## 2 Introduction:

This document contains detailed guidelines to install Oracle FLEXCUBE Machine Learning framework.

*Note: Please refer Oracle FLEXCUBE Machine Learning User Manual for Model execution and control*

## 3 Application Compatibility:

### 3.1 Oracle FLEXCUBE Universal Banking

Version: 14.4.0.0.0

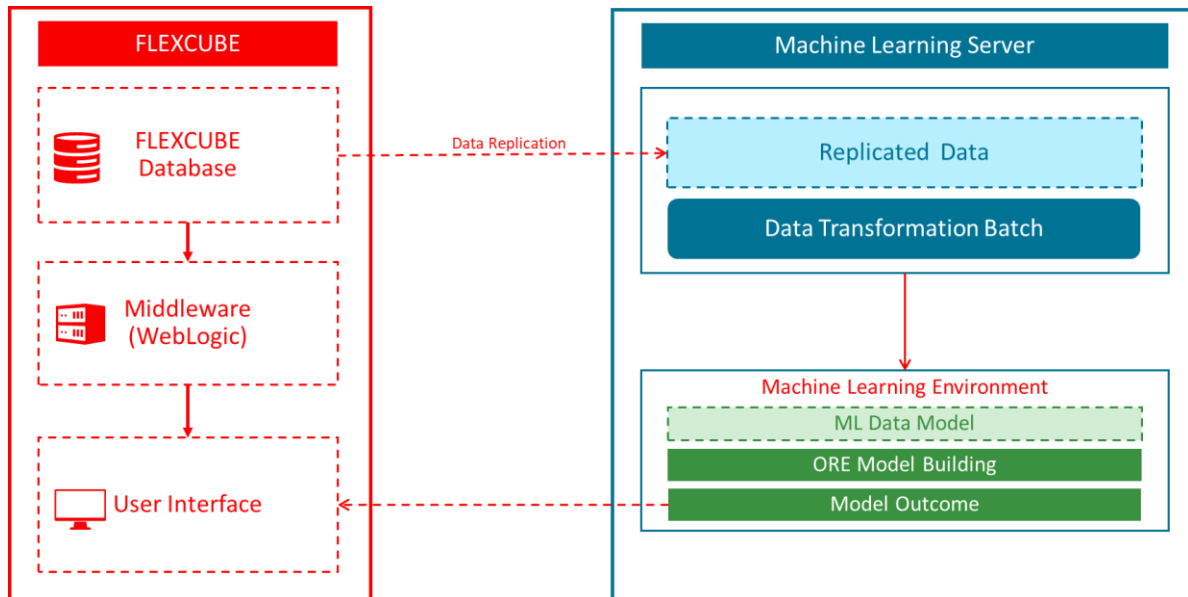

### 3.2 OML4R (Previously Oracle R Enterprise (ORE))

- All the Machine Learning models were built using OML4R (Previously Oracle R Enterprise) 1.5.1
- For installation and setup please refer to the guidelines received with the licensed version of OML4R (Previously Oracle R Enterprise Software).
- Oracle Enterprise Linux server 7.1 (x86 64 bit)

### 3.3 Machine Learning Database

- Oracle Database 19.6c

## 4 Oracle FLEXCUBE Machine Learning Architecture

### Note:

- i. FLEXCUBE database and Machine learning database should be on two different servers
- ii. This is to ensure that the machine learning workload is not on the critical path of banking operations and hog critical server memory

## 5 Pre-Installation Checklist:

### 5.1 FLEXCUBE Database Instance

- FLEXCUBE database instance should be up and available.

### 5.2 Machine Learning Database Instance

**Note:** OML4R (Previously ORE) database **MUST** be a separate instance from Oracle FLEXCUBE Instance. This is to ensure that the machine learning workload is not on the critical path of banking operations and hog critical server memory

Please follow the sequential steps are detailed below.

- 1) Install Oracle Database on the Machine Learning server. Refer to [3.3](#) for compatible database versions.
- 2) OML4R (Previously Oracle R Enterprise) should be installed in Machine Learning database server. Please refer [3.2](#) for compatible OML4R (Previously ORE) version.
- 3) For OML4R (Previously ORE) installation and setup please refer to the guideline received with licensed version.
- 4) R Client needs to be installed to access OML4R (Previously Oracle R Enterprise) server from client machine. R client could be open source R or Oracle R Distribution. Below are the links to install the same.
  - a. Open source R: <https://cran.r-project.org/bin/windows/base/>
  - b. Oracle R Distribution (ORD): <https://oss.oracle.com/ORD/>
- 5) Rstudio IDE can be installed for developer friendly environment. Below is the link to download Rstudio. Download the version based on the operating system in client machine  
<https://www.rstudio.com/products/rstudio/download/#download>
- 6) Set up OML4R (Previously Oracle R Enterprise) client in client machine. Please refer to the guideline received with licensed version.

### 5.3 Data Replication

Data replication from FLEXCUBE to the Machine learning server is outside the purview of this document.

Any data replication software could be deployed to replicate FLEXCUBE data to the Machine Learning database Instance

It is left to the bank/solution team to decide on the data Replication Software including the mode of replication and frequency of replication

**Please ensure FLEXCUBE data is already replicated into the Machine Learning Schema, before proceeding ahead with the Installation**

## 6 Installation Steps:

To proceed with the installation steps first check if all the checkpoints mentioned in section [Pre-Installation Checklist](#) are met. Follow below steps sequentially for the installation.

There will be two binary packages, one for the global function and another one for FCUBS.

#### *Linux Binary Packages:*

1. globalfunction\_0.1.0\_R\_x86\_64-pc-linux-gnu.tar.gz
2. FCUBSML\_0.2.0\_R\_x86\_64-pc-linux-gnu.tar.gz

### 6.1.4.2 Check the user access and environment variables.

Usually those things are already set up while installing OML4R (Previously ORE) in the server  
The user should have the following access rights

- *Has sudo rights access or root access for installing Oracle R Distribution.*
- *Is a member of the dba group for installing and using OML4R (Previously Oracle R Enterprise)*
- *Has write access to \$ORACLE\_HOME/lib.*

The following environment variable should be set up...

- *\$ORACLE\_SID specifies the identifier (SID) of the database.*
- *\$ORACLE\_HOME specifies the home directory of the database.*
- *\$LD\_LIBRARY\_PATH includes \$ORACLE\_HOME/lib.*
- *\$PATH includes \$ORACLE\_HOME/bin*

### 6.1.4.3 Now install the packages in the server by executing following command.

Use sudo command in case current user does not have write access to the OML4R (Previously ORE) library folder

**ORE CMD INSTALL {package name}**

*E.g.*

**ORE CMD INSTALL globalfunction\_0.1.0\_R\_x86\_64-pc-linux-gnu.tar.gz**

**ORE CMD INSTALL FCUBSML\_0.2.0\_R\_x86\_64-pc-linux-gnu.tar.gz**

```
-bash-4.2$ sudo ORE CMD INSTALL globalfunction_0.1.0_R_x86_64-pc-linux-gnu.tar.gz
* installing to library '/scratch/db/db1900/product/19.0.0/dbhome_1/R/library'
