Client System Requirements

This document covers the client system requirements for Primavera Gateway 20 cloud deployments.

Note: All platforms and technologies certified with a base Gateway version are also supported with the latest patch set for that version (unless specified).

For information on certified platforms for Oracle and other third-party technologies, refer to the certification matrix of the respective technology and select the platform compatible with your Primavera applications and the respective technology.

Oracle has tested on the following configurations and certifies this version to work with these technologies. Customers may choose to use non-certified technologies but do so at their own risk. If any problems are found with non-certified technologies, these may take longer to investigate and resolve by Oracle. Oracle will only test and have access to tested platforms and configurations. In addition, the resolution for any issues with non-tested configurations could be a recommendation that to resolve the issue you will need to use a tested technology. If it is still decided to use a non-certified technology, it is strongly recommended to fully test the product and non-certified platform in a test environment.

For your reference, please refer to the link below for the specific and complete Oracle Support terms and conditions:

What's Changed

Review the table to learn about updates to this document.

Change Record

Date	Change Reference
April 2020	Client and Browser (on page 6) <ul style="list-style-type: none"> ▶ Firefox Quantum 64.0++ is supported on all operating systems.
Feb 2020	Client and Browser (on page 6) <ul style="list-style-type: none"> ▶ Chrome: Support has been updated from 71.x to 78 ▶ Firefox: Support has been updated from 60.4.0 (ESR) + to 68 (ESR) Integration with Primavera Applications (on page 7) <ul style="list-style-type: none"> ▶ Primavera P6 Enterprise Project Portfolio Management (EPPM): Support has been added for 20.x. ▶ Primavera Unifier: Support has been added for 20.x

Client and Browser

This document covers the client system requirements for Primavera Gateway 20 cloud deployments.

Note: Internet Explorer 11 is deprecated for Oracle Construction and Engineering products and may be dropped in a future release.

Version Supported	Client OS / Email Clients	Client OS 32/64 bit	Supported Browsers	Exceptions and Additional Information
Gateway 20	Windows 10	64 bit	Internet Explorer 11.x Firefox 68 (ESR) + Chrome 78 + Microsoft Edge 44.x + Firefox Quantum 64.0++	

Version Supported	Client OS / Email Clients	Client OS 32/64 bit	Supported Browsers	Exceptions and Additional Information
Gateway 20	Windows 10	32 bit	Internet Explorer 11.x Firefox 68 (ESR) + Chrome 78 + Microsoft Edge 44.x + Firefox Quantum 64.0++	
Gateway 20	Mac OS X 10.12 (Sierra)	64 bit	Safari 11.1.x + Firefox 68 (ESR) + Firefox Quantum 64.0+	

Integration with Primavera Applications

This document covers the client system requirements for Primavera Gateway Version 20 cloud deployments.

Version Supported	Product*	Product Version	Exceptions and Additional Information
Gateway Version 20	Primavera P6 Enterprise Project Portfolio Management (EPPM)	20 and 19	
Gateway Version 20	Oracle Primavera Cloud Projects	19	
Gateway Version 20	Oracle Instantis EnterpriseTrack	20 and 19	
Gateway Version 20	Primavera Unifier	20 and 19	

***Product** - Refer to Primavera P6 Enterprise Project Portfolio Management, Primavera Unifier and Oracle Instantis EnterpriseTrack Tested Configurations for more info

Note: Integration through Gateway is tested only with weblogic application server for respective products

Localization

This document covers the client system requirements for Primavera Gateway Version 20 cloud deployments.
