## Brief Description

**Business Process:** 3.1.2.1 C2M.CCB.Select Customers and Manage Marketing Programs

**Process Type:** Process

**Parent Process:** 3.1.2 C2M.CCB.Manage Marketing Programs

**Sibling Processes:**

This process takes place when Utility organization markets various programs and services designed to encourage selected customers to enroll in various sales and marketing initiatives and measures success of efforts. Examples of typical programs include Enrollment to conservation program, sign up for special contract options, setting up marketing surveys.

Process starts when Sales and Marketing Representative selects one or more [Initiatives](#) that designed for specific market and group of customers and activates selected programs. Programs usually target:

- groups of customers selected automatically based on criteria defined by business
- groups of customers identified either manually or by third party application (e.g. reporting application)
- one or more individual Customer/ Account(s) selected by business user

C2M(CCB) generates [Leads](#) for each selected Account. Usually [Lead](#) consists of number of events. Some of the Events trigger communication to customer, such as a letter or an email that are sent to a customer.

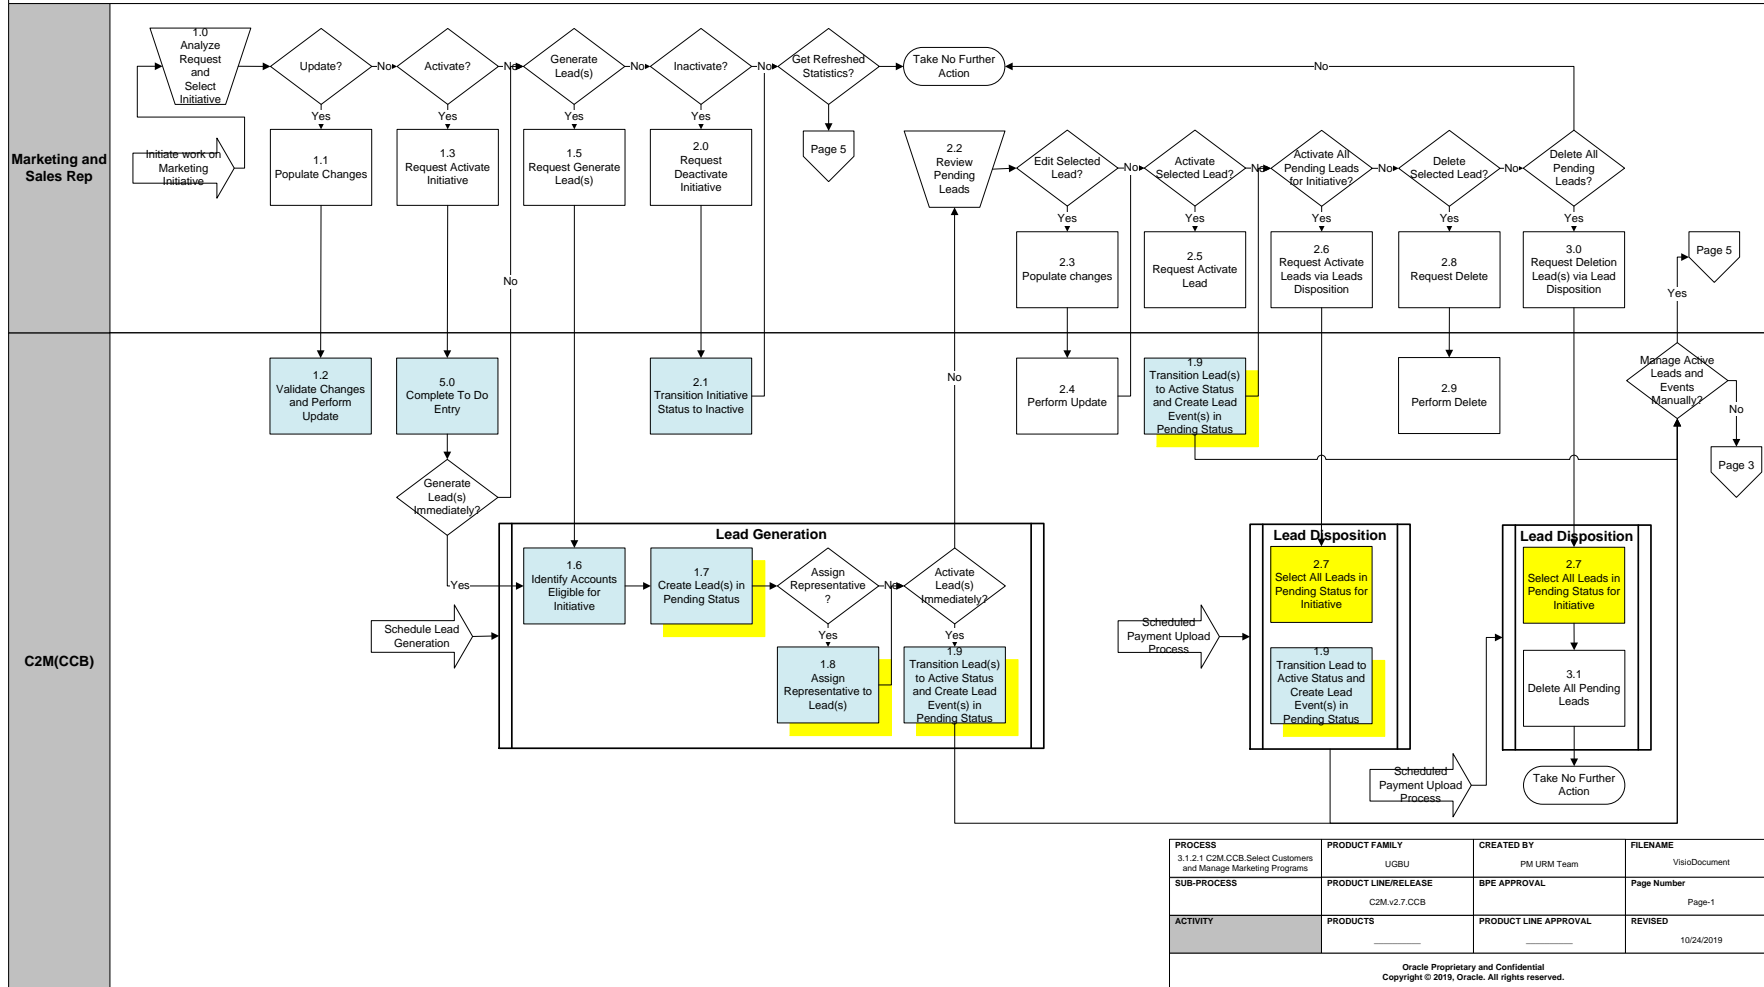

The system considers a Lead as successful if goal program is achieved and C2M(CCB) has the indicator (appropriate data/information is stored) that reflects this achievement. For example, if a rebate claim is filed for a customer with an active lead linked to conservation program Initiative the lead will be considered as successful.

In most of the situations system automatically completes Events and Leads, however Leads and Events could be edited and completed manually by Sales and Marketing Representative or Authorized User as well.

Application allows collecting statistics for Initiative, for groups and/or individual Sales and Marketing Representatives and provides a tool to measure success of efforts.

## Detail Business Process Model Description

### 1.0 Analyze Request and Select Initiative

**Actor/Role:** Marketing and Sales Representative

**Description:**

The Marketing and Sales Representative selects one of the existing [Initiatives](#) that satisfies current business requirements and needs

### 1.1 Populate Changes for an Initiative Update

**Actor/Role:** Marketing and Sales Representative

**Description:**

The Marketing and Sales Representative evaluates existing Initiative and makes necessary changes to the main attributes of an Initiative if it requires any adjustment to address business requirements.

### 1.2 Validate Changes and Perform Update

**Actor/Role:** C2M(CCB)

**Description:**

The system validates any changes made to the Initiative and updates the Initiative record. The system further validates program management initiatives.

**1.3 Request to Activate Initiative****Actor/Role: Marketing and Sales Representative****Description:**

The Marketing and Sales Representative requests activate pending or inactive Initiative.

**1.4 Transition Initiative Active Status and Generate Batch Controls****Actor/Role: C2M(CCB)****Description:**

The system transitions the [Initiative](#) to Active status and attempts to create a lead generation and a lead disposition batch control using the template batch controls.

Note: The template lead generation and a lead disposition batch controls are retrieved from the parent initiative.

**1.5 Request Generate Lead(s)****Actor/Role: Marketing and Sales Representative****Description:**

The Marketing and Sales Representative requests generate predefined large number of Leads for selected initiative by submitting Lead Generation process.

**1.6 Identify Accounts Eligible for Initiative. Group: Lead Generation****Actor/Role: C2M(CCB)****Description:**

This is the first step that takes place when application executes Lead Generation batch process submitted by user or automatically. C2M(CCB) identifies accounts eligible for the Initiative by applying initiative eligibility criteria.

**Note:**

- Templates for lead generation and a lead disposition batch controls are configured in Initiative.

- The initiative's lead generation batch control is constructed by concatenating the initiative code and a number. For example, when an initiative with code SMARTAC is activated, the system creates batch control SMARTAC1 for lead generation and SMARTAC2 for lead disposition.
- Each batch control's description is constructed by concatenating the template batch control's description and the initiative's description.

### **1.7 Create Lead(s) in Pending Status. Group: Lead Generation**

**Actor/Role: C2M(CCB)**

**Description:**

The system creates Leads in Pending status using the Initiative's eligibility criteria. Application also provides information about return customers By generating the Lead in Pending state the system allows the user to verify the targeted customer before actively marketing the Initiative.

**Process Plug-in enabled (Y)      Available Algorithm(s):**

**1.9 Transition Lead(s) to Active Status and Create Lead Events(s) in Pending Status. Group: Lead Generation****Group: Lead Disposition****Actor/Role: C2M(CCB)****Description:**

The Lead is activated and the Initiative is actively marketed to customers. When a lead is transitioned to the Active state, [Lead Events](#) are created to encourage the customer to participate in the Initiative.

Note:

- The number and type of events are defined on the initiative's event template.
- Event trigger date is calculated for each lead event by adding the number of days defined on the initiative's event template to the lead creation date.

### **2.2 Review Pending Leads**

**Actor/Role: Marketing and Sales Representative**

**Description:**

Marketing and Sales Representative reviews pending leads created for the targeted customers before actively market the Initiative.

### **2.3 Populate Changes**

**Actor/Role: Marketing and Sales Representative**

**Description:**

Marketing and Sales Representative updates selected pending Lead(s) if required.

### **2.4 Perform Update Lead**

**Actor/Role: C2M(CCB)**

**Description:**

The system performs required updates.

**Business Object (Y)**

**Business Object:**

### **2.5 Request Activate Lead**

**Actor/Role: Marketing and Sales Representative**

**Description:**

Marketing and Sales Representative requests to activate selected pending Lead(s).

### **2.6 Request Activate Leads via Lead Disposition**

**Actor/Role: Marketing and Sales Representative**

**Description:**

To activate automatically large number of Pending Leads for an Initiative, the Marketing and Sales Representative submits Lead Disposition process

**2.7 Select All Leads in Pending Status for Initiative. Group: Lead Disposition****Actor/Role:** C2M(CCB)**Description:**

This is the first step that takes place when application executes Lead Disposition batch process submitted by user or automatically. C2M(CCB) selects all the pending Leads for the Initiative that should to be either activated or deleted

		C1-Initiative
<b>Customizable process (N)</b>	<b>Process Name</b>	C1-LEADD (Lead Generation batch control)

**3.2 Identify Account. Group: Create Lead for Single Selected Account****Actor/Role:** Marketing and Sales Representative**Description:**

The Marketing and Sales Representative determines if any of the specific accounts that should be part of one of the currently active programs.

**3.3 Select Active Initiative and Populate Required Data. Group: Create Lead for Single Selected Account****Actor/Role:** Marketing and Sales Representative**Description:**

The Marketing and Sales Representative identifies active initiative that represents the program to which customer should participate and populates required details.

<b>Configuration required (Y)</b>	<b>Entities to Configure:</b>	Initiative
		Group Sales Representatives, Individual Sales
		Representatives

**3.4 Request Generate Lead. Group: Create Lead for Single Selected Account****Actor/Role:** Marketing and Sales Representative**Description:**

The Marketing and Sales Representative requests generate [Lead](#) for a targeted account. Lead is created in Pending status.

### **3.5 Request Select Specific Accounts. Group: Create Leads for Group of Preselected Accounts**

**Actor/Role: Marketing and Sales Representative**

**Description:**

Sometimes business process requires identify and add a number of specific target accounts to existing active Initiative. The Marketing and Sales Representative initiates Account selection process.

Accounts could be selected manually or automatically using reporting software.

Note: This process is used to generate leads for small number of accounts

### **3.6 Identify Target Account(s). Group: Create Leads for Group of Preselected Accounts**

**Actor/Role: Reporting Software**

**Description:**

Third party Reporting Software (or any other software) generates a list of selected accounts eligible for specific program represented by active Initiative.

### **3.7 Create File and Place in Source Directory. Group: Create Leads for Group of Preselected Accounts**

**Actor/Role: Reporting Software**

**Description:**

Application creates one or more CSV files containing selected accounts and places them in specified directory.

Note: This process is recommended for processing limited number of pre-selected accounts. It allows forcefully create Leads for any initiative and bypasses the Initiative's eligibility criteria.

Note: CSV file containing pre-selected accounts could be created manually by Marketing and Sales Representative as an exception.

### **3.8 Populate Required Data for Selected Active Initiative. Group: Create Leads for Group of Preselected Accounts**

**Actor/Role: Marketing and Sales Representative**

**Description:**

The Marketing and Sales Representative populates all the required data.

### **3.9 Request Upload and Process File from Source Directory. Group: Create Leads for Group of Preselected Accounts**

**Actor/Role: Marketing and Sales Representative**

**Description:**

Marketing and Sales Representative selects the specific file containing list of accounts and requests to [upload](#) it.

#### **4.0 Validate Account(s) and Existing Leads for Account(s). Group: Create Leads for Group of Preselected Accounts**

**Actor/Role:** C2M(CCB)

**Description:**

Upon CSV file upload, C2M(CCB) validates the accounts from the list and existing leads these accounts.

Note: BPA script *C1-InitvLdUp* (Initiative - Lead Upload) is used for loading accounts via CSV file.

#### **4.1 Generate File Upload Statistics. Group: Create Leads for Group of Preselected Accounts**

**Actor/Role:** C2M(CCB)

**Description:**

The system generates statistics on whether the account was successfully or unsuccessfully uploaded and processed. A summary provides details of the action taken for each account (i.e. how many leads were successfully created, how many leads encountered error and how many accounts were skipped).

#### **4.2 Review Upload Results. Group: Create Leads for Group of Preselected Accounts**

**Actor/Role:** Marketing and Sales Representative

**Description:**

The Marketing and Sales Representative reviews file upload results.

#### **4.3 Evaluate Lead Event Scheduled Complete Date Group: Monitor Event Trigger Date**

**Actor/Role:** C2M(CCB)

An initiative usually defines a structured marketing effort for the events or actions that take place during the life of a lead to encourage a customer to participate in a program. These Lead events have scheduled triggers dates for processing. C2M(CCB) monitors lead event(s) completion dates and triggers event processing when event completion date is reached
