3. Loans And Finances

Islamic Banking is a Banking system that is based on the principles of sharia (Islamic law) and guided by the Islamic economics. The Shariah Laws provide guidance on each and every aspect of human life, and the laws which govern and guide financial and commercial transactions define Islamic Banking activities.

Islamic Finance is an amount of money that is financed by the bank for a certain period of time. Banks charge profit rate for the amount financed. Hence, Islamic Finance accounts are valuable income generating assets for banks. In order to achieve this, banks are constantly making efforts to enhance the digital banking experience for their customers by introducing and revamping servicing features on the digital platform.

The application provides a platform by which banks are able to offer their users an enriching digital banking experience in servicing their customers.

Users can manage their banking requirements efficiently and effectively through the OBDX self-service channels.
