You can access the common document from the OHC Documentation Library:

- [OFS Analytical Applications 8.1.1.0.0 Technology Matrix](#)
- [OFS Data Model Utilities Guide](#)
- [OFS Cash Flow Engine Reference Guide](#)

2 About Insurance Allocation Manager for Enterprise Profitability Application Pack

Oracle Insurance Allocation Manager for Enterprise Profitability Application pack includes Oracle Financial Service Analytical Applications Infrastructure and Oracle Insurance Allocation Manager for Enterprise Profitability applications.

- **Oracle Financial Services Analytical Applications Infrastructure:** In today's turbulent markets, financial institutions require a better understanding of their risk-return, while strengthening competitive advantage, and enhancing long-term customer value.

Oracle Financial Services Analytical Applications (OFSAA) enables financial institutions to measure and meet the risk-adjusted performance objectives, cultivate a risk management culture through transparency, lower the costs of compliance and regulation, and improve insight into customer behavior.

OFSAA uses industry-leading analytical methods, shared data models, and applications architecture to enable integrated risk management, performance management, customer insight, and compliance management. OFSAA actively incorporates risk into decision making, enables to achieve a consistent view of performance, promotes a transparent risk management culture, and provides pervasive intelligence.

OFSAA delivers a comprehensive, integrated suite of financial services analytical applications for both banking and insurance domains.

- **Oracle Insurance Allocation Manager for Enterprise Profitability:** Oracle Insurance Allocation Manager for Enterprise Profitability enables financial services institutions to calculate profitability by-products, channels, segments, and even individual customers. These profitability calculations are adjusted for risk, and they drive Risk-Adjusted Performance Management (RAPM), an imperative for financial services institutions operating in this rapidly evolving and complex industry.

Isolating and analyzing business unit profitability is only the first step in building effective profitability management. To hold operational managers truly accountable for the profitability, senior management must give them the power to identify the products that are profitable in each market segment, for each customer.

Oracle Insurance Allocation Manager for Enterprise Profitability links general ledger, account-level, and statistical data together to produce detailed financial statements for individual business units, products, and customers. Combining powerful modeling and disciplined accounting, Oracle Insurance Allocation Manager for Enterprise Profitability delivers complete, accurate, and inclusive profiles of profitability.

See the subsequent chapters to know more about this release.

3 Insurance Allocation Manager for Enterprise Profitability

This chapter includes the following topics:

- [New Features](#)
- [Bugs Fixed in this Release](#)
- [Known Issues/Limitations in this Release](#)

Raise a Service Request (SR) in [My Oracle Support \(MOS\)](#) for queries related to the OFSAA applications.

Send Us Your Comments

Oracle welcomes your comments and suggestions on the quality and usefulness of this publication. Your input is an important part of the information used for revision.

- Did you find any errors?
- Is the information clearly presented?
- Do you need more information? If so, where?
- Are the examples correct? Do you need more examples?
- What features did you like most about this manual?

If you find any errors or have any other suggestions for improvement, indicate the title and part number of the documentation along with the chapter/section/page number (if available) and contact the Oracle Support.

Before sending us your comments, you might like to ensure that you have the latest version of the document wherein any of your concerns have already been addressed. You can access My Oracle Support site that has all the revised/recently released documents.
