Brief Description

Business Process: 4.2.1.6 C2M.CCB.Receive External Charges
Process Type: Sub-process
Parent Process: 4.2.1 C2M.CCB.Collect and Process Measurements
Sibling Processes: 4.2.1.7 C2M.CCB.Apply Miscellaneous Charges, 4.2.2.4 C2M.CCB.Manage External and Miscellaneous Charges

The Receive External Charges process takes place if the Utility Company practices receiving charges calculated by third parties and presents them on the customer’s bill along with the utilities own charges. The process is initiated by a Third Party Service Provider by calculating and sending charges to the Utility Company that bills the customer. These charges are called “pass through” and typically include charges for:
- consumption
- miscellaneous service provided to the Customer

The Utility Company receives, uploads, validates received information, creates Billable Charges and stores all the related details. These charges will be included into the Customer’s next bill (see sibling process 4.2.2.4 C2M.CCB.Manage External and Miscellaneous Charges for details) and all the details associated with the Billable Charge received from the Third Party Service Provider (meter reads, consumption, etc.) will be printed on the bill.
4.2.1.6 C2M.v2.7.CCB Receive External Charges . Exception Processing

**Process Exceptions:**
- request to bill for Services or for Consumption

**Third Party Service Provider**

**CSR or Authorized User**

**C2M(CCB)**

**To Do for Billable Charge in Error**
- 2.3 Review BC Staging records Exceptions
- 2.4 Generate To Do

**Update Data and update status of Staging record to Pending**

**Add Billable Charge Staging records in Pending Status**

**2.8**

**Enter Billable Charge Upload Staging Data**

**2.7**

**Apply Miscellaneous Charges**

**Generate To Do**
- 2.4

**2.3**

**2.4**

**Review BC Staging records Exceptions**

**Process Exceptions:**
- request to bill for Services or for Consumption

**To Do**
- 2.5 Investigate and Work To Do

**2.5**

**Review BC Uploaded Errors**

**2.1**

**FlexiSet Update Existing Staging records in Error**

**Yes**

**2.6**

**Enter correct data and mark Staging data as Pending**

**No**

**FlexiSet in Add new Billable Charge**

**Yes**

**Yes**

**Yes**

**2.8**

**2.9**

**Request to add Staging Records for Billable Charge**

**No**

**Take no further action**

**No**

**No**

**No**

**No**

Detail Business Process Model Description

1.0 Send Billable Charge Details
Actor/Role: Third Party Service Provider
Description:
This task is initiated when Third Party Service Provider wants to bill a Customer for a service being provided. The Third Party Service Provider calculates charges for consumption and /or any other type of service provided to the Customer and sends this information to the billing provider. Typically, Billable Charges information may include:
- Pre-calculated bill lines that will be presented “as is” to the customer
- Service quantities that will be used by the billing system to calculate the charges
- Meter read details required to be printed on the bill
- Periodic or one time charges etc.

1.1 Accept External Billable Charge Details
Actor/Role: C2M(CCB)
Description:
The Utility Company who is responsible for billing accepts External Billable Charges sent by Third Party Service Provider. This task is the receipt of the billable charges, from the 3rd party provider, in electronic form.

1.2 Process External Billable Charge records. Group: Populate BC Upload Staging
Actor/Role: C2M(CCB)
Description:
System reads and initially processes External Charges received from a Third Party Service Provider. This task is a part of Populate BC Upload Staging background batch process. Populate BC Upload Staging process is a custom process and it is different for each company.

Customizable process Y Process Name: Populate BC Upload Staging

1.3 Pre-populate Billable Charge in Staging Tables. Group: Populate BC Upload Staging
Actor/Role: C2M(CCB)
Description:
When initial processing is successful, the External Billable Charges and relevant details associated with the Billable Charges are loaded into Billable Charge Upload Staging tables. This task is also part of Populate BC Upload Staging batch process. See 1.2 Process External Billable Charge records for details.
1.4 Link External Billable Charge and Internal Billable Charge SA(s). Group: Validate and Populate BC Upload Staging
Actor/Role: C2M(CCB)
Description:
Customers with “pass through” charges have a separate Service Agreement to hold Billable Charges in C2M(CCB). In this step C2M(CCB) identifies those Billable Charge Service Agreements for each External Billable Charge. This is a first step of Billable Charge Upload 1 - Validate and Populate BC Upload Staging background process.

</tr>
<tr>
<td>SA Relationship Type (Optional)</td>
</tr>
</tbody>
</table>

1.5 Validate Billable Charge Staging Data Group: Validate and Populate BC Upload Staging
Actor/Role: C2M(CCB)
Description:
C2M(CCB) validates Billable Charge data stored in Staging tables.

1.6 Populate Additional BC details into Staging Table(s). Group: Validate and Populate BC Upload Staging
Actor/Role: C2M(CCB)
Description:
C2M(CCB) populates default information stored in C2M(CCB) if not provided by Third Party Service provider.

Configuration required Y

<table>
<thead>
<tr>
<th>Entities to Configure:</th>
</tr>
</thead>
<tbody>
<tr>
<td>SA Type</td>
</tr>
<tr>
<td>Bill Charge Line External Type (Optional)</td>
</tr>
</tbody>
</table>
1.7 Mark Staging Record as Error and Provide Error Information

Group: Validate and Populate BC Upload Staging
Group: Create Billable Charge

Actor/Role: C2M(CCB)
Description:
If any of the Billable Charge Staging Records didn’t pass the validations or cannot be processed C2M(CCB) marks those records as error records (changes the status of the record to “Error”) and stores error details.

1.8 Evaluate Billable Charge Staging Records.

Group: Create Billable Charge

Actor/Role: C2M(CCB)
Description:
C2M(CCB) reviews and evaluates all the newly uploaded and validated Billable Charge records. This is a first step of Billable Charge Upload 2 – Create Billable Charge background process.

Customizable process N
Process Name:

BCU2 Billable Charge Upload 2 – Create Billable Charge

1.9 Verify Possibility to Apply Billable Charge to Customer’s Billable Charge SA.

Group: Create Billable Charge

Actor/Role: C2M(CCB)
Description:
C2M(CCB) verifies status of Customer’s Billable Charge Service Agreement to determine if External Billable Charge can be applied

2.0 Re-activate Billable Charge SA.

Group: Create Billable Charge

Actor/Role: C2M(CCB)
Description:
If Customer’s Billable Charge Service Agreement is closed (charges cannot be applied) C2M(CCB) re-activates it to allow system to apply External Billable Charges.

2.1 Override Billable Charge Lines, Switches and Values.

Group: Create Billable Charge

Actor/Role: C2M(CCB)
Description:
4.2.1.6. C2M.v2.7.CCB. Receive External Charges

C2M(CCB) overrides the values of the various switches referenced on a Billable Charge Upload Staging lines if the Customer’s Service Agreement Type has an override value

**Configuration required Y**  **Entities to Configure:**

<table>
<thead>
<tr>
<th>SA Type</th>
</tr>
</thead>
<tbody>
<tr>
<td>Bill Charge Line External Type (Optional)</td>
</tr>
<tr>
<td>Billable Charge Template</td>
</tr>
</tbody>
</table>

2.2 **Create Billable Charge and Mark Staging Record as Complete. Group: Create Billable Charge**
Actor/Role: C2M(CCB)
Description:

System creates External Billable Charge received from Third Party Service Provider and applies it to Customer’s Service Agreement.

2.3 **Review BC Staging Records exceptions. Group: To Do for Billable Charge in Error**
Actor/Role: C2M(CCB)
Description:

C2M(CCB) reviews all the exception records that were created during Billable Charge Upload (all the Billable Charge Upload Staging records marked as error)

**Customizable process N**  **Process Name:**

| TD-BCUPL To-Do for Billable Charge in Error |

2.4 **Generate To Do. Group: To Do for Billable Charge in Error**
Actor/Role: C2M(CCB)
Description:

System creates a To-Do List Entry for each Billable Charge Upload Staging record in error to view and analyze error messages

2.5 **Investigate and Work To-Do**
Actor/Role: CSR
Description:

CSR or Authorized User views and investigates Billable Charge upload errors.

2.6 **Enter Correct Data and Mark Staging Data as Pending**
Actor/Role: CSR
4.2.1.6. C2M.v2.7.CCB. Receive External Charges

Description:
CSR or Authorized User fixes the problem identified during investigation and enters correct data. CSR or Authorized User also changes status of Billable Charge Upload Staging record to Pending using Billable Charge Upload Staging page. It allows to re-process External Billable Charge Staging data again and attempts to create Billable Charge within C2M(CCB)

2.7 Update Data and Update Status of Staging Records to Pending
Actor/Role: C2M(CCB)
Description:
C2M(CCB) performs required updates.

2.8 Enter Billable Charge Upload Staging Data
Actor/Role: CSR
Description:
Sometimes a CSR or Authorized User identifies a need to create a new Billable Charge. In this case CSR or Authorized User also selects the way to create Billable Charge. If Billable Charge has to be created and applied to Customer’s Service Agreement immediately, a CSR or Authorized User uses the Billable Charge page (see 4.2.1.7 C2M.CCB.Apply Miscellaneous Charges for details). Alternatively, a CSR or Authorized User enters Billable Charge Upload Staging Data using Billable Charge Upload Staging page, that data will then be processed by C2M(CCB) background processes and Billable Charges will be created and applied automatically.

2.9 Request to Add Staging Records for Billable Charges
Actor/Role: CSR
Description:
CSR or Authorized User requests to add a Staging Records for Billable Charge

3.0 Add Billable Charge Staging Records in Pending Status
Actor/Role: C2M(CCB)
Description:
System adds new Staging Records in pending status

3.1 Review Billable Charge Upload Errors
Actor/Role: CSR
Description:
CSR or Authorized User reviews specific errors using Billable Charge Upload Staging page

3.2 Determine Age of Completed BC Staging Records Group: Purge Billable Charge Upload Objects
Actor/Role: C2M(CCB)
4.2.1.6. C2M.v2.7.CCB. Receive External Charges

**Description:**
The first step of C2M(CCB) background process Purge Billable Charge Upload Objects determines age of completed BC staging records.

</thead>
<tbody>
<tr>
<td></td>
<td>BCUP-PRG Purge Billable Charge Upload objects</td>
</tr>
</tbody>
</table>

### 3.3 Purge Billable Charge Upload Objects. Group: Purge Billable Charge Upload Objects
**Actor/Role:** C2M(CCB)
**Description:**
System purges competed Staging records that are older than number of days determined by Company’s business practice and then specified in the batch control parameter “NO-OF-DAYS”.
