
Approve Price Assignment.....	668
Search.....	668
List of Price Assignments.....	671
Approve Price Assignment - Comparison: New versus Existing.....	672
Approval Transaction Log.....	674
Approving a Price Assignment for an Account.....	675
Approving a Price Assignment for a Person.....	676
Approving a Price Assignment for a Price List.....	677
Rejecting a Price Assignment for an Account.....	678
Rejecting a Price Assignment for a Person.....	679
Rejecting a Price Assignment for a Price List.....	681
Canceling a Price Assignment for an Account.....	682
Canceling a Price Assignment for a Person.....	683
Canceling a Price Assignment for a Price List.....	685
Modify Price Assignment.....	686
Search.....	686
List of Price Assignments.....	690
Modifying a Price Assignment for an Account.....	691
Modifying a Price Assignment for a Person.....	692
Modifying a Price Assignment for a Price List.....	693
Withdrawing a Price Assignment for an Account.....	693
Withdrawing a Price Assignment for a Person.....	694
Withdrawing a Price Assignment for a Price List.....	695
Viewing the Log of an Approval Transaction.....	696
Resolve Price Assignment.....	697
Search.....	697
List of Price Assignments.....	701
Resolving a Price Assignment for an Account.....	702
Resolving a Price Assignment for a Person.....	703
Resolving a Price Assignment for a Price List.....	704
Withdrawing a Price Assignment for an Account.....	704
Withdrawing a Price Assignment for a Person.....	705
Withdrawing a Price Assignment for a Price List.....	706
Viewing the Log of an Approval Transaction.....	707
Approval Workflow Group (Used for Searching).....	708
Search Approval Workflow Group.....	708
Searching for an Approval Workflow Group.....	709
Viewing the Approval Workflow Group Details.....	710

Defining an Approval Workflow Group.....	710
Adding a Business Object.....	714
Defining a Group BO Relation.....	716
Approval Workflow Group (Used for Viewing).....	717
Approval Workflow Group.....	718
Editing an Approval Workflow Group.....	720
Deleting an Approval Workflow Group.....	720
Editing a Business Object.....	721
Deleting a Business Object.....	723
Editing a Group BO Relation.....	723
Deleting a Group BO Relation.....	725
Approval Workflow Chain (Used for Searching).....	725
Search Approval Workflow Chain.....	725
Searching for an Approval Workflow Chain.....	726
Viewing the Approval Workflow Chain Details.....	727
Defining an Approval Workflow Chain.....	727
Defining Approval Levels for an Approval Workflow Chain.....	728
Approval Workflow Chain (Used for Viewing).....	729
Approval Workflow Chain.....	729
Editing an Approval Workflow Chain.....	730
Deleting an Approval Workflow Chain.....	731
Approval Workflow Criterion Type (Used for Searching).....	732
Search Approval Workflow Criterion Type.....	732
Searching for an Approval Workflow Criterion Type.....	732
Viewing the Approval Workflow Criterion Type Details.....	733
Defining an Approval Workflow Criterion Type.....	733
Approval Workflow Criterion Type (Used for Viewing).....	735
Approval Workflow Criterion Type.....	735
Editing an Approval Workflow Criterion Type.....	736
Deleting an Approval Workflow Criterion Type.....	738
Approval Workflow Group Chain Linkage (Used for Searching).....	738
Search Approval Workflow Group Chain Linkage.....	738
Searching for an Approval Workflow Group Chain Linkage.....	739
Viewing the Approval Workflow Group Chain Linkage Details.....	740
Defining an Approval Workflow Group Chain Linkage.....	740
Defining Group Chain Linkage Criteria for an Approval Workflow.....	742
Defining a Field Approval Rule.....	742
Approval Workflow Group Chain Linkage (Used for Viewing).....	744
Approval Workflow Group Chain Linkage.....	745
Editing an Approval Workflow Group Chain Linkage.....	747
Deleting an Approval Workflow Group Chain Linkage.....	748
Approval Workflow Setting (Used for Searching).....	748
Search Approval Workflow Group.....	748
Searching for an Approval Workflow Group.....	749
Viewing the Approval Workflow Setting Details.....	750
Defining Approval Workflow Group Settings.....	750
Approval Workflow Setting (Used for Viewing).....	752
Approval Workflow Group Settings.....	752
Editing Approval Workflow Group Settings.....	754
Deleting Approval Workflow Group Settings.....	754
Regenerating Input and Display UI Maps.....	755
Approval Workflow Reason (Used for Searching).....	755
Approval Workflow Reason List.....	755
Filtering the Approval Workflow Reasons.....	756
Viewing the Approval Workflow Reason Details.....	757
Defining an Approval Workflow Reason.....	757

Approval Workflow Reason (Used for Viewing).....	758
Approval Workflow Reason.....	758
Editing an Approval Workflow Reason.....	759
Deleting an Approval Workflow Reason.....	760

## **Chapter VIII: Rules Engine.....761**

Rule Type (Used for Searching).....	763
Search Rule Type.....	763
Searching for a Rule Type.....	764
Defining a Rule Type.....	765
Defining Input and Output Parameters for a Rule Type.....	767
Associating a Characteristic Entity with a Rule Type.....	768
Associating an Algorithm with a Rule Type.....	769
Editing a Rule Type.....	770
Deleting a Rule Type.....	772
Copying a Rule Type.....	773
Viewing the Rule Type Details.....	775
Rule Type (Used for Viewing).....	775
Rule Type.....	775
Viewing the Rule Type Details.....	776
Editing a Rule Type.....	777
Rule.....	779
Search.....	779
Searching for a Rule.....	780
Viewing the Rule Details.....	781
Defining a Rule.....	781
Editing a Rule.....	785
Deleting a Rule.....	790
Copying a Rule.....	790
View Rule.....	791
Rule Information.....	791
Viewing the Rule Details.....	793
Rule Check.....	794
Rule Check.....	795

## **Chapter IX: Alternate Sequential Bill Numbers..... 797**

Sequential Bill Number Generation Algorithms.....	798
C1_ALTBLLSYS.....	798
C1_ALTBLSYS1.....	798
C1_ALTBLDV.....	801
C1_ALTBLDIV1.....	801
Enabling the Alternate Sequential Bill Numbers Feature.....	804

## **Chapter X: Currency Conversion.....807**

Prerequisites.....	809
Bill Segment Generation.....	810
Adjustment Creation.....	811
Payment and Tender Creation.....	811
Transaction Aggregation.....	812
FT GL Creation.....	812
Currency Conversion Algorithms.....	813

## **Chapter XI: Transaction Feed Management.....847**

Prerequisites.....	848
Transaction Rating Before Billing.....	848
Transaction Aggregation.....	856
Header Validation.....	857
Transaction Validation and Initial Price Item Determination.....	859
Price Item Pricing Verification.....	870
Aggregation.....	875
Clean Up.....	879
Transaction Aggregation Batch Processing.....	881
Transaction Disaggregation.....	884
Transaction Disaggregation Batch Processing.....	891
Reseeding.....	892
Transaction Cancellation.....	895
Transaction Cancellation Batch Processing.....	898
Transaction Rollback.....	899
Feed Status Transition.....	901
Transaction Status Transition.....	902
Transaction Leg Status Transition.....	903
Transaction Data File.....	911
Error List.....	914
Feed Management Dashboard.....	950
Search - Feed Level.....	950
Division Level Information.....	952
Transaction Level Information.....	953
Transaction Leg Information.....	954
Transaction Leg Service Quantity.....	955
Transaction Leg Calculation Lines.....	955
Transaction Leg Calc Line Characteristics.....	957
Searching for a Transaction Feed.....	957
Viewing Division Level Details of a Transaction Feed.....	958
Viewing Transactions that Belong to a Division.....	958
Viewing Legs of a Transaction.....	958
Viewing the SQIs Calculated for a Transaction Leg.....	959
Viewing the Calculation Lines of a Transaction Leg.....	960

Viewing Characteristics of a Calculation Line.....	960
View Billed Transactions.....	961
Search Bill.....	961
Bill Segments.....	963
Transaction Details.....	964
SQ Details.....	965
Searching for a Bill.....	965
Viewing the Bill Segments of a Bill.....	966
Viewing Transactions for which the Bill Segment is Generated.....	966
Viewing SQIs Calculated on the Billable Charge.....	967

Disaggregation Request.....	1025
Search Disaggregation Request.....	1026
Searching for a Disaggregation Request.....	1029
Creating a Disaggregation Request.....	1030
Deleting a Disaggregation Request.....	1035
Accumulation Data.....	1035

**Chapter XII: Upload Validated Payment Data..... 1037**

Payment Upload Process.....	1038
Upload Payment Records in the Pre-Staging Area.....	1038
Move Payment Records to the Staging Area.....	1039
Create Payment Events and Payments.....	1039
Prerequisites.....	1040
CSV File Format.....	1041
Payment Data File Status Transition.....	1043
Payment Record Status Transition.....	1043
Error Messages.....	1045
Payment Upload.....	1049
Search Payment Data File.....	1050
Payment Data Records.....	1052
Payment Data File Log.....	1053
Searching for a Payment Data File.....	1054
Uploading a Payment Data File.....	1054
Replacing an Existing File.....	1056
Cancelling a Payment Data File.....	1057
Moving the Payment Records to the Staging Area.....	1057
Editing a Payment Staging Record.....	1058
Viewing the Records of a Payment Data File.....	1059
Viewing the Log of a Payment Data File.....	1059
Viewing the Error Messages.....	1060

**Chapter XIII: Freeze Payments on Notification.....1061**

Freeze Payments on Notification Process.....	1063
Creating Automatic Payments and Refunds.....	1063
Generating a Flat File.....	1063
Uploading Response from Auto Clearing House (ACH).....	1063
Freezing or Canceling Automatic Payments.....	1064
Voiding Refund Requests and Canceling Refund Adjustments.....	1065
Generating To Do Entries.....	1065
Creating Tender Controls.....	1065
Prerequisites.....	1066
Automatic Payment or Refund Clearing Staging Record Status Transition.....	1067
EDI 824 File Format.....	1067
Sample EDI 824 File Format.....	1068
Automatic Payment and Refund Upload Reason.....	1069
Upload Reasons.....	1069
Defining an Upload Reason.....	1070
Editing an Upload Reason.....	1072
Deleting an Upload Reason.....	1074
Automatic Payment and Refund Clearing Staging.....	1074
Search Clearing Record.....	1075
Associated Clearing Staging Records.....	1077
Clearing Staging Upload Reasons.....	1078
Clearing Staging Characteristics.....	1078
Searching for a Clearing Record.....	1079
Viewing the Clearing Staging Records Associated to a Clearing Record.....	1079
Viewing the Upload Reason Specified in the Clearing Staging Record.....	1080
Viewing the Characteristics of the Clearing Staging Record.....	1080
Editing a Clearing Staging Record.....	1081
Defining Characteristics for a Clearing Staging Record.....	1082

Deleting a Clearing Staging Record.....	1083
<b>Chapter XIV: Trial Billing.....</b>	<b>1085</b>
Trial Bill (Used for Searching).....	1087
Search Trial Bill .....	1087
Searching for a Trial Bill.....	1088
Viewing the Trial Bill Details.....	1089
Trial Bill (Used for Viewing).....	1090
Trial Bill.....	1090
Trial Bill Segments.....	1091
Trial Bill Segment Calc Lines.....	1093
Trial Bill Segment SQ Details.....	1094
Trial Bill Segment Financial Details.....	1094
Printing a Trial Bill in the PDF Format.....	1095
Viewing the Segments of a Trial Bill.....	1095
Filtering the Trial Bill Segments.....	1096
Viewing the Calc Lines of a Trial Bill Segment.....	1096
Viewing the SQ Details of a Trial Bill Segment.....	1097
Viewing the Financial Details of a Trial Bill Segment.....	1098
<b>Chapter XV: GL Account Validation.....</b>	<b>1099</b>
Static GL Account Validation.....	1100
Dynamic GL Account Validation.....	1100
<b>Chapter XVI: Upload Validated Adjustment Data.....</b>	<b>1101</b>
Prerequisites.....	1103
CSV File Format.....	1103
Adjustment Upload Request (Without Approval) Status Transition.....	1104
Adjustment Upload Request (With Approval) Status Transition.....	1105
Algorithms Used in C1-ADJUPLD.....	1106
Upload Request Type.....	1109
Upload Request Type List.....	1110
Upload Request Type.....	1111
Defining an Upload Request Type.....	1114
Defining Characteristics for an Upload Request Type.....	1120
Editing an Upload Request Type.....	1121
Copying an Upload Request Type.....	1125
Mapping an Upload Request Type.....	1129
Deleting an Upload Request Type.....	1130
Viewing the Upload Request Type Details.....	1131
Adjustment Upload Request (Used for Searching).....	1132
Search Adjustment Upload Request.....	1132
Searching for an Adjustment Upload Request.....	1134
Uploading an Adjustment Data File.....	1134
Replacing an Adjustment Data File.....	1137
Viewing the Adjustment Upload Request Details.....	1139
Adjustment Upload Request (Used for Viewing).....	1140
Adjustment Upload Request - Main.....	1140
Adjustment Upload Request.....	1140
Adjustment Data Records.....	1143
Adjustment Upload Request - Log.....	1144
Adjustment Upload Request Log.....	1144
Cancelling an Adjustment Data File.....	1144

Creating Adjustments for an Adjustment Data File.....	1145
Submitting an Adjustment Data File for Approval.....	1146
Approving an Adjustment Data File.....	1147
Rejecting an Adjustment Data File.....	1148
Viewing the Log of an Adjustment Upload Request.....	1149
Adding a Log Entry for an Adjustment Upload Request.....	1150

## **Chapter XVII: Payment Request..... 1153**

Prerequisites.....	1155
Payment Request (Without Approval) Status Transition.....	1156
Payment Request (With Approval) Status Transition.....	1157
Algorithms Used in C1-PaymentRequest.....	1158
Algorithms Used in C1-PaymentTransferRequest.....	1162
Payment Request Type.....	1167
Payment Request Type List.....	1167
Payment Request Type.....	1168
Defining a Payment Request Type.....	1170
Defining Characteristics for a Payment Request Type.....	1173
Editing a Payment Request Type.....	1174
Copying a Payment Request Type.....	1177
Deleting a Payment Request Type.....	1180
Viewing the Payment Request Type Details.....	1181
Payment Request (Used for Searching).....	1181
Search Payment Request.....	1182
Searching for a Payment Request.....	1184
Viewing the Payment Request Details.....	1185
Payment Request (Used for Viewing).....	1186
Payment Request.....	1186
Payment Distribution.....	1192
Creating a Payment Creation Request.....	1194
Defining Characteristics for a Payment Tender.....	1199
Editing the Payment Amount.....	1200
Editing a Payment Request.....	1202
Deleting a Payment Request.....	1205
Distributing the Tender or Payment Amount.....	1206
Distributing and Freezing the Tender or Payment Amount.....	1207
Redistributing the Tender or Payment Amount.....	1208
Editing the Payment Segment Amount.....	1209
Freezing Payments Created Through a Payment Request.....	1211
Submitting a Payment Request for Approval.....	1212
Approving a Payment Request.....	1212
Rejecting a Payment Request.....	1214
Discarding a Payment Request.....	1216
Viewing the Log of a Payment Request.....	1216
Adding a Log Entry for a Payment Request.....	1217
Payment Event Summary.....	1218
Search Payment Event.....	1218
Payments.....	1221
Payment Segments.....	1223
Searching for a Payment Event.....	1223
Creating a Payment Transfer Request.....	1224
Cancelling a Payment Event.....	1228
Deleting a Payment Event.....	1229
Viewing Payments Created Through a Payment Event.....	1230
Cancelling a Payment.....	1230

Deleting a Payment.....	1231
Viewing Payment Segments of a Payment.....	1231

## **Chapter XVIII: Account Receivable Central..... 1233**

Single Offset.....	1234
Mass Offset.....	1234
Cross Currency Offset.....	1235
Hold.....	1235
Refund.....	1236
Write Off.....	1236
Dispute.....	1236
Account Receivable Central.....	1236
Search Bill .....	1236
Bill Information.....	1240
Offset Details.....	1240
Hold Details.....	1240
Garnishment Details.....	1241
Bill Line Items.....	1241
Searching for a Bill.....	1241
Viewing the Bill Details.....	1242

## **Chapter XIX: Offset Request..... 1243**

Single Offset.....	1245
Mass Offset.....	1246
Cross Currency Offset.....	1249
Prerequisites.....	1251
Offset Request (Without Approval) Status Transition.....	1252
Offset Request (With Approval) Status Transition.....	1253
Algorithms Used in C1-OffsetRequest.....	1255
C1-OFFST-INF.....	1256
F1-TODOCOMPL.....	1256

Search Bill.....	1291
Offset Request Adjustments.....	1296
Offset Request - Log.....	1296
Offset Request Log.....	1296
Viewing the Debit and Credit Bills Added to an Offset Request.....	1297
Viewing the Adjustments Created Through an Offset Request.....	1297
Adding a Debit or Credit Bill to an Offset Request.....	1298
Editing an Offset Request.....	1299
Defining a Characteristic for an Offset Request.....	1301
Editing the Offset Amount of a Debit or Credit Bill.....	1302
Removing a Debit or Credit Bill from an Offset Request.....	1303
Deleting an Offset Request.....	1303
Submitting an Offset Request.....	1304
Approving an Offset Request.....	1306
Rejecting an Offset Request.....	1308
Unapplying an Offset Request.....	1310
Viewing the Log of an Offset Request.....	1311
Adding a Log Entry for an Offset Request.....	1311

## **Chapter XX: Funding Request.....1313**

Prerequisites.....	1316
Funding Request (Without Approval) Status Transition.....	1316
Funding Request (With Approval) Status Transition.....	1317
Algorithms Used in C1-FundingReq.....	1318
C1-FUNDINFO.....	1319
C1-FUNDSUBMT.....	1319
C1-FUNDAPP.....	1320
C1-FUNDAPRVD.....	1320
F1-TODOCOMPL.....	1320
F1-AT-RQJ.....	1320
C1-FNDRESUBM.....	1321
C1-FUNDVAL.....	1321
C1-FUNDAPAY.....	1321
C1-FUNDADJCR.....	1321
C1-FUNDCANCL.....	1322
Funding Request Type.....	1322
Funding Request Type List.....	1322
Funding Request Type.....	1323
Defining a Funding Request Type.....	1326
Defining a Characteristic for a Funding Request Type.....	1333
Editing a Funding Request Type.....	1334
Deleting a Funding Request Type.....	1341
Copying a Funding Request Type.....	1342
Viewing the Funding Request Type Details.....	1349
Funding Request (Used for Searching).....	1350

Search Funding Request.....	1350
Searching for a Funding Request.....	1353
Creating a Funding Request.....	1354
Viewing the Funding Request Details.....	1355

Funding Request - Main.....	1355
Funding Request.....	1356
Search Bill.....	1359
Funding Request - Bills.....	1363
Currency Statistics.....	1363
Selected Bills.....	1364
Funding Payment Details.....	1367
Funding Adjustments.....	1367
Funding Request - Log.....	1367
Funding Request Log.....	1367
Adding a Debit or Credit Bill to a Funding Request.....	1368
Deleting a Debit or Credit Bill from a Funding Request.....	1369
Excluding a Bill from a Funding Request.....	1370
Editing a Funding Request.....	1372
Defining a Characteristic for a Funding Request.....	1373
Deleting a Funding Request.....	1374
Cancelling a Funding Request.....	1375
Submitting a Funding Request.....	1376
Approving a Funding Request.....	1378
Rejecting a Funding Request.....	1380
Requesting to Resubmit a Funding Request.....	1382
Withdrawing a Funding Request.....	1383
Transferring the Funding Amount of a Credit Bill to a Garnishment Contract.....	1384
Viewing the Garnishment Details of a Credit Bill.....	1385
Viewing the Payments Created Through a Funding Request.....	1386
Viewing the Adjustments Created Through a Funding Request.....	1387
Viewing the Log of a Funding Request.....	1387
Adding a Log Entry for a Funding Request.....	1388

## **Chapter XXI: Refund/Write Off Request..... 1389**

Refund Request (Without Approval) Status Transition.....	1391
Refund Request (With Approval) Status Transition.....	1391
Write Off Request (Without Approval) Status Transition.....	1392
Write Off Request (With Approval) Status Transition.....	1393
Algorithms Used in C1-RefundReq.....	1394
Algorithms Used in C1-WORequest.....	1399
Prerequisites.....	1403
Refund/Write Off Request Type.....	1403
Refund/Write Off Request Type List.....	1407
Refund/Write Off Request Type.....	1408
Defining a Refund or Write Off Request Type.....	1410
Defining Characteristics for a Refund or Write Off Request Type.....	1413
Editing a Refund or Write Off Request Type.....	1414
Copying a Refund or Write Off Request Type.....	1418
Deleting a Refund or Write Off Request Type.....	1421
Viewing the Refund or Write Off Request Type Details.....	1422
Refund/Write Off Request.....	1423
Search Refund/Write Off Request.....	1423
Searching for a Refund or Write Off Request.....	1427
Creating a Refund Request.....	1428

Creating a Write Off Request.....	1430

Data Records.....	1667
Upload Request - Log.....	1668
Upload Request Log.....	1668
Editing an Upload Request.....	1669
Deleting an Upload Request.....	1670
Validating an Upload Request.....	1671
Cancelling an Upload Request.....	1671
Submitting an Upload Request.....	1672
Approving an Upload Request.....	1676
Rejecting an Upload Request.....	1679
Viewing the Data Record Details.....	1680
Viewing the Log of an Upload Request.....	1681
Adding a Log Entry for an Upload Request.....	1682

## **Chapter XXV: General Ledger (GL) Accounting Template..... 1683**

GL Accounting Template (Without Approval) Status Transition.....	1688
GL Accounting Template (With Approval) Status Transition.....	1688
Algorithms Used in C1- GLAT.....	1689
Prerequisites.....	1691
GL Accounting Template (Used for Searching).....	1691
Search GL Accounting Template.....	1692
GL Accounting Template Lines.....	1693
Searching for a GL Accounting Template.....	1694
Creating a GL Accounting Template.....	1694
Viewing the GL Accounting Template Details.....	1696
Viewing the GL Accounting Template Lines Details.....	1697
GL Accounting Template (Used for Viewing).....	1697
GL Accounting Template - Main.....	1697
GL Accounting Template.....	1697

GL Accounting Template - Log.....	1699
GL Accounting Template Log.....	1699
Editing a GL Accounting Template.....	1700
Deleting a GL Accounting Template.....	1701
Submitting a GL Accounting Template.....	1702
Approving a GL Accounting Template.....	1703
Rejecting a GL Accounting Template.....	1704
Deactivating a GL Accounting Template.....	1706
Viewing the Log of a GL Accounting Template.....	1707
Adding a Log Entry for a GL Accounting Template.....	1708

## **Chapter XXVI: Payment Agreement Request.....1709**

Payment Agreement Request (Without Approval) Status Transition.....	1712
Payment Agreement Request (With Approval) Status Transition.....	1712
Prerequisites.....	1713
Algorithms Used in CI-PaymentAgreementRequest.....	1714
Payment Agreement Request Type.....	1714
Payment Agreement Request Type List.....	1715
Payment Agreement Request Type.....	1715
Defining a Payment Agreement Request Type.....	1718
Defining Characteristics for a Payment Agreement Request Type.....	1721
Editing a Payment Agreement Request Type.....	1722
Copying a Payment Agreement Request Type.....	1724
Deleting a Payment Agreement Request Type.....	1726
Viewing the Payment Agreement Request Type Details.....	1727
Payment Agreement Request (Used for Searching).....	1728
Search Payment Agreement Request.....	1728
Bill Details.....	1731
Searching for a Payment Agreement Request.....	1732
Creating a Payment Agreement Request.....	1732
Defining Characteristics for a Payment Agreement Request.....	1733
Defining Payment Schedule for a Payment Agreement Request.....	1734
Viewing the Bills Added in the Payment Agreement Request.....	1735
Viewing the Payment Agreement Request Details.....	1736
Payment Agreement Request (Used for Viewing).....	1736
Payment Agreement Request - Main.....	1737
Payment Agreement Request.....	1737
Bill Details.....	1739
Payment Schedule.....	1740
Payment Agreement Request - Bills.....	1740
Search Bills.....	1740
Payment Agreement Request - Log.....	1742
Payment Agreement Request Log.....	1742
Editing a Payment Agreement Request.....	1742
Deleting a Payment Agreement Request.....	1745
Submitting a Payment Agreement Request.....	1746
Removing an Overdue Bill from a Payment Agreement Request.....	1747
Approving a Payment Agreement Request.....	1747
Rejecting a Payment Agreement Request.....	1749
Resubmitting a Payment Agreement Request.....	1750
Filtering Overdue Bills of an Account.....	1751
Adding an Overdue Bill in a Payment Agreement Request.....	1752
Viewing the Log of a Payment Agreement Request.....	1753
Adding a Log Entry for a Payment Agreement Request.....	1754

<b>Chapter XXVII: Inbound Message.....</b>	<b>1757</b>
Customer Inbound Message.....	1758
Prerequisites.....	1758
Customer Inbound Message Status Transition through User Interface.....	1759
Customer Inbound Message Status Transition through a Batch Process.....	1760
Algorithms Used in C1-CustomerInboundMessage.....	1761
C1-AT-RQJ.....	1762
F1-AT-RQJ.....	1762
C1-CINMSGVAL.....	1762
C1-CINMSGPRC.....	1763
C1-TODORETRY.....	1772
C1-TDCRINMSG.....	1772
Customer Inbound Message XML Format.....	1773
Customer Inbound Message Schema.....	1790
Sample Customer Inbound Message.....	1793
Membership Inbound Message.....	1796
Prerequisites.....	1796
Membership Inbound Message Status Transition through User Interface.....	1797
Membership Inbound Message Status Transition through a Batch Process.....	1798
Algorithms Used in C1-MemberInboundMessage.....	1799
C1-AT-RQJ.....	1800
F1-AT-RQJ.....	1800
C1-INMEMEVAL.....	1800
C1-INMEMEPRC.....	1801
C1-TODORETRY.....	1808
C1-TDCRINMSG.....	1808
F1-TODOCOMPL.....	1809
Membership Inbound Message XML Format.....	1809
Membership Inbound Message Schema.....	1822
Sample Membership Inbound Message.....	1824
ASO Customer Inbound Message.....	1826
Prerequisites.....	1828
ASO Customer Inbound Message Status Transition through User Interface.....	1828
ASO Customer Inbound Message Status Transition through a Batch Process.....	1829
Algorithms Used in C1-ASOCustomerInboundMessage.....	1830
C1-AT-RQJ.....	1831
F1-AT-RQJ.....	1831
C1-ASOCINVAL.....	1831
C1-ASOCINPRC.....	1832
C1-TODORETRY.....	1832
C1-TDCRINMSG.....	1832
ASO Customer Inbound Message XML Format.....	1833
ASO Customer Inbound Message Schema.....	1852
Sample ASO Customer Inbound Message.....	1856
Health Care Inbound Message.....	1863
Prerequisites.....	1869
Health Care Inbound Message Status Transition through User Interface.....	1871
Health Care Inbound Message Status Transition through a Batch Process.....	1872
Algorithms Used in C1-HCInboundMessage.....	1872
C1-AT-RQJ.....	1873
F1-AT-RQJ.....	1873
C1-HCINVAL.....	1873
C1-HCINPROC.....	1874
C1-TODORETRY.....	1874

C1-TDCRINMSG.....	1875
Health Care Inbound Message XML Format.....	1875
Health Care Inbound Message Schema.....	1914
Sample Health Care Inbound Message for Fully-Insured Customer Setup.....	1920
Sample Health Care Inbound Message for Self-Funded Customer Setup.....	1945
Sample Health Care Inbound Message for Pricing Rules.....	1960
Sample Health Care Inbound Message for Membership.....	1968
Inbound Message Type.....	1981
Inbound Message Type List.....	1982
Inbound Message Type.....	1983
Viewing the Inbound Message Type Details.....	1986
Defining an Inbound Message Type.....	1986
Defining a Characteristic for an Inbound Message Type.....	1991
Editing an Inbound Message Type.....	1992
Copying an Inbound Message Type.....	1997
Deleting an Inbound Message Type.....	2001
Inbound Message (Used for Searching).....	2002
Search Inbound Message.....	2002
Searching for an Inbound Message.....	2005
Creating an Inbound Message.....	2006
C1-CustomerStructureInboundMessage.....	2006
C1-MembershipInboundMessage.....	2007
C1-ASOCustomerInboundMessage.....	2007
C1-HCInboundMessage.....	2008
Viewing the Inbound Message Details.....	2008
Inbound Message (Used for Viewing).....	2009
Inbound Message - Main.....	2009
Inbound Message.....	2009
Inbound Message - Message.....	2011
Inbound Message Content.....	2011
Inbound Message - Log.....	2012
Inbound Message Log.....	2012
Editing an Inbound Message.....	2012
Defining a Characteristic for an Inbound Message.....	2013
Deleting an Inbound Message.....	2014
Processing an Inbound Message.....	2015
Using the Retry Option for an Inbound Message.....	2017
Voiding an Inbound Message.....	2018
Viewing the Content of an Inbound Message.....	2018
Viewing the Log of an Inbound Message.....	2019
Adding a Log Entry for an Inbound Message.....	2019

## **Chapter XXVIII: Health Insurance Policy..... 2021**

Pre-requisites (for Fully-Insured Policy).....	2022
Pre-requisites (for Self-Funded Policy).....	2023
Types of Policies.....	2023
Fully-Insured Policy.....	2024
Fully-Insured Policy Activation.....	2025
Fully-Insured Policy Termination.....	2025
Fully-Insured Policy Reinstatement.....	2026
Fully-Insured Policy Renewal.....	2027
Fully-Insured Policy Plan Contract Creation.....	2027
Self-Funded Policy.....	2037
Self-Funded Policy Activation.....	2039
Transition of Self-Funded Policy to Runout Status.....	2040

Transition of Self-Funded Policy to Post Runout Status.....	2040
Self-Funded Policy Renewal.....	2041
Self-Funded Policy Contract Creation.....	2041
Fully-Insured Policy Status Transition.....	2044
Self-Funded Policy Status Transition.....	2045
Membership Status Transition.....	2048
Algorithms Used in C1-POLICY.....	2049
C1-REAUDEVNT.....	2050
C1-POLBOVAL.....	2051
C1-TRNDFLSYS.....	2051
F1-AT-RQJ.....	2051
C1-EVCSTSTAT.....	2052
C1-PLCYTRMRQ.....	2052
C1-POLCYTERM.....	2052
C1-DELTRMLTR.....	2053
C1-PLCYREIRQ.....	2054
C1-POLCYREIN.....	2054
C1-CCPOLRE1.....	2054
Algorithms Used in C1-PolicyPlan.....	2055
C1-PPCONCRE.....	2055
C1-VALPPBO.....	2056
Algorithms Used in C1-Membership.....	2056
C1-FIAUDEV.....	2057
C1-MEMSTPRE.....	2058
C1-VALMEMBO.....	2058
C1-MEMINACT.....	2058
Algorithms Used in C1-ASOPolicy.....	2058
C1-ASOPOLVAL.....	2059
C1-ASOBOPOSP.....	2060
C1-ASOPRUCPY.....	2060
C1-ASOPOLMOA.....	2060
C1-ASOPOLREN.....	2061
C1-ASOPCKTD.....	2061
Policy Type.....	2061
Policy Type List.....	2062
Policy Type.....	2062
Defining a Policy Type.....	2064
Defining a Characteristic for a Policy Type.....	2065
Editing a Policy Type.....	2066
Copying a Policy Type.....	2068
Deleting a Policy Type.....	2069
Viewing the Policy Type Details.....	2070
Policy Person Role.....	2071
Policy Person Role List.....	2071
Defining a Policy Person Role.....	2071
Editing a Policy Person Role.....	2072
Deleting a Policy Person Role.....	2073
Contract Relationship Type.....	2073
Filtering the Contract Relationship Types.....	2073
Defining a Contract Relationship Type.....	2074
Editing a Contract Relationship Type.....	2074
Deleting a Contract Relationship Type.....	2075
Source System Extendable Lookup.....	2076
Extendable Lookup Search.....	2076
Searching for the Source System Extendable Lookup.....	2077
Viewing the Values of the Source System Extendable Lookup.....	2077

Extendable Lookup (Source System).....	2078
Extendable Lookup Value List.....	2078
Extendable Lookup Value.....	2079
Defining a Source System.....	2080
Editing a Source System.....	2081
Copying a Source System.....	2082
Deleting a Source System.....	2083
Viewing the Source System Details.....	2083
Policy (Used for Searching).....	2084
Search Policy.....	2084
Searching for a Policy.....	2088
Viewing the Policy Details.....	2089
Defining a Policy.....	2089
Associating a Person with a Policy.....	2092
Defining a Characteristic for a Policy.....	2093
Policy (Used for Viewing).....	2095
Policy - Main.....	2095
Policy.....	2095
Policy - Plan.....	2102
Plans.....	2102
Memberships.....	2103
Policy - Log.....	2104
Policy Log.....	2104
Activating a Policy.....	2105
Editing a Policy.....	2105
Deleting a Policy.....	2109
Initiating the Cancellation Process for a Fully-Insured Policy.....	2110
Canceling a Fully-Insured Policy.....	2110
Initiating the Termination Process for a Fully-Insured Policy.....	2111
Terminating a Fully-Insured Policy.....	2112
Initiating the Reinstatement Process for a Fully-Insured Policy.....	2112
Reinstating a Fully-Insured Policy.....	2113
Manually Changing the Status of a Self-Funded Policy to Runout.....	2114
Renewing a Self-Funded Policy of a Bill Group.....	2115
Viewing the Plans of a Fully-Insured Policy.....	2117
Viewing the Memberships of a Fully-Insured Policy Plan.....	2118
Viewing the Fully-Insured Policy Plan Details.....	2118
Viewing the Membership Details of a Fully-Insured Policy Plan.....	2119
Defining a Plan for a Fully-Insured Policy.....	2120
Associating a Pricing Rule Type with a Fully-Insured Policy Plan.....	2122
Defining a Characteristic for a Fully-Insured Policy Plan.....	2123
Editing a Plan of a Fully-Insured Policy.....	2124
Viewing the Log of a Policy.....	2126
Adding a Log Entry for a Policy.....	2126
Policy Plan (Used for Viewing).....	2127
Policy Plan.....	2127
Memberships.....	2129
Membership (Used for Searching).....	2130
Search Membership.....	2130
Searching for a Membership.....	2133
Viewing the Membership Details.....	2134
Defining a Membership for a Fully-Insured Policy Plan.....	2134
Defining a Characteristic for a Membership.....	2137
Membership (Used for Viewing).....	2138
Membership - Main.....	2138
Membership.....	2139

Member Persons.....	2141
Other Plans of Main Subscriber.....	2142
Membership - Contracts and Charges.....	2143
Membership Contracts.....	2143
Billable Charges.....	2144
Bill Segment Details.....	2146
Billable Charge Timeline Details.....	2147
Pricing Calculation Details.....	2147
Membership - Log.....	2148
Membership Log.....	2148
Editing a Membership of a Fully-Insured Policy Plan.....	2149
Adding a Person to a Membership.....	2150
Defining a Characteristic for a Member Person.....	2152
Inactivating a Membership.....	2153
Inactivating a Member Person.....	2154
Removing a Person from a Membership.....	2155
Editing the Membership Details of a Person.....	2155
Associating a Contract with a Membership.....	2157
Disassociating a Contract from a Membership.....	2159
Editing the Contract Association Details of a Membership.....	2159
Viewing the Billable Charges Created for a Membership.....	2161
Viewing the Bill Segments Generated for a Billable Charge.....	2161
Viewing the Timeline Details of a Membership Billable Charge.....	2162
Viewing the Pricing Calculation Details of a Timeline.....	2162
Viewing the Log of a Membership.....	2163
Adding a Log Entry for a Membership.....	2163

## **Chapter XXIX: Upload Lockbox Payment and Remittance Advices**

### **Overview.....2165**

Prerequisites.....	2167
EDI 820 Flat File Description.....	2167
Sample EDI 820 Flat File.....	2169
Upload EDI 820 Files in ORMB.....	2172

## **Chapter XXX: Deferred Revenue Recognition.....2175**

Prerequisites.....	2177
Deferred Revenue Recognition Status Transition.....	2177
Algorithms Used in Deferred Revenue Recognition.....	2179
Deferred Revenue Recognition Template (Used for Searching).....	2184
Search Deferred Revenue Recognition Template.....	2184
Searching for a Deferred Revenue Recognition Template.....	2185
Defining a Deferred Revenue Recognition Template.....	2186
Associating Algorithms with a Deferred Revenue Recognition Template.....	2188
Associating Deferred Revenue Recognition Template With A Division.....	2189
Defining Characteristics for a Deferred Revenue Recognition Template.....	2190
Viewing the Deferred Revenue Recognition Template Details.....	2191
Deferred Revenue Recognition Template (Used for Viewing).....	2192
Deferred Revenue Recognition Template.....	2192
Editing a Deferred Revenue Recognition Template.....	2194
Deleting a Deferred Revenue Recognition Template.....	2195
Viewing the Deferred Revenue Recognition Template Details.....	2195
Deferred Revenue Recognition (Used for Searching).....	2196
Search Deferred Revenue Recognition.....	2196
Searching for a Deferred Revenue Recognition.....	2200

Viewing the Deferred Revenue Recognition Details.....	2201
Deferred Revenue Recognition (Used for Viewing).....	2202
Deferred Revenue Recognition - Main.....	2202
Deferred Revenue Recognition.....	2202
Associated Deferred Revenue Recognitions.....	2204
Recognition Schedule.....	2205
Revenue Recognition Items.....	2205
Deferred Revenue Recognition - Log.....	2205
Deferred Revenue Recognition Log.....	2205
Editing a Deferred Revenue Recognition.....	2206
Creating the Deferred Revenue Recognition Schedule.....	2207
Defining Characteristics for a Deferred Revenue Recognition.....	2207
Adding Related Deferred Revenue Recognitions.....	2208
Editing the Deferred Revenue Recognition Schedule Details.....	2209
Viewing the Log of a Deferred Revenue Recognition.....	2210
Adding a Log Entry for a Deferred Revenue Recognition.....	2211

## **Chapter XXXI: Reconciliation..... 2213**

Reconciliation Status Transition.....	2216
Pay Instruction Status Transition.....	2217
Discrepancy Report Status Transition.....	2219
EDI 820 File Format For Reconciliation.....	2219
Sample EDI 820 File Format.....	2220
Algorithms Used in C1-MemberReconType.....	2221
C1-REOCNPEP.....	2221
Algorithms Used in C1-MemberReconciliation.....	2222
C1-RECONINFO.....	2223
C1-MRECONVAL.....	2223
F1-AT-RQJ.....	2223
F1-TDCREATE.....	2223
C1-VALPAYINS.....	2224
F1-TODOCOMPL.....	2224
C1-MRECONVAL.....	2224
C1-MONPAYINS.....	2225
C1-TRNPAYRCN.....	2225
C1-RCOPNPYIN.....	2226
C1-RCNOPNMR.....	2226
C1-RCMONPNCN.....	2226
C1-CANPAYINS.....	2227
C1-CANRCNPAY.....	2227
C1-RCNCANLTD.....	2227
Algorithms Used in C1-PayInstruction.....	2227
C1-MPAYININF.....	2228
C1-PYINDRVAN.....	2228
C1-PIRECOCIL.....	2229
C1-PYICNADJ.....	2230
F1-AT-RQJ.....	2230
Algorithms Used in C1-MemberDiscReportType.....	2230
C1-DISCPEP.....	2231
Algorithms Used in C1-DiscrepancyReport.....	2231
F1-AT-RQJ.....	2231
C1-DISRINFO.....	2231
C1-VALNEWDIS.....	2232
C1-CRDSLNITM.....	2232
F1-TODOCOMPL.....	2232

C1-VALCMPDIS.....	2232
Reconciliation Type.....	2232
Reconciliation Type List.....	2233
Reconciliation Type.....	2233
Defining a Reconciliation Type.....	2235
Defining Characteristics for a Reconciliation Type.....	2237
Associating an Algorithm with a Reconciliation Type.....	2237
Editing a Reconciliation Type.....	2239
Deleting a Reconciliation Type.....	2240
Copying a Reconciliation Type.....	2241
Viewing the Reconciliation Type Details.....	2242
Reconciliation (Used for Searching).....	2243
Search Reconciliation.....	2243
Searching for a Reconciliation.....	2246
Viewing the Reconciliation Details.....	2247
Reconciliation (Used for Viewing).....	2247
Reconciliation - Main.....	2248
Reconciliation.....	2248
Pay Instructions.....	2250
Reconciliation - Log.....	2251
Reconciliation Log.....	2251
Editing a Reconciliation.....	2252
Defining Characteristics for a Reconciliation.....	2252
Deleting a Reconciliation.....	2254
Submitting Pay Instructions for a Reconciliation.....	2254
Reconciling Pay Instructions.....	2255
Adding a Log Entry for a Reconciliation.....	2256
Viewing the Log of a Reconciliation.....	2256
Canceling a Reconciliation.....	2257
Viewing the Pay Instruction Details.....	2258
Pay Instruction.....	2258
Pay Instruction - Main.....	2259
Pay Instruction.....	2259
Reconciliation Adjustments.....	2259
Related Objects.....	2260
Pay Instruction - Log.....	2260
Pay Instruction Log.....	2260
Adding a Log Entry for a Pay Instruction.....	2261
Viewing the Log of a Pay Instruction.....	2261
Discrepancy Report Type.....	2262
Discrepancy Report Type List.....	2262
Discrepancy Report Type.....	2263
Defining a Discrepancy Report Type.....	2264
Defining Characteristics for a Discrepancy Report Type.....	2266
Editing a Discrepancy Report Type.....	2267
Deleting a Discrepancy Report Type.....	2268
Copying a Discrepancy Report Type.....	2268
Viewing the Discrepancy Report Type Details.....	2270
Discrepancy Report (Used for Searching).....	2270
Search Discrepancy Report.....	2270
Searching for a Discrepancy Report.....	2273
Creating a Discrepancy Report.....	2274
Viewing the Discrepancy Report Details.....	2275
Discrepancy Report (Used for Viewing).....	2275
Discrepancy Report - Main.....	2276
Discrepancy Report.....	2276

Discrepancy Line Items.....	2277
Discrepancy Line Item Related Objects.....	2278
Discrepancy Line Items Characteristics Zone.....	2279
Discrepancy Report - Log.....	2279
Discrepancy Report Log.....	2279
Editing a Discrepancy Line Item.....	2279
Deleting a Discrepancy Report.....	2281
Finalizing a Discrepancy Report.....	2281
Adding a Log Entry for a Discrepancy Report.....	2282
Viewing the Log of a Discrepancy Report.....	2282

## **Chapter XXXII: Self-Funded Pricing.....2285**

Prerequisites.....	2286
Approval Workflow for the Self-Funded Pricing Rules.....	2286
Line Item Extendable Lookup.....	2287
Extendable Lookup Search.....	2288
Searching for the Line Item Extendable Lookup.....	2289
Viewing the Values of the Line Item Extendable Lookup.....	2289
Extendable Lookup (Line Item).....	2290
Extendable Lookup Value List.....	2290
Extendable Lookup Value.....	2291
Defining a Line Item.....	2293
Associating a Line Item with a Pricing Rule Type Category.....	2294
Editing a Line Item.....	2296
Copying a Line Item.....	2298
Deleting a Line Item.....	2300
Viewing the Line Item Details.....	2300
Claim Template Extendable Lookup.....	2301
Extendable Lookup Search.....	2302
Searching for the Claim Template Extendable Lookup.....	2303
Viewing the Values of the Claim Template Extendable Lookup.....	2303
Extendable Lookup (Claim Template).....	2304
Extendable Lookup Value List.....	2304
Extendable Lookup Value.....	2305
Defining a Claim Template.....	2307
Adding a Line Item in a Claim Template.....	2309
Defining the Default Markup or Markdown Values for the Line Items.....	2311
Editing a Claim Template.....	2313
Copying a Claim Template.....	2315
Deleting a Claim Template.....	2316
Viewing the Claim Template Details.....	2317
Rate Option Extendable Lookup.....	2318
Extendable Lookup Search.....	2318
Searching for the Rate Option Extendable Lookup.....	2319
Viewing the Values of the Rate Option Extendable Lookup.....	2320
Extendable Lookup (Rate Option).....	2320
Extendable Lookup Value List.....	2320
Extendable Lookup Value.....	2321
Defining a Rate Option.....	2323
Editing a Rate Option.....	2326
Copying a Rate Option.....	2329
Deleting a Rate Option.....	2331
Viewing the Rate Option Details.....	2332
Pricing Group.....	2333
Viewing the Pricing Groups of a Bill Group.....	2333

Defining a Pricing Group for a Bill Group.....	2334
Editing a Pricing Group of a Bill Group.....	2337
Deleting a Pricing Group of a Bill Group.....	2339
Copying a Pricing Group of a Bill Group.....	2340
Pricing Rule Type.....	2343
Pricing Rule Type List.....	2344
Pricing Rule Type.....	2347
Claim Pricing.....	2354
Defining a Claim Pricing Rule Type.....	2356
Adding Claim Templates in a Claim Pricing Rule Type.....	2359
Adding the Claim-Specific Data in a Pricing Rule Type.....	2360
Editing a Claim Pricing Rule Type.....	2361
Deleting a Claim Pricing Rule Type.....	2364
Viewing the Claim Pricing Rule Type Details.....	2364
Defining a Claim Pricing Rule for a Parent Customer.....	2365
Defining the Markup or Markdown Values for Line Items in a Claim Pricing Rule.....	2367
Defining the Markup or Markdown Values for Line Items for Each Rule in a Claim Pricing Rule.....	2369
Defining Characteristics for a Claim Pricing Rule.....	2371
Editing a Claim Pricing Rule of a Parent Customer.....	2372
Viewing a Claim Pricing Rule of a Parent Customer.....	2374
Deleting a Claim Pricing Rule of a Parent Customer.....	2375
Defining a Claim Pricing Rule for a Bill Group.....	2375
Defining a Claim Pricing Rule for a Bill Group Using a Pricing Group.....	2378
Editing a Claim Pricing Rule of a Bill Group.....	2381
Viewing a Claim Pricing Rule of a Bill Group.....	2382
Deleting a Claim Pricing Rule of a Bill Group.....	2383
Specific Stop-Loss (SSL) Pricing.....	2384
Defining a Specific Stop-Loss (SSL) Pricing Rule Type.....	2386
Adding the SSL-Specific Data in a Pricing Rule Type.....	2389
Editing a Specific Stop-Loss (SSL) Pricing Rule Type.....	2391
Deleting a Specific Stop-Loss (SSL) Pricing Rule Type.....	2394
Viewing the Specific Stop-Loss (SSL) Pricing Rule Type Details.....	2394
Defining a Specific Stop-Loss Pricing Rule for a Parent Customer.....	2395
Defining Accumulation Parameters in a Specific Stop-Loss Pricing Rule.....	2398
Defining Run-in Parameters in a Specific Stop-Loss Pricing Rule.....	2400
Defining Lasering and Exclusion Information in a Specific Stop-Loss Pricing Rule.....	2401
Defining Characteristics for a Specific Stop-Loss Pricing Rule.....	2402
Editing a Specific Stop-Loss Pricing Rule of a Parent Customer.....	2404
Viewing a Specific Stop-Loss Pricing Rule of a Parent Customer.....	2406
Deleting a Specific Stop-Loss Pricing Rule of a Parent Customer.....	2407
Defining a Specific Stop-Loss Pricing Rule for a Bill Group.....	2407
Defining Accumulation Criteria in a Specific Stop-Loss Pricing Rule.....	2410
Defining Claim Pricing Information in a Specific Stop Loss Pricing Rule.....	2412
Defining a Specific Stop-Loss Pricing Rule for a Bill Group Using a Pricing Group.....	2414
Editing a Specific Stop-Loss Pricing Rule of a Bill Group.....	2417
Viewing a Specific Stop-Loss Pricing Rule of a Bill Group.....	2418
Deleting a Specific Stop-Loss Pricing Rule of a Bill Group.....	2419
Aggregate Stop-Loss (ASL) Pricing.....	2420
Defining a Aggregate Stop-Loss (ASL) Pricing Rule Type.....	2422
Adding the ASL-Specific Data in a Pricing Rule Type.....	2425
Editing an Aggregate Stop-Loss (ASL) Pricing Rule Type.....	2427
Deleting an Aggregate Stop-Loss (ASL) Pricing Rule Type.....	2430
Viewing the Aggregate Stop-Loss (ASL) Pricing Rule Type Details.....	2430
Defining an Aggregate Stop-Loss Pricing Rule for a Parent Customer.....	2431
Defining Accumulation Parameters in an Aggregate Stop-Loss Pricing Rule.....	2434

Defining Run-in Parameters in an Aggregate Stop-Loss Pricing Rule.....	2437
Defining Characteristics for an Aggregate Stop-Loss Pricing Rule.....	2438
Editing an Aggregate Stop-Loss Pricing Rule of a Parent Customer.....	2439
Viewing an Aggregate Stop-Loss Pricing Rule of a Parent Customer.....	2442
Deleting an Aggregate Stop-Loss Pricing Rule of a Parent Customer.....	2442
Defining an Aggregate Stop-Loss Pricing Rule for a Bill Group.....	2443
Defining Accumulation Criteria in an Aggregate Stop-Loss Pricing Rule.....	2446
Defining Claim Pricing Rules in an Aggregate Stop-Loss Pricing Rule.....	2448
Defining an Aggregate Stop-Loss Pricing Rule for a Bill Group Using a Pricing Group...	2450
Editing an Aggregate Stop-Loss Pricing Rule of a Bill Group.....	2453
Viewing an Aggregate Stop-Loss Pricing Rule of a Bill Group.....	2454
Deleting an Aggregate Stop-Loss Pricing Rule of a Bill Group.....	2455
Retention Type Claim Based Pricing.....	2456
Defining a Retention Type Claim Based Pricing Rule Type.....	2457
Adding Claim Based Disposition Details in a Pricing Rule Type.....	2460
Editing a Retention Type Claim Based Pricing Rule Type.....	2461
Deleting a Retention Type Claim Based Pricing Rule Type.....	2463
Viewing the Retention Type Claim Based Pricing Rule Type Details.....	2464
Defining a Retention Type Claim Based Pricing Rule for a Parent Customer.....	2465

Viewing a Retention Type Enrollment Based Pricing Rule of a Parent Customer.....	2511
Viewing a Retention Type Enrollment Based Pricing Rule of a Bill Group.....	2512
Flat Fee Pricing.....	2513
Defining a One-Time Flat Fee Pricing Rule Type.....	2515
Adding the One-Time Flat Fee Specific Data in a Pricing Rule Type.....	2517
Editing a One-Time Flat Fee Pricing Rule Type.....	2518

Deleting a One-Time Flat Fee Pricing Rule Type.....	2521
Viewing the One-Time Flat Fee Pricing Rule Type Details.....	2522
Defining a One-Time Flat Fee Pricing Rule for a Bill Group.....	2522
Defining Characteristics for a One-Time Flat Fee Pricing Rule.....	2525
Editing a One-Time Flat Fee Pricing Rule of a Bill Group.....	2526
Viewing a One-Time Flat Fee Pricing Rule of a Bill Group.....	2527
Deleting a One-Time Flat Fee Pricing Rule of a Bill Group.....	2528
Defining a Bill Period Based Recurring Flat Fee Pricing Rule Type.....	2529
Adding the Recurring Flat Fee Specific Data in a Pricing Rule Type.....	2532
Editing a Bill Period Based Recurring Flat Fee Pricing Rule Type.....	2533
Deleting a Bill Period Based Recurring Flat Fee Pricing Rule Type.....	2536
Viewing the Bill Period Based Recurring Flat Fee Pricing Rule Type Details.....	2537
Defining a Bill Period Based Recurring Flat Fee Pricing Rule for a Bill Group.....	2537
Defining Characteristics for a Bill Period Based Recurring Flat Fee Pricing Rule.....	2540
Editing a Bill Period Based Recurring Flat Fee Pricing Rule of a Bill Group.....	2541
Viewing a Bill Period Based Recurring Flat Fee Pricing Rule of a Bill Group.....	2542
Deleting a Bill Period Based Recurring Flat Fee Pricing Rule of a Bill Group.....	2543
Defining a Frequency Based Recurring Flat Fee Pricing Rule Type.....	2544
Adding the Recurring Flat Fee Specific Data in a Pricing Rule Type.....	2547
Editing a Frequency Based Recurring Flat Fee Pricing Rule Type.....	2548
Deleting a Frequency Based Recurring Flat Fee Pricing Rule Type.....	2551
Viewing the Frequency Based Recurring Flat Fee Pricing Rule Type Details.....	2551
Defining a Frequency Based Recurring Flat Fee Pricing Rule for a Bill Group.....	2552
Defining Characteristics for a Frequency Based Recurring Flat Fee Pricing Rule.....	2554
Editing a Frequency Based Recurring Flat Fee Pricing Rule of a Bill Group.....	2555
Viewing a Frequency Based Recurring Flat Fee Pricing Rule of a Bill Group.....	2557
Deleting a Frequency Based Recurring Flat Fee Pricing Rule of a Bill Group.....	2558
Ancillary Pricing.....	2558
Defining an Ancillary Pricing Rule Type.....	2561
Adding a Related Pricing Rule Type in an Ancillary Pricing Rule Type.....	2566
Mapping the Transaction Field in an Ancillary Pricing Rule Type.....	2568
Associating an Algorithm with an Ancillary Pricing Rule Type.....	2572
Defining Additional Data in an Ancillary Pricing Rule Type.....	2575
Adding a Price Item in an Ancillary Pricing Rule Type.....	2578
Adding a Price Item Parameter in an Ancillary Pricing Rule Type.....	2581
Defining the Ancillary-Specific Data in an Ancillary Pricing Rule Type.....	2582
Defining Pricing Arrangements in an Ancillary Pricing Rule Type.....	2584
Defining a Characteristic for a Ancillary Pricing Rule Type.....	2585
Editing an Ancillary Pricing Rule Type.....	2586
Deleting an Ancillary Pricing Rule Type.....	2590
Viewing the Ancillary Pricing Rule Type Details.....	2591
Defining an Ancillary Pricing Rule for a Parent Customer.....	2591
Defining Characteristics for an Ancillary Pricing Rule.....	2594
Editing an Ancillary Pricing Rule of a Parent Customer.....	2596
Deleting an Ancillary Pricing Rule of a Parent Customer.....	2598
Defining an Ancillary Pricing Rule for a Bill Group.....	2599
Defining Characteristics for an Ancillary Pricing Rule.....	2602
Editing an Ancillary Pricing Rule of a Bill Group.....	2604
Deleting an Ancillary Pricing Rule of a Bill Group.....	2606
Discount Pricing.....	2607
Types of Discount Arrangement.....	2608
Discount Share.....	2608
Discount Guarantee.....	2608
Defining a Discount Arrangement Pricing Rule Type.....	2608
Associating Algorithms with a Discount Arrangement Pricing Rule Type.....	2612
Defining Additional Data in a Discount Arrangement Pricing Rule Type.....	2615

Adding a Price Item in a Discount Arrangement Pricing Rule Type.....	2617
Adding a Price Item Parameter in a Discount Arrangement Pricing Rule Type.....	2620
Defining a Characteristic for a Discount Arrangement Pricing Rule Type.....	2621
Defining the Discount Specific Data in a Discount Arrangement Pricing Rule Type.....	2622
Editing a Discount Arrangement Pricing Rule Type.....	2625
Deleting a Discount Arrangement Pricing Rule Type.....	2628
Viewing the Discount Arrangement Pricing Rule Type Details.....	2629
Defining a Discount Arrangement Pricing Rule for a Parent Customer.....	2629
Adding the Discount Details in a Discount Arrangement Pricing Rule .....	2632
Defining the Discount Limits in a Discount Arrangement Pricing Rule.....	2633
Excluding a Network or Provider in a Discount Arrangement Pricing Rule.....	2635
Defining a Characteristic for a Discount Arrangement Pricing Rule.....	2636
Editing a Discount Arrangement Pricing Rule of a Parent Customer.....	2637
Deleting a Discount Arrangement Pricing Rule of a Parent Customer.....	2639
Write-Off Charges during Post Runout.....	2640
Level Funding Pricing.....	2640
Defining a Level Funded Pricing Rule Type.....	2644
Associating an Algorithm with a Level Funded Pricing Rule Type.....	2646
Defining Additional Data in a Level Funded Pricing Rule Type.....	2647
Adding a Price Item in a Level Funded Pricing Rule Type.....	2649
Adding a Price Item Parameter in a Level Funded Pricing Rule Type.....	2652
Defining Characteristics for a Level Funded Pricing Rule Type.....	2653
Defining the Level Funded Specific Additional Data in a Level Funded Pricing Rule Type.....	2654
Editing a Level Funded Pricing Rule Type.....	2658
Deleting a Level Funded Pricing Rule Type.....	2661
Viewing the Level Funded Pricing Rule Type Details.....	2661
Defining a Level Funded Pricing Rule for a Parent Customer.....	2662
Defining Accumulation Parameters in a Level Funded Pricing Rule.....	2665
Defining the Final Settlement Rules in a Level Funded Pricing Rule.....	2666
Defining a Characteristic for a Level Funded Pricing Rule.....	2671
Defining a Level Funded Pricing Rule for a Bill Group.....	2672
Defining Accumulation Criteria in a Level Funded Pricing Rule.....	2675
Defining Claim Pricing Information in a Level Funded Pricing Rule.....	2678
Defining Ancillary Pricing Information in a Level Funded Pricing Rule.....	2681
Defining Discount Arrangement Pricing Information in a Level Funded Pricing Rule.....	2684
Defining Retention Type Claim Based and/or Retention Type Enrollment Based Pricing Rule Information in a Level Funded Pricing Rule.....	2686
Defining a Characteristic for a Level Funded Pricing Rule.....	2687
Pricing Rule (Used for Viewing).....	2688
Claim.....	2689
Aggregate Stop-Loss.....	2691
Specific Stop-Loss.....	2697
Retention Type Claim Based.....	2703
Retention Type Enrollment Based.....	2704
Flat Fee.....	2705
Ancillary.....	2707
Discount Arrangement.....	2709
Level Funded.....	2712

## **Chapter XXXIII: Self-Funded Billing..... 2719**

Pre-requisites.....	2721
Bill Group Derivation and Pricing Parameters.....	2722
Related Pricing Rule Type Eligibility.....	2724
Price Item Eligibility.....	2726

Self-Funded Billing Process.....	2727
Transaction Aggregation.....	2727
Stop Loss Calculation.....	2732
Bill Generation.....	2732
Bill Group Derivation.....	2733
Account and Price Item Derivation (for the Claim Pricing Rule Type Category).....	2736
Account and Price Item Derivation (for the Specific Stop-Loss and Aggregate Stop-Loss Pricing Rule Type Categories).....	2741
Account and Price Item Derivation (for the Retention Type Claim Based Pricing Rule Type Category).....	2754
Account and Price Item Derivation (for the Retention Type Enrollment Based Pricing Rule Type Category).....	2766
Account and Price Item Derivation (for the Ancillary Pricing Rule Type Category).....	2776
Bill After Date Determination.....	2785

## **Chapter XXXIV: Fully-Insured Pricing.....2787**

Age Based Pricing.....	2788
Defining an Age Based Pricing Rule Type.....	2790
Associating an Algorithm with an Age Based Pricing Rule Type.....	2792
Adding a Price Item in an Age Based Pricing Rule Type.....	2794
Adding a Price Item Parameter in an Age Based Pricing Rule Type.....	2797
Defining Characteristics for an Age Based Pricing Rule Type.....	2798
Adding Elements for Audit in an Age Based Pricing Rule Type.....	2799
Defining Additional Data in an Age Based Pricing Rule Type.....	2800
Editing an Age Based Pricing Rule Type.....	2801
Deleting an Age Based Pricing Rule Type.....	2803
Viewing the Age Based Pricing Rule Type Details.....	2804
Tier Based Pricing.....	2804
Defining a Tier Based Pricing Rule Type.....	2806
Associating an Algorithm with a Tier Based Pricing Rule Type.....	2808
Adding a Price Item in a Tier Based Pricing Rule Type.....	2810
Adding a Price Item Parameter in a Tier Based Pricing Rule Type.....	2813
Defining Characteristics for a Tier Based Pricing Rule Type.....	2814
Adding Elements for Audit in a Tier Based Pricing Rule Type.....	2815
Editing a Tier Based Pricing Rule Type.....	2816
Deleting a Tier Based Pricing Rule Type.....	2818
Viewing the Tier Based Pricing Rule Type Details.....	2819
Pass-Through Billable Charge.....	2819
Defining a Pass-Through Billable Charge Pricing Rule Type.....	2820
Associating an Algorithm with a Pass-Through Billable Charge Pricing Rule Type.....	2822
Adding a Price Item in a Pass-Through Billable Charge Pricing Rule Type.....	2824
Adding a Price Item Parameter in a Pass-Through Billable Charge Pricing Rule Type.....	2826
Defining Characteristics for a Pass-Through Billable Charge Pricing Rule Type.....	2827
Editing a Pass-Through Billable Charge Pricing Rule Type.....	2828
Deleting a Pass-Through Billable Charge Pricing Rule Type.....	2830
Viewing the Pass-Through Billable Charge Pricing Rule Type Details.....	2830

## **Chapter XXXV: Fully-Insured Billing..... 2833**

Audit Framework for Fully-Insured Health Care Billing.....	2834
Age Based and Tier Based Pricing Rules Audit Process.....	2835
Membership Audit Process.....	2836
Person Audit Process.....	2839
Bill Group Derivation for Membership.....	2840
Account and Price Item Derivation for Membership.....	2840

State of Issue.....	2841
Membership Premium Calculation.....	2841
Repricing.....	2846
Fully Insured Billable Charge Creation.....	2847

## **Chapter XXXVI: Entity Audit..... 2849**

Audit Event Status Transition.....	2850
Prerequisites.....	2850
Entity Audit Process.....	2851
Audit Event Creation.....	2851
Audit Event Processing.....	2852
Algorithms Used in the Entity Audit Process.....	2852
C1-REAUDEVNT.....	2852
C1-AUDEVMPR.....	2853
Audit Event Type.....	2853
Audit Event Type List.....	2855
Audit Event Type.....	2856
Defining an Audit Event Type.....	2858
Associating an Algorithm with an Audit Event Type.....	2861
Adding an Element for Auditing in an Audit Event Type.....	2862
Defining a Characteristic for an Audit Event Type.....	2865
Editing an Audit Event Type.....	2866
Copying an Audit Event Type.....	2868
Deleting an Audit Event Type.....	2870
Viewing the Audit Event Type Details.....	2871
Audit Event (Used for Searching).....	2872
Search Audit Event.....	2872
Searching for an Audit Event.....	2874
Viewing the Audit Event Details.....	2875
Audit Event (Used for Viewing).....	2875
Audit Event - Main.....	2876
Audit Event.....	2876
Audit Event - Log.....	2877
Audit Event Log.....	2877
Canceling an Audit Event.....	2878
Viewing the Log of an Audit Event.....	2879

## **Appendix A: Most Commonly Used Tasks..... 2881**

Changing the Layout.....	2882
Adding a Column to the Zone.....	2882
Rearranging Columns in the Zone.....	2882
Removing a Column from the Zone.....	2882

## **Appendix B: Administration..... 2885**

UI Maps.....	2886
Creating Display UI Map for an Approval Workflow Group.....	2886
Creating Input UI Map for an Approval Workflow Group.....	2887
Feature Configurations.....	2888
Setting the C1_ACCTINFO Feature Configuration.....	2888
Setting the C1-ASOBLLNG Feature Configuration.....	2889
Setting the C1_AXENTITY Feature Configuration.....	2902
Setting the C1-BILLADJSQ Feature Configuration.....	2904
Setting the C1-BILLCYCLE Feature Configuration.....	2905

Setting the C1_CMO Feature Configuration.....	2906
Setting the C1_DIVFUNCT Feature Configuration.....	2907
Setting the C1_EXCHRATE Feature Configuration.....	2908
Setting the C1_EXP_OVRD Feature Configuration.....	2908
Setting the C1_FINTRANOP Feature Configuration.....	2909
Setting the C1_FM Feature Configuration.....	2910
Setting the C1-OFFSETREQ Feature Configuration.....	2917
Setting the C1-PAYPORTAL Feature Configuration.....	2918
Setting the C1_PERACCT Feature Configuration.....	2920
Setting the C1_PERSTYPE Feature Configuration.....	2920
Setting the C1_PER_REL Feature Configuration.....	2921
Setting the C1_PPARAM_FLG Feature Configuration.....	2922
Setting the C1_PRASNORDR Feature Configuration.....	2923
Setting the C1_PR_REC Feature Configuration.....	2924
Setting the C1-PYREQSRT Feature Configuration.....	2925
Setting the C1_RLENG Feature Configuration.....	2926
Setting the C1-TXNDMYID Feature Configuration.....	2926

# About this Document

---

This document lists and describes various features in Oracle Revenue Management and Billing which can be used in the Healthcare and Insurance domains. It describes all screens related to these features and explains how to perform various tasks through these screens.

## Intended Audience

---

This document is intended for the following audience:

- End-users
- System Administrators
- Consulting Team
- Implementation Team
- Development Team

## Organization of the Document

---

Each insurance feature is described in a separate chapter in this document. All screens related to the feature and tasks related to the screen are explained in each chapter. This document contains the following chapters:

Chapter Number	Chapter Name	Chapter Description
Chapter 1	Self-Funded Customer Management	Explains how to create customers and accounts for billing the self-funded plans.
Chapter 2	Fully-Insured Customer Management	Explains how to create customers and accounts for billing the fully-insured plans.
Chapter 3	Customer Registration	Describes how to create a person, account, policy, and policy plan through a customer registration object.
Chapter 4	Customer 360° View	Explains how to view in-depth information about the person, account, or policy in the <b>Customer 360° View</b> screen. It explains how to create sort records for bill groups and derivation and pricing parameters for bill groups. It explains how to view the pricing rules of a parent customer and the pricing rules defined for a policy of a bill group. It also explains how to define, edit, and delete the different types of pricing rules of a parent customer and bill group. In addition, it explains how to view the detailed information about the bill.
Chapter 5	Pricing Management	Explains the different concepts of the pricing model supported in the application. It explains how to define a parameter, price item, price list, tiering criterion, variance parameter, and person to person relationship type sequence. It also explains how to define pricing for a price item, how to assign a price item to a person, account, or price list, and how to assign a price list to a person or account.
Chapter 6	Division	Describes the different types of division. It also explains how to define a division.

Chapter Number	Chapter Name	Chapter Description
Chapter 7	Approval Workflow	Describes the approval workflow process and explains how to perform various tasks involved in the process. It explains how to implement the approval workflow process for an entity, such as account, person, and so on. It explains how to define an approval workflow group, approval workflow chain, approval workflow criterion type, approval workflow group chain linkage, approval workflow reasons, and approval workflow settings.
Chapter 8	Rules Engine	Describes how the rules engine function. It explains how to define, execute, and maintain business rules separately from the application code.
Chapter 9	Alternate Sequential Bill Numbers	Explains how to generate alternate sequential bill numbers which are either unique throughout the system or within the division.
Chapter 10	Transaction Feed Management	Describes the transaction feed management process and its sub-processes. It explains how to execute each sub-process. It also explains how to view the details of various transactions uploaded in the system. In addition, it explains how to create a transaction source, transaction record type, transaction aggregation rule, aggregation schedule, and disaggregation request.
Chapter 11	Upload Validated Payment Data	Explains how to upload and validate the payment records before you move them to the staging area. It also explains how to create payment events and payments using the validated payment records.
Chapter 12	Freeze Payments on Notification	Explains how the system freezes or cancels the automatic payments, voids the refund requests and cancels the refund adjustments when the review comments are received from the auto clearing house.
Chapter 13	Trial Billing	Explains how to generate trial bills before the actual bill is generated for an account. It also explains how to view the trial bills in the system.
Chapter 14	GL Account Validation	Explains how to enable the static or dynamic GL account validation feature.
Chapter 15	Upload Validated Adjustment Data	Explains how to validate and upload an adjustment data file and create adjustments through an adjustment upload request.
Chapter 16	Payment Request	Explains how to create or transfer payments through a payment request.
Chapter 17	Account Receivable Central	Explains how to use the <b>Account Receivable Central</b> screen to search for a bill which you need to offset against another bill. It explains how to perform single, mass, and cross currency offset against one or more bills. It also enables you to create a hold request, refund request, write off request, and dispute request through this screen.
Chapter 18	Offset Request	Explains how to offset the bill's outstanding amount against one or more bills through an offset request. It explains how to create the offset request types and offset requests in the system.
Chapter 19	Funding Request	Describes how to change the automatic payment amount through the funding process. It explains how to create the funding request types and funding requests in the system.

Chapter Number	Chapter Name	Chapter Description
Chapter 20	Refund/Write Off Request	Describes how to refund a payment or credit bill or bill line item and write off a debit bill or bill line item through a refund or write off request, respectively. It explains how to create the refund or write off request types and refund or write off requests in the system.
Chapter 21	Hold Request	Describes how to hold some processes and/or bills at the account or person level for a time period through a hold request. It explains how to create the hold request types and hold requests in the system.
Chapter 22	Delinquency Central	Explains how to track the overdue processes of a delinquent account through the <b>Delinquency Central</b> screen. It also explains how to create a hold request, payment arrangement, and promise to pay for a delinquent account from this screen.
Chapter 23	Upload Request	Explains how to do the following through an upload request: <ul style="list-style-type: none"> <li>• Update bill cycle of accounts</li> <li>• Update contract riders in contracts</li> <li>• Create hold requests, refund requests, write off requests, or billable charges</li> <li>• Reinstate the policies</li> <li>• Create sort records for bill groups</li> <li>• Create derivation and pricing parameters for bill groups</li> </ul>
Chapter 24	General Ledger (GL) Accounting Template	Describes how to override the distribution code used for creating FT GL entries using the <b>GL Accounting Template</b> feature. It explains how to create the GL accounting templates for each process and sub processes combination.
Chapter 25	Payment Agreement Request	Describes how to schedule payments in installments for a set of unpaid bills of an account through a payment agreement request. It explains how to create the payment agreement request types and payment agreement requests in the system.
Chapter 26	Inbound Message	Explains how to create the customer and membership inbound messages through the web services. It explains the XML format in which the customer and membership data should be available while calling the respective web service. It also explains how to create the inbound message types and how to process the inbound messages in the system.
Chapter 27	Health Insurance Policy	Describes the fully-insured and self-funded policies and their lifecycle. Explains how to create the policy types, policy person roles, contract relationship types, and source systems in the system. It explains how to create the fully-insured policies, plans, and memberships in the system. It also explains how to create the self-funded policies in the system.
Chapter 28	Upload Lockbox Payment and Remittance Advices	Explains how to upload lockbox payment and remittance advices received in the <b>Electronic Data Exchange (EDI) 820</b> format. It also explains the format in which EDI 820 flat file should be uploaded in the system.

Chapter Number	Chapter Name	Chapter Description
Chapter 29	Deferred Revenue Recognition	Describes how to recognize the deferred revenue in the system. It explains how to create a deferred revenue recognition template for each distribution code and contract type combination. It also explains how to generate the schedule for a deferred revenue recognition. In addition, it explains how to edit the deferred revenue recognition schedule.
Chapter 30	Reconciliation	Describes how to reconcile pay instructions received from the external system against the bill segments based on the account identifier, policy number, plan number, member identifier, and coverage period combination. It explains the CSV and EDI 820 file formats in which you can upload the pay instructions. It also explains how to create reconciliation types, reconciliations, discrepancy report types, and discrepancy reports in the system.
Chapter 31	Self-Funded Pricing	Explains how to create the following in the system: <ul style="list-style-type: none"> <li>• Claim, Specific Stop-Loss, Aggregate Stop-Loss, Retention Type Claim Based, Retention Type Enrollment Based, One-Time Flat Fees, Bill Period Based Recurring Flat Fees, Frequency Based Recurring Flat Fees, Ancillary, Discount, and Level-Funding pricing rule types</li> <li>• Claim, Specific Stop-Loss, Aggregate Stop-Loss, Retention Type Claim Based, Retention Type Enrollment Based, Ancillary, and Level-Funding pricing rules for the parent customers and the policies of the bill groups</li> <li>• One-Time Flat Fees, Bill Period Based Recurring Flat Fees, and Frequency Based Recurring Flat Fees pricing rules for the policies of the bill groups</li> <li>• Discount pricing rules for the parent customers</li> </ul>
Chapter 32	Self-Funded Billing	Explains the billing process for the self-funded plans.
Chapter 33	Fully-Insured Pricing	Explains how to create the following in the system: <ul style="list-style-type: none"> <li>• Age Based, Tier Based, and Pass-Through Billable Charge pricing rule types</li> <li>• Age Based and Tier Based pricing rules for the fully-insured group policy plans</li> </ul>
Chapter 34	Fully-Insured Billing	Explains how the system creates the fully insured pass-through billable charges.
Chapter 35	Entity Audit	Explains how auditors can track various actions, such as add, update, and delete for an entity.
Appendix A	Most Commonly Used Tasks	Lists and describes some of the common tasks that you may perform while using the application.
Appendix B	Administration	Describes how to create UI maps and set various feature configurations in the system.

## Conventions

---

The following conventions are used across this document:

Convention	Meaning
<b>boldface</b>	Boldface indicates graphical user interface elements associated with an action, or terms defined in the text.
<i>italic</i>	Italic indicates a document or book title.
Monospace	Monospace indicates information that an end-user needs to enter in the application.

## Related Documents

---

You can refer to the following documents:

Document Name	Description
<i>Oracle Revenue Management and Billing Version 2.8.0.0.0 Release Notes</i>	Provides a brief description about the new features, enhancements, UI and database level changes, supported platforms, framework upgrade, supported upgrades, and technology upgrade made in this release. It also highlights the discontinued features, bug fixes, and known issues in this release.
<i>ORMB - Transaction Feed Management - Batch Execution Guide</i>	Describes the sequence in which the batches must be executed while performing various tasks in the Transaction Feed Management module.
<i>Oracle Revenue Management and Billing Batch Guide</i>	Lists and describes various ORMB batches.
<i>Oracle Revenue Management and Billing Installation Guide</i>	Lists the application server pre-requisites, supported platforms, and software and hardware requirements for installing the Oracle Revenue Management and Billing application. It explains how to install the Oracle Revenue Management and Billing application.
<i>Oracle Revenue Management and Billing Quick Installation Guide</i>	Provides high-level information on how to install the Oracle Revenue Management and Billing (ORMB) application and selected additional software.
<i>Oracle Revenue Management and Billing Database Administrator's Guide</i>	Provides information about the Oracle Database Server and Client required for installing the Oracle Revenue Management and Billing database. It explains how to install database with and without demo data. It provides database configuration guidelines including recommended settings for the Oracle Exadata Database machine.
<i>Oracle Revenue Management and Billing Server Administration Guide</i>	Explains the Oracle Revenue Management and Billing (ORMB) architecture and technical know-how required for configuring and using the ORMB application. It explains how to configure and deploy web and business application servers. In addition, it explains how to monitor client machines, web and/or business application servers, and database connections.

Document Name	Description
<i>Oracle Revenue Management and Billing Security Guide</i>	Lists the security features available in the Oracle Revenue Management and Billing application. It explains how to configure security for the Oracle Revenue Management and Billing application using the default security features.

## Change Log

Revision	Last Update	Updated Section	Comments
9.1	07-07-2019	Fully-Insured Billing	Added Section
9.2	08-07-2019	Self-Funded Customer Management (formerly, known as Administrative Services Only (ASO) Customer Management)	Updated Information
		Fully-Insured Customer Management	Added Section
		Customer 360° View	Updated Information
		Self-Funded Pricing (formerly, known as Administrative Services Only (ASO) Pricing)	Added Information Related to Discount and Level Funded Pricing Rules Types
		Policy-Membership Overview	Updated Information
		Audit Event	Added Section
		Upload Validated Adjustment Data	Updated Information in the Status Transition Topics
		Payment Request	Updated Information in the Status Transition Topics
		Offset Request	Updated Information in the Status Transition Topics
		Refund/Write Off Request	Updated Information in the Status Transition Topics
		Hold Request	Updated Information in the Status Transition Topics
		Upload Request	Updated Information in the Status Transition Topics
		General Ledger (GL) Accounting Template	Updated Information in the Status Transition Topics
Payment Agreement Request	Updated Information in the Status Transition Topics

# Chapter 1

---

## Self-Funded Customer Management

---

### Topics:

- [Self-Funded Entities](#)

Self-funded health care, also known as Administrative Services Only (ASO), is a self insurance arrangement whereby an employer provides health or disability benefits to employees using the company's own funds. In self-funded health plan, employers (usually larger) operate their own health plan. However, in the fully-insured plan, the employer contracts an insurance company to cover the employees and dependents. Employers choose to self-insure because it allows them to save the profit margin that an insurance company adds to its premium for a fully-insured plan. However, self-insuring exposes the company to much larger risk in the event that more claims than expected must be paid.

Oracle Revenue Management and Billing (ORMB) supports the following types of self-funding approach:

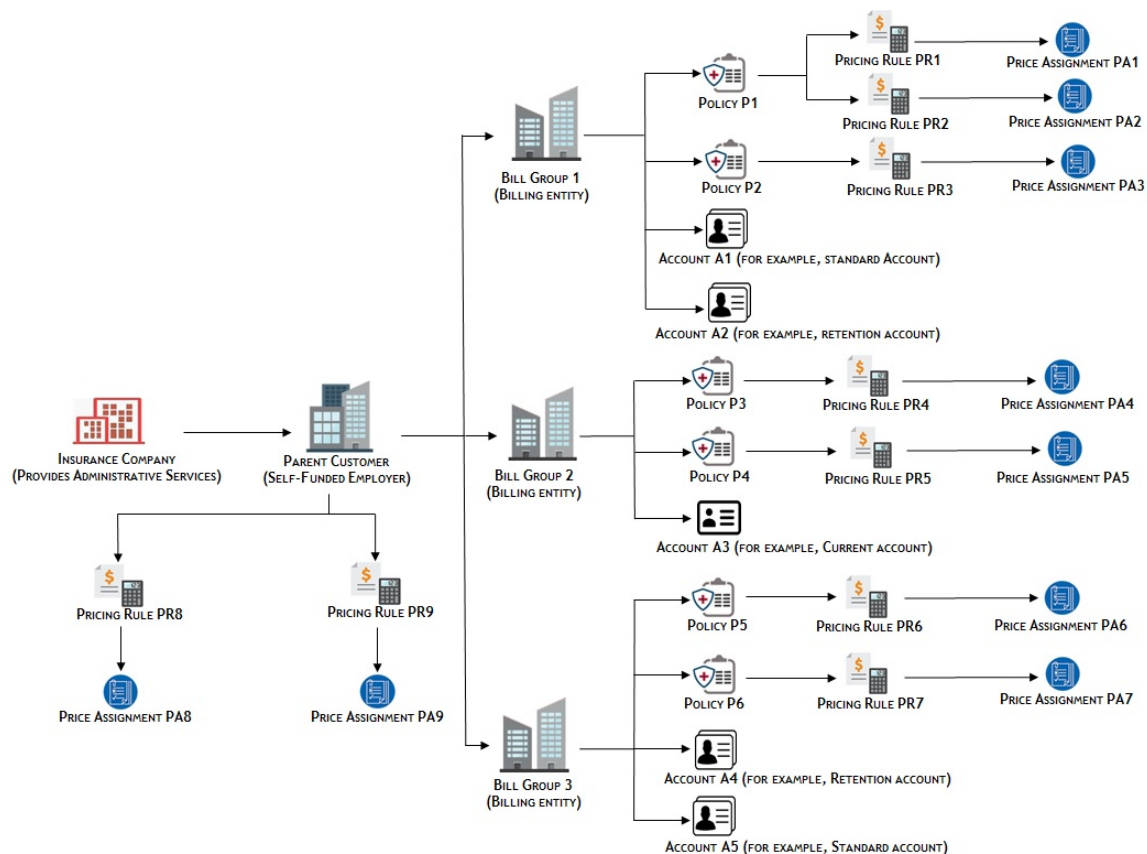

- **Fully Self-Funded** - In the fully self-funded approach, the employer retains all the risk and bears the claim costs irrespective of any limit.
- **Partially Self-Funded** - In the partially self-funded approach, the employer purchases reinsurance or stop loss coverage to pass the risk to insurance company.

The system enables you to create customers and accounts for the self-funded health care business. This chapter explains how to create different entities involved in the self-funded health care business.

<b>Pricing Rules</b>	<a href="#">Pricing Rules</a> on page 57
<b>Price Assignments</b>	<a href="#">Price Assignments</a> on page 58

### Parent Customer

The self-funded employers must be defined as parent customers in the system. You can define a person as the parent customer by setting its person type to **Parent Customer**. You can create a parent customer through a customer registration object or a health care inbound message.

## Bill Groups

The system allows you to define one or more bill groups for a parent customer. The claim, enrollment, and ancillary transactions of the employees are billed to a bill group. Each bill group will handle the claim, enrollment, and ancillary transactions of employees based on the employee attributes, such as location, employment status, employment department, and so on. The system allows you to define the derivation and pricing parameters, such as source system, parameter 1, parameter 2, parameter 3, and parameter 4 for a bill group. These parameters are used to derive the bill group against which the claim, enrollment, and ancillary charges should be billed in the system. The derived bill group is also used for billing the claim based fees, specific stop-loss credits, aggregate stop-loss credits, discount, and level-funding charges.

You can define a person as the bill group by setting its person type to **Bill Group**. The bill groups should be defined as the child persons of the parent customer (i.e. self-funded employer) using the relationship type which is specified in the **Person Relationship Type** option type of the **C1-ASOBLNG** feature configuration. You can create a bill group through a customer registration object or a health care inbound message.

### Related Topics

For more information on...	See...
Bill Group Derivation and Pricing Parameters	<a href="#">Bill Group Derivation and Pricing Parameters</a> on page 2722
How to setup the <b>C1-ASOBLNG</b> feature configuration	<a href="#">Setting the C1-ASOBLNG Feature Configuration</a> on page 2889

## Bill Group's Account

The claim charges, specific stop-loss credits, aggregate stop-loss credits, claim based fees, enrollment based fees, ancillary charges, discount, and level-funding charges are billed to the bill group's account. Therefore, every bill group should have at least one account in the system. You can create multiple accounts for a bill group. You can create an account for a bill group through a customer registration object or a health care inbound message.

Depending on the employer's preference, the claim charges, specific stop-loss credits, aggregate stop-loss credits, claim based fees, enrollment based fees, ancillary charges, discount, and level-funding charges can be billed on the same or different accounts of the bill group. The system enables you to create different types of accounts (such as, standard and retention) for a bill group. You can specify the type of account by defining the **Invoice Type (C1INVTYP)** characteristic for the account.

**Note:** At present, we have not shipped any predefined values for the **Invoice Type (C1INVTYP)** characteristic type. You must define the predefined characteristic values as per the business requirements.

You can also set the priority for an account based on the invoice type while specifying the billing account information for a price item in a pricing rule type. For example,

Price Item	Priority	Invoice Type	Account
P1	10	Standard	A1
	20	Retention	A2
P2	10	Retention	A2
	20	Standard	A1

Now, when a claim transaction is mapped to P1, the system checks whether an account where the **Invoice Type (C1INVTYP)** characteristic type is set to **Standard** exists for the bill group. If so, it considers the standard account (A1) of the bill group for billing. However, if an account where the **Invoice Type (C1INVTYP)** characteristic type is set to **Standard** does not exist for the bill group, the system checks whether an account where the **Invoice Type (C1INVTYP)** characteristic type is set to **Retention** exists for the bill group. If so, it considers the retention account (A2) of the bill

group for billing. If an account where the **Invoice Type (C1INVTYP)** characteristic type is set to **Retention** does not exist for the bill group, the status of the transaction is changed to **Error**.

Similarly, when a claim transaction is mapped to P2, the system considers the account of the bill group which is available based on the priority. The system derives the billing account for only those price items for which the effective pricing rule is derived.

The system searches the account of the bill group based on the priority only when the **Invoice Type Characteristic Type** option type of the **C1-ASOBLNG** feature configuration is set to **C1INVTYP**.

### Related Topics

For more information on...	See...
How to setup the <b>C1-ASOBLNG</b> feature configuration	<a href="#">Setting the C1-ASOBLNG Feature Configuration</a> on page 2889

## Self-Funded Policy

You can create a self-funded policy using a policy type where the policy category is set to **Self-Funded**. You can create a self-funded policy through a customer registration object or a health care inbound message. If the self-funded policy information is given for a bill group in a health care inbound message, the system does the following:

- Associates the bill group with the policy using the policy person role which is specified in the **Bill Group Policy Person Role** option type of the **C1-ASOBLNG** feature configuration
- Associates the parent customer with the policy using the policy person role which is specified in the **Parent Customer Policy Person Role** option type of the **C1-ASOBLNG** feature configuration

## Price Items

Each service offered in the self-funded plan should be defined as a price item in the system. You must add the price item in a pricing rule type. The system then enables you to create a pricing rule for a price item using the respective pricing rule type.

You can define a price item and associate the required parameters with the price item from the user interface. You can use the price item parameters for defining multi parameter based pricing or for aggregating the transactions.

## Pricing Rule Types

You can create a pricing rule using the respective pricing rule type. The system enables you to create pricing rule types of the following categories for the self-funded plan from the user interface:

Pricing Rule Type	Pricing Rule Type Category	Sample Shipped with the Product
Claim	Claim	CLAIM
Retention Type Claim Based	Retention Type Claim Based	RETCLMBSD
Discount Share	Discount Arrangement	DISSHARE
Discount Guarantee	Discount Arrangement	DISGUAR
One-Time Flat Fees	Flat Fees	ONETIMEFLATFEES
Bill Period Based Recurring Flat Fees	Flat Fees	RECFLATFEES_BP
Frequency Based Recurring Flat Fees	Flat Fees	RECFLATFEES_FREQ
Retention Type Enrollment Based	Retention Type Enrollment Based	RETENRLBSD

Pricing Rule Type	Pricing Rule Type Category	Sample Shipped with the Product
Ancillary	Ancillary	ANCILLARY
Specific Stop-Loss	Specific Stop-Loss	SSL
Aggregate Stop-Loss	Aggregate Stop-Loss	ASL
Enrollment Based Premium	Level Funded	LVLNRLPRE
Flat Rate Based Premium	Level Funded	LVLFLATPRE

## Pricing Rules

The self-funded plan may offer various services to the employer, such as claim administration, reinsurance or stop-loss, discount or level funding arrangement, and so on. Oracle Revenue Management and Billing enables you to define pricing rules for various services offered in the self-funded plan. The below table lists the pricing rules which you can define for the following services offered in the self-funded plan:

Service	Pricing Rule	Created for....
Claim Administration	Claim	Parent Customer
Claim Administration	Claim	Bill Group's Policy where the Parent Customer is the Policy Holder
Claim Administration	Retention Type Claim Based	Parent Customer
Claim Administration	Retention Type Claim Based	Bill Group's Policy where the Parent Customer is the Policy Holder
Claim Administration	Discount Share	Parent Customer
Claim Administration	Discount Guarantee	Parent Customer
Claim Administration	One-Time Flat Fees	Bill Group's Policy where the Parent Customer is the Policy Holder
Claim Administration	Bill Period Based Recurring Flat Fees	Bill Group's Policy where the Parent Customer is the Policy Holder
Claim Administration	Frequency Based Recurring Flat Fees	Bill Group's Policy where the Parent Customer is the Policy Holder
Enrollment	Retention Type Enrollment Based	Parent Customer
Enrollment	Retention Type Enrollment Based	Bill Group's Policy where the Parent Customer is the Policy Holder
Ancillary, such as Laboratory, Radiology, Pharmacy, Physical Therapy, or Preventive Care	Ancillary	Parent Customer
Ancillary, such as Laboratory, Radiology, Pharmacy, Physical Therapy, or Preventive Care	Ancillary	Bill Group's Policy where the Parent Customer is the Policy Holder
Stop-Loss	Specific Stop-Loss	Parent Customer
Stop-Loss	Specific Stop-Loss	Bill Group's Policy where the Parent Customer is the Policy Holder
Stop-Loss	Aggregate Stop-Loss	Parent Customer

Service	Pricing Rule	Created for....
Stop-Loss	Aggregate Stop-Loss	Bill Group's Policy where the Parent Customer is the Policy Holder
Level Funding Arrangement	Enrollment Based Premium	Parent Customer
Level Funding Arrangement	Enrollment Based Premium	Bill Group's Policy where the Parent Customer is the Policy Holder
Level Funding Arrangement	Flat Rate Based Premium	Parent Customer
Level Funding Arrangement	Flat Rate Based Premium	Bill Group's Policy where the Parent Customer is the Policy Holder

You can create the above mentioned self-funded pricing rules for a parent customer or for the policy of the bill group from the user interface and not through a health care inbound message.

The system creates a price assignment for each pricing rule. In case of the retention type claim and enrollment based pricing rules, the system creates multiple price assignments when different claim based or enrollment based fee is offered for employees with different set of employee attributes.

The system first searches for the pricing rule of a price item (i.e. service) at the bill group level. If the effective pricing rule for a price item is available at the bill group level, the system uses it for deriving the price assignment. However, if the effective pricing rule for a price item is not available at the bill group level, the system searches for the pricing rule of a price item at the parent customer level. If the effective pricing rule for a price item is available at the parent customer level, the system uses it for deriving the price assignment. However, if the effective pricing rule for a price item is not available at the bill group or parent customer level, the system does not consider the respective price item for billing.

## Price Assignments

The system creates a price assignment for each self-funded pricing rule. In case of the retention type claim and enrollment based pricing rules, the system creates multiple price assignments when different claim based or enrollment based fee is offered for employees with different set of employee attributes.

The system automatically creates a price assignment whenever you create a self-funded pricing rule. The system creates the price assignment in a price list and assigns the price list to the parent customer or bill group. The system creates multiple price assignments when you define a pricing rule for a policy of a bill group using a pricing group.

## Fully-Insured Customer Management

---

### Topics:

- [Fully-Insured Entities](#)

A fully-insured health plan is the traditional way to structure an employer-sponsored health plan. In the fully-insured plan, the employer contracts an insurance company to cover the employees and dependents. The employer pays a premium to the insurance carrier. The premium rates are fixed for a year, based on the number of employees enrolled in the plan each month. The monthly premium changes during the year when the number of enrolled employees in the plan changes. The insurance carrier collects the premiums and pays the health care claims based on the coverage benefits outlined in the policy. The covered persons (i.e. employees and dependents) are responsible to pay any deductible amounts or co-payments required for covered services under the policy.

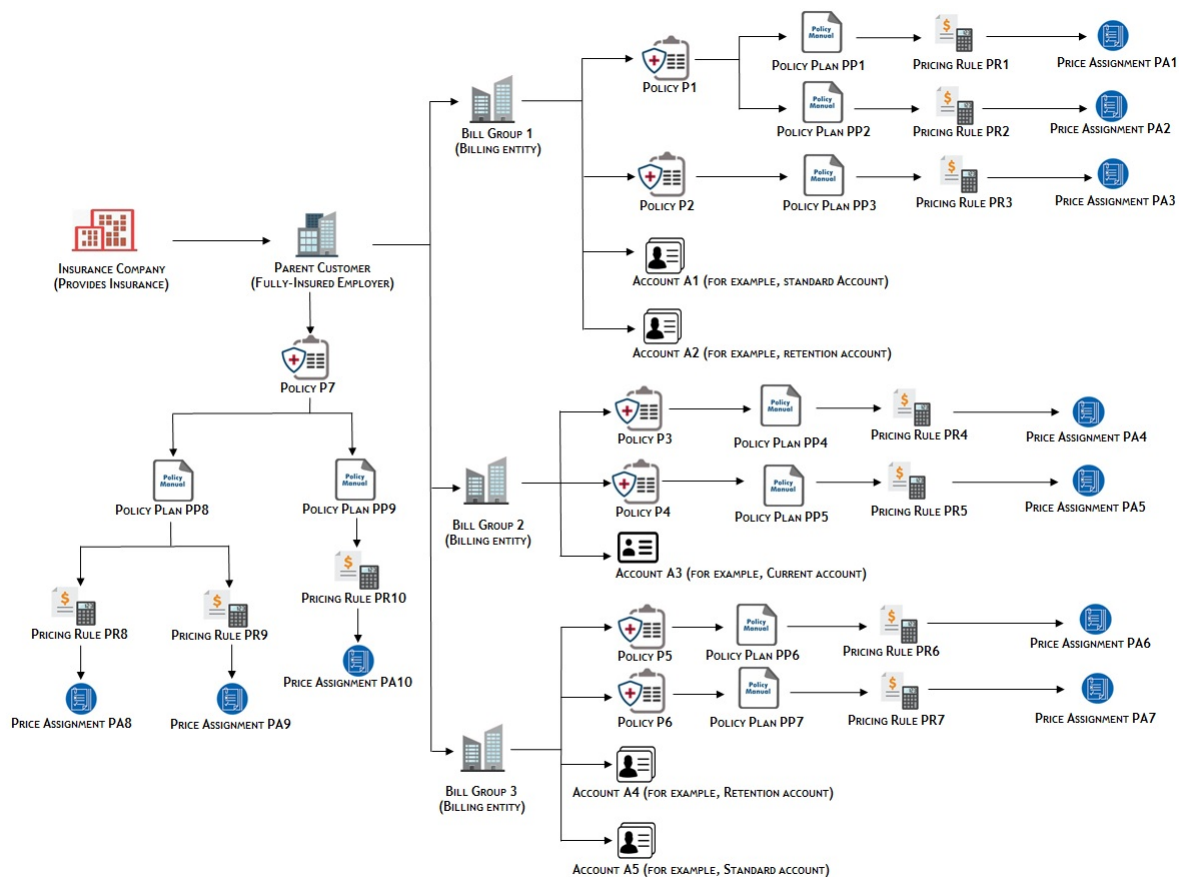

The system enables you to create customers and accounts for the fully-insured health care business. This chapter explains how to create different entities involved in the fully-insured health care business.

### Related Topics

## Parent Customer

The fully-insured employers must be defined as parent customers in the system. You can define a person as the parent customer by setting its person type to **Parent Customer**. You can create a parent customer through a customer registration object or a health care inbound message.

## Bill Groups

The system allows you to define one or more bill groups for a parent customer. The membership premium of the employees are billed to a bill group. Each bill group will handle the membership premium of employees based on the employee attributes, such as location, employment status, employment department, and so on. The system allows you to define the derivation and pricing parameters, such as source system, parameter 1, parameter 2, parameter 3, and parameter 4 for a bill group. These parameters are used to derive the bill group against which the membership premium should be billed in the system. You can define a person as the bill group by setting its person type to **Bill Group**. The bill groups should be defined as the child persons of the parent customer (i.e. fully-insured employer) using the relationship type which is specified in the **Person Relationship Type** option type of the **C1-ASOBLNG** feature configuration. You can create a bill group through a customer registration object or a health care inbound message.

### Related Topics

For more information on...	See...
Bill Group Derivation and Pricing Parameters	<a href="#">Bill Group Derivation and Pricing Parameters</a> on page 2722
How to setup the <b>C1-ASOBLNG</b> feature configuration	<a href="#">Setting the C1-ASOBLNG Feature Configuration</a> on page 2889

## Bill Group's Account

The membership premium of employees are billed to the bill group's account. Therefore, every bill group should have at least one account in the system. You can create multiple accounts for a bill group. You can create an account for a bill group through a customer registration object or a health care inbound message.

Depending on the employer's preference, the charges for one or more membership and price item combinations can be billed on the same or different accounts of the bill group. The system enables you to create different types of accounts (such as, MEDCARE1 and MEDCARE2) for a bill group. You can specify the type of account by defining the **Invoice Type (C1INVTYP)** characteristic for the account.

**Note:** At present, we have not shipped any predefined values for the **Invoice Type (C1INVTYP)** characteristic type. You must define the predefined characteristic values as per the business requirements.

You can also set the priority for an account based on the invoice type while specifying the billing account information for a price item in a pricing rule type. For example,

Price Item	Priority	Invoice Type	Account
P1	10	MEDCARE1	A1
	20	MEDCARE2	A2
P2	10	MEDCARE2	A2
	20	MEDCARE1	A1

Now, when the effective pricing rule is derived for P1 on the policy plan, the system checks whether an account where the **Invoice Type (C1INVTYP)** characteristic type is set to **MEDCARE1** exists for the bill group. If so, it considers the account (A1) of the bill group for billing. However, if an account where the **Invoice Type (C1INVTYP)** characteristic type is set to **MEDCARE1** does not exist for the bill group, the system checks whether an account where the **Invoice**

**Type (C1INVTYP)** characteristic type is set to **MEDCARE2** exists for the bill group. If so, it considers the account (A2) of the bill group for billing. If an account where the **Invoice Type (C1INVTYP)** characteristic type is set to **MEDCARE2** does not exist for the bill group, the status of the record in the **CI\_REPRC\_ENTITY\_DTL** table is set to **Error (E)**.

Similarly, when the effective pricing rule is derived for P2 on the policy plan, the system considers the account of the bill group which is available based on the priority. The system derives the billing account for only those price items for which the effective pricing rule is derived.

The system searches the account of the bill group based on the priority only when the **Invoice Type Characteristic Type** option type of the **C1-ASOBLNG** feature configuration is set to **C1INVTYP**.

### Related Topics

For more information on...	See...
How to setup the <b>C1-ASOBLNG</b> feature configuration	<a href="#">Setting the C1-ASOBLNG Feature Configuration</a> on page 2889

## Fully-Insured Policy

You can create a fully-insured policy using a policy type where the policy category is set to **Fully-Insured Group**. You can create a fully-insured policy through a customer registration object or a health care inbound message. If the fully-insured policy information is given for a bill group in a health care inbound message, the system does the following:

- Associates the bill group with the policy using the policy person role which is specified in the **Bill Group Policy Person Role** option type of the **C1-ASOBLNG** feature configuration
- Associates the parent customer with the policy using the policy person role which is specified in the **Parent Customer Policy Person Role** option type of the **C1-ASOBLNG** feature configuration

However, if the fully-insured policy information is given for a parent customer in a health care inbound message, the system does the following:

- Associates the parent customer with the policy using the policy person role which is specified in the **Parent Customer Policy Person Role** option type of the **C1-ASOBLNG** feature configuration

**Note:** At present, the **Fully-Insured Individual** policy category is not yet supported in the system.

## Policy Plans

A fully insured group policy may cover various plans for medical, dental, or disability benefits. You can subscribe a person for one or more policy plans within or across policies. The system creates one membership for each person who is subscribed to the policy plan. You can then add dependent members in each membership whenever required.

While creating a policy plan, you need to specify either a price item or at least one pricing rule type. The price item given in the policy plan is used to create a pass-through billable charge for pre-calculated premium amount which is received in a membership inbound message.

Alternatively, you can associate a pricing rule type with a policy plan. You can only associate a pricing rule type where the pricing rule type category is set to **Age Based**, **Tier Based**, or **Pass-Through Billable Charge**. If you associate an age based pricing rule type with the policy plan, the system creates the SQI based billable charge whenever the membership premium is calculated for eligible members. If you associate a tier based pricing rule type with the policy plan, the system creates the SQI based billable charge whenever the premium is calculated for membership. However, if you associate a pass-through billable charge pricing rule type with the policy plan, the system creates an SQI based billable charge using the pass-through billable charge pricing rule type whenever the price item information is given, but the account information is not given in a health care inbound message. Note that if both the price item and account details are given in the billable charge information, the system directly creates the SQI based billable charge for the pre-calculated premium and does not refer the pass-through billable charge pricing rule type which is associated with the policy plan.

## Price Items

Each service offered in the fully-insured plan should be defined as a price item in the system. You can define a price item from the user interface. You must add the price item in a pricing rule type. The system then enables you to create a pricing rule for a price item using the respective pricing rule type.

## Pricing Rule Types

You can create a pricing rule using the respective pricing rule type. The system enables you to create pricing rule types of the following categories for the fully-insured plan through a health care inbound message:

Pricing Rule Type	Pricing Rule Type Category	Sample Shipped with the Product
Age Based	Age Based	AGE_BASED
Tier Based	Tier Based	TIER_BASED
Pass-Through Billable Charge	Pass-Through Billable Charge	FI_PASSTBC

**Note:** You cannot define a pricing rule using a pricing rule type where the pricing rule type category is set to **Pass-Through Billable Charge**.

## Pricing Rules

The fully-insured plan may offer various services to the employer, such as medical insurance, dental insurance, vision care, life insurance, short-term and long-term disability benefits, and so on. Oracle Revenue Management and Billing enables you to define pricing rules for various services offered in the fully-insured plan. The below table lists the pricing rules which you can define for the following services offered in the fully-insured plan:

Service	Pricing Rule	Created for....
Medical Insurance, Dental Insurance, Vision Care, Life Insurance, Short-Term and Long-Term Disability Benefits, etc.	Age Based	Fully-Insured Policy Plan
	Tier Based	Fully-Insured Policy Plan

You can create the above mentioned pricing rules for the fully-insured policy plans through a health care inbound message and not from the user interface. The system creates a price assignment for each pricing rule. In the age based pricing rules, you can define different premium fee for employees who belong different age band. You can also offer different premium fee for the employees with the same age band, but with the different set of attributes. The system also enables you to charge additional fee for the eligible member based on certain modifiers. For example, you can charge additional fee when the eligible member is alcoholic and/or consumes tobacco. However, in the tier based pricing rules, you can define different premium fee for employees who belong to different membership tier, such as Employee (E), Employee + Spouse (ES), Employee + Spouse + Children (F), and so on.

The system searches for the pricing rule of a price item (i.e. service) on the policy plan to which the membership belongs. If the effective pricing rule for a price item is not available on the policy plan, the system does not consider the respective price item for billing.

## Price Assignments

The system creates a price assignment for each fully-insured pricing rule. If different premium fee is defined for employees with different set of employee attributes, then the system creates a separate price component for each set of employee attributes. If the modifiers are used in the age based pricing rule, the system creates a price component for each modifier. In the price component, the age band or tier band parameter, the employee attributes, and modifiers are used to define the pricing eligibility criteria. Once the age based or tier based pricing rule is defined for a policy plan, the system creates a price item pricing and price list, and then assigns the price item pricing to the price list.

## Customer Registration

---

### Topics:

- [Customer Registration \(Without Approval\) Status Transition](#)
- [Customer Registration \(With Approval\) Status Transition](#)
- [Customer Registration Template](#)
- [Customer Registration Type](#)
- [Customer Registration \(Used for Searching\)](#)
- [Customer Registration \(Used for Viewing\)](#)

Until now, you were able to create person, account, policy, and policy plan from the different screens. Now, ORMB provides the ability to create a person, multiple accounts for the person, multiple policies for the person, and multiple policy plans for the policy from the same user interface. A new object named **Customer Registration** is introduced in this release. Through a customer registration object, you can create person, accounts, policies, and policy plans at the same time from the same interface. Before creating a customer registration object, you need to create the following:

- Customer Registration Template
- Customer Registration Type

While creating a customer registration object, you need to specify the following:

- A customer registration type using which the customer registration object should be created
- A source system from the customer information is received
- A type of person that you want to create through the customer registration object

Once you specify the above details, the **Customer Registration** screen appears with a set of pages and sections which are added in the respective person template. The default values for the fields, characteristic types, identifier types, and phone types are shown as specified in the person template. In addition, the field values, characteristic types, characteristic values, identifier types, identifier values, phone types, and phone numbers are disabled as specified in the person template. On the Accounts page, you can view one row for each account template which is added in the customer registration type. You can then edit the row and thereby create an account for the person. You can create multiple accounts for the person using the same or different template.

#### Note:

You cannot create sort records and derivation and pricing parameters for the bill group from the **Customer Registrations** screen. You can only create these from the **Customer 360° Information** screen or using the healthcare inbound message.

The system creates effective dated address using the address business object which is specified in the customer registration type. By default, the account override address is effective from the date when the customer registration object is created in the system.

On the **Policies** page, you can view one row for each policy template which is added in the customer registration type. You can then edit the row and thereby

create a policy for the person. You can create multiple policies for the person using the same or different template. On clicking the **Add** icon corresponding to the policy row, you can view one row for each policy plan template which is added in the customer registration type. You can then edit the row and thereby create a policy plan for the policy.

On clicking the **View/Edit** icon or the **Add New Account** button in the **Accounts** page, the **Customer Registration - Add Account** screen appears with a set of pages and sections which are added in the respective account template. The default values for the fields, characteristic types, and identifier types are shown as specified in the account template. In addition, the field values, characteristic types, characteristic values, identifier types, and identifier values are disabled as specified in the account template.

On clicking the **View/Edit** icon or the **Add New Policy** button in the **Policies** page, you need to specify a policy type. The policy type indicates the category to which the policy belongs (i.e. whether it is Self Funded, Fully-Insured Group, or Fully-Insured Individual) and the policy business object using which the policy should be created. Once you specify a policy type, the **Policy** screen appears with a set of sections which are added in the respective policy template. The default values for the fields and characteristic types are shown as specified in the policy template. In addition, the field values, characteristic types, and characteristic values are disabled as specified in the policy template. You can create one or more policies for the person using the same or different policy type.

On clicking the **View/Edit** icon or the **Add New Plan** button corresponding to a policy plan row in the **Policies** page, the **Plan** screen appears with a set of sections which are added in the respective policy plan template. The default values for the fields and characteristic types are shown as specified in the policy plan template. In addition, the field values, characteristic types, and characteristic values are disabled as specified in the policy plan template.

You can save the person, account, policy, and policy plan details as and when you are entering the data by clicking the **Save as Draft** button. On clicking the **Save as Draft** button, the system creates a customer registration object in the Draft status. The status of the policies which are created through the customer registration object is set to Pending. Once the person, account, policy, and policy plan details are specified, you can click the **Validate and Save** button. The system then validates the information. You can edit, delete, or submit a customer registration object when it is in the **Draft** status. On submitting a customer registration object, the person, accounts, policies, and policy plans are created in the system. Finally, the status of the customer registration object is changed to the following depending on the type of person:

Person Type	Status
Parent Customer	Parent Customer Approved
Bill Group	Bill Group Approved
Any Other Person Type Other Than Parent Customer and Bill Group	Complete

You can optionally configure the approval process for the customer registration. If the **Approval Required** option is selected in the customer registration type, the status of the customer registration object is changed to **Approval In Progress** on submitting it. A To Do using the approval To Do type is created and assigned to the users with the approval To Do role. The approver can

then review the customer registration object and accordingly approve, reject, or request the submitter to resubmit the customer registration object for approval. On approving a customer registration object, the person, accounts, policies, and policy plans are created in the system. Finally, the status of the customer registration object is changed to the following depending on the type of person:

Person Type	Status
Parent Customer	Parent Customer Approved
Bill Group	Bill Group Approved
Any Other Person Type Other Than Parent Customer and Bill Group	Complete

If the approver rejects a customer registration object due to some reason, the status of the customer registration object is changed to **Rejected**. However, if the approver requests the submitter to resubmit a customer registration object for approval after making the required changes, the status of the customer registration object is changed to **Draft**. The submitter can then make the required changes and resubmit the customer registration object for approval.

The system provides the following two options while defining a customer registration type:

- Manual Billing Hierarchy and Pricing**- Used when you want to inform the user to create the billing hierarchy and pricing for the parent customer manually. In other words, you want the user to create the required bill groups for the parent customer, the bill group's accounts, pricing rules, bill group sorting information, and bill group derivation and pricing parameters. If this option is selected, a To Do is created using the **Billing Hierarchy and Pricing To Do** type and assigned to the users with the **Billing Hierarchy and Pricing To Do** role. This feature can be used only for customer registration objects where the person type is set to **Parent Customer**. Once the billing hierarchy and pricing is created for the parent customer, the user must complete the corresponding To Do which is created using the **Billing Hierarchy and Pricing To Do** type. On executing the **Customer Registration Monitor (C1-CUSRG)** batch, the system considers all customer registration objects which are in the **Parent Customer Approved** or **Pending Pricing Correction** status. It checks whether the corresponding To Do (if any) created using the **Billing Hierarchy and Pricing To Do** type is completed. If so, it changes the status of the customer registration object to the following depending on whether the **Final Approval Required** option is selected:

Final Approval Required (Yes or No)	Status
Yes	Pending Final Approval
No	Complete

- Final Approval Required**- Used to indicate whether the final approval is required once the approver at the first level approves the customer registration object. Ideally, the final approval is required when the **Manual Billing Hierarchy and Pricing** option is selected. This ensures that the information related to the following entities is created and verified before the customer registration object moves to the **Complete** status:
  - Bill Group

- Bill Group's Accounts
- Bill Group's Sorting Records
- Bill Group's Derivation and Pricing Parameters
- Pricing Rules for the Policy Plans

If this option is selected, a To Do is created using the **Final Approval To Do** type and assigned to the users with the **Final Approval To Do** role. This feature can be used only for customer registration objects where the person type is set to **Parent Customer**. Once the user with the **Final Approval To Do** role approves the customer registration object, the status of the customer registration object is changed to **Complete**.

If the approver requests the submitter to resubmit a customer registration object for approval, the status of the customer registration object is changed to **Pending Pricing Correction**.

**Note:** The system enables you to create maximum 10 accounts and 5 policies for a person and maximum 10 policy plans for a policy through a customer registration object from the user interface.

Once the status of a customer registration object is changed to **Complete** or **Bill Group Approved**, the system changes the status of the policies created through the customer registration object to **In Force/Active**. In addition, the status of the pricing rules which are created for such policies' policy plans is set to **Active**.

You can also create a customer registration object using the **File Upload Interface** utility through an inbound message. On creating an inbound message using the **File Upload Interface** utility, the status of the inbound message is set to **Pending**. Once the inbound message is processed, a customer registration object is created in the following status depending on the person type:

Person Type	Status
Parent Customer	Complete
Bill Group	Bill Group Approved
Any Other Person Type Other Than Parent Customer and Bill Group	Complete

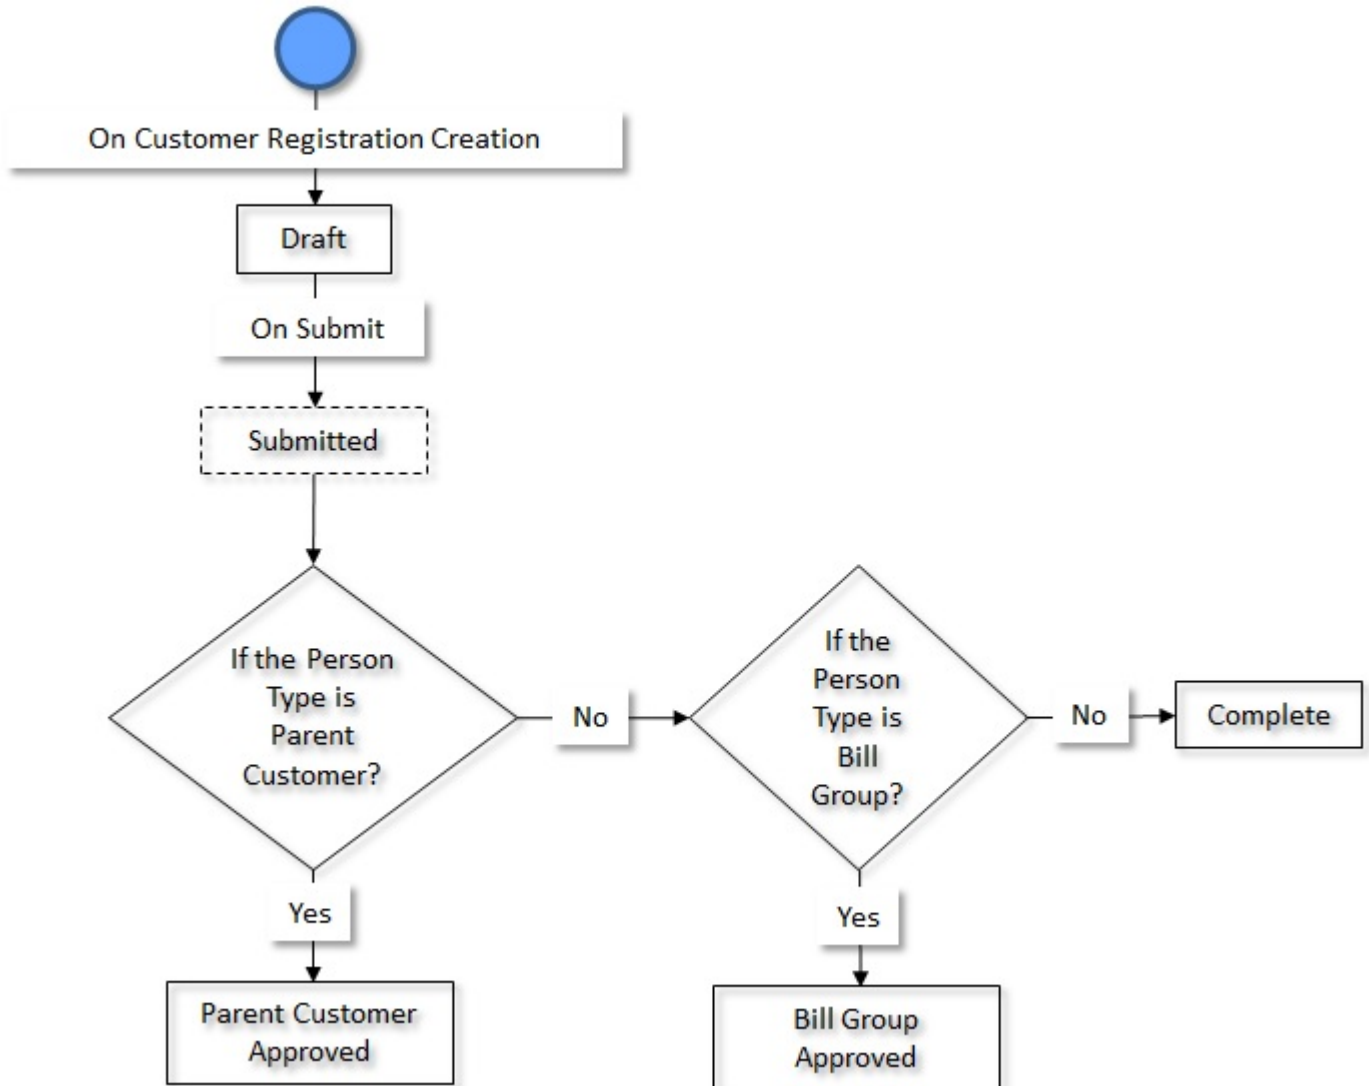

**Note:** The above status transition is mentioned based on the assumption that the data uploaded through the **File Upload Interface** utility will be pre-approved and does not require any approval in the system.

At present, only the XML format is supported for creating a customer registration object using the File Upload Interface utility through an inbound message. To implement the Customer Registration feature, the following new screens are introduced in this release:

- Customer Registration Template
- Customer Registration Type
- Customer Registration

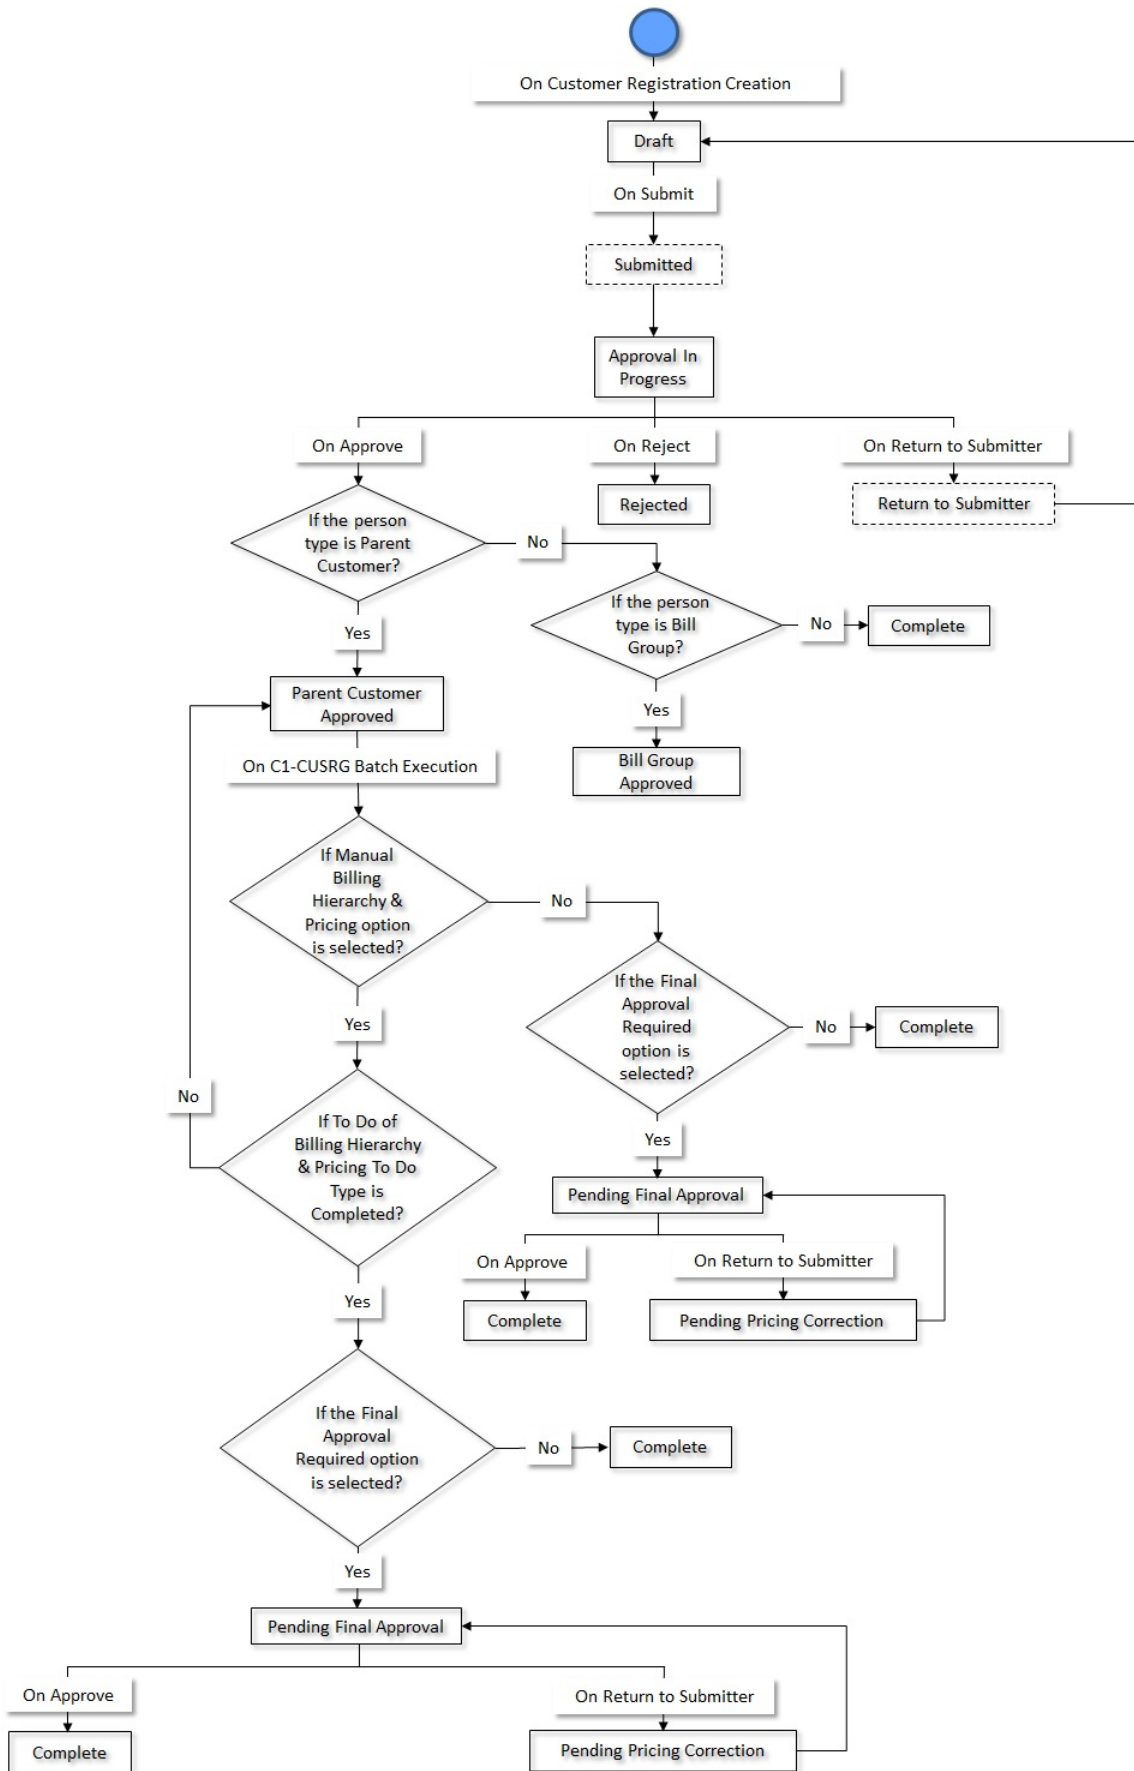

## Customer Registration (Without Approval) Status Transition

The following figure graphically indicates how a customer registration moves from one status to another when the approval process is not configured in the respective customer registration type:

## Customer Registration (With Approval) Status Transition

The following figure graphically indicates how a customer registration moves from one status to another when the approval process is configured in the respective customer registration type:

## Customer Registration Template

A customer registration template encapsulates the following information:

- List of pages that should appear when you create a person, account, policy, or policy plan using the respective customer registration template
- List of sections that should appear in each page
- Field or characteristic attributes, such as:
  - Default value for a field or characteristic type
  - Default value for a person or account identifier type or phone type
  - Primary identifier type for a person or account
  - Mandatory field in each section
  - Enable or disable the field value, identifier type, identifier value, characteristic type, characteristic value, phone type, or phone number

You can create multiple customer registration templates for person, account, policy and policy plan. Depending on whether you are creating a customer registration template for person, account, policy or policy plan, you can include the following pages and define field or characteristic attributes for the following sections:

Template Category	Template Page	Template Section
Person	Accounts	-
	Contact Information	Person Address
		Person Email
	Deal Information	Deal - Main
	Main	Person Identifiers
		Person Main
		Person Names
		Person Phones
	Person Characteristics	Person Characteristics
	Person Hierarchy	Person Hierarchy – Characteristics
		Person Hierarchy – Main
	Policies	Policies
		Parent Policies
	Registration Characteristics	Customer Registration Characteristics

Template Category	Template Page	Template Section
Account	Auto Pay	Account Autopay
	Account Characteristics	Account Characteristics
	Main	Account Identifiers
		Account Information
	Persons	Main
		Account Address Override Information
		Bill Routing
Credit Ratings	Credit Rating	
Policy	Policy – Main	Policy Characteristics
		Policy Main
		Policy Persons
Policy Plan	Plan	Plan - Characteristics
		Plan - Main

## **Search Customer Registration Template**

The **Search Customer Registration Template** zone allows you to search for a customer registration template using various search criteria. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)						
Search By	Used to indicate whether you want to search for a customer registration template using the banking or healthcare template details. The valid values are: <ul style="list-style-type: none"> <li>Banking Template</li> <li>Healthcare Template</li> </ul> <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"><b>Note:</b> By default, the <b>Banking Template</b> option is selected.</div>	Yes						
Template	Used to search customer registration template with a particular name.	No						
Description	Used to search the customer registration template with a particular description.	No						
Template Category	<table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="width: 50%;">If you search for a customer registration template using...</th> <th style="width: 50%;">Then...</th> </tr> </thead> <tbody> <tr> <td>The <b>Banking Template</b> option</td> <td>The valid values are: <ul style="list-style-type: none"> <li>Account</li> <li>Person</li> </ul> </td> </tr> <tr> <td>The <b>Healthcare Template</b> option</td> <td>The valid values are: <ul style="list-style-type: none"> <li>Account</li> <li>Person</li> <li>Policy</li> <li>Policy Plan</li> </ul> </td> </tr> </tbody> </table>	If you search for a customer registration template using...	Then...	The <b>Banking Template</b> option	The valid values are: <ul style="list-style-type: none"> <li>Account</li> <li>Person</li> </ul>	The <b>Healthcare Template</b> option	The valid values are: <ul style="list-style-type: none"> <li>Account</li> <li>Person</li> <li>Policy</li> <li>Policy Plan</li> </ul>	No
If you search for a customer registration template using...	Then...							
The <b>Banking Template</b> option	The valid values are: <ul style="list-style-type: none"> <li>Account</li> <li>Person</li> </ul>							
The <b>Healthcare Template</b> option	The valid values are: <ul style="list-style-type: none"> <li>Account</li> <li>Person</li> <li>Policy</li> <li>Policy Plan</li> </ul>							

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Template	Displays the name of the customer registration template.
Description	Displays the description of the customer registration template.
Template Category	Displays the category of the customer registration template.

Column Name	Column Description	
Edit	<b>If...</b>	<b>Then</b>
	You click the <b>Edit</b> (  ) icon when the <b>Search By</b> option is <b>Banking Template</b>	The <b>Customer Registration Template for Banking</b> screen appears where you can edit the details of the customer registration banking template.
	You click the <b>Edit</b> (  ) icon when the <b>Search By</b> option is <b>Healthcare Template</b>	The <b>Customer Registration Template for Healthcare</b> screen appears where you can edit the details of the customer registration healthcare template.
<b>Note:</b> The <b>Edit</b> icon appears only when the customer registration template is not used while defining the customer registration type.		
Duplicate	<b>If...</b>	<b>Then</b>
	You click the <b>Duplicate</b> (  ) icon when the <b>Search By</b> option is <b>Banking Template</b>	The <b>Customer Registration Template for Banking</b> screen appears where you can create a copy of the customer registration banking template.
	You click the <b>Duplicate</b> (  ) icon when the <b>Search By</b> option is <b>Healthcare Template</b>	The <b>Customer Registration Template for Banking</b> screen appears where you can create a copy of the customer registration healthcare template.
Delete	On clicking the <b>Delete</b> (  ) icon, you can delete the customer registration template.	
	<b>Note:</b> The <b>Delete</b> icon appears only when the customer registration template is not used while defining the customer registration type. You can delete a customer registration template only when you have not created a customer registration using the customer registration template.	

**Note:** Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

On clicking the **Broadcast** () icon corresponding to a customer registration template, the **Customer Registration Template** zone appears with the details of the respective customer registration template.

You can filter the list using various search criteria (such as, **Template**, **Description**, and **Template Category**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** () icon in the upper right corner of this zone.

## Customer Registration Template

The **Customer Registration Template** zone displays the details of the customer registration template. It contains the following sections:

- **Main** - Displays the basic information about the customer registration template. It contains the following fields:

Field Name	Field Description
Template Code	Displays the customer registration template code.
Template Category	Indicates the category of the customer registration template.
Description	Displays the description of the customer registration template.
Detailed Description	Displays additional information about the customer registration template.

- **Template Page** - The **Template Page** section lists the pages, sections and its respective fields defined for the customer registration template. It contains the following columns:

Column Name	Column Description												
Template Page	Indicates the template page.												
Template Section	Indicates the template section along with its respective fields.  <div style="border: 1px solid black; padding: 5px; margin: 5px 0;"> <p><b>Note:</b> The following table appears only when the template section contains fields that are defined for the customer registration template.</p> </div> <table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th>Field Name</th> <th>Field Description</th> </tr> </thead> <tbody> <tr> <td>Sequence</td> <td>Displays the sequence number of the field defined in the template section.</td> </tr> <tr> <td>Field</td> <td>Indicates the field that is defined for the customer registration template.</td> </tr> <tr> <td>Default Field Value</td> <td>Indicates the default value of the field.</td> </tr> <tr> <td>Required</td> <td>Indicates whether the field is required or not.</td> </tr> <tr> <td>Disable Field Value</td> <td>Indicates whether the value is disabled for the field or not.</td> </tr> </tbody> </table>	Field Name	Field Description	Sequence	Displays the sequence number of the field defined in the template section.	Field	Indicates the field that is defined for the customer registration template.	Default Field Value	Indicates the default value of the field.	Required	Indicates whether the field is required or not.	Disable Field Value	Indicates whether the value is disabled for the field or not.
Field Name	Field Description												
Sequence	Displays the sequence number of the field defined in the template section.												
Field	Indicates the field that is defined for the customer registration template.												
Default Field Value	Indicates the default value of the field.												
Required	Indicates whether the field is required or not.												
Disable Field Value	Indicates whether the value is disabled for the field or not.												

- **Record Actions** - The **Record Actions** section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the customer registration template.

Button Name	Button Description
Delete	Used to delete the customer registration template. <b>Note:</b> You can delete a customer registration template only when you have not created a customer registration using the customer registration template.
Duplicate	Used to create a new customer registration template using an existing customer registration template.

- **Record Information** - The **Record Information** section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the customer registration template is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.

By default, the **Customer Registration Template** zone does not appear in the **Customer Registration Template** screen. It appears only when you click the **Broadcast**  icon corresponding to the customer registration template in the **Customer Registration Template List** zone.

## **Searching for a Customer Registration Template**

### **Prerequisites**

To search for a customer registration template, you should have:

- Customer registration templates defined in the application

### **Procedure**

To search for a customer registration template:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **C** and then click **Customer Registration Template**.  
A sub-menu appears.

- Click the **Search** option from the **Customer Registration Template** sub-menu.

The **Customer Registration Template** screen appears.

- Enter the search criteria in the **Customer Registration Template List** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

- Click **Search**.

A list of customer registration template that meet the search criteria appears in the **Search Results** section.

## Defining a Customer Registration Template

### Prerequisites

To define a customer registration template, you should have:

- Customer registration template business objects defined in the application
- Template categories defined in the application

### Procedure

To define a customer registration template:

- Click the **Admin** link in the **Application** toolbar.

A list appears.

- From the **Admin** menu, select **C** and then click **Customer Registration Template**.

A sub-menu appears.

- Click the **Add** option from the **Customer Registration Template** sub-menu.

The **Select Business Object** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Customer Registration Template Business Object	Used to indicate the business object using which you want to create the customer registration template. The valid values are: <ul style="list-style-type: none"> <li>Customer Registration Template - Banking</li> <li>Customer Registration Template - Healthcare</li> </ul>	Yes

**Tip:** Alternatively, you can access the **Select Business Object** screen by clicking the **Add** button in the **Page Title** area of the **Customer Registration Template** screen.

- Select the required customer registration business object from the respective field.
- Click **OK**.

The **Customer Registration Template - Banking** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Template Code	Used to specify the customer registration template.	Yes
Template Category	Used to indicate the template category using which you want to create the customer registration template. The valid values are: <ul style="list-style-type: none"> <li>Account</li> <li>Person</li> <li>Policy</li> <li>Policy Plan</li> </ul>	Yes
Business Object	Indicates the business object using which the customer registration template is defined in the system.	Not applicable
Description	Used to specify the description for the customer registration template.	Yes
Detailed Description	Used to specify additional information about the customer registration template.	No

Field Name	Field Description	Mandatory (Yes or No)
Template Page	<p>Used to indicate the template page using which you want to create the customer registration template.</p> <p><b>Note:</b> The following template pages are mandatory, if the <b>Template Category</b> is selected as <b>Account</b> in the <b>Main</b> section:</p> <ul style="list-style-type: none"> <li>• Main</li> <li>• Persons</li> </ul> <p>The following template pages are mandatory, if the <b>Template Category</b> is selected as <b>Person</b> in the <b>Main</b> section:</p> <ul style="list-style-type: none"> <li>• Main</li> </ul> <p>The following template pages are mandatory, if the <b>Template Category</b> is selected as <b>Policy</b> in the <b>Main</b> section:</p> <ul style="list-style-type: none"> <li>• Policy Main</li> </ul> <p>The following template pages are mandatory, if the <b>Template Category</b> is selected as <b>Policy Plan</b> in the <b>Main</b> section:</p> <ul style="list-style-type: none"> <li>• Plan</li> </ul>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Template Section	<p>Used to indicate the template section using which you want to create the customer registration template.</p> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> The following template sections are mandatory, if the <b>Template Category</b> is selected as <b>Account</b> and <b>Template page</b> is selected as <b>Main</b> in the <b>Main</b> section:</p> <ul style="list-style-type: none"> <li>• Account Identifiers</li> <li>• Account Information</li> </ul> <p>The following template sections are mandatory, if the <b>Template Category</b> is selected as <b>Account</b> and <b>Template page</b> is selected as <b>Persons</b> in the <b>Main</b> section:</p> <ul style="list-style-type: none"> <li>• Main</li> <li>• Bill Routing</li> </ul> <p>The following template sections are mandatory, if the <b>Template Category</b> is selected as <b>Person</b> and <b>Template page</b> is selected as <b>Main</b> in the <b>Main</b> section:</p> <ul style="list-style-type: none"> <li>• Person Identifiers</li> <li>• Person Main</li> <li>• Person Names</li> </ul> <p>The following template sections are mandatory, if the <b>Template Category</b> is selected as <b>Policy</b> and <b>Template page</b> is selected as <b>Policy Main</b> in the <b>Main</b> section:</p> <ul style="list-style-type: none"> <li>• Policy Main</li> </ul> <p>The following template sections are mandatory, if the <b>Template Category</b> is selected as <b>Policy Plan</b> and <b>Template page</b> is selected as <b>Plan</b> in the <b>Main</b> section:</p> <ul style="list-style-type: none"> <li>• Plan Main</li> </ul> </div>	Yes
Default Field	<p>Used to specify the default field using which you want to create the customer registration template.</p> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> The list includes only those default fields which are associated to the specified template sections.</p> </div>	Yes

6. Enter the required details in the **Main** section.

7. Configure the template page, template section and set the default value for the relevant fields, if required.

## 8. Click **Save**.

The customer registration template is defined.

## Editing a Customer Registration Template

### Prerequisites

To edit a customer registration template, you should have:

- Template categories defined in the application

### Procedure

To edit a customer registration template:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **C** and then click **Customer Registration Template**.  
A sub-menu appears.
3. Click the **Search** option from the **Customer Registration Template** sub-menu.  
The **Customer Registration Template** screen appears.
4. Enter the search criteria in the **Customer Registration Template List** zone.
5. Click **Search**.

A list of customer registration template that meet the search criteria appears in the **Search Results** section.

6. In the **Search Result**, click the **Edit** (✎) icon in the **Edit** column corresponding to the customer registration template whose details you want to edit.

The **Customer Registration Template - Banking** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Template Code	Displays the customer registration template.	Yes
Template Category	Used to indicate the template category using which you want to create the customer registration template.	Yes
Business Object	Indicates the business object using which you want to create the customer registration template.	Not applicable
Description	Used to specify the description for the customer registration template.	Yes
Detailed Description	Used to specify additional information about the customer registration template.	No

Field Name	Field Description	Mandatory (Yes or No)
Template Page	<p>Used to indicate the template page using which you want to create the customer registration template.</p> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> The following template pages are mandatory, if the <b>Template Category</b> is selected as <b>Account</b> in the <b>Main</b> section:</p> <ul style="list-style-type: none"> <li>• Main</li> <li>• Persons</li> </ul> <p>The following template pages are mandatory, if the <b>Template Category</b> is selected as <b>Person</b> in the <b>Main</b> section:</p> <ul style="list-style-type: none"> <li>• Main</li> </ul> <p>The following template pages are mandatory, if the <b>Template Category</b> is selected as <b>Policy</b> in the <b>Main</b> section:</p> <ul style="list-style-type: none"> <li>• Policy Main</li> </ul> <p>The following template pages are mandatory, if the <b>Template Category</b> is selected as <b>Policy Plan</b> in the <b>Main</b> section:</p> <ul style="list-style-type: none"> <li>• Plan</li> </ul> </div>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Template Section	<p>Used to indicate the template section using which you want to create the customer registration template.</p> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> The following template sections are mandatory, if the <b>Template Category</b> is selected as <b>Account</b> and <b>Template page</b> is selected as <b>Main</b> in the <b>Main</b> section:</p> <ul style="list-style-type: none"> <li>• Account Identifiers</li> <li>• Account Information</li> </ul> <p>The following template sections are mandatory, if the <b>Template Category</b> is selected as <b>Account</b> and <b>Template page</b> is selected as <b>Persons</b> in the <b>Main</b> section:</p> <ul style="list-style-type: none"> <li>• Main</li> <li>• Bill Routing</li> </ul> <p>The following template sections are mandatory, if the <b>Template Category</b> is selected as <b>Person</b> and <b>Template page</b> is selected as <b>Main</b> in the <b>Main</b> section:</p> <ul style="list-style-type: none"> <li>• Person Identifiers</li> <li>• Person Main</li> <li>• Person Names</li> </ul> <p>The following template sections are mandatory, if the <b>Template Category</b> is selected as <b>Policy</b> and <b>Template page</b> is selected as <b>Policy Main</b> in the <b>Main</b> section:</p> <ul style="list-style-type: none"> <li>• Policy Main</li> </ul> <p>The following template sections are mandatory, if the <b>Template Category</b> is selected as <b>Policy Plan</b> and <b>Template page</b> is selected as <b>Plan</b> in the <b>Main</b> section:</p> <ul style="list-style-type: none"> <li>• Plan Main</li> </ul> </div>	Yes
Default Field	<p>Used to specify the default field using which you want to create the customer registration template.</p> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> The list includes only those default fields which are associated to the specified template sections.</p> </div>	Yes

**Tip:** Alternatively, you can edit the details of a customer registration template by clicking the **Edit** button in the **Customer Registration Template** zone.

7. Modify the details in the **Main** section, if required.
8. Configure the template page, template section and set the default value for the relevant fields, if required.
9. Click **Save**.

The changes made to the customer registration template are saved.

## Copying a Customer Registration Template

Instead of creating a customer registration template from scratch, you can create a new customer registration template using an existing customer registration template. This is possible through copying a customer registration template. On copying a customer registration template, the details including the default fields are copied to the new customer registration template. You can then edit the details, if required.

### Prerequisites

To copy a customer registration template, you should have:

- Customer registration template (whose copy you want to create) defined in the application
- Template categories defined in the application

### Procedure

To copy a customer registration template:

1. Click the **Admin** link in the **Application** toolbar.

A list appears.

2. From the **Admin** menu, select **C** and then click **Customer Registration Template**.

A sub-menu appears.

3. Click the **Search** option from the **Customer Registration Template** sub-menu.

The **Customer Registration Template** screen appears.

4. In the **Customer Registration Template List** zone, click the **Duplicate**  icon in the **Duplicate** column corresponding to the customer registration template whose copy you want to create.

The **Customer Registration Template - Banking** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Template Code	Used to specify the customer registration template.	Yes
Template Category	Used to indicate the template category using which you want to create the customer registration template.	Yes
Business Object	Indicates the business object using which you want to create the customer registration template.	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
Description	Used to specify the description for the customer registration template.	Yes
Detailed Description	Used to specify additional information about the customer registration template.	No
Template Page	<p>Used to indicate the template page using which you want to create the customer registration template.</p> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> The following template pages are mandatory, if the <b>Template Category</b> is selected as <b>Account</b> in the <b>Main</b> section:</p> <ul style="list-style-type: none"> <li>• Main</li> <li>• Persons</li> </ul> <p>The following template pages are mandatory, if the <b>Template Category</b> is selected as <b>Person</b> in the <b>Main</b> section:</p> <ul style="list-style-type: none"> <li>• Main</li> </ul> <p>The following template pages are mandatory, if the <b>Template Category</b> is selected as <b>Policy</b> in the <b>Main</b> section:</p> <ul style="list-style-type: none"> <li>• Policy Main</li> </ul> <p>The following template pages are mandatory, if the <b>Template Category</b> is selected as <b>Policy Plan</b> in the <b>Main</b> section:</p> <ul style="list-style-type: none"> <li>• Plan</li> </ul> </div>	Yes

Field Name	Field Description	Mandatory (Yes or No)

## Deleting a Customer Registration Template

### Procedure

To delete a Customer Registration Template:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **Customer Registration Template**.  
A sub-menu appears.
3. Click the **Search** option from the **Customer Registration Template** sub-menu.  
The **Customer Registration Template** screen appears.
4. In the **Customer Registration Template List** zone, click the **Delete** (🗑️) icon in the **Delete** column corresponding to the customer registration template that you want to delete.

A message appears confirming whether you want to delete the customer registration template.

**Note:** You can delete a customer registration template only when you have not created a customer registration using the customer registration template.

**Tip:** Alternatively, you can delete a customer registration template by clicking the **Delete** button in the **Customer Registration Template** zone.

5. Click **OK**.

The customer registration template is deleted.

## Customer Registration Type

A customer registration type encapsulates the following information:

- Users with a particular access group can only create a customer registration object using the customer registration type
- Whether the customer registration type can be used to create a customer registration object from the user interface, through the inbound message, or through the **File Upload Interface** utility
- Whether the approval is required when you create, edit, or delete a customer registration object
- Whether the final level approval is required once the approver at the first level approves the customer registration object
- Whether a To Do should be created indicating that the users have to manually create the billing hierarchy and pricing for the parent customer.
- The business objects using which the person, account, policy plan, membership, and address should be created when a customer registration object is created using the customer registration type
- A customer registration template which indicates the pages and sections that should appear when you are creating a customer registration object using the customer registration type. You can specify one customer registration template for person and one or more customer registration templates for account, policy, and policy plan.
- Information, such as person names, person identifiers, person phones, person characteristics, person addresses, person hierarchy, accounts, account identifiers, account characteristics, account auto pay information, account persons, account bill routing information, policies, policy plans, policy characteristics, or policy plan characteristics, which should be copied when you create a copy of a customer registration object which is created using the customer registration type.

## Customer Registration Type

The **Customer Registration Type** zone displays the details of the customer registration type. It contains the following sections:

- **Main** - Displays the basic information about the customer registration type. It contains the following fields:

Field Name	Field Description
Customer Registration Type	Displays the Customer Registration Type.
Description	Displays the description of the customer registration type.
Customer Registration Business Object	Displays the business object using which you want to create the Customer Registration Type.
Detailed Description	Displays additional information about the customer registration type.
Status	Displays the status of the customer registration type. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul> <b>Note:</b> You cannot change the status of a customer registration type to <b>Inactive</b> when the corresponding customer registration is in a status other than <b>Processed</b> or <b>Rejected</b> .

Field Name	Field Description
Access Group	<p>Displays the access group of the customer registration type.</p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Access Group</b> field. On clicking the <b>Search</b> icon, the <b>Access Group Search</b> window appears.</p> <p>On specifying the access group, the description of the access group appears corresponding to the <b>Access Group</b> field.</p>
Registration Source	Displays the registration source of the customer registration type.

- **Additional Data** - The **Additional Data** section lists the approval type, submitter type and its respective fields defined for the customer registration type. It contains the following fields:

Column Name	Column Description
Approval Required	Indicates whether approval is required while creating the customer registration using the customer registration type.
Approval To Do Type	<p>Indicates that the To Do entry of the specified To Do type must be created when you submit the customer registration for approval.</p> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>This field appears only when the <b>Approval Required</b> check box is selected.</p> <p>It has a link. On clicking the link, the <b>To Do Type</b> screen appears with the details of the respective To Do type.</p> <p>The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.</p> </div>
Approval To Do Role	<p>Indicates that users with the specified To Do role can only approve or reject the customer registration submitted for approval.</p> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>This field appears only when the <b>Approval Required</b> check box is selected.</p> <p>It has a link. On clicking the link, the <b>To Do Role</b> screen appears with the details of the respective To Do role.</p> </div>
Submitter To Do Type	<p>Indicates the To Do type for the submitter when the funding request type is resubmitted by the approver.</p> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>The <b>Submitter To Do Type</b> field appears only when the <b>Approval Required</b> check box is selected.</p> <p>It has a link. On clicking the link, the <b>To Do Type</b> screen appears where you can view the details of the respective To Do type.</p> </div>

Column Name	Column Description
Submitter To Do Role	<p>Indicates the To Do role for the submitter when the funding request type is resubmitted by the approver.</p> <p><b>Note:</b> The <b>Submitter To Do Role</b> field appears only when the <b>Approval Required</b> check box is selected. It has a link. On clicking the link, the <b>To Do Role</b> screen appears where you can view the details of the respective To Do role.</p>
Person Business Object	<p>Indicates the business object using which the customer registration type for a person is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.</p>
Account Business Object	<p>Indicates the business object using which the customer registration type for an account is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.</p>
Address Business Object	<p>Indicates the business object using which the customer registration type for an address is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.</p>

- **Characteristics** - The **Record Information** section contains the following columns:

Field Name	Field Description
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- **Customer Registration Templates** - The **Customer Registration Templates** section contains the following columns:

Field Name	Field Description
Sequence	Displays the sequence of the <b>Customer Registration Type</b> .
Template Category	Displays the template category of the <b>Customer Registration Type</b> .
Template	Indicates the template of the <b>Customer Registration Type</b> .

- **Record Actions** - The **Record Actions** section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the customer registration type.

Button Name	Button Description
Delete	Used to delete the customer registration type.  <b>Note:</b> You can delete a customer registration type only when you have not created a customer registration using the customer registration type.
Duplicate	Used to create a new customer registration type using an existing customer registration type.

- **Record Information** - The **Record Information** section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the customer registration type is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.

- **Copy Customer Registration Details** - The **Copy Customer Registration Details** section lists allows to copy certain fields and its respective details defined for the customer registration type. It contains the following fields:

Column Name	Column Description
Person Names	Indicates whether the field <b>Person Names</b> and its respective details need to be copied while creating the customer registration type.
Accounts	Indicates whether the field <b>Accounts</b> and its respective details need to be copied while creating the customer registration type.
Person Identifiers	Indicates whether the field <b>Person Identifiers</b> and its respective details need to be copied while creating the customer registration type.
Account Identifiers	Indicates whether the field <b>Account Identifiers</b> and its respective details need to be copied while creating the customer registration type.
Person Phones	Indicates whether the field <b>Person Phones</b> and its respective details need to be copied while creating the customer registration type.
Account Characteristics	Indicates whether the field <b>Account Characteristics</b> and its respective details need to be copied while creating the customer registration type.
Person Characteristics	Indicates whether the field <b>Person Characteristics</b> and its respective details need to be copied while creating the customer registration type.
Account Auto Pay Information	Indicates whether the field <b>Account Auto Pay Information</b> and its respective details need to be copied while creating the customer registration type.
Person Addresses	Indicates whether the field <b>Person Addresses</b> and its respective details need to be copied while creating the customer registration type.
Account Persons	Indicates whether the field <b>Account Persons</b> and its respective details need to be copied while creating the customer registration type.
Person Hierarchy	Indicates whether the field <b>Person Hierarchy</b> and its respective details need to be copied while creating the customer registration type.

Column Name	Column Description
Account Override Address	Indicates whether the field <b>Account Override Address</b> and its respective details need to be copied while creating the customer registration type.
Bill Routing Information	Indicates whether the field <b>Bill Routing Information</b> and its respective details need to be copied while creating the customer registration type.
Credit Rating History	Indicates whether the field <b>Credit Rating History</b> and its respective details need to be copied while creating the customer registration type.

By default, the **Customer Registration Type** zone does not appear in the **Customer Registration Type** screen. It appears only when you click the **Broadcast**  icon corresponding to the customer registration template in the **Customer Registration Type List** zone.

## Searching for a Customer Registration Type

### Prerequisites

To search for a customer registration type, you should have:

- Customer registration types defined in the application

### Procedure

To search for a customer registration type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **C** and then click **Customer Registration Type**.  
A sub-menu appears.
3. Click the **Search** option from the **Customer Registration Type** sub-menu.  
The **Customer Registration Type** screen appears.
4. Enter the search criteria in the **Customer Registration Type List** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search**.

A list of customer registration types that meet the search criteria appears in the **Search Results** section.

**Defining a Customer Registration Type****Prerequisites**

To define a customer registration type, you should have:

- Customer registration type business objects defined in the application
- Customer registration business objects defined in the application
- Person business objects defined in the application
- Account business objects defined in the application
- Address business objects defined in the application
- Access groups defined in the application
- Registration sources defined in the application
- Characteristic types defined in the application
- Template categories defined in the application

**Procedure**

To define a customer registration type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **C** and then click **Customer Registration Type**.  
A sub-menu appears.
3. Click the **Add** option from the **Customer Registration Type** sub-menu.

The **Select Business Object** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Customer Registration Type Business Object	Used to indicate the business object using which you want to create the customer registration type. The valid values are: <ul style="list-style-type: none"> <li>• Customer Registration Type (C1-CustomerRegistration)</li> <li>• Customer Registration Type - Banking (C1-CustomerRegistrationBanking)</li> <li>• Customer Registration Type - Healthcare (C1-CustomerRegistrationHC)</li> </ul>	Yes

**Tip:** Alternatively, you can access the **Select Business Object** screen by clicking the **Add** button in the **Page Title** area of the **Customer Registration Type** screen.

4. Select the **Customer Registration Type - Banking** business object from the respective field.
5. Click **OK**.

The **Customer Registration Type** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the customer registration type.
- **Additional Data** - Used to provide the additional information about the customer registration type.
- **Characteristics** - Used to lists characteristics defined for the customer registration type.
- **Customer Registration Type Template** - Used to lists template categories for the customer registration type.
- **Copy Customer Registration**- Used to indicate template pages, template sections and their respective fields to be copied for the customer registration.
- **Main** - The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Customer Registration Type	Used to specify the customer registration type.	Yes
Business Object	Indicates the business object using which you want to create a customer registration type.	Not applicable
Description	Used to specify the description for the customer registration type.	Yes
Customer Registration Business Object	Used to indicate the customer registration business object using which you want to create a customer registration type.	Yes
Detailed Description	Used to specify additional information about the customer registration type.	No
Status	Used to indicate the status of the customer registration type.	Yes
Access Group	Used to specify the access group of the customer registration type.  The <b>Search</b>  icon appears corresponding to the <b>Access Group</b> field. On clicking the <b>Search</b> icon, the <b>Access Group Search</b> window appears.	Yes
Registration Source	Used to indicate the registration source of the customer registration type.	Yes

- **Additional Data**- The **Additional Data** section is used to provide the additional information about the customer registration type. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Approval Required	Used to indicate whether the approval is required before creating the customer registration type.	No
Person Business Object	Used to indicate the business object for a person.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Account Business Object	Used to indicate the business object for an account.	Yes
Address Business Object	Used to indicate the business object for an address.	Yes

6. Enter the required details in the **Main** section.
7. Enter the required details in the **Additional Data** section.
8. Configure the template page, template section and set the default value for the relevant fields, if required.
9. Select the **Person** fields to copy customer registration, if required.
10. Select the **Accounts** fields to copy customer registration, if required.
11. Click **Save**.

The customer registration type is defined.

## **Defining an Additional Data for a Customer Registration Type**

### **Prerequisites**

To define an additional data for a customer registration type, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Customer Registration Type**)

### **Procedure**

To define an additional data for a customer registration type:

1. Ensure that the **Additional Data** section is expanded when you are defining, editing, or copying a customer registration type.

The **Additional Data** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Approval Required	Used to indicate whether approval is required while creating the customer registration using the customer registration type.  <b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Customer Registration Type</b> .	Yes (Conditional)  <b>Note:</b> This field is required when the <b>Approval Required</b> checkbox is selected.

Field Name	Field Description	Mandatory (Yes or No)
Approval To Do Type	<p>Used to indicate that the To Do entry of the specified To Do type must be created when you submit the customer registration for approval.</p> <p><b>Note:</b> This field appears only when the <b>Approval Required</b> check box is selected.</p> <p>It has a link. On clicking the link, the <b>To Do Type</b> screen appears with the details of the respective To Do type.</p> <p>The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required when the <b>Approval Required</b> checkbox is selected.</p>
Approval To Do Role	<p>Used to indicate that users with the specified To Do role can only approve or reject the customer registration submitted for approval.</p> <p><b>Note:</b> This field appears only when the <b>Approval Required</b> check box is selected.</p> <p>It has a link. On clicking the link, the <b>To Do Role</b> screen appears with the details of the respective To Do role.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required when the <b>Approval Required</b> checkbox is selected.</p>
Submitter To Do Type	<p>Used to indicates the To Do type for the submitter when the funding request type is resubmitted by the approver.</p> <p><b>Note:</b> The <b>Submitter To Do Type</b> field appears only when the <b>Approval Required</b> check box is selected.</p> <p>It has a link. On clicking the link, the <b>To Do Type</b> screen appears where you can view the details of the respective To Do type.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required when the <b>Approval Required</b> checkbox is selected.</p>

Field Name	Field Description	Mandatory (Yes or No)
Submitter To Do Role	<p>Indicates the To Do role for the submitter when the funding request type is resubmitted by the approver.</p> <p><b>Note:</b> The <b>Submitter To Do Role</b> field appears only when the <b>Approval Required</b> check box is selected.</p> <p>It has a link. On clicking the link, the <b>To Do Role</b> screen appears where you can view the details of the respective To Do role.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required when the <b>Approval Required</b> checkbox is selected.</p>
Person Business Object	<p>Indicates the business object using which the customer registration type for a person is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.</p>	<p>Yes</p>
Account Business Object	<p>Indicates the business object using which the customer registration type for an account is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.</p>	<p>Yes</p>

Field Name	Field Description	Mandatory (Yes or No)
Address Business Object	Used to indicate the business object using which the customer registration type for an address is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.	Yes

- Enter the required details in the **Additional Data** section.

## Defining a Characteristic for a Customer Registration Type

### Prerequisites

To define a characteristic for a customer registration type, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Customer Registration Type**)

### Procedure

To define a characteristic for a customer registration type:

- Ensure that the **Characteristics** section is expanded when you are defining, editing, or copying a customer registration type.

The **Characteristics** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Type	Used to indicate the characteristic type.  <b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Customer Registration Type</b> .	Yes (Conditional)  <b>Note:</b> This field is required when you are defining a characteristic for the customer registration type.

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the customer registration type.

- Enter the required details in the **Characteristics** section.
- If you want to define more than one characteristic for the customer registration type, click the **Add** (+) icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from the customer registration type, click the **Delete** (🗑️) icon corresponding to the characteristic.

## Editing a Customer Registration Type

### Prerequisites

To edit a customer registration type, you should have:

- Access groups defined in the application
- Registration sources defined in the application
- Customer registration business objects defined in the application
- Person business objects defined in the application
- Account business objects defined in the application
- Plan business objects defined in the application
- Membership business objects defined in the application
- Address business objects defined in the application
- Characteristic types defined in the application
- Template categories defined in the application

### Procedure

To edit a customer registration type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **C** and then click **Customer Registration Type**.  
A sub-menu appears.
3. Click the **Search** option from the **Customer Registration Type** sub-menu.  
The **Customer Registration Type** screen appears.
4. Click the **Filter** () icon in the title bar of the **Customer Registration Type List** zone.  
It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Customer Registration Type	Used to specify the customer registration type.	No
Description	Used to specify the description.	No

5. Enter the search criteria in the **Customer Registration Type List** zone.
6. Click **Search**.  
A list of customer registration template that meet the search criteria appears in the **Search Results** section.

7. In the **Search Result**, click the **Edit** (✎) icon in the **Edit** column corresponding to the customer registration template whose details you want to edit.

The **Customer Registration Type** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Customer Registration Type	Displays the customer registration type.	Yes
Business Object	Indicates the business object using which you want to create the customer registration type.	Not applicable
Description	Used to specify the description for the customer registration type.	Yes
Detailed Description	Used to specify additional information about the customer registration type.	No
Status	Used to indicate the status of the customer registration type. The valid values are: <ul style="list-style-type: none"> <li>Active</li> <li>Inactive</li> </ul>	Yes
Access Group	Used to specify an access group of the customer registration type. <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Access Group</b> field. On clicking the <b>Search</b> icon, the <b>Access Group Search</b> window appears.</p> </div>	Yes
Registration Source	Used to indicate the registration source of the customer registration type	Yes

**Tip:** Alternatively, you can edit the details of a customer registration template by clicking the **Edit** button in the **Customer Registration Type** zone.

8. Modify the details in the **Main** section, if required.
9. Configure the template page, template section and set the default value for the relevant fields, if required.
10. Click **Save**.

The changes made to the customer registration type are saved.

## Copying a Customer Registration Type

Instead of creating a customer registration type from scratch, you can create a new customer registration type using an existing customer registration type. This is possible through copying a customer registration type. On copying a customer registration type, the details including the default fields are copied to the new customer registration type. You can then edit the details, if required.

### Prerequisites

To copy a customer registration type, you should have:

- Customer registration type (whose copy you want to create) defined in the application
- Template categories defined in the application

### Procedure

To copy a customer registration type:

1. Click the **Admin** link in the **Application** toolbar.

A list appears.

2. From the **Admin** menu, select **C** and then click **Customer Registration Type**.

A sub-menu appears.

3. Click the **Search** option from the **Customer Registration Type** sub-menu.

The **Customer Registration Type** screen appears.

4. In the **Customer Registration Type List** zone, click the **Duplicate** () icon in the **Duplicate** column corresponding to the customer registration type whose copy you want to create.

The **Customer Registration Type** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Customer Registration Type	Used to specify the customer registration type.	Yes
Business Object	Indicates the business object using which you want to create a customer registration type.	Not applicable
Description	Used to specify the description for the customer registration type.	Yes
Customer Registration Business Object	Used to indicate the customer registration business object using which you want to create a customer registration type.	Yes
Detailed Description	Used to specify additional information about the customer registration type.	No
Status	Used to indicate the status of the customer registration type.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Access Group	Used to specify the access group of the customer registration type.  The <b>Search</b>  icon appears corresponding to the <b>Access Group</b> field. On clicking the <b>Search</b> icon, the <b>Access Group Search</b> window appears.  On specifying the access group, the description of the access group appears corresponding to the <b>Access Group</b> field.	Yes
Registration Source	Used to indicate the registration source of the customer registration type.	Yes

**Tip:** Alternatively, you can copy a customer registration type by clicking the **Duplicate** button in the **Customer Registration Type** zone.

5. Enter the required details in the **Main** section.
6. Enter the required details in the **Additional Data** section.
7. Define characteristics for the customer registration type, if required.
8. Configure the template page, template section and set the default value for the relevant fields, if required.
9. Select the required fields in the **Copy Customer Registration Details** section.
10. Click **Save**.

The new customer registration type is defined.

## Deleting a Customer Registration Type

### Procedure

To delete a Customer Registration Type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **Customer Registration Type**.  
A sub-menu appears.
3. Click the **Search** option from the **Customer Registration Type** sub-menu.  
The **Customer Registration Type** screen appears.

- In the **Customer Registration Type List** zone, click the **Delete** () icon in the **Delete** column corresponding to the customer registration type that you want to delete.

A message appears confirming whether you want to delete the customer registration type.

**Note:** You can delete a customer registration type only when you have not created a customer registration using the customer registration type.

**Tip:** Alternatively, you can delete a customer registration type by clicking the **Delete** button in the **Customer Registration Type** zone.

- Click **OK**.

The customer registration type is deleted.

## Searching a Customer Registration

### Prerequisites

To search a customer registration, you should have:

- Customer registration statuses defined in the application
- Customer registration types defined in the application

### Procedure

To search a customer registration:

1. Click the **Menu** link in the **Application** toolbar.

A list appears.

- From the **Main** menu, select **Person Information** and then click **Customer Registration**.

A sub-menu appears.

- Click the **Search** option from the **Customer Registration** sub-menu.

The **Customer Registration** screen appears.

- Enter the search criteria in the **Search Customer Registration** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

- Click **Search**.

A list of customer registrations that meet the search criteria appears in the **Search Results** section.

## Associating a Person to Policy

### Prerequisites

To associate a person to a policy, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Customer Registration**)

### Procedure

To associate a person to a policy:

1. Ensure that the **Customer Registration** screen is opened when you are defining, editing, or copying a customer registration.
2. Ensure that the **Add/Edit Policy** screen is opened using the **Add New Policy** button from the **Policies & Plans** zone of the **Policies** panel.
3. Ensure that the **Persons** zone is expanded.

The **Persons** zone contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Persons	Used to indicate the person. The <b>Search</b>  icon appears corresponding to the <b>Person</b> field. On clicking the <b>Search</b> icon, you can search for a predefined persons.	Yes (Conditional) <b>Note:</b> This field is required when you are associating persons to policy.

Field Name	Field Description	Mandatory (Yes or No)
Sequence	Used to specify the sequence number.	Yes (Conditional) <b>Note:</b> This field is required when you are associating persons to policy.
Policy Person Role	Used to indicate role of the policy person.	Yes (Conditional) <b>Note:</b> This field is required when you are associating persons to policy.
Main Customer	Used to indicate whether the person is main customer.	Yes (Conditional) <b>Note:</b> This field is required when you are associating persons to policy.
Start Date	Used to indicate the start date of policy.	Yes (Conditional) <b>Note:</b> This field is required when you are associating persons to policy.
End Date	Used to indicate the end date of policy.	Yes (Conditional) <b>Note:</b> This field is required when you are associating persons to policy.

- Enter the required details in the **Persons** section.
- Click **Save as Draft** to save the details as a draft to associate person to a policy.
- Click **Validate and Save** to validate and save the details.

## Copying a Customer Registration

Instead of creating a customer registration from scratch, you can create a new customer registration using an existing customer registration. This is possible through copying a customer registration. On copying a customer registration, the details including the characteristics are copied to the new customer registration. You can then edit the details, if required.

#### Prerequisites

To copy a customer registration, you should have:

- Person type (whose copy you want to create) defined in the application
- Divisions defined in the application
- Access groups defined in the application
- Name types defined in the application
- Phone types defined in the application
- Person identifier types defined in the application
- Address type code defined in the application

- Countries defined in the application
- Characteristic types defined in the application
- Parent/Child entities defined in the application
- Relationship type defined in the application

### **Procedure**

To copy a customer registration:

1. Click the **Admin** link in the **Application** toolbar.

A list appears.

2. From the **Main** menu, select **Person Information** and then click **Customer Registration**.

A sub-menu appears.

3. Click the **Search** option from the **Customer Registration** sub-menu.

The **Customer Registration** screen appears.

4. In the search result of **Search Customer Registration** zone, click the **Copy** () icon in the **Copy** column corresponding to the customer registration id whose copy you want to create.

The **Customer Registration** screen appears. It contains the following panels:

- Main
- Contact
- Person characteristics
- Hierarchy
- Accounts
- Policies
- Registration Characteristics

The **Main** panel appears. It contains the following sections:

- **Main** - Used to specify basic details about the customer registration.
- **Person Names** - Used to define the name type details about the customer registration.
- **Person Phones** - Used to define the phone type details about the customer registration.
- **Person IDs**- Used to define the identifier details about the customer registration.

The **Main** section contains the following fields:

<b>Field Name</b>	<b>Field Description</b>	<b>Mandatory (Yes or No)</b>
Person Type	Used to indicate the type of a person. <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"><b>Note:</b> This field is in the read-only mode.</div>	Yes
Date of Birth	Used to indicate the date of birth.	Not applicable
Division	Used to indicate the division.	Yes
Person Since Date	Used to indicate the person since date.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Customer Segment	Used to indicate the customer segment. <b>Note:</b> This field appears only when <b>Customer Registration Type</b> is <b>Banking</b> .	No
Customer Tier	Used to indicate the customer tier. <b>Note:</b> This field appears only when <b>Customer Registration Type</b> is <b>Banking</b> .	Yes
Access Group	Used to indicate the access group.  The <b>Search</b> (🔍) icon appears corresponding to the <b>Access Group</b> field. On clicking the <b>Search</b> icon, you can search for a predefined access groups.  The selected access group appears next to <b>Access Group</b> field.	Yes

5. Enter the required details in the **Main** section.
6. Define names of a person, if required.
7. Define phone details for a person, if required.
8. Define identifier details for a person, if required.
9. Define addresses of a person in the **Contact** panel, if required.
10. Define characteristics of a person in the **Person Characteristics** panel, if required.
11. Define hierarchy of a person in the **Hierarchy** panel, if required.
12. Define accounts in the **Accounts** panel, if required.
13. Define policies and plans in the **Policies & Plans** panel, if required.

**Note:** This panel appears only when the **Customer Registration Type** is **Healthcare**.

14. Define registration characteristics in the **Registration Characteristics** panel.
15. Click **Save as Draft** to save the details as a draft.
16. Click **Validate and Save** to validate and save the details.

The customer registration is created.

## Customer Registration - Main

The **Main** tab displays information about the customer registration object. It contains the following zones:

- [Customer Registration](#)
- [Account Information](#) on page 155
- [Policies](#) on page 158
- [Parent Policies](#) on page 158

### Customer Registration

Oracle Revenue Management and Billing provides the automatic customer registration facility for an account, person, policy or policy plan. Initial customer setup or customer on-boarding as well as updates to the Customer information is an integral part of the Oracle Insurance Revenue Management and Billing (OIRMB) for **Healthcare** customers, be it **ASO** or Fully Insured.

In the OIRMB, the customer registration can be used to create customer and related entities by using the following methods:

- The **User Interface** for low volume data
- The **Inbound Messages** for integration with the case install systems for low to medium volume data
- The **File Upload Utility** for integration with the case install systems for high volume data

A **Customer Registration** module enables user to set up a new business in a structured manner. A user can set up:

- Parent Customer
- Bill Groups and Billing Hierarchy
- Billing Accounts and Contracts
- Policies and Plans

A complete workflow is processed through the To-do notifications sent to different **Billing Users** requesting the setup of various entities like Bill Groups, Pricing etc.

For better usability, different templates can be defined for each of the entities that are setup to enable the validations and defaulting of data.

For more information on how to setup the customer registration process, see [Prerequisites](#).

### Account Information

The **Account Information** zone displays the account details of the customer. It contains of the following sections:

- **Main** - Displays the basic information about the account. It contains the following fields:

Field Name	Field Description
Account Information	Indicates the information about the account.
Customer Class	Indicates the customer class to which account belongs.
Division	Indicates the division to which account is associated.
Set Up Date	Indicates the set up date of the account.
Invoice Currency	Indicates the invoice currency of the account.
Account Category	Indicates the category of the account.
Access Group	Indicates the access group of the account.

Field Name	Field Description
Exclude Accrual	Indicates whether the accrual is excluded.
Eligible for Repricing	Indicates whether the account is eligible for repricing.
Product	Indicates the product.
Bill Lead Days	Indicates the bill lead days.
Bill Cycle	Indicates the bill cycle.
Comments	Displays the comments entered for the account.

- **Account Identifiers** - The **Account Identifiers** section displays the account identifiers details.

Column Name	Column Description
Primary ID	Indicates whether the primary id of the account.
Account Identifier Type	Indicates the type of the account identifier.
Account Identifier	Indicates the account identifier details.

- **Account Characteristics**- The **Account Characteristics** section displays the characteristics details of the account.

Column Name	Column Description
Effective Date	Displays the date from when the characteristic is effective for the customer registration.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value for the characteristic type.

**Auto Pay Details**- The **Auto Pay Details** section displays the auto pay details of an account.

Column Name	Column Description
Defer Auto Pay Date	Displays the date from when auto pay process is to be put on deferred mode.
Rule Based Auto Pay	Indicates whether the rule based auto pay option is enabled.
Start Date	Indicates the date from when the automatic payment process is effective for an account.
End Date	Indicates the date till when the automatic payment process is effective for an account.
Percentage	Indicates the percentage of payment details.
Priority	Indicates the priority of payment.
Auto Pay Source Code	Indicates the source of funds used to make the automatic payment. For example, debit card or credit card.
Auto Pay Route Type	Indicates when and how an automatic payment request of the account is routed.
Account Number	Displays the account number.
Expires On	Indicates the date on which auto pay expires.
Name	Displays the name of the account owner.

Column Name	Column Description
Maximum Withdrawal Amount	Displays the maximum limit of the withdrawal amount.
Comments	Displays the comments entered for auto payment.

- **Account Credit Rating**

- The **Account Credit Rating** section displays the account credit rating details. It contains the following fields:

Column Name	Column Description
Collection Class	Indicates the collection class to which account belongs.
Current Credit Rating	Indicates the current credit rating.
Current Cash Only Score	Indicates the current cash only score.
Start Date	Indicates the start date.
End Date	Indicates the end date.
Affect Credit Rating By	Indicates the count by which the credit rating is affected.
Affect Cash-Only Score By	Indicates the score by which cash only affected.
Comments	Indicates the comments for account credit rating.

- **Account Persons**

- The **Account Persons** section displays the person related details.

Column Name	Column Description
Person ID	Indicates the person identification value.
Person Name	Indicates the name of the person.
Main Customer	Indicates whether the person is a main customer.
Financially Responsible	Indicates whether a person is financially responsible.
Account Relationship Type	Indicates the account relationship type.

- **Account Override Address** - The **Account Override Address** section displays the account override address. It contains the following fields:

Column Name	Column Description
Country	Indicates the country of the address of the account.
Address 1 / 2 / 3 / 4	Indicates the address details.
City	Displays the city of the address.
State	Indicates the state of the address.
Postal	Displays the postal code of the address.

- **Bill Routing Information** - The **Bill Routing Information** section displays the bill routing information of the account. It contains the following columns:

Column Name	Column Description
Receives Copy of Bill	Indicates whether to receive a copy of bill.
Bill Format	Indicates the bill format.

Column Name	Column Description
Address Source	Indicates the address source.
Number of Bill copies	Indicates the total number of bill copies.
Bill Route Type	Indicates the bill route type.
Receives Notification	Indicates whether to receive notification for the bill routing.

Search for the customer registration in the <b>Customer Registration</b> screen.</li> <li>2. In the <b>Search Results</b> section, click the link in the <b>Customer Registration Information</b> column corresponding to the customer registration which you want to review.</li> </ol>
Reject a customer registration from the <b>To Do List</b> screen	<ol style="list-style-type: none"> <li>1. Click the <b>Menu</b> link in the <b>Application</b> toolbar. A list appears.</li> <li>2. From the <b>Main</b> menu, select <b>To Do</b> and then click <b>To Do List</b>. The <b>To Do Type for User Search</b> window appears.</li> <li>3. Enter <b>C1-CustomerRegistration</b> in the <b>To Do Type</b> field.</li> <li>4. Click the <b>Search</b> button corresponding to the <b>To Do Type</b> field. The <b>To Do List</b> screen appears.</li> <li>5. Select the <b>Open</b> option from the <b>Filter by</b> list to view all unassigned To Dos.</li> <li>6. Click the link in the <b>Message</b> column corresponding to the To Do of the customer registration that you want to review.</li> </ol>

The **Customer Registration** screen appears.

2. Review the details in the **Customer Registration** screen.
3. If the information in the customer registration is incorrect, then click the **Reject** button in the **Customer Registration** zone.

The **Reject Customer Registration** window appears. It contains following fields:

Field Name	Field Description	Mandatory (Yes or No)
Status Reason	Used to indicate the reason why you want to reject the customer registration.  <b>Note:</b> The list includes only those reasons which are defined for the <b>Rejected</b> status of the <b>C1-CustomerRegistration</b> business object in the <b>Status Reason</b> screen.	Yes
Comments	Used to specify additional information while rejecting the customer registration.	No

**Note:** The **Reject** button appears only when:

- The customer registration is in the **Approval In Progress** status.
- A user with the approval To Do role is reviewing the customer registration.

4. Select the reason for rejection of the customer registration from the **Status Reason** field.
5. Click **Save**.

The status of the customer registration is changed to **Rejected**.

## Requesting to Resubmit a Customer Registration for Approval

### Procedure

To initiate a resubmission request for a customer registration:

1. Do either of the following:

If you want to...	Then...
Request the submitter to resubmit a customer registration through the <b>Customer Registration</b> screen	<ol style="list-style-type: none"> <li>1. Search for the customer registration in the <b>Customer Registration</b> screen.</li> <li>2. In the <b>Search Results</b> section, click the link in the <b>Customer Registration ID</b> column corresponding to the customer registration which you want to review.</li> </ol>
Request the submitter to resubmit a customer registration from the <b>To Do List</b> screen	<ol style="list-style-type: none"> <li>1. Click the <b>Menu</b> link in the <b>Application</b> toolbar. A list appears.</li> <li>2. From the <b>Main</b> menu, select <b>To Do</b> and then click <b>To Do List</b>.</li> </ol>

If you want to...	Then...
	<p>The <b>To Do Type for User Search</b> window appears.</p> <ol style="list-style-type: none"> <li>Enter <b>C1-CustomerRegistration</b> in the <b>To Do Type</b> field.</li> <li>Click the <b>Search</b> button corresponding to the <b>To Do Type</b> field.</li> </ol> <p>The <b>To Do List</b> screen appears.</p> <ol style="list-style-type: none"> <li>Select the <b>Open</b> option from the <b>Filter by</b> list to view all unassigned To Dos.</li> <li>Click the link in the <b>Message</b> column corresponding to the To Do of the customer registration that you want to review.</li> </ol>

The **Customer Registration** screen appears.

- Review the details in the **Customer Registration** screen.
- If the information in the customer registration is incomplete and you want the submitter to make the required changes and resubmit, click the **Re Submit** button in the **Customer Registration** zone.

The **Resubmit Customer Registration** window appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Comments	Used to specify the changes which the submitter should make in the customer registration before resubmitting it for approval.	Yes

**Note:** The **Re Submit** button appears only when:

- The customer registration is in the **Approval In Progress** status.
- A user with the approval To Do role is reviewing the customer registration.

- Enter the comments in the respective field and then click **Save**.

A To Do is created using the submitter To Do type and assigned to all users with a submitter To Do role specified in the customer registration type. In addition, the status of the customer registration is changed to **Draft**.

# Chapter 4

---

## Customer 360° View

---

### Topics:

- [Prerequisites](#)
- [Customer 360° View](#)
- [Customer 360° Information](#)
- [Bill Information](#)

Oracle Revenue Management and Billing provides a new screen named **Customer 360° View** which enables you to quickly view in-depth information about the person. This screen can be used to view the 360° information of a person who is associated with the fully insured group or self-funded policy. It provides the following information:

- Basic details, characteristics, child persons, person hierarchy, person billing hierarchy, and the customer contacts of the person.
- Customer registration objects through which the bill groups are created for a parent customer.
- List of accounts to which the parent customer and its bill groups are associated.
- Basic details, characteristics, administrative contracts, automatic payment options, billing and adjustment summary, financial and collections summary, and unpaid bills of the person's account.
- Consolidated view of the transactions (such as, billing, payment, payment cancellation, adjustment, adjustment cancellation, automatic payments sent to the auto clearing house for review, refund, write off, excess credit, and reconciliation) which are carried out for the person's account.
- List of policies to which the parent customer or bill group is associated. The system lists those policies where the policy category is set to **Self-Funded** and **Fully Insured Group**.
- Basic details, related persons, and policy plans in the person's policy.
- Basic and in-depth details of the pricing rules which are defined for a parent customer who is associated with the self-funded policy.
- Basic and in-depth details of the pricing rules which are defined for a self-funded policy of a bill group.
- Basic and in-depth details of the pricing rules which are defined for a fully-insured policy plan.
- Basic details of the pricing groups defined for a bill group who is associated with the self-funded policy.
- Basic details of the approval transactions which are created while defining, editing, and deleting the pricing rules of the parent customer and bill group.
- Basic details of the bill, adjustments which are swept onto the bill, activities (such as, payment, offset, refund, write off, or transfer) through which the bill is settled, high-level summary and details of the bill segments which are included in the bill, active hold requests due to which the bill is kept on hold, offset requests through which the bill is offset

against another bill, and refund and write off requests through which the bill or its bill segment is either refunded or written off.

In other words, this feature allows you to drill-down to see or act on all current and historical revenue management and billing details. This allows you to professionally and efficiently handle customer inquiries and complaints at the first point of contact, raising your customer service from previously unattainable levels and reducing the associated time and cost.

## Prerequisites

---

To setup the Customer 360° View feature, you need do the following:

- Define the required divisions, customer classes, person types, person identifier types, account identifier types, policy types, and policy person roles in the system
- Define values for the **C1-SourceSystemLookup** extendable lookup
- Define the required characteristic types where the characteristic entity is set to **Person**
- Define the required characteristic types where the characteristic entity is set to **Account**
- Define the required characteristic types where the characteristic entity is set to **Policy**
- Define values for the **Administrative Contract Type** and **On Account Contract Type** option types in the **C1\_CMO** feature configuration

**Note:** This prerequisite is not required when you are viewing the 360° information of a person who is associated with the self-funded policy.

- Define values for **Premium Amount SQI** and **Coverage End Date SQI** option types in the **C1-BILLADJSQ** feature configuration

**Note:** This prerequisite is not required when you are viewing the 360° information of a person who is associated with the self-funded policy.

- Define value for the **Person Relationship Type** option type in the **C1-ASOBLNG** feature configuration

## Customer 360° View

---

The **Customer 360° View** screen allows you to search for a person, its accounts, and policies using various search criteria. It contains the following zone:

- [360° Search](#) on page 177

### 360° Search

The **360° Search** zone allows you to search for a person, account, and policy using various search criteria. It contains the following two sections:

- **Search Criteria** – The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	<p>Used to indicate whether you want to search for a person, account, or policy. The valid values are:</p> <ul style="list-style-type: none"> <li>• Policy</li> <li>• Person</li> <li>• Account</li> </ul> <p><b>Note:</b> By default, the <b>Policy</b> option is selected.</p>	Yes
Policy Type	<p>Used to search policies which are created using a particular policy type.</p> <p><b>Note:</b> This field appears when the <b>Policy</b> option is selected from the <b>Search By</b> list.</p>	No
Source System	<p>Used to search policies which were created in a particular external system.</p> <p><b>Note:</b> This field appears when the <b>Policy</b> option is selected from the <b>Search By</b> list.</p>	No
Policy Number	<p>Used to search a policy with a particular policy number.</p> <p><b>Note:</b> This field appears when the <b>Policy</b> option is selected from the <b>Search By</b> list.</p>	No
Policy ID	<p>Used to search a particular policy.</p> <p><b>Note:</b> This field appears when the <b>Policy</b> option is selected from the <b>Search By</b> list.</p>	No
Policy Person Role	<p>Used to search policies where a person is assigned a particular person role.</p> <p><b>Note:</b> This field appears when the <b>Policy</b> option is selected from the <b>Search By</b> list.</p>	No

Field Name	Field Description	Mandatory (Yes or No)
Person Name	<p>Used to search a particular person using its primary name. If you specify the person name while searching for an account, the system searches all accounts where the person is the main customer. However, if you specify the person name while searching for a policy, the system searches all policies where the person is the main customer.</p> <p><b>Note:</b> This field appears when:</p> <ul style="list-style-type: none"> <li>• The <b>Policy</b> or <b>Person</b> option is selected from the <b>Search By</b> list.</li> <li>• The <b>Account</b> option is selected from the <b>Search By</b> list and the <b>Advanced Search</b> link available in the right side of the <b>360° Search</b> zone is clicked.</li> </ul>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required when you are searching for a policy using the policy person role.</p>
Status	<p>Used to search policies with a particular status. The valid values are:</p> <ul style="list-style-type: none"> <li>• In Force/Active</li> <li>• Canceled</li> <li>• Pending Cancellation</li> <li>• Pending</li> <li>• Pending Reinstatement</li> <li>• Pending Termination</li> <li>• Pending Termination Overridden</li> <li>• Post Runout</li> <li>• Reinstated</li> <li>• Runout</li> <li>• Terminated</li> </ul> <p><b>Note:</b> This field appears when the <b>Policy</b> option is selected from the <b>Search By</b> list.</p>	No
Start Date	<p>Used to search policies which are effective from a particular date.</p> <p><b>Note:</b> This field appears when the <b>Policy</b> option is selected from the <b>Search By</b> list and the <b>Advanced Search</b> link available in the right side of the <b>360° Search</b> zone is clicked.</p>	No
End Date	<p>Used to search policies which are effective till a particular date.</p> <p><b>Note:</b> This field appears when the <b>Policy</b> option is selected from the <b>Search By</b> list and the <b>Advanced Search</b> link available in the right side of the <b>360° Search</b> zone is clicked.</p>	No

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Type	Used to search persons, accounts, or policies with a particular type of characteristic.  <b>Note:</b> This field appears when the <b>Advanced Search</b> link available in the right side of the <b>360° Search</b> zone is clicked.	No
Characteristic Value	Used to search persons, accounts, or policies with a particular characteristic.  <b>Note:</b> This field appears when you are searching for a person, account, or policy using the characteristic type. On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	Yes (Conditional)  <b>Note:</b> If you specify the characteristic type as a search criteria, you have to enter the characteristics value.
Division	Used to search persons or accounts which belong to a particular division.  <b>Note:</b> This field appears when the <b>Person</b> or <b>Account</b> option is selected from the <b>Search By</b> list.	No
Customer Class	Used to search accounts or persons' whose accounts belong to a particular customer class.  <b>Note:</b> This field appears when the <b>Person</b> or <b>Account</b> option is selected from the <b>Search By</b> list.	No
Person ID	Used to search a particular person.  <b>Note:</b> This field appears when the <b>Person</b> option is selected from the <b>Search By</b> list.	No
Person Identifier Type	Used to indicate the person identifier type based on which you want to search for a person.  <b>Note:</b> This field appears when the <b>Person</b> option is selected from the <b>Search By</b> list.	Yes (Conditional)  <b>Note:</b> If you specify the person identifier as a search criteria, you have to select the person identifier type.
Person Identifier	Used to search a person with a particular identifier.  <b>Note:</b> This field appears when the <b>Person</b> option is selected from the <b>Search By</b> list.	Yes (Conditional)  <b>Note:</b> If you specify the person identifier type as a search criteria, you have to enter the person identifier.

Field Name	Field Description	Mandatory (Yes or No)
Person Type	<p>Used to search persons of a particular type. The valid values are:</p> <ul style="list-style-type: none"> <li>• Business</li> <li>• Bill Group</li> <li>• Group</li> <li>• Broker</li> <li>• Person</li> <li>• Parent Customer</li> </ul> <p><b>Note:</b> This field appears when the <b>Person</b> option is selected from the <b>Search By</b> list and the <b>Advanced Search</b> link available in the right side of the <b>360° Search</b> zone is clicked.</p>	No
Address	<p>Used to search persons with a particular address or accounts' whose main customer has a particular address.</p> <p><b>Note:</b> This field appears when the <b>Person</b> or <b>Account</b> option is selected from the <b>Search By</b> list and the <b>Advanced Search</b> link available in the right side of the <b>360° Search</b> zone is clicked.</p>	No
City	<p>Used to search persons who belong to a particular city or accounts' whose main customer belongs to a particular city.</p> <p><b>Note:</b> This field appears when the <b>Person</b> or <b>Account</b> option is selected from the <b>Search By</b> list and the <b>Advanced Search</b> link available in the right side of the <b>360° Search</b> zone is clicked.</p>	No
Phone Number	<p>Used to search a person with a particular phone number or accounts' whose main customer has a particular phone number.</p> <p><b>Note:</b> This field appears when the <b>Person</b> or <b>Account</b> option is selected from the <b>Search By</b> list and the <b>Advanced Search</b> link available in the right side of the <b>360° Search</b> zone is clicked.</p>	No
Account ID	<p>Used to search a particular account.</p> <p><b>Note:</b> This field appears when the <b>Account</b> option is selected from the <b>Search By</b> list.</p>	No

Field Name	Field Description	Mandatory (Yes or No)
Account Identifier Type	Used to indicate the account identifier type based on which you want to search for an account.  <b>Note:</b> This field appears when the <b>Account</b> option is selected from the <b>Search By</b> list.	Yes (Conditional)  <b>Note:</b> If you specify the account identifier as a search criteria, you have to select the account identifier type.
Account Identifier	Used to search an account with a particular identifier.  <b>Note:</b> This field appears when the <b>Account</b> option is selected from the <b>Search By</b> list.	Yes (Conditional)  <b>Note:</b> If you specify the account identifier type as a search criteria, you have to enter the account identifier.

**Note:**

You must specify at least one search criterion while searching for a person, account, or policy. One more search criterion is required when you are searching for a person or account using the division and/or customer class. Similarly, one more search criterion is required when you are searching for a policy using the policy type and/or source system.

If you have specified any other search criterion along with the person ID, account ID, or policy ID, the system ignores the additional search criterion and searches using the person ID, account ID, or policy ID, respectively.

- **Search Results** – On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Policy Information	Displays information about the policy.  <b>Note:</b> It has a link. On clicking the link, the <b>Policy</b> screen appears where you can view the details of the respective policy. This column appears when the <b>Policy</b> option is selected from the <b>Search By</b> list.
Main Customer	Indicates the main customer of the policy or account.  <b>Note:</b> This column appears when the <b>Policy</b> or <b>Account</b> option is selected from the <b>Search By</b> list.
Source System	Displays the name of the external system in which the policy was created.  <b>Note:</b> This column appears when the <b>Policy</b> option is selected from the <b>Search By</b> list.

Column Name	Column Description
Policy Number	<p>Displays the policy number.</p> <p><b>Note:</b> This column appears when the <b>Policy</b> option is selected from the <b>Search By</b> list.</p>
Start Date	<p>Displays the date from when the policy is effective.</p> <p><b>Note:</b> This column appears when the <b>Policy</b> option is selected from the <b>Search By</b> list.</p>
End Date	<p>Displays the date till when the policy is effective.</p> <p><b>Note:</b> This column appears when the <b>Policy</b> option is selected from the <b>Search By</b> list.</p>
Status	<p>Indicates the status of the policy. The valid values are:</p> <ul style="list-style-type: none"> <li>• In Force/Active</li> <li>• Canceled</li> <li>• Pending Cancellation</li> <li>• Pending</li> <li>• Pending Reinstatement</li> <li>• Pending Termination</li> <li>• Pending Termination Overridden</li> <li>• Post Runout</li> <li>• Reinstated</li> <li>• Runout</li> <li>• Terminated</li> </ul> <p><b>Note:</b> This column appears when the <b>Policy</b> option is selected from the <b>Search By</b> list.</p>
Person Information	<p>Displays information about the person. In addition, this column has a context menu which helps in navigating to other screens in the application.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Person</b> screen appears where you can view the details of the respective person. This column appears when the <b>Person</b> option is selected from the <b>Search By</b> list.</p>
Person Name	<p>Displays the name of the person.</p> <p><b>Note:</b> This column appears when the <b>Person</b> option is selected from the <b>Search By</b> list.</p>

Column Name	Column Description
Person Type	<p>Indicates the type of the person. The valid values are:</p> <ul style="list-style-type: none"> <li>• Business</li> <li>• Bill Group</li> <li>• Group</li> <li>• Broker</li> <li>• Person</li> <li>• Parent Customer</li> </ul> <p><b>Note:</b> This column appears when the <b>Person</b> option is selected from the <b>Search By</b> list.</p>
Primary Person Identifier Type	<p>Indicates the primary identifier type associated with the person.</p> <p><b>Note:</b> This column appears when the <b>Person</b> option is selected from the <b>Search By</b> list.</p>
Primary Person Identifier	<p>Displays the primary person identifier.</p> <p><b>Note:</b> This column appears when the <b>Person</b> option is selected from the <b>Search By</b> list.</p>
Account Information	<p>Displays information about the account. In addition, this column has a context menu which helps in navigating to other screens in the application.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account. This column appears when the <b>Account</b> option is selected from the <b>Search By</b> list.</p>
Division	<p>Indicates the division to which the account belongs.</p> <p><b>Note:</b> This column appears when the <b>Account</b> option is selected from the <b>Search By</b> list.</p>
Customer Class	<p>Indicates the customer class to which the account belongs.</p> <p><b>Note:</b> This column appears when the <b>Account</b> option is selected from the <b>Search By</b> list.</p>
Primary Account Identifier Type	<p>Indicates the primary identifier type associated with the account.</p> <p><b>Note:</b> This column appears when the <b>Account</b> option is selected from the <b>Search By</b> list.</p>
Primary Account Identifier	<p>Displays the primary account identifier.</p> <p><b>Note:</b> This column appears when the <b>Account</b> option is selected from the <b>Search By</b> list.</p>

Column Name	Column Description
Current Balance	Displays the total amount of funds in the account.  <b>Note:</b> This column appears when the <b>Account</b> option is selected from the <b>Search By</b> list.

**Note:**

You can view the 360° information of the person, account, or policy by clicking the **View**  icon corresponding to the record in the **Search Results** section.

Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

**Searching for a Person****Prerequisites**

To search for a person, you should have:

- Divisions, customer classes, person types, and person identifier types defined in the application
- Characteristic types defined in the application (where the characteristic entity is set to **Person**)

**Procedure**

To search for a person:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, click **Customer 360° View**.  
The **Customer 360° View** screen appears.
3. Select the **Person** option from the **Search By** list to indicate that you want to search for a person.
4. Enter the required search criteria in the **360° Search** zone.

**Note:**

You must specify at least one search criterion while searching for a person. One more search criterion is required when you are searching for a person using the division and/or customer class.

The criteria are grouped as indicated by line separators between the criteria. Each group is independent from the other, and only one group is used at a time for searching. If you enter criteria in more than one group, the criteria from the former group is used for searching. For example, if you enter the person name (in the second criteria group) and person identifier (in the fourth criteria group), the system searches using the person name instead of the person identifier.

You must specify division and/or customer class when you are searching for a person using the city.

You must specify division, customer class, or any other criteria in the second group when you are searching for a person using the person type.

If you have specified any other search criterion along with the person ID, the system ignores the additional search criterion and searches for the person using the person ID.

ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

The **Advanced Search** link appears in the right side of the **360° Search** zone. On clicking the **Advanced Search** link, additional fields appear in the zone which help you to refine the search.

If you select a predefined characteristic type, the **Search**  icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

#### 5. Click **Search**.

A list of persons that meet the search criteria appears in the **Search Results** section.

## Searching for an Account

### Prerequisites

To search for an account, you should have:

- Divisions, customer classes, and account identifier types defined in the application
- Characteristic types defined in the application (where the characteristic entity is set to **Account**)

### Procedure

To search for an account:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, click **Customer 360° View**.  
The **Customer 360° View** screen appears.
3. Select the **Account** option from the **Search By** list to indicate that you want to search for an account.

- Enter the required search criteria in the **360° Search** zone.

**Note:**

You must specify at least one search criterion while searching for an account. One more search criterion is required when you are searching for an account using the division and/or customer class.

The criteria are grouped as indicated by line separators between the criteria. Each group is independent from the other, and only one group is used at a time for searching. If you enter criteria in more than one group, the criteria from the former group is used for searching. For example, if you enter the person name (in the fourth criteria group) and account identifier (in the third criteria group), the system searches using the account identifier instead of the person name.

You must specify division and/or customer class when you are searching for an account using the city.

If you have specified any other search criterion along with the account ID, the system ignores the additional search criterion and searches for the account using the account ID.

ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

The **Advanced Search** link appears in the right side of the **360° Search** zone. On clicking the **Advanced Search** link, additional fields appear in the zone which help you to refine the search.

If you select a predefined characteristic type, the **Search**  icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

- Click **Search**.

A list of accounts that meet the search criteria appears in the **Search Results** section.

**Searching for a Policy****Prerequisites**

To search for a policy, you should have:

- Policy types and policy person roles defined in the application
- Values defined for the **C1-SourceSystemLookup** extendable lookup
- Characteristic types defined in the application (where the characteristic entity is set to **Policy**)

**Procedure**

To search for a policy:

- Click the **Menu** link in the **Application** toolbar.  
A list appears.
- From the **Main** menu, click **Customer 360° View**.  
The **Customer 360° View** screen appears.
- Select the **Policy** option from the **Search By** list to indicate that you want to search for a policy.

4. Enter the required search criteria in the **360° Search** zone.

**Note:**

You must specify at least one search criterion while searching for a policy. One more search criterion is required when you are searching for a policy using the policy type and/or source system.

If you have specified any other search criterion along with the policy ID, the system ignores the additional search criterion and searches for the policy using the policy ID.

You must specify the person name when you are searching for a policy using the policy person role.

ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

The **Advanced Search** link appears in the right side of the **360° Search** zone. On clicking the **Advanced Search** link, additional fields appear in the zone which help you to refine the search.

If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

5. Click **Search**.

A list of policies that meet the search criteria appears in the **Search Results** section.

**Viewing the 360° Information of a Person****Prerequisites**

To view the 360° information of a person, you should have:

- Value defined for the **Person Relationship Type** option type in the **C1-ASOBLLNG** feature configuration

**Procedure**

To view the 360° information of a person:

1. Search for the person in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **View** (👁) icon corresponding to the person whose details you want to view.

The **Person** tab appears in the **Customer 360° Information** screen. It contains the following zones:

- [Person Information](#) on page 202
- [Person Characteristics](#) on page 203
- [Child Persons](#) on page 204
- [Person Hierarchy](#) on page 204

**Note:** The **Person Hierarchy** zone does not appear when you are viewing the 360° information of a person whose person type is set to **Parent Customer**.

- [Person Billing Hierarchy](#) on page 205

**Note:** The **Person Billing Hierarchy** zone appears when you are viewing the 360° information of a person whose person type is set to **Parent Customer**.

- [Bill Group Derivation and Pricing Parameters](#) on page 208

**Note:** The **Bill Group Derivation and Pricing Parameters** zone appears when you are viewing the 360° information of a person whose person type is set to **Parent Customer**.

- [Bill Group Sorting](#) on page 210

**Note:** The **Bill Group Sorting** zone appears when you are viewing the 360° information of a person whose person type is set to **Parent Customer**.

- [Customer Contacts](#) on page 211
- [Bill Groups Created Via Customer Registration](#) on page 212

**Note:** The **Bill Groups Created Via Customer Registration** zone appears when you are viewing the 360° information of a person whose person type is set to **Parent Customer**.

3. View the basic details of the person in the **Person Information** zone.
4. View the characteristics defined for the person in the **Person Characteristics** zone.
5. View the child persons included in the person's hierarchy in the **Child Persons** zone.
6. View the accounts and policies where the person is the main customer and memberships where the person is the main subscriber in the **Person Hierarchy** zone.
7. View the parent customer's accounts and policies and its bill groups' accounts and policies in the **Person Billing Hierarchy** zone.
8. View the derivation and pricing parameters defined for the bill group and sort ID combinations in the **Bill Group Derivation and Pricing Parameters** zone.
9. View the sort IDs defined for the bill groups in the **Bill Group Sorting** zone.
10. View how and when the person was contacted in the **Customer Contacts** zone.
11. View the customer registration objects through which the bill groups are created for the parent customer in the **Bill Groups Created Via Customer Registration** zone.
12. If required, you can view the details of the account to which the person is associated in the **Account** tab.

**Note:**

If you are viewing the 360° information of a parent customer, the following zones appear in the **Account** tab when you click the **Broadcast**  icon corresponding to the account in the **Account List** zone:

- Account Information
- Auto Pay Details
- Account Financial and Collections Summary
- Account Characteristics
- Open Bills
- Billed Vs Paid
- Timeline

13. If required, you can view the details of the policy to which the person is associated in the **Policy** tab.

14. If required, you can view the pricing information of a parent customer or bill group in the **Pricing** tab.

## Viewing the 360° Information of an Account

### Prerequisites

To view the 360° information of an account, you should have:

- Value defined for the **Person Relationship Type** option type in the **C1-ASOBLNG** feature configuration
- Values defined for the **Administrative Contract Type** and **On Account Contract Type** option types in the **C1\_CMO** feature configuration
- Values defined for the **Premium Amount SQI** and **Coverage End Date SQI** option types in the **C1-BILLADJSQ** feature configuration

**Note:** The latter two prerequisites are not required when you are viewing the 360° information of a person who is associated with the self-funded policy.

### Procedure

To view the 360° information of an account:

1. Search for the account in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **View** () icon corresponding to the account whose details you want to view.

The **Account** tab appears in the **Customer 360° Information** screen. It contains the following zones:

- [Account List](#) on page 213

**Note:** The **Account List** zone appears when you are viewing the 360° information of a person whose person type is set to **Parent Customer**.

- [Account Information](#) on page 214
- [Auto Pay Details](#) on page 217

- [Account Characteristics](#) on page 216
- [Administrative Contracts](#) on page 216

**Note:** The **Administrative Contracts** zone appears when you are viewing the 360° information of a person whose person type is neither **Parent Customer** nor **Bill Group**.

- [Account Financial and Collections Summary](#) on page 217
- [Billing and Adjustment Summary](#) on page 218

**Note:** The **Billing and Adjustment Summary** zone appears when you are viewing the 360° information of a person whose person type is neither **Parent Customer** nor **Bill Group**.

- [Open Bills](#) on page 219
  - [Billed Vs Paid](#) on page 220
  - [Timeline](#) on page 223
3. View the accounts of the parent customer and its bill groups in the **Account List** zone.
  4. View the basic details of the account in the **Account Information** zone.
  5. View the automatic payment options defined for the account in the **Auto Pay Details** zone.
  6. View the characteristics defined for the account in the **Account Characteristics** zone.
  7. View the account's contracts which should be monitored closely for various administrative reasons in the **Administrative Contracts** zone.
  8. View the financial and collection details of the account in the **Account Financial and Collections Summary** zone.
  9. View the billing and adjustment summary of the account in the **Billing and Adjustment Summary** zone.
  10. View the unpaid bills of the account in the **Open Bills** zone.
  11. View various transactions of the account, such as bills, payments, adjustments, reconciliations, and so on, in the **Billed Vs Paid** zone.
  12. View the number of customer contacts, bills, and payments created for the account in a particular month in the **Timeline** zone.

### Person Information

The **Person Information** zone displays the details of the person. It contains the following sections:

- **Main** - Displays the basic information about the person. It contains the following fields:

Field Name	Field Description
Person Information	Displays information about the person. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Person</b> screen appears where you can view the details of the person.
Person Type	Indicates the type of the person. The valid values are: <ul style="list-style-type: none"> <li>• Business</li> <li>• Bill Group</li> <li>• Group</li> <li>• Broker</li> <li>• Person</li> <li>• Parent Customer</li> </ul>
Date of Birth	Displays the date when the person was born.  <b>Note:</b> This field appears only when the respective data is available for the person.

- **Person Identifiers** - Lists various types of identification associated with the person. It contains the following columns:

Column Name	Column Description
Person Identifier Type	Indicates the person identifier type.
Person Identifier	Displays the value of the person identifier type.

- **Contact Information** - Displays the contact details of the person. It contains the following fields:

Field Name	Field Description
Country	Indicates the country where the person is located.
Address 1	Displays the first line of the person's address. It may contain details, such as house number and apartment name.

Field Name	Field Description
Address 2	Displays the second line of the person's address. It may contain details, such as street name.
Address 3	Displays the third line of the person's address. It may contain the landmark details.
Address 4	Displays the fourth line of the person's address.
House Type	Indicates the type of the house.
Number 1	Displays the numeric information, if any, related to the address.
Number 2	Displays the numeric information, if any, related to the address.
In City Limit	Indicates whether the person resides within the city limit or not. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>
City	Displays the city where the person is located.
Geographic Code	Displays the geographic code of the address.
County	Displays the county where the person is located.
State	Indicates the state where the city or county is located.
Postal	Displays the postal or zip code of the address.
Email ID	Displays the e-mail ID of the person.

**Note:** The above mentioned fields appear in the **Contact Information** section only when the respective data is available for the person.

- **Phone Details** – Lists the phone details of the person. It contains the following columns:

Column Name	Column Description
Phone Type	Indicates the type of the phone number.
Phone Number	Displays the phone number of the person.

### Person Characteristics

The **Person Characteristics** zone lists the characteristics defined for the person. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the characteristic is effective for the person.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.
Description	Displays the description of the characteristic value. <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> The data appears in this column only when the type of characteristic value is set to <b>Predefined Value</b> or <b>Foreign Key Value</b>.</p> </div>

You can filter the list using the **Characteristic Type** field available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** () icon in the upper right corner of this zone.

## Child Persons

The **Child Persons** zone lists the child persons included in the person's hierarchy. It contains the following columns:

Column Name	Column Description
Child Person Information	Displays information about the child person. <b>Note:</b> It has a link. On clicking the link, the <b>Person</b> screen appears where you can view the details of the child person.
Relationship Type	Indicates how the child person is related to the parent person.
Start Date	Displays the date from when the child person is related to the parent person.
End Date	Displays the date till when the child person is related to the parent person.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can view the 360° information of a child person by clicking the **View** () icon corresponding to the child person in this zone.

You can create a new child person through the **Customer Registration** feature by clicking the **Add** link in the upper right corner of this zone. While adding a child person to a parent person, the child person is related to the parent person using the relationship type which is specified in the **Person Relationship Type** option type of the **C1-ASOBLNG** feature configuration.

You can filter the list using the **Person Relationship Type** field available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** () icon in the upper right corner of this zone.

## Bill Group Derivation and Pricing Parameters

An employer may have different bill groups. Each bill group will handle the claim and enrollment transactions of employees based on the employee attributes, such as location, employment status, employment department, and so on.

Oracle Revenue Management and Billing allows you to define the derivation and pricing parameters, such as source system, parameter 1, parameter 2, parameter 3, and parameter 4 for the bill group and sort ID combination. These parameters are used to derive the bill group against which the claim and enrollment transactions should be billed in the system. For example, if you want bill group 1 to handle claim and enrollment transactions of employees who reside in the western location of city and belong to grade A and whose transactions are received from the X system, you need to define the derivation and pricing parameters for bill group 1 where the source system is set to X, parameter 1 is set to Western, and parameter 2 is set to Grade A. Similarly, if you want bill group 2 to handle claim and enrollment transactions of employees who reside in the eastern location of city and belong to grade A and whose transactions are received from the X system, you need to define the derivation and pricing parameters for bill group 2 where the source system is set to X, parameter 1 is set to Eastern, and parameter 2 is set to Grade A.

**Note:** In the above examples, the bill group is derived based on the specified attributes only when the source system, parameter 1, and parameter 2 are mapped to the appropriate transaction fields in the pricing rule type using which the pricing rules are defined for the bill group.

You can also define criteria for a rule in a pricing group using the parameters, such as source system, parameter 1, parameter 2, parameter 3, and parameter 4. If a pricing rule is defined for a bill group using a pricing group, you can define more than one price in the pricing rule which is offered based on the attributes of the employees.

The derivation and pricing parameters for the bill group and sort ID combination are effective from a particular date. However, the effective date must fall within the date range defined for the sort ID of the bill group.

The **Bill Group Derivation and Pricing Parameters** zone lists the derivation and pricing parameters defined for all effective child persons whose person type is set to **Bill Group** and who are related to the parent customer using a relationship type which is specified in the **Person Relationship Type** option type of the **C1-ASOBLLNG** feature configuration. It appears when you are viewing the 360° information of a person whose person type is set to **Parent Customer**.

You can define and edit the derivation and pricing parameters for a bill group (who is effective child person of the parent customer) and sort ID combination through this zone. You can also upload the derivation and pricing parameters for one or more bill group and sort ID combinations at the same time using the **Upload Request** feature. You can upload the derivation and pricing parameters for a bill group and sort ID combination either from this zone or from the **Upload Request** screen. While creating an upload request for the derivation and pricing parameters, you need to specify the parent customer whose bill groups' derivation and pricing parameters you want to upload. Once the upload request is processed, the derivation and pricing parameters are defined for the bill group and sort ID combination in the system.

This zone contains the following columns:

Column Name	Column Description
Bill Group Information	Indicates the parent customer's bill group for whom the derivation and pricing parameters are defined. In addition, a context menu appears corresponding to this column which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Person</b> screen appears where you can view the details of the respective bill group (i.e. person).
Bill Group ID	Displays the bill group ID (i.e. person ID).
Source System	Indicates the source system from where the claim and enrollment transactions are received.
Parameter 1	Indicates the employee attribute based on which you want to derive the bill group.
Parameter 2	Indicates the employee attribute based on which you want to derive the bill group.

Column Name	Column Description
Parameter 3	Indicates the employee attribute based on which you want to derive the bill group.
Parameter 4	Indicates the employee attribute based on which you want to derive the bill group.
Sort ID	Indicates the sort ID of the bill group.
Effective Date	Displays the date from when the derivation and pricing parameters are effective for the bill group and sort ID combination.
Status	Indicates the status of the derivation and pricing parameters defined for the bill group and sort ID combination. The valid values are: <ul style="list-style-type: none"> <li>Active</li> <li>Inactive</li> </ul>

In addition, it contains the following buttons:

Button Name	Button Description
Edit	Used to edit the derivation and pricing parameters of a bill group and sort ID combination.

If you want to edit the derivation and pricing parameters of all bill group and sort ID combinations, you need to select the check box corresponding to the column header in this zone, and then click the **Edit** button. However, if you want to edit the derivation and pricing parameters of one or more bill group and sort ID combination, you need to select the check box corresponding to the bill group and sort ID combination, and then click the **Edit** button.

**Note:**

Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

If you select the check box corresponding to the column header in this zone, the system considers only those records which are present on the respective page for editing.

You can define the derivation and pricing parameters for a bill group (who is effective child person of the parent customer) and sort ID combination by clicking the **Add** link in the upper right corner of this zone. You can also upload the derivation and pricing parameters for one or more bill group (who is effective child person of the parent customer) and sort ID combinations by clicking the **Upload** link in the upper right corner of this zone.

You can filter the list using various search criteria (such as, **Parameter 1, Parameter 2, Parameter 3, Parameter 4, Bill Group ID, Sort ID, Status, and Bill Group Name**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** () icon in the upper right corner of this zone.

You can change the layout of this zone. For more information on how to change the layout, see [Changing the Layout](#) on page 2882.

## Bill Group Sorting

Oracle Revenue Management and Billing allows you to define unique sort IDs for a bill group in a given date range. In future, the sort ID will be used to club transactions based on certain parameters and present them in the bill in the ascending or descending order. It may also be used to sort data while generating various reports.

The **Bill Group Sorting** zone lists the sort IDs defined for all effective child persons whose person type is set to **Bill Group** and who are related to the parent customer using a relationship type which is specified in the **Person Relationship Type** option type of the **C1-ASOBLNG** feature configuration. It appears when you are viewing the 360° information of a person whose person type is set to **Parent Customer**.

You can define, edit, and delete a sort ID of a bill group (who is effective child person of the parent customer) through this zone. You can also upload a set of sort IDs for one or more bill groups (who are effective child persons of the parent customer) at the same time using the **Upload Request** feature. You can upload the sort IDs for bill groups either from this zone or from the **Upload Request** screen. While creating an upload request for bill group sort IDs, you need to specify the parent customer whose bill groups' sort IDs you want to upload. Once the upload request is processed, the sort ID is defined for the respective bill group in the system.

This zone contains the following columns:

Column Name	Column Description
Bill Group Information	Indicates the parent customer's bill group for whom the sort ID is defined. In addition, a context menu appears corresponding to this column which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Person</b> screen appears where you can view the details of the respective bill group (i.e. person).
Bill Group ID	Displays the bill group ID (i.e. person ID).
Sort ID	Displays the sort ID.
Description	Displays the description of the sort ID.
Start Date	Displays the date from when the sort ID is effective for the bill group.
End Date	Displays the date till when the sort ID is effective for the bill group.

In addition, it contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of a bill group's sort ID.
Delete	Used to delete a bill group's sort ID.  <b>Note:</b> You can delete a bill group's sort ID only when the derivation and pricing parameters are not yet defined for the bill group and sort ID combination.

If you want to edit or delete all sort IDs of effective bill groups, you need to select the check box corresponding to the column header in this zone, and then accordingly click the **Edit** or **Delete** button. However, if you want to edit or delete

one or more sort IDs of effective bill groups, you need to select the check box corresponding to the bill group and sort ID combination, and then accordingly click the **Edit** or **Delete** button.

**Note:**

Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

If you select the check box corresponding to the column header in this zone, the system considers only those records which are present on the respective page for editing or deleting.

You can define a sort ID for a bill group (who is effective child person of the parent customer) by clicking the **Add** link in the upper right corner of this zone. You can also upload a set of sort IDs for one or more bill groups (who are effective child persons of the parent customer) by clicking the **Upload** link in the upper right corner of this zone.

You can filter the list using the **Bill Group Name** field available in the **Filter** area. By default, the **Filter** area is hidden.

You can view the **Filter** area by clicking the **Filters** (  ) icon in the upper right corner of this zone.

You can change the layout of this zone. For more information on how to change the layout, see [Changing the Layout](#) on page 2882.

### Customer Contacts

The **Customer Contacts** zone displays information about how and when the person was contacted. It contains the following columns:

Column Name	Column Description
Contact Date	Displays the date when the person was contacted.
Customer Contact Information	Displays information about the customer contact.  <b>Note:</b> It has a link. On clicking the link, the <b>Customer Contact</b> screen appears where you can view the details of the customer contact.
Contact Type	Indicates how the person was contacted.
Comments	Displays additional information about the customer contact.

You can filter the list using various search criteria (such as, **On or Before Contact Date**, **Contact Class**, **Contact Type**, and **Show Open Contacts Only**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (  ) icon in the upper right corner of this zone.

## Bill Groups Created Via Customer Registration

The **Bill Groups Created Via Customer Registration** zone lists the customer registration objects through which the parent customer's bill groups are created in the system. It appears when you are viewing the 360° information of a person whose person type is set to **Parent Customer**. It contains the following columns:

Column Name	Column Description
Customer Registration Information	Indicates the customer registration object through which the bill group is created.  <b>Note:</b> It has a link. On clicking the link, the <b>Customer Registration</b> screen appears where you can view the details of the respective customer registration object.
Person Name	Displays the name of the bill group.
Person Relationship Type	Indicates how the bill group is related to the parent customer.
Status	Indicates the status of the customer registration object. The valid value is: <ul style="list-style-type: none"> <li>• Bill Group Approved</li> </ul>

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can filter the list using the **Person Relationship Type** field available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (  ) icon in the upper right corner of this zone.

## Customer 360° Information - Account

The following table provides information about the **Account** tab:

If you are viewing the 360° information of...	Then...
A parent customer who is associated with the self-funded or fully-insured group policy	The <b>Account</b> tab displays the following: <ul style="list-style-type: none"> <li>• List of the parent customer's and bill groups' accounts. Note that the system lists the accounts of all effective child persons whose person type is set to <b>Bill Group</b> and who are related to the parent customer using a relationship type which is specified in the <b>Person Relationship Type</b> option type of the <b>C1-ASOBLNG</b> feature configuration.</li> <li>• Basic details, characteristics, automatic payment options, financial and collections summary, and unpaid bills of the parent customer's or bill group's account.</li> </ul>
A bill group who is associated with the self-funded or fully insured group policy	The <b>Account</b> tab displays the basic details, characteristics, automatic payment options, financial and collections summary, and unpaid bills of the bill group's account.  <b>Note:</b> If the bill group has multiple accounts, the system, by default, picks and displays the details of any one of its account.

If you are viewing the 360° information of...	Then...
A person whose person type is neither <b>Parent Customer</b> nor <b>Bill Group</b>	<p>The <b>Account</b> tab displays the basic details, characteristics, automatic payment options, administrative contracts, financial and collections summary, billing and adjustment summary, and unpaid bills of the person's account.</p> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> If the person has multiple accounts, the system, by default, picks and displays the details of any one of its account.</p> </div>

It contains the following zones:

- [Account List](#) on page 213

**Note:** The **Account List** zone appears when you are viewing the 360° information of a person whose person type is set to **Parent Customer**.

### Account List

The **Account List** zone lists the accounts of the parent customer and its bill groups. Note that the system lists the accounts of all effective child persons whose person type is set to **Bill Group** and who are related to the parent customer using a relationship type which is specified in the **Person Relationship Type** option type of the **C1-ASOBLNG** feature configuration. It appears when you are viewing the 360° information of a person whose person type is set to **Parent Customer**. It contains the following columns:

Column Name	Column Description
Person Name	Indicates the person who is linked to the account.
Account Information	Displays information about the account. In addition, a context menu appears corresponding to this column which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account.
Person Type	Indicates the type of the person. The valid values are: <ul style="list-style-type: none"> <li>• Business</li> <li>• Bill Group</li> <li>• Group</li> <li>• Broker</li> <li>• Person</li> <li>• Parent Customer</li> </ul>
Person's Mailing Address	Displays the mailing address of the person.
Person ID	Displays the person ID.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

On clicking the **Broadcast**  icon corresponding to an account, the following zones appear in the **Account** tab:

- Account Information
- Auto Pay Details
- Account Financial and Collections Summary
- Account Characteristics
- Open Bills
- Billed Vs Paid
- Timeline

You can filter the list using various search criteria (such as, **Person Name**, **Account ID**, and **Person Type**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters**  icon in the upper right corner of this zone.

### **Account Information**

The **Account Information** zone displays the details of the account. It contains the following sections:

- **Main** – Displays the basic information about the account. It contains the following fields:

Field Name	Field Description
Account Information	<p>Displays information about the account. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account.</p>
Management Group	<p>Indicates the account management group to which the account belongs.</p> <p><b>Note:</b></p> <p>It has a link. On clicking the link, the <b>Account Management Group</b> screen appears where you can view the details of the respective account management group.</p> <p>This field appears only when the respective data is available for the account.</p>

- **Contact Information** – Displays the contact details of the account’s main customer. It contains the following fields:

Field Name	Field Description
Address Source	Indicates which address should be used to route the account’s bills and/or quotes via the postal service.
Country	Indicates the country where the main customer is located.
Address 1	Displays the first line of the main customer’s address. It may contain details, such as house number and apartment name.
Address 2	Displays the second line of the main customer’s address. It may contain details, such as street name.
Address 3	Displays the third line of the main customer’s address. It may contain the landmark details.
Address 4	Displays the fourth line of the main customer’s address.
House Type	Indicates the type of the house.
Number 1	Displays the numeric information, if any, related to the address.
Number 2	Displays the numeric information, if any, related to the address.
In City Limit	<p>Indicates whether the main customer resides within the city limit or not. The valid values are:</p> <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>
City	Displays the city where the main customer is located.
Geographic Code	Displays the geographic code of the address.
County	Displays the county where the main customer is located.
State	Indicates the state where the city or county is located.
Postal	Displays the postal or zip code of the address.

**Note:** The above mentioned fields except **Address Source** appear in the **Contact Information** section only when the address source of the main customer is set to **Account Override** and the respective data is available for the account.

- **Account Identifiers** – Lists various types of identification associated with the account. It contains the following columns:

Column Name	Column Description
Account Identifier Type	Indicates the account identifier type.
Account Identifier	Displays the value of the account identifier type.

### Account Characteristics

The **Account Characteristics** zone lists the characteristics defined for the account. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the characteristic is effective for the account.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.
Description	Displays the description of the characteristic value.  <b>Note:</b> The data appears in this column only when the type of characteristic value is set to <b>Predefined Value</b> or <b>Foreign Key Value</b> .

You can filter the list using the **Characteristic Type** field available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (  ) icon in the upper right corner of this zone.

### Administrative Contracts

The **Administrative Contracts** zone lists the account's contracts which should be monitored closely for various administrative reasons. It appears when you are viewing the 360° information of a person whose person type is neither **Parent Customer** nor **Bill Group**. It contains the following columns:

Column Name	Column Description
Contract ID	Displays the contract ID.  <b>Note:</b> It has a link. On clicking the link, the <b>Contract</b> screen appears where you can view the details of the respective contract.
Contract Type	Indicates the type of the contract.
Currency	Indicates the currency in which the contract balance is maintained.
Current Balance	Displays the current balance on the contract.

**Note:**

Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

The data appears in this zone only when you have defined the value for the **Administrative Contract Type** option type in the **C1\_CMO** feature configuration.

**Related Topics**

How to setup the C1_CMO feature configuration	<a href="#">Setting the C1_CMO Feature Configuration</a> on page 2906

**Auto Pay Details**

The **Auto Pay Details** zone lists the automatic payment options defined for the account. It contains the following columns:

Column Name	Column Description
Start Date	Displays the date from when the automatic payment option is effective.
End Date	Displays the date till when the automatic payment option is effective.
Auto Pay Source Code	Indicates the source of funds used to make the automatic payment. For example, debit or credit card.
Last Four Digits of Card	Displays the last four digits of the debit or credit card.  <b>Note:</b> The data appears in this column only when the external type of the auto pay source code's tender type is set to <b>Credit Card Withdrawal</b> .
Percentage	Indicates the percentage of automatic payment that must be made through the automatic payment option.
Priority	Indicates the order in which the automatic payment option should be considered for the effective date range.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

**Account Financial and Collections Summary**

The **Account Financial and Collections Summary** zone displays the financial and collection details of the account. It contains the following fields:

Field Name	Field Description
Collection Class	Indicates the collection class to which the account belongs.
Current Credit Rating	Indicates the account's credit rating which is effective on the current date.
Last Credit Review Date	Displays the date when the account's debt was last reviewed.
Last Payment Date	Displays the date when the last payment was made for the account.  <b>Note:</b> The system considers the last payment which is in the <b>Frozen</b> status.
Last Payment Amount	Displays the amount of the last payment.  <b>Note:</b> The system considers the last payment which is in the <b>Frozen</b> status.
Current Balance	Displays the current balance of the account.
Payoff Balance	Displays the payoff balance of the account.

Field Name	Field Description
Account on Hold	Indicates whether the account is on hold or not. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>
Account on Promise to Pay	Indicates whether any promise to pay is scheduled for the account on the current or future date. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>
Account on Payment Arrangement	Indicates whether any payment arrangement exists for the account. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>
Account on Payment Agreement	Indicates whether any active payment agreement request exists for the account. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>

### Billing and Adjustment Summary

The **Billing and Adjustment Summary** zone displays the billing and adjustment summary of the account. It appears when you are viewing the 360° information of a person whose person type is neither **Parent Customer** nor **Bill Group**. It contains the following sections:

- **Quote Billed Balance** – Displays information about the account’s billed balance. It contains the following fields:

Field Name	Field Description
Past Due Billed Balance	Displays the sum of open financial transactions of the account that are listed on a bill with a past due date.
Future Due Billed Balance	Displays the sum of open financial transactions of the account that are listed on a bill with a future due date.
Quote Billed Balance	Displays the sum of past due billed balance and future due billed balance.

- **Future Adjustments and Retroactivity** – Displays information about the account’s future adjustments and retro activities. It contains the following fields:

Field Name	Field Description
Future Adjustments	Displays the sum of adjustment financial transactions of the account which are swept onto the next bill.
Future Retro Terms (Credits)	Displays the sum of canceled bill segment financial transactions of the account which are presented on the next bill.

Field Name	Field Description
Future Retro Adds (Debits)	<p>Displays the sum of membership premium billable charges which are not yet billed to the account.</p> <p><b>Note:</b> The data appears in this field only when the values are defined for the <b>Premium Amount SQI</b> and <b>Coverage End Date SQI</b> option types in the <b>C1-BILLADJSQ</b> feature configuration.</p>
Future Balance with Adjustments & Debits/Credits	Displays the sum of quote billed balance, future adjustments, future retro terms (credits), and future retro adds (debits).

### Open Bills

The **Open Bills** zone lists the unpaid bills of the account. By default, the bills where the unpaid amount is greater than zero are listed in this zone. It contains the following columns:

Column Name	Column Description										
Bill Date	<p>Displays the date when the bill was generated.</p> <p><b>Note:</b> The data in this column is presented in a different color depending on the age bucket in which the bill's days past due falls. The following table lists the color used for presentation in various age buckets:</p> <table border="1"> <thead> <tr> <th>Age Bucket</th> <th>Color</th> </tr> </thead> <tbody> <tr> <td>Age 0 to 30 DPD</td> <td>Black</td> </tr> <tr> <td>Age 31 to 60 DPD</td> <td>Green</td> </tr> <tr> <td>Age 61 to 90 DPD</td> <td>Orange</td> </tr> <tr> <td>Age &gt; 90 DPD</td> <td>Red</td> </tr> </tbody> </table>	Age Bucket	Color	Age 0 to 30 DPD	Black	Age 31 to 60 DPD	Green	Age 61 to 90 DPD	Orange	Age > 90 DPD	Red
Age Bucket	Color										
Age 0 to 30 DPD	Black										
Age 31 to 60 DPD	Green										
Age 61 to 90 DPD	Orange										
Age > 90 DPD	Red										
Bill ID	<p>Displays the bill ID.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Bill</b> screen appears where you can view the details of the respective bill.</p>										
Due Date	Displays the date when the bill is due for payment.										
Bill Amount	Displays the bill amount.										
Bill Status	<p>Indicates the status of the bill. The valid values are:</p> <ul style="list-style-type: none"> <li>• Pending</li> <li>• Complete</li> </ul>										
Unpaid Amount	Displays the unpaid amount of the bill.										

Column Name	Column Description
Age Bucket	Indicates the age bucket in which the bill's days past due falls. The valid values are: <ul style="list-style-type: none"> <li>• Age 0 to 30 DPD</li> <li>• Age 31 to 60 DPD</li> <li>• Age 61 to 90 DPD</li> <li>• Age &gt; 90 DPD</li> </ul>
Days Past Due	Displays the number of days past after the due date.
Overdue Process Information	Indicates the overdue process which is initiated for the bill and is currently in the <b>Active</b> status. In addition, this column has a context menu which helps in navigating to other screens in the application. <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> It has a link. On clicking the link, the <b>Overdue Process</b> screen appears where you can view the details of the respective overdue process.</p> </div>
Payment Agreement Request Information	Indicates the active payment agreement request in which the bill is included. <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> It has a link. On clicking the link, the <b>Payment Agreement Request</b> screen appears where you can view the details of the respective payment agreement request.</p> </div>

You can view additional information about the bill by clicking the **View** () icon corresponding to the bill in the **Open Bills** zone.

You can filter the list using various search criteria (such as, **On or Before Bill Date** and **Show All Bills**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** () icon in the upper right corner of this zone.

**Note:** If you select the **Show All Bills** option, the system lists all bills where the unpaid amount is greater than or equal to zero.

### **Billed Vs Paid**

The **Billed Vs Paid** zone lists the following transactions of the account:

- Bills which are created for the account
- Any excess credit which is made for the account
- Payments which are created or canceled for the account
- Adjustments which are created or canceled for the account
- Refund or Write Off adjustments which are created or canceled for the account
- Payment transfer to the reconciliation contract of the account
- Payment transfer from the reconciliation contract to the payor account's contract
- Reconciliations through which the account's bill segments are reconciled

- Automatic payments sent to the auto clearing house for review before freezing them

**Note:** The excess credit information for the account appears only when you have defined the value for the **On Account Contract Type** option type in the **C1\_CMO** feature configuration. Accordingly, the excess credit information (if any) on the respective contracts is listed in this zone.

It contains the following columns:

Column Name	Column Description																						
Due Date	<p>Displays the date when the bill is due for payment.</p> <p><b>Note:</b> The data appears in this column only when the transaction type is set to <b>Bill</b>.</p>																						
Bill ID	<p>Displays the bill ID.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Bill</b> screen appears where you can view the details of the respective bill. The data appears in this column only when the transaction type is set to <b>Bill</b>.</p>																						
Transaction Date	<p>The following table indicates the date that appears depending on the type of the transaction:</p> <table border="1"> <thead> <tr> <th>If the transaction type is...</th> <th>Then...</th> </tr> </thead> <tbody> <tr> <td>Bill</td> <td>Date when the bill is generated for the account</td> </tr> <tr> <td>Payment</td> <td>Date when the payment is made for the account</td> </tr> <tr> <td>Adjustment</td> <td>Date when the adjustment is created for the account</td> </tr> <tr> <td>Payment Cancellation</td> <td>Date when the payment is canceled for the account</td> </tr> <tr> <td>Adjustment Cancellation</td> <td>Date when the adjustment is canceled for the account</td> </tr> <tr> <td>Excess Credit (overpayment)</td> <td>Date when the excess credit is made for the account</td> </tr> <tr> <td>Reconciliation Contract</td> <td>Date when the payment is transferred to the reconciliation contract of the account</td> </tr> <tr> <td>Reconciliation Contract - Returned</td> <td>Date when the payment made to the reconciliation contract of the account is canceled</td> </tr> <tr> <td>Payment Transfer</td> <td>Date when the pay instruction for the account is reconciled</td> </tr> <tr> <td>Payment Transfer Cancellation</td> <td>Date when the reconciliation is canceled</td> </tr> </tbody> </table> <p><b>Note:</b> The data does not appear in this column for automatic payments which are sent to the auto clearing house for review.</p>	If the transaction type is...	Then...	Bill	Date when the bill is generated for the account	Payment	Date when the payment is made for the account	Adjustment	Date when the adjustment is created for the account	Payment Cancellation	Date when the payment is canceled for the account	Adjustment Cancellation	Date when the adjustment is canceled for the account	Excess Credit (overpayment)	Date when the excess credit is made for the account	Reconciliation Contract	Date when the payment is transferred to the reconciliation contract of the account	Reconciliation Contract - Returned	Date when the payment made to the reconciliation contract of the account is canceled	Payment Transfer	Date when the pay instruction for the account is reconciled	Payment Transfer Cancellation	Date when the reconciliation is canceled
If the transaction type is...	Then...																						
Bill	Date when the bill is generated for the account																						
Payment	Date when the payment is made for the account																						
Adjustment	Date when the adjustment is created for the account																						
Payment Cancellation	Date when the payment is canceled for the account																						
Adjustment Cancellation	Date when the adjustment is canceled for the account																						
Excess Credit (overpayment)	Date when the excess credit is made for the account																						
Reconciliation Contract	Date when the payment is transferred to the reconciliation contract of the account																						
Reconciliation Contract - Returned	Date when the payment made to the reconciliation contract of the account is canceled																						
Payment Transfer	Date when the pay instruction for the account is reconciled																						
Payment Transfer Cancellation	Date when the reconciliation is canceled																						

Column Name	Column Description
Transaction Type	<p>Indicates the type of the transaction. The valid values are:</p> <ul style="list-style-type: none"> <li>• Bill</li> <li>• Payment</li> <li>• Adjustment</li> <li>• Payment Cancellation</li> <li>• Adjustment Cancellation</li> <li>• Excess Credit (overpayment)</li> <li>• Reconciliation Contract</li> <li>• Reconciliation Contract - Returned</li> <li>• Payment Transfer</li> <li>• Payment Transfer Cancellation</li> </ul>
Transaction Description	<p>Displays the description of the transaction.</p> <p><b>Note:</b> The data appears in this column only when the transaction type is set to <b>Adjustment, Adjustment Cancellation, Reconciliation Contract - Returned, Payment Transfer, and Payment Transfer Cancellation</b>. In addition, the data appears in this column when the automatic payments are sent to the auto clearing house for review before freezing them. The transaction description for such payments is set to <b>Pending Payment</b>.</p>
Transaction Amount	Displays the transaction amount.
Unpaid Amount	<p>Displays the unpaid amount of the bill.</p> <p><b>Note:</b> The data appears in this column only when the transaction type is set to <b>Bill</b>.</p>
Payment Date	<p>Displays the date when the payment is created or canceled for the account.</p> <p><b>Note:</b> The data appears in this column only when the transaction type is set to <b>Payment, Payment Cancellation, or Excess Credit (overpayment)</b>.</p>
Tender Type	Indicates the type of tender through which the payment was made.
Check Number/External Reference ID	Displays the check number or external reference ID.
Transaction ID	<p>Displays the payment, adjustment, or reconciliation ID.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Payment, Adjustment, or Reconciliation</b> screen appears where you can view the details of the respective transaction.</p>

You can filter the list using the **On or Before Due Date** field available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (  ) icon in the upper right corner of this zone.

You can change the layout of this zone. For more information on how to change the layout, see [Changing the Layout](#) on page 2882.

## Timeline

The **Timeline** zone displays the following information in a graphical form:

- Number of customer contacts which are created for the account's main customer in a particular month
- Number of bills which are created for the account in a particular month
- Number of payments which are created for the account in a particular month

It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Month	Used to indicate the month till when you want to display the above stated information.  <b>Note:</b> By default, the current month appears in this field.	Yes
Year	Used to indicate the year till when you want to display the above stated information.  <b>Note:</b> By default, the current year appears in this field.	Yes

Depending on the month and year specified in the above fields, the data for the respective month and previous 11 months is presented in the grid. For example, if the Month and Year is set to April 2017, then the data for the May 2016, Jun 2016, Jul 2016, Aug 2016, Sep 2016, Oct 2016, Nov 2016, Dec 2016, Jan 2017, Feb 2017, Mar 2017, and Apr 2017 appears in the grid. To view the data for a different period, you must accordingly change the month and year and then click **Search** () icon.

You can use the **Previous 12 Months** () , **Previous Month** () , **Go To Today** () , **Next Month** () , and **Next 12 Months** () icons to change the values specified in the above mentioned fields.

The following table indicates the data and the manner in which the data is presented in the grid:

Row Name	Row Description										
Customer Contacts	<p>A small icon appears for each customer contact which is created for the account's main customer in the respective month. For example, if two customer contacts are created for the main customer in the month of Jan 2017 and one customer contact is created in the month of Feb 2017, then two icons appear in the Jan 2017 column and one icon appear in the Feb 2017 column. A text indicating the day of the month when the customer contact was created appears on the icon. The following table indicates the color in which the icon appears depending on the condition which is satisfied:</p> <table border="1" data-bbox="467 453 1461 636"> <thead> <tr> <th data-bbox="475 459 964 531">If the contact action on the customer contact type is...</th> <th data-bbox="972 459 1453 531">Then the icon appears in...</th> </tr> </thead> <tbody> <tr> <td data-bbox="475 533 964 583">Set to <b>Send Letter</b></td> <td data-bbox="972 533 1453 583">Red</td> </tr> <tr> <td data-bbox="475 585 964 636">Set to <b>Action Algorithm</b></td> <td data-bbox="972 585 1453 636">Yellow</td> </tr> </tbody> </table> <p>On clicking the icon, the corresponding customer contact information appears at the bottom of this zone. It has a link. On clicking the link, the <b>Customer Contact</b> screen appears where you can view the details of the respective customer contact.</p> <p><b>Note:</b> You can change the color in which the text appears on the icon and the color in which the icon appears when the above stated conditions are met through the <b>C1-TL-CC-EVT</b> algorithm.</p>	If the contact action on the customer contact type is...	Then the icon appears in...	Set to <b>Send Letter</b>	Red	Set to <b>Action Algorithm</b>	Yellow				
If the contact action on the customer contact type is...	Then the icon appears in...										
Set to <b>Send Letter</b>	Red										
Set to <b>Action Algorithm</b>	Yellow										
Bills	<p>A small icon appears for each bill which is created for the account in the respective month. For example, if three bills are created for the account in the month of Jan 2017, two bills are created in the month of Feb 2017, and one bill is created in the month of Apr 2017, then three icons appear in the Jan 2017 column, two icons appear in the Feb 2017 column, and one icon appears in the Apr 2017 column. A text indicating the day of the month when the bill was due appears on the icon. You can either display the day of the due date or bill date on the icon depending on the requirement. The following table indicates the color in which the icon appears depending on the condition which is satisfied:</p> <table border="1" data-bbox="467 1155 1461 1404"> <thead> <tr> <th data-bbox="475 1161 964 1203">If the bill is...</th> <th data-bbox="972 1161 1453 1203">Then the icon appears in...</th> </tr> </thead> <tbody> <tr> <td data-bbox="475 1205 964 1255">Fully Matched</td> <td data-bbox="972 1205 1453 1255">Green</td> </tr> <tr> <td data-bbox="475 1257 964 1308">Unmatched</td> <td data-bbox="972 1257 1453 1308">Red</td> </tr> <tr> <td data-bbox="475 1310 964 1360">Credit Note</td> <td data-bbox="972 1310 1453 1360">Blue</td> </tr> <tr> <td data-bbox="475 1362 964 1404">Scheduled for billing in the next bill cycle</td> <td data-bbox="972 1362 1453 1404">Black</td> </tr> </tbody> </table> <p>On clicking the icon, the corresponding bill information appears at the bottom of this zone. It has a link. On clicking the link, the <b>Bill</b> screen appears where you can view the details of the respective bill.</p> <p><b>Note:</b></p> <p>If you want to display the day of the due date on the icon, you must set the <b>Date To Use (D-Due Date, B-Bill Date)</b> parameter in the <b>C1-TL-OI-EVT</b> algorithm to <b>D</b>. However, if you want to display the day of the bill date on the icon, you must set the <b>Date To Use (D-Due Date, B-Bill Date)</b> parameter in the <b>C1-TL-OI-EVT</b> algorithm to <b>B</b>.</p> <p>You can change the color in which the text appears on the icon and the color in which the icon appears when the above stated conditions are met through the <b>C1-TL-OI-EVT</b> algorithm.</p>	If the bill is...	Then the icon appears in...	Fully Matched	Green	Unmatched	Red	Credit Note	Blue	Scheduled for billing in the next bill cycle	Black
If the bill is...	Then the icon appears in...										
Fully Matched	Green										
Unmatched	Red										
Credit Note	Blue										
Scheduled for billing in the next bill cycle	Black										

Row Name	Row Description												
Payments	<p>A small icon appears for each payment which is created for the account in the respective month. For example, if one payment is created for the account in the month of Aug 2016, three payments are created in the month of Dec 2016, and four payments are created in the month of Mar 2017, then one icon appears in the Aug 2016 column, three icons appear in the Dec 2016 column, and four icons appear in the Mar 2017 column. A text indicating the day of the month when the payment was created appears on the icon. The following table indicates the color in which the icon appears depending on the status of the payment:</p> <table border="1"> <thead> <tr> <th>Status</th> <th>Color</th> </tr> </thead> <tbody> <tr> <td>Frozen</td> <td>Green</td> </tr> <tr> <td>Canceled</td> <td>Red</td> </tr> <tr> <td>Freezable</td> <td>Blue</td> </tr> <tr> <td>Error</td> <td>Red</td> </tr> <tr> <td>Incomplete</td> <td>Yellow</td> </tr> </tbody> </table> <p>On clicking the icon, the corresponding payment information appears at the bottom of this zone. It has a link. On clicking the link, the <b>Payment</b> screen appears where you can view the details of the respective payment.</p> <p><b>Note:</b> You can change the color in which the text appears on the icon and the color in which the icon appears in the different status through the <b>C1-TL-PY-EVT</b> algorithm.</p>	Status	Color	Frozen	Green	Canceled	Red	Freezable	Blue	Error	Red	Incomplete	Yellow
Status	Color												
Frozen	Green												
Canceled	Red												
Freezable	Blue												
Error	Red												
Incomplete	Yellow												

## Customer 360° Information - Policy

The following table provides information about the **Policy** tab:

If you are viewing the 360° information of...	Then...
A parent customer who is associated with the self-funded policy	<p>The <b>Policy</b> tab displays the following:</p> <ul style="list-style-type: none"> <li>List of self-funded policies to which the parent customer's bill groups are associated.</li> </ul> <p><b>Note:</b> The system lists only those policies of the bill groups where the parent customer is associated as a policy holder.</p> <ul style="list-style-type: none"> <li>Basic details and policy persons of a self-funded policy where the parent customer is the policy holder.</li> </ul>
A parent customer who is associated with the fully-insured group policy	<p>The <b>Policy</b> tab displays the following:</p> <ul style="list-style-type: none"> <li>List of fully-insured group policies to which the parent customer or its bill groups are associated.</li> </ul> <p><b>Note:</b> The system lists only those policies of the bill groups where the parent customer is associated as a policy holder.</p> <ul style="list-style-type: none"> <li>Basic details, policy persons, and policy plans of a fully-insured group policy to which the parent customer or its bill group is associated.</li> </ul>

If you are viewing the 360° information of...	Then...
A bill group who is associated with the self-funded policy	The <b>Policy</b> tab displays the following: <ul style="list-style-type: none"> <li>List of self-funded policies to which the bill group is associated.</li> <li>Basic details and policy persons of a self-funded policy.</li> </ul>
A bill group who is associated with the fully-insured group policy	The <b>Policy</b> tab displays the following: <ul style="list-style-type: none"> <li>List of fully-insured group policies to which the bill group is associated.</li> <li>Basic details, policy persons, and policy plans of a fully-insured group policy.</li> </ul>
A person whose person type is neither <b>Parent Customer</b> nor <b>Bill Group</b>	The <b>Policy</b> tab displays the following: <ul style="list-style-type: none"> <li>List of self-funded or fully-insured group policies to which the person is associated.</li> <li>Basic details, policy persons, and policy plans of a self-funded or fully-insured group policy.</li> </ul>

It contains the following zones:

- [Policy List](#) on page 226

**Note:** The **Policy List** zone appears when there is more than one policy associated with the person.

- [Policy Information](#) on page 227
- [Policy Persons](#) on page 228
- [Policy Plans](#) on page 228

**Note:** The **Policy Plans** zone appears when you are viewing the 360° information of a person who is associated with the fully-insured group policy.

How to view the 360° information of a policy	<a href="#">Viewing the 360° Information of a Policy</a> on page 191

### Policy List

If you are viewing 360° information of a parent customer, the **Policy List** zone lists the policies to which the parent customer and its bill groups are associated. Note that the system lists the policies of all effective child persons whose person type is set to **Bill Group** and who are related to the parent customer using a relationship type which is specified in the **Person Relationship Type** option type of the **C1-ASOBLNG** feature configuration.

**Note:** The system lists only those policies of the bill groups where the parent customer is associated as a policy holder.

If you are viewing 360° information of a bill group, the **Policy List** zone lists the policies to which the bill group is associated. If you are viewing 360° information of a person who is neither a parent customer nor a bill group, the **Policy List** zone lists the policies to which the person is associated. This zone appears when there is more than one policy associated with the person. It contains the following columns:

Column Name	Column Description
Policy Number	Displays the policy number.
Policy Information	Displays information about the policy. <b>Note:</b> It has a link. On clicking the link, the <b>Policy</b> screen appears where you can view the details of the respective policy.
Policy Type	Indicates the type of the policy.
Status	Indicates the status of the policy.
Start Date	Displays the date from when the policy is effective.
End Date	Displays the date till when the policy is effective.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

On clicking the **Broadcast**  icon corresponding to a policy, the following zones appear in the **Policy** tab:

- Policy Information
- Policy Persons
- Policy Plans

You can filter the list using various search criteria (such as, **Policy Number**, **Start Date**, **Policy Type**, **End Date**, and **Status**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters**  icon in the upper right corner of this zone.

#### Related Topics

#### **Policy Information**

The **Policy Information** zone displays the details of the policy. It contains the following sections:

- **Main** – Displays the basic information about the policy. It contains the following fields:

Field Name	Field Description
Policy Information	Displays information about the policy. <b>Note:</b> It has a link. On clicking the link, the <b>Policy</b> screen appears where you can view the details of the respective policy.
Source System	Displays the name of the external system in which the policy is created.
Policy Number	Displays the policy number.
Status	Indicates the status of the policy.
Start Date	Displays the date from when the policy is effective.
End Date	Displays the date till when the policy is effective.

Field Name	Field Description
Runout End Date	Displays the date when the runout period of the policy ends.  <b>Note:</b> This field appears only when you are viewing the 360° information of a person who is associated with a self-funded policy.
Runout Administration Fees	Indicates whether the administration fees must be charged when the claim transaction for the policy is processed in the runout period. The valid values are: <ul style="list-style-type: none"> <li>• None</li> <li>• Percentage of Claim</li> </ul> <b>Note:</b> This field appears only when you are viewing the 360° information of a person who is associated with a self-funded policy. At present, this field is used only for the information purposes and is not considered during the billable charge creation for the claim transactions which are received in the runout period of the policy.

- **Characteristics** – Lists the characteristics defined for the policy. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the characteristic is effective for the policy.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

### Policy Persons

The **Policy Persons** zone lists the persons associated with the policy. It contains the following columns:

Column Name	Column Description
Person Name	Indicates the person who is associated with the policy.
Policy Person Role	Indicates the role of the person with respect to the policy.
Start Date	Displays the date from when the person is associated with the policy.
End Date	Displays the date till when the person is associated with the policy.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can view the 360° information of a policy person by clicking the **View** () icon corresponding to the person in the **Policy Persons** zone.

### Policy Plans

The **Policy Plans** zone lists the plans defined in the policy. It appears when you are viewing the 360° information of a person who is associated with the fully-insured group policy. It contains the following columns:

Column Name	Column Description
Policy Plan Information	Displays information about the policy plan. In addition, this column has a context menu which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Policy Plan</b> screen appears where you can view the details of the respective policy plan.
Start Date	Displays the date from when the policy plan is effective.
End Date	Displays the date till when the policy plan is effective.
Plan	Indicates the price item associated with the policy plan.
Policy Plan Description	Displays the description of the price item.
No. of Subscribers	Indicates the number of main subscribers in the policy plan.
No. of Members	Indicates the number of members in the policy plan.

**Note:**

Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can view the pricing rules defined for a policy plan by clicking the **View** () icon corresponding to the policy plan in the **Policy Plans** zone.

You can filter the list using various search criteria (such as, **Plan Start Date** and **Plan End Date**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** () icon in the upper right corner of this zone.

## Customer 360° Information - Pricing

The following table provides information about the **Pricing** tab:

If you are viewing the 360° information of...	Then...
A parent customer who is associated with the self-funded policy	<p>The <b>Pricing</b> tab displays the following:</p> <ul style="list-style-type: none"> <li>• Basic details of the pricing rules which are defined for the parent customer.</li> <li>• Summarized tree view listing each bill group of the parent customer and the bill groups' self-funded policies and pricing rules.</li> <li>• Basic details of the self-funded policies which are associated with each bill group of the parent customer.</li> <li>• Basic details of the pricing rules which are defined for the self-funded policies of each bill group.</li> <li>• Basic details of the active pricing groups which are defined for each bill group.</li> <li>• Basic information about the approval transactions which are created while defining, editing, and deleting the parent customer's and bill groups' pricing rules.</li> </ul>

If you are viewing the 360° information of...	Then...
A bill group who is associated with the self-funded policy	<p>The <b>Pricing</b> tab displays the following:</p> <ul style="list-style-type: none"> <li>• Summarized tree view listing the parent customer and pricing rules which are defined for the parent customer.</li> <li>• Basic details of the self-funded policies which are associated with the bill group.</li> <li>• Basic details of the pricing rules which are defined for the self-funded policies of the bill group.</li> <li>• Basic details of the active pricing groups which are defined for the bill group.</li> <li>• Basic information about the approval transactions which are created while defining, editing, and deleting the pricing rules of the bill group.</li> </ul>
A parent customer who is associated with the fully-insured group policy	<p>The <b>Pricing</b> tab displays the following:</p> <ul style="list-style-type: none"> <li>• Summarized tree view listing the fully-insured group policies of the parent customer and its bill group along with their respective policy plans and pricing rules.</li> <li>• Basic policy plan details of the fully-insured group policy to which the parent customer or its bill group is associated.</li> <li>• Basic details of the pricing rules which are defined for the fully-insured group policy plans.</li> <li>• Basic information about the approval transactions which are created while defining, editing, and deleting a pricing rule of a policy plan.</li> </ul>
A bill group who is associated with the fully-insured group policy	<p>The <b>Pricing</b> tab displays the following:</p> <ul style="list-style-type: none"> <li>• Summarized tree view listing the fully-insured group policies of the bill group along with their respective policy plans and pricing rules.</li> <li>• Basic policy plan details of the fully-insured group policy to which the bill group is associated.</li> <li>• Basic details of the pricing rules which are defined for the fully-insured group policy plans.</li> <li>• Basic information about the approval transactions which are created while defining, editing, and deleting a pricing rule of a policy plan.</li> </ul>
A person whose person type is neither <b>Parent Customer</b> nor <b>Bill Group</b>	No data appears in the <b>Pricing</b> tab.

It contains the following zones:

- [Parent Customer Pricing Rules](#) on page 231

**Note:** The **Parent Customer Pricing Rules** zone appears when you are viewing 360° information of a parent customer who is associated with the self-funded or fully-insured group policy.

### Bill Group ASO Policy Information

The **Bill Group ASO Policy Information** zone appears when you are viewing 360° information of a parent customer or bill group who is associated with the self-funded policy. If you are viewing the 360° information of a parent customer, the **Bill Group ASO Policy Information** zone lists the policies to which each bill group of the parent customer is associated. However, if you are viewing the 360° information of a bill group, the **Bill Group ASO Policy Information** zone lists the policies to which the bill group is associated. It contains the following columns:

Column Name	Column Description
Bill Group Information	Indicates the bill group to which the policy is associated.  <b>Note:</b> It has a link. On clicking the link, the <b>Person</b> screen appears where you can view the details of the respective bill group (i.e. person).
Policy Information	Displays information about the policy.  <b>Note:</b> It has a link. On clicking the link, the <b>Policy</b> screen appears where you can view the details of the respective policy.
Renew	On clicking the <b>Renew</b> (  ) icon, the <b>Policy</b> screen appears where you can renew the policy.  <b>Note:</b> The <b>Renew</b> icon appears only when the policy is in the <b>In Force/Active</b> status and it is not yet renewed.

Column Name	Column Description
Policy Number	Displays the policy number.
Start Date	Displays the date from when the policy is effective.
End Date	Displays the date till when the policy is effective.
Status	Indicates the status of the policy. The valid values are: <ul style="list-style-type: none"> <li>• Pending</li> <li>• In Force/Active</li> <li>• Runout</li> <li>• Post Runout</li> </ul>
Runout End Date	Displays the date when the runout period of the policy ends.
Renewal Date	Displays the date when the policy is renewed.  <b>Note:</b> The data appears in this column only when the policy is renewed.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

On clicking the **Broadcast**  icon corresponding to a bill group and policy combination, the **Bill Group ASO Policy Pricing Rules** and **Bill Group Pricing Groups** zones appear.

You can filter the list using various search criteria (such as, **Bill Group Name**, **Policy Start Date**, and **Policy End Date**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters**  icon in the upper right corner of this zone.

### Bill Group Pricing Groups

The **Bill Group Pricing Groups** zone lists the pricing groups which are defined for the bill group. By default, the active pricing groups are listed in this zone. It appears when you are viewing 360° information of a bill group who is associated with the self-funded policy. It contains the following columns:

Column Name	Column Description
Pricing Group	Indicates the pricing group which is created for the bill group.
Status	Indicates the status of the pricing group. The valid values are: <ul style="list-style-type: none"> <li>Active</li> <li>Inactive</li> </ul>
Edit	On clicking the <b>Edit</b> (  ) icon, the <b>Pricing Group</b> screen appears where you can edit the details of the pricing group.
Delete	On clicking the <b>Delete</b> (  ) icon, you can delete the pricing group. <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> You can delete a pricing group only when it is not yet used while defining a pricing rule for the bill group.</p> </div>
Duplicate	On clicking the <b>Duplicate</b> (  ) icon, the <b>Pricing Group</b> screen appears where you can define a new pricing group using an existing pricing group.
Associated Price Items	Indicates the price items whose pricing is defined using the pricing group.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

By default, the **Bill Group Pricing Groups** zone does not appear in the **Pricing** tab of the **Customer 360° Information** screen. It appears only when you click the **Broadcast** () icon corresponding to a bill group in the **Bill Group Policy Information** zone.

You can define a new pricing group for the bill group by clicking the **Add** link in the upper right corner of this zone.

You can filter the list using the **Show All** field available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** () icon in the upper right corner of this zone.

**Note:** If you select the **Yes** option from the **Show All** list, the system lists both the active and inactive pricing groups in the **Bill Group Pricing Groups** zone.

You can change the layout of this zone. For more information on how to change the layout, see [Changing the Layout](#) on page 2882.

### **Pricing Rule Approval Transactions**

The **Pricing Rule Approval Transactions** zone lists the following information:

<b>If you are viewing the 360° information of...</b>	<b>Then...</b>
A parent customer who is associated with the self-funded policy	The <b>Pricing Rule Approval Transactions</b> zone lists the approval transactions which are created while defining, editing, and deleting the parent customer's and bill groups' pricing rules.
A bill group who is associated with the self-funded policy	The <b>Pricing Rule Approval Transactions</b> zone lists the approval transactions which are created while defining, editing, and deleting the pricing rules of the bill group.
A parent customer who is associated with the fully-insured group policy	The <b>Pricing Rule Approval Transactions</b> zone lists the approval transactions which are created while defining, editing, and deleting the parent customer and its bill groups' policy plans' pricing rules.
A bill group who is associated with the fully-insured group policy	The <b>Pricing Rule Approval Transactions</b> zone lists the approval transactions which are created while defining, editing, and deleting the bill group's policy plans' pricing rules.

It contains the following columns:

<b>Column Name</b>	<b>Column Description</b>
Submitted On	Displays the date and time when the approval transaction is created by the submitter.
Approval Transaction ID	Displays the approval transaction ID.  <b>Note:</b> It has a link. On clicking the link, the <b>Comparison: New versus Existing</b> screen appears where you can review and accordingly approve, reject, or revert the changes.
Pricing Level	Indicates whether the approval transaction is created for a pricing rule which is defined at the parent customer or bill group level. The valid values are: <ul style="list-style-type: none"> <li>• Parent Customer</li> <li>• Bill Group</li> </ul>
Person Name	Indicates the person for whom the pricing rule is created.
Pricing Rule Type	Indicates the pricing rule type using which the pricing rule is created.

Column Name	Column Description
Price Item Information	Indicates the price item for which the pricing rule is created.  <b>Note:</b> It has a link. On clicking the link, the <b>Price Item</b> screen appears where you can view the details of the respective price item.
Start Date	Displays the date from when the pricing rule is effective.
End Date	Displays the date till when the pricing rule is effective.
Approval Status	Indicates the status of the approval transaction. The valid values are: <ul style="list-style-type: none"> <li>• Approved</li> <li>• Cancelled</li> <li>• Deleted</li> <li>• Inprocess</li> <li>• Pending</li> <li>• Rejected</li> </ul>
Action	Indicates the type of action performed by the submitter on the pricing rule. The valid values are: <ul style="list-style-type: none"> <li>• Add</li> <li>• Update</li> <li>• Delete</li> </ul>
Submitted By	Indicates the user who has performed the action on the pricing rule.
Assigned To	Indicates the user to whom the approval transaction is manually assigned for review.
Approved/Rejected By	Indicates the user who has approved or rejected the approval transaction.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can filter the list using various search criteria (such as, **Status**, **Assigned To**, and **Price Item**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters**  icon in the upper right corner of this zone.

### Policy Plan Pricing Rule Summary

The **Policy Plan Pricing Rule Summary** zone lists the following in a tree view:

- Information string of each fully-insured policy where the parent customer is associated
- Information string of each plan defined on the fully-insured policy of the parent customer
- Information string of each fully-insured policy of an effective child person whose person type is set to **Bill Group** and who is related to the parent customer using a relationship type which is specified in the **Person Relationship Type** option type of the **C1-ASOBLNG** feature configuration
- Information string of each plan defined on the fully-insured policy of the bill group
- Information string of each pricing rule defined on the policy plan

It appears when you are viewing 360° information of a parent customer who is associated with the fully-insured policy. It contains the following column:

Column Name	Column Description
Hierarchy	Displays information about the policy, policy plan, and pricing rule in a tree view.

### Policy Plan Information

The **Policy Plan Information** zone appears when you are viewing 360° information of a parent customer or bill group who is associated with the fully-insured policy. If you are viewing the 360° information of a parent customer, the **Policy Plan Information** zone lists the policy plans of the fully-insured policies to which the parent customer and its bill groups are associated. However, if you are viewing the 360° information of a bill group, the **Bill Group ASO Policy Information** zone lists the policy plans of the fully-insured policies to which the bill group is associated. It contains the following columns:

Column Name	Column Description
Policy Plan Information	Displays information about the policy plan. In addition, this column has a context menu which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Policy Plan</b> screen appears where you can view the details of the respective policy plan.
Policy Number	Displays the policy number.
Policy Type	Indicates the type of the policy.
Plan Name	Indicates the price item associated with the policy plan.
Start Date	Displays the date from when the policy plan is effective.
End Date	Displays the date till when the policy plan is effective.
No. of Subscribers	Indicates the number of main subscribers in the policy plan.
No. of Members	Indicates the number of members in the policy plan.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

On clicking the **Broadcast**  icon corresponding to a policy plan, the **Policy Plan Pricing Rules** zone appears where you can view the pricing rules defined for the policy plan.

You can filter the list using various search criteria (such as, **Policy Type**, **Plan Start Date**, and **Plan End Date**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters**  icon in the upper right corner of this zone.

## Policy Plan Pricing Rules

The **Policy Plan Pricing Rules** zone lists the pricing rules which are defined for a fully-insured policy plan. It appears when you are viewing 360° information of a parent customer or bill group who is associated with the fully-insured policy. It contains the following columns:

Column Name	Column Description
Pricing Rule Type	Indicates the pricing rule type using which the pricing rule is created.  <b>Note:</b> It has a link. On clicking the link, the <b>Pricing Rule Type</b> screen appears where you can view the details of the respective pricing rule type.
Pricing Rule Information	Displays information about the pricing rule.  <b>Note:</b> It has a link. On clicking the link, the <b>Pricing Rule</b> screen appears where you can view the details of the respective pricing rule.
Price Item Information	Indicates the price item for which the pricing rule is created.  <b>Note:</b> It has a link. On clicking the link, the <b>Price Item</b> screen appears where you can view the details of the respective price item.
Start Date	Displays the date from when the pricing rule is effective.
End Date	Displays the date till when the pricing rule is effective.
Price List Information	Indicates the price list which contains the price item pricing which is created through the pricing rule.  <b>Note:</b> It has a link. On clicking the link, the <b>Price List</b> screen appears where you can view the details of the respective price list.

### Note:

Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can define and edit a pricing rule for a policy plan through a healthcare inbound message and not from the user interface.

By default, the **Policy Plan Pricing Rules** zone does not appear in the **Pricing** tab of the **Customer 360° Information** screen. It appears only when you click the **Broadcast**  icon corresponding to a policy plan in the **Policy Plan Information** zone.

You can filter the list using various search criteria (such as, **Price Item**, **Start Date**, **Pricing Rule Type**, **End Date**, and **Status**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters**  icon in the upper right corner of this zone.

You can change the layout of this zone. For more information on how to change the layout, see [Changing the Layout](#) on page 2882.

## Defining a Sort ID for a Bill Group

### Prerequisites

To define a sort ID for a bill group, you should have:

- Effective child persons whose person type is set to **Bill Group** and who are related to the parent customer using a relationship type which is specified in the **Person Relationship Type** option type of the **C1-ASOBLNG** feature configuration

### Procedure

To define a sort ID for a bill group:

- Search for a person whose person type is set to **Parent Customer** in the **Customer 360° View** screen.
- In the **Search Results** section, click the **View** () icon corresponding to the person whose details you want to view.

The **Person** tab appears in the **Customer 360° Information** screen.

- Expand the **Bill Group Sorting** zone.

**Note:** The **Bill Group Sorting** zone appears when you are viewing the 360° information of a person whose person type is set to **Parent Customer**.

- Click the **Add** link in the upper right corner of the **Bill Group Sorting** zone.

The **Bill Group Sorting** screen appears. It contains the following field:

Field Name	Field Description
Parent Customer	Indicates the parent customer whose bill groups' sort IDs you want to define.

In addition, it contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Bill Group Information	Used to indicate the bill group for whom you want to define the sort ID.  <b>Note:</b> The values appear in this list only when there are effective child persons whose person type is set to <b>Bill Group</b> and who are related to the parent customer using a relationship type which is specified in the <b>Person Relationship Type</b> parameter of the <b>C1-ASOBLNG</b> feature configuration.	Yes
Description	Used to specify the description for the sort ID.	Yes
Sort ID	Used to specify the sort ID.	Yes
Start Date	Used to specify the date from when the sort ID is effective for the bill group.  <b>Note:</b> The start date cannot be later than the end date.	Yes

Field Name	Field Description	Mandatory (Yes or No)
End Date	Used to specify the date till when the sort ID is effective for the bill group.  <b>Note:</b> The end date cannot be earlier than the start date.	No

- Enter the required details in the grid.
- If you want to define more than one sort ID for a bill group, click the **Add** (  ) icon and then repeat step 5.

**Note:** However, if you want to remove a sort ID of a bill group, click the **Delete** (  ) icon corresponding to the bill group and sort ID combination.

- Click **Save**.

A sort ID is defined for the bill group.

## Editing a Sort ID of a Bill Group

### Procedure

To edit a sort ID of a bill group:

- Search for a person whose person type is set to **Parent Customer** in the **Customer 360° View** screen.
- In the **Search Results** section, click the **View** (  ) icon corresponding to the person whose details you want to view.

The **Person** tab appears in the **Customer 360° Information** screen.

- Expand the **Bill Group Sorting** zone.

**Note:** The **Bill Group Sorting** zone appears when you are viewing the 360° information of a person whose person type is set to **Parent Customer**.

- In the **Bill Group Sorting** zone, select the check box corresponding to the bill group and sort ID combination whose details you want to edit.

**Note:** If you want to edit all sort IDs of effective bill groups, you need to select the check box corresponding to the column header. In such case, the system considers only those records which are present on the respective page for editing.

- Click **Edit**.

The **Bill Group Sorting** screen appears. It contains the following field:

Field Name	Field Description
Parent Customer	Indicates the parent customer whose bill groups' sort IDs you want to edit.

In addition, it contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Bill Group Information	Indicates the bill group whose sort ID you want to edit.	Not applicable
Description	Used to specify the description for the sort ID.	Yes
Sort ID	Displays the sort ID.	Not applicable
Start Date	Used to specify the date from when the sort ID is effective for the bill group.  <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> The start date cannot be later than the end date. The start date cannot be later than the effective date specified in the derivation and pricing parameters which are defined for the bill group and sort ID combination.</p> </div>	Yes
End Date	Used to specify the date till when the sort ID is effective for the bill group.  <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> The end date cannot be earlier than the start date. The end date cannot be earlier than the effective date specified in the derivation and pricing parameters which are defined for the bill group and sort ID combination.</p> </div>	No

6. Modify the details of a bill group's sort ID, if required.
7. Click **Save**.

The changes made to the bill group's sort ID are saved.

## Deleting a Sort ID of a Bill Group

### **Procedure**

To delete a sort ID of a bill group:

1. Search for a person whose person type is set to **Parent Customer** in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **View** () icon corresponding to the person whose details you want to view.

The **Person** tab appears in the **Customer 360° Information** screen.

3. Expand the **Bill Group Sorting** zone.

**Note:** The **Bill Group Sorting** zone appears when you are viewing the 360° information of a person whose person type is set to **Parent Customer**.

4. In the **Bill Group Sorting** zone, select the check box corresponding to the bill group and sort ID combination that you want to delete.

**Note:** If you want to delete all sort IDs of effective bill groups, you need to select the check box corresponding to the column header. In such case, the system considers only those records which are present on the respective page for deleting.

5. Click **Delete**.

A message appears confirming whether you want to delete the bill group's sort ID.

**Note:** You can delete a bill group's sort ID only when the derivation and pricing parameters are not yet defined for the bill group and sort ID combination.

6. Click **OK**.

The bill group's sort ID is deleted.

## **Creating a Bill Group Sorting Upload Request**

### **Procedure**

To create a bill group sorting upload request:

1. Search for a person whose person type is set to **Parent Customer** in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **View** () icon corresponding to the person whose details you want to view.

The **Person** tab appears in the **Customer 360° Information** screen.

3. Expand the **Bill Group Sorting** zone.

**Note:** The **Bill Group Sorting** zone appears when you are viewing the 360° information of a person whose person type is set to **Parent Customer**.

4. Click the **Upload** link in the upper right corner of the **Bill Group Sorting** zone.

The **Select Upload Request Type** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Upload Request Type	Used to indicate the upload request type using which you want to create the upload request.  <b>Note:</b> The list includes only those upload request types where the upload request business object with the <b>Upload Type</b> option type set to <b>BG</b> is selected.	Yes

**Note:** The **Select Upload Request Type** screen appears only when there are multiple upload request types where the upload request business object with the **Upload Type** option type set to **BG** is selected. If there is only one such upload request type defined in the application, the **Bill Group Sorting Upload Request** screen appears.

5. Select the required upload request type from the respective field.
6. Click **OK**.

The **Bill Group Sorting Upload Request** screen appears. It contains the following sections:

- **Main** – Used to specify basic details about the upload request.
- **Characteristics** – Used to define characteristics for the upload request.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Upload Request Type	Indicates the upload request type using which the bill group sorting upload request will be created.	Not applicable
Parent Customer	Used to indicate the person for whom you want to create the bill group sorting upload request.  <b>Note:</b> By default, the parent customer's ID appears in this field. You can change the person, if required.  The system allows you to create a bill group sorting upload request for a person whose person type is set to <b>Parent Customer</b> .  The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Person Search</b> window appears.	Yes

Field Name	Field Description	Mandatory (Yes or No)
File Name	Used to specify the name and path of the file that you want to upload.  <b>Note:</b> You can also click the <b>Browse</b> button corresponding to this field to browse to the location where the file is available in the system.	Yes
Replace Existing File	Used to indicate whether you want to replace any existing file in the system. You must select this check box when you want to upload the same file once again.	No
Comments	Used to specify additional information about the upload request.	No

- Click the **Browse** button corresponding to the **File Name** field.

The **Choose File to Upload** dialog box appears.

- Browse to the location where the file that you want to upload is available in the system.

- Click **Open**.

The file name along with the path appears in the **File Name** field.

- Select the **Replace Existing File** check box depending on whether you want to upload the same file once again in the system.

- Define characteristics for the upload request, if required.

- Click **Save**.

A message appears indicating the number of records which are successfully uploaded. Then, a bill group sorting upload request is created in the **Draft** status. If the bill group ID is available in the record, the status of the record is set to **Pending**. However, if the system could not derive the bill group ID using the bill group identifier type and bill group identifier combination when the bill group ID is not specified in the record, the status of the record is set to **Invalid**.

## Defining the Derivation and Pricing Parameters for a Bill Group and Sort ID Combination

### Prerequisites

To define the derivation and pricing parameters for a bill group and sort ID combination, you should have:

- Effective child persons whose person type is set to **Bill Group** and who are related to the parent customer using a relationship type which is specified in the **Person Relationship Type** option type of the **C1-ASOBLNG** feature configuration
- Sort ID defined for the bill group
- Values defined for the **C1-SourceSystemLookup** extendable lookup

### Procedure

To define the derivation and pricing parameters for a bill group and sort ID combination:

1. Search for a person whose person type is set to **Parent Customer** in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **View** () icon corresponding to the person whose details you want to view.

The **Person** tab appears in the **Customer 360° Information** screen.

3. Expand the **Bill Group Derivation and Pricing Parameters** zone.

**Note:** The **Bill Group Derivation and Pricing Parameters** zone appears when you are viewing the 360° information of a person whose person type is set to **Parent Customer**.

4. Click the **Add** link in the upper right corner of the **Bill Group Derivation and Pricing Parameters** zone.

The **Bill Group Derivation and Pricing Parameters** screen appears. It contains the following field:

Field Name	Field Description
Parent Customer	Indicates the parent customer whose bill groups' derivation and pricing parameters you want to define.

In addition, it contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Source System	Used to indicate the source system from where the claim and enrollment transactions are received.	Yes
Parameter 1	Used to specify the employee attribute based on which you want to derive the bill group. <b>Note:</b> You must not specify the ampersand (&) character in this field.	Yes
Parameter 2	Used to specify the employee attribute based on which you want to derive the bill group. <b>Note:</b> You must not specify the ampersand (&) character in this field.	No
Parameter 3	Used to specify the employee attribute based on which you want to derive the bill group. <b>Note:</b> You must not specify the ampersand (&) character in this field.	No

Field Name	Field Description	Mandatory (Yes or No)
Parameter 4	Used to specify the employee attribute based on which you want to derive the bill group.  <b>Note:</b> You must not specify the ampersand (&) character in this field.	No
Effective Date	Used to specify the date from when the derivation and pricing parameters are effective for the bill group and sort ID combination.  <b>Note:</b> The effective date must be within the date range of the sort ID defined for the bill group.	Yes
Status	Indicates the status of the derivation and pricing parameters for the bill group and sort ID combination. The valid values are:  <ul style="list-style-type: none"> <li>Active</li> <li>Inactive</li> </ul> <b>Note:</b> By default, the value is set to <b>Active</b> .	Not applicable
Bill Group Information	Used to indicate the bill group for whom you want to define the derivation and pricing parameters.  <b>Note:</b> The values appear in this list only when there are effective child persons whose person type is set to <b>Bill Group</b> and who are related to the parent customer using a relationship type which is specified in the <b>Person Relationship Type</b> parameter of the <b>C1-ASOBLNG</b> feature configuration.	Yes
Sort ID	Used to indicate the sort ID of the bill group for which you want to define the derivation and pricing parameters.  <b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Sort ID Search</b> window appears.	Yes

- Enter the required details in the grid.
- If you want to define the derivation and pricing parameters for more than one bill group and sort ID combination, click the **Add** (📄+) icon and then repeat step 5.

**Note:** However, if you want to remove the derivation and pricing parameters of a bill group and sort ID combination, click the **Delete** (🗑️) icon corresponding to the bill group and sort ID combination.

- Click **Save**.

The derivation and pricing parameters are defined for the bill group and sort ID combination.

## Editing the Derivation and Pricing Parameters of a Bill Group and Sort ID Combination

### Procedure

To edit the derivation and pricing parameters of a bill group and sort ID combination:

1. Search for a person whose person type is set to **Parent Customer** in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **View** () icon corresponding to the person whose details you want to view.

The **Person** tab appears in the **Customer 360° Information** screen.

3. Expand the **Bill Group Derivation and Pricing Parameters** zone.

**Note:** The **Bill Group Derivation and Pricing Parameters** zone appears when you are viewing the 360° information of a person whose person type is set to **Parent Customer**.

4. In the **Bill Group Derivation and Pricing Parameters** zone, select the check box corresponding to the bill group and sort ID combination whose details you want to edit.

**Note:** If you want to edit the derivation and pricing parameters of all bill group and sort ID combinations, you need to select the check box corresponding to the column header. In such case, the system considers only those records which are present on the respective page for editing.

5. Click **Edit**.

The **Bill Group Derivation and Pricing Parameters** screen appears. It contains the following field:

Field Name	Field Description
Parent Customer	Indicates the parent customer whose bill groups' derivation and pricing parameters you want to edit.

In addition, it contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Source System	Indicates the source system from where the claim and enrollment transactions are received.	Not applicable
Parameter 1	Indicates the employee attribute based on which you want to derive the bill group.	Not applicable
Parameter 2	Indicates the employee attribute based on which you want to derive the bill group.	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
Parameter 3	Indicates the employee attribute based on which you want to derive the bill group.	Not applicable
Parameter 4	Indicates the employee attribute based on which you want to derive the bill group.	Not applicable
Effective Date	Displays the date from when the derivation and pricing parameters are effective for the bill group and sort ID combination.	Not applicable
Status	Used to indicate the status of the derivation and pricing parameters for the bill group and sort ID combination. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>	Yes
Bill Group Information	Indicates the bill group for whom the derivation and pricing parameters are defined.	Not applicable
Sort ID	Indicates the sort ID of the bill group for which the derivation and pricing parameters are defined.	Not applicable

- If required, you can inactivate the derivation and pricing parameters of a bill group and sort ID combination.
- Click **Save**.

The changes made to the derivation and pricing parameters of a bill group and sort ID combination are saved.

## **Creating a Bill Group Derivation and Pricing Parameters Upload Request**

### **Procedure**

To create a bill group derivation and pricing parameters upload request:

- Search for a person whose person type is set to **Parent Customer** in the **Customer 360° View** screen.
- In the **Search Results** section, click the **View** () icon corresponding to the person whose details you want to view.

The **Person** tab appears in the **Customer 360° Information** screen.

- Expand the **Bill Group Derivation and Pricing Parameters** zone.

**Note:** The **Bill Group Derivation and Pricing Parameters** zone appears when you are viewing the 360° information of a person whose person type is set to **Parent Customer**.

- Click the **Upload** link in the upper right corner of the **Bill Group Derivation and Pricing Parameters** zone.

The **Select Upload Request Type** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Upload Request Type	Used to indicate the upload request type using which you want to create the upload request.  <b>Note:</b> The list includes only those upload request types where the upload request business object with the <b>Upload Type</b> option type set to <b>BL</b> is selected.	Yes

**Note:** The **Select Upload Request Type** screen appears only when there are multiple upload request types where the upload request business object with the **Upload Type** option type set to **BL** is selected. If there is only one such upload request type defined in the application, the **Bill Group Derivation and Pricing Parameters Upload Request** screen appears.

5. Select the required upload request type from the respective field.
6. Click **OK**.

The **Bill Group Derivation and Pricing Parameters Upload Request** screen appears. It contains the following sections:

- **Main** – Used to specify basic details about the upload request.
- **Characteristics** – Used to define characteristics for the upload request.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Upload Request Type	Indicates the upload request type using which the bill group derivation and pricing parameters upload request will be created.	Not applicable
Parent Customer	Used to indicate the person for whom you want to create the bill group derivation and pricing parameters upload request.  <b>Note:</b> By default, the parent customer's ID appears in this field. You can change the person, if required.  The system allows you to create a bill group derivation and pricing parameters upload request for a person whose person type is set to <b>Parent Customer</b> .  The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Person Search</b> window appears.	Yes

Field Name	Field Description	Mandatory (Yes or No)
File Name	Used to specify the name and path of the file that you want to upload.  <b>Note:</b> You can also click the <b>Browse</b> button corresponding to this field to browse to the location where the file is available in the system.	Yes
Replace Existing File	Used to indicate whether you want to replace any existing file in the system. You must select this check box when you want to upload the same file once again.	No
Comments	Used to specify additional information about the upload request.	No

- Click the **Browse** button corresponding to the **File Name** field.

The **Choose File to Upload** dialog box appears.

- Browse to the location where the file that you want to upload is available in the system.

- Click **Open**.

The file name along with the path appears in the **File Name** field.

- Select the **Replace Existing File** check box depending on whether you want to upload the same file once again in the system.

- Define characteristics for the upload request, if required.

- Click **Save**.

A message appears indicating the number of records which are successfully uploaded. Then, a bill group derivation and pricing parameters upload request is created in the **Draft** status. If the bill group ID is available in the record, the status of the record is set to **Pending**. However, if the system could not derive the bill group ID using the bill group identifier type and bill group identifier combination when the bill group ID is not specified in the record, the status of the record is set to **Invalid**.

## Renewing a Self-Funded Policy of a Bill Group

Oracle Revenue Management and Billing enables you to renew a self-funded policy which is associated with a bill group. However, note that you can renew a self-funded policy only when it is in the **In Force/Active** status and is not yet renewed. For more information, see [Self-Funded Policy Renewal](#) on page 2041.

### Procedure

To renew a self-funded policy of a bill group:

1. Search for the bill group who is associated with the self-funded policy (which you want to renew) in the **Customer 360° View** screen.

2. In the **Search Results** section, click the **View** () icon corresponding to the bill group whose details you want to view.

The **Person** tab appears in the **Customer 360° Information** screen.

3. Click the **Pricing** tab.

The **Pricing** tab appears.

4. In the **Bill Group ASO Policy Information** zone, click the **Renew** () icon in the **Renew** column corresponding to the self-funded policy which you want to renew.

The **Policy** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the renewed policy.
- **Persons** - Used to associate or disassociate persons from the renewed policy.

**Note:** You cannot disassociate persons who are associated with the base policy using a policy person role which is specified in the **Bill Group Policy Person Role** or **Parent Customer Policy Person Role** option type of the **C1-ASOBLNG** feature configuration.

- **Characteristics** - Used to define characteristics for the renewed policy.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Base Policy Information	Indicates the policy which you want to renew.	Not applicable
Policy Type	Indicates the policy type using which the base policy is created.	Not applicable
Policy Number	Used to specify the policy number of the renewed policy.	Yes
Description	Used to specify the description for the renewed policy.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Start Date	<p>Used to specify the date from when the renewed policy is effective.</p> <div data-bbox="537 289 1182 632" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>By default, the start date is set to the base policy's end date plus one day. For example, if the base policy's end date is 12-31-2018, then by default, the renewed policy's start date is set to 01-01-2019.</p> <p>The start date cannot be later than the end date.</p> <p>The start date cannot be earlier than or equal to the base policy's end date.</p> </div>	Yes
End Date	<p>Used to specify the date till when the renewed policy is effective.</p> <div data-bbox="537 737 1182 789" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> The end date cannot be earlier than the start date.</p> </div>	Yes
Runout End Date	<p>Used to specify the date when the runout period of the renewed policy ends.</p> <div data-bbox="537 898 1182 978" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> The runout end date cannot be earlier than or equal to the renewed policy's end date.</p> </div>	No
Runout Administration Fees	<p>Used to indicate whether the administration fees must be charged when the claim transaction for the policy is processed in the runout period. The valid values are:</p> <ul style="list-style-type: none"> <li>• None</li> <li>• Percentage of Claim</li> </ul> <div data-bbox="537 1220 1182 1360" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> At present, this field is used only for the informational purposes and is not considered during the billable charge creation for the claim transactions which are received in the runout period of the policy.</p> </div>	No

Field Name	Field Description	Mandatory (Yes or No)
Copy Pricing Rules	<p>Used to indicate whether you want to copy the pricing rules of the base policy to the renewed policy. If you select the <b>Copy Pricing Rules</b> option, the system copies the following pricing rules of the base policy:</p> <ul style="list-style-type: none"> <li>• Claim</li> <li>• Retention Type Claim Based</li> <li>• Retention Type Enrollment Based</li> <li>• Recurring Flat Fees</li> <li>• Ancillary</li> </ul> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b></p> <p>While copying a pricing rule, the start and end dates of the new pricing rule are set to the renewed policy's start and end dates, respectively.</p> <p>If there are multiple pricing rules which are created using the same pricing rule type and are effective for the different date range, the system copies only one pricing rule from the base policy with the latest date range.</p> </div>	No

**Note:** The **Renew** icon appears only when the policy is in the **In Force/Active** status and it is not yet renewed.

5. Enter the required details in the **Main** section.
6. Associate or disassociate persons from the renewed policy, if required.
7. Define, edit, or remove characteristics from the renewed policy, if required.
8. Click **Save**.

The renewed policy is created in the **Pending** status. The renewal date is stamped corresponding to the base policy in the **Bill Group ASO Policy Information** zone.

## Viewing the Bill Details

### Procedure

To view the details of a bill:

1. Search for the account, whose bill details you want to view, in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **View** () icon corresponding to the account whose details you want to view.

The **Account** tab appears in the **Customer 360° Information** screen.

3. In the **Open Bills** zone, click the **View** () icon corresponding to the bill whose details you want to view.

The **Bill Information** screen appears. It contains the following zones:

- [Bill Information](#) on page 265
  - [Adjustments](#) on page 265
  - [Settlement Activities](#) on page 265
  - [Bill Segment Summary](#) on page 266
  - [Bill Segment Details](#) on page 266
  - [Hold Details](#) on page 267
  - [Offset Details](#) on page 268
  - [Refund and Write Off Details](#) on page 268
4. View the basic details about the bill in the **Bill Information** zone.
  5. View the adjustments which are swept onto the bill in the **Adjustments** zone.
  6. View the activities, such as payment, transfer, offset, refund, or write off through which the bill is settled, in the **Settlement Activities** zone.
  7. View the bill segment information which is summarized based on the coverage period and plan/fee type combination in the **Bill Segment Summary** zone.
  8. View the details of the bill segments which are included in the bill in the **Bill Segment Details** zone.
  9. View the active hold requests due to which the bill is kept on hold in the **Hold Details** zone.
  10. View the offset requests through which the bill is offset against another bill in the **Offset Details** zone.
  11. View the refund and write off requests through which the bill or its bill segment is either refunded or written off in the **Refund and Write Off Details** zone.

## Viewing the Pricing Rules Defined for a Policy Plan

### Procedure

To view the pricing rules defined for a policy plan:

1. Search for a person who is associated with a fully-insured policy in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **View** () icon corresponding to the person whose details you want to view.  
The **Person** tab appears in the **Customer 360° Information** screen.
3. Click the **Pricing** tab.  
The **Pricing** tab appears.
4. In the **Policy Plan Information** zone, click the **Broadcast** () icon corresponding to a policy plan whose details you want to view.  
The **Policy Plan Pricing Rules** zone appears.
5. View the pricing rules which are defined for the policy plan in the **Policy Plan Pricing Rules** zone.

**Tip:** Alternatively, you can access the **Policy Plan Pricing Rules** zone by clicking the **View** () icon corresponding to a policy plan in the **Policy Plans** zone of the **Policy** tab.

## Bill Information

The **Bill Information** screen allows you to view:

- Basic details of the bill
- Adjustments which are swept onto the bill
- Activities, such as payment, offset, refund, write off, or transfer through which the bill is settled
- High-level summary and details of the bill segments which are included in the bill
- Active hold requests due to which the bill is kept on hold
- Offset requests through which the bill is offset against another bill
- Refund and write off requests through which the bill or its bill segment is either refunded or written off

It contains the following zones:

- [Bill Information](#) on page 265
- [Adjustments](#) on page 265
- [Settlement Activities](#) on page 265
- [Bill Segment Summary](#) on page 266
- [Bill Segment Details](#) on page 266
- [Hold Details](#) on page 267

- [Offset Details](#) on page 268
- [Refund and Write Off Details](#) on page 268

## Bill Information

The **Bill Information** zone displays the details of the bill. It contains the following section:

- **Main** - Displays the basic information about the bill. It contains the following fields:

Field Name	Field Description
Bill Information	<p>Displays information about the bill. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Bill</b> screen appears where you can view the details of the respective bill.</p>
Alternate Bill ID	<p>Displays the alternate bill ID.</p> <p><b>Note:</b> This field appears only when the respective data is available for the bill.</p>
Account Information	<p>Indicates the account for which the bill is generated. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account.</p>

## Adjustments

The **Adjustments** zone lists the adjustments which are swept onto the bill. It contains the following columns:

Column Name	Column Description
Adjustment Information	<p>Displays information about the adjustment.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Adjustment</b> screen appears where you can view the details of the respective adjustment.</p>
Contract Information	<p>Indicates the contract against which the adjustment is created. In addition, this column has a context menu which helps in navigating to other screens in the application.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Contract</b> screen appears where you can view the details of the respective contract.</p>

## Settlement Activities

You may settle a bill or its bill segment by making a payment, offsetting, refunding, writing off, or by reconciling against pay instructions. The **Settlement Activities** zone lists the activities related to the bill or its bill segment settlement. It contains the following columns:

Column Name	Column Description
Activity Date	Displays the date when the settlement activity was performed in the system.

Column Name	Column Description
Activity Type	Indicates the type of the settlement activity. The valid values are: <ul style="list-style-type: none"> <li>• Payment</li> <li>• Offset</li> <li>• Refund</li> <li>• Write Off</li> <li>• Transfer</li> </ul>
Amount	Indicates the amount settled through the activity.
Related Object Information	Displays additional information about the settlement activity.
Related Object ID	Indicates the payment, offset request, refund request, write off request, or reconciliation adjustment which is created during settlement. <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> It has a link. On clicking the link, the <b>Payment, Offset Request, Refund Request, Write Off Request, or Adjustment</b> screen appears where you can view the details of the respective activity.</p> </div>

## Bill Segment Summary

The system groups the bill segments with the same date range and plan/fee type combination and then provides the summarized information for each combination in the **Bill Segment Summary** zone. It contains the following columns:

Column Name	Column Description
Start Date	Displays the start date of the bill segment.
End Date	Displays the end date of the bill segment.
Policy Number	Indicates the policy for which the bill segment is generated.
Plan/Fee Type	Indicates the plan code or fee type for which the bill segment is generated.
Amount	Displays the bill segment amount.
Unpaid Amount	Displays the unpaid amount of the bill segment.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

## Bill Segment Details

The **Bill Segment Details** zone displays the details of the bill segments which are included in the bill. It contains the following columns:

Column Name	Column Description
Start Date	Displays the start date of the bill segment.
End Date	Displays the end date of the bill segment.
Policy Number	Indicates the policy for which the bill segment is generated.
Plan/Fee Type	Indicates the plan code or fee type for which the bill segment is generated.
External Membership ID	Indicates the membership in which the member is included.

Column Name	Column Description
Member Primary ID	Displays the concatenated string consisting of primary identifier type and primary identifier of the member which are separated by a colon (:).
Member Name	Indicates the member for whom the bill segment is generated.
Coverage Tier	Indicates the coverage tier to which the membership belongs. The valid values are: <ul style="list-style-type: none"> <li>CHILDREN ONLY</li> <li>EMPLOYEE &amp; CHILD(REN)</li> </ul> <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"> <b>Note:</b> The data appears in this column only when the <b>Coverage Tier (C1CVTIER)</b> characteristic type is defined for the membership. </div>
Status	Indicates the eligibility status of the member. The valid values are: <ul style="list-style-type: none"> <li>Active</li> <li>Cobra</li> <li>Retiree</li> <li>Terminated</li> </ul> <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"> <b>Note:</b> The data appears in this column only when the <b>Eligibility Status Type (C1ELGSTA)</b> characteristic type is defined for the member. </div>
Amount	Displays the bill segment amount.
Unpaid Amount	Displays the unpaid amount of the bill segment.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

On clicking the **View** () icon corresponding to a bill segment, the **Bill Segment** screen appears where you can view the additional details of the respective bill segment.

You can filter the list using various search criteria (such as, **Start Date** and **End Date**) available in the **Filter** area.

By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** () icon in the upper right corner of this zone.

## Hold Details

The **Hold Details** zone lists the active hold requests due to which the bill is kept on hold. It contains the following columns:

Column Name	Column Description
Hold Request Information	Displays information about the hold request. <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"> <b>Note:</b> It has a link. On clicking the link, the <b>Hold Request</b> screen appears where you can view the details of the respective hold request. </div>
Status	Indicates the status of the hold request.

Column Name	Column Description
Entity	Indicates the type of the entity. The valid values are: <ul style="list-style-type: none"> <li>• Person</li> <li>• Account</li> <li>• Bill</li> </ul>
Entity Information	Indicates the entity for which the hold request is created. In addition, this column has a context menu which helps in navigating to other screens in the application. <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> It has a link. On clicking the link, the <b>Person, Account, or Bill</b> screen appears where you can view the details of the respective entity.</p> </div>
Start Date	Displays the date from when the entity is kept on hold.
End Date	Displays the date till when the entity is kept on hold.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

## Offset Details

The **Offset Details** zone lists the offset requests through which the bill is offset against another bill. It contains the following columns:

Column Name	Column Description
Offset Request Information	Displays information about the offset request. <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> It has a link. On clicking the link, the <b>Offset Request</b> screen appears where you can view the details of the respective offset request.</p> </div>
Offset Amount	Indicates the bill amount which is offset against another bill.
Creation Mode	Indicates the mode in which the offset request is created. The valid values are: <ul style="list-style-type: none"> <li>• Automatic</li> <li>• Manual</li> </ul>

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

## Refund and Write Off Details

The **Refund and Write Off Details** zone lists the refund and write off requests through which the bill or its bill segment is either refunded or written off. It contains the following columns:

Column Name	Column Description
Create Date/Time	Displays the date and time when the refund or write off request is created.

Column Name	Column Description
Refund/Write Off Request Information	Displays information about the refund or write off request.  <b>Note:</b> It has a link. On clicking the link, the <b>Refund Request</b> or <b>Write Off Request</b> screen appears depending on whether the request is created for refund or write off.
Refund/Write Off Amount	Displays the total refund or write off amount.
Status	Indicates the status of the refund or write off request. The valid values are: <ul style="list-style-type: none"> <li>• Approval In Progress</li> <li>• Cancelled</li> <li>• Deferred Processing</li> <li>• Draft</li> <li>• Processed</li> <li>• Rejected</li> <li>• Voided</li> </ul>
Action	Indicates whether the request is created for refund or write off. The valid values are: <ul style="list-style-type: none"> <li>• Refund</li> <li>• Write Off</li> </ul>
Account Information	Indicates the account for which the refund or write off request is created. In addition, this column has a context menu which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account.
Created By	Indicates the user who has created the refund or write off request.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can filter the list using the **Action** field available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (  ) icon in the upper right corner of this zone.

Oracle Revenue Management and Billing allows you to define prices for price item and services offered to the customers. These prices are either standard prices defined in the price lists or override prices that are specific to a customer or an account. The system allows you to define prices at various levels in a customer hierarchy (for example, at the account level, main customer level, or at the parent customer level). You can also define prices in the account's price list, main customer's price list, parent customer's price list, price list's parent price list. As prices can be defined at multiple places, the order in which the system searches for effective price item pricing will affect the price charged to the customer. The search order is configurable, and can vary with each division. You need to define the search order in the price assignment search algorithm (which is also known as crawling algorithm) and then attach the algorithm to the division. You can change the search order at any time.

You need to define the price assignment search algorithm using the C1\_PRASN algorithm type. The price assignment search algorithm is used while:

- Listing effective price item pricing for an account or a customer
- Fetching effective price item pricing while creating recurring and non-recurring bill segments
- Fetching effective post processing pricing while creating post processing bill segments
- Fetching effective price item pricing in the **Price Item Pricing Verification (C1-TXNVP)** batch

For more information about the price assignment search algorithm, see [Price Assignment Search Mechanism](#) on page 277.

Since a global customer is not associated to any division, the system cannot determine the price assignment search order for a global customer. Hence, the default search order is defined for global customers through the **C1\_PRASNORDR** feature configuration. You can change this default search order, if required.

The prices that are specific to a customer or an account are referred to as customer agreed or account agreed prices, respectively. You can override these agreed prices. Customer agreed or account agreed prices are effective for a particular duration and do not expire until you manually specify the end date. However, if you set the **Expire Override Switch** option type of the **C1\_EXP\_OVRD** feature configuration to **Y**, the system will automatically expire an agreed pricing when the agreed pricing of a customer or an account without end date is overridden. If you do not want an agreed pricing to automatically expire when it is overridden, you must set the **Expire Override Switch** option type of the **C1\_EXP\_OVRD** feature configuration to **N**.

The system allows you to define the following types of pricing:

- Flat Pricing
- Tiered Pricing

For more information about the types of pricing, see [Types of Pricing](#) on page 273.

The price for a price item or service may differ depending upon various transaction, customer or account attributes. Oracle Revenue Management and Billing provides a facility to define pricing for a price item based on multiple parameters. This multi parameter based pricing feature enables the price analyst to define price item and its parameters which influence pricing. You can then define pricing for the price item based on these parameters. Bundles are offered to customers to provide discounted rates. You can also define pricing for bundles based on multiple parameters. To enable the multi parameter based pricing feature, you must set the **Multi Price Parameter** option type of the **Multi Parameter Based Pricing (C1\_PPARM\_FLG)** feature configuration to **True**. For more information about the multi parameter based pricing feature, see [Multi Parameter Based Pricing](#) on page 273.

## Types of Pricing

The system allows you to define the following types of pricing:

- **Flat Pricing** — Used when you want to charge a fixed price per unit to the customer.
- **Tiered Pricing** — Used when standard flat pricing is not sufficient to meet the business needs. Through tiered pricing, you can offer more favorable pricing to the customers based on service quantity utilization. For example, CG Limited uses wire transfer services provided by a large bank. If CG Limited initiates up to 1,000 wire transfers, the fee charged by the bank will be \$5 per transfer. If CG Limited initiates more than 1,000 wire transfers, the fee will be \$3 per transfer. To introduce this flexibility in the pricing model, the following tiered pricing is defined:

Quantity Range	Rate (\$) per transfer
0 – 1000	5
1000+	3

You can define two types of tiered pricing:

- **Step Tiered Pricing** — The rate of the first tiering range is used to calculate the charge for the maximum quantity in the range, and for incremental service quantity utilization, the rate of the progressive tiering range is used. This happens till the utilized quantity is exhausted. For example, when you define the following step tiered pricing for Price Item A and the user consumes 60,000 units of the same, the system will charge the first 45,000 units at \$2 per unit and the remaining 15,000 units at \$1 per unit:

Quantity Range	Rate (\$) per unit
0 – 45000	2
45000+	1

- **Threshold Tiered Pricing** — The rate of the tiering range within which the service quantity utilization falls is used to calculate the charge for the entire volume. For example, when you define the following threshold tiered pricing for Price Item A and the user consumes 75,000 units of the same, the system will charge 75,000 units at \$1 per unit as the service quantity utilization falls within 45000+ tiering range:

Quantity Range	Rate (\$) per unit
0 – 45000	2
45000+	1

## Multi Parameter Based Pricing

Oracle Revenue Management and Billing provides a facility to define pricing for a price item based on multiple parameters. You can also define pricing for bundles based on multiple parameters. You can enable or disable the multi parameter based pricing feature by setting the **Multi Parameter Based Pricing (C1\_PPARM\_FLG)** feature configuration. For more information, see [Setting the C1\\_PPARM\\_FLG Feature Configuration](#) on page 2922.

If the multi parameter based pricing feature is disabled, you can define pricing for a price item based on the variance parameter. If the multi parameter based pricing feature is enabled, you can define pricing for a price item based on multiple parameters. For example:

Price Item A	Country	Currency
Pricing 1	US	USD

Price Item A	Country	Currency
Pricing 2	Germany	USD

Pricing 1 and Pricing 2 are defined for Price Item A based on two parameters — Country and Currency. Before you define pricing based on country and currency, you need to define these parameters in the system. Once you define these parameters, you need to associate them to the price item (i.e. Price item A).

Then, when you define Pricing 1 for Price item A, you need to set the following price item parameters:

- Country — US
- Currency — USD

Similarly, you need to define Pricing 2 with Country set to Germany and Currency set to USD.

The following table lists the tiering ranges defined in Pricing 1 where price item parameters are set to US, USD:

Tier Sequence	Rate	Tiering Criteria	Price Item	Price Parameters	Item	From	To
10	2	Number of Transactions	Price Item A	US, USD		0	5000
20	1	Number of Transactions	Price Item A	US, USD		5000	

The following table lists the tiering ranges defined in Pricing 2 where price item parameters are set to Germany, USD:

Tier Sequence	Rate	Tiering Criteria	Price Item	Price Parameters	Item	From	To
10	4	Number of Transactions	Price Item A	Germany, USD		0	1000
20	3	Number of Transactions	Price Item A	Germany, USD		1000	

Now, when the user performs 1500 transactions (in USD) of Price Item A in Germany, 12000 transactions (in USD) of Price Item A in US, the system creates two billable charges. In one billable charge (with Price Item A, US and USD combination), the system uses \$1 as the rate for calculating charges, and in another billable charge (with Price Item A, Germany and USD combination), the system uses \$3 as the rate for calculating charges.

Note that in this case the parameters based on which you have defined pricing and tiering ranges are same. You can use different parameters while defining pricing and tiering ranges, if required. You can also use another price item or bundle and its parameters while defining tiering ranges. For example:

The following table lists the tiering ranges of Pricing 1 defined for Price Item A where price item parameters are set to US, USD:

Tier Sequence	Rate	Tiering Criteria	Price Item	Price Parameters	Item	From	To
10	2	Number of Transactions	Price Item B	Germany, USD		0	100
20	1	Number of Transactions	Price Item B	Germany, USD		100	200
30	0.5	Number of Transactions	Price Item B	Germany, USD		200	

Now, when the user performs 1500 transactions (in USD) of Price Item A in US, 200 transactions (in USD) of Price Item B in Germany, the system creates one billable charge. The system adds the transactions with the following combinations and then determines the range of Price Item A within which the total units (i.e. 200) fall:

- Price Item B, Germany, USD

In this case, the total units fall in the 100 – 200 range of Price Item A, and therefore the system uses \$1 as the rate for calculating charges (i.e.  $1500 * 1 = 1500$ ).

Some parameters might be mandatory and some might be optional while defining price item pricing. You can define price item pricing based on these parameters at various levels, such as:

- Account Agreed
- Account Price List
- Account Inherited Price List
- Customer Agreed
- Customer Price List
- Customer Inherited Price List
- Parent Customer Agreed
- Parent Customer Price List
- Parent Customer Inherited Price List
- Default Price List
- Global Price List

As prices can be defined at multiple levels, the system first searches for exact match at all levels (using the search order). If the system finds the exact match at multiple levels, the price assignment at the higher precedence level is considered. Let us understand this with the help of an example.

Pricing 1 is defined for Price Item A with the following parameters at the Account Agreed level:

Parameter	Mandatory (Yes or No)	Priority	Value
Type	Yes	—	BT
Country	No	1	US
Currency	No	2	USD

Pricing 2 is defined for Price Item A with the following parameters at the Parent Customer Agreed level:

Parameter	Mandatory (Yes or No)	Priority	Value
Type	Yes	—	BT
Country	No	1	US
Currency	No	2	USD

Pricing 3 is defined for Price Item A with the following parameters at the Account Price List level:

Parameter	Mandatory (Yes or No)	Priority	Value
Type	Yes	—	BT
Country	No	1	US
Currency	No	2	—

Now, when the user performs transactions (with the type set to BT in US) of Price Item A in USD, the system searches for price with exact match (Type — BT, Country — US, and Currency — USD). The exact match is available at two levels — Account Agreed and Parent Customer Agreed. The system considers the price at the Account Agreed level because this level has higher precedence.

Depending on the search order defined for the division (to which the account belongs), the level with higher precedence changes. Accordingly, the price assignment at the higher precedence level is considered for calculating the charges.

If the system does not find the exact match at any level, it searches for the best fit match at all levels. Let us understand how the best fit match is determined with the help of an example.

Pricing 1 is defined for Price Item A with the following parameters:

Parameter	Mandatory (Yes or No)	Priority	Value
Type	Yes	—	BT
Country	No	1	US
Currency	No	2	-

Pricing 2 is defined for Price Item A with the following parameters:

Parameter	Mandatory (Yes or No)	Priority	Value
Type	Yes	—	BT
Country	No	1	-
Currency	No	2	USD

Pricing 3 is defined for Price Item A with the following parameters:

Parameter	Mandatory (Yes or No)	Priority	Value
Type	Yes	—	BT
Country	No	1	-
Currency	No	2	-

Pricing 4 is defined for Price Item A with the following parameters:

Parameter	Mandatory (Yes or No)	Priority	Value
Type	Yes	—	BT
Country	No	1	US
Currency	No	2	GBP

The system has Pricing 1, Pricing 2, Pricing 3, and Pricing 4 defined for Price Item A. Now, when the user performs transactions (with the type set to BT in US) of Price Item A in USD, the system does not find price with exact match (Type — BT, Country — US, and Currency — USD). Therefore, it searches for the best fit match.

While searching for the best fit match, the system rules out the optional parameter with lowest priority (i.e. Currency) and checks whether the price (with Type — BT and Country — US) is available. If the price is available, the system considers the price as the best fit match. Therefore, in this case, Pricing 1 is considered as the best fit match.

Suppose, if the price (with Type — BT and Country — US) is not available, then the system rules out the optional parameter with next lowest priority (i.e. Country) and checks whether the price (with Type — BT and Currency — USD) is available. If the price is available, the system considers the price as the best fit match. In this case, Pricing 2 would be considered as the best fit match. If the system finds the best fit match with same weight at multiple levels, the price assignment at the higher precedence level is considered.

## Price Assignment Search Mechanism

The price assignment search algorithm searches effective price item pricing based on the following parameters:

- **Search Order** — Used to indicate the order in which the system must search effective price item pricing at various levels in the customer hierarchy. This is a mandatory parameter. The valid values are:

If you select the following value...	Then the effective price item pricing is searched at the following levels in the specified order...
AGREED_PRICELIST	<ol style="list-style-type: none"> <li>1. <b>Account Agreed</b> — Means price item pricing is agreed for the account in the hierarchy.</li> <li>2. <b>Account Price List</b> — Means price item pricing is defined within the price list which is assigned to the account.</li> <li>3. <b>Account Inherited Price List</b> — Means price item pricing is inherited from the hierarchy defined for the price list which is assigned to the account.</li> <li>4. <b>Customer Agreed</b> — Means price item pricing is agreed for the customer in the hierarchy.</li> <li>5. <b>Customer Price List</b> — Means price item pricing is defined within the price list which is assigned to the customer.</li> <li>6. <b>Customer Inherited Price List</b> — Means price item pricing is inherited from the hierarchy defined for the price list which is assigned to the customer.</li> <li>7. <b>Parent Customer Agreed</b> — Means price item pricing is agreed for the parent customer in the hierarchy.</li> <li>8. <b>Parent Customer Price List</b> — Means price item pricing is defined within the price list which is assigned to the parent customer.</li> <li>9. <b>Parent Customer Inherited Price List</b> — Means price item pricing is inherited from the hierarchy defined for the price list which is assigned to the parent customer.</li> </ol>

If you select the following value...	Then the effective price item pricing is searched at the following levels in the specified order...
AGREED_FIRST	<ol style="list-style-type: none"> <li>1. <b>Account Agreed</b> — Means price item pricing is agreed for the account in the hierarchy.</li> <li>2. <b>Customer Agreed</b> — Means price item pricing is agreed for the customer in the hierarchy.</li> <li>3. <b>Parent Customer Agreed</b> — Means price item pricing is agreed for the parent customer in the hierarchy.</li> <li>4. <b>Account Price List</b> — Means price item pricing is defined within the price list which is assigned to the account.</li> <li>5. <b>Account Inherited Price List</b> — Means price item pricing is inherited from the hierarchy defined for the price list which is assigned to the account.</li> <li>6. <b>Customer Price List</b> — Means price item pricing is defined within the price list which is assigned to the customer.</li> <li>7. <b>Customer Inherited Price List</b> — Means price item pricing is inherited from the hierarchy defined for the price list which is assigned to the customer.</li> <li>8. <b>Parent Customer Price List</b> — Means price item pricing is defined within the price list which is assigned to the parent customer.</li> <li>9. <b>Parent Customer Inherited Price List</b> — Means price item pricing is inherited from the hierarchy defined for the price list which is assigned to the parent customer.</li> </ol>

**Note:** In these price assignment search orders, the account agreed level has highest precedence and parent customer inherited price list level has lowest precedence.

- **Default Price List ID** — Used to indicate the default price list. If the effective price item pricing is not available at any level in the customer hierarchy, the system checks whether the default price list is specified in the price assignment search algorithm. If the default price list is specified in the algorithm, the system checks whether effective price item pricing is available in the default price list.
- **Global Price List** — Used to indicate whether the system should consider the price item pricing defined in the global price list. If the effective price item pricing is not available in the default price list or if the default price list is not specified in the price assignment search algorithm, the system checks whether it should consider the price item pricing defined in the global price list. The valid values are:

- Y
- N

Finally, if the effective price item pricing is not available in either default and/or global price list, an error message occurs indicating that the effective price item pricing is not available in the system.

- **Prefer Price Item Over Bundle** — Used to indicate whether to prefer price item, regular bundle, or parent bundle pricing when the price item, regular bundle (to which the price item belongs), and parent (regular) bundle (i.e. to which the regular bundle belongs) are assigned at the same level. The valid values are:

- Y
- N

If the value of the **Prefer Price Item Over Bundle** parameter is set to **Y**, the system first searches whether effective pricing is available for the price item. If the effective pricing is not available for the price item, then the system searches whether effective pricing is available for the regular bundle at the same level. If the effective pricing is not available for the regular bundle, then the system searches whether effective pricing is available for the parent bundle at the same level. However, if the value of the **Prefer Price Item Over Bundle** parameter is set to **N**, the system first searches whether effective pricing is available for the parent bundle. If the effective pricing is not available for the parent bundle, then the system searches whether effective pricing is available for the regular bundle at the same level. If the effective pricing is not available for the regular bundle, then the system searches whether effective pricing is available for the price item at the same level.

- **Person Relationship Type Sequence Algorithm** — Used to attach an algorithm which is defined using the C1-CUSRLALGT algorithm type. The attached algorithm is used while searching effective price item pricing at the parent customer level. It indicates whether the system should search person to person relationship type sequence defined:
  - For the division, price item, and price item parameters combination
  - For the division
  - In the C1\_PER\_REL feature configuration

Person to Person Relationship Type Sequence	<a href="#">Person Relationship Type Sequence</a> on page 279

## Person Relationship Type Sequence

When the price assignment search algorithm searches effective price item pricing at the parent customer level, the system determines the parent customer's person to person relationship type whose price item pricing should be considered. The person to person relationship type sequence indicates the order in which relationship type should be considered while searching for effective price item pricing at the parent customer level. For example, if a customer has two parents – Parent 1 with the relationship type set to “Subsidiary” and Parent 2 with the relationship type set to “Franchise Owner”, and the following person to person relationship type sequence is defined in the system:

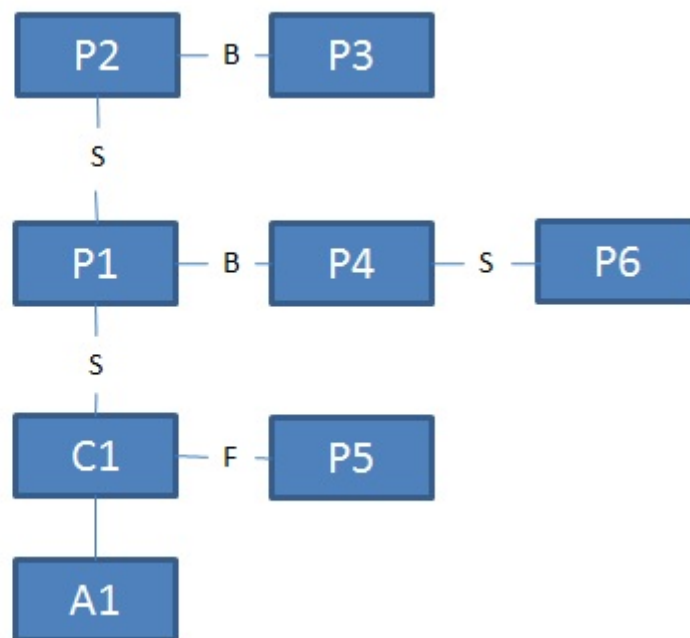

When the price assignment search algorithm searches effective price item pricing at the parent customer level, the system determines the parent customer's person to person relationship type whose price item pricing should be considered. The person to person relationship type sequence indicates the order in which relationship type should be considered while searching for effective price item pricing at the parent customer level. For example, if a customer has two parents – Parent 1 with the relationship type set to “Subsidiary” and Parent 2 with the relationship type set to “Franchise Owner”, and the following person to person relationship type sequence is defined in the system:

Sequence Number	Relationship Type
10	Subsidiary
20	Franchise Owner

In the above example, the system will inherit effective price item pricing (if available) from Parent 1 or within its hierarchy. If the effective price item pricing is not available in the Parent 1 hierarchy, the system will inherit effective price item pricing (if available) from Parent 2 or within its hierarchy. If the effective price item pricing is not available in the Parent 2 hierarchy, an error message occurs indicating that the effective price item pricing is not available.

While searching effective pricing at the parent customer level based on the person to person relationship type sequence, the system will use the depth first search mechanism. Let us understand this with the help of an example.

Person To Person Relationship Type Sequence	
Sequence Number	Relationship Type
10	Subsidiary (S)
20	Branch (B)
30	Franchise Owner (F)

In the above example, if the effective pricing is not available at the account or customer level, the system will search effective pricing at the parent customer level in the following order:

- P1 (because the first relationship type in the sequence is Subsidiary)
- P2 (grandparent of P1 irrespective of the relationship type)
- P3 (because the second relationship type in the sequence is Branch)
- P4 (because the second relationship type in the sequence is Branch)
- P6 (grandparent of P4 irrespective of the relationship type)
- P5 (because the third relationship type in the sequence is Franchise Owner)

The system provides you the flexibility to define person to person relationship type sequence:

- For each division, price item, and price item parameters combination
- For each division
- In the C1\_PER\_REL feature configuration

The system will first check whether the person to person relationship type sequence is defined for the division, price item, and price item parameters combination. If the person to person relationship type sequence is defined for the division, price item, and price item parameters combination, the system will search effective price item pricing at the parent customer level based on the sequence defined for the combination. However, if the person to person relationship type sequence is not defined for the division, price item, and price item parameters combination, the system will check whether the person to person relationship type sequence is defined for the division. If the person to person relationship type sequence is defined for the division, the system will search effective price item pricing at the parent customer level based on the sequence defined for the division. However, if the person to person relationship type sequence is not defined for the division, the system will consider the person to person relationship type sequence defined in the C1\_PER\_REL feature configuration and accordingly search the effective price item pricing at the parent customer level.

To enable the system to search person to person relationship type sequence at different levels, you need to create an algorithm of the C1-CUSRLALGT algorithm type and attach it to the **Person Relationship Type Sequence Algorithm** parameter in the price assignment search algorithm. The C1-CUSRLALGT algorithm type has the following parameters:

- **Check on Division, Price Item and Price Item Parameters Combination** - Used to indicate whether you want the system to search person to person relationship type sequence defined for the division, price item, and price item parameters combination. This is a mandatory parameter. The valid values are:

- Y
- N

By default, the value is set to **N**.

- **Check on Division** - Used to indicate whether you want the system to search person to person relationship type sequence defined for the division. This is a mandatory parameter. The valid values are:

- Y
- N

By default, the value is set to **N**.

- **Check on Feature Configuration** – Used to indicate whether you want the system to consider the person to person relationship type sequence defined in the **C1\_PER\_REL** feature configuration. This is a mandatory parameter. The valid values are:

- **A** – Used when you want to consider all person to person relationship types defined in the feature configuration (in the specified sequence).
- **F** – Used when you want to only consider the person to person relationship type defined with the lowest sequence in the feature configuration.
- **N** – Used when you do not want to consider the person to person relationship type sequence defined in the C1\_PER\_REL feature configuration.

By default, the value is set to **F**.

## Pricing Eligibility

Oracle Revenue Management and Billing enables you to define pricing eligibility criteria using the account, person, and product attributes while defining a price item pricing. For example, a bank offers a product named 12 Month Standard Certificate of Deposit (CD). The interest rate charged to a person for this product differs based on two parameters – Deposit Amount and Person Type (Preferred and Non-Preferred). The following table lists the interest rates offered for the 12 Month Standard Certificate of Deposit (CD) product:

Deposit Amount	Non-Preferred	Preferred
Less than \$5,000	0.13%	0.20%
Greater than \$5,000	0.15%	0.22%

Earlier, you were able to define different interest rates based on different parameters using the rate eligibility feature at the rate component level. Considering the above example, you had to define four rate components. The respective rate component would appear while defining price item pricing based on the following:

- The value defined for the **Deposit Amount** characteristic on the account

- The value defined for the **Customer Type** characteristic on the main customer

However, now, you can implement the above scenario using a single rate component instead of maintaining four different rate components. Now, while defining price item pricing, you need to define four different price components for a rate component. For each price component, you need to define the pricing eligibility criteria in the following manner:

Price Component	Rate	Pricing Criteria	Eligibility	If True	If False
P1	0.13%	Deposit Amount > 5000		Check Next Condition	Return False
P1	0.13%	Person Type = Non-Preferred		Return True	Return False
P2	0.15%	Deposit Amount < 5000		Check Next Condition	Return False
P2	0.15%	Person Type = Non-Preferred		Return True	Return False
P3	0.20%	Deposit Amount > 5000		Check Next Condition	Return False
P3	0.20%	Person Type = Preferred		Return True	Return False
P4	0.22%	Deposit Amount < 5000		Check Next Condition	Return False
P4	0.22%	Person Type = Preferred		Return True	Return False

You can define pricing eligibility criteria only when the appropriate parameters are created in the system. These parameters must be mapped to either of the following:

- Account attributes, characteristics, usage amounts, or usage counters
- Person attributes, characteristics, usage amounts, or usage counters
- Product attributes or characteristics
- Service Quantity Identifier
- Custom algorithm which returns the appropriate value

In the above example, you can define the pricing eligibility criteria only when the following parameters are defined in the system:

Parameter	Source Entity	Source Type	Source Type Code	Value Type
Deposit Amount	Account	Usage Amount	Deposit Amount	Adhoc
Customer Type	Person	Characteristic	Person Type	Predefined

You can define pricing eligibility criteria for rate components whose tiering type is set to **Flat**, **Threshold**, or **Step**. Each criterion in the pricing eligibility criteria is executed in the specified sequence. If the value of the pricing eligibility criteria is **True**, the rate of the respective price component is passed to the rate component for further calculations.

## Persisting Interest Rate for Rate Type Price Items

While defining a price item, you can indicate whether the price item is available for pricing and billing or only for pricing. If the price item is available only for pricing, you can indicate the type of the price item. The valid values for the price item type are:

- Rate (i.e. Interest Rate)
- Fees

If the type of a price item is **Rate**, the system calculates and persist the rate for the price item. The rate is persisted only for the price item pricing which is either assigned or inherited by an account. If the account or person attributes are changed, the system allows you to recalculate and persist the interest rate for rate type price items. This process is known as **Repricing**.

Repricing	<a href="#">Repricing</a> on page 283

## Persisting Fee for Fee Type Price Items

While defining a price item, you can indicate whether the price item is available for pricing and billing or only for pricing. If the price item is available only for pricing, you can indicate the type of the price item. The valid values for the price item type are:

- Rate
- Fees

The input elements Pricing Frequency, Advance Pricing should be populated if **Price Item** is available for **Pricing Only**, **Price Item Type** is **Fees** and **Price Assignment Type** is **Post-Processing**.

If the type of a price item is **Fee**, the system calculates and persist the fee for the price item.

**Note:** The **Process Fees Request and Persist Fees for an Account (C1-ACFEE)** batch is used to calculate and persist the fees for the account. It must be executed when a user wants to store fees.

Repricing	<a href="#">Repricing</a> on page 283

## Repricing

If the account or person attributes are changed, the system allows you to recalculate and persist the interest rate for rate type price items. This process is known as **Repricing**. The **Repricing** process is triggered in the following scenarios when:

- You edit the attributes and characteristics of an account.
- You add or delete the usage amount and counter details of an account.
- You edit the attributes and characteristics of a person.
- You add or delete the usage amount and counter details of a person.
- You define or edit the price item pricing of an active price list which is assigned to an account or a person.
- You define, edit, override, or copy the price item pricing of an account or a person.
- You assign a price list to an account or a person, or edit the price list assignment details of an account or a person.

The system behaves in the following manner in the above scenarios:

Scenario	System Behaviour
On editing the attributes and characteristics of an account	<p>The system checks whether the account is eligible for repricing. If the account is eligible for repricing, the system checks whether a parameter for the account attribute or characteristic whichever is changed is already defined in the system. If the required parameters are available in the system, the system creates a repricing request for the account and effective date combination in the <b>CI_REPRC_REQ_DTL</b> table. On executing the <b>Process Repricing Request and Persist Pricing for an Account (C1-REPC2)</b> batch, you can recalculate and persist the rate for the account in the <b>CI_PRCE_CALC</b> table.</p> <p><b>Note:</b> On editing the account attributes, the effective date is set to the date when you edit the account attributes. However, on editing the account's characteristic, the effective date is set to the date from when the characteristic is effective for the account.</p>
On adding or deleting the usage amount and counter details of an account	<p>The system checks whether the account is eligible for repricing. If the account is eligible for repricing, the system checks whether a parameter for the usage amount or counter whichever is changed is already defined in the system. If the required parameters are available in the system, the system creates a repricing request for the account and effective date combination in the <b>CI_REPRC_REQ_DTL</b> table. On executing the <b>Process Repricing Request and Persist Pricing for an Account (C1-REPC2)</b> batch, you can recalculate and persist the rate for the account in the <b>CI_PRCE_CALC</b> table.</p> <p><b>Note:</b> The effective date is set to the date from when the usage amount or counter is effective for the account.</p>
On editing the attributes and characteristics of a person	<p>The system identifies all accounts which belong to the person and its child persons, and then checks whether the identified accounts are eligible for repricing. If one or more accounts are eligible for repricing, the system checks whether a parameter for the person attribute or characteristic whichever is changed is already defined in the system. If the required parameters are available in the system, the system creates a repricing request for the account and effective date combination in the <b>CI_REPRC_REQ_DTL</b> table. On executing the <b>Process Repricing Request and Persist Pricing for an Account (C1-REPC2)</b> batch, you can recalculate and persist the rate for the account in the <b>CI_PRCE_CALC</b> table.</p> <p><b>Note:</b></p> <p>Only accounts where the person and child person are the main customers are considered for repricing.</p> <p>On editing the person attributes, the effective date is set to the date when you edit the person attributes. However, on editing the person's characteristic, the effective date is set to the date from when the characteristic is effective for the person.</p>

Scenario	System Behaviour
<p>On adding or deleting the usage amount and counter details of a person</p>	<p>The system identifies all accounts which belong to the person and its child persons, and then checks whether the identified accounts are eligible for repricing. If one or more accounts are eligible for repricing, the system checks whether a parameter for the usage amount or counter whichever is changed is already defined in the system. If the required parameters are available in the system, the system creates a repricing request for the account and effective date combination in the <b>CI_REPRC_REQ_DTL</b> table. On executing the <b>Process Repricing Request and Persist Pricing for an Account (C1-REPC2)</b> batch, you can recalculate and persist the rate for the account in the <b>CI_PRCE_CALC</b> table.</p> <div data-bbox="605 514 1466 741" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>Only accounts where the person and child person are the main customers are considered for repricing.</p> <p>The effective date is set to the date from when the usage amount or counter is effective for the person.</p> </div>
<p>On assigning a price list to an account or editing the price list assignment details of an account</p>	<p>The system creates a repricing request for the account, price item, and effective date combination in the <b>CI_REPRC_REQ_DTL</b> table. If the price assignment end date and/or price list assignment end date is available, the system creates two repricing requests – one request where the effective date is set to the start date and another request where the effective date is set to the end date. The effective date is set to the price assignment start date or price list assignment start date depending on the following conditions:</p> <ul style="list-style-type: none"> <li>• If the Price Assignment Start Date is later than the Price List Assignment Start Date, then the effective date is set to Price Assignment Start Date.</li> <li>• If the Price Assignment Start Date is earlier than or equal to the Price List Assignment Start Date, then the effective date is set to Price List Assignment Start Date.</li> </ul> <p>However, the effective date is set to the price assignment end date or price list assignment end date depending on the following conditions:</p> <ul style="list-style-type: none"> <li>• If the Price Assignment End Date is earlier than the Price List Assignment End Date, then the effective date is set to Price Assignment End Date + 1 Day.</li> <li>• If the Price Assignment End Date is later than or equal to the Price List Assignment End Date, then the effective date is set to Price List Assignment End Date + 1 Day.</li> </ul> <p>On executing the <b>Process Repricing Request and Persist Pricing for an Account (C1-REPC2)</b> batch, you can recalculate and persist the rate for the account in the <b>CI_PRCE_CALC</b> table.</p> <div data-bbox="605 1612 1466 1692" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> The system creates the repricing request for the account irrespective of whether the account is eligible for repricing or not.</p> </div>

Scenario	System Behaviour
<p>On assigning a price list to a person or editing the price list assignment details of a person</p>	<p>The system identifies all accounts which belong to the person and its child persons, and then creates a repricing request for the account, price item, and effective date combination in the <b>CI_REPRC_REQ_DTL</b> table. If the price assignment end date and/or price list assignment end date is available, the system creates two repricing requests – one request where the effective date is set to the start date and another request where the effective date is set to the end date. The effective date is set to the price assignment start date or price list assignment start date depending on the following conditions:</p> <ul style="list-style-type: none"> <li>• If the Price Assignment Start Date is later than the Price List Assignment Start Date, then the effective date is set to Price Assignment Start Date.</li> <li>• If the Price Assignment Start Date is earlier than or equal to the Price List Assignment Start Date, then the effective date is set to Price List Assignment Start Date.</li> </ul> <p>However, the effective date is set to the price assignment end date or price list assignment end date depending on the following conditions:</p> <ul style="list-style-type: none"> <li>• If the Price Assignment End Date is earlier than the Price List Assignment End Date, then the effective date is set to Price Assignment End Date + 1 Day.</li> <li>• If the Price Assignment End Date is later than or equal to the Price List Assignment End Date, then the effective date is set to Price List Assignment End Date + 1 Day.</li> </ul> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> If the Price List Assignment Start Date and Price List Assignment End Date are earlier than the current date, repricing requests for the accounts are not created in the <b>CI_REPRC_REQ_DTL</b> table.</p> </div> <p>On executing the <b>Process Repricing Request and Persist Pricing for an Account (C1-REPC2)</b> batch, you can recalculate and persist the rate for the account in the <b>CI_PRCE_CALC</b> table.</p> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b></p> <p>Only accounts where the person and child person are the main customers are considered for repricing.</p> <p>The system creates the repricing request for the account irrespective of whether the account is eligible for repricing or not.</p> </div>
<p>On defining, editing, overriding, or copying the price item pricing of an account</p>	<p>The system creates a repricing request for the account, price item, and effective date combination in the <b>CI_REPRC_REQ_DTL</b> table. If the price assignment end date is specified, the system creates two repricing requests – one request where the effective date is set to the price assignment start date and another request where the effective date is set to the price assignment end date + 1 Day. On executing the <b>Process Repricing Request and Persist Pricing for an Account (C1-REPC2)</b> batch, you can recalculate and persist the rate for the account in the <b>CI_PRCE_CALC</b> table.</p> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> The system creates the repricing request for the account irrespective of whether the account is eligible for repricing or not.</p> </div>

Scenario	System Behaviour
On defining, editing, overriding, or copying the price item pricing of a person	<p>The system identifies all accounts which belong to the person and its child persons, and then creates a repricing request for the account, price item, and effective date combination in the <b>CI_REPRC_REQ_DTL</b> table. If the price assignment end date is specified, the system creates two repricing requests – one request where the effective date is set to the price assignment start date and another request where the effective date is set to the price assignment end date + 1 Day. On executing the <b>Process Repricing Request and Persist Pricing for an Account (C1-REPC2)</b> batch, you can recalculate and persist the rate for the account in the <b>CI_PRCE_CALC</b> table.</p> <div data-bbox="605 514 1464 741" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>Only accounts where the person and child person are the main customers are considered for repricing.</p> <p>The system creates the repricing request for the account irrespective of whether the account is eligible for repricing or not.</p> </div>
On defining or editing the price item pricing of an active price list which is assigned to an account or a person	<p>The system creates an entry for the price item pricing in the <b>CI_REPRC_ENTITY_DTL</b> table. On executing the <b>Identify Accounts for Repricing (C1-REPC1)</b> batch, the system identifies the following in the specified order:</p> <ol style="list-style-type: none"> <li>1. Price list on which the price item pricing is assigned</li> <li>2. Account or Person on which the price list is assigned</li> <li>3. All accounts which belong to the person and its child persons when the price list is assigned to a person</li> </ol> <p>Once the accounts are identified, the system checks whether the identified accounts are eligible for repricing. If one or more accounts are eligible for repricing, a repricing request is created for the account, price item, and effective date combination in the <b>CI_REPRC_REQ_DTL</b> table. If the price assignment end date is specified, the system creates two repricing requests – one request where the effective date is set to the price assignment start date and another request where the effective date is set to the price assignment end date + 1 Day. On executing the <b>Process Repricing Request and Persist Pricing for an Account (C1-REPC2)</b> batch, you can recalculate and persist the rate for the account in the <b>CI_PRCE_CALC</b> table.</p> <div data-bbox="605 1465 1464 1549" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> Only accounts where the person and child person are the main customers are considered for repricing.</p> </div>

For more information about the **Identify Accounts for Repricing (C1-REPC1)** and **Process Repricing Request and Persist Pricing for an Account (C1-REPC2)** batches, refer to *Oracle Revenue Management and Billing Batch Guide*.

To enable the repricing feature, you need to do the following:

- Define an algorithm using the **C1-REPRCACCT** algorithm type and attach it to the **Audit** algorithm spot of the **C1-AccountBO** business object
- Define an algorithm using the **C1-REPRCACBC** algorithm type and attach it to the **Audit** algorithm spot of the **C1-ACCBALCNT** business object

- Define an algorithm using the **C1-REPRCPERS** algorithm type and attach it to the **Audit** algorithm spot of the **C1\_PERSON\_BO** business object
- Define an algorithm using the **C1-REPRCPPEBC** algorithm type and attach it to the **Audit** algorithm spot of the **C1-PERBALCNT** business object
- Define an algorithm using the **C1\_PLASGNAUD** algorithm type and attach it to the **Audit** algorithm spot of the **C1\_PLASGNADD** and **C1\_PLASGNEDIT** business objects
- Define an algorithm using the **C1-PRCASGNAD** algorithm type and attach it to the **Audit** algorithm spot of the **C1\_PRICEASGN\_BO** business object
- Define an algorithm using the **C1-REPRCPPLPA** algorithm type and attach it to the **Audit** algorithm spot of the **C1\_PRICEASGN\_BO** business object
- Define the required parameters for the account and person attributes, characteristics, usage amount and usage counter

## Two-Dimensional Pricing

---

Oracle Revenue Management and Billing enables you to define two-dimensional pricing for a price item. In the two-dimensional pricing, you can offer rates based on utilization of two service quantity identifiers (SQIs). For example, the rate for a price item can vary for each customer depending on the number of ATM transactions and current monthly balance as shown below: Current Monthly Balance Number of ATM Transactions 0-25 25-50 50-75 75-100 0-10000 2 1.9 1.8 1.7 10000-50000 1.6 1.5 1.4 1.3 50000-100000 1.2 1.1 1.0 0.9 100000-500000 0.8 0.7 0.6 0.5 The system allows you to define two-dimensional pricing in a grid which has X-axis and Y-axis. Both, the X-axis and Y-axis should contain service quantity identifiers (SQIs). The two-dimensional pricing is composed of threshold and step tiered pricing. The X-axis is a threshold tier and Y-axis is a step tier. On creating two-dimensional pricing, one price component is created for each X-axis and Y-axis combination. The step tier is stored as the tiering range whereas the threshold tier is stored as the eligibility criteria in the price component. Note that the tiering ranges and eligibility criteria are automatically created in the price component. You cannot manually add a tiering range and eligibility criteria in the price component. You can define two-dimensional pricing only when the tiering type of the rate components in the rate schedule is set to STEP. A new field named Pricing Rule Type is added in the Price Item Pricing screen. If you select the Two-Dimensional option from the Pricing Rule Type list, you can define two-dimensional pricing for the price item. However, if you do not select the Two-Dimensional option from the Pricing Rule Type list, you can define traditional flat, step, or tiered pricing for the price item. Besides selecting the Two-Dimensional option from the Pricing Rule Type list, you also need to select the Pricing Eligibility option while defining the two-dimensional pricing for the price item.

## Types of Price Item Bundle

---

The system allows you to define the following types of price item bundle:

- [Regular Bundle](#) on page 288
- [Phantom Bundle](#) on page 292
- [Ratio Bundle](#) on page 290

### Regular Bundle

In case of a regular bundle, pricing is defined at the bundle level. The system determines the rate by identifying the tiering range within which the total service quantities used for all price items in the bundle fall. Note that the rate is determined from the tiering range of the price component whose pricing eligibility criteria is met. Let us understand this with the help of an example.

Bundle X, which is a regular bundle, contains the following three price items:

- Price Item A

- Price Item B
- Price Item C

The following tiered pricing is defined for Bundle X:

Quantity Range	Rate (\$) per unit
1 – 3000	3
3001 – 4000	2
4001 – 8000	1

**Note:** In the above example, the assumption is that there only one rate component, one price component within the rate component, and pricing eligibility criteria is not defined for the price component.

Now, when the user consumes 1500 units of Price Item A, 1000 units of Price Item B, and 2000 units of Price Item C, the system adds the quantities of services used for all price items in Bundle X (i.e. 1500+1000+2000=4500), and then determines the range within which the total units (i.e. 4500) fall. In this case, the total units fall in the 4001 – 8000 range, and therefore the system uses \$1 as the rate for calculating charges.

If the multi parameter based pricing feature is enabled, you can define pricing for regular bundles based on multiple parameters. For example:

Bundle X	Country	Currency
Pricing 1	US	USD
Pricing 2	Germany	USD

Pricing 1 and Pricing 2 are defined for Bundle X based on two parameters — Country and Currency. Before you define pricing based on country and currency, you need to define these parameters in the system. Once you define these parameters, you need to associate them to the regular bundle (i.e. Bundle X) and then add price items (i.e. Price Item A, Price Item B, and Price Item C) to the bundle. Note that you can add a price item to a regular bundle only when the regular bundle and price item have same parameters associated with them for the specified date range. Therefore, before adding Price Item A, Price Item B, and Price Item C to Bundle X, you should ensure that Country and Currency are also associated with these price items.

Then, when you define Pricing 1 for Bundle X, you need to set the following price item parameters:

- Country — US
- Currency — USD

Similarly, you need to define Pricing 2 with Country set to Germany and Currency set to USD.

The following table lists the tiering ranges defined in Pricing 1 where price item parameters are set to US, USD:

Tier Sequence	Rate	Tiering Criteria	Price Item	Price Parameters	Item	From	To
10	2	Number of Transactions	Bundle X	US, USD		0	500
20	1	Number of Transactions	Bundle X	US, USD		500	

The following table lists the tiering ranges defined in Pricing 2 where price item parameters are set to Germany, USD:

Tier Sequence	Rate	Tiering Criteria	Price Item	Price Parameters	Item	From	To
10	4	Number of Transactions	Bundle X	Germany, USD		0	1000
20	3	Number of Transactions	Bundle X	Germany, USD		1000	

Now, when the user performs 500 transactions (in USD) of Bundle X in Germany, 1200 transactions (in USD) of Bundle X in US, the system creates two billable charges. In one billable charge (with Bundle X, US and USD combination), the system uses \$1 as the rate for calculating charges, and in another billable charge (with Bundle X, Germany and USD combination), the system uses \$4 as the rate for calculating charges.

## Ratio Bundle

In case of a ratio bundle, pricing is not defined at the bundle level. Instead, pricing is defined separately for each price item in the bundle.

A ratio expresses the magnitude of quantities relative to each other. It has two factors — Numerator and Denominator. For ratio bundle, the ratio of price item quantities is used to determine the rate for volume based pricing. To determine within which range of ratio limit does the price item utilization falls, the ratio of price item quantities is used. Once the range limits are determined, the rate specified for that range is applied to the quantity of the price item used. Let us understand this with the help of an example.

Bundle X, which is a ratio bundle, contains the following price items:

- **Price Item A** — It has been added to the bundle using the price item relationship type as Numerator. It has the following tiered pricing defined in the system:

Quantity Range	Rate (\$) per unit
0 – 0.6	4
0.6 – 0.9	3
0.9+	2

- **Price Item B** — It has been added to the bundle using the price item relationship type as Numerator. It has the following tiered pricing defined in the system:

Quantity Range	Rate (\$) per unit
0 – 0.6	5
0.6 – 0.9	4
0.9+	3

- **Price Item C** — It has been added to the bundle using the price item relationship type as Denominator. It has the following tiered pricing defined in the system:

Quantity Range	Rate (\$) per unit
0 – 0.6	3
0.6 – 0.9	2
0.9+	1

Now, when the user consumes 500 units of Price Item A, 2500 units of Price Item B, and 4000 units of Price Item C, the system calculates the ratio of price item quantities (i.e.  $(500+2500)/4000=0.75$ ). Once the ratio is calculated, the system determines the range of each price item within which the ratio (i.e. 0.75) falls. In this case, the ratio falls in the 0.6 – 0.9 range of Price Item A, B, and C. Therefore, the system uses \$3, \$4, and \$2, respectively, as the rate for calculating charges (i.e.  $(500*3)=1500$ ,  $(2500*4)=10000$ , and  $(4000*2)=8000$ ).

If the multi parameter based pricing feature is enabled, you can determine the price item utilization in a ratio bundle based on multiple parameters. For example:

Bundle X	Country	Currency
Price Item A	US	USD

<b>Bundle X</b>	<b>Country</b>	<b>Currency</b>
Price Item B	Germany	USD
Price Item C	England	USD

Price Item A, Price Item B, and Price Item C are added in Bundle X. Price Item A, Price Item B, and Price Item C utilization in Bundle X is determined based on two parameters — Country and Currency. Before you add price item to a ratio bundle, you need to define these parameters in the system. Once you define these parameters, you need to associate them to the price items (i.e. Price Item A, Price Item B, and Price Item C) and then add these price items to the bundle (i.e. Bundle X).

While adding Price Item A to Bundle X, you need to set the following price item parameters:

- Country — US
- Currency — USD

Similarly, you need to add Price Item B to Bundle X with Country set to Germany and Currency set to USD, and Price Item C with Country set to England and Currency set to USD.

The following table lists the tiered pricing defined for Price Item A:

<b>Tier Sequence</b>	<b>Rate</b>	<b>Tiering Criteria</b>	<b>Price Item</b>	<b>Price Parameters</b>	<b>Item</b>	<b>From</b>	<b>To</b>
10	5	Number of Transactions	Bundle X			0	1.75
20	4	Number of Transactions	Bundle X			1.75	2.50
30	3	Number of Transactions	Bundle X			2.50	

The following table lists the tiered pricing defined for Price Item B:

<b>Tier Sequence</b>	<b>Rate</b>	<b>Tiering Criteria</b>	<b>Price Item</b>	<b>Price Parameters</b>	<b>Item</b>	<b>From</b>	<b>To</b>
10	5	Number of Transactions	Bundle X			0	3.5
20	4	Number of Transactions	Bundle X			3.5	

The following table lists the tiered pricing defined for Price Item C:

<b>Tier Sequence</b>	<b>Rate</b>	<b>Tiering Criteria</b>	<b>Price Item</b>	<b>Price Parameters</b>	<b>Item</b>	<b>From</b>	<b>To</b>
10	2	Number of Transactions	Bundle X			0	2.0
20	1	Number of Transactions	Bundle X			2.0	

Now, when the user performs 5000 transactions (in USD) of Price Item A in US, 6000 transactions (in USD) of Price Item B in Germany, and 5000 transactions (in USD) of Price Item C in England, the system creates three billable charges — one for each price item (i.e. Price Item A, Price Item B, and Price Item C). The system calculates the ratio of transactions with the following combinations and then determines the range of each price item within which the ratio (i.e. 2.2) falls:

- Price Item A, US, USD
- Price Item B, Germany, USD
- Price Item C, England, USD

In this case, the ratio falls in the 1.75 – 2.50 range of Price Item A, the 0 – 3.5 range of Price Item B, and in the 2.0 — Infinite range of Price Item C. Therefore, the system uses \$4, \$5, and \$1 as the rate for calculating charges (i.e.  $(5000*4)=20000$  ,  $(6000*5)=30000$  , and  $(5000*1)=5000$ ).

You can also add a price item more than once in a ratio bundle with different set of parameters. For example:

Bundle X	Relationship Type	Country	Currency
Price Item A	Numerator	US	USD
Price Item A	Numerator	England	USD
Price Item B	Numerator	Germany	USD
Price Item C	Denominator	England	USD
Price Item C	Denominator	US	USD

In this case, the system calculates the ratio of transactions with the following combinations and then determines the range of each price item (i.e. Price Item A, Price Item B, and Price Item C) within which the ratio falls:

- Price Item A, US, USD
- Price Item A, England, USD
- Price Item B, Germany, USD
- Price Item C, England, USD
- Price Item C, US, USD

## Phantom Bundle

In case of a phantom bundle, pricing is not defined at the bundle level. Instead, pricing is defined separately for each price item in the bundle. The system determines the price by identifying the tiering range of each price item within which the total quantities of services used for all price items in the bundle fall. Let us understand this with the help of an example.

Bundle A, which is a phantom bundle, contains the following two price items:

- **Price Item X** — The following tiered pricing is defined for Price Item X:

Quantity Range	Rate (\$) per unit
1 – 3000	3
3001 – 6000	2

- **Price Item Y** — The following tiered pricing is defined for Price Item Y:

Quantity Range	Rate (\$) per unit
1 – 5000	2
5001 – 10000	1

Now, when the user consumes 2500 units of Price Item X and 3500 units of Price Item Y, the system adds the quantities of services used for all price items in Bundle A (i.e.  $2500+3500=6000$ ), and then determines the range of each price item within which the total units (i.e. 6000) fall. In this case, the total units fall in the 3001 – 6000 range of Price Item X and the 5001 – 10000 range of Price Item Y, and therefore the system uses \$2 and \$1, respectively, as the rate for calculating charges (i.e.  $(2500*2)=5000$  and  $(3500*1)=3500$ ). This helps the customer to take advantage of the lowest rate.

If the multi parameter based pricing feature is enabled, you can determine the price item utilization in a phantom bundle based on multiple parameters. For example:

Bundle A	Country	Currency
Price Item X	US	USD
Price Item Y	Germany	USD

Price Item X and Price Item Y are added in Bundle A. Price Item X and Price Item Y utilization in Bundle A is determined based on two parameters — Country and Currency. Before you add price item to a phantom bundle, you need to define these parameters in the system. Once you define these parameters, you need to associate them to the price items (i.e. Price Item X and Price Item Y) and then add these price items to the bundle (i.e. Bundle A).

While adding Price Item X to Bundle A, you need to set the following price item parameters:

- Country — US
- Currency — USD

Similarly, you need to add Product Y to Bundle A with Country set to Germany and Currency set to USD.

The following table lists the tiered pricing defined for Price Item X:

Tier Sequence	Rate	Tiering Criteria	Price Item	Price Parameters	Item	From	To
10	3	Number of Transactions	Bundle A			0	5000
20	2	Number of Transactions	Bundle A			5000	10000
30	1	Number of Transactions	Bundle A			10000	

The following table lists the tiered pricing defined for Price Item Y:

Tier Sequence	Rate	Tiering Criteria	Price Item	Price Parameters	Item	From	To
10	5	Number of Transactions	Bundle A			0	5000
20	4	Number of Transactions	Bundle A			5000	

Now, when the user performs 5000 transactions (in USD) of Price Item Y in Germany, 6000 transactions (in USD) of Price Item X in US, the system creates two billable charges — one for Price Item X and another for Price Item Y. The system adds the transactions with the following combinations and then determines the range of each price item within which the total units (i.e. 11000) fall:

- Price Item X, US, USD
- Price Item Y, Germany, USD

In this case, the total units fall in the 10000 – Infinite range of Price Item X and the 5000 – Infinite range of Price Item Y, and therefore the system uses \$1 and \$4, respectively, as the rate for calculating charges (i.e.  $(5000 * 4) = 20000$  and  $(6000 * 1) = 6000$ ).

You can also add a price item more than once in a phantom bundle with different set of parameters. For example:

Bundle A	Country	Currency
Price Item X	US	USD
Price Item X	Germany	USD
Price Item Y	Germany	USD
Price Item Y	US	USD

In this case, the system adds the transactions with the following combinations and then determines the range of each price item (i.e. Price Item X and Price Item Y) within which the total units fall:

- Price Item X, US, USD
- Price Item X, Germany, USD
- Price Item Y, Germany, USD

- Price Item Y, US, USD

## Parameter

The pricing for a price item may differ depending upon various transaction, person, account, or product attributes. Oracle Revenue Management and Billing provides a facility to define pricing for a price item based on multiple parameters. In addition, you can define the pricing, price list, and product eligibility criteria using one or more parameters.

Each parameter must be mapped to the following:

- **Source Entity** - Indicates the entity from where the parameter value is derived. A source entity can be account, person, product, transaction, service quantity identifier, or an algorithm.
- **Source Type** - Indicates the type of source from where the parameter value is derived. A source type can be field, characteristic, usage amount, or usage counter.
- **Source Type Code** - Indicates the source (such as, field, characteristic, usage amount, usage counter, SQI, or algorithm) from where the parameter value is derived.

The system allows you to define the following types of parameters:

- **Adhoc** - Used to store an adhoc value.
- **Predefined** - Used to store a predefined value. For example, you can create a parameter named **Country** where the value type is set to **Predefined** and the following predefined values are added in the parameter:

Parameter Value	Description
AUT	Austria
AUS	Australia
CAN	Canada
CHN	China

In such case, while defining the pricing for a price item using the **Country** parameter, you can use any one of the above mentioned parameter values.

- **Reference** - Used to store a value which is already present in a table. For example, you can create a parameter named **Country** where the value type is set to **Reference** and the reference entity is set to **CI\_COUNTRY\_L** (i.e. where the description of all countries is stored). In such case, while defining the pricing for a price item using the **Country** parameter, you can specify a country which is present in the **CI\_COUNTRY\_L** table in the parameter value.

## Parameter (Used for Searching)

The **Parameter** screen allows you to define, edit, delete and copy a parameter. It contains the following zone:

- [Search Parameter](#) on page 294

### Search Parameter

The **Search Parameter** zone allows you to search for a parameter using various search criteria. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Parameter	Used to search a particular parameter.	No

Field Name	Field Description	Mandatory (Yes or No)
Value Type	Used to search parameters in which you can store a particular type of value. The valid values are: <ul style="list-style-type: none"> <li>• Adhoc</li> <li>• Predefined</li> <li>• Reference</li> </ul>	No
Source Entity	Used to search parameters whose value is derived from a particular entity. The valid values are: <ul style="list-style-type: none"> <li>• Account</li> <li>• Algorithm</li> <li>• Person</li> <li>• Product</li> <li>• Service Quantity Identifier</li> <li>• Transaction</li> </ul>	No
Source Type	Used to search parameters whose value is derived from a particular type of source. The valid values are: <ul style="list-style-type: none"> <li>• Characteristic</li> <li>• Field</li> <li>• Usage Amount</li> <li>• Usage Counter</li> </ul>	No
Description	Used to search parameters with a particular description.	No

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Parameter	Displays the parameter name.
Value Type	Indicates the type of value that you can store in the parameter. The valid values are: <ul style="list-style-type: none"> <li>• Adhoc</li> <li>• Predefined</li> <li>• Reference</li> </ul>
Description	Displays the description of the parameter.

Column Name	Column Description
Source Entity	Indicates the entity from where the parameter value is derived. The valid values are: <ul style="list-style-type: none"> <li>• Account</li> <li>• Algorithm</li> <li>• Person</li> <li>• Product</li> <li>• Service Quantity Identifier</li> <li>• Transaction</li> </ul>
Source Type	Indicates the type of source from where the parameter value is derived. The valid values are: <ul style="list-style-type: none"> <li>• Characteristic</li> <li>• Field</li> <li>• Usage Amount</li> <li>• Usage Counter</li> </ul>
View	On clicking the <b>View</b> (  ) icon, the <b>Parameter</b> screen appears where you can view the details of the parameter.
Edit	On clicking the <b>Edit</b> (  ) icon, the <b>Parameter</b> screen appears where you can edit the details of the parameter.
Delete	On clicking the <b>Delete</b> (  ) icon, you can delete the parameter. <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b></p> <p>You can delete a parameter only when the following conditions are met:</p> <ul style="list-style-type: none"> <li>• It is not yet associated to any price item or price item bundle.</li> <li>• It is not yet used while defining the pricing, price list, or product eligibility criteria.</li> </ul> </div>
Copy	On clicking the <b>Copy</b> (  ) icon, the <b>Parameter</b> screen appears where you can define a new parameter using an existing parameter.

**Note:** Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

## Searching for a Parameter

### Procedure

To search for a parameter:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **P** and then click **Parameter**.  
The **Parameter** screen appears.
3. Enter the search criteria in the **Search Parameter** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

4. Click **Search**.

A list of parameters that meet the search criteria appears in the **Search Results** section.

## Defining a Parameter

### Prerequisites

To define a parameter, you should have:

- Validation algorithm defined using the **C1\_PPARM\_VAL** algorithm type (in case you want to validate an adhoc parameter value)
- An algorithm defined using the **C1-PPARM-ENT** algorithm type (in case you want to use the algorithm while validating the pricing eligibility criteria)

### Note:

A sample algorithm type named **C1\_PPARM\_VAL** is shipped with the product. At present, it allows you to specify any special characters except ampersand (&), comma (,), underscore (\_), equal to (=), tilde (~), and semi-colon(;) in the parameter value.

A sample algorithm type named **C1-PPARM-ENT** is shipped with the product. At present, it returns a boolean value true. You can build custom logic in this algorithm which returns a value. This value can then be compared against the parameter value specified in the pricing eligibility criteria.

### Procedure

To define a parameter:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.

- From the **Admin** menu, select **P** and then click **Parameter**.

The **Parameter** screen appears.

- Click the **Add** button in the **Page Title** area of the **Parameter** screen.

The **Parameter** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Parameter	Used to specify the parameter name.  <b>Note:</b> You cannot specify any special character except underscore (_) in the parameter name.	Yes
Source Entity	Used to indicate the entity from where the parameter value should be derived. The valid values are: <ul style="list-style-type: none"> <li>Account</li> <li>Algorithm</li> <li>Person</li> <li>Product</li> <li>Service Quantity Identifier</li> <li>Transaction</li> </ul>	Yes
Description	Used to specify the description for the parameter.	Yes
Source Type	Used to indicate the type of source from where the parameter value should be derived. The valid values are: <ul style="list-style-type: none"> <li>Characteristic</li> <li>Field</li> <li>Usage Amount</li> <li>Usage Counter</li> </ul> <b>Note:</b> This field appears only when the <b>Account</b> , <b>Person</b> , or <b>Product</b> option is selected from the <b>Source Entity</b> list. The <b>Usage Amount</b> and <b>Usage Counter</b> options do not appear in the <b>Source Type</b> list when the <b>Product</b> option is selected from the <b>Source Entity</b> list.	Yes
Value Type	Used to indicate the type of value that you want to store in the parameter. The valid values are: <ul style="list-style-type: none"> <li>Adhoc</li> <li>Predefined</li> <li>Reference</li> </ul>	Yes

Field Name	Field Description	Mandatory (Yes or No)																																				
Source Type Code	<p>Used to indicate the source, such as field, characteristic, usage amount, usage counter, SQI, or algorithm, from where the parameter value should be derived.</p> <p><b>Note:</b></p> <p>This field does not appear when the <b>Transaction</b> option is selected from the <b>Source Entity</b> list.</p> <p>The following table indicates the values that are listed in the <b>Source Type Code</b> field depending on the source entity and source type combination:</p> <table border="1" data-bbox="483 604 1222 1717"> <thead> <tr> <th data-bbox="483 604 672 653">Source Entity</th> <th data-bbox="672 604 883 653">Source Type</th> <th data-bbox="883 604 1222 653">Source Type Code</th> </tr> </thead> <tbody> <tr> <td data-bbox="483 653 672 772">Account</td> <td data-bbox="672 653 883 772">Characteristic</td> <td data-bbox="883 653 1222 772">Lists all characteristics where the characteristic entity is set to <b>Account</b>.</td> </tr> <tr> <td data-bbox="483 772 672 856">Account</td> <td data-bbox="672 772 883 856">Field</td> <td data-bbox="883 772 1222 856">Lists all fields of the <b>CI_ACCT</b> table.</td> </tr> <tr> <td data-bbox="483 856 672 940">Account</td> <td data-bbox="672 856 883 940">Usage Amount</td> <td data-bbox="883 856 1222 940">Lists all values defined for the <b>BAL_FLG</b> lookup field.</td> </tr> <tr> <td data-bbox="483 940 672 1024">Account</td> <td data-bbox="672 940 883 1024">Usage Counter</td> <td data-bbox="883 940 1222 1024">Lists all values defined for the <b>CNT_FLG</b> lookup field.</td> </tr> <tr> <td data-bbox="483 1024 672 1144">Person</td> <td data-bbox="672 1024 883 1144">Characteristic</td> <td data-bbox="883 1024 1222 1144">Lists all characteristics where the characteristic entity is set to <b>Person</b>.</td> </tr> <tr> <td data-bbox="483 1144 672 1228">Person</td> <td data-bbox="672 1144 883 1228">Field</td> <td data-bbox="883 1144 1222 1228">Lists all fields of the <b>CI_PER</b> table.</td> </tr> <tr> <td data-bbox="483 1228 672 1312">Person</td> <td data-bbox="672 1228 883 1312">Usage Amount</td> <td data-bbox="883 1228 1222 1312">Lists all values defined for the <b>BAL_FLG</b> lookup field.</td> </tr> <tr> <td data-bbox="483 1312 672 1396">Person</td> <td data-bbox="672 1312 883 1396">Usage Counter</td> <td data-bbox="883 1312 1222 1396">Lists all values defined for the <b>CNT_FLG</b> lookup field.</td> </tr> <tr> <td data-bbox="483 1396 672 1495">Product</td> <td data-bbox="672 1396 883 1495">Characteristic</td> <td data-bbox="883 1396 1222 1495">Lists all characteristics where the characteristic entity is set to <b>Product</b>.</td> </tr> <tr> <td data-bbox="483 1495 672 1579">Product</td> <td data-bbox="672 1495 883 1579">Field</td> <td data-bbox="883 1495 1222 1579">Lists all fields of the <b>C1_PRODUCT</b> table.</td> </tr> <tr> <td data-bbox="483 1579 672 1717">Service Quantity Identifier</td> <td data-bbox="672 1579 883 1717">—</td> <td data-bbox="883 1579 1222 1717">Lists all service quantity identifiers available in the <b>CI_SQI</b> table.</td> </tr> </tbody> </table>	Source Entity	Source Type	Source Type Code	Account	Characteristic	Lists all characteristics where the characteristic entity is set to <b>Account</b> . Service Quantity Identifier	—	Lists all service quantity identifiers available in the <b>CI_SQI</b> table.																																				

Field Name	Field Description	Mandatory (Yes or No)						
	<table border="1"> <thead> <tr> <th>Source Entity</th> <th>Source Type</th> <th>Source Type Code</th> </tr> </thead> <tbody> <tr> <td>Algorithm</td> <td>—</td> <td>Lists all algorithms which are defined using the <b>C1-PPARM-ENT</b> algorithm type.</td> </tr> </tbody> </table>	Source Entity	Source Type	Source Type Code	Algorithm	—	Lists all algorithms which are defined using the <b>C1-PPARM-ENT</b> algorithm type.	
Source Entity	Source Type	Source Type Code						
Algorithm	—	Lists all algorithms which are defined using the <b>C1-PPARM-ENT</b> algorithm type.						
Validation Algorithm	<p>Used to indicate the algorithm using which you want to validate the adhoc parameter value.</p> <p><b>Note:</b> This field appears only when the <b>Adhoc</b> option is selected from the <b>Value Type</b> list.</p> <p>The <b>Search</b>  icon appears corresponding to the <b>Validation Algorithm</b> field. On clicking the <b>Search</b> icon, the <b>Algorithm Search</b> window appears.</p>	No						
Reference Entity	<p>Used to indicate the table whose primary key (column) you want to set as the reference entity.</p> <p><b>Note:</b> This field appears only when the <b>Reference</b> option is selected from the <b>Value Type</b> list.</p> <p>The <b>Search</b>  icon appears corresponding to the <b>Reference Entity</b> field. On clicking the <b>Search</b> icon, the <b>Reference Table Search</b> window appears.</p> <p>You can only specify a language table, where the <b>DESCR</b> column is available, in the <b>Reference Entity</b> field.</p>	Yes						
Field Name	<p>Indicates the column which is the primary key of the table. The parameter value is then validated against the primary column of the table.</p> <p><b>Note:</b> This field appears only when the <b>Reference</b> option is selected from the <b>Value Type</b> list.</p>	Not applicable						

In addition, this screen contains the following two sections:

- **Parameter Values** - Used to define predefined values for the parameter. It contains the following fields in the grid:

Field Name	Field Description	Mandatory (Yes or No)
Parameter Value	Used to specify the parameter value.  <b>Note:</b> You can specify any special characters except ampersand (&), comma (,), underscore (_), equal to (=), tilde (~), and semi-colon(;) in the predefined parameter value.	Yes
Description	Used to specify the description for the parameter value.	Yes

**Note:**

The **Parameter Values** section appears only when the **Predefined** option is selected from the **Value Type** list.

At least one parameter value should be defined for a parameter where the value type is set to **Predefined**.

If you want to define more than one predefined value for the parameter, click the **Add** () icon and then specify the details. However, if you want to remove a predefined value of the parameter, click the **Delete** () icon corresponding to the parameter value.

- **Parameter Usage** - Used to indicate where the parameter can be used in the system. It contains the following options:

Option Name	Option Description	Mandatory (Yes or No)																
Price Item	<p>Used to indicate whether the parameter can be associated with a price item or price item bundle. If a parameter is associated with a price item or price item bundle, you can use the parameter while defining the price item pricing.</p> <p><b>Note:</b> The following table lists the source entity and source type combinations when the <b>Price Item</b> option is disabled in the <b>Parameter Usage</b> section:</p> <table border="1" data-bbox="542 562 1263 814"> <thead> <tr> <th>Source Entity</th> <th>Source Type</th> </tr> </thead> <tbody> <tr> <td>Account</td> <td>Usage Amount</td> </tr> <tr> <td>Account</td> <td>Usage Counter</td> </tr> <tr> <td>Person</td> <td>Usage Amount</td> </tr> <tr> <td>Person</td> <td>Usage Counter</td> </tr> </tbody> </table> <p>The following table lists the source entity and source type combinations when the <b>Price Item</b> option does not appear in the <b>Parameter Usage</b> section:</p> <table border="1" data-bbox="542 951 1263 1098"> <thead> <tr> <th>Source Entity</th> <th>Source Type</th> </tr> </thead> <tbody> <tr> <td>Algorithm</td> <td>—</td> </tr> <tr> <td>Service Quantity Identifier</td> <td>—</td> </tr> </tbody> </table>	Source Entity	Source Type	Account	Usage Amount	Account	Usage Counter	Person	Usage Amount	Person	Usage Counter	Source Entity	Source Type	Algorithm	—	Service Quantity Identifier	—	<p>Yes (Conditional)</p> <p><b>Note:</b> You must select this option when you want to associate the parameter with a price item.</p>

Account	Usage Amount																	
Account	Usage Counter																	
Person	Usage Amount																	
Person	Usage Counter																	
Source Entity	Source Type																	
Algorithm	—																	
Service Quantity Identifier	—																	
Pricing Eligibility Criteria	<p>Used to indicate whether the parameter can be used while defining the pricing eligibility criteria.</p> <p><b>Note:</b> This option does not appear when the <b>Transaction</b> option is selected from the <b>Source Entity</b> list.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> You must select this option when you want to define a pricing eligibility criteria using the parameter.</p>																
Price List Eligibility Criteria	<p>Used to indicate whether the parameter can be used while defining the price list eligibility criteria.</p> <p><b>Note:</b> This option does not appear when the <b>Transaction</b> option is selected from the <b>Source Entity</b> list.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> You must select this option when you want to define a price list eligibility criteria using the parameter.</p>																

Option Name	Option Description	Mandatory (Yes or No)
Product Eligibility Criteria	Used to indicate whether the parameter can be used while defining the product eligibility criteria.  <b>Note:</b> This option does not appear when the <b>Algorithm</b> , <b>Service Quantity Identifier</b> , or <b>Transaction</b> option is selected from the <b>Source Entity</b> list.	Yes (Conditional)  <b>Note:</b> You must select this option when you want to define a product eligibility criteria using the parameter.

**Note:** You must select at least one option in the **Parameter Usage** section.

- Enter the required details in the **Parameter** screen depending on whether you want to create an adhoc, predefined, or reference parameter.
- Click **Save**.

The parameter is defined.

**Note:** If a parameter is already defined using the source entity, source type, and source type code combination, the system will not allow you to define another parameter with the same combination.

### Editing a Parameter

#### Prerequisites

To edit a parameter, you should have:

- Validation algorithm defined using the **C1\_PPARM\_VAL** algorithm type (in case you want to validate an adhoc parameter value)
- An algorithm defined using the **C1-PPARM-ENT** algorithm type (in case you want to use the algorithm while validating the pricing eligibility criteria)

#### Note:

A sample algorithm type named **C1\_PPARM\_VAL** is shipped with the product. At present, it allows you to specify any special characters except ampersand (&), comma (,), underscore (\_), equal to (=), tilde (~), and semi-colon(;) in the parameter value.

A sample algorithm type named **C1-PPARM-ENT** is shipped with the product. At present, it returns a boolean value true. You can build custom logic in this algorithm which returns a value. This value can then be compared against the parameter value specified in the pricing eligibility criteria.

#### Procedure

To edit a parameter:

- Search for the parameter in the **Parameter** screen.

2. In the **Search Results** section, click the **Edit** (✎) icon in the **Edit** column corresponding to the parameter whose details you want to edit.

The **Parameter** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Parameter	Displays the parameter name.	Not applicable
Source Entity	Used to indicate the entity from where the parameter value should be derived. The valid values are: <ul style="list-style-type: none"> <li>Account</li> <li>Algorithm</li> <li>Person</li> <li>Product</li> <li>Service Quantity Identifier</li> <li>Transaction</li> </ul>	Yes
Description	Used to specify the description for the parameter.	Yes
Source Type	Used to indicate the type of source from where the parameter value should be derived. The valid values are: <ul style="list-style-type: none"> <li>Characteristic</li> <li>Field</li> <li>Usage Amount</li> <li>Usage Counter</li> </ul> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b></p> <p>This field appears only when you select the <b>Account</b>, <b>Person</b>, or <b>Product</b> option from the <b>Source Entity</b> list.</p> <p>The <b>Usage Amount</b> and <b>Usage Counter</b> options do not appear in the <b>Source Type</b> list when the <b>Product</b> option is selected from the <b>Source Entity</b> list.</p> </div>	Yes
Value Type	Indicates the type of value that you can store in the parameter. The valid values are: <ul style="list-style-type: none"> <li>Adhoc</li> <li>Predefined</li> <li>Reference</li> </ul>	Not applicable
Source Type Code	Used to indicate the source, such as, field, characteristic, usage amount, usage counter, SQL, or algorithm, from where the parameter value should be derived.	Yes

Field Name	Field Description	Mandatory (Yes or No)																																				
	<p><b>Note:</b></p> <p>This field does not appear when the <b>Transaction</b> option is selected from the <b>Source Entity</b> list.</p> <p>The following table indicates the values that are listed in the <b>Source Type Code</b> field depending on the source entity and source type combination:</p> <table border="1" data-bbox="480 506 1203 1650"> <thead> <tr> <th data-bbox="480 506 664 583">Source Entity</th> <th data-bbox="669 506 841 583">Source Type</th> <th data-bbox="846 506 1203 583">Source Type Code</th> </tr> </thead> <tbody> <tr> <td data-bbox="480 590 664 699">Account</td> <td data-bbox="669 590 841 699">Characteristic</td> <td data-bbox="846 590 1203 699">Lists all characteristics where the characteristic entity is set to <b>Account</b>.</td> </tr> <tr> <td data-bbox="480 705 664 783">Account</td> <td data-bbox="669 705 841 783">Field</td> <td data-bbox="846 705 1203 783">Lists all fields of the <b>CI_ACCT</b> table.</td> </tr> <tr> <td data-bbox="480 789 664 867">Account</td> <td data-bbox="669 789 841 867">Usage Amount</td> <td data-bbox="846 789 1203 867">Lists all values defined for the <b>BAL_FLG</b> lookup field.</td> </tr> <tr> <td data-bbox="480 873 664 951">Account</td> <td data-bbox="669 873 841 951">Usage Counter</td> <td data-bbox="846 873 1203 951">Lists all values defined for the <b>CNT_FLG</b> lookup field.</td> </tr> <tr> <td data-bbox="480 957 664 1066">Person</td> <td data-bbox="669 957 841 1066">Characteristic</td> <td data-bbox="846 957 1203 1066">Lists all characteristics where the characteristic entity is set to <b>Person</b>.</td> </tr> <tr> <td data-bbox="480 1073 664 1150">Person</td> <td data-bbox="669 1073 841 1150">Field</td> <td data-bbox="846 1073 1203 1150">Lists all fields of the <b>CI_PER</b> table.</td> </tr> <tr> <td data-bbox="480 1157 664 1234">Person</td> <td data-bbox="669 1157 841 1234">Usage Amount</td> <td data-bbox="846 1157 1203 1234">Lists all values defined for the <b>BAL_FLG</b> lookup field.</td> </tr> <tr> <td data-bbox="480 1241 664 1318">Person</td> <td data-bbox="669 1241 841 1318">Usage Counter</td> <td data-bbox="846 1241 1203 1318">Lists all values defined for the <b>CNT_FLG</b> lookup field.</td> </tr> <tr> <td data-bbox="480 1325 664 1434">Product</td> <td data-bbox="669 1325 841 1434">Characteristic</td> <td data-bbox="846 1325 1203 1434">Lists all characteristics where the characteristic entity is set to <b>Product</b>.</td> </tr> <tr> <td data-bbox="480 1440 664 1507">Product</td> <td data-bbox="669 1440 841 1507">Field</td> <td data-bbox="846 1440 1203 1507">Lists all fields of the <b>CI_PRODUCT</b> table.</td> </tr> <tr> <td data-bbox="480 1514 664 1650">Service Quantity Identifier</td> <td data-bbox="669 1514 841 1650">—</td> <td data-bbox="846 1514 1203 1650">Lists all service quantity identifiers available in the <b>CI_SQI</b> table.</td> </tr> </tbody> </table>	Source Entity	Source Type	Source Type Code	Account	Characteristic	Lists all characteristics where the characteristic entity is set to <b>Account</b> . Option Name	Option Description	Mandatory (Yes or No)
Product Eligibility Criteria	Used to indicate whether the parameter can be used while defining the product eligibility criteria.  <b>Note:</b> This option does not appear when the <b>Algorithm</b> , <b>Service Quantity Identifier</b> , or <b>Transaction</b> option is selected from the <b>Source Entity</b> list.	Yes (Conditional)  <b>Note:</b> This field is required when you want to define a product eligibility criteria using the parameter.

**Note:**  
You must select at least one option in the **Parameter Usage** section.  
  
If the parameter is already associated to a price item or used while defining the pricing, price list, or product eligibility criteria, you cannot deselect the respective option in the **Parameter Usage** section.

3. Modify the required details in the **Parameter** screen.
4. Click **Save**.

The changes made to the parameter are saved.

#### **Related Topics**

For more information on...	See...
How to search for a parameter	<a href="#">Searching for a Parameter</a> on page 297

#### **Deleting a Parameter**

##### **Procedure**

To delete a parameter:

1. Search for the parameter in the **Parameter** screen.
2. In the **Search Results** section, click the **Delete** (🗑️) icon in the **Delete** column corresponding to the parameter that you want to delete.

A message appears confirming whether you want to delete the parameter.

**Note:**  
You can delete a parameter only when the following conditions are met:

- It is not yet associated to any price item or price item bundle.
- It is not yet used while defining the pricing, price list, or product eligibility criteria.

3. Click **OK**.

The parameter is deleted.

## Copying a Parameter

Instead of creating a parameter from scratch, you can define a new parameter using an existing parameter. This is possible through copying a parameter. When you copy a parameter, the predefined values, validation algorithm, and reference entity (depending upon the value type) are copied along with other parameter details. You can then edit the details, if required.

**Note:** You cannot change the type of value that you can store in the new parameter (which is created using an existing parameter).

### Prerequisites

To copy a parameter, you should have:

- Parameter (whose copy you want to create) defined in the application
- Validation algorithm defined using the **C1\_PPARM\_VAL** algorithm type (in case you want to validate an adhoc parameter value)
- An algorithm defined using the **C1-PPARM-ENT** algorithm type (in case you want to use the algorithm while validating the pricing eligibility criteria)

### Note:

A sample algorithm type named **C1\_PPARM\_VAL** is shipped with the product. At present, it allows you to specify any special characters except ampersand (&), comma (,), underscore (\_), equal to (=), tilde (~), and semi-colon(;) in the parameter value.

A sample algorithm type named **C1-PPARM-ENT** is shipped with the product. At present, it returns a boolean value true. You can build custom logic in this algorithm which returns a value. This value can then be compared against the parameter value specified in the pricing eligibility criteria.

### Procedure

To copy a parameter:

1. Search for the parameter in the **Parameter** screen.
2. In the **Search Results** section, click the **Copy** () icon in the **Copy** column corresponding to the parameter whose copy you want to create.

The **Parameter** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Parameter	Used to specify the parameter name.  <b>Note:</b> You cannot specify any special character except underscore (_) in the parameter name.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Source Entity	Used to indicate the entity from where the parameter value should be derived. The valid values are: <ul style="list-style-type: none"> <li>• Account</li> <li>• Algorithm</li> <li>• Person</li> <li>• Product</li> <li>• Service Quantity Identifier</li> <li>• Transaction</li> </ul>	Yes
Description	Used to specify the description for the parameter.	Yes
Source Type	Used to indicate the type of source from where the parameter value should be derived. The valid values are: <ul style="list-style-type: none"> <li>• Characteristic</li> <li>• Field</li> <li>• Usage Amount</li> <li>• Usage Counter</li> </ul> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b></p> <p>This field appears only when you select the <b>Account</b>, <b>Person</b>, or <b>Product</b> option from the <b>Source Entity</b> list.</p> <p>The <b>Usage Amount</b> and <b>Usage Counter</b> options do not appear in the <b>Source Type</b> list when the <b>Product</b> option is selected from the <b>Source Entity</b> list.</p> </div>	Yes
Value Type	Indicates the type of value that you can store in the parameter. The valid values are: <ul style="list-style-type: none"> <li>• Adhoc</li> <li>• Predefined</li> <li>• Reference</li> </ul>	Not applicable

Field Name	Field Description	Mandatory (Yes or No)																																				
Source Type Code	<p>Used to indicate the source, such as, field, characteristic, usage amount, usage counter, SQI, or algorithm, from where the parameter value should be derived.</p> <p><b>Note:</b></p> <p>This field does not appear when the <b>Transaction</b> option is selected from the <b>Source Entity</b> list.</p> <p>The following table indicates the values that are listed in the <b>Source Type Code</b> field depending on the source entity and source type combination:</p> <table border="1" data-bbox="451 575 1240 1682"> <thead> <tr> <th data-bbox="451 575 651 625">Source Entity</th> <th data-bbox="651 575 878 625">Source Type</th> <th data-bbox="878 575 1240 625">Source Type Code</th> </tr> </thead> <tbody> <tr> <td data-bbox="451 625 651 741">Account</td> <td data-bbox="651 625 878 741">Characteristic</td> <td data-bbox="878 625 1240 741">Lists all characteristics where the characteristic entity is set to <b>Account</b>.</td> </tr> <tr> <td data-bbox="451 741 651 821">Account</td> <td data-bbox="651 741 878 821">Field</td> <td data-bbox="878 741 1240 821">Lists all fields of the <b>CI_ACCT</b> table.</td> </tr> <tr> <td data-bbox="451 821 651 903">Account</td> <td data-bbox="651 821 878 903">Usage Amount</td> <td data-bbox="878 821 1240 903">Lists all values defined for the <b>BAL_FLG</b> lookup field.</td> </tr> <tr> <td data-bbox="451 903 651 982">Account</td> <td data-bbox="651 903 878 982">Usage Counter</td> <td data-bbox="878 903 1240 982">Lists all values defined for the <b>CNT_FLG</b> lookup field.</td> </tr> <tr> <td data-bbox="451 982 651 1098">Person</td> <td data-bbox="651 982 878 1098">Characteristic</td> <td data-bbox="878 982 1240 1098">Lists all characteristics where the characteristic entity is set to <b>Person</b>.</td> </tr> <tr> <td data-bbox="451 1098 651 1180">Person</td> <td data-bbox="651 1098 878 1180">Field</td> <td data-bbox="878 1098 1240 1180">Lists all fields of the <b>CI_PER</b> table.</td> </tr> <tr> <td data-bbox="451 1180 651 1262">Person</td> <td data-bbox="651 1180 878 1262">Usage Amount</td> <td data-bbox="878 1180 1240 1262">Lists all values defined for the <b>BAL_FLG</b> lookup field.</td> </tr> <tr> <td data-bbox="451 1262 651 1344">Person</td> <td data-bbox="651 1262 878 1344">Usage Counter</td> <td data-bbox="878 1262 1240 1344">Lists all values defined for the <b>CNT_FLG</b> lookup field.</td> </tr> <tr> <td data-bbox="451 1344 651 1459">Product</td> <td data-bbox="651 1344 878 1459">Characteristic</td> <td data-bbox="878 1344 1240 1459">Lists all characteristics where the characteristic entity is set to <b>Product</b>.</td> </tr> <tr> <td data-bbox="451 1459 651 1541">Product</td> <td data-bbox="651 1459 878 1541">Field</td> <td data-bbox="878 1459 1240 1541">Lists all fields of the <b>C1_PRODUCT</b> table.</td> </tr> <tr> <td data-bbox="451 1541 651 1656">Service Quantity Identifier</td> <td data-bbox="651 1541 878 1656">—</td> <td data-bbox="878 1541 1240 1656">Lists all service quantity identifiers available in the <b>CI_SQI</b> table.</td> </tr> </tbody> </table>	Source Entity	Source Type	Source Type Code	Account	Characteristic	Lists all characteristics where the characteristic entity is set to <b>Account</b> .	Account	Field	Lists all fields of the <b>CI_ACCT</b> table.	Account	Usage Amount	Lists all values defined for the <b>BAL_FLG</b> lookup field.	Account	Usage Counter	Lists all values defined for the <b>CNT_FLG</b> lookup field.	Person	Characteristic	Lists all characteristics where the characteristic entity is set to <b>Person</b> .	Person	Field	Lists all fields of the <b>CI_PER</b> table.	Person	Usage Amount	Lists all values defined for the <b>BAL_FLG</b> lookup field.	Person	Usage Counter	Lists all values defined for the <b>CNT_FLG</b> lookup field.	Product	Characteristic	Lists all characteristics where the characteristic entity is set to <b>Product</b> .	Product	Field	Lists all fields of the <b>C1_PRODUCT</b> table.	Service Quantity Identifier	—	Lists all service quantity identifiers available in the <b>CI_SQI</b> table.	Yes
Source Entity	Source Type	Source Type Code																																				
Account	Characteristic	Lists all characteristics where the characteristic entity is set to <b>Account</b> .																																				
Account	Field	Lists all fields of the <b>CI_ACCT</b> table.																																				
Account	Usage Amount	Lists all values defined for the <b>BAL_FLG</b> lookup field.																																				
Account	Usage Counter	Lists all values defined for the <b>CNT_FLG</b> lookup field.																																				
Person	Characteristic	Lists all characteristics where the characteristic entity is set to <b>Person</b> .																																				
Person	Field	Lists all fields of the <b>CI_PER</b> table.																																				
Person	Usage Amount	Lists all values defined for the <b>BAL_FLG</b> lookup field.																																				
Person	Usage Counter	Lists all values defined for the <b>CNT_FLG</b> lookup field.																																				
Product	Characteristic	Lists all characteristics where the characteristic entity is set to <b>Product</b> .																																				
Product	Field	Lists all fields of the <b>C1_PRODUCT</b> table.																																				
Service Quantity Identifier	—	Lists all service quantity identifiers available in the <b>CI_SQI</b> table.																																				

Field Name	Field Description	Mandatory (Yes or No)						
	<table border="1"> <thead> <tr> <th>Source Entity</th> <th>Source Type</th> <th>Source Type Code</th> </tr> </thead> <tbody> <tr> <td>Algorithm</td> <td>—</td> <td>Lists all algorithms which are defined using the <b>C1-PPARM-ENT</b> algorithm type.</td> </tr> </tbody> </table>	Source Entity	Source Type	Source Type Code	Algorithm	—	Lists all algorithms which are defined using the <b>C1-PPARM-ENT</b> algorithm type.	
Source Entity	Source Type	Source Type Code						
Algorithm	—	Lists all algorithms which are defined using the <b>C1-PPARM-ENT</b> algorithm type.						
Validation Algorithm	<p>Used to indicate the algorithm using which you want to validate the adhoc parameter value.</p> <p><b>Note:</b> This field appears only when the <b>Adhoc</b> option is selected from the <b>Value Type</b> list. The <b>Search</b> (🔍) icon appears corresponding to the <b>Validation Algorithm</b> field. On clicking the <b>Search</b> icon, the <b>Algorithm Search</b> window appears.</p>	No						
Reference Entity	<p>Used to indicate the table whose primary key (column) you want to set as the reference entity.</p> <p><b>Note:</b> This field appears only when the <b>Reference</b> option is selected from the <b>Value Type</b> list. The <b>Search</b> (🔍) icon appears corresponding to the <b>Reference Entity</b> field. On clicking the <b>Search</b> icon, the <b>Reference Table Search</b> window appears. You can only specify a language table, where the <b>DESCR</b> column is available, in the <b>Reference Entity</b> field.</p>	Yes						
Field Name	<p>Indicates the column which is the primary key of the table. The parameter value is then validated against the primary column of the table.</p> <p><b>Note:</b> This field appears only when the <b>Reference</b> option is selected from the <b>Value Type</b> list.</p>	Not applicable						

In addition, this screen contains the following two sections:

- **Parameter Values** - Used to define predefined values for the parameter. It contains the following fields in the grid:

Field Name	Field Description	Mandatory (Yes or No)
Parameter Value	<p>Used to specify the parameter value.</p> <p><b>Note:</b> You can specify any special characters except ampersand (&amp;), comma (,), underscore (_), equal to (=), tilde (~), and semi-colon(;) in the predefined parameter value.</p>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Description	Used to specify the description for the parameter value.	Yes

**Note:**

The **Parameter Values** section appears only when the **Predefined** option is selected from the **Value Type** list.

At least one parameter value should be defined for a parameter where the value type is set to **Predefined**.

If you want to define more than one predefined value for the parameter, click the **Add** (+) icon and then specify the details. However, if you want to remove a predefined value of the parameter, click the **Delete** (🗑) icon corresponding to the parameter value.

- **Parameter Usage** - Used to indicate where the parameter can be used in the system. It contains the following options:

Option Name	Option Description	Mandatory (Yes or No)																
Price Item	<p>Used to indicate whether the parameter can be associated with a price item or price item bundle. If a parameter is associated with a price item or price item bundle, you can use the parameter while defining the price item pricing.</p> <p><b>Note:</b></p> <p>The following table lists the source entity and source type combinations when the <b>Price Item</b> option is disabled in the <b>Parameter Usage</b> section:</p> <table border="1"> <thead> <tr> <th>Source Entity</th> <th>Source Type</th> </tr> </thead> <tbody> <tr> <td>Account</td> <td>Usage Amount</td> </tr> <tr> <td>Account</td> <td>Usage Counter</td> </tr> <tr> <td>Person</td> <td>Usage Amount</td> </tr> <tr> <td>Person</td> <td>Usage Counter</td> </tr> </tbody> </table> <p>The following table lists the source entity and source type combinations when the <b>Price Item</b> option does not appear in the <b>Parameter Usage</b> section:</p> <table border="1"> <thead> <tr> <th>Source Entity</th> <th>Source Type</th> </tr> </thead> <tbody> <tr> <td>Algorithm</td> <td>—</td> </tr> <tr> <td>Service Quantity Identifier</td> <td>—</td> </tr> </tbody> </table>	Source Entity	Source Type	Account	Usage Amount	Account	Usage Counter	Person	Usage Amount	Person	Usage Counter	Source Entity	Source Type	Algorithm	—	Service Quantity Identifier	—	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required when you want to associate the parameter with a price item.</p>
Source Entity	Source Type																	
Account	Usage Amount																	
Account	Usage Counter																	
Person	Usage Amount																	
Person	Usage Counter																	
Source Entity	Source Type																	
Algorithm	—																	
Service Quantity Identifier	—																	

Option Name	Option Description	Mandatory (Yes or No)
Pricing Eligibility Criteria	Used to indicate whether the parameter can be used while defining the pricing eligibility criteria.  <b>Note:</b> This option does not appear when the <b>Transaction</b> option is selected from the <b>Source Entity</b> list.	Yes (Conditional)  <b>Note:</b> This field is required when you want to define a pricing eligibility criteria using the parameter.
Price List Eligibility Criteria	Used to indicate whether the parameter can be used while defining the price list eligibility criteria.  <b>Note:</b> This option does not appear when the <b>Transaction</b> option is selected from the <b>Source Entity</b> list.	Yes (Conditional)  <b>Note:</b> This field is required when you want to define a price list eligibility criteria using the parameter.
Product Eligibility Criteria	Used to indicate whether the parameter can be used while defining the product eligibility criteria.  <b>Note:</b> This option does not appear when the <b>Algorithm</b> , <b>Service Quantity Identifier</b> , or <b>Transaction</b> option is selected from the <b>Source Entity</b> list.	Yes (Conditional)  <b>Note:</b> This field is required when you want to define a product eligibility criteria using the parameter.

**Note:** You must select at least one option in the **Parameter Usage** section.

- Enter the required details in the **Parameter** screen depending on whether you want to create an adhoc, predefined, or reference parameter.
- Click **Save**.

The parameter is defined.

**Note:** If a parameter is already defined using the source entity, source type, and source type code combination, the system will not allow you to define another parameter with the same combination.

### Viewing the Parameter Details

#### Procedure

To view the details of a parameter:

- Search for the parameter in the **Parameter** screen.
- In the **Search Results** section, click the **View** (🔍) icon in the **View** column corresponding to the parameter whose details you want to view.

The **Parameter** screen appears.

- View the details of the parameter in the **Parameter** screen.

## Parameter (Used for Viewing)

The **Parameter** screen allows you to view the details of a parameter. It contains the following zone:

- [Parameter](#) on page 316

### **Parameter**

The **Parameter** zone displays the details of the parameter. It contains the following sections:

- Main** – Displays basic information about the parameter. It contains the following fields:

Field Name	Field Description
Parameter	Displays the parameter name.
Description	Displays the description of the parameter.
Value Type	Indicates the type of value that you can store in the parameter. The valid values are: <ul style="list-style-type: none"> <li>Adhoc</li> <li>Predefined</li> <li>Reference</li> </ul>
Validation Algorithm	Indicates the algorithm which is used to validate the adhoc parameter value. <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b></p> <p>This field appears only when the <b>Adhoc</b> option is selected from the <b>Value Type</b> list.</p> <p>It has a link. On clicking the link, the <b>Algorithm</b> screen appears where you can view the details of the respective algorithm.</p> </div>
Referenced Table	Indicates the table whose primary key (i.e. column) is used to validate the parameter value. <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b></p> <p>This field appears only when the <b>Reference</b> option is selected from the <b>Value Type</b> list.</p> <p>It has a link. On clicking the link, the <b>Table</b> screen appears where you can view the details of the respective table.</p> </div>

Field Name	Field Description
Source Entity	<p>Indicates the entity from where the parameter value is derived. The valid values are:</p> <ul style="list-style-type: none"> <li>• Account</li> <li>• Algorithm</li> <li>• Person</li> <li>• Product</li> <li>• Service Quantity Identifier</li> <li>• Transaction</li> </ul>
Source Type	<p>Indicates the type of source from where the parameter value is derived. The valid values are:</p> <ul style="list-style-type: none"> <li>• Characteristic</li> <li>• Field</li> <li>• Usage Amount</li> <li>• Usage Counter</li> </ul> <p><b>Note:</b> This field appears only when the <b>Account</b>, <b>Person</b>, or <b>Product</b> option is selected from the <b>Source Entity</b> list.</p>
Source Type Code	<p>Indicates the source, such as field, characteristic, usage amount, usage counter, SQI, or algorithm, from where the parameter value is derived.</p> <p><b>Note:</b> This field does not appear when the <b>Transaction</b> option is selected from the <b>Source Entity</b> list.</p>

- **Parameter Usage** – Indicates where the parameter can be used in the system. It contains the following options:

Option Name	Option Description						
Price Item	<p>Indicates whether the parameter can be associated with a price item or price item bundle. If a parameter is associated with a price item or price item bundle, you can use the parameter while defining the price item pricing.</p> <p>The following table lists the source entity and source type combinations when the <b>Price Item</b> option does not appear in the <b>Parameter Usage</b> section:</p> <table border="1"> <thead> <tr> <th>Source Entity</th> <th>Source Type</th> </tr> </thead> <tbody> <tr> <td>Algorithm</td> <td>—</td> </tr> <tr> <td>Service Quantity Identifier</td> <td>—</td> </tr> </tbody> </table>	Source Entity	Source Type	Algorithm	—	Service Quantity Identifier	—
Source Entity	Source Type						
Algorithm	—						
Service Quantity Identifier	—						
Pricing Eligibility Criteria	<p>Indicates whether the parameter can be used while defining the pricing eligibility criteria.</p> <p><b>Note:</b> This option does not appear when the <b>Transaction</b> option is selected from the <b>Source Entity</b> list.</p>						

Option Name	Option Description
Price List Eligibility Criteria	Indicates whether the parameter can be used while defining the price list eligibility criteria.  <b>Note:</b> This option does not appear when the <b>Transaction</b> option is selected from the <b>Source Entity</b> list.
Product Eligibility Criteria	Indicates whether the parameter can be used while defining the product eligibility criteria.  <b>Note:</b> This option does not appear when the <b>Algorithm, Service Quantity Identifier, or Transaction</b> option is selected from the <b>Source Entity</b> list.

- **Parameter Values** - Lists the predefined values of the parameter. It contains the following columns in the grid:

Column Name	Column Description
Parameter Value	Displays the parameter value.
Description	Displays the description of the parameter value.

**Note:** The **Parameter Values** section appears only when the **Predefined** option is selected from the **Value Type** list.

## Price Item

A bank may offer wide range of services to customers and accordingly charge them fees and/or interest for a service. You can define each charge as a price item in Oracle Revenue Management and Billing. Once a price item is defined, you can define pricing for the price item. The price item pricing can be a standard price defined in the price list or override price that is specific to a person or an account. The system allows you to define price item pricing at various levels in a person hierarchy (for example, at the account level, main customer level, or at the parent customer level). You can also define price item pricing in the account's price list, main customer's price list, parent customer's price list, and price list's parent price list.

You can associate one or more price items with each other, and thereby group them for various reasons, such as reporting, billing, and so on. You can also create a price item bundle and then add price items within the price item bundle. The main objective behind grouping price items or creating price item bundles is to offer discounts based on the volume across price items, facilitate minimum or maximum charge calculations across price items, or offer common price across price items. While associating a price item with the parent price item or adding a price item to the price item bundle, you need to specify how the two price items are related to each other.

The system allows you to define the following types of price item bundle:

- [Regular Bundle](#) on page 288
- [Phantom Bundle](#) on page 292
- [Ratio Bundle](#) on page 290

The system allows you to define price items and price item bundles which are available for only pricing or pricing and billing. If the price item is available for only pricing, you can indicate the type of the price item. The valid values are:

- Rate (i.e. Interest Rate)
- Fees

If the type of a price item is **Rate**, the system calculates and persist the rate for the price item. The rate is persisted only for the price item pricing which is either assigned or inherited by an account. You cannot define a price item bundle when it is available for only pricing and when the price item type is set to **Rate**. When you define a price item or price item bundle which is available for only pricing, the contract type defined in the **Default Contract Type** option type of the **Pricing Configuration (C1\_PRICING)** feature configuration is automatically associated with the price item or price item bundle.

You can associate a price item or price item bundle to one or more divisions. You can assign a price item or price item bundle to an account, person, or price list only when the account, person, or price list belongs to the division to which the price item or price item bundle is associated. You can define a set of characteristics for a price item or price item bundle which are common across divisions or specific to a division. You can associate one or more parameters to a price item. These parameters can then be used for aggregating transactions and defining the price item pricing. Note that you can associate parameters only to regular price item bundles and not to ratio and phantom price item bundles.

## Price Item (Used for Searching)

The **Price Item** screen allows you to search for a price item or price item bundle using various search criteria. It allows you to create and edit a price item or price item bundle. In addition, it allows you to copy a price item bundle only when **Multi Price Parameter** option type of the **Multi Parameter Based Pricing (C1\_PPARM\_FLG)** feature configuration is set to **False**. This screen consists of the following zones:

- [Search Price Item](#) on page 319

### Search Price Item

The **Search Price Item** zone allows you to search for a price item or price item bundle using various search criteria. It contains the following two sections:

- **Search Criteria** – The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for a price item or price item bundle using the price item details. The valid value is: <ul style="list-style-type: none"> <li>• Price Item Details</li> </ul> <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"><b>Note:</b> By default, the <b>Price Item Details</b> option is selected.</div>	Yes
Price Item	Used to search a particular price item or price item bundle.	No
Description	Used to search a price item or price item bundle with a particular description.	No
Division	Used to search price items or price item bundles which are associated with a particular division. <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"><b>Note:</b> You can only view those divisions to which you have access in the <b>Division</b> list.</div>	No

Field Name	Field Description	Mandatory (Yes or No)
Global Price List	Used to search price items or price item bundles which can be assigned to a global price list. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	No
Price Item Usage	Used to search price items or price item bundles which can be used for only pricing or pricing and billing. The valid values are: <ul style="list-style-type: none"> <li>• Pricing</li> <li>• Pricing and Billing</li> </ul> <div style="border: 1px solid black; padding: 2px;"> <p><b>Note:</b> By default, the <b>Pricing and Billing</b> option is selected.</p> </div>	No
Bundle	Used to indicate whether you want to search a price item bundle. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	No
Price Item Type	Used to search a particular type of price items or price item bundles. The valid values are: <ul style="list-style-type: none"> <li>• Fees</li> <li>• Rate</li> </ul> <div style="border: 1px solid black; padding: 2px;"> <p><b>Note:</b> This field appears only when you select the <b>Pricing</b> option from the <b>Price Item Usage</b> list.</p> </div>	No

**Note:** You must specify at least one search criterion while searching for a price item or price item bundle.

- **Search Results** – On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Price Item Information	Displays information about the price item or price item bundle. <div style="border: 1px solid black; padding: 2px;"> <p><b>Note:</b> It has a link. On clicking the link, the <b>Price Item</b> screen appears where you can view the details of the respective price item or price item bundle.</p> </div>

Column Name	Column Description
Bundle Type	<p>Indicates the type of the price item bundle. If the price item bundle is available for pricing and billing, the valid values are:</p> <ul style="list-style-type: none"> <li>• Phantom</li> <li>• Ratio</li> <li>• Regular</li> </ul> <p>However, if the price item bundle is available for only pricing and the <b>Price Item Type</b> is set to <b>Fees</b>, the valid value is:</p> <ul style="list-style-type: none"> <li>• Regular</li> </ul>
Price Item Type	<p>Indicates the type of the price item or price item bundle. The valid values are:</p> <ul style="list-style-type: none"> <li>• Rate</li> <li>• Fees</li> </ul>
Price Item Usage	<p>Indicates whether the price item or price item bundle is used for only pricing or pricing and billing. The valid values are:</p> <ul style="list-style-type: none"> <li>• Pricing</li> <li>• Pricing and Billing</li> </ul>
Copy	<p>On clicking the <b>Copy</b> () icon, the <b>Price Item</b> screen appears where you can create a new price item or price item bundle using an existing price item or price item bundle.</p>
Price Item Assigned To	<p>On clicking the <b>View</b> () icon in the <b>Price Item Assigned To</b> column, the <b>Price Item Assignments</b> screen appears where you can view the active price lists, persons, and accounts to which the price item or price item bundle is assigned.</p>
Price Item Relationship	<p>On clicking the <b>View</b> () icon in the <b>Price Item Relationship</b> column, the <b>Price Item Relationship</b> screen appears where you can view the list of the price items and price item bundles associated with the parent price item or added to the price item bundle.</p>

**Note:** Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

## Searching for a Price Item or Price Item Bundle

### Prerequisites

To search for a price item or price item bundle, you should have:

- Divisions defined in the application
- Price items or price item bundles associated with the division to which the user belongs

### Procedure

To search for a price item or price item bundle:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Pricing Management** and then click **Price Item**.  
A sub-menu appears.
3. Click the **Search** option from the **Price Item** sub-menu.  
The **Price Item** screen appears.
4. Enter the search criteria in the **Search Price Item** zone depending on whether you want to search for a price item or price item bundle.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search**.

A list of price items or price item bundles that meet the search criteria appears in the **Search Results** section.

**Note:** Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

## Defining a Price Item or Price Item Bundle

### Prerequisites

To define a price item or price item bundle, you should have:

- Contract types defined in the application
- Value defined for the **Default Contract Type** option type in the **Pricing Configuration (C1\_PRICING)** feature configuration

### Procedure

To define a price item or price item bundle:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.

- From the **Main** menu, select **Pricing Management** and then click **Price Item**.

A sub-menu appears.

- Click the **Add** option from the **Price Item** sub-menu.

The **Price Item** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the price item or price item bundle.
- **Parameters** - Used to associate a parameter with the price item or price item bundle. These associated parameters are then used for aggregating transactions and/or for defining the price item pricing.

**Note:**

The **Parameters** section appears in the **Price Item** screen only when the **Multi Price Parameter** option type of the **Multi Parameter Based Pricing (C1\_PPARM\_FLG)** feature configuration is set to **True**.

You cannot associate parameters to ratio and phantom price item bundles. Therefore, while defining the ratio and phantom price item bundles, the **Parameters** section does not appear in the **Price Item** screen.

- **Divisions** - Used to associate the price item or price item bundle with one or more divisions. It also allows you to define division-specific SQIs, division-specific accrual type criteria, and division-specific characteristics for the price item or price item bundle.
- **Price Item Characteristics** - Used to define characteristics (which are applicable across divisions) for the price item or price item bundle.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Price Item	Used to specify the price item or price item bundle.	Yes
Description	Used to specify the description for the price item or price item bundle.	Yes
Price Item Usage	Used to indicate whether the price item or price item bundle is used for only pricing or pricing and billing. The valid values are: <ul style="list-style-type: none"> <li>• Pricing</li> <li>• Pricing and Billing</li> </ul> <div data-bbox="548 1356 1107 1436" style="border: 1px solid black; padding: 2px;"> <p><b>Note:</b> By default, the <b>Pricing and Billing</b> option is selected.</p> </div>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Price Item Type	<p>Used to indicate the type of the price item or price item bundle. The valid values are:</p> <ul style="list-style-type: none"> <li>• Rate</li> <li>• Fees</li> </ul> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> By default, the <b>Fees</b> option is selected. This field appears only when you select the <b>Pricing</b> option from the <b>Price Item Usage</b> list. You cannot define a price item bundle when it is available for only pricing and when the price item type is set to <b>Rate</b>.</p> </div>	Yes
Bundle	<p>Used to indicate whether you want to define a price item bundle. The valid values are:</p> <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> By default, the <b>No</b> option is selected.</p> </div>	Yes
Bundle Type	<p>Used to indicate the type of the price item bundle. If the price item bundle is available for pricing and billing, the valid values are:</p> <ul style="list-style-type: none"> <li>• Phantom</li> <li>• Ratio</li> <li>• Regular</li> </ul> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> This field is enabled only when you select the <b>Pricing and Billing</b> option from the <b>Price Item Usage</b> list and the <b>Yes</b> option from the <b>Bundle</b> list. All the above mentioned values are available in the list when you are defining a price item bundle which is available for pricing and billing. However, when you are defining a price item bundle which is available for only pricing and when the price item type is set to <b>Fees</b>, you can only define a regular price item bundle. Therefore, by default, the value is set to <b>Regular</b> when you select the <b>Pricing</b> option from the <b>Price Item Usage</b> list and the <b>Yes</b> option from the <b>Bundle</b> list. You cannot define a price item bundle when it is available for only pricing and when the price item type is set to <b>Rate</b>.</p> </div>	Yes (Conditional) <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"><b>Note:</b> This field is required when you are creating a price item bundle.</div>

Field Name	Field Description	Mandatory (Yes or No)
Global Price List	Used to indicate whether the price item or price item bundle can be assigned to a global price list. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul> <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"><b>Note:</b> By default, the <b>No</b> option is selected.</div>	Yes
Contract Type	Used to indicate the contract type that you want to associate with the price item or price item bundle. <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"><b>Note:</b> This field appears only when you select the <b>Pricing and Billing</b> option from the <b>Price Item Usage</b> list. The <b>Search</b>  icon appears corresponding to the <b>Contract Type</b> field. On clicking the <b>Search</b> icon, the <b>Contract Type Search</b> window appears.</div>	Yes

**Tip:** Alternatively, you can access the **Price Item** screen by clicking the **Add** button in the **Page Title** area of the **Price Item** screen.

4. Enter the required details in the **Main** section.
5. Associate parameters with the price item or price item bundle, if required.
6. Associate the price item or price item bundle to the required divisions.
7. Define the required division-specific SQIs for the price item or price item bundle.
8. Define division-specific characteristics for the price item or price item bundle, if required.
9. Define division-specific accrual type criteria for the price item or price item bundle, if required.
10. Define characteristics for the price item or price item bundle, if required.
11. Click **Save**.

The price item is defined.

**Note:** When you define a price item or price item bundle which is available for only pricing, the contract type defined in the **Default Contract Type** option type of the **Pricing Configuration (C1\_PRICING)** feature configuration is automatically associated to the price item or price item bundle.

## Associating a Parameter with a Price Item or Price Item Bundle

### Prerequisites

To associate a parameter with a price item or price item bundle, you should have:

- Parameters defined in the application (where the **Price Item** option is selected in the **Parameter Usage** section)

### Procedure

To associate a parameter with a price item or price item bundle:

1. Click the **Parameters** or **Show All** link in the **Section** pane when you are defining, editing, or copying a price item or price item bundle.

The **Parameters** section appears. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Start Date	Used to specify the date from when the parameter is effective for the price item or price item bundle.	Yes
Effective End Date	Used to specify the date till when the parameter is effective for the price item or price item bundle.	No
Parameter	Used to indicate the parameter that you want to associate with the price item or price item bundle.  <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>The <b>Search</b>  icon appears corresponding to the <b>Parameter</b> field. On clicking the <b>Search</b> icon, the <b>Parameter Search</b> window appears.</p> <p>In the <b>Parameter Search</b> window, the system allows you to search only those parameters where the parameter usage is set to <b>Price Item</b>.</p> </div>	Yes
Business Label	Used to specify a business label for the parameter. If the business label is defined for a parameter, the business label appears instead of the parameter name.	No
Display Order	Used to indicate the order in which the parameter and its value should be displayed in the price item parameter information string across the application.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Parameter Usage	Used to indicate whether you want to use the parameter for aggregation and/or for defining the price item pricing. The valid values are: <ul style="list-style-type: none"> <li>• <b>Aggregation</b> – Indicates that you want to use the parameter for aggregating transactions.</li> <li>• <b>Pricing</b> – Indicates that you want to use the parameter for aggregating transactions and defining the price item pricing.</li> </ul>	Yes
Mandatory	Used to indicate whether the parameter is mandatory while defining the price item pricing.	No
Priority	Used to indicate the priority in which optional parameters should be considered while determining best fit price for the price item or price item bundle.  <b>Note:</b> This field is disabled when the <b>Mandatory</b> option is selected.	Yes (Conditional)  <b>Note:</b> This field is required when the <b>Mandatory</b> option is not selected.

**Note:**

The **Parameters** section appears in the **Price Item** screen only when the **Multi Price Parameter** option type of the **Multi Parameter Based Pricing (C1\_PPARM\_FLG)** feature configuration is set to **True**.

You cannot associate parameters to ratio and phantom price item bundles. Therefore, while defining, editing, or copying ratio and phantom price item bundles, the **Parameters** section does not appear in the **Price Item** screen.

- Enter the required details in the **Parameters** section.
- If you want to associate more than one parameter with the price item or price item bundle, click the **Add (+)** icon and then repeat steps 2.

**Note:**

However, if you want to remove a parameter from the price item or price item bundle, click the **Delete (🗑)** icon corresponding to the parameter. You can edit the parameter details and remove a parameter from the price item or price item bundle only when the parameter or any other parameter from the same date range is not yet used for aggregation or for defining the price item pricing.

You can add a parameter which will be used for aggregation (in other words, where the **Parameter Usage** field is set to **Aggregation**) anytime, whenever required. However, you can add a parameter which will be used for pricing (in other words, where the **Parameter Usage** field is set to **Pricing**) only when any other parameter from the same date range is not yet used for aggregation or for defining the price item pricing.

- Click **Save**.

The parameters are associated with the price item or price item bundle.

**Note:** The priority for all parameters which are mandatory is set to 0.

How to define valid predefined parameter values for a price item or price item bundle	<a href="#">Defining Valid Predefined Parameter Values for a Price Item or Price Item Bundle</a> on page 328

## Defining Valid Predefined Parameter Values for a Price Item or Price Item Bundle

### Prerequisites

To define valid predefined parameter values for a price item or price item bundle, you should have:

- Values defined for the predefined parameter which is associated with the price item or price item bundle

### Procedure

To define valid predefined parameter values for a price item or price item bundle:

1. Click the **Parameters** or **Show All** link in the **Section** pane when you are defining, editing, or copying a price item or price item bundle.

The **Parameters** section appears.

2. Click the **Add** () icon in the **Parameter** column corresponding to the predefined parameter for which you want to define valid values for the price item or price item bundle.

The following field appears in the grid:

Field Name	Field Description	Mandatory (Yes or No)
Parameter Value	<p>Used to indicate the predefined parameter value which you can use for the price item or price item bundle while defining the pricing.</p> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>The <b>Search</b> () icon appears corresponding to the <b>Parameter Value</b> field. On clicking the <b>Search</b> icon, the <b>Predefined Parameter Value Search</b> window appears.</p> <p>On specifying the valid predefined parameter value for a price item or price item bundle, the description of the valid predefined parameter value appears corresponding to the <b>Parameter Value</b> field.</p> </div>	<p>Yes (Conditional)</p> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This field is required when you are defining valid predefined parameter values for the price item or price item bundle.</p> </div>

3. Select the predefined parameter value from the respective field.
4. If you want to define more than one valid predefined parameter value for the price item or price item bundle, click the **Add** () icon and then repeat step 3.

**Note:** However, if you want to remove a valid predefined parameter value from the price item or price item bundle, click the **Delete** () icon corresponding to the parameter value.

- Click **Save**.

The valid predefined parameter values are defined for the price item or price item bundle.

## **Associating a Price Item or Price Item Bundle with a Division**

### **Prerequisites**

To associate a price item or price item bundle with a division, you should have:

- Divisions defined in the application

### **Procedure**

To associate a price item or price item bundle with a division:

- Click the **Divisions** or **Show All** link in the **Section** pane when you are defining, editing, or copying a price item or price item bundle.

The **Divisions** section appears. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
SQIs	On clicking the <b>Add</b> (  ) icon, you can define division-specific SQIs for the price item or price item bundle.	No
Division Characteristics	On clicking the <b>Add</b> (  ) icon, you can define division-specific characteristics for the price item or price item bundle.	No
Accrual Type Criteria	On clicking the <b>Add</b> (  ) icon, you can define division-specific accrual type criteria for the price item or price item bundle.	No
Division	Used to indicate the division to which you want to associate the price item or price item bundle.  <b>Note:</b> You can only view those divisions to which you have access in the <b>Division</b> list.	Yes

- Enter the required details in the **Divisions** section.
- If you want to associate the price item or price item bundle with more than one division, click the **Add** () icon and then repeat step 2.

**Note:** However, if you want to remove the price item or price item bundle from a division, click the **Delete** () icon corresponding to the division.

- Define division-specific SQIs for the price item or price item bundle, if required.

5. Define division-specific characteristics for the price item or price item bundle, if required.
6. Define division-specific accrual type criteria for the price item or price item bundle, if required.
7. Click **Save**.

The price item or price item bundle is associated to the division.

**Tip:** Alternatively, you can associate a price item or price item bundle to a division using the **Division** screen.

## **Defining Division-Specific SQIs for a Price Item or Price Item Bundle**

### **Prerequisites**

To define division-specific SQIs for a price item or price item bundle, you should have:

- SQIs defined in the application
- Price items or price item bundles associated with the division to which the user belongs

### **Procedure**

To define division-specific SQIs for a price item or price item bundle:

1. Click the **Divisions** or **Show All** link in the **Section** pane when you are defining, editing, or copying a price item or price item bundle.

The **Divisions** section appears.

2. Click the **Add** (  ) icon in the **SQIs** column corresponding to the division for which you want to define division-specific price item or price item bundle SQIs.

The following field appears in the grid:

Field Name	Field Description	Mandatory (Yes or No)
SQI	Used to indicate the SQI to which you want to associate the price item or price item bundle in the division.  <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>The <b>Search</b>  icon appears corresponding to the <b>SQI</b> field. On clicking the <b>Search</b> icon, the <b>Service Quantity Identifier Search</b> window appears.</p> <p>On indicating the SQI, the description of the SQI appears corresponding to the <b>SQI</b> field.</p> </div>	Yes (Conditional)  <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This field is required when you are defining a division-specific SQI for the price item or price item bundle.</p> </div>

- Enter the required details in the **Divisions** section.
- If you want to define more than one division-specific SQI for the price item or price item bundle, click the **Add**  icon and then repeat step 3.

**Note:** However, if you want to remove a division-specific SQI from the price item or price item bundle, click the **Delete**  icon corresponding to the SQI.

- Click **Save**.

The division-specific SQIs are defined for the price item or price item bundle.

## **Defining Division-Specific Characteristics for a Price Item or Price Item Bundle**

### **Prerequisites**

To define division-specific characteristics for a price item or price item bundle, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Division/Price Item Combination**)
- Price items or price item bundles associated to the division to which the user belongs

### **Procedure**

To define division-specific characteristics for a price item or price item bundle:

- Click the **Divisions** or **Show All** link in the **Section** pane when you are defining, editing, or copying a price item or price item bundle.

The **Divisions** section appears.

- Click the **Add** () icon in the **Division Characteristics** column corresponding to the division for which you want to define division-specific price item or price item bundle characteristics.

The following fields appear in the grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the price item or price item bundle characteristic is effective for the division.	Yes (Conditional)  <b>Note:</b> This field is required when you are defining a division-specific characteristic for the price item or price item bundle.
Characteristic Type	Used to indicate the characteristic type.  <b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Division/Price Item Combination</b> .	Yes (Conditional)  <b>Note:</b> This field is required when you are defining a division-specific characteristic for the price item or price item bundle.
Characteristic Value	Used to specify the value for the characteristic type.  <b>Note:</b> If you select a predefined characteristic type, the <b>Search</b> (  ) icon appears corresponding to the <b>Characteristic Value</b> field. On clicking the <b>Search</b> icon, the <b>Predefined Characteristic Search</b> window appears.  On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	Yes (Conditional)  <b>Note:</b> This field is required when you are defining a division-specific characteristic for the price item or price item bundle.

- Enter the required details in the **Divisions** section.
- If you want to define more than one division-specific characteristic for the price item or price item bundle, click the **Add** () icon and then repeat step 3.

**Note:** However, if you want to remove a division-specific characteristic from the price item or price item bundle, click the **Delete** () icon corresponding to the characteristic.

- Click **Save**.

The division-specific characteristics are defined for the price item or price item bundle.

## Defining Division-Specific Accrual Type Criteria for a Price Item or Price Item Bundle

### Prerequisites

To define division-specific accrual type criteria for a price item or price item bundle, you should have:

- Accrual types defined in the application
- Price items or price item bundles associated with the division to which the user belongs

### Procedure

To define division-specific accrual type criteria for a price item or price item bundle:

1. Click the **Divisions** or **Show All** link in the **Section** pane when you are defining, editing, or copying a price item or price item bundle.

The **Divisions** section appears.

2. Click the **Add** () icon in the **Accrual Type Criteria** column corresponding to the division for which you want to define a division-specific price item or price item bundle accrual type criteria.

The following field appears in the grid:

Field Name	Field Description	Mandatory (Yes or No)
Accrual Type Criteria	<p>Used to indicate the accrual type to which you want to associate the price item or price item bundle in the division. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Actual</b> - Used to create accrual for the price item or price item bundle based on the current trial bill data in a division.</li> <li>• <b>Historical</b> - Used to create accrual for the price item or price item bundle based on the historical bill data in a division.</li> <li>• <b>Not Applicable</b> - Used to create accrual for the price item or price item bundle based on the current trial bill data as well as the historical bill data in a division.</li> </ul> <p><b>Note:</b> By default, the <b>Not Applicable</b> option is selected.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required when you are defining a division-specific accrual type criteria for the price item or price item bundle.</p>

3. Enter the required details in the **Divisions** section.
4. If you want to define more than one division-specific accrual type criteria for the price item or price item bundle, click the **Add** () icon corresponding to the respective division and then repeat step 3.

**Note:** However, if you want to remove a division-specific accrual type criteria from the price item or price item bundle, click the **Delete** () icon corresponding to the respective division.

5. Click **Save**.

The division-specific accrual type criteria are defined for the price item or price item bundle.

**Defining a Characteristic for a Price Item or Price Item Bundle****Prerequisites**

To define a characteristic for a price item or price item bundle, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Price Item**)

**Procedure**

To define a characteristic for a price item or price item bundle:

1. Click the **Price Item Characteristics** or **Show All** link in the **Section** pane when you are defining, editing, or copying a price item or price item bundle.

The **Price Item Characteristics** section appears. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the price item or price item bundle.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the price item or price item bundle.
Characteristic Type	Used to indicate the characteristic type. <b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Price Item</b> .	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the price item or price item bundle.

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Value	<p>Used to specify the value for the characteristic type.</p> <p><b>Note:</b></p> <p>If you select a predefined characteristic type, the <b>Search</b>  icon appears corresponding to the <b>Characteristic Value</b> field. On clicking the <b>Search</b> icon, the <b>Predefined Characteristic Search</b> window appears.</p> <p>On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required when you are defining a characteristic for the price item or price item bundle.</p>

- Enter the required details in the **Price Item Characteristics** section.
- If you want to define more than one characteristic for the price item or price item bundle, click the **Add**  icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from the price item or price item bundle, click the **Delete**  icon corresponding to the characteristic.

- Click **Save**.

The characteristics are defined for the price item or price item bundle.

### **Related Topics**

For more information on...	See...
How to define a price item or price item bundle	<a href="#">Defining a Price Item or Price Item Bundle</a> on page 322
How to edit a price item or price item bundle	<a href="#">Editing a Price Item or Price Item Bundle</a> on page 346
How to copy a price item or price item bundle	<a href="#">Copying a Price Item or Price Item Bundle</a> on page 335

### **Copying a Price Item or Price Item Bundle**

Instead of creating a price item or price item bundle from scratch, you can create a new price item or price item bundle using an existing price item or price item bundle. This is possible through copying a price item or price item bundle. On copying a price item or price item bundle, the details including the parameters, divisions, division-specific characteristics, division-specific SQIs, and characteristics are copied to the new price item or price item bundle. You can then edit the details, if required.

### **Prerequisites**

To copy a price item or price item bundle, you should have:

- Price item or price item bundle (whose copy you want to create) defined in the application
- Price item or price item bundle (whose copy you want to create) associated with the division to which the user belongs
- Contract types defined in the application
- Value defined for the **Default Contract Type** option type in the **Pricing Configuration (C1\_PRICING)** feature configuration

**Procedure**

To copy a price item or price item bundle:

1. Search for the price item or price item bundle in the **Price Item** screen.
2. In the **Search Results** section, click the **Copy**  icon in the **Copy** column corresponding to the price item or price item bundle using which you want to define a new price item or price item bundle.

The **Price Item** screen appears. It contains the following sections:

- **Main** – Used to specify basic details about the price item or price item bundle.
- **Parameters** – Used to associate a parameter with the price item or price item bundle. These associated parameters are then used for aggregating transactions and/or for defining the price item pricing.

**Note:**

The **Parameters** section appears in the **Price Item** screen only when the **Multi Price Parameter** option type of the **Multi Parameter Based Pricing (C1\_PPARM\_FLG)** feature configuration is set to **True**.

You cannot associate parameters to ratio and phantom price item bundles. Therefore, while defining ratio and phantom price item bundles, the **Parameters** section does not appear in the **Price Item** screen.

- **Divisions** – Used to associate the price item or price item bundle with one or more divisions. It also allows you to define division-specific SQIs, division-specific accrual type criteria, and division-specific characteristics for the price item or price item bundle.
- **Price Item Characteristics** – Used to define characteristics (which are applicable across divisions) for the price item or price item bundle.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Price Item	Used to specify the price item or price item bundle.	Yes
Description	Used to specify the description for the price item or price item bundle.	Yes
Price Item Usage	Used to indicate whether the price item or price item bundle is used for only pricing or pricing and billing. The valid values are: <ul style="list-style-type: none"> <li>• Pricing</li> <li>• Pricing and Billing</li> </ul>	Yes
Price Item Type	Used to indicate the type of the price item or price item bundle. The valid values are: <ul style="list-style-type: none"> <li>• Rate</li> <li>• Fees</li> </ul> <div data-bbox="548 1640 1105 1892" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>This field appears only when you select the <b>Pricing</b> option from the <b>Price Item Usage</b> list.</p> <p>You cannot define a price item bundle when it is available for only pricing and when the price item type is set to <b>Rate</b>.</p> </div>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Bundle	Used to indicate whether you want to define a price item bundle. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	Yes
Bundle Type	Used to indicate the type of the price item bundle. The valid values are: <ul style="list-style-type: none"> <li>• Phantom</li> <li>• Ratio</li> <li>• Regular</li> </ul> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This field is enabled only when you select the <b>Pricing and Billing</b> option from the <b>Price Item Usage</b> list and the <b>Yes</b> option from the <b>Bundle</b> list.</p> <p>All the above mentioned values are available in the list when you are defining a price item bundle which is available for pricing and billing. However, when you are defining a price item bundle which is available for only pricing and when the price item type is set to <b>Fees</b>, you can only define a regular price item bundle. Therefore, by default, the value is set to <b>Regular</b> when you select the <b>Pricing</b> option from the <b>Price Item Usage</b> list and the <b>Yes</b> option from the <b>Bundle</b> list.</p> <p>You cannot define a price item bundle when it is available for only pricing and when the price item type is set to <b>Rate</b>.</p> </div>	Yes (Conditional) <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> This field is required when you are creating a price item bundle.</p> </div>
Global Price List	Used to indicate whether the price item or price item bundle can be assigned to a global price list. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	Yes
Contract Type	Used to indicate the contract type that you want to associate with the price item or price item bundle. <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> This field appears only when you select the <b>Pricing and Billing</b> option from the <b>Price Item Usage</b> list.</p> <p>The <b>Search</b>  icon appears corresponding to the <b>Contract Type</b> field. On clicking the <b>Search</b> icon, the <b>Contract Type Search</b> window appears.</p> </div>	Yes

3. Enter the required details in the **Main** section.
4. Associate, edit, or disassociate parameters from the price item or price item bundle, if required.

5. Associate or disassociate the price item or price item bundle from the required divisions.
6. Define or remove the division-specific SQIs from the price item or price item bundle, if required.
7. Define or remove the division-specific characteristics for the price item or price item bundle, if required.
8. Define, edit, or remove the division-specific accrual type criteria for the price item or price item bundle, if required.
9. Define, edit, or remove characteristics from the price item or price item bundle, if required.
10. Click **Save**.

The new price item is defined.

**Note:**

When you define a new price item or price item bundle which is available for only pricing, the contract type defined in the **Default Contract Type** option type of the **Pricing Configuration (C1\_PRICING)** feature configuration is automatically associated to the price item or price item bundle.

The system allows you to add a price item to the new price item bundle only when:

- Price item and price item bundle (whose copy you are creating) are associated to the same contract type.
- Price item is associated with the division to which the price item bundle (whose copy you are creating) is associated.
- Another price item bundle with the same price item, relationship type, and date range combination does not exist in the system.

**Viewing the Price Item or Price Item Bundle Details**

**Procedure**

To view the details of a price item or price item bundle:

1. Search for the price item or price item bundle in the **Price Item** screen.

- In the **Search Results** section, click the link in the **Price Item Information** column corresponding to the price item or price item bundle whose details you want to view.

The **Price Item** screen appears. It contains the following zones:

- [Price Item](#) on page 340
  - [Parameters](#) on page 342
  - [Predefined Parameter Values for Price Item](#) on page 342
  - [Divisions](#) on page 343
  - [Division-Specific SQIs for Price Item](#) on page 343
  - [Division-Specific Characteristics for Price Item](#) on page 344
  - [Division-Specific Accrual Type Criteria for Price Item](#) on page 344
  - [Price Item Relationship](#) on page 345
- View the basic details and characteristics of the price item or price item bundle in the **Price Item** zone.
  - View the parameters associated with the price item or price item bundle in the **Parameters** zone.
  - View the valid predefined parameter values of the price item or price item bundle in the **Predefined Parameter Values for Price Item** zone.
  - View the divisions to which the price item or price item bundle is associated in the **Divisions** zone.
  - View the division-specific SQIs of the price item or price item bundle in the **Division-Specific SQIs for Price Item** zone.
  - View the division-specific characteristics of the price item or price item bundle in the **Division-Specific Characteristics for Price Item** zone.
  - View the division-specific accrual type criteria of the price item or price item bundle in the **Division-Specific Accrual Type Criteria for Price Item** zone.
  - View the price items or price item bundles related to the parent price item or price item bundle in the **Price Item Relationship** zone.

<b>Price Item</b> screen	<a href="#">Price Item (Used for Viewing)</a> on page 339

## Price Item (Used for Viewing)

The **Price Item** screen allows you to view the details of the price item or price item bundle. It also allows you to edit the details of the price item or price item bundle. It contains the following zones:

- **Price Item** – Displays the basic details of the price item or price item bundle.
- **Parameters** – Lists the parameters which are associated with the price item or price item bundle.
- **Predefined Parameter Values for Price Item** – Lists the predefined parameter values which are valid for the price item or price item bundle.

**Note:** By default, the **Predefined Parameter Values for Price Item** zone does not appear in the **Price Item** screen. It appears only when you click the **Broadcast**  icon corresponding to a parameter in the **Parameters** zone.

- **Divisions** – Lists the divisions to which the price item or price item bundle is associated.
- **Division-Specific SQIs for Price Item** – Lists the SQIs to which the price item or price item bundle is associated in the respective division.

**Note:** By default, the **Division-Specific SQIs for Price Item** zone does not appear in the **Price Item** screen. It appears only when you click the **Broadcast**  icon corresponding to a division in the **Divisions** zone.

- **Division-Specific Characteristics for Price Item** – Lists the characteristics which are defined for the price item or price item bundle in the respective division.

**Note:** By default, the **Division-Specific Characteristics for Price Item** zone does not appear in the **Price Item** screen. It appears only when you click the **Broadcast**  icon corresponding to a division in the **Divisions** zone.

- **Division-Specific Accrual Type Criteria for Price Item** – Indicates the accrual type to which the price item or price item bundle is associated in the respective division.

**Note:** By default, the **Division-Specific Accrual Type Criteria for Price Item** zone does not appear in the **Price Item** screen. It appears only when you click the **Broadcast**  icon corresponding to a division in the **Divisions** zone.

- **Price Item Relationship** – Lists the price items or price item bundles which are associated with the parent price item or added in the price item bundle.

## Price Item

The **Price Item** zone displays the details of the price item or price item bundle. It contains the following sections:

- **Main** – Displays basic information about the price item or price item bundle. It contains the following fields:

Field Name	Field Description
Price Item	Displays information about the price item or price item bundle.
Description	Displays the description of the price item or price item bundle.
Price Item Usage	Indicates whether the price item or price item bundle is used for only pricing or pricing and billing. The valid values are: <ul style="list-style-type: none"> <li>• Pricing</li> <li>• Pricing and Billing</li> </ul>
Price Item Type	Indicates the type of the price item or price item bundle. The valid values are: <ul style="list-style-type: none"> <li>• Rate</li> <li>• Fees</li> </ul> <p><b>Note:</b> This field appears only when you select the <b>Pricing</b> option from the <b>Price Item Usage</b> list.</p>
Bundle	Indicates whether the price item is a bundle. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>

Field Name	Field Description
Bundle Type	<p>Indicates the type of the price item bundle. The valid values are:</p> <ul style="list-style-type: none"> <li>• Phantom</li> <li>• Ratio</li> <li>• Regular</li> </ul> <p><b>Note:</b> This field appears only when you select the <b>Yes</b> option from the <b>Bundle</b> list.</p>
Global Price List	<p>Indicates whether the price item or price item bundle is assigned to a global price list. The valid values are:</p> <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>
Contract Type	Displays the contract type to which the price item or price item bundle is associated.

- **Price Item Characteristics** – Lists the characteristics defined for the price item or price item bundle. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the characteristic is effective for the price item or price item bundle.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- **Record Actions** – This section contains the following button:

Button Name	Button Description
Edit	Used to edit the details of the price item or price item bundle.

- **Record Information** – This section contains the following field:

Field Name	Field Description
Business Object	<p>Indicates the business object using which the price item or price item bundle is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.</p>

## Parameters

The **Parameters** zone lists the parameters to which the price item or price item bundle is associated. It contains the following columns:

Column Name	Column Description
Effective Start Date	Displays the date from when the parameter is effective for the price item or price item bundle.
Effective End Date	Displays the date till when the parameter is effective for the price item or price item bundle.
Parameter	Indicates the parameter to which the price item or price item bundle is associated. <b>Note:</b> It has a link. On clicking the link, the <b>Parameter</b> screen appears where you can view the details of the respective parameter.
Business Label	Displays the business label of the parameter. If the business label is defined for a parameter, the business label appears instead of the parameter name.
Display Order	Indicates the order in which the parameter and its value should be displayed in the price item parameter information string across the application.
Parameter Usage	Indicates whether the parameter is used for aggregation and/or for defining the pricing of the price item or price item bundle. The valid values are: <ul style="list-style-type: none"> <li>• <b>Aggregation</b> – Indicates that the parameter is used for aggregating transactions.</li> <li>• <b>Pricing</b> – Indicates that the parameter is used for aggregating transactions and defining the price item pricing.</li> </ul>
Mandatory	Indicates whether the parameter is mandatory while defining the price item pricing.
Priority	Indicates the priority in which optional parameters should be considered while determining best fit price for the price item or price item bundle.

On clicking the **Broadcast**  icon corresponding to a parameter, the **Predefined Parameter Values for Price Item** zone appears where you can view the valid predefined parameter values of the price item or price item bundle.

### Predefined Parameter Values for Price Item

The **Predefined Parameter Values for Price Item** zone lists the predefined parameter values which are valid for the price item or price item bundle. It contains the following columns:

Column Name	Column Description
Parameter Value	Displays the predefined parameter value.
Description	Displays the description of the predefined parameter value.

By default, the **Predefined Parameter Values for Price Item** zone does not appear in the **Price Item** screen. It appears only when you click the **Broadcast**  icon corresponding to a parameter in the **Parameters** zone.

### Related Topics

For more information on...	See...
<b>Price Item</b> screen	<a href="#">Price Item (Used for Viewing)</a> on page 339

### Divisions

The **Divisions** zone lists the divisions to which the price item or price item bundle is associated. It contains the following column:

Column Name	Column Description
Division	Indicates the division to which the price item or price item bundle is associated.  <b>Note:</b> It has a link. On clicking the link, the <b>Division</b> screen appears where you can view the details of the respective division.

On clicking the **Broadcast**  icon corresponding to a division, the **Division-Specific SQIs for Price Item**, **Division-Specific Characteristics for Price Item**, and **Division-Specific Accrual Type Criteria for Price Item** zones appear.

You can filter the list using the **Division** field available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters**  icon in the upper right corner of this zone.

### Division-Specific SQIs for Price Item

The **Division-Specific SQIs for Price Item** zone lists the SQIs to which the price item or price item bundle is associated in a specific division. It contains the following column:

Column Name	Column Description
SQI	Indicates the SQI to which the price item or price item bundle is associated in the division.

By default, the **Division-Specific SQIs for Price Item** zone does not appear in the **Price Item** screen. It appears only when you click the **Broadcast**  icon corresponding to a division in the **Divisions** zone.

### Division-Specific Characteristics for Price Item

The **Division-Specific Characteristics for Price Item** zone lists the characteristics defined for a price item or price item bundle in a specific division. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the price item or price item bundle characteristic is effective for the division.
Characteristic Type	Indicates the characteristic type.  <b>Note:</b> It has a link. On clicking the link, the <b>Characteristic Type</b> screen appears where you can view the details of the respective characteristic type.
Characteristic Value	Displays the value of the characteristic type.

By default, the **Division-Specific Characteristics for Price Item** zone does not appear in the **Price Item** screen. It appears only when you click the **Broadcast**  icon corresponding to a division in the **Divisions** zone.

### Division-Specific Accrual Type Criteria for Price Item

The **Division-Specific Accrual Type Criteria for Price Item** zone lists the accrual type to which the price item or price item bundle is associated in a specific division. It contains the following column:

Field Name	Field Description	Mandatory (Yes or No)
Accrual Type Criteria	Indicates the accrual type to which you want to associate the price item or price item bundle in the division. The valid values are: <ul style="list-style-type: none"> <li>• <b>Actual</b> <ul style="list-style-type: none"> <li>- Indicates the accrual created for the price item or price item bundle is based on the current trial bill data in a division.</li> </ul> </li> <li>• <b>Historical</b> - Indicates the accrual created for the price item or price item bundle is based on the historical bill data in a division.</li> <li>• <b>Not Applicable</b> - Indicates the accrual created for the price item or price item bundle is based on the current trial bill data as well as the historical bill data in a division.</li> </ul> <p><b>Note:</b> By default, the <b>Not Applicable</b> option is selected.</p>	Yes (Conditional)  <b>Note:</b> This field is required when you are defining a division-specific accrual type criteria for the price item or price item bundle.

By default, the **Division-Specific Accrual Type Criteria for Price Item** zone does not appear in the **Price Item** screen. It appears only when you click the **Broadcast**  icon corresponding to a division in the **Divisions** zone.

### Related Topics

For more information on...	See...
<b>Price Item</b> screen	<a href="#">Price Item (Used for Viewing)</a> on page 339

### Price Item Relationship

The **Price Item Relationship** zone lists the price items or price item bundles which are associated with the parent price item or added to the price item bundle. It contains the following columns:

Column Name	Column Description
Price Item Information	Displays information about the price item or price item bundle.  <b>Note:</b> It has a link. On clicking the link, the <b>Price Item</b> screen appears where you can view the details of the respective price item.
Effective Start Date	Displays the date from when the price item or price item bundle is associated with the parent price item or added to the price item bundle.
Effective End Date	Displays the date till when the price item or price item bundle is associated with the parent price item or added to the price item bundle.
Relationship Type	Indicates how the price item or price item bundle is related with the parent price item or price item bundle. The valid values are: <ul style="list-style-type: none"> <li>• Bundle</li> <li>• Custom</li> <li>• Denominator</li> <li>• Numerator</li> <li>• Other</li> <li>• Price Item</li> <li>• Service</li> <li>• Service Group</li> </ul>
Bundle Type	Indicates the type of the price item bundle. The valid values are: <ul style="list-style-type: none"> <li>• Phantom</li> <li>• Ratio</li> <li>• Regular</li> </ul> <b>Note:</b> The data appears in this column only when the associated price item is a bundle.

You can filter the list using various search criteria (such as, **Price Item**, **Description**, **Effective Start Date**, and **Relationship Type**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters**  icon in the upper right corner of this zone.

You can change the layout of this zone. For more information on how to change the layout, see [Changing the Layout](#) on page 2882.

You can associate or disassociate a price item or price item bundle from a parent price item and add or remove a price item or price item bundle from a price item bundle by clicking the **Add/Edit** link in the upper right corner of this zone.

### Editing a Price Item or Price Item Bundle

#### Prerequisites

To edit a price item or price item bundle, you should have:

- Contract types defined in the application
- Value defined for the **Default Contract Type** option type in the **Pricing Configuration (C1\_PRICING)** feature configuration

#### Procedure

To edit a price item or price item bundle:

1. Search for the price item or price item bundle in the **Price Item** screen.
2. In the **Search Results** section, click the link in the **Price Item Information** column corresponding to the price item or price item bundle whose details you want to edit.

The **Price Item** screen appears.

3. Click the **Edit** button in the **Price Item** zone.

The **Price Item** screen appears. It contains the following sections:

- **Main** – Used to specify basic details about the price item or price item bundle.
- **Parameters** – Used to associate a parameter with the price item or price item bundle. These associated parameters are then used for aggregating transactions and/or for defining the price item pricing.

#### **Note:**

The **Parameters** section appears in the **Price Item** screen only when the **Multi Price Parameter** option type of the **Multi Parameter Based Pricing (C1\_PPARM\_FLG)** feature configuration is set to **True**.

You cannot associate parameters to ratio and phantom price item bundles. Therefore, while editing the ratio and phantom price item bundles, the **Parameters** section does not appear in the **Price Item** screen.

- **Divisions** – Used to associate the price item or price item bundle with one or more divisions. It also allows you to define division-specific SQIs, division-specific accrual type criteria, and division-specific characteristics for the price item or price item bundle.
- **Price Item Characteristics** – Used to define characteristics (which are applicable across divisions) for the price item or price item bundle.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Price Item	Displays the price item or price item bundle.	Not applicable
Description	Used to specify the description for the price item or price item bundle.	Yes
Price Item Usage	Used to indicate whether the price item or price item bundle is used for only pricing or pricing and billing. The valid values are: <ul style="list-style-type: none"> <li>• Pricing</li> <li>• Pricing and Billing</li> </ul> <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"> <b>Note:</b> The system does not allow you to change the price item usage from <b>Pricing and Billing</b> to <b>Pricing</b> for a price item or price item bundle. </div>	Yes
Price Item Type	Used to indicate the type of price item or price item bundle. The valid values are: <ul style="list-style-type: none"> <li>• Rate</li> <li>• Fees</li> </ul> <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"> <b>Note:</b> This field appears only when the <b>Price Item Usage</b> field is set to <b>Pricing</b>. </div>	Yes
Bundle	Indicates whether the price item is a bundle. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
Bundle Type	<p>Used to indicate the type of the price item bundle. The valid values are:</p> <ul style="list-style-type: none"> <li>• Phantom</li> <li>• Ratio</li> <li>• Regular</li> </ul> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> This field is enabled only when you select the <b>Pricing and Billing</b> option from the <b>Price Item Usage</b> list and the <b>Yes</b> option from the <b>Bundle</b> list.</p> <p>All the above mentioned values are available in the list when you are editing a price item bundle which is available for pricing and billing. However, when you are editing a price item bundle which is available for only pricing and when the price item type is set to <b>Fees</b>, you can only define a regular price item bundle. Therefore, by default, the value is set to <b>Regular</b> when the <b>Pricing</b> option is selected from the <b>Price Item Usage</b> list and the <b>Yes</b> option from the <b>Bundle</b> list.</p> </div>	<p>Yes (Conditional)</p> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> This field is required when you are editing a price item bundle.</p> </div>
Global Price List	<p>Used to indicate whether the price item or price item bundle can be assigned to a global price list. The valid values are:</p> <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	Yes
Contract Type	<p>Used to indicate the contract type that you want to associate with the price item or price item bundle.</p> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> This field appears only when the <b>Price Item Usage</b> field is set to <b>Pricing and Billing</b>.</p> <p>The <b>Search</b>  icon appears corresponding to the <b>Contract Type</b> field. On clicking the <b>Search</b> icon, the <b>Contract Type Search</b> window appears.</p> </div>	Yes

4. Modify the required details in the **Main** section.
5. Associate or disassociate a parameter from the price item or price item bundle, if required.

**Note:**

You can edit the parameter details and remove a parameter from the price item or price item bundle only when the parameter or any other parameter from the same date range is not yet used for aggregation or for defining the price item pricing.

You can add a parameter which will be used for aggregation (in other words, where the **Parameter Usage** field is set to **Aggregation**) anytime, whenever required. However, you can add a parameter which will be used for pricing (in other words, where the **Parameter Usage** field is set to **Pricing**) only when any other parameter from the same date range is not yet used for aggregation or for defining the price item pricing.

6. Associate or disassociate the price item or price item bundle from the divisions, if required.

**Note:** If the price item or price item bundle is associated to a division to which you do not have access, then the corresponding row in the **Divisions** section is grayed out.

7. Define, edit, or remove division-specific SQIs from the price item or price item bundle, if required.
8. Define, edit, or remove division-specific characteristics from the price item or price item bundle, if required.
9. Define, edit, or remove division-specific accrual type criteria from the price item or price item bundle, if required.
10. Define, edit, or remove characteristics from the price item or price item bundle, if required.
11. Click **Save**.

The changes made to the price item or price item bundle are saved.

**Price Item Relationship**

Oracle Revenue Management and Billing allows you to associate two or more price items with each other, and thereby group them for various reasons, such as reporting, billing, and so on. In other words, you can define a price item to price

item relationship. The price item to which a set of price items are associated is called a parent price item. You can also create a price item bundle and then add price items to the price item bundle. The main objective behind grouping price items or creating price item bundles is to offer discounts based on the volume across price items, facilitate minimum or maximum charge calculations across price items, or offer common price across price items.

While associating a price item with a parent price item or adding a price item to a price item bundle, you need to specify how the price item is related to the parent price item or price item bundle. You can add a price item to a price item bundle using the following relationship types:

- **Bundle** – Used while adding price items in the regular and phantom price item bundles.
- **Denominator** – Used while adding price items in the ratio price item bundles.
- **Numerator** – Used while adding price items in the ratio price item bundles.

However, you can associate a price item or price item bundle with a parent price item using the following relationship types:

- Other
- Custom
- Price Item
- Service
- Service Group

**Note:**

You cannot add same set of price items using the same relationship type while defining two or more bundles with the same bundle type. For example, you cannot add P1 and P2 using the relationship type as Bundle while defining regular bundles named BUN1 and BUN2. However, you can use same set of price items while defining two or more price item to price item relationships.

If the multi parameter based pricing feature is enabled, you can add same set of price item and price item parameter combination (using the same relationship type) in more than one bundle (having the same bundle type) provided the price item parameter values are different.

The **Price Item Relationship** screen allows you to view the price items that are already associated with the parent price item or added to the price item bundle. It also allows you to associate or disassociate a price item or price item bundle from the parent price item, or add or remove a price item or price item bundle from the price item bundle. This screen consists of the following zone:

- [Assigned Price Items](#) on page 350

### Assigned Price Items

The **Assigned Price Items** zone lists the price items or price item bundles that are already associated with the parent price item or added to the price item bundle. You will not find any records in this zone if the parent price item does not have any price item or price item bundle associated with it or if the price item bundle does not have any price item or price item bundle added to it. It contains the following sections:

- **Search Criteria** – The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Price Item	Used to search a particular price item or price item bundle which is associated with the parent price item or added to the price item bundle.	No
Description	Used to search price items or price item bundles with a particular description.	No

Field Name	Field Description	Mandatory (Yes or No)
Effective Start Date	Used to search price items or price item bundles which are associated with the parent price item or added to the price item bundle from a particular date.	No
Relationship Type	Used to search price items or price item bundles which are related to the parent price item or added to the price item bundle using a particular relationship type. The valid values are: <ul style="list-style-type: none"> <li>• Bundle</li> <li>• Custom</li> <li>• Denominator</li> <li>• Numerator</li> <li>• Other</li> <li>• Price Item</li> <li>• Service</li> <li>• Service Group</li> </ul>	No

- **Search Results** – On clicking the **Search** button, the search results are filtered based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Price Item Information	Displays information about the price item or price item bundle. <div style="border: 1px solid black; padding: 5px; margin-top: 5px;"> <p><b>Note:</b> It has a link. On clicking the link, the <b>Price Item</b> screen appears where you can view the details of the respective price item or price item bundle.</p> </div>
Effective Start Date	Displays the date from when the price item or price item bundle is associated with the parent price item or added to the price item bundle.
Effective End Date	Displays the date till when the price item or price item bundle is associated with the parent price item or added to the price item bundle.

Column Name	Column Description
Relationship Type	<p>Indicates how the price item or price item bundle is related to the parent price item or price item bundle. The valid values are:</p> <ul style="list-style-type: none"> <li>• Bundle</li> <li>• Custom</li> <li>• Denominator</li> <li>• Numerator</li> <li>• Other</li> <li>• Price Item</li> <li>• Service</li> <li>• Service Group</li> </ul> <p><b>Note:</b> The <b>Bundle</b> relationship type is used while adding price items in the regular and phantom price item bundles. The <b>Denominator</b> and <b>Numerator</b> relationship types are used while adding price items in the ratio price item bundles. And, all other relationship types, such as <b>Other</b>, <b>Custom</b>, <b>Price Item</b>, <b>Service</b>, and <b>Service Group</b> are used while associating price items to the parent price item.</p>
Price Item Parameters	Indicates the parameters based on which you want to determine pricing for the price item.

You can associate or disassociate a price item or price item bundle from a parent price item, or add or remove a price item or price item bundle from a price item bundle by clicking the **Add/Edit** link in the upper right corner of this zone.

## Viewing the Price Items or Price Item Bundles Associated with a Parent Price Item

### Procedure

To view the price items or price item bundles associated with a parent price item:

1. Search for the price item in the **Price Item** screen.
2. In the **Search Results** section, click the **Price Item Relationship** (☰) icon in the **Price Item Relationship** column corresponding to the price item whose relationship details you want to view.

The **Price Item Relationship** screen appears.

3. View the price items or price item bundles that are associated with the parent price item in the **Assigned Price Items** zone.

## Viewing the Price Items or Price Item Bundles Added to a Price Item Bundle

### Procedure

To view the price items or price item bundles added to a price item bundle:

1. Search for the price item bundle in the **Price Item** screen.
2. In the **Search Results** section, click the **Price Item Relationship** (☰) icon in the **Price Item Relationship** column corresponding to the price item bundle whose relationship details you want to view.

The **Price Item Relationship** screen appears.

3. View the price items or price item bundles that are added to the price item bundle in the **Assigned Price Items** zone.

### Related Topics

## Associating a Price Item or Price Item Bundle with a Parent Price Item

### Prerequisites

To associate a price item or price item bundle with a parent price item, you should have:

- Parent price item associated with the division to which the user belongs
- Price item or price item bundle associated to at least one division to which the parent price item belongs.

### Procedure

To associate a price item or price item bundle with a parent price item:

1. Search for the parent price item in the **Price Item** screen.
2. In the **Search Results** section, click the **Price Item Relationship** (🔍) icon in the **Price Item Relationship** column corresponding to the parent price item to which you want to associate a price item or price item bundle.

The **Price Item Relationship** screen appears.

3. Click the **Add/Edit** link in the upper right corner of the **Assigned Price Items** zone.

The **Price Item Relationship** screen appears. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Price Item	Used to indicate the price item or price item bundle that you want to associate with the parent price item.  <b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Price Item Search</b> window appears.	Yes
Relationship Type	Used to indicate how the price item or price item bundle is related with the parent price item. The valid values are: <ul style="list-style-type: none"> <li>• Bundle</li> <li>• Custom</li> <li>• Denominator</li> <li>• Numerator</li> <li>• Other</li> <li>• Price Item</li> <li>• Service</li> <li>• Service Group</li> </ul> <b>Note:</b> You can use the <b>Other, Custom, Price Item, Service, or Service Group</b> relationship type while associating a price item or price item bundle to the parent price item.	Yes
Effective Start Date	Used to specify the date from when you want to associate the price item or price item bundle with the parent price item.  <b>Note:</b> The effective start date cannot be later than the effective end date.	Yes
Effective End Date	Used to specify the date till when you want to associate the price item or price item bundle with the parent price item.  <b>Note:</b> The effective end date cannot be earlier than the effective start date.	No

Field Name	Field Description	Mandatory (Yes or No)
Price Item Parameters	<p>Used to specify the parameters and their values based on which you want to determine pricing for the price item or price item bundle.</p> <p><b>Note:</b></p> <p>This field appears only when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>True</b>.</p> <p>The <b>Search</b> () icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Price Item Parameters</b> screen appears.</p> <p>You must not use the <b>Price Item Parameters</b> field while associating a price item or price item bundle with a parent price item. This is because it is designed to be used while adding a price item or price item bundle to the ratio and phantom price item bundles.</p>	Not applicable
Characteristics	<p>On clicking the <b>Add</b> () icon, you can define relationship-specific characteristics for the price item or price item bundle.</p>	Not applicable

4. Enter the required details in the **Price Item Relationship** screen.

**Note:** You can associate the same set of price items or price item bundles using the same relationship type to more than one parent price item. For example, you can associate the **P1** and **P2** price items using the **Service** relationship type to the **PP1** and **PP2** price items.

5. Define relationship-specific characteristics for the price item or price item bundle, if required.
6. If you want to associate more than one price item or price item bundle with the parent price item, click the **Add** () icon and then repeat the steps from 4 to 5.

**Note:** However, if you want to disassociate a price item or price item bundle from a parent price item, click the **Delete** () icon corresponding to the price item or price item bundle.

7. Click **Save**.

The price item or price item bundle is associated with the parent price item.

## Adding a Price Item or Price Item Bundle to a Price Item Bundle

### Prerequisites

To add a price item or price item bundle to a price item bundle, you should have:

- Price item bundle (to which you want to add a price item or price item bundle) associated with the division to which the user belongs
- Price item bundle (to which you want to add a price item or price item bundle) and price item or price item bundle (which you want to add) associated to the same contract type
- Parameters associated with the price item or price item bundle (which you want to add) when you want to determine pricing for the price item based on the parameters in the ratio and phantom price item bundles
- Regular price item bundle (to which you want to add a price item or price item bundle) and price item or price item bundle (which you want to add) associated with the same parameters

**Note:** Not only the parameters, but also their details such as parameter usage, mandatory flag, and priority should be identical. Also, the date from when the parameters are effective for the price item bundle (to which you want to add a price item or price item bundle) should be earlier than or equal to the date from when the parameters are effective for the price item or price item bundle (which you want to add).

- Price item or price item bundle (which you want to add) associated to at least one division to which the price item bundle (to which you want to add a price item or price item bundle) belongs

### Procedure

To add a price item or price item bundle to a price item bundle:

1. Search for the price item bundle in the **Price Item** screen.
2. In the **Search Results** section, click the **View** (🔍) icon in the **Price Item Relationship** column corresponding to the price item bundle to which you want to add a price item or price item bundle.

The **Price Item Relationship** screen appears.

3. Click the **Add/Edit** link in the upper right corner of the **Assigned Price Items** zone.

The **Price Item Relationship** screen appears. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Price Item	Used to indicate the price item or price item bundle that you want to add to the price item bundle.  <b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Price Item</b> field. On clicking the <b>Search</b> icon, the <b>Price Item Search</b> window appears.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Relationship Type	<p>Used to indicate how the price item or price item bundle is related to the price item bundle. The valid values are:</p> <ul style="list-style-type: none"> <li>• Bundle</li> <li>• Custom</li> <li>• Denominator</li> <li>• Numerator</li> <li>• Other</li> <li>• Price Item</li> <li>• Service</li> <li>• Service Group</li> </ul> <p><b>Note:</b> You can use the <b>Bundle</b> relationship type while adding a price item or price item bundle in the regular and phantom price item bundles. However, you can use the <b>Denominator</b> and <b>Numerator</b> relationship type while adding a price item or price item bundle in the ratio price item bundles.</p>	Yes
Effective Start Date	<p>Used to specify the date from when the price item or price item bundle is added to the price item bundle.</p> <p><b>Note:</b> The effective start date cannot be later than the effective end date.</p>	Yes
Effective End Date	<p>Used to specify the date till when the price item or price item bundle is added to the price item bundle.</p> <p><b>Note:</b> The effective end date cannot be earlier than the effective start date.</p>	No
Price Item Parameters	<p>Used to specify the parameters and their values based on which you want to determine pricing for the price item or price item bundle.</p> <p><b>Note:</b> This field appears only when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>True</b>. The <b>Search</b>  icon appears corresponding to the <b>Price Item Parameters</b> field. On clicking the <b>Search</b> icon, the <b>Price Item Parameters</b> screen appears.</p>	No
Characteristics	<p>On clicking the <b>Add</b>  icon, you can define relationship-specific characteristics for the price item or price item bundle.</p>	Not applicable

4. Enter the required details in the **Price Item Relationship** screen.

**Note:**

You can add a price item or price item bundle to a regular price item bundle only when the regular price item bundle (to which you want to add a price item or price item bundle) and price item or price item bundle (which you want to add) are associated with the same parameters for the specified date range.

You cannot add the same set of price items using the same relationship type to two or more price item bundles with the same bundle type. For example, you cannot add **P1** and **P2** using the **Bundle** relationship type to the **BUN1** and **BUN2** regular price item bundles.

If the multi parameter based pricing feature is enabled, you can add the same set of price item and price item parameter combination (using the same relationship type) to more than one bundle (with the same bundle type) provided the price item parameter values are different.

You cannot add the same price item or price item bundle in numerator and denominator while defining a ratio price item bundle.

5. Define relationship-specific characteristics for the price item or price item bundle, if required.
6. If you want to add more than one price item or price item bundle to the price item bundle, click the **Add** () icon and then repeat the steps from 4 to 5.

**Note:** However, if you want to remove a price item or price item bundle from a price item bundle, click the **Delete** () icon corresponding to the price item or price item bundle.

7. Click **Save**.

The price item or price item bundle is added to the price item bundle.

**Related Topics**

How to define relationship-specific characteristics for a price item or price item bundle	<a href="#">Defining Relationship-Specific Characteristics for a Price Item or Price Item Bundle</a> on page 360

**Setting the Parameters for a Price Item or Price Item Bundle****Prerequisites**

To set the parameters for a price item or price item bundle, you should have:

- Parameters (where the **Parameter Usage** field is set to **Pricing**) associated with the price item or price item bundle

**Procedure**

To set the parameters for a price item or price item bundle:

1. Click the **Search** () icon corresponding to the **Price Item Parameters** field.

The **Price Item Parameters** screen appears. It contains the following fields:

Field Name	Field Description
Price Item	Indicates the price item or price item bundle for which you want to set the parameters.
Description	Displays the description of the price item or price item bundle.

In addition, this screen contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Price Item Parameter	Indicates the parameter which is associated with the price item or price item bundle.  <b>Note:</b> Here, the system displays the price item parameter where the <b>Parameter Usage</b> field is set to <b>Pricing</b> .	Not applicable
Mandatory	Indicates whether the parameter is mandatory while defining the price item pricing. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	Not applicable
Priority	Indicates the priority in which optional parameters should be considered while determining best fit price for the price item or price item bundle.  <b>Note:</b> The priority for all parameters which are mandatory is set to 0.	Not applicable
Parameter Value	Used to specify the parameter value.  <b>Note:</b> If the parameter value type is <b>Predefined</b> or <b>Reference</b> , the <b>Search</b>  icon appears corresponding to the <b>Parameter Value</b> field. On clicking the <b>Search</b> icon, you can search for a parameter value.  You can specify any special characters except ampersand (&), comma (,), underscore (_), equal to (=), tilde (~), and semi-colon(;) in the parameter value.	Yes (Conditional)  <b>Note:</b> This field is required when you want to determine pricing for the price item or price item bundle based on the parameter.

2. Enter the required details in the **Price Item Parameters** screen.
3. Click **OK**.

A comma-separated list of values appear in the **Price Item Parameters** column corresponding to the price item or price item bundle. The order in which parameter values appear in the price item parameter information string is controlled by the display order (which is defined while associating a parameter with a price item).

**Note:** The value specified for a parameter whose value type is set to **Adhoc** is validated using the validation algorithm attached to the respective parameter.

## Defining Relationship-Specific Characteristics for a Price Item or Price Item Bundle

### Prerequisites

To define relationship-specific characteristics for a price item or price item bundle, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Price Item Relationship**)

### Procedure

To define relationship-specific characteristics for a price item or price item bundle:

1. Click the **Add** (  ) icon in the **Characteristics** column corresponding to the price item or price item bundle for which you want to define relationship-specific characteristics.

A grid appears corresponding to the price item or price item bundle with the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the relationship-specific characteristic is effective for the price item or price item bundle.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a relationship-specific characteristic for the price item or price item bundle.
Characteristic Type	Used to indicate the characteristic type. <b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Price Item Relationship</b> .	Yes (Conditional) <b>Note:</b> This field is required when you are defining a relationship-specific characteristic for the price item or price item bundle.
Characteristic Value	Used to specify the value for the characteristic type. <b>Note:</b> If you select a predefined characteristic type, the <b>Search</b> (  ) icon appears corresponding to the <b>Characteristic Value</b> field. On clicking the <b>Search</b> icon, the <b>Predefined Characteristic Search</b> window appears. On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a relationship-specific characteristic for the price item or price item bundle.

2. Enter the required details in the **Characteristics** grid.
3. If you want to define more than one relationship-specific characteristic for the price item or price item bundle, click the **Add** (  ) icon and then repeat step 2.

**Note:** However, if you want to remove a relationship-specific characteristic from the price item or price item bundle, click the **Delete** () icon corresponding to the characteristic.

4. Click **Save**.

The relationship-specific characteristics are defined for the price item or price item bundle.

### **Disassociating a Price Item or Price Item Bundle from a Parent Price Item**

#### **Prerequisites**

To disassociate a price item or price item bundle from a parent price item, you should have:

- Parent price item associated with the division to which the user belongs

#### **Procedure**

To disassociate a price item or price item bundle from a parent price item:

1. Search for the parent price item in the **Price Item** screen.
2. In the **Search Results** section, click the **View** () icon in the **Price Item Relationship** column corresponding to the parent price item from which you want to disassociate a price item or price item bundle.

The **Price Item Relationship** screen appears.

3. Click the **Add/Edit** link in the upper right corner of the **Assigned Price Items** zone.

The **Price Item Relationship** screen appears.

4. Filter the price items or price item bundles associated to the parent price item, if required.
5. In the **Search Results** section, click the **Delete** () icon corresponding to the price item or price item bundle that you want to disassociate from the parent price item.

6. Click **Save**.

The price item or price item bundle is disassociated from the parent price item.

## Filtering the Price Items or Price Item Bundles Associated with a Parent Price Item

### Prerequisites

To filter the price items or price item bundles associated with a parent price item, you should have:

- Parent price item associated with the division to which the user belongs

### Procedure

To filter the price items or price item bundles associated with a parent price item:

1. Search for the parent price item in the **Price Item** screen.
2. In the **Search Results** section, click the **View** (🔍) icon in the **Price Item Relationship** column corresponding to the parent price item whose details you want to view.  
The **Price Item Relationship** screen appears.
3. Enter the search criteria in the **Assigned Price Items** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

#### 4. Click **Search**.

The search results are filtered based on the specified criteria.

#### Related Topics

### Filtering the Price Items or Price Item Bundles Added to a Price Item Bundle

#### Prerequisites

To filter the price items or price item bundles added to a price item bundle, you should have:

- Price item bundle associated with the division to which the user belongs

#### Procedure

To filter the price items or price item bundles added to a price item bundle:

1. Search for the price item bundle in the **Price Item** screen.
2. In the **Search Results** section, click the **View** (🔍) icon in the **Price Item Relationship** column corresponding to the price item bundle whose details you want to view.

The **Price Item Relationship** screen appears.

3. Enter the search criteria in the **Assigned Price Items** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

#### 4. Click **Search**.

The search results are filtered based on the specified criteria.

## Price Item Assignments

The **Price Item Assignments** screen allows you to view the active price lists, persons, and accounts where the price item or price item bundle is assigned. It contains the following zones:

- [Active Price Lists where Price Item is Assigned](#) on page 364
- [Persons to whom Price Item is Assigned](#) on page 364
- [Accounts where Price Item is Assigned](#) on page 365

### Active Price Lists where Price Item is Assigned

The **Active Price Lists where Price Item is Assigned** zone lists the active price lists where the pricing is defined for the price item or price item bundle. It contains the following columns:

Column Name	Column Description
Price List Information	Displays information about the price list.  <b>Note:</b> It has a link. On clicking the link, the <b>Price List</b> screen appears where you can view the details of the respective price list.
Effective Start Date	Displays the date from when the price list is effective.
Effective End Date	Displays the date till when the price list is effective.
Availability Start Date	Displays the date from when the price list is available for assignment.
Availability End Date	Displays the date till when the price list is available for assignment.

### Persons to whom Price Item is Assigned

The **Persons to whom Price Item is Assigned** zone lists the persons where the pricing is defined for the price item or price item bundle. It contains the following columns:

Column Name	Column Description
Person ID	Indicates the person to whom the price item is assigned.
Person Information	Displays information about the person. In addition, this column has a context menu which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Person</b> screen appears where you can view the details of the respective person.
Price Assignment Start Date	Displays the date from when the price item is assigned to the person.
Price Assignment End Date	Displays the date till when the price item is assigned to the person.
Division	Indicates the division to which the person belongs.

Column Name	Column Description
Price Assignment ID	Indicates the price item pricing which is assigned to the person.

### **Accounts where Price Item is Assigned**

The **Accounts where Price Item is Assigned** zone lists the accounts where the pricing is defined for the price item or price item bundle. It contains the following columns:

Column Name	Column Description
Account ID	Indicates the account where the price item is assigned.
Account Information	Displays information about the account. In addition, this column has a context menu which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account.
Price Assignment Start Date	Displays the date from when the price item is assigned to the account.
Price Assignment End Date	Displays the date till when the price item is assigned to the account.
Division	Indicates the division to which the account belongs.
Price Assignment ID	Indicates the price item pricing which is assigned to the account.

### **Viewing the Price Lists, Persons, or Accounts where a Price Item is Assigned**

#### **Prerequisites**

To view the price lists, persons, or accounts where the price item or price item bundle is assigned, you should have:

- Price item or price item bundle assigned to a price list, person, or account

#### **Procedure**

To view the price lists, persons, or accounts where the price item or price item bundle is assigned:

1. Search for the price item or price item bundle in the **Price Item** screen.
2. In the **Search Results** section, click the **View**  icon in the **Price Item Assigned To** column corresponding to the price item or price item bundle whose assignment details you want to view.

The **Price Item Assignments** screen appears.

3. View the price lists where the pricing is defined for the price item or price item bundle in the **Active Price Lists where Price Item is Assigned** zone.
4. View the accounts where the pricing is defined for the price item or price item bundle in the **Accounts where Price Item is Assigned** zone.
5. View the persons where the pricing is defined for the price item or price item bundle in the **Person to whom Price Item is Assigned** zone.

## Price List

---

A price list allows you to define standard prices for a group of price items. In other words, a price list is a rate card for price items or services which are offered to the accounts or persons. You can create more than one price list. For example, you can create a price list for large, medium-sized, and small customers. You can also create a set of price lists for different regions. You can define two types of price lists — **Standard** and **Promotional**. You can also set eligibility criteria for the price list with effective start date, end date, and description. At present, there is no functionality associated with the price list type. The implementation team can use the price list type to define the custom logic as per the business requirements.

A price list and price item pricing within the price list are effective for a particular duration. You can define multiple pricing for the same price item and variance parameter or product parameters combination within a price list only when the price item pricing date range is different. You can assign the same price item in multiple price lists and define different pricing for the price item in each price list based on the business requirements.

The system enables you to specify the duration for which the price list is available for assignment to an account or a person. However, note that at present, the availability start and end dates are not used in the product while assigning a price list to an account or a person. If required, the implementation team can build the custom logic using the availability start and end dates in the product.

Once you create a price list, you have to assign price items to the price list and define pricing for each price item assigned to the price list. The price lists are then assigned to accounts or persons to indicate the prices that will be charged for various price items or services offered to them. You can assign multiple price lists to an account or a person for an overlapping date range. But, you need to specify the priority or order for the price list in which the pricing from the price list should be considered. You can also assign the same price list to multiple accounts or persons.

You can define whether the account or person can avail the price item pricing listed on the parent or grandparent price list if it is not available on the assigned price list. In other words, you can define whether the account or person can inherit price item pricing from the price list hierarchy.

The system allows you to create the following:

- **Default Price List** – You can create a price list and set it as a default price list for a particular division. To define a default price list for a division, you need to set the value for the **Default Price List ID** parameter in the price

assignment search algorithm which is attached to the division. If the effective price item pricing is not available at any level in the customer hierarchy, the system checks whether the default price list is specified in the price assignment search algorithm. If the default price list is specified in the algorithm, the system checks whether effective price item pricing is available in the default price list and accordingly uses the price item pricing. You can have the same price list as a the default price list for multiple divisions.

- **Global Price List** – You can create one global price list in the system. It is used only when the price item pricing is not available at any level in the customer hierarchy and in the default price list associated with the division. You can assign only those price items in the global price list whose the **Global Price List** option is set to **Yes**. The global price list is used while searching an effective price item pricing only when the **Global Price List** parameter in the price assignment search algorithm (attached to the division) is set to **Y**. Finally, if the effective price item pricing is not available in the default and/or global price list, an error message occurs indicating that the effective price item pricing is not available in the system.
- **Template Price List** – You can define a template price list and assign template price item pricing to a template price list. You cannot assign template price list to an account or a person. You can only create a copy of a template price item pricing which is assigned to a template price list. Once you create a copy of the template price item pricing, you can save the new price item pricing in either **Active** or **Proposed** status.

## Price List (Used for Searching)

The **Price List** screen allows you to search for a price list using various search criteria. It also allows you to create a price list. This screen consists of the following zones:

- [Search Price List](#) on page 367
- [Price List Price Items](#) on page 370

### Search Price List

The **Search Price List** zone allows you to search for a price list using various search criteria. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for a price list using the price list details. The valid value is: <ul style="list-style-type: none"> <li>• Price List Details</li> </ul> <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"><b>Note:</b> By default, the <b>Price List Details</b> option is selected.</div>	Yes
Price List ID	Used to search a particular price list.	No
Price List Description	Used to search a price list with a particular description.	No
Effective Start Date	Used to search price lists which are effective from a particular date.	No
Effective End Date	Used to search price lists which are effective till a particular date.	No

Field Name	Field Description	Mandatory (Yes or No)
Price List Type	<p>Used to search a particular type of price lists. The valid values are:</p> <ul style="list-style-type: none"> <li>• Promotional</li> <li>• Standard</li> </ul> <p><b>Note:</b> By default, the <b>Standard</b> option is selected.</p>	No
Global Price List	<p>Used to indicate whether you want to search a global price list. The valid values are:</p> <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	No
Availability Start Date	<p>Used to search price lists which are available for assignment to an account or a person from a particular date.</p> <p><b>Note:</b> By default this field does not appear. This field appears only when you click the <b>Advanced Search</b> link in the upper right corner of the <b>Search Price List</b> zone.</p>	No
Availability End Date	<p>Used to search price lists which are available for assignment to an account or a person till a particular date.</p> <p><b>Note:</b> By default this field does not appear. This field appears only when you click the <b>Advanced Search</b> link in the upper right corner of the <b>Search Price List</b> zone.</p>	No
Status	<p>Used to search price lists with a particular status. The valid values are:</p> <ul style="list-style-type: none"> <li>• Active</li> <li>• Proposed</li> <li>• Template</li> </ul> <p><b>Note:</b> By default this field does not appear. This field appears only when you click the <b>Advanced Search</b> link in the upper right corner of the <b>Search Price List</b> zone.</p>	No
Division	<p>Used to search price lists which are associated with a particular division.</p> <p><b>Note:</b> You can only view those divisions to which you have access in the <b>Division</b> list.</p>	No

Field Name	Field Description	Mandatory (Yes or No)
Parent Price List	Used to search price lists which inherit pricing from a particular parent price list.  <b>Note:</b> The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Price List Search</b> window appears.  By default this field does not appear. This field appears only when you click the <b>Advanced Search</b> link in the upper right corner of the <b>Search Price List</b> zone.	No
Parent Price List Effective Date	Used to search price lists that can inherit pricing from a parent price list which is effective from a particular date.  <b>Note:</b> By default this field does not appear. This field appears only when you click the <b>Advanced Search</b> link in the upper right corner of the <b>Search Price List</b> zone.	No

**Note:** You must specify at least one search criterion while searching for a price list.

- **Search Results** – On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Price List Information	Displays information about the price list.  <b>Note:</b> It has a link. On clicking the link, the <b>Price List</b> screen appears where you can view the details of the respective price list.
Status	Indicates the status of the price list. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Proposed</li> <li>• Template</li> </ul>
Effective Start Date	Displays the date from when the price list is effective.
Effective End Date	Displays the date till when the price list is effective.
Availability Start Date	Displays the date from when the price list is available for assignment to an account or a person.
Availability End Date	Displays the date till when the price list is available for assignment to an account or a person.
Copy	On clicking the <b>Copy</b>  icon, the <b>Price List</b> screen appears where you can create a new price list using an existing price list.
Price List Pricing	On clicking the <b>View</b>  icon in the <b>Price List Pricing</b> column, the <b>Price List Price Item Pricing</b> screen appears where you can view and edit a list of price items pricing information assigned to the price list.

Column Name	Column Description
Price List Assigned To	On clicking the <b>View</b> (🔍) icon in the <b>Price List Assigned To</b> column, the <b>Price List Assignments</b> screen appears where you can view the details of the persons and accounts to which the price list is assigned.
Eligible Accounts/ Persons	On clicking the <b>View</b> (🔍) icon in the <b>Eligible Accounts/Persons</b> column, the <b>Entities Eligible for Price List Assignment</b> screen appears where you can search for a list of eligible accounts and persons to which you want to assign the price list in a particular division.

**Note:**

However, when you search for a price list by specifying the date (which can be current, past or future date) in the **Parent Price List Effective Date** field, the system retrieves the price lists that meet the search criteria along with the details of the parent price list that is effective on that date.

Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

By default, the **Filter** area is visible. You can hide the **Filter** area by clicking the **Filters** (🗑️) icon in the upper right corner of this zone.

On clicking the **Broadcast** (📡) icon corresponding to the **Price List Information** field, the **Price List Price Items** zone appears where you can view a list of price items to which the price list is assigned.

**Price List Price Items**

The **Price List Price Items** zone lists price items that are assigned to the price list. You will not find any records in this zone if the price list does not have any price items assigned to it. It contains the following columns:

Column Name	Column Description
Pricing	Displays the concatenated string consisting of pricing information and pricing ID which are separated by a comma (,) for the price list.  <b>Note:</b> It has a link. On clicking the link, the <b>Price Item Pricing</b> screen appears where you can view the pricing information of the respective price list.

Column Name	Column Description
Pricing Parameters	Used to specify multiple parameters based on which you want to determine the pricing utilization.  <b>Note:</b> This column appears only when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARAM_FLG)</b> feature configuration is set to <b>True</b> .
Pricing Status	Displays the status of pricing for the price item. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>
Effective Start Date	Displays the date from when the price item pricing is effective for the price list.
Effective End Date	Displays the date till when the price item pricing is effective for the price list.
Price Assignment Type	Indicates the type of the price item pricing. The valid values are: <ul style="list-style-type: none"> <li>• Regular</li> <li>• Post Processing</li> <li>• Post Processing – Invoice Based</li> <li>• Post Processing – Price Item Based</li> </ul> <b>Note:</b> This column appears only when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>True</b> .
Copy	On clicking the <b>Copy</b> (  ) icon, the <b>Price Item Pricing</b> screen appears where you can define a new price item pricing using an existing price item pricing.

By default, the **Price List Price Items** zone does not appear in the **Price List** screen. It appears only when you click the **Broadcast** () icon corresponding to the price list in the **Search Price List** zone.

You can filter the list using various search criteria (such as, **Price Item** and **Effective Start Date**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** () icon in the upper right corner of this zone.

You can change the layout of this zone. For more information on how to change the layout, see [Changing the Layout](#) on page 2882.

### Searching for a Price List

#### Prerequisites

To search for a price list, you should have:

- Divisions defined in the application

- Price list associated with the division to which the user belongs

### **Procedure**

To search for a price list:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Pricing Management** and then click **Price List**.  
A sub-menu appears.
3. Click the **Search** option from the **Price List** sub-menu.  
The **Price List** screen appears.
4. Enter the search criteria in the **Search Price List** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search**.

A list of price lists that meet the search criteria appears in the **Search Results** section.

**Note:** Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

### **Viewing Price Items Assigned to a Price List**

#### **Prerequisites**

To view price items assigned to a price list, you should have:

- An algorithm defined using the **C1-PLPINFO** algorithm type and attached to **Pricelist Products Assignment Information** system event in the **Algorithms** tab of the **Installation Options – Framework** screen

#### **Procedure**

To view price items assigned to a price list:

1. Search for the price list in the **Price List** screen.
2. In the **Search Results** section, click the **Broadcast**  icon corresponding to the price list whose price items details you want to view.  
The **Price List Price Items** zone appears.
3. View the price items that are assigned to the price list in the **Price List Price Items** zone.

### **Related Topics**

<b>For more information on...</b>	<b>See...</b>

## Defining a Price List

### Procedure

To define a price list:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Pricing Management** and then click **Price List**.  
A sub-menu appears.
3. Click the **Add** option from the **Price List** sub-menu.

The **Price List** screen appears. It consists the following sections:

- **Main** - Used to specify basic details about the price list.
- **Hierarchy** - Used to associate the price list with one or more parent price lists for a particular duration.
- **Divisions** - Used to associate the price list with one or more divisions.
- **Eligibility** - Used to define eligibility criteria for the price list.
- **Characteristics** - Used to define characteristics for the price list.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Price List Description	Used to specify the description for the price list.	Yes
Effective Start Date	Used to specify the date from when the price list is effective. <b>Note:</b> By default, the current date appears in this field.	Yes
Effective End Date	Used to specify the date till when the price list is effective. <b>Note:</b> The effective end date cannot be earlier than the effective start date.	No
Price List Type	Used to indicate the type of the price list. The valid values are: <ul style="list-style-type: none"> <li>• Standard</li> <li>• Promotional</li> </ul> <b>Note:</b> By default, the <b>Standard</b> option is selected.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Global Price List	Used to indicate whether the price list is a global price list. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	Yes
Availability Start Date	Used to the specify the date from when the price list is available for assignment to an account or a person. <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> At present, the availability start date is not used in the price item while assigning a price list to an account or a person. It is available for future use.</p> </div>	No
Availability End Date	Used to the specify the date till when the price list is available for assignment to an account or a person. <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> The availability end date cannot be earlier than the availability start date. At present, the availability end date is not used in the price item while assigning a price list to an account or a person. It is available for future use.</p> </div>	No
Validity Period (in Days)	Used to specify the period in days for which the price list is valid. It is used to calculate price list assignment validity end date while assigning the price list to an account or a person.	No
Status	Used to indicate the status of the price list. The valid values are: <ul style="list-style-type: none"> <li>• <b>Active</b> - Used to indicate that the price list is used for billing.</li> <li>• <b>Proposed</b> - Used to indicate that the price list is used for quotations.</li> <li>• <b>Template</b> - Used to indicate that the price list is a template price list.</li> </ul> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> By default, the <b>Active</b> option is selected.</p> </div>	Yes

**Tip:** Alternatively, you can access the **Price List** screen by clicking the **Add** button in the **Page Title** area of the **Price List** screen.

4. Enter the required details in the **Main** section.

**Note:** By default the **Main** section is displayed.

5. Click the **Show All** link from the **Section** to view all the sections and define or associate the following:
  - Associate the price list with one or more parent price list, if required.
  - Associate price list with one or more divisions, if required.
  - Define eligibility criteria for the price list, if required.

- Define characteristics for the price list, if required.

6. Click **Save**.

**Note:** The price list ID is generated automatically when the price list is created.

### Defining the Price List Hierarchy

Oracle Revenue Management and Billing allows you to define the price list hierarchy. It helps you to inherit the price item pricing from the parent price list if the price item pricing is not available in the price list (assigned to the account, person, or parent person). And, if the price item pricing is not available in the parent price list, the system will search for the price item pricing in the parent's parent price list (i.e. in the grandparent price list) and continue till it reaches the last level in the hierarchy.

In other words, when you define the price list hierarchy and assign the price list to an account or a person, the account or person can avail the price item pricing listed on the parent or grandparent price list if it is not available on the assigned price list. However, if the price item pricing is available on both the assigned and parent price lists, the system derives the price item pricing from the assigned price list.

You can define multiple parent price lists for a price list. But, only one parent price list is effective for a particular duration. Two or more price lists can have the same parent price list.

### Procedure

To define the price list hierarchy:

1. Click the **Hierarchy** or **Show All** link from the **Section** in the **Price List** screen when you are defining, editing, or copying a price list.

The **Hierarchy** section appears. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Parent Price List Effective From Date	Used to specify the date from when the price list inherits pricing from the parent price list.	Yes (Conditional) <b>Note:</b> This field is required when you are associating the price list with a parent price list.
Parent Price List Effective To Date	Used to specify the date till when the price list inherits pricing from the parent price list. <b>Note:</b> The parent price list effective to date cannot be earlier than the parent price list effective from date and later than price list effective end date.	No

Field Name	Field Description	Mandatory (Yes or No)
Parent Price List	<p>Used to specify the parent price list ID to which you want to associate the price list.</p> <p><b>Note:</b></p> <p>The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Price List Search</b> window appears.</p> <p>On specifying the parent price list, the description of the parent price list appears corresponding to the <b>Parent Price List</b> field.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required when you are associating the price list with a parent price list.</p>

- Enter the required details in the **Hierarchy** section.

**Note:** You can search for a price list by clicking the **Search**  icon corresponding to the **Parent Price List** field.

- If you want to associate the price list with more than one parent price list, click the **Add**  icon corresponding to the parent price list and then repeat step 2.

**Note:**

You can associate a price list with multiple parent price lists. But, only one parent price list is effective for a particular duration. Also, while associating a price list with a parent price list, you can only specify a price list which is effective during the specified duration.

If you want to remove a parent price list from the price list hierarchy, click the **Delete**  icon corresponding to the parent price list.

- Click **Save**.

The price list is associated with the parent price lists.

### **Defining a Characteristic for a Price List**

#### **Prerequisites**

To define a characteristic for a price list, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Price List**)

#### **Procedure**

To define a characteristics for a price list:

- Click the **Characteristics** or **Show All** link from the **Section** in the **Price List** window when you are defining, editing, or copying a price list.

The **Characteristics** section appears. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the price list.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the price list.
Characteristic Type	Used to indicate the characteristic type. <b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Price List</b> .	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the price list.
Characteristic Value	Used to specify the value for the characteristic type. <b>Note:</b> The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Predefined Characteristic Search</b> window appears. On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the price list.

- Enter the required details in the **Characteristics** section.

**Note:** If you select a predefined characteristic type, the **Search**  icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

- If you want to define more than one characteristic for the price list, click the **Add**  icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from the price list, click the **Delete**  icon corresponding to the characteristic.

- Click **Save**.

The characteristics are defined for the price list.

## Associating a Price List with a Division

You can assign a price list only to those accounts or persons which belong to the division to which the price list is associated. Therefore, you need to associate the price list with appropriate divisions.

### Prerequisites

To associate a price list with a division, you should have:

- Divisions defined in the application

### Procedure

To associate a price list with a division:

1. Click the **Divisions** or **Show All** link from the **Section** in the **Price List** window when you are defining, editing, or copying a price list.

The **Divisions** section appears. It contains the following field in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Division	Used to indicate the division to which you want to associate the price list.  <b>Note:</b> You can only view those divisions to which you have access in the <b>Division</b> list.	No

2. Select the required division from the list.
3. If you want to associate the price list with more than one division, click the **Add** (+) icon corresponding to the division and then repeat step 2.

**Note:** However, if you want to remove the price list from a division, click the **Delete** (🗑️) icon corresponding to the division.

4. Click **Save**.

The price list is associated with the divisions.

**Tip:** Alternatively, you can associate a price list with a division using the **Division** screen.

## Defining Eligibility Criteria for a Price List

### Prerequisites

To define eligibility criteria for a price list, you should have:

- The **Price List Eligibility Criteria** check box selected in the **Parameter Usage** section while defining the parameter

### Procedure

To define eligibility criteria for a price list:

1. Click the **Eligibility** or **Show All** link from the **Section** in the **Price List** screen when you are defining, editing, or copying a price list.

The **Eligibility** section appears. It contains the following fields in a grid:

Column Name	Column Description	Mandatory (Yes or No)
Criteria	On clicking the <b>Add</b> (  ) icon, you can associate eligibility criteria of parameters for the price list.	Yes (Conditional) <b>Note:</b> This field is required when you are defining an eligibility criteria for the price list.
Effective Start Date	Used to specify the date from when the criteria is effective for the price list.	Yes (Conditional) <b>Note:</b> This field is required when you are defining an eligibility criteria for the price list.
Effective End Date	Used to specify the date till when the criteria is effective for the price list.	No
Description	Used to specify the description for the criteria type.	Yes

2. Enter the required details in the **Eligibility** section.
3. If you want to define more than one eligibility criteria for the price list, click the **Add** () icon and then repeat step 2.

**Note:** However, if you want to remove the eligibility criteria, click the **Delete** () icon corresponding to the criteria.

4. Associate eligibility criteria of parameter for the price list, if required.
5. If you want to define more than one eligibility criteria of parameter for the price item, click the **Add** () icon corresponding to the parameter.

**Note:** However, if you want to remove the eligibility criteria of parameter for the price item, click the **Delete** () icon corresponding to the parameter.

6. Click **Save**.

The eligibility criteria are defined for the price list.

## Copying a Price List

Instead of creating a price list from scratch, you can create a new price list using an existing price list. This is possible through copying a price list. On copying a price list, the details including the pricing parameters, divisions, characteristics, eligibility criteria, and the assigned price items are copied to the new price list. You can then edit the details, if required.

### Prerequisites

To copy a price list, you should have:

- Price list (whose copy you want to create) defined in the application
- Price list (whose copy you want to create) associated with the division to which the user belongs

### Procedure

To copy a price list:

1. Search for the price list in the **Price List** screen.
2. In the **Search Results** section, click the **Copy** () icon in the **Copy** column corresponding to the price list using which you want to define a new price list.

The **Price List** screen appears. It contains the following sections:

- **Main** – Used to specify basic details about the price list.
- **Hierarchy** – Used to define parent price list for the price list for a particular duration.
- **Divisions** – Used to associate price list with one or more divisions.
- **Eligibility Criteria** – Used to define eligibility criteria for price list.
- **Characteristics** – Used to define characteristics (which are applicable across divisions) for the price list.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Price List Description	Used to specify the description for the price list.	Yes
Effective Start Date	Used to specify the date from when the price list is effective	Yes
Effective End Date	Used to specify the date till when the price list is effective.	No
Price List Type	Used to indicate the type of the price list. The valid values are: <ul style="list-style-type: none"> <li>• Standard</li> <li>• Promotional</li> </ul>	Yes
Global Price List	Used to Indicate whether the price list is a global price list. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Availability Start Date	Used to specify the date from when the price list is available for assignment to an account or a person.	Yes
Availability End date	Used to specify the date till when the price list is available for assignment to an account or a person.	No
Validity Period (in Days)	Used to specify the period in days for which the price list is valid. It is used to calculate price list assignment validity end date while assigning the price list to an account or a person.	Yes
Status	Used to indicate the status of the price list. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Proposed</li> <li>• Template</li> </ul>	Yes
Copy Pricing	Used to indicate whether you want to copy the pricing information to the price list. The valid values are: <ul style="list-style-type: none"> <li>• All</li> <li>• None</li> </ul>	Yes (Conditional)

3. Enter the required details in the **Main** section.
4. Add, edit, or remove the parent price list details, if required.
5. Associate or disassociate the price list from the required divisions.
6. Define, edit, or remove the price list eligibility criteria and parameter eligibility criteria for price list in the, if required.
7. Define, edit, or remove characteristics from the price list, if required.
8. Click **Save**.

The new price list is defined.

**Note:** The price list ID is generated automatically when the price list is defined.

### **Viewing the Price List Details**

#### **Procedure**

To view the details of a price list:

1. Search for the price list in the **Price List** screen.
2. In the **Search Results** section, click the link in the **Price List Information** column corresponding to the price list whose details you want to view.

The **Price List** screen appears. It contains the following zones:

- [Price List](#) on page 382
  - [Eligibility Criteria](#) on page 384
  - [Price List Price Items](#) on page 370
3. View the basic details, hierarchy, divisions, and characteristics of the price list in the **Price List** zone.
  4. View the eligibility criteria to which the price list is associated in the **Eligibility Criteria** zone.
  5. View the price items that are assigned to the price list in the **Price List Price Items** zone.

## Price List (Used for Viewing)

The **Price List** screen allows you to view the details of a price list. It also allows you to edit a price list. It contains the following zones:

- **Price List** - Displays the basic details of the price list.
- **Eligibility Criteria** - Displays the eligibility criteria for the price list.
- **Price List Price Items** - Displays the price items that are assigned to the price list.

### Price List

The **Price List** zone displays the details of the price list. It contains the following sections:

- **Main** - Displays basic information about the price list. It contains the following fields:

Field Name	Field Description
Price List ID	Displays the price list ID.
Price List Description	Displays the description for the price list.
Effective Start Date	Displays the date from when the price list is effective.
Effective End Date	Displays the date till when the price list is effective.
Price List Type	Indicates the type of the price list. The valid values are: <ul style="list-style-type: none"> <li>• Standard</li> <li>• Promotional</li> </ul>
Global Price List	Indicates whether the price list is a global price list. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>
Availability Start Date	Displays the date from when the price list is available for assignment to an account or a person.

Field Name	Field Description
Availability End date	Displays the date till when the price list is available for assignment to an account or a person.
Validity Period (in Days)	Displays the period in days for which the price list is valid. It is used to calculate price list assignment validity end date while assigning the price list to an account or a person.
Status	Indicates the status of the price list. The valid values are: <ul style="list-style-type: none"> <li>• <b>Active</b> – Indicates that the price list is used for billing.</li> <li>• <b>Proposed</b> – Indicates that the price list is used for quotations.</li> <li>• <b>Template</b> – Indicates that the price list is a template price list.</li> </ul>

- **Hierarchy** - Lists the parent price list from which the price list has inherited the price item pricing for a particular duration. It contains the following columns:

Column Name	Column Description
Parent Price List ID	Displays the ID of the parent price list.
Parent Price List Effective From Date	Displays the date from when the price list can inherit pricing from the parent price list.
Parent Price List Effective To Date	Displays the date till when the price list can inherit pricing from the parent price list.

- **Divisions** - Lists the divisions to which the price list is associated. It contains the following column:

Column Name	Column Description
Division	Displays the division to which the price list is associated.  <b>Note:</b> It has a link. On clicking the link, the <b>Division</b> screen appears where you can view the details of the respective division.

- **Characteristics** - Lists the characteristics that are associated with the price list. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the characteristic is effective for the price list.
Characteristic Type	Displays the characteristic type.
Characteristic Value	Displays the value for the characteristic type.

- **Record Actions** - This section contains the following button:

Button Name	Button Description
Edit	Used to edit the details of the price list.

- **Record Information** - This section contains the following field:

Field Name	Field Description
Business Object	Indicates the business object using which the price list is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.

### Eligibility Criteria

The **Eligibility Criteria** zone lists the eligibility criteria of the price list. It contains the following columns:

Field Name	Field Description
Effective Start Date	Displays the date from when the criteria is effective for the price list.
Effective End Date	Displays the date till when the criteria is effective for the price list.
Description	Displays the description for the criteria type.
Sequence	Indicates the order in which the price list eligibility criteria should be executed.
Parameter	Indicates the parameter (on the left hand side) is used in the pricing eligibility criteria.
Operator	Displays the relational operator to define the relation between the parameter name and value.
Parameter Value Type	Indicates whether the parameter (on the left hand side) must be compared against another parameter (on the right hand side) or directly against a parameter value.
Parameter	Indicates the parameter (on the right hand side) against which you want to compare the parameter (on the left hand side).
Parameter Value	Indicates the parameter value against which you want to compare the parameter (on the left hand side).
Is True	Indicates what happens when the condition is true (satisfied). The valid values are: <ul style="list-style-type: none"> <li>• <b>Check Next Condition</b> – Indicates that the condition with consecutive sequence number should be executed.</li> <li>• <b>Rule Is False</b> – Indicates that the action specified in the <b>Rule False Action</b> field should be executed</li> <li>• <b>Rule Is True</b> – Indicates that the action specified in the <b>Rule True Action</b> field should be executed.</li> </ul>

Field Name	Field Description
Is False	<p>Indicates what happens when the condition is false (not satisfied). The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Check Next Condition</b> – Indicates that the condition with consecutive sequence number should be executed.</li> <li>• <b>Rule Is False</b> – Indicates that the action specified in the <b>Rule False Action</b> field should be executed</li> <li>• <b>Rule Is True</b> – Indicates that the action specified in the <b>Rule True Action</b> field should be executed.</li> </ul>
Is Insufficient	<p>Indicates what happens when the data is insufficient. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Check Next Condition</b> – Indicates that the condition with consecutive sequence number should be executed.</li> <li>• <b>Rule Is False</b> – Indicates that the action specified in the <b>Rule False Action</b> field should be executed</li> <li>• <b>Rule Is True</b> – Indicates that the action specified in the <b>Rule True Action</b> field should be executed.</li> </ul>

## Editing a Price List

### Procedure

To edit a price list:

1. Search for the price list in the **Price List** screen.
2. In the **Search Results** section, click the link in the **Price List Information** column corresponding to the price list whose details you want to edit.

The **Price List** screen appears.

3. Click the **Edit** button in the **Price List** zone.

The **Price List** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the price list.
- **Hierarchy** - Used to define parent price list to inherit price item pricing for the price list for a particular duration.
- **Divisions** - Used to associate price list with one or more divisions.
- **Eligibility Criteria** - Used to define eligibility criteria for the price list.
- **Characteristics** - Used to define characteristics (which are applicable across divisions) for the price list.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Price List Description	Used to specify the description for the price list.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Effective Start Date	Used to specify the date from when the price list is effective.  <b>Note:</b> The system will not allow you to change the effective start date when: <ul style="list-style-type: none"> <li>• There is a price item assigned to the price list on that date.</li> <li>• The price list is assigned to an account or a person on that date.</li> </ul>	Yes
Effective End Date	Used to specify the date till when the price list is effective.  <b>Note:</b> The effective end date cannot be earlier than the effective start date.	No
Price List Type	Used to indicate the type of the price list. The valid values are: <ul style="list-style-type: none"> <li>• Standard</li> <li>• Promotional</li> </ul>	Yes
Global Price List	Used to indicate whether the price list is a global price list. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	Yes
Availability Start Date	Used to the specify the date from when the price list is available for assignment to an account or a person.  <b>Note:</b> At present, the availability start date is not used in the product while assigning a price list to an account or a person. It is available for future use.	No
Availability End Date	Used to the specify the date till when the price list is available for assignment to an account or a person.  <b>Note:</b> The availability end date cannot be earlier than the availability start date.  At present, the availability end date is not used in the product while assigning a price list to an account or a person. It is available for future use.	No
Validity Period (in Days)	Used to specify the period in days for which the price list is valid. It is used to calculate price list assignment validity end date while assigning the price list to an account or a person.	No

Field Name	Field Description	Mandatory (Yes or No)
Status	<p>Used to indicate the status of the price list. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Active</b> – Used to indicate that the price list is used for billing. This value appears only when you are editing a proposed price list</li> <li>• <b>Proposed</b> – Used to indicate that the price list is used for quotations.</li> <li>• <b>Template</b> – Used to indicate that the price list is a template price list.</li> </ul> <p><b>Note:</b> You cannot change the status of an active and a template price list.</p>	Yes

4. Modify the details in the **Main** section, if required.

**Note:** By default the **Main** section is displayed.

5. Add, edit or remove parent price list from the price list hierarchy, if required.
6. Associate or disassociate the price list from the divisions, if required.

**Note:** You can only view those divisions to which you have access in the **Division** list. If the price list is associated to a division to which you do not have access, then the **Divisions** section is grayed out.

7. Define, edit, or remove eligibility criteria from the price list, if required
8. Define, edit, or remove characteristics from the price list, if required.
9. Click **Save**.

The changes made to the price list are saved.

## **Price List Price Item Pricing**

Once a price list is created, you can either assign a price item to the price list and then define pricing for the price item, or you can copy an existing price item pricing and assign it to the price list. The **Price List Price Item Pricing** screen allows you to:

- View and filter the price items that are assigned to the price list
- Search and assign price items to the price list
- Copy a price item pricing and assign it to the price list

This screen consists of the following zones:

- [Price List Price Items](#) on page 388
- [Search Price Item](#) on page 389

### Price List Price Items

The **Price List Price Items** zone lists price items that are assigned to the price list. You will not find any records in this zone if the price list does not have any price items assigned to it. This zone contains the following columns:

Column Name	Column Description
Pricing Information	Displays the details of price item pricing.
Pricing Parameters	Displays a comma-separated list of parameter values. The order in which parameter values appear in this column is controlled by the display order (which is defined while associating a parameter with a price item).  <b>Note:</b> This column appears only when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>True</b> .
Pricing Status	Indicates the status of the price item pricing. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> <li>• Proposed</li> <li>• Rejected</li> <li>• Template</li> </ul>
Effective Start Date	Displays the date from when the price item pricing is effective for the price list.
Effective End Date	Displays the date till when the price item pricing is effective for the price list.
Price Assignment Type	Indicates the type of the price item pricing. The valid values are: <ul style="list-style-type: none"> <li>• Regular</li> <li>• Post Processing</li> <li>• Post Processing – Invoice Based</li> <li>• Post Processing – Price Item Based</li> </ul> <b>Note:</b> This column appears only when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>True</b> .
Edit	On clicking the <b>Edit</b> (  ) icon, you can edit the price item from the price list.
Delete	On clicking the <b>Delete</b> (  ) icon, you can remove the price item from the price list.  <b>Note:</b> The <b>Delete</b> icon appears in this column only when the price list is not yet assigned to any account or person.  This column appears only when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>False</b> .

You can filter the list using various search criteria (such as, **Price Item** and **Effective Start Date**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (  ) icon in the upper right corner of this zone.

You can change the layout of this zone. For more information on how to change the layout, see [Changing the Layout](#) on page 2882.

### **Related Topics**

<b>For more information on...</b>	<b>See...</b>
How to edit a price item from the price list	<a href="#">Editing a Price Item Pricing</a>
How to remove a price item from the price list	<a href="#">Removing a Price Item from a Price List</a> on page 395

### **Search Price Item**

You can assign a price item or price item bundle to a price list and then define pricing for the price item or price item bundle, or you can copy an existing price item pricing and assign it to a price list. The **Search Price Item** zone allows you to search for a price item pricing which is assigned to an account, person, or a price list. You can then create a new price item pricing using an existing price item pricing through copying the price item pricing. Once you create a copy of an existing price item pricing, the new price item pricing is assigned to the price list. On copying a price item pricing, the pricing details including the price components, eligibility and tiering criteria for each price component, and characteristics are copied to the new price item pricing. You can then edit the details, if required.

The system allows you to create a copy of active, proposed, inactive, rejected, and template price item pricing. Once you create the copy of a template price item pricing, you can save the new price item pricing in either **Active** or **Proposed** status.

The **Search Price Item** zone contains the following two sections:

- **Search Criteria** – The **Search Criteria** section contains the following fields:

<b>Field Name</b>	<b>Field Description</b>	<b>Mandatory (Yes or No)</b>
Search By	Used to indicate whether you want to search price item, pricing assigned to price list and override pricing for an account, or person. The valid values are: <ul style="list-style-type: none"> <li>• Price Item</li> <li>• Price list Pricing</li> <li>• Account Override Pricing</li> <li>• Person Override Pricing</li> </ul>	Yes
Price Item	Used to search a particular price item or price item bundle.	No
Description	Used to search price items or price item bundles with a particular description. <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> This field appears only when you select the <b>Price Item</b> option from the <b>Search By</b> list.</p> </div>	No
Global Price List	Used to search price items or price item bundles which can be assigned to a global price list. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	No

Field Name	Field Description	Mandatory (Yes or No)
Bundle	Used to indicate whether you want to search for price item bundles. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	No
Price List ID	Used to search pricing of price items or price item bundles which are assigned to a particular price list. <div style="border: 1px solid black; padding: 2px;"><b>Note:</b> This field appears only when you select the <b>Price List Pricing</b> option from the <b>Search By</b> list.</div>	No
Effective Start Date	Used to search price item pricing on price lists which are effective from a particular date onwards. <div style="border: 1px solid black; padding: 2px;"><b>Note:</b> This field appears only when you select the <b>Price List Pricing, Account Override Pricing, or Person Override Pricing</b> option from the <b>Search By</b> list.</div>	No
Effective End Date	Used to search price item pricing on price lists which are effective till a particular date. <div style="border: 1px solid black; padding: 2px;"><b>Note:</b> This field appears only when you select the <b>Price List Pricing, Account Override Pricing, or Person Override Pricing</b> option from the <b>Search By</b> list.</div>	No
Pricing Status	Used to search price item pricing with a particular status. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> <li>• Proposed</li> <li>• Rejected</li> <li>• Template</li> </ul> <div style="border: 1px solid black; padding: 2px;"><b>Note:</b> This field appears only when you select the <b>Price List Pricing, Account Override Pricing, or Person Override Pricing</b> option from the <b>Search By</b> list.</div>	No
Price Assignment Type	Used to search a particular type of the price item pricing. The valid values are: <ul style="list-style-type: none"> <li>• Regular</li> <li>• Post Processing</li> <li>• Post Processing – Invoice Based</li> <li>• Post Processing – Price Item Based</li> </ul> <div style="border: 1px solid black; padding: 2px;"><b>Note:</b> This field appears only when you select the <b>Price List Pricing, Account Override Pricing, or Person Override Pricing</b> option from the <b>Search By</b> list.</div>	No

Field Name	Field Description	Mandatory (Yes or No)
Account ID	Used to search pricing of price items or price item bundles which are assigned to a particular account.  <b>Note:</b> This field appears only when you select the <b>Account Override Pricing</b> option from the <b>Search By</b> list.	Yes
Person ID	Used to search pricing of price items or price item bundles which are assigned to a particular person.  <b>Note:</b> This field appears only when you select the <b>Person Override Pricing</b> option from the <b>Search By</b> list.	Yes

**Note:**  
You must specify at least one search criterion while searching for a price item or price item bundle.  
You can search for an account, person by clicking the **Search**  icon corresponding to the respective field.

- **Search Results** – On clicking the **Search** button, the search results appear based on the specified search criteria. The search results include only those price items or price item bundles that are associated with the division to which the price list belongs. It may also include price items or price item bundles that are already assigned to the price list in case those price items or price item bundles match the search criteria.

The **Search Results** section contains the following columns:

Column Name	Column Description
Assign	On clicking the <b>Assign</b>  icon, the <b>Price Item Pricing</b> screen appears where you can define a new price item pricing.
Price Item Information	Displays details of the price item or price item bundle.  <b>Note:</b> It has a link. On clicking the link, the <b>Price Item</b> screen appears where you can view the details of the respective price item or price item bundle.
Copy	On clicking the <b>Copy</b>  icon, the <b>Price Item Pricing</b> screen appears where you can define a new price item pricing using an existing price item pricing.
Pricing Information	Displays details of the price item pricing.  <b>Note:</b> It has a link. On clicking the link, the <b>View Price Item Pricing</b> window appears with the details of the respective price item pricing.

Column Name	Column Description
Account Information	<p>Indicates the account to which the price item pricing is assigned. In addition, this column has a context menu which helps in navigating to other screens in the application.</p> <div data-bbox="570 321 1463 657" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>This column appears only when you select the <b>Account Override Pricing</b> option from the <b>Search By</b> list.</p> <p>It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account.</p> <p>The account information string appears only when an algorithm defined using the <b>C1-AC-INFO</b> algorithm type is attached to the <b>Account Information</b> system event in the <b>Algorithms</b> tab of the <b>Installation Options – Framework</b> screen.</p> </div>
Person Information	<p>Indicates the person to which the price item pricing is assigned. In addition, this column has a context menu which helps in navigating to other screens in the application.</p> <div data-bbox="570 800 1463 1136" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>This column appears only when you select the <b>Person Override Pricing</b> option from the <b>Search By</b> list.</p> <p>It has a link. On clicking the link, the <b>Person</b> screen appears where you can view the details of the respective person.</p> <p>The person information string appears only when an algorithm defined using the <b>PERS-INFO</b> algorithm type is attached to the <b>Person Information</b> system event in the <b>Algorithms</b> tab of the <b>Installation Options – Framework</b> screen.</p> </div>
Price List Information	<p>Indicates the price list to which the price item pricing is assigned. In addition, this column has a context menu which helps in navigating to other screens in the application.</p> <div data-bbox="570 1276 1463 1507" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>This column appears only when you select the <b>Price List Pricing</b> option from the <b>Search By</b> list.</p> <p>It has a link. On clicking the link, the <b>Price List</b> screen appears where you can view the details of the respective person.</p> </div>
Variance Parameter	<p>Indicates the variance parameter which is used for defining the price item pricing.</p> <div data-bbox="570 1581 1463 1696" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This column appears only when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>False</b>.</p> </div>

Column Name	Column Description
Pricing Parameters	<p>Displays a comma-separated list of parameter values. The order in which parameter values appear in this column is controlled by the display order (which is defined while associating a parameter with a price item or price item bundle).</p> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This column appears only when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>True</b>.</p> </div>
Effective Start Date	Displays the date from when the price item pricing is effective.
Effective End Date	Displays the date till when the price item pricing is effective.
Pricing Currency	Indicates the currency in which the price item pricing is defined.
Pricing Status	<p>Indicates the status of the price item pricing. The valid values are:</p> <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> <li>• Proposed</li> <li>• Rejected</li> <li>• Template</li> </ul>
Rate Schedule	Indicates the rate schedule which is used for defining the price item pricing.
Price Assignment Usage	<p>Indicates whether the price item pricing is applicable to all customers or only to new customers. The valid values are:</p> <ul style="list-style-type: none"> <li>• AC</li> <li>• NC</li> </ul>
Price Assignment Type	<p>Indicates the type of the price item pricing. The valid values are:</p> <ul style="list-style-type: none"> <li>• Regular</li> <li>• Post Processing</li> <li>• Post Processing – Invoice Based</li> <li>• Post Processing – Price Item Based</li> </ul> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This column appears only when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>False</b>.</p> </div>
Price Item	<p>Displays the price item or price item bundle code.</p> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> It has a link. On clicking the link, the <b>Price Item Pricing</b> screen appears where you can define the pricing for the respective price item or price item bundle.</p> </div>
Description	Displays the description of the price item or price item bundle.
Global Price List	<p>Indicates whether the price item or price item bundle can be assigned to a global price list. The valid values are:</p> <ul style="list-style-type: none"> <li>• Y</li> <li>• N</li> </ul>

Column Name	Column Description
Unit of Measure	Indicates the unit of measure associated with the price item or price item bundle.
Bundle	Indicates whether the price item is a bundle or not. The valid values are: <ul style="list-style-type: none"> <li>• Y</li> <li>• N</li> </ul>
Owner ID	Displays the ID of the person for whose account the price list is created.
Party ID	Displays the third party ID.
Price List ID	Indicates the price list to which the price item pricing is assigned. <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <b>Note:</b> This column appears only when you select the <b>Price List Pricing</b> option from the <b>Search By</b> list. </div>
Price Assignment ID	Displays the price assignment ID.
Price Assignment Owner Type Flag	Displays whether price list or party is the owner of the price assignment.
Bundle Type	Indicates the type of the price item bundle. If the price item bundle is available for pricing and billing, the valid values are: <ul style="list-style-type: none"> <li>• Phantom</li> <li>• Ratio</li> <li>• Regular</li> </ul> <p>However, if the price item bundle is available for only pricing and the price item type is <b>Fees</b> then the valid value is <b>Regular</b>.</p> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <b>Note:</b> This column appears only when you select the <b>Yes</b> option from the <b>Bundle</b> list. </div>
Price Item Type	Indicates the type of the price item or price item bundle. The valid values are: <ul style="list-style-type: none"> <li>• Rate</li> <li>• Fees</li> </ul>

## Editing a Price Item Pricing of a Price List

### Prerequisites

To edit a price item pricing of a price list, you should have:

- Transactions mapped to the price item defined in the application
- Rate schedules, rate versions, rate components defined in the application
- Parameters associated with the price item (in case you want to define price item pricing based on those parameters)

### Procedure

To edit a price item pricing of a price list:

1. Search for the price list in the **Price List** screen.
2. In the **Search Results** section, click the **Price List Pricing** (  ) icon corresponding to the price list whose details you want to view.  
The **Price List Price Item Pricing** screen appears.
3. Price assignments effective for the price list appears in the **Price List Price Items** zone.
4. Click the **Edit** (  ) icon in the **Edit** column corresponding to the price item pricing whose details you want to edit.

The **Price Item Pricing** screen appears. It contains the following sections:

- **Main** – Used to specify basic details about the price item pricing.
- **TFM Information** – Used to specify the transaction feed management information about the price item pricing.

**Note:** This section appears in the **Price Item Pricing** screen only when the value for the **Show Default Values in Price Item Pricing** option type for **C1\_FM** feature configuration is set to **Y** and **Price Item Available For** is **Pricing and Billing**.

- **Characteristics** – Used to define characteristics for the price item pricing.
- **Price Item and Parameter Information** – Used to define the parameter details segment for the price item pricing.

**Note:** This section appears only when **Price Assignment Type** is **Regular**.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Start Date	<p>Used to specify the date from when the price item pricing is effective.</p> <div data-bbox="548 321 1195 661" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>The effective start date cannot be later than the effective end date.</p> <p>If you change the effective start and end dates while editing a price item pricing, you need to specify the parameters which are effective during that date range.</p> <p>This field will be in read-only mode when the price assignment has been used.</p> </div>	Yes
End Date	<p>Used to specify the date till when the price item pricing is effective.</p> <div data-bbox="548 768 1195 850" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> The effective end date cannot be earlier than the effective start date.</p> </div>	No

Field Name	Field Description	Mandatory (Yes or No)
Price Assignment Type	<p>Used to indicate the type of price assignment. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Regular</b> – Used to indicate that the pricing must be used to generate regular bill segment.</li> <li>• <b>Post Processing</b> – Used to indicate that the pricing must be used to generate post processing bill segment. This type of price assignment can be done on usage accounts. The post processing bill segment is generated when you generate the bill for the usage account and not when you bill the usage account through an invoice account.</li> </ul> <div data-bbox="613 642 1198 884" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> The post processing bill segment is generated when the <b>Post Processing Sequence (PPSEQ)</b> characteristic is defined for the price item and when the price item is associated with another price item using the <b>Price Item</b> relationship type.</p> </div> <ul style="list-style-type: none"> <li>• <b>Post Processing – Invoice Based</b> – Used to indicate that the pricing must be used to generate post processing bill segment. This type of price assignment can be done on an invoice account, and, as a result, the post processing bill segment is generated on the invoice account.</li> </ul> <div data-bbox="613 1108 1198 1192" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This will not be applicable for price item which are defined for <b>Only Pricing</b>.</p> </div> <ul style="list-style-type: none"> <li>• <b>Post Processing – Price Item Based</b> – Used to indicate that the pricing must be used to generate post processing bill segment. This type of price assignment can be done on both invoice and usage accounts, but the post processing bill segment is generated only on the invoice account.</li> </ul> <div data-bbox="613 1417 1198 1501" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This will not be applicable for price item which are defined for <b>Only Pricing</b>.</p> </div>	Yes
Pricing Eligibility	<p>Used to select pricing eligibility criteria for price item pricing.</p> <div data-bbox="548 1577 1198 1692" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This field will be enabled for selection if the checkbox is not selected. If the checkbox appears selected then this field will be in read-only mode.</p> </div>	No

Field Name	Field Description	Mandatory (Yes or No)
Pricing Status	<p>Used to indicate the status of the price assignment. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Draft</b> – Indicates that the price assignment is created as a draft.</li> <li>• <b>Active</b> – Indicates that the price assignment is used for billing.</li> <li>• <b>Inactive</b> – Indicates that the price assignment is no longer used for billing.</li> <li>• <b>Proposed</b> – Indicates that the price assignment is to be used for quotations.</li> <li>• <b>Template</b> – Indicates that the price assignment is a template price list.</li> </ul> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> If a price assignment is in <b>Active</b> status, you can change its status to <b>Inactive</b>. If a price assignment is in <b>Draft</b> status, you cannot change its status to <b>Proposed</b>.</p> </div>	Yes
Pricing Currency	Used to indicate the currency in which you want to define the price item pricing.	Yes
Rate Schedule	<p>Used to specify the rate schedule that you want to use while defining price item pricing.</p> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> Rate schedules control how the bills for the price item will be calculated. The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Rate Schedule Search</b> screen appears.</p> </div>	Yes
Pricing Rule Type	<p>Used to indicate the pricing rule type. The valid value is:</p> <ul style="list-style-type: none"> <li>• Two-Dimensional</li> </ul>	<p>Yes (Conditional)</p> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> This field is required when you are editing a two-dimensional pricing rule.</p> </div>
Print Zero	<p>Used to indicate whether zero pricing should be displayed in the bill. The valid values are:</p> <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> By default, <b>Yes</b> is selected.</p> </div>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Price Assignment Usage	Used to indicate whether the price item pricing is applicable to all customers or only to new customers. The valid values are: <ul style="list-style-type: none"> <li>All Customers</li> <li>New Customers</li> </ul>	Yes
Pricing Frequency	Used to indicate pricing frequency for the price item. <div style="border: 1px solid black; padding: 2px;"> <b>Note:</b> This field appears only when <b>Price Item</b> is defined as <b>Only Pricing</b> and <b>Price Item Type</b> is defined as <b>Fees</b>. </div>	Yes

5. Modify the details in the **Main** section, if required.
6. Edit the TFM Information in a price item pricing, if required.
7. Edit the characteristics for a price item pricing, if required.
8. Edit the parameters for a price item pricing, if required.
9. Click **Save**.

The changes made to the price item pricing are saved.

### **Assigning a Price Item to a Price List**

#### **Prerequisites**

To assign a price item to a price list, you should have:

- Transactions mapped to the price item defined in the application
- Rate schedules, rate versions, and rate components defined in the application
- Parameters associated with the price item (in case you want to define price item pricing based on multiple parameters)

#### **Procedure**

To assign a price item to a price list:

1. Search for the price list in the **Price List** screen.

- In the **Search Results** section, click the **Price List Pricing** () icon corresponding to the price list whose details you want to view.

The **Price List Price Item Pricing** screen appears.

- Search for the price item that you want to assign to the price list in the **Search Price Item or Price Item Pricing** zone.
- In the **Search Results** section, click the **Assign** () icon in the **Assign** column corresponding to the price item that you want to assign to the price list.

The **Price Item Pricing** screen appears. It contains the following sections:

- Main** – Used to specify basic details about the price item pricing.
- TFM Information** – Used to specify the transaction feed management information about the price item pricing.

**Note:** This section appears in the **Price Item Pricing** screen only when the value for the **Show Default Values in Price Item Pricing** option type for **C1\_FM** feature configuration is set to **Y** and **Price Item Available For** is **Pricing and Billing**.

- Characteristics** – Used to define characteristics for the price item pricing.
- Price Item and Parameter Information** – Used to define the parameter details segment for the price item pricing.

**Note:** This section appears only when **Price Assignment Type** is **Processing**.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Start Date	Used to specify the date from when the price item pricing is effective.  <b>Note:</b> By default, the current system date appears in this field. The effective start date cannot be later than the effective end date.	Yes
End Date	Used to specify the date till when the price item pricing is effective.  <b>Note:</b> The effective end date cannot be earlier than the effective start date.	No

Field Name	Field Description	Mandatory (Yes or No)
Price Assignment Type	<p>Used to indicate the type of price assignment. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Regular</b> – Used to indicate that the pricing must be used to generate regular bill segment.</li> <li>• <b>Post Processing</b> – Used to indicate that the pricing must be used to generate post processing bill segment. This type of price assignment can be done on usage accounts. The post processing bill segment is generated when you generate the bill for the usage account and not when you bill the usage account through an invoice account.</li> </ul> <div data-bbox="610 642 1187 884" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> The post processing bill segment is generated when the <b>Post Processing Sequence (PPSEQ)</b> characteristic is defined for the price item and when the price item is associated with another price item using the <b>Price Item</b> relationship type.</p> </div> <ul style="list-style-type: none"> <li>• <b>Post Processing – Invoice Based</b> – Used to indicate that the pricing must be used to generate post processing bill segment. This type of price assignment can be done on an invoice account, and, as a result, the post processing bill segment is generated on the invoice account.</li> </ul> <div data-bbox="610 1108 1187 1192" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This will not be applicable for price item which are defined for <b>Only Pricing</b>.</p> </div> <ul style="list-style-type: none"> <li>• <b>Post Processing – Price Item Based</b> – Used to indicate that the pricing must be used to generate post processing bill segment. This type of price assignment can be done on both invoice and usage accounts, but the post processing bill segment is generated only on the invoice account.</li> </ul> <div data-bbox="610 1417 1187 1501" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This will not be applicable for price item which are defined for <b>Only Pricing</b>.</p> </div>	Yes
Pricing Eligibility	Used to select pricing eligibility criteria for price item pricing.	No
Pricing Status	<p>Used to indicate the status of the price assignment. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Draft</b> – Indicates that the price assignment is created as a draft.</li> <li>• <b>Proposed</b> – Indicates that the price assignment is used for quotations.</li> <li>• <b>Template</b> – Indicates that the price assignment is a template price list.</li> </ul>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Pricing Currency	Used to indicate the currency in which you want to define the price item pricing.	Yes
Rate Schedule	Used to specify the rate schedule that you want to use while defining price item pricing.  <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> Rate schedules control how the bills for the price item will be calculated.  The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Rate Schedule Search</b> screen appears.</p> </div>	Yes
Pricing Rule Type	Used to indicate the pricing rule type. The valid value is: <ul style="list-style-type: none"> <li>Two-Dimensional</li> </ul>	Yes (Conditional)  <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This field is required when you are defining a two-dimensional pricing rule.</p> </div>
Print Zero	Used to indicate whether zero pricing should be displayed in the bill. The valid values are: <ul style="list-style-type: none"> <li>Yes</li> <li>No</li> </ul> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> By default, <b>Yes</b> is selected.</p> </div>	Yes
Price Assignment Usage	Used to indicate whether the price item pricing is applicable to all customers or only to new customers. The valid values are: <ul style="list-style-type: none"> <li>All Customers</li> <li>New Customers</li> </ul>	Yes
Pricing Frequency	Used to indicate pricing frequency for the price item.  <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This field appears only when <b>Price Item</b> is defined as <b>Only Pricing</b> and <b>Price Item Type</b> is defined as <b>Fees</b>.</p> </div>	Yes

5. Enter the required details in the **Main** section.
6. Define TFM Information in a price item pricing, if required.
7. Define characteristics for a price item pricing, if required.
8. Define parameters for a price item pricing, if required.
9. Click **Save**.

The pricing is defined for the price item.

**Note:** A bundle cannot be assigned if its child price items are already assigned to a price list and vice versa, in the same date range.

#### **Prerequisites**

To define characteristics for a price item pricing, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Price Item**)

#### **Procedure**

To define characteristics for a price item pricing that is assigned to an account:

1. Ensure that the **Characteristics** section is expanded when you are defining a price item pricing.

The **Characteristics** section contains the following columns:

<b>Column Name</b>	<b>Column Description</b>	<b>Mandatory (Yes or No)</b>
Effective Date	Used to specify the date from when the characteristic is effective for the price item pricing.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the price item pricing.
Characteristic Type	Used to indicate the characteristic type. <b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Price Item Pricing</b> .	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the price item pricing.

Column Name	Column Description	Mandatory (Yes or No)
Characteristic Value	Used to specify the value for the characteristic type.  <b>Note:</b> If you select a predefined characteristic type, the <b>Search</b> (🔍) icon appears corresponding to the <b>Characteristic Value</b> field. On clicking the <b>Search</b> icon, the <b>Predefined Characteristic Search</b> window appears.  On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	Yes (Conditional)  <b>Note:</b> This field is required when you are defining a characteristic for the price item pricing.

- Enter the required details in the **Characteristics** section.
- If you want to define more than one characteristic for the price item pricing, click the **Add** (+) icon and then repeat step 3.

**Note:** However, if you want to remove a characteristic from the price item pricing, click the **Delete** (🗑️) icon corresponding to the characteristic.

- Click **Save**.

The characteristics are defined for the price item pricing.

## **Defining Parameters for a Price Item Pricing**

### **Prerequisites**

To define parameters for a price item pricing, you should have:

- Parameters associated with the price item, in case, you want to define price item pricing based on multiple parameters

### **Procedure**

To define parameter details segment for a price item pricing that is assigned to an account:

- Ensure that the **Price Item and Parameter Information** section is expanded when you are defining a price item pricing.

The **Price Item and Parameter Information** section contains the following field:

Field Name	Field Description
Price Item	Indicates the price item or price item bundle whose pricing details are listed in this section.

In addition, this section contains a grid which has the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Parameter	Used to indicate the parameter that you want to associate with the price item pricing.  <b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Price Item Parameter Search</b> window appears. The parameter search results displays only those parameters where the <b>Price Item</b> check box is selected	Yes
Parameter Information	Displays a comma-separated string which contains of the following: <ul style="list-style-type: none"> <li>Parameter Description</li> <li>Mandatory (Yes or No)</li> <li>Priority</li> </ul>	Not applicable
Parameter Value	Used to specify the value of the parameter.	Yes

- Enter the required details in the **Price Item and Parameter Information** section.
- If you want to define more than one parameter information for the price item pricing, click the **Add** (+) icon and then repeat step 2.

**Note:** However, if you want to remove a parameter information from the price item pricing, click the **Delete** (🗑️) icon corresponding to the parameter.

- Click **Save**.

The parameters are defined for the price item pricing.

## Defining TFM Information in a Price Item Pricing

### Prerequisites

To define the TFM information in a price item pricing, you should have:

- Transactions mapped to the price item defined in the application
- Aggregation or Rating Criteria data to be defined for the price item pricing

### Procedure

To define the TFM information in a price item pricing:

- Ensure that the **TFM Information** section is expanded when you are defining a price item pricing.

The **TFM Information** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Ignore Transaction	Used to indicate whether the transactions mapped to the price item is considered for billing. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	Yes
Aggregate Transactions	Used to indicate whether the transactions mapped to the price item is aggregated for billing. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	Yes
Aggregation Schedule	Used to indicate the transaction aggregation cycle. The valid values are: <ul style="list-style-type: none"> <li>• Daily</li> <li>• Weekly</li> <li>• Monthly</li> <li>• Quaterly</li> <li>• Yearly</li> </ul>	Yes
Transaction Rating Criteria	Used to indicate how and when the transaction legs mapped to the price item are rated. The valid values are: <ul style="list-style-type: none"> <li>• Aggregate Transactions and Then Rate Aggregated SQs</li> <li>• Do Not Rate Transactions</li> <li>• Rate Transaction and Aggregate Calc Lines Across Transaction</li> </ul>	Yes

- Enter the required details in the **TFM Information** section.

**Note:** **TFM Information** section appears when the value for **Show Default Values in Price Item Pricing** option type of **C1\_FM feature configuration** is set to **Y** and **Price Item Available For** is **Pricing and Billing**.

- Click **Save**.

The transactions are defined for the price item pricing.

## Price List Assignment

Once a price list is defined, you can assign it to accounts or persons to indicate the prices that will be charged for the price items or services offered to the accounts or persons. You can assign multiple price lists to an account or a person along with the priority or order in which the pricing should be considered. You can also define whether the account or person can avail the price item pricing listed on the parent or grandparent price list if it is not available on the assigned price list. In other words, you can define whether the account or person can inherit the price item pricing from the price list hierarchy.

For example, suppose you have PL1 (with priority 10) and PL2 (with priority 20) assigned to an account or a person. While determining pricing for a price item, the system will search for the price item pricing in PL1. If the system does not find the price item pricing in PL1, it will search for the price item pricing in PL2. The system will behave in this manner only when the price list inheritance for PL1 is set to **No** during the price list assignment.

If the price list inheritance while assigning PL1 and PL2 to an account or a person is set to **Yes**, the system will search for the price item pricing in PL1. If the system does not find the price item pricing in PL1, it will search for the price item pricing from the price list hierarchy defined for PL1. However, if the system does not find the price item pricing from the price list hierarchy of PL1, it will then search for the price item pricing in PL2 (assigned to the account or person with priority 20). If the system still does not find the price item pricing in PL2, it will search for the price item pricing from the price list hierarchy defined for PL2.

The **Price List Assignment** screen allows you to search and assign a price list to an account or a person. It also allows you to view the price lists that are already assigned to an account or a person. It contains the following zones:

- [Price List Assignments](#) on page 409
- [Price List Price Items](#) on page 411
- [Search Price List for Assignment](#)

### Price List Assignments

The **Price List Assignments** zone allows you to view and filter price lists that are currently assigned to the account or person. You can also search for the price lists assigned to the account or person which are either inactive or expired. You will not find any records in this zone if the account does not have any price lists assigned to it. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for the current, inactive, or historical price list assignments. The valid values are: <ul style="list-style-type: none"> <li>• Current Price List Assignments</li> <li>• Inactive Price List Assignments</li> <li>• Historical Price List Assignments</li> </ul> <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"> <b>Note:</b> By default, the <b>Current Price List Assignments</b> option is selected. </div>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Price List ID	Used to search a particular price list assigned to an account or a person.  <b>Note:</b> The <b>Search</b>  icon appears corresponding to the <b>Price List ID</b> field. On clicking the <b>Search</b> icon, the <b>Price List Search</b> window appears.	No
Price List Description	Used to search price lists which are assigned to the account or person having a particular description.	No
Effective Start Date	Used to search price lists which are assigned to the account or person from a particular date.	No
Effective End Date	Used to search price lists which are assigned to the account or person till a particular date.	No
Assignment Status	Used to search price list assignments with a particular status. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Rejected</li> <li>• Proposed</li> <li>• Inactive</li> </ul> <b>Note:</b> The <b>Inactive</b> option is not available in the <b>Assignment Status</b> list when you have selected the <b>Current Price List Assignments</b> or <b>Historical Price List Assignments</b> option from the <b>Search By</b> list. This field is disabled, and by default, the <b>Inactive</b> option is selected when you select the <b>Inactive Price List Assignments</b> option from the <b>Search By</b> list.	No
Price List Inheritance	Used to search price list assignments where the account or person inherits price item pricing from the price list hierarchy. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	No

**Note:** You must specify at least one search criterion while searching for price list assignments.

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Price List Information	Displays information about the price list which is assigned to the account or person.  <b>Note:</b> It has a link. On clicking the link, the <b>Price List</b> screen appears with the details of the respective price list.

Column Name	Column Description
Effective Start Date	Displays the date from when the price list is assigned to the account or person.
Effective End Date	Displays the date till when the price list is assigned to the account or person.
Priority	Indicates the order in which the assigned price list must be considered while determining the price item pricing for the account or person.
Assignment Status	Indicates the status of the price list assignment. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Rejected</li> <li>• Proposed</li> <li>• Inactive</li> </ul>
Price List Inheritance	Indicates whether the account or person can avail the price item pricing listed on the parent or grandparent price list if it is not available on the assigned price list. In other words, it indicates whether the account or person can inherit the price item pricing from the price list hierarchy.
Edit	On clicking the <b>Edit</b>  icon, the <b>Price List Assignment</b> screen appears where you can edit the price list assignment details.

**Note:** Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

On clicking the **Broadcast**  icon corresponding to the assigned price list, the **Price List Price Items** zone appears where you can view the price items assigned to the price list.

### **Price List Price Items**

The **Price List Price Items** zone lists the price items that are assigned to the price list. You will not find any records in this zone if the price list does not have any price items assigned to it. It contains the following columns:

Column Name	Column Description
Pricing	Displays information about the price item pricing. <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> It has a link. On clicking the link, the <b>Price Item Pricing</b> screen appears where you can view the details of the price item pricing.</p> </div>

Column Name	Column Description
Pricing Parameters	<p>Displays a comma-separated list of parameter values. The order in which parameter values appear in this column is controlled by the display order (which is defined while associating a parameter with a price item).</p> <p><b>Note:</b> This column appears only when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>True</b>.</p>
Pricing Status	<p>Indicates the status of the price item pricing. The valid values are:</p> <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> <li>• Proposed</li> <li>• Rejected</li> <li>• Template</li> </ul>
Effective Start Date	Displays the date from when the price item pricing is effective for the price list.
Effective End Date	Displays the date till when the price item pricing is effective for the price list.
Price Assignment Type	<p>Indicates the type of the price assignment for price item pricing. The valid values are:</p> <ul style="list-style-type: none"> <li>• Regular</li> <li>• Post Processing</li> <li>• Post Processing – Invoice Based</li> <li>• Post Processing – Price Item Based</li> </ul> <p><b>Note:</b> This column appears only when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>True</b>.</p>
Copy	<p>On clicking the <b>Copy</b> () icon, the <b>Price Item Pricing</b> screen appears where you can define a new price item pricing using an existing price item pricing.</p>

By default, the **Price List Price Items** zone does not appear in the **Price List Assignment** screen. It appears only when you click the **Broadcast** () icon corresponding to the assigned price list in the **Price List Assignments** zone.

You can filter the list using various search criteria (such as, **Price Item** and **Effective Start Date**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filter** () icon in the upper right corner of this zone.

You can change the layout of this zone. For more information on how to change the layout, see [Changing the Layout](#) on page 2882.

### Search Price List for Assignment

The **Search Price List for Assignment** zone allows you to search for a price list that you want to assign to the account or person. It contains the following two sections:

- **Search Criteria** – The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search against all price lists or against those price lists which are already assigned to an account or a person. The valid values are: <ul style="list-style-type: none"> <li>• Price List</li> <li>• Assigned Price List</li> </ul> <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"><b>Note:</b> By default, the <b>Price List</b> option is selected.</div>	Yes
Price List ID	Used to search a particular price list.	No
Price List Description	Used to search price lists with a particular description.	No
Effective Start Date	If you have selected the <b>Price List</b> option from the <b>Search By</b> list, this field is used to search price lists which are effective from a particular date onwards. However, if you have selected the <b>Assigned Price List</b> option from the <b>Search By</b> list, this field is used to search price lists which are assigned to an account or a person from a particular date onwards.	No
Effective End Date	If you have selected the <b>Price List</b> option from the <b>Search By</b> list, this field is used to search price lists which are effective till a particular date. However, if you have selected the <b>Assigned Price List</b> option from the <b>Search By</b> list, this field is used to search price lists which are assigned to an account or a person till a particular date.	No
Account ID	Used to search price lists assigned to a particular account. <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"><b>Note:</b> This field appears only when you have selected the <b>Assigned Price List</b> option from the <b>Search By</b> list.</div>	No
Person ID	Used to search price lists assigned to a particular person. <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"><b>Note:</b> This field appears only when you have selected the <b>Assigned Price List</b> option from the <b>Search By</b> list.</div>	No
Status	Used to search price lists with a particular status. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Proposed</li> </ul> <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"><b>Note:</b> This field appears only when you have selected the <b>Price List</b> option from the <b>Search By</b> list.</div>	No

Field Name	Field Description	Mandatory (Yes or No)
Price List Type	Used to search a particular type of price lists. The valid values are: <ul style="list-style-type: none"> <li>Standard</li> <li>Promotional</li> </ul> <p><b>Note:</b> This field appears only when you have selected the <b>Price List</b> option from the <b>Search By</b> list.</p>	No
Only Eligible Price Lists	Used to search price lists which are eligible for the account or person. <p><b>Note:</b> This field appears only when you have selected the <b>Price List</b> option from the <b>Search By</b> list.</p>	No
Eligibility Date	Used to search price lists which are eligible for the account or person from a particular date. <p><b>Note:</b> This field appears only when you have selected the <b>Price List</b> option from the <b>Search By</b> list. By default, the current date appears in this field when the <b>Only Eligible Price Lists</b> option is selected. You can change the value, if required.</p>	No

**Note:** You must specify at least one search criterion while searching for a price list.

- **Search Results** – On clicking the **Search** button, the search results appear based on the specified search criteria. The search results include only those price lists that are associated with the division to which the account belongs. It may also include price lists that are already assigned to the account in case those price lists match the search criteria.

The **Search Results** section contains the following columns:

Column Name	Column Description
Assign	On clicking the <b>Assign</b> (  ) icon, the <b>Price List Assignment</b> screen appears where you can assign the price list to the account or person.
Price List Information	Displays the information about the price list. <p><b>Note:</b> It has a link. On clicking the link, the <b>Price List</b> screen appears where you can view the details of the respective price list.</p>
Account Information	Displays the information about the account. <p><b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account.</p>

Column Name	Column Description
Person Information	Displays the information about the person.  <b>Note:</b> It has a link. On clicking the link, the <b>Person</b> screen appears where you can view the details of the respective person.
Effective Start Date	If you have selected the <b>Price List</b> option from the <b>Search By</b> list, the date from when the price list is effective appears in this column. However, if you have selected the <b>Assigned Price List</b> option from the <b>Search By</b> list, the date from when the price list is assigned to the account or person appears in this column.
Effective End Date	If you have selected the <b>Price List</b> option from the <b>Search By</b> list, the date till when the price list is effective appears in this column. However, if you have selected the <b>Assigned Price List</b> option from the <b>Search By</b> list, the date till when the price list is assigned to the account or person appears in this column.
Availability Start Date	Displays the date from when the price list is available for assignment to an account or a person.
Availability End Date	Displays the date till when the price list is available for assignment to an account or a person.

### **Assigning a Price List to an Account**

#### **Prerequisites**

To assign a price list to an account, you should have:

- Price list defined in the application
- Price list associated with the division to which the account belongs

#### **Procedure**

To assign a price list to an account:

1. Search for the account in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **Show Context Menu** () icon corresponding to the account whose details you want to edit.

A menu appears.

3. Click the **Go To Price List Assignment** menu option.

The **Price List Assignment** screen appears. It contains the following zones:

- **Price List Assignments** – Lists the price lists that are already assigned to the account.
  - **Price List Price Items** – Lists the price items that are assigned to the price list.
  - **Search Price List for Assignment** – Enables you to search for a price list that you want to assign to the account.
4. In the **Search Price List for Assignment** zone, select the **Price List** or **Assigned Price List** option from the **Search By** list depending on whether you want to search against all price lists or against those price lists which are already assigned to an account or a person.
  5. Enter the search criteria in the **Search Price List for Assignment** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

6. Click **Search**.

A list of price lists that meet the search criteria appears in the **Search Results** section.

**Note:** The search results include only those price lists that are associated with the division to which the account belongs. It may also include price lists that are already assigned to the account in case those price lists match the search criteria.

7. In the **Search Results** section, click the **Assign** () icon corresponding to the price list that you want to assign to the account.

The **Price List Assignment** screen appears. It consists of the following sections:

- **Main** – Used to specify basic information while assigning the price list to the account.
- **Characteristics** – Used to define characteristics for the price list assignment.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Account Information	Indicates the account to which you want to assign the price list.	Not applicable
Price List Information	Displays the information about the price list.	Not applicable

Field Name	Field Description	Mandatory (Yes or No)										
Effective Start Date	<p>Used to specify the date from when you want to assign the price list to the account.</p> <p><b>Note:</b> The price list assignment start date cannot be earlier than the price list effective start date or later than the price list effective end date.</p>	Yes										
Effective End Date	<p>Used to specify the date till when you want to assign the price list to the account.</p> <p><b>Note:</b></p> <p>The effective end date cannot be earlier than the effective start date.</p> <p>If the validity period is specified for the price list, the price list assignment end date should be earlier than or equal to the following whichever is earlier:</p> <ul style="list-style-type: none"> <li>• Price list assignment validity end date (which is price list assignment start date + validity period)</li> <li>• Price list effective end date</li> </ul> <p>Let us understand this with the help of the following example:</p> <table border="1" data-bbox="516 974 1138 1352"> <tbody> <tr> <td><b>Price List Effective Start Date</b></td> <td>01-Jan-2015</td> </tr> <tr> <td><b>Price List Effective End Date</b></td> <td>31-Jan-2015</td> </tr> <tr> <td><b>Validity Period</b></td> <td>15 Days</td> </tr> <tr> <td><b>Price List Assignment Start Date</b></td> <td>15-Jan-2015</td> </tr> <tr> <td><b>Price List Assignment Validity End Date</b></td> <td>30-Jan-2015 (i.e. 15-Jan-2015 + 15 Days)</td> </tr> </tbody> </table> <p>In the above example, the price list assignment end date must be earlier than or equal to the price list assignment validity end date because the price list assignment validity end date is earlier than the price list effective end date.</p>	<b>Price List Effective Start Date</b>	01-Jan-2015	<b>Price List Effective End Date</b>	31-Jan-2015	<b>Validity Period</b>	15 Days	<b>Price List Assignment Start Date</b>	15-Jan-2015	<b>Price List Assignment Validity End Date</b>	30-Jan-2015 (i.e. 15-Jan-2015 + 15 Days)	No
<b>Price List Effective Start Date</b>	01-Jan-2015											
<b>Price List Effective End Date</b>	31-Jan-2015											
<b>Validity Period</b>	15 Days											
<b>Price List Assignment Start Date</b>	15-Jan-2015											
<b>Price List Assignment Validity End Date</b>	30-Jan-2015 (i.e. 15-Jan-2015 + 15 Days)											
Priority	Used to specify the order in which the price list should be considered while determining the price item pricing for the account.	Yes										
Price List Inheritance	<p>Used to indicate whether the account can avail the price item pricing listed on the parent or grandparent price list if it is not available on the price list. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Yes</b> – Used to indicate that the account can inherit the price item pricing from the price list hierarchy.</li> <li>• <b>No</b> – Used to indicate that the account cannot inherit the price item pricing from the price list hierarchy.</li> </ul>	Yes										

Field Name	Field Description	Mandatory (Yes or No)
Assignment Status	Used to indicate the status of the price list assignment. The valid values are: <ul style="list-style-type: none"> <li>• <b>Active</b> – Used to indicate that you want to use the price item pricing on the price list for billing.</li> <li>• <b>Proposed</b> – Used to indicate that you want to use the price item pricing on the price list for quotations.</li> </ul>	Yes

8. Enter the required details in the **Main** section.
9. Define characteristics for the price list assignment, if required.
10. Click **Save**.

The price list is assigned to the account.

## **Assigning a Price List to a Person**

### **Prerequisites**

To assign a price list to a person, you should have:

- Price list defined in the application
- Price list associated with the division to which the person belongs

### **Procedure**

To assign a price list to a person:

1. Search for the person in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **Show Context Menu** () icon corresponding to the person whose details you want to edit.

A menu appears.

3. Click the **Go To Price List Assignment** menu option.

The **Price List Assignment** screen appears. It contains the following zones:

- **Price List Assignments** – Lists the price lists that are already assigned to the person.
  - **Price List Price Items** – Lists the price items that are assigned to the price list.
  - **Search Price List for Assignment** – Enables you to search for a price list that you want to assign to the person.
4. In the **Search Price List for Assignment** zone, select the **Price List** or **Assigned Price List** option from the **Search By** list depending on whether you want to search against all price lists or against those price lists which are already assigned to an account or a person.

5. Enter the search criteria in the **Search Price List for Assignment** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

6. Click **Search**.

A list of price lists that meet the search criteria appears in the **Search Results** section.

**Note:** The search results include only those price lists that are associated with the division to which the person belongs. It may also include price lists that are already assigned to the person in case those price lists match the search criteria.

7. In the **Search Results** section, click the **Assign**  icon corresponding to the price list that you want to assign to the person.

The **Price List Assignment** screen appears. It consists of the following sections:

- **Main** – Used to specify basic information while assigning the price list to the person.
- **Characteristics** – Used to define characteristics for the price list assignment.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Person Information	Indicates the person to whom you want to assign the price list.	Not applicable
Price List Information	Displays the information about the price list.	Not applicable
Effective Start Date	Used to specify the date from when you want to assign the price list to the person.  <b>Note:</b> The price list assignment start date cannot be earlier than the price list effective start date or later than the price list effective end date.	Yes

Field Name	Field Description	Mandatory (Yes or No)										
Effective End Date	<p>Used to specify the date till when you want to assign the price list to the person.</p> <p><b>Note:</b></p> <p>The effective end date cannot be earlier than the effective start date.</p> <p>If the validity period is specified for the price list, the price list assignment end date should be earlier than or equal to the following whichever is earlier:</p> <ul style="list-style-type: none"> <li>• Price list assignment validity end date (which is price list assignment start date + validity period)</li> <li>• Price list effective end date</li> </ul> <p>Let us understand this with the help of the following example:</p> <table border="1" data-bbox="518 751 1138 1129"> <tr> <td><b>Price List Effective Start Date</b></td> <td>01-Jan-2015</td> </tr> <tr> <td><b>Price List Effective End Date</b></td> <td>31-Jan-2015</td> </tr> <tr> <td><b>Validity Period</b></td> <td>15 Days</td> </tr> <tr> <td><b>Price List Assignment Start Date</b></td> <td>15-Jan-2015</td> </tr> <tr> <td><b>Price List Assignment Validity End Date</b></td> <td>30-Jan-2015 (i.e. 15-Jan-2015 + 15 Days)</td> </tr> </table> <p>In the above example, the price list assignment end date must be earlier than or equal to the price list assignment validity end date because the price list assignment validity end date is earlier than the price list effective end date.</p>	<b>Price List Effective Start Date</b>	01-Jan-2015	<b>Price List Effective End Date</b>	31-Jan-2015	<b>Validity Period</b>	15 Days	<b>Price List Assignment Start Date</b>	15-Jan-2015	<b>Price List Assignment Validity End Date</b>	30-Jan-2015 (i.e. 15-Jan-2015 + 15 Days)	No
<b>Price List Effective Start Date</b>	01-Jan-2015											
<b>Price List Effective End Date</b>	31-Jan-2015

How to define characteristics for a price list assignment	<a href="#">Defining Characteristics for a Price List Assignment</a>

## **Defining Characteristics for a Price List Assignment**

### **Prerequisites**

To define characteristics for a price list assignment, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Price List Assignment**)

### **Procedure**

To define characteristics for a price list assignment:

1. Ensure that the **Characteristics** section is expanded when you are defining or editing characteristics for a price list assignment.

The **Characteristics** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the price list assignment.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the price list assignment.
Characteristic Type	Used to indicate the characteristic type. <b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Price List Assignment</b> .	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the price list assignment.

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Value	Used to specify the value for the characteristic type.  <b>Note:</b> On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	Yes (Conditional)  <b>Note:</b> This field is required when you are defining a characteristic for the price list assignment.

- Enter the required details in the **Characteristics** section.

**Note:** If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

- If you want to define more than one characteristic for the price list assignment, click the **Add** (+) icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from the price list assignment, click the **Delete** (🗑️) icon corresponding to the characteristic.

- Click **Save**.

The characteristics are defined for the price list assignment.

How to view accounts and persons where price list is assigned	<a href="#">Viewing Accounts and Persons where Price List is Assigned</a> on page 433

### Persons to whom Price List is Assigned

The **Persons to whom Price List is Assigned** zone displays the details of the persons where price list is assigned. It contains the following fields:

Field Name	Field Description
Person ID	Displays the person ID.
Person Information	Displays information about the person. In addition, this column has a context menu which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Person</b> screen appears where you can view the details of the respective person.
Price List Assignment Start Date	Displays the price list assignment start date.
Price List Assignment End Date	Displays the price list assignment end date.
Division	Displays the division to which the person belongs.
Price List Assignment ID	Displays the price list assignment ID.

## Viewing Accounts and Persons where Price List is Assigned

### Prerequisites

To view accounts and persons where price list is assigned, you should have:

- Accounts and persons created in the application
- Price list defined and assigned to the accounts and persons

### Procedure

To view accounts and persons where price list is assigned:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Pricing Management** and then click **Price List**.  
The **Price List** screen appears.
3. You can search for a price list by entering the search criteria in the **Search Price List** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

4. Click **Search**.  
A list of price lists that meet the search criteria appears in the search results.
5. In the **Search Results** section, click the **Assigned To** (🔗) icon in the **Assigned To** column corresponding to the price list whose details you want to view.  
The **Price List Assignments** screen appears.
6. You can view the accounts and persons list where price list is assigned in the **Price List Assignments** screen.

## Persons and Accounts Eligible for Price List Assignment

The **Persons and Accounts Eligible for Price List Assignment** screen allows you to view the details of a price list. It also allows you to search for multiple eligible accounts or persons and assign them to the price list. This screen consists of the following zones:

- [Eligible Accounts](#) on page 434
- [Eligible Persons](#) on page 434

## Eligible Accounts

The **Eligible Accounts** zone allows you to search the eligible accounts for price list assignments. Moreover, it also allows you to assign the multiple eligible accounts to a price list. This zone contains the following two sections:

- **Search Criteria** — The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Division	Used to indicate the division whose accounts you want to search.	Yes
Effective Date	Used to indicate the date from when the accounts are eligible for price list assignment.	No
Account ID	Used to indicate the account ID.	No

- **Search Results** — On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Account Information	<p>Displays the information about the eligible accounts where price list can be assigned. In addition, this column has a context menu which helps in navigating to other screens in the application.</p> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account.</p> </div>
Assigned	<p>Displays whether the account is assigned to the price list or not. The valid values are:</p> <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>

## Eligible Persons

The **Eligible Persons** zone allows you to search the eligible persons for price list assignments. Moreover, it also allows you to assign the multiple eligible persons to a price list. This zone contains the following two sections:

- **Search Criteria** — The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Division	Used to indicate the division whose persons you want to search.	Yes
Effective Date	Used to indicate the date from when the persons are eligible for price list assignment.	No
Person ID	Used to indicate the person ID.	No

- **Search Results** — On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Person Information	<p>Displays the information about the eligible persons where price list can be assigned. In addition, this column has a context menu which helps in navigating to other screens in the application.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Person</b> screen appears where you can view the details of the respective person.</p>
Assigned	<p>Displays whether the person is assigned to the price list or not. The valid values are:</p> <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>

## **Assigning a Price List to One or More Eligible Accounts**

### **Prerequisites**

To assign a price list to one or more eligible accounts, you should have:

- Price list defined in the application
- Accounts created in the application
- Price list should be associated with the division to which accounts belong.

### **Procedure**

To assign a price list to one or more eligible accounts:

1. Search for the eligible accounts in the **Eligible Accounts** zone of **Persons and Accounts Eligible for Price List Assignment** screen.
2. In the **Search Results** section, select the one or more accounts that you want to assign to the price list.
3. Click the **Assign** button available in the upper left corner of this section

The **Price List Assignment** screen appears. This screen contains following two sections:

- **Main** — Used to specify basic details about the price list. This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Price List Information	Displays the additional information about the price list.	Not applicable
Effective Start Date	Used to specify the date from when the price list is effective.	Yes
Effective End Date	Used to specify the date till when the price list is effective.	No

Field Name	Field Description	Mandatory (Yes or No)
Priority	Used to specify the order in which the price list should be considered while determining the price item pricing for the account.	No
Price List Inheritance	Used to indicate whether the account can avail the price item pricing listed on the parent or grandparent price list if it is not available on the price list. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	No
Assignment Status	Used to indicate the status of the price list assignment. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Proposed</li> </ul>	No
Priority Indicator	Used to set the priority of the price list assignment. The valid values are: <ul style="list-style-type: none"> <li>• <b>Highest</b> — Used when you want the price list assignment to have the highest priority. It checks whether there are any other price list assignments for the account, derives the priority of each such price list assignment, and then sets the priority of the new price list assignment to the existing price list assignment with highest priority minus one.</li> <li>• <b>Lowest</b> — Used when you want the price list assignment to have the lowest priority. It checks whether there are any other price list assignments for the account, derives the priority of each such price list assignment, and then sets the priority of the new price list assignment to the existing price list assignment with lowest priority plus one.</li> </ul>	No

- **Characteristics** — Used to define characteristics for the price list.

#### 4. Click **Save**.

Selected accounts are assigned to the price list.

## Assigning a Price List to One or More Eligible Persons

### Prerequisites

To assign a price list to one or more eligible persons, you should have:

- Price list defined in the application
- Persons created in the application
- Price list should be associated with the division to which persons belong.

### Procedure

To assign a price list to one or more eligible persons:

1. Search for the eligible Persons in the **Eligible Persons** zone of **Persons and Accounts Eligible for Price List Assignment** screen.
2. In the **Search Results** section, select the one or more persons that you want to assign to the price list.
3. Click the **Assign** button available in the upper left corner.

The **Price List Assignment** screen appears. This screen contains following two sections:

- **Main** — Used to specify basic details about the price list. This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Price List Information	Displays the additional information about the price list.	Not applicable
Effective Start Date	Used to specify the date from when the price list is effective.	Yes
Effective End Date	Used to specify the date till when the price list is effective.	No
Priority	Used to specify the order in which the price list should be considered while determining the price item pricing for the person.	No
Price List Inheritance	Used to indicate whether the account can avail the price item pricing listed on the parent or grandparent price list if it is not available on the price list. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	No
Assignment Status	Used to indicate the status of the price list assignment. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Proposed</li> </ul>	No

Field Name	Field Description	Mandatory (Yes or No)
Priority Indicator	Used to set the priority of the price list assignment. The valid values are: <ul style="list-style-type: none"> <li>• <b>Highest</b> — Used when you want the price list assignment to have the highest priority. It checks whether there are any other price list assignments for the person, derives the priority of each such price list assignment, and then sets the priority of the new price list assignment to the existing price list assignment with highest priority minus one.</li> <li>• <b>Lowest</b> — Used when you want the price list assignment to have the lowest priority. It checks whether there are any other price list assignments for the person, derives the priority of each such price list assignment, and then sets the priority of the new price list assignment to the existing price list assignment with lowest priority plus one.</li> </ul>	No

- **Characteristics** — Used to define characteristics for the price list.

#### 4. Click **Save**.

Selected persons are assigned to the price list.

## Defining Characteristics for a Price List Assignment

### **Prerequisites**

To define characteristics for a price list assignment, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Price List Assignment**)

### **Procedure**

To define characteristics for a price list assignment:

1. Click the **Characteristics** tab in the **Price List Assignment** screen when you are assigning a price list to multiple persons or accounts and also editing the price list assignment details of multiple persons or accounts.

The **Characteristics** tab appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the price list assignment.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the price list assignment.
Characteristic Type	Used to indicate the characteristic type. <b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Price List Assignment</b> .	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the price list assignment.
Characteristic Value	Used to specify the value for the characteristic type. <b>Note:</b> On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the price list assignment.

- Enter the required details in the **Characteristics** tab.

**Note:** If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

- If you want to define more than one characteristic for the price list assignment, click the **Add** (+) icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from the price list assignment, click the **Delete** (🗑️) icon corresponding to the characteristic.

- Click **Save**.

The characteristics are defined for the price list assignment.

## Pricing (Account)

The **Pricing (Account)** screen allows you to:

- View effective price assignments of an account
- View the details of an assigned or inherited price item pricing
- Search and assign price items or price item bundles to an account

- Edit or override a price item pricing
- Copy a price item pricing and assign it to an account

This screen consists of the following zones:

- [Effective Price Assignments for Account](#) on page 440
- [Search Price Item](#) on page 445

## Effective Price Assignments for Account

The **Effective Price Assignments for Account** zone lists the price item pricing (i.e. price assignments) which are effective on the current date. In other words, it lists effective pricing for price items or price item bundles assigned to the account either directly or through the customer hierarchy. The order in which the price assignments are listed is controlled by the **Price Assignment Search** algorithm defined for the division to which the account belongs. If required, you can filter effective price assignments using various search criteria.

**Note:** If the effective pricing is available for the price item, regular bundle (to which the price item belongs), and parent (regular) bundle (i.e. to which the regular bundle belongs) at the same level, the system lists the pricing depending on the value defined for the **Prefer Price Item Over Bundle** parameter in the price assignment search algorithm. If the value of the **Prefer Price Item Over Bundle** parameter is set to **Y**, the system lists effective pricing which is available for the price item. If the effective pricing is not available for the price item, then the system lists effective pricing which is available for the regular bundle at the same level. If the effective pricing is not available for the regular bundle, then the system lists effective pricing which is available for the parent bundle at the same level. However, if the value of the **Prefer Price Item Over Bundle** parameter is set to **N**, the system lists effective pricing which is available for the parent bundle. If the effective pricing is not available for the parent bundle, then the system lists effective pricing which is available for the regular bundle at the same level. If the effective pricing is not available for the regular bundle, then the system lists effective pricing which is available for the price item at the same level.

This zone contains the following two sections:

- **Search Criteria** – The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Account ID	Indicates the account whose effective price assignments are listed in this zone.	Not applicable
Effective Pricing Date	Used to search price assignments which are effective on a particular date.  <b>Note:</b> By default, this field is set to the system date.	No

Field Name	Field Description	Mandatory (Yes or No)
Assignment Level	<p>Used to search price assignments at a particular level in the customer hierarchy. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Account Agreed</b> – Means price item pricing is agreed for the account.</li> <li>• <b>Account Price List</b> – Means price item pricing is defined in the price list which is assigned to the account.</li> <li>• <b>Account Inherited Price List</b> – Means price item pricing is inherited from the parent price list hierarchy defined for the price list which is assigned to the account.</li> <li>• <b>Customer Agreed</b> – Means price item pricing is agreed for the main customer in the customer hierarchy.</li> <li>• <b>Customer Price List</b> – Means price item pricing is defined in the price list which is assigned to the main customer.</li> <li>• <b>Default Price List</b> – Means price item pricing defined in the price list is available in the default price list.</li> <li>• <b>Global Price List</b> – Means price item pricing defined in the price list is available in the global price list.</li> <li>• <b>Customer Inherited Price List</b> – Means price item pricing is inherited from the parent price list hierarchy defined for the price list which is assigned to the main customer.</li> <li>• <b>Parent Customer Agreed</b> – Means price item pricing is agreed for the parent customer in the customer hierarchy.</li> <li>• <b>Parent Customer Price List</b> – Means price item pricing is defined in the price list which is assigned to the parent customer.</li> <li>• <b>Parent Customer Inherited Price List</b> – Means price item pricing is inherited from the parent price list hierarchy defined for the price list which is assigned to the parent customer.</li> <li>• <b>Product Default Price List</b> – Means product defined in the price list is available in the default price list.</li> </ul>	No
Parent Person	Used to search price assignments which are inherited from a particular parent customer.	No

Field Name	Field Description	Mandatory (Yes or No)
Pricing Status	Used to search price assignments with a particular status. The valid values are: <ul style="list-style-type: none"> <li>Active</li> <li>Proposed</li> </ul> <div style="border: 1px solid black; padding: 2px;"><b>Note:</b> By default, the <b>Active</b> option is selected.</div>	No
Show Default and Global Pricing	Used to search price assignments inherited from the default or global price list. The valid values are: <ul style="list-style-type: none"> <li><b>Yes</b> – Used when you want to search price assignments inherited from either of the following: <ul style="list-style-type: none"> <li>Product-specific default price list defined for the division</li> <li>Default price list defined for the division</li> <li>Global price list</li> </ul> </li> <li><b>No</b> – Used when you do not want to search price assignments inherited from either of the following: <ul style="list-style-type: none"> <li>Product-specific default price list defined for the division</li> <li>Default price list defined for the division</li> <li>Global price list</li> </ul> </li> </ul> <div style="border: 1px solid black; padding: 2px;"><b>Note:</b> By default, the <b>No</b> option is selected.</div>	No
Price Item	Used to search price assignments of a particular price item or price item bundle.	No
Description	Used to search price assignments of a price item or price item bundle having a particular description.	No
Search Type	Used to search the price list using the following values: <ul style="list-style-type: none"> <li>Best Fit</li> <li>Exact Match</li> </ul> <div style="border: 1px solid black; padding: 2px;"><b>Note:</b> By default, the <b>Exact Match</b> option is selected.</div>	No

**Note:** The **Search**  icon appears corresponding to the **Price Item** field. On clicking the **Search** icon, you can search for a price item.

- Price Item Parameters** – The **Price Item Parameters** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Parameter	Used to search price assignments which are defined using a particular parameter.  <b>Note:</b> This field appears only when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>True</b> .	No
Parameter Value	Used to search price assignments which are defined using a particular parameter value.  <b>Note:</b> This field appears only when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>True</b> .	No

**Note:**

The **Search**  icon appears corresponding to the **Parameter** field. On clicking the **Search** icon, you can search for a parameter.

You can only use those parameters where the source entity is set to **Transaction**.

The **Search**  icon appears corresponding to the **Parameter Value** field only when the value type of the parameter is **Predefined** or **Reference**. If the value type of the parameter is **Predefined** then on clicking the **Search** icon, you can search for a predefined parameter value. However, if the value type of the parameter is **Reference** then on clicking the **Search** icon, you can search for a reference parameter value.

- **Search Results** – On clicking the **Search** button, the search results are filtered based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Pricing Information	Displays the concatenated string consisting of pricing information and pricing ID for the account.  <b>Note:</b> It has a link. On clicking the link, the <b>View Price Item Pricing</b> screen appears with the details of the respective price item pricing.
Price Item	Displays the price item or price item bundle code.
Pricing Parameters	Used to specify multiple parameters based on which you want to determine the pricing utilization.  <b>Note:</b> This column appears only when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>True</b> .

Column Name	Column Description
Price Assignment Type	Indicates the type of price assignment. The valid values are: <ul style="list-style-type: none"> <li>• Regular</li> <li>• Post Processing</li> <li>• Post Processing – Invoice Based</li> <li>• Post Processing – Price Item Based</li> </ul>
Assignment Level	Indicates the level at which the price item pricing is defined in the customer hierarchy. The valid values are: <ul style="list-style-type: none"> <li>• Account Agreed</li> <li>• Account Price List</li> <li>• Account Inherited Price List</li> <li>• Customer Agreed</li> <li>• Customer Price List</li> <li>• Default Price List</li> <li>• Global Price List</li> <li>• Customer Inherited Price List</li> <li>• Parent Customer Agreed</li> <li>• Parent Customer Price List</li> <li>• Parent Customer Inherited Price List</li> <li>• Product Default Price List</li> </ul>
Price List Information	Displays the information about the price list which is assigned to the account.
Rate Schedule	Indicates the rate schedule which is used for defining the price item pricing.
Edit	On clicking the <b>Edit</b> (  ) icon, the <b>Price Item Pricing</b> screen appears where you can edit the details of the price item pricing. <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> The <b>Edit</b> icon appears only when the assignment level is <b>Account Agreed</b>.</p> </div>

Column Name	Column Description
Override	<p>On clicking the <b>Override</b>  icon, the <b>Price Item Pricing</b> screen appears where you can override the price item pricing.</p> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>You can override a price item pricing assigned at any level in the customer hierarchy. On overriding a price item pricing, a new price item pricing which is specific to the account is defined at the account level and is then called account agreed pricing.</p> <p>A customer agreed or account agreed price assignments are effective for a particular duration and do not expire until you specify the end date manually. However, if you set the <b>Expire Override Switch</b> option type of the <b>C1_EXP_OVRD</b> feature configuration to <b>Y</b>, the system will automatically expire an agreed pricing when the agreed pricing of a customer or an account without end date is overridden. If you do not want an agreed pricing to automatically expire when it is overridden, you must set the <b>Expire Override Switch</b> option type of the <b>C1_EXP_OVRD</b> feature configuration to <b>N</b>.</p> </div>
Effective Start Date	Displays the date from when the price item pricing is effective.
Effective End Date	Displays the date till when the price item pricing is effective.
Pricing Currency	Indicates the currency in which the price item pricing is defined.
Parent Person	Displays the name of the parent or grandparent customer from whom the price item pricing is inherited.

**Note:** The number of records that can be displayed in the **Search Results** section is controlled via the **C1\_PR\_REC** feature configuration. You can change the number of records that can be displayed using the **Effective Pricing RecordSet Limit** option type of the **C1\_PR\_REC** feature configuration. For more information, refer to [Setting the C1\\_PR\\_REC Feature Configuration](#) on page 2924.

### Search Price Item

You can either assign a price item to a price list and then define pricing for the price item, or you can copy an existing price item pricing and assign it to a price list. The **Search Price Item** zone allows you to search for a price item pricing which is assigned to an account, person, or a price list. You can then create a new price item pricing using an existing price item pricing through copying the price item pricing. Once you create a copy of an existing price item pricing, the new price item pricing is assigned to the price list. On copying a price item pricing, the pricing details including the price components, eligibility and tiering criteria for each price component, and characteristics are copied to the new price item pricing. You can then edit the details, if required.

The system allows you to create a copy of active, proposed, inactive, rejected, and template price item pricing. Once you create the copy of a template price item pricing, you can save the new price item pricing in either **Active** or **Proposed** status.

The **Search Price Item** zone contains the following two sections:

- **Search Criteria** – The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to search whether you want to search price item pricing for a price item, account, person, or a price list. The valid values are: <ul style="list-style-type: none"> <li>• Price Item</li> <li>• Price List Pricing</li> <li>• Account Override Pricing</li> <li>• Person Override Pricing</li> </ul>	Yes
Price Item	Used to search pricing for a particular price item or price item bundle.	No
Description	Used to search price items or price item bundles with a particular description. <p><b>Note:</b> This field appears only when you select the <b>Price Item</b> option from the <b>Search By</b> list.</p>	No
Global Price List	Used to search price items or price item bundles which can be assigned to a global price list. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul> <p><b>Note:</b> This field appears only when you select the <b>Price Item</b> option from the <b>Search By</b> list.</p>	No
Bundle	Used to search whether the price item is a bundle or not. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul> <p><b>Note:</b> This field appears only when you select the <b>Price Item</b> option from the <b>Search By</b> list.</p>	No
Price List ID	Used to search the price list to which the price item pricing is assigned. <p><b>Note:</b> This field appears only when you select the <b>Price List Pricing</b> option from the <b>Search By</b> list.</p>	No

Field Name	Field Description	Mandatory (Yes or No)
Effective Start Date	<p>Used to search price item pricing on price lists which are effective from a particular date onwards.</p> <p><b>Note:</b> This field appears only when you select the <b>Price List Pricing, Account Override Pricing, or Person Override Pricing</b> option from the <b>Search By</b> list.</p>	No
Effective End Date	<p>Used to search price item pricing on price lists which are effective till a particular date.</p> <p><b>Note:</b> This field appears only when you select the <b>Price List Pricing, Account Override Pricing, or Person Override Pricing</b> option from the <b>Search By</b> list.</p>	No
Pricing Status	<p>Used to search price item pricing with a particular status. The valid values are:</p> <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> <li>• Proposed</li> <li>• Rejected</li> <li>• Template</li> </ul> <p><b>Note:</b> This field appears only when you select the <b>Price List Pricing, Account Override Pricing, or Person Override Pricing</b> option from the <b>Search By</b> list.</p>	No
Price Assignment Type	<p>Used to search a particular type of the price item pricing. The valid values are:</p> <ul style="list-style-type: none"> <li>• Regular</li> <li>• Post Processing</li> <li>• Post Processing – Invoice Based</li> <li>• Post Processing – Price Item Based</li> </ul> <p><b>Note:</b> This field appears only when you select the <b>Price List Pricing, Account Override Pricing, or Person Override Pricing</b> option from the <b>Search By</b> list.</p>	No
Account ID	<p>Used to search pricing of price items which are assigned to a particular account.</p> <p><b>Note:</b> This field appears only when you select the <b>Account Override Pricing</b> option from the <b>Search By</b> list.</p>	No

Field Name	Field Description	Mandatory (Yes or No)
Person ID	Used to search pricing of price items which are assigned to a particular person.  <b>Note:</b> This field appears only when you select the <b>Person Override Pricing</b> option from the <b>Search By</b> list.	No

**Note:**

You must specify at least one search criterion while searching for a price item or price item bundle.

The **Search**  icon appears corresponding to the **Price List ID**, **Price Item**, **Account ID**, and **Person ID** fields. On clicking the **Search** icon, you can search for a price list, price item, an account, and person.

- **Search Results** – On clicking the **Search** button, the search results appear based on the specified search criteria. The search results include only those price items or price item bundles that are associated with the division to which the account belongs. It may also include price items or price item bundles that are already assigned to the account in case those price items or price item bundles match the search criteria.

The **Search Results** section contains the following columns:

Column Name	Column Description
Assign	On clicking the <b>Assign</b>  icon, the <b>Price Item Pricing</b> screen appears where you can define a new price item pricing.  <b>Note:</b> This column appears only when you select the <b>Price Item</b> option from the <b>Search By</b> list.
Price Item Information	Displays details of the price item or price item bundle.  <b>Note:</b> It has a link. On clicking the link, the <b>Price Item</b> screen appears where you can view the details of the respective price item or price item bundle.  This column appears only when you select the <b>Price Item</b> option from the <b>Search By</b> list.
Copy	On clicking the <b>Copy</b>  icon, the <b>Price Item Pricing</b> screen appears where you can define a new price item pricing using an existing price item pricing.
Pricing Information	Displays details of the price item pricing.  <b>Note:</b> This column appears only when you select the <b>Price List Pricing</b> , <b>Account Override Pricing</b> , or <b>Person Override Pricing</b> option from the <b>Search By</b> list.

Column Name	Column Description
Account Information	<p>Indicates the account to which the price item pricing is assigned. In addition, this column has a context menu which helps in navigating to other screens in the application.</p> <div data-bbox="570 321 1466 659" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>This column appears only when you select the <b>Account Override Pricing</b> option from the <b>Search By</b> list.</p> <p>It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account.</p> <p>The account information string appears only when an algorithm defined using the <b>C1-AC-INFO</b> algorithm type is attached to the <b>Account Information</b> system event in the <b>Algorithms</b> tab of the <b>Installation Options – Framework</b> screen.</p> </div>
Person Information	<p>Indicates the person to which the price item pricing is assigned. In addition, this column has a context menu which helps in navigating to other screens in the application.</p> <div data-bbox="570 800 1466 1138" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>This column appears only when you select the <b>Person Override Pricing</b> option from the <b>Search By</b> list.</p> <p>It has a link. On clicking the link, the <b>Person</b> screen appears where you can view the details of the respective person.</p> <p>The person information string appears only when an algorithm defined using the <b>PERS-INFO</b> algorithm type is attached to the <b>Person Information</b> system event in the <b>Algorithms</b> tab of the <b>Installation Options – Framework</b> screen.</p> </div>
Price List Information	<p>Indicates the price list to which the price item pricing is assigned. In addition, this column has a context menu which helps in navigating to other screens in the application.</p> <div data-bbox="570 1276 1466 1499" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>This column appears only when you select the <b>Price List Pricing</b> option from the <b>Search By</b> list.</p> <p>It has a link. On clicking the link, the <b>Price List</b> screen appears where you can view the details of the respective price list.</p> </div>
Pricing Parameters	<p>Displays a comma-separated list of parameter values. The order in which parameter values appear in this column is controlled by the display order (which is defined while associating a parameter with a price item or price item bundle).</p> <div data-bbox="570 1644 1466 1755" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This column appears only when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>False</b>.</p> </div>
Effective Start Date	<p>Displays the date from when the price item pricing is effective.</p> <div data-bbox="570 1833 1466 1913" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This column appears only when you select the <b>Price List Pricing</b>, <b>Account Override Pricing</b>, or <b>Person Override Pricing</b> option from the <b>Search By</b> list.</p> </div>

Column Name	Column Description
Effective End Date	<p>Displays the date till when the price item pricing is effective.</p> <p><b>Note:</b> This column appears only when you select the <b>Price List Pricing, Account Override Pricing, or Person Override Pricing</b> option from the <b>Search By</b> list.</p>
Pricing Currency	<p>Indicates the currency in which the price item pricing is defined.</p> <p><b>Note:</b> This column appears only when you select the <b>Price List Pricing, Account Override Pricing, or Person Override Pricing</b> option from the <b>Search By</b> list.</p>
Rate Schedule	<p>Indicates the rate schedule which is used for defining the price item pricing.</p> <p><b>Note:</b> It has a link. On clicking the link <b>Rate Schedule</b> screen appears. This column appears only when you select the <b>Price List Pricing, Account Override Pricing, or Person Override Pricing</b> option from the <b>Search By</b> list.</p>
Price Assignment Usage	<p>Indicates whether the price item pricing is applicable to all customers or only to new customers. The valid values are:</p> <ul style="list-style-type: none"> <li>• All Customers</li> <li>• New Customers</li> </ul> <p><b>Note:</b> This column appears only when you select the <b>Price List Pricing, Account Override Pricing, or Person Override Pricing</b> option from the <b>Search By</b> list.</p>
Price Assignment Type	<p>Indicates the type of the price item pricing. The valid values are:</p> <ul style="list-style-type: none"> <li>• Regular</li> <li>• Post Processing</li> <li>• Post Processing – Invoice Based</li> <li>• Post Processing – Price Item Based</li> </ul> <p><b>Note:</b> This column appears only when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>False</b>.</p>

## Viewing Effective Price Assignments of an Account

### Prerequisites

To view effective price assignments of an account, you should have:

- Price items or price item bundles assigned to the account either directly or through the customer hierarchy

**Procedure**

To view effective price assignments of an account:

1. Search for the account in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **Show Context Menu** () icon corresponding to the account whose details you want to view.  
A menu appears.
3. Click the **Go To Effective Pricing** menu option.  
The **Pricing (Account)** screen appears.
4. View the pricing for price items or price item bundles assigned to the account (either directly or through the customer hierarchy) in the **Effective Price Assignments for Account** zone.
5. Filter the effective price assignments of the account, if required.

**Related Topics**

<b>For more information on...</b>	<b>See...</b>
How to search for an account	<a href="#">Searching for an Account</a> on page 186
<b>Pricing (Account)</b> screen	<a href="#">Pricing (Account)</a> on page 439
<b>Effective Price Assignments for Account</b> zone	<a href="#">Effective Price Assignments for Account</a> on page 440
How to filter effective price assignments of an account	<a href="#">Filtering Effective Price Assignments of an Account</a> on page 451

**Filtering Effective Price Assignments of an Account****Prerequisites**

To filter effective price assignments of an account, you should have:

- Price items or price item bundles defined in the application
- Parameters defined in the application (where the source entity is set to **Transaction**)
- Price items or price item bundles assigned to the account either directly or through the customer hierarchy

**Procedure**

To filter effective price assignments of an account:

1. Search for the account in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **Show Context Menu** () icon corresponding to the account whose details you want to view.  
A menu appears.
3. Click the **Go To Effective Pricing** menu option.  
The **Pricing (Account)** screen appears.
4. Enter the search criteria in the **Effective Price Assignments for Account** zone.

**Note:**

You can search for a price item, parameter, or parameter value by clicking the **Search** () icon corresponding to the respective field.

If you want to add more than one parameter in the search criteria, click the **Add** () icon and then enter the parameter name and its value. However, if you want to remove a parameter from the search criteria, click the

**Delete** () icon corresponding to the parameter.

You can only use those parameters where the source entity is set to **Transaction**.

ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

### 5. Click **Search**.

A list of price assignments which are effective on the specified date and that meet the search criteria are listed in the **Effective Price Assignments for Account** zone.

## Exporting Effective Price Assignments of an Account

### Prerequisites

To export effective price assignments of an account in the CSV format, you should have:

- Price items or price item bundles assigned to the account either directly or through the customer hierarchy

### Procedure

To export effective price assignments of an account in the CSV format:

1. Search for the account in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **Show Context Menu** () icon corresponding to the account whose details you want to view.  
A menu appears.
3. Click the **Go To Effective Pricing** menu option.  
The **Pricing (Account)** screen appears.
4. Filter the effective price assignments of the account, if required.
5. Click the **Export to Excel** link in the **Effective Price Assignment** zone.  
A message appears confirming whether you want to open or save the EffectivePricing.csv file.
6. Select the **Save As** option from the **Save** list.  
The **Save As** dialog box appears.

7. Browse to the location where you want to save the file.
8. Enter the file name in the respective field, and click **Save**.

The search results are exported in the CSV format.

9. Open the CSV file in Microsoft Excel.

The sheet contains the following columns:

Column Name	Column Description
Price Item	Displays the price item or price item bundle code.
Description	Displays the description of the price item or price item bundle.
Variance	Indicates the variance parameter which is used for defining the price item pricing.  <b>Note:</b> This column appears only when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>False</b> .
Price Item Parameters	Displays a comma-separated list of parameter values. The order in which parameter values appear in this column is controlled by the display order (which is defined while associating a parameter with a price item). A tool tip appears when you hover over this column corresponding to the price item. It indicates the price item parameters and their values which are used for defining the price item pricing.  <b>Note:</b> This column appears only when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>True</b> .
Price Assignment Type	Indicates the type of price assignment. The valid values are: <ul style="list-style-type: none"> <li>• Regular</li> <li>• Post Processing</li> <li>• Post Processing — Invoice Based</li> <li>• Post Processing — Price Item Based</li> </ul>
Assignment Level	Indicates the level at which the price item pricing is defined in the customer hierarchy. The valid values are: <ul style="list-style-type: none"> <li>• Account Agreed</li> <li>• Account Price List</li> <li>• Account Inherited Price List</li> <li>• Customer Agreed</li> <li>• Customer Price List</li> <li>• Customer Inherited Price List</li> <li>• Parent Customer Agreed</li> <li>• Parent Customer Price List</li> <li>• Parent Customer Inherited Price List</li> </ul>

Column Name	Column Description
Price List Description	<p>Displays the description of the price list.</p> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> The description appears only when the assignment level is <b>Account Price List, Account Inherited Price List, Customer Price List, Customer Inherited Price List, Parent Customer Price List, or Parent Customer Inherited Price List.</b></p> </div>
Rate Description	Displays the description of the rate schedule which is used for defining the price item pricing.
Rate Component Information	<p>Displays a comma-separated string which consists of the following:</p> <ul style="list-style-type: none"> <li>• Rate Component Sequence</li> <li>• Tiering Setup of the Rate Component</li> </ul>
Price Component Sequence	Indicates the sequence number of the price component.
Price Component Description	Displays the description of the price component.
Rate	Indicates the rate defined for the price component.
Effective Start Date	Displays the date from when the price item pricing is effective.
Effective End Date	Displays the date till when the price item pricing is effective.
Pricing Currency	Indicates the currency in which the price item pricing is defined.
From	Displays the lower limit of the tiering range.
To	Displays the upper limit of the tiering range.
Price Assignment Usage	<p>Indicates whether the price item pricing is applicable to all customers or only to the new customers. The valid values are:</p> <ul style="list-style-type: none"> <li>• AC</li> <li>• NC</li> </ul>
Price Assignment ID	Displays the price assignment ID.
Parent Level	Indicates the numerical level of the parent in the customer hierarchy from whom the price item pricing is inherited.
Price List ID	Indicates the price list from where the price item pricing is inherited.
Price List Start Date	Displays the date from when the price list is effective.
Parent Person	Displays the name of the parent or grandparent customer from whom the price item pricing is inherited.
Parent Pricelist Level	Indicates the parent level when price item pricing is inherited from the price list hierarchy. If the pricing is inherited from the assigned price list, the parent price list level will be 0. However, if the pricing is inherited from the parent price list in the hierarchy, the parent price list level will be 1. And, if the pricing is inherited from the grandparent price list in the hierarchy, the parent price list level will be 2, and so on.

Column Name	Column Description
Ignore Transaction	Indicates whether the transactions mapped to the price item is considered for billing. The valid values are: <ul style="list-style-type: none"> <li>• Y</li> <li>• N</li> </ul>
Aggregate Transaction	Indicates whether the transactions mapped to the price item is aggregated for billing. The valid values are: <ul style="list-style-type: none"> <li>• Y</li> <li>• N</li> </ul>
Aggregation Schedule	Indicates the transaction aggregation cycle. The valid values are: <ul style="list-style-type: none"> <li>• Daily</li> <li>• Weekly</li> <li>• Monthly</li> <li>• Quarterly</li> <li>• Yearly</li> </ul>
Tiering Criterion	Indicates the tiering criterion which is used in the tiering range.
Tiering Price Item	Indicates whether the price item is billed individually or at the price item bundle level.

## Copying a Price Item Pricing

### Prerequisites

To copy a price item pricing and assign it to an account, you should have:

- Account (to which you want to assign the price item pricing) defined in the application
- Account associated with the division to which the user belongs
- Price item pricing (whose copy you want to create) defined in the application

### Procedure

To copy a price item pricing and assign it to an account:

1. Search for the account in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **Show Context Menu** () icon corresponding to the account whose details you want to view.  
A menu appears.
3. Click the **Go To Effective Pricing** menu option.

The **Pricing (Account)** screen appears.

- In the **Search Price Item** zone, select the required option from the **Search By** list to indicate whether you want to search price item pricing assigned to an account, person, or a price list.

The fields in the **Search Criteria** section change depending on the option that you select from the **Search By** list.

- Enter the search criteria in the **Search Price Item** zone to search for the price item pricing whose copy you want to create and assign it to the account.
- Click **Search**.

A list of price assignments that meet the search criteria appears in the **Search Results** section.

- In the **Search Results** section, click the **Copy** () icon in the **Copy** column corresponding to the price item pricing whose copy you want to create.

The **Price Item Pricing** screen appears.

- Modify the required pricing details.

**Note:**

If you change the effective start and end dates while copying a price item pricing, you need to specify the parameters which are effective during that date range.

While copying a price item pricing, you can not only edit the existing tiering combination details, but can also add additional tiering combinations until the maximum tiering combinations limit is met.

If you are creating a copy of active, proposed, inactive, rejected, or template price item pricing, you can save the new price item pricing in the **Active** or **Proposed** status.

- Edit the characteristics of the price item pricing, if required.
- Click **Save**.

A new price item pricing is defined and assigned to the account.

## **Viewing a Price Item Pricing**

### **Procedure**

To view a price item pricing and assignment details:

- Search for the account in the **Customer 360° View** screen.
- In the **Search Results** section, click the **Show Context Menu** () icon corresponding to the account whose details you want to view.

A menu appears.

- Click the **Go To Effective Pricing** menu option.

The **Pricing (Account)** screen appears.

- Price assignments effective for the account appears in the **Effective Price Assignments for Account** zone.
- In the **Search Results** section, click the link in the **Pricing Information** column corresponding to the price item whose pricing details you want to view.

The **Price Item Pricing** screen appears. It contains the following zones:

- Price Item Pricing** – Displays the price item pricing details. It contains the following sections:
  - Pricing Information** – Displays the pricing information of the price item.
  - TFM Information** – Displays the transaction feed management information of the price item.
  - Characteristics** – Displays the details of price item pricing characteristics.
  - Price Item and Parameter Information** – Displays the price item parameter details.
  - Record Actions** – Displays the record actions of the price item pricing.
  - Record Information** – Displays the record information of the price item pricing.
- Rate and Price Component Summary** – Displays the rate and price component summary of the price item.
- Rate Components** – Displays the rate components of the price item.
- Price Components** – Displays the details of price components of the price item.
- Tiering Criteria** – Displays the tiering criteria of the price item pricing.

**Note:** This zone appears only when **Tiering Type** for the rate component is **STEP** or **Threshold**

- Pricing Eligibility Criteria** – Displays the pricing eligibility criteria of the price item pricing.

**Note:** This zone appears only when eligibility checkbox is selected in the **Price Item Pricing** screen and details for pricing eligibility criteria is added in the **Price Component** screen.

- View the basic details of price item pricing in the **Price Item Pricing** zone.
- View the rate and price component summary of price item in the **Rate and Price Component Summary** zone.
- View the rate components of price item in the **Rate Components** zone.
- View the details of price components of price item in the **Price Components** zone.
- View the tiering criteria of price item pricing in the **Tiering Criteria** zone.
- View the pricing eligibility criteria of price item pricing in the **Pricing Eligibility Criteria** zone.

## Editing a Price Item Pricing of an Account

### Prerequisites

To edit a price item pricing of an account, you should have:

- Transactions mapped to the price item defined in the application
- Rate schedules, rate versions, rate components defined in the application
- Parameters associated with the price item (in case you want to define price item pricing based on those parameters)

### Procedure

To edit a price item pricing of an account:

1. Search for the account in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **Show Context Menu** (☰) icon corresponding to the account whose details you want to view.  
A menu appears.
3. Click the **Go To Effective Pricing** menu option.  
The **Pricing (Account)** screen appears.
4. Price assignments effective for the account appears in the **Effective Price Assignments for Account** zone.
5. In the **Search Results** section, click the **Edit** (✎) icon in the **Edit** column corresponding to the price item pricing whose details you want to edit.

The **Price Item Pricing** screen appears. It contains the following sections:

- **Main** – Used to specify basic details about the price item pricing.
- **TFM Information** – Used to specify the transaction feed management information about the price item pricing.

**Note:** This section appears in the **Price Item Pricing** screen only when the value for the **Show Default Values in Price Item Pricing** option type for **C1\_FM** feature configuration is set to **Y** and **Price Item Available For** is **Pricing and Billing**.

- **Characteristics** – Used to define characteristics for the price item pricing.
- **Price Item and Parameter Information** – Used to define the parameter details segment for the price item pricing.

**Note:** This section appears only when **Price Assignment Type** is **Regular**.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Start Date	<p>Used to specify the date from when the price item pricing is effective.</p> <div data-bbox="548 289 1105 659" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>The effective start date cannot be later than the effective end date.</p> <p>If you change the effective start and end dates while editing a price item pricing, you need to specify the parameters which are effective during that date range.</p> <p>This field will be in read-only mode when the price assignment has been used.</p> </div>	Yes
End Date	<p>Used to specify the date till when the price item pricing is effective.</p> <div data-bbox="548 768 1105 848" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> The effective end date cannot be earlier than the effective start date.</p> </div>	No

Field Name	Field Description	Mandatory (Yes or No)
Price Assignment Type	<p>Used to indicate the type of price assignment. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Regular</b> – Used to indicate that the pricing must be used to generate regular bill segment.</li> <li>• <b>Post Processing</b> – Used to indicate that the pricing must be used to generate post processing bill segment. This type of price assignment can be done on usage accounts. The post processing bill segment is generated when you generate the bill for the usage account and not when you bill the usage account through an invoice account.</li> </ul> <div data-bbox="613 640 1109 915" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> The post processing bill segment is generated when the <b>Post Processing Sequence (PPSEQ)</b> characteristic is defined for the price item and when the price item is associated with another price item using the <b>Price Item</b> relationship type.</p> </div> <ul style="list-style-type: none"> <li>• <b>Post Processing – Invoice Based</b> – Used to indicate that the pricing must be used to generate post processing bill segment. This type of price assignment can be done on an invoice account, and, as a result, the post processing bill segment is generated on the invoice account.</li> </ul> <div data-bbox="613 1171 1109 1255" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This will not be applicable for price item which are defined for <b>Only Pricing</b>.</p> </div> <ul style="list-style-type: none"> <li>• <b>Post Processing – Price Item Based</b> – Used to indicate that the pricing must be used to generate post processing bill segment. This type of price assignment can be done on both invoice and usage accounts, but the post processing bill segment is generated only on the invoice account.</li> </ul> <div data-bbox="613 1512 1109 1596" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This will not be applicable for price item which are defined for <b>Only Pricing</b>.</p> </div>	Yes
Pricing Eligibility	<p>Used to select pricing eligibility criteria for price item pricing.</p> <div data-bbox="548 1703 1109 1818" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This field will be enabled for selection if the checkbox is not selected. If the checkbox appears selected then this field will be in read-only mode.</p> </div>	No

Field Name	Field Description	Mandatory (Yes or No)
Pricing Status	<p>Used to indicate the status of the price assignment. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Draft</b> – Indicates that the price assignment is created as a draft.</li> <li>• <b>Active</b> – Indicates that the price assignment is used for billing.</li> <li>• <b>Inactive</b> – Indicates that the price assignment is no longer used for billing.</li> <li>• <b>Proposed</b> – Indicates that the price assignment is used for quotations.</li> </ul> <p><b>Note:</b> If a price assignment is in <b>Active</b> status, you can change its status to <b>Inactive</b>. If a price assignment is in <b>Draft</b> status, you cannot change its status to <b>Proposed</b>.</p>	Yes
Pricing Currency	Used to indicate the currency in which you want to define the price item pricing.	Yes
Rate Schedule	<p>Used to specify the rate schedule that you want to use while defining price item pricing.</p> <p><b>Note:</b> Rate schedules control how the bills for the price item will be calculated. The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Rate Schedule Search</b> screen appears.</p>	Yes
Pricing Rule Type	<p>Used to indicate the pricing rule type. The valid value is:</p> <ul style="list-style-type: none"> <li>• Two-Dimensional</li> </ul>	Yes (Conditional)
Print Zero	<p>Used to indicate whether zero pricing should be displayed in the bill. The valid values are:</p> <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul> <p><b>Note:</b> By default, <b>Yes</b> is selected.</p>	Yes
Pricing Frequency	<p>Used to indicate pricing frequency for the price item.</p> <p><b>Note:</b> This field appears only when <b>Price Item</b> is defined as <b>Only Pricing</b> and <b>Price Item Type</b> is defined as <b>Fees</b>.</p>	Yes

6. Modify the details in the **Main** section, if required.
7. Edit the TFM Information in a price item pricing, if required.
8. Edit the characteristics for a price item pricing, if required.
9. Edit the parameters for a price item pricing, if required.
10. Click **Save**.

The changes made to the price item pricing are saved.

## Overriding a Price Item Pricing of an Account

### Prerequisites

To override a price item pricing of an account, you should have:

- Transactions mapped to the price item defined in the application
- Rate schedules, rate versions, rate components defined in the application
- Parameters associated with the price item (in case you want to define price item pricing based on multiple parameters)

### Procedure

To override a price item pricing of an account:

1. Search for the account in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **Show Context Menu** () icon corresponding to the account whose details you want to view.  
A menu appears.
3. Click the **Go To Effective Pricing** menu option.  
The **Pricing (Account)** screen appears.
4. Price assignments effective for the account appears in the **Effective Price Assignments for Account** zone.
5. In the **Search Results** section, click the **Override** () icon in the **Override** column corresponding to the price item pricing whose details you want to override.

The **Price Item Pricing** screen appears. It contains the following sections:

- **Main** – Used to specify basic details about the price item pricing.

- **TFM Information** – Used to specify the transaction feed management information about the price item pricing.

**Note:** This section appears in the **Price Item Pricing** screen only when the value for the **Show Default Values in Price Item Pricing** option type for **C1\_FM** feature configuration is set to **Y** and **Price Item Available For** is **Pricing and Billing**.

- **Characteristics** – Used to define characteristics for the price item pricing.
- **Price Item and Parameter Information** – Used to define the parameter details segment for the price item pricing.

**Note:** This section appears only when **Price Assignment Type** is **Regular**.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Start Date	Used to specify the date from when the price item pricing is effective.  <b>Note:</b> The effective start date cannot be later than the effective end date. If you change the effective start and end dates while overriding a price item pricing, you need to specify the parameters which are effective during that date range. This field will be in read-only mode when the price assignment has been used.	Yes
End Date	Used to specify the date till when the price item pricing is effective.  <b>Note:</b> The effective end date cannot be earlier than the effective start date.	No

Field Name	Field Description	Mandatory (Yes or No)
Price Assignment Type	<p>Used to indicate the type of price assignment. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Regular</b> – Used to indicate that the pricing must be used to generate regular bill segment.</li> <li>• <b>Post Processing</b> – Used to indicate that the pricing must be used to generate post processing bill segment. This type of price assignment can be done on usage accounts. The post processing bill segment is generated when you generate the bill for the usage account and not when you bill the usage account through an invoice account.</li> </ul> <div data-bbox="599 611 1175 852" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> The post processing bill segment is generated when the <b>Post Processing Sequence (PPSEQ)</b> characteristic is defined for the price item and when the price item is associated with another price item using the <b>Price Item</b> relationship type.</p> </div> <ul style="list-style-type: none"> <li>• <b>Post Processing – Invoice Based</b> – Used to indicate that the pricing must be used to generate post processing bill segment. This type of price assignment can be done on an invoice account, and, as a result, the post processing bill segment is generated on the invoice account.</li> </ul> <div data-bbox="599 1077 1175 1157" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This will not be applicable for price item which are defined for <b>Only Pricing</b>.</p> </div> <ul style="list-style-type: none"> <li>• <b>Post Processing – Price Item Based</b> – Used to indicate that the pricing must be used to generate post processing bill segment. This type of price assignment can be done on both invoice and usage accounts, but the post processing bill segment is generated only on the invoice account.</li> </ul> <div data-bbox="599 1381 1175 1461" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This will not be applicable for price item which are defined for <b>Only Pricing</b>.</p> </div>	Yes
Pricing Eligibility	<p>Used to select pricing eligibility criteria for price item pricing.</p> <div data-bbox="532 1577 1175 1688" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This field will be in enabled for selection if the checkbox is not selected. If the checkbox appears selected then this field will be in read-only mode.</p> </div>	No

Field Name	Field Description	Mandatory (Yes or No)
Pricing Status	Used to indicate the status of the price assignment. The valid values are: <ul style="list-style-type: none"> <li>• <b>Draft</b> – Indicates that the price assignment is created as a draft.</li> <li>• <b>Proposed</b> – Indicates that the price assignment is used for quotations.</li> </ul> <div style="border: 1px solid black; padding: 2px;"><b>Note:</b> If a price assignment is in <b>Draft</b> status, you cannot change its status to <b>Proposed</b>.</div>	Yes
Pricing Currency	Used to indicate the currency in which you want to override the price item pricing.	Yes
Rate Schedule	Used to specify the rate schedule that you want to use while defining price item pricing. <div style="border: 1px solid black; padding: 2px;"><b>Note:</b> Rate schedules control how the bills for the price item will be calculated. The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Rate Schedule Search</b> screen appears.</div>	Yes
Pricing Rule Type	Used to indicate the pricing rule type. The valid value is: <ul style="list-style-type: none"> <li>• Two-Dimensional</li> </ul>	Yes (Conditional) <div style="border: 1px solid black; padding: 2px;"><b>Note:</b> This field is required when you are overriding a two-dimensional pricing rule.</div>
Print Zero	Used to indicate whether zero pricing should be displayed in the bill. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul> <div style="border: 1px solid black; padding: 2px;"><b>Note:</b> By default, <b>Yes</b> is selected.</div>	Yes
Pricing Frequency	Used to indicate pricing frequency for the price item. <div style="border: 1px solid black; padding: 2px;"><b>Note:</b> This field appears only when <b>Price Item</b> is defined as <b>Only Pricing</b> and <b>Price Item Type</b> is defined as <b>Fees</b>.</div>	Yes

6. Modify the details in the **Main** section, if required.
7. Modify the TFM Information in a price item pricing, if required.
8. Modify the characteristics for a price item pricing, if required.
9. Modify the parameters for a price item pricing, if required.

**Note:** If you change the effective end date while overriding a price item pricing, you need to specify the parameters which are effective during the date range of start and end date.

**10. Click Save.**

The price item pricing is overridden.

**Assigning a Price Item to an Account****Prerequisites**

To assign a price item to an account, you should have:

- Transactions mapped to the price item defined in the application
- Rate schedules, rate versions, and rate components defined in the application
- Parameters associated with the price item (in case you want to define price item pricing based on multiple parameters)

**Procedure**

To assign a price item to an account:

1. Search for the account in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **Show Context Menu** () icon corresponding to the account whose details you want to view.  
A menu appears.
3. Click the **Go To Effective Pricing** menu option.  
The **Pricing (Account)** screen appears.
4. Search for the price item that you want to assign to the account in the **Search Price Item or Price Item Pricing** zone.
5. In the **Search Results** section, click the **Assign** () icon in the **Assign** column corresponding to the price item that you want to assign to the account.

The **Price Item Pricing** screen appears. It contains the following sections:

- **Main** – Used to specify basic details about the price item pricing.
- **TFM Information** – Used to specify the transaction feed management information about the price item pricing.

**Note:** This section appears in the **Price Item Pricing** screen only when the value for the **Show Default Values in Price Item Pricing** option type for **C1\_FM** feature configuration is set to **Y** and **Price Item Available For** is **Pricing and Billing**.

- **Characteristics** – Used to define characteristics for the price item pricing.
- **Price Item and Parameter Information** – Used to define the parameter details segment for the price item pricing.

**Note:** This section appears only when **Price Assignment Type** is **Processing**.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Start Date	Used to specify the date from when the price item pricing is effective.  <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> By default, the current system date appears in this field. The effective start date cannot be later than the effective end date.</p> </div>	Yes
End Date	Used to specify the date till when the price item pricing is effective.  <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> The effective end date cannot be earlier than the effective start date.</p> </div>	No

Field Name	Field Description	Mandatory (Yes or No)
Price Assignment Type	<p>Used to indicate the type of price assignment. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Regular</b> – Used to indicate that the pricing must be used to generate regular bill segment.</li> <li>• <b>Post Processing</b> – Used to indicate that the pricing must be used to generate post processing bill segment. This type of price assignment can be done on usage accounts. The post processing bill segment is generated when you generate the bill for the usage account and not when you bill the usage account through an invoice account.</li> </ul> <div data-bbox="613 606 1200 850" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> The post processing bill segment is generated when the <b>Post Processing Sequence (PPSEQ)</b> characteristic is defined for the price item and when the price item is associated with another price item using the <b>Price Item</b> relationship type.</p> </div> <ul style="list-style-type: none"> <li>• <b>Post Processing – Invoice Based</b> – Used to indicate that the pricing must be used to generate post processing bill segment. This type of price assignment can be done on an invoice account, and, as a result, the post processing bill segment is generated on the invoice account.</li> </ul> <div data-bbox="613 1075 1200 1157" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This will not be applicable for price item which are defined for <b>Only Pricing</b>.</p> </div> <ul style="list-style-type: none"> <li>• <b>Post Processing – Price Item Based</b> – Used to indicate that the pricing must be used to generate post processing bill segment. This type of price assignment can be done on both invoice and usage accounts, but the post processing bill segment is generated only on the invoice account.</li> </ul> <div data-bbox="613 1381 1200 1463" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This will not be applicable for price item which are defined for <b>Only Pricing</b>.</p> </div>	Yes
Pricing Eligibility	Used to select pricing eligibility criteria for price item pricing.	No
Pricing Status	<p>Used to indicate the status of the price assignment. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Draft</b> – Indicates that the price assignment is created as a draft.</li> <li>• <b>Proposed</b> – Indicates that the price assignment is used for quotations.</li> </ul>	Yes
Pricing Currency	Used to indicate the currency in which you want to define the price item pricing.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Rate Schedule	Used to specify the rate schedule that you want to use while defining price item pricing.  <b>Note:</b> Rate schedules control how the bills for the price item will be calculated.  The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Rate Schedule Search</b> screen appears.	Yes
Pricing Rule Type	Used to indicate the pricing rule type. The valid value is: <ul style="list-style-type: none"> <li>Two-Dimensional</li> </ul>	Yes (Conditional)  <b>Note:</b> This field is required when you are defining a two-dimensional pricing rule.
Print Zero	Used to indicate whether zero pricing should be displayed in the bill. The valid values are: <ul style="list-style-type: none"> <li>Yes</li> <li>No</li> </ul> <b>Note:</b> By default, <b>Yes</b> is selected.	Yes
Pricing Frequency	Used to indicate pricing frequency for the price item.  <b>Note:</b> This field appears only when <b>Price Item</b> is defined as <b>Only Pricing</b> and <b>Price Item Type</b> is defined as <b>Fees</b> .	Yes

- Enter the required details in the **Main** section.
- Define TFM Information in a price item pricing, if required.
- Define characteristics for a price item pricing, if required.
- Define parameters for a price item pricing, if required.
- Click **Save**.

The pricing is defined for the price item.

**Note:** A bundle cannot be assigned if its child price items are already assigned to an account and vice versa, in the same date range.

## Defining Characteristics for a Price Item Pricing

### Prerequisites

To define characteristics for a price item pricing, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Price Item**)

### Procedure

To define characteristics for a price item pricing that is assigned to an account:

1. Ensure that the **Characteristics** section is expanded when you are defining a price item pricing.

The **Characteristics** section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the price item pricing.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the price item pricing.
Characteristic Type	Used to indicate the characteristic type. <b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Price Item Pricing</b> .	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the price item pricing.
Characteristic Value	Used to specify the value for the characteristic type. <b>Note:</b> If you select a predefined characteristic type, the <b>Search</b> (🔍) icon appears corresponding to the <b>Characteristic Value</b> field. On clicking the <b>Search</b> icon, the <b>Predefined Characteristic Search</b> window appears. On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the price item pricing.

2. Enter the required details in the **Characteristics** section.
3. If you want to define more than one characteristic for the price item pricing, click the **Add** (+) icon and then repeat step 3.

**Note:** However, if you want to remove a characteristic from the price item pricing, click the **Delete** (🗑️) icon corresponding to the characteristic.

4. Click **Save**.

The characteristics are defined for the price item pricing.

## **Defining Parameters for a Price Item Pricing**

### **Prerequisites**

To define parameters for a price item pricing, you should have:

- Parameters associated with the price item, in case, you want to define price item pricing based on multiple parameters

### **Procedure**

To define parameter details segment for a price item pricing that is assigned to an account:

1. Ensure that the **Price Item and Parameter Information** section is expanded when you are defining a price item pricing.

The **Price Item and Parameter Information** section contains the following field:

<b>Field Name</b>	<b>Field Description</b>
Price Item	Indicates the price item or price item bundle whose pricing details are listed in this section.

In addition, this section contains a grid which has the following columns:

<b>Column Name</b>	<b>Column Description</b>	<b>Mandatory (Yes or No)</b>
Parameter	Used to indicate the parameter that you want to associate with the price item pricing.  <b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Price Item Parameter Search</b> window appears. The parameter search results displays only those parameters where the <b>Price Item</b> check box is selected	Yes
Parameter Information	Displays a comma-separated string which contains of the following: <ul style="list-style-type: none"> <li>Parameter Description</li> <li>Mandatory (Yes or No)</li> <li>Priority</li> </ul>	Not applicable

Column Name	Column Description	Mandatory (Yes or No)
Parameter Value	Used to specify the value of the parameter.	Yes

- Enter the required details in the **Price Item and Parameter Information** section.
- If you want to define more than one parameter information for the price item pricing, click the **Add (+)** icon and then repeat step 2.

**Note:** However, if you want to remove a parameter information from the price item pricing, click the **Delete** (🗑️) icon corresponding to the parameter.

- Click **Save**.

The parameters are defined for the price item pricing.

## Defining TFM Information in a Price Item Pricing

### Prerequisites

To define the TFM information in a price item pricing, you should have:

- Transactions mapped to the price item defined in the application
- Aggregation or Rating Criteria data to be defined for the price item pricing

### Procedure

To define the TFM information in a price item pricing:

- Ensure that the **TFM Information** section is expanded when you are defining a price item pricing.

The **TFM Information** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Ignore Transaction	Used to indicate whether the transactions mapped to the price item is considered for billing. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	Yes
Aggregate Transactions	Used to indicate whether the transactions mapped to the price item is aggregated for billing. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Aggregation Schedule	Used to indicate the transaction aggregation cycle. The valid values are: <ul style="list-style-type: none"> <li>• Daily</li> <li>• Weekly</li> <li>• Monthly</li> <li>• Quaterly</li> <li>• Yearly</li> </ul>	Yes
Transaction Rating Criteria	Used to indicate how and when the transaction legs mapped to the price item are rated. The valid values are: <ul style="list-style-type: none"> <li>• Aggregate Transactions and Then Rate Aggregated SQs</li> <li>• Do Not Rate Transactions</li> <li>• Rate Transaction and Aggregate Calc Lines Across Transaction</li> </ul>	Yes

2. Enter the required details in the **TFM Information** section.

**Note:** **TFM Information** section appears when the value for **Show Default Values in Price Item Pricing** option type of **C1\_FM feature configuration** is set to **Y** and **Price Item Available For** is **Pricing and Billing**.

3. Click **Save**.

The transactions are defined for the price item pricing.

## **Pricing (Person)**

The **Pricing (Person)** screen allows you to:

- View effective price assignments of a person
- View the details of an assigned or inherited price item pricing
- Search and assign price items or price item bundles to a person

- Edit or override a price item pricing
- Copy a price item pricing and assign it to a person

You can also view effective price assignments of a global person (i.e. a person who is not associated to any division) in this screen. The pricing for all price items or price item bundles assigned to the global person either directly or through a price list appears in this screen. However, you will be able to view pricing for only those price items or price item bundles that are associated to the division to which you have access.

Since a global person is not associated to any division, the system cannot determine the price assignment search order for a global person. Hence, the default search order is defined for global persons through the **C1\_PRASNORDR** feature configuration. This feature configuration contains the **Price Assignment Algorithm** option type where you need to specify the algorithm which contains default search order for global persons. You can change this default search order, if required. The valid search order values are — **AGREED\_PRICELIST** and **AGREED\_FIRST**. You can also create a custom search order, if required.

This screen consists of the following zones:

- [Effective Price Assignments for Person](#) on page 474
- [Search Price Item](#) on page 479

## Effective Price Assignments for Person

The **Effective Price Assignments for Person** zone lists the price item pricing (i.e. price assignments) which are effective on the current date. In other words, it lists effective pricing for price items or price item bundles assigned to the person either directly or through the customer hierarchy. The order in which the price assignments are listed is controlled by the **Price Assignment Search** algorithm defined for the division to which the person belongs. If required, you can filter effective price assignments using various search criteria.

**Note:** If the effective pricing is available for the price item, regular bundle (to which the price item belongs), and parent (regular) bundle (i.e. to which the regular bundle belongs) at the same level, the system lists the pricing depending on the value defined for the **Prefer Price Item Over Bundle** parameter in the price assignment search algorithm. If the value of the **Prefer Price Item Over Bundle** parameter is set to **Y**, the system lists effective pricing which is available for the price item. If the effective pricing is not available for the price item, then the system lists effective pricing which is available for the regular bundle at the same level. If the effective pricing is not available for the regular bundle, then the system lists effective pricing which is available for the parent bundle at the same level. However, if the value of the **Prefer Price Item Over Bundle** parameter is set to **N**, the system lists effective pricing which is available for the parent bundle. If the effective pricing is not available for the parent bundle, then the system lists effective pricing which is available for the regular bundle at the same level. If the effective pricing is not available for the regular bundle, then the system lists effective pricing which is available for the price item at the same level.

This zone contains the following two sections:

- **Search Criteria** — The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Person ID	Indicates the person whose effective price assignments are listed in this zone.	Not applicable
Effective Pricing Date	Used to search price assignments which are effective on a particular date.  <b>Note:</b> By default, this field is set to the current date.	No

Field Name	Field Description	Mandatory (Yes or No)
Assignment Level	<p>Used to search price assignments at a particular level in the customer hierarchy. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Customer Agreed</b> – Means price item pricing is agreed for the main customer in the customer hierarchy.</li> <li>• <b>Customer Price List</b> – Means price item pricing is defined in the price list which is assigned to the main customer.</li> <li>• <b>Customer Inherited Price List</b> – Means price item pricing is inherited from the parent price list hierarchy defined for the price list which is assigned to the main customer.</li> <li>• <b>Default Price List</b> – Means price item pricing defined in the price list is available in the default price list.</li> <li>• <b>Global Price List</b> – Means price item pricing defined in the price list is available in the global price list.</li> <li>• <b>Parent Customer Agreed</b> – Means price item pricing is agreed for the parent customer in the customer hierarchy.</li> <li>• <b>Parent Customer Price List</b> – Means price item pricing is defined in the price list which is assigned to the parent customer.</li> <li>• <b>Parent Customer Inherited Price List</b> – Means price item pricing is inherited from the parent price list hierarchy defined for the price list which is assigned to the parent customer.</li> </ul>	No
Parent Person	Used to search price assignments which are inherited from a particular parent customer.	No
Pricing Status	<p>Used to search price assignments with a particular status. The valid values are:</p> <ul style="list-style-type: none"> <li>• Active</li> <li>• Proposed</li> </ul> <p><b>Note:</b> By default, the <b>Active</b> option is selected.</p>	No

Field Name	Field Description	Mandatory (Yes or No)
Show Default and Global Pricing	<p>Used to indicate whether you want to search price assignments inherited from the default or global price list. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Yes</b> – Used when you want to search price assignments inherited from either of the following: <ul style="list-style-type: none"> <li>• Default price list defined for the division</li> <li>• Global price list</li> </ul> </li> <li>• <b>No</b> – Used when you do not want to search price assignments inherited from either of the following: <ul style="list-style-type: none"> <li>• Default price list defined for the division</li> <li>• Global price list</li> </ul> </li> </ul> <p><b>Note:</b> By default, the <b>No</b> option is selected.</p>	No
Price Item	Used to search price assignments of a particular price item or price item bundle.	No
Description	Used to search price assignments of a price item or price item bundle having a particular description.	No
Search Type	<p>Used to search the price list using the following values:</p> <ul style="list-style-type: none"> <li>• Best Fit</li> <li>• Exact Match</li> </ul> <p><b>Note:</b> By default, the <b>Exact Match</b> option is selected.</p>	No

**Note:** The **Search**  icon appears corresponding to the **Price Item** field. On clicking the **Search** icon, you can search for a price item.

- **Price Item Parameters** – The **Price Item Parameters** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Parameter	<p>Used to search price assignments which are defined using a particular parameter.</p> <p><b>Note:</b> This field appears only when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>True</b>.</p>	No

Field Name	Field Description	Mandatory (Yes or No)
Parameter Value	Used to search price assignments which are defined using a particular parameter value.  <b>Note:</b> This field appears only when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>True</b> .	No

<p><b>Note:</b></p> <p>The <b>Search</b>  icon appears corresponding to the <b>Parameter</b> field. On clicking the <b>Search</b> icon, you can search for a parameter.</p> <p>You can only use those parameters where the source entity is set to <b>Transaction</b>.</p> <p>The <b>Search</b>  icon appears corresponding to the <b>Parameter Value</b> field only when the value type of the parameter is <b>Predefined</b> or <b>Reference</b>. If the value type of the parameter is <b>Predefined</b> then on clicking the <b>Search</b> icon, you can search for a predefined parameter value. However, if the value type of the parameter is <b>Reference</b> then on clicking the <b>Search</b> icon, you can search for a reference parameter value.</p>
--

- **Search Results** – On clicking the **Search** button, the search results are filtered based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Pricing Information	Displays the concatenated string consisting of pricing information and pricing ID for the person.  <b>Note:</b> It has a link. On clicking the link, the <b>View Price Item Pricing</b> screen appears with the details of the respective price item pricing.
Price Item	Displays the price item or price item bundle code.
Pricing Parameters	Used to specify multiple parameters based on which you want to determine the pricing utilization.  <b>Note:</b> This column appears only when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>True</b> .
Price Assignment Type	Indicates the type of price assignment. The valid values are: <ul style="list-style-type: none"> <li>• Regular</li> <li>• Post Processing</li> <li>• Post Processing – Invoice Based</li> <li>• Post Processing – Price Item Based</li> </ul>

Column Name	Column Description
Assignment Level	<p>Indicates the level at which the price item pricing is defined in the customer hierarchy. The valid values are:</p> <ul style="list-style-type: none"> <li>• Customer Agreed</li> <li>• Customer Price List</li> <li>• Customer Inherited Price List</li> <li>• Default Price List</li> <li>• Global Price List</li> <li>• Parent Customer Agreed</li> <li>• Parent Customer Price List</li> <li>• Parent Customer Inherited Price List</li> </ul>
Price List Information	Displays the information about the price list which is assigned to the account.
Rate Schedule	Indicates the rate schedule which is used for defining the price item pricing.
Edit	<p>On clicking the <b>Edit</b>  icon, the <b>Price Item Pricing</b> screen appears where you can edit the details of the price item pricing.</p> <p><b>Note:</b> The <b>Edit</b> icon appears only when the assignment level is <b>Customer Agreed</b>.</p>
Override	<p>On clicking the <b>Override</b>  icon, the <b>Price Item Pricing</b> screen appears where you can override the price item pricing.</p> <p><b>Note:</b></p> <p>You can override a price item pricing assigned at any level in the customer hierarchy. On overriding a price item pricing, a new price item pricing which is specific to the account is defined at the account level and is then called account agreed pricing.</p> <p>A customer agreed or account agreed price assignments are effective for a particular duration and do not expire until you specify the end date manually. However, if you set the <b>Expire Override Switch</b> option type of the <b>C1_EXP_OVRD</b> feature configuration to <b>Y</b>, the system will automatically expire an agreed pricing when the agreed pricing of a customer or an account without end date is overridden. If you do not want an agreed pricing to automatically expire when it is overridden, you must set the <b>Expire Override Switch</b> option type of the <b>C1_EXP_OVRD</b> feature configuration to <b>N</b>.</p>
Effective Start Date	Displays the date from when the price item pricing is effective.
Effective End Date	Displays the date till when the price item pricing is effective.
Pricing Currency	Indicates the currency in which the price item pricing is defined.
Parent Person	Displays the name of the parent or grandparent customer from whom the price item pricing is inherited.

**Note:** The number of records that can be displayed in the **Search Results** section is controlled via the **C1\_PR\_REC** feature configuration. You can change the number of records that can be displayed using the **Effective Pricing RecordSet Limit** option type of the **C1\_PR\_REC** feature configuration. For more information, refer to [Setting the C1\\_PR\\_REC Feature Configuration](#) on page 2924.

**Search Price Item**

You can either assign a price item to a price list and then define pricing for the price item, or you can copy an existing price item pricing and assign it to a price list. The **Search Price Item** zone allows you to search for a price item pricing which is assigned to an account, person, or a price list. You can then create a new price item pricing using an existing price item pricing through copying the price item pricing. Once you create a copy of an existing price item pricing, the new price item pricing is assigned to the price list. On copying a price item pricing, the pricing details including the price components, eligibility and tiering criteria for each price component, and characteristics are copied to the new price item pricing. You can then edit the details, if required.

The system allows you to create a copy of active, proposed, inactive, rejected, and template price item pricing. Once you create the copy of a template price item pricing, you can save the new price item pricing in either **Active** or **Proposed** status.

The **Search Price Item** zone contains the following two sections:

- **Search Criteria** – The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to search whether you want to search price item pricing for a price item, account, person, or a price list. The valid values are: <ul style="list-style-type: none"> <li>• Price Item</li> <li>• Price List Pricing</li> <li>• Account Override Pricing</li> <li>• Person Override Pricing</li> </ul>	Yes
Price Item	Used to search pricing for a particular price item or price item bundle.	No
Description	Used to search price items or price item bundles with a particular description. <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"> <p><b>Note:</b> This field appears only when you select the <b>Price Item</b> option from the <b>Search By</b> list.</p> </div>	No

Field Name	Field Description	Mandatory (Yes or No)
Global Price List	<p>Used to search price items or price item bundles which can be assigned to a global price list. The valid values are:</p> <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul> <p><b>Note:</b> This field appears only when you select the <b>Price Item</b> option from the <b>Search By</b> list.</p>	No
Bundle	<p>Used to search whether the price item is a bundle or not. The valid values are:</p> <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul> <p><b>Note:</b> This field appears only when you select the <b>Price Item</b> option from the <b>Search By</b> list.</p>	No
Price List ID	<p>Used to search the price list to which the price item pricing is assigned.</p> <p><b>Note:</b> This field appears only when you select the <b>Price List Pricing</b> option from the <b>Search By</b> list.</p>	No
Effective Start Date	<p>Used to search price item pricing on price lists which are effective from a particular date onwards.</p> <p><b>Note:</b> This field appears only when you select the <b>Price List Pricing, Account Override Pricing, or Person Override Pricing</b> option from the <b>Search By</b> list.</p>	No
Effective End Date	<p>Used to search price item pricing on price lists which are effective till a particular date.</p> <p><b>Note:</b> This field appears only when you select the <b>Price List Pricing, Account Override Pricing, or Person Override Pricing</b> option from the <b>Search By</b> list.</p>	No

Field Name	Field Description	Mandatory (Yes or No)
Pricing Status	Used to search price item pricing with a particular status. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> <li>• Proposed</li> <li>• Rejected</li> <li>• Template</li> </ul> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <b>Note:</b> This field appears only when you select the <b>Price List Pricing, Account Override Pricing, or Person Override Pricing</b> option from the <b>Search By</b> list. </div>	No
Price Assignment Type	Used to search a particular type of the price item pricing. The valid values are: <ul style="list-style-type: none"> <li>• Regular</li> <li>• Post Processing</li> <li>• Post Processing – Invoice Based</li> <li>• Post Processing – Price Item Based</li> </ul> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <b>Note:</b> This field appears only when you select the <b>Price List Pricing, Account Override Pricing, or Person Override Pricing</b> option from the <b>Search By</b> list. </div>	No
Account ID	Used to search pricing of price items which are assigned to a particular account. <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <b>Note:</b> This field appears only when you select the <b>Account Override Pricing</b> option from the <b>Search By</b> list. </div>	No
Person ID	Used to search pricing of price items which are assigned to a particular person. <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <b>Note:</b> This field appears only when you select the <b>Person Override Pricing</b> option from the <b>Search By</b> list. </div>	No

**Note:**

You must specify at least one search criterion while searching for a price item or price item bundle.

The **Search**  icon appears corresponding to the **Price List ID, Price Item, Account ID, and Person ID** fields. On clicking the **Search** icon, you can search for a price list, price item, an account, and person.

- **Search Results** — On clicking the **Search** button, the search results appear based on the specified search criteria. The search results include only those price items or price item bundles that are associated with the division to which the person belongs. However, if the person does not belong to any division, the search will be performed

against all price items or price item bundles defined in the system. It may also include price items or price item bundles that are already assigned to the person in case those price items or price item bundles match the search criteria.

The **Search Results** section contains the following columns:

Column Name	Column Description
Assign	<p>On clicking the <b>Assign</b> () icon, the <b>Price Item Pricing</b> screen appears where you can define a new price item pricing.</p> <p><b>Note:</b> This column appears only when you select the <b>Price Item</b> option from the <b>Search By</b> list.</p>
Price Item Information	<p>Displays details of the price item or price item bundle.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Price Item</b> screen appears where you can view the details of the respective price item or price item bundle. This column appears only when you select the <b>Price Item</b> option from the <b>Search By</b> list.</p>
Copy	<p>On clicking the <b>Copy</b> () icon, the <b>Price Item Pricing</b> screen appears where you can define a new price item pricing using an existing price item pricing.</p>
Pricing Information	<p>Displays details of the price item pricing.</p> <p><b>Note:</b> This column appears only when you select the <b>Price List Pricing, Account Override Pricing, or Person Override Pricing</b> option from the <b>Search By</b> list.</p>
Account Information	<p>Indicates the account to which the price item pricing is assigned. In addition, this column has a context menu which helps in navigating to other screens in the application.</p> <p><b>Note:</b> This column appears only when you select the <b>Account Override Pricing</b> option from the <b>Search By</b> list. It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account. The account information string appears only when an algorithm defined using the <b>C1-AC-INFO</b> algorithm type is attached to the <b>Account Information</b> system event in the <b>Algorithms</b> tab of the <b>Installation Options – Framework</b> screen.</p>

Column Name	Column Description
Person Information	<p>Indicates the person to which the price item pricing is assigned. In addition, this column has a context menu which helps in navigating to other screens in the application.</p> <div data-bbox="570 323 1466 661" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>This column appears only when you select the <b>Person Override Pricing</b> option from the <b>Search By</b> list.</p> <p>It has a link. On clicking the link, the <b>Person</b> screen appears where you can view the details of the respective person.</p> <p>The person information string appears only when an algorithm defined using the <b>PERS-INFO</b> algorithm type is attached to the <b>Person Information</b> system event in the <b>Algorithms</b> tab of the <b>Installation Options – Framework</b> screen.</p> </div>
Price List Information	<p>Indicates the price list to which the price item pricing is assigned. In addition, this column has a context menu which helps in navigating to other screens in the application.</p> <div data-bbox="570 800 1466 1024" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>This column appears only when you select the <b>Price List Pricing</b> option from the <b>Search By</b> list.</p> <p>It has a link. On clicking the link, the <b>Price List</b> screen appears where you can view the details of the respective price list.</p> </div>
Pricing Parameters	<p>Displays a comma-separated list of parameter values. The order in which parameter values appear in this column is controlled by the display order (which is defined while associating a parameter with a price item or price item bundle).</p> <div data-bbox="570 1167 1466 1278" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This column appears only when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>False</b>.</p> </div>
Effective Start Date	<p>Displays the date from when the price item pricing is effective.</p> <div data-bbox="570 1356 1466 1438" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This column appears only when you select the <b>Price List Pricing, Account Override Pricing, or Person Override Pricing</b> option from the <b>Search By</b> list.</p> </div>
Effective End Date	<p>Displays the date till when the price item pricing is effective.</p> <div data-bbox="570 1514 1466 1596" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This column appears only when you select the <b>Price List Pricing, Account Override Pricing, or Person Override Pricing</b> option from the <b>Search By</b> list.</p> </div>
Pricing Currency	<p>Indicates the currency in which the price item pricing is defined.</p> <div data-bbox="570 1671 1466 1753" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This column appears only when you select the <b>Price List Pricing, Account Override Pricing, or Person Override Pricing</b> option from the <b>Search By</b> list.</p> </div>

Column Name	Column Description
Rate Schedule	<p>Indicates the rate schedule which is used for defining the price item pricing.</p> <p><b>Note:</b> It has a link. On clicking the link <b>Rate Schedule</b> screen appears. This column appears only when you select the <b>Price List Pricing, Account Override Pricing, or Person Override Pricing</b> option from the <b>Search By</b> list.</p>
Price Assignment Usage	<p>Indicates whether the price item pricing is applicable to all customers or only to new customers. The valid values are:</p> <ul style="list-style-type: none"> <li>• All Customers</li> <li>• New Customers</li> </ul> <p><b>Note:</b> This column appears only when you select the <b>Price List Pricing, Account Override Pricing, or Person Override Pricing</b> option from the <b>Search By</b> list.</p>
Price Assignment Type	<p>Indicates the type of the price item pricing. The valid values are:</p> <ul style="list-style-type: none"> <li>• Regular</li> <li>• Post Processing</li> <li>• Post Processing – Invoice Based</li> <li>• Post Processing – Price Item Based</li> </ul> <p><b>Note:</b> This column appears only when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>False</b>.</p>

How to assign a price item or price item bundle to a person	<a href="#">Assigning a Price Item or Price Item Bundle to a Person</a>

## Viewing Effective Price Assignments of a Person

### Prerequisites

To view effective price assignments of a person, you should have:

- Price items or price item bundles assigned to the person either directly or through the customer hierarchy

### Procedure

To view effective price assignments of a person:

1. Search for the person in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **Show Context Menu** () icon corresponding to the person whose details you want to view.  
A menu appears.
3. Click the **Go To Effective Pricing** menu option.

The **Pricing (Person)** screen appears.

4. View the pricing for price items or price item bundles assigned to the person (either directly or through the customer hierarchy) in the **Effective Price Assignments for Person** zone.
5. Filter the effective price assignments of the person, if required.

### Related Topics

For more information on...	See...
How to search for a person	<a href="#">Searching for a Person</a> on page 185
<b>Pricing (Person)</b> screen	<a href="#">Pricing (Person)</a> on page 473
<b>Effective Price Assignments for Person</b> zone	<a href="#">Effective Price Assignments for Person</a> on page 474
How to filter effective price assignments of a person	<a href="#">Filtering Effective Price Assignments of a Person</a> on page 485

## Filtering Effective Price Assignments of a Person

### Prerequisites

To filter effective price assignments of a person, you should have:

- Price items or price item bundles defined in the application
- Parameters defined in the application (where the source entity is set to **Transaction**)
- Price items or price item bundles assigned to the person either directly or through the customer hierarchy

### Procedure

To filter effective price assignments of a person:

1. Search for the person in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **Show Context Menu** () icon corresponding to the person whose details you want to view.  
A menu appears.
3. Click the **Go To Effective Pricing** menu option.  
The **Pricing (Person)** screen appears.
4. Enter the search criteria in the **Effective Price Assignments for Person** zone.

**Note:**

You can search for a price item, parameter, or parameter value by clicking the **Search**  icon corresponding to the respective field.

If you want to add more than one parameter in the search criteria, click the **Add**  icon and then enter the parameter name and its value. However, if you want to remove a parameter from the search criteria, click the

**Delete**  icon corresponding to the parameter.

You can only use those parameters where the source entity is set to **Transaction**.

ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

### 5. Click **Search**.

A list of price assignments which are effective on the specified date and that meet the search criteria are listed in the **Effective Price Assignments for Person** zone.

#### Related Topics

## Exporting Effective Price Assignments of a Person

### Prerequisites

To export effective price assignments of a person in the CSV format, you should have:

- Price items or price item bundles assigned to the person either directly or through the customer hierarchy

### Procedure

To export effective price assignments of a person in the CSV format:

1. Search for the person in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **Show Context Menu**  icon corresponding to the person whose details you want to view.  
A menu appears.
3. Click the **Go To Effective Pricing** menu option.  
The **Pricing (Person)** screen appears.
4. Filter the effective price assignments of the person, if required.
5. Click the **Export to Excel** link in the **Effective Price Assignment** zone.  
A message appears confirming whether you want to open or save the EffectivePricing.csv file.
6. Select the **Save As** option from the **Save** list.  
The **Save As** dialog box appears.

7. Browse to the location where you want to save the file.
8. Enter the file name in the respective field, and click **Save**.

The search results are exported in the CSV format.

9. Open the CSV file in Microsoft Excel.

The sheet contains the following columns:

Column Name	Column Description
Price Item	Displays the price item or price item bundle code.
Description	Displays the description of the price item or price item bundle.
Variance	Indicates the variance parameter which is used for defining the price item pricing.  <b>Note:</b> This column appears only when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>False</b> .
Price Item Parameters	Displays a comma-separated list of parameter values. The order in which parameter values appear in this column is controlled by the display order (which is defined while associating a parameter with a price item). A tool tip appears when you hover over this column corresponding to the price item. It indicates the price item parameters and their values which are used for defining the price item pricing.  <b>Note:</b> This column appears only when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>True</b> .
Price Assignment Type	Indicates the type of price assignment. The valid values are: <ul style="list-style-type: none"> <li>• Regular</li> <li>• Post Processing</li> <li>• Post Processing – Invoice Based</li> <li>• Post Processing – Price Item Based</li> </ul>
Assignment Level	Indicates the level at which the price item pricing is defined in the customer hierarchy. The valid values are: <ul style="list-style-type: none"> <li>• Customer Agreed</li> <li>• Customer Price List</li> <li>• Customer Inherited Price List</li> <li>• Parent Customer Agreed</li> <li>• Parent Customer Price List</li> <li>• Parent Customer Inherited Price List</li> </ul>
Price List Description	Displays the description of the price list.  <b>Note:</b> The description appears only when the assignment level is <b>Customer Price List, Customer Inherited Price List, Parent Customer Price List, or Parent Customer Inherited Price List</b> .

Column Name	Column Description
Rate Description	Displays the description of the rate schedule which is used for defining the price item pricing.
Rate Component Information	Displays a comma-separated string which consists of the following: <ul style="list-style-type: none"> <li>• Rate Component Sequence</li> <li>• Tiering Setup of the Rate Component</li> </ul>
Price Component Sequence	Indicates the sequence number of the price component.
Price Component Description	Displays the description of the price component.
Rate	Indicates the rate defined for the price component.
Effective Start Date	Displays the date from when the price item pricing is effective.
Effective End Date	Displays the date till when the price item pricing is effective.
Pricing Currency	Indicates the currency in which the price item pricing is defined.
From	Displays the lower limit of the tiering range.
To	Displays the upper limit of the tiering range.
Price Assignment Usage	Indicates whether the price item pricing is applicable to all customers or only to the new customers. The valid values are: <ul style="list-style-type: none"> <li>• AC</li> <li>• NC</li> </ul>
Price Assignment ID	Displays the price assignment ID.
Parent Level	Indicates the numerical level of the parent in the customer hierarchy from whom the price item pricing is inherited.
Price List ID	Indicates the price list from where the price item pricing is inherited.
Price List Start Date	Displays the date from when the price list is effective.
Parent Person	Displays the name of the parent or grandparent customer from whom the price item pricing is inherited.
Parent Pricelist Level	Indicates the parent level when price item pricing is inherited from the price list hierarchy. If the pricing is inherited from the assigned price list, the parent price list level will be 0. However, if the pricing is inherited from the parent price list in the hierarchy, the parent price list level will be 1. And, if the pricing is inherited from the grandparent price list in the hierarchy, the parent price list level will be 2, and so on.
Ignore Transaction	Indicates whether the transactions mapped to the price item is considered for billing. The valid values are: <ul style="list-style-type: none"> <li>• Y</li> <li>• N</li> </ul>

Column Name	Column Description
Aggregate Transaction	Indicates whether the transactions mapped to the price item is aggregated for billing. The valid values are: <ul style="list-style-type: none"> <li>• Y</li> <li>• N</li> </ul>
Aggregation Schedule	Indicates the transaction aggregation cycle. The valid values are: <ul style="list-style-type: none"> <li>• Daily</li> <li>• Weekly</li> <li>• Monthly</li> <li>• Quarterly</li> <li>• Yearly</li> </ul>
Tiering Criterion	Indicates the tiering criterion which is used in the tiering range.
Tiering Price Item	Indicates whether the price item or price item bundle's total usage is considered for determining the rate.

<b>Pricing (Person)</b> screen	<a href="#">Pricing (Person)</a> on page 473
<b>Effective Price Assignment</b> zone	<a href="#">Effective Price Assignments for Person</a> on page 474
How to search for a person	<a href="#">Searching for a Person</a>

## **Copying a Price Item Pricing**

### **Prerequisites**

To copy a price item pricing and assign it to a person, you should have:

- Person (to which you want to assign the price item pricing) defined in the application
- Person associated with the division to which the user belongs
- Price item pricing (whose copy you want to create) defined in the application

### **Procedure**

To copy a price item pricing and assign it to a person:

1. Search for the person in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **Show Context Menu** () icon corresponding to the person whose details you want to view.  
A menu appears.
3. Click the **Go To Effective Pricing** menu option.  
The **Pricing (Person)** screen appears.
4. In the **Search Price Item** zone, select the required option from the **Search By** list to indicate whether you want to search price item pricing assigned to an account, person, or a price list.

The fields in the **Search Criteria** section change depending on the option that you select from the **Search By** list.

5. Enter the search criteria in the **Search Price Item** zone to search for the price item pricing whose copy you want to create and assign it to the person.
6. Click **Search**.

A list of price assignments that meet the search criteria appears in the **Search Results** section.

7. In the **Search Results** section, click the **Copy** () icon in the **Copy** column corresponding to the price item pricing whose copy you want to create.

The **Price Item Pricing** screen appears.

8. Modify the required pricing details.

**Note:**

If you change the effective start and end dates while copying a price item pricing, you need to specify the parameters which are effective during that date range.

While copying a price item pricing, you can not only edit the existing tiering combination details, but can also add additional tiering combinations until the maximum tiering combinations limit is met.

If you are creating a copy of active, proposed, inactive, rejected, or template price item pricing, you can save the new price item pricing in the **Active** or **Proposed** status.

9. Edit the characteristics of the price item pricing, if required.

10. Click **Save**.

A new price item pricing is defined and assigned to the person.

## **Viewing a Price Item Pricing**

### **Procedure**

To view a price item pricing and assignment details:

1. Search for the person in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **Show Context Menu** () icon corresponding to the person whose details you want to view.  
A menu appears.
3. Click the **Go To Effective Pricing** menu option.  
The **Pricing (Person)** screen appears.
4. Price assignments effective for the person appears in the **Effective Price Assignments for Person** zone.

5. In the **Search Results** section, click the link in the **Pricing Information** column corresponding to the price item whose pricing details you want to view.

The **Price Item Pricing** screen appears. It contains the following zones:

- **Price Item Pricing** – Displays the price item pricing details. It contains the following sections:
  - **Pricing Information** – Displays the pricing information of the price item.
  - **TFM Information** – Displays the transaction feed management information of the price item.
  - **Characteristics** – Displays the details of price item pricing characteristics.
  - **Price Item and Parameter Information** – Displays the price item parameter details.
  - **Record Actions** – Displays the record actions of the price item pricing.
  - **Record Information** – Displays the record information of the price item pricing.
- **Rate and Price Component Summary** – Displays the rate and price component summary of the price item.
- **Rate Components** – Displays the rate components of the price item.
- **Price Components** – Displays the details of price components of the price item.
- **Tiering Criteria** – Displays the tiering criteria of the price item pricing.

**Note:** This zone appears only when **Tiering Type** for the rate component is **STEP** or **Threshold**

- **Pricing Eligibility Criteria** – Displays the pricing eligibility criteria of the price item pricing.

**Note:** This zone appears only when eligibility checkbox is selected in the **Price Item Pricing** screen and details for pricing eligibility criteria is added in the **Price Component** screen.

6. View the basic details of price item pricing in the **Price Item Pricing** zone.
7. View the rate and price component summary of price item in the **Rate and Price Component Summary** zone.
8. View the rate components of price item in the **Rate Components** zone.
9. View the details of price components of price item in the **Price Components** zone.
10. View the tiering criteria of price item pricing in the **Tiering Criteria** zone.
11. View the pricing eligibility criteria of price item pricing in the **Pricing Eligibility Criteria** zone.

## Editing a Price Item Pricing of a Person

### Prerequisites

To edit a price item pricing of a person, you should have:

- Transactions mapped to the price item defined in the application
- Rate schedules, rate versions, rate components defined in the application
- Parameters associated with the price item (in case you want to define price item pricing based on those parameters)

### Procedure

To edit a price item pricing of a person:

1. Search for the account in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **Show Context Menu** (☰) icon corresponding to the person whose details you want to view.

A menu appears.

3. Click the **Go To Effective Pricing** menu option.

The **Pricing (Person)** screen appears.

4. Price assignments effective for the person appears in the **Effective Price Assignments for Person** zone.

5. In the **Search Results** section, click the **Edit** (✎) icon in the **Edit** column corresponding to the price item pricing whose details you want to edit.

The **Price Item Pricing** screen appears. It contains the following sections:

- **Main** – Used to specify basic details about the price item pricing.
- **TFM Information** – Used to specify the transaction feed management information about the price item pricing.

**Note:** This section appears in the **Price Item Pricing** screen only when the value for the **Show Default Values in Price Item Pricing** option type for **C1\_FM** feature configuration is set to **Y** and **Price Item Available For** is **Pricing and Billing**.

- **Characteristics** – Used to define characteristics for the price item pricing.
- **Price Item and Parameter Information** – Used to define the parameter details segment for the price item pricing.

**Note:** This section appears only when **Price Assignment Type** is **Regular**.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Start Date	<p>Used to specify the date from when the price item pricing is effective.</p> <div data-bbox="548 289 1105 659" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>The effective start date cannot be later than the effective end date.</p> <p>If you change the effective start and end dates while editing a price item pricing, you need to specify the parameters which are effective during that date range.</p> <p>This field will be in read-only mode when the price assignment has been used.</p> </div>	Yes
End Date	<p>Used to specify the date till when the price item pricing is effective.</p> <div data-bbox="548 768 1105 848" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> The effective end date cannot be earlier than the effective start date.</p> </div>	No

Field Name	Field Description	Mandatory (Yes or No)
Price Assignment Type	<p>Used to indicate the type of price assignment. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Regular</b> – Used to indicate that the pricing must be used to generate regular bill segment.</li> <li>• <b>Post Processing</b> – Used to indicate that the pricing must be used to generate post processing bill segment. This type of price assignment can be done on usage accounts. The post processing bill segment is generated when you generate the bill for the usage account and not when you bill the usage account through an invoice account.</li> </ul> <div data-bbox="613 640 1109 913" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> The post processing bill segment is generated when the <b>Post Processing Sequence (PPSEQ)</b> characteristic is defined for the price item and when the price item is associated with another price item using the <b>Price Item</b> relationship type.</p> </div> <ul style="list-style-type: none"> <li>• <b>Post Processing – Invoice Based</b> – Used to indicate that the pricing must be used to generate post processing bill segment. This type of price assignment can be done on an invoice account, and, as a result, the post processing bill segment is generated on the invoice account.</li> </ul> <div data-bbox="613 1171 1109 1255" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This will not be applicable for price item which are defined for <b>Only Pricing</b>.</p> </div> <ul style="list-style-type: none"> <li>• <b>Post Processing – Price Item Based</b> – Used to indicate that the pricing must be used to generate post processing bill segment. This type of price assignment can be done on both invoice and usage accounts, but the post processing bill segment is generated only on the invoice account.</li> </ul> <div data-bbox="613 1514 1109 1598" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This will not be applicable for price item which are defined for <b>Only Pricing</b>.</p> </div>	Yes
Pricing Eligibility	<p>Used to select pricing eligibility criteria for price item pricing.</p> <div data-bbox="548 1703 1109 1818" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This field will be enabled for selection if the checkbox is not selected. If the checkbox appears selected then this field will be in read-only mode.</p> </div>	No

Field Name	Field Description	Mandatory (Yes or No)
Pricing Status	<p>Used to indicate the status of the price assignment. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Draft</b> – Indicates that the price assignment is created as a draft.</li> <li>• <b>Active</b> – Indicates that the price assignment is used for billing.</li> <li>• <b>Inactive</b> – Indicates that the price assignment is no longer used for billing.</li> <li>• <b>Proposed</b> – Indicates that the price assignment is used for quotations.</li> </ul> <div data-bbox="548 611 1105 835" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> If a price assignment is in <b>Active</b> status, you can change its status to <b>Inactive</b>. If a price assignment is in <b>Draft</b> status, you cannot change its status to <b>Proposed</b>.</p> </div>	Yes
Pricing Currency	Used to indicate the currency in which you want to define the price item pricing.	Yes
Rate Schedule	<p>Used to specify the rate schedule that you want to use while defining price item pricing.</p> <div data-bbox="548 1024 1105 1293" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> Rate schedules control how the bills for the price item will be calculated. The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Rate Schedule Search</b> screen appears.</p> </div>	Yes
Pricing Rule Type	<p>Used to indicate the pricing rule type. The valid value is:</p> <ul style="list-style-type: none"> <li>• Two-Dimensional</li> </ul>	Yes (Conditional) <div data-bbox="1128 1367 1466 1482" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This field is required when you are editing a two-dimensional pricing rule.</p> </div>
Print Zero	<p>Used to indicate whether zero pricing should be displayed in the bill. The valid values are:</p> <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul> <div data-bbox="548 1686 1105 1738" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> By default, <b>Yes</b> is selected.</p> </div>	Yes
Pricing Frequency	<div data-bbox="548 1812 1105 1927" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This field appears only when <b>Price Item</b> is defined as <b>Only Pricing</b> and <b>Price Item Type</b> is defined as <b>Fees</b>.</p> </div>	Yes

6. Modify the details in the **Main** section, if required.
7. Edit the TFM Information in a price item pricing, if required.
8. Edit the characteristics for a price item pricing, if required.
9. Edit the parameters for a price item pricing, if required.
10. Click **Save**.

The changes made to the price item pricing are saved.

## Overriding a Price Item Pricing of a Person

### Prerequisites

To override a price item pricing of a person, you should have:

- Transactions mapped to the price item defined in the application
- Rate schedules, rate versions, rate components defined in the application
- Parameters associated with the price item (in case you want to define price item pricing based on multiple parameters)

### Procedure

To override a price item pricing of a person:

1. Search for the person in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **Show Context Menu** () icon corresponding to the person whose details you want to view.  
A menu appears.
3. Click the **Go To Effective Pricing** menu option.  
The **Pricing (Person)** screen appears.
4. Price assignments effective for the person appears in the **Effective Price Assignments for Person** zone.
5. In the **Search Results** section, click the **Override** () icon in the **Override** column corresponding to the price item pricing whose details you want to override.

The **Price Item Pricing** screen appears. It contains the following sections:

- **Main** – Used to specify basic details about the price item pricing.

- **TFM Information** – Used to specify the transaction feed management information about the price item pricing.

**Note:** This section appears in the **Price Item Pricing** screen only when the value for the **Show Default Values in Price Item Pricing** option type for **C1\_FM** feature configuration is set to **Y** and **Price Item Available For** is **Pricing and Billing**.

- **Characteristics** – Used to define characteristics for the price item pricing.
- **Price Item and Parameter Information** – Used to define the parameter details segment for the price item pricing.

**Note:** This section appears only when **Price Assignment Type** is **Regular**.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Start Date	Used to specify the date from when the price item pricing is effective.  <b>Note:</b> The effective start date cannot be later than the effective end date. If you change the effective start and end dates while overriding a price item pricing, you need to specify the parameters which are effective during that date range. This field will be in read-only mode when the price assignment has been used.	Yes
End Date	Used to specify the date till when the price item pricing is effective.  <b>Note:</b> The effective end date cannot be earlier than the effective start date.	No

Field Name	Field Description	Mandatory (Yes or No)
Price Assignment Type	<p>Used to indicate the type of price assignment. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Regular</b> – Used to indicate that the pricing must be used to generate regular bill segment.</li> <li>• <b>Post Processing</b> – Used to indicate that the pricing must be used to generate post processing bill segment. This type of price assignment can be done on usage accounts. The post processing bill segment is generated when you generate the bill for the usage account and not when you bill the usage account through an invoice account.</li> </ul> <div data-bbox="613 640 1109 913" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> The post processing bill segment is generated when the <b>Post Processing Sequence (PPSEQ)</b> characteristic is defined for the price item and when the price item is associated with another price item using the <b>Price Item</b> relationship type.</p> </div> <ul style="list-style-type: none"> <li>• <b>Post Processing – Invoice Based</b> – Used to indicate that the pricing must be used to generate post processing bill segment. This type of price assignment can be done on an invoice account, and, as a result, the post processing bill segment is generated on the invoice account.</li> </ul> <div data-bbox="613 1171 1109 1255" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This will not be applicable for price item which are defined for <b>Only Pricing</b>.</p> </div> <ul style="list-style-type: none"> <li>• <b>Post Processing – Price Item Based</b> – Used to indicate that the pricing must be used to generate post processing bill segment. This type of price assignment can be done on both invoice and usage accounts, but the post processing bill segment is generated only on the invoice account.</li> </ul> <div data-bbox="613 1514 1109 1598" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This will not be applicable for price item which are defined for <b>Only Pricing</b>.</p> </div>	Yes
Pricing Eligibility	<p>Used to select pricing eligibility criteria for price item pricing.</p> <div data-bbox="548 1703 1109 1818" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This field will be in enabled for selection if the checkbox is not selected. If the checkbox appears selected then this field will be in read-only mode.</p> </div>	No

Field Name	Field Description	Mandatory (Yes or No)
Pricing Status	Used to indicate the status of the price assignment. The valid values are: <ul style="list-style-type: none"> <li>• <b>Draft</b> – Indicates that the price assignment is created as a draft.</li> <li>• <b>Proposed</b> – Indicates that the price assignment is used for quotations.</li> </ul> <div style="border: 1px solid black; padding: 2px;"><b>Note:</b> If a price assignment is in <b>Draft</b> status, you cannot change its status to <b>Proposed</b>.</div>	Yes
Pricing Currency	Used to indicate the currency in which you want to override the price item pricing.	Yes
Rate Schedule	Used to specify the rate schedule that you want to use while defining price item pricing. <div style="border: 1px solid black; padding: 2px;"><b>Note:</b> Rate schedules control how the bills for the price item will be calculated. The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Rate Schedule Search</b> screen appears.</div>	Yes
Pricing Rule Type	Used to indicate the pricing rule type. The valid value is: <ul style="list-style-type: none"> <li>• Two-Dimensional</li> </ul>	Yes (Conditional) <div style="border: 1px solid black; padding: 2px;"><b>Note:</b> This field is required when you are overriding a two-dimensional pricing rule.</div>
Print Zero	Used to indicate whether zero pricing should be displayed in the bill. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul> <div style="border: 1px solid black; padding: 2px;"><b>Note:</b> By default, <b>Yes</b> is selected.</div>	Yes
Pricing Frequency	Used to indicate pricing frequency for the price item. <div style="border: 1px solid black; padding: 2px;"><b>Note:</b> This field appears only when <b>Price Item</b> is defined as <b>Only Pricing</b> and <b>Price Item Type</b> is defined as <b>Fees</b>.</div>	Yes

6. Modify the details in the **Main** section, if required.
7. Modify the TFM Information in a price item pricing, if required.
8. Modify the characteristics for a price item pricing, if required.
9. Modify the parameters for a price item pricing, if required.

**Note:** If you change the effective end date while overriding a price item pricing, you need to specify the parameters which are effective during the date range of start and end date.

**10. Click Save.**

The price item pricing is overridden.

**Assigning a Price Item to a Person****Prerequisites**

To assign a price item to a person, you should have:

- Transactions mapped to the price item defined in the application
- Rate schedules, rate versions, and rate components defined in the application
- Parameters associated with the price item (in case you want to define price item pricing based on multiple parameters)

**Procedure**

To assign a price item to a person:

1. Search for the account in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **Show Context Menu** () icon corresponding to the person whose details you want to view.  
A menu appears.
3. Click the **Go To Effective Pricing** menu option.  
The **Pricing (Person)** screen appears.
4. Search for the price item that you want to assign to the person in the **Search Price Item or Price Item Pricing** zone.
5. In the **Search Results** section, click the **Assign** () icon in the **Assign** column corresponding to the price item that you want to assign to the person.

The **Price Item Pricing** screen appears. It contains the following sections:

- **Main** – Used to specify basic details about the price item pricing.
- **TFM Information** – Used to specify the transaction feed management information about the price item pricing.

**Note:** This section appears in the **Price Item Pricing** screen only when the value for the **Show Default Values in Price Item Pricing** option type for **C1\_FM** feature configuration is set to **Y** and **Price Item Available For** is **Pricing and Billing**.

- **Characteristics** – Used to define characteristics for the price item pricing.
- **Price Item and Parameter Information** – Used to define the parameter details segment for the price item pricing.

**Note:** This section appears only when **Price Assignment Type** is **Processing**.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Start Date	Used to specify the date from when the price item pricing is effective.  <b>Note:</b> By default, the current system date appears in this field. The effective start date cannot be later than the effective end date.	Yes
End Date	Used to specify the date till when the price item pricing is effective.  <b>Note:</b> The effective end date cannot be earlier than the effective start date.	No

Field Name	Field Description	Mandatory (Yes or No)
Price Assignment Type	<p>Used to indicate the type of price assignment. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Regular</b> – Used to indicate that the pricing must be used to generate regular bill segment.</li> <li>• <b>Post Processing</b> – Used to indicate that the pricing must be used to generate post processing bill segment. This type of price assignment can be done on usage accounts. The post processing bill segment is generated when you generate the bill for the usage account and not when you bill the usage account through an invoice account.</li> </ul> <div data-bbox="613 611 1162 852" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> The post processing bill segment is generated when the <b>Post Processing Sequence (PPSEQ)</b> characteristic is defined for the price item and when the price item is associated with another price item using the <b>Price Item</b> relationship type.</p> </div> <ul style="list-style-type: none"> <li>• <b>Post Processing – Invoice Based</b> – Used to indicate that the pricing must be used to generate post processing bill segment. ## Defining Characteristics for a Price Item Pricing

### Prerequisites

To define characteristics for a price item pricing, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Price Item**)

### Procedure

To define characteristics for a price item pricing that is assigned to an account:

1. Ensure that the **Characteristics** section is expanded when you are defining a price item pricing.

The **Characteristics** section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the price item pricing.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the price item pricing.
Characteristic Type	Used to indicate the characteristic type. <b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Price Item Pricing</b> .	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the price item pricing.
Characteristic Value	Used to specify the value for the characteristic type. <b>Note:</b> If you select a predefined characteristic type, the <b>Search</b> (🔍) icon appears corresponding to the <b>Characteristic Value</b> field. On clicking the <b>Search</b> icon, the <b>Predefined Characteristic Search</b> window appears. On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the price item pricing.

2. Enter the required details in the **Characteristics** section.
3. If you want to define more than one characteristic for the price item pricing, click the **Add** (+) icon and then repeat step 3.

**Note:** However, if you want to remove a characteristic from the price item pricing, click the **Delete** (🗑️) icon corresponding to the characteristic.

4. Click **Save**.

The characteristics are defined for the price item pricing.

## **Defining Parameters for a Price Item Pricing**

### **Prerequisites**

To define parameters for a price item pricing, you should have:

- Parameters associated with the price item, in case, you want to define price item pricing based on multiple parameters

### **Procedure**

To define parameter details segment for a price item pricing that is assigned to an account:

1. Ensure that the **Price Item and Parameter Information** section is expanded when you are defining a price item pricing.

The **Price Item and Parameter Information** section contains the following field:

<b>Field Name</b>	<b>Field Description</b>
Price Item	Indicates the price item or price item bundle whose pricing details are listed in this section.

In addition, this section contains a grid which has the following columns:

<b>Column Name</b>	<b>Column Description</b>	<b>Mandatory (Yes or No)</b>
Parameter	Used to indicate the parameter that you want to associate with the price item pricing.  <b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Price Item Parameter Search</b> window appears. The parameter search results displays only those parameters where the <b>Price Item</b> check box is selected	Yes
Parameter Information	Displays a comma-separated string which contains of the following: <ul style="list-style-type: none"> <li>Parameter Description</li> <li>Mandatory (Yes or No)</li> <li>Priority</li> </ul>	Not applicable

Column Name	Column Description	Mandatory (Yes or No)
Parameter Value	Used to specify the value of the parameter.	Yes

- Enter the required details in the **Price Item and Parameter Information** section.
- If you want to define more than one parameter information for the price item pricing, click the **Add (+)** icon and then repeat step 2.

**Note:** However, if you want to remove a parameter information from the price item pricing, click the **Delete** (🗑️) icon corresponding to the parameter.

- Click **Save**.

The parameters are defined for the price item pricing.

## Defining TFM Information in a Price Item Pricing

### Prerequisites

To define the TFM information in a price item pricing, you should have:

- Transactions mapped to the price item defined in the application
- Aggregation or Rating Criteria data to be defined for the price item pricing

### Procedure

To define the TFM information in a price item pricing:

- Ensure that the **TFM Information** section is expanded when you are defining a price item pricing.

The **TFM Information** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Ignore Transaction	Used to indicate whether the transactions mapped to the price item is considered for billing. The valid values are: <ul style="list-style-type: none"> <li>Yes</li> <li>No</li> </ul>	Yes
Aggregate Transactions	Used to indicate whether the transactions mapped to the price item is aggregated for billing. The valid values are: <ul style="list-style-type: none"> <li>Yes</li> <li>No</li> </ul>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Aggregation Schedule	Used to indicate the transaction aggregation cycle. The valid values are: <ul style="list-style-type: none"> <li>• Daily</li> <li>• Weekly</li> <li>• Monthly</li> <li>• Quaterly</li> <li>• Yearly</li> </ul>	Yes
Transaction Rating Criteria	Used to indicate how and when the transaction legs mapped to the price item are rated. The valid values are: <ul style="list-style-type: none"> <li>• Aggregate Transactions and Then Rate Aggregated SQs</li> <li>• Do Not Rate Transactions</li> <li>• Rate Transaction and Aggregate Calc Lines Across Transaction</li> </ul>	Yes

2. Enter the required details in the **TFM Information** section.

**Note:** **TFM Information** section appears when the value for **Show Default Values in Price Item Pricing** option type of **C1\_FM feature configuration** is set to **Y** and **Price Item Available For** is **Pricing and Billing**.

3. Click **Save**.

The transactions are defined for the price item pricing.

## **Price Item Pricing (Used for Viewing)**

Once the pricing is defined for a price item pricing which is assigned to a account, person, or price list, the **Price Item Pricing** screen allows you to:

- Edit the details of a price item pricing
- Delete a price item pricing

- Submit a price item pricing for processing
- View the details of price components of the rate component
- View the details of tiering criteria, pricing eligibility criteria of a price component
- Add price components of the rate components
- Add tiering components, pricing eligibility criteria of the price components
- Edit price components, tiering criteria, pricing eligibility criteria
- Delete price components, tiering criteria, pricing eligibility criteria

**Note:**

When the price assignment is in **Draft** status and when:

- Approval Workflow is off then status is changed from **Draft** to **Active**.
- Approval Workflow is on then status is changed from **Draft** to **Pending in Approval**.

## Price Item Pricing

The **Price Item Pricing** zone displays the details of the price item pricing. It contains the following sections:

- **Pricing Information** - Displays basic information about the pricing of the price item. It contains the following fields:

Field Name	Field Description
Start Date	Displays the date from when the pricing of the price item is effective.
End Date	Displays the date till when the pricing of the price item is effective.

Field Name	Field Description
Price Assignment Type	<p>Indicates the type of price assignment. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Post Processing</b> – Indicates that the pricing is used to generate post processing bill segment. This type of price assignment can be done on usage accounts. The post processing bill segment is generated when you generate the bill for the usage account and not when you bill the usage account through an invoice account.</li> <li>• <b>Post Processing – Invoice Based</b> – Indicates that the pricing is used to generate post processing bill segment. This type of price assignment is done on an invoice account, and, as a result, the post processing bill segment is generated on the invoice account.</li> </ul> <div style="border: 1px solid black; padding: 5px; margin: 10px 0;"> <p><b>Note:</b> This is not applicable for price items which are defined for <b>Pricing</b> and where the <b>Price Item Type</b> field is set to <b>Fees</b>.</p> </div> <ul style="list-style-type: none"> <li>• <b>Post Processing – Price Item Based</b> – Indicates that the pricing is used to generate post processing bill segment. This type of price assignment is done on both invoice and usage accounts, but the post processing bill segment is generated only on the invoice account.</li> <li>• <b>Regular</b> – Indicates that the pricing is used to generate regular bill segment.</li> </ul> <div style="border: 1px solid black; padding: 5px; margin: 10px 0;"> <p><b>Note:</b> This is not applicable for price items which are defined for <b>Pricing</b> and where the <b>Price Item Type</b> field is set to <b>Fees</b>. By default, the <b>Regular</b> option is selected in the <b>Bundle Type</b> field for price item which are applicable for <b>Pricing</b> and cannot be edited. The post processing bill segment is generated when the <b>Post Processing Sequence (PPSEQ)</b> characteristic is defined for the price item and when the price item is associated with another price item using the <b>Price Item</b> relationship type.</p> </div>
Pricing Eligibility	Indicates whether the price item pricing is eligible for pricing assignment or not.
Pricing Status	<p>Indicates the pricing assignment status of the price item pricing. The valid values are:</p> <ul style="list-style-type: none"> <li>• Draft</li> <li>• Active</li> <li>• Inactive</li> <li>• Proposed</li> <li>• Rejected</li> <li>• Template</li> </ul>
Pricing Currency	<p>Indicates the currency in which the price item pricing is defined.</p> <div style="border: 1px solid black; padding: 5px; margin: 10px 0;"> <p><b>Note:</b> It has a link. On clicking the link, the <b>Currency</b> screen appears where you can view the details of the currency.</p> </div>
Rate Schedule	<p>Indicates the rate schedule that is used to define the price item pricing.</p> <div style="border: 1px solid black; padding: 5px; margin: 10px 0;"> <p><b>Note:</b> It has a link. On clicking the link, the <b>Rate Schedule</b> screen appears where you can view the details of the rate schedule.</p> </div>

Field Name	Field Description
Pricing Rule Type	Indicates the pricing rule type. The valid value is: <ul style="list-style-type: none"> <li>Two-Dimensional</li> </ul>
Print Zero	Indicates the zero pricing displayed in the bill. The valid values are: <ul style="list-style-type: none"> <li>Yes</li> <li>No</li> </ul>
Price Assignment Usage	Indicates whether the price item pricing is applicable to all customers or only to new customers. The valid values are: <ul style="list-style-type: none"> <li>All Customers</li> <li>New Customers</li> </ul>

- **TFM Information** – Displays the transactions mapped to the price item pricing. It contains the following fields:

Field Name	Field Description
Ignore Transaction	Indicates whether the transactions mapped to the price item pricing is considered for billing or not. The valid values are: <ul style="list-style-type: none"> <li>Yes</li> <li>No</li> </ul>
Aggregate Transactions	Indicates whether the transactions mapped to the price item pricing is aggregated for billing or not. The valid values are: <ul style="list-style-type: none"> <li>Yes</li> <li>No</li> </ul>
Aggregation Schedule	Indicates the transaction aggregation cycle. The valid values are: <ul style="list-style-type: none"> <li>Daily</li> <li>Weekly</li> <li>Monthly</li> <li>Quarterly</li> <li>Yearly</li> </ul>
Transaction Rating Criteria	Indicates how and when the transaction legs mapped to the price item are rated. The valid values are: <ul style="list-style-type: none"> <li>Aggregate Transactions and Then Rate Aggregated SQs</li> <li>Do Not Rate Transactions</li> </ul>

**Note:**

**TFM Information** section appears when the value for **Show Default Values in Price Item Pricing** option type of **C1\_FM feature configuration** is set to **Y** and **Price Item Usage** field is set to **Pricing and Billing**.

**TFM Information** section does not appear when the **Price Item Usage** field is set to **Only Pricing** and the **Price Item Type** field is set to **Fees**, then, only the **Pricing Frequency** field appears.

- **Characteristics** – Lists the characteristics defined for the price item pricing. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the characteristic is effective for the price item pricing.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- **Price Item and Parameter Information** – Displays the parameter details for the price item pricing. It contains the following field:

Field Name	Field Description
Price Item	Indicates the price item or price item bundle whose pricing details are listed in this section.

In addition, this section contains the following columns:

Column Name	Column Description
Parameter	Indicates the parameter that is associated with the price item pricing.
Parameter Value	Displays the parameter value.

- **Record Actions** – This section contains the following buttons:

Column Name	Column Description
Edit	Used to edit the details of the price item pricing.  <b>Note:</b> The <b>Edit</b> button appears only when the price item pricing is in the <b>Draft</b> status.
Delete	Used to delete the price item pricing.  <b>Note:</b> The <b>Delete</b> button appears only when the price item pricing is in the <b>Draft</b> status.
Submit	Used to submit the price item pricing for validation and processing.  <b>Note:</b> The <b>Submit</b> button appears only when the price item pricing is in the <b>Draft</b> status.

- **Record Information** – This section contains the following field:

Field Name	Field Description
Business Object	Indicates the business object using which the price item pricing is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.

## Rate and Price Component Summary

The **Rate and Price Component Summary** zone lists the following in a tree view:

- Information string of price component with tiers where the rate schedule is flat.

- Information string of price component with tiers where the rate schedule is step.
- Information string of price component with tiers where the rate schedule is threshold.

## Rate Components

The **Rate Components** zone lists rate components and its details for price item pricing that are assigned to an account, person, or price list. This zone contains the following columns:

Column Name	Column Description
Sequence	Indicates the sequence number of the rate component.
Rate Components	Displays a comma-separated string which consists of the following: <ul style="list-style-type: none"> <li>• Rate Component ID</li> <li>• Rate Component Sequence Number</li> <li>• Tiering Setup of the Rate Component</li> </ul>
Add Price Component	On clicking the <b>Add Price Component</b> button, the <b>Price Component</b> screen appears where you can add the price component for the rate component. <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> This button appears only when the <b>Pricing Status</b> of the price item pricing is in <b>Draft, Proposed</b> and <b>Template</b> status.</p> </div>

On clicking the broadcast **Broadcast** (📡) icon corresponding to the rate component, the **Price Components** zone appears with the details of the price components for the respective rate component.

You can change the layout of this zone. For more information on how to change the layout, see [Changing the Layout](#) on page 2882.

## Price Components

The **Price Components** zone lists details of price components of the rate component for price item pricing that are assigned to an account, person, or price list. This zone contains the following columns:

Column Name	Column Description
Sequence	Indicates the sequence number of the price component.
Show Price Component	Indicates whether to display the price components or not. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>

Column Name	Column Description
Description	Displays a comma-separated string which consists of the following: <ul style="list-style-type: none"> <li>• Tiering Setup of the Price Component</li> <li>• Description of the Price Component</li> </ul>
Rate Value	Indicates the rate defined for the price component.
Edit	On clicking the <b>Edit</b> (✎) icon, the <b>Price Component</b> screen appears where you can edit the details of the price component.
Delete	On clicking the <b>Delete</b> (🗑) icon, you can delete the price component. <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> The <b>Delete</b> icon appears only when the price assignment is in <b>Draft, Proposed</b> or <b>Template</b> status.</p> </div>

By default, the **Price Components** zone does not appear in the **Price Item Pricing** screen. It appears only when you click the broadcast **Broadcast** (📡) icon corresponding to a rate component in the **Rate Components** zone.

On clicking the **Broadcast** (📡) icon corresponding to a price component, the **Tiering Criteria** and **Pricing Eligibility Criteria** zones appear with details of the respective tiering, pricing eligibility criteria.

**Note:**

The **Tiering Criteria** zone appears only when **Tiering Type** for the rate component is **STEP** or **Threshold**.

The **Pricing Eligibility Criteria** zone appears only when eligibility checkbox is selected in the **Price Item Pricing** screen and details for pricing eligibility criteria is added in the **Price Component** screen.

You can define price component for a rate component by clicking the **Add** link in the upper right corner of this zone.

You can change the layout of this zone. For more information on how to change the layout, see [Changing the Layout](#) on page 2882.

## Tiering Criteria

The **Tiering Criteria** zone lists the detail of tiering criterions that are used in the tiering range. This zone contains the following columns:

Column Name	Column Description
Sequence	Indicates the sequence number of the tiering criteria.
Tiering Criterion	Indicates the tiering criterion.
Price Item	Displays the price item.
Parameter Information	Displays information about the parameter associated with the price item.
Lower Limit	Displays the lower limit of the tiering range.
Upper Limit	Displays the upper limit of the tiering range.
Edit	On clicking the <b>Edit</b> (✎) icon, the <b>Price Component</b> screen appears where you can edit the details of the tiering criteria.
Delete	On clicking the <b>Delete</b> (🗑) icon, you can delete the tiering criteria.  <b>Note:</b> The <b>Delete</b> icon appears only when the price assignment is in <b>Draft</b> , <b>Proposed</b> or <b>Template</b> status.

By default, the **Tiering Criteria** zone does not appear in the **Price Item Pricing** screen. It appears only when you click the broadcast **Broadcast** (📡) icon corresponding to a price component in the **Price Components** zone.

**Note:**

The **Tiering Criteria** zone appears only when **Tiering Type** for the rate component is **STEP** or **Threshold**.

You can define tiering criteria for a price component by clicking the **Add** link in the upper right corner of this zone.

You can change the layout of this zone. For more information on how to change the layout, see [Changing the Layout](#) on page 2882.

## Pricing Eligibility Criteria

The **Pricing Eligibility Criteria** zone lists the detail of parameters used while defining the pricing eligibility criteria. This zone contains the following columns:

Column Name	Column Description
Sequence	Indicates the sequence number of the tiering criteria.
Parameter	Indicates the parameter (on the left hand side) is used in the pricing eligibility criteria.
Operator	Displays the relational operator defined for the relation between the parameter name and value.
Parameter Value Type	Indicates whether the parameter (on the left hand side) is compared against another parameter (on the right hand side) or directly against a parameter value.
Parameter	Indicates the parameter (on the right hand side) against which you have compared the parameter (on the left hand side).
Parameter Value	Indicates the parameter value against which you have compared the parameter (on the left hand side).
Is True	Indicates what happens when the condition is true (satisfied). The valid values are: <ul style="list-style-type: none"> <li>• <b>Check Next Condition</b> – Indicates that the condition with consecutive sequence number is executed.</li> <li>• <b>Rule Is False</b> – Indicates that the action specified in the <b>Rule False Action</b> field is executed.</li> <li>• <b>Rule Is True</b> – Indicates that the action specified in the <b>Rule True Action</b> field is executed.</li> </ul>
Is False	Indicates what happens when the condition is false (not satisfied). The valid values are: <ul style="list-style-type: none"> <li>• <b>Check Next Condition</b> – Indicates that the condition with consecutive sequence number is executed.</li> <li>• <b>Rule Is False</b> – Indicates that the action specified in the <b>Rule False Action</b> field is executed</li> <li>• <b>Rule Is True</b> – Indicates that the action specified in the <b>Rule True Action</b> field is executed.</li> </ul>
Is Insufficient	Indicates what happens when the data is insufficient. The valid values are: <ul style="list-style-type: none"> <li>• <b>Check Next Condition</b> – Indicates that the condition with consecutive sequence number is executed.</li> <li>• <b>Rule Is False</b> – Indicates that the action specified in the <b>Rule False Action</b> field is executed</li> <li>• <b>Rule Is True</b> – Indicates that the action specified in the <b>Rule True Action</b> field is executed.</li> </ul>
Edit	On clicking the <b>Edit</b> (✎) icon, the <b>Price Component</b> screen appears where you can edit the details of the pricing eligibility criteria.
Delete	On clicking the <b>Delete</b> (🗑) icon, you can delete the pricing eligibility criteria. <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> The <b>Delete</b> icon appears only when the price assignment is in <b>Draft, Proposed</b> or <b>Template</b> status.</p> </div>

By default, the **Pricing Eligibility Criteria** zone does not appear in the **Price Item Pricing** screen. It appears only when you click the broadcast **Broadcast** (📡) icon corresponding to a price component in the **Price Components** zone.

**Note:**

The **Pricing Eligibility Criteria** zone appears only when eligibility checkbox is selected in the **Price Item Pricing** screen and details for pricing eligibility criteria is added in the **Price Component** screen.

You can define pricing eligibility criteria for a price component by clicking the **Add** link in the upper right corner of this zone.

You can change the layout of this zone. For more information on how to change the layout, see [Changing the Layout](#) on page 2882.

**Two-Dimensional Pricing**

The **Two-Dimensional Pricing** zone displays the details of the two-dimensional pricing. It contains the following field:

Field Name	Field Description
Pricing Information	Displays the concatenated string consisting of pricing information and pricing ID which are separated by a comma(,) for an account, person or price list.

In addition, this section contains the following fields in a grid:

Field Name	Field Description
Step Criterion	Displays the <b>Price Criteria</b> of the price component
Threshold Parameter	Displays the parameter of the price component eligibility
Tiering Range	Displays the tiering range of the pricing.

**Defining a Price Item Pricing****Prerequisites**

To define pricing for a price item, you should have:

- Transactions mapped to the price item defined in the application
- Rate schedules, rate versions, and rate components defined in the application
- Tiering criteria defined in the application
- Tiering setup for the rate components defined in the application
- Pricing eligibility defined in the application

- Parameters associated with the price item (in case you want to define price item pricing based on multiple parameters)

### **Procedure**

To define pricing for a price item:

- Do either of the following:

<b>If you want to...</b>	<b>Then...</b>
Define pricing for a price item that you want assign to a customer	<ol style="list-style-type: none"> <li>Access the <b>Pricing (Person)</b> screen.</li> <li>Search for the price item that you want to assign to the customer.</li> <li>In the <b>Search Results</b> section, click the <b>Assign</b>  icon in the <b>Assign</b> column corresponding to the price item that you want to assign to the customer.</li> </ol>
Define pricing for a price item that you want assign to an account	<ol style="list-style-type: none"> <li>Access the <b>Pricing (Account)</b> screen.</li> <li>Search for the price item that you want to assign to the account.</li> <li>In the <b>Search Results</b> section, click the <b>Assign</b>  icon in the <b>Assign</b> column corresponding to the price item that you want to assign to the account.</li> </ol>
Define pricing for a price item that you want assign to a price list	<ol style="list-style-type: none"> <li>Access the <b>Price list Price Item Pricing</b> screen.</li> <li>Search for the price item that you want to assign to the price list.</li> <li>In the <b>Search Results</b> section, click the link in the <b>Price Item</b> column corresponding to the price item that you want to assign to the price list.</li> </ol>

The **Price Item Pricing** screen appears.

- Enter the transaction feed management information that you want to map to the price item pricing.
- Enter the date from when the price item pricing is effective in the **Effective Start Date** field.
- Select the currency, in which you want to define the pricing, from the **Pricing Currency** list.
- Enter the rate schedule that you want to use while defining price item pricing.
  - Parameter details segment is displayed in the **Price Item and Parameter Information** section.

**Note:** You can specify multiple parameter codes associated with the price items, search for a price item parameters using the **Search**  icon corresponding to the **Parameter** field.

- A section appears at the bottom of the screen.

**Note:** You can search for a rate schedule by clicking the **Search** (🔍) icon corresponding to the field.

6. Select the type of price assignment from the respective field.
7. Select **All Customers** or **New Customers** from the **Apply To** list depending on whether you want to apply the price item pricing to all customers or only to the new customers.
8. Select **Pricing Frequency** and **Advance Pricing** (this field would be displayed only if additionally **Price Assignment Type** is **Post Processing**). These fields are applicable for price item value as **Pricing Only** and **Price Item Type** value as **Fees**.
9. The section at the bottom of the screen contains rate components of the rate schedule on the left hand side and the eligibility and tiering ranges per price component on the right hand side.
10. Rate is used to specify the price for the price item.
11. You can expand details to add tiering criteria and pricing eligibility criteria by clicking the **Add** (📄+) icon corresponding to the **Eligibility tier Details** field.
12. If price component is for **Flat Rate** then **Pricing Eligibility Criteria** details are displayed and if price component is for **Step Tiering** or **Threshold Tiering** then **Pricing Eligibility Criteria** and **Tiering Criteria** details are displayed.
13. In the **Pricing Eligibility Criteria** section, you can enter price component details to following mandatory fields:
  - a) You can specify relational **Operator** to define relation between **LHS Parameter Code** and **RHS Parameter Code**.
  - b) You can select the type of pricing eligibility for **RHS Parameter Value Type**.
  - c) Select the values from **Is True**, **Is False** and **Is Insufficient** that indicates what should happen when the condition is true, false or insufficient.
14. To add more than one **Pricing Eligibility Criteria**, click the **Add** (+) icon and to delete the pricing eligibility click the **Delete** (🗑️) icon corresponding to the **Sequence Number**.
15. In the **Tiering Criteria** section, you can enter price component details to the following mandatory fields:
  - a) Select the **Tiering Criterion** from the list.
  - b) If you want to define tiering range based on some other price item or bundle's usage, enter the price item or bundle code in the **Price Item** field

**Note:** You can search for a price item by clicking the **Search** (🔍) icon corresponding to the **Price item** field.

- c) You can define the price item pricing based on multiple parameters, select the parameters using the **Search** (🔍) icon corresponding to the **Price Item Parameters** field.
  - d) To add more than one **Price Item Parameters**, click the **Add** (+) icon and to delete the price item parameters click the **Delete** (🗑️) icon corresponding to the **Parameter** field.
  - e) Enter the lower and upper limits of the tiering range in the **From** and **To** fields.
16. To add more than one **Price Component Details**, click the **Add** (+) icon and repeat the steps from 9 to 14. To delete the details of price component click the **Delete** (🗑️) icon corresponding to the **Price Component Sequence** field.
  17. Define characteristics for the price assignment, if required.
  18. Click **Save**.  
The pricing is defined for the price item.

**Note:** A bundle cannot be assigned if its child price items are already assigned to a price list, customer, or an account, and vice versa, in the same date range.

In the <b>Search Results</b> section, click the link in the <b>Pricing Information</b> column corresponding to the price item whose pricing details you want to view. The <b>Price Item Pricing</b> screen appears.</li> </ol>

If you want to define...	Then...
	<p><b>Tip:</b> Alternatively, you can access the <b>Price Item Pricing</b> screen by:</p> <ol style="list-style-type: none"> <li>1. Search for a price item in the <b>Search Price Item or Price Item Pricing</b> zone.</li> <li>2. In the <b>Search Results</b> section, click the <b>Assign</b> () icon corresponding to the price item.</li> <li>3. Enter the required details in the <b>Price Item Pricing</b> screen and click <b>Save</b>.</li> <li>4. The <b>Price Item Pricing</b> screen appears.</li> </ol>

2. Click the **Add Price Component** button in the **Add Price Component** of **Rate Components** zone.

The **Price Component** screen appears. It contains the following fields:

Field Name	Field Description
Pricing Information	Displays the concatenated string consisting of pricing information and pricing ID which are separated by a colon (:) for an account, person or price list.
Rate Component Information	Displays a comma-separated string which consists of the following: <ul style="list-style-type: none"> <li>• Rate Component Sequence</li> <li>• Tiering Type of the Rate Component</li> </ul>

In addition, this screen contains the following sections:

- **Main** – Used to specify the basic details about the price component.
- **Tiering Criteria** – Used to specify the details of tiering criterions that are used in the tiering range.
- **Pricing Eligibility Criteria** – Used to specify the details of parameters used while defining the pricing eligibility criteria.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Sequence	Used to indicate the sequence in which price component should be considered.	Yes
Show Price Component	Used to indicate whether the price component should appear or not.	Yes
Description	Used to specify the description of the price component.	Yes
Rate Value	Used to indicate the rate defined for the price component.	Yes

**Tip:** Alternatively, you can access the **Price Component** screen by clicking the **Add** link to the right hand side corner of the **Price Components** zone.

3. Enter the required details in the **Main** section.

4. Define tiering criteria for a price component.
5. Define pricing eligibility criteria for a price component.
6. Click **Save**.

The price component is defined for a rate component.

## Defining a Tiering Criteria for a Price Component

### Prerequisites

To define a tiering criteria for a price component, you should have:

- Tiering criteria defined in the application
- Tiering setup for the rate components defined in the application.

### Procedure

To define a tiering criteria for a price component:

1. Click the **Add** link the right hand side corner of the **Tiering Criteria** zone.

#### **Note:**

The **Tiering Criteria** zone appears only when **Tiering Type** for the rate component is **STEP** or **Threshold**.

The **Price Component** screen appears. It contains the following fields:

Field Name	Field Description
Pricing Information	Displays the concatenated string consisting of pricing information and pricing ID which are separated by a colon (:) for an account, person or price list.

Field Name	Field Description
Rate Component Information	Displays a comma-separated string which consists of the following: <ul style="list-style-type: none"> <li>Rate Component Sequence</li> <li>Tiering Type of the Rate Component</li> </ul>

In addition, this screen contains the following sections:

- Main** – Used to specify the basic details about the price component.

This section contains the following fields:

Field Name	Field Description
Sequence	Indicates the sequence in which price component should be considered.
Show Price Component	Indicates that the price component will appear or not.
Description	Displays the description of the price component.
Rate Value	Indicates the rate defined for the price component.

- Tiering Criteria** – Used to specify the details of tiering criterions that are used in the tiering range.

This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Sequence	Used to indicate the sequence in which tiering criteria should be considered.	Yes
Tiering Criterion	Used to select the tiering criterion which is used in the tiering range.	Yes
Lower Limit	Used to specify the lower limit of the pricing range.  <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> The system provides you with the facility to specify the lower limit value with a precision of up to 18 places before decimal and 18 places after decimal. This gives you the flexibility to specify very large and very low values in the tiering range.</p> </div>	Yes
Upper Limit	Used to specify the upper limit of the pricing range.  <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> The system provides you with the facility to specify the upper limit value with a precision of up to 18 places before decimal and 18 places after decimal. This gives you the flexibility to specify very large and very low values in the tiering range.  When you define single tier with the maximum value as blank (for example, 0 to BLANK), the system will automatically replace the blank space with 9999999999999999.99.</p> </div>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Price Item	Used to Indicate whether the price item or price item bundle's total usage is considered for determining the rate. By default, the price item code for which you are defining the pricing appears in this field. You can specify any other price item or bundle code, if required.  <b>Note:</b> The <b>Search</b> (  ) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Price Item Search</b> screen appears.	Yes
Price Item Parameters	Used to specify the parameters based on which price item or bundle's total usage should be considered for determining the rate. By default, the parameters based on which you are defining the pricing appear in this field. You can specify any other parameters (where the <b>Pricing</b> flag is set to <b>Yes</b> ), if required. However, note that you can only select parameters associated with the price item or bundle which is used for defining the tiering criteria.  <b>Note:</b> This field appears only when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>True</b> .  The <b>Edit</b> (  ) appears corresponding to this field. On clicking the <b>Edit</b> icon, the <b>Parameters Search</b> screen appears.	No

- Enter the required details in the **Tiering Criteria** section.
- If you want to define more than one tiering criteria for the price component, click the **Add** () icon and then repeat step 2.

**Note:** However, if you want to remove a tiering criteria from the price component, click the **Delete** () icon corresponding to the tiering criterion.

- Click **Save**.

The tiering criteria is defined for the price component.

## Defining a Pricing Eligibility Criteria for a Price Component

### Prerequisites

To define a pricing eligibility criteria for a price component, you should have:

- Pricing eligibility defined in the application

### Procedure

To define a pricing eligibility criteria for a price component:

1. Click the **Add** link the right hand side corner of the **Pricing Eligibility Criteria** zone.

#### **Note:**

The **Pricing Eligibility Criteria** zone appears only when eligibility checkbox is selected in the **Price Item Pricing** screen and details for pricing eligibility criteria is added in the **Price Component** screen.

The **Price Component** screen appears. It contains the following fields:

Field Name	Field Description
Pricing Information	Displays the concatenated string consisting of pricing information and pricing ID which are separated by a colon (:) for an account, person or price list.
Rate Component Information	Displays a comma-separated string which consists of the following: <ul style="list-style-type: none"> <li>• Rate Component Sequence</li> <li>• Tiering Type of the Rate Component</li> </ul>

In addition, this screen contains the following sections:

- **Main** – Used to specify the basic details about the price component.

This section contains the following fields:

Field Name	Field Description
Sequence	Indicates the sequence in which price component should be considered.
Show Price Component	Indicates that the price component will appear or not.
Description	Displays the description of the price component.
Rate Value	Indicates the rate defined for the price component.

- **Pricing Eligibility Criteria** – Used to specify the details of parameters used in the pricing eligibility criteria.

This section contains the following fields:

Column Name	Column Description	Mandatory (Yes or No)
Sequence	Used to indicate the order in which the criteria should be executed in the rule.	Yes
Parameter	<p>Used to indicate the left hand side parameter which you want to use along with the price item for price determination.</p> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>This field appears only when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARAM_FLG)</b> feature configuration is set to <b>True</b>.</p> <p>The <b>Search</b> () icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Price Item Search</b> screen appears.</p> <p>You must not specify any special character except underscore (_) in the parameter code. Otherwise, the status of the transaction is changed to <b>Error (ERROR)</b>.</p> </div>	Yes
Operator	<p>Used to specify the relational operator to define the relation between the left hand side and right hand side parameters code. The valid values are:</p> <ul style="list-style-type: none"> <li>• &lt;</li> <li>• &lt;=</li> <li>• &lt;&gt;</li> <li>• =</li> <li>• &gt;</li> <li>• &gt;=</li> <li>• Algorithm</li> <li>• Between</li> <li>• In</li> <li>• Like</li> </ul>	Yes
Parameter Value Type	<p>Used to indicate the type of pricing eligibility. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Parameter</b> – Used to indicate the type of parameter.</li> <li>• <b>Value</b> – Used to indicate the type of value.</li> </ul>	Yes

Column Name	Column Description	Mandatory (Yes or No)
Parameter Value	<p>When the <b>Parameter</b> option is selected for the <b>Parameter Value Type</b> field then it is used to specify the right hand side parameter which you want to use along with the price item for price determination. When the <b>Value</b> option is selected for the <b>Parameter Value Type</b> field then it is used to specify the parameter value.</p> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>This field appears only when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARAM_FLG)</b> feature configuration is set to <b>True</b>.</p> <p>The <b>Search</b> () icon appears corresponding to this field only when the <b>Parameter</b> option is selected for <b>Parameter Value Type</b> field. On clicking the <b>Search</b> icon, the <b>Price Item Search</b> screen appears.</p> <p>When the <b>Parameter</b> option is selected for the <b>Parameter Value Type</b> field then you must not specify any special character except underscore (_) in the parameter code. Otherwise, the status of the transaction is changed to <b>Error (ERROR)</b>.</p> <p>When the <b>Value</b> option is selected for the <b>Parameter Value Type</b> field then you can specify any special characters except ampersand (&amp;), comma (,), underscore (_), equal to (=), tilde (~), and semi-colon (;) in the parameter value.</p> </div>	Yes
Is True	<p>Used to indicate what should happen when the condition is true (satisfied). The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Check Next Condition</b> – Used to indicate that the condition with consecutive sequence number should be executed.</li> <li>• <b>Rule Is False</b> – Used to indicate that the action specified in the <b>Rule False Action</b> field should be executed.</li> <li>• <b>Rule Is True</b> – Used to indicate that the action specified in the <b>Rule True Action</b> field should be executed.</li> </ul>	Yes

Column Name	Column Description	Mandatory (Yes or No)
Is False	Used to indicate what should happen when the condition is false (not satisfied). The valid values are: <ul style="list-style-type: none"> <li>• <b>Check Next Condition</b> – Used to indicate that the condition with consecutive sequence number should be executed.</li> <li>• <b>Rule Is False</b> – Used to indicate that the action specified in the <b>Rule False Action</b> field should be executed.</li> <li>• <b>Rule Is True</b> – Used to indicate that the action specified in the <b>Rule True Action</b> field should be executed.</li> </ul>	Yes
Is Insufficient	Used to indicate what should happen when the data is insufficient. The valid values are: <ul style="list-style-type: none"> <li>• <b>Check Next Condition</b> – Used to indicate that the condition with consecutive sequence number should be executed.</li> <li>• <b>Rule Is False</b> – Used to indicate that the action specified in the <b>Rule False Action</b> field should be executed.</li> <li>• <b>Rule Is True</b> – Used to indicate that the action specified in the <b>Rule True Action</b> field should be executed.</li> </ul>	Yes

- Enter the required details in the **Pricing Eligibility Criteria** section.
- If you want to define more than one pricing eligibility criteria for the price component, click the **Add (+)** icon and then repeat step 2.

**Note:** However, if you want to remove a pricing eligibility criteria from the price component, click the **Delete (🗑)** icon corresponding to the parameter.

- Click **Save**.

The pricing eligibility criteria is defined for the price component.

Price components of Price Item Pricing assigned to a price list	<ol style="list-style-type: none"> <li>1. Search for the price list in the <b>Price List</b> screen.</li> <li>2. In the <b>Search Results</b> section, click the <b>Price List Pricing</b> () icon corresponding to the price list whose <i>details</i> you want to view. The <b>Price List Price Item Pricing</b> screen appears.</li> <li>3. Price items assigned to the price list appears in the <b>Price List Price Items</b> zone.</li> <li>4. In the <b>Search Results</b> section, click the link in the <b>Pricing Information</b> column corresponding to the price item whose pricing details you want to view. The <b>Price Item Pricing</b> screen appears.</li> </ol>

If you want to edit the tiering criteria of.....	Then...
	<p><b>Tip:</b> Alternatively, you can access the <b>Price Item Pricing</b> screen by:</p> <ol style="list-style-type: none"> <li>1. Search for a price item in the <b>Search Price Item or Price Item Pricing</b> zone.</li> <li>2. In the <b>Search Results</b> section, click the <b>Assign</b> () icon corresponding to the price item.</li> <li>3. Enter the required details in the <b>Price Item Pricing</b> screen and click <b>Save</b>.</li> <li>4. The <b>Price Item Pricing</b> screen appears.</li> </ol>

2. In the **Rate Components** zone, click the **Broadcast** () icon corresponding to the rate component, the **Price Components** zone appears with the details of the price components for the respective rate component.
3. In the **Price Components** zone, click the **Broadcast** () icon corresponding to the price component, the **Tiering Criteria** zone appears with the details of tiering criterions that are used in the tiering range.

**Note:**

The **Tiering Criteria** zone appears only when **Tiering Type** for the rate component is **STEP** or **Threshold**.

4. Click the **Edit** () icon in the **Edit** column corresponding to the tiering criteria whose details you want to edit for the price component.

The **Price Component** screen appears. It contains the following fields:

Field Name	Field Description
Pricing Information	Displays the concatenated string consisting of pricing information and pricing ID which are separated by a colon (:) for an account, person or price list.
Rate Component Information	Displays a comma-separated string which consists of the following: <ul style="list-style-type: none"> <li>• Rate Component Sequence</li> <li>• Tiering Type of the Rate Component</li> </ul>

In addition, this screen contains the following sections:

- **Main** – Used to specify the basic details about the price component.

This section contains the following fields:

Field Name	Field Description
Sequence	Indicates the sequence in which price component should be considered.
Show Price Component	Indicates that the price component will appear or not.
Description	Displays the description of the price component.
Rate Value	Indicates the rate defined for the price component.

- **Tiering Criteria** – Used to specify the details of tiering criteria that are used in the tiering range.

This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Sequence	Used to indicate the sequence in which tiering criteria is to be considered.	Yes
Tiering Criterion	Used to select the tiering criterion which is used in the tiering range.	Yes
Lower Limit	Used to specify the lower limit of the pricing range.  <b>Note:</b> The system provides you with the facility to specify the lower limit value with a precision of up to 18 places before decimal and 18 places after decimal. This gives you the flexibility to specify very large and very low values in the tiering range.	Yes
Upper Limit	Used to specify the upper limit of the pricing range.  <b>Note:</b> The system provides you with the facility to specify the upper limit value with a precision of up to 18 places before decimal and 18 places after decimal. This gives you the flexibility to specify very large and very low values in the tiering range.  When you define single tier with the maximum value as blank (for example, 0 to BLANK), the system will automatically replace the blank space with 9999999999999999.99.	Yes
Price Item	Used to Indicate whether the price item or price item bundle's total usage is considered for determining the rate. By default, the price item code for which you defined the pricing appears in this field. You can specify any other price item or bundle code, if required.  <b>Note:</b> The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Price Item Search</b> screen appears.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Price Item Parameters	<p>Used to specify the parameters based on which price item or bundle's total usage should be considered for determining the rate. By default, the parameters based on which you are defining the pricing appear in this field. You can specify any other parameters (where the <b>Pricing</b> flag is set to <b>Yes</b>), if required. However, note that you can only select parameters associated with the price item or bundle which is used for defining the tiering criteria.</p> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>This field appears only when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>True</b>.</p> <p>The <b>Edit</b> () appears corresponding to this field. On clicking the <b>Edit</b> icon, the <b>Parameters Search</b> screen appears.</p> </div>	No

5. Modify the tiering criteria for a price component.

6. Click **Save**.

The tiering criteria is edited for a price component.

The **Price Item Pricing** screen appears.

2. Modify the required pricing details.

**Note:**

If you change the effective start and end dates while editing a price item pricing, you need to specify the parameters which are effective during that date range.

You can search for parameter, rate schedule by clicking the **Search** () icon corresponding to the respective fields.

3. Edit the TFM Information in a price item pricing, if required.

4. Edit the characteristics for a price item pricing, if required.
5. Edit the parameters for a price item pricing, if required.
6. Edit the price assignment, if required.
7. Click **Save**.

**Note:**

If any value other than **Status** and **End Date** is updated then the price item pricing for the price item is end with **End Date** updated as (today's date -1) and a new price item pricing is generated for the price item with new price item pricing ID and start date as today's date.

The **Edit Price Components** button appears only when you are editing a price assignment which is in the **Active**, **Proposed**, or **Template** status and which is not past dated; If the approval workflow is on, then the **Edit Price Components** button appears when you are editing a proposed and template price assignment which is already approved.

When the price assignment is in **Draft** status and,

- When the approval workflow is on and is in **Draft** status then it is changed to **Pending in Approval**.

When the price assignment is in **Draft** status and,

- When the approval workflow is off and is in **Draft** status then it is changed to **Active**.

The changes made to the price item pricing are saved.

## Submitting a Price Item Pricing

### Procedure

To submit pricing for a price item:

1. Do either of the following:

If you want to...	Then...
Submit pricing of a price item that is assigned to a person	<ol style="list-style-type: none"> <li>1. Search for the person in the <b>Customer 360° View</b> screen.</li> <li>2. In the <b>Search Results</b> section, click the <b>Show Context Menu</b> () icon corresponding to the person whose <i>details</i> you want to view. A menu appears.</li> <li>3. Click the <b>Go To Effective Pricing</b> menu option. The <b>Pricing (Person)</b> screen appears.</li> <li>4. Price assignments effective for the person appears in the <b>Effective Price Assignments for Person</b> zone.</li> <li>5. In the <b>Search Results</b> section, click the link in the <b>Pricing Information</b> column corresponding to the price item whose pricing details you want to view. The <b>Price Item Pricing</b> screen appears.</li> </ol> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Tip:</b> Alternatively, you can access the <b>Price Item Pricing</b> screen by:</p> <ol style="list-style-type: none"> <li>1. Search for a price item in the <b>Search Price Item or Price Item Pricing</b> zone.</li> <li>2. In the <b>Search Results</b> section, click the <b>Assign</b> () icon corresponding to the price item.</li> <li>3. Enter the required details in the <b>Price Item Pricing</b> screen and click <b>Save</b>.</li> <li>4. The <b>Price Item Pricing</b> screen appears.</li> </ol> </div>

## Overriding a Price Item Pricing

### Prerequisites

To override a price item pricing, you should have:

- Transactions mapped to the price item defined in the application
- Rate schedules, rate versions, rate components defined in the application
- Tiering criteria defined in the application
- Tiering setup for the rate components defined in the application
- Pricing eligibility defined in the application
- Parameters associated with the price item (in case you want to define price item pricing based on multiple parameters)

### Procedure

To override a price item pricing:

1. Do either of the following:

If you want to...	Then...
Override price item pricing assigned to the customer either directly or through the customer hierarchy or price list	<ol style="list-style-type: none"> <li>1. Access the <b>Pricing (Person)</b> screen.</li> <li>2. In the <b>Effective Price Assignment</b> zone, click the <b>Override</b>  icon in the <b>Override</b> column corresponding to the price item pricing that you want to override.</li> </ol>
Override price item pricing assigned to the account either directly or through the customer hierarchy or price list	<ol style="list-style-type: none"> <li>1. Access the <b>Pricing (Account)</b> screen.</li> <li>2. In the <b>Effective Price Assignment</b> zone, click the <b>Override</b>  icon in the <b>Override</b> column corresponding to the price item pricing that you want to override.</li> </ol>

The **Price Item Pricing** screen appears.

2. Modify the required pricing details.

#### Note:

If you change the effective start and end dates while overriding a price item pricing, you need to specify the parameters which are effective during that date range.

While overriding a price item pricing, you can not only edit the existing tiering combination details, but also add additional tiering combinations until the maximum tiering combinations limit is met.

3. Modify the price assignment characteristics, if required.
4. Click **Save**.

The price item pricing is overridden.

## Editing the Two-Dimensional Pricing

### Procedure

To edit a two-dimensional pricing:

1. Search for the account in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **Show Context Menu** () icon corresponding to the account whose details you want to view.

A menu appears.

3. Click the **Go To Effective Pricing** menu option.

The **Pricing (Person)** screen appears.

4. Search for the price item pricing in the **Search Price Item or Price Item Pricing** screen.

5. Click the **Assign** icon () corresponding to the **Price Item Information**.

The **Price Item Pricing** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Start Date	Displays the date from when the price item pricing is effective.	Yes
End Date	Displays the date till when the price item pricing is effective.	No
Rate Schedule	Indicates the rate schedule used while defining price item pricing.  <b>Note:</b> It has a link. On clicking the link, the <b>Rate Schedule</b> screen appears where you can view the details of the rate schedule.	Yes
Print Zero	Indicates the zero pricing displayed in the bill. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	Yes
Pricing Currency	Indicates the currency in which the price item pricing is defined.  <b>Note:</b> It has a link. On clicking the link, the <b>Currency</b> screen appears where you can view the details of the currency.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Pricing Status	Indicates the status of the price assignment. The valid values are: <ul style="list-style-type: none"> <li>• Draft</li> <li>• Active</li> <li>• Inactive</li> <li>• Proposed</li> <li>• Rejected</li> <li>• Template</li> </ul>	Yes
Price Assignment Type	Indicates the type of price assignment. The valid values are: <ul style="list-style-type: none"> <li>• Regular</li> <li>• Post Processing</li> <li>• Post Processing – Invoice Based</li> <li>• Post Processing – Price Item Based</li> </ul>	Yes
Pricing Eligibility	Displays the pricing eligibility criteria for price item pricing.	Yes
Pricing Rule Type	Indicates the pricing rule type. The valid value is: <ul style="list-style-type: none"> <li>• Two-Dimensional</li> </ul>	Yes

6. Click **Save**.

The **Price Item Pricing** screen appears.

7. Click the **Edit** link in the top-right of the **Two-Dimensional Pricing** zone.

The **Two-Dimensional Pricing** screen appears. It contains the following fields in a grid:

Field Name	Field Description
Step Criterion	Used to search by the various criterion.
Threshold Parameter	Used to search by the threshold parameter.
Tiering Range	Displays the tiering range of the pricing.

8. Modify the details in the **Two-Dimensional Pricing** screen, if required.

9. If you want to add more than one threshold parameter, click the **Add** (+) icon and then enter the threshold parameter name and its value.

However, if you want to remove a threshold parameter, click the **Delete** (trash) icon corresponding to the parameter.

10. If you want to add more than one tiering range, click the **Add** (+) icon and then enter the specific range.

However, if you want to remove a tiering range, click the **Delete** (trash) icon corresponding to the range that you want to remove.

11. Click **Save**.

The changes made to the two-dimensional pricing are saved.

**Related Topics**

For more information on...	See...
How to search for a price list	<a href="#">Searching for a Price List</a> on page 371

## Pricing Simulation

The **Pricing Simulation** screen allows you to:

- View pricing simulation details for account or price list
- View effective pricing information
- Search simulation details of account or price list

This screen consists of the following zones:

- [Search Pricing](#) on page 572

Through the **Pricing Simulation** screen, you can navigate to the following screens:

- [Price Item \(Used for Viewing\)](#) on page 339
- [Simulation - Effective Pricing Information](#) on page 576

## Search Pricing

The **Search Pricing** zone allows you to search pricing for an account.

In case of bundles, the order in which the price item pricing is listed in this zone is based on the following condition:

- If the system finds pricing for price items that belong to a bundle before finding pricing for the bundle, then the system lists the pricing for price items that belong to the bundle, and not the pricing for the bundle. For example, let say, B0001 is a bundle, and contains C0001 and C0002 price items. If the system finds pricing for B0001, it validates whether the pricing for C0001 and C0002 has already been found. If yes, then the system lists the pricing for C0001 and C0002. If the system does not find pricing for C0001 and C0002 before finding pricing for B0001, it lists the pricing for B0001.

**Note:** If the effective pricing is available for the price item, regular bundle (to which the price item belongs), and parent (regular) bundle (i.e. to which the regular bundle belongs) at the same level, the system lists the pricing depending on the value defined for the **Prefer Price Item Over Bundle** parameter in the price assignment search algorithm. If the value of the **Prefer Price Item Over Bundle** parameter is set to **Y**, the system lists effective pricing which is available for the price item. If the effective pricing is not available for the price item, then the system lists effective pricing which is available for the regular bundle at the same level. If the effective pricing is not available for the regular bundle, then the system lists effective pricing which is available for the parent bundle at the same level. However, if the value of the **Prefer Price Item Over Bundle** parameter is set to **N**, the system lists effective pricing which is available for the parent bundle. If the effective pricing is not available for the parent bundle, then the system lists effective pricing which is available for the regular bundle at the same level. If the effective pricing is not available for the regular bundle, then the system lists effective pricing which is available for the price item at the same level.

This zone contains the following two sections:

- **Search Criteria** — The **Search Criteria** section contains the following two options:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for pricing using price list or account or person details. The valid values are: <ul style="list-style-type: none"> <li>• Price List</li> <li>• Account /Person</li> </ul> <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"><b>Note:</b> By default, <b>Price List</b> option is selected.</div>	Yes
Price List ID	Used to indicate Price List ID for which simulation must be created. <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"><b>Note:</b> This field appears only when the <b>Price List ID</b> option is selected for the <b>Search By</b> field. The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Price List Search</b> screen appears.</div>	Yes
Account ID	Used to specify the account for which simulation must be created. <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"><b>Note:</b> This field appears only when the <b>Account</b> option is selected for the <b>Search By</b> field. The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Account Search</b> screen appears.</div>	Yes
Person ID	Used to specify the person for which simulation must be created. This field gets auto populated once the Account ID value is defined. <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"><b>Note:</b> The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Person Search</b> screen appears.</div>	Yes
Simulation Date	Used to search price simulations which are effective from a particular date onwards.	Yes
Pricing Status	Used to search price assignments with a particular status. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Proposed</li> </ul>	No

Field Name	Field Description	Mandatory (Yes or No)
Search Type	Used to indicate whether you want to search the price list using the following values: <ul style="list-style-type: none"> <li>• Best Fit</li> <li>• Exact Match</li> </ul> <div style="border: 1px solid black; padding: 2px;"> <p><b>Note:</b> By default, <b>Exact Match</b> option is selected.</p> </div>	No
Show Default and Global Pricing	Used to indicate whether the product is assigned to a default and global price list. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	No
Price Item	Used to specify the price items for pricing simulation. <div style="border: 1px solid black; padding: 2px;"> <p><b>Note:</b> The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Price Item Search</b> screen appears.</p> </div>	No
Description	Used to search price assignments of a price item having a particular description.	No
View Type	Used to indicate whether you want to view summary or tiering details of price components. The valid values are: <ul style="list-style-type: none"> <li>• <b>Detail</b> — Used when you want to view the details of price component with pricing eligibility and tiering criteria.</li> <li>• <b>Summary</b> — Used when you want to view the summary of effective price component.</li> </ul>	No
Parameter	Used to specify multiple parameter codes based on which you want to define the pricing. <div style="border: 1px solid black; padding: 2px;"> <p><b>Note:</b> This field appears only when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>True</b>. The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Parameter Search</b> screen appears.</p> </div>	No

Field Name	Field Description	Mandatory (Yes or No)
Parameter Value	<p>Displays the value of the parameter or used to specify multiple parameter value.</p> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>The <b>Search</b>  icon appears corresponding to this field only when the value type for the <b>Parameter</b> is <b>Reference</b> or <b>Predefined</b>.</p> <p>If the value type of the <b>Parameter</b> is <b>Reference</b> then on clicking the <b>Search</b> icon, the <b>Reference Parameter Value Search</b> screen appears.</p> <p>If the value type of the <b>Parameter</b> is <b>Predefined</b> then on clicking the <b>Search</b> icon, the <b>Predefined Parameter Value Search</b> screen appears.</p> </div>	No

To add more than one **Parameter**, click the **Add**  icon and to delete the parameters click the **Delete**  icon corresponding to the **Parameter** field.

- **Search Results** — On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

**Note:** If default Price List ID is added to the Price List Value and if **Yes** is selected for **Show Default and Global Pricing**, also if Price List is added to the product for selected account then **Search Results** section will display price list assignments for the value and product will be displayed along with the default price list assignments.

Column Name	Column Description
Price Item	<p>Displays the price item code.</p> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> It has a link. On clicking the link, the <b>View Price Item</b> screen appears with the details of the respective price item.</p> </div>
Description	Displays the description of the price item.
Variance Parameters	<p>Indicates the variance parameter which is used for defining the price item pricing.</p> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This column appears only when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>False</b>.</p> </div>
Price Item Parameters	<p>Displays a comma-separated list of parameter values. The order in which parameter values appear in this field is controlled by the display order (which is defined while associating a parameter with a price item). A tool tip appears when you hover over this column corresponding to the price item. It indicates the price item parameters and their values used for defining the price item pricing.</p> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This column appears only when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>True</b>.</p> </div>

Column Name	Column Description
Price Assignment Type	Indicates the type of price assignment. The valid values are: <ul style="list-style-type: none"> <li>• Regular</li> <li>• Post Processing</li> <li>• Post Processing — Invoice Based</li> <li>• Post Processing — Price Item Based</li> </ul>
Assignment Level	Indicates the level at which the price item pricing is defined in the customer hierarchy.
Price List Description	Displays the description of the price list. <div style="border: 1px solid black; padding: 5px; margin-top: 5px;"> <b>Note:</b> The description appears only when the pricing assignment type is Account Price List, or Account Inherited Price List. </div>
Rate Description	Displays the description of the tiering setup of the rate component.
Simulate	On clicking the Simulate (🔍) icon, the <b>Simulation — Effective Pricing Information</b> screen appears where you can add the <b>Price Item SQIs</b> and <b>Pricing Eligibility Parameters</b> details that can be passed for pricing simulation. <div style="border: 1px solid black; padding: 5px; margin-top: 5px;"> <b>Note:</b> This column appears only when the price item is <b>Rate</b> and <b>Fees</b>. </div>
Effective Start Date	Displays the date from when the pricing is effective.
Effective End Date	Displays the date till when the pricing is effective.
Pricing Currency	Indicates the currency in which the price item pricing is defined.
Parent Person	Displays the name of the parent or grandparent customer from whom the pricing is inherited.

**Note:**

The number of records that can be displayed in the **Search Results** section of the **Search Pricing** zone is controlled via the **C1\_PR\_REC** feature configuration. You can change the number of records that can be displayed using the **Effective Pricing RecordSet Limit** option type of the **C1\_PR\_REC** feature configuration. For more information, refer to [Setting the C1\\_PR\\_REC Feature Configuration](#) on page 2924.

## Simulation - Effective Pricing Information

The **Simulation — Effective Pricing Information** screen contains the following sections:

- **SQIs** — This section contains the following fields:

Field Name	Field Description
SQI	<p>Used to indicate the SQI that you want to associate with the price item.</p> <p><b>Note:</b></p> <p>If you want to define more than one price item SQI, click the <b>Add</b> (+) icon corresponding to this field.</p> <p>If you want to remove a price item SQI, click the <b>Delete</b> (🗑️) icon corresponding to this field.</p> <p>The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the search icon, the <b>Search for Service Quantity Identifier</b> screen appears.</p> <p>This field is required when you want to view the effective pricing simulation.</p>
Value	<p>Used to indicate the SQI value that you want to associate with the price item.</p> <p><b>Note:</b></p> <p>If you want to define more than one value, click the <b>Add</b> (+) icon corresponding to this field.</p> <p>If you want to remove a price item SQI value, click the <b>Delete</b> (🗑️) icon corresponding to this field.</p>

- **Pricing Eligibility Parameters** — This section contains the following fields:

Field Name	Field Description
Parameter	<p>Used to specify multiple parameter codes based on which you want to define the pricing</p> <p><b>Note:</b></p> <p>This field appears only when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to true.</p> <p>The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the search icon, the <b>Parameter Search</b> screen appears.</p> <p>If you want to define more than one parameter, click the <b>Add</b> (+) icon corresponding to this field.</p> <p>If you want to remove a parameter, click the <b>Delete</b> (🗑️) icon corresponding to this field.</p>

Field Name	Field Description
Parameter Value	<p>Displays the value of the parameter or used to specify multiple parameter value.</p> <p><b>Note:</b></p> <p>The <b>Search</b>  icon appears corresponding to this field appears only when the value type for the <b>Parameter</b> is defined as <b>Reference</b> or <b>Predefined</b>. If the value type of the <b>Parameter</b> is <b>Reference</b>, then the <b>Reference Parameter Value Search</b> screen appears and if the value type of the <b>Parameter</b> is <b>Predefined</b>, then the <b>Predefined Parameter Value Search</b> screen appears.</p> <p>If you want to define more than one value, click the <b>Add</b>  icon corresponding to this field.</p> <p>If you want to remove a parameter value, click the <b>Delete</b>  icon corresponding to this field.</p>

After providing the required information, when you click on **Simulate** button, the **Effective Pricing Information** zone appears where you can view the effective pricing simulation. This zone contains the following sections:

- **Rate Information** — This section contains the following fields:

Field Name	Field Description
Applicable Rate	Displays the rate applicable for which pricing is defined.
Contributing Price Components are	Displays how the price components are contributed.

**Note:** This section appears only when **Price Item Type** is **Rate** .

- **Fee Information** — This section contains the following fields:

Field Name	Field Description
Applicable Fee	Displays the fee applicable for which pricing is defined.
Contributing Price Components are	Displays how the price components are contributed.

**Note:** This section appears only when **Price Item Type** is **Fees** .

- **Price Item and Parameter Information** — This section contains the following fields:

Field Name	Field Description
Price Item	Displays the price item for which pricing is defined.
Description	Displays the description of the price item

The Parameter Information appears only when the **Multi Price Parameter** option type of the **Multi Parameter Based Pricing (C1\_PPARM\_FLG)** feature configuration is set to **True**.

This segment contains the following fields:

Field Name	Field Description
Parameter	Specifies multiple parameter codes associated with the price items based on which pricing is defined.
Parameter Information	Displays the parameter information with concatenated comma separated values.
Parameter Value	Displays the value of the parameter.

- **TFM Information** — This section contains the following fields:

Field Name	Field Description
Ignore Transaction	Displays whether the transactions mapped to the price item is considered for billing.
Aggregation Schedule	Displays the aggregation cycle.
Aggregation Transaction	Specifies whether the transactions mapped to the price item are aggregated for billing.
Rating Criteria	Specifies how and when you rate the transaction legs mapped to the price item.

**Note:** This section appears only when the **Price Item** is available for **Pricing and Billing**.

- **Pricing Information** — This section contains the following fields.

Field Name	Field Description
Effective Start Date	Displays the date from when the price item pricing is effective.
Pricing Currency	Specifies the currency in which you define the price item pricing.
Effective End Date	Displays the date till when the price item pricing is effective.
Pricing Status	Displays the status of price assignment.
Variance Parameter	Specifies the variance based on which price item pricing is defined. <b>Note:</b> This field appears only when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>False</b> .
Rate Schedule	Specifies the rate schedule used for defining price item pricing.
Price Assignment Type	Displays the type of price assignment.
Print Zero	Specifies whether zero pricing should be displayed in the bill.
Apply To	Displays whether the price item pricing is applied to all customers or only to the new customers.
Pricing Frequency	Displays the frequency for pricing where <b>Price Item Type</b> is fees.
Advance Pricing	Displays only if <b>Price Item</b> is defined as <b>Pricing Only</b> , <b>Price Item Type</b> is defined as <b>Fees</b> and <b>Price Assignment Type</b> is defined as <b>Post Processing</b> . The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>

**Pricing Eligibility Criteria** and **Tiering Criteria** for each eligibility or tier range are displayed in following fields:

Field Name	Field Description
Rate Component Sequence	Displays the sequence number of the rate component.
Tiering Type	Displays the tiering type of the rate component.
Price Component Sequence	Specifies the sequence of price component whose rate is used for calculation.
Price Component Description	Displays the description of the rate component.
Rate	Specifies the price for the price item.
Contributing Factor	Displays the availability of contributing factor.
Eligibility/Tier Details	On clicking the <b>Add (+)</b> icon, expandable details of <b>Tiering Criteria</b> and <b>Pricing Eligibility Criteria</b> are displayed.

When you click the **Add (+)** icon, if the price component is scheduled for Flat Rate then, only **Pricing Eligibility Criteria** segment appears. If the price component is scheduled for Step or Threshold then both the segments, **Tiering Criteria** and **Pricing Eligibility Criteria** appears.

**Tiering Criteria** segment contains the following fields:

Field Name	Field Description
Tiering Criteria	Displays the tiering criteria.
Price Item	Specifies whether the price item or bundle's total usage is considered for determining the rate.
Variance Parameter	Specifies the variance based on which price item or bundle's total usage is considered for determining the rate. <b>Note:</b> This field appears only when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>False</b> .
Price Item Parameters	Specifies the parameters based on which price item or bundle's total usage is considered for determining the rate. <b>Note:</b> This field appears only when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>True</b> .
From	Specifies the lower limit of the tiering range.
To	Specify the upper limit of the tiering range.

**Pricing Eligibility Criteria** segment contains the following fields:

Field Name	Field Description
Sequence Number	Specifies the order in which the criteria should be executed in the rule.

Field Name	Field Description
Parameter	Specifies the left hand side parameter which you want to use along with the price item for price determination.  <b>Note:</b> This field appears only when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>True</b> .
Operator	Specifies the relational operator to define the relation between the left hand side and right hand side parameters.
Parameter Value Type	Displays the type of pricing eligibility.
Parameter	Specifies the right hand side parameter which you want to use along with the price item for price determination.  <b>Note:</b> This field appears only when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>True</b> .
Parameter Value	Specifies the parameter value.
Is True	Displays what should happen when the condition is true (satisfied).
Is False	Displays what should happen when the condition is false (not satisfied).
Is Sufficient	Displays what should happen when the data is insufficient.

This section contains the following links:

Link Name	Link Description
Expand All	Used to define all the <b>Tiering Criteria</b> and <b>Pricing Eligibility Criteria</b> segments.
Collapse All	Used to un-define the displayed <b>Tiering Criteria</b> and <b>Pricing Eligibility Criteria</b> segments.
Expand Only Contributing Factors	Used to define only those <b>Tiering Criteria</b> and <b>Pricing Eligibility Criteria</b> segments with contributing factors.

## Searching Pricing Simulation for Account or Price List

### Prerequisites

To search pricing simulation for an account or price list, you should have:

- Price Item, Account or Person details defined in the application

### **Procedure**

To search pricing simulation for an account or price list:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Pricing Management** and then click **Pricing Simulation**.  
The **Pricing Simulation** screen appears.
3. In the **Search Pricing** zone, select **Account** or **Price List** depending on what you want search pricing simulation.
4. Enter the additional search criteria, if required.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search**.

A list of pricing details that meet the search criteria appears in the **Search Results** section.

### **Related Topics**

<b>For more information on...</b>	<b>See...</b>
<b>Pricing Simulation</b> screen	<a href="#">Pricing Simulation</a> on page 572
<b>Search Pricing</b> zone	<a href="#">Search Pricing</a> on page 572

## **Viewing Pricing Simulation**

### **Prerequisites**

To view pricing simulation details of an account, you should have:

- Price items assigned to the account

### **Procedure**

To view pricing simulation of an account:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Pricing Management** and then click **Pricing Simulation**.  
The **Pricing Simulation** screen appears.
3. You can search for an account by entering the search criteria in the **Search Pricing** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

## **Exporting Effective Price Simulation**

### **Procedure**

To export effective price simulation for an account in the CSV format:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Pricing Management** and then click **Pricing Simulation**.  
The **Pricing Simulation** screen appears.
3. You can search for an account by entering the search criteria in the **Search Pricing** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

4. Click the **Export to Excel** link in the **Search Pricing** zone.  
The **File Download** dialog box appears.
5. Click **Save**.  
The **Save As** dialog box appears.
6. Browse to the location where you want to save the file.
7. Enter the file name in the respective field, and click **Save**.  
The search results are exported in CSV format.
8. Open the CSV file in Microsoft Excel.

It contains the following columns:

<b>Column Name</b>	<b>Column Description</b>
Price Item	Displays the price item code.
Description	Displays the description of the price item.

Column Name	Column Description
Variance	Indicates the variance parameter which is used for defining the price item pricing.  <b>Note:</b> This column appears only when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>False</b> .
Price Item Parameters	Indicates the parameters which are used for defining the price item pricing.  <b>Note:</b> This column appears only when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>True</b> .
Price Assignment Type	Indicates the type of price assignment. The valid values are: <ul style="list-style-type: none"> <li>• Regular</li> <li>• Post Processing</li> <li>• Post Processing — Invoice Based</li> <li>• Post Processing — Price Item Based</li> </ul>
Assignment Level	Indicates the level at which the price item pricing is defined in the customer hierarchy.
Price List Description	Displays the description of the price list.  <b>Note:</b> The description appears only when the pricing assignment type is Account Price List, Customer Price List, or Parent Customer Price List.
Rate	Displays the price of the price item. It also indicates whether the price is a Flat, Threshold, or Step price. The price can be agreed pricing, price list pricing, or pricing inherited from the price list hierarchy. If the price is applicable only to new customers, an asterisk (*) symbol appears corresponding to the price.
Price Component Description	Displays the description of the price component whose rate is used for calculation.  <b>Note:</b> The data appears in this column only when the rate corresponding to the price component in the price item pricing is used for calculation.
Effective Start Date	Displays the date from when the pricing assignment is effective.
Effective End Date	Displays the date till when the pricing assignment is effective.
Pricing Currency	Indicates the currency in which the price item pricing is defined.
From	Displays the lower limit of the tiering range.
To	Displays the upper limit of the tiering range.
Price Assignment Usage	Indicates whether the price assignment is applicable to all customers or only to the new customers.
Price Assignment ID	Displays the ID that is generated automatically when the price assignment is done.
Parent Level	Displays the numerical level of the parent in the hierarchy from whom the pricing is inherited.
Price List ID	Displays the price list ID from where the pricing is inherited.
Price List Start Date	Displays the date from when the price list is effective.

Column Name	Column Description
Parent Person	Displays the name of the parent or grandparent customer from whom the pricing is inherited.
Parent Pricelist Level	Indicates the parent level when pricing is inherited from the price list hierarchy. If the pricing is inherited from the assigned price list, the parent price list level will be 0. However, if the pricing is inherited from the parent price list in the hierarchy, the parent price list level will be 1. And, if the pricing is inherited from the grandparent price list in the hierarchy, the parent price list level will be 2, and so on.
Ignore Transaction	Indicates whether the transactions mapped to the price item should be considered for billing. The valid values are: <ul style="list-style-type: none"> <li>• Y</li> <li>• N</li> </ul>
Aggregate Transaction	Indicates whether the transactions mapped to the price item should be aggregated for billing. The valid values are: <ul style="list-style-type: none"> <li>• Y</li> <li>• N</li> </ul>
Aggregation Schedule	Indicates the aggregation cycle.
Tiering Criterion	Indicates the tiering criterion.
Tiering Price Item	Indicates whether the price item is billed individually or at the bundle level.

## Eligible Price List

---

The **Eligible Price List** screen allows you to:

- View eligible price list details for account or person
- View pricing simulation details of account or person

This screen consists of the following zones:

- [Search Eligible Price Lists](#) on page 585
- [Pricing Simulation](#) on page 572

### Search Eligible Price Lists

The **Search Eligible Price List** zone allows you to search eligible price list for account and person. This zone contains the following two sections:

- **Search Criteria** — The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Eligible Date	Used to specify the date on which the eligibility check need to be searched.	Yes
Person ID	Used to specify the person for which eligible price list to be searched.  <b>Note:</b> The Search (🔍) icon appears corresponding to this field. On clicking the icon, the <b>Person Search</b> screen appears.	No
Account ID	Used to specify the account for which eligible price list to be searched.  <b>Note:</b> The Search (🔍) icon appears corresponding to this field. On clicking the icon, the <b>Account Search</b> screen appears.	No
Status	Used to search eligible price list based on status.	Yes
Division	Used to search eligible price list based on division.	Yes
Parameter	Used to specify multiple parameter codes based on which you want to define the pricing.  <b>Note:</b> This field appears only when the <b>MultiPrice Parameter</b> option type of the <b>MultiParameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to True.  The Search (🔍) icon appears corresponding to this field. On clicking the icon, the <b>Parameter Search</b> screen appears.	No
Parameter Value	Displays the value of the parameter or used to specify multiple parameter value.  <b>Note:</b> The Search (🔍) icon appears corresponding to this field only when the value type for the <b>Parameter</b> is defined as <b>Reference</b> or <b>Predefined</b> . If the value type of the <b>Parameter</b> is <b>Reference</b> then on clicking the search icon, the <b>Reference Parameter Value Search</b> screen appears else if the value type of the <b>Parameter</b> is <b>Predefined</b> then on clicking the search icon, the <b>Predefined Parameter Value Search</b> screen appears.	No

**Note:** To add more than one **Parameter**, click the add (+) icon and to delete the parameters click the delete (🗑️) icon corresponding to this field.

- **Search Results** — On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Price List ID	Displays the price list ID. <b>Note:</b> It has a link. On clicking the link, the <b>Price List Price Item Assignments</b> screen appears where you can view the details of the respective price list.
Price List Description	Displays the price list description. <b>Note:</b> It has a link. On clicking the link, the <b>Price List Price Item Assignments</b> screen appears where you can view the details of the respective price list.
Status	Indicates the status of the price list. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Proposed</li> </ul>
Availability Start Date	Used to search price lists which are available for assignment from a particular date.
Availability End Date	Used to search price lists which are available for assignment till a particular date.
Effective Start Date	Used to search price lists which are effective from a particular date.
Effective End Date	Used to search price lists which are effective till a particular date.
Simulate	On clicking the <b>Simulate</b> (🔍) icon, the <b>Pricing Simulation Screen</b> appears with the price list ID, account and person fields prepopulated.

## Rate Definition

Rate schedules, rate versions, and rate components are used to define the formulas to calculate the total amount charged to a customer for a product. Some examples of formulas are: price times the number of transactions used and a flat monthly charge plus a percentage of the average daily balance.

The rate is a formula with variables whose values are supplied by a user by setting up a price list or override price. For example, a rate might add a flat monthly charge and a percentage of the average daily balance to arrive at the amount charged to the customer. This rate might be used to calculate the charge for multiple products, each product with its own flat amount and percentage. So, these two factors are defined as variables whose values must be entered by users when they setup price list or override price. In Oracle Revenue Management and Billing (ORMB), these variables are defined as rate components.

The system provides you with the ability to create tiered pricing in case standard flat pricing is not sufficient to meet the business needs. The **Rate Definition** screen allows you to indicate whether the rate component supports standard

flat pricing or tiered pricing. It allows you to define, edit, and delete the tiering setup of a rate component. This screen consists of the following zones:

- [Rate Schedule Components](#) on page 588
- [Create/Edit Rate Definition](#) on page 589

## Rate Schedule Components

The **Rate Schedule Components** zone allows you to select the rate schedule whose rate components' tiering setup you want to define or edit. This zone contains the following two sections:

- **Search Criteria** — The **Search Criteria** section contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Rate Schedule	Used to select the rate schedule.	Yes

- **Search Results** — On clicking the **Search** button, the rate components of the rate schedule appear in the search results. The **Search Results** section contains the following columns:

Column Name	Column Description
Rate Schedule	Displays the rate schedule.
Rate Component Sequence	Displays the sequence number of the rate component.
Rate Component Description	Displays the description of the rate component.
Effective Start Date	Displays the date from when the rate version to which the rate component belongs is effective.
Tiering Type	Displays the tiering type.
Maximum Tiering Combinations	Displays the maximum number of tiering ranges supported by the rate component.  <b>Note:</b> Each tiering range supports more than one tiering criteria. For example, a rate component supports tiering based on two different criteria such as transaction volumes from a bundle and balances of the priced product. In such case, for a single rate, it is possible to enter separate tiering range information for each criterion and vary this information by product.
Rate Component Map Description	Displays the description of the tiering setup of the rate component.
Action	Indicates the action that can be performed on the rate component. The valid values are: <ul style="list-style-type: none"> <li>• <b>Add</b> — Allows you to define the tiering setup of the rate component</li> <li>• <b>Edit</b> — Allows you to edit the tiering setup of the rate component</li> </ul>
Rate Component Map ID	Displays the rate component map ID.  <b>Note:</b> This ID is generated automatically when you define the tiering setup of the rate component.

On clicking the **Broadcast**  icon corresponding to the rate component, the **Create/Edit Rate Definition** zone appears with the details of the respective rate component.

How to delete tiering setup of a rate component	<a href="#">Deleting Tiering Setup of a Rate Component</a> on page 592

**Create/Edit Rate Definition**

The **Create/Edit Rate Definition** zone allows you to define and edit tiering setup of the rate component. This zone contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Rate Schedule	Displays the code of the rate schedule.	Not applicable
Rate Component Description	Displays the description of the rate component.	Not applicable
Effective Start Date	Displays the date from when the rate version to which the rate component belongs is effective.	Not applicable
Rate Component Sequence	Displays the sequence number of the rate component.	Not applicable
Tiering Type	Used to specify the tiering type. The valid values are: <ul style="list-style-type: none"> <li>• FLAT</li> <li>• STEP</li> <li>• THRESHOLD</li> </ul> <div style="border: 1px solid black; padding: 5px; margin-top: 5px;"> <b>Note:</b> This field is non-editable when you edit the tiering setup of the rate component. </div>	Yes
Maximum Tiering Combinations	Used to specify the maximum number of tiering ranges supported by the rate component. <div style="border: 1px solid black; padding: 5px; margin-top: 5px;"> <b>Note:</b>  This field is non-editable when you: <ul style="list-style-type: none"> <li>• Select the tiering type as <b>FLAT</b> or <b>STEP</b></li> <li>• Edit the tiering setup of the rate component</li> </ul> By default, <b>0</b> appears in this field when you select the tiering type as <b>FLAT</b>, and <b>1</b> appears when you select the tiering type as <b>STEP</b>. </div>	Yes
Rate Component Map Description	Used to specify the description for the tiering setup of the rate component. For example, if you want the user to enter price per transaction for a tiering range, enter <b>Price Per Transaction</b> in the <b>Rate Component Map Description</b> field.	Yes

This zone contains the following buttons:

Button Name	Button Description (When the Action is Add)	Button Description (When the Action is Edit)
Save	Used to create the tiering setup.	Used to save the changes made in this zone.
Delete	<b>Note:</b> This button is disabled when you define the tiering setup of the rate component.	Used to delete the tiering setup of the rate component.  <b>Note:</b> You can delete the tiering setup only when the rate component is not yet used for any product pricing.
Cancel	Used to clear the fields in this zone.	Used to reset the changes made in this zone.

### Related Topics

For more information on...	See...
How to define tiering setup of a rate component	<a href="#">Defining Tiering Setup of a Rate Component</a> on page 590
How to edit tiering setup of a rate component	<a href="#">Editing Tiering Setup of a Rate Component</a> on page 591
How to delete tiering setup of a rate component	<a href="#">Deleting Tiering Setup of a Rate Component</a> on page 592

## Defining Tiering Setup of a Rate Component

### Prerequisites

To define tiering setup of a rate component, you should have:

- Rate schedules defined in the application
- Rate components of the rate schedule defined in the application

### Procedure

To define tiering setup of a rate component:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Pricing Management** and then click **Rate Definition**.  
The **Rate Definition** screen appears.
3. Select the rate schedule in the **Rate Schedule Components** zone.
4. Click **Search**.  
The rate components of the rate schedule appear as the search results.
5. Click the **Broadcast**  icon corresponding to the rate component whose tiering setup you want to define.  
The **Create/Edit Rate Definition** zone appears.
6. Select the tiering type from the list.
7. Enter the maximum number of tiering ranges supported by the rate component.

#### Note:

The **Maximum Tiering Combinations** field is non-editable when you select the tiering type as **FLAT** or **STEP**. By default, **0** appears in the **Maximum Tiering Combinations** field when you select the tiering type as **FLAT**, and **1** appears when you select the tiering type as **STEP**.

- Enter the description for the tiering setup of the rate component.

For example, if you want the user to enter price per transaction for a tiering range, enter `Price Per Transaction` in the **Rate Component Map Description** field.

- Click **Save**.

The rate component map ID is generated automatically when you define the tiering setup of the rate component.

### Related Topics

For more information on...	See...
<b>Rate Definition</b> screen	<a href="#">Rate Definition</a> on page 587
<b>Rate Schedule Components</b> zone	<a href="#">Rate Schedule Components</a> on page 588
<b>Create/Edit Rate Definition</b> zone	<a href="#">Create/Edit Rate Definition</a> on page 589

## Editing Tiering Setup of a Rate Component

### Procedure

To edit tiering setup of a rate component:

- Click the **Menu** link in the **Application** toolbar.  
A list appears.
- From the **Main** menu, select **Pricing Management** and then click **Rate Definition**.  
The **Rate Definition** screen appears.
- Select the rate schedule in the **Rate Schedule Components** zone.
- Click **Search**.  
The rate components of the rate schedule appear as the search results.
- Click the **Broadcast**  icon corresponding to the rate component whose tiering setup you want to edit.  
The **Create/Edit Rate Definition** zone appears.
- Modify the details of the tiering setup.

**Note:** You can only modify the rate component map description.

- Click **Save**.

The changes made to the tiering setup are saved.

### Related Topics

For more information on...	See...
<b>Rate Definition</b> screen	<a href="#">Rate Definition</a> on page 587
<b>Rate Schedule Components</b> zone	<a href="#">Rate Schedule Components</a> on page 588
<b>Create/Edit Rate Definition</b> zone	<a href="#">Create/Edit Rate Definition</a> on page 589

## Deleting Tiering Setup of a Rate Component

### Procedure

To delete tiering setup of a rate component:

1. Click the **Menu** link in the **Application** toolbar.

A list appears.

2. From the **Main** menu, select **Pricing Management** and then click **Rate Definition**.

The **Rate Definition** screen appears.

3. Select the rate schedule in the **Rate Schedule Components** zone.

4. Click **Search**.

The rate components of the rate schedule appear as the search results.

5. Click the **Broadcast**  icon corresponding to the rate component whose tiering setup you want to delete.

The **Create/Edit Rate Definition** zone appears.

6. Click **Delete**.

The tiering setup of the rate component is deleted, and the action that can be performed on the rate component changes from **Edit** to **Add** in the **Rate Schedule Components** zone.

#### Note:

The **Delete** button is disabled when you define the tiering setup of the rate component.

You can delete the tiering setup only when the rate component is not yet used for any product pricing.

## Tiering Criterion

Oracle Revenue Management and Billing (ORMB) provides you with the ability to create tiered pricing in case standard flat pricing is not sufficient to meet the business needs. Through tiered pricing, you can offer more favorable pricing to the customers based on service quantity utilization.

Let us understand this with the help of an example. ABC company uses wire transfer services provided by a large bank. If ABC company initiates up to 1,000 wire transfers, the fee charged by the bank will be \$5 per transfer. If ABC company initiates more than 1,000 wire transfers, the fee will be \$3 per transfer. To introduce this flexibility in the pricing model, you will have to define tiered pricing with the following tiering ranges:

- If the number of wire transfers is greater than 0 and less than or equal to 1000, then charge \$5 per transfer to ABC company.
- If the number of wire transfers is greater than 1000, then charge \$3 per transfer to ABC company.

In the above example, number of wire transfers is the tiering criterion, 0 – 1000 and 1000 – BLANK are tiering ranges, and \$5 and \$3 are rates per transfer.

The **Tiering Criteria** screen allows you to create and edit a tiering criterion. This screen consists of the following zones:

- [Tiering Criterion List](#) on page 593
- [Edit Tiering Criterion](#) on page 593
- [Create Tiering Criterion](#) on page 594

## Tiering Criterion List

The **Tiering Criterion List** zone displays tiering criterion that are already defined in the system. This zone contains the following columns:

Column Name	Column Description
Tiering Criterion	Displays the code of the tiering criterion.
Description	Displays the description of the tiering criterion.
Service Quantity Identifier	Displays the Service Quantity Identifier (SQI) of the tiering criterion.

You can change the layout of this zone. For more information on how to change the layout, see [Changing the Layout](#) on page 2882.

On clicking the **Broadcast**  icon corresponding to the tiering criterion, the **Edit Tiering Criterion** zone appears with the details of the respective tiering criterion.

## Edit Tiering Criterion

The **Edit Tiering Criterion** zone allows you to edit the tiering criterion. This zone contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Tiering Criterion	Displays the code of the tiering criterion.	Not applicable
Description	Used to modify the description of the tiering criterion.	Yes
Service Quantity Identifier	Displays the Service Quantity Identifier (SQI) of the tiering criterion.	Not applicable

This zone contains the following two buttons:

Button Name	Button Description
Save	Used to save the changes made in this zone.
Cancel	Used to clear the changes made in this zone.

By default, the **Edit Tiering Criterion** zone does not appear in the **Tiering Criteria** screen. It appears only when you click the **Broadcast**  icon corresponding to the tiering criterion in the **Tiering Criteria List** zone.

## Create Tiering Criterion

The **Create Tiering Criterion** zone allows you to create tiering criterion. This zone contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Tiering Criterion	Used to specify the code that uniquely identifies the tiering criterion.	Yes
Description	Used to specify the description for the tiering criterion.	Yes
Service Quantity Identifier	Used to specify the Service Quantity Identifier (SQI) for the tiering criterion.  <b>Note:</b> During billing, the rating engine uses the SQI to determine which service quantities are applied to tiers.	Yes

This zone contains the following two buttons:

Button Name	Button Description
Save	Used to create the tiering criterion.
Cancel	Used to clear the fields in this zone.

## Creating a Tiering Criterion

### Prerequisites

To create a tiering criterion, you should have:

- Service Quantity Identifiers (SQIs) defined in the application

### Procedure

To create a tiering criterion:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Pricing Management** and then click **Tiering Criterion**.  
The **Tiering Criterion** screen appears.
3. In the **Create Tiering Criterion** zone, enter the code that uniquely identifies the tiering criterion.
4. Enter the description for the tiering criterion.
5. Select the Service Quantity Identifier (SQI) that you want to associate with the tiering criterion.
6. Click **Save**.

The tiering criterion is created.

## Variance Parameter

Oracle Revenue Management and Billing allows you to define pricing for a product based on the variance parameter. This helps you to maintain variance based pricing for a product. For example, you can define different product pricing for each country or currency, if required. Before you define product pricing based on a variance parameter, you need to define the variance parameter. The **Variance Parameter** screen allows you to define, edit, and delete a variance parameter. It also allows you to filter the variance parameters using a search criteria.

## Filtering the Variance Parameters

### Procedure

To filter the variance parameters:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **V** and then click **Variance Parameter**.

The **Variance Parameter** screen appears. It contains the following two sections:

- **Search Criteria**— The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Variance Parameter	Used to specify the variance parameter.	No

- **Search Results** — On clicking the **Search** button corresponding to the **Variance Parameter** field, the search results are filtered based on the specified criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Variance Parameter	Displays the variance parameter.
Description	Displays the description of the variance parameter.

3. Enter the search criteria in the **Variance Parameter** field.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

4. Click the **Search** button corresponding to the **Variance Parameter** field.

The search results are filtered based on the specified criteria.

## **Defining a Variance Parameter**

### **Procedure**

To define a variance parameter:

1. Click the **Admin** link in the **Application** toolbar.

A list appears.

2. From the **Admin** menu, select **V** and then click **Variance Parameter**.

The **Variance Parameter** screen appears. It contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Variance Parameter	Used to specify the variance parameter.	Yes
Description	Used to specify the description for the variance parameter.	Yes

3. Enter the required details.
4. If you want to define more than one variance parameter, click the **Add (+)** icon and then repeat step 4.

**Note:** However, if you want to remove a variance parameter, click the **Delete** (🗑️) icon corresponding to the variance parameter that you want to delete.

5. Click **Save**.

The variance parameter is defined.

**Related Topics**

Variance Parameter screen	<a href="#">Variance Parameter</a> on page 595

## Editing a Variance Parameter

**Procedure**

To edit a variance parameter:

1. Click the **Admin** link in the **Application** toolbar.

A list appears.

2. From the **Admin** menu, select **V** and then click **Variance Parameter**.

The **Variance Parameter** screen appears.

3. If required, you can filter the variance parameters in the **Variance Parameter** screen.

A list of variance parameters that meet the search criteria appears in the search results. The **Search Results** section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Variance Parameter	Displays the variance parameter.	Not applicable
Description	Used to specify the description for the variance parameter.	Yes

4. Modify the required details.

5. Click **Save**.

The changes made to the variance parameter are saved.

**Related Topics**

## Deleting a Variance Parameter

**Procedure**

To delete a variance parameter:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **V** and then click **Variance Parameter**.  
The **Variance Parameter** screen appears.
3. If required, you can filter the variance parameters in the **Variance Parameter** screen.  
A list of variance parameters that meet the search criteria appears in the **Search Results** section.
4. Click the **Delete** () icon corresponding to the variance parameter that you want to delete.
5. Click **Save**.  
The variance parameter is deleted.

**Note:** You can only delete a variance parameter which is not yet used.

## Person to Person Relationship Type Sequence

Oracle Revenue Management and Billing provides you the flexibility to define person to person relationship type sequence:

- For each division, price item, and price item parameters combination
- For each division
- In the C1\_PER\_REL feature configuration

The system will first check whether the person to person relationship type sequence is defined for the division, price item, and price item parameters combination. If the person to person relationship type sequence is defined for the division, price item, and price item parameters combination, the system will search effective price item pricing at the parent customer level based on the sequence defined for the combination. However, if the person to person relationship type sequence is not defined for the division, price item, and price item parameters combination, the system will check whether the person to person relationship type sequence is defined for the division. If the person to person relationship type sequence is defined for the division, the system will search effective price item pricing at the parent customer level based on the sequence defined for the division. However, if the person to person relationship type sequence is not defined for the division, the system will consider the person to person relationship type sequence defined in the C1\_PER\_REL feature configuration and accordingly search effective price item pricing at the parent customer level.

The **Person to Person Relationship Type Sequence** screen allows you to define, edit, and delete person to person relationship type sequence of:

- a division
- a division, price item, and price item parameters combination

This screen consists of the following zones:

- [Search Person Relationship Type Sequence for Price Item](#) on page 599
- [Search Person Relationship Type Sequence for Division](#) on page 600

## Search Person Relationship Type Sequence for Price Item

The **Search Person Relationship Type Sequence for Price Item** zone allows you to search person to person relationship type sequence defined for a division, price item, and price item parameters combination. You can also define, edit, and delete person to person relationship type sequence of a division, price item, and price item parameters combination.

This zone contains the following two sections:

- **Search Criteria** — The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Price Item	Used to specify the price item code.	No
Price Item Description	Used to specify the description of the price item.	No
Division	Used to specify the division.  <b>Note:</b> You can only view those divisions to which you have access in the <b>Division</b> list.	No

**Note:** You must specify at least one search criterion while searching person to person relationship type sequence defined for a division, price item, and price item parameters combination.

- **Search Results** — On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Price Item	Displays the price item code.  <b>Note:</b> It has a link. On clicking the link, the <b>View Price Item</b> screen appears with the details of the respective price item.
Description	Displays the description of the price item.
Price Item Parameters	Displays a comma-separated list of parameter values. The order in which parameter values appear in this field is controlled by the display order (which is defined while associating a parameter with a price item).
Division	Indicates the division for which price item and price item parameters specific person to person relationship type sequence is defined.
View	On clicking the <b>View</b> (🔍) icon, the <b>Person Relationship Type Sequence for Division and Price Item</b> screen appears where you can view person to person relationship type sequence defined for the division, price item, and price item parameters combination.
Edit	On clicking the <b>Edit</b> (✎) icon, the <b>Person Relationship Type Sequence for Division and Price Item</b> screen appears where you can edit person to person relationship type sequence defined for the division, price item, and price item parameters combination.
Delete	On clicking the <b>Delete</b> (🗑️) icon, you can delete person to person relationship type sequence defined for the division, price item, and price item parameters combination.

You can define person to person relationship type sequence for a division, price item, and price item parameters combination by clicking the **Add** link in the upper right corner of this zone.

**Search Person Relationship Type Sequence for Division**

The **Search Person Relationship Type Sequence for Division** zone allows you to search person to person relationship type sequence defined for a division. You can also define, edit, and delete person to person relationship type sequence of a division.

This zone contains the following two sections:

- **Search Criteria** — The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Division	Used to specify the division.  <b>Note:</b> You can only view those divisions to which you have access in the <b>Division</b> list.	No

- **Search Results** — On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Division	Indicates the division for which person to person relationship type sequence is defined.
Description	Displays the description of the division.
View	On clicking the <b>View</b> (👁️) icon, the <b>Person Relationship Type Sequence for Division</b> screen appears where you can view person to person relationship type sequence of the division.
Edit	On clicking the <b>Edit</b> (✏️) icon, the <b>Person Relationship Type Sequence for Division</b> screen appears where you can edit person to person relationship type sequence of the division.
Delete	On clicking the <b>Delete</b> (🗑️) icon, you can delete the person to person relationship type sequence of the division.

You can define person to person relationship type sequence for a division by clicking the **Add** link in the upper right corner of this zone.

## Searching Relationship Type Sequence for a Division, Price Item, and Price Item Parameters

### Prerequisites

To search person to person relationship type sequence for a division, price item, and price item parameters combination, you should have:

- Divisions defined in the application

### Procedure

To search person to person relationship type sequence for a division, price item, and price item parameters combination:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Pricing Management** and then click **Person to Person Relationship Type Sequence**.  
The **Person to Person Relationship Type Sequence** screen appears.
3. Enter the search criteria in the **Search Person Relationship Type Sequence for Price Item** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually whenever required.

4. Click **Search**.

A list of division, price item, and price item parameters combinations that meet the search criteria and for which person to person relationship type sequence is defined appears in the **Search Results** section.

## Defining Relationship Type Sequence for a Division, Price Item, and Price Item Parameters

### Prerequisites

To define person to person relationship type sequence for a division, price item, and price item parameters combination, you should have:

- Divisions defined in the application
- Price items associated with the division to which the user belongs
- Parameters associated with the price item
- Person relationship types defined in the application

### Procedure

To define person to person relationship type sequence for a division, price item, and price item parameters combination:

1. Click the **Menu** link in the **Application** toolbar.

A list appears.

2. From the **Main** menu, select **Pricing Management** and then click **Person to Person Relationship Type Sequence**.

The **Person to Person Relationship Type Sequence** screen appears.

3. Click the **Add** link in the upper right corner of the **Search Person Relationship Type Sequence for Price Item** zone.

The **Person Relationship Type Sequence for Division and Price Item** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Division	Used to indicate the division for which you want to define price item and price item parameters specific person to person relationship type sequence.	Yes
Price Item	Used to specify the price item code.  <b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Price Item Search</b> screen appears.	Yes
Price Item Parameters	Used to specify the price item parameters.  <b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Price Item Parameters Search</b> screen appears.	No

In addition, this screen contains the following section:

- **Person Relationship Type Sequence** — This section allows you to define person to person relationship type sequence for the division, price item, and price item parameters combination. It contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Sequence Number	Used to indicate the sequence in which relationship type should be considered while searching for effective price item pricing at the parent customer level.	Yes
Relationship Type	Used to indicate the person to person relationship type.	Yes

4. Enter the required details.

**Note:** You can search for a price item and price item parameters by clicking the **Search** (🔍) icon corresponding to the respective field.

5. If you want to define more than one relationship type in the person to person relationship type sequence, click the **Add** (+) icon and then enter the details in the **Person Relationship Type Sequence** section.

**Note:** However, if you want to remove a relationship type from the person to person relationship type sequence, click the **Delete** (🗑️) icon corresponding to the relationship type.

6. Click **Save**.

The person to person relationship type sequence is defined for the division, price item, and price item parameters combination.

## **Editing Relationship Type Sequence of a Division, Price Item, and Price Item Parameters**

### **Prerequisites**

To edit person to person relationship type sequence of a division, price item, and price item parameters combination, you should have:

- Person relationship types defined in the application

### **Procedure**

To edit person to person relationship type sequence of a division, price item, and price item parameters combination:

1. Search person to person relationship type sequence for the division, price item, and price item parameters combination in the **Person to Person Relationship Type Sequence** screen.

- In the **Search Results** section, click the **Edit** () icon in the **Edit** column corresponding to the division, price item, and price item parameters combination whose person to person relationship type sequence you want to edit.

The **Person Relationship Type Sequence for Division and Price Item** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Division	Indicates the division for which price item and price item parameters specific person to person relationship type sequence is defined.	Not applicable
Price Item	Displays the price item code.	Not applicable
Price Item Parameters	Displays a comma-separated list of parameter values. The order in which parameter values appear in this field is controlled by the display order (which is defined while associating a parameter with a price item).	Not applicable

In addition, this screen contains the following section:

- Person Relationship Type Sequence** — This section allows you to define person to person relationship type sequence for the division, price item, and price item parameters combination. It contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Sequence Number	Used to indicate the sequence in which relationship type should be considered while searching for effective price item pricing at the parent customer level.	Yes
Relationship Type	Used to indicate the person to person relationship type.	Yes

- If you want to define more than one relationship type in the person to person relationship type sequence, click the **Add** () icon and then enter the details in the **Person Relationship Type Sequence** section.

**Note:** However, if you want to remove a relationship type from the person to person relationship type sequence, click the **Delete** () icon corresponding to the relationship type.

- Click **Save**.

The changes made to the person to person relationship type sequence are saved.

## Multiple Parameter Based Post-Processing Pricing

Until now, while deriving the post-processing bill segments, the system aggregated the regular bill segments of related price items without considering the price item parameters. Now, if you specify a price item parameter while associating regular price items with a post-processing price item and if the pricing for the post-processing price item is based on the price item parameter, the system aggregates the bill segments of regular price item and price item parameter combination. The system searches for the exact match. In this case, if the exact match is not found, the system does not aggregate the bill segments of the related price item. For example, the PR1 post processing price item is associated with the following regular price items:

Regular Price Item	Price Item Parameter
R1	Country = US
R2	Country = US

And, the pricing for PR1 post processing price item is based on Country = US. Now, if the following bill segments are generated for R1 and R2 in a bill:

Bill Segment	Price Item	Parameter 1	Parameter 2
BS1	R1	Country = US	-
BS2	R1	Country = US	Currency = USD
BS3	R1	Country = US	-
BS4	R1	-	-
BS5	R2	Country = US	-
BS6	R2	Country = US	-

Then, the system will aggregate the following regular bill segments while creating the post-processing bill segment for PR1:

- BS1
- BS3
- BS5

- BS6

However, if you specify a price item parameter while associating regular price items with a post-processing price item, but the pricing for the post-processing price item is not based on the price item parameter, the system aggregates all bill segments of regular price item irrespective of the price item parameter. For example, the PR1 post processing price item is associated with the following regular price items:

Regular Price Item	Price Item Parameter
R1	Country = US
R2	-

And, the pricing for PR1 post processing price item is not based on a price item parameter. Now, if the following bill segments are generated for R1 and R2 in a bill:

Bill Segment	Price Item	Parameter 1	Parameter 2
BS1	R1	Country = US	-
BS2	R1	Country = US	Currency = USD
BS3	R1	Country = US	-
BS4	R1	-	-
BS5	R2	Country = US	-
BS6	R2	-	-

Then, the system will aggregate the following regular bill segments while creating the post-processing bill segment for PR1:

- BS1
- BS2
- BS3
- BS4
- BS5
- BS6

## Division

---

### Topics:

- [Division](#)

The following two types of divisions are used while defining a contract type:

- **General Ledger (GL) Division** — GL divisions typically comprise of individual entities (for example, companies) in the general ledger. You must set up a GL division for each such entity. The GL division is used to define the accounting period for financial transactions linked to contracts. Contracts are associated with GL divisions through their contract type. The system uses accounting periods to prevent a user from creating financial transactions in the closed periods. It also uses accounting periods when it generates the flat file that contains the consolidated journal entry that is interfaced to the general ledger.
- **Division** — A division is associated with a jurisdiction. A jurisdiction is a geographic-oriented entity with unique business rules. For example, if you conduct business in California and Japan, each jurisdiction has different set of rules, and therefore you need to have a separate jurisdiction for each division. You must set up a division for each jurisdiction in which you conduct the business. For the Pricing Management functionality, setting up a division is mandatory, and the system must contain information about at least one division.

A division is associated with the following:

- **Person** — You may or may not associate person to a division. It is optional. But, when you are using division specific functionality, you have to associate person to a division while creating a local person.
- **Contract** — Contract is associated to a division through its contract type. The contract type controls multiple business rules which are defined for a given jurisdiction and contract type combination. In addition to controlling the business rules defined on the contract's contract type, the contract's division also controls the type of collection criteria used to determine if and how to collect overdue debt.
- **Account** — The division on account when combined with the account's customer class defines the jurisdiction that governs financial business rules (for example, the bill's due date, when and how late payment charges are calculated, etc.). It also allows you to assign To Do entries associated with the account to a given To Do role based on the account's division.

## Division

---

The **Division** screen allows you to define, edit, and delete a division. It consists of the following tabs:

Tab Name	Tab Description	Mandatory (Yes or No)
Main	Used to define basic details of a division.	Yes
Access Groups	Used to define the users who have right to associate objects (such as persons, accounts, price items, price lists, etc.) with this division. The users can only view those divisions to which they have access in the <b>Division</b> list used across the application.	No
Price Items	Used to define which price items are available to persons or accounts in a division.  <b>Note:</b> Once the price item is created, you need to associate it with a division.	No
Price Lists	Used to define which price lists are available to persons or accounts in a division.  <b>Note:</b> Once the price list is created, you need to associate it with a division.  You can associate a price list with a division only when all price items in the price list are already associated with the division.	No
Languages	Used to limit the languages that you can select for a person's bills and correspondence in a division.	No
Invoice Currencies	Used to limit the invoice currencies that you can select for accounts in a division.  <b>Note:</b> Invoice currency is a currency in which the accounts in the division can be billed.	No
Person Identifier Types	Used to limit the person identifier types that you can select for persons in a division.	No

Tab Name	Tab Description	Mandatory (Yes or No)
Algorithms	<p>Used to associate algorithms with the division. Once a division is created, you must associate the <b>Price Assignment Search</b> algorithm to it. For the Banking functionality, this is required to ensure that the price item pricing is displayed in the correct order as defined by the algorithm. Each division can have unique hierarchy order or more than one division can have the same hierarchy order. The hierarchy order is also used in billing when the price determination is controlled by the sort order definition of the algorithm.</p> <p>You can define algorithms in the <b>Algorithm</b> screen. The search order is governed by the second parameter of the algorithm, and the valid values for the same are:</p> <ul style="list-style-type: none"> <li>• <b>AGREED_PRICELIST</b> - If you use this search order, the price item pricing is searched in the following order: Account Agreed, Account Price List, Account Inherited Price List, Customer Agreed, Customer Price List, Customer Inherited Price List, Parent Customer Agreed, Parent Customer Price List, and Parent Customer Inherited Price List.</li> </ul> <div data-bbox="607 961 1105 1104" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> In this search order, the account agreed level has highest precedence and parent customer inherited price list level has lowest precedence.</p> </div> <ul style="list-style-type: none"> <li>• <b>AGREED_FIRST</b> - If you use this search order, the price item pricing is searched in the following order: Account Agreed, Customer Agreed, Parent Customer Agreed, Account Price List, Account Inherited Price List, Customer Price List, Customer Inherited Price List, Parent Customer Price List, and Parent Customer Inherited Price List.</li> </ul> <div data-bbox="607 1394 1105 1537" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> In this search order, the account agreed level has highest precedence and parent customer inherited price list level has lowest precedence.</p> </div>	No
Characteristics	Used to define characteristics for a division.	No
Bill Messages	Used to specify the bill messages that are valid for accounts in a division.	No
Party Char Types	Used to limit the characteristic types that you can select for persons and accounts in a division.	No
Bill Cycles	Used to limit the bill cycles that you can select for accounts in a division.	No
Account Identifier Types	Used to limit the account identifier types that you can select for accounts in a division.	No

Tab Name	Tab Description	Mandatory (Yes or No)
Price Item Characteristics	Used to define division-specific characteristics for price items associated with the division.	No

## **Division - Main**

The **Main** tab displays the basic information about the division. It contains the following fields:

Field Name	Field Description
Division	Indicates the division.  <b>Note:</b> The Search  icon appears corresponding to the <b>Division</b> field. On clicking the <b>Search</b> icon, the <b>Division Search</b> window appears where you can search for a division.
Description	Displays the description of the division.
Work Calendar	Indicates the work calendar which is associated with the division.

Field Name	Field Description
Status	Indicates the status of the division. The valid values are: <ul style="list-style-type: none"> <li>Active</li> <li>Pending</li> <li>Retired</li> </ul>
Bill Format	Indicates the format in which the bills should be printed for the accounts which belong to the division. The valid values are: <ul style="list-style-type: none"> <li>Detailed</li> <li>Summary</li> </ul>
Bill Route Type	Indicates how the bills must be sent to the main customer of the accounts which belong to the division.
Base Currency	Indicates the currency in which the GL entries should be created for the accounts which belong to the division.
Time Zone	Indicates the time zones in which the division is operational.
Eligible for Accrual	Indicates whether accrual should be calculated for the accounts which belong to the division.
Accrual Cycle	Indicates the accrual cycle of the accounts which belong to the division.
Comments	Displays additional details about the division.
Business Object	Indicates the business object using which the division is created in the system.

In addition, the **Main** tab contains the following fields in a grid:

Field Name	Field Description
To Do Type	Indicates the To Do type for which division-specific To Do role is defined.
To Do Role	Indicates the To Do role whose users must receive the To Do entries of the specified To Do type for the accounts which belong to the division.

## Division - Access Groups

The **Access Groups** tab lists the access groups which are associated with the division. It contains the following field:

Field Name	Field Description
Division	Indicates the division.

In addition, the following fields appear in a grid:

Field Name	Field Description
Access Group	Indicates the access group which is associated with the division.

Field Name	Field Description
Description	Displays the description of the access group.

**Related Topics**

For more information on...	See...
How to associate an access group with a division	<a href="#">Associating an Access Group with a Division</a> on page 627

**Division - Price Items**

The **Price Items** tab lists the price items which are associated with the division. It contains the following field:

Field Name	Field Description
Division	Indicates the division.

In addition, the following fields appear in a grid:

Field Name	Field Description
Price Item	Indicates the price item which is associated with the division.
Description	Displays the description of the price item.
Accrual Type Criteria	Indicates whether the billable charges of the price item should be considered for accrual depending on the accrual criteria specified in the accrual type. The valid values are: <ul style="list-style-type: none"> <li>• Actual</li> <li>• Historical</li> <li>• Not Applicable</li> </ul>

**Related Topics**

For more information on...	See...
How to associate a price item with a division	<a href="#">Associating a Price Item with a Division</a> on page 628

**Division - Price Lists**

The **Price Lists** tab lists the price lists which are associated with the division. It contains the following field:

Field Name	Field Description
Division	Indicates the division.

In addition, the following fields appear in a grid:

Field Name	Field Description
Price List ID	Indicates the price list.
Description	Displays the description of the price list.

**Related Topics**

For more information on...	See...
How to associate a price list with a division	<a href="#">Associating a Price List with a Division</a> on page 630

## Division - Languages

The **Languages** tab lists the languages which you can select for generating invoice and correspondence for the accounts in the division. It contains the following field:

Field Name	Field Description
Division	Indicates the division.

In addition, the following field appears in a grid:

Field Name	Field Description
Language	Indicates the language associated with the division.

### Related Topics

For more information on...	See...
How to associate a language with a division	<a href="#">Associating a Language with a Division</a> on page 631

## Division - Invoice Currencies

The **Invoice Currencies** tab lists the currencies which you can use for generating the invoice of the accounts in the division. It contains the following field:

Field Name	Field Description
Division	Indicates the division.

In addition, the following fields appear in a grid:

Field Name	Field Description
Currency	Indicates the currency.
Rounding Type	Indicates the rounding type for the currency. The valid values are: <ul style="list-style-type: none"> <li>• Down</li> <li>• Nearest</li> <li>• Up</li> </ul>

### Related Topics

How to associate an invoice currency with a division	<a href="#">Associating an Invoice Currency with a Division</a> on page 632

## Division - Person Identifier Types

The **Person Identifier Types** tab lists the identifier types which are valid for the persons associated with the division. It contains the following field:

Field Name	Field Description
Division	Indicates the division.

In addition, the following field appears in a grid:

Field Name	Field Description
Person Identifier Type	Indicates the person identifier type.

#### **Related Topics**

For more information on...	See...
How to associate a person identifier type with a division	<a href="#">Associating a Person Identifier Type with a Division</a> on page 634

## **Division - Algorithms**

The **Algorithms** tab lists the algorithms which are associated with the division. It contains the following field:

Field Name	Field Description
Division	Indicates the division.

In addition, the following fields appear in a grid:

Field Name	Field Description
Division Algorithm Entity	Indicates the algorithm entity to which you want to attach the algorithm.
Sequence Number	Displays the order in which the algorithms with the same entity should be executed.
Algorithm	Indicates the algorithm.
Description	Displays the description of the algorithm.

#### **Related Topics**

For more information on...	See...
How to associate an algorithm with a division	<a href="#">Associating an Algorithm with a Division</a> on page 635

## **Division - Characteristics**

The **Characteristics** tab lists the characteristics which are defined for the division. It contains the following field:

Field Name	Field Description
Division	Indicates the division.

In addition, the following fields appear in a grid:

Field Name	Field Description
Effective Date	Indicates the date from when the characteristic is effective for the division.
Characteristic Type	Indicates the characteristic type.

Field Name	Field Description
Characteristic Value	Indicates the value for the characteristic type.

### **Related Topics**

For more information on...	See...
How to define a characteristic for a division	<a href="#">Defining a Characteristic for a Division</a> on page 641

## **Division - Bill Messages**

The **Bill Messages** tab lists the bill messages which are valid for the accounts in the division for a specified duration. It contains the following field:

Field Name	Field Description
Division	Indicates the division.

In addition, the following fields appear in a grid:

Field Name	Field Description
Start Date	Indicates the date from when you want the bill message to appear on the bill.
End Date	Indicates the date till when you want the bill message to appear on the bill.
Bill Message	Indicates the bill message that is valid for the accounts in the division.
Description	Displays the description of the bill message.

### **Related Topics**

For more information on...	See...
How to associate a bill message with a division	<a href="#">Associating a Bill Message with a Division</a> on page 642

## **Division - Party Char Types**

The **Party Char Types** tab lists the characteristic types which are valid for the persons and accounts associated with the division. It contains the following field:

Field Name	Field Description
Division	Indicates the division.

In addition, the following fields appear in a grid:

Field Name	Field Description
Characteristic Entity	Indicates whether the characteristic type is valid for a person or an account in this division.
Characteristic Type	Indicates the characteristic type.

### **Related Topics**

For more information on...	See...
How to associate a party char type with a division	<a href="#">Associating a Party Characteristic Type with a Division</a> on page 644

## Division - Bill Cycles

The **Bill Cycles** tab lists the bill cycles which are valid for the accounts associated with the division. It contains the following field:

Field Name	Field Description
Division	Indicates the division.

In addition, the following field appears in a grid:

Field Name	Field Description
Bill Cycle	Indicates the bill cycle.

### Related Topics

For more information on...	See...
How to associate a bill cycle with a division	<a href="#">Associating a Bill Cycle with a Division</a> on page 645

## Division - Account Identifier Types

The **Account Identifier Types** tab lists the identifier types which are valid for the accounts associated with the division. It contains the following field:

Field Name	Field Description
Division	Indicates the division.

In addition, the following field appears in a grid:

Field Name	Field Description
Account Identifier Type	Indicates the account identifier type.

### Related Topics

For more information on...	See...
How to associate an account identifier type with a division	<a href="#">Associating an Account Identifier Type with a Division</a> on page 646

## Division - Price Item Characteristics

The **Price Item Characteristics** tab lists division-specific characteristics of price items which are associated with the division. It contains the following field:

Field Name	Field Description
Division	Indicates the division.

In addition, the following fields appear in a grid:

Field Name	Field Description
Price Item	Displays the price item count associated with the selected division to which the user belongs.
Price Item	Displays the price item associated with the division to which the user belongs.
Effective Date	Indicates the date from when the price item characteristic is effective for the division.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value for the characteristic type.

### **Related Topics**

For more information on...	See...
How to define a division-specific characteristic for a price item	<a href="#">Defining a Division-Specific Characteristic for a Price Item</a> on page 647

## Searching for a Division

### **Procedure**

To search for a division:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **D** and then click **Division**.  
A sub-menu appears.
3. Click the **Search** option from the **Division** sub-menu.

The **Division Search** window appears. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Division	Used to search for a particular division.	No
Description	Used to search division with a particular name.	No

**Note:** You must specify at least one search criterion while searching for a division.

- **Search Results** - On clicking the **Search** button corresponding to the respective field, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Division	Displays the division.
Description	Displays the description of the division.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

- In the **Search Results** section, click the division whose details you want to view or edit.

The **Division** screen appears.

### Related Topics

<b>Division</b> screen	<a href="#">Division</a> on page 614

## Defining a Division

### Prerequisites

To define a division, you should have:

- Required division business object defined in the application
- Work calendars, bill route types, currencies, time zones, accrual cycles, To Do types, and To Do roles defined in the application
- Values defined for the **BILL\_FORMAT\_FLG** lookup field

### Procedure

To define a division:

- Click the **Admin** link in the **Application** toolbar.  
A list appears.
- From the **Admin** menu, select **D** and then click **Division**.  
A sub-menu appears.
- Click the **Add** option from the **Division** sub-menu.  
The **Division** screen appears.
- Ensure that the **Main** tab is selected.

The **Main** tab contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Division	Used to specify the division.	Yes
Description	Used to specify the description for the division.	Yes
Work Calendar	Used to indicate the work calendar that you want to associate with the division. The work calendar indicates the days when the division is operational. It is used to ensure that the system calculated dates (for example, bill due date, credit and collection event dates, etc.) fall on a working day.  <b>Note:</b> The list includes only those work calendars which are already defined in the system.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Status	<p>Used to indicate the status of the division. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Active</b> - Indicates that you can use the division in the system.</li> <li>• <b>Pending</b> - Indicates that the division is not yet available for use.</li> <li>• <b>Retired</b> - Indicates that the division is no longer available for use.</li> </ul> <p><b>Note:</b> The list includes only those statuses which are defined in the <b>DIVISION_STATUS_FLG</b> lookup field.</p>	No
Bill Format	<p>Used to specify the format in which the bills should be printed for the accounts which belong to the division. The valid values are:</p> <ul style="list-style-type: none"> <li>• Detailed</li> <li>• Summary</li> </ul> <p><b>Note:</b> The list includes only those bill formats which are defined in the <b>BILL_FORMAT_FLG</b> lookup field.</p>	No
Bill Route Type	<p>Used to indicate how the bills must be sent to the main customer of the accounts which belong to the division.</p> <p><b>Note:</b> The list includes only those bill route types which are already defined in the system.</p>	No
Base Currency	<p>Used to specify the currency in which the GL entries should be created for the accounts which belong to the division. If the account's invoice currency and division's base currency are different, the system converts the GL amount from the account's invoice currency to the division's base currency. In such cases, the system creates the financial transactions for the accounts in both the currencies (i.e. account's invoice currency and division's base currency).</p> <p><b>Note:</b> The list includes only those currencies which are already defined in the system.</p>	Yes
Time Zone	<p>Used to indicate the time zone in which the division is operational.</p> <p><b>Note:</b> The list includes only those time zones which are already defined in the system.</p>	No

Field Name	Field Description	Mandatory (Yes or No)
Eligible for Accrual	Used to indicate whether you can calculate accrual for the accounts which belong to the division.	No
Accrual Cycle	Used to indicate the accrual cycle for the accounts which belong to the division.  <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This field is enabled when the <b>Eligible for Accrual</b> option is selected.</p> <p>The <b>Search</b>  icon appears corresponding to the <b>Accrual Cycle</b> field. On clicking the <b>Search</b> icon, the <b>Accrual Cycle Search</b> window appears.</p> </div>	Yes (Conditional)  <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> The field is required when the <b>Eligible for Accrual</b> option is selected.</p> </div>
Comments	Used to specify additional details about the division.	No
Business Object	Used to indicate the business object using which you want to create the division.  <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> The <b>Search</b>  icon appears corresponding to the <b>Business Object</b> field. On clicking the <b>Search</b> icon, the <b>Business Object Search</b> window appears.</p> </div>	Yes

In addition, the **Main** tab contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
To Do Type	Used to indicate the To Do type for which you want to define division-specific To Do role.  <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> The <b>Search</b>  icon appears corresponding to the <b>To Do Type</b> field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.</p> </div>	Yes (Conditional)  <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This field is required when you are defining the division-specific To Do role for a To Do type.</p> </div>
To Do Role	Used to indicate the To Do role whose users must receive the To Do entries of the specified To Do type for the accounts which belong to the division.  <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> The <b>Search</b>  icon appears corresponding to the <b>To Do Role</b> field. On clicking the <b>Search</b> icon, the <b>Role for To Do Type</b> window appears.</p> </div>	Yes (Conditional)  <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This field is required when you are defining the division-specific To Do role for a To Do type.</p> </div>

5. Enter the required details in the **Main** tab.
6. Associate access groups, price items, price lists, languages, invoice currencies, person identifier types, algorithms, bill messages, party characteristic types, bill cycles, and account identifier types with the division, if required.
7. Define characteristics for the division, if required.
8. Define division-specific characteristics for the price items, if required.

- Click the **Save** button in the **Page Title** area.

The division is defined. The status of the division is set to **Pending**.

## Associating an Access Group with a Division

On associating an access group with a division, the users which belong to the access group can view the division in the respective list across the system. These users can then create and edit the accounts of the division.

### Prerequisites

To associate an access group with a division, you should have:

- Access groups defined in the application

### Procedure

To associate an access group with a division:

- Search for the division to which you want to associate an access group.
- Click the **Access Groups** tab in the **Division** screen.

The **Access Groups** tab appears. It contains the following field:

Field Name	Field Description
Division	Indicates the division.  <b>Note:</b> The <b>Search</b> (  ) icon appears corresponding to the <b>Division</b> field. On clicking the <b>Search</b> icon, the <b>Division Search</b> window appears where you can search for a division.

In addition, it contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Access Group	Used to indicate the access group which you want to associate with the division.  <b>Note:</b> The <b>Search</b> (  ) icon appears corresponding to the <b>Access Group</b> field. On clicking the <b>Search</b> icon, the <b>Access Group Search</b> window appears.  On specifying an access group, the description of the access group appears in the <b>Description</b> field.	Yes (Conditional)  <b>Note:</b> This field is required when you are associating an access group with the division.
Description	Displays the description of the access group.	Not applicable

- Enter the required details in the **Access Groups** tab.
- If you want to associate more than one access group with the division, click the **Add** () icon and then repeat step 3.

**Note:** However, if you want to remove an access group from the division, click the **Delete** () icon corresponding to the access group.

- Click the **Save** button in the **Page Title** area.

The access group is associated with the division.

## Associating a Price Item with a Division

On associating a price item with a division, you can assign the price item to the persons and accounts which belong to the division. While associating a price item with a division, you can specify the accrual type criteria for the price item. The accrual type criteria is referred only when the accrual is calculated for an account using an accrual type where the **Price Item Accrual Criteria Required** option is selected. The system behaves in the following manner when the **Price Item Accrual Criteria Required** option is selected in the accrual type:

If the accrual type criteria is set to...	Then...
Actual	The system considers the billable charges of the price item only when the accrual is calculated for an account using the accrual type where the accrual criteria is set to <b>Actual</b> .
Historical	The system considers the billable charges of the price item only when the accrual is calculated for an account using the accrual type where the accrual criteria is set to <b>Historical</b> .

### Prerequisites

To associate a price item with a division, you should have:

- Price items defined in the application

### Procedure

To associate a price item with a division:

1. Search for the division to which you want to associate a price item.
2. Click the **Price Items** tab in the **Division** screen.

The **Price Items** tab appears. It contains the following field:

Field Name	Field Description
Division	Indicates the division.  <b>Note:</b> The <b>Search</b>  icon appears corresponding to the <b>Division</b> field. On clicking the <b>Search</b> icon, the <b>Division Search</b> window appears where you can search for a division.

In addition, it contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Price Item	Used to indicate the price item which you want to associate with the division.  <b>Note:</b> The <b>Search</b>  icon appears corresponding to the <b>Price Item</b> field. On clicking the <b>Search</b> icon, the <b>Price Item Search</b> window appears. On specifying a price item, the description of the price item appears in the <b>Description</b> field.	Yes (Conditional)  <b>Note:</b> This field is required when you are associating a price item with the division.
Description	Displays the description of the price item.	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
Accrual Type Criteria	<p>Used to indicate whether the billable charges of the price item should be considered for accrual depending on the accrual criteria specified in the accrual type. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Actual</b> <ul style="list-style-type: none"> <li>- Used to indicate that the billable charges of the price item should be considered for accrual when the accrual criteria in the accrual type is set to <b>Actual</b>.</li> </ul> </li> <li>• <b>Historical</b> <ul style="list-style-type: none"> <li>- Used to indicate that the billable charges of the price item should be considered for accrual when the accrual criteria in the accrual type is set to <b>Historical</b>.</li> </ul> </li> <li>• <b>Not Applicable</b> <ul style="list-style-type: none"> <li>- Used to indicate that the billable charges of the price item should be considered for accrual irrespective of the accrual criteria specified in the accrual type</li> </ul> </li> </ul>	No

3. Enter the required details in the **Price Items** tab.
4. If you want to associate more than one price item with the division, click the **Add (+)** icon and then repeat step 3.

**Note:** However, if you want to remove a price item from the division, click the **Delete (🗑)** icon corresponding to the price item.

5. Click the **Save** button in the **Page Title** area.  
The price item is associated with the division.

## **Associating a Price List with a Division**

### **Prerequisites**

To associate a price list with a division, you should have:

- Price lists defined in the application

### **Procedure**

To associate a price list with a division:

1. Search for the division to which you want to associate a price list.
2. Click the **Price Lists** tab in the **Division** screen.

The **Price Lists** tab appears. It contains the following field:

Field Name	Field Description
Division	<p>Indicates the division.</p> <p><b>Note:</b> The <b>Search</b>  icon appears corresponding to the <b>Division</b> field. On clicking the <b>Search</b> icon, the <b>Division Search</b> window appears where you can search for a division.</p>

In addition, it contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Price List ID	<p>Used to specify the price list which you want to associate with the division.</p> <p><b>Note:</b></p> <p>The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Price List Search</b> window appears.</p> <p>On specifying a price list, the description of the price list appears in the <b>Description</b> field.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required when you are associating a price list with a division.</p>
Description	Displays the description of the price list.	Not applicable

3. Enter the required details in the **Price Lists** tab.
4. If you want to associate more than one price list with the division, click the **Add**  icon and then repeat step 3.

**Note:** However, if you want to remove a price list from the division, click the **Delete**  icon corresponding to the price list.

5. Click the **Save** button in the **Page Title** area.

The price list is associated with the division.

## **Associating a Language with a Division**

### **Prerequisites**

To associate a language with a division, you should have:

- Languages defined in the application

### **Procedure**

To associate a language with a division:

1. Search for the division to which you want to associate a language.
2. Click the **Languages** tab in the **Division** screen.

The **Languages** tab appears. It contains the following field:

Field Name	Field Description
Division	Indicates the division.  <b>Note:</b> The <b>Search</b>  icon appears corresponding to the <b>Division</b> field. On clicking the <b>Search</b> icon, the <b>Division Search</b> window appears where you can search for a division.

In addition, it contains the following field in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Language	Used to specify the language which you want to select for generating invoice and correspondence for the accounts in the division.	No

3. Select the language from the list.
4. If you want to associate more than one language with the division, click the **Add**  icon and then repeat step 3.

**Note:** However, if you want to remove a language from the division, click the **Delete**  icon corresponding to the language.

5. Click the **Save** button in the **Page Title** area.

The language is associated with the division.

## **Associating an Invoice Currency with a Division**

### **Prerequisites**

To associate an invoice currency with a division, you should have:

- Currencies defined in the application

### **Procedure**

To associate an invoice currency with a division:

1. Search for the division to which you want to associate an invoice currency.
2. Click the **Invoice Currencies** tab in the **Divisions** screen.

The **Invoice Currencies** tab appears. It contains the following field:

Field Name	Field Description
Division	Indicates the division.  <b>Note:</b> The <b>Search</b>  icon appears corresponding to the <b>Division</b> field. On clicking the <b>Search</b> icon, the <b>Division Search</b> window appears where you can search for a division.

In addition, it contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Currency	Used to indicate the currency which you want to use for generating the invoice of the accounts in the division.	Yes (Conditional)  <b>Note:</b> This field is required when you are associating an invoice currency with the division.
Rounding Type	Used to indicate the rounding type for the currency. The valid values are: <ul style="list-style-type: none"> <li>• Down</li> <li>• Nearest</li> <li>• Up</li> </ul>	Yes (Conditional)  <b>Note:</b> This field is required when you are associating an invoice currency with the division.

3. Select the currency and its rounding type from the respective list.
4. If you want to associate more than one invoice currency with the division, click the **Add**  icon and then repeat step 3.

**Note:** However, if you want to remove an invoice currency from the division, click the **Delete**  icon corresponding to the currency.

5. Click the **Save** button in the **Page Title** area.

The invoice currency is associated with the division.

## Associating a Person Identifier Type with a Division

### Prerequisites

To associate a person identifier type with a division, you should have:

- Person identifier types defined in the application

### Procedure

To associate a person identifier type with a division:

1. Search for the division to which you want to associate a person identifier type.
2. Click the **Person Identifier Types** tab in the **Division** screen.

The **Person Identifier Types** tab appears. It contains the following field:

Field Name	Field Description
Division	Indicates the division.  <b>Note:</b> The Search  icon appears corresponding to the <b>Division</b> field. On clicking the <b>Search</b> icon, the <b>Division Search</b> window appears where you can search for a division.

In addition, it contains the following field in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Person Identifier Type	Used to indicate the person identifier type.	Yes (Conditional)  <b>Note:</b> This field is required when you are associating a person identifier type with a division.

3. Select the person identifier type from the list.
4. If you want to associate more than one person identifier type with the division, click the **Add**  icon and then repeat step 3.

**Note:** However, if you want to remove a person identifier type from the division, click the **Delete**  icon corresponding to the person identifier type.

5. Click the **Save** button in the **Page Title** area.

The person identifier type is associated with the division.

## Associating an Algorithm with a Division

### Prerequisites

To associate an algorithm with a division, you should have:

- Required algorithms defined in the application

### Procedure

To associate an algorithm with a division:

1. Search for the division to which you want to associate the algorithm.

The **Division** screen appears.

2. Click the **Algorithms** tab.

The **Algorithms** tab appears. It contains the following field:

Field Name	Field Description
Division	Indicates the division.  <b>Note:</b> The <b>Search</b>  icon appears corresponding to the <b>Division</b> field. On clicking the <b>Search</b> icon, the <b>Division Search</b> window appears where you can search for a division.

In addition, it contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Division      Algorithm Entity	<p>Used to indicate the algorithm entity to which you want to attach the algorithm. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>ASL Accumulation Post-Processing</b> - Used to attach an algorithm which must be triggered for undertaking some post-processing activities on the aggregate stop-loss accumulation amount. This algorithm is invoked when you execute the <b>C1-ACASL</b> batch.</li> </ul> <div style="border: 1px solid black; padding: 2px; margin: 5px 0;"> <p><b>Note:</b> No algorithm types for this algorithm entity are shipped with the product. The implementation team can create custom algorithm type for this algorithm entity based on the customer requirements.</p> </div> <ul style="list-style-type: none"> <li>• <b>ASL Accumulation Pre-Processing</b> - Used to attach an algorithm which must be triggered for undertaking some pre-processing activities on the aggregate stop-loss accumulation records. This algorithm is invoked when you execute the <b>C1-ACASL</b> batch.</li> </ul> <div style="border: 1px solid black; padding: 2px; margin: 5px 0;"> <p><b>Note:</b> No algorithm types for this algorithm entity are shipped with the product. The implementation team can create custom algorithm type for this algorithm entity based on the customer requirements.</p> </div> <ul style="list-style-type: none"> <li>• <b>Account - Post Processing</b> - Used to attach an algorithm which must be triggered when you create or edit an account.</li> </ul> <div style="border: 1px solid black; padding: 2px; margin: 5px 0;"> <p><b>Note:</b> The <b>C1-CLSACCT</b> and <b>C1-UACM-IC</b> algorithm types are shipped with the product. On clicking the <b>Search</b> icon, the <b>Algorithm Search</b> window appears.</p> </div>	Yes (Conditional) <div data-bbox="1140 1709 1466 1822" style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> This field is required when you are associating an algorithm with the division.</p> </div>

Field Name	Field Description	Mandatory (Yes or No)
Description	Displays the description of the algorithm.  <b>Note:</b> The description appears automatically when you specify the algorithm code in the <b>Algorithm</b> field.	Not applicable

- Enter the required details in the **Algorithms** tab.
- If you want to associate more than one algorithm with the division, click the **Add** (+) icon and then repeat step 3.

**Note:** However, if you want to remove an algorithm from the division, click the **Delete** (🗑️) icon corresponding to the algorithm.

- Click the **Save** button in the **Page Title** area.  
The algorithm is associated with the division.

## Defining a Characteristic for a Division

### Prerequisites

To define a characteristic for a division, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to Division)

### Procedure

To define a characteristic for a division:

- Search for the division for which you want to define characteristics.
- Click the **Characteristics** tab in the **Division** screen.

The **Characteristics** tab appears. It contains the following field:

Field Name	Field Description
Division	Indicates the division.  <b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Division</b> field. On clicking the <b>Search</b> icon, the <b>Division Search</b> window appears where you can search for a division.

In addition, it contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the division.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the division.
Characteristic Type	Used to indicate the characteristic type. <b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to Division.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the division.
Characteristic Value	Used to specify the value for the characteristic type. <b>Note:</b> The <b>Search</b>  icon appears corresponding to the <b>Characteristic Value</b> field. On clicking the <b>Search</b> icon, the <b>Characteristic Value Search</b> window appears. On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the division.

- Enter the required details in the **Characteristics** tab.
- If you want to define more than one characteristic for the division, click the **Add**  icon and then repeat step 3.

**Note:** However, if you want to remove a characteristic from the division, click the **Delete**  icon corresponding to the characteristic.

- Click the **Save** button in the **Page Title** area.  
The characteristic is defined for the division.

## **Associating a Bill Message with a Division**

### **Prerequisites**

To associate a bill message with a division, you should have:

- Bill messages defined in the application

### **Procedure**

To associate a bill message with a division:

1. Search for the division to which you want to associate a bill message.
2. Click the **Bill Messages** tab in the **Division** screen.

The **Bill Messages** tab appears. It contains the following field:

Field Name	Field Description
Division	Indicates the division.  <b>Note:</b> The <b>Search</b>  icon appears corresponding to the <b>Division</b> field. On clicking the <b>Search</b> icon, the <b>Division Search</b> window appears where you can search for a division.

In addition, it contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Start Date	Used to specify the date from when you want the bill message to appear on the bill for the accounts in the division.	Yes (Conditional)  <b>Note:</b> This field is required when you are associating a bill message with the division.
End Date	Used to specify the date till when you want the bill message to appear on the bill for the accounts in the division.	No
Bill Message	Used to specify the bill message which is valid for the accounts in the division.  <b>Note:</b> The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Bill Message Search</b> window appears.  On specifying a bill message, the description of the bill message appears in the <b>Description</b> field.	Yes (Conditional)  <b>Note:</b> This field is required when you are associating a bill message with the division.
Description	Displays the description of the bill message.	Not applicable

3. Enter the required details in the **Bill Messages** tab.
4. If you want to associate more than one bill message with the division, click the **Add**  icon and then repeat step 3.

**Note:** However, if you want to remove a bill message from the division, click the **Delete**  icon corresponding to the bill message.

5. Click the **Save** button in the **Page Title** area.

The bill message is associated with the division.

## Associating a Party Characteristic Type with a Division

### Prerequisites

To associate a party char type with a division, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to Division)

### Procedure

To associate a party char type with a division:

1. Search for the division to which you want to associate a party char type.
2. Click the **Party Char Types** tab in the **Division** screen.

The **Party Char Types** tab appears. It contains the following field:

Field Name	Field Description
Division	Indicates the division.  <b>Note:</b> The <b>Search</b>  icon appears corresponding to the <b>Division</b> field. On clicking the <b>Search</b> icon, the <b>Division Search</b> window appears where you can search for a division.

In addition, it contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Entity	Used to indicate whether the characteristic type is valid for a person or an account in the division.	Yes (Conditional)  <b>Note:</b> This field is required when you are associating a party char type with the division.
Characteristic Type	Used to indicate the characteristic type.  <b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to Division.	Yes (Conditional)  <b>Note:</b> This field is required when you are associating a party char type with the division.

3. Enter the required details in the **Party Char Types** tab.
4. If you want to associate more than one party char type with the division, click the **Add**  icon and then repeat step 3.

**Note:** However, if you want to remove a party char type from the division, click the **Delete**  icon corresponding to the characteristic type.

- Click the **Save** button in the **Page Title** area.

The party char type is associated with the division.

## Associating a Bill Cycle with a Division

### Prerequisites

To associate a bill cycle with a division, you should have:

- Bill cycles defined in the application

### Procedure

To associate a bill cycle with a division:

- Search for the division to which you want to associate a bill cycle.
- Click the **Bill Cycles** tab in the **Division** screen.

The **Bill Cycles** tab appears. It contains the following field:

Field Name	Field Description
Division	Indicates the division.  <b>Note:</b> The <b>Search</b>  icon appears corresponding to the <b>Division</b> field. On clicking the <b>Search</b> icon, the <b>Division Search</b> window appears where you can search for a division.

In addition, it contains the following field in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Bill Cycle	Used to specify the bill cycle that is valid for the accounts associated with the division.	Yes (Conditional)  <b>Note:</b> This field is required when you are associating a bill cycle with the division.

- Select the bill cycle from the list.
- If you want to associate more than one bill cycle with the division, click the **Add**  icon and then repeat step 3.

**Note:** However, if you want to remove a bill cycle from the division, click the **Delete**  icon corresponding to the bill cycle.

- Click the **Save** button in the **Page Title** area.

The bill cycle is associated with the division.

## Associating an Account Identifier Type with a Division

### Prerequisites

To associate an account identifier type with a division, you should have:

- Account identifier types defined in the application

### Procedure

To associate an account identifier type with a division:

- Search for the division to which you want to associate an account identifier type.
- Click the **Account Identifier Types** tab in the **Division** screen.

The **Account Identifier Types** tab appears. It contains the following field:

Field Name	Field Description
Division	Indicates the division.  <b>Note:</b> The <b>Search</b>  icon appears corresponding to the <b>Division</b> field. On clicking the <b>Search</b> icon, the <b>Division Search</b> window appears where you can search for a division.

In addition, it contains the following field in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Account Identifier Type	Used to specify the account identifier type valid for the accounts associated with the division.	Yes (Conditional)  <b>Note:</b> This field is required when you are associating an account identifier type with the division.

- Select the account identifier type from the list.
- If you want to associate more than one account identifier type with the division, click the **Add**  icon and then repeat step 3.

**Note:** However, if you want to remove an account identifier type from the division, click the **Delete**  icon corresponding to the account identifier type.

- Click the **Save** button in the **Page Title** area.

The account identifier type is associated with the division.

**Defining a Division-Specific Characteristic for a Price Item****Prerequisites**

To define a division-specific characteristics for a price item, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to Division/Price Item Combination)
- Price item associated with the division to which the user belongs

**Procedure**

To define a division-specific characteristic for a price item:

1. Search for the division for which you want to define a price item characteristic.
2. Click the **Price Item Characteristics** tab in the **Division** screen.

The **Price Item Characteristics** tab appears. It contains the following field:

Field Name	Field Description
Division	Indicates the division.  <b>Note:</b> The <b>Search</b>  icon appears corresponding to the <b>Division</b> field. On clicking the <b>Search</b> icon, the <b>Division Search</b> window appears where you can search for a division.

In addition, it contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Price Item	Indicates the price item count associated with the selected division.	No
Price Item	Indicates the price item code associated with the division to which the user belongs.	Not applicable
Effective Date	Used to specify the date from when the price item characteristic is effective for the division.	Yes (Conditional)  <b>Note:</b> This field is required when you are defining a division-specific characteristic for the price item.

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Type	Used to indicate the characteristic type.  <b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to Division/Price Item Combination.	Yes (Conditional)  <b>Note:</b> This field is required when you are defining a division-specific characteristic for the price item.
Characteristic Value	Used to specify the value for the characteristic type.  <b>Note:</b> If you select a predefined characteristic type, the <b>Search</b> (🔍) icon appears corresponding to the <b>Characteristic Value</b> field. On clicking the <b>Search</b> icon, the <b>Characteristic Value Search</b> window appears.  On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	Yes (Conditional)  <b>Note:</b> This field is required when you are defining a division-specific characteristic for the price item.

3. If the division has multiple price items associated with it, navigate to define characteristics for the required price item.

**Note:** You can use the **Previous** (⏪) and **Next** (⏩) buttons to navigate through the price items while defining their characteristics.

4. Enter the required details in the **Price Item Characteristics** tab.
5. If you want to define more than one division-specific characteristic for the price item, click the **Add** (+) icon and then repeat step 4.

**Note:** However, if you want to remove a division-specific characteristic from the price item, click the **Delete** (🗑️) icon corresponding to the characteristic.

6. Click the **Save** button in the **Page Title** area.

The division-specific characteristic is defined for the price item.

## Associating a To Do Type and To Do Role with a Division

### Prerequisites

To associate a To Do type and To Do role with a division, you should have:

- To Do types and to do roles defined in the application
- To Do roles associated to the respective to do types

### **Procedure**

To associate a To Do type and To Do role with a division:

1. Search for the division to which you want to associate a To Do type and To Do role.
2. Click the **Main** tab in the **Divisions** screen.  
The **Main** tab appears.
3. The **To Do** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
To Do Type	Used to indicate the To Do type for which you want to define division-specific To Do role.  <b>Note:</b> The <b>Search</b>  icon appears corresponding to the <b>To Do Type</b> field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.	Yes (Conditional)  <b>Note:</b> This field is required when you are defining a To Do type for the division
To Do Role	Used to indicate the To Do role whose users must receive the To Do entries of the specified To Do type for the accounts which belong to the division.  <b>Note:</b> The <b>Search</b>  icon appears corresponding to the <b>To Do Role</b> field. On clicking the <b>Search</b> icon, the <b>Role for To Do Type</b> window appears.	Yes (Conditional)  <b>Note:</b> This field is required when you are defining a division-specific To Do role for a To Do type

4. If you want to associate more than one To Do type and To Do role with the division, click the **Add**  icon and then repeat step 3.

**Note:** However, if you want to remove a To Do type and To Do role from the division, click the **Delete**  icon corresponding to the To Do type.

5. Click the **Save** button in the **Page Title** area.

The To Do type and To Do role is associated with the division.

Oracle Revenue Management and Billing may optionally be configured to use the approval workflow process whenever any addition, modification, or deletion is done manually by a user. The approval workflow process routes any changes made to the business objects (such as person, account, contract, division, and so on) to a group of people for approval. The approval workflow process allows you to manage and track all tasks involved in the approval process.

Approval workflow allows you to define the rules for requiring an approval step before the data changes are committed to the database. Once you establish the approval workflow rules, the application manages the business process flow for having data changes approved before they are reflected in the database.

The system provides you with a flexible set of options used to determine when approvals are required, and how the approval process is to be managed including:

- Turning approval on or off for individual business objects within the application
- Grouping business objects so that approval is required for the group rather than the individual business objects within the group
- Who should approve
- How many levels of approvals are required
- Different approval workflow chains based on different criteria

Once you have turned approval workflow on for an object, or a group of objects, the system will use the approval workflow configuration to manage the entire approval process including:

- Determining whether approval is required based on data changes submitted by a user
- Routing approval workflow requests to one or more qualified approvers
- Managing rejected data changes and sending these back to the submitter for resolution
- Committing the changes once all required approvals are received

- *Approval Workflow Reason  
(Used for Viewing)*

## Most Commonly Used Terms

---

Before you understand the approval workflow process, you must familiarize yourself with the following terms:

Term	Description
Submitter	A person who adds, modifies or deletes a business object, such as person, account, contract, and division is called a submitter.
Approver	A person who approves any changes made to a business object is called an approver.
Approval Workflow Group	A group of one or more business objects for which approval is required, under some or all conditions, when data changes are made.
Approval Workflow Chain	The approval workflow chain indicates how many levels of approvals are required to approve the changes made by the submitter.

## Approval Workflow Process

---

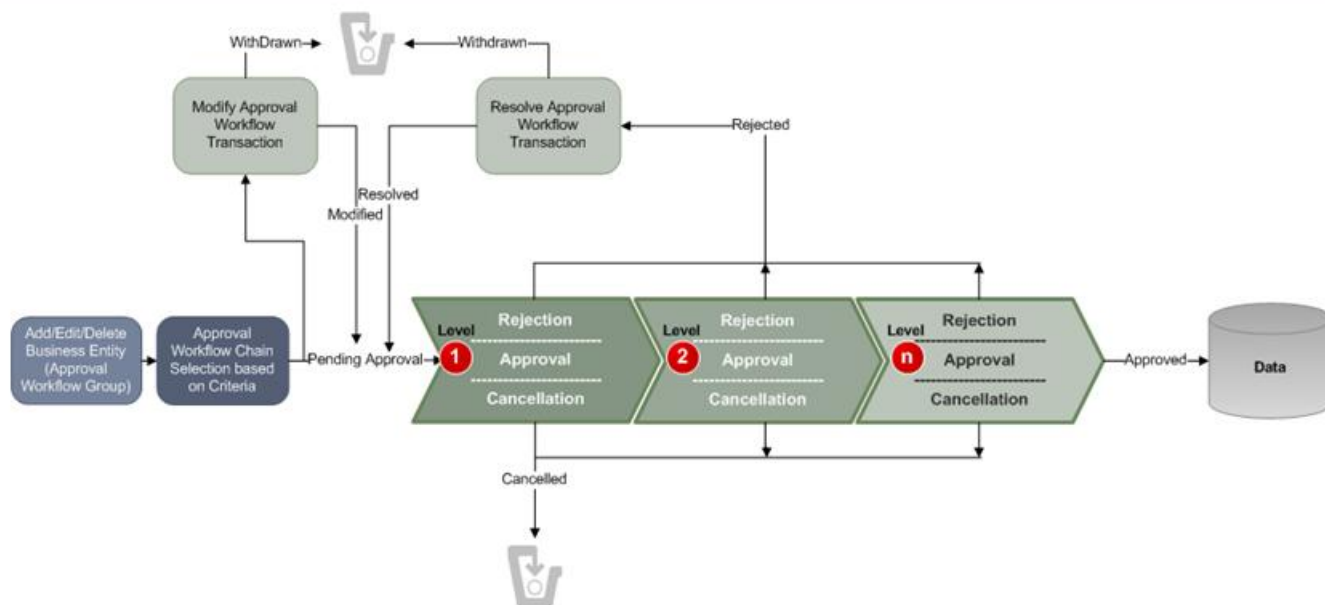

When a submitter adds, edits or deletes a business object (for example, an account) that belongs to an approval workflow group, the system checks whether approval workflow is activated for the approval workflow group. If the approval workflow is activated for the group, the system creates an approval workflow request. Every approval workflow request is uniquely identified in the system through the Approval Transaction ID.

The system identifies the approval workflow chain that must be used for approval depending on the pre-configured conditions or criteria. Based on the number of levels defined in the approval workflow chain, the request is sent to the approver at each level in the chain or hierarchy for approval. When the approver at the first level approves the request, a notification is sent to the approver at the second level for approval. This process continues till the approval is received from all levels in the hierarchy. Once the approvers at all levels approve the request, the changes are committed to the database.

However, if an approver at any level in the hierarchy rejects the request, a notification is sent to the submitter who has made the changes. The submitter then makes the required corrections based on the approver's comments and resubmits the changes for approval. In this case, the approval process starts once again from the beginning and not from the level at which the request was rejected.

The submitter also has the facility to modify the request before the approver at the first level in the hierarchy approves or rejects the request. Once the changes are made, the submitter submits the request for approval. The submitter also has the facility to cancel the request.

The following figure indicates the flow of the approval workflow process:

To implement the approval workflow process, you need to define the following:

- [Approval Workflow Group \(Used for Searching\)](#) on page 708
- [Approval Workflow Chain \(Used for Searching\)](#) on page 725
- [Approval Workflow Criterion Type \(Used for Searching\)](#) on page 732
- [Approval Workflow Group Chain Linkage \(Used for Searching\)](#) on page 738
- [Approval Workflow Reason \(Used for Searching\)](#) on page 755
- [Approval Workflow Setting \(Used for Searching\)](#) on page 748

For price list, price item and price assignment, the approval workflow configuration is shipped with ORMB. The following groups are available in the system:

- **C1PRODUCT** – Contains the C1\_PRICEITEM\_BO business object
- **C1PRICELST** – Contains the C1\_F\_ADDPLBO business object
- **C1PRICEASG** – Contains the C1\_PRICECOMP and C1\_PRICEASGN\_BO business objects

After creating the approval workflow chains, you need to link these groups to the corresponding approval workflow chains. To setup the approval workflow process for price assignment, you need to do the following:

For Price Item	<ol style="list-style-type: none"> <li>1. If a <b>Determine BO</b> algorithm is not specified for the <b>C1_PRICEITEM</b> maintenance object, create a <b>Determine BO</b> algorithm using the <b>F1-MOBO</b> algorithm type and specify <b>C1_PRICEITEM_BO</b> as the business object on this algorithm.</li> <li>2. Attach this algorithm on the <b>Determine BO</b> algorithm spot of the <b>C1_PRICEITEM</b> MO.</li> <li>3. Link the <b>C1PRODUCT</b> group to the appropriate approval workflow chain.</li> <li>4. Activate the approval workflow for the <b>C1PRODUCT</b> group by setting the <b>Active</b> flag corresponding to the group in the <b>Approval Workflow Settings</b> screen to <b>Y</b>.</li> </ol>
----------------	---

For Price List	<ol style="list-style-type: none"> <li>1. If a <b>Determine BO</b> algorithm is not specified for the <b>C1_PRICELIST</b> maintenance object, create a <b>Determine BO</b> algorithm using the <b>F1-MOBO</b> algorithm type and specify <b>C1_F_ADDPLBO</b> as the business object on this algorithm.</li> <li>2. Attach this algorithm on the <b>Determine BO</b> algorithm spot of the <b>C1_PRICELIST</b> MO.</li> <li>3. Link the <b>C1PRICELST</b> group to the appropriate approval workflow chain.</li> <li>4. Activate the approval workflow for the <b>C1PRICELST</b> group by setting the <b>Active</b> flag corresponding to the group in the <b>Approval Workflow Settings</b> screen to <b>Y</b>.</li> </ol>
For Price Assignments	<ol style="list-style-type: none"> <li>1. If a <b>Determine BO</b> algorithm is not specified for the <b>C1_PRICECOMP</b> maintenance object, create a <b>Determine BO</b> algorithm using the <b>F1-MOBO</b> algorithm type and specify <b>C1_PRICECOMP</b> as the business object on this algorithm.</li> <li>2. Attach this algorithm on the <b>Determine BO</b> algorithm spot of the <b>C1_PRICECOMP</b> MO.</li> <li>3. If a <b>Determine BO</b> algorithm is not specified for the <b>C1_PRICEASGN</b> maintenance object, create a <b>Determine BO</b> algorithm using the <b>F1-MOBO</b> algorithm type and specify <b>C1_PRICEASGN_BO</b> as the business object on this algorithm.</li> <li>4. Attach this algorithm on the <b>Determine BO</b> algorithm spot of the <b>C1_PRICEASGN</b> MO.</li> <li>5. Link the <b>C1PRICEASG</b> group to the appropriate approval workflow chain.</li> <li>6. Activate the approval workflow for the <b>C1PRICEASG</b> group by setting the <b>Active</b> flag corresponding to the group in the <b>Approval Workflow Settings</b> screen to <b>Y</b>.</li> </ol>

Similarly, for invoicing group, the approval workflow configuration is shipped with ORMB. The following groups are available in the system:

- **C1IGADD**
- **C1IGUPD**

After creating the approval workflow chains, you need to link these groups to the corresponding approval workflow chains, and activate the approval workflow for these groups by setting the following in the **Approval Workflow Settings** screen:

- Set **Active** flag to **Yes**
- Set **Prevalidation** flag to **Yes**

**Note:** You must set the **Active** flag to **No** for both the groups in case you do not want to activate the approval workflow for invoicing group. If you set the **Active** flag to **Yes** for either of the groups, approval workflow is triggered when you add and/or edit an invoicing group.

## Prerequisites

You need to setup the following prerequisites to implement the approval workflow process:

- **Setup Feature Configuration for Approval Workflow** — If you create new Maintenance Objects (MOs) and want the access control for these MOs in the approval workflow transactions to be based on the access group and division, then you have to create a custom algorithm and attach it to the **Approval Transaction Entity Access Algorithms** option type of the **C1\_AXENTITY** feature configuration. Note that you will then have two access algorithms; one default algorithm (that is, **C1-APPTXN**) and another custom algorithm. For more information

about the **C1\_AXENTITY** feature configuration, see [Setting the C1\\_AXENTITY Feature Configuration](#) on page 2902.

- **Create and Attach Determine BO Algorithm** — To use approval workflow for a business object, check the corresponding maintenance object to see if a **Determine BO** algorithm is already attached to it. If not, create a **Determine BO** algorithm using the **F1-MOBO** algorithm type, and specify the appropriate business object name on the newly created algorithm. Attach this algorithm on the **Determine BO** algorithm spot of the maintenance object.
- **Attach Audit Algorithm to Business Objects** — To use the approval workflow process for a business object, you need to attach the **C1-APPTXNBAS** algorithm on the **Audit** algorithm spot of the business object. Unless you attach the audit algorithm to a business object, the approval workflow process will not be triggered for the respective business object. This step is only required when you are using the base panels. If you have created custom UI maps to enter or modify data for a specific business object, this step is not needed.
- **Attach Validation Algorithms to Business Objects** — The following algorithms are shipped with ORMB:

Business Object	Basic Validation Algorithm	Pending Transaction Validation Algorithm
C1-AppBOChain	C1-GRPCHNALG	C1-APPGRPCHL
C1-AppGrp	C1-GRPALG	C1-APPGROUPV
C1-ApprovalChainEligible	C1-ADMALG	C1-APGBYPORT
C1-ApprovalTransactionChain	C1-APCHALGO	C1-APCHNPEND

The basic validation algorithms are attached to the respective business objects, and then shipped with ORMB. However, the pending transaction validation algorithms are not attached to the respective business objects. If you want to restrict the users from either editing or deleting the approval workflow group, approval workflow settings, approval workflow chain, or approval workflow group chain linkage when the respective approval workflow requests are in the **Pending**, **Work-in-Progress**, or **Rejected** state, then you must attach the pending transaction validation algorithm on the **Validation** algorithm spot of the respective business object.

- **Set Colors for Highlighting during Comparison** — While approving, rejecting, or cancelling approval workflow requests where the submitter action is Update (UPD), you will be able to compare the existing and new data. By default, any modifications are highlighted in the Yellow (9933FF) color and new additions are highlighted in the Purple (FFFF66) color. You can easily change these default colors. For more information on how to set the colors used for highlighting, see [Changing the Highlighting Colors](#).
- **Create To Do Types** — You need to create the To Do types that you want to use in the approval workflow process. Once the To Do type is created, you need to link it to the required To Do roles so that users belonging to the To Do role can view and work on the To Do type.
- **Create To Do Roles** — You need to create the To Do roles that you want to use in the approval workflow process. Once the To Do role is created, you need to add the users whom you want to assign this role.

**Note:** User who is withdrawing the approval workflow request must be assigned to the To Do role to which the approver at the first level in the hierarchy is assigned. Otherwise, the user will not be able to withdraw the approval workflow request.

- **Create Input UI Map for an Approval Workflow Group** — The system provides you with the ability to automatically generate an Input UI map, and associate it with the approval workflow group. Alternatively, you can create an Input UI map manually, and attach it to the approval workflow group. For more information on how to create an Input UI map manually, see [Creating Input UI Map for an Approval Workflow Group](#) on page 2887.
- **Create Display UI Map for an Approval Workflow Group** — The system provides you with the ability to automatically generate a Display UI map, and associate it with the approval workflow group. Alternatively, you can create a Display UI map manually, and attach it to the approval workflow group. For more information on

how to create a Display UI map manually, see [Creating Display UI Map for an Approval Workflow Group](#) on page 2886.

## Approval Transaction

If an approver at any level in the hierarchy rejects a request, a notification is sent to the submitters having the To Do role to resolve. The submitter then makes the required corrections based on the approver's comments, and resubmits the changes for approval. In this case, the approval process starts once again from the beginning, and not from the level at which the request was rejected.

The **Approval Transaction** screen allows you to resolve or withdraw a request. It consists of the following zones:

- [Search Approval Transaction](#)
- [Approval Transaction Log](#)

## Search Approval Transaction

The **Search Approval Transaction** zone allows you to search for an approval transaction using various search criteria. It contains the following two sections:

- **Search Criteria** — The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for an approval transaction using the task or approval transaction details. The valid values are: <ul style="list-style-type: none"> <li>• Task Details</li> <li>• Approval Transaction Details</li> </ul> <div style="border: 1px solid black; padding: 2px;"><b>Note:</b> By default, the <b>Task Details</b> option is selected.</div>	Yes
Status	Used to search approval transactions with a particular status. The valid values are: <ul style="list-style-type: none"> <li>• Approved</li> <li>• Cancelled</li> <li>• Rejected</li> <li>• Inprocess</li> <li>• Pending</li> <li>• Deleted</li> </ul> <div style="border: 1px solid black; padding: 2px;"><b>Note:</b> This field appears only when you select the <b>Approval Transaction Details</b> option from the <b>Search By</b> list.</div>	No

Field Name	Field Description	Mandatory (Yes or No)
Task	<p>Used to search approval transactions with a particular task. The valid values are:</p> <ul style="list-style-type: none"> <li>• Approve</li> <li>• Modify</li> <li>• Resolve</li> </ul> <p><b>Note:</b> This field appears only when you select the <b>Task Details</b> option from the <b>Search By</b> list.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required when you want to search approval transactions using the task details.</p>
Approval Workflow Group	Used to search approval transactions created for the business objects that belong to a particular approval workflow group.	No
Division	<p>Used to search approval transactions which belong to a particular division.</p> <p><b>Note:</b> You can only view those divisions to which you have access in the <b>Division</b> list.</p>	No
Reference ID	Used to search approval transactions created for the business object with a particular reference ID.	No
Approval Transaction ID	Used to search for a particular approval transaction.	No
Created From	Used to search approval transactions which are created from a particular date onwards.	No
Created Until	Used to search approval transactions which are created till a particular date.	No
Action	Used to search approval transactions which are created while adding, updating, or deleting a business object.	No
Submitter ID	<p>Used to search approval transactions which are created by a particular submitter.</p> <p><b>Note:</b></p> <p>This field appears either when you select the <b>Task Details</b> from the <b>Search By</b> list and <b>Approve</b> option from the <b>Task</b> list or when you select the <b>Approval Transaction Details</b> from the <b>Search By</b> list and <b>Processing, Pending, or Deleted</b> option from the <b>Approval Transaction Status</b> list.</p> <p>The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Submitter Id for Status</b> window appears.</p>	No

Field Name	Field Description	Mandatory (Yes or No)
Approver ID	<p>Used to search approval transactions which are rejected by a particular approver.</p> <p><b>Note:</b></p> <p>The <b>Approver ID</b> is displayed when the approval transaction is searched by <b>Task Details</b> and <b>Task is Resolve</b>. It is also displayed when the approval transaction is searched by <b>Approval Transaction Details</b> and Status is <b>Approved, Canceled, or Rejected</b>.</p> <p>The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Approver ID Search</b> window appears.</p>	No

**Note:** You must specify at least one search criterion while searching for an approval transaction. One more search criterion is required when you are searching for an approval transaction using the **Task** field.

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Approval Transaction ID	<p>Displays the approval transaction ID.</p> <p><b>Note:</b> It has a link. The link appears when you select <b>Task Details</b> option from the <b>Search By</b> list. If the <b>Approve</b> option is selected from the <b>Task</b> list then on clicking the link, <b>Comparison: New versus Existing</b> window appears with the compared details of the new and existing approval transactions. If the <b>Modify</b> option is selected from the <b>Task</b> list then on clicking the link, <b>Modify/Resolve Price List Assignment</b> window appears to modify or resolve the details of price list assignment. If the <b>Resolve</b> option is selected from the <b>Task</b> list then on clicking the link, <b>Modify/Resolve Price List Assignment</b> window appears to modify or resolve the details of price list assignment.</p>
Approval Workflow Group	Displays the code of the approval workflow group.
Submitter Name	<p>Displays the name of submitter who submits the approval transaction details list.</p> <p><b>Note:</b> This column appears either when you select the <b>Approve</b> or <b>Modify</b> option from the <b>Task</b> list or when you select the <b>Processing, Pending, or Deleted</b> option from the <b>Approval Transaction Status</b> list.</p>
Approver Name	<p>Displays the name of an approver who approves an approval transaction details list.</p> <p><b>Note:</b> This column appears either when you select the <b>Resolve</b> option from the <b>Task</b> list or when you select the <b>Approved, Canceled, or Rejected</b> option from the <b>Approval Transaction Status</b> list.</p>

Column Name	Column Description
Submitted On	<p>Displays the date and time on which approval transaction is submitted for approval.</p> <p><b>Note:</b> This column appears either when you select the <b>Approve</b> or <b>Modify</b> option from the <b>Task</b> list or when you select the <b>Approved</b>, <b>Pending</b>, or <b>Deleted</b> option from the <b>Approval Transaction Details</b> list.</p>
Action	<p>Indicates the various types of action. The valid values are:</p> <ul style="list-style-type: none"> <li>• Add</li> <li>• Delete (DEL)</li> <li>• Update (UPD)</li> </ul>
Division	Displays the division to which the approval transaction belongs.
Status	<p>Displays the status of approval transaction. The valid values are:</p> <ul style="list-style-type: none"> <li>• Approved</li> <li>• Cancelled</li> <li>• Rejected</li> <li>• Processing</li> <li>• Pending</li> <li>• Deleted</li> </ul> <p><b>Note:</b> This column appears either when you select <b>Approval Transaction Details</b> option from the <b>Search By</b> list of the search criteria.</p>
To Do Type	Displays the type of <b>To Do</b> (notification) received for the approval transaction.
Approval Transaction Information	Displays additional information about the approval transaction.
Rejected On	<p>Displays the date and time on which the transaction is rejected.</p> <p><b>Note:</b> This column appears either when you select the <b>Resolve</b> option from the <b>Task</b> list or when you select the <b>Rejected</b>, option from the <b>Approval Transaction Details</b> list.</p>
Reject Reason	<p>Displays the reason for which the approval transaction is rejected by the approver.</p> <p><b>Note:</b> This column appears either when you select the <b>Resolve</b> option from the <b>Task</b> list or when you select the <b>Rejected</b> option from the <b>Approval Transaction Details</b> list.</p>
Canceled On	<p>Displays the date and time on which the approval transaction is canceled by the user.</p> <p><b>Note:</b> This column appears when you select the <b>Cancelled</b> option from the <b>Approval Transaction Details</b> list.</p>

Column Name	Column Description
Cancel Reason	Displays the reason for which the approval transaction is canceled by the user.  <b>Note:</b> This column appears either when you select the <b>Canceled</b> option from the <b>Approval Transaction Details</b> list.
Withdraw	Displays a link to withdraw an approval transaction.  <b>Note:</b> This column appears either when you select the <b>Modify</b> or <b>Resolve</b> option from the <b>Task</b> list. It has a link and on clicking the link, a message appears to confirm the withdrawal of the respective approval transaction.

On clicking the **Broadcast**  icon corresponding to the approval transaction the **Approval Transaction Log** zone appears with the approval transaction log details.

## Approval Transaction Log

The **Approval Transaction Log** zone displays the complete trail of submitter and approver actions performed on the approval transaction. It contains the following columns:

Column Name	Column Description
Date Time	Displays the date and time when the action was performed on the approval transaction.
User Name	Indicates the user who has performed the action on the approval transaction.
Status	Displays the status of the approval transaction. The valid values are: <ul style="list-style-type: none"> <li>• Approved</li> <li>• Cancelled</li> <li>• Rejected</li> <li>• InProcess</li> <li>• Pending</li> <li>• Deleted</li> </ul>
View	It has a link. On clicking the <b>View</b> link, the <b>Comparison: New versus Existing</b> window appears where you can view the existing and new compared transactions”.
Status Reason	Displays the status reason of the approval transaction.
Comments	Displays additional information about the approval transaction.

By default, the **Banking Approval Transaction Log** zone does not appear. It appears only when you click the **Broadcast**  icon corresponding to the approval transaction in the **Approval Transaction** zone.

You can change the layout of this zone. For more information on how to change the layout, see [Changing the Layout](#) on page 2882.

**Searching for an Approval Transaction****Procedure**

To search for an approval transaction:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Approval Workflow Management** and then click **Approval Transaction**.  
The **Approval Transaction** screen appears.
3. Click the **Search** option from the **Approval Transaction** sub-menu.  
The **Approval Transaction** screen appears.
4. Enter the search criteria in the **Search Approval Transaction** zone depending on whether you want to search for a task or approval transaction details.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search**.  
A list of task or approval transactions that meet the search criteria appears in the **Search Results** section.

## Comparison: New versus Existing

You have to define the reason codes which are used when the approval workflow request is either rejected or cancelled. The reason code helps to indicate the reason why a particular request was rejected or cancelled.

The **Comparison: New versus Existing** screen allows you to view the changes in the new approval transaction compared to the existing one. It contains the following sections:

- New
- Existing

Through this screen you can do the following:

- Approve an approval transaction
- Reject an Approval Transaction
- Cancel an approval transaction
- Modify an approval transaction
- Withdraw an Approval Transaction
- Resolve an approval transaction

## Approving an Approval Transaction

You can view the number of approval transactions which are pending for approval in the **Approval Transaction** screen. The approver can review, and accordingly approve, return to the submitter, revert to the original, or cancel the approval transaction based on the observations.

**Note:** The system will not allow you to approve, return to the submitter, revert to the original or cancel an approval transaction submitted by you.

### **Procedure**

To approve an approval transaction:

1. Search for approval transactions with task details and status as Approve in the **Approval Transaction** screen.
2. In the **Search Results** section, click the link in the **Approval Transaction ID** column corresponding to the approval transaction which you want to review.

The **Comparison: New versus Existing** screen appears.

3. Review the compared existing and new approval transactions.
4. Click **Approve**.

A message appears with confirmation on transaction approved successfully.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **OK**.

The approval transaction is removed from the search results.

**Note:**

By default, any modifications will be highlighted in the Yellow (9933FF) color and new additions will be highlighted in the Purple (FFFF66) color. You can easily change these default colors. For more information on how to set the colors used for highlighting, see [Setting the CI\\_AXENTITY Feature Configuration](#) on page 2902.

6. Review the changes and click **Approve** to accept the changes.

The changes in the approval transaction are approved.

**Rejecting an Approval Transaction****Prerequisites**

To return an approval transaction to its submitter, you should have:

- Rejection reasons defined in the application

**Note:**

While returning an approval transaction, you need to specify the reason why you want to return the approval transaction. You can select the appropriate rejection reason only when you have defined the reasons for the **Rejected** status of the business object in the **Status Reason** screen.

The system will not allow you to approve, return or revert an approval transaction submitted by you.

**Procedure**

To reject an approval transaction:

1. Click the **Menu** link in the **Application** toolbar.

A list appears.

2. In the **Search Results** section, click the link in the **Approval Transaction ID** column corresponding to the approval transaction which you want to review.

The **Comparison: New versus Existing** screen appears.

3. Review the compared existing and new approval transactions.

4. Click Return to Submitter.” With stepresult, “The Rejection/Cancelation Reason window appears. It contains the following fie

Field Name	Field Description	Mandatory (Yes or No)
Approval Workflow Reason	Used to search a particular approval workflow reason.	Yes
Comments	Used to specify additional information while rejecting the usage record.	Yes

5. Enter the required details.
6. Click **OK**.

The approval transaction is removed from the search results.

## Canceling an Approval Transaction

### Prerequisites

To revert an approval transaction to its initial status, you should have:

- Cancellation reasons defined in the application

### **Note:**

While reverting an approval transaction, you need to specify the reason why you want to revert the approval transaction. You can select the appropriate cancellation reason only when you have defined the reasons for the **Canceled** status of the business object in the **Status Reason** screen.

The system will not allow you to approve, return or revert an approval transaction submitted by you.

### Procedure

To cancel an approval transaction:

1. Search for approval transactions with task details and status as Approve in the **Approval Transaction** screen.
2. In the **Search Results** section, click the link in the **Approval Transaction ID** column corresponding to the approval transaction which you want to review.

The **Comparison: New versus Existing** screen appears.

3. Review the compared existing and new approval transactions.
4. Click **Revert to Original**.

The **Rejection/Cancellation Reason** window appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Approval Workflow Reason	Used to search a particular approval workflow reason.	Yes
Comments	Used to specify additional information while rejecting the usage record.	Yes

5. Enter the required details.

A **Comparison: New versus Existing** screen appears where you can view the changes in the new transaction as compared to the existing ones.

**Note:**

By default, any modifications will be highlighted in the Yellow (9933FF) color and new additions will be highlighted in the Purple (FFFF66) color. You can easily change these default colors. For more information on how to set the colors used for highlighting, see [Setting the CI\\_AXENTITY Feature Configuration](#) on page 2902.

6. Click **OK**.

The approval transaction is removed from the search results.

**Modifying an Approval Transaction****Prerequisites**

To modify an approval transaction, you should have:

- Characteristic Types defined in the application.

**Procedure**

To Modify an approval transaction:

1. Search for approval transactions with task details and status as Modify in the **Approval Transaction** screen.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

2. From the **Main** menu, select **Approval Workflow Management** and then click **Approval Transaction**.

A screen appears where you can review the changes, and accordingly modify or resolve the request based on your observations. In case where the submitter action is **Update (UPD)**, you will be able to compare the existing and new data, and accordingly take an action.

3. Modify the required details.
4. Click **Save**.

The modifications made to the approval transaction are saved.

## Withdrawing an Approval Transaction

### Procedure

To withdraw an approval transaction:

1. Click the **Menu** link in the **Application** toolbar.

A list appears.

2. In the **Search Results** section, click the link in the **Withdraw** column corresponding to the approval transaction which you want to withdraw.

A message appears confirming whether you want to withdraw the approval transaction.

3. Click **OK**.

A message appears confirming whether you want to delete the approval transaction.

4. Click **OK**.

The approval transaction is deleted.

## Resolving an Approval Transaction

### Prerequisites

To resolve an approval transaction, you should have:

- Characteristic Types defined in the application.

### Procedure

To resolve an approval transaction:

1. Search for approval transactions with task details and status as Resolve in the **Approval Transaction** screen.

A list appears.

2. In the **Search Results** section, click the link in the **Approval Transaction ID** column corresponding to the approval transaction which you want to resolve.

A screen appears where you can review the changes, and accordingly modify or resolve the request based on your observations. In case where the submitter action is Update (UPD), you will be able to compare the existing and new data, and accordingly take an action.

3. Make the required changes.

4. Click **Save**.

The changes resolve for the approval transaction are saved.

## Approve Price Assignment

The **Approve Price Assignment** screen allows you to search for the price assignment requests that are pending in your workflow for approval. You can review the changes, and accordingly approve, reject or cancel the request based on your observations. It contains the following zones:

- [Search](#) on page 668
- [List of Price Assignments](#) on page 671
- [Approve Price Assignment - Comparison: New versus Existing](#) on page 672
- [Approval Transaction Log](#) on page 661

## Search

The **Search** zone allows you to search for the price assignment requests that are pending in your workflow for approval. It contains the following two sections:

- **Search Criteria** – The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for price assignments using the account, person, price list, submitter ID or transaction ID. The valid values are: <ul style="list-style-type: none"> <li>• Person</li> <li>• Account</li> <li>• Price List</li> <li>• Submitter ID</li> <li>• Approval Transaction ID</li> </ul> <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"><b>Note:</b> By default, the <b>Person</b> option is selected.</div>	Yes
Division	Used to search price assignments which are associated with a particular division. <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"><b>Note:</b> You can only view those divisions to which you have access in the <b>Division</b> list. This field appears only when you select the <b>Person</b> or <b>Account</b> option from the <b>Search By</b> list.</div>	No

Field Name	Field Description	Mandatory (Yes or No)
Person Identifier Type	Used to specify the value for the person identifier type.	Yes (Conditional)  <b>Note:</b> If you enter the person identifier as a search criteria, you have to select the person identifier type.
Person Identifier	Used to specify the ID linked to the person.  <b>Note:</b> This field appears only when you select the <b>Person</b> option from the <b>Search By</b> list.	Yes (Conditional)  <b>Note:</b> If you specify the person identifier type as a search criteria, you have to enter the person identifier.
Account ID	Used to search price assignments which are created for a particular account.  <b>Note:</b> This field appears only when you select the <b>Account</b> option from the <b>Search By</b> list.	No
Account Identifier Type	Used to select the identifier type based on which you want to search price assignments of an account.  <b>Note:</b> This field appears only when you select the <b>Account</b> option from the <b>Search By</b> list.	Yes (Conditional)  <b>Note:</b> If you enter the account identifier as a search criteria, you have to select the account identifier type.
Account Identifier	Used to specify the account whose price assignments you want to view.  <b>Note:</b> This field appears only when you select the <b>Account</b> option from the <b>Search By</b> list.	Yes (Conditional)  <b>Note:</b> If you specify the account identifier type as a search criteria, you have to enter the account identifier.
Price List Description	Used to search price lists with a particular description.  <b>Note:</b> This field appears only when you select the <b>Price List</b> option from the <b>Search By</b> list.	No
Submitter ID	Used to search for price assignment requests that are created by a particular submitter.  <b>Note:</b> This field appears only when you select the <b>Submitter ID</b> option from the <b>Search By</b> list.	No

Field Name	Field Description	Mandatory (Yes or No)
Approval Transaction ID	<p>This field appears only when you select the <b>Approval Transaction ID</b> option from the <b>Search By</b> list.</p> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>The approval transaction ID is generated automatically when the price assignment request is created.</p> <p>This field appears only when you select the <b>Transaction ID</b> option from the <b>Search By</b> list.</p> </div>	No

**Note:** You must specify at least one search criterion while searching for a price assignment.

- **Search Results** – On clicking the **Search** button, the search results appear based on the specified search criteria. It contains the following columns:

Column Name	Column Description
Account ID	<p>Displays the account ID.</p> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This column appears only when you select the <b>Account</b> option from the <b>Search By</b> list.</p> </div>
Account Identifier Type	<p>Indicates the account identifier type of the account for the price assignments.</p> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This column appears only when you select the <b>Account</b> option from the <b>Search By</b> list.</p> </div>
Account Identifier	<p>Displays the value of the account identifier type.</p> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This column appears only when you select the <b>Account</b> option from the <b>Search By</b> list.</p> </div>
Price List ID	<div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This column appears only when you select the <b>Price List</b> option from the <b>Search By</b> list.</p> </div>
Price List Description	<p>Displays the description for the price list.</p> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This column appears only when you select the <b>Price List</b> option from the <b>Search By</b> list.</p> </div>
Person Identifier	<div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This column appears only when you select the <b>Person</b> option from the <b>Search By</b> list.</p> </div>
Person Name	<p>Displays the name of the person.</p> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This column appears only when you select the <b>Person</b> option from the <b>Search By</b> list.</p> </div>
Division	<p>Displays the division to which the account, person, or price list belongs.</p>

Column Name	Column Description
Submitter ID	Displays the ID of the submitter.  <b>Note:</b> This column appears only when you select the <b>Submitter ID</b> option from the <b>Search By</b> list.
Approval Transaction ID	Displays the approval transaction ID.  <b>Note:</b> This column appears only when you select the <b>Approval Transaction ID</b> option from the <b>Search By</b> list.

On clicking the **Broadcast**  icon corresponding to the account, person, price list, or submitter ID the **List of Price Assignments** zone appears with the list of price assignments.

**Approve Price Assignment - Comparison: New versus Existing**

The **Comparison: New versus Existing** zone lists the existing and the new price assignments defined in the system. You can approve, cancel, reject a price assignment through this zone. It contains the following fields:

Field Name	Field Description
Approval Transaction ID	Displays the approval transaction id.
Submitter ID	Displays the submitter id who has created the price assignment request.

Field Name	Field Description
Approval Transaction Information	Displays information about the approval transaction
Action	Indicates the action that can be performed on the price assignment. The valid values are: <ul style="list-style-type: none"> <li>• Add – Allows you to define the tiering setup of the price assignment</li> <li>• DEL – Allows you to delete the tiering setup of the price assignment.</li> <li>• UPD – Allows you to upload the tiering setup of the price assignment.</li> </ul>

In addition to the above fields, this zone also contains the following two sections:

- **New** – It consists of the new approved price assignments.
- **Existing** – It consists of the existing or old price assignments.

In addition, this zone also contains the following buttons:

Button Name	Button Description
Approve	Used to approve the price assignment.
Return to Submitter	Used to reject the price assignment.
Revert to Original	Used to cancel the price assignment.

**Note:**

By default, the **Comparison: New versus Existing** zone does not appear in the **Approve Price Assignment** screen. It appears only when you click the **Broadcast**  icon corresponding to the approval transaction ID in the **List Of Price Assignments** zone.

The changes made are highlighted in both the sections for the respective fields. The fields change according to the price assignments.

You can click on **Approve** button, **Return to Submitter** button, or **Revert to Original** button to **Approve**, **Reject** or **Cancel** the price assignments, respectively.

## Approval Transaction Log

The **Approval Transaction Log** zone displays the complete trail of submitter and approver actions performed on the approval transaction. It contains the following columns:

Column Name	Column Description
Date Time	Displays the date and time when the action was performed on the approval transaction.
User Name	Indicates the user who has performed the action on the approval transaction.
Status	Indicates the status of the approval transaction. The valid values are: <ul style="list-style-type: none"> <li>• Approved</li> <li>• Cancelled</li> <li>• Rejected</li> <li>• Inprocess</li> <li>• Pending</li> <li>• Initial</li> <li>• Deleted</li> </ul>
Status Reason	Indicates the reason why the approval transaction was rejected or cancelled.
Comments	Displays the additional details entered by the approver on rejecting or cancelling the approval transaction.

### Note:

By default, the **Approval Transaction Log** zone does not appear in the **Approve Price Assignment** screen. It appears only when you click the **Broadcast**  icon corresponding to the approval transaction ID in the **List Of Price Assignments** zone.

You can change the layout of this zone. For more information on how to change the layout, see [Changing the Layout](#) on page 2882.

## Approving a Price Assignment for an Account

You can view the number of price assignments which are pending for approval in the **Approve Price Assignment** screen. The approver can review, and accordingly approve, reject or cancel the price assignment based on the observations.

**Note:** The system will not allow you to approve, reject or cancel a price assignment submitted by you.

### Procedure

To approve a price assignment for an account:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Approval Workflow Management** and then click **Approve Price Assignment**.  
The **Approve Price Assignment** screen appears.
3. Enter the search criteria in the **Search** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

4. Click **Search**.  
A list of accounts that meet the search criteria appears in the **Search Results** section.
5. Click the **Broadcast**  icon corresponding to the account whose price assignments you want to review for approval.  
The **List of Price Assignments** zone appears.
6. In the **List of Price Assignments** zone, click the **Broadcast**  icon corresponding to the price assignment whose details you want to review and approve.  
The **Comparison: New Versus Existing** zone appears.

### Note:

By default, any modifications will be highlighted in the Yellow (9933FF) color and new additions will be highlighted in the Purple (FFFF66) color. You can easily change these default colors. For more information on how to set the colors used for highlighting, see [Setting the CI\\_AXENTITY Feature Configuration](#) on page 2902.

Only those users who have access to the application services for each business object within the approval workflow group will be able to view the details of the price assignment request.

7. Review the compared existing and new approval transactions.  
A message appears indicating that the price assignment request is sent to the approver at the next level in the hierarchy for approval. However, if you are the last approver in the hierarchy, a message appears indicating that the price assignment request is approved successfully.
8. Click **Approve**.  
A message appears with confirmation on transaction approved successfully.

**Tip:** Alternatively, in the **List of Price Assignments** zone, you can select the check box corresponding to the price assignment request that you want to approve and then click **Approve**.

9. Click **OK**.

The approval transaction is removed from the **List of Price Assignments** zone.

## Approving a Price Assignment for a Person

### Procedure

To approve a price assignment for a person:

1. Click the **Menu** link in the **Actions/Navigation** area.  
A list appears.
2. From the **Main** menu, select **Approval Workflow Management** and then click **Approve Price Assignment**.  
The **Approve Price Assignment** screen appears.
3. In the **Search** zone, enter the search criteria by selecting **Person** in the **Search By** field.

**Note:**

ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

The **Search Results** appear only when **Person Identifier Type** and **Person Identifier** fields are entered.

4. Click **Search**.  
A list of persons that meet the search criteria appears in the **Search Results** section.
5. Click the **Broadcast**  icon corresponding to the person whose price assignments you want to review for approval.  
The **List of Price Assignments** zone appears.
6. Click the **Broadcast**  icon corresponding to the **Transaction Id** in the **List of Price Assignments** zone, whose details you want to view and approve.  
The **Comparison: New Versus Existing** zone appears.

**Note:**

By default, any modifications will be highlighted in the Yellow (9933FF) color and new additions will be highlighted in the Purple (FFFF66) color. You can easily change these default colors. For more information on how to set the colors used for highlighting, see [Setting the CI\\_AXENTITY Feature Configuration](#) on page 2902.

Only those users who have access to the application services for each business object within the approval workflow group will be able to view the details of the price assignment request.

- Review the pricing details, tiering ranges, and price assignment characteristics, and if they are accurate, then click **Approve**.

A message appears indicating that the price assignment request is sent to the approver at the next level in the hierarchy for approval. However, if you are the last approver in the hierarchy, a message appears indicating that the price assignment request is approved successfully.

- Click **OK**.

A To Do (notification) is sent to the approver at the next level in the hierarchy. You will no longer be able to view this request in your workflow for approval. In case you are the last approver in the hierarchy, the changes are committed to the database.

**Tip:** Alternatively, in the **List of Price Assignments** zone, you can select the check box corresponding to the price assignment request that you want to approve, and then click **Approve**.

## Modify Price Assignment

The submitter has the facility to modify or withdraw a price assignment request before the approver at the first level in the hierarchy approves or rejects the request. Once the changes are made, the submitter submits the request for approval.

The **Modify Price Assignment** screen allows you to modify or withdraw a price assignment request. It contains the following zones:

- [Search](#) on page 686
- [List of Price Assignments](#) on page 701

### Search

The **Search** zone allows you to search for the price assignment request using various search criteria. This zone contains the following two sections:

- **Search Criteria** – The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	<p>Used to indicate whether you want to search for price assignments using the account, person, price list, submitter ID or transaction ID. The valid values are:</p> <ul style="list-style-type: none"> <li>• Person</li> <li>• Account</li> <li>• Price List</li> <li>• Submitter ID</li> <li>• Approval Transaction ID</li> </ul> <p><b>Note:</b> By default, the <b>Person</b> option is selected.</p>	Yes
Division	<p>Used to search price assignments which are associated with a particular division.</p> <p><b>Note:</b> You can only view those divisions to which you have access in the <b>Division</b> list. This field appears only when you select the <b>Person</b> or <b>Account</b> option from the <b>Search By</b> list.</p>	No
Person Identifier Type	<p>Used to select the identifier type based on which you want to search price assignments through which the person's record is created or updated in the system.</p> <p><b>Note:</b> This field appears only when you select the <b>Person</b> option from the <b>Search By</b> list.</p>	Yes (Conditional) <b>Note:</b> If you enter the person identifier as a search criteria, you have to select the person identifier type.
Person Identifier	<p>Used to specify the value for the person identifier type.</p>	Yes (Conditional) <b>Note:</b> If you specify the person identifier type as a search criteria, you have to enter the person identifier.
Account ID	<p>Used to search price assignments which are created for a particular account.</p> <p><b>Note:</b> This field appears only when you select the <b>Account</b> option from the <b>Search By</b> list.</p>	No
Account Identifier Type	<p>Used to select the identifier type based on which you want to search price assignments of an account.</p> <p><b>Note:</b> This field appears only when you select the <b>Account</b> option from the <b>Search By</b> list.</p>	Yes (Conditional) <b>Note:</b> If you enter the account identifier as a search criteria, you have to select the account identifier type.

Field Name	Field Description	Mandatory (Yes or No)
Account Identifier	Used to specify the account whose price assignments you want to view.  <b>Note:</b> This field appears only when you select the <b>Account</b> option from the <b>Search By</b> list.	Yes (Conditional)  <b>Note:</b> If you specify the account identifier type as a search criteria, you have to enter the account identifier.
Price List Description	Used to search price lists with a particular description.  <b>Note:</b> This field appears only when you select the <b>Price List</b> option from the <b>Search By</b> list.	No
Submitter ID	Used to search for price assignment requests that are created by a particular submitter.  <b>Note:</b> This field appears only when you select the <b>Submitter ID</b> option from the <b>Search By</b> list.	No
Approval Transaction ID	Used to search the price assignment request using the approval transaction ID.  <b>Note:</b> The approval transaction ID is generated automatically when the price assignment request is created. This field appears only when you select the <b>Approval Transaction ID</b> option from the <b>Search By</b> list.	No

**Note:** You must specify at least one search criterion while searching for a price assignment.

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Person Identifier	Indicates the person for whom the price assignment is created.  <b>Note:</b> This column appears only when you select the <b>Person</b> or <b>Submitter ID</b> option from the <b>Search By</b> list.
Person Name	Displays the name of the person.  <b>Note:</b> This column appears only when you select the <b>Person</b> or <b>Submitter ID</b> option from the <b>Search By</b> list.
Person Identifier Type	Displays the person identifier type.  <b>Note:</b> This column appears only when you select the <b>Submitter ID</b> option from the <b>Search By</b> list.
Division	Displays the division to which the account, person, or price list belongs.

Column Name	Column Description
Account Information	<p>Displays information about the account. In addition, this column has a context menu which helps in navigating to other screens in the application.</p> <p><b>Note:</b></p> <p>This column appears only when you select the <b>Account</b> or <b>Submitter ID</b> option from the <b>Search By</b> list.</p> <p>It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account.</p>
Account Identifier Type	<p>Indicates the account identifier type of the account for the price assignments.</p> <p><b>Note:</b> This column appears only when you select the <b>Account</b> or <b>Submitter ID</b> option from the <b>Search By</b> list.</p>
Account Identifier	<p>Displays the value of the account identifier type.</p> <p><b>Note:</b> This column appears only when you select the <b>Account</b> or <b>Submitter ID</b> option from the <b>Search By</b> list.</p>
Price List ID	<p>Displays the price list ID.</p> <p><b>Note:</b> This column appears only when you select the <b>Price List</b> option from the <b>Search By</b> list.</p>
Price List Description	<p>Displays the description for the price list.</p> <p><b>Note:</b> This column appears only when you select the <b>Price List</b> option from the <b>Search By</b> list.</p> <p><b>Note:</b> This column appears only when you are searching for price assignment requests of a price list.</p>
Submitter ID	<p>Displays the ID of the submitter.</p> <p><b>Note:</b> This column appears only when you select the <b>Submitter ID</b> option from the <b>Search By</b> list.</p>

On clicking the **Broadcast**  icon corresponding to the account, person, price list, or submitter ID the **List of Price Assignments** zone appears with the list of price assignments.

## List of Price Assignments

The **List of Price Assignments** zone lists price assignment requests specific to an account, a person, or a price list. It contains the following columns:

Column Name	Column Description
Approval Transaction ID	Displays the approval transaction ID.  <b>Note:</b> The approval transaction id is generated automatically when the price assignment request is created.
Submitter Name	Indicates the submitter who has created the price assignment request.
Action	Indicates the type of action, such as <b>Add</b> , <b>Update (UPD)</b> , or <b>Delete (DEL)</b> , performed by the submitter during price assignment.
Submitted On	Displays the date and time when the price assignment request was created by the submitter.
To Do Type	Displays the type of To Do (notification) received for the price assignment request.
Price Item	Displays the price item or price item code.
Description	Displays the description of the price item or price item code.
Pricing Currency	Indicates the currency in which the price item pricing is defined.
Start Date	Displays the date from when the price item pricing is effective.
End Date	Displays the date till when the price item pricing is effective.
Approval Transaction Information	Displays information about the approval transaction.  <b>Note:</b> This information string is generated using the <b>C1-APPTXNINF</b> algorithm.
Modify	It has a link. On clicking the <b>Modify</b> link, the <b>Modify/Resolve Price Assignment</b> screen appears where you can modify the price assignment.
Withdraw	It has a link. On clicking the <b>Withdraw</b> link, you can withdraw and remove the approval transaction from the list of price assignments.
View	It has a link. On clicking the <b>Log</b> link, you can view the approval transaction log details.

By default, the **List of Price Assignments** zone does not appear in the **Modify Price Assignment** screen. It appears only when you click the **Broadcast**  icon corresponding to the account, person, or price list in the **Search** zone.

## Modifying a Price Assignment for an Account

You can view the number of price assignments which are pending for modification in the **Modify Price Assignment** screen. The modifier can review, and accordingly modify, withdraw or view log of the price assignment based on the observations.

### Procedure

To modify a price assignment for an account:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Approval Workflow Management** and then click **Modify Price Assignment**.  
The **Modify Price Assignment** screen appears.
3. Enter the search criteria in the **Search** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

4. Click **Search**.  
A list of accounts that meet the search criteria appears in the **Search Results** section.
5. Click the **Broadcast**  icon corresponding to the account whose price assignments you want to review.  
The **List of Price Assignments** zone appears.
6. Click the **Modify** link in the **Modify** column corresponding to the price assignment that you want to modify.  
The **Modify/Resolve Price Assignment** screen appears.

**Note:** Only those users who have access to the application services for each business object within the approval workflow group will be able to modify the details of the price assignment request.

7. Make the required changes.
8. Modify the required details.

The changes made to the price assignment are saved.

## Modifying a Price Assignment for a Person

### Procedure

To modify a price assignment for a person:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Approval Workflow Management** and then click **Modify Price Assignment**.  
The **Modify Price Assignment** screen appears.
3. In the **Search** zone, enter the search criteria, such as the division to which the person belongs or the person identification type and value.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

4. Click **Search**.  
A list of persons that meet the search criteria appears in the **Search Results** section.
5. Click the **Broadcast**  icon corresponding to the person whose price assignment requests you want to modify.  
The **List of Price Assignments** zone appears.
6. Click the **Modify** link in the **Modify** column corresponding to the price assignment request that you want to modify.  
The **Modify/Resolve Price Assignment** screen appears where you can modify the pricing details, tiering ranges, and price assignment characteristics.

**Note:** Only those users who have access to the application services for each business object within the approval workflow group will be able to modify the details of the price assignment request.

7. Make the required changes.
8. Click **Save**.  
The price assignment for a person is updated.

## **Resolve Price Assignment**

---

If an approver at any level in the hierarchy rejects a price assignment request, a notification is sent to the submitter who has made the changes. The submitter then makes the required corrections based on the approver’s comments, and resubmits the changes for approval. In this case, the approval process starts once again from the beginning, and not from the level at which the request was rejected.

The **Resolve Price Assignment** screen allows you to resolve or withdraw a price assignment request. It consists of the following zones:

- [Search](#) on page 697
- [List of Price Assignments](#) on page 701

### **Search**

The **Search** zone allows you to search for the price assignment requests rejected by approvers and pending for you to resolve. It contains the following two sections:

- Search Criteria** — The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	<p>Used to indicate whether you want to search price assignments using various details. The valid values are:</p> <ul style="list-style-type: none"> <li>• Person</li> <li>• Account</li> <li>• Price List</li> <li>• Submitter ID</li> <li>• Approver Transaction ID</li> </ul> <p><b>Note:</b> By default, the <b>Person</b> option is selected.</p>	Yes
Division	<p>Used to search price assignments which belong to a particular division.</p> <p><b>Note:</b> You can only view those divisions to which you have access in the <b>Division</b> list.</p>	No
Person Identifier Type	<p>Used to specify the identifier type based on which you want to search for price assignment requests of a person.</p> <p><b>Note:</b> This field appears only when you select the <b>Person</b> option from the <b>Search By</b> list.</p>	Yes (Conditional) <b>Note:</b> If you enter the person identifier as a search criteria, you have to select the person identifier type.
Person Identifier	<p>Used to specify the ID linked to the person.</p> <p><b>Note:</b> This field appears only when you select the <b>Person</b> option from the <b>Search By</b> list.</p>	Yes (Conditional) <b>Note:</b> If you specify the person identifier type as a search criteria, you have to enter the person identifier.
Account ID	<p>Used to search for price assignment requests created for an account.</p> <p><b>Note:</b> This field appears only when you select the <b>Account</b> option from the <b>Search By</b> list.</p>	No
Account Identifier Type	<p>Used to specify the account identifier type of the account whose price assignment requests you want to search.</p> <p><b>Note:</b> This field appears only when you select the <b>Account</b> option from the <b>Search By</b> list.</p>	Yes (Conditional) <b>Note:</b> If you enter the account identifier as a search criteria, you have to select the account identifier type.
Account Identifier	<p>Used to specify the value of the account identifier type.</p> <p><b>Note:</b> This field appears only when you select the <b>Account</b> option from the <b>Search By</b> list.</p>	Yes (Conditional) <b>Note:</b> If you specify the account identifier type as a search criteria, you have to enter the account identifier.

Field Name	Field Description	Mandatory (Yes or No)
Price List Description	Used to search for price assignment requests created for a price list.  <b>Note:</b> This field appears only when you select the <b>Price List</b> option from the <b>Search By</b> list.	No
Submitter ID	Used to search for price assignment requests that are created by a particular submitter.  <b>Note:</b> This field appears only when you select the <b>Submitter ID</b> option from the <b>Search By</b> list.	No
Approval Transaction ID	Used to search the price assignment request using the approval transaction ID.  <b>Note:</b> The approval transaction ID is generated automatically when the price assignment request is created.  This field appears only when you select the <b>Approval Transaction ID</b> option from the <b>Search By</b> list.	No

**Note:** You must specify at least one search criterion while searching for a price assignments.

- **Search Results** — On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Person Identifier	Displays the ID linked to the person.  <b>Note:</b> This column appears only when you are searching for price assignment requests of a person.
Person Name	Displays the name of the person.  <b>Note:</b> This column appears only when you are searching for price assignment requests of a person.
Division	Displays the division to which the account, person, or price list belongs.
Account Information	Displays information about the account. In addition, this column has a context menu which helps in navigating to other screens in the application.  <b>Note:</b> This column appears only when you are searching for price assignment requests of an account.  It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account.

Column Name	Column Description
Account Identifier Type	Displays the account identifier type. <b>Note:</b> This column appears only when you are searching for price assignment requests of an account.
Account Identifier	Displays the value of the account identifier type. <b>Note:</b> This column appears only when you are searching for price assignment requests of an account.
Price List ID	Displays the price list ID. <b>Note:</b> This column appears only when you are searching for price assignment requests of a price list.
Price List Description	Displays the description of the price list. <b>Note:</b> This column appears only when you are searching for price assignment requests of a price list.
Owner ID	Displays the ID of the person for whose account the approval workflow request is created.
Approval Transaction ID	Displays the approval transaction ID. <b>Note:</b> The approval transaction ID is generated automatically when the price assignment request is created.
Person Identifier Type	Displays the person identifier type. <b>Note:</b> This column appears only when you are searching for price assignment requests of a person.

On clicking the **Broadcast**  icon corresponding to the account, person, or price list, the **List of Price Assignments** zone appears.

How to withdraw a price assignment for a price list	<a href="#">Withdrawing a Price Assignment for a Price List</a> on page 706

## List of Price Assignments

The **List of Price Assignments** zone lists price assignment requests specific to an account, a person, or a price list. It contains the following columns:

Column Name	Column Description
Approval Transaction ID	Displays the approval transaction ID.  <b>Note:</b> The approval transaction ID is generated automatically when the price assignment request is created.
Submitter Name	Indicates the submitter who has created the price assignment request.
Action	Indicates the type of action, such as <b>Add</b> , <b>Update (UPD)</b> , or <b>Delete (DEL)</b> performed by the submitter during price assignment.
Submitted On	Displays the date and time when the price assignment request was created by the submitter.
To Do Type	Displays the type of To Do (notification) received for the price assignment request.
Price Item	Displays the price item code.
Description	Displays the description of the product.
Pricing Currency	Indicates the currency in which the product pricing is defined.
Start Date	Displays the date from when the product pricing is effective.
End Date	Displays the date till when the product pricing is effective.
Approver Name	Indicates the approver who has rejected the price assignment request.
Rejected On	Displays the date and time when the price assignment request was rejected by an approver.
Reject Reason	Indicates the reason why the price assignment request was rejected.
Rejection Comments	Displays the additional details entered by an approver on rejecting the price assignment request.
Approval Transaction Information	Displays information about the approval transaction.  <b>Note:</b> This information string is generated using the <b>C1-APPTXNINF</b> algorithm.
Resolve	On clicking the <b>Resolve</b> link, you can modify the details of the price assignment request, and resubmit it for approval. On resubmitting, the approval workflow process starts once again from the first level in the hierarchy.
Withdraw	On clicking the <b>Withdraw</b> link, you can withdraw the price assignment request. Once you withdraw the request, no further action will be taken on the request.
View	On clicking the <b>Log</b> link, you can view the log of the price assignment request from the <b>Resolve Price Assignment</b> screen before resolving or withdrawing a request.

By default, the **List of Price Assignments** zone does not appear in the **Resolve Price Assignment** screen. It appears only when you click the **Broadcast**  icon corresponding to the account, person, or price list in the **Search** zone.

## Resolving a Price Assignment for an Account

### Procedure

To resolve a price assignment for an account:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Approval Workflow Management** and then click **Resolve Price Assignment**.  
The **Resolve Price Assignment** screen appears.
3. In the **Search** zone, enter the search criteria, such as the division to which the account belongs, account ID, or account identifier.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

4. Click **Search**.  
A list of accounts that meet the search criteria appears in the **Search Results** section.
5. Click the **Broadcast**  icon corresponding to the account whose price assignment requests you want to resolve.  
The **List of Price Assignments** zone appears.
6. Click the **Resolve** link in the **Resolve** column corresponding to the price assignment request that you want to resolve.  
The **Modify/Resolve Price Assignment** screen appears where you can modify the pricing details, tiering ranges, and price assignment characteristics.

**Note:** Only those users who have access to the application services for each business object within the approval workflow group will be able to resolve the request and resubmit it for approval.

7. Make the required changes.
8. Click **Save**.  
The price assignment is updated and resubmitted for approval.

## Resolving a Price Assignment for a Person

### Procedure

To resolve a price assignment for a person:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Approval Workflow Management** and then click **Resolve Price Assignment**.  
The **Resolve Price Assignment** screen appears.
3. In the **Search** zone, enter the search criteria, such as the division to which the person belongs or the person identification type and value.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

4. Click **Search**.  
A list of persons that meet the search criteria appears in the **Search Results** section.
5. Click the **Broadcast**  icon corresponding to the person whose price assignment requests you want to resolve.  
The **List of Price Assignments** zone appears.
6. Click the **Resolve** link in the **Resolve** column corresponding to the price assignment request that you want to resolve.

A screen appears where you can modify the pricing details, tiering ranges, and price assignment characteristics.

**Note:** Only those users who have access to the application services for each business object within the approval workflow group will be able to resolve the request, and resubmit it for approval.

7. Make the required changes.
8. Click **Save**.  
The price assignment is updated and resubmitted for approval.

## Withdrawing a Price Assignment for an Account

### Procedure

To withdraw a price assignment for an account:

1. Click the **Menu** link in the **Application** toolbar.

A list appears.

- Do the following:

If you want to...	Then...
Withdraw a price assignment request when it is in the Pending Approval status	From the <b>Main</b> menu, select <b>Approval Workflow Management</b> and then click <b>Modify Price Assignment</b> . The <b>Modify Price Assignment</b> screen appears.
Withdraw a price assignment request when it has been rejected by an approver at any level in the hierarchy	From the <b>Main</b> menu, select <b>Approval Workflow Management</b> and then click <b>Resolve Price Assignment</b> . The <b>Resolve Price Assignment</b> screen appears.

- In the **Search** zone, enter the search criteria, such as the division to which the account belongs, account ID, or account identifier.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

- Click **Search**.

A list of accounts that meet the search criteria appears in the **Search Results** section.

- Click the **Broadcast**  icon corresponding to the account whose price assignment requests you want to withdraw.

The **List of Price Assignments** zone appears.

**Note:** The system provides you with a facility to view the log of a price assignment request from the **Modify Price Assignment** and **Resolve Price Assignment** screens before withdrawing a request.

- Click the **Withdraw** link in the **Withdraw** column corresponding to the price assignment request that you want to withdraw.

A message box appears confirming whether you want to delete the price assignment request.

- Click **OK**.

You will no longer be able to view this request in your workflow.

Approval Workflow Group zone	<a href="#">Search Approval Workflow Group</a> on page 708

## Defining an Approval Workflow Group

### Prerequisites

To define an approval workflow group, you should have:

- Input and Display UI maps created in the application in case you want to use custom UI maps.
- Dependency, Approval, and Approval Post Processing algorithms defined in the application in case you want to use any of them.

**Note:** Before you define an approval workflow group for the User BO, you need to attach the **C1-APPTXNBAS** algorithm on the **Audit** algorithm spot of the business object belonging to the USER-SC MO, and not the USER MO.

### Procedure

To define an approval workflow group:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, Select **A** and then click **Approval Workflow Group**.  
The **Approval Workflow Group** screen appears.
3. Click the **Add** button in the **Page Title** area of **Approval Workflow Group** screen.

The **Approval Workflow Group** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the approval workflow group.
- **Business Objects and Group BO Relation** - Used to add business objects and define group BO Relation for the approval workflow group.

The **Main** section contains the following:

Field Name	Field Description	Mandatory (Yes or No)
Approval Transaction Type	Used to indicate the transaction type to which the approval workflow group belongs.	Yes
Approval Workflow Group	Used to specify the approval workflow group.	Yes
Description	Used to specify the approval workflow group with a particular description.	Yes
Display UI Map	<p>Used to specify the UI map that you want to use for viewing data of the business objects within the approval workflow group.</p> <p><b>Note:</b> You can search for a UI map, code, and an algorithm by clicking the <b>Search</b> icon () corresponding to the Display UI Map field.</p> <p><b>Note:</b> If you clear the <b>Display UI Map</b> field, you need to either manually specify the UI map or automatically regenerate the UI map by clicking the <b>Regenerate UI Maps</b> icon corresponding to the group in the <b>Approval Workflow Settings</b> screen.</p>	No
Input UI Map	<p>Used to specify the UI map that you want to use for modifying data of the business objects within the approval workflow group.</p> <p><b>Note:</b> You can search for a UI map, code, and an algorithm by clicking the <b>Search</b> icon () corresponding to the Input UI Map field.</p> <p><b>Note:</b> If you clear the <b>Input UI Map</b> field, you need to either manually specify the UI map or automatically regenerate the UI map by clicking the <b>Regenerate UI Maps</b> icon corresponding to the group in the <b>Approval Workflow Settings</b> screen.</p>	No
Dependency Algorithm	<p>Used to specify the algorithm that will be triggered before creating the approval workflow group.</p> <p><b>Note:</b> You can search for a Input UI map, code, and an algorithm by clicking the <b>Search</b> icon () corresponding to the Dependency Algorithm field.</p> <p><b>Note:</b> This algorithm can be used to check all prerequisites before creating the approval workflow group.</p>	No

Field Name	Field Description	Mandatory (Yes or No)
Approval Algorithm	<p>Used to specify the algorithm that will be triggered after the approval workflow group is approved by the approver at the last level in the hierarchy. The following approval algorithms are shipped with ORMB:</p> <ul style="list-style-type: none"> <li>• <b>C1-APPPROD</b> - This approval algorithm is used for the C1PRODUCT group, which is shipped with ORMB.</li> <li>• <b>C1-APPPL</b> - This approval algorithm is used for the C1PRICELST group, which is shipped with ORMB.</li> <li>• <b>C1-APPASG</b> - This approval algorithm is used for the C1PRICEASG group, which is shipped with ORMB.</li> <li>• <b>C1-APPALG</b> - This is a standard approval algorithm that you can use for approval workflow groups where custom logic is not required.</li> </ul> <p>You can also create your own approval algorithms for custom UIs.</p> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> You can search for a Input UI map, code, and an algorithm by clicking the <b>Search</b> icon  corresponding to the Approval Algorithm field.</p> </div>	No
Approval Post Processing Algorithm	<p>Used to specify the algorithm that will be triggered after the changes (which are approved by all approvers' in the hierarchy) are committed to the database.</p> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> You can search for a Input UI map, code, and an algorithm by clicking the <b>Search</b> icon  corresponding to the Approval Post Processing Algorithm field.</p> </div>	No

Field Name	Field Description	Mandatory (Yes or No)
Transaction Creation Algorithm	<p>Used to specify the algorithm that will create approval workflow group. The following transaction creation algorithms are shipped with ORMB:</p> <ul style="list-style-type: none"> <li>• <b>C1-APPASGCR</b> - Used to create approval workflow group for price assignment.</li> <li>• <b>C1-AXPROD</b> - Used to create approval workflow group for price item.</li> <li>• <b>C1-AXUSR</b> - Used to create approval workflow group for user.</li> <li>• <b>C1-IGCREATE</b> - Used to create approval workflow group for invoicing group.</li> <li>• <b>C1-AXCREATE</b> - This is a standard transaction creation algorithm that you can use to create approval workflow group for most of the base objects.</li> </ul> <p>You can also create your own transaction creation algorithms for custom UIs.</p> <p>In case of the base UIs, this algorithm is only used while modifying or resolving a group. The initial approval transaction creation for base UIs takes place through the Audit algorithm attached on the business object.</p> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> You can search for a Input UI map, code, and an algorithm by clicking the <b>Search</b> icon  corresponding to the Transaction Creation Algorithm field.</p> </div>	Yes
Data Retrieval Algorithm	<p>Used to specify the algorithm that will be triggered to retrieve the original data of the business objects within the approval workflow group. This will help an approver to compare the original and new data in case where the submitter action is Update (UPD). The following data retrieval algorithms are shipped with ORMB:</p> <ul style="list-style-type: none"> <li>• <b>C1-APPIGDR</b> - Used to retrieve data for invoicing group.</li> <li>• <b>C1-AXPRICEOV</b> - Used to retrieve data for price assignment.</li> <li>• <b>C1_APPDATA</b> - This is a standard data retrieval algorithm that you can use to retrieve data for most of the base objects.</li> </ul> <p>You can also create your own data retrieval algorithms for custom UIs.</p> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> You can search for a Input UI map, code, and an algorithm by clicking the <b>Search</b> icon  corresponding to the Data Retrieval Algorithm field.</p> </div>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Information Algorithm	Used to specify the algorithm information.  <b>Note:</b> You can search for a Input UI map, code, and an algorithm by clicking the <b>Search</b> icon (🔍) corresponding to the Approval Post Processing Algorithm field.	No
Compare Map	Used to specify the customized Display UI map that you want to use for the approval workflow group. It overrides the UI map specified in the <b>Display UI Map</b> field.  <b>Note:</b> You can search for a Input UI map, code, and an algorithm by clicking the <b>Search</b> icon (🔍) corresponding to the Approval Post Processing Algorithm field.	No
Input Script	Used to specify the customized Input UI map that you want to use for the approval workflow group. It overrides the UI map specified in the <b>Input UI Map</b> field.  <b>Note:</b> You can search for a Input UI map, code, and an algorithm by clicking the <b>Search</b> icon (🔍) corresponding to the Approval Post Processing Algorithm field.	No

4. Enter the required details.
5. Add business objects and group BO relation with the approval workflow group, if required.
6. Click **Save**.

The approval workflow group is defined.

How to add business objects and group BO relation	<a href="#">Adding a Business Object</a>

## Adding a Business Object

### Prerequisites

To add a business object in the approval workflow group, you should have:

- Business object and approval workflow group created in the application.

### Procedure

To add a business object in the approval workflow group:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, Select **A**, and then click **Approval Workflow Group**.

The **Approval Workflow Group** screen appears.

- Click the **Add** button in the page-title area of the **Approval Workflow Group** screen.

The **Approval Workflow Group** screen appears. It contains following sections:

- Main** - Used to specify basic details of the approval workflow group.
- Business Objects and Group BO Relation** - Used to specify the fields that allow to define business and parent objects and link them with the approval workflow group.

The **Business Objects and Group BO Relation** section contains following fields:

Field Name	Field Description	Mandatory (Yes or No)
Business Object	Used to specify the Business Object Code that you want to include in the Approval Workflow Group.	Yes
Reference ID 1	Used to specify the XPATH key of the field in the business object that you want to display in the approval transaction information string.	Yes
Reference ID 2	Used to specify the XPATH key of the field in the business object that you want to display in the approval transaction information string.	Yes
Reference ID 3	Used to specify the XPATH key of the field in the business object that you want to display in the approval transaction information string.	Yes
Reference ID 4	Used to specify the XPATH key of the field in the business object that you want to display in the approval transaction information string.	Yes
Reference Foreign Key 1	Used to specify the XPATH key of the field in the business object that you want to use for validating whether duplicate approval transaction exists in the system.	No
Reference Foreign Key 2	Used to specify the XPATH key of the field in the business object that you want to use for validating whether duplicate approval transaction exists in the system.	No
Reference Foreign Key 3	Used to specify the XPATH key of the field in the business object that you want to use for validating whether duplicate approval transaction exists in the system.	No
Reference Foreign Key 4	Used to specify the XPATH key of the field in the business object that you want to use for validating whether duplicate approval transaction exists in the system.	No
Reference Foreign Key 5	Used to specify the XPATH key of the field in the business object that you want to use for validating whether duplicate approval transaction exists in the system.	No
Reference Foreign Key 6	Used to specify the XPATH key of the field in the business object that you want to use for validating whether duplicate approval transaction exists in the system.	No

Field Name	Field Description	Mandatory (Yes or No)
List	Used to indicate whether the group contains one or multiple instance of the business object. For example, if you want to create a group that contains multiple account objects, you need to set this flag for the Account BO to True. If you want to create a group that contains single instance of the business object, you must set this flag for the business object to False.	Yes
Parent Business Object	Used to specify the parent business object. This should be one of the business objects within the group.	No
From Key	Used to specify the XPATH key of the field or list of fields in the parent business object.	No
To Key	Used to specify the XPATH key of the field or list of fields in the current business object.	No

**Note:** You can search for a business object and parent business object, by clicking the **Search** () icon placed corresponding to the **Business Object** field.

- If you want to define more than one business and parent business object for the approval workflow group, click the **Add** () icon placed corresponding to the field.
- Enter the required details in **Main** and **Business Objects and Group BO Relation** sections.
- Click **Save**

The business object is added in the approval workflow group.

**Note:** When you add business objects in an approval workflow group, you need to regenerate the Input and Display UI maps by clicking the **Regenerate UI Maps** () icon corresponding to the group in the **Approval Workflow Settings** screen. You must do this only when you are using automatically generated UI maps, and not otherwise.

## Defining a Group BO Relation

### Prerequisites

To define a relationship between business object in the approval workflow group, you should have:

- Business objects added in the approval workflow group.

### Procedure

To define a relationship between business objects in the approval workflow group:

- Click the **Admin** link in the **Application** toolbar.  
A list appears.
- From the **Admin** menu, Select **A** and then click **Approval Workflow Group**.  
The **Approval Workflow Group** screen appears.

3. Search for an approval workflow group in the **Approval Workflow Group** screen.
4. In the **Search Results** section, click the link in the **Description** column corresponding to the approval workflow group.
5. The **Approval Workflow Group** screen appears. It contains following sections:
  - **Main** - Used to specify basic details of the approval workflow group.
  - **Business Objects and Group BO Relation** - Used to specify the fields that allow to define business and parent objects, and link them with the approval workflow group.
6. Define and edit the approval workflow group details from the **Main** section, if required.
7. If you only want to define a business object, enter the required details in the **Business Objects and Group BO Relation** section.
8. If you want to define a group BO relation with the business object, enter the required details in the following fields.
  - a) **Parent Business Object**
  - b) **From Key**
  - c) **To Key**

**Note:** If you want to define more than one business or parent object, click the **Add** (+) icon and then repeat step 2. However, if you want to remove a business or parent object, click the **Delete** (🗑️) icon corresponding to the business or parent object field.

9. Click **Save**.

The business object is defined, and its relationship with the parent object is also defined in the approval workflow group.

## **Approval Workflow Group (Used for Viewing)**

Once you define an approval workflow group, the **Approval Workflow Group** screen allows you to:

- Edit the details of an approval workflow group
- Edit the details of business objects and group business object relation
- Delete an approval workflow group
- Delete a business object and a group business object relation
- View the details of an approval workflow group

This screen consists of the following zone:

- [Approval Workflow Group](#) on page 718

## Approval Workflow Group

The **Approval Workflow Group** zone displays the details of the approval workflow group. It contains the following sections:

- **Main** - Displays basic information about the approval workflow group. It contains the following fields:

Field Name	Field Description
Approval Workflow Group	Displays the name of the approval workflow group.
Description	Displays the description of the approval workflow group.
Display UI Map	Indicates the UI map that will be used for viewing data of the business objects within the approval workflow group.  <b>Note:</b> It has a link. On clicking the link, the <b>UI Map</b> screen appears where you can view the details of the respective UI Map.
Input UI Map	Indicates the UI map that will be used for modifying data of the business objects within the approval workflow group.  <b>Note:</b> It has a link. On clicking the link, the <b>UI Map</b> screen appears where you can view the details of the respective UI Map.
Dependency Algorithm	Indicates the algorithm that will be triggered before creating the approval workflow request.  <b>Note:</b> This algorithm can be used to check all prerequisites before creating the approval workflow request.
Approval Algorithm	Indicates the algorithm that will be triggered after the approval workflow request is approved by the approver at the last level in the hierarchy.
Approval Post Processing Algorithm	Indicates the algorithm that will be triggered after the changes (which are approved by all approvers in the hierarchy) are committed to the database.
Transaction Creation Algorithm	Indicates the algorithm that will create approval workflow requests.  <b>Note:</b> It has a link. On clicking the link, the <b>Algorithm</b> screen appears where you can view the details of the respective algorithm.
Data Retrieval Algorithm	Indicates the algorithm that will be triggered to retrieve the original data of the business objects within the approval workflow group. This will help an approver to compare the original and new data in case where the submitter action is Update (UPD).  <b>Note:</b> It has a link. On clicking the link, the <b>Algorithm</b> screen appears where you can view the details of the respective algorithm.
Information Algorithm	Indicates the Approval Transaction information from the Approval Transactions that are created for a particular entity, based on the inputs of the XPath paths provided in the Reference IDs.
Compare Map	Indicates the customized Display UI map that you want to use for the approval workflow group. It overrides the UI map specified in the <b>Display UI Map</b> field.
Input Script	Indicates the customized Input UI map that you want to use for the approval workflow group. It overrides the UI map specified in the <b>Input UI Map</b> field.

- **Record Actions** - This section contains the following buttons:

Button Name	Button Description
Edit	Used to define, edit the approval workflow group. It is also used to delete the business objects and group BO relation.
Delete	Used to delete an approval workflow group.

- **Record Information** - This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the approval workflow group is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.

- **Business Objects And Group BO Relation** - The Business Objects And Group BO Relation contains the following fields:

Field Name	Field Description
Business Object	Indicates the Business Object that you want to include in the Approval Workflow Group.
Reference ID 1	Indicates the XPATH key of the field in the business object that you want to display in the approval transaction information string.
Reference ID 2	Indicates the XPATH key of the field in the business object that you want to display in the approval transaction information string.
Reference ID 3	Indicates the XPATH key of the field in the business object that you want to display in the approval transaction information string.
Reference ID 4	Indicates the XPATH key of the field in the business object that you want to display in the approval transaction information string.
Reference Foreign Key 1	Indicates the XPATH key of the field in the business object that you want to use for validating whether duplicate approval transaction exists in the system.
Reference Foreign Key 2	Indicates the XPATH key of the field in the business object that you want to use for validating whether duplicate approval transaction exists in the system.
Reference Foreign Key 3	Indicates the XPATH key of the field in the business object that you want to use for validating whether duplicate approval transaction exists in the system.
Reference Foreign Key 4	Indicates the XPATH key of the field in the business object that you want to use for validating whether duplicate approval transaction exists in the system.
Reference Foreign Key 5	Indicates the XPATH key of the field in the business object that you want to use for validating whether duplicate approval transaction exists in the system.
Reference Foreign Key 6	Indicates the XPATH key of the field in the business object that you want to use for validating whether duplicate approval transaction exists in the system.

Field Name	Field Description
List	Indicates whether the group contains one or multiple instance of the business object. For example, if you want to create a group that contains multiple account objects, you need to set this flag for the Account BO to True. If you want to create a group that contains single instance of the business object, you must set this flag for the business object to False.
Parent Business Object	Indicates the parent business object. This should be one of the business objects within the group.
From Key	Indicates the XPATH key of the field or list of fields in the parent business object.
To Key	Indicates the XPATH key of the field or list of fields in the current business object.

## Editing an Approval Workflow Group

### Procedure

To edit an approval workflow group:

1. Search for the approval workflow group in the **Approval Workflow Group**.
2. In the **Search Results** section, click the link in the **Description** column corresponding to the approval workflow group whose details you want to edit.

The **Approval Workflow Group** screen appears.

3. Click the **Edit** button in the **Approval workflow Group** zone.

The **Approval Workflow Group** screen appears.

4. Modify the details of the approval workflow group, if required.
5. Define, edit, or remove business objects and group BO relation from the approval workflow group, if required.
6. Click **Save**.

The changes made to the approval workflow group are saved.

## Editing a Business Object

### Procedure

To edit a business object in the approval workflow group:

1. From the **Admin** menu, select **A** and then click **Approval Workflow Group**.  
The **Approval Workflow Group** screen appears.
2. Search for an approval workflow group in the **Search Approval Workflow Group** zone.
3. In the **Search Results** section, click the link in the **Description** column corresponding to the approval workflow group whose details you want to edit.
4. The **Approval Workflow Group** zone appears. Click the **Edit** button from **Record Action** sections.

The **Approval Workflow Group** screen appears. It contains the following sections:

- **Main** - Used to specify the basic details of the approval workflow group.
- **Business Objects and Group BO Relation** - Used to specify the fields that allow to define business objects and link them with the approval workflow group

The **Business Objects and Group BO Relation** section contains following fields:

Field Name	Field Description	Mandatory (Yes or No)
Business Object	Displays the Business Object Code that is included in the Approval Workflow Group.	Yes
Reference ID 1	Displays the XPATH key of the field in the business object that you want to use as criteria for searching approval workflow groups.	No
Reference ID 2	Displays the XPATH key of the field in the business object that you want to use as criteria for searching approval workflow groups.	No
Reference ID 3	Displays the XPATH key of the field in the business object that you want to use as criteria for searching approval workflow groups.	No
Reference ID 4	Displays the XPATH key of the field in the business object that you want to use as criteria for searching approval workflow groups.	No
Reference Foreign Key 1	Displays the XPATH key of the field in the business object that you want to use for validating whether duplicate approval transaction exists in the system.	No
Reference Foreign Key 2	Displays the XPATH key of the field in the business object that you want to use for validating whether duplicate approval transaction exists in the system.	No

Field Name	Field Description	Mandatory (Yes or No)
Reference Foreign Key 3	Displays the XPATH key of the field in the business object that you want to use for validating whether duplicate approval transaction exists in the system.	No
Reference Foreign Key 4	Displays the XPATH key of the field in the business object that you want to use for validating whether duplicate approval transaction exists in the system.	No
Reference Foreign Key 5	Displays the XPATH key of the field in the business object that you want to use for validating whether duplicate approval transaction exists in the system.	No
Reference Foreign Key 6	Displays the XPATH key of the field in the business object that you want to use for validating whether duplicate approval transaction exists in the system.	No
List	Indicates whether the group contains one or multiple instance of the business object. For example, if you want to create a group that contains multiple account objects, you need to set this flag for the Account BO to True. If you want to create a group that contains single instance of the business object, you must set this flag for the business object to False.	Yes
Parent Business Object	Used to specify the parent business object. This should be one of the business objects within the group.	No
From Key	Display the XPATH key of the field or list of fields in the parent business object.	No
To Key	Display the XPATH key of the field or list of fields in the current business object.	No

**Note:** You can search for a business object or parent business object by clicking the **Search**  icon placed corresponding to the **Business Object** and **Parent Business Object** field.

- If you want to define more than one business object or parent object for the approval workflow group, click the **Add**  icon placed corresponding to the field.
- Enter the required details in **Main** and **Business Objects and Group BO Relation** sections.
- Click **Save**.

The changes made to the business object in approval workflow group are saved.

**Note:** When you change business objects in an approval workflow group, you need to regenerate the Input and Display UI maps by clicking the **Regenerate UI Maps**  icon corresponding to the group in the **Approval Workflow Settings** screen. You must do this only when you are using automatically generated UI maps, and not otherwise.

## Editing a Group BO Relation

### Procedure

To edit the business object's relationship details in the approval workflow group:

1. If required, filter the approval workflow group in the **Approval Workflow Group** screen.
2. In the **Search Results** section, click the link in the **Description** column corresponding to the approval workflow group.

The **Approval Workflow Group** screen appears. It contains following two sections:

- **Main** - Displays the basic details of the approval workflow group.
- **Business Objects and Group BO Relation** - Displays the fields that allow to define or edit business objects, and link them with the approval workflow group.

3. If required, define and edit the approval workflow group details from the **Main** section.
4. The **Business Objects and Group BO Relation** section contains following fields:

Field Name	Field Description	Mandatory (Yes or No)
Business Object	Used to specify the business object that you want to add in the approval workflow group.	Yes
Reference ID 1	Used to indicate the XPATH key of the field that you want to concatenate in the approval transaction information string.	No
Reference ID 2	Used to indicate the XPATH key of the field that you want to concatenate in the approval transaction information string.	No

Field Name	Field Description	Mandatory (Yes or No)
Reference ID 3	Used to indicate the XPATH key of the field that you want to concatenate in the approval transaction information string.	No
Reference ID 4	Used to indicate the XPATH key of the field that you want to concatenate in the approval transaction information string.	No
Reference Foreign Key 1	Used to indicate the XPATH key of the field that you want to use while validating whether a duplicate approval transaction does not exist in the system.	No
Reference Foreign Key 2	Used to indicate the XPATH key of the field that you want to use while validating whether a duplicate approval transaction does not exist in the system.	No
Reference Foreign Key 3	Used to indicate the XPATH key of the field that you want to use while validating whether a duplicate approval transaction does not exist in the system.	No
Reference Foreign Key 4	Used to indicate the XPATH key of the field that you want to use while validating whether a duplicate approval transaction does not exist in the system.	No
Reference Foreign Key 5	Used to indicate the XPATH key of the field that you want to use while validating whether a duplicate approval transaction does not exist in the system.	No
Reference Foreign Key 6	Used to indicate the XPATH key of the field that you want to use while validating whether a duplicate approval transaction does not exist in the system.	No
List	Indicates whether the group contains one or multiple instance of the business object. For example, if you want to create a group that contains multiple account objects, you need to set this flag for the Account BO to True. If you want to create a group that contains single instance of the business object, you must set this flag for the business object to False.	Yes
Parent Business Object	Displays the parent business object. This should be one of the business objects within the group.	No
From Key	Displays the XPATH key of the field or list of fields in the parent business object.	No
To Key	Displays the XPATH key of the field or list of fields in the current business object.	No

**Note:** You can search for a parent business object by clicking the **Search** () icon placed corresponding to the field. You can also define a new parent business object by clicking the **Add** () icon placed corresponding to the field.

5. Modify the required details in **Business Objects and Group BO Relation** section.
6. Click **Save**.

The changes made to business object's relationship are saved in the approval workflow group.

## Approval Workflow Chain (Used for Searching)

The **Approval Workflow Chain** screen allows you to search for approval workflow chain using various search criteria. Through this screen, you can navigate to the following screen:

- [Approval Workflow Chain \(Used for Viewing\)](#) on page 729

This screen consists of the following zone:

- [Search Approval Workflow Chain](#) on page 725

## Search Approval Workflow Chain

The **Search Approval Workflow Chain** zone allows you to search for an approval workflow chain using various search criteria. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Approval Workflow Chain	Used to search a particular approval workflow chain.	No
Description	Used to search approval workflow chains with a particular description.	No

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search. The **Search Results** section contains the following columns:

Column Name	Column Description
Approval Workflow Chain	Displays the approval workflow chain.
Description	Displays the description of the approval workflow chain.  <b>Note:</b> It has a link. On clicking the link, the <b>Approval Workflow Chain</b> screen appears where you can view the details of the respective approval workflow chain.

**Note:** You must specify at least one search criterion while searching for an approval workflow chain.

### Related Topics

For more information on...	See...
How to search for an approval workflow chain	<a href="#">Searching for an Approval Workflow Chain</a> on page 726
How to view the details of an approval workflow chain	<a href="#">Viewing the Approval Workflow Chain Details</a> on page 727

## Searching for an Approval Workflow Chain

### Procedure

To search the approval workflow chain:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **A** and then click **Approval Workflow Chain**.

The **Approval Workflow Chain** screen appears.

3. Enter the search criteria in the **Search Approval Workflow Chain** zone.

ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

4. Click **Search**.

A list of approval workflow chains that meet the search criteria appears in the **Search Results** section.

## Defining an Approval Workflow Chain

### Prerequisites

To define an approval workflow chain, you should have:

- The To Do role and To Do type defined in the application.
- Action algorithms defined in the application, in case you want to use any of them.

### Procedure

To define an approval workflow chain:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **A** and then click **Approval Workflow Chain**.  
The **Approval Workflow Chain** screen appears.
3. Click the **Add** button in the **Page Title** area of the **Approval Workflow Chain** screen.  
The **Approval Workflow Chain** screen appears. It contains the following sections:
  - **Main** - Used to specify basic details of the approval workflow chain.
  - **Approval Levels** - Used to specify a level in the approval workflow chain.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Approval Workflow Chain	Used to specify the approval workflow chain	Yes
Description	Used to specify the description for the approval workflow chain	Yes

Field Name	Field Description	Mandatory (Yes or No)
To Do Role To Resolve	Used to specify the To Do Role to indicate the users who will receive a notification when the approval transactions are rejected by an approver at any level in the hierarchy.	Yes

- Enter the required details.
- Define approval levels for the approval workflow chain, if required.
- Click **Save**.

The approval workflow chain is defined.

## Defining Approval Levels for an Approval Workflow Chain

### Prerequisites

To define approval levels in the approval workflow chain, you should have:

- The To Do Role and To Do Type defined in the application.
- Action algorithms defined in the application, in case you want to use any of them.

### Procedure

To define an approval levels for an approval workflow chain:

- Ensure that the **Approval Levels** section is expanded when you are defining or editing an approval workflow chain.

The **Approval Levels** section contains the following fields

Field Name	Field Description	Mandatory (Yes or No)
Action Algorithm	Used to specify the additional action that you want the system to perform apart from generating a notification when the approver approves or rejects the request.  <b>Note:</b> You can search for an action algorithm by clicking the <b>Search</b>  icon corresponding to the <b>Action Algorithm</b> field.	Yes
Approver To Do Role	Used to specify the To Do role to indicate the users who will either approve or reject the request at this level in the hierarchy.  <b>Note:</b> You can search for an approver to do role by clicking the <b>Search</b>  icon corresponding to the <b>Approver To Do Role</b> field.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Approver To Do Type	Used to specify the type of notification that you want to generate when the approver approves or rejects the request.  <b>Note:</b> You can search for an approver to do type by clicking the <b>Search</b> (🔍) icon corresponding to the <b>Approver To Do Type</b> field.	Yes

- Enter the required details in the **Approval Levels** section.
- If you want to define more than one approval level for the approval workflow chain, click the **Add** (+) icon and then repeat step 2. However, if you want to remove a approval level from the approval workflow chain, click the **Delete** (🗑️) icon corresponding to the approval level.

## Approval Workflow Chain (Used for Viewing)

Once you define an approval workflow chain, the **Approval Workflow Chain** screen allows you to:

- View the details of an approval workflow chain
- Edit an approval workflow chain
- Delete an approval workflow chain

This screen contains the following zone:

- [Approval Workflow Chain](#) on page 729

### Approval Workflow Chain

The **Approval Workflow Chain** zone displays the details of the approval workflow chain. It contains the following sections:

- Main** - Displays basic information about the approval workflow chain. It contains the following fields:

Field Name	Field Description
Approval Workflow Chain	Displays the approval workflow chain and levels.
Description	Displays the description of the approval workflow chain and levels.
To Do Role To Resolve	Displays the description of To Do Role role type.

- Approval Levels** - Displays the levels defined in the approval workflow chain.

Field Name	Field Description
Action Algorithm	Indicates the additional action that the system will perform apart from generating a notification when the approver approves or rejects the request.

Field Name	Field Description
Level	Indicates the level in the hierarchy.
Approver To Do Role	Indicates that the users with the specified To Do role will either approve or reject the request at this level in the hierarchy.
Approval To Do Type	Indicates the type of notification that will be generated when the approver approves or rejects the request.

- **Record Actions** - This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit and delete the approval workflow chain and approval levels.
Delete	Used to delete the approval workflow chain.

- **Record Information** - This section contains the following field:

Field Name	Field Description
Business Object	Indicates the business object using which the approval workflow chain is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.

## Editing an Approval Workflow Chain

### Procedure

To edit an approval workflow chain:

1. Search for an approval workflow chain in the **Search Approval Workflow Chain** screen.
2. In the **Search Results** section, click the link in the **Description** column corresponding to the approval workflow chain whose details you want to edit.

The **Approval Workflow Chain** screen appears.

3. Click the **Edit** button in the **Approval Workflow Chain**.

The **Approval Workflow Chain** screen appears.

- **Main** - Used to specify the basic details of the approval workflow chain. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Approval Workflow Chain	Displays the approval workflow chain.	Yes
Description	Displays the description for the approval workflow chain.	Yes
To Do Role To Resolve	Displays the To Do role to indicate the users who will be sent a notification when the approval workflow request is rejected by an approver at any level in the hierarchy.	Yes

- **Approval Levels** - Used to specify a level in the approval workflow chain. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Action Algorithm	Displays the additional action that you want the system to perform apart from generating a notification when the approver approves or rejects the request.	Yes
Approver To Do Role	Displays the To Do role to indicate the users who will either approve or reject the request at this level in the hierarchy.	Yes
Approval To Do Type	Displays the type of notification that you want to generate when the approver approves or rejects the request.	Yes

4. Modify the required details in the **Main** section.
5. Edit, or remove approval levels from the approval workflow chain, if required.
6. Click **Save**.

The changes made to the approval workflow chain screen are saved.

## Deleting an Approval Workflow Chain

### Procedure

To delete an approval workflow chain:

1. Search for the approval workflow chain in the **Search Approval Workflow Chain** screen.
2. In the **Search Results** section, click the link in the **Description** column corresponding to the approval workflow chain that you want to delete.

The **Approval Workflow Chain** screen appears.

3. Click the **Delete** button in the **Approval Workflow Chain** zone.

A message appears confirming whether you want to delete the approval workflow chain.

4. Click **OK**.

The approval workflow chain is deleted.

### Related Topics

## Approval Workflow Criterion Type (Used for Searching)

The **Approval Workflow Criterion Type** screen allows you to search for an approval workflow criterion type using various search criteria. Through this screen, you can navigate to the following screen:

- [Approval Workflow Criterion Type \(Used for Viewing\)](#) on page 735

This screen consists of the following zone:

- [Search Approval Workflow Criterion Type](#) on page 732

### Search Approval Workflow Criterion Type

The **Search Approval Workflow Criterion Type** zone allows you to search for an approval workflow criterion type using various search criteria. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Approval Workflow Criterion Type	Used to search a particular approval workflow criterion type.	Yes
Description	Used to specify the description for the approval workflow criteria type.	No

**Note:** You must specify at least one search criterion while searching for an approval workflow criterion type.

- **Search Results** - On clicking the **Search** button, the search results are filtered based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Approval Workflow Criterion Type	Displays the approval workflow criterion type.
Description	Displays the description of the approval workflow criterion type.

### Related Topics

For more information on...	See...
How to search for an approval workflow criterion type	<a href="#">Searching for an Approval Workflow Criterion Type</a> on page 732

## Searching for an Approval Workflow Criterion Type

### Procedure

To search the approval workflow criterion type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **A** and then click **Approval Workflow Criterion Type**.  
The **Approval Workflow Criterion Type** screen appears.
3. Enter the search criteria in the **Search Approval Workflow Criterion Type** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

#### 4. Click **Search**

A list of approval workflow criterion types that meet the search criteria appears in the **Search Results** section.

## Viewing the Approval Workflow Criterion Type Details

### Procedure

To view the details of an approval workflow criterion type:

1. If required, filter the approval workflow criterion type details in the **Search Approval Workflow Criterion Type** screen.
2. In the **Search Results** section, click the link in the **Description** column corresponding to the approval workflow criterion type whose details you want to view.

The **Approval Workflow Criterion** screen appears. It contains the following zone:

- [Approval Workflow Criterion Type](#) on page 735

3. View the details of the approval workflow criterion type in the **Approval Workflow Criterion Type** zone.

### Related Topics

## Defining an Approval Workflow Criterion Type

### Prerequisites

To define an approval workflow criterion type, you should have:

- Algorithm, Business object, and Field object defined in the application.

### Procedure

To define an approval workflow criterion type:

1. Click the **Admin** link in the **Application** toolbar.

A list appears.

- From the **Admin** menu, select **A** and then click **Approval Workflow Criterion Type**.

The **Approval Workflow Criterion Type** screen appears.

- Click the **Add** button in the **Page Title** area of the **Approval Workflow Criterion Type** screen.

The **Approval Workflow Criterion Type** screen appears. It contains the following section:

- Main** - Used to specify basic details about the approval workflow criterion type.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Approval Workflow Criterion Type	Used to specify the approval workflow criterion type.	Yes
Description	Used to specify the description for the approval workflow criterion type.	Yes
Derived From	Used to indicate the option which triggers the approval workflow. The valid values are: <ul style="list-style-type: none"> <li>Algorithm</li> <li>Business Object</li> </ul>	Yes
Algorithm	Used to indicate the algorithm for which you want to define the approval workflow criterion type. <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b></p> <p>The <b>Search</b>  icon appears corresponding to this field. On clicking the Search icon, the Algorithm Search window appears.</p> <p>This field appears only when you select the Algorithm option form the Derived From list.</p> </div>	Yes
Business Object	Used to indicate the business object for which you want to define the approval workflow criterion type. <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b></p> <p>The <b>Search</b>  icon appears corresponding to this field. On clicking the Search icon, the Business Object Search window appears.</p> <p>This field appears only when you select the Business Object option form the Derived From list.</p> </div>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Field	<p>Used to indicate the field that you want to use to define the criteria for associating approval workflow requests with the approval workflow chains.</p> <p><b>Note:</b></p> <p>The <b>Search</b>  icon corresponding to this field. On clicking the Search icon, the Field Search window appears.</p> <p>This field appears only when you select the Business Object option from the Derived From list.</p>	Yes

4. Enter the required details.
5. Click **Save**.

The approval workflow criterion type is created.

### Related Topics

Approval Workflow Criterion Type screen	<a href="#">Approval Workflow Criterion Type (Used for Viewing)</a> on page 735
Search Approval Workflow Criterion Type zone	<a href="#">Search Approval Workflow Criterion Type</a> on page 732

## Approval Workflow Criterion Type (Used for Viewing)

Once you define an approval workflow criterion type, the **Approval Workflow Criterion Type** screen allows you to:

- Edit the details of an approval workflow criterion type
- Delete an approval workflow criterion type

This screen contains the following zone:

- [Approval Workflow Criterion Type](#) on page 735

### Approval Workflow Criterion Type

The **Approval Workflow Criterion Type** zone displays the details of the approval workflow criterion types. It contains the following sections:

- **Main** - Displays basic information about the approval workflow criterion type. It contains the following fields:

Field Name	Field Description
Approval Workflow Criterion Type	Displays the approval workflow criterion type.
Description	Displays the description of the approval workflow criterion type.
Derived From	<p>Indicates the criteria type that triggers the approval workflow. The valid values are:</p> <ul style="list-style-type: none"> <li>• Algorithm</li> <li>• Business Object</li> </ul>

Field Name	Field Description
Business Object	Indicates the business object using which the approval workflow criterion type is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.
Field	Indicates the field using which the criteria for associating approval workflow requests with the approval workflow chains will be defined.  <b>Note:</b> It has a link. On clicking the link, the <b>Fields</b> screen appears where you can view the details of the respective field.

- **Record Actions** - This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the approval workflow criterion type.
Delete	Used to delete the approval workflow criterion type.

- **Record Information** - This section contains the following field:

Field Name	Field Description
Business Object	Indicates the business object using which the approval workflow chain and levels is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.

## Editing an Approval Workflow Criterion Type

### Procedure

To edit an approval workflow criterion type:

1. Search for the approval workflow criterion type in the **Approval Workflow Criterion Type** screen.
2. In the **Search Results** section, click the link in the **Description** column corresponding to the approval workflow criterion type whose details you want to edit.

The **Approval Workflow Criterion Type** screen appears.

3. Click the **Edit** button in the **Approval Workflow Criterion Type** zone.

The **Approval Workflow Criterion Type** screen appears. It contains the following section:

- **Main** - This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Approval Workflow Criterion Type	Displays the approval workflow criterion type.	Yes
Description	Displays the description for the approval workflow criterion type.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Derived From	Displays an option which triggers the approval workflow.	Yes
Algorithm	<p>Displays the algorithm for which you want to define the approval workflow criterion type.</p> <p><b>Note:</b></p> <p>The <b>Search</b>  icon corresponding to this field. On clicking the Search icon, the Algorithm Search window appears</p> <p>This field appears only when you select the Algorithm option form the Derived From list.</p>	Yes
Business Object	<p>Displays the business object which is used to define the approval workflow criterion type.</p> <p><b>Note:</b></p> <p>The <b>Search</b>  icon corresponding to this field. On clicking the Search icon, the Business Object Search window appears.</p> <p>This field appears only when you select the Business Object option form the Derived From list.</p>	Yes
Field	<p>Displays the field which is used to define the criteria for associating approval workflow requests with the approval workflow chains.</p> <p><b>Note:</b></p> <p>The Search  icon corresponding to the respective field. On clicking the Search icon, the Field Search window appears.</p> <p>This field appears only when you select the Business Object option form the Derived From list.</p>	Yes

4. Modify the required details in the **Approval Workflow Criterion Type** screen.

5. Click **Save**.

The changes made to the approval workflow criterion type screen are saved.

## Deleting an Approval Workflow Criterion Type

### Procedure

To delete an approval workflow criterion type:

1. Search for the approval workflow criterion type in the **Approval Workflow Criterion Type** screen.
2. In the **Search Results** section, click the link in the **Description** column corresponding to the approval workflow criterion type whose details you want to delete.

The **Approval Workflow Criterion Type** screen appears.

3. Click the **Delete** button in the **Approval Workflow Criterion Type** zone.

A message appears confirming whether you want to delete the approval workflow criterion type.

4. Click **OK**.

The approval workflow criterion type is deleted.

## Search Approval Workflow Group Chain Linkage

The **Search Approval Workflow Group Chain Linkage** zone allows you to search for an approval workflow group chain linkage using various search criteria. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Group Chain Linkage ID	Used to search a particular approval workflow group chain linkage.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Approval Workflow Group	Used to search a group chain linkage for which an approval workflow group is defined.	Yes
Approval Workflow Chain	Used to search a group chain linkage for which an approval workflow chain is defined.	Yes

**Note:** You must specify at least one search criterion while searching for an approval workflow group chain linkage.

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria.

The **Search Results** section contains the following columns:

Column Name	Column Description
Group Chain Linkage ID	Displays the ID which is generated automatically when the link is created.
Approval Workflow Group	Indicates the approval workflow group for which the link is created. <b>Note:</b> It has a link. On clicking the link, the <b>Approval Workflow Group Chain Linkage</b> screen appears with the details of the respective business object.
Approval Workflow Chain	Indicates the approval workflow chain for which the link is created.
Field Approval Rule	Indicates whether you want to configure approval rule for one or more fields of the business objects which are included in the approval workflow group. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>

## Defining an Approval Workflow Group Chain Linkage

### Prerequisites

To define an approval workflow group chain linkage, you should have:

- Business Object, Field, Criterion Type, Approval Workflow Group and Approval Workflow Chain defined in the application.

### Procedure

To define an approval workflow group chain linkage:

1. Click the **Admin** link in the **Application** toolbar.

A list appears.

- From the **Admin** menu, select **A** and then click **Approval Workflow Group Chain Linkage**.

The **Approval Workflow Group Chain Linkage** screen appears.

- Click the **Add** button in the **Page Title** area of the **Approval Workflow Group Chain Linkage** screen.

The **Approval Workflow Group Chain Linkage** screen appears. It contains the following sections:

- Main** - Used to specify basic details about the approval workflow group chain linkage.
- Group Chain Linkage Criteria** - Used to define group chain linkage criteria for the approval workflow type.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Approval Workflow Group	Used to indicate the approval workflow group.  <b>Note:</b> You can search for an approval workflow group type by clicking the Search (🔍) icon corresponding to the field.	Yes
Approval Workflow Chain	Used to indicate the approval workflow chain.  <b>Note:</b> You can search for an approval workflow chain by clicking the Search (🔍) icon corresponding to the field.	Yes
Field Approval Rule	Used to indicate whether you want to configure approval rule for one or more fields of the business objects which are included in the approval workflow group. The valid values are: <ul style="list-style-type: none"> <li>Yes</li> <li>No</li> </ul>	Yes

- Enter the required details.
- Define group chain linkage criteria for the approval workflow, if required.
- Define field approval rule criteria for the approval workflow, if required.
- Click **Save**.

The approval workflow group chain linkage is created.

### **Related Topics**

## Defining Group Chain Linkage Criteria for an Approval Workflow

### Prerequisites

To define group chain linkage criteria for an approval workflow, you should have:

- Approval Workflow Criterion Type defined in the application.

### Procedure

To define group chain linkage criteria for an approval workflow:

1. Ensure that the **Group Chain Linkage Criteria** section is expanded when you are defining or editing an approval workflow.

The **Group Chain Linkage Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Group Chain Linkage ID	Displays the Group Chain Linkage ID.  <b>Note:</b> The data appears in this field only when you are editing the details of an approval workflow criterion type.	Yes
Criterion Type	Used to indicate the criteria type needed for defining the criterion.  <b>Note:</b> The Search (🔍) icon appears corresponding to this field. On clicking the Search icon, the Approval Workflow Chain Search window appears.	Yes
Operator	Used to indicate the relational operator used to define the relation between the criterion type and criterion value.	Yes
Criterion Value	Used to specify the criterion value.	Yes

2. Enter the required details.
3. If you want to define more than one group chain linkage criteria for the approval workflow, click the **Add** (+) icon, and then repeat step 2.

**Note:** However, if you want to remove a group chain linkage criteria from the approval workflow, click the **Delete** (🗑️) icon corresponding to the group chain linkage criteria.

### Related Topics

For more information on...	See...
How to edit an approval workflow group chain linkage	<a href="#">Editing an Approval Workflow Group Chain Linkage</a> on page 747

## Defining a Field Approval Rule

### Prerequisites

To define a field approval rule for an approval workflow group chain linkage, you should have:

- Business Object, Field, and Approval Workflow Chain to be defined in the application.

**Procedure**

To define a field approval rule for an approval workflow group chain linkage:

1. Ensure that the **Field Approval Rule Criteria** section is expanded when you select the Yes option from the Field Approval Rule field of the Main section.

The **Field Approval Rule Criteria** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Sequence.	Used to indicate the order in which the rule criteria should be executed while adding or updating the field value.	Yes
Applicable For	Used to indicate whether the rule criteria should be considered while adding and/or updating the field value. The valid values are: <ul style="list-style-type: none"> <li>• Add</li> <li>• Update</li> <li>• Add and Update</li> </ul>	Yes
Business Object	Used to indicate the business object in which the field is included. <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b></p> <p>The Search  icon appears corresponding to the <b>Business Object</b> field. On clicking the search icon, the <b>Search Group Based Business Object</b> search window appears.</p> </div>	Yes
Field	Used to indicate the field for which you want to define the approval rule criteria. <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b></p> <p>The Search  icon appears corresponding to the <b>Field</b> search field. On clicking the search icon, the <b>Field Search</b> search window appears.</p> </div>	Yes
Approval Workflow Chain	Used to indicate the approval workflow chain that you want to use for the field value approval. <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b></p> <p>The Search  icon appears corresponding to the <b>Approval Workflow Chain</b> field. On clicking the search icon, the <b>Approval Workflow Chain Search</b> search window appears.</p> </div>	Yes
Value Range	Used to indicate whether you want to define value based threshold limit for each approval level. <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> This field is enabled only when the data type of the field is <b>Numeric</b>.</p> </div>	No

Field Name	Field Description	Mandatory (Yes or No)
Hierarchical	Used to indicate whether multi-level or single-level approval is required while adding or updating the field value beyond the threshold limit.	No

If the **Value Range** check box is selected, a grid appears with the following set of fields:

Field	Field Description
Threshold Value	Used to specify the threshold value using which you want to control the approval hierarchy.
Approval Level	Used to indicate the approval level at which approval is required when the field value is within the threshold value.  <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Approval Level</b> field. On clicking the search icon, the <b>Approval Level Search</b> search window appears.</p> <hr/> <p><b>Note:</b> The search results will include all those levels which are defined in the approval workflow chain.</p> </div>
Approval Level Information	Displays additional information about the approval level.

- Enter the required details in the **Field Approval Rule Criteria** section.
- If you want to define more than one field approval rule criteria for the approval workflow chain linkage, click the **Add** (+) icon and then repeat step 2. However, if you want to remove a field approval rule criteria from the approval workflow chain linkage, click the **Delete** (🗑️) icon corresponding to the sequence field.
- Click **Save**.

The approval workflow field rule is defined.

## Approval Workflow Group Chain Linkage (Used for Viewing)

Once you define an approval workflow group chain linkage, the **Approval Workflow Group Chain Linkage** screen allows you to:

- Edit an approval workflow group chain linkage
- Delete an approval workflow group chain linkage

This screen contains the following zone:

- [Approval Workflow Group Chain Linkage](#) on page 745

For more information on...	See...
How to view the details of an approval workflow group chain linkage	<a href="#">Viewing the Approval Workflow Group Chain Linkage Details</a> on page 740

## Approval Workflow Group Chain Linkage

The **Approval Workflow Group Chain Linkage** zone displays the details of the approval workflow group chain linkage. It contains the following sections:

- **Main** - Displays basic information about the approval workflow group chain linkage. It contains the following fields:

Field Name	Field Description
Approval Workflow Group	Displays the approval workflow group for which a link is created.  <b>Note:</b> It has a link. On clicking the link, the <b>Approval Workflow Group</b> screen appears with the details of the respective approval workflow group.
Approval Workflow Chain	Displays the approval workflow chain for which a link is created.  <b>Note:</b> It has a link. On clicking the link, the <b>Approval Workflow Chain</b> screen appears with the details of the respective approval workflow group.
Field Approval Rule	Indicates whether you want to configure approval rule for one or more fields of the business objects which are included in the approval workflow group. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>

- **Record Actions** - This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the approval workflow group chain linkage. Also used to define, edit, delete Group Chain Linkage Criteria and Field Approval Rule Criteria.
Delete	Used to delete the approval workflow group chain linkage.

- **Record Information** - This section contains the following field:

Field Name	Field Description
Business Object	Indicates the business object using which the approval workflow chain linkage is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.

- **Group Chain Linkage Criteria** - Lists the group chain linkage criteria..This section contains the following columns:

Column Name	Column Description
Group Chain Linkage ID	Displays the ID which is generated automatically when the link is created.

Column Name	Column Description
Criterion Type	Displays the criterion type needed for defining the criterion.  <b>Note:</b> It has a link. On clicking the link, the <b>Approval Workflow Criterion Type</b> screen appears where you can view the details of the respective criterion type.
Operator	Indicates the relational operator used to define the relation between the criterion type and criterion value. The valid values are: <ul style="list-style-type: none"> <li>EQUALS</li> <li>IN</li> </ul>
Criterion Value	Displays the criterion value.

- **Field Approval Rule Criteria** - Lists the field approval rule criteria for approval workflow group chain linkage. It contains the following columns:

Column Name	Column Description
Sequence	Indicates the order in which the rule criteria should be executed while adding or updating the field value.
Applicable For	Displays the rule criteria which should be considered while adding and/or updating the field value.
Business Object	Displays the business object in which the field is included.
Field	Displays the field for which you want to define the approval rule criteria.  <b>Note:</b> The <b>Context Menu</b> (☰) icon appears corresponding to the <b>Field</b> search field. On clicking the context menu icon, the <b>Go to Field</b> menu appears. On clicking the <b>Go to Field</b> menu item, the <b>Field</b> screen appears with the details of the respective field.  <b>Note:</b> It has a link. On clicking the link, the <b>Field</b> screen appears with the details of the respective field.
Approval Workflow Chain	Indicates the approval workflow chain that you want to use for the field value approval.  <b>Note:</b> It has a link. On clicking the link, the <b>Approval Workflow Chain</b> screen appears with the details of the respective approval workflow chain.
Value Range	Indicates whether you want to define value based threshold limit for each approval level.  <b>Note:</b> This field is enabled only when the data type of the field is <b>Numeric</b> .

Column Name	Column Description
Hierarchical Approval	Indicates whether multi-level or single-level approval is required while adding or updating the field value beyond the threshold limit.  <b>Note:</b> This field is enabled only when the <b>Value Range</b> check box is selected.

If the **Value Range** check box is selected, a grid appears with the following set of fields:

Field	Field Description
Threshold Value	Displays the threshold value using which you want to control the approval hierarchy.
Approval Level	Displays the approval level at which approval is required when the field value is within the threshold value.  <b>Note:</b> The <b>Search</b>  icon appears corresponding to the <b>Approval Level</b> field. On clicking the search icon, the <b>Approval Level Search</b> search window appears.  <b>Note:</b> The search results will include all those levels which are defined in the approval workflow chain.
Approval Level Information	Displays additional information about the approval level.

## Editing an Approval Workflow Group Chain Linkage

### Prerequisites

To edit an approval workflow group chain linkage, you should have:

- Business Object, Field, Criterion Type, Approval Workflow Group, and Approval Workflow Chain defined in the application.

### Procedure

To edit an approval workflow group chain linkage:

1. Search for the Approval Workflow Group Chain Linkage in the **Approval Workflow Group Chain Linkage** screen.
2. In the **Search Results** section, click the link in the **Approval Workflow Group** column corresponding to the approval workflow chain whose details you want to edit.  
The **Approval Workflow Group Chain Linkage** screen appears.
3. Click the **Edit** button in the **Approval Workflow Group Chain Linkage** zone.  
The **Approval Workflow Group Chain Linkage** screen appears.
4. Define or edit approval workflow group chain linkage, if required.
5. Define, edit or remove approval workflow criterion from the approval workflow group chain linkage, if required.
6. Define, edit or remove field approval rule criteria from the approval workflow group chain linkage, if required.
7. Click **Save**.

The changes made to the approval workflow group chain linkage screen are saved.

### Related Topics

For more information on...	See...
How to search approval workflow group chain linkage	<a href="#">Searching for an Approval Workflow Group Chain Linkage</a> on page 739
<b>Approval Workflow Group Chain Linkage</b> screen	<a href="#">Approval Workflow Group Chain Linkage (Used for Viewing)</a> on page 744
<b>Approval Workflow Group Chain Linkage</b> zone	<a href="#">Approval Workflow Group Chain Linkage</a> on page 745

## Deleting an Approval Workflow Group Chain Linkage

### Procedure

To delete an approval workflow group chain linkage:

1. Search for an approval workflow group chain linkage in the **Search Approval Workflow Group Chain Linkage** zone.
2. In the **Search Results** section, click the link in the **Approval Workflow Group** column corresponding to the approval workflow chain that you want to delete.

The **Approval Workflow Group Chain Linkage** screen appears.

3. Click the **Delete** button in the **Approval Workflow Group Chain Linkage** zone.

A message appears confirming whether you want to delete the approval workflow group chain linkage.

4. Click **OK**.

The approval workflow group chain linkage is deleted.

### Related Topics

For more information on...	See...
How to search for an approval workflow group chain linkage	<a href="#">Searching for an Approval Workflow Group Chain Linkage</a> on page 739

## Approval Workflow Setting (Used for Searching)

The **Approval Workflow Setting** screen allows you to search for approval workflow setting using various search criteria. It consists the following zone:

- [Search Approval Workflow Group](#) on page 748

Through this screen, you can navigate to the following screen:

- [Approval Workflow Setting \(Used for Viewing\)](#) on page 752

For more information on...	See...
How to search for an approval workflow setting	<a href="#">Searching for an Approval Workflow Group</a> on page 749
How to view the details of approval workflow settings	<a href="#">Viewing the Approval Workflow Setting Details</a> on page 750

## Search Approval Workflow Group

The **Search Approval Workflow Group** zone allows you to search for an approval workflow group using various search criteria. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields::

Field Name	Field Description	Mandatory (Yes or No)
Approval Workflow Group	Used to search a particular approval workflow group.	Yes
Description	Used to search approval workflow group with a particular description.	Yes

**Note:** You must specify at least one search criterion while searching for an approval workflow group.

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Approval Workflow Group	Displays the approval workflow group.
Description	Displays the description of the approval workflow group.  <b>Note:</b> It has a link. On clicking the link, the <b>Approval Workflow Group</b> screen appears where you can view the details of the respective approval workflow group.

### **Related Topics**

For more information on...	See...
How to search for an approval workflow group	<a href="#">Searching for an Approval Workflow Group</a> on page 709

## **Searching for an Approval Workflow Group**

### **Prerequisites**

To search for an approval workflow group, you should have:

- Approval Workflow Group defined in the application.
- Active flag should be set to **Yes**

### **Procedure**

To search for an approval workflow group:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, Select **A** and then click **Approval Workflow Setting**.  
The **Approval Workflow Setting** screen appears.
3. Enter the search criteria in the **Search Approval Workflow Group** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

#### 4. Click **Search**.

A list of approval workflow groups that meet the search criteria appears in the **Search Results** section.

## Viewing the Approval Workflow Setting Details

### Procedure

To view the details of approval workflow setting:

1. Search for an approval workflow group in the **Approval Workflow Setting** screen.
2. In the **Search Results** section, click the link in the **Description** column corresponding to the approval workflow group whose details you want to view.

The **Approval Workflow Settings** screen appears.

3. View the details of the approval workflow group in the **Approval Workflow Group Settings** zone.

### Related Topics

## Defining Approval Workflow Group Settings

### Prerequisites

To define an approval workflow group setting, you should have:

- Approval Workflow Group defined in the application.
- Active flag set to **Yes**

### Procedure

To define an approval workflow group setting:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **A** and then click **Approval Workflow Setting**.  
The **Approval Workflow Settings** screen appears.
3. Click the **Add** button in the **Page Title** area of the **Approval Workflow Settings** screen.

The **Approval Workflow Settings** screen appears. It contains the following section:

- **Main** - Used to specify the details for the approval workflow settings.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Approval Workflow Group	Used to specify the approval workflow group.	Yes
Approval Chain Selection Algorithm	<p>Used to specify the algorithm that will be triggered before creating the approval workflow request.</p> <p><b>Note:</b> This algorithm identifies the approval workflow chain that must be used for the approval workflow group.</p> <p><b>Note:</b> You can search for an approval chain selection algorithm by clicking the <b>Search</b> (🔍) icon corresponding to the <b>Approval Chain Selection Algorithm</b> field.</p>	Yes
Prevalidation	<p>Used to indicate whether validation must be done before the approval workflow request is created. The valid values are:</p> <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul> <p><b>Note:</b> You can search for a prevalidation by clicking the <b>Search</b> (🔍) icon corresponding to the <b>Prevalidation</b> field.</p>	Yes
Approval Reason Required	<p>Used to indicate whether you want the approver to add reason and comments while approving the approval transaction. The valid values are:</p> <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	Yes
Active	<p>Used to indicate whether the approval workflow is required for the business objects in the approval workflow group. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Yes</b> - Used when you want to activate the approval workflow for the business objects in the approval workflow group.</li> <li>• <b>No</b> - Used when you do not want to activate the approval workflow for the business objects in the approval workflow group.</li> <li>• <b>Conditional</b> - Used when you want to activate the approval workflow for business objects that satisfy particular criteria (for example, when the person or account belongs to a particular division). Note that, at present, this functionality works only for an approval workflow group which consists of a single business object.</li> </ul>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Conditional Algorithm	Used to specify the algorithm that will be used to determine the business objects for which the approval workflow must be activated.  <b>Note:</b> This field appears only when the <b>Conditional</b> option is selected from the <b>Active</b> list.	Yes

4. Enter the required details.

5. Click **Save**.

The approval workflow group setting is defined.

## Approval Workflow Setting (Used for Viewing)

Once the approval workflow group setting is defined, the **Approval Workflow Settings** screen allows you to:

- View the details of an approval workflow setting
- Edit the approval workflow group settings
- Delete an approval workflow group settings
- Regenerate approval workflow setting UI maps

This screen consists of the following zone:

- [Approval Workflow Group Settings](#) on page 752

For more information on...	See...
How to edit the approval workflow group settings	<a href="#">Editing Approval Workflow Group Settings</a> on page 754
How to delete an approval workflow group settings	<a href="#">Deleting Approval Workflow Group Settings</a> on page 754
How to regenerate UI Maps	<a href="#">Regenerating Input and Display UI Maps</a> on page 755

## Approval Workflow Group Settings

The **Approval Workflow Group Settings** zone displays the details of the approval workflow group settings. It contains the following sections:

- **Main** - Displays the basic information about the approval workflow group settings. It contains the following fields:

Field Name	Field Description
Approval Workflow Group	Displays the approval workflow group.

Field Name	Field Description
Approval Chain Selection Algorithm	<p>Displays the algorithm that will be triggered after creating the approval workflow request.</p> <p><b>Note:</b> This algorithm identifies the approval workflow chain that must be used for the approval workflow group.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Algorithm</b> screen appears where you can view the details of the respective approval chain selection algorithm.</p>
Prevalidation	<p>Indicates whether validation must be done before the approval workflow request is created. The valid values are:</p> <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>
Approval Reason Required	<p>Indicates whether you want the approver to add reason and comments while approving the approval transaction. The valid values are:</p> <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>
Active	<p>Indicates whether the approval workflow is required for the business objects in the approval workflow group. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Yes</b> - Used when you want to activate the approval workflow for the business objects in the approval workflow group.</li> <li>• <b>No</b> - Used when you do not want to activate the approval workflow for the business objects in the approval workflow group.</li> <li>• <b>Conditional</b> - Used when you want to activate the approval workflow for business objects that satisfy particular criteria (for example, when the person or account belongs to a particular division). Note that, at present, this functionality works only for an approval workflow group which consists of a single business object.</li> </ul>
Conditional Algorithm	<p>Displays the algorithm that will be used to determine the business objects for which the approval workflow must be activated.</p> <p><b>Note:</b> This field appears only when the <b>Conditional</b> option is selected from the <b>Active</b> list.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Algorithm</b> screen appears where you can view the details of the respective conditional algorithm.</p>

- **Record Actions** - This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the settings of the approval workflow group.
Delete	Used to delete the approval workflow group setting.
Regenerate UI Maps	Used to regenerate the approval workflow group setting UI Maps.

- **Record Information** - This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the approval workflow reason is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.

## Editing Approval Workflow Group Settings

### Prerequisites

To edit approval workflow group settings, you should have:

- Approval Chain Selection Algorithm defined in the application.
- Prevalidation, Approval Reason Required, and Active flag defined in the application.
- Conditional Algorithm defined in the application

### Procedure

To edit approval workflow group settings:

1. Search for the approval workflow group in the **Approval Workflow Setting** screen.
2. In the **Search Results** section, click the link in the **Description** column corresponding to the approval workflow group whose details you want to edit.

The **Approval Workflow Settings** screen appears.

3. Click the **Edit** button in the **Approval Workflow Group Settings** zone.

The **Approval Workflow Group Settings** screen appears.

4. Edit the settings for the approval workflow group, if required.
5. Click **Save**.

The changes made to the approval workflow group settings are saved.

## Deleting Approval Workflow Group Settings

### Procedure

To delete approval workflow group settings:

1. Search for the approval workflow group in the **Approval Workflow Setting** screen.
2. In the **Search Results** section, click the link in the **Description** column corresponding to the approval workflow group that you want to delete.

The **Approval Workflow Settings** screen appears.

3. Click the **Delete** button in the **Approval Workflow Group Settings** zone.

A message appears confirming whether you want to delete the approval workflow group settings.

4. Click **OK**.

The approval workflow setting is deleted.

## Regenerating Input and Display UI Maps

### Procedure

To regenerate UI Maps for an approval workflow group setting:

1. Search for the approval workflow group in the **Approval Workflow Setting** screen.
2. In the **Search Results** section, click the link in the **Description** column corresponding to the approval workflow group for which you want to regenerate UI maps.

The **Approval Workflow Settings** screen appears.

3. Click the **Regenerate UI Maps** button in the **Approval Workflow Group Settings** zone.

A message appears confirming whether you want to replace the existing Input and Display UI Maps.

4. Click **OK**.

The Input and Display UI Maps are generated.

## Approval Workflow Reason (Used for Searching)

The **Approval Workflow Reason** screen allows you to search for an approval workflow reason using various search criteria. It also allows you to define an approval workflow reason. It contains the following zone:

- [Approval Workflow Reason List](#) on page 755

### Approval Workflow Reason List

The **Approval Workflow Reason List** zone lists the approval workflow reasons that are already defined in the system. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Approval Workflow Reason	Used to search a particular approval workflow reason.	No
Description	Used to search approval workflow reasons with a particular description.	No

- **Search Results** - On clicking the **Search** button, the search results are filtered based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Approval Workflow Reason	Displays the approval workflow reason.
Description	Displays the description of the approval workflow reason.
Reason Category	Indicates the category to which the approval workflow reason belongs. The valid values are: <ul style="list-style-type: none"> <li>• Approve</li> <li>• Cancel</li> <li>• Reject</li> </ul>

## Filtering the Approval Workflow Reasons

### Procedure

To filter the approval workflow reasons:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **A** and then click **Approval Workflow Reason**.  
The **Approval Workflow Reason** screen appears.
3. Enter the required search criteria in the **Approval Workflow Reason List** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

4. Click **Search**.  
The search results are filtered based on the specified criteria.

## Defining an Approval Workflow Reason

### Prerequisites

To define an approval workflow reason, you should have:

- Values defined for the **APPTXN\_REASON\_TYPE** lookup field

### Procedure

To define an approval workflow reason:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **A** and then click **Approval Workflow Reason**.  
The **Approval Workflow Reason** screen appears.
3. Click the **Add** button in the **Page Title** area of the **Approval Workflow Reason** screen.

The **Approval Workflow Reason** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Approval Workflow Reason	Used to specify the approval workflow reason.	Yes
Description	Used to specify the description for the approval workflow reason.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Reason Category	Used to indicate the category to which the approval workflow reason belongs. The valid values are: <ul style="list-style-type: none"> <li>• Approve</li> <li>• Cancel</li> <li>• Reject</li> </ul>	Yes

4. Enter the required details in the **Approval Workflow Reason** screen.

5. Click **Save**.

The approval workflow reason is defined.

# Chapter 8

---

## Rules Engine

---

### Topics:

- [Rule Type \(Used for Searching\)](#)
- [Rule Type \(Used for Viewing\)](#)
- [Rule](#)
- [View Rule](#)
- [Rule Check](#)

A rules engine executes one or more business rules in a runtime production environment. It allows you to define, execute, and maintain these business rules separately from the application code. You can then use these business rules in any program to facilitate operational decisions at runtime. For example, you might use business rules in the Collection module to decide the collection strategy or in the Banking module to derive charges codes or price items for the transaction.

A rules engine allows you to classify these rules using the rule type. It also allows you to define the relationship between two or more rules and set the priority for each rule. When a calling program invokes these rules using the rule type, all effective rules with the specified rule type are executed, starting with the rule having highest priority. For example, a rule with the priority 10 will be executed before a rule with the priority 20.

Each rule contains one or more criteria. Depending on whether the criteria is satisfied, the system either executes the next criteria or indicates whether the rule is true or false. The rules engine allows you to define what should happen when the rule is true or false. In both the cases, you can enforce the system to either:

- Execute any dependent rule
- Execute a rule with the same rule type having lower priority
- Return the output parameters and their values to the calling program

You can define a criteria for a rule only using the input parameters that are defined for the rule type. Also, when the rule is true, you can only return the output parameters that are defined for the rule type to the calling programs. Therefore, in case you want to use any field in the rule, you have to associate it with the rule type as an input or output parameter.

A rules engine also allows you to execute preprocessing and postprocessing algorithms. A preprocessing algorithm is triggered before executing any criteria in the rule. It pre-processes the input parameters and then returns processed values against which the criteria is validated. A postprocessing algorithm is triggered after executing all criteria in the rule. It post-processes the output parameters and returns the updated values to the calling programs or dependent rules.

Oracle Revenue Management and Billing provides you with the Rule Check utility. It allows you to validate whether rules defined with a specific rule type get executed as expected. On validating, it indicates the sequence in which the rules were executed, the total execution time, and displays the output parameters of the rule that was successfully executed.

Normally, in the Transaction Feed Management feature, the transaction legs are created using the output parameters of the rule where the criteria returns **Rule**

**Is True** and the rule true action is set to **Success**. Oracle Revenue Management and Billing also enables you to accumulate the output parameters of all rules where the criteria returns **Rule Is True** irrespective of whether the rule true action is set to **Next Dependent**, **Next Rule by Priority**, or **Success**. This accumulation process continues until a rule is executed where the criteria returns **Rule Is True** and the rule true action is set to **Success**. Once the output parameters are accumulated, the transactions legs are created using these accumulated output parameters. You can enable the rule output accumulation feature for the Transaction Feed Management module by setting the **Rule Output Accumulation** option type in the **C1\_FM** feature configuration to **true**.

There might be situations when duplicate transaction legs are created through the rule output accumulation process. The system enables you to indicate whether duplicate transaction legs must be created during the transaction aggregation cycle through the rule output accumulation process. If the **Remove Duplicates from Accumulated Rule Output** option type in **C1\_FM** feature configuration is set to **true**, the system does not create duplicate transaction legs during the transaction aggregation cycle.

**Note:** The transaction legs with the same account ID, price item, variance parameter or price item parameters, and processing date are considered as duplicate transaction legs.

## Rule Type (Used for Searching)

A rule type can be used for defining rule based auto pay instructions or business rules for mapping transactions with the price items. If you want to use the rule type for defining rule based auto pay instructions, you must set the **Rule Type Usage** field to **Auto Pay**. However, if you want to use the rule type for defining business rules for mapping transactions with the price items, you must leave the **Rule Type Usage** field blank.

It is the rule type which helps the system to determine:

- Fields that can be used while defining criteria for business rules or rule based auto pay instructions
- Entities whose characteristics can be used while defining criteria for rule based auto pay instructions
- Algorithms which must be used for deriving information from the financial transaction
- Maximum number of rules that can be defined when the rule based auto pay instruction is created using the rule type

The **Rule Type** screen allows you to search for a rule type using various search criteria. It also allows you to define, edit, delete, and copy a rule type. It contains the following zone:

- [Search Rule Type](#) on page 763

### Search Rule Type

The **Search Rule Type** zone allows you to search for a rule type using various search criteria. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Rule Type	Used to search a particular rule type.	No
Description	Used to search rule types with a particular description.	No
Rule Type Usage	Used to indicate whether you want to search rule types which are used for defining rule based auto pay instructions or which are used for defining business rules for mapping transactions with the price items. The valid value is: <ul style="list-style-type: none"> <li>• Auto Pay</li> </ul> <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"> <p><b>Note:</b> If you want to search rule types which are used for defining business rules for mapping transactions with the price items, you must leave this field blank.</p> </div>	No

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Rule Type	Displays the rule type.
Description	Displays the description of the rule type.
Rule Type Usage	Indicates whether the rule type is used for defining rule based auto pay instructions or for defining business rules for mapping transactions with the price items.

Column Name	Column Description
View	On clicking the <b>View</b> (  ) icon, the <b>Rule Type</b> screen appears where you can view the details of the rule type.
Edit	On clicking the <b>Edit</b> (  ) icon, the <b>Rule Type</b> screen appears where you can edit the details of the rule type.
Delete	On clicking the <b>Delete</b> (  ) icon, you can delete the rule type.  <b>Note:</b> You can delete a rule type only when the rule based auto pay instructions or business rules are not yet defined using the rule type.
Copy	On clicking the <b>Copy</b> (  ) icon, the <b>Rule Type</b> screen appears where you can create a new rule type using an existing rule type.

## Searching for a Rule Type

### Prerequisites

To search for a rule type, you should have:

- Values defined for the **C1\_RULE\_USAGE\_FLG** lookup field

### Procedure

To search for a rule type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **R** and then click **Rule Type**.  
A sub-menu appears.
3. Click the **Search** option from the **Rule Type** sub-menu.  
The **Rule Type** screen appears.
4. Enter the search criteria in the **Search Rule Type** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search**.

A list of rule types that meet the search criteria appears in the **Search Results** section.

## Defining a Rule Type

### Prerequisites

To define a rule type, you should have:

- Values defined for the **C1\_RULE\_USAGE\_FLG** lookup field

### Procedure

To define a rule type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **R** and then click **Rule Type**.  
A sub-menu appears.
3. Click the **Add** option from the **Rule Type** sub-menu.

The **Rule Type** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the rule type.
- **Input and Output Parameters** - Used to define input and output parameters for the rule type.
- **Rule Criteria Characteristic Entities** - Used to indicate the entities whose characteristics you can use while defining rule based auto pay instructions using the rule type.

**Note:** This section appears only when you select the **Auto Pay** option from the **Rule Type Usage** list.

- **Rule Criteria Derivation Algorithms** - Used to attach algorithms which you want to use for deriving the following from the financial transaction:
  - Values of all those fields (such as, policy number, plan number, or price item) which are selected in the rule type as the input and output parameters
  - Characteristics of all those entities which are selected in the rule type as the rule criteria characteristic entities

**Note:** This section appears only when you select the **Auto Pay** option from the **Rule Type Usage** list.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Rule Type	Used to specify the rule type.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Rule Type Usage	Used to indicate whether you want to use the rule type for defining rule based auto pay instructions or for defining business rules for mapping transactions with the price items. The valid value is: <ul style="list-style-type: none"> <li>Auto Pay</li> </ul> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> If you want to use the rule type for defining rule based auto pay instructions, you must set the rule type usage to <b>Auto Pay</b>. However, if you want to use the rule type for defining business rules for mapping transactions with the price items, you must leave this field blank.</p> </div>	No
Description	Used to specify the description for the rule type.	Yes
Maximum Rule Count	Used to indicate the maximum number of rules that can be defined when the rule based auto pay instruction is created using the rule type. <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> This field appears only when you select the <b>Auto Pay</b> option from the <b>Rule Type Usage</b> list. The maximum rule count cannot be less than or equal to zero.</p> </div>	No

**Tip:** Alternatively, you can access this screen by clicking the **Add** button in the **Page Title** area of the **Rule Type** screen.

- Enter the required details in the **Main** section.
- Define input and output parameters for the rule type.
- Associate one or more characteristic entities with the rule type, if required.

**Note:** You must specify at least one input or output parameter when you want to use the rule type for defining business rules for mapping transactions with the price items. However, you must specify at least one input or output parameter or associate at least one characteristic entity when you want to use the rule type for defining rule based auto pay instructions.

- Associate the rule criteria derivation algorithm when you want to use the rule type for defining rule based auto pay instructions.

**Note:** You must associate the rule criteria derivation algorithm with the rule type when the **Rule Type Usage** field is set to **Auto Pay**.

- Click **Save**.

The rule type is defined.

## Defining Input and Output Parameters for a Rule Type

### Prerequisites

To define the input and output parameters for a rule type, you should have:

- Fields defined in the application
- Field search zone defined in the application

### Procedure

To define the input and output parameters for a rule type:

1. Ensure that the **Input and Output Parameters** section is expanded when you are defining, editing, or copying a rule type.

The **Input and Output Parameters** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Sequence	Used to specify the sequence number for the input or output parameter.	Yes
Field	Used to indicate the field that you want to use as the input or output parameter.  <b>Note:</b> The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Field Search</b> window appears.	Yes
Rule Input/Output	Used to indicate whether you want to use the field as input and/or output parameter while defining a business rule. The valid values are: <ul style="list-style-type: none"> <li>• Input</li> <li>• Input and Output</li> <li>• Output</li> </ul> <b>Note:</b> By default, the <b>Input</b> option is selected. This field appears only when you do not select the <b>Auto Pay</b> option from the <b>Rule Type Usage</b> list.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Search Zone	<p>Used to indicate the search zone that you want to use for searching the field value while defining criteria for rule based auto pay instructions.</p> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>The <b>Search</b>  icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Zone Search</b> window appears.</p> <p>This field appears only when you select the <b>Auto Pay</b> option from the <b>Rule Type Usage</b> list.</p> </div>	No

- Enter the required details in the **Input and Output Parameters** section.

<p><b>Note:</b></p> <p>At present, the following fields are only supported while defining a rule type where the <b>Rule Type Usage</b> field is set to <b>Auto Pay</b>:</p> <ul style="list-style-type: none"> <li>• Policy Number</li> <li>• Plan Number</li> <li>• Price Item</li> </ul> <p>If you want to use any other field while defining criteria for rule based auto pay instructions, the implementation team will have to develop the custom logic to implement the requirement.</p>
--

- If you want to define more than one input or output parameter for the rule type, click the **Add**  icon and then repeat step 2.

<p><b>Note:</b> However, if you want to remove an input or output parameter from the rule type, click the <b>Delete</b>  icon corresponding to the parameter.</p>
--

## Associating a Characteristic Entity with a Rule Type

### Prerequisites

To associate a characteristic entity with a rule type, you should have:

- Values defined for the **RULE\_CRITERIA\_ENTITY\_FLG** lookup field

### Procedure

To associate a characteristic entity with a rule type:

- Ensure that the **Rule Criteria Characteristic Entities** section is expanded when you are defining, editing, or copying a rule type.

The **Rule Criteria Characteristic Entities** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Entity	<p>Used to indicate the entity whose characteristics you want to use while defining criteria for rule based auto pay instructions. The valid values are:</p> <ul style="list-style-type: none"> <li>• Adjustment</li> <li>• Billable Charge</li> <li>• Policy</li> <li>• Policy Plan</li> <li>• Price Item</li> </ul> <p><b>Note:</b> At present, the characteristics of the above listed entities are only supported while defining criteria for rule based auto pay instructions. If you want to use characteristics of any other entity, the implementation team will have to develop the custom logic to implement the requirement.</p>	Yes

**Note:** This section appears only when you select the **Auto Pay** option from the **Rule Type Usage** list.

- Enter the required details in the **Rule Criteria Characteristic Entities** section.
- If you want to associate more than one characteristic entity with the rule type, click the **Add (+)** icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic entity from the rule type, click the **Delete (🗑)** icon corresponding to the characteristic entity.

## Associating an Algorithm with a Rule Type

### Prerequisites

To associate an algorithm with a rule type, you should have:

- Rule criteria derivation algorithm defined using the **C1-APRCRIDER** algorithm type

### Procedure

To associate an algorithm with a rule type:

- Ensure that the **Rule Criteria Derivation Algorithms** section is expanded when you are defining, editing, or copying a rule type.

The **Rule Criteria Derivation Algorithms** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Sequence	Used to indicate the order in which the algorithm should be executed.	Yes
Algorithm	<p>Used to attach an algorithm which you want to use for deriving the following from the financial transaction:</p> <ul style="list-style-type: none"> <li>• Values of all those fields (such as, policy number, plan number, or price item) which are selected in the rule type as the input and output parameters</li> <li>• Characteristics of all those entities which are selected in the rule type as the rule criteria characteristic entities</li> </ul> <p><b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Algorithm Search</b> window appears.</p>	Yes

**Note:** This section appears only when you select the **Auto Pay** option from the **Rule Type Usage** list.

2. Enter the required details in the **Rule Criteria Derivation Algorithms** section.
3. If you want to associate more than one algorithm with the rule type, click the **Add** (+) icon and then repeat step 2.

**Note:** However, if you want to remove an algorithm from the rule type, click the **Delete** (🗑️) icon corresponding to the algorithm.

### Related Topics

## Editing a Rule Type

### Procedure

To edit a rule type:

1. Search for the rule type in the **Rule Type** screen.
2. In the **Search Results** section, click the **Edit** (✎) icon in the **Edit** column corresponding to the rule type whose details you want to edit.

The **Rule Type** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the rule type.
- **Input and Output Parameters** - Used to define input and output parameters for the rule type.
- **Rule Criteria Characteristic Entities** - Used to indicate the entities whose characteristics you can use while defining rule based auto pay instructions using the rule type.

**Note:** This section appears only when you select the **Auto Pay** option from the **Rule Type Usage** list.

- **Rule Criteria Derivation Algorithms** - Used to attach algorithms which you want to use for deriving the following from the financial transaction:
  - Values of all those fields (such as, policy number, plan number, or price item) which are selected in the rule type as the input and output parameters
  - Characteristics of all those entities which are selected in the rule type as the rule criteria characteristic entities

**Note:** This section appears only when you select the **Auto Pay** option from the **Rule Type Usage** list.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Rule Type	Displays the rule type.	Not applicable
Rule Type Usage	Indicates whether the rule type is used for defining rule based auto pay instructions or for defining business rules for mapping transactions with the price items.	Not applicable
Description	Used to specify the description for the rule type.	Yes
Maximum Rule Count	<p>Used to indicate the maximum number of rules that can be defined when the rule based auto pay instruction is created using the rule type.</p> <p><b>Note:</b> This field appears only when the <b>Rule Type Usage</b> field is set to <b>Auto Pay</b>. The maximum rule count cannot be less than or equal to zero. You cannot reduce the maximum rule count when one or more auto pay instructions contain the specified number of rules.</p>	No

**Tip:** Alternatively, you can edit the details of a rule type by clicking the **Edit** link in the **Rule Type** zone.

3. Modify the required details in the **Main** section.
4. Define, edit, or remove input or output parameters from the rule type, if required.

**Note:** You cannot edit or remove an input or output parameter from the rule type when it is used for defining criteria in a business rule or rule based auto pay instruction.

5. Associate or remove one or more characteristic entities from the rule type, if required.

**Note:**

You must specify at least one input or output parameter when you want to use the rule type for defining business rules for mapping transactions with the price items. However, you must specify at least one input or output parameter or associate at least one characteristic entity when you want to use the rule type for defining rule based auto pay instructions.

You cannot remove a characteristic entity from the rule type when it is used for defining criteria in a rule based auto pay instruction.

- Associate or remove one or more rule criteria derivation algorithm from the rule type, if required.

**Note:** You must associate the rule criteria derivation algorithm with the rule type when the **Rule Type Usage** field is set to **Auto Pay**.

- Click **Save**.

The changes made to the rule type are saved.

**Deleting a Rule Type****Procedure**

To delete a rule type:

- Search for the rule type in the **Rule Type** screen.
- In the **Search Results** section, click the **Delete** (🗑️) icon in the **Delete** column corresponding to the rule type that you want to delete.

A message appears confirming whether you want to delete the rule type.

**Note:** You can delete a rule type only when the rule based auto pay instructions or business rules are not yet defined using the rule type.

- Click **OK**.

The rule type is deleted.

How to search for a rule type	<a href="#">Searching for a Rule Type</a> on page 764

## Copying a Rule Type

Instead of creating a rule type from scratch, you can create a new rule type using an existing rule type. This is possible through copying a rule type. On copying a rule type, the details including the input and output parameters, rule criteria characteristic entities, and rule criteria derivation algorithms are copied to the new rule type. You can then edit the details, if required.

### Prerequisites

To copy a rule type, you should have:

- Rule type (whose copy you want to create) defined in the application
- Values defined for the **C1\_RULE\_USAGE\_FLG** lookup field

### Procedure

To copy a rule type:

1. Search for the rule type in the **Rule Type** screen.
2. In the **Search Results** section, click the **Copy** () icon in the **Copy** column corresponding to the rule type whose copy you want to create.

The **Rule Type** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the rule type.
- **Input and Output Parameters** - Used to define input and output parameters for the rule type.
- **Rule Criteria Characteristic Entities** - Used to indicate the entities whose characteristics you can use while defining rule based auto pay instructions using the rule type.

**Note:** This section appears only when you select the **Auto Pay** option from the **Rule Type Usage** list.

- **Rule Criteria Derivation Algorithms** - Used to attach algorithms which you want to use for deriving the following from the financial transaction:
  - Values of all those fields (such as, policy number, plan number, or price item) which are selected in the rule type as the input and output parameters
  - Characteristics of all those entities which are selected in the rule type as the rule criteria characteristic entities

**Note:** This section appears only when you select the **Auto Pay** option from the **Rule Type Usage** list.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Rule Type	Used to specify the rule type.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Rule Type Usage	Used to indicate whether you want to use the rule type for defining rule based auto pay instructions or for defining business rules for mapping transactions with the price items. The valid value is: <ul style="list-style-type: none"> <li>Auto Pay</li> </ul> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> If you want to use the rule type for defining rule based auto pay instructions, you must set the rule type usage to <b>Auto Pay</b>. However, if you want to use the rule type for defining business rules for mapping transactions with the price items, you must leave this field blank.</p> </div>	No
Description	Used to specify the description for the rule type.	Yes
Maximum Rule Count	Used to indicate the maximum number of rules that can be defined when the rule based auto pay instruction is created using the rule type. <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> This field appears only when you select the <b>Auto Pay</b> option from the <b>Rule Type Usage</b> list. The maximum rule count cannot be less than or equal to zero.</p> </div>	No

- Enter the required details in the **Main** section.
- Define, edit, or remove input or output parameters from the rule type, if required.
- Associate or remove one or more characteristic entities from the rule type, if required.

**Note:** You must specify at least one input or output parameter when you want to use the rule type for defining business rules for mapping transactions with the price items. However, you must specify at least one input or output parameter or associate at least one characteristic entity when you want to use the rule type for defining rule based auto pay instructions.

- Associate the rule criteria derivation algorithm when you want to use the rule type for defining rule based auto pay instructions.

**Note:** You must associate the rule criteria derivation algorithm with the rule type when the **Rule Type Usage** field is set to **Auto Pay**.

- Click **Save**.

The new rule type is defined.

## Viewing the Rule Type Details

### Procedure

To view the details of a rule type:

1. Search for the rule type in the **Rule Type** screen.
2. In the **Search Results** section, click the **View** (🔍) icon in the **View** column corresponding to the rule type whose details you want to view.

The **Rule Type** screen appears.

3. View the details of the rule type in the **Rule Type** zone.

### Related Topics

For more information on...	See...
How to search for a rule type	<a href="#">Searching for a Rule Type</a> on page 764
<b>Rule Type</b> screen	<a href="#">Rule Type (Used for Viewing)</a> on page 775
<b>Rule Type</b> zone	<a href="#">Rule Type</a>

## Rule Type (Used for Viewing)

The **Rule Type** screen allows you to view the details of the rule type. It contains the following zone:

- [Rule Type](#) on page 775

### Rule Type

The **Rule Type** zone displays the details of the rule type. It contains the following sections:

- **Main** - Displays basic information about the rule type. It contains the following fields:

Field Name	Field Description
Rule Type	Displays the rule type.
Rule Type Usage	Indicates whether the rule type is used for defining rule based auto pay instructions or for defining business rules for mapping transactions with the price items.  <b>Note:</b> This field appears only when the rule type usage is specified while defining the rule type.
Description	Displays the description of the rule type.
Maximum Rule Count	Indicates the maximum number of rules that can be defined when the rule based auto pay instruction is created using the rule type.  <b>Note:</b> This field appears only when the <b>Rule Type Usage</b> field is set to <b>Auto Pay</b> .

- **Input and Output Parameters** - Lists the input and output parameters defined for the rule type. It contains the following columns:

Column Name	Column Description
Sequence	Displays the sequence number of the input or output parameter.
Field	Indicates the field which is used as the input or output parameter.
Type	Indicates whether the field is used as input and/or output parameter while defining a business rule.
Search Zone	Indicates the search zone that is used for searching the field value while defining criteria for rule based auto pay instructions.  <b>Note:</b> It has a link. On clicking the link, the <b>Zone</b> screen appears where you can view the details of the zone.

- **Rule Criteria Characteristic Entities** - This section contains the following column:

Column Name	Column Description
Characteristic Entity	Indicates the entity whose characteristics can be used while defining criteria for rule based auto pay instructions. The valid values are: <ul style="list-style-type: none"> <li>• Adjustment</li> <li>• Billable Charge</li> <li>• Policy</li> <li>• Policy Plan</li> <li>• Price Item</li> </ul>

- **Rule Criteria Derivation Algorithms** - Lists the algorithms attached to the rule type. It contains the following columns:

Column Name	Column Description
Sequence	Indicates the order in which the algorithm should be executed.
Algorithm	Indicates the algorithm attached to the rule type which derives the following from the financial transaction: <ul style="list-style-type: none"> <li>• Values of all those fields (such as, policy number, plan number, or price item) which are selected in the rule type as the input and output parameters</li> <li>• Characteristics of all those entities which are selected in the rule type as the rule criteria characteristic entities</li> </ul>

**Note:** The **Rule Criteria Characteristic Entities** and **Rule Criteria Derivation Algorithms** sections appear only when the **Rule Type Usage** field is set to **Auto Pay**.

You can edit the details of the rule type by clicking the **Edit** link in the upper-right corner of this zone.

### **Related Topics**

<b>Rule Type</b> zone	<a href="#">Rule Type</a>

## Editing a Rule Type

### Procedure

To edit a rule type:

1. Search for the rule type in the **Rule Type** screen.
2. In the **Search Results** section, click the **Edit**  icon in the **Edit** column corresponding to the rule type whose details you want to edit.

The **Rule Type** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the rule type.
- **Input and Output Parameters** - Used to define input and output parameters for the rule type.
- **Rule Criteria Characteristic Entities** - Used to indicate the entities whose characteristics you can use while defining rule based auto pay instructions using the rule type.

**Note:** This section appears only when you select the **Auto Pay** option from the **Rule Type Usage** list.

- **Rule Criteria Derivation Algorithms** - Used to attach algorithms which you want to use for deriving the following from the financial transaction:
  - Values of all those fields (such as, policy number, plan number, or price item) which are selected in the rule type as the input and output parameters
  - Characteristics of all those entities which are selected in the rule type as the rule criteria characteristic entities

**Note:** This section appears only when you select the **Auto Pay** option from the **Rule Type Usage** list.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Rule Type	Displays the rule type.	Not applicable
Rule Type Usage	Indicates whether the rule type is used for defining rule based auto pay instructions or for defining business rules for mapping transactions with the price items.	Not applicable
Description	Used to specify the description for the rule type.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Maximum Rule Count	<p>Used to indicate the maximum number of rules that can be defined when the rule based auto pay instruction is created using the rule type.</p> <p><b>Note:</b></p> <p>This field appears only when the <b>Rule Type Usage</b> field is set to <b>Auto Pay</b>.</p> <p>The maximum rule count cannot be less than or equal to zero.</p> <p>You cannot reduce the maximum rule count when one or more auto pay instructions contain the specified number of rules.</p>	No

**Tip:** Alternatively, you can edit the details of a rule type by clicking the **Edit** link in the **Rule Type** zone.

3. Modify the required details in the **Main** section.
4. Define, edit, or remove input or output parameters from the rule type, if required.

**Note:** You cannot edit or remove an input or output parameter from the rule type when it is used for defining criteria in a business rule or rule based auto pay instruction.

5. Associate or remove one or more characteristic entities from the rule type, if required.

**Note:**

You must specify at least one input or output parameter when you want to use the rule type for defining business rules for mapping transactions with the price items. However, you must specify at least one input or output parameter or associate at least one characteristic entity when you want to use the rule type for defining rule based auto pay instructions.

You cannot remove a characteristic entity from the rule type when it is used for defining criteria in a rule based auto pay instruction.

6. Associate or remove one or more rule criteria derivation algorithm from the rule type, if required.

**Note:** You must associate the rule criteria derivation algorithm with the rule type when the **Rule Type Usage** field is set to **Auto Pay**.

7. Click **Save**.

The changes made to the rule type are saved.

<b>Rule Type zone</b>	<i>Rule Type</i> on page 775

## Rule

The **Rule** screen allows you to define, edit, delete, and copy a rule. This screen consists of the following zones:

- *Search* on page 779

## Search

The **Search** zone allows you to search for a rule. This zone contains the following two sections:

- **Search Criteria** — The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Rule Code	Used to specify the rule code.	No
Rule Type	Used to specify the type of rule.	No
Description	Used to specify the description for the rule.	No
Rule Priority	Used to specify the priority of the rule.	No
Effective Start Date	Used to specify the date from when the rule is effective.	No

- **Search Results** — On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Priority	Displays the priority of the rule.
Code	Displays the rule code.
Description	Displays the description of the rule.
Type	Displays the type of rule.
Start Date	Displays the date from when the rule is effective.
End Date	Displays the date till when the rule is effective.
Preprocessing Algorithm	Indicates the algorithm that will be triggered before executing the criteria in the rule. It pre-processes the input parameters and then returns processed values against which the criteria is validated.
Postprocessing Algorithm	Indicates the algorithm that will be triggered when the rule is true. It post-processes the output parameters and returns the updated values to the calling programs or dependent rules.
View	On clicking the <b>View</b> (  ) icon, the <b>View Rule</b> screen appears where you can view the details of the rule.
Edit	On clicking the <b>Edit</b> (  ) icon, the <b>Edit Rule</b> screen appears where you can edit the details of the rule.

Column Name	Column Description
Delete	On clicking the <b>Delete</b> (🗑️) icon, you can delete the rule.  <b>Note:</b> You can delete a rule only if it is not used.
Copy	On clicking the <b>Copy</b> (📄) icon, the <b>Copy Rule</b> screen appears where you can create a rule using an existing rule.

You can create a new rule by clicking the **Add** link in the upper right corner of this zone.

## **Searching for a Rule**

### **Procedure**

To search for a rule:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **R** and then click **Rule**.  
A sub-menu appears.
3. Click the **Search** option from the **Rule** sub-menu.  
The **Rule** screen appears.
4. Enter the search criteria in the **Search** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search**.  
A list of rules that meet the search criteria appears in the **Search Results** section.

## Viewing the Rule Details

### Procedure

To view the details of a rule:

1. Search for the rule in the **Rule** screen.
2. In the **Search Results** section, click the **View** () icon in the **View** column corresponding to the rule whose details you want to view.

The **View Rule** screen appears.

3. View the details of the rule in the **Rule Information** zone.

### Related Topics

## Defining a Rule

### Prerequisites

To define a rule, you should have:

- Rule types defined in the application
- Preprocessing and postprocessing algorithms, dependent rules, and parameters defined in the application in case you want to use any of them

### Procedure

To define a rule:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **R** and then click **Rule**.

A sub-menu appears.

3. Click the **Add** option from the **Rule** sub-menu.

The **Add Rule** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Rule Code	Used to specify the rule code.	Yes
Rule Type	Used to specify the type of rule.	Yes
Description	Used to specify the description for the rule.	Yes
Rule Priority	Used to specify the priority of the rule.  <b>Note:</b> You cannot define two rules with the same rule type and priority in the same duration.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Effective Start Date	Used to specify the date from when the rule is effective.	Yes
Effective End Date	Used to specify the date till when the rule is effective.  <b>Note:</b> The effective end date cannot be earlier than the effective start date.	No
Preprocessing Algorithm	Used to specify the algorithm that will be triggered before executing the criteria in the rule. It pre-processes the input parameters and then returns processed values against which the criteria is validated.  <b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Algorithm Search</b> window appears.	No
Postprocessing Algorithm	Used to specify the algorithm that will be triggered when the rule is true. It post-processes the output parameters and returns the updated values to the calling programs or dependent rules.  <b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Algorithm Search</b> window appears.	No
Rule True Action	Used to indicate what should happen when all conditions in the rule are satisfied and returns <b>Rule is True</b> . The valid values are: <ul style="list-style-type: none"> <li>• <b>Next Dependent Rule</b> — Used to indicate that the dependent rule should be executed when the rule is true.</li> <li>• <b>Next Rule by Priority</b> — Used to indicate that the rule of the same rule type having lower priority should be executed when the rule is true.</li> <li>• <b>Success</b> — Used to indicate that no more rules should be executed when the rule is true. The output parameters and their values are returned to the calling programs.</li> </ul>	Yes
Dependent Rule	Used to specify the next dependent rule that must be executed when <b>Next Dependent Rule</b> is selected from the <b>Rule True Action</b> list.	Yes (Conditional)  <b>Note:</b> This field is required when you select <b>Next Dependent Rule</b> from the <b>Rule True Action</b> list.

Field Name	Field Description	Mandatory (Yes or No)
Rule False Action	Used to indicate what should happen when any of the criteria in the rule is not satisfied and returns <b>Rule is False</b> . The valid values are: <ul style="list-style-type: none"> <li>• <b>Next Dependent Rule</b> — Used to indicate that the dependent rule should be executed when the rule is false.</li> <li>• <b>Next Rule by Priority</b> — Used to indicate that the rule of the same rule type having lower priority should be executed when the rule is false.</li> <li>• <b>Success</b> — Used to indicate that no more rules should be executed when the rule is false. The output parameters and their values are returned to the calling programs.</li> </ul>	Yes
Dependent Rule	Used to specify the next dependent rule that must be executed when <b>Next Dependent Rule</b> is selected from the <b>Rule False Action</b> list.	Yes (Conditional)  <div style="border: 1px solid black; padding: 5px;"> <b>Note:</b> This field is required when you select <b>Next Dependent Rule</b> from the <b>Rule False Action</b> list. </div>

In addition, it contains the following two sections:

- **Rule Output Parameters** — Used to specify the output parameters that must be returned to the calling programs or dependent rules when all conditions in the rule are satisfied. This section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Parameter Name	Used to specify the parameter.  <div style="border: 1px solid black; padding: 5px;"> <b>Note:</b> For more information about the output parameters that you can specify while defining a rule, see <a href="#">Transaction Validation and Initial Price Item Determination</a>.   The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Search Rule Type Field</b> window appears. </div>	Yes
Parameter Value	Used to specify the value for the parameter.  <div style="border: 1px solid black; padding: 5px;"> <b>Note:</b> You can specify any special characters except ampersand (&amp;), comma (,), underscore (_), equal to (=), tilde (~), and semi-colon(;) in the parameter value. </div>	Yes

- **Criteria** — Used to define criteria for the rule. This section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Sequence Number	Used to indicate the order in which the criteria should be executed in the rule.	Yes

Column Name	Column Description	Mandatory (Yes or No)
Parameter Name	<p>Used to indicate whether you want to specify a field or an algorithm as an input parameter. It also allows you to specify the field or algorithm name.</p> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> If a business label is defined for a user defined field (that you have selected), the business label appears in the <b>Parameter Name</b> field.</p> <p>The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Search Rule Type Field</b> window appears.</p> </div>	Yes
Operator	Used to specify the relational operator to define the relation between the parameter name and value.	Yes
Parameter Value	<p>Used to specify the parameter value.</p> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> You can specify any special characters except ampersand (&amp;), comma (,), underscore (_), equal to (=), tilde (~), and semi-colon(;) in the parameter value.</p> <p>The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Search Rule Type Field</b> window appears.</p> </div>	Yes
Is True	<p>Used to indicate what should happen when the condition is true (satisfied). The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Check next condition</b> — Used to indicate that the condition with consecutive sequence number should be executed.</li> <li>• <b>Rule is false</b> — Used to indicate that the action specified in the <b>Rule False Action</b> field should be executed.</li> <li>• <b>Rule is true</b> — Used to indicate that the action specified in the <b>Rule True Action</b> field should be executed.</li> </ul>	Yes
Is False	<p>Used to indicate what should happen when the condition is false (not satisfied). The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Check next condition</b> — Used to indicate that the condition with consecutive sequence number should be executed.</li> <li>• <b>Rule is false</b> — Used to indicate that the action specified in the <b>Rule False Action</b> field should be executed.</li> <li>• <b>Rule is true</b> — Used to indicate that the action specified in the <b>Rule True Action</b> field should be executed.</li> </ul>	Yes

Column Name	Column Description	Mandatory (Yes or No)
Is Insufficient	Used to indicate what should happen when the data is insufficient. The valid values are: <ul style="list-style-type: none"> <li>• <b>Check next condition</b> — Used to indicate that the condition with consecutive sequence number should be executed.</li> <li>• <b>Rule is false</b> — Used to indicate that the action specified in the <b>Rule False Action</b> field should be executed.</li> <li>• <b>Rule is true</b> — Used to indicate that the action specified in the <b>Rule True Action</b> field should be executed.</li> </ul>	Yes

**Tip:** Alternatively, you can access the **Add Rule** screen by clicking the **Add** link in the upper right corner of the **Search** zone in the **Rule** screen.

4. Enter the required details.

**Note:**

You can search for a parameter, dependent rule and an algorithm by clicking the **Search** (🔍) icon corresponding to the respective field.

If you want to associate more than one output parameter with the rule or define more than one criteria for the rule, click the **Add** (+) icon and then specify the details. However, if you want to remove an output parameter or a criteria from the rule, click the **Delete** (🗑️) icon corresponding to it.

5. Click **Save**.

The rule is defined.

## **Editing a Rule**

### **Prerequisites**

To edit a rule, you should have:

- Preprocessing and postprocessing algorithms, dependent rules, and parameters defined in the application in case you want to use any of them.

### **Procedure**

To edit a rule:

1. Search for the rule in the **Rule** screen.
2. In the **Search Results** section, click the **Edit** (✎) icon in the **Edit** column corresponding to the rule whose details you want to edit.

The **Edit Rule** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Rule Code	Used to specify the rule code.	Yes
Rule Type	Used to specify the type of rule.	Yes
Description	Used to specify the description for the rule.	Yes
Rule Priority	Used to specify the priority of the rule.  <b>Note:</b> You cannot define two rules with the same rule type and priority in the same duration.	Yes
Effective Start Date	Used to specify the date from when the rule is effective.	Yes
Effective End Date	Used to specify the date till when the rule is effective.  <b>Note:</b> The effective end date cannot be earlier than the effective start date.	No
Preprocessing Algorithm	Used to specify the algorithm that will be triggered before executing the criteria in the rule. It pre-processes the input parameters and then returns processed values against which the criteria is validated.  <b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Algorithm Search</b> window appears.	No
Postprocessing Algorithm	Used to specify the algorithm that will be triggered when the rule is true. It post-processes the output parameters and returns the updated values to the calling programs or dependent rules.  <b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Algorithm Search</b> window appears.	No

Field Name	Field Description	Mandatory (Yes or No)
Rule True Action	Used to indicate what should happen when all conditions in the rule are satisfied and returns <b>Rule is True</b> . The valid values are: <ul style="list-style-type: none"> <li>• <b>Next Dependent Rule</b> — Used to indicate that the dependent rule should be executed when the rule is true.</li> <li>• <b>Next Rule by Priority</b> — Used to indicate that the rule of the same rule type having lower priority should be executed when the rule is true.</li> <li>• <b>Success</b> — Used to indicate that no more rules should be executed when the rule is true. The output parameters and their values are returned to the calling programs.</li> </ul>	Yes
Dependent Rule	Used to specify the next dependent rule that must be executed when <b>Next Dependent Rule</b> is selected from the <b>Rule True Action</b> list.	Yes (Conditional) <div style="border: 1px solid black; padding: 5px; margin-top: 5px;"> <b>Note:</b> This field is required when you select <b>Next Dependent Rule</b> from the <b>Rule True Action</b> list. </div>
Rule False Action	Used to indicate what should happen when any of the criteria in the rule is not satisfied and returns <b>Rule is False</b> . The valid values are: <ul style="list-style-type: none"> <li>• <b>Next Dependent Rule</b> — Used to indicate that the dependent rule should be executed when the rule is false.</li> <li>• <b>Next Rule by Priority</b> — Used to indicate that the rule of the same rule type having lower priority should be executed when the rule is false.</li> <li>• <b>Success</b> — Used to indicate that no more rules should be executed when the rule is false. The output parameters and their values are returned to the calling programs.</li> </ul>	Yes
Dependent Rule	Used to specify the next dependent rule that must be executed when <b>Next Dependent Rule</b> is selected from the <b>Rule False Action</b> list.	Yes (Conditional) <div style="border: 1px solid black; padding: 5px; margin-top: 5px;"> <b>Note:</b> This field is required when you select <b>Next Dependent Rule</b> from the <b>Rule False Action</b> list. </div>

In addition, it contains the following two sections:

- **Rule Output Parameters** — Used to specify the output parameters that must be returned to the calling programs or dependent rules when all conditions in the rule are satisfied. This section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Parameter Name	<p>Used to specify the parameter.</p> <p><b>Note:</b> For more information about the output parameters that you can specify while defining a rule, see <a href="#">Transaction Validation and Initial Price Item Determination</a>.</p> <p>The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Search Rule Type Field</b> window appears.</p>	Yes
Parameter Value	<p>Used to specify the value for the parameter.</p> <p><b>Note:</b> You can specify any special characters except ampersand (&amp;), comma (,), underscore (_), equal to (=), tilde (~), and semi-colon(;) in the parameter value.</p>	Yes

- **Criteria** — Used to define criteria for the rule. This section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Sequence Number	Used to indicate the order in which the criteria should be executed in the rule.	Yes
Parameter Name	<p>Used to indicate whether you want to specify a field or an algorithm as an input parameter. It also allows you to specify the field or algorithm name.</p> <p><b>Note:</b></p> <p>If a business label is defined for a user defined field (that you have selected), the business label appears in the <b>Parameter Name</b> field.</p> <p>The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Search Rule Type Field</b> window appears.</p>	Yes
Operator	Used to specify the relational operator to define the relation between the parameter name and value.	Yes
Parameter Value	<p>Used to specify the parameter value.</p> <p><b>Note:</b> You can specify any special characters except ampersand (&amp;), comma (,), underscore (_), equal to (=), tilde (~), and semi-colon(;) in the parameter value.</p> <p>The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Search Rule Type Field</b> window appears.</p>	Yes

Column Name	Column Description	Mandatory (Yes or No)
Is True	Used to indicate what should happen when the condition is true (satisfied). The valid values are: <ul style="list-style-type: none"> <li>• <b>Check next condition</b> — Used to indicate that the condition with consecutive sequence number should be executed.</li> <li>• <b>Rule is false</b> — Used to indicate that the action specified in the <b>Rule False Action</b> field should be executed.</li> <li>• <b>Rule is true</b> — Used to indicate that the action specified in the <b>Rule True Action</b> field should be executed.</li> </ul>	Yes
Is False	Used to indicate what should happen when the condition is false (not satisfied). The valid values are: <ul style="list-style-type: none"> <li>• <b>Check next condition</b> — Used to indicate that the condition with consecutive sequence number should be executed.</li> <li>• <b>Rule is false</b> — Used to indicate that the action specified in the <b>Rule False Action</b> field should be executed.</li> <li>• <b>Rule is true</b> — Used to indicate that the action specified in the <b>Rule True Action</b> field should be executed.</li> </ul>	Yes
Is Insufficient	Used to indicate what should happen when the data is insufficient. The valid values are: <ul style="list-style-type: none"> <li>• <b>Check next condition</b> — Used to indicate that the condition with consecutive sequence number should be executed.</li> <li>• <b>Rule is false</b> — Used to indicate that the action specified in the <b>Rule False Action</b> field should be executed.</li> <li>• <b>Rule is true</b> — Used to indicate that the action specified in the <b>Rule True Action</b> field should be executed.</li> </ul>	Yes

**Tip:** Alternatively, you can access the **Edit Rule** screen by clicking the **Edit** link in the **View Rule** screen.

3. Modify the required details.

**Note:** You can search for a parameter, dependent rule and an algorithm by clicking the **Search** (🔍) icon corresponding to the respective field.

4. Add or remove output parameters or criteria from the rule, if required.

**Note:** If you want to associate more than one output parameter with the rule or define more than one criteria for the rule, click the **Add** (+) icon and then specify the details. However, if you want to remove an output parameter or a criteria from the rule, click the **Delete** (🗑️) icon corresponding to it.

5. Click **Save**.

The changes made to the rule are saved.

### Related Topics

For more information on...	See...
<b>Rule</b> screen	<a href="#">Rule</a> on page 779

## Deleting a Rule

### Procedure

To delete a rule:

1. Search for the rule in the **Rule** screen.
2. In the **Search Results** section, click the **Delete** (🗑️) icon in the **Delete** column corresponding to the rule that you want to delete.

A message appears confirming whether you want to delete the rule.

**Note:** You can delete a rule only if it is not used.

3. Click **OK**.

The rule is deleted.

### Related Topics

For more information on...	See...
<b>Rule</b> screen	<a href="#">Rule</a> on page 779
<b>Search</b> zone	<a href="#">Search</a> on page 779

## Copying a Rule

Instead of creating a rule from scratch, you can also create a new rule using an existing rule. You can do this by copying a rule. When you copy a rule, the output parameters and criteria defined for the original rule are copied to the new rule. You can then add or remove parameters or criteria from the new rule.

### Prerequisites

To copy a rule, you should have:

- Rule (whose copy you want to create) defined in the application
- Preprocessing and postprocessing algorithms, dependent rules, and parameters defined in the application in case you want to use any of them

### Procedure

To copy a rule:

1. Search for the rule in the **Rule** screen.
2. In the **Search Results** section, click the **Copy** (📄) icon corresponding to the rule whose copy you want to create.

The **Copy Rule** screen appears.

3. Enter the new rule code and the description for the new rule.

4. Modify the required details.
5. Add or remove output parameters or criteria from the new rule.

**Note:**

You can specify any special characters except ampersand (&), comma (,), underscore (\_), equal to (=), tilde (~), and semi-colon(;) in the parameter value.

You can search for a parameter, dependent rule and an algorithm by clicking the **Search** (🔍) icon corresponding to the respective field.

If you want to associate more than one output parameter with the rule or define more than one criteria for the rule, click the **Add** (+) icon and then specify the details. However, if you want to remove an output parameter or a criteria from the rule, click the **Delete** (🗑️) icon corresponding to it.

For more information about the output parameters that you can specify while defining a rule, see [Transaction Validation and Initial Price Item Determination](#).

6. Click **Save**.

The new rule is defined.

**Related Topics**

For more information on...	See...
<b>Rule</b> screen	<a href="#">Rule</a> on page 779
<b>Search</b> zone	<a href="#">Search</a> on page 779
How to define a rule	<a href="#">Defining a Rule</a> on page 781

## View Rule

The **View Rule** screen allows you to view the details of a rule. This screen consists of the following zones:

- [Rule Information](#) on page 791

### Rule Information

The **Rule Information** zone displays information about the rule. This zone contains the following fields:

Field Name	Field Description
Rule Code	Displays the rule code.
Rule Type	Indicates the type of rule.
Description	Displays the description of the rule.
Rule Priority	Indicates the priority of the rule.  <b>Note:</b> You can use the <b>Move Up</b> (↑) and <b>Move Down</b> (↓) icons corresponding to this field to view the details of a rule (having the same rule type) with a higher or lower priority. Note that this functionality is available only when you access the <b>View Rule</b> screen through the <b>Rule</b> screen.
Effective Start Date	Displays the date from when the rule is effective.

Field Name	Field Description
Effective End Date	Displays the date till when the rule is effective.
Preprocessing Algorithm	Indicates the algorithm that will be triggered before executing the criteria in the rule. It pre-processes the input parameters and then returns processed values against which the criteria is validated.
Postprocessing Algorithm	Indicates the algorithm that will be triggered after executing the criteria in the rule. It post-processes the output parameters and returns the updated values to the calling programs or dependent rules.
Rule True Action	Indicates what should happen when all conditions in the rule are satisfied and returns <b>Rule is True</b> .
Dependent Rule	Indicates the next dependent rule that must be executed when <b>Next Dependent Rule</b> is selected from the <b>Rule True Action</b> list.
Rule False Action	Indicates what should happen when any of the criteria in the rule is not satisfied and returns <b>Rule is False</b> .
Dependent Rule	Indicates the next dependent rule that must be executed when <b>Next Dependent Rule</b> is selected from the <b>Rule False Action</b> list.

In addition, it contains the following two sections:

- **Rule Output Parameters** — Lists the output parameters that must be returned to the calling programs or dependent rules when all conditions in the rule are satisfied. This section contains the following columns:

Column Name	Column Description
Parameter Name	Displays the name of the parameter. In addition, this column has a context menu which helps in navigating to the <b>Field</b> screen.
Parameter Value	Displays the value of the parameter.

- **Criteria** — Lists the criteria defined in the rule. This section contains the following columns:

Column Name	Column Description
Sequence Number	Indicates the order in which the criteria should be executed in the rule.
Parameter Type	Indicates whether the input parameter is a field or an algorithm.
Parameter Name	Displays the field or algorithm name which is used as an input parameter.
Operator	Indicates the relational operator used to define the relation between the parameter name and value.
Parameter Value	Displays the parameter value.
Is True	Indicates what should happen when the condition is true (satisfied). The valid values are: <ul style="list-style-type: none"> <li>• <b>Check next condition</b> — Indicates that the condition with consecutive sequence number should be executed.</li> <li>• <b>Rule is false</b> — Indicates that the action specified in the <b>Rule False Action</b> field should be executed.</li> <li>• <b>Rule is true</b> — Indicates that the action specified in the <b>Rule True Action</b> field should be executed.</li> </ul>

Column Name	Column Description
Is False	<p>Indicates what should happen when the condition is false (not satisfied). The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Check next condition</b> — Indicates that the condition with consecutive sequence number should be executed.</li> <li>• <b>Rule is false</b> — Indicates that the action specified in the <b>Rule False Action</b> field should be executed.</li> <li>• <b>Rule is true</b> — Indicates that the action specified in the <b>Rule True Action</b> field should be executed.</li> </ul>
Is Insufficient	<p>Indicates what should happen when the data is insufficient. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Check next condition</b> — Indicates that the condition with consecutive sequence number should be executed.</li> <li>• <b>Rule is false</b> — Indicates that the action specified in the <b>Rule False Action</b> field should be executed.</li> <li>• <b>Rule is true</b> — Indicates that the action specified in the <b>Rule True Action</b> field should be executed.</li> </ul>

The **Edit** link appears in the upper-right corner of the **Rule Information** zone. On clicking the **Edit** link, the **Edit Rule** screen appears where you can edit the details of the rule.

### Related Topics

For more information on...	See...
How to view the details of a rule	<a href="#">Viewing the Rule Details</a> on page 781

## Viewing the Rule Details

### Procedure

To view the details of a rule:

1. Search for the rule in the **Rule** screen.
2. In the **Search Results** section, click the **View** () icon in the **View** column corresponding to the rule whose details you want to view.

The **View Rule** screen appears.

3. View the details of the rule in the **Rule Information** zone.

### Related Topics

For more information on...	See...
<b>View Rule</b> screen	<a href="#">View Rule</a> on page 791
<b>Rule Information</b> zone	<a href="#">Rule Information</a> on page 791

## Rule Check

The **Rule Check** screen allows you to validate whether rules of a particular rule type are executed as expected. On validating, it indicates the sequence in which all effective rules were executed, the total execution time, and the output parameters of the rule that was successfully executed. This screen consists of the following sections:

- Rule Type Input Parameters
- Rule Output Parameters
- Rule Execution

### Rule Type Input Parameters

The **Rule Type Input Parameters** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Rule Type	Used to specify the rule type.	Yes
Effective Date	Used when you want to execute the rules which are effective on a particular date.  <b>Note:</b> If you do not specify the effective date, the system executes all rules which are effective on the system date.	No
Parameter Name	Indicates the input parameter.  <b>Note:</b> The input parameters listed change depending on the rule type that you have selected.	Not applicable
Parameter Value	Used to specify the value for the input parameter.	Yes

In addition, this section contains the **Check Rule** button. On clicking the button, you can validate the sequence in which the rules with the specified rule type are executed.

### Rule Output Parameters

The **Rule Output Parameters** section contains the following fields:

Field Name	Field Description
Status	Displays the status of the rule execution. The valid values are: <ul style="list-style-type: none"> <li>• <b>Success</b> — Indicates that one of the rule was successfully executed and returned the output parameters.</li> <li>• <b>Fail</b> — Indicates that none of the rules with the specified rule type were successfully executed.</li> <li>• <b>Error</b> — Indicates that an error occurred while executing a rule.</li> </ul>
Execution Time	Displays the total time taken to execute all effective rules with the specified rule type.
Error	Displays the error message indicating the error that occurred while executing a rule.  <b>Note:</b> This field appears only when the status is <b>Error</b> .

In addition, this section contains the following columns:

Column Name	Column Description
Parameter Name	Displays the output parameter of the rule that was successfully executed.
Parameter Value	Displays the value of the output parameter.

### **Rule Execution**

The **Rule Execution** section indicates the sequence in which all effective rules with the specified rule type were executed. This section contains the following columns:

Column Name	Column Description
Rule Code	Indicates the rule that was executed.
Rule Type	Indicates the type of rule.
Rule Priority	Indicates the priority of the rule.
Rule Status Flag	Indicates whether the rule was true or false.
Rule Next Action	Indicates the action that took place when the rule was true or false.

### **Rule Check**

The **Rule Check** zone allows you to validate whether rules of a particular rule type are executed as expected. It indicates the sequence in which all effective rules were executed along with the total execution time. This zone consists of the following sections:

- **Rule Type Input Parameters** — This sections contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Rule Type	Used to specify the rule type.	Yes
Effective Date	Used when you want to execute the rules which are effective on a particular date.	No
Parameter Name	Indicates the input parameter. <b>Note:</b> The input parameters listed change depending on the rule type that you have selected.	Not applicable
Parameter Value	Used to specify the value for the input parameter.	Yes

In addition, this section contains the **Check Rule** button. On clicking the button, you can validate the sequence in which the rules with the specified rule type are executed.

- **Rule Output Parameters** — This section contains the following fields:

Field Name	Field Description
Status	Displays the status of the rule execution. The valid values are: <ul style="list-style-type: none"> <li>• <b>Success</b> — Indicates that one of the rule was successfully executed and returned the output parameters.</li> <li>• <b>Fail</b> — Indicates that none of the rules with the specified rule type were successfully executed.</li> <li>• <b>Error</b> — Indicates that an error occurred while executing a rule.</li> </ul>
Execution Time	Displays the total time taken to execute a set of rules.

Field Name	Field Description
Error	Displays the error message indicating the error that occurred while executing a rule. <b>Note:</b> This field appears only when the status is <b>Error</b> .

In addition, this section contains the following columns:

Column Name	Column Description
Parameter Name	Displays the output parameter of the rule that was successfully executed.
Parameter Value	Displays the value of the output parameter.

- **Rule Execution** — Indicates the sequence in which the rules with the specified rule type were executed. This section contains the following columns:

Column Name	Column Description
Rule Code	Displays the rule code.
Rule Type	Displays the type of rule.
Rule Priority	Displays the priority of the rule.
Rule Status Flag	Indicates whether the rule was true or false.
Rule Next Action	Indicates the action that took place when the rule was true or false.

## Alternate Sequential Bill Numbers

---

### Topics:

- [Sequential Bill Number Generation Algorithms](#)
- [Enabling the Alternate Sequential Bill Numbers Feature](#)

Each bill is uniquely identified by its bill ID. Bill ID is a random, system-generated number. In some locales, bills have an additional identifier known as alternate sequential bill number. Alternate sequential bill numbers are system-generated, sequential numbers. For example, the first bill generated by the system is assigned a sequential bill number of 1, the next bill is assigned a value of 2, and so on.

If you want to generate alternate sequential bill numbers, you must select the **Use Sequential Bill Numbers** check box in the **Billing** tab of the **Installation Options** screen. However, you can only generate alternate sequential bill numbers for bills that are complete and for which the alternate sequential bill numbers are not yet generated.

You can configure the application to generate alternate sequential bill numbers which are either unique throughout the system or within the division. The **Assign Sequential Bill Numbers (ASSGNSBN)** batch allows you to generate alternate sequential bill numbers for completed bills. You need to configure this batch such that it is executed at regular intervals. For more information about the batch, refer to *Oracle Revenue Management and Billing Batch Guide*.

## Sequential Bill Number Generation Algorithms

The following table lists the sequential bill number generation algorithm types shipped with the product:

If you want to generate...	Then create algorithm using the following algorithm type....
Alternate sequential bill numbers unique throughout the system	<a href="#">C1_ALTBLLSYS</a> on page 798
Alternate sequential bill numbers unique within the division	<a href="#">C1_ALTBLDV</a> on page 801
Alternate sequential bill numbers unique throughout the system and in the required format using a set of parameters	<a href="#">C1_ALTBSYSI</a> on page 798 <b>Note:</b> The alternate sequential bill number will be unique throughout the system only when you configure the algorithm parameters appropriately.
Alternate sequential bill numbers unique within the division and in the required format using a set of parameters	<a href="#">C1_ALTBLDIVI</a> on page 801 <b>Note:</b> The alternate sequential bill number will be unique within the division only when you configure the algorithm parameters appropriately.

### C1\_ALTBLLSYS

The **C1\_ALTBLLSYS** algorithm type is used to generate alternate bill ID for a completed bill. The alternate bill ID is sequenced using the sequence number, and is unique throughout the system. This algorithm type does not have any parameters.

### C1\_ALTBSYSI

The **C1\_ALTBSYSI** algorithm type is used to generate alternate bill ID for a completed bill. You can generate alternate bill ID in the required format using the following parameters:

Parameter	Description
'X'	Here, X stands for a separator. For example, ','. The separator must be enclosed within single quotes. It will act as a delimiter in the alternate sequential bill number.
CIS_DIVISION	The division to which the account belongs. It is retrieved from the bill. It should not be more than five characters.
BILL_CYC_CD	The bill cycle of the account for which the bill is generated. It is retrieved from the bill. It should not be more than four characters.

Parameter	Description
ACCT_IDENTIFIER=<Account_Identifier_Type>,<CharStartPosition>,<CharCount>	<p>Here, you need to specify the following information separated by a comma:</p> <ul style="list-style-type: none"> <li>• <b>&lt;Account_Identifier_Type&gt;</b> - Used to indicate the account identifier type whose value must be used to generate the alternate sequential bill number.</li> <li>• <b>&lt;CharStartPosition&gt;</b> - Used to indicate the starting position from where you want to extract the characters from the account identifier. If you do not specify the starting position, by default, it is set to zero (0) (i.e. from the first character).</li> <li>• <b>&lt;CharCount&gt;</b> - Used to indicate the number of characters that you want to extract from the account identifier. If you do not specify the count, by default, it is set to five.</li> </ul>
CHARACC=<Characteristic_Type>,<CharStartPosition>,<CharCount>	<p>Here, you need to specify the following information separated by a comma:</p> <ul style="list-style-type: none"> <li>• <b>&lt;Characteristic_Type&gt;</b> - Used to indicate the account's characteristic whose value must be used to generate the alternate sequential bill number.</li> <li>• <b>&lt;CharStartPosition&gt;</b> - Used to indicate the starting position from where you want to extract the characters from the characteristic value. If you do not specify the starting position, by default, it is set to zero (0) (i.e. from the first character).</li> <li>• <b>&lt;CharCount&gt;</b> - Used to indicate the number of characters that you want to extract from the characteristic value. If you do not specify the count, by default, it is set to five.</li> </ul> <div data-bbox="820 1241 1463 1350" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> If the same characteristic is defined multiple times for an account, the characteristic value which is effective on the batch business date is considered.</p> </div>

Parameter	Description
CHARPER=<Characteristic_Type>,<CharStartPosition>,<CharCount>	<p>Here, you need to specify the following information separated by a comma:</p> <ul style="list-style-type: none"> <li>• <b>&lt;Characteristic_Type&gt;</b> - Used to indicate the person's characteristic whose value must be used to generate the alternate sequential bill number.</li> <li>• <b>&lt;CharStartPosition&gt;</b> - Used to indicate the starting position from where you want to extract the characters from the characteristic value. If you do not specify the starting position, by default, it is set to zero (0) (i.e. from the first character).</li> <li>• <b>&lt;CharCount&gt;</b> - Used to indicate the number of characters that you want to extract from the characteristic value. If you do not specify the count, by default, it is set to five.</li> </ul> <p><b>Note:</b> If the same characteristic is defined multiple times for an account, the characteristic value which is effective on the batch business date is considered.</p>
BILL_DT=MMddy	<p>The date when the bill is created for the account. It should not be more than six characters. You can use the following patterns in the date format:</p> <ul style="list-style-type: none"> <li>• "yyyy" or "yy" for year</li> <li>• "MM" or "M" for month</li> <li>• "dd" or "d" for day</li> </ul> <p><b>Note:</b> The date format should either start or end with the year.</p>
SEQ_NBR	The sequence number generated by the database. It should not be more than 12 characters.
FIXED_SUFFIX=XX	Here, X stands for a letter or a group of letters that you want to add at the end of the alternate sequential bill number.
LEFT_PADDING_CHAR=ZERO LEFT_PADDING_CHAR=SPACE	<p>or</p> <p>Indicates whether you want to add zero or space when the number of characters derived from the account's or person's characteristic value is less than the character count. The padding is added to the left.</p>

You can specify the above mentioned parameters against any of the following parameters available in the C1\_ALTBLSYS1 algorithm type:

- Field1
- Field2
- Field3
- Field4
- Field5
- Field6
- Field7

- Field8
- Field9
- Field10

None of these algorithm type parameters are mandatory. The system will concatenate the parameter values and then generate alternate bill ID in the required format. For example, if you created the algorithm using the following parameters:

- Field1 — CIS\_DIVISION
- Field2 — ‘|’
- Field3 — SEQ\_NBR
- Field4 — ‘-’
- Field5 — FIXED\_SUFFIX=01

In this case, the system will generate the alternate bill ID in the CIS\_DIVISION|SEQ\_NBR-01 format. For example, DIV1|12345678-01. If you want to generate unique alternate bill ID, we recommend you to use the **SEQ\_NBR** parameter while creating an algorithm using the **C1\_ALTBLSYS1** algorithm type.

Note that if you do not specify the value for any parameters while creating an algorithm using the **C1\_ALTBLSYS1** algorithm type, the system will generate the alternate bill ID using the sequence number.

While specifying the value for these parameters, you need to ensure that the length of the alternate bill ID should not exceed 30 characters. An algorithm named **C1\_ALTBLSYS1** is already shipped with the product. You can create custom algorithms using the **C1\_ALTBLSYS1** algorithm type to design the required alternate bill ID format using the above mentioned parameters.

## C1\_ALTBLDV

The **C1\_ALTBLDV** algorithm type is used to generate alternate bill ID for a completed bill which is unique within the division. For example, two bills (such as B1 and B2) belonging to the same division (such as D1) cannot have the same alternate bill ID. However, two bills (such as B1 and B2) belonging to different divisions, (such as D1 and D2) can have the same alternate bill ID.

This algorithm type contains the following parameters:

Parameter	Description	Mandatory (Yes or No)
Initial Bill Sequence Number	Used to specify the initial alternate bill ID that you want to use while sequencing.  <b>Note:</b> If you do not specify any value for this parameter, by default, the system will generate the initial alternate bill ID for sequencing.	No

## C1\_ALTBLDIV1

The **C1\_ALTBLDIV1** algorithm type is used to generate alternate bill ID for a completed bill. You can generate alternate bill ID in the required format using the following parameters:

Parameter	Description
‘X’	Here, X stands for a separator. For example, ‘;’. The separator must be enclosed within single quotes. It will act as a delimiter in the alternate sequential bill number.
CIS_DIVISION	The division to which the account belongs. It is retrieved from the bill. It should not be more than five characters.

Parameter	Description
BILL_CYC_CD	The bill cycle of the account for which the bill is generated. It is retrieved from the bill. It should not be more than four characters.
ACCT_IDENTIFIER=<Account_Identifier_Type>,<CharStartPosition>,<CharCount>	<p>Here, you need to specify the following information separated by a comma:</p> <ul style="list-style-type: none"> <li>• <b>&lt;Account_Identifier_Type&gt;</b> - Used to indicate the account identifier type whose value must be used to generate the alternate sequential bill number.</li> <li>• <b>&lt;CharStartPosition&gt;</b> - Used to indicate the starting position from where you want to extract the characters from the account identifier. If you do not specify the starting position, by default, it is set to zero (0) (i.e. from the first character).</li> <li>• <b>&lt;CharCount&gt;</b> - Used to indicate the number of characters that you want to extract from the account identifier. If you do not specify the count, by default, it is set to five.</li> </ul>
CHARACC=<Characteristic_Type>,<CharStartPosition>,<CharCount>	<p>Here, you need to specify the following information separated by a comma:</p> <ul style="list-style-type: none"> <li>• <b>&lt;Characteristic_Type&gt;</b> - Used to indicate the account's characteristic whose value must be used to generate the alternate sequential bill number.</li> <li>• <b>&lt;CharStartPosition&gt;</b> - Used to indicate the starting position from where you want to extract the characters from the characteristic value. If you do not specify the starting position, by default, it is set to zero (0) (i.e. from the first character).</li> <li>• <b>&lt;CharCount&gt;</b> - Used to indicate the number of characters that you want to extract from the characteristic value. If you do not specify the count, by default, it is set to five.</li> </ul> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> If the same characteristic is defined multiple times for an account, the characteristic value which is effective on the batch business date is considered.</p> </div>

Parameter	Description
CHARPER=<Characteristic_Type>,<CharStartPosition>,<CharCount>	<p>Here, you need to specify the following information separated by a comma:</p> <ul style="list-style-type: none"> <li>• <b>&lt;Characteristic_Type&gt;</b> - Used to indicate the person's characteristic whose value must be used to generate the alternate sequential bill number.</li> <li>• <b>&lt;CharStartPosition&gt;</b> - Used to indicate the starting position from where you want to extract the characters from the characteristic value. If you do not specify the starting position, by default, it is set to zero (0) (i.e. from the first character).</li> <li>• <b>&lt;CharCount&gt;</b> - Used to indicate the number of characters that you want to extract from the characteristic value. If you do not specify the count, by default, it is set to five.</li> </ul> <p><b>Note:</b> If the same characteristic is defined multiple times for an account, the characteristic value which is effective on the batch business date is considered.</p>
BILL_DT=MMddy	<p>The date when the bill is created for the account. It should not be more than six characters. You can use the following patterns in the date format:</p> <ul style="list-style-type: none"> <li>• "yyyy" or "yy" for year</li> <li>• "MM" or "M" for month</li> <li>• "dd" or "d" for day</li> </ul> <p><b>Note:</b> The date format should either start or end with the year.</p>
FIXED_SUFFIX=XX	<p>Here, X stands for a letter or a group of letters that you want to add at the end of the alternate sequential bill number.</p>
LEFT_PADDING_CHAR=ZERO LEFT_PADDING_CHAR=SPACE	<p>or</p> <p>Indicates whether you want to add zero or space when the number of characters derived from the account's or person's characteristic value is less than the character count. The padding is added to the left.</p>

You can specify the above mentioned parameters against any of the following parameters available in the C1\_ALTBLDIV1 algorithm type:

- Field1
- Field2
- Field3
- Field4
- Field5
- Field6
- Field7
- Field8
- Field9

- Field10

None of these algorithm type parameters are mandatory. The system will concatenate the parameter values and then generate alternate bill ID in the required format. For example, if you created the algorithm using the following parameters:

- Field1 — CIS\_DIVISION
- Field2 — ‘|’
- Field3 — BILL\_DT=MMddy
- Field4 — ‘-’
- Field5 — FIXED\_SUFFIX=01

In this case, the system will generate the alternate bill ID in the CIS\_DIVISION|MMddy-01 format. For example, DIV1|110501-01. Note that if you do not specify the value for any of these algorithm type parameters, the system will not generate the alternate bill ID for a completed bill.

While specifying the value for these parameters, you need to ensure that the length of the alternate bill ID should not exceed 30 characters. An algorithm named **C1\_ALTBLDIV1** is already shipped with the product. You can create custom algorithms using the **C1\_ALTBLDIV1** algorithm type to design the required alternate bill ID format using the above mentioned parameters.

## Enabling the Alternate Sequential Bill Numbers Feature

---

### Prerequisites

To enable the alternate sequential bill numbers feature, you should have:

- An algorithm created using the **C1\_ALTBLLSYS**, **C1\_ALTBLSYS1**, **C1\_ALTBLDV**, or **C1\_ALTBLDIV1** algorithm type depending on which you want to use for alternate sequential bill number generation

### Procedure

To enable the alternate sequential bill numbers feature:

1. Click the **Admin** link in the **Application** toolbar.

A list appears.

2. From the **Admin** menu, select **I** and then click **Installation Options**.

The **Installation Options** screen appears.

3. Click the **Billing** tab.

The **Billing** tab appears.

4. Select the **Use Sequential Bill Numbers** check box to indicate that you want to generate alternate sequential bill numbers for completed bills.

The **Sequential Invoice** field is enabled.

5. Select the **System-wide** or **Division-specific** option from the **Sequential Invoice** list depending on whether you want alternate sequential bill numbers to be unique throughout the system or within the division.

6. Do either of the following:

If you want to generate...	Then
Alternate sequential bill numbers unique throughout the system	<ol style="list-style-type: none"> <li>1. Attach an algorithm created using the <b>C1_ALTBLLSYS</b> algorithm type to the <b>Sequence Generation Algorithm</b> field to indicate how the alternate bill numbers which are unique throughout the system should be sequenced.</li> </ol>

If you want to generate...	Then
	<p><b>Note:</b> The <b>Sequence Generation Algorithm</b> field is enabled only when you select the <b>System-wide</b> option from the <b>Sequential Invoice</b> list.</p> <ol style="list-style-type: none"> <li>Click the <b>Save</b> button in the <b>Page Title</b> area. The changes made to the installation options are saved.</li> </ol>
Alternate sequential bill numbers unique within the division	<ol style="list-style-type: none"> <li>Click the <b>Save</b> button in the <b>Page Title</b> area. The changes made to the installation options are saved.</li> <li>Search for the division, whose accounts' bills should have alternate sequential bill numbers unique within the division, in the <b>Division</b> screen. The <b>Division</b> screen appears.</li> <li>Click the <b>Algorithms</b> tab. The <b>Algorithms</b> tab appears.</li> <li>Select the <b>Sequential Bill Number Generation</b> option from the <b>Division Algorithm Entity</b> list.</li> <li>Enter the sequence number to indicate the order in which the algorithms with the same entity should be executed.</li> <li>Attach an algorithm created using the <b>C1_ALTBLDV</b> algorithm type to the respective field to indicate how alternate bill numbers which are unique within the division should be sequenced.</li> <li>Click the <b>Save</b> button in the <b>Page Title</b> area. The changes made to the division are saved.</li> </ol>
Alternate sequential bill numbers unique throughout the system and in the required format using a set of parameters	<ol style="list-style-type: none"> <li>Attach an algorithm created using the <b>C1_ALTBLSYS1</b> algorithm type to the <b>Sequence Generation Algorithm</b> field to indicate how the alternate bill numbers which are unique throughout the system should be generated.</li> </ol> <p><b>Note:</b> The <b>Sequence Generation Algorithm</b> field is enabled only when you select the <b>System-wide</b> option from the <b>Sequential Invoice</b> list. The alternate sequential bill number will be unique throughout the system only when you configure the algorithm parameters appropriately.</p> <ol style="list-style-type: none"> <li>Click the <b>Save</b> button in the <b>Page Title</b> area. The changes made to the installation options are saved.</li> </ol>

If you want to generate...	Then
<p>Alternate sequential bill numbers unique within the division and in the required format using a set of parameters</p>	<ol style="list-style-type: none"> <li>1. Click the <b>Save</b> button in the <b>Page Title</b> area. The changes made to the installation options are saved.</li> <li>2. Search for the division, whose accounts' bills should have alternate sequential bill numbers unique within the division, in the <b>Division</b> screen. The <b>Division</b> screen appears.</li> <li>3. Click the <b>Algorithms</b> tab. The <b>Algorithms</b> tab appears.</li> <li>4. Select the <b>Sequential Bill Number Generation</b> option from the <b>Division Algorithm Entity</b> list.</li> <li>5. Enter the sequence number to indicate the order in which the algorithms with the same entity should be executed.</li> <li>6. Attach an algorithm created using the <b>C1_ALTBLDIV1</b> algorithm type to the respective field to indicate how the alternate bill numbers which are unique within the division should be generated.</li> </ol> <div style="border: 1px solid black; padding: 5px; margin: 10px 0;"> <p><b>Note:</b> The alternate sequential bill number will be unique within the division only when you configure the algorithm parameters appropriately.</p> </div> <ol style="list-style-type: none"> <li>7. Click the <b>Save</b> button in the <b>Page Title</b> area. The changes made to the division are saved.</li> </ol>

# Chapter 10

---

## Currency Conversion

---

### Topics:

- [Prerequisites](#)
- [Bill Segment Generation](#)
- [Adjustment Creation](#)
- [Payment and Tender Creation](#)
- [Transaction Aggregation](#)
- [FT GL Creation](#)
- [Currency Conversion Algorithms](#)
- [Exchange Rate \(Used for Searching\)](#)
- [Exchange Rate \(Used for Viewing\)](#)

Oracle Revenue Management and Billing supports currency conversion using an exchange rate. The currency conversion feature is used only when the multi-currency accounts feature is enabled. In other words, you can use the currency conversion feature only when the **Allow Multi-Currency Accounts** option type of the **Multi-Currency Accounts (C1\_MLTCURACC)** feature configuration is set to **Y**.

The currency conversion can take place during the following business processes which are configured in the system:

- Bill Segment Generation
- Adjustment Creation
- Payment and Tender Creation
- FT GL Creation
- Transaction Aggregation

To enable the currency conversion feature, you need to attach the currency conversion algorithm at the division level. The system facilitates you to define different conversion currency algorithm for each business process. The currency conversion feature functions only when the appropriate exchange rate is available in the system. Otherwise, erroneous results might occur.

The system allows you to define date or date and time based global and division-specific exchange rates. The date based exchange rate mean that the exchange rate is applicable throughout the day. However, the date and time based exchange rate mean that the exchange rate is applicable from that date and time onwards.

**Note:** At present, time is not passed as input from any module (such as, payments, adjustments, billing, transaction feed management, and so on) during currency conversion. Therefore, even if you define date and time based exchange rates and use the date and time based currency conversion algorithms at the division level, the system will not search date and time based exchange rate when multiple exchange rates are available on the same day. The system will randomly pick an exchange rate on that day. The implementation team has to build the custom logic to pass or input time to the date and time based currency conversion algorithms in order to derive the appropriate exchange rate.

The system might use the direct division-specific or global exchange rate (i.e. FROM CCY to TO CCY) or direct reverse division-specific or global exchange rate (i.e. TO CCY to FROM CCY) during currency conversion. If either direct or direct reverse exchange rate is not available, the system might use division-specific or global exchange rate through base currency during

currency conversion. You can define the order in which exchange rate must be searched in the currency conversion algorithm.

While converting the amount from the source currency to the target currency (i.e. FROM CCY to TO CCY), the system uses the precision (i.e. decimal positions) of the target currency (i.e. TO CCY). For example, if you set the decimal positions for USD and INR to 1 and 2, respectively, the system uses 1 decimal position during currency conversion from INR to USD.

The system provides you with a facility to define whether you want to enable or disable the currency conversion feature for a rate component. If the currency conversion feature is enabled for a rate component, the currency conversion will take place while generating bill segments for the rate (i.e. rate component) based billable charges.

## Prerequisites

---

To setup the currency conversion feature, you need to do the following:

- Define the required divisions and currencies in the system
- Define the values for the **CONV\_TYPE\_FLG** and **EXCH\_RATE\_SRC\_FLG** lookup fields
- Define the Determine Business Object algorithm using the **F1-MOBO** algorithm type and attach it to the **C1\_EXCHRATE** maintenance object

**Note:** The **C1-ExchangeRate** and **C1\_EXCHRATE\_BO** business objects are shipped with the product. The **C1-ExchangeRate** business object is used while defining and editing date and time based exchange rates. However, the **C1\_EXCHRATE\_BO** business object is used while defining and editing date based exchange rates. Depending on whether you want to define date or date and time based exchange rates, you need to accordingly set the **Business Object** parameter in the Determine Business Object algorithm. The system will then accordingly display the fields while defining or editing an exchange rate.

- Define the required exchange rates for currency conversion
- Set the following option types of the **Multi-Currency Accounts (C1\_MLTCURACC)** feature configuration:
  - Allow Multi-Currency Accounts
  - Transfer Adjustment Type
- Set the **Allow Currency Conversion** field for each rate component to either **Yes** or **No** depending on whether you want to enable the currency conversion feature for the rate (i.e. rate component) based billable charges
- Create an algorithm of the **C1\_CURALGBS** or **C1\_EXCRTBS** algorithm type and attach it to the **Currency Conversion For Bill Segments** algorithm spot of the division when you want to enable currency conversion during:
  - Bill Segment Generation
  - FT GL Creation for Bill Segments

**Note:** The **C1\_CURALGBS** algorithm type uses date based exchange rate during currency conversion. However, the **C1\_EXCRTBS** algorithm type uses date and time based exchange rate during currency conversion.

- Create an algorithm of the **C1\_CURALGAD** or **C1\_EXCRTAD** algorithm type and attach it to the **Currency Conversion For Adjustments** algorithm spot of the division when you want to enable currency conversion during:
  - Adjustment Creation
  - FT GL Creation for Adjustments

**Note:** The **C1\_CURALGAD** algorithm type uses date based exchange rate during currency conversion. However, the **C1\_EXCRTAD** algorithm type uses date and time based exchange rate during currency conversion.

- Create an algorithm of the **C1\_CURALGPY** or **C1\_EXCRTPY** algorithm type and attach it to the **Currency Conversion For Payments** algorithm spot of the division when you want to enable currency conversion during:
  - Payment and Tender Creation
  - FT GL Creation for Payments

**Note:** The **C1\_CURALGPY** algorithm type uses date based exchange rate during currency conversion. However, the **C1\_EXCRTPY** algorithm type uses date and time based exchange rate during currency conversion.

- Create an algorithm of the **C1\_CURALGTFM** or **C1\_EXCRTTFM** algorithm type and attach it to the **TFM - Currency Conversion** algorithm spot of the division when you want to enable currency conversion during transaction aggregation

**Note:** The **C1\_CURALGTFM** algorithm type uses date based exchange rate during currency conversion. However, the **C1\_EXCRTTFM** algorithm type uses date and time based exchange rate during currency conversion.

- Create an algorithm of the **FTFREZGLEXTN** algorithm type and attach it on the **FT Freeze** system event of the customer class for which you want to create FT GL extension

## Bill Segment Generation

The system allows you to generate bill segments using the following:

- **Pass through billable charges** — If the pass through billable charges have a bill line currency which is different from the account's invoice currency, the bill line amount is converted into the account's invoice currency during the bill segment generation.
- **Rate based billable charges** — If the rate based billable charges have a pricing currency which is different from the account's invoice currency, the amount is converted into the account's invoice currency during the bill segment generation.

In addition, during the post processing bill segment generation, if the pricing currency is different from the account's invoice currency, then the amount is converted into the account's invoice currency. The currency conversion is done only when you have an algorithm of the **C1\_CURALGBS** or **C1\_EXCRTBS** algorithm type attached on the **Currency Conversion For Bill Segments** algorithm spot of the respective division. In addition, the currency conversion is done for rate based billable charges only when the **Allow Currency Conversion** field in the respective rate component is set to **Yes**. Otherwise, the currency conversion will not happen. If the required exchange rate is not available during currency conversion, the status of the bill segment will change to **Error**.

### Related Topics

<b>C1_CURALGBS</b> algorithm type	<a href="#">CI_CURALGBS</a> on page 814
<b>C1_EXCRTBS</b> algorithm type	<a href="#">CI_EXCRTBS</a> on page 821

## Adjustment Creation

There might be situations when the adjustment currency is different from the account's invoice currency. The system enables you to determine whether currency conversion must be done during adjustment creation or during bill completion. If you clear the **Print by Default** check box in the respective adjustment type, the currency conversion takes place during adjustment creation. However, if you select the **Print by Default** check box in the respective adjustment type, the currency conversion takes place during bill completion and not during adjustment creation. A transfer adjustment is created in the account's invoice currency and the reverse adjustment is created against the original adjustment in the adjustment currency when you complete the next bill of the account. The system creates the transfer and reverse adjustments using the adjustment type specified in the **Transfer Adjustment Type** option type of the **Multi-Currency Accounts (C1\_MLTCURACC)** feature configuration.

The currency conversion is done only when you have an algorithm of the **C1\_CURALGAD** or **C1\_EXCRTAD** algorithm type attached on the **Currency Conversion For Adjustments** algorithm spot of the respective division. Otherwise, the currency conversion will not happen. If the required exchange rate is not available during currency conversion, the transfer adjustment will not be created.

<b>C1_CURALGAD</b> algorithm type	<a href="#">CI_CURALGAD</a> on page 815
<b>C1_EXCRTAD</b> algorithm type	<a href="#">CI_EXCRTAD</a> on page 822

## Payment and Tender Creation

If the payment currency is different from the account's invoice currency, the amount is converted into the account's invoice currency during payment and tender creation. The currency conversion is done only when you have an algorithm of the **C1\_CURALGPY** or **C1\_EXCRTPY** algorithm type attached on the **Currency Conversion For Payments** algorithm spot of the respective division. Otherwise, the currency conversion will not happen. If the required exchange rate is not available during currency conversion, the payment and tenders will not be created.

### Note:

The currency conversion feature is available only when the payment currency (i.e. tender currency) is different from the payor account's invoice currency and not when the payor account's invoice currency is different from the payee account's invoice currency.

The currency conversion feature for payments is currently not supported from the **Payment Portal** screen and while uploading payment data from an external source.

<b>C1_CURALGPY</b> algorithm type	<a href="#">CI_CURALGPY</a> on page 817
<b>C1_EXCRTPY</b> algorithm type	<a href="#">CI_EXCRTPY</a> on page 824

## Transaction Aggregation

---

If the transaction or user defined (UDF) currency is different from the pricing currency, the amount is converted into the pricing currency when you are aggregating transactions based on the transaction or UDF amount. The currency conversion is done only when you have an algorithm of the **C1\_CURALGTFM** or **C1\_EXCRTTFM** algorithm type attached on the **TFM - Currency Conversion** algorithm spot of the respective division. Otherwise, the currency conversion will not happen. If the required exchange rate is not available during currency conversion, the status of the transaction will change to **Error**.

## FT GL Creation

---

During FT GL creation, the system creates an FT GL extension when the account's invoice currency is different from the division's base currency. The FT GL extension is created for the following financial transaction (FT) types:

- Adjustment
- Adjustment Cancellation
- Bill Segment
- Bill Cancellation
- Pay Segment
- Pay Cancellation

The FT GL extension is created for bill segments only when you have an algorithm of the **C1\_CURALGBS** or **C1\_EXCRTBS** algorithm type attached on the **Currency Conversion For Bill Segments** algorithm spot of the respective division. The FT GL extension is created for payments only when you have an algorithm of the **C1\_CURALGPY** or **C1\_EXCRTPY** algorithm type attached on the **Currency Conversion For Payments** algorithm spot of the respective division. The FT GL extension is created for adjustments only when you have an algorithm of the **C1\_CURALGAD** or **C1\_EXCRTAD** algorithm type attached on the **Currency Conversion For Adjustments** algorithm spot of the respective division. Otherwise, the currency conversion will not happen and the FT GL extension will not be created. In addition, if the required exchange rate is not available during currency conversion, the FT GL extension will not be created.

Date and time based exchange rate during currency conversion while aggregating transactions	<a href="#">CI_EXCRTTFM</a> on page 826

## C1\_CURALGBS

The **C1\_CURALGBS** algorithm type is used to convert the amount in one currency to another currency using date based exchange rate. You can define date or date and time based global and division-specific exchange rates. The system might use the direct division-specific or global exchange rate (i.e. FROM CCY to TO CCY) or direct reverse division-specific or global exchange rate (i.e. TO CCY to FROM CCY) during currency conversion. If either direct or direct reverse exchange rate is not available, the system might use division-specific or global exchange rate through base currency during currency conversion. For example, if the FROM CCY is Canadian Dollars, TO CCY is Japanese Yen, and the division's base currency is U.S. Dollars, the system will first convert the amount from Canadian Dollars to U.S. Dollars and then convert the amount from U.S. Dollars to Japanese Yen.

The system allows you to indicate the order, in which the exchange rate must be searched, in the currency conversion algorithm. If you use the **Direct Rate First** search order, the system searches for an exchange rate in the specified order:

1. Division-specific direct exchange rate
2. Global direct exchange rate
3. Division-specific direct reverse exchange rate (if the **Division Reverse Rate** parameter is set to **Yes**)
4. Global direct reverse exchange rate (if the **Global Reverse Rate** parameter is set to **Yes**)
5. Division-specific exchange rate through base currency
6. Division-specific reverse exchange rate through base currency (if the **Division Reverse Rate** parameter is set to **Yes**)
7. Global exchange rate through base currency
8. Global reverse exchange rate through base currency (if the **Global Reverse Rate** parameter is set to **Yes**)

If you use the **Division First** search order, the system searches for an exchange rate in the specified order:

1. Division-specific direct exchange rate
2. Division-specific direct reverse exchange rate (if the **Division Reverse Rate** parameter is set to **Yes**)
3. Division-specific exchange rate through base currency
4. Division-specific reverse exchange rate through base currency (if the **Division Reverse Rate** parameter is set to **Yes**)
5. Global direct exchange rate
6. Global direct reverse exchange rate (if the **Global Reverse Rate** parameter is set to **Yes**)
7. Global exchange rate through base currency
8. Global reverse exchange rate through base currency (if the **Global Reverse Rate** parameter is set to **Yes**)

You need to attach an algorithm of the **C1\_CURALGBS** algorithm type on the **Currency Conversion For Bill Segments** algorithm spot of the division for which you want to enable the currency conversion feature. Once the algorithm is attached, the currency conversion will take place during:

- Bill Segment Generation
- FT GL Creation for Bill Segments

The **C1\_CURALGBS** algorithm type contains the following parameters:

Parameter	Description	Mandatory (Yes or No)
Override Base Currency	Used to specify the base currency. This will override division's base currency while searching for an exchange rate through base currency.	No
Conversion Type	Used when you want to use the exchanges rates with a particular conversion type during currency conversion.  <b>Note:</b> The parameter value must be already defined as a value in the <b>CONV_TYPE_FLG</b> lookup field.	No

Parameter	Description	Mandatory (Yes or No)
Search Order (Valid Values: Division First, Direct Rate First)	Used to indicate the order in which you want to search for an exchange rate during currency conversion. The valid values are: <ul style="list-style-type: none"> <li>• Direct Rate First</li> <li>• Division First</li> </ul> If you do not specify the value for this parameter, by default, the system uses the <b>Division First</b> search order.	No
Division Reverse Rate (Valid Values: Yes, No)	Used to indicate whether you want the system to search for division-specific reverse exchange rate (i.e. To CCY to From CCY). The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul> If you do not specify the value for this parameter, by default, the system does not use the division-specific reverse exchange rate.	No
Global Reverse Rate (Valid Values: Yes, No)	Used to indicate whether you want the system to search for global reverse exchange rate (i.e. To CCY to From CCY). The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul> If you do not specify the value for this parameter, by default, the system does not use the global reverse exchange rate.	No

## C1\_CURALGAD

The **C1\_CURALGAD** algorithm type is used to convert the amount in one currency to another currency using date based exchange rate. You can define date or date and time based global and division-specific exchange rates. The system might use the direct division-specific or global exchange rate (i.e. FROM CCY to TO CCY) or direct reverse division-specific or global exchange rate (i.e. TO CCY to FROM CCY) during currency conversion. If either direct or direct reverse exchange rate is not available, the system might use division-specific or global exchange rate through base currency during currency conversion. For example, if the FROM CCY is Canadian Dollars, TO CCY is Japanese Yen, and the division's base currency is U.S. Dollars, the system will first convert the amount from Canadian Dollars to U.S. Dollars and then convert the amount from U.S. Dollars to Japanese Yen.

The system allows you to indicate the order, in which the exchange rate must be searched, in the currency conversion algorithm. If you use the **Direct Rate First** search order, the system searches for an exchange rate in the specified order:

1. Division-specific direct exchange rate
2. Global direct exchange rate

3. Division-specific direct reverse exchange rate (if the **Division Reverse Rate** parameter is set to **Yes**)
4. Global direct reverse exchange rate (if the **Global Reverse Rate** parameter is set to **Yes**)
5. Division-specific exchange rate through base currency
6. Division-specific reverse exchange rate through base currency (if the **Division Reverse Rate** parameter is set to **Yes**)
7. Global exchange rate through base currency
8. Global reverse exchange rate through base currency (if the **Global Reverse Rate** parameter is set to **Yes**)

If you use the **Division First** search order, the system searches for an exchange rate in the specified order:

1. Division-specific direct exchange rate
2. Division-specific direct reverse exchange rate (if the **Division Reverse Rate** parameter is set to **Yes**)
3. Division-specific exchange rate through base currency
4. Division-specific reverse exchange rate through base currency (if the **Division Reverse Rate** parameter is set to **Yes**)
5. Global direct exchange rate
6. Global direct reverse exchange rate (if the **Global Reverse Rate** parameter is set to **Yes**)
7. Global exchange rate through base currency
8. Global reverse exchange rate through base currency (if the **Global Reverse Rate** parameter is set to **Yes**)

You need to attach an algorithm of the **C1\_CURALGAD** algorithm type on the **Currency Conversion For Adjustments** algorithm spot of the division for which you want to enable the currency conversion feature. Once the algorithm is attached, the currency conversion will take place during:

- Adjustment Creation
- FT GL Creation for Adjustments

The **C1\_CURALGAD** algorithm type contains the following parameters:

Parameter	Description	Mandatory (Yes or No)
Override Base Currency	Used to specify the base currency. This will override division's base currency while searching for an exchange rate through base currency.	No
Conversion Type	Used when you want to use the exchanges rates with a particular conversion type during currency conversion.  <b>Note:</b> The parameter value must be already defined as a value in the <b>CONV_TYPE_FLG</b> lookup field.	No
Search Order (Valid Values: Division First, Direct Rate First)	Used to indicate the order in which you want to search for an exchange rate during currency conversion. The valid values are: <ul style="list-style-type: none"> <li>• Direct Rate First</li> <li>• Division First</li> </ul> <p>If you do not specify the value for this parameter, by default, the system uses the <b>Division First</b> search order.</p>	No

Parameter	Description	Mandatory (Yes or No)
Division Reverse Rate (Valid Values: Yes, No)	Used to indicate whether you want the system to search for division-specific reverse exchange rate (i.e. To CCY to From CCY). The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul> If you do not specify the value for this parameter, by default, the system does not use the division-specific reverse exchange rate.	No
Global Reverse Rate (Valid Values: Yes, No)	Used to indicate whether you want the system to search for global reverse exchange rate (i.e. To CCY to From CCY). The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul> If you do not specify the value for this parameter, by default, the system does not use the global reverse exchange rate.	No

## **C1\_CURALGPY**

The **C1\_CURALGPY** algorithm type is used to convert the amount in one currency to another currency using date based exchange rate. You can define date or date and time based global and division-specific exchange rates. The system might use the direct division-specific or global exchange rate (i.e. FROM CCY to TO CCY) or direct reverse division-specific or global exchange rate (i.e. TO CCY to FROM CCY) during currency conversion. If either direct or direct reverse exchange rate is not available, the system might use division-specific or global exchange rate through base currency during currency conversion. For example, if the FROM CCY is Canadian Dollars, TO CCY is Japanese Yen, and the division's base currency is U.S. Dollars, the system will first convert the amount from Canadian Dollars to U.S. Dollars and then convert the amount from U.S. Dollars to Japanese Yen.

The system allows you to indicate the order, in which the exchange rate must be searched, in the currency conversion algorithm. If you use the **Direct Rate First** search order, the system searches for an exchange rate in the specified order:

1. Division-specific direct exchange rate
2. Global direct exchange rate
3. Division-specific direct reverse exchange rate (if the **Division Reverse Rate** parameter is set to **Yes**)
4. Global direct reverse exchange rate (if the **Global Reverse Rate** parameter is set to **Yes**)
5. Division-specific exchange rate through base currency
6. Division-specific reverse exchange rate through base currency (if the **Division Reverse Rate** parameter is set to **Yes**)
7. Global exchange rate through base currency

8. Global reverse exchange rate through base currency (if the **Global Reverse Rate** parameter is set to **Yes**)

If you use the **Division First** search order, the system searches for an exchange rate in the specified order:

1. Division-specific direct exchange rate
2. Division-specific direct reverse exchange rate (if the **Division Reverse Rate** parameter is set to **Yes**)
3. Division-specific exchange rate through base currency
4. Division-specific reverse exchange rate through base currency (if the **Division Reverse Rate** parameter is set to **Yes**)
5. Global direct exchange rate
6. Global direct reverse exchange rate (if the **Global Reverse Rate** parameter is set to **Yes**)
7. Global exchange rate through base currency
8. Global reverse exchange rate through base currency (if the **Global Reverse Rate** parameter is set to **Yes**)

You need to attach an algorithm of the **C1\_CURALGPY** algorithm type on the **Currency Conversion For Payments** algorithm spot of the division for which you want to enable the currency conversion feature. Once the algorithm is attached, the currency conversion will take place during:

- Payment and Tender Creation
- FT GL Creation for Payments

The **C1\_CURALGPY** algorithm type contains the following parameters:

Parameter	Description	Mandatory (Yes or No)
Override Base Currency	Used to specify the base currency. This will override division's base currency while searching for an exchange rate through base currency.	No
Conversion Type	Used when you want to use the exchanges rates with a particular conversion type during currency conversion.  <b>Note:</b> The parameter value must be already defined as a value in the <b>CONV_TYPE_FLG</b> lookup field.	No
Search Order (Valid Values: Division First, Direct Rate First)	Used to indicate the order in which you want to search for an exchange rate during currency conversion. The valid values are: <ul style="list-style-type: none"> <li>• Direct Rate First</li> <li>• Division First</li> </ul> If you do not specify the value for this parameter, by default, the system uses the <b>Division First</b> search order.	No
Division Reverse Rate (Valid Values: Yes, No)	Used to indicate whether you want the system to search for division-specific reverse exchange rate (i.e. To CCY to From CCY). The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul> If you do not specify the value for this parameter, by default, the system does not use the division-specific reverse exchange rate.	No

Parameter	Description	Mandatory (Yes or No)
Global Reverse Rate (Valid Values: Yes, No)	Used to indicate whether you want the system to search for global reverse exchange rate (i.e. To CCY to From CCY). The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul> If you do not specify the value for this parameter, by default, the system does not use the global reverse exchange rate.	No

## C1\_CURALGTFM

The **C1\_CURALGTFM** algorithm type is used to convert the amount in one currency to another currency using date based exchange rate. You can define date or date and time based global and division-specific exchange rates. The system might use the direct division-specific or global exchange rate (i.e. FROM CCY to TO CCY) or direct reverse division-specific or global exchange rate (i.e. TO CCY to FROM CCY) during currency conversion. If either direct or direct reverse exchange rate is not available, the system might use division-specific or global exchange rate through base currency during currency conversion. For example, if the FROM CCY is Canadian Dollars, TO CCY is Japanese Yen, and the division's base currency is U.S. Dollars, the system will first convert the amount from Canadian Dollars to U.S. Dollars and then convert the amount from U.S. Dollars to Japanese Yen.

The system allows you to indicate the order, in which the exchange rate must be searched, in the currency conversion algorithm. If you use the **Direct Rate First** search order, the system searches for an exchange rate in the specified order:

1. Division-specific direct exchange rate
2. Global direct exchange rate
3. Division-specific direct reverse exchange rate (if the **Division Reverse Rate** parameter is set to **Yes**)
4. Global direct reverse exchange rate (if the **Global Reverse Rate** parameter is set to **Yes**)
5. Division-specific exchange rate through base currency
6. Division-specific reverse exchange rate through base currency (if the **Division Reverse Rate** parameter is set to **Yes**)
7. Global exchange rate through base currency
8. Global reverse exchange rate through base currency (if the **Global Reverse Rate** parameter is set to **Yes**)

If you use the **Division First** search order, the system searches for an exchange rate in the specified order:

1. Division-specific direct exchange rate
2. Division-specific direct reverse exchange rate (if the **Division Reverse Rate** parameter is set to **Yes**)
3. Division-specific exchange rate through base currency
4. Division-specific reverse exchange rate through base currency (if the **Division Reverse Rate** parameter is set to **Yes**)
5. Global direct exchange rate
6. Global direct reverse exchange rate (if the **Global Reverse Rate** parameter is set to **Yes**)

7. Global exchange rate through base currency

8. Global reverse exchange rate through base currency (if the **Global Reverse Rate** parameter is set to **Yes**)

You need to attach an algorithm of the **C1\_CURALGTFM** algorithm type on the **TFM - Currency Conversion** algorithm spot of the division for which you want to enable the currency conversion feature. Once the algorithm is attached, the currency conversion will take place during the transaction aggregation process when the transaction or UDF currency is different from the pricing currency.

The **C1\_CURALGTFM** algorithm type contains the following parameters:

Parameter	Description	Mandatory (Yes or No)
Override Base Currency	Used to specify the base currency. This will override division's base currency while searching for an exchange rate through base currency.	No
Conversion Type	Used when you want to use the exchanges rates with a particular conversion type during currency conversion.  <b>Note:</b> The parameter value must be already defined as a value in the <b>CONV_TYPE_FLG</b> lookup field.	No
Search Order (Valid Values: Division First, Direct Rate First)	Used to indicate the order in which you want to search for an exchange rate during currency conversion. The valid values are: <ul style="list-style-type: none"> <li>• Direct Rate First</li> <li>• Division First</li> </ul> If you do not specify the value for this parameter, by default, the system uses the <b>Division First</b> search order.	No
Division Reverse Rate (Valid Values: Yes, No)	Used to indicate whether you want the system to search for division-specific reverse exchange rate (i.e. To CCY to From CCY). The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul> If you do not specify the value for this parameter, by default, the system does not use the division-specific reverse exchange rate.	No
Global Reverse Rate (Valid Values: Yes, No)	Used to indicate whether you want the system to search for global reverse exchange rate (i.e. To CCY to From CCY). The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul> If you do not specify the value for this parameter, by default, the system does not use the global reverse exchange rate.	No

## C1\_EXCRTBS

The **C1\_EXCRTBS** algorithm type is used to convert the amount in one currency to another currency using date and time based exchange rate. You can define date or date and time based global and division-specific exchange rates. The system might use the direct division-specific or global exchange rate (i.e. FROM CCY to TO CCY) or direct reverse division-specific or global exchange rate (i.e. TO CCY to FROM CCY) during currency conversion. If either direct or direct reverse exchange rate is not available, the system might use division-specific or global exchange rate through base currency during currency conversion. For example, if the FROM CCY is Canadian Dollars, TO CCY is Japanese Yen, and the division's base currency is U.S. Dollars, the system will first convert the amount from Canadian Dollars to U.S. Dollars and then convert the amount from U.S. Dollars to Japanese Yen.

The system allows you to indicate the order, in which the exchange rate must be searched, in the currency conversion algorithm. If you use the **Direct Rate First** search order, the system searches for an exchange rate in the specified order:

1. Division-specific direct exchange rate
2. Global direct exchange rate
3. Division-specific direct reverse exchange rate (if the **Division Reverse Rate** parameter is set to **Yes**)
4. Global direct reverse exchange rate (if the **Global Reverse Rate** parameter is set to **Yes**)
5. Division-specific exchange rate through base currency
6. Division-specific reverse exchange rate through base currency (if the **Division Reverse Rate** parameter is set to **Yes**)
7. Global exchange rate through base currency
8. Global reverse exchange rate through base currency (if the **Global Reverse Rate** parameter is set to **Yes**)

If you use the **Division First** search order, the system searches for an exchange rate in the specified order:

1. Division-specific direct exchange rate
2. Division-specific direct reverse exchange rate (if the **Division Reverse Rate** parameter is set to **Yes**)
3. Division-specific exchange rate through base currency
4. Division-specific reverse exchange rate through base currency (if the **Division Reverse Rate** parameter is set to **Yes**)
5. Global direct exchange rate
6. Global direct reverse exchange rate (if the **Global Reverse Rate** parameter is set to **Yes**)
7. Global exchange rate through base currency
8. Global reverse exchange rate through base currency (if the **Global Reverse Rate** parameter is set to **Yes**)

You need to attach an algorithm of the **C1\_EXCRTBS** algorithm type on the **Currency Conversion For Bill Segments** algorithm spot of the division for which you want to enable the currency conversion feature. Once the algorithm is attached, the currency conversion will take place during:

- Bill Segment Generation
- FT GL Creation for Bill Segments

The **C1\_EXCRTBS** algorithm type contains the following parameters:

Parameter	Description	Mandatory (Yes or No)
Override Base Currency	Used to specify the base currency. This will override division's base currency while searching for an exchange rate through base currency.	No
Conversion Type	Used when you want to use the exchanges rates with a particular conversion type during currency conversion.  <b>Note:</b> The parameter value must be already defined as a value in the <b>CONV_TYPE_FLG</b> lookup field.	No

Parameter	Description	Mandatory (Yes or No)
Search Order (Valid Values: Division First, Direct Rate First)	Used to indicate the order in which you want to search for an exchange rate during currency conversion. The valid values are: <ul style="list-style-type: none"> <li>• Direct Rate First</li> <li>• Division First</li> </ul> If you do not specify the value for this parameter, by default, the system uses the <b>Division First</b> search order.	No
Division Reverse Rate (Valid Values: Yes, No)	Used to indicate whether you want the system to search for division-specific reverse exchange rate (i.e. To CCY to From CCY). The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul> If you do not specify the value for this parameter, by default, the system does not use the division-specific reverse exchange rate.	No
Global Reverse Rate (Valid Values: Yes, No)	Used to indicate whether you want the system to search for global reverse exchange rate (i.e. To CCY to From CCY). The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul> If you do not specify the value for this parameter, by default, the system does not use the global reverse exchange rate.	No
Exchange Rate Override Algorithm	Used to attach a custom algorithm when you want to use an exchange rate search mechanism other than the one defined in this algorithm.	No
Exchange Rate Source	Used when you want to use the exchanges rates received from a particular source during currency conversion. <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"> <b>Note:</b> The parameter value must be already defined as a value in the <b>EXCH_RATE_SRC_FLG</b> lookup field. </div>	No

## C1\_EXCRTAD

The **C1\_EXCRTAD** algorithm type is used to convert the amount in one currency to another currency using date and time based exchange rate. You can define date or date and time based global and division-specific exchange rates. The system might use the direct division-specific or global exchange rate (i.e. FROM CCY to TO CCY) or direct reverse division-specific or global exchange rate (i.e. TO CCY to FROM CCY) during currency conversion. If either direct or

direct reverse exchange rate is not available, the system might use division-specific or global exchange rate through base currency during currency conversion. For example, if the FROM CCY is Canadian Dollars, TO CCY is Japanese Yen, and the division's base currency is U.S. Dollars, the system will first convert the amount from Canadian Dollars to U.S. Dollars and then convert the amount from U.S. Dollars to Japanese Yen.

The system allows you to indicate the order, in which the exchange rate must be searched, in the currency conversion algorithm. If you use the **Direct Rate First** search order, the system searches for an exchange rate in the specified order:

1. Division-specific direct exchange rate
2. Global direct exchange rate
3. Division-specific direct reverse exchange rate (if the **Division Reverse Rate** parameter is set to **Yes**)
4. Global direct reverse exchange rate (if the **Global Reverse Rate** parameter is set to **Yes**)
5. Division-specific exchange rate through base currency
6. Division-specific reverse exchange rate through base currency (if the **Division Reverse Rate** parameter is set to **Yes**)
7. Global exchange rate through base currency
8. Global reverse exchange rate through base currency (if the **Global Reverse Rate** parameter is set to **Yes**)

If you use the **Division First** search order, the system searches for an exchange rate in the specified order:

1. Division-specific direct exchange rate
2. Division-specific direct reverse exchange rate (if the **Division Reverse Rate** parameter is set to **Yes**)
3. Division-specific exchange rate through base currency
4. Division-specific reverse exchange rate through base currency (if the **Division Reverse Rate** parameter is set to **Yes**)
5. Global direct exchange rate
6. Global direct reverse exchange rate (if the **Global Reverse Rate** parameter is set to **Yes**)
7. Global exchange rate through base currency
8. Global reverse exchange rate through base currency (if the **Global Reverse Rate** parameter is set to **Yes**)

You need to attach an algorithm of the **C1\_EXCRTAD** algorithm type on the **Currency Conversion For Adjustments** algorithm spot of the division for which you want to enable the currency conversion feature. Once the algorithm is attached, the currency conversion will take place during:

- Adjustment Creation
- FT GL Creation for Adjustments

The **C1\_EXCRTAD** algorithm type contains the following parameters:

Parameter	Description	Mandatory (Yes or No)
Override Base Currency	Used to specify the base currency. This will override division's base currency while searching for an exchange rate through base currency.	No
Conversion Type	Used when you want to use the exchanges rates with a particular conversion type during currency conversion.  <b>Note:</b> The parameter value must be already defined as a value in the <b>CONV_TYPE_FLG</b> lookup field.	No
Search Order (Valid Values: Division First, Direct Rate First)	Used to indicate the order in which you want to search for an exchange rate during currency conversion. The valid values are: <ul style="list-style-type: none"> <li>• Direct Rate First</li> <li>• Division First</li> </ul> If you do not specify the value for this parameter, by default, the system uses the <b>Division First</b> search order.	No

Parameter	Description	Mandatory (Yes or No)
Division Reverse Rate (Valid Values: Yes, No)	Used to indicate whether you want the system to search for division-specific reverse exchange rate (i.e. To CCY to From CCY). The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul> If you do not specify the value for this parameter, by default, the system does not use the division-specific reverse exchange rate.	No
Global Reverse Rate (Valid Values: Yes, No)	Used to indicate whether you want the system to search for global reverse exchange rate (i.e. To CCY to From CCY). The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul> If you do not specify the value for this parameter, by default, the system does not use the global reverse exchange rate.	No
Exchange Rate Override Algorithm	Used to attach a custom algorithm when you want to use an exchange rate search mechanism other than the one defined in this algorithm.	No
Exchange Rate Source	Used when you want to use the exchanges rates received from a particular source during currency conversion. <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <b>Note:</b> The parameter value must be already defined as a value in the <b>EXCH_RATE_SRC_FLG</b> lookup field. </div>	No

## C1\_EXCRTPY

The **C1\_EXCRTPY** algorithm type is used to convert the amount in one currency to another currency using date and time based exchange rate. You can define date or date and time based global and division-specific exchange rates. The system might use the direct division-specific or global exchange rate (i.e. FROM CCY to TO CCY) or direct reverse division-specific or global exchange rate (i.e. TO CCY to FROM CCY) during currency conversion. If either direct or direct reverse exchange rate is not available, the system might use division-specific or global exchange rate through base currency during currency conversion. For example, if the FROM CCY is Canadian Dollars, TO CCY is Japanese Yen, and the division's base currency is U.S. Dollars, the system will first convert the amount from Canadian Dollars to U.S. Dollars and then convert the amount from U.S. Dollars to Japanese Yen.

The system allows you to indicate the order, in which the exchange rate must be searched, in the currency conversion algorithm. If you use the **Direct Rate First** search order, the system searches for an exchange rate in the specified order:

1. Division-specific direct exchange rate
2. Global direct exchange rate

3. Division-specific direct reverse exchange rate (if the **Division Reverse Rate** parameter is set to **Yes**)
4. Global direct reverse exchange rate (if the **Global Reverse Rate** parameter is set to **Yes**)
5. Division-specific exchange rate through base currency
6. Division-specific reverse exchange rate through base currency (if the **Division Reverse Rate** parameter is set to **Yes**)
7. Global exchange rate through base currency
8. Global reverse exchange rate through base currency (if the **Global Reverse Rate** parameter is set to **Yes**)

If you use the **Division First** search order, the system searches for an exchange rate in the specified order:

1. Division-specific direct exchange rate
2. Division-specific direct reverse exchange rate (if the **Division Reverse Rate** parameter is set to **Yes**)
3. Division-specific exchange rate through base currency
4. Division-specific reverse exchange rate through base currency (if the **Division Reverse Rate** parameter is set to **Yes**)
5. Global direct exchange rate
6. Global direct reverse exchange rate (if the **Global Reverse Rate** parameter is set to **Yes**)
7. Global exchange rate through base currency
8. Global reverse exchange rate through base currency (if the **Global Reverse Rate** parameter is set to **Yes**)

You need to attach an algorithm of the **C1\_EXCRTPY** algorithm type on the **Currency Conversion For Payments** algorithm spot of the division for which you want to enable the currency conversion feature. Once the algorithm is attached, the currency conversion will take place during:

- Payment and Tender Creation
- FT GL Creation for Payments

The **C1\_EXCRTPY** algorithm type contains the following parameters:

Parameter	Description	Mandatory (Yes or No)
Override Base Currency	Used to specify the base currency. This will override division's base currency while searching for an exchange rate through base currency.	No
Conversion Type	Used when you want to use the exchanges rates with a particular conversion type during currency conversion.  <b>Note:</b> The parameter value must be already defined as a value in the <b>CONV_TYPE_FLG</b> lookup field.	No
Search Order (Valid Values: Division First, Direct Rate First)	Used to indicate the order in which you want to search for an exchange rate during currency conversion. The valid values are: <ul style="list-style-type: none"> <li>• Direct Rate First</li> <li>• Division First</li> </ul> If you do not specify the value for this parameter, by default, the system uses the <b>Division First</b> search order.	No

Parameter	Description	Mandatory (Yes or No)
Division Reverse Rate (Valid Values: Yes, No)	Used to indicate whether you want the system to search for division-specific reverse exchange rate (i.e. To CCY to From CCY). The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul> If you do not specify the value for this parameter, by default, the system does not use the division-specific reverse exchange rate.	No
Global Reverse Rate (Valid Values: Yes, No)	Used to indicate whether you want the system to search for global reverse exchange rate (i.e. To CCY to From CCY). The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul> If you do not specify the value for this parameter, by default, the system does not use the global reverse exchange rate.	No
Exchange Rate Override Algorithm	Used to attach a custom algorithm when you want to use an exchange rate search mechanism other than the one defined in this algorithm.	No
Exchange Rate Source	Used when you want to use the exchanges rates received from a particular source during currency conversion. <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <b>Note:</b> The parameter value must be already defined as a value in the <b>EXCH_RATE_SRC_FLG</b> lookup field. </div>	No

## C1\_EXCRTTFM

The **C1\_EXCRTTFM** algorithm type is used to convert the amount in one currency to another currency using date and time based exchange rate. You can define date or date and time based global and division-specific exchange rates. The system might use the direct division-specific or global exchange rate (i.e. FROM CCY to TO CCY) or direct reverse division-specific or global exchange rate (i.e. TO CCY to FROM CCY) during currency conversion. If either direct or direct reverse exchange rate is not available, the system might use division-specific or global exchange rate through base currency during currency conversion. For example, if the FROM CCY is Canadian Dollars, TO CCY is Japanese Yen, and the division's base currency is U.S. Dollars, the system will first convert the amount from Canadian Dollars to U.S. Dollars and then convert the amount from U.S. Dollars to Japanese Yen.

The system allows you to indicate the order, in which the exchange rate must be searched, in the currency conversion algorithm. If you use the **Direct Rate First** search order, the system searches for an exchange rate in the specified order:

1. Division-specific direct exchange rate

2. Global direct exchange rate
3. Division-specific direct reverse exchange rate (if the **Division Reverse Rate** parameter is set to **Yes**)
4. Global direct reverse exchange rate (if the **Global Reverse Rate** parameter is set to **Yes**)
5. Division-specific exchange rate through base currency
6. Division-specific reverse exchange rate through base currency (if the **Division Reverse Rate** parameter is set to **Yes**)
7. Global exchange rate through base currency
8. Global reverse exchange rate through base currency (if the **Global Reverse Rate** parameter is set to **Yes**)

If you use the **Division First** search order, the system searches for an exchange rate in the specified order:

1. Division-specific direct exchange rate
2. Division-specific direct reverse exchange rate (if the **Division Reverse Rate** parameter is set to **Yes**)
3. Division-specific exchange rate through base currency
4. Division-specific reverse exchange rate through base currency (if the **Division Reverse Rate** parameter is set to **Yes**)
5. Global direct exchange rate
6. Global direct reverse exchange rate (if the **Global Reverse Rate** parameter is set to **Yes**)
7. Global exchange rate through base currency
8. Global reverse exchange rate through base currency (if the **Global Reverse Rate** parameter is set to **Yes**)

You need to attach an algorithm of the **C1\_EXCRTTFM** algorithm type on the **TFM - Currency Conversion** algorithm spot of the division for which you want to enable the currency conversion feature. Once the algorithm is attached, the currency conversion will take place during the transaction aggregation process when the transaction or UDF currency is different from the pricing currency.

The **C1\_EXCRTTFM** algorithm type contains the following parameters:

Parameter	Description	Mandatory (Yes or No)
Override Base Currency	Used to specify the base currency. This will override division's base currency while searching for an exchange rate through base currency.	No
Conversion Type	Used when you want to use the exchanges rates with a particular conversion type during currency conversion.  <b>Note:</b> The parameter value must be already defined as a value in the <b>CONV_TYPE_FLG</b> lookup field.	No
Search Order (Valid Values: Division First, Direct Rate First)	Used to indicate the order in which you want to search for an exchange rate during currency conversion. The valid values are: <ul style="list-style-type: none"> <li>• Direct Rate First</li> <li>• Division First</li> </ul> If you do not specify the value for this parameter, by default, the system uses the <b>Division First</b> search order.	No

Parameter	Description	Mandatory (Yes or No)
Division Reverse Rate (Valid Values: Yes, No)	Used to indicate whether you want the system to search for division-specific reverse exchange rate (i.e. To CCY to From CCY). The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul> <p>If you do not specify the value for this parameter, by default, the system does not use the division-specific reverse exchange rate.</p>	No
Global Reverse Rate (Valid Values: Yes, No)	Used to indicate whether you want the system to search for global reverse exchange rate (i.e. To CCY to From CCY). The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul> <p>If you do not specify the value for this parameter, by default, the system does not use the global reverse exchange rate.</p>	No
Exchange Rate Override Algorithm	Used to attach a custom algorithm when you want to use an exchange rate search mechanism other than the one defined in this algorithm. <p><b>Note:</b> A sample algorithm type named <b>CI_EXCRTOVRD</b> is shipped with the product. It is used to fetch the exchange rate which is available corresponding to the transaction in the <b>CI_TXN_DETAIL</b> table. The exchange rate is then used by the algorithm which is created using the <b>CI_EXCRTTFM</b> algorithm type to convert the transaction amount from the transaction currency to the pricing currency. You must specify the column from where the exchange rate must be picked during currency conversion in the <b>Transaction Detail Field for Exchange Rate</b> parameter.</p>	No
Exchange Rate Source	Used when you want to use the exchanges rates received from a particular source during currency conversion. <p><b>Note:</b> The parameter value must be already defined as a value in the <b>EXCH_RATE_SRC_FLG</b> lookup field.</p>	No

## FTFREZGLEXTN

The **FTFREZGLEXTN** algorithm type is used to create FT GL extension for the following financial transaction (FT) types when the account's invoice currency is different from the division's base currency:

- Adjustment
- Adjustment Cancellation
- Bill Segment
- Bill Cancellation
- Pay Segment
- Pay Cancellation

You need to attach an algorithm of the **FTFREZGLEXTN** algorithm type on the **FT Freeze** system event of the customer class. The FT GL extension is created for bill segments only when you have an algorithm of the **C1\_CURALGBS** algorithm type attached on the **Currency Conversion For Bill Segments** algorithm spot of the respective division. The FT GL extension is created for payments only when you have an algorithm of the **C1\_CURALGPY** algorithm type attached on the **Currency Conversion For Payments** algorithm spot of the respective division. The FT GL extension is created for adjustments only when you have an algorithm of the **C1\_CURALGAD** algorithm type attached on the **Currency Conversion For Adjustments** algorithm spot of the respective division.

The **FTFREZGLEXTN** algorithm type contains the following parameters:

Parameter	Description	Mandatory (Yes or No)
Exchange Rate Date Type for Adjustments with Freeze At Will	Used to indicate the date on which the exchange rate should be picked up when FT GL extension is created for adjustments with the <b>Freeze At Will</b> option. The valid values are: <ul style="list-style-type: none"> <li>• <b>A (Accounting Date)</b> – Used to search for an exchange rate which is effective on the accounting date.</li> <li>• <b>R (Arrears Date)</b> - Used to search for an exchange rate which is effective on the arrears date.</li> <li>• <b>F (FT Freeze Date)</b> - Used to search for an exchange rate which is effective on the FT freeze date.</li> <li>• <b>C (FT Create Date)</b> - Used to search for an exchange rate which is effective on the FT creation date.</li> </ul>	Yes

Parameter	Description	Mandatory (Yes or No)
Exchange Rate Date Type for Adjustments with Freeze At Bill Completion	<p>Used to indicate the date on which the exchange rate should be picked up when FT GL extension is created for adjustments with the <b>Freeze At Bill Completion</b> option. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>A (Accounting Date)</b> – Used to search for an exchange rate which is effective on the accounting date.</li> <li>• <b>R (Arrears Date)</b> - Used to search for an exchange rate which is effective on the arrears date.</li> <li>• <b>F (FT Freeze Date)</b> - Used to search for an exchange rate which is effective on the FT freeze date.</li> <li>• <b>C (FT Create Date)</b> - Used to search for an exchange rate which is effective on the FT creation date.</li> </ul>	Yes
Exchange Rate Date Type for Payments (Valid Values: A, R, F, C)	<p>Used to indicate the date on which the exchange rate should be picked up when FT GL extension is created for payments. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>A (Accounting Date)</b> – Used to search for an exchange rate which is effective on the accounting date.</li> <li>• <b>R (Arrears Date)</b> - Used to search for an exchange rate which is effective on the arrears date.</li> <li>• <b>F (FT Freeze Date)</b> - Used to search for an exchange rate which is effective on the FT freeze date.</li> <li>• <b>C (FT Create Date)</b> - Used to search for an exchange rate which is effective on the FT creation date.</li> </ul>	Yes

Parameter	Description	Mandatory (Yes or No)
Exchange Rate Date Type for Bill Segments (Valid Values: A, R, F, C, E)	<p>Used to indicate the date on which the exchange rate should be picked up when FT GL extension is created for bill segments. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>A (Accounting Date)</b> – Used to search for an exchange rate which is effective on the accounting date.</li> <li>• <b>R (Arrears Date)</b> - Used to search for an exchange rate which is effective on the arrears date.</li> <li>• <b>F (FT Freeze Date)</b> - Used to search for an exchange rate which is effective on the FT freeze date.</li> <li>• <b>C (FT Create Date)</b> - Used to search for an exchange rate which is effective on the FT creation date.</li> <li>• <b>E (Bill Segment End Date)</b> - Used to search for an exchange rate which is effective on the bill segment end date.</li> </ul> <p><b>Note:</b> If you set the <b>Exchange Rate Date Type for Bill Segments</b> parameter to <b>R</b>, ensure that you set the <b>Bill Segment Freeze Option</b> to <b>Freeze At Bill Completion</b> in the <b>Billing</b> tab of the <b>Installation Options</b> screen. Otherwise, erroneous results might occur.</p>	Yes

## C1\_EXCRTOVRD

The **C1\_EXCRTOVRD** algorithm type is used to fetch the exchange rate which is available corresponding to the transaction in the **CI\_TXN\_DETAIL** table. The exchange rate is then used by the algorithm which is created using the **C1\_EXCRTTFM** algorithm type to convert the transaction amount from the transaction currency to the pricing currency. If you want to fetch exchange rate from the **CI\_TXN\_DETAIL** table, you need to create an algorithm using the **C1\_EXCRTOVRD** algorithm type and attach it to the **Exchange Rate Override Algorithm** parameter in the algorithm which is created using the **C1\_EXCRTTFM** algorithm type.

The **C1\_EXCRTOVRD** algorithm type contains the following parameters:

Parameter	Description	Mandatory (Yes or No)
Transaction Detail Field for Exchange Rate	Used to indicate the column of the <b>CI_TXN_DETAIL</b> table from where the exchange rate must be picked during currency conversion.	Yes

C1_EXCRTTFM algorithm type	<a href="#">C1_EXCRTTFM</a> on page 826

## Exchange Rate (Used for Searching)

You can define date or date and time based global and division-specific exchange rates. The date based exchange rate means that the exchange rate is applicable throughout the day. However, the date and time based exchange rate means that the exchange rate is applicable from that date and time onwards. The global exchange rate can be used for all divisions, whereas the division-specific exchange range can only be used for the division for which the exchange rate is defined.

**Note:** At present, time is not passed as input from any module (such as, payments, adjustments, billing, transaction feed management, and so on) during currency conversion. Therefore, even if you define date and time based exchange rates and use the date and time based currency conversion algorithms at the division level, the system will not search date and time based exchange rate when multiple exchange rates are available on the same day. The system will randomly pick an exchange rate on that day. The implementation team has to build the custom logic to pass or input time to the date and time based currency conversion algorithms in order to derive the appropriate exchange rate.

The system might use the direct division-specific or global exchange rate (i.e. FROM CCY to TO CCY) or direct reverse division-specific or global exchange rate (i.e. TO CCY to FROM CCY) during currency conversion. If either direct or direct reverse exchange rate is not available, the system might use division-specific or global exchange rate through base currency during currency conversion. For example, if the FROM CCY is Canadian Dollars, TO CCY is Japanese Yen, and the division's base currency is U.S. Dollars, the system will first convert the amount from Canadian Dollars to U.S. Dollars and then convert the amount from U.S. Dollars to Japanese Yen. You can define the order in which exchange rate must be searched in the currency conversion algorithm.

The **Exchange Rate** screen allows you to search for date or date and time based global and division-specific exchange rate using various search criteria. It also allows you to define, edit, and delete an exchange rate. This screen consists of the following zones:

- [Search Exchange Rate](#) on page 832

## Search Exchange Rate

The **Search Exchange Rate** zone allows you to search for an exchange rate using various search criteria. This zone contains the following two sections:

- **Search Criteria** — The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search date or date and time based exchange rates. The valid values are: <ul style="list-style-type: none"> <li>• Date/Time and Exchange Rate Source</li> <li>• Date</li> </ul> <p><b>Note:</b> By default, the <b>Date/Time and Exchange Rate Source</b> option is selected.</p>	Yes
From Currency	Used to search exchange rates with a particular source currency.	No
To Currency	Used to search exchange rates with a particular target currency.	No

Field Name	Field Description	Mandatory (Yes or No)
Division	Used to search exchange rates which are defined for a particular division.  <b>Note:</b> You can only view those divisions to which you have access in the <b>Division</b> list.	No
Conversion Type	Used to search exchange rates which are defined using a particular conversion type.	No
Effective Start Date/Time	Used to search exchange rates which are effective from a particular date and time onwards.  <b>Note:</b> This field appears only when you select the <b>Date/Time and Exchange Rate Source</b> option from the <b>Search By</b> list.	No
Effective End Date/Time	Used to search exchange rates which are effective till a particular date and time.  <b>Note:</b> This field appears only when you select the <b>Date/Time and Exchange Rate Source</b> option from the <b>Search By</b> list.	No
Effective Start Date	Used to search exchange rates which are effective from a particular date onwards.  <b>Note:</b> This field appears only when you select the <b>Date</b> option from the <b>Search By</b> list.	No
Effective End Date	Used to search exchange rates which are effective till a particular date.  <b>Note:</b> This field appears only when you select the <b>Date</b> option from the <b>Search By</b> list.	No
Exchange Rate Source	Used to search exchange rates which are received from a particular source.  <b>Note:</b> This field appears only when you select the <b>Date/Time and Exchange Rate Source</b> option from the <b>Search By</b> list.	No

**Note:** You must specify at least one search criterion while searching for an exchange rate.

- **Search Results** — On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Exchange Rate ID	Displays the exchange rate ID.  <b>Note:</b> It has a link. On clicking the link, the <b>Exchange Rate</b> screen appears with the details of the respective exchange rate.

Column Name	Column Description
From Currency	Indicates the currency which is translated. In other words, it is the source currency.
To Currency	Indicates the currency in which the source currency is translated. In other words, it is the target currency.
Division	Indicates the division for which the exchange rate is defined.  <b>Note:</b> The data does not appear in this column when the exchange rate is a global exchange rate.
Exchange Rate Source	Indicates the source from where the exchange rate is received.  <b>Note:</b> This column appears only when you select the <b>Date/Time and Exchange Rate Source</b> option from the <b>Search By</b> list.
Conversion Type	Indicates the conversion type of the exchange rate.
Effective Start Date/Time	Displays the date and time from when the exchange rate is effective.  <b>Note:</b> This column appears only when you select the <b>Date/Time and Exchange Rate Source</b> option from the <b>Search By</b> list.
Effective End Date/Time	Displays the date and time till when the exchange rate is effective.  <b>Note:</b> This column appears only when you select the <b>Date/Time and Exchange Rate Source</b> option from the <b>Search By</b> list. The data does not appear in this column when the exchange rate is a global exchange rate. This is because a global exchange rate does not have an end date and time.
Effective Start Date	Displays the date from when the exchange rate is effective.  <b>Note:</b> This column appears only when you select the <b>Date</b> option from the <b>Search By</b> list.
Effective End Date	Displays the date till when the exchange rate is effective.  <b>Note:</b> This column appears only when you select the <b>Date</b> option from the <b>Search By</b> list. The data does not appear in this column when the exchange rate is a global exchange rate. This is because a global exchange rate does not have an end date.
Exchange Rate	Displays the exchange rate.
Spread	Indicates the spread for the exchange rate.
Inverse Rate	Displays the reverse exchange rate.
Edit	On clicking the <b>Edit</b> (✎) icon, the <b>Add/Edit Exchange Rate</b> screen appears where you can edit the details of the exchange rate.
Delete	On clicking the <b>Delete</b> (🗑) icon, you can delete the exchange rate.

**Note:**

If you specify the effective start date and time while searching for an exchange rate, the system searches exchange rates which are effective from the specified date and time onwards. Let us understand this with the help of an example. The following table lists the exchange rates which are defined in the system where the From Currency is USD, To Currency is INR, and Division is D1:

Exchange Rate	Effective Start Date and Time	Effective End Date and Time
RT1	01-01-2014 12:00:00 PM	-
RT2	02-01-2014 12:00:00 PM	-
RT3	03-01-2014 12:00:00 PM	-

Now, when you search for exchange rates using the following search criteria, the system accordingly displays the search results:

Search Criteria	Search Results
Effective Start Date and Time: 01-01-2014 12:00:00 PM	All three exchange rates — RT1, RT2, and RT3 — will appear in the search results.
Effective Start Date and Time: 01-01-2014 12:00:00 PM; Effective End Date and Time: 31-01-2014 22:00:00 PM	RT1 will appear in the search results.
Effective Start Date and Time: 01-01-2014 12:00:00 PM; Effective End Date and Time: 02-01-2014 22:00:00 PM	RT1 and RT2 will appear in the search results.
Effective Start Date and Time: 02-01-2014 12:00:00 PM	RT2 and RT3 will appear in the search results.
Effective Start Date and Time: 02-01-2014 12:00:00 PM; Effective End Date and Time: 02-28-2014 22:00:00 PM	RT2 will appear in the search results.
Effective Start Date and Time: 03-01-2014 12:00:00 PM	RT3 will appear in the search results.

**Searching for an Exchange Rate****Prerequisites**

To search for an exchange rate, you should have:

- Currencies and divisions defined in the application

- Conversion types defined in the **CONV\_TYPE\_FLG** lookup field
- Exchange rate sources defined in the **EXCH\_RATE\_SRC\_FLG** lookup field

### **Procedure**

To search for an exchange rate:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Pricing Management** and then click **Exchange Rate**.  
A sub-menu appears.
3. Click the **Search** option from the **Exchange Rate** sub-menu.  
The **Exchange Rate** screen appears.
4. Select the required option from the **Search By** list depending on whether you want to search date or date and time based exchange rates.
5. Enter the search criteria in the **Search Exchange Rate** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all the input fields except the date fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

6. Click **Search**.

A list of exchange rates that meet the search criteria appears in the **Search Results** section.

## **Defining an Exchange Rate**

### **Prerequisites**

To define an exchange rate, you should have:

- Determine Business Object algorithm defined using the **F1-MOBO** algorithm type and attached to the **C1\_EXCHRATE** maintenance object

**Note:** The **C1-ExchangeRate** and **C1\_EXCHRATE\_BO** business objects are shipped with the product. The **C1-ExchangeRate** business object is used while defining and editing date and time based exchange rates. However, the **C1\_EXCHRATE\_BO** business object is used while defining and editing date based exchange rates. Depending on whether you want to define date or date and time based exchange rates, you need to accordingly set the **Business Object** parameter in the Determine Business Object algorithm. The system will then accordingly display the fields while defining or editing an exchange rate.

- Currencies and divisions defined in the application
- Conversion types defined in the **CONV\_TYPE\_FLG** lookup field
- Exchange rate sources defined in the **EXCH\_RATE\_SRC\_FLG** lookup field

**Procedure**

To define an exchange rate:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Pricing Management** and then click **Exchange Rate**.  
A sub-menu appears.
3. Click the **Add** option from the **Exchange Rate** sub-menu.

The **Add/Edit Exchange Rate** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Business Object	Indicates the business object using which you are defining an exchange rate.	Not applicable
From Currency	Used to indicate the currency that you want to translate. In other words, it is used to indicate the source currency.	Yes
To Currency	Used to indicate the currency in which you want to translate the source currency. In other words, it is used to indicate the target currency.	Yes
Conversion Type	Used to indicate the conversion type for the exchange rate.	Yes
Division	Used to indicate the division for which you want to define the exchange rate.  <b>Note:</b> You can only view those divisions to which you have access in the <b>Division</b> list.  You must leave this field blank while defining a global exchange rate.	Yes (Conditional)  <b>Note:</b> This field is required when you are defining a division-specific exchange rate.
Exchange Rate Source	Used to indicate the source from where the exchange rate is received.  <b>Note:</b> This field appears only when you are defining a date and time based exchange rate.	No
Effective Start Date/Time	Used to specify the date and time from when the exchange rate is effective.  <b>Note:</b> This field appears only when you are defining a date and time based exchange rate.  By default, the time is set to 12:00 AM. You can change the time, if required.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Effective End Date/ Time	Used to specify the date and time till when the exchange rate is effective.  <b>Note:</b> The effective end date and time cannot be earlier than the effective start date and time. You must leave this field blank while defining a global exchange rate. This is because a global exchange rate does not have an end date and time. This field appears only when you are defining a date and time based exchange rate. By default, the time is set to 12:00 AM. You can change the time, if required.	Yes (Conditional)  <b>Note:</b> If the <b>End Date Required for Division Override</b> option type of the <b>C1_EXCHRATE</b> feature configuration is set to <b>Y</b> , this field is required when you are defining a division-specific exchange rate.
Effective Start Date	Used to specify the date from when the exchange rate is effective.  <b>Note:</b> This field appears only when you are defining a date based exchange rate.	Yes
Effective End Date	Used to specify the date till when the exchange rate is effective.  <b>Note:</b> The effective end date cannot be earlier than the effective start date. You must leave this field blank while defining a global exchange rate. This is because a global exchange rate does not have an end date. This field appears only when you are defining a date based exchange rate.	Yes (Conditional)  <b>Note:</b> If the <b>End Date Required for Division Override</b> option type of the <b>C1_EXCHRATE</b> feature configuration is set to <b>Y</b> , this field is required when you are defining a division-specific exchange rate.
Exchange Rate	Used to specify the exchange rate. In other words, it is the number of units of the target currency that is equivalent to a single unit of the source currency.  <b>Note:</b> The system provides you with the facility to specify the exchange rate value with a precision of upto 18 decimal places (0.000000000000000001).	Yes
Spread	Used to specify the spread for the exchange rate.	No

**Tip:** Alternatively, you can access the **Add/Edit Exchange Rate** screen by clicking the **Add Exchange Rate** button in the **Page Title** area of the **Exchange Rate** screen.

4. Enter the required details in the **Add/Edit Exchange Rate** screen.
5. Define characteristics for the exchange rate, if required.

**Note:** You can define characteristics only when you are defining a date and time based exchange rate.

6. Click **Save**.

The exchange rate is defined in the system.

**Note:** If an exchange rate is already defined with a source and conversion type combination on a given date and time, the system will not allow you to define another exchange rate with the same specifications.

## **Defining Characteristics for an Exchange Rate**

### **Prerequisites**

To define characteristics for an exchange rate, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Exchange Rate**)

### **Procedure**

To define characteristics for an exchange rate:

1. Ensure that the **Characteristics** section is expanded when you are defining or editing an exchange rate.

The **Characteristics** section contains the following fields:

<b>Field Name</b>	<b>Field Description</b>	<b>Mandatory (Yes or No)</b>
Effective Date	Used to specify the date from when the characteristic is effective for the exchange rate.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the exchange rate.
Characteristic Type	Used to indicate the characteristic type. <b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Exchange Rate</b> .	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the exchange rate.

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Value	Used to specify the value for the characteristic type.  <b>Note:</b> On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	Yes (Conditional)  <b>Note:</b> This field is required when you are defining a characteristic for the exchange rate.

**Note:** The **Characteristics** section appears only when you are defining or editing a date and time based exchange rate.

- Enter the required details in the **Characteristics** section.

**Note:** If you select a predefined characteristic type, the **Search**  icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

- If you want to define more than one characteristic for the exchange rate, click the **Add**  icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from the exchange rate, click the **Delete**  icon corresponding to the characteristic.

## Editing an Exchange Rate

### Procedure

To edit an exchange rate:

- Search for the exchange rate in the **Exchange Rate** screen.
- In the **Search Results** section, click the **Edit**  icon in the **Edit** column corresponding to the exchange rate whose details you want to edit.

The **Add/Edit Exchange Rate** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Exchange Rate ID	Displays the exchange rate ID.	Not applicable
Business Object	Indicates the business object used while defining an exchange rate.	Not applicable
From Currency	Indicates the currency which is translated. In other words, it is the source currency.	Not applicable
To Currency	Indicates the currency in which the source currency is translated. In other words, it is the target currency.	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
Conversion Type	Indicates the conversion type of the exchange rate.	Not applicable
Division	Indicates the division for which the exchange rate is defined.  <b>Note:</b> The data does not appear corresponding to this field when the exchange rate is a global exchange rate.	Not applicable
Exchange Rate Source	Indicates the source from where the exchange rate is received.  <b>Note:</b> This field appears only when you are editing a date and time based exchange rate.	Not applicable
Effective Start Date/Time	Displays the date and time from when the exchange rate is effective.  <b>Note:</b> This field appears only when you are editing a date and time based exchange rate.	Not applicable
Effective End Date/Time	Used to specify the date and time till when the exchange rate is effective.  <b>Note:</b> The effective end date and time cannot be earlier than the effective start date and time. This field appears only when you are editing a date and time based exchange rate. This field is non-editable when you are editing a date and time based global exchange rate. This is because a global exchange rate does not have an end date and time.	Yes (Conditional)  <b>Note:</b> If the <b>End Date Required for Division Override</b> option type of the <b>C1_EXCHRATE</b> feature configuration is set to <b>Y</b> , this field is required when you are defining a division-specific exchange rate.
Effective Start Date	Displays the date from when the exchange rate is effective.  <b>Note:</b> This field appears only when you are editing a date based exchange rate.	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
Effective End Date	Used to specify the date till when the exchange rate is effective.  <b>Note:</b> The effective end date cannot be earlier than the effective start date. This field appears only when you are editing a date based exchange rate. This field is non-editable when you are editing a date based global exchange rate. This is because a global exchange rate does not have an end date.	Yes (Conditional)  <b>Note:</b> If the <b>End Date Required for Division Override</b> option type of the <b>C1_EXCHRATE</b> feature configuration is set to <b>Y</b> , this field is required when you are defining a division-specific exchange rate.
Exchange Rate	Used to specify the exchange rate. In other words, it is the number of units of the target currency that is equivalent to a single unit of the source currency.  <b>Note:</b> The system provides you with the facility to specify the exchange rate value with a precision of upto 18 decimal places (0.000000000000000001).	Yes
Spread	Used to specify the spread for the exchange rate.	No

**Tip:** Alternatively, you can click the **Edit** button in the **Exchange Rate** zone to edit the details of the exchange rate.

3. Modify the required details in the **Add/Edit Exchange Rate** screen.
4. Define, edit, or remove characteristics from the exchange rate, if required.

**Note:** The **Characteristics** section appears only when you are editing a date and time based exchange rate.

5. Click **Save**.

The changes made to the exchange rate are saved.

## **Deleting an Exchange Rate**

### **Procedure**

To delete an exchange rate:

1. Search for the exchange rate in the **Exchange Rate** screen.

- In the **Search Results** section, click the **Delete** (🗑️) icon in the **Delete** column corresponding to the exchange rate that you want to delete.

A message appears confirming whether you want to delete the exchange rate.

**Tip:** Alternatively, you can click the **Delete** button in the **Exchange Rate** zone to delete the exchange rate.

- Click **OK**.

The exchange rate is deleted.

## Exchange Rate (Used for Viewing)

---

Once you define an exchange rate, the **Exchange Rate** screen allows you to:

- Edit the details of the exchange rate
- Delete the exchange rate
- View the details of the exchange rate
- View the log of the exchange rate

This screen consists of the following zones:

- [Exchange Rate](#) on page 843
- [Exchange Rate Log](#) on page 845

### Exchange Rate

The **Exchange Rate** zone displays the details of the exchange rate. This zone contains the following sections:

- Main** — This section provides basic information about the exchange rate. It contains the following fields:

Field Name	Field Description
Exchange Rate ID	Displays the exchange rate ID.
From Currency	Indicates the currency which is translated. In other words, it is the source currency.
To Currency	Indicates the currency in which the source currency is translated. In other words, it is the target currency.
Conversion Type	Indicates the conversion type of the exchange rate.

Field Name	Field Description
Division	<p>Indicates the division for which the exchange rate is defined.</p> <p><b>Note:</b> The data does not appear corresponding to this field when the exchange rate is a global exchange rate. It has a link. On clicking the link, the <b>Division</b> screen appears with the details of the respective division.</p>
Exchange Rate Source	<p>Indicates the source from where the exchange rate is received.</p> <p><b>Note:</b> This field appears only when you are viewing the details of a date and time based exchange rate.</p>
Effective Start Date/ Time	<p>Displays the date and time from when the exchange rate is effective.</p> <p><b>Note:</b> This field appears only when you are viewing the details of a date and time based exchange rate.</p>
Effective End Date/ Time	<p>Displays the date and time till when the exchange rate is effective.</p> <p><b>Note:</b> This field appears only when you are viewing the details of a date and time based exchange rate. The data does not appear corresponding to this field when the exchange rate is a global exchange rate. This is because a global exchange rate does not have an end date and time.</p>
Effective Start Date	<p>Displays the date from when the exchange rate is effective.</p> <p><b>Note:</b> This field appears only when you are viewing the details of a date based exchange rate.</p>
Effective End Date	<p>Displays the date till when the exchange rate is effective.</p> <p><b>Note:</b> This field appears only when you are viewing the details of a date based exchange rate. The data does not appear corresponding to this field when the exchange rate is a global exchange rate. This is because a global exchange rate does not have an end date.</p>
Exchange Rate	Displays the exchange rate.
Spread	Indicates the spread for the exchange rate.

- **Characteristics** — This section lists the characteristics defined for the exchange rate. It contains the following columns:

Column Name	Column Description
Effective Date	Indicates the date from when the characteristic is effective for the exchange rate.
Characteristic Type	Indicates the characteristic type.

Column Name	Column Description
Characteristic Value	Displays the value of the characteristic type.

**Note:** The **Characteristics** section appears only when you are viewing the details of a date and time based exchange rate.

- **Record Actions** — This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the exchange rate.
Delete	Used to delete the exchange rate.

- **Record Information** — This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the exchange rate is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.
Create Date/Time	Displays the date and time when the exchange rate is created.

### Related Topics

For more information on...	See...
How to edit an exchange rate	<a href="#">Editing an Exchange Rate</a> on page 840
How to delete an exchange rate	<a href="#">Deleting an Exchange Rate</a> on page 842

## Exchange Rate Log

The **Exchange Rate Log** zone lists the complete trail of actions performed on the exchange rate. It contains the following columns:

Column Name	Column Description
Date/Time	Displays the date and time when the action was performed on the exchange rate.
Details	Displays the details about the action performed on the exchange rate.
User	Indicates the user who has performed the action on the exchange rate.
Log Type	Indicates the type of the log.
Related Object	Indicates the object or entity which is generated when the action is performed on the exchange rate.  <b>Note:</b> At present, no data appears in this column. The implementation team can build the custom logic to meet the business requirements.

Column Name	Column Description
Status Reason	Indicates the reason why the status was changed.  <b>Note:</b> At present, no data appears in this column. The implementation team can create a custom exchange rate business object with the status lifecycle.

## Viewing the Exchange Rate Details

### Procedure

To view the details of an exchange rate:

1. Search for the exchange rate in the **Exchange Rate** screen.
2. In the **Search Results** section, click the link in the **Exchange Rate ID** column corresponding to the exchange rate whose details you want to view.

The **Exchange Rate** screen appears. It contains the following zones:

- **Exchange Rate** — Displays the details of the exchange rate.
  - **Exchange Rate Log** — Lists the complete trail of actions performed on the exchange rate.
3. View the details of the exchange rate in the **Exchange Rate** zone.
  4. View the log of the exchange rate in the **Exchange Rate Log** zone.

- [Transaction Details](#)
- [Transaction Source](#)
- [Transaction Record Type](#)
- [Transaction Aggregation Rule](#)
- [Schedule](#)
- [Disaggregation Request](#)
- [Accumulation Data](#)

Oracle Revenue Management and Billing provides you with a facility to upload banking and Administrative Services Only (ASO) transactions received from various product processors or applications for billing. You can use the **File Upload Interface** feature to upload transaction data files in the following formats:

- Comma Separated Values
- JavaScript Object Notation
- Fixed Position
- Pipe Separated Values
- Tilde Separated Values
- Extensible Markup Language

For more information on how to upload the data using the **File Upload Interface** feature, refer to the respective feature documentation. Once the transaction data is uploaded in the system, you need to:

- Validate Header Details
- Validate Transaction Details and Determine Initial Product
- Verify Price Item Pricing
- Rate Transactions Before Billing (if required)
- Create and Update Billable Charge with the SQI values
- Clean-up Unwanted Data

The system provides the flexibility to rate the transactions either prior to billing or during billing. Based on the business requirements, you can configure the system such that transactions mapped to some price item can be rated at a frequency which is different than the account's billing frequency. For example, daily, weekly, etc. During the transaction feed management process, each transaction goes through various statuses until it is billed to the person. For more information about the transaction statuses, see [Transaction Status Transition](#) on page 902.

The transaction feed management process includes the following sub-processes:

- [Transaction Aggregation](#)
- [Transaction Disaggregation](#) on page 884
- [Transaction Cancellation](#) on page 895
- [Transaction Rollback](#) on page 899

## Prerequisites

---

To setup the transaction feed management process, you need to do the following:

- Define the required transaction sources in the system
- Define the required transaction record types for each transaction source
- Associate the required SQIs with a price item —division combination
- Define the required transaction aggregation rule for each SQI
- Define the aggregation schedules in the system
- Define the required rules in the system to determine initial price item for transactions
- Attach a validation algorithm to each account identifier type (to ensure that the account identifier type and account identifier combination is unique in or across divisions)
- Attach the **Price Assignment Search** algorithm to each division
- Define the **TFM - Processing Date** characteristic for each division
- Create an algorithm of the **C1\_CURALGTFM** algorithm type and attach it to the **TFM - Currency Conversion** algorithm spot of the division for which you want to enable the currency conversion feature
- Define the required exchange rates for currency conversion
- Define values for the PAGE\_NUMBER lookup field
- Create an algorithm of the **C1\_RTCL\_POPC** algorithm type and attach it to the **TFM - Rate Post-Processing** algorithm spot of the required division

Besides this, you need to setup the following feature configurations:

- *Rule Engine (CI\_RLENG)*
- *Dummy Header (CI-TXNDMYID)*
- *Multi Parameter Based Pricing (CI\_PPARAM\_FLG)*
- *Feed Management (CI\_FM)*

## Transaction Rating Before Billing

---

The system provides the flexibility to rate the transaction legs either prior to billing or during billing. Based on the business requirements, you can configure the system such that transactions mapped to some price items can be rated at a frequency which is different than the account's billing frequency. For example, daily, weekly, etc. This will help to reduce the performance issues which are caused when large volume of transactions are rated at the time of billing.

The system offers the following ways in which a transaction leg can be priced, rated and billed:

1. **Rate the Transaction Leg During Billing** – In this approach, you can use either of the following ways:
  - a. Determine effective pricing for a transaction leg, create a billable charge for the transaction leg, and then determine the rate during billing.
  - b. Determine effective pricing for a transaction leg, create a billable charge for aggregated transaction legs, and then determine the rate during billing.
2. **Rate the Transaction Leg Prior to Billing** – In this approach, you can use either of the following ways:
  - a. Determine effective pricing and rate for a transaction leg, and accumulate pre-calculated charges in a pass through billable charge based on the distribution code, currency code, description on bill, aggregation

parameter group ID (which is created based on the rate component characteristics). The pass through billable charge is then billed during billing.

- b. Determine effective pricing for a transaction leg, aggregate the transaction legs, determine rate for aggregated service quantities, and then accumulate pre-calculated charges in a pass through billable charge based on the distribution code, currency code, description on bill, aggregation parameter group ID (which is created based on the rate component characteristics). The pass through billable charge is then billed during billing.
- c. Determine effective pricing and rate for a transaction leg and create a pass through billable charge for the transaction leg which is billed during billing.

**3. Ignore the Transaction Leg for Billing** – In this approach, you can use either of the following ways:

- a. Determine effective pricing for a transaction leg, but the billable charge is not created for the transaction leg.
- b. Determine effective pricing and rate for a transaction leg, but the billable charge is not created for the transaction leg.

**Note:**

Once the rate is determined for transaction legs, a set of rate component characteristics and their values are grouped. For example, if a price assignment has the following rate components, the system creates two groups — Group A and Group B:

- RC1, Char1=Y, Char2=Y
- RC2, Char1=N, Char2=Y
- RC3, Char1=Y, Char2=Y

Group A contains Char1=Y, Char2=Y and Group B contains Char1=N, Char2=Y. These groups are used for accumulating pre-calculated charges. A unique aggregation parameter group ID is generated for each group. If a group with a set of rate component characteristics and their values already exists in the system, a new group is not created. Instead, the existing group is used for accumulating pre-calculated charges. The aggregation parameter group ID is created only when you attach an algorithm of the **C1\_RTCL\_POPC** algorithm type on the **TFM - Rate Post-Processing** algorithm entity in the **Algorithms** tab of the **Division** screen. Note that the system invokes the algorithm which is attached on the derived account's division and not on the division to which the transaction belongs.

While defining a price item pricing, you need to specify the rating criteria which indicates how and when you want to rate the transaction legs. The valid values are:

- Do Not Rate Transactions (DNRT)
- Aggregate transactions and then rate aggregated SQs (AGTR)
- Rate individual transactions and aggregate calc lines across transactions (RITA)
- Rate Transactions (RITX)

Along with the **Rating Criteria** field, the **Ignore Transaction** and **Aggregate Transaction** fields help the system to determine how and when the corresponding transaction leg must be rated. The following table indicates how to configure the system in order to use the above mentioned ways:

Transaction Rating Approach and Way	Ignore Transaction (Yes or No)	Aggregate Transaction (Yes or No)	Rating Criteria	Batch in which the Rate is Determined
3a	Yes	Not applicable	Do Not Rate Transactions (DNRT)	Not applicable because ignored transactions are not considered for billing.

Transaction Rating Approach and Way	Ignore Transaction (Yes or No)	Aggregate Transaction (Yes or No)	Rating Criteria	Batch in which the Rate is Determined
3b	Yes	Not applicable	Rate Transactions (RITX)	Update Status (C1-TXNEX)
1b	No	Yes	Do Not Rate Transactions (DNRT)	Not applicable because the rate is determined during billing.
2b	No	Yes	Aggregate transactions and then rate aggregated SQs (AGTR)	Service Quantity Calculation (C1-TXNSQ)
2a	No	Yes	Rate individual transactions and aggregate calc lines across transactions (RITA)	Update Status (C1-TXNEX)
1a	No	No	Do Not Rate Transactions (DNRT)	Not applicable because the rate is determined during billing.
2c	No	No	Rate Transactions (RITX)	Service Quantity Calculation (C1-TXNSQ)

Let us understand the following transaction rating ways with the help of an example:

- 2a
- 2b
- 2c

The following table lists the account, price item, and price item parameters combination to which transaction T1 and T2 are mapped:

Transaction	Transaction Volume	Transaction Date	Account	Price Item	Price Item Parameter Group ID	Price Assignment ID	Aggregation Schedule
T1	300	01/01/2015	A1	P1	PG1	PA1	Monthly
T1	300	01/01/2015	A2	P1	PG1	PA2	Monthly
T2	200	15/01/2015	A1	P1	PG1	PA1	Monthly
T2	200	15/01/2015	A3	P1	PG1	PA3	Monthly

The following table lists the rate components available on the PA1, PA2, and PA3 price assignments:

Transaction	Price Assignment ID	Rate Component	Currency Code	Distribution Code	Description on Bill	Aggregation Parameter Group ID (Rate Component's Characteristics)
T1	PA1	RC1-0.1*Transaction Volume	USD	BK-AR1	XYZ	Char1=Y
T1	PA1	RC2-0.2*Transaction Volume	USD	BK-AR2	ABC	Char2=Y
T1	PA2	RC3-0.3*Transaction Volume	USD	BK-AR3	XYZ	Char1=Y
T1	PA2	RC4-0.2*Transaction Volume	USD	BK-AR4	ABC	Char2=Y
T2	PA1	RC1-0.1*Transaction Volume	USD	BK-AR1	XYZ	Char1=Y
T2	PA1	RC2-0.2*Transaction Volume	USD	BK-AR2	ABC	Char2=Y
T2	PA3	RC3-0.3*Transaction Volume	USD	BK-AR3	XYZ	Char1=Y
T2	PA3	RC4-0.2*Transaction Volume	USD	BK-AR3	XYZ	Char1=Y

Now, if you use **RITA (2a)** approach, the system will rate a transaction leg and accumulate pre-calculated charges in a pass through billable charge based on the distribution code, currency code, description on bill, aggregation parameter group ID, as shown in the following table:

Billable Charge	Start Date	End Date	Transaction Leg	Rate Component	Calculation Details	Pass Through Charge (\$)	Comments
BC1	01/01/2015	31/01/2015	T1- A1P1PG1- PA1, T2- A1P1PG1- PA1	RC1	$300*0.1 = 30$ , $200*0.1 = 20$	$30+20 = 50$	The pass through charge is calculated for each transaction leg and then accumulated because the distribution code, currency code, description on bill, and characteristics of the rate components are same.

Billable Charge	Start Date	End Date	Transaction Leg	Rate Component	Calculation Details	Pass Through Charge (\$)	Comments
BC1	01/01/2015	31/01/2015	T1– A1P1PG1– PA1, T2– A1P1PG1– PA1	RC2	$300 * 0.2 = 60$ , $200 * 0.2 = 40$	$60 + 40 = 100$	The pass through charge is calculated for each transaction leg and then accumulated because the distribution code, currency code, description on bill, and characteristics of the rate components are same.
BC2	01/01/2015	31/01/2015	T1– A2P1PG1– PA2	RC3	$300 * 0.3 = 90$	90	The pass through charge is calculated for the transaction leg.
BC2	01/01/2015	31/01/2015	T1– A2P1PG1– PA2	RC4	$300 * 0.2 = 60$	60	The pass through charge is calculated for the transaction leg.
BC3	01/01/2015	31/01/2015	T2– A3P1PG1– PA3	RC3, RC4	$200 * 0.3 = 60$ , $200 * 0.2 = 40$	$60 + 40 = 100$	The pass through charges are calculated for the transaction leg and then accumulated because the distribution code, currency code, description on bill, and characteristics of the rate components are same.

In the above example, the BC1 and BC2 will have two pass through lines, whereas the BC3 will have one pass through line.

Now, if you use **RITX (2c)** approach, the system will rate a transaction leg and calculate charges for each transaction leg in a separate pass through billable charge, as shown in the following table:

Billable Charge	Start Date	End Date	Transaction Leg	Rate Component	Calculation Details	Pass Through Charge (\$)	Comments
BC1	01/01/2015	31/01/2015	T1-A1P1PG1-PA1	RC1	$300 * 0.1 = 30$	30	The pass through charge is calculated for the transaction leg.
BC1	01/01/2015	31/01/2015	T1-A1P1PG1-PA1	RC2	$300 * 0.2 = 60$	60	The pass through charge is calculated for the transaction leg.
BC2	01/01/2015	31/01/2015	T1-A2P1PG1-PA2	RC3	$300 * 0.3 = 90$	90	The pass through charge is calculated for the transaction leg.
BC2	01/01/2015	31/01/2015	T1-A2P1PG1-PA2	RC4	$300 * 0.2 = 60$	60	The pass through charge is calculated for the transaction leg.
BC3	01/01/2015	31/01/2015	T2-A1P1PG1-PA1	RC1	$200 * 0.1 = 20$	20	The pass through charge is calculated for the transaction leg.
BC3	01/01/2015	31/01/2015	T2-A1P1PG1-PA1	RC2	$200 * 0.2 = 40$	40	The pass through charge is calculated for the transaction leg.
BC4	01/01/2015	31/01/2015	T2-A3P1PG1-PA3	RC3, RC4	$200 * 0.3 = 60$ , $200 * 0.2 = 40$	$60 + 40 = 100$	The pass through charges are calculated for the transaction leg and then accumulated because the distribution code, currency code, description on bill, and characteristics of the rate components are same.

In the above example, the BC1, BC2, and BC3 will have two pass through lines, whereas the BC4 will have one pass through line.

Now, if you use **AGTR (2b)** approach, the system will determine effective pricing for a transaction leg, aggregate the transaction legs, determine rate for aggregated service quantities, and then accumulate pre-calculated charges in a pass through billable charge based on the distribution code, currency code, description on bill, aggregation parameter group ID (which is created based on the rate component characteristics), as shown in the following table:

Account- Price Item- Price Item Parameter Group- Price Assignment- Aggregation Schedule	Total Transaction Volume	Billable Charge	Start Date	End Date	Rate Component	Calculation Details	Pass Through Charge (\$)	Comments
A1P1PG1- PA1- Monthly	300+200 = 500	BC1	01/01/2015	31/01/2015	RC1	500*0.1 = 50	50	The transaction volume of T1 and T2 legs having the same price item and price item parameters combination and whose transaction date falls between the aggregation schedule is first aggregated and then pass through charge is calculated for aggregated service quantities.

Account- Price Item- Price Item Parameter Group- Price Assignment- Aggregation Schedule	Total Transaction Volume	Billable Charge	Start Date	End Date	Rate Component	Calculation Details	Pass Through Charge (\$)	Comments
A1P1PG1- PA1- Monthly	300+200 = 500	BC1	01/01/2015	31/01/2015	RC2	500*0.2 = 100	100	The transaction volume of T1 and T2 legs having the same price item and price item parameters combination and whose transaction date falls between the aggregation schedule is first aggregated and then pass through charge is calculated for aggregated service quantities.
A2P1PG1- PA2- Monthly	300	BC2	01/01/2015	31/01/2015	RC3	300*0.3 = 90	90	The pass through charge is calculated for the transaction leg.
A2P1PG1- PA2- Monthly	300	BC2	01/01/2015	31/01/2015	RC4	300*0.2 = 60	60	The pass through charge is calculated for the transaction leg.

Account- Price Item- Price Item Parameter Group- Price Assignment- Aggregation Schedule	Total Transaction Volume	Billable Charge	Start Date	End Date	Rate Component	Calculation Details	Pass Through Charge (\$)	Comments
A3P1PG1- PA3- Monthly	200	BC3	01/01/2015	31/01/2015	RC3, RC4	200*0.3 = 60, 200*0.2 = 40	60+40 = 100	The pass through charges are calculated for the transaction leg and then accumulated because the distribution code, currency code, description on bill, and characteristics of the rate components are same.

In the above example, the BC1 and BC2 will have two pass through lines, whereas the BC3 will have one pass through line.

## Transaction Aggregation

---

The transaction aggregation process includes the following sub-processes:

- [Header Validation](#) on page 857
- [Transaction Validation and Initial Price Item Determination](#) on page 859
- [Price Item Pricing Verification](#) on page 870
- [Aggregation](#) on page 875
- [Clean Up](#) on page 879

The following figure graphically explains the transaction aggregation process:

## Header Validation

Once the file is uploaded in the system, you can execute the **Header Validation (C1-TXNHV)** batch to validate the file or header level information. It checks whether:

- Transaction Header ID and Transaction Source is available in the header.
- At least one transaction record is available in the file.
- The number of transaction records in the file matches the total transaction records in the header.
- The sum of transaction amount matches the total transaction amount in the header.
- The sum of transaction volume matches the total transaction volume in the header.
- File with the same header date and transaction header ID is not available in the system.
- External reference number is specified in each transaction record of the file.

If the file or header information is validated successfully, the status of the file or feed is changed to **Validated (VALI)** and the status of all transactions in the feed remains as **Uploaded (UPLD)**. However, if the header validation fails, the status of the feed and all transactions in the feed is changed to **Invalid (INVL)**.

The **Header Validation (C1-TXNHV)** batch is a multi-threaded batch. You can specify either of the following parameters while executing this batch:

Parameter Name	Description	Mandatory (Yes or No)
Transaction Header ID	Used when you want to validate a particular transaction feed.	No

Parameter Name	Description	Mandatory (Yes or No)
Transaction Source	Used when you want to validate the transaction feeds which are received from a particular transaction source.	No
Checksum Validation Required	Used to indicate whether the following should be validated: <ul style="list-style-type: none"> <li>The number of transaction records in the file matches the total transaction records in the header.</li> <li>The sum of transaction amount matches the total transaction amount in the header.</li> <li>The sum of transaction volume matches the total transaction volume in the header.</li> </ul> The valid values are: <ul style="list-style-type: none"> <li>Y</li> <li>N</li> </ul>	No
Duplicate Check Required	Used to indicate whether the following should be validated: <ul style="list-style-type: none"> <li>File with the same header date and external header ID is not available in the system.</li> </ul> The valid values are: <ul style="list-style-type: none"> <li>Y</li> <li>N</li> </ul> <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"><b>Note:</b> The duplicate check is done only against the transaction feeds which are in the <b>Validated (VALD)</b> status and not against the transaction feeds which are in the <b>Uploaded (UPLD)</b> status.</div>	No
Allow Positive Transaction Volume in Header	Used to indicate whether you want to allow positive value in the total transaction volume which is specified in the header record. The valid values are: <ul style="list-style-type: none"> <li>Y</li> <li>N</li> </ul> <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"><b>Note:</b> By default, the parameter value is set to <b>Y</b>.</div>	Yes
Allow Negative Transaction Volume in Header	Used to indicate whether you want to allow negative value in the total transaction volume which is specified in the header record. The valid values are: <ul style="list-style-type: none"> <li>Y</li> <li>N</li> </ul> <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"><b>Note:</b> By default, the parameter value is set to <b>N</b>.</div>	Yes

Parameter Name	Description	Mandatory (Yes or No)
Allow Zero Transaction Volume in Header	Used to indicate whether you want to allow zero value in the total transaction volume which is specified in the header record. The valid values are: <ul style="list-style-type: none"> <li>• Y</li> <li>• N</li> </ul> <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"><b>Note:</b> By default, the parameter value is set to N.</div>	Yes
Thread Pool Name	Used to specify the thread pool on which you want to execute the batch.	No

## Transaction Validation and Initial Price Item Determination

This process includes the following two sub-processes:

- **Transaction Validation** - In this sub-process, the transaction records are validated. The transaction level validations are done to check the integrity of the data. During the transaction validation, the system checks whether:
  - Transaction source is defined in the system.
  - Transaction record type is defined for the transaction source in the system.
  - Division and currencies are defined in the system.
  - The account with the specified account identifier, account identifier type and division exists in the system.

**Note:** This validation is done only when the **Transaction Detail Account Validation** option type of the **Feed Management (C1\_FM)** feature configuration is set to **Y**. If you set the **Transaction Detail Account Validation** option type of the **Feed Management (C1\_FM)** feature configuration to **N**, the system overrides the transaction's account identifier type, account identifier, and division with the first derived account's account identifier type, account identifier, and division, respectively.

- User ID (if available in the transaction information) is defined in the system.
- The value other than 'Y' or 'N' is not specified in the **Manual Switch** column.
- The value other than '+' or '-' is not specified in the **Credit/Debit Indicator** column.
- Transaction Amount is specified when Transaction Currency is specified, and vice versa.
- Additional Amount 1 is specified when Amount 1 Currency Code is specified, and vice versa.
- Additional Amount 2 is specified when Amount 2 Currency Code is specified, and vice versa.
- Additional Amount 3 is specified when Amount 3 Currency Code is specified, and vice versa.
- Additional Amount 4 is specified when Amount 4 Currency Code is specified, and vice versa.
- Additional Amount 5 is specified when Amount 5 Currency Code is specified, and vice versa.
- Additional Amount 6 is specified when Amount 6 Currency Code is specified, and vice versa.
- Additional Amount 7 is specified when Amount 7 Currency Code is specified, and vice versa.
- Additional Amount 8 is specified when Amount 8 Currency Code is specified, and vice versa.
- Additional Amount 9 is specified when Amount 9 Currency Code is specified, and vice versa.
- Additional Amount 10 is specified when Amount 10 Currency Code is specified, and vice versa.

If the transaction information is invalid or incorrect (for example, division is invalid), the status of the transaction is changed to **Error (EROR)**. But, if the transaction information is not available, the status of the transaction is changed to **Invalid (INVL)**.

- **Pricing Rule Type or Rule Type Determination** - If the transaction validation is successful, the system checks whether a primary pricing rule type is specified in the respective transaction record type. If a primary pricing rule type is specified in the transaction record type, the system calls the primary pricing rule type and invokes the algorithms which are attached to the following system events of the primary pricing rule type in the specified sequence:
  1. **Transaction Validation** - At present, the product has not shipped an algorithm type for the **Transaction Validation** system event. If required, you can create a custom algorithm type which validates the transaction before deriving the transaction legs.
  2. **Bill Group Derivation** - For more information, refer to the [Bill Group Derivation](#) on page 2733 section.
  3. **Account and Price Item Derivation** - Depending on the category to which the pricing rule type belongs, you need to attach different algorithm to the **Account and Price Item Derivation** system event. The following table lists the algorithms that you can attach to a primary pricing rule types with different category:

Pricing Rule Type Category	Algorithm	For more information on how the system derives the transaction legs, refer to...
Claim	C1_ACCPRIDRV	<a href="#">Account and Price Item Derivation (for the Claim Pricing Rule Type Category)</a> on page 2736
Retention Type Enrollment Based	C1_ACCPRIDRV	<a href="#">Account and Price Item Derivation (for the Retention Type Enrollment Based Pricing Rule Type Category)</a> on page 2766
Ancillary	C1_ACCPRIDRV	<a href="#">Account and Price Item Derivation (for the Ancillary Pricing Rule Type Category)</a> on page 2776

Once the primary pricing rule type is called, the system calls the eligible related pricing rule types (if any) defined in the primary pricing rule type. Note that the related pricing rule types are called one by one in the specified sequence. The system invokes the algorithms which are attached to the following system events of the related pricing rule type in the specified sequence:

1. **Transaction Validation** - At present, the product has not shipped an algorithm type for the **Transaction Validation** system event. If required, you can create a custom algorithm type which validates the transaction before deriving the transaction legs.
2. **Account and Price Item Derivation** - Depending on the category to which the pricing rule type belongs, you need to attach different algorithm to the **Account and Price Item Derivation** system event. The following table lists the algorithms that you can attach to a related pricing rule type with different category:

Pricing Rule Type Category	Algorithm	For more information on how the system derives the transaction legs, refer to...
Specific Stop-Loss	C1_ACCPRISL	<a href="#">Account and Price Item Derivation (for the Specific Stop-Loss and Aggregate Stop-Loss Pricing Rule Type Categories)</a> on page 2741
Aggregate Stop-Loss	C1_ACCPRISL	<a href="#">Account and Price Item Derivation (for the Specific Stop-Loss and Aggregate Stop-Loss Pricing Rule Type Categories)</a> on page 2741

Pricing Rule Type Category	Algorithm	For more information on how the system derives the transaction legs, refer to...
Retention Type Claim Based	C1_ACCPRIDRV	<i>Account and Price Item Derivation (for the Retention Type Claim Based Pricing Rule Type Category) on page 2754</i>

However, if a primary pricing rule type is not specified in the transaction record type, the system determines the account which will bear the charges for the transaction and the price item and variance parameter or price item parameters to which the transaction will be mapped using rules which are invoked through the rule type. Depending on the transaction record type, a rule type is invoked for each transaction. The effective rules with the specified rule type are executed, starting with the rule having highest priority, until a rule is satisfied. For example, a rule with the priority 10 will be executed before a rule with the priority 20.

**Note:** The system determines rules which are effective based on the **TFM - Processing Date** characteristic defined for the division to which the transaction belongs. The system uses the **TFM - Processing Date** characteristic which is effective on the transaction date. If the **TFM - Processing Date** characteristic type is set to **BATCH\_DT**, the system executes rules which are effective on the batch business date. However, if the **TFM - Processing Date** characteristic type is set to **TXN\_DT**, the system executes rules which are effective on the transaction date. Note that the transaction date must be earlier than or equal to the batch business date. And, if the **TFM - Processing Date** characteristic is not defined for the division to which a transaction belongs, the system, by default, executes rules which are effective on the transaction date.

Each rule contains one or more conditions or criteria. For example, Rule A states that if the transaction record type is R001 and the division is New York, then set the following output parameters:

- ACCT\_NO1\_Val - Account 1
- DIVISION1\_VAL - D1
- PRODUCT1\_1\_Val - Price Item X

Here, Transaction Record Type = R001 and Division = New York are two conditions. If these two conditions in the rule are satisfied, then set three output parameters - ACCT\_NO1\_Val, DIVISION1\_VAL and PRODUCT1\_1\_Val. Now, when this rule is executed and the transaction satisfies this criteria, the transaction is mapped to Price Item X and Account 1 which belongs to D1 bears the charges for the transaction. In case, the rule has four output parameters (ACCT\_NO1\_Val set to Account 1, DIVISION1\_VAL set to D1, PRODUCT1\_1\_Val set to Price Item X, and PRODUCT1\_2\_Val set to Price Item Y), the transaction will be mapped to both the price items (i.e. Price Item X and Price Item Y) and Account 1 which belongs to D1 bears the charges for the transaction. A transaction can be mapped to one or more price items or to one or more price item and TOU (variance parameter) combinations. If the multi parameter based pricing feature is enabled, you can map a transaction to one or more price item and price item parameters combinations. Let us understand this with the help of an example.

Rule B states that if the transaction is performed in US and the transaction amount exceeds 1000 USD, then set the following output parameters:

- ACCT\_NO1\_Val - Account A
- DIVISION1\_VAL - D1
- PRODUCT1\_1\_Val - Price Item X
- PCD1\_1\_1\_VAL - Country
- PVL1\_1\_1\_VAL - US
- PCD1\_1\_2\_VAL - Currency
- PVL1\_1\_2\_VAL - USD
- PRODUCT1\_2\_Val - Price Item Y
- PCD1\_2\_1\_VAL - Country

- PVL1\_2\_1\_VAL - US
- PCD1\_2\_2\_VAL - Currency
- PVL1\_2\_2\_VAL - USD

Now, when this rule is executed and the transaction satisfies the criteria, Account A which belongs to D1 bears the charges for the transaction which is mapped to the following price item and price item parameters combinations:

- Price Item X, Country - US, Currency - USD
- Price Item Y, Country - US, Currency - USD

More than one account can bear the charges for a transaction and each account can belong to a different division. You can map a transaction to one or more price items, to one or more price item and TOU (variance parameter) combinations, or to one or more price item and price item parameters combinations. The system allows you to map price items for each account. For example, Rule C states that if the transaction is performed in UK and the transaction amount exceeds 1000 USD, then set the following output parameters:

- ACCT\_NO1\_Val - Account A
- DIVISION1\_VAL - D1
- PRODUCT1\_1\_Val - Price Item X
- PCD1\_1\_1\_VAL - Country
- PVL1\_1\_1\_VAL - UK
- PCD1\_1\_2\_VAL - Currency
- PVL1\_1\_2\_VAL - USD
- PRODUCT1\_2\_Val - Price Item Y
- PCD1\_2\_1\_VAL - Country
- PVL1\_2\_1\_VAL - UK
- PCD1\_2\_2\_VAL - Currency
- PVL1\_2\_2\_VAL - USD
- ACCT\_NO2\_Val - Account B
- DIVISION2\_VAL - D2
- PRODUCT2\_1\_Val - Price Item A
- PCD2\_1\_1\_VAL - Country
- PVL2\_1\_1\_VAL - US
- PCD2\_1\_2\_VAL - Currency
- PVL2\_1\_2\_VAL - USD

Now, when this rule is executed and the transaction satisfies the criteria, the transaction is mapped to the following price item and price item parameters combinations:

<b>Charges Borne By</b>	<b>Division to which the account belongs...</b>	<b>Price Item</b>	<b>Country</b>	<b>Currency</b>
Account A	D1	Price Item X	UK	USD
Account A	D1	Price Item Y	UK	USD
Account B	D2	Price Item A	US	USD

You can limit the maximum accounts that can bear the charges for a transaction, maximum price item that can be mapped to a transaction, and maximum parameters that can be used with each price item to determine price item pricing. For more information, see [Defining a Transaction Record Type](#) on page 1000. You can also define rules to ignore transactions based on the transaction attributes. If the rule returns the **IGNORE\_SW** equal to **Y**, the status of the transaction is changed to **Ignored (IGNR)** and no further processing takes place on the transaction.

You can use the following output parameters while defining rules in the system:

Output Parameter	Naming Convention	Example	Description
Account Identifier	ACCT_NOX_Val	ACCT_NO1_Val, ACCT_NO2_Val, ACCT_NO3_Val, ....	Used to indicate the account which must bear the charges for the transaction.
Account Identifier Column Name	ACCT_NOX_Col	ACCT_NO1_Col, ACCT_NO2_Col, ACCT_NO3_Col, ...	Used to indicate the column from where the account identifier corresponding to the transaction (in the transaction details) must be picked.
Account Identifier Type	ACCT_NO_TYPEX_Val	ACCT_NO_TYPE1_Val, ACCT_NO_TYPE2_Val, ACCT_NO_TYPE3_Val, ...	Used to indicate the type of account identifier.
Account Identifier Type Column Name	ACCT_NO_TYPEX_Col	ACCT_NO_TYPE1_Col, ACCT_NO_TYPE2_Col, ACCT_NO_TYPE3_Col, ...	Used to indicate the column from where the account identifier type corresponding to the transaction (in the transaction details) must be picked.
Account Division	DIVISIONX_VAL	DIVISION1_VAL	Used to indicate the division to which the account belongs.
Account Division Column Name	DIVISIONX_COL	DIVISION1_COL	Used to indicate the column from where the division corresponding to the transaction (in the transaction details) must be picked.
Price Item Name	PRODUCTX_Y_Val <b>Note:</b> Here, X represents the account and Y represents the price item.	PRODUCT1_1_Val, PRODUCT2_1_Val, PRODUCT2_2_Val, ....	Used to indicate the price item to which the transaction must be mapped.
Price Item Column Name	PRODUCTX_Y_Col <b>Note:</b> Here, X represents the account and Y represents the price item.	PRODUCT1_1_Col,, PRODUCT2_1_Col, PRODUCT2_2_Col, ...	Used to indicate the column from where the price item corresponding to the transaction (in the transaction details) must be picked.

Output Parameter	Naming Convention	Example	Description
TOU	TOUX_Y_Val  <b>Note:</b> Here, X represents the account and Y represents the price item.	TOU1_1_Val, TOU2_1_Val, TOU2_2_Val, ...	Used to indicate the variance parameter which you want to use along with the price item for price determination.  <b>Note:</b> This output parameter appears only when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>False</b> .
TOU Column Name	TOUX_Y_Col  <b>Note:</b> Here, X represents the account and Y represents the price item.	TOU1_1_Col, TOU2_1_Col, TOU2_2_Col, ...	Used to indicate the column from where the variance parameter corresponding to the transaction (in the transaction details) must be picked.  <b>Note:</b> This output parameter appears only when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>False</b> .
Parameter Code	PCDX_Y_Z_VAL  <b>Note:</b> Here, X represents the account, Y represents the price item, and Z represents the parameter.	PCD1_1_1_VAL, PCD1_2_1_VAL, PCD2_1_1_VAL, ...	Used to indicate the parameter which you want to use along with the price item for price determination.  <b>Note:</b> This output parameter appears only when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>True</b> .  You must not specify any special character except underscore ( ) in the parameter code. Otherwise, the status of the transaction is changed to <b>Error (EROR)</b> .

Output Parameter	Naming Convention	Example	Description
Parameter Value	PVLX_Y_Z_VAL  <b>Note:</b> Here, X represents the account, Y represents the price item, and Z represents the parameter.	PVL1_1_1_VAL, PVL1_2_1_VAL, PVL2_1_1_VAL, ...	Used to specify the value for the parameter.  <b>Note:</b> This output parameter appears only when the <b>Multi Price Parameter Based Pricing (C1_PPARAM_FLG)</b> feature configuration is set to <b>True</b> .  The parameter value must not contain the equal to (=) and tilde (~) symbols. Otherwise, the status of the transaction is changed to <b>Error (EROR)</b> .
Parameter Value Column Name	PVLX_Y_Z_COL  <b>Note:</b> Here, X represents the account, Y represents the price item, and Z represents the parameter.	PVL1_1_1_COL, PVL1_2_1_COL, PVL2_1_1_COL, ...	Used to indicate the column from where the parameter value corresponding to the transaction (in the transaction details) must be picked.  <b>Note:</b> This output parameter appears only when the <b>Multi Price Parameter Based Pricing (C1_PPARAM_FLG)</b> feature configuration is set to <b>True</b> .  The column from where the parameter value is picked must not contain the equal to (=) and tilde (~) symbols. Otherwise, the status of the transaction is changed to <b>Error (EROR)</b> .

Output Parameter	Naming Convention	Example	Description
Processing Date Type	PRCS_DTX_Y_TYP  <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> Here, X represents the account and Y represents the price item.</p> </div>	PRCS_DT1_1_TYP, PRCS_DT1_2_TYP, PRCS_DT2_1_TYP, ...	Used to indicate the date type using which you want to determine the effective price item parameters, pricing, and exchange rate. The valid values are: <ul style="list-style-type: none"> <li>• <b>TXN_DT</b> - Used when you want to determine price item parameters, pricing, and exchange rate which are effective on the transaction date.</li> <li>• <b>Batch_DT</b> - Used when you want to determine price item parameters, pricing, and exchange rate which are effective on the batch business date.</li> </ul> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> Based on the <b>TFM - Processing Date</b> characteristic defined for the division to which a transaction belongs, the system determines the rules, price item parameters, pricing, and exchange rate which are effective on the transaction or batch business date. The price item parameters, pricing, and exchange rate which are effective is determined for all account and price item combinations to which the transaction is mapped. If you want to use a custom processing date for a particular account and price item combination to which the transaction is mapped, you need to set the PRCS_DTX_Y_TYP output parameter. In other words, the PRCS_DTX_Y_TYP output parameter helps you to override the processing date for a particular account and price item combination. However, the overridden processing date is used only while determining effective price item parameters, pricing, and exchange rate.</p> </div>

Output Parameter	Naming Convention	Example	Description
Processing Date	PRCS_DTX_Y_VAL  <b>Note:</b> Here, X represents the account and Y represents the price item.	PRCS_DT1_1_VAL, PRCS_DT1_2_VAL, PRCS_DT2_1_VAL, ...	Used to specify a custom date on which you want to determine the effective price item parameters, pricing, and exchange rate.  <b>Note:</b> The custom date must be a date other than the transaction or batch business date.  Based on the <b>TFM - Processing Date</b> characteristic defined for the division to which a transaction belongs, the system determines the rules, price item parameters, pricing, and exchange rate which are effective on the transaction or batch business date. The price item parameters, pricing, and exchange rate which are effective is determined for all account and price item combinations to which the transaction is mapped. If you want to use a custom processing date for a particular account and price item combination to which the transaction is mapped, you need to set the PRCS_DTX_Y_VAL output parameter. In other words, the PRCS_DTX_Y_VAL output parameter helps you to override the processing date for a particular account and price item combination. However, the overridden processing date is used only while determining effective price item parameters, pricing, and exchange rate.
Ignore Transaction	IGNORE_SW		Used to ignore transactions based on the transaction attributes. The valid values are: <ul style="list-style-type: none"> <li>• Y</li> <li>• N</li> </ul>

Once the transaction satisfies any rule (invoked through the rule type), one transaction leg is created for each account, division, price item, and variance parameter or price item parameters combination. Let us understand this with the help of an example. The following table lists the accounts and price items to which T1, T2, and T3 are mapped:

Transaction	Charges Borne By	Division to which the account belongs...	Price Item	Variance Parameter	Price Item Parameters
T1	A1	D1	P1	-	Country - US, Currency - USD
T1	A1	D1	P2	-	Country - Germany, Currency - USD
T1	A2	D2	P3	USD	-
T2	A1	D1	P1	-	Country - US, Currency - USD
T2	A2	D2	P2	USD	-
T3	A1	D1	P3	-	Country - Germany, Currency - USD

In such case, the system will create three legs for T1, two legs for T2, and one leg for T3. Each transaction leg will have its own status. The status of the transaction legs and transaction is changed to **Initial Price Item Determined (INPD)**. However, if a transaction does not satisfy any rule, the status of the transaction is changed to **Error (EROR)**.

Note:
<p>During this sub-process, the system validates the following:</p> <ul style="list-style-type: none"> <li>• Whether the price item parameters specified in the output parameters are effective for the price item on the processing date.</li> <li>• Whether the mandatory price item parameter which is effective on the processing date is specified in the output parameter.</li> <li>• Whether the parameter value is specified for all mandatory price item parameters which are effective on the processing date.</li> </ul> <p>If any of the above validation fails, the status of the transaction is changed to <b>Error (EROR)</b> and no transaction legs are created.</p>

Once the transaction legs are created, the price item parameters of each transaction leg are grouped. For example, when a transaction is mapped to the following price item and price item parameters combinations, the system creates three groups - Group A, Group B, and Group C:

- Account A, Price Item X, Country - US, Currency - USD
- Account A, Price Item Y, Country - Germany, Currency - USD
- Account B, Price Item X, Country - England, Currency - USD

Group A contains Country - US, Currency - USD; Group B contains Country - Germany, Currency - USD; and Group C contains Country - England, Currency - USD.

A set of price item parameters are grouped only when the multi parameter based pricing feature is enabled. A group is used to determine the price item pricing. A unique group ID is generated for each group. If a group with a set of price item parameters already exists in the system, a new group is not created. Instead, the existing group is used for determining the price item pricing.

You can execute this process through a multi-threaded batch named **Validate Transaction and Derive Price Item (C1-TXNIP)**. You can specify the following parameters while executing this batch:

Parameter Name	Description	Mandatory (Yes or No)
Batch Business Date	<p>Used to identify the transactions for which you want to perform validation and determine price item. The system considers the transactions whose transaction date is earlier than or equal to the batch business date.</p> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>If you do not specify any date, the batch business date is set to the current date.</p> <p>The batch business date used while executing the <b>C1-TXNIP</b> batch is stamped in the database. It is then used while executing all other consequent batches in the transaction aggregation cycle.</p> </div>	No
Transaction Header ID	Used when you want to validate and derive price item for the transactions which are received in a particular transaction feed.	No
Transaction Source	Used when you want to validate and derive price item for the transactions which are received from a particular transaction source.	No
Division	Used when you want to validate and derive price item for the transactions belonging to a particular division.	No
Shuffle Work Unit	<p>Used to indicate whether you want to shuffle the work units across threads to correct the uneven thread processing time. The valid values are:</p> <ul style="list-style-type: none"> <li>• Y</li> <li>• N</li> </ul> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> By default, the parameter value is set to N.</p> </div>	No
Chunk Size	Used to specify the number of transactions you want to execute in each work unit.	Yes
Maximum Batch Count	Used to specify the maximum number of transactions after which the data must be transferred to the database.	Yes
Thread Pool Name	Used to specify the thread pool on which you want to execute the batch.	No

A log is generated if the **Logging Rules for Transaction Feed** option type in the **Rule Engine (C1\_RLENG)** feature configuration is set to **True**. This log indicates the rules that were executed for each transaction and whether each rule passed or failed during the execution.

**Note:**

You can aggregate transaction legs in a billable charge using aggregation parameters other than account ID, price item code, variance or price item parameters, aggregation start date, and aggregation end date. The additional aggregation parameters can be stamped in the form of aggregation parameter group ID while performing post-processing activities for each transaction leg. This aggregation parameter group ID will be used in subsequent batches during the transaction aggregation cycle. If you want to perform some post-processing activities on the transaction legs, you need to attach a post-processing algorithm on the **TFM - Price Item Derivation Post-Processing** algorithm entity in the **Algorithms** tab of the **Division** screen. Note that the system invokes the algorithm which is attached on the division to which the transaction belongs. This algorithm is triggered only for transactions which are in the **Initial Price Item Determined (INPD)** status. It is triggered before the price item parameter group is created.

A sample post-processing algorithm type named **C1\_PRDR\_POPC** is shipped with the price item. It does not have any business logic. If you want to undertake some post-processing activities for a transaction leg, you need to create custom algorithm type and attach the respective algorithm on the **TFM - Price Item Derivation Post-Processing** algorithm spot of the respective division. You can refer to the **C1\_PRDR\_POPC** algorithm type to understand the input parameters that must be passed to the custom algorithm type.

Once the **Validate Transaction and Derive Price Item (C1-TXNIP)** batch is executed, the processing date is stamped against each transaction leg in the database. If a custom processing date is specified for a particular account and price item combination, the custom processing date is stamped against the respective transaction leg. Otherwise, the processing date defined for the division to which a transaction belongs is stamped against the legs of the respective transaction. The processing date which is stamped against a transaction leg in the database is used while executing all subsequent batches in the transaction aggregation cycle.

How to define a rule	<a href="#">Defining a Rule</a> on page 781

**Price Item Pricing Verification**

In this process, the system behaves in the following manner:

If the Multi Parameter Based Pricing feature is...	Then...
Disabled	<p>The system checks whether effective pricing is available for the account, price item or regular bundle (to which the price item belongs) or parent (regular) bundle (to which the regular bundle belongs) and/or TOU combination on the processing date. The system searches for the price item, regular bundle or parent bundle pricing depending on the value defined for the <b>Prefer Price Item Over Bundle</b> parameter in the price assignment search algorithm (which is defined for the division to which the account belongs).</p> <p>If the price item belongs to a regular bundle and the effective pricing is available for the regular bundle at the account level, the system considers the regular bundle as the final price item and maps it to the transaction leg. If the effective pricing is not available for the regular bundle, the system checks whether the effective pricing is available for the parent bundle (if assigned) at the account level. If the effective pricing is available for the parent bundle, the system considers the parent bundle as the final price item and maps it to the transaction leg. If the effective pricing is not available for the price item, regular bundle, or parent bundle, the status of the transaction leg is changed to <b>Error (EROR)</b>. If the effective pricing is not available for one or more price items to which a transaction is mapped, the status of the transaction is also changed to <b>Error (EROR)</b>.</p>
Enabled	<p>The system checks whether effective pricing is available for the account, price item or regular bundle (to which the price item belongs) or parent (regular) bundle (to which the regular bundle belongs) and/or price item parameters (parameter group) combination on the processing date. The system searches for the price item, regular bundle or parent bundle pricing depending on the value defined for the <b>Prefer Price Item Over Bundle</b> parameter in the price assignment search algorithm (which is defined for the division to which the account belongs).</p> <p>The system searches for a price with exact match at all levels defined in the search order. If the exact match is available at two or more levels, the price assignment at the higher precedence level is considered for calculating the charges. But, if the system does not find the exact match at any level, it searches for the best fit match at all levels. For more information about best fit match, see <a href="#">Multi Parameter Based Pricing</a> on page 273. If the system finds the best fit match with same weight at multiple levels, the price assignment at the higher precedence level is considered for calculating the charges.</p> <p>If the price item belongs to a regular bundle and the exact or best fit price is available for the regular bundle at the account level, the system considers the regular bundle as the final price item and maps it to the transaction leg. If the exact or best fit price is not available for the regular bundle, the system checks whether the exact or best fit price is available for the parent bundle (if assigned) at the account level. If the exact or best fit price is available for the parent bundle, the system considers the parent bundle as the final price item and maps it to the transaction leg. If the exact or best fit price is not available for the price item, regular bundle, or parent bundle, the status of the transaction leg is changed to <b>Error (EROR)</b>. If the exact or best fit price is not available for one or more price items to which a transaction is mapped, the status of the transaction is also changed to <b>Error (EROR)</b>.</p>

**Note:**

The processing date which is stamped against a transaction leg is used to determine effective pricing for the transaction leg.

The order in which the system searches effective pricing for the price item, regular bundle, or parent (regular) bundle at the same level depends on the value defined for the **Prefer Price Item Over Bundle** parameter in the price assignment search algorithm. If the value of the **Prefer Price Item Over Bundle** parameter is set to **Y**, the system first searches whether effective pricing is available for the price item. If the effective pricing is not available for the price item, then the system searches whether effective pricing is available for the regular bundle at the same level. If the effective pricing is not available for the regular bundle, then the system searches whether effective pricing is available for the parent bundle at the same level. However, if the value of the **Prefer Price Item Over Bundle** parameter is set to **N**, the system first searches whether effective pricing is available for the parent bundle. If the effective pricing is not available for the parent bundle, then the system searches whether effective pricing is available for the regular bundle at the same level. If the effective pricing is not available for the regular bundle, then the system searches whether effective pricing is available for the price item at the same level.

In addition, the status of the transaction and transaction leg is changed to **Error (EROR)** when:

- There is no contract available with the specified contract type on the transaction date or when the contract is inactive.
- There are multiple effective contracts of the same contract type (available on the transaction date) in **Active**, **Pending Stop**, or **Stop** status.
- The **Price Assignment Search** algorithm is not defined for the division.
- The parameter values are either not defined or invalid in the **Price Assignment Search** algorithm on the processing date.
- The period in which the transaction date falls is not defined in the aggregation schedule.

Once the effective pricing is determined for the initial or final price item, the values of the following pricing attributes are retrieved:

- Ignore Transaction
- Aggregate Transaction
- Aggregation Schedule
- Rating Criteria
- Price Assignment ID
- Account ID (in case of account agreed and price list pricing)
- Person ID (in case of customer agreed and price list pricing)
- Price List ID (in case of price list pricing)
- Contract ID
- Regular Bundle Code
- Pricing Currency

In addition, the system invokes the algorithms attached to the following algorithm spots of the derived account's division in the specified sequence for the self-funded health care business:

1. **TFM - Contract Derivation** - You can attach an algorithm created using the **SA\_DERV\_POPC** algorithm type to this algorithm spot. If the account has multiple active contracts of the contract type which is associated with the price item, this algorithm derives the contract which is associated with the policy and maps it to the transaction leg. The manner in which the system derives the active contract for the account differs in the following scenarios:

<b>If the effective pricing rule stamped against the transaction leg is defined at ...</b>	<b>Then...</b>
The bill group level	The system first fetches the policy derived for the transaction and then derives the active contract which is associated with the policy.
The parent customer level	The system first fetches the bill group to which the account belongs and then the policy where the bill group is associated with the policy using the policy person role which is specified in the <b>Bill Group Policy Person Role</b> option type of the <b>C1-ASOBLLNG</b> feature configuration. Once the policy is derived, the system derives the active contract which is associated with the policy.

2. **TFM - Verify Pricing Post-Processing** - You can attach an algorithm created using the **C1-VRPR\_POPC** algorithm type to this algorithm spot. This algorithm removes the price assignment ID and price item parameter group ID from the summary ID column of each transaction leg.

You can execute this process through a multi-threaded batch named **Price Item Pricing Verification (C1-TXNVP)**. You can specify either of the following parameters while executing this batch:

<b>Parameter Name</b>	<b>Description</b>	<b>Mandatory (Yes or No)</b>
Transaction Header ID	Used when you want to find the price item pricing for transactions which are received in a particular transaction feed.	No
Transaction Source	Used when you want to find the price item pricing for transactions which are received from a particular transaction source.	No
Division	Used when you want to find the price item pricing for transactions belonging to a particular division.	No
Chunk Size	Used to specify the number of transactions you want to execute in each work unit.	Yes
Thread Pool Name	Used to specify the thread pool on which you want to execute the batch.	No

Note that the **Price Item Pricing Verification (C1-TXNVP)** batch does not change the status of the transaction and its legs. You need to execute the **Update Status (C1-TXNEX)** batch to update the status of the transaction and its legs. Besides updating the status, the **Update Status (C1-TXNEX)** batch determines the rate for transaction legs whose effective pricing has either of the following set of attributes:

- **Ignore Transaction** is set to **Yes** and **Rating Criteria** is set to **Rate Transactions (RITX)**
- **Ignore Transaction** is set to **No**, **Aggregate Transaction** is set to **Yes**, and **Rating Criteria** is set to **Rate individual transactions and aggregate calc lines across transactions (RITA)**

Each set of pricing attributes indicates how the transaction legs must be rated before billing. For more information about the different ways in which a transaction leg can be rated, see [Transaction Rating Before Billing](#) on page 848.

You can specify either of the following parameters while executing this batch:

<b>Parameter Name</b>	<b>Description</b>	<b>Mandatory (Yes or No)</b>
Transaction Header ID	Used when you want to change the status of transactions which are received in a particular transaction feed.	No

Parameter Name	Description	Mandatory (Yes or No)
Transaction Source	Used when you want to change the status of transactions which are received from a particular transaction source.	No
Division	Used when you want to change the status of transactions belonging to a particular division.	No
Shuffle Work Unit	Used to indicate whether you want to shuffle the work units across threads to correct the uneven thread processing time. The valid values are: <ul style="list-style-type: none"> <li>• Y</li> <li>• N</li> </ul> <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"><b>Note:</b> By default, the parameter value is set to N.</div>	No
Chunk Size	Used to specify the number of transactions you want to execute in each work unit.	Yes
Maximum Batch Count	Used to specify the maximum number of transactions after which the data must be transferred to the database.	Yes
Thread Pool Name	Used to specify the thread pool on which you want to execute the batch.	No

**Note:**

You must specify same parameters in the **Product Pricing Verification (C1-TXNVP)** and **Update Status (C1-TXNEX)** batches. Otherwise, erroneous results might occur.

If you want to do some preprocessing activities before invoking the rates engine, you need to attach a preprocessing algorithm on the **TFM - Rate Pre-Processing** algorithm entity in the **Algorithms** tab of the **Division** screen. Note that the system invokes the algorithm which is attached on the derived account's division and not on the division to which the transaction belongs. A sample preprocessing algorithm type named **C1\_RTCL\_PRPC** is shipped with the product. It does not have any business logic. If you want to undertake some preprocessing activities before invoking the rates engine, you need to create custom algorithm type and attach the respective algorithm on the **TFM - Rate Pre-Processing** algorithm spot of the respective division. You can refer to the **C1\_RTCL\_PRPC** algorithm type to understand the input parameters that must be passed to the custom algorithm type.

If a transaction leg is ignored and not considered for billing, the status of the transaction leg is changed to **Ignored (IGNR)**, whereas the status of the transaction remains as **Initial Price Item Determined (INPD)**. However, if all legs of a transaction are ignored and not considered for billing, the status of the transaction and transaction legs is changed to **Ignored (IGNR)**.

You can store the price item pricing information, and thereby improve the **Price Item Pricing Verification (C1-TXNVP)** batch performance. If you set the **Use Materialized Views** option type of the **C1\_FM** feature configuration to **true**, the system will store the product pricing information in the following tables:

- CI\_PRC\_AGRD
- CI\_PRC\_PL
- CI\_PRC\_INH\_PL

But, if you set the **Use Materialized Views** option type of the **C1\_FM** feature configuration to **false**, the system will not store the product pricing information in the above mentioned tables. If there are any pricing changes, you will have to update these tables before executing the **Price Item Pricing Verification (C1-TXNVP)** batch. You can update the product pricing information in these tables by executing the **Refresh Pricing (C1-TXNRP)** batch. Ideally, you must execute the **Refresh Pricing (C1-TXNRP)** batch after you execute the **Flush All Caches (F1-FLUSH)** batch in the

transaction aggregation cycle. You can specify the following parameters while executing the **Refresh Pricing (C1-TXNRP)** batch:

Parameter Name	Description	Mandatory (Yes or No)
Division	Used when you want to update the price item pricing information of accounts belonging to a particular division.	No
Chunk Size	Used to specify the number of persons whose regular and post-processing price item pricing information you want to update in each work unit.	Yes
Thread Pool Name	Used to specify the thread pool on which you want to execute the batch.	No

## Aggregation

Once the price item pricing verification is complete, you can aggregate the transaction legs, create a billable charge, and update the SQI values in the billable charge. In the aggregation process, the system behaves in the following manner:

If the Multi Parameter Based Pricing feature is...	Then...
Disabled	<p>The system checks the value defined in the <b>Aggregate Transaction</b> field. If the <b>Aggregate Transaction</b> field is set to <b>No</b>, the system creates one billable charge (with the <b>Billable</b> status) for each transaction leg. However, if the <b>Aggregate Transaction</b> field is set to <b>Yes</b>, the system creates one billable charge (with the <b>Billable</b> status) for all transactions legs having the same price item and TOU combination and whose transaction date falls between the aggregation schedule.</p> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>During the billable charge creation, the system also considers the contract start and end dates along with the aggregation schedule. If the contract start date falls between the aggregation schedule, the billable charge start date is equal to the contract start date. If the contract start date is earlier than the aggregation schedule start date, the billable charge start date is equal to the aggregation schedule start date. If the contract end date is earlier than the aggregation schedule end date, the billable charge end date is equal to the contract end date. If the contract end date is later than the aggregation schedule end date, the billable charge end date is equal to the aggregation schedule end date. However, if the contract start date is later than the aggregation schedule end date or if the contract end date is earlier than the aggregation schedule start date, the status of the transaction leg is changed to <b>Error (EROR)</b>.</p> <p>If the aggregated billable charge already exists for the account, price item and TOU combination and there is no bill segment associated with the billable charge, the system will update the SQI values in the existing billable charge.</p> </div>

If the Multi Parameter Based Pricing feature is...	Then...
Enabled	<p>The system checks the value defined in the <b>Aggregate Transaction</b> field. If the <b>Aggregate Transaction</b> field is set to <b>No</b>, the system creates one billable charge (with the <b>Billable</b> status) for each transaction leg. However, if the <b>Aggregate Transaction</b> field is set to <b>Yes</b>, the system creates one billable charge (with the <b>Billable</b> status) for all transaction legs having the same price item and price item parameters (parameter group) combination and whose transaction date falls between the aggregation schedule.</p> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>During the billable charge creation, the system also considers the contract start and end dates along with the aggregation schedule. If the contract start date falls between the aggregation schedule, the billable charge start date is equal to the contract start date. If the contract start date is earlier than the aggregation schedule start date, the billable charge start date is equal to the aggregation schedule start date. If the contract end date is earlier than the aggregation schedule end date, the billable charge end date is equal to the contract end date. If the contract end date is later than the aggregation schedule end date, the billable charge end date is equal to the aggregation schedule end date. However, if the contract start date is later than the aggregation schedule end date or if the contract end date is earlier than the aggregation schedule start date, the status of the transaction leg is changed to <b>Error (EROR)</b>.</p> <p>If the aggregated billable charge already exists for the account, price item and price item parameters combination and there is no bill segment associated with the billable charge, the system will update the SQI values in the existing billable charge.</p> </div>

The transaction aggregation is done based on the aggregation schedule defined in the price item pricing. You can use the following standard schedules or you can create your own custom schedules for aggregation:

- Daily
- Weekly
- Monthly
- Quarterly
- Yearly

Once the billable charge is created, the system aggregates the SQIs defined for the price item — division combination using the aggregation function and then updates the billable charge with the respective SQI values. If the aggregation function is based on the transaction amount or on any other user defined amount and the transaction or user defined currency is different from the pricing currency, the system does currency conversion if the appropriate exchange rate is available in the system. The processing date which is stamped against a transaction leg is used to determine effective exchange rate for the transaction leg.

Once the SQI values are updated in the billable charge, the rate is determined for the transaction leg whose effective pricing has either of the following set of attributes:

- **Ignore Transaction** is set to **No**, **Aggregate Transaction** is set to **Yes**, and **Rating Criteria** is set to **Aggregate transactions and then rate aggregated SQs (AGTR)**
- **Ignore Transaction** is set to **No**, **Aggregate Transaction** is set to **No**, and **Rating Criteria** is set to **Rate Transactions (RITX)**

Each set of pricing attributes indicates how the transaction legs must be rated before billing. For more information about the different ways in which a transaction leg can be rated, see [Transaction Rating Before Billing](#) on page 848.

**Note:** If you want to do some preprocessing activities while determining rate, you need to attach a preprocessing algorithm on the **TFM - Rate Pre-Processing** algorithm entity in the **Algorithms** tab of the **Division** screen. Note that the system invokes the algorithm which is attached on the derived account's division and not on the division to which the transaction belongs. A sample preprocessing algorithm type named **C1\_RTCL\_PRPC** is shipped with the price item. It does not have any business logic. If you want to undertake some preprocessing activities while determining rate for transaction legs, you need to create custom algorithm type and attach the respective algorithm on the **TFM - Rate Pre-Processing** algorithm spot of the respective division. You can refer to the **C1\_RTCL\_PRPC** algorithm type to understand the input parameters that must be passed to the custom algorithm type.

In addition, the system invokes the algorithm attached to the following algorithm spot of the derived account's division for the **self-funded health care** business:

- **TFM - Billable Charge Post Processing** - You can attach an algorithm created using the **C1\_BCHG\_POPC** algorithm type to this algorithm spot. This algorithm invokes the algorithm which is attached to the **Bill After Date Determination** system event of the respective pricing rule type. For more information, refer to the [Bill After Date Determination](#) on page 2785 section.

Once the billable charge is created and updated successfully, the status of the transaction leg is changed to **Completed (COMP)**. However, if the SQIs are not defined for the price item — division combination, the transaction aggregation rule is not defined for the SQI, or if the exchange rate is not available during currency conversion, the status of the transaction leg is changed to **Error (EROR)**. If all legs of a transaction are in the **Completed (COMP)** status, the status of the transaction is changed to **Completed (COMP)**. But, if any of the transaction leg is in the **Error (EROR)** status, the status of the transaction is changed to **Error (EROR)**.

You can execute this process through a multi-threaded batch named **Service Quantity Calculation (C1-TXNSQ)**. You can specify either of the following parameters while executing this batch:

Parameter Name	Description	Mandatory (Yes or No)
Transaction Header ID	Used when you want to create the billable charges for transactions which are received in a particular transaction feed.	No
Transaction Source	Used when you want to create the billable charges for transactions which are received from a particular transaction source.	No
Division	Used when you want to create the billable charges for transactions belonging to a particular division.	No
Chunk Size	Used to specify the number of transactions you want to execute in each work unit.	Yes
Maximum Batch Count	Used to specify the maximum number of transactions after which the data must be transferred to the database.	Yes
Thread Pool Name	Used to specify the thread pool on which you want to execute the batch.	No

The **Service Quantity Calculation (C1-TXNSQ)** batch does not change the status of the transaction and its legs. You need to execute the **Mark Completion (C1-TXNCM)** batch to update the status of the transaction and its legs. Besides updating the status, the **Mark Completion (C1-TXNCM)** batch does the following with other legs when billable charge is not created for one or more transaction legs:

<b>Rate for other transaction leg is determined using the following set of pricing attributes...</b>	<b>Then....</b>
<b>Ignore Transaction</b> is set to <b>Yes</b> and <b>Rating Criteria</b> is set to <b>Rate Transactions (RITX)</b>	The corresponding calculation lines of the transaction leg are deleted.
<b>Ignore Transaction</b> is set to <b>No</b> , <b>Aggregate Transaction</b> is set to <b>No</b> , and <b>Rating Criteria</b> is set to <b>Rate Transactions (RITX)</b>	The corresponding billable charge and calculation lines of the transaction leg are deleted.
<b>Ignore Transaction</b> is set to <b>No</b> , <b>Aggregate Transaction</b> is set to <b>Yes</b> , and <b>Rating Criteria</b> is set to <b>Rate individual transactions and aggregate calc lines across transactions (RITA)</b>	The corresponding calculation lines of the transaction leg are deleted.
<b>Ignore Transaction</b> is set to <b>No</b> , <b>Aggregate Transaction</b> is set to <b>Yes</b> , and <b>Rating Criteria</b> is set to <b>Aggregate transactions and then rate aggregated SQs (AGTR)</b>	The corresponding billable charge and calculation lines are not deleted.
<b>Ignore Transaction</b> is set to <b>No</b> , <b>Aggregate Transaction</b> is set to <b>No</b> , and <b>Rating Criteria</b> is set to <b>Do Not Rate Transactions</b>	The corresponding non-aggregated billable charge is deleted.

You can specify either of the following parameters while executing the **Mark Completion (C1-TXNCM)** batch:

<b>Parameter Name</b>	<b>Description</b>	<b>Mandatory (Yes or No)</b>
Transaction Header ID	Used when you want to change the status of transactions which are received in a particular transaction feed.	No
Transaction Source	Used when you want to change the status of transactions which are received from a particular transaction source.	No
Division	Used when you want to change the status of transactions belonging to a particular division.	No
Chunk Size	Used to specify the number of transactions you want to execute in each work unit.	Yes
Maximum Batch Count	Used to specify the maximum number of transactions after which the data must be transferred to the database.	Yes
Thread Pool Name	Used to specify the thread pool on which you want to execute the batch.	No

**Note:**

You must specify same parameters in the **Service Quantity Calculation (C1-TXNSQ)** and **Mark Completion (C1-TXNCM)** batches. Otherwise, erroneous results might occur.

If you want to perform some post-processing activities on a billable charge, you need to attach a post-processing algorithm on the **TFM - Billable Charge Post-Processing** algorithm entity in the **Algorithms** tab of the **Division** screen. This algorithm is triggered once the billable charge is created and SQIs are updated in the billable charge. Note that the system invokes the algorithm which is attached on the derived account's division and not on the division to which the transaction belongs. A sample post-processing algorithm type named **C1\_BCHG\_POPC** is shipped with the product. It does not have any business logic. If you want to undertake some post-processing activities on a billable charge, you need to create custom algorithm type and attach the respective algorithm on the **Feed Management Billable Charge Post-Processing** algorithm spot of the respective division. You can refer to the **C1\_BCHG\_POPC** algorithm type to understand the input parameters that must be passed to the custom algorithm type.

For more information on...	See...
Transaction Leg Status Transition	<a href="#">Transaction Leg Status Transition</a> on page 903

## Clean Up

There might be situations when a transaction is mapped to one or more price items and due to some reasons a billable charge could not be created for one of the price item. And, therefore the status of the transaction is changed to **Error (EROR)**. In such case, you need to either recalculate SQIs in the aggregated billable charge or delete the aggregated billable charge depending on whether the aggregated billable charge includes transaction legs in the **Completed (COMP)** status. You can perform this clean up process through a multi-threaded batch named **Clean Up (C1-TXNCU)**.

When the transaction legs in the **Error (EROR)** and **Completed (COMP)** statuses are aggregated together in a billable charge, the **Clean Up (C1-TXNCU)** batch does the following:

Billable charge contain transaction legs with the following set of pricing attributes...	Then....
<b>Ignore Transaction</b> is set to <b>No</b> , <b>Aggregate Transaction</b> is set to <b>Yes</b> , and <b>Rating Criteria</b> is set to <b>Do Not Rate Transactions</b>	The SQIs are recalculated in the billable charge.
<b>Ignore Transaction</b> is set to <b>No</b> , <b>Aggregate Transaction</b> is set to <b>Yes</b> , and <b>Rating Criteria</b> is set to <b>Aggregate transactions and then rate aggregated SQs (AGTR)</b>	The SQIs are recalculated in the billable charge and the rate is determined for aggregated service quantities. Once the rate is determined, pass through charges are calculated and accumulated accordingly.
<b>Ignore Transaction</b> is set to <b>No</b> , <b>Aggregate Transaction</b> is set to <b>Yes</b> , and <b>Rating Criteria</b> is set to <b>Rate individual transactions and aggregate calc lines across transactions (RITA)</b>	The pass through charges are recalculated and accumulated accordingly.

However, when the transaction legs in the **Error (EROR)** status are only aggregated in a billable charge, the **Clean Up (C1-TXNCU)** batch does the following:

Billable charge contain transaction legs with the following set of pricing attributes...	Then....
<b>Ignore Transaction</b> is set to <b>No</b> , <b>Aggregate Transaction</b> is set to <b>Yes</b> , and <b>Rating Criteria</b> is set to <b>Do Not Rate Transactions</b>	The aggregated billable charge is deleted.
<b>Ignore Transaction</b> is set to <b>No</b> , <b>Aggregate Transaction</b> is set to <b>Yes</b> , and <b>Rating Criteria</b> is set to <b>Aggregate transactions and then rate aggregated SQs (AGTR)</b>	The aggregated billable charge and the corresponding calculation lines are deleted.
<b>Ignore Transaction</b> is set to <b>No</b> , <b>Aggregate Transaction</b> is set to <b>Yes</b> , and <b>Rating Criteria</b> is set to <b>Rate individual transactions and aggregate calc lines across transactions (RITA)</b>	The aggregated billable charge is deleted.

**Note:**

If the aggregation function is based on the transaction amount or on any other user defined amount and the transaction or user defined currency is different from the pricing currency, the system does currency conversion if the appropriate exchange rate is available in the system. The processing date which is stamped against a transaction leg is used to determine effective exchange rate for the transaction leg.

The SQIs in an aggregated billable charge are recalculated only when the **SQ Recalculation Required** option type in the **C1\_FM** feature configuration is set to **Y**. If you set the **SQ Recalculation Required** option type in the **C1\_FM** feature configuration to **N**, the SQIs are not recalculated in an aggregated billable charge. We recommend you to recalculate SQIs in an aggregated billable charge when more than one account bears the charges for a transaction.

If you want to perform some post-processing activities on a billable charge, you need to attach a post-processing algorithm on the **TFM - Billable Charge Post-Processing** algorithm entity in the **Algorithms** tab of the **Division** screen. This algorithm is triggered once the billable charge is created and SQIs are updated in the billable charge. Note that the system invokes the algorithm which is attached on the derived account's division and not on the division to which the transaction belongs. A sample post-processing algorithm type named **C1\_BCHG\_POPC** is shipped with the product. It does not have any business logic. If you want to undertake some post-processing activities on a billable charge, you need to create custom algorithm type and attach the respective algorithm on the **TFM - Billable Charge Post-Processing** algorithm spot of the respective division. You can refer to the **C1\_BCHG\_POPC** algorithm type to understand the input parameters that must be passed to the custom algorithm type.

Besides the transaction aggregation process, the **Clean Up (C1-TXNCU)** batch is also used during the following sub-processes:

- **Cancellation** — During the cancellation process, it deletes non-aggregated billable charges and recalculates SQIs in aggregated billable charges.
- **Disaggregation** — During the disaggregation process, it deletes an aggregated billable charge when all the corresponding transaction legs which were aggregated in the billable charge are deleted during disaggregation.

You can specify either of the following parameters while executing the **Clean Up (C1-TXNCU)** batch:

Parameter Name	Description	Mandatory (Yes or No)
Transaction Header ID	Used when you want to update or delete billable charges created for transactions which are received in a particular transaction feed.  <b>Note:</b> This parameter should not be used during the disaggregation process.	Yes (Conditional)  <b>Note:</b> This parameter is required when you set the request type to <b>CNCL</b> .
Transaction Source	Used when you want to update or delete billable charges created for transactions which are received from a particular transaction source.  <b>Note:</b> This parameter should not be used during the cancellation and disaggregation processes.	No
Division	Used when you want to update or delete billable charges created for transactions belonging to a particular division.  <b>Note:</b> This parameter should not be used during the cancellation process.	No

Parameter Name	Description	Mandatory (Yes or No)
Account ID	Used when you want to update or delete billable charges created for transactions of a particular account.  <b>Note:</b> This parameter should be used only during the disaggregation process.	No
Bill Cycle	Used when you want to update or delete billable charges created for transactions of accounts having a particular bill cycle.  <b>Note:</b> This parameter should be used only during the disaggregation process.	No
Disaggregate Transactions From Date	Used when you want to update or delete billable charges created for transactions which were performed from a particular date onwards.  <b>Note:</b> You must specify the date in the YYYY-MM-DD format. This parameter should be used only during the disaggregation process.	Yes (Conditional)  <b>Note:</b> This parameter is required when you set the request type to <b>DISAGG</b> .
Request Type	Used to indicate the process during which you want to execute the batch. The valid values are: <ul style="list-style-type: none"> <li>• CNCL</li> <li>• EROR</li> <li>• DISAGG</li> </ul>	Yes
Chunk Size	Used to specify the number of transactions you want to execute in each work unit.	Yes
Maximum Batch Count	Used to specify the maximum number of transactions after which the data must be transferred to the database.	Yes
Thread Pool Name	Used to specify the thread pool on which you want to execute the batch.	No

## **Transaction Aggregation Batch Processing**

During the transaction aggregation process, you need to execute the following batches in the specified order:

1. Flush All Caches (F1-FLUSH)
2. Refresh Pricing (C1-TXNRP)
3. Header Validation (C1-TXNHV)

4. Validate Transaction and Derive Price Item (C1-TXNIP)
5. Price Item Pricing Verification (C1-TXNVP)
6. Update Status (C1-TXNEX)
7. Service Quantity Calculation (C1-TXNSQ)
8. Mark Completion (C1-TXNCM)
9. Clean Up (C1-TXNCU) with the **Request Type** parameter set to **EROR**

The **Validate Transaction and Derive Price Item (C1-TXNIP)** batch locks the **CI\_TXN\_DTL\_PRITM\_SUMMARY** table before inserting records to ensure that only unique records are inserted in this table. The locking mechanism results in performance issue when there is no or very little aggregation of transactions. Therefore, we recommend you to use an alternative transaction aggregation process when the aggregation ratio is low. You can enable the alternative transaction aggregation process by setting the **Use C1-TXNPS During Transaction Aggregation** option type in the **C1\_FM** feature configuration to **true**. In this alternative transaction aggregation process, you need to execute the following batches in the specified order:

1. Flush All Caches (F1-FLUSH)
2. Refresh Pricing (C1-TXNRP)
3. Header Validation (C1-TXNHV)
4. Validate Transaction and Derive Price Item (C1-TXNIP)
5. Populate CI\_TXN\_DTL\_PRITM\_SUMMARY Table (C1-TXNPS)
6. Price Item Pricing Verification (C1-TXNVP)
7. Update Status (C1-TXNEX)
8. Service Quantity Calculation (C1-TXNSQ)
9. Mark Completion (C1-TXNCM)
10. Clean Up (C1-TXNCU) with the **Request Type** parameter set to **EROR**

The following figure graphically explains the sequence in which you need to execute the batches during the transaction aggregation process:

**Note:**

You need to remember the following points during the transaction aggregation process:

- Before you start the transaction aggregation process, you need to execute the **Flush All Caches (F1-FLUSH)** batch to clean the cache. This batch has one parameter named **Thread Pool** which allows you to clean cache of a particular thread pool. In case you want to reprocess the error transactions from the earlier cycle, you need to execute the **Rollback (C1-TXNRB)** batch.
- You can store the price item pricing information, and thereby improve the **Price Item Pricing Verification (C1-TXNVP)** batch performance. If you set the **Use Materialized Views** option type of the **C1\_FM** feature configuration to **true**, the system will store the price item pricing information in the following tables:
  - CI\_PRC\_AGRD
  - CI\_PRC\_PL
  - CI\_PRC\_INH\_PL

But, if you set the **Use Materialized Views** option type of the **C1\_FM** feature configuration to **false**, the system will not store the price item pricing information in the above mentioned tables. If there are any pricing changes, you can update the price item pricing information in these tables by executing the **Refresh Pricing (C1-TXNRP)** batch.
