Preface

Oracle Hospitality Simphony Venue Management (SimVen) is a perpetual inventory management solution focused on the needs of stadium, arena, theme park, concert hall, and convention center managers. SimVen provides comprehensive reports that identify ways to reduce labor costs, theft, and spoilage, improve operational efficiencies, and enable the efficient management of nonprofit groups and commissions.

Purpose

These Release Notes provide a brief overview of additions, enhancements, and corrections implemented in this software release. Their intent is informative, not instructional. Review Simphony Venue Management's product documentation, including technical and application advisories for previous versions, for detailed information on installation, upgrade, configuration, and general use.

Audience

This document is intended for all users of Oracle Hospitality Simphony Venue Management.

Customer Support

To contact Oracle Customer Support, access My Oracle Support at the following URL:

https://support.oracle.com

When contacting Customer Support, please provide the following:

• Product version and program/module name
• Functional and technical description of the problem (include business impact)
• Detailed step-by-step instructions to re-create
• Exact error message received and any associated log files
• Screenshots of each step you take

Documentation

Product documentation is available on the Oracle Help Center at

Features and Updates

This section describes the new features and enhancements included in this release.

Crypt Utility UI Update and Adding the CheckPostingDB

In SimVen version 3.12, two radio buttons signifying Simphony and Simphony FE are available in the Crypt Utility Database tab.

- If the user selects the Simphony radio button, they can then add the Check Posting Database to the list of databases.
- If the user selects the Simphony FE radio button, the option to add the Check Posting Database will not appear.

Figure 1 - Crypt Utility Settings
Use CAPS for Sales Totals Option

In SimVen version 3.12, an option titled **Use CAPS for Sales Totals** is available in the Tangent Web Service tab of the System Maintenance window. The display of this option is dependent on the Simphony Version drop down list selection:

- If the user selects **Simphony First Edition**, the option will not display.
- If the user selects **Simphony**, the option will display. The user will then have the choice to mark the check box if they wish to use the CAPS database for Sales Totals or not.
