This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

If this is software or related documentation that is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, then the following notice is applicable:

U.S. GOVERNMENT END USERS: Oracle programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, delivered to U.S. Government end users are "commercial computer software" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, use, duplication, disclosure, modification, and adaptation of the programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, shall be subject to license terms and license restrictions applicable to the programs. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

Oracle and Java are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

Intel and Intel Xeon are trademarks or registered trademarks of Intel Corporation. All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. AMD, Opteron, the AMD logo, and the AMD Opteron logo are trademarks or registered trademarks of Advanced Micro Devices. UNIX is a registered trademark of The Open Group.

This software or hardware and documentation may provide access to or information about content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services, except as set forth in an applicable agreement between you and Oracle.

Preface

Welcome to the Oracle Utilities Testing Accelerator Release Notes.

The Release Notes describes the new features, enhancements, known issues, and other changes in Oracle Utilities Testing Accelerator v6.0.0.2.

The preface provides the following information:

- [Audience](#)
- [Abbreviations](#)
- [Conventions](#)
- [Related Documents](#)

Audience

This Release Notes is intended for anyone installing or using Oracle Utilities Testing Accelerator v6.0.0.2.

Abbreviations

The following abbreviations are used throughout this document:

Term	Expanded Form
OUTA/UTA	Oracle Utilities Testing Accelerator

Conventions

The following text conventions are used in this document:

Notation	Indicates
boldface	Graphical user interface elements associated with an action, terms defined in text, or terms defines in the glossary
<i>italic</i>	Book titles, emphasis, or placeholder variables for which you supply particular values
monospace	Commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter

Chapter 1

Release Notes

This document provides general information about Oracle Utilities Testing Accelerator v6.0.0.2, including new functionality, known issues, and other important aspects of the product.

Prior to installing this release, it is important that you review all of the release notes and your business processes as they relate to the new enhancements. There may be steps to complete or information to review before accepting the release.

For information about supported platforms and installation, refer to the *Oracle Utilities Testing Accelerator Installation and Administration Guide*.

The document includes the following:

- [Release Overview](#)
- [Supported Oracle Utilities Applications](#)
- [System Requirements](#)
- [New Features](#)
- [Deprecated Features](#)
- [Known Issues](#)

Release Overview

Oracle Utilities Testing Accelerator comprises test automation accelerators for automated testing of the Oracle Utilities applications. For the list of Oracle Utilities applications supported in this release, refer to the [Related Documents](#) section in [Preface](#).

Supported Oracle Utilities Applications

Oracle Utilities Testing Accelerator v6.0.0.2 release supports respective versions that each of the below listed Oracle Utilities product currently supports:

- Oracle Real-Time Scheduler
- Oracle Utilities Mobile Workforce Management
- Oracle Utilities Customer Care and Billing
- Oracle Utilities Customer To Meter
- Oracle Utilities Work and Asset Management
- Oracle Utilities Operational Device Management
- Oracle Utilities Meter Data Management
- Oracle Utilities Smart Grid Gateway

System Requirements

For an updated list of system requirements and supported platforms, refer to the **System Requirements** section in *Oracle Utilities Testing Accelerator Installation and Administration Guide* included in this release.

New Features

This section focuses on the new features implemented in this release. While these notes provide high-level information, refer to the *Oracle Utilities Testing Accelerator Installation and Administration Guide* and *Oracle Utilities Testing Accelerator User's Guide* for comprehensive guidelines.

For more details refer to the *Flow Subroutines and Test Data Sets (Doc ID 2632033.1)* whitepaper on My Oracle Support.

New Users

The new features included in this Oracle Utilities Testing Accelerator release are:

- Ability to call a flow within another flow. This is done by adding the flow to be called as a “subroutine” in the flow.
- Ability to group flows. A flow module can be used to group related flows.
- Support to create test data sets for a given flow (flow test data sets).
- Ability to execute a flow iteratively using different/same flow test data set.
- Ability to view summary report of a flow set execution and email it if needed.
- Ability to create a custom library where users can define their own validation functions used in component/flow validations.
- REST API interface to extract flow/flow set execution analytics.

-
- REST API interface to trigger flows/flow sets.

For detailed information about these new features, refer to the *Oracle Utilities Testing Accelerator User's Guide*.

Existing Users

For information about changes/enhancements, the existing Oracle Utilities Testing Accelerator users can refer to *Oracle Utilities Testing Accelerator Upgrade Guide*.

Deprecated Features

The Language Based Flow Definition feature is deprecated as of this release and will be unavailable in a future release.

Known Issues

This section lists the issues that were found but not resolved in Oracle Utilities Testing Accelerator at the time of release.

Generating Component - Attribute Support

When you generate a component from a WSDL, and if WSDL contains an XML element that has an attribute, the generated component does not reflect this information. You should manually edit the XML element that has the attribute and specify the attribute using the @attribute notation.

Custom Content Upgrade

While upgrading flows as part of the custom content upgrade, if a component of the flow is missing in the target product, a new component is created with no definition. The application does not show it as outdated while displaying the new component. The **Outdated** icon does not appear in the display of the flow. Open the new component and add the definition and the test data before using the upgraded flow.
