Brief Description

Business Process: 3.3.8 C2M.CCB.Manage Net Energy Metering Service

Process Type: Process

Parent Process:

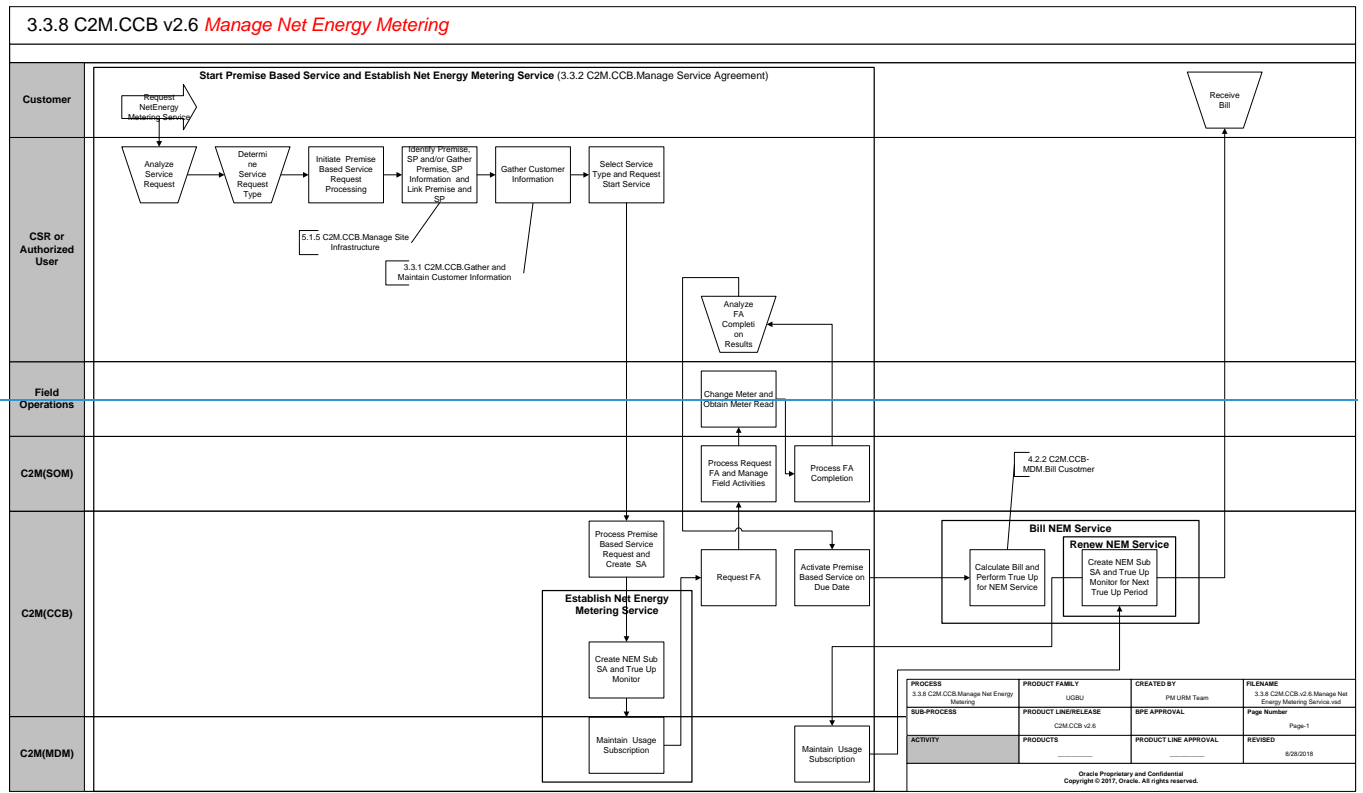

Sibling Processes:

Customers in a distributed generation energy market may have renewable energy devices such as solar panels or wind turbines connected to their meters. The energy generated at this service point, as well as any energy used, could possibly be measured by a single meter, with the energy generated being netted against the energy used. This is called net energy metering (NEM).

This process describes how a Service Agreement for Net Metering services is established and maintained. After the Service is established, the application automatically adjusts the Account at the end of the specified period, called True Up period, and calculates bills for Customers.

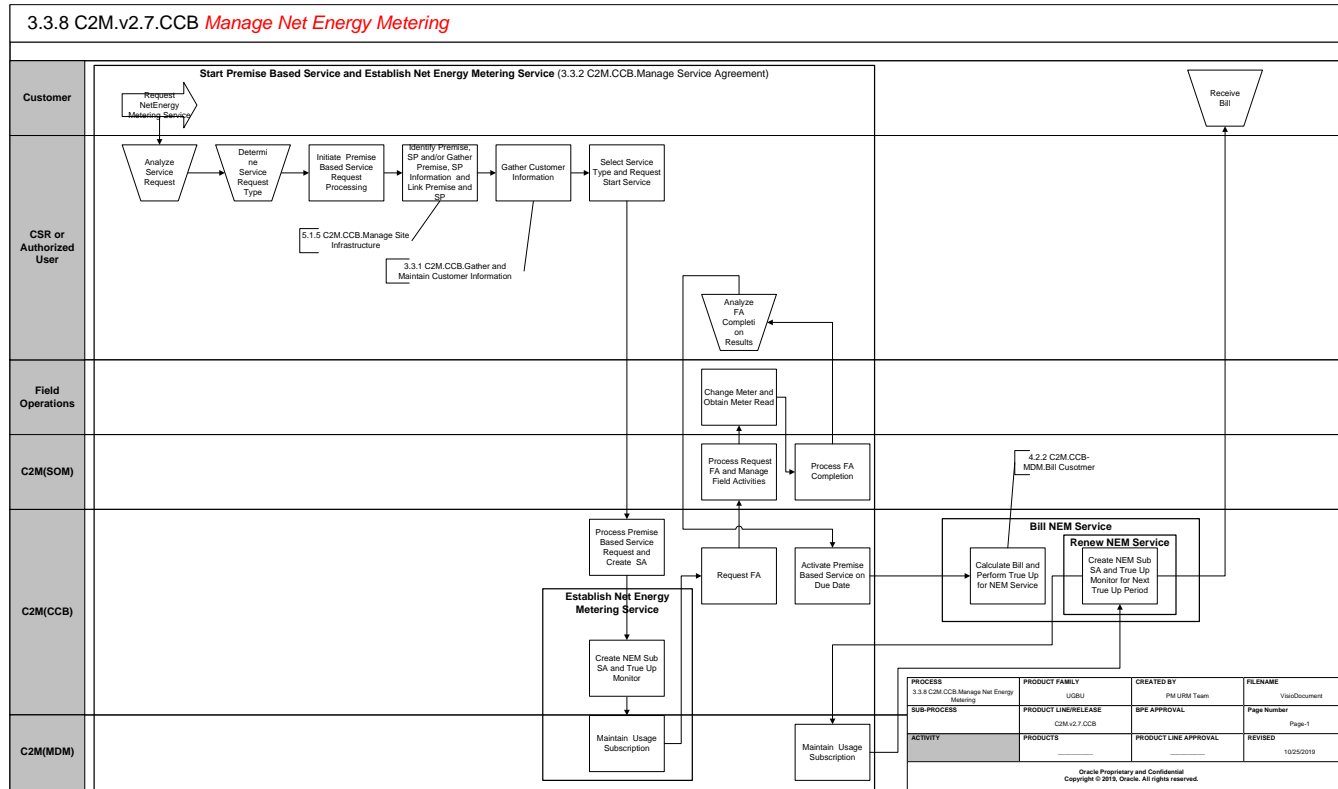

Business Process Model

3.3.8 C2M.v2.7.CCB.v2.6.Manage Net Energy Metering Service

3.3.8 C2M.v2.7.CCB.v2.6.Manage Net Energy Metering Service

3.3.8 C2M.v2.7.CCB.v2.6.Manage Net Energy Metering Service

Field Code Changed
