1	.3	CREATING SCHEMA FROM SHIPMENT MEDIA	1-1
	1.3.1	1 Backend Setup using Silent Installer	1-1
		2 Basic Setup using GUI Installer	

1. Installing Oracle FLEXCUBE Database

1.1 Introduction

Oracle FLEXCUBE database can be installed in one of the following methods.

- Import full dump Import the Oracle FLEXCUBE objects into an empty schema using full dump. This is a manual activity.
- From shipment media Load the shipment media objects into an empty schema using Installer.

These methods are discussed in detail under the following heads.

1.2 Creating Schema by Importing Full Dump

Under this method, you need to manually import the Oracle FLEXCUBE DMP file into the Oracle FLEXCUBE schema. This can be done using the following command:

\$impdp user_name/password directory=dir_name dumpfile=dmp_file_name.dmp logfile=dmp_file_name.log remap_schema=from_schema_name:to_schema_name remap_tablespace=from_tablespace_name:to_tablespace_name transform=OID:n

1.3 Creating Schema from Shipment Media

Under this method, you need to create the schema from the shipment media.

1.3.1 Backend Setup using Silent Installer

Backend Setup has to be done using Silent Installer. DDL Compilation, Object Compilation and Static Data Load will be taken care as part of Backend Setup.

Before loading objects into the schema, fcubs.properties file creation must be performed with the required database details using the GUI installer (Refer <u>FCUBS Property File Creation.pdf</u>). After the property file is created, env.properties file, present in INSTALLER/SOFT/GUI/logs/ directory, will be automatically updated, with the details provided while creating the property file.

env.properties file present in INSTALLER/SOFT/GUI/logs/ will be automatically copied to INSTALLER/SOFT/logs/ directory as part of property file creation. Details from this env.properties are taken for further steps.

Run the **<Product Processor>**DBCompileRun.bat from INSTALLER/SOFT directory. DDL Compilation, Object Compilation and Static Data load will be done.

For Example: ROFC INSTALLATION-

First load SMS objects first and then ROFC objects. i.e.

a. Run SMSDBCompileRun.bat in windows (SMSDBCompileRun.sh in linux). Note: Before running DB Compilation of any sort, please make sure that System Date Time format and language are provided as English, or otherwise DB Compilation might fail due to improper log names.

b. After SMS object loading is completed, then initiate ROFC compilationRun ROFCDBCompileRun.bat in windows (ROFCDBCompileRun.sh in linux)

<Product Processor>DBCompileRun.bat – PMDBCompileRun.bat (PMDBCompileRun.sh) for Payments, ROFCDBCompileRun.bat (ROFCDBCompileRun.sh) for ROFC, POJOLoadRun.bat (POJOLoadRun.sh) for POJO Compilation and so on.

Check for the Invalid Count and make sure that the Invalid count is '0'. Please run Invalid Recompilation script(fast.sql), if required. Please provide number of threads and schema name as input while running the script.

000	N.
	-7

fast.sql

For Cluster : As part of FCUBS_14.0.0.0.1 patch set Mexico Localization changes are released in cluster mode. So from FCUBS_14.0.0.0.1 patch onwards if any site wants to consume these changes, needs to run the ROFCDBCompileClusterRun.bat in windows(ROFCDBCompileClusterRun.sh in linux).

This is for KERNEL as well as cluster objects in DB schema.

Similarly, FCUBS_14.3.0.2.0 patch set onwards, if any Site wants to consume Italy Cluster changes, then they need to run the ROFCDBCompileClusterRun.bat in windows (ROFCDBCompileClusterRun.sh in linux).

1.3.2 Basic Setup using GUI Installer

The steps to load objects from the shipment media are given below:

1. Double-click 'FCUBSInstaller.bat' batch file to launch Oracle FLEXCUBE Universal Installer. The following screen is displayed. Select Utilities option and click 'Next' button.

🙆 Oracle FLEXCUBE Universa	al Installer	The lotse	_ _ x
Oracle Bankin	ig Installer		ORACLE INSTALLER
Welcome To Oracle Unive	rsal Banking Installer		
Prerequisites			
 Oracle Database JDK should be I 	e should be Installed. Installed.		
Please specify the JDK and	d Oracle Home path.		
JDK Path		Browse	
Oracle Home Path		Browse	
Please select any one of the	he below options:		
	Property File creation		
	Utilities		
Exit Log		Bac	Next

2. Select 'Day Zero Setup' in Utility Screen and click Next as shown below:

Soracle FLEXCUBE Universal Installer	
Oracle Banking Installer	
Select an Utility:	
Day Zero Setup	
O User Creation	
O DSN Entries	
O Entity Details	
○ SMS DSN Entries	
Switch Monitor Installation	
ENV Property file operations	
Exit	Back Next

3. Click 'Next' and in the below screen. ROFC Schema details to be entered is displayed:

Name		
Name	Value	
Username	installer	
Password	•••••	
Service Name	testdb	
P Address	10.10.10	
Port	1521	
TNS Connect Descriptor	testdb	Test Connection
Name	Value	
Username	installer	Same as SMS Schema
Password	•••••	
Service Name	testdb	
P Address	10.10.10	
Port	1521	
TNS Connect Descriptor	testdb	Test Connection

Specify the following schema details:

User Name

Specify the user name to access the schema.

Password

Enter the schema password.

Service Name

Provide service name of database.

IP Address

Specify the IP address of the system where the database schema is installed.

Note: IP Address should be same as mentioned in the TNSnames.ora

Port

Specify the port number.

TNS Connect Descriptor

Specify the TNS Connect Descriptor.

Here Entity Schema is mandatory, atleast minimum one entry should be provided.

Entity Id value is default i.e. 'ENTITY_ID1' for first entry.

Provide the JNDI Name for the ENTITY_ID1. By default the jndi name is 'jdbc/fcjdevDS' Give the Schema Details for the Entity1.

Here Compile In All Entities Field is 'N'. (As using the Single Entity Concept).

4. Click 'Next' and the following screen is displayed:

	EXCUBE Universal Installer				
Basic Seti Parameter	up Details rs of CSTB_PARAM table in the Datab	ase.		_	
S.No.	Param Name	Param value			
1	PW_OUR_STD_CCY_DEFAULT	Y		1	
2	SSN_MASK_FORMAT	ann-an-naaa			
3	TRACK_LIABILITY	Y			
4	PROJFINCMTRATE	INTEREST_RATE		4	
5	ELCM_USER_ID	SYSTEM			
6	STMT_SPOOL_PATH	/home/fcubs/logs			
7	CHUNK_SIZE	Y			
8	PROJFINCMTMARGIN	MARGIN			
9	WORKFLOW_SESSION_TIMEOUT	50			
10	OR_ADMINROLE	OR-SUPERVISOR			
11	NOTIF_LOG	Y			
12	FCIS_INSTALLED	N			
13	PROPOGATION_OF_LOH	N			
14	SMTP_USERID				
15	COMMITMENT_UDE_NAME	INTEREST_RATE			
16	DEFER_LOCAL_LIMITS	Y			
17	PC_OUTFILE_PATH	/home/fcubs/gilog/gi/outgoing/data			
18	ELCM_CCY_REV_LIAB_BR	Y			
19	SPREAD_APPLICATION	В	-		
Exit Log Back Next					

5. Screen displays basic setup details for table 'CSTB_PARAM'.

Here Oracle directory name(present in all_directories table in the schema) must be added for WORK_AREA and TRACE_AREA. Oracle directory name must be added for other required parameters also.

Oracle directory creation in the schema can be done as below :

Create or replace directory dir_name as 'directory_path';

6. Click on 'Next' button to display Limits integration Parameters Screen as shown below:

Soracle FLEXCUBE Universal Installer	
Oracle Banking Installer	
LIMITS INTEGRATION PARAMETERS Parameters of CSTB_PARAM table in the Database. FCUBS PROPERTY FILE LIMITS SETUP MODE LIMITS COMMUNICATION MODE OBCL LIMITS COMMUNICATION MODE	STANDALONE V ASYNCHRONOUS V ASYNCHRONOUS V
Exit Log	Back Next

Limits Integration Parameters will be set based on values read from fcubs.properties file browsed.

In case of ELCM Embedded, Limit Communication mode will be Asynchronous by default. These parameters will be updated in CSTB_PARAM table.

7. Click on 'Next' button .Screen displays parameters for table SMTB_MODULES_GROUP

If any change is required in the JNDI name, edit the same and click on Update.

Note: SMTB_MODULES_GROUP for FCELCM (Oracle ELCM) with the JNDI name '<ENTITY_ID JNDI name>_EL'. For example, if the ENTITY_ID JNDI name is 'jdbc/fcjdevDS', then you need to update JNDI name 'jdbc/fcjdevDS_EL'.

1 ADMINUSER1 •• 2 ADMINUSER2 ••	•••••	Back Next

Screen displays basic setup details for currency, User can change them.

Local Currency Code

Enter Local Currency Code

Local Currency Name

Enter Local Currency Name

Current Fin Cycle

Enter Current Financial Cycle(any year from 2011 to 2050)

Current Fin Period

Enter Current Financial Period(QT1 to QT4,M01 to M12)

ISO Currency Code

Enter ISO Currency Code.

Screen also displays basic setup details for the creating a user in FLEXCUBE.

Creation of 'SYSTEM' user is mandatory for payments processing, it needs to be created as part of static data setup.

External Password

Check this box to specify the external password.

User Name

Displays the user name. Change the user name if required.

Password or LDAP User Name

Specify the password and it is mandatory. You can use the following characters in the password:

- Alphabets in uppercase
- Alphabets in lowercase
- Numerals

You cannot use '_' (underscore) in the password.

10. Click 'Next' and the following screen is displayed:
