Financial Services Advanced Analytical Applications Infrastructure Application Pack v8.1.2.0.0 Maintenance Release #6 (v8.1.2.6.0)

OFS AAI Application Pack v8.1.2.0.0 Maintenance Release #6 8.1.2.6.0 (ID **38681161**) is a cumulative release of all enhancements and bug fixes completed since the v8.1.2.0.0 release.

Note

- Before you apply the OFS AAI 8.1.2.6.0 ML, contact [My Oracle Support](#) to ascertain the compatibility of the OFSAA applications in the OFSAA instance. **If an application is not listed in the Compatibility Matrix or if any dependent application version is listed as TBD in the Compatibility Matrix, contact Support before applying OFS AAI 8.1.2.6.0 ML.**
- For information about the Hardware and Software Requirements for this release, see the [Oracle Financial Services Analytical Applications 8.1.2.0.0 Technology Matrix](#).
- You must plan the tech stack upgrade along with the AAI 8.1.2.6.0. ML upgrade. If the tech stack is not upgraded during the AAI 8.1.2.6.0. ML upgrade, it cannot be upgraded independently afterward and can only be upgraded as part of the next ML upgrade (AAI 8.1.2.7.0).
- In case the OFSAA environment has the ERF suite of applications installed, refer to the Compatibility Matrix of OFSAAI with ERF Applications [KB916541](#) and install the appropriate compatibility patches.
- In case the OFSAA environment has the FCCM suite of applications installed, refer to the Compatibility Matrix of OFSAAI with FCCM Applications [KB916546](#) and install the appropriate compatibility patches.
- **SQL Rule is a deprecated feature from OFS AAI 8.1.2.4.0 ML and is not supported.** For more information, contact Oracle support.
- **Data Entries Forms and Queries is not enabled as part of standard release and is only available in as-is-where-is mode and will not be enhanced, fixed, or updated.** As an alternative, data maintenance is enabled through Data Maintenance Interface (DMI) module. **We strongly recommend to use DMI for data maintenance.**

Additional Licensing Information

To use the **Data Maintenance Interface** feature, Oracle Financial Services Analytical Applications Infrastructure Extension Pack (OFS AAIEP) is required. For more information, refer to [OFS AAIEP Release Notes](#).

Prerequisites

The minimum patch set level should be OFS AAI/AAAI Application Pack v8.1.2.0.0.

Note

Upgrade the OFS AAI Platform on any OFSAA Application Pack.

How to Apply this Release?

For instructions on how to install this OFS AAAI Application Pack release, see the [OFS AAAI Application Pack Installation and Configuration Guide 8.1.2.6.0](#)

New Features and Enhancements

Features and improvements introduced in this release.

The following list provides details for the new features and enhancements in this release. For detailed information on how to use these features, see the [Oracle Financial Services Advanced Analytical Applications Infrastructure v8.1.2.x User Documentation](#).

Technology Stack Updates

- Support for Java 17.
- Support for Oracle WebLogic Server versions 14.1.2.x and 15.1.1, which run on Java 17.
- Support for Tomcat 10.1.x.
- Support for Erwin Data Modeler 15.2.
- Support for Oracle AI Database 26ai Client and Server.
For more information, see [OFSAA Technology Stack Matrices](#).

Administration

- Support for XLSX extension for all Admin reports.
- Comments are now mandatory for authorization and rejection actions in Identity Management.
- Added support for Java Performance Edition, enabling smoother execution of batch processes and improved overall application performance.
- Online Object Migration enhanced to support Oracle Wallet.

Data Maintenance Interface

- Two-factor authentication is configurable.
- Users can now delete records in Ready status for both manual and auto-approved data entry forms.
- Forms designed using DMI Form Designer can be migrated using Object Migration.
- Data View mode is enabled for Excel (Ready records).
- Support for rearranging DMI columns.
- Added configurable data sorting based on key columns.

- Support for auto-incrementing key field values.
- Maker-Checker column can be marked for approval workflows.
- List of Values (LOV) support for columns in Form Designer.

Model Upload

- Model versioning now supports six digits.

Document Management

- Support for REST endpoints in document upload with encrypt and decrypt enabled.
- Support for consistent and configurable API response content type in token authentication API.

Operations

- UX improvement in View Log window in Batch Monitor (increased the display width of the Log File dropdown list).

Process Modelling Framework

- PMF Canvas has an improved UI/UX.
- Provided option to configure and execute F2T in Process Modelling Framework.

Security Management System

- Enabled Maker/Checker process during enable/disable users in User Maintenance screen.
- Enhanced SAML authentication integration to support retrieval and mapping of additional user attributes from Azure Active Directory.
- User Group Code enhanced to support underscore (_).
- User IDs are now sorted in ascending alphanumeric order (A-Z and 0-9) by default on the Enable User and Disabled Users screens.

System Configuration

- Strengthened password validation policy with consistent enforcement across user creation, first-time login, and password change workflows.

Library Upgrade Information
