1. Preface

1.1 Introduction

This manual is designed to help acquaint you with the integration of Oracle Banking Trade Finance and Oracle FLEXCUBE Document Management System Interface.

1.2 Audience

This manual is intended for the following User/User Roles:

Role	Function
Back office data entry Clerks	Input functions for maintenances
Back office Managers/ Officers	Authorization functions

1.3 Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

1.4 Organization

This manual is organized as follows:

Chapter	Description
Chapter 1	<i>About this Manual</i> gives information on the intended audience. It also lists the various chapters covered in this User Manual.
Chapter 2	<i>Oracle Banking Trade Finance - DMS Integration</i> explains about Oracle IPM which is an external Document Management System with which Oracle Banking Trade Finance integrates for document processes.

1.5 Acronyms and Abbreviations

Abbreviation	Description
DMS	Document Management System
IPM	Imaging and Process Management
OBTf	Oracle Banking Trade Finance

1.6 Organization

This document talks about the required maintenance and further processing of data transfer between Oracle Banking Trade Finance and DMS.

1.7 Glossary of Icons

This User Manual may refer to all or some of the following icons.

Icons	Function
	Exit
	Add row
	Delete row
	Option List

1.8 Related Documents

You can refer to the following documents:

- Procedures User Manual

2. Oracle Banking Trade Finance - DMS Integration

Oracle IPM is an external Document Management System with which Oracle Banking Trade Finance integrates for document processes. Oracle IPM provides image scanning and business process management capabilities for enterprise applications. Oracle IPM is integrated with Oracle Banking Trade Finance to support the existing Oracle FLEXCUBE DMS.

The integration between Oracle Banking Trade Finance and Document Management Systems occurs only in process flows. Therefore, not all modules of Oracle Banking Trade Finance are utilizing the services offered by the integration. The user interface in OBTF makes standard request to the underlying infrastructure and Oracle Banking Trade Finance infrastructure would interact with the DMS and supply the result to user interface in same manner.

This chapter includes the following section:

- [Section 2.1, "Oracle Banking Trade Finance and external DMS"](#)

2.1 **Oracle Banking Trade Finance and external DMS**

This section contains the following topics:

- [Section 2.1.1, "Integrating Oracle Banking Trade Finance with external DMS"](#)
- [Section 2.1.2, "Adding a Document to DMS"](#)
- [Section 2.1.3, "Viewing the Document Indexed in the DMS"](#)
- [Section 2.1.4, "Deleting a Document Indexed in DMS"](#)

2.1.1 **Integrating Oracle Banking Trade Finance with external DMS**

You can integrate Oracle Banking Trade Finance with Oracle IPM. OBTF will intergrate/interact with one DMS provider at a given time and currently it is integrated with Oracle IPM only. Adapters are kind of service provider which provides the operations as per the Oracle Banking Trade Finance infrastructure.

Oracle Banking Trade Finance supports a set of operations that are common to the DMS solutions supported. The set of operations that would be supported by the integration are:

- Add a document to a DMS
- View a document indexed in the DMS
- Delete a document indexed in the DMS

2.1.2 **Adding a Document to DMS**

In this operation you can upload a document to a DMS. The paper documents should be scanned into a digital format, which can be uploaded to the DMS. To upload the digital document, you must choose the file using the browse dialog and click upload button to index the document in the DMS. The DMS would register the document and provide a document ID to identify this document for later usage. This document ID can be used to locate the document, for other operations.

Oracle Banking Trade Finance stores this document ID to maintain a linkage between the documents stored in the DMS, and the documents pertaining to any transaction. Hence, the documents indexed in the DMS by Oracle Banking Trade Finance, can be opened and viewed at a later stage.

If Oracle IPM is the DMS of choice, then the document ID is stored as an attribute of the document.

The ID can be utilized for searching and locating the document via the search features offered by Oracle IPM.

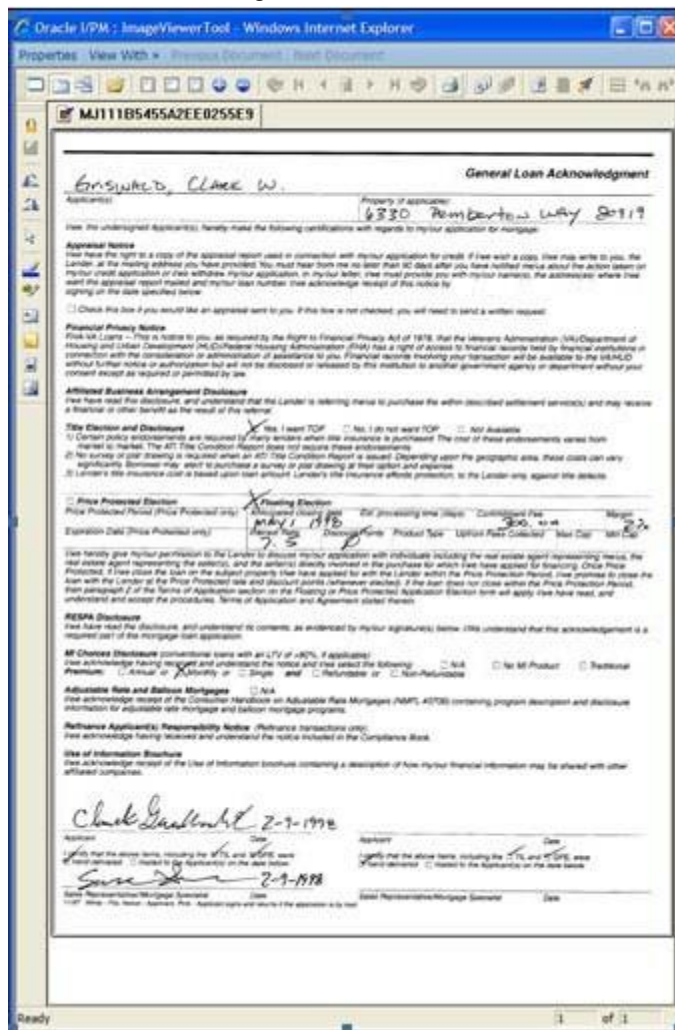

The screenshot shows the 'Contract Details' window in Oracle IPM. It includes a search section with fields for Acknowledgement Reference Number, Product Code (COES), Product Description (EXPORT COLLECT), Contract Reference (000COES171810003), User Reference (000COES171810003), and Source Reference (000COES171810003). On the right, there are tabs for Characteristics, Export, and Documents, with Version Number 3 of 3, Operation COL, Stage Final, and Source Code FLEXCUBE. Below the search section is a 'Document Details' table with columns for Code, Description, First Mail Copy, Second Mail Copy, First Mail Original, Second Mail Original, Reimbursement Bank Copy, Document Reference, and Document Date. The table contains two rows: 'AWB' (AIRWAY BILL) and 'BL' (BILL OF LADING). At the bottom, there is a 'Clause' section with various tabs like Events, Adices/FFT, Settlement, Split Settlement, Collateral, Interest, Charges, Tax, Import License, MIS, Loan Preference, Drawer/Drawee IC, Brokerage, Linkage Details, FX Linkage, Fields, Effective Interest Rate, Interest Dates, Loan Accounts, Charges Transfer, Message Preview, All Messages, Remarks, Common Group Message, and Substitution Bills. The bottom status bar shows Input By U016284, Date Time 2017-07-17 11:13:31, Status Active, Checker U016284, Date Time 2017-07-17 11:13:31, Authorization Status Authorized, and an Exit button.

Code	Description	First Mail Copy	Second Mail Copy	First Mail Original	Second Mail Original	Reimbursement Bank Copy	Document Reference	Document Date
AWB	AIRWAY BILL			1/1	1/1		AWB1	2017-06-29
BL	BILL OF LADING			2/3	1/3		BL2	2017-06-29

2.1.3 Viewing the Document Indexed in the DMS

Oracle Banking Trade Finance allows you to view documents stored in a DMS that are referenced by transactions created in Oracle Banking Trade Finance. To view the document captured in DMS, select the document and click View button.

If Oracle IPM is your DMS, you must login to Oracle IPM and you can view the document in the 'Oracle IPM: ImageViewerTool' screen.

Documents stored in Oracle IPM are viewed via the Oracle IPM Viewer which provides additional functionality to annotate the document.

Note

If Oracle IPM Viewer is not installed on your machine you can use the plain Image Viewer to view the documents.

2.1.4 Deleting a Document Indexed in DMS

Documents stored in the DMS can be deleted from Oracle Banking Trade Finance if the transaction stores the link to the document. To delete the document captured in the DMS, select the document and click 'Delete' button to delete the record from the set of document records.

After the deletion of a document the corresponding Oracle Banking Trade Finance transaction would not have references to the document. If the document does not get deleted from the DMS, the record would still be removed from the Oracle Banking Trade Finance transaction, so that a failure in the DMS would not prevent further transactions.

To delete multiple documents at a time, you have to select the multiple records corresponding to the document and click the delete button. The system displays the message as "The selected documents have been deleted from the Document Manager System."
