## **License Restrictions Warranty/Consequential Damages Disclaimer**

This software and related documentation are provided under a license agreement containing restrictions on use and disclosure, and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish, or display any part, in any form, or by any means. Reverse engineering, disassembly, or de-compilation of this software, unless required by law for interoperability, is prohibited.

## **Warranty Disclaimer**

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

## **Restricted Rights Notice**

If this software or related documentation is delivered to the U.S. Government or anyone licensing it on behalf of the U.S. Government, the following notice is applicable:

## **U.S. GOVERNMENT RIGHTS**

Oracle programs, including any operating system, integrated software, any programs installed on the hardware, documentation, and/or technical data delivered to U.S. Government end users are “commercial computer software” or “commercial technical data” pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, use, duplication, disclosure, modification, and adaptation of the programs, including any operating system, integrated software, any programs installed on the hardware, documentation, and/or technical data shall be subject to license terms and restrictions as mentioned in Oracle License Agreement, and to the extent applicable, the additional rights set forth in FAR 52.227-19, Commercial Computer Software--Restricted Rights (June 1987). No other rights are granted to the U.S. Government.

## **Hazardous Applications Notice**

This software is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software in dangerous applications, then you shall be responsible to take all appropriate fail-safe, backup, redundancy, and other measures to ensure the safe use of this software. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software in dangerous applications.

## **Third Party Content, Products, and Services Disclaimer**

This software and documentation may provide access to or information on content, products, and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third party content, products, and services unless otherwise set forth in an applicable agreement between you and Oracle. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third party content, products, or services.

Division - Algorithms.....	852
Division - Characteristics.....	852
Division - Bill Messages.....	853
Division - Party Char Types.....	853
Division - Bill Cycles.....	853
Division - Account Identifier Types.....	854
Division - Price Item Characteristics.....	854
Searching for a Division.....	855
Defining a Division.....	856
Associating an Access Group with a Division.....	859
Associating a Price Item or Price Item Bundle with a Division.....	860
Associating a Price List with a Division.....	862
Associating a Language with a Division.....	863
Associating an Invoice Currency with a Division.....	864

Associating a Person Identifier Type with a Division.....	866
Associating an Algorithm with a Division.....	867
Defining a Characteristic for a Division.....	873
Associating a Bill Message with a Division.....	874
Associating a Party Characteristic Type with a Division.....	876
Associating a Bill Cycle with a Division.....	877
Associating an Account Identifier Type with a Division.....	878
Defining a Division-Specific Characteristic for a Price Item.....	879
Associating a To Do Type and To Do Role with a Division.....	880

## **Chapter 10: Approval Workflow..... 883**

Most Commonly Used Terms.....	885
Approval Workflow Process.....	885
Prerequisites.....	887
Approval Transaction.....	889
Search Approval Transaction.....	889
Approval Transaction Log.....	893
Searching for an Approval Transaction.....	894
Viewing the Log of an Approval Transaction.....	894
Comparison: New versus Existing.....	895
Approving an Approval Transaction.....	895
Rejecting an Approval Transaction.....	896
Canceling an Approval Transaction.....	897
Modifying an Approval Transaction.....	898
Withdrawing an Approval Transaction.....	899
Resolving an Approval Transaction.....	899
Approve Price Assignment.....	900
Search.....	900
List of Price Assignments.....	903
Approve Price Assignment - Comparison: New versus Existing.....	904
Approval Transaction Log.....	906
Approving a Price Assignment for an Account.....	907
Approving a Price Assignment for a Person.....	908
Approving a Price Assignment for a Price List.....	909
Rejecting a Price Assignment for an Account.....	910
Rejecting a Price Assignment for a Person.....	911
Rejecting a Price Assignment for a Price List.....	913
Canceling a Price Assignment for an Account.....	914
Canceling a Price Assignment for a Person.....	915
Canceling a Price Assignment for a Price List.....	917
Modify Price Assignment.....	918
Search.....	918
List of Price Assignments.....	922
Modifying a Price Assignment for an Account.....	923
Modifying a Price Assignment for a Person.....	924
Modifying a Price Assignment for a Price List.....	925
Withdrawing a Price Assignment for an Account.....	925
Withdrawing a Price Assignment for a Person.....	926
Withdrawing a Price Assignment for a Price List.....	927
Viewing the Log of an Approval Transaction.....	928
Resolve Price Assignment.....	929
Search.....	929
List of Price Assignments.....	933
Resolving a Price Assignment for an Account.....	934
Resolving a Price Assignment for a Person.....	935

Resolving a Price Assignment for a Price List.....	936
Withdrawing a Price Assignment for an Account.....	936
Withdrawing a Price Assignment for a Person.....	937
Withdrawing a Price Assignment for a Price List.....	938
Viewing the Log of an Approval Transaction.....	939
Approval Workflow Group (Used for Searching).....	940
Search Approval Workflow Group.....	940
Searching for an Approval Workflow Group.....	941
Viewing the Approval Workflow Group Details.....	942
Defining an Approval Workflow Group.....	942
Adding a Business Object.....	946
Defining a Group BO Relation.....	948
Approval Workflow Group (Used for Viewing).....	949
Approval Workflow Group.....	950
Editing an Approval Workflow Group.....	952
Deleting an Approval Workflow Group.....	952
Editing a Business Object.....	953
Deleting a Business Object.....	955
Editing a Group BO Relation.....	955
Deleting a Group BO Relation.....	957
Approval Workflow Chain (Used for Searching).....	957
Search Approval Workflow Chain.....	957
Searching for an Approval Workflow Chain.....	958
Viewing the Approval Workflow Chain Details.....	959
Defining an Approval Workflow Chain.....	959
Defining Approval Levels for an Approval Workflow Chain.....	960
Approval Workflow Chain (Used for Viewing).....	961
Approval Workflow Chain.....	961
Editing an Approval Workflow Chain.....	962
Deleting an Approval Workflow Chain.....	963
Approval Workflow Criterion Type (Used for Searching).....	964
Search Approval Workflow Criterion Type.....	964
Searching for an Approval Workflow Criterion Type.....	964
Viewing the Approval Workflow Criterion Type Details.....	965
Defining an Approval Workflow Criterion Type.....	965
Approval Workflow Criterion Type (Used for Viewing).....	967
Approval Workflow Criterion Type.....	967
Editing an Approval Workflow Criterion Type.....	968
Deleting an Approval Workflow Criterion Type.....	970
Approval Workflow Group Chain Linkage (Used for Searching).....	970
Search Approval Workflow Group Chain Linkage.....	970
Searching for an Approval Workflow Group Chain Linkage.....	971
Viewing the Approval Workflow Group Chain Linkage Details.....	972
Defining an Approval Workflow Group Chain Linkage.....	972
Defining Group Chain Linkage Criteria for an Approval Workflow.....	974
Defining a Field Approval Rule.....	974
Approval Workflow Group Chain Linkage (Used for Viewing).....	976
Approval Workflow Group Chain Linkage.....	977
Editing an Approval Workflow Group Chain Linkage.....	979
Deleting an Approval Workflow Group Chain Linkage.....	980
Approval Workflow Setting (Used for Searching).....	980
Search Approval Workflow Group.....	980
Searching for an Approval Workflow Group.....	981
Viewing the Approval Workflow Setting Details.....	982
Defining Approval Workflow Group Settings.....	982
Approval Workflow Setting (Used for Viewing).....	984

Approval Workflow Group Settings.....	984
Editing Approval Workflow Group Settings.....	986
Deleting Approval Workflow Group Settings.....	986
Regenerating Input and Display UI Maps.....	987
Approval Workflow Reason (Used for Searching).....	987
Approval Workflow Reason List.....	987
Filtering the Approval Workflow Reasons.....	988
Viewing the Approval Workflow Reason Details.....	989
Defining an Approval Workflow Reason.....	989
Approval Workflow Reason (Used for Viewing).....	990
Approval Workflow Reason.....	990
Editing an Approval Workflow Reason.....	991
Deleting an Approval Workflow Reason.....	992

## **Chapter 11: Rules Engine..... 993**

Rule Type (Used for Searching).....	995
Search Rule Type.....	995
Searching for a Rule Type.....	996
Defining a Rule Type.....	997
Defining Input and Output Parameters for a Rule Type.....	999
Associating a Characteristic Entity with a Rule Type.....	1001
Associating an Algorithm with a Rule Type.....	1002
Editing a Rule Type.....	1003
Deleting a Rule Type.....	1006
Copying a Rule Type.....	1006
Rule Type (Used for Viewing).....	1008
Rule Type.....	1009
Viewing the Rule Type Details.....	1010
Editing a Rule Type.....	1011
Rule.....	1013
Search Rule.....	1013
Searching for a Rule.....	1014
Viewing the Rule Details.....	1015
Defining a Rule.....	1015
Editing a Rule.....	1021
Deleting a Rule.....	1027
Copying a Rule.....	1028
Rule.....	1034
Rule Information.....	1034
Viewing the Rule Details.....	1036
Rule Check.....	1036
Rule Check.....	1038

## **Chapter 12: Alternate Sequential Bill Numbers.....1041**

Alternate Sequential Bill Number Generation Algorithms.....	1042
C1_ALTBLLSYS.....	1042
C1_ALTBLSYS1.....	1042
C1_ALTBLDV.....	1045
C1_ALTBLDIV1.....	1045
Enabling the Alternate Sequential Bill Numbers Feature.....	1048

## **Chapter 13: Transaction Feed Management..... 1051**

Prerequisites.....	1052
--------------------	------

Transaction Rating Before Billing.....	1052
Transaction Aggregation.....	1061
Header Validation.....	1062
Transaction Validation and Initial Price Item Determination.....	1064
Price Item Pricing Verification.....	1075
Aggregation.....	1080
Clean Up.....	1084
Transaction Aggregation Batch Processing.....	1086
Transaction Disaggregation.....	1089
Transaction Disaggregation Batch Processing.....	1096
Reseeding.....	1097
Transaction Cancellation.....	1100
Transaction Cancellation Batch Processing.....	1103
Transaction Rollback.....	1104
Feed Status Transition.....	1106
Transaction Status Transition.....	1107
Transaction Leg Status Transition.....	1108
Transaction Data File.....	1116
Error List.....	1119
Feed Management Dashboard.....	1155
Search - Feed Level.....	1155
Division Level Information.....	1157
Transaction Level Information.....	1158
Transaction Leg Information.....	1159
Transaction Leg Service Quantity.....	1160
Transaction Leg Calculation Lines.....	1160
Transaction Leg Calc Line Characteristics.....	1162
Searching for a Transaction Feed.....	1162
Viewing Division Level Details of a Transaction Feed.....	1163
Viewing Transactions that Belong to a Division.....	1163
Viewing Legs of a Transaction.....	1163
Viewing the SQIs Calculated for a Transaction Leg.....	1164
Viewing the Calculation Lines of a Transaction Leg.....	1165
Viewing Characteristics of a Calculation Line.....	1165
Transaction Details.....	1166
Search.....	1166
Searching for an UPLD Transaction.....	1167
Searching for an INPD Transaction.....	1169
Searching for an COMP Transaction.....	1171
Searching for an CNCL Transaction.....	1173
Searching for an EROR Transaction.....	1175
Searching for an IGNR Transaction.....	1178
Searching for an INVL Transaction.....	1180
Viewing the Transaction Legs.....	1182
Viewing Error Messages.....	1184
Viewing the Transaction Details.....	1185
Adding a Transaction.....	1187
Copying a Transaction.....	1189
Transaction Source.....	1192
Search Transaction Source.....	1192
Searching for a Transaction Source.....	1193
Defining a Transaction Source.....	1193
Editing a Transaction Source.....	1194
Deleting a Transaction Source.....	1195
Copying a Transaction Source.....	1195
Transaction Record Type.....	1196

Search Transaction Record Type.....	1196
Searching for a Transaction Record Type.....	1197
Defining a Transaction Record Type.....	1198
Editing a Transaction Record Type.....	1203
Deleting a Transaction Record Type.....	1209
Copying a Transaction Record Type.....	1210
Transaction Aggregation Rule.....	1215
Transaction Aggregation Rules.....	1215
Defining Transaction Aggregation Rule for an SQL.....	1216
Editing Transaction Aggregation Rule of an SQL.....	1217
Deleting Transaction Aggregation Rule of an SQL.....	1218
Schedule.....	1219
Search Schedule.....	1219
Searching for a Schedule.....	1220
Viewing the Schedule Details.....	1220
Defining a Schedule.....	1221
Editing a Schedule.....	1222
Deleting a Schedule.....	1223
Disaggregation Request.....	1223
Search Disaggregation Request.....	1224
Searching for a Disaggregation Request.....	1227
Creating a Disaggregation Request.....	1228
Deleting a Disaggregation Request.....	1232

## **Chapter 14: Upload Validated Payment Data..... 1235**

Payment Upload Process.....	1236
Upload Payment Records in the Pre-Staging Area.....	1236
Move Payment Records to the Staging Area.....	1237
Create Payment Events and Payments.....	1237
Prerequisites.....	1238
CSV File Format.....	1239
Payment Data File Status Transition.....	1241
Payment Record Status Transition.....	1241
Error Messages.....	1243
Payment Upload.....	1247
Search Payment Data File.....	1248
Payment Data Records.....	1250
Payment Data File Log.....	1251
Searching for a Payment Data File.....	1252
Uploading a Payment Data File.....	1252
Replacing an Existing File.....	1254
Cancelling a Payment Data File.....	1255
Moving the Payment Records to the Staging Area.....	1255
Editing a Payment Staging Record.....	1256
Viewing the Records of a Payment Data File.....	1257
Viewing the Log of a Payment Data File.....	1257
Viewing the Error Messages.....	1258

## **Chapter 15: Freeze Payments on Notification..... 1259**

Freeze Payments on Notification Process.....	1261
Creating Automatic Payments and Refunds.....	1261
Generating a Flat File.....	1261
Uploading Response from Auto Clearing House (ACH).....	1261
Freezing or Canceling Automatic Payments.....	1262

Voiding Refund Requests and Canceling Refund Adjustments.....	1263
Generating To Do Entries.....	1263
Creating Tender Controls.....	1263
Prerequisites.....	1264
Automatic Payment or Refund Clearing Staging Record Status Transition.....	1265
EDI 824 File Format.....	1265
Sample EDI 824 File Format.....	1266
Automatic Payment and Refund Upload Reason.....	1267
Upload Reasons.....	1267
Defining an Upload Reason.....	1268
Editing an Upload Reason.....	1270
Deleting an Upload Reason.....	1272
Automatic Payment and Refund Clearing Staging.....	1272
Search Clearing Record.....	1273
Associated Clearing Staging Records.....	1275
Clearing Staging Upload Reasons.....	1276
Clearing Staging Characteristics.....	1276
Searching for a Clearing Record.....	1277
Viewing the Clearing Staging Records Associated to a Clearing Record.....	1277
Viewing the Upload Reason Specified in the Clearing Staging Record.....	1278
Viewing the Characteristics of the Clearing Staging Record.....	1278
Editing a Clearing Staging Record.....	1279
Defining a Characteristic for a Clearing Staging Record.....	1280
Deleting a Clearing Staging Record.....	1281

## **Chapter 16: Trial Billing.....1283**

Prerequisites.....	1285
Trial Bill (Used for Searching).....	1285
Search Trial Bill .....	1285
Searching for a Trial Bill.....	1287
Viewing the Trial Bill Details.....	1287
Trial Bill (Used for Viewing).....	1288
Trial Bill.....	1288
Trial Bill Segments.....	1290
Trial Bill Segment Calc Lines.....	1291
Trial Bill Segment SQ Details.....	1292
Trial Bill Segment Financial Details.....	1293
Policy Details.....	1293
Printing a Trial Bill in the PDF Format.....	1294
Viewing the Segments of a Trial Bill.....	1294
Filtering the Trial Bill Segments.....	1295
Viewing the Calc Lines of a Trial Bill Segment.....	1295
Viewing the SQ Details of a Trial Bill Segment.....	1296
Viewing the Financial Details of a Trial Bill Segment.....	1296
Viewing the Policy Details of a Trial Bill Segment.....	1297

## **Chapter 17: GL Account Validation..... 1299**

Static GL Account Validation.....	1300
Dynamic GL Account Validation.....	1300

## **Chapter 18: Upload Validated Adjustment Data..... 1301**

Prerequisites.....	1303
CSV File Format.....	1303

Adjustment Upload Request (Without Approval) Status Transition.....	1304
Adjustment Upload Request (With Approval) Status Transition.....	1305
Algorithms Used in C1-ADJUPLD.....	1306
Upload Request Type.....	1309
Upload Request Type List.....	1310
Upload Request Type.....	1311
Defining an Upload Request Type.....	1314
Defining a Characteristic for an Upload Request Type.....	1320
Editing an Upload Request Type.....	1321
Copying an Upload Request Type.....	1324
Mapping an Upload Request Type.....	1328
Deleting an Upload Request Type.....	1329
Viewing the Upload Request Type Details.....	1330
Adjustment Upload Request (Used for Searching).....	1331
Search Adjustment Upload Request.....	1331
Searching for an Adjustment Upload Request.....	1333
Uploading an Adjustment Data File.....	1333
Replacing an Adjustment Data File.....	1336
Viewing the Adjustment Upload Request Details.....	1338
Adjustment Upload Request (Used for Viewing).....	1339
Adjustment Upload Request - Main.....	1339
Adjustment Upload Request.....	1339
Adjustment Data Records.....	1342
Adjustment Upload Request - Log.....	1343
Adjustment Upload Request Log.....	1343
Cancelling an Adjustment Data File.....	1343
Creating Adjustments for an Adjustment Data File.....	1344
Submitting an Adjustment Data File for Approval.....	1345
Approving an Adjustment Data File.....	1346
Rejecting an Adjustment Data File.....	1347
Viewing the Log of an Adjustment Upload Request.....	1348
Adding a Log Entry for an Adjustment Upload Request.....	1349

## **Chapter 19: Payment Request..... 1351**

Prerequisites.....	1353
Payment Request (Without Approval) Status Transition.....	1354
Payment Request (With Approval) Status Transition.....	1355
Algorithms Used in C1-PaymentRequest.....	1356
Algorithms Used in C1-PaymentTransferRequest.....	1360
Payment Request Type.....	1365
Payment Request Type List.....	1365
Payment Request Type.....	1366
Defining a Payment Request Type.....	1368
Defining a Characteristic for a Payment Request Type.....	1371
Editing a Payment Request Type.....	1372
Copying a Payment Request Type.....	1375
Deleting a Payment Request Type.....	1378
Viewing the Payment Request Type Details.....	1379
Payment Request (Used for Searching).....	1379
Search Payment Request.....	1380
Searching for a Payment Request.....	1382
Viewing the Payment Request Details.....	1383
Payment Request (Used for Viewing).....	1384
Payment Request - Main.....	1384
Payment Request.....	1384

Payment Distribution.....	1390
Payment Request - Log.....	1392
Payment Request Log.....	1392
Creating a Payment Creation Request.....	1393
Defining a Characteristic for a Payment Tender.....	1398
Editing the Payment Amount.....	1399
Editing a Payment Request.....	1401
Deleting a Payment Request.....	1404
Distributing the Tender or Payment Amount.....	1405
Distributing and Freezing the Tender or Payment Amount.....	1406
Redistributing the Tender or Payment Amount.....	1407
Editing the Payment Segment Amount.....	1408
Freezing Payments Created Through a Payment Request.....	1410
Submitting a Payment Request for Approval.....	1411
Approving a Payment Request.....	1411
Rejecting a Payment Request.....	1413
Discarding a Payment Request.....	1415
Viewing the Log of a Payment Request.....	1415
Adding a Log Entry for a Payment Request.....	1416
Payment Event Summary.....	1417
Search Payment Event.....	1417
Payments.....	1420
Payment Segments.....	1422
Searching for a Payment Event.....	1422
Creating a Payment Transfer Request.....	1423
Cancelling a Payment Event.....	1427
Deleting a Payment Event.....	1428
Viewing Payments Created Through a Payment Event.....	1428
Cancelling a Payment.....	1429
Deleting a Payment.....	1429
Viewing Payment Segments of a Payment.....	1430

## **Chapter 20: Account Receivable Central..... 1431**

Single Offset.....	1432
Mass Offset.....	1432
Cross Currency Offset.....	1433
Hold.....	1433
Refund.....	1434
Write Off.....	1434
Dispute.....	1434
Account Receivable Central.....	1434
Search Bill .....	1434
Bill Information.....	1438
Offset Details.....	1438
Hold Details.....	1438
Garnishment Details.....	1439
Bill Line Items.....	1439
Searching for a Bill.....	1439
Viewing the Bill Details.....	1440

## **Chapter 21: Offset Request..... 1441**

Single Offset.....	1443
Mass Offset.....	1444
Cross Currency Offset.....	1447

Prerequisites.....	1449
Offset Request (Without Approval) Status Transition.....	1450
Offset Request (With Approval) Status Transition.....	1451
Algorithms Used in C1-OffsetRequest.....	1453
C1-OFFST-INF.....	1454
F1-TODOCOMPL.....	1454
C1-OFFSUBENT.....	1454
C1-OFFAPPENT.....	1454
C1-OFFAPPEXT.....	1455
C1-OFSAPRENT.....	1455
F1-AT-RQJ.....	1455
C1-OFST-DIST.....	1455
C1-UPD-HOLD.....	1456
C1-UPD-FUND.....	1456
C1-DFRUNAPPLY.....	1456
C1-UNAPOFST.....	1457
C1-UPDT-FUND.....	1457
C1-WTBS-CRBL.....	1457
Additional Algorithms Used in Offset Request.....	1457
C1-OFST-AMT.....	1457
C1-WTBS-CRBL.....	1458
Offset Request Type.....	1458
Offset Request Type List.....	1458
Offset Request Type.....	1459
Defining an Offset Request Type.....	1461
Defining a Characteristic for an Offset Request Type.....	1466
Editing an Offset Request Type.....	1467
Deleting an Offset Request Type.....	1472
Copying an Offset Request Type.....	1473
Viewing the Offset Request Type Details.....	1477
Offset Request (Used for Searching).....	1478
Search Offset Request.....	1478
Searching for an Offset Request.....	1481
Creating an Offset Request.....	1482
Viewing the Offset Request Details.....	1484
Offset Request (Used for Viewing).....	1485
Offset Request - Main.....	1485
Offset Request.....	1485
Selected Bills.....	1488
Search Bill.....	1489
Offset Request Adjustments.....	1494
Offset Request - Log.....	1494
Offset Request Log.....	1494
Viewing the Debit and Credit Bills Added to an Offset Request.....	1495
Viewing the Adjustments Created Through an Offset Request.....	1495
Adding a Debit or Credit Bill to an Offset Request.....	1496
Editing an Offset Request.....	1497
Defining a Characteristic for an Offset Request.....	1498
Editing the Offset Amount of a Debit or Credit Bill.....	1500
Removing a Debit or Credit Bill from an Offset Request.....	1501
Deleting an Offset Request.....	1501
Submitting an Offset Request.....	1502
Approving an Offset Request.....	1504
Rejecting an Offset Request.....	1506
Unapplying an Offset Request.....	1508
Viewing the Log of an Offset Request.....	1509

Adding a Log Entry for an Offset Request.....	1509
---	------

## **Chapter 22: Funding Request..... 1511**

Prerequisites.....	1514
Funding Request (Without Approval) Status Transition.....	1514
Funding Request (With Approval) Status Transition.....	1515
Algorithms Used in C1-FundingReq.....	1516
C1-FUNDINFO.....	1517
C1-FUNDSUBMT.....	1517
C1-FUNDAPP.....	1518
C1-FUNDAPRVD.....	1518
F1-TODOCOMPL.....	1518
F1-AT-RQJ.....	1518
C1-FNDRESUBM.....	1519
C1-FUNDVAL.....	1519
C1-FUNDAPAY.....	1519
C1-FUNDADJCR.....	1519
C1-FUNDCANCL.....	1520
Funding Request Type.....	1520
Funding Request Type List.....	1520
Funding Request Type.....	1521
Defining a Funding Request Type.....	1524
Defining a Characteristic for a Funding Request Type.....	1531
Editing a Funding Request Type.....	1532
Deleting a Funding Request Type.....	1539
Copying a Funding Request Type.....	1540
Viewing the Funding Request Type Details.....	1547
Funding Request (Used for Searching).....	1548
Search Funding Request.....	1548
Searching for a Funding Request.....	1551
Creating a Funding Request.....	1552
Viewing the Funding Request Details.....	1552
Funding Request (Used for Viewing).....	1553
Funding Request - Main.....	1553
Funding Request.....	1554
Search Bill.....	1557
Funding Request - Bills.....	1561
Currency Statistics.....	1561
Selected Bills.....	1561
Funding Payment Details.....	1564
Funding Adjustments.....	1565
Funding Request - Log.....	1565
Funding Request Log.....	1565
Adding a Debit or Credit Bill to a Funding Request.....	1566
Deleting a Debit or Credit Bill from a Funding Request.....	1567
Excluding a Bill from a Funding Request.....	1567
Editing a Funding Request.....	1569
Defining a Characteristic for a Funding Request.....	1571
Deleting a Funding Request.....	1572
Cancelling a Funding Request.....	1573
Submitting a Funding Request.....	1574
Approving a Funding Request.....	1576
Rejecting a Funding Request.....	1578
Requesting to Resubmit a Funding Request.....	1580
Withdrawing a Funding Request.....	1581

Transferring the Funding Amount of a Credit Bill to a Garnishment Contract.....	1582
Viewing the Garnishment Details of a Credit Bill.....	1583
Viewing the Payments Created Through a Funding Request.....	1584
Viewing the Adjustments Created Through a Funding Request.....	1585
Viewing the Log of a Funding Request.....	1585
Adding a Log Entry for a Funding Request.....	1586

## **Chapter 23: Refund/Write Off Request..... 1587**

Refund Request (Without Approval) Status Transition.....	1589
Refund Request (With Approval) Status Transition.....	1589
Write Off Request (Without Approval) Status Transition.....	1590
Write Off Request (With Approval) Status Transition.....	1591
Algorithms Used in C1-RefundReq.....	1592
Algorithms Used in C1-WORequest.....	1597
Prerequisites.....	1601
Refund/Write Off Request Type.....	1601
Refund/Write Off Request Type List.....	1605
Refund/Write Off Request Type.....	1606
Defining a Refund or Write Off Request Type.....	1608
Defining a Characteristic for a Refund or Write Off Request Type.....	1611
Editing a Refund or Write Off Request Type.....	1612
Copying a Refund or Write Off Request Type.....	1616
Deleting a Refund or Write Off Request Type.....	1619
Viewing the Refund or Write Off Request Type Details.....	1620
Refund/Write Off Request.....	1621
Search Refund/Write Off Request.....	1621
Searching for a Refund or Write Off Request.....	1625
Creating a Refund Request.....	1626
Creating a Write Off Request.....	1628
Viewing the Refund Request Details.....	1631
Viewing the Write Off Request Details.....	1631
Refund Request.....	1632
Refund Request - Main.....	1633
Refund Request.....	1633
Refund Details.....	1635
Bill Line Items.....	1636
Refund Request - Bills.....	1637
Search Bills.....	1637
Bill Line Items.....	1639
Refund Request - Payments.....	1639
Search Payment Event.....	1640
Payments.....	1641
Refund Request - Log.....	1641
Refund Request Log.....	1642
Creating a Refund Request.....	1642
Defining a Characteristic for a Refund Request.....	1645
Adding a Payment Event to the Refund Request.....	1646
Adding a Payment to the Refund Request.....	1647
Adding a Credit Bill to the Refund Request.....	1648
Adding a Credit Bill Line Item to the Refund Request.....	1649
Editing a Refund Request.....	1650
Editing the Refund Details.....	1652
Deleting a Refund Request.....	1654
Deleting a Bill from the Refund Request.....	1655
Deleting a Bill Line Item from the Refund Request.....	1655

Submitting a Refund Request.....	1656
Approving a Refund Request.....	1658
Rejecting a Refund Request.....	1661
Viewing the Log of a Refund Request.....	1662
Adding a Log Entry for a Refund Request.....	1663
Voiding a Refund Request.....	1664
Write Off Request.....	1665
Write Off Request - Main.....	1666
Write Off Request.....	1666
Write Off Details.....	1668
Bill Line Items.....	1669
Write Off Request - Bills.....	1670
Search Bills.....	1670
Bill Line Items.....	1671
Write Off Request - Log.....	1672
Write Off Request Log.....	1672
Creating a Write Off Request.....	1673
Defining a Characteristic for a Write Off Request.....	1675
Adding a Debit Bill to the Write Off Request.....	1676
Adding a Debit Bill Line Item to the Write Off Request.....	1678
Editing a Write Off Request.....	1679
Editing the Write Off Details.....	1681
Deleting a Write Off Request.....	1683
Deleting a Bill from the Write Off Request.....	1683
Deleting a Bill Line Item from the Write Off Request.....	1684
Submitting a Write Off Request.....	1684
Approving a Write Off Request.....	1686
Rejecting a Write Off Request.....	1688
Viewing the Log of a Write Off Request.....	1689
Adding a Log Entry for a Write Off Request.....	1690
Cancelling a Write Off Request.....	1691

## **Chapter 24: Hold Request..... 1693**

Hold Request (Without Approval) Status Transition.....	1695
Hold Request (With Approval) Status Transition.....	1695
Algorithms Used in C1-HoldRequest.....	1696
Prerequisites.....	1702
Hold Request Type.....	1702
Hold Request Type List.....	1702
Hold Request Type.....	1703
Defining a Hold Request Type.....	1705
Defining a Characteristic for a Hold Request Type.....	1708
Editing a Hold Request Type.....	1709
Deleting a Hold Request Type.....	1711
Copying a Hold Request Type.....	1712
Viewing the Hold Request Type Details.....	1715
Hold Request (Used for Searching).....	1716
Search Hold Request.....	1716
Searching for a Hold Request.....	1719
Creating a Hold Request.....	1720
Viewing the Hold Request Details.....	1725
Hold Request (Used for Viewing).....	1726
Hold Request - Main.....	1726
Hold Request.....	1727
Hold Entities.....	1729

Search Account.....	1730
Search Bill.....	1733
Search Person.....	1734
Hold Request - Log.....	1735
Hold Request Log.....	1735
Searching Persons.....	1736
Searching Accounts.....	1737
Searching Bills.....	1737
Adding Persons in a Hold Request.....	1738
Adding Accounts in a Hold Request.....	1738
Adding Bills in a Hold Request.....	1739
Adding Processes in a Hold Request.....	1739
Defining a Characteristic for a Hold Request.....	1740
Editing a Hold Request.....	1741
Editing Hold Request Entities.....	1743
Deleting Hold Request Entities.....	1745
Deleting a Hold Request.....	1745
Submitting a Hold Request.....	1746
Approving a Hold Request.....	1747
Releasing a Hold Request.....	1748
Rejecting a Hold Request.....	1749
Resubmitting a Hold Request.....	1751
Viewing the Log of a Hold Request.....	1751
Adding a Log Entry for a Hold Request.....	1752

## **Chapter 25: Delinquency Central..... 1755**

Prerequisites.....	1756
Delinquency Central (Used for Viewing).....	1756
Search Overdue Process.....	1756
Overdue Events.....	1761
Searching for an Overdue Process.....	1762
Viewing Events of an Overdue Process.....	1762
Viewing the Overdue Process Details.....	1763
Overdue Process Information for Account: {Account ID}.....	1763
Person Information.....	1764
Account Information.....	1764
Customer Contact Details.....	1764
Promise To Pay.....	1764
Hold Details.....	1765
Overdue Bills.....	1765
Payment Arrangement.....	1766
Search Bill.....	1766
Searching for a Bill.....	1767
Adding the Customer Contact Details.....	1768
Creating a Hold Request for an Overdue Process.....	1768
Creating a Payment Arrangement for an Overdue Process.....	1769
Defining a Promise To Pay for an Overdue Process.....	1769

## **Chapter 26: Upload Request..... 1771**

Upload Request (Without Approval) Status Transition.....	1774
Upload Request (With Approval) Status Transition.....	1775
Prerequisites.....	1776
Algorithms Used in C1-BillCycleUpdateUpdReq.....	1777
Algorithms Used in C1-ContractRiderUpdateUpdReq.....	1782

Algorithms Used in C1-HoldUploadRequest.....	1787
Algorithms Used in C1-RefundUploadRequest.....	1794
Algorithms Used in C1-WriteOffUploadRequest.....	1798
Algorithms Used in C1-BillableChargeUploadRequest.....	1802
Algorithms Used in C1-ReinstatementUploadRequest.....	1806
Algorithms Used in C1-BillGrpSortUploadRequest.....	1812
C1-BLSRTUPLD.....	1813
C1-BLSRTDERV.....	1813
C1-BLSRTVALD.....	1813
F1-AT-RQJ.....	1814
C1-UPLSUBENT.....	1814
C1-DEFERUPLD.....	1814
C1-UPLAPPENT.....	1814
C1-UPLAPPEXT.....	1814
F1-TODOCOMPL.....	1814
C1-BLSRTPROC.....	1815
Algorithms Used in C1-BillLevelUploadRequest.....	1815
C1-BLVUPLDTL.....	1816
C1-BLVLDERIV.....	1816
C1-BLVLVALID.....	1816
F1-AT-RQJ.....	1817
C1-UPLSUBENT.....	1817
C1-DEFERUPLD.....	1817
C1-UPLAPPENT.....	1817
C1-UPLAPPEXT.....	1817
F1-TODOCOMPL.....	1817
C1-BLVLVPRO.....	1817
CSV File Format for Account Bill Cycle Upload Request.....	1818
CSV File Format for Contract Rider Upload Request.....	1818
CSV File Format for Billable Charge Upload.....	1819
CSV File Format for Hold Upload Request.....	1823
CSV File Format for Refund Request Upload.....	1827
CSV File Format for Write Off Request Upload.....	1828
CSV File Format for Reinstatement Upload Request.....	1829
CSV File Format for Bill Group Sorting Upload Request.....	1830
CSV File Format for Bill Group Derivation and Pricing Parameters Upload Request.....	1831
Upload Request Type.....	1833
Upload Request Type List.....	1834
Upload Request Type.....	1835
Defining an Upload Request Type.....	1838
Defining a Characteristic for an Upload Request Type.....	1844
Editing an Upload Request Type.....	1845
Deleting an Upload Request Type.....	1848
Copying an Upload Request Type.....	1849
Mapping an Upload Request Type.....	1853
Viewing the Upload Request Type Details.....	1854
Upload Request (Used for Searching).....	1855
Search Upload Request.....	1855
Searching for an Upload Request.....	1857
Viewing the Upload Request Details.....	1858
Creating an Upload Request.....	1858
Defining a Characteristic for an Upload Request.....	1861
Upload Request (Used for Viewing).....	1862
Upload Request - Main.....	1862
Upload Request.....	1862
Data Records.....	1864

Upload Request - Log.....	1866
Upload Request Log.....	1866
Editing an Upload Request.....	1867
Deleting an Upload Request.....	1868
Validating an Upload Request.....	1868
Cancelling an Upload Request.....	1869
Submitting an Upload Request.....	1870
Approving an Upload Request.....	1874
Rejecting an Upload Request.....	1877
Viewing the Data Record Details.....	1878
Viewing the Log of an Upload Request.....	1879
Adding a Log Entry for an Upload Request.....	1880

## **Chapter 27: General Ledger (GL) Accounting Template..... 1881**

GL Accounting Template (Without Approval) Status Transition.....	1886
GL Accounting Template (With Approval) Status Transition.....	1886
Algorithms Used in C1- GLAT.....	1887
Prerequisites.....	1889
GL Accounting Template (Used for Searching).....	1889
Search GL Accounting Template.....	1890
GL Accounting Template Lines.....	1891
Searching for a GL Accounting Template.....	1892
Creating a GL Accounting Template.....	1892
Viewing the GL Accounting Template Details.....	1894
Viewing the GL Accounting Template Lines Details.....	1895
GL Accounting Template (Used for Viewing).....	1895
GL Accounting Template - Main.....	1895
GL Accounting Template.....	1895
GL Accounting Template - Log.....	1897
GL Accounting Template Log.....	1897
Editing a GL Accounting Template.....	1898
Deleting a GL Accounting Template.....	1899
Submitting a GL Accounting Template.....	1900
Approving a GL Accounting Template.....	1901
Rejecting a GL Accounting Template.....	1902
Deactivating a GL Accounting Template.....	1904
Viewing the Log of a GL Accounting Template.....	1905
Adding a Log Entry for a GL Accounting Template.....	1906

## **Chapter 28: Payment Agreement Request..... 1907**

Payment Agreement Request (Without Approval) Status Transition.....	1910
Payment Agreement Request (With Approval) Status Transition.....	1910
Prerequisites.....	1911
Algorithms Used in C1-PaymentAgreementRequest.....	1912
Payment Agreement Request Type.....	1912
Payment Agreement Request Type List.....	1913
Payment Agreement Request Type.....	1913
Defining a Payment Agreement Request Type.....	1916
Defining a Characteristic for a Payment Agreement Request Type.....	1919
Editing a Payment Agreement Request Type.....	1920
Copying a Payment Agreement Request Type.....	1922
Deleting a Payment Agreement Request Type.....	1924
Viewing the Payment Agreement Request Type Details.....	1925
Payment Agreement Request (Used for Searching).....	1926

Search Payment Agreement Request.....	1926
Bill Details.....	1929
Searching for a Payment Agreement Request.....	1930
Creating a Payment Agreement Request.....	1930
Defining a Characteristic for a Payment Agreement Request.....	1931
Defining Payment Schedule for a Payment Agreement Request.....	1932
Viewing the Bills Added in the Payment Agreement Request.....	1933
Viewing the Payment Agreement Request Details.....	1934
Payment Agreement Request (Used for Viewing).....	1934
Payment Agreement Request - Main.....	1935
Payment Agreement Request.....	1935
Bill Details.....	1937
Payment Schedule.....	1938
Payment Agreement Request - Bills.....	1938
Search Bills.....	1938
Payment Agreement Request - Log.....	1940
Payment Agreement Request Log.....	1940
Editing a Payment Agreement Request.....	1940
Deleting a Payment Agreement Request.....	1943
Submitting a Payment Agreement Request.....	1944
Removing an Overdue Bill from a Payment Agreement Request.....	1945
Approving a Payment Agreement Request.....	1945
Rejecting a Payment Agreement Request.....	1947
Resubmitting a Payment Agreement Request.....	1948
Filtering Overdue Bills of an Account.....	1949
Adding an Overdue Bill in a Payment Agreement Request.....	1950
Viewing the Log of a Payment Agreement Request.....	1951
Adding a Log Entry for a Payment Agreement Request.....	1952

## **Chapter 29: Inbound Message.....1955**

Customer Inbound Message.....	1956
Prerequisites.....	1956
Customer Inbound Message Status Transition through User Interface.....	1957
Customer Inbound Message Status Transition through a Batch Process.....	1958
Algorithms Used in C1-CustomerInboundMessage.....	1959
C1-AT-RQJ.....	1960
F1-AT-RQJ.....	1960
C1-CINMSGVAL.....	1960
C1-CINMSGPRC.....	1961
C1-TODORETRY.....	1970
C1-TDCRINMSG.....	1970
Customer Inbound Message XML Format.....	1971
Customer Inbound Message Schema.....	1989
Sample Customer Inbound Message.....	1992
Membership Inbound Message.....	1994
Prerequisites.....	1995
Membership Inbound Message Status Transition through User Interface.....	1996
Membership Inbound Message Status Transition through a Batch Process.....	1996
Algorithms Used in C1-MemberInboundMessage.....	1997
C1-AT-RQJ.....	1998
F1-AT-RQJ.....	1998
C1-INMEMEVAL.....	1998
C1-INMEMEPRC.....	1999
C1-TODORETRY.....	2006
C1-TDCRINMSG.....	2006

F1-TODOCOMPL.....	2007
Membership Inbound Message XML Format.....	2007
Membership Inbound Message Schema.....	2020
Sample Membership Inbound Message.....	2022
ASO Customer Inbound Message.....	2024
Prerequisites.....	2026
ASO Customer Inbound Message Status Transition through User Interface.....	2026
ASO Customer Inbound Message Status Transition through a Batch Process.....	2027
Algorithms Used in C1-ASOCustomerInboundMessage.....	2028
C1-AT-RQJ.....	2029
F1-AT-RQJ.....	2029
C1-ASOCINVAL.....	2029
C1-ASOCINPRC.....	2030
C1-TODORETRY.....	2030
C1-TDCRINMSG.....	2030
ASO Customer Inbound Message XML Format.....	2031
ASO Customer Inbound Message Schema.....	2052
Sample ASO Customer Inbound Message.....	2055
Health Care Inbound Message.....	2062
Prerequisites.....	2068
Health Care Inbound Message Status Transition through User Interface.....	2070
Health Care Inbound Message Status Transition through a Batch Process.....	2071
Algorithms Used in C1-HCInboundMessage.....	2072
C1-AT-RQJ.....	2073
F1-AT-RQJ.....	2073
C1-HCINVAL.....	2073
C1-HCINPROC.....	2074
C1-TODORETRY.....	2074
C1-TDCRINMSG.....	2075
Health Care Inbound Message XML Format.....	2075
Health Care Inbound Message Schema.....	2116
Sample Health Care Inbound Message for Fully-Insured Group Customer Setup.....	2123
Sample Health Care Inbound Message for Self-Funded Customer Setup.....	2150
Sample Health Care Inbound Message for Pricing Rules.....	2166
Sample Health Care Inbound Message for Membership.....	2174
Inbound Message Type.....	2188
Inbound Message Type List.....	2189
Inbound Message Type.....	2189
Viewing the Inbound Message Type Details.....	2192
Defining an Inbound Message Type.....	2193
Defining a Characteristic for an Inbound Message Type.....	2198
Editing an Inbound Message Type.....	2199
Copying an Inbound Message Type.....	2203
Deleting an Inbound Message Type.....	2207
Inbound Message (Used for Searching).....	2208
Search Inbound Message.....	2208
Searching for an Inbound Message.....	2211
Creating an Inbound Message.....	2212
C1-CustomerStructureInboundMessage.....	2212
C1-MembershipInboundMessage.....	2213
C1-ASOCustomerInboundMessage.....	2213
C1-HCInboundMessage.....	2214
Viewing the Inbound Message Details.....	2214
Inbound Message (Used for Viewing).....	2214
Inbound Message - Main.....	2215
Inbound Message.....	2215

Inbound Message - Message.....	2217
Inbound Message Content.....	2217
Inbound Message - Log.....	2217
Inbound Message Log.....	2217
Editing an Inbound Message.....	2218
Defining a Characteristic for an Inbound Message.....	2219
Deleting an Inbound Message.....	2220
Processing an Inbound Message.....	2221
Using the Retry Option for an Inbound Message.....	2223
Voiding an Inbound Message.....	2223
Viewing the Content of an Inbound Message.....	2224
Viewing the Log of an Inbound Message.....	2224
Adding a Log Entry for an Inbound Message.....	2225
Statement Construct Preference.....	2226
Searching for a Statement Construct Preference.....	2226
Viewing the Statement Construct Preference Details.....	2227
Defining a Statement Construct Preference.....	2227
Editing a Statement Construct Preference.....	2232
Copying a Statement Construct Preference.....	2236
Deleting a Statement Construct Preference.....	2241

## **Chapter 30: Upload Lockbox Payment and Remittance Advices**

<b>Overview.....</b>	<b>2243</b>
Prerequisites.....	2245
EDI 820 Flat File Description.....	2245
Sample EDI 820 Flat File.....	2247
Upload EDI 820 Files in ORMB.....	2250

## **Chapter 31: Deferred Revenue Recognition..... 2253**

Prerequisites.....	2255
Deferred Revenue Recognition Status Transition.....	2255
Algorithms Used in Deferred Revenue Recognition.....	2257
Deferred Revenue Recognition Template (Used for Searching).....	2262
Search Deferred Revenue Recognition Template.....	2262
Searching for a Deferred Revenue Recognition Template.....	2263
Defining a Deferred Revenue Recognition Template.....	2264
Associating Algorithms with a Deferred Revenue Recognition Template.....	2266
Associating Deferred Revenue Recognition Template With A Division.....	2267
Defining a Characteristic for a Deferred Revenue Recognition Template.....	2268
Viewing the Deferred Revenue Recognition Template Details.....	2269
Deferred Revenue Recognition Template (Used for Viewing).....	2270
Deferred Revenue Recognition Template.....	2270
Editing a Deferred Revenue Recognition Template.....	2272
Deleting a Deferred Revenue Recognition Template.....	2273
Viewing the Deferred Revenue Recognition Template Details.....	2273
Deferred Revenue Recognition (Used for Searching).....	2274
Search Deferred Revenue Recognition.....	2274
Searching for a Deferred Revenue Recognition.....	2278
Viewing the Deferred Revenue Recognition Details.....	2279
Deferred Revenue Recognition (Used for Viewing).....	2280
Deferred Revenue Recognition - Main.....	2280
Deferred Revenue Recognition.....	2280
Associated Deferred Revenue Recognitions.....	2282
Recognition Schedule.....	2282

Revenue Recognition Items.....	2283
Deferred Revenue Recognition - Log.....	2283
Deferred Revenue Recognition Log.....	2283
Editing a Deferred Revenue Recognition.....	2284
Creating the Deferred Revenue Recognition Schedule.....	2284
Defining a Characteristic for a Deferred Revenue Recognition.....	2285
Adding Related Deferred Revenue Recognitions.....	2286
Editing the Deferred Revenue Recognition Schedule Details.....	2287
Viewing the Log of a Deferred Revenue Recognition.....	2288
Adding a Log Entry for a Deferred Revenue Recognition.....	2289

## **Chapter 32: Reconciliation.....2291**

Pre-requisites.....	2294
Reconciliation Status Transition.....	2294
Pay Instruction Status Transition.....	2295
Discrepancy Report Status Transition.....	2297
EDI 820 File Format For Reconciliation.....	2297
Sample EDI 820 File Format.....	2298
Algorithms Used in C1-MemberReconType.....	2299
C1-REOCNPEP.....	2299
Algorithms Used in C1-MemberReconciliation.....	2300
C1-RECONINFO.....	2301
C1-MRECONVAL.....	2301
F1-AT-RQJ.....	2301
F1-TDCREATE.....	2302
C1-VALPAYINS.....	2302
F1-TODOCOMPL.....	2302
C1-MRECONVAL.....	2303
C1-MONPAYINS.....	2303
C1-TRNPAYRCN.....	2303
C1-RCOPNPYIN.....	2304
C1-RCNOPNMR.....	2304
C1-RCMONPNCN.....	2304
C1-CANPAYINS.....	2305
C1-CANRCNPAY.....	2305
C1-RCNCANLTD.....	2305
Algorithms Used in C1-PayInstruction.....	2305
C1-MPAYININF.....	2306
C1-PYINDRVAN.....	2306
C1-PIRECOCIL.....	2307
C1-PYICNADJ.....	2308
F1-AT-RQJ.....	2308
Algorithms Used in C1-MemberDiscReportType.....	2308
C1-DISCPEP.....	2309
Algorithms Used in C1-DiscrepancyReport.....	2309
F1-AT-RQJ.....	2309
C1-DISRINFO.....	2309
C1-VALNEWDIS.....	2310
C1-CRDSLNITM.....	2310
F1-TODOCOMPL.....	2310
C1-VALCMPDIS.....	2310
Reconciliation Type.....	2310
Reconciliation Type List.....	2311
Reconciliation Type.....	2311
Defining a Reconciliation Type.....	2313

Defining a Characteristic for a Reconciliation Type.....	2315
Associating an Algorithm with a Reconciliation Type.....	2315
Editing a Reconciliation Type.....	2317
Deleting a Reconciliation Type.....	2318
Copying a Reconciliation Type.....	2319
Viewing the Reconciliation Type Details.....	2320
Reconciliation (Used for Searching).....	2321
Search Reconciliation.....	2321
Searching for a Reconciliation.....	2324
Viewing the Reconciliation Details.....	2325
Reconciliation (Used for Viewing).....	2325
Reconciliation - Main.....	2326
Reconciliation.....	2326
Reconciliation - Pay Instruction.....	2328
Pay Instructions.....	2328
Reconciliation - Log.....	2330
Reconciliation Log.....	2331
Editing a Reconciliation.....	2331
Defining a Characteristic for a Reconciliation.....	2332
Deleting a Reconciliation.....	2333
Submitting Pay Instructions for a Reconciliation.....	2333
Reconciling Pay Instructions.....	2334
Adding a Log Entry for a Reconciliation.....	2334
Viewing the Log of a Reconciliation.....	2335
Canceling a Reconciliation.....	2336
Searching for a Pay Instruction.....	2336
Viewing the Pay Instruction Details.....	2337
Pay Instruction.....	2338
Pay Instruction - Main.....	2338
Pay Instruction.....	2338
Reconciliation Adjustments.....	2340
Related Objects.....	2340
Pay Instruction - Log.....	2341
Pay Instruction Log.....	2341
Adding a Log Entry for a Pay Instruction.....	2341
Viewing the Log of a Pay Instruction.....	2342
Discrepancy Report Type.....	2343
Discrepancy Report Type List.....	2343
Discrepancy Report Type.....	2344
Defining a Discrepancy Report Type.....	2345
Defining a Characteristic for a Discrepancy Report Type.....	2346
Editing a Discrepancy Report Type.....	2347
Deleting a Discrepancy Report Type.....	2349
Copying a Discrepancy Report Type.....	2349
Viewing the Discrepancy Report Type Details.....	2350
Discrepancy Report (Used for Searching).....	2351
Search Discrepancy Report.....	2351
Searching for a Discrepancy Report.....	2354
Creating a Discrepancy Report.....	2354
Viewing the Discrepancy Report Details.....	2356
Discrepancy Report (Used for Viewing).....	2356
Discrepancy Report - Main.....	2357
Discrepancy Report.....	2357
Discrepancy Line Items.....	2358
Discrepancy Line Item Related Objects.....	2359
Discrepancy Line Items Characteristics Zone.....	2360

Discrepancy Report - Log.....	2360
Discrepancy Report Log.....	2360
Editing a Discrepancy Line Item.....	2360
Deleting a Discrepancy Report.....	2362
Finalizing a Discrepancy Report.....	2362
Adding a Log Entry for a Discrepancy Report.....	2363
Viewing the Log of a Discrepancy Report.....	2363
Member Reconciliation Preference.....	2364
Searching for a Member Reconciliation Preference.....	2364
Viewing the Member Reconciliation Preference Details.....	2365
Defining a Member Reconciliation Preference.....	2365
Editing a Member Reconciliation Preference.....	2370
Copying a Member Reconciliation Preference.....	2374
Deleting a Member Reconciliation Preference.....	2378

## **Chapter 33: Self-Funded Pricing..... 2379**

Prerequisites.....	2381
Approval Workflow for the Self-Funded Pricing Rules.....	2381
Line Item Extendable Lookup.....	2382
Extendable Lookup Search.....	2383
Searching for the Line Item Extendable Lookup.....	2384
Viewing the Values of the Line Item Extendable Lookup.....	2385
Extendable Lookup (Line Item).....	2385
Extendable Lookup Value List.....	2385
Extendable Lookup Value.....	2386
Defining a Line Item.....	2389
Associating a Line Item with a Pricing Rule Type Category.....	2391
Defining the Markup or Markdown Billing Information for the Line Items.....	2393
Defining Line Item Billing Information for the Line Items.....	2394
Defining the Claim Handling Fees Billing Information for the Line Items.....	2395
Editing a Line Item.....	2397
Copying a Line Item.....	2399
Deleting a Line Item.....	2402
Viewing the Line Item Details.....	2402
Claim Template Extendable Lookup.....	2403
Extendable Lookup Search.....	2404
Searching for the Claim Template Extendable Lookup.....	2405
Viewing the Values of the Claim Template Extendable Lookup.....	2405
Extendable Lookup (Claim Template).....	2406
Extendable Lookup Value List.....	2406
Extendable Lookup Value.....	2407
Defining a Claim Template.....	2410
Defining the Claim Handling Fees for Line Items in the Claim Template.....	2412
Defining the Default Markup or Markdown Values for Line Items in a Claim Template..	2414
Adding a Line Item in a Claim Template.....	2415
Editing a Claim Template.....	2418
Copying a Claim Template.....	2419
Deleting a Claim Template.....	2421
Viewing the Claim Template Details.....	2421
Rate Option Extendable Lookup.....	2422
Extendable Lookup Search.....	2423
Searching for the Rate Option Extendable Lookup.....	2424
Viewing the Values of the Rate Option Extendable Lookup.....	2424
Extendable Lookup (Rate Option).....	2425
Extendable Lookup Value List.....	2425

Extendable Lookup Value.....	2426
Defining a Rate Option.....	2428
Editing a Rate Option.....	2430
Copying a Rate Option.....	2433
Deleting a Rate Option.....	2436
Viewing the Rate Option Details.....	2436
Rate Type Extendable Lookup.....	2437
Extendable Lookup Search.....	2437
Searching for the Rate Type Extendable Lookup.....	2438
Viewing the Values of the Rate Type Extendable Lookup.....	2439
Extendable Lookup (Rate Type).....	2439
Extendable Lookup Value List.....	2439
Extendable Lookup Value.....	2440
Defining a Rate Type.....	2441
Editing a Rate Type.....	2443
Copying a Rate Type.....	2445
Deleting a Rate Type.....	2447
Viewing the Rate Type Details.....	2447
Pricing Group.....	2448
Viewing the Pricing Groups of a Bill Group.....	2448
Defining a Pricing Group for a Bill Group.....	2449
Editing a Pricing Group of a Bill Group.....	2452
Deleting a Pricing Group of a Bill Group.....	2455
Copying a Pricing Group of a Bill Group.....	2455
Pricing Rule Type.....	2458
Pricing Rule Type List.....	2459
Pricing Rule Type.....	2462
Claim Pricing.....	2471
Defining a Claim Pricing Rule Type.....	2473
Adding Related Pricing Rule Types in a Primary Pricing Rule Type.....	2475
Defining Transaction Field Mapping in a Primary Pricing Rule Type.....	2477
Associating Algorithms with a Pricing Rule Type.....	2483
Defining Additional Data for a Pricing Rule Type.....	2485
Adding Price Items in a Pricing Rule Type.....	2487
Adding a Price Item Parameter in a Pricing Rule Type.....	2490
Defining a Characteristic for a Pricing Rule Type.....	2492
Adding Claim Templates in a Claim Pricing Rule Type.....	2494
Adding the Claim-Specific Data in a Pricing Rule Type.....	2495
Adding Claim Handling Fees Indicator in a Claim Pricing Rule Type.....	2496
Editing a Claim Pricing Rule Type.....	2498
Deleting a Claim Pricing Rule Type.....	2500
Viewing the Claim Pricing Rule Type Details.....	2501
Defining a Claim Pricing Rule for a Parent Customer.....	2501
Defining the Markup or Markdown Values For Line Items in a Claim Pricing Rule.....	2504
Defining the Markup or Markdown Values for Line Items for Each Rule in a Claim Pricing Rule.....	2505
Defining a Characteristic for a Claim Pricing Rule.....	2507
Editing a Claim Pricing Rule of a Parent Customer.....	2508
Viewing a Claim Pricing Rule of a Parent Customer.....	2510
Deleting a Claim Pricing Rule of a Parent Customer.....	2511
Defining a Claim Pricing Rule for a Bill Group.....	2512
Defining a Claim Pricing Rule for a Bill Group Using a Pricing Group.....	2515
Editing a Claim Pricing Rule of a Bill Group.....	2518
Viewing a Claim Pricing Rule of a Bill Group.....	2520
Deleting a Claim Pricing Rule of a Bill Group.....	2521
Specific Stop-Loss (SSL) Pricing.....	2521

Defining a Specific Stop-Loss (SSL) Pricing Rule Type.....	2524
Adding the SSL-Specific Data in a Pricing Rule Type.....	2527
Editing a Specific Stop-Loss (SSL) Pricing Rule Type.....	2529
Deleting a Specific Stop-Loss (SSL) Pricing Rule Type.....	2532
Viewing the Specific Stop-Loss (SSL) Pricing Rule Type Details.....	2532
Defining a Specific Stop-Loss Pricing Rule for a Parent Customer.....	2533
Defining Accumulation Parameters in a Specific Stop-Loss Pricing Rule.....	2536
Defining Run-in Parameters in a Specific Stop-Loss Pricing Rule.....	2538
Defining Lasering and Exclusion Information in a Specific Stop-Loss Pricing Rule.....	2539
Defining a Characteristic for a Specific Stop-Loss Pricing Rule.....	2540
Editing a Specific Stop-Loss Pricing Rule of a Parent Customer.....	2541
Viewing a Specific Stop-Loss Pricing Rule of a Parent Customer.....	2544
Deleting a Specific Stop-Loss Pricing Rule of a Parent Customer.....	2545
Defining a Specific Stop-Loss Pricing Rule for a Bill Group.....	2545
Defining Accumulation Criteria in a Specific Stop-Loss Pricing Rule.....	2548
Defining Claim Pricing Information in a Specific Stop Loss Pricing Rule.....	2550
Defining a Specific Stop-Loss Pricing Rule for a Bill Group Using a Pricing Group.....	2552
Editing a Specific Stop-Loss Pricing Rule of a Bill Group.....	2555
Viewing a Specific Stop-Loss Pricing Rule of a Bill Group.....	2556
Deleting a Specific Stop-Loss Pricing Rule of a Bill Group.....	2557
Aggregate Stop-Loss (ASL) Pricing.....	2558
Defining a Aggregate Stop-Loss (ASL) Pricing Rule Type.....	2560
Adding the ASL-Specific Data in a Pricing Rule Type.....	2563
Editing an Aggregate Stop-Loss (ASL) Pricing Rule Type.....	2565
Deleting an Aggregate Stop-Loss (ASL) Pricing Rule Type.....	2568
Viewing the Aggregate Stop-Loss (ASL) Pricing Rule Type Details.....	2568
Defining an Aggregate Stop-Loss Pricing Rule for a Parent Customer.....	2569
Defining Accumulation Parameters in an Aggregate Stop-Loss Pricing Rule.....	2572
Defining Run-in Parameters in an Aggregate Stop-Loss Pricing Rule.....	2575
Defining a Characteristic for an Aggregate Stop-Loss Pricing Rule.....	2576
Editing an Aggregate Stop-Loss Pricing Rule of a Parent Customer.....	2577
Viewing an Aggregate Stop-Loss Pricing Rule of a Parent Customer.....	2580
Deleting an Aggregate Stop-Loss Pricing Rule of a Parent Customer.....	2580
Defining an Aggregate Stop-Loss Pricing Rule for a Bill Group.....	2581
Defining Accumulation Criteria in an Aggregate Stop-Loss Pricing Rule.....	2584
Defining Claim Pricing Rules in an Aggregate Stop-Loss Pricing Rule.....	2586
Defining an Aggregate Stop-Loss Pricing Rule for a Bill Group Using a Pricing Group...	2588
Editing an Aggregate Stop-Loss Pricing Rule of a Bill Group.....	2591
Viewing an Aggregate Stop-Loss Pricing Rule of a Bill Group.....	2592
Deleting an Aggregate Stop-Loss Pricing Rule of a Bill Group.....	2593
Retention Type Claim Based Pricing.....	2594
Defining a Retention Type Claim Based Pricing Rule Type.....	2595
Adding Claim Based Disposition Details in a Pricing Rule Type.....	2598
Editing a Retention Type Claim Based Pricing Rule Type.....	2599
Deleting a Retention Type Claim Based Pricing Rule Type.....	2601
Viewing the Retention Type Claim Based Pricing Rule Type Details.....	2602
Defining a Retention Type Claim Based Pricing Rule for a Parent Customer.....	2603
Defining a Characteristic for a Retention Type Claim Based Pricing Rule.....	2606
Editing a Retention Type Claim Based Pricing Rule of a Parent Customer.....	2607
Deleting a Retention Type Claim Based Pricing Rule of a Parent Customer.....	2610
Defining a Retention Type Claim Based Pricing Rule for a Bill Group.....	2611
Defining a Characteristic for a Retention Type Claim Based Pricing Rule.....	2613
Editing a Retention Type Claim Based Pricing Rule of a Bill Group.....	2614
Deleting a Retention Type Claim Based Pricing Rule of a Bill Group.....	2617
Defining a Retention Type Claim Based Pricing Rule for a Bill Group Using a Pricing Group.....	2617

Defining a Characteristic for a Retention Type Claim Based Pricing Rule for a Bill Group Using a Pricing Group.....	2620
Viewing a Retention Type Claim Based Pricing Rule of a Parent Customer.....	2621
Viewing a Retention Type Claim Based Pricing Rule of a Bill Group.....	2622
Retention Type Enrollment Based Pricing.....	2623
Defining a Retention Type Enrollment Based Pricing Rule Type.....	2624
Adding the Enrollment Specific Data in a Pricing Rule Type.....	2627
Editing a Retention Type Enrollment Based Pricing Rule Type.....	2628
Deleting a Retention Type Enrollment Based Pricing Rule Type.....	2630
Viewing the Retention Type Enrollment Based Pricing Rule Type Details.....	2631
Defining a Retention Type Enrollment Based Pricing Rule for a Parent Customer.....	2631
Defining a Characteristic for a Retention Type Enrollment Based Pricing Rule.....	2634
Editing a Retention Type Enrollment Based Pricing Rule of a Parent Customer.....	2635
Deleting a Retention Type Enrollment Based Pricing Rule of a Parent Customer.....	2638
Defining a Retention Type Enrollment Based Pricing Rule for a Bill Group.....	2638
Defining a Characteristic for a Retention Type Enrollment Based Pricing Rule.....	2641
Editing a Retention Type Enrollment Based Pricing Rule of a Bill Group.....	2642
Deleting a Retention Type Enrollment Based Pricing Rule of a Bill Group.....	2645
Defining a Retention Type Enrollment Based Pricing Rule for a Bill Group Using a Pricing Group.....	2646
Defining a Characteristic for a Retention Type Enrollment Based Pricing Rule for a Bill Group Using a Pricing Group.....	2649
Viewing a Retention Type Enrollment Based Pricing Rule of a Parent Customer.....	2650
Viewing a Retention Type Enrollment Based Pricing Rule of a Bill Group.....	2651
Flat Fee Pricing.....	2651
Defining a One-Time Flat Fee Pricing Rule Type.....	2653
Adding the One-Time Flat Fee Specific Data in a Pricing Rule Type.....	2656
Editing a One-Time Flat Fee Pricing Rule Type.....	2657
Deleting a One-Time Flat Fee Pricing Rule Type.....	2660
Viewing the One-Time Flat Fee Pricing Rule Type Details.....	2661
Defining a One-Time Flat Fee Pricing Rule for a Bill Group.....	2661
Defining a Characteristic for a One-Time Flat Fee Pricing Rule.....	2664
Editing a One-Time Flat Fee Pricing Rule of a Bill Group.....	2665
Viewing a One-Time Flat Fee Pricing Rule of a Bill Group.....	2666
Deleting a One-Time Flat Fee Pricing Rule of a Bill Group.....	2667
Defining a Bill Period Based Recurring Flat Fee Pricing Rule Type.....	2668
Adding the Recurring Flat Fee Specific Data in a Pricing Rule Type.....	2671
Editing a Bill Period Based Recurring Flat Fee Pricing Rule Type.....	2672
Deleting a Bill Period Based Recurring Flat Fee Pricing Rule Type.....	2675
Viewing the Bill Period Based Recurring Flat Fee Pricing Rule Type Details.....	2676
Defining a Bill Period Based Recurring Flat Fee Pricing Rule for a Bill Group.....	2676
Defining a Characteristic for a Bill Period Based Recurring Flat Fee Pricing Rule.....	2679
Editing a Bill Period Based Recurring Flat Fee Pricing Rule of a Bill Group.....	2680
Viewing a Bill Period Based Recurring Flat Fee Pricing Rule of a Bill Group.....	2681
Deleting a Bill Period Based Recurring Flat Fee Pricing Rule of a Bill Group.....	2682
Defining a Frequency Based Recurring Flat Fee Pricing Rule Type.....	2683
Adding the Recurring Flat Fee Specific Data in a Pricing Rule Type.....	2686
Editing a Frequency Based Recurring Flat Fee Pricing Rule Type.....	2687
Deleting a Frequency Based Recurring Flat Fee Pricing Rule Type.....	2690
Viewing the Frequency Based Recurring Flat Fee Pricing Rule Type Details.....	2690
Defining a Frequency Based Recurring Flat Fee Pricing Rule for a Bill Group.....	2691
Defining a Characteristic for a Frequency Based Recurring Flat Fee Pricing Rule.....	2693
Editing a Frequency Based Recurring Flat Fee Pricing Rule of a Bill Group.....	2694
Viewing a Frequency Based Recurring Flat Fee Pricing Rule of a Bill Group.....	2696
Deleting a Frequency Based Recurring Flat Fee Pricing Rule of a Bill Group.....	2697
Ancillary Pricing.....	2697

Defining an Ancillary Pricing Rule Type.....	2700
Adding a Related Pricing Rule Type in an Ancillary Pricing Rule Type.....	2705
Mapping the Transaction Field in an Ancillary Pricing Rule Type.....	2707
Associating an Algorithm with an Ancillary Pricing Rule Type.....	2711
Defining Additional Data in an Ancillary Pricing Rule Type.....	2714
Adding a Price Item in an Ancillary Pricing Rule Type.....	2717
Adding a Price Item Parameter in an Ancillary Pricing Rule Type.....	2720
Defining the Ancillary-Specific Data in an Ancillary Pricing Rule Type.....	2721
Defining Pricing Arrangements in an Ancillary Pricing Rule Type.....	2723
Defining a Characteristic for a Ancillary Pricing Rule Type.....	2724
Editing an Ancillary Pricing Rule Type.....	2725
Deleting an Ancillary Pricing Rule Type.....	2729
Viewing the Ancillary Pricing Rule Type Details.....	2730
Defining an Ancillary Pricing Rule for a Parent Customer.....	2730
Defining a Characteristic for an Ancillary Pricing Rule.....	2733
Editing an Ancillary Pricing Rule of a Parent Customer.....	2735
Deleting an Ancillary Pricing Rule of a Parent Customer.....	2737
Defining an Ancillary Pricing Rule for a Bill Group.....	2738
Defining a Characteristic for an Ancillary Pricing Rule.....	2741
Editing an Ancillary Pricing Rule of a Bill Group.....	2743
Deleting an Ancillary Pricing Rule of a Bill Group.....	2745
Discount Pricing.....	2746
Types of Discount Arrangement.....	2747
Discount Share.....	2747
Discount Guarantee.....	2747
Defining a Discount Arrangement Pricing Rule Type.....	2747
Associating Algorithms with a Discount Arrangement Pricing Rule Type.....	2751
Defining Additional Data in a Discount Arrangement Pricing Rule Type.....	2754
Adding a Price Item in a Discount Arrangement Pricing Rule Type.....	2756
Adding a Price Item Parameter in a Discount Arrangement Pricing Rule Type.....	2759
Defining a Characteristic for a Discount Arrangement Pricing Rule Type.....	2760
Defining the Discount Specific Data in a Discount Arrangement Pricing Rule Type.....	2761
Editing a Discount Arrangement Pricing Rule Type.....	2764
Deleting a Discount Arrangement Pricing Rule Type.....	2767
Viewing the Discount Arrangement Pricing Rule Type Details.....	2768
Defining a Discount Arrangement Pricing Rule for a Parent Customer.....	2768
Adding the Discount Details in a Discount Arrangement Pricing Rule .....	2771
Defining the Discount Limits in a Discount Arrangement Pricing Rule.....	2772
Excluding a Network or Provider in a Discount Arrangement Pricing Rule.....	2774
Defining a Characteristic for a Discount Arrangement Pricing Rule.....	2775
Editing a Discount Arrangement Pricing Rule of a Parent Customer.....	2776
Deleting a Discount Arrangement Pricing Rule of a Parent Customer.....	2778
Write-Off Charges during Post Runout.....	2779
Level Funding Pricing.....	2779
Defining a Level Funded Pricing Rule Type.....	2783
Associating an Algorithm with a Level Funded Pricing Rule Type.....	2785
Defining Additional Data in a Level Funded Pricing Rule Type.....	2786
Adding a Price Item in a Level Funded Pricing Rule Type.....	2788
Adding a Price Item Parameter in a Level Funded Pricing Rule Type.....	2791
Defining a Characteristic for a Level Funded Pricing Rule Type.....	2792
Defining the Level Funded Specific Additional Data in a Level Funded Pricing Rule Type.....	2793
Editing a Level Funded Pricing Rule Type.....	2797
Deleting a Level Funded Pricing Rule Type.....	2800
Viewing the Level Funded Pricing Rule Type Details.....	2800
Defining a Level Funded Pricing Rule for a Parent Customer.....	2801

Defining Accumulation Parameters in a Level Funded Pricing Rule.....	2804
Defining the Final Settlement Rules in a Level Funded Pricing Rule.....	2805
Defining a Characteristic for a Level Funded Pricing Rule.....	2810
Defining a Level Funded Pricing Rule for a Bill Group.....	2811
Defining Accumulation Criteria in a Level Funded Pricing Rule.....	2814
Defining Claim Pricing Information in a Level Funded Pricing Rule.....	2817
Defining Ancillary Pricing Information in a Level Funded Pricing Rule.....	2820
Defining Discount Arrangement Pricing Information in a Level Funded Pricing Rule.....	2823
Defining Retention Type Claim Based and/or Retention Type Enrollment Based Pricing Rule Information in a Level Funded Pricing Rule.....	2825
Defining a Characteristic for a Level Funded Pricing Rule.....	2826
Terminal Liability Reserve (Run Out) Level Funding Pricing.....	2827
Pricing Rule (Used for Viewing).....	2828
Claim.....	2829
Aggregate Stop-Loss.....	2832
Specific Stop-Loss.....	2838
Retention Type Claim Based.....	2843
Retention Type Enrollment Based.....	2845
Flat Fee.....	2846
Ancillary.....	2848
Discount Arrangement.....	2850
Level Funded.....	2852
Age Based Pricing Rule.....	2858
Tier Based Pricing Rule.....	2859
Additional Charge Pricing Rule.....	2861
Self-Funded Pricing Rule Versioning.....	2862

## **Chapter 34: Stop-Loss..... 2867**

Accumulation Data.....	2868
------------------------	------

## **Chapter 35: Self-Funded Billing..... 2869**

Pre-requisites.....	2871
Bill Group Derivation and Pricing Parameters.....	2872
Related Pricing Rule Type Eligibility.....	2874
Price Item Eligibility.....	2876
Self-Funded Billing Process.....	2877
Transaction Aggregation.....	2877
Stop Loss Calculation.....	2882
Bill Generation.....	2882
Bill Group Derivation.....	2883
Account and Price Item Derivation (for the Claim Pricing Rule Type Category).....	2886
Account and Price Item Derivation (for the Specific Stop-Loss and Aggregate Stop-Loss Pricing Rule Type Categories).....	2891
Account and Price Item Derivation (for the Retention Type Claim Based Pricing Rule Type Category).....	2904
Account and Price Item Derivation (for the Retention Type Enrollment Based Pricing Rule Type Category).....	2916
Account and Price Item Derivation (for the Ancillary Pricing Rule Type Category).....	2926
Bill After Date Determination.....	2934

## **Chapter 36: Fully-Insured Pricing..... 2937**

Age Based Pricing.....	2938
Defining an Age Based Pricing Rule Type.....	2941

Adding the Related Pricing Rule Types in an Age Based Pricing Rule Type.....	2943
Associating an Algorithm with an Age Based Pricing Rule Type.....	2945
Adding a Price Item in an Age Based Pricing Rule Type.....	2947
Adding a Price Item Parameter in an Age Based Pricing Rule Type.....	2950
Defining a Characteristic for an Age Based Pricing Rule Type.....	2951
Adding Elements for Audit in an Age Based Pricing Rule Type.....	2952
Defining an Age Based Specific Additional Data in an Age Based Pricing Rule Type.....	2953
Mapping Characteristic Attributes in an Age Based Pricing Rule Type.....	2954
Editing an Age Based Pricing Rule Type.....	2955
Deleting an Age Based Pricing Rule Type.....	2958
Viewing the Age Based Pricing Rule Type Details.....	2958
Tier Based Pricing.....	2959
Defining a Tier Based Pricing Rule Type.....	2961
Adding the Related Pricing Rule Types in a Tier Based Pricing Rule Type.....	2964
Associating an Algorithm with a Tier Based Pricing Rule Type.....	2965
Adding a Price Item in a Tier Based Pricing Rule Type.....	2967
Adding a Price Item Parameter in a Tier Based Pricing Rule Type.....	2970
Defining a Characteristic for a Tier Based Pricing Rule Type.....	2971
Adding Elements for Audit in a Tier Based Pricing Rule Type.....	2972
Editing a Tier Based Pricing Rule Type.....	2973
Deleting a Tier Based Pricing Rule Type.....	2975
Viewing the Tier Based Pricing Rule Type Details.....	2976
Pass-Through Billable Charge.....	2976
Defining a Pass-Through Billable Charge Pricing Rule Type.....	2977
Associating an Algorithm with a Pass-Through Billable Charge Pricing Rule Type.....	2979
Adding a Price Item in a Pass-Through Billable Charge Pricing Rule Type.....	2981
Adding a Price Item Parameter in a Pass-Through Billable Charge Pricing Rule Type.....	2984
Defining a Characteristic for a Pass-Through Billable Charge Pricing Rule Type.....	2984
Editing a Pass-Through Billable Charge Pricing Rule Type.....	2985
Deleting a Pass-Through Billable Charge Pricing Rule Type.....	2987
Viewing the Pass-Through Billable Charge Pricing Rule Type Details.....	2988
Administration Fee Pricing for COBRA Membership.....	2989
Defining an Additional Charge Pricing Rule Type.....	2991
Associating an Algorithm with an Additional Charge Pricing Rule Type.....	2993
Adding a Price Item in an Additional Charge Pricing Rule Type.....	2995
Adding a Price Item Parameter in an Additional Charge Pricing Rule Type.....	2998
Defining a Characteristic for an Additional Charge Pricing Rule Type.....	2999
Adding Elements for Audit in an Additional Charge Pricing Rule Type.....	3000
Editing an Additional Charge Pricing Rule Type.....	3001
Deleting an Additional Charge Pricing Rule Type.....	3003
Viewing the Additional Charge Pricing Rule Type Details.....	3004
Medicare Part D LIS and LEP Pricing.....	3004
Defining a Benefit Pricing Rule Type.....	3005
Associating Algorithms with a Benefit Pricing Rule Type.....	3007
Adding a Price Item in a Benefit Pricing Rule Type.....	3009
Adding a Price Item Parameter in a Benefit Pricing Rule Type.....	3011
Defining a Characteristic for a Benefit Pricing Rule Type.....	3012
Adding Elements for Audit in a Benefit Pricing Rule Type.....	3013
Editing a Benefit Pricing Rule Type.....	3014
Deleting a Benefit Pricing Rule Type.....	3016
Viewing the Benefit Pricing Rule Type Details.....	3017
<b>Chapter 37: Fully-Insured Group Billing.....</b>	<b>3019</b>
Audit Framework for Fully-Insured Group Health Insurance Billing.....	3021
Age Based and Tier Based Pricing Rules Audit Process.....	3022

Membership Audit Process.....	3023
Person Audit Process.....	3029
Bill Group Derivation and Pricing Parameters Audit Process.....	3031
Premium Proration Rules.....	3034
Age Monitoring.....	3036
State of Issue.....	3037
Membership Premium Calculation.....	3038
Bill Group Derivation for Membership.....	3043
Account and Price Item Derivation for Membership.....	3046
Bill Cycle and Bill Period Derivation.....	3046
Bill Period Timeline.....	3047
9/10 Billing (Skip Months).....	3047
Repricing.....	3048
Fully-Insured Group Billable Charge Creation.....	3049
Repricing Request.....	3051
Search Repricing Entity Detail Record.....	3051
Repricing Requests.....	3054
Timeline and Billable Charge Details.....	3055
Pricing Calculation Details.....	3055
Searching for a Repricing Entity Detail Record.....	3056
Viewing the Repricing Requests Created for a Repricing Entity Detail Record.....	3057
Viewing the Billable Charge Timeline Details of a Repricing Request.....	3057
Viewing the Pricing Calculation Details of a Timeline.....	3058
Membership Premium Calculation Through Inbound Web Service.....	3058

## **Chapter 38: Off-Process Request..... 3059**

Prerequisites.....	3062
Off-Process Request (Without Approval) Status Transition.....	3062
Off-Process Request (With Approval) Status Transition.....	3062
Algorithms Used in C1-OffProcessRequest.....	3063
Off-Process Request Type.....	3063
Off-Process Request Type List.....	3064
Off-Process Request Type.....	3064
Defining an Off-Process Request Type.....	3067
Adding the Accumulation Amendment Details in an Off-Process Request Type.....	3069
Defining a Characteristic for an Off-Process Request Type.....	3071
Editing an Off-Process Request Type.....	3072
Deleting an Off-Process Request Type.....	3074
Copying an Off-Process Request Type.....	3075
Viewing the Off-Process Request Type Details.....	3078
Off-Process Request (Used for Searching).....	3078
Search Off-Process Request.....	3078
Searching for an Off-Process Request.....	3081
Defining an Off-Process Request.....	3081
Viewing the Off-Process Request Details of an Off-Process Request.....	3083
Off-Process Request (Used for Viewing).....	3084
Off-Process Request - Main.....	3084
Off-Process Request.....	3084
Off-Process Request Details.....	3086
Off-Process Request Error Message.....	3088
Off-Process Request - Log.....	3088
Off-Process Request Log.....	3088
Viewing the Error Message of an Off-Process Request.....	3089
Adding the Off-Process Request Details in an Off-Process Request.....	3090
Defining a Characteristic for an Off-Process Request.....	3093

Editing an Off-Process Request.....	3093
Deleting an Off-Process Request.....	3094
Submitting an Off-Process Request.....	3095
Approving an Off-Process Request.....	3096
Rejecting an Off-Process Request.....	3097
Viewing the Log of an Off-Process Request.....	3099
Adding a Log Entry for an Off-Process Request.....	3099

## **Chapter 39: Entity Audit..... 3101**

Audit Event Status Transition.....	3102
Prerequisites.....	3102
Entity Audit Process.....	3103
Audit Event Creation.....	3103
Audit Event Processing.....	3104
Algorithms Used in the Entity Audit Process.....	3104
C1-REAUDEVNT.....	3104
C1-AUDEVMPR.....	3105
Audit Event Type.....	3105
Audit Event Type List.....	3107
Audit Event Type.....	3108
Defining an Audit Event Type.....	3110
Associating an Algorithm with an Audit Event Type.....	3113
Adding an Element for Auditing in an Audit Event Type.....	3114
Defining a Characteristic for an Audit Event Type.....	3117
Editing an Audit Event Type.....	3118
Copying an Audit Event Type.....	3120
Deleting an Audit Event Type.....	3123
Viewing the Audit Event Type Details.....	3123
Audit Event (Used for Searching).....	3124
Search Audit Event.....	3124
Searching for an Audit Event.....	3127
Viewing the Audit Event Details.....	3128
Audit Event (Used for Viewing).....	3128
Audit Event - Main.....	3128
Audit Event.....	3128
Audit Event - Log.....	3130
Audit Event Log.....	3130
Canceling an Audit Event.....	3131
Viewing the Log of an Audit Event.....	3131

## **Chapter 40: Invoice Request..... 3133**

Prerequisites.....	3136
Types of Invoice Request.....	3136
Manual Regular Bill Generation Invoice Request.....	3136
Manual Trial Bill Generation Invoice Request.....	3138
Automatic Regular Bill Generation Invoice Request.....	3138
Invoice Request Manual Trial Bill Generation (Without Approval) Status Transition.....	3139
Invoice Request Manual Regular Bill Generation (Without Approval) Status Transition.....	3143
Invoice Request Manual Regular Bill Generation (With Approval) Status Transition.....	3149
Invoice Request Automatic Regular Bill Generation (Without Approval) Status Transition.....	3154
Invoice Request Type.....	3157
Invoice Request Type List.....	3157
Invoice Request Type.....	3158
Defining an Invoice Request Type.....	3161

Defining a Characteristic for an Invoice Request Type.....	3166
Editing an Invoice Request Type.....	3167
Deleting an Invoice Request Type.....	3171
Copying an Invoice Request Type.....	3172
Viewing the Invoice Request Type Details.....	3176
Invoice Request (Used for Searching).....	3177
Search Invoice Request.....	3177
Searching for an Invoice Request.....	3181
Manually Creating an Invoice Request.....	3182
Viewing the Invoice Request Details.....	3184
Invoice Request (Used for Viewing).....	3184
Invoice Request - Main.....	3184
Invoice Request.....	3185
Invoice Request Details/Account List.....	3188
Excluded Accounts.....	3189
Invoice Request - Log.....	3189
Invoice Request Log.....	3189
Editing an Invoice Request.....	3190
Defining a Characteristic for an Invoice Request.....	3192
Deleting an Invoice Request.....	3193
Canceling an Invoice Request.....	3194
Submitting an Invoice Request.....	3195
Approving an Invoice Request.....	3196
Rejecting an Invoice Request.....	3197
Requesting to Resubmit an Invoice Request.....	3198
Viewing the Log of an Invoice Request.....	3200
Adding a Log Entry for an Invoice Request.....	3200

## **Chapter 41: FOP Reports..... 3203**

## **Chapter 42: Garbling Customer Information..... 3205**

## **Appendix A: Most Commonly Used Tasks..... 3207**

Changing the Layout.....	3208
Adding a Column to the Zone.....	3208
Rearranging Columns in the Zone.....	3208
Removing a Column from the Zone.....	3208

## **Appendix B: Administration.....3211**

UI Maps.....	3212
Creating Display UI Map for an Approval Workflow Group.....	3212
Creating Input UI Map for an Approval Workflow Group.....	3213
Feature Configurations.....	3214
Setting the C1_ACCTINFO Feature Configuration.....	3214
Setting the C1-ASOBLLNG Feature Configuration.....	3215
Setting the C1_AXENTITY Feature Configuration.....	3234
Setting the C1-BILLADJSQ Feature Configuration.....	3236
Setting the C1-BILLCYCLE Feature Configuration.....	3237
Setting the C1_CMO Feature Configuration.....	3238
Setting the C1_DIVFUNCT Feature Configuration.....	3240
Setting the C1-EHRCONFIG Feature Configuration.....	3240
Setting the C1_EXCHRATE Feature Configuration.....	3241

Setting the C1_EXP_OVRD Feature Configuration.....	3242
Setting the C1_FINTRANOP Feature Configuration.....	3243
Setting the C1_FM Feature Configuration.....	3246
Setting the C1-OFFSETREQ Feature Configuration.....	3252
Setting the C1-PAYPORTAL Feature Configuration.....	3253
Setting the C1_PER_REL Feature Configuration.....	3255
Setting the C1_PERSTYPE Feature Configuration.....	3256
Setting the C1_PPARAM_FLG Feature Configuration.....	3257
Setting the C1_PR_REC Feature Configuration.....	3258
Setting the C1_PRASNORDR Feature Configuration.....	3259
Setting the C1_PRICING Feature Configuration.....	3260
Setting the C1-PYREQSRT Feature Configuration.....	3261
Setting the C1_RLENG Feature Configuration.....	3262
Setting the C1-TXNDMYID Feature Configuration.....	3263
Setting the C1-PAYFLUPLD Feature Configuration.....	3264

# About this Document

---

This document lists and describes various features in Oracle Revenue Management and Billing which can be used in the Health Insurance domain. It describes all screens related to these features and explains how to perform various tasks through these screens.

## Intended Audience

---

This document is intended for the following audience:

- End-users
- System Administrators
- Consulting Team
- Implementation Team
- Development Team

## Organization of the Document

---

Each insurance feature is described in a separate chapter in this document. All screens related to the feature and tasks related to the screen are explained in each chapter. This document contains the following chapters:

Chapter Number	Chapter Name	Chapter Description
Chapter 1	Fully-Insured Group Customer Management	Explains how to create customers and accounts for billing the fully-insured group health plans.
Chapter 2	Self-Funded Customer Management	Explains how to create customers and accounts for billing the self-funded plans.
Chapter 3	Health Insurance Business Management	Describes how to setup the pricing and billing engines for the following lines of health insurance business — <b>Fully-Insured Group Health Insurance</b> and <b>Self-Funded Group Health Insurance</b> .
Chapter 4	Fully-Insured Group Health Insurance	Explains how to design the pricing and billing models for the fully-insured group health insurance business in ORMB. It also explains how to create policies, plans, and memberships for the fully-insured group health insurance.
Chapter 5	Self-Funded Group Health Insurance	Explains how to design the pricing and billing models for the self-funded group health insurance business in ORMB. It also explains how to create policies for the self-funded group health insurance.
Chapter 6	Customer Registration	Describes how to create a person, account, policy, and policy plan through a customer registration object.

Chapter Number	Chapter Name	Chapter Description
Chapter 7	Customer 360° View	Explains how to view in-depth information about the person, account, or policy in the <b>Customer 360° View</b> screen. It explains how to create sort records for bill groups and derivation and pricing parameters for bill groups. It explains how to view the pricing rules of a parent customer and the pricing rules defined for a policy of a bill group. It also explains how to define, edit, and delete the different types of pricing rules of a parent customer and bill group. In addition, it explains how to view the detailed information about the bill.
Chapter 8	Pricing Management (Health Insurance Business)	Explains the different concepts of the pricing model supported in the application. It explains how to define a parameter, price item, price list, and tiering criterion. It also explains how to define pricing for a price item, how to assign a price item to a price list, and how to assign a price list to a person or account.
Chapter 9	Division	Describes the different types of division. It also explains how to define a division.
Chapter 10	Approval Workflow	Describes the approval workflow process and explains how to perform various tasks involved in the process. It explains how to implement the approval workflow process for an entity, such as account, person, and so on. It explains how to define an approval workflow group, approval workflow chain, approval workflow criterion type, approval workflow group chain linkage, approval workflow reasons, and approval workflow settings.
Chapter 11	Rules Engine	Describes how the rules engine function. It explains how to define, execute, and maintain business rules separately from the application code.
Chapter 12	Alternate Sequential Bill Numbers	Explains how to generate alternate sequential bill numbers which are either unique throughout the system or within the division.
Chapter 13	Transaction Feed Management	Describes the transaction feed management process and its sub-processes. It explains how to execute each sub-process. It also explains how to view the details of various transactions uploaded in the system. In addition, it explains how to create a transaction source, transaction record type, transaction aggregation rule, aggregation schedule, and disaggregation request.
Chapter 14	Upload Validated Payment Data	Explains how to upload and validate the payment records before you move them to the staging area. It also explains how to create payment events and payments using the validated payment records.
Chapter 15	Freeze Payments on Notification	Explains how the system freezes or cancels the automatic payments, voids the refund requests and cancels the refund adjustments when the review comments are received from the auto clearing house.
Chapter 16	Trial Billing	Explains how to generate trial bills before the actual bill is generated for an account. It also explains how to view the trial bills in the system.
Chapter 17	GL Account Validation	Explains how to enable the static or dynamic GL account validation feature.
Chapter 18	Upload Validated Adjustment Data	Explains how to validate and upload an adjustment data file and create adjustments through an adjustment upload request.

Chapter Number	Chapter Name	Chapter Description
Chapter 19	Payment Request	Explains how to create or transfer payments through a payment request.
Chapter 20	Account Receivable Central	Explains how to use the <b>Account Receivable Central</b> screen to search for a bill which you need to offset against another bill. It explains how to perform single, mass, and cross currency offset against one or more bills. It also enables you to create a hold request, refund request, write off request, and dispute request through this screen.
Chapter 21	Offset Request	Explains how to offset the bill's outstanding amount against one or more bills through an offset request. It explains how to create the offset request types and offset requests in the system.
Chapter 22	Funding Request	Describes how to change the automatic payment amount through the funding process. It explains how to create the funding request types and funding requests in the system.
Chapter 23	Refund/Write Off Request	Describes how to refund a payment or credit bill or bill line item and write off a debit bill or bill line item through a refund or write off request, respectively. It explains how to create the refund or write off request types and refund or write off requests in the system.
Chapter 24	Hold Request	Describes how to hold some processes and/or bills at the account or person level for a time period through a hold request. It explains how to create the hold request types and hold requests in the system.
Chapter 25	Delinquency Central	Explains how to track the overdue processes of a delinquent account through the <b>Delinquency Central</b> screen. It also explains how to create a hold request, payment arrangement, and promise to pay for a delinquent account from this screen.
Chapter 26	Upload Request	Explains how to do the following through an upload request: <ul style="list-style-type: none"> <li>• Update bill cycle of accounts</li> <li>• Update contract riders in contracts</li> <li>• Create hold requests, refund requests, write off requests, or billable charges</li> <li>• Reinstate the policies</li> <li>• Create sort records for bill groups</li> <li>• Create derivation and pricing parameters for bill groups</li> </ul>
Chapter 27	General Ledger (GL) Accounting Template	Describes how to override the distribution code used for creating FT GL entries using the <b>GL Accounting Template</b> feature. It explains how to create the GL accounting templates for each process and sub processes combination.
Chapter 28	Payment Agreement Request	Describes how to schedule payments in installments for a set of unpaid bills of an account through a payment agreement request. It explains how to create the payment agreement request types and payment agreement requests in the system.

Chapter Number	Chapter Name	Chapter Description
Chapter 29	Inbound Message	Explains how to create the customer and membership inbound messages through the web services. It explains the XML format in which the customer and membership data should be available while calling the respective web service. It also explains how to create the inbound message types and how to process the inbound messages in the system.
Chapter 30	Upload Lockbox Payment and Remittance Advices	Explains how to upload lockbox payment and remittance advices received in the <b>Electronic Data Exchange (EDI) 820</b> format. It also explains the format in which EDI 820 flat file should be uploaded in the system.
Chapter 31	Deferred Revenue Recognition	Describes how to recognize the deferred revenue in the system. It explains how to create a deferred revenue recognition template for each distribution code and contract type combination. It also explains how to generate the schedule for a deferred revenue recognition. In addition, it explains how to edit the deferred revenue recognition schedule.
Chapter 32	Reconciliation	Describes how to reconcile pay instructions received from the external system against the bill segments based on the account identifier, policy number, plan number, member identifier, and coverage period combination. It explains the CSV and EDI 820 file formats in which you can upload the pay instructions. It also explains how to create reconciliation types, reconciliations, discrepancy report types, and discrepancy reports in the system.
Chapter 33	Self-Funded Pricing	Explains how to create the following in the system: <ul style="list-style-type: none"> <li>• Claim, Specific Stop-Loss, Aggregate Stop-Loss, Retention Type Claim Based, Retention Type Enrollment Based, One-Time Flat Fees, Bill Period Based Recurring Flat Fees, Frequency Based Recurring Flat Fees, Ancillary, Discount, and Level-Funded pricing rule types</li> <li>• Claim, Specific Stop-Loss, Aggregate Stop-Loss, Retention Type Claim Based, Retention Type Enrollment Based, Ancillary, and Level-Funded pricing rules for the parent customers and the policies of the bill groups</li> <li>• One-Time Flat Fees, Bill Period Based Recurring Flat Fees, and Frequency Based Recurring Flat Fees pricing rules for the policies of the bill groups</li> <li>• Discount pricing rules for the parent customers</li> </ul>
Chapter 34	Stop-Loss	Explains how to accumulate the specific stop-loss and aggregate stop-loss and create billable charges for them.
Chapter 35	Self-Funded Billing	Explains the billing process for the self-funded plans.
Chapter 36	Fully-Insured Pricing	Explains how to create the following in the system: <ul style="list-style-type: none"> <li>• Age Based, Tier Based, and Pass-Through Billable Charge pricing rule types</li> <li>• Age Based and Tier Based pricing rules for the fully-insured group policy plans</li> </ul>

Chapter Number	Chapter Name	Chapter Description
Chapter 37	Fully-Insured Group Billing	Explains how the system creates the fully-insured pass-through billable charges.
Chapter 38	Off-Process Request	Describes how to amend the agreed limits, funds, or calculated amounts of the accumulation products within the policy period through an off-process request. It explains how to create the off-process request types and off-process requests in the system.
Chapter 39	Entity Audit	Explains how to use the entity audit framework to track various actions, such as add, update, and delete for an entity.
Chapter 40	Invoice Request	Describes how to create adhoc regular and trial bills for an account through an invoice request. It explains how to create the invoice request types and invoice requests in the system.
Appendix A	Most Commonly Used Tasks	Lists and describes some of the common tasks that you may perform while using the application.
Appendix B	Administration	Describes how to create UI maps and set various feature configurations in the system.

## Conventions

---

The following conventions are used across this document:

Convention	Meaning
<b>boldface</b>	Boldface indicates graphical user interface elements associated with an action, or terms defined in the text.
<i>italic</i>	Italic indicates a document or book title.
Monospace	Monospace indicates information that an end-user needs to enter in the application.

## Fully-Insured Group Customer Management

---

### Topics:

- [Fully-Insured Entities](#)

A fully-insured group health plan is the traditional way to structure an employer-sponsored health plan. In the fully-insured group health plan, the employer contracts an insurance company to cover the employees and dependents. The employer pays a premium to the insurance carrier. The premium rates are fixed for a year, based on the number of employees enrolled in the plan each month. The monthly premium changes during the year when the number of enrolled employees in the plan changes. The insurance carrier collects the premiums and pays the health insurance claims based on the coverage benefits outlined in the policy. The covered persons (i.e. employees and dependents) are responsible to pay any deductible amounts or co-payments required for covered services under the policy.

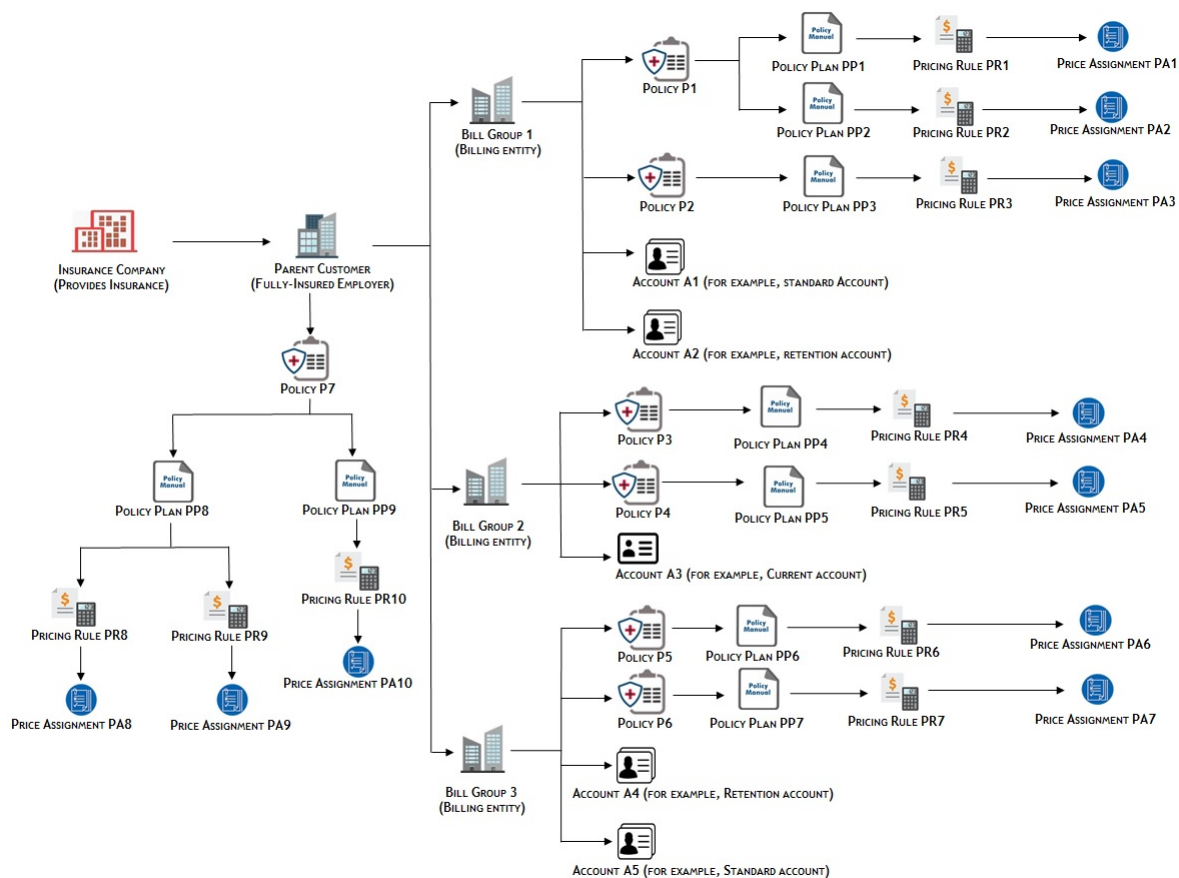

The system enables you to create customers and accounts for the fully-insured group health insurance business. This chapter explains how to create different entities involved in the fully-insured group health insurance business.

## Parent Customer

The fully-insured employers must be defined as parent customers in the system. You can define a person as the parent customer by setting its person type to **Parent Customer**. You can create a parent customer through a customer registration object or a health care inbound message.

## Bill Groups

The system allows you to define one or more bill groups for a parent customer. The membership premium of the employees are billed to a bill group. Each bill group will handle the membership premium of employees based on the employee attributes, such as location, employment status, employment department, and so on. The system allows you to define the derivation and pricing parameters, such as source system, parameter 1, parameter 2, parameter 3, and parameter 4 for a bill group. These parameters are used to derive the bill group against which the membership premium should be billed in the system. You can define a person as the bill group by setting its person type to **Bill Group**. The bill groups should be defined as the child persons of the parent customer (i.e. fully-insured employer) using the relationship type which is specified in the **Person Relationship Type** option type of the **C1-ASOBLNG** feature configuration. You can create a bill group through a customer registration object or a health care inbound message.

### Related Topics

For more information on...	See...
Bill Group Derivation and Pricing Parameters	<a href="#">Bill Group Derivation and Pricing Parameters</a> on page 2872
How to setup the <b>C1-ASOBLNG</b> feature configuration	<a href="#">Setting the C1-ASOBLNG Feature Configuration</a> on page 3215

## Bill Group's Account

The membership premium of employees are billed to the bill group's account. Therefore, every bill group should have at least one account in the system. You can create multiple accounts for a bill group. You can create an account for a bill group through a customer registration object or a health care inbound message.

Depending on the employer's preference, the charges for one or more membership and price item combinations can be billed on the same or different accounts of the bill group. The system enables you to create different types of accounts (such as, MEDCARE1 and MEDCARE2) for a bill group. You can specify the type of account by defining the **Invoice Type (C1INVTYP)** characteristic for the account.

**Note:** At present, we have not shipped any predefined values for the **Invoice Type (C1INVTYP)** characteristic type. You must define the predefined characteristic values as per the business requirements.

You can also set the priority for an account based on the invoice type while specifying the billing account information for a price item in a pricing rule type. For example,

Price Item	Priority	Invoice Type	Account
P1	10	MEDCARE1	A1
	20	MEDCARE2	A2
P2	10	MEDCARE2	A2
	20	MEDCARE1	A1

Now, when the effective pricing rule is derived for P1 on the policy plan, the system checks whether an account where the **Invoice Type (C1INVTYP)** characteristic type is set to **MEDCARE1** exists for the bill group. If so, it considers the account (A1) of the bill group for billing. However, if an account where the **Invoice Type (C1INVTYP)** characteristic type is set to **MEDCARE1** does not exist for the bill group, the system checks whether an account where the **Invoice**

**Type (C1INVTYP)** characteristic type is set to **MEDCARE2** exists for the bill group. If so, it considers the account (A2) of the bill group for billing. If an account where the **Invoice Type (C1INVTYP)** characteristic type is set to **MEDCARE2** does not exist for the bill group, the status of the record in the **CI\_REPRC\_ENTITY\_DTL** table is set to **Error (E)**.

Similarly, when the effective pricing rule is derived for P2 on the policy plan, the system considers the account of the bill group which is available based on the priority. The system derives the billing account for only those price items for which the effective pricing rule is derived.

The system searches the account of the bill group based on the priority when the **Invoice Type Characteristic Type** option type of the **C1-ASOBLNG** feature configuration is set to **C1INVTYP**.

### Related Topics

For more information on...	See...
How to setup the <b>C1-ASOBLNG</b> feature configuration	<a href="#">Setting the C1-ASOBLNG Feature Configuration</a> on page 3215

## Fully-Insured Group Policy

You can create a fully-insured group policy using a policy type where the policy category is set to **Fully-Insured Group**. You can create a fully-insured group policy through a customer registration object or a health care inbound message. If the fully-insured group policy information is given for a bill group in a health care inbound message, the system does the following:

- Associates the bill group with the policy using the policy person role which is specified in the **Bill Group Policy Person Role** option type of the **C1-ASOBLNG** feature configuration
- Associates the parent customer with the policy using the policy person role which is specified in the **Parent Customer Policy Person Role** option type of the **C1-ASOBLNG** feature configuration

However, if the fully-insured group policy information is given for a parent customer in a health care inbound message, the system does the following:

- Associates the parent customer with the policy using the policy person role which is specified in the **Parent Customer Policy Person Role** option type of the **C1-ASOBLNG** feature configuration

**Note:** At present, the **Fully-Insured Individual** policy category is not yet supported in the system.

## Policy Plans

A fully-insured group policy may cover various plans for medical, dental, or disability benefits. You can subscribe a person for one or more policy plans within or across policies. The system creates one membership for each person who is subscribed to the policy plan. You can then add dependent members in each membership whenever required.

While creating a policy plan, you need to specify either a price item or at least one pricing rule type. The price item given in the policy plan is used to create a pass-through billable charge for pre-calculated premium amount which is received in a membership inbound message.

Alternatively, you can associate a pricing rule type with a policy plan. You can only associate a pricing rule type where the pricing rule type category is set to **Age Based**, **Tier Based**, or **Pass-Through Billable Charge**. If you associate an age based pricing rule type with the policy plan, the system creates the SQI based billable charge whenever the membership premium is calculated for eligible members. If you associate a tier based pricing rule type with the policy plan, the system creates the SQI based billable charge whenever the premium is calculated for membership. However, if you associate a pass-through billable charge pricing rule type with the policy plan, the system creates an SQI based billable charge using the pass-through billable charge pricing rule type whenever the price item information is given, but the account information is not given in a health care inbound message. Note that if both the price item and account details are given in the billable charge information, the system directly creates the SQI based billable charge for the pre-calculated premium and does not refer the pass-through billable charge pricing rule type which is associated with the policy plan.

## Price Items

Each service offered in the fully-insured group health plan should be defined as a price item in the system. You can define a price item from the user interface. You must add the price item in a pricing rule type. The system then enables you to create a pricing rule for a price item using the respective pricing rule type.

## Pricing Rule Types

You can create a pricing rule using the respective pricing rule type. The system enables you to create pricing rule types of the following categories for the fully-insured group health plan through a health care inbound message:

Pricing Rule Type	Pricing Rule Type Category	Sample Shipped with the Product
Age Based	Age Based	AGE_BASED
Tier Based	Tier Based	TIER_BASED
Pass-Through Billable Charge	Pass-Through Billable Charge	FI_PASSTBC

**Note:** You cannot define a pricing rule using a pricing rule type where the pricing rule type category is set to **Pass-Through Billable Charge**.

## Pricing Rules

The fully-insured group health plan may offer various services to the employer, such as medical insurance, dental insurance, vision care, life insurance, short-term and long-term disability benefits, and so on. Oracle Revenue Management and Billing enables you to define pricing rules for various services offered in the fully-insured group health plan. The below table lists the pricing rules which you can define for the following services offered in the fully-insured group health plan:

Service	Pricing Rule	Created for....
Medical Insurance, Dental Insurance, Vision Care, Life Insurance, Short-Term and Long-Term Disability Benefits, etc.	Age Based	Fully-Insured Group Policy Plan
	Tier Based	Fully-Insured Group Policy Plan

You can create the above mentioned pricing rules for the fully-insured group policy plans through a health care inbound message and not from the user interface. The system creates a price assignment for each pricing rule. In the age based pricing rules, you can define different premium fee for employees who belong different age band. You can also offer different premium fee for the employees with the same age band, but with the different set of attributes. The system also enables you to charge additional fee for the eligible member based on certain modifiers. For example, you can charge additional fee when the eligible member is alcoholic and/or consumes tobacco. However, in the tier based pricing rules, you can define different premium fee for employees who belong to different membership tier, such as Employee (E), Employee + Spouse (ES), Employee + Spouse + Children (F), and so on.

The system searches for the pricing rule of a price item (i.e. service) on the policy plan to which the membership belongs. If the effective pricing rule for a price item is not available on the policy plan, the system does not consider the respective price item for billing.

## Price Assignments

The system creates a price assignment for each fully-insured pricing rule. If different premium fee is defined for employees with different set of employee attributes, then the system creates a separate price component for each set of employee attributes. If the modifiers are used in the age based pricing rule, the system creates a price component for each modifier. In the price component, the age band or tier band parameter, the employee attributes, and modifiers are used to define the pricing eligibility criteria. Once the age based or tier based pricing rule is defined for a policy plan, the system creates a price item pricing and price list, and then assigns the price item pricing to the price list.

# Chapter 2

---

## Self-Funded Customer Management

---

### Topics:

- [Self-Funded Entities](#)

Self-funded health insurance, also known as Administrative Services Only (ASO), is a self insurance arrangement whereby an employer provides health or disability benefits to employees using the company's own funds. In self-funded health plan, employers operate their own health plan. However, in the fully-insured group health plan, the employer contracts an insurance company to cover the employees and dependents. Employers choose to self-insure because it allows them to save the profit margin that an insurance company adds to its premium for a fully-insured group health plan. However, self-insuring exposes the company to much larger risk in the event that more claims than expected must be paid.

Oracle Revenue Management and Billing (ORMB) supports the following types of self-funding approach:

- **Fully Self-Funded** - In the fully self-funded approach, the employer retains all the risk and bears the claim costs irrespective of any limit.
- **Partially Self-Funded** - In the partially self-funded approach, the employer purchases reinsurance or stop loss coverage to pass the risk to insurance company.

The system enables you to create customers and accounts for the self-funded health insurance business. This chapter explains how to create different entities involved in the self-funded health insurance business.

For more information on...	See...
Self-Funded Entities	<a href="#">Self-Funded Entities</a> on page 64

## Self-Funded Entities

The following figure graphically represents the different entities involved in the self-funded health insurance business:

For more information on...	See...
<b>Parent Customer</b>	<a href="#">Parent Customer</a> on page 65
<b>Bill Group</b>	<a href="#">Bill Groups</a> on page 65
<b>Bill Group's Account</b>	<a href="#">Bill Group's Account</a> on page 65
<b>Self-Funded Policy</b>	<a href="#">Self-Funded Policy</a> on page 66
<b>Price Items</b>	<a href="#">Price Items</a> on page 66
<b>Pricing Rule Types</b>	<a href="#">Pricing Rule Types</a> on page 66
<b>Pricing Rules</b>	<a href="#">Pricing Rules</a> on page 67
<b>Price Assignments</b>	<a href="#">Price Assignments</a> on page 68

## Parent Customer

The self-funded employers must be defined as parent customers in the system. You can define a person as the parent customer by setting its person type to **Parent Customer**. You can create a parent customer through a customer registration object or a health care inbound message.

## Bill Groups

The system allows you to define one or more bill groups for a parent customer. The claim, enrollment, and ancillary transactions of the employees are billed to a bill group. Each bill group will handle the claim, enrollment, and ancillary transactions of employees based on the employee attributes, such as location, employment status, employment department, and so on. The system allows you to define the derivation and pricing parameters, such as source system, parameter 1, parameter 2, parameter 3, and parameter 4 for a bill group. These parameters are used to derive the bill group against which the claim, enrollment, and ancillary charges should be billed in the system. The derived bill group is also used for billing the claim based fees, specific stop-loss credits, aggregate stop-loss credits, discount, and level funding charges.

You can define a person as the bill group by setting its person type to **Bill Group**. The bill groups should be defined as the child persons of the parent customer (i.e. self-funded employer) using the relationship type which is specified in the **Person Relationship Type** option type of the **C1-ASOBLNG** feature configuration. You can create a bill group through a customer registration object or a health care inbound message.

### Related Topics

For more information on...	See...
Bill Group Derivation and Pricing Parameters	<a href="#">Bill Group Derivation and Pricing Parameters</a> on page 2872
How to setup the <b>C1-ASOBLNG</b> feature configuration	<a href="#">Setting the C1-ASOBLNG Feature Configuration</a> on page 3215

## Bill Group's Account

The claim charges, specific stop-loss credits, aggregate stop-loss credits, claim based fees, enrollment based fees, ancillary charges, discount, and level funding charges are billed to the bill group's account. Therefore, every bill group should have at least one account in the system. You can create multiple accounts for a bill group. You can create an account for a bill group through a customer registration object or a health care inbound message.

Depending on the employer's preference, the claim charges, specific stop-loss credits, aggregate stop-loss credits, claim based fees, enrollment based fees, ancillary charges, discount, and level funding charges can be billed on the same or different accounts of the bill group. The system enables you to create different types of accounts (such as, standard and retention) for a bill group. You can specify the type of account by defining the **Invoice Type (C1INVTYP)** characteristic for the account.

**Note:** At present, we have not shipped any predefined values for the **Invoice Type (C1INVTYP)** characteristic type. You must define the predefined characteristic values as per the business requirements.

You can also set the priority for an account based on the invoice type while specifying the billing account information for a price item in a pricing rule type. For example,

Price Item	Priority	Invoice Type	Account
P1	10	Standard	A1
	20	Retention	A2
P2	10	Retention	A2

Price Item	Priority	Invoice Type	Account
	20	Standard	A1

Now, when a claim transaction is mapped to P1, the system checks whether an account where the **Invoice Type (C1INVTYP)** characteristic type is set to **Standard** exists for the bill group. If so, it considers the standard account (A1) of the bill group for billing. However, if an account where the **Invoice Type (C1INVTYP)** characteristic type is set to **Standard** does not exist for the bill group, the system checks whether an account where the **Invoice Type (C1INVTYP)** characteristic type is set to **Retention** exists for the bill group. If so, it considers the retention account (A2) of the bill group for billing. If an account where the **Invoice Type (C1INVTYP)** characteristic type is set to **Retention** does not exist for the bill group, the status of the transaction is changed to **Error**.

Similarly, when a claim transaction is mapped to P2, the system considers the account of the bill group which is available based on the priority. The system derives the billing account for only those price items for which the effective pricing rule is derived.

The system searches the account of the bill group based on the priority when the **Invoice Type Characteristic Type** option type of the **C1-ASOBLNG** feature configuration is set to **C1INVTYP**.

### Related Topics

For more information on...	See...
How to setup the <b>C1-ASOBLNG</b> feature configuration	<a href="#">Setting the C1-ASOBLNG Feature Configuration</a> on page 3215

## Self-Funded Policy

You can create a self-funded policy using a policy type where the policy category is set to **Self-Funded**. You can create a self-funded policy through a customer registration object or a health care inbound message. If the self-funded policy information is given for a bill group in a health care inbound message, the system does the following:

- Associates the bill group with the policy using the policy person role which is specified in the **Bill Group Policy Person Role** option type of the **C1-ASOBLNG** feature configuration
- Associates the parent customer with the policy using the policy person role which is specified in the **Parent Customer Policy Person Role** option type of the **C1-ASOBLNG** feature configuration

## Price Items

Each service offered in the self-funded plan should be defined as a price item in the system. You must add the price item in a pricing rule type. The system then enables you to create a pricing rule for a price item using the respective pricing rule type.

You can define a price item and associate the required parameters with the price item from the user interface. You can use the price item parameters for defining multi parameter based pricing or for aggregating the transactions.

## Pricing Rule Types

You can create a pricing rule using the respective pricing rule type. The system enables you to create pricing rule types of the following categories for the self-funded plan from the user interface:

Pricing Rule Type	Pricing Rule Type Category	Sample Shipped with the Product
Claim	Claim	CLAIM
Retention Type Claim Based	Retention Type Claim Based	RETCLMBSD
Discount Share	Discount Arrangement	DISSHARE
Discount Guarantee	Discount Arrangement	DISGUAR

Pricing Rule Type	Pricing Rule Type Category	Sample Shipped with the Product
One-Time Flat Fees	Flat Fees	ONETIMEFLATFEES
Bill Period Based Recurring Flat Fees	Flat Fees	RECFLATFEES_BP
Frequency Based Recurring Flat Fees	Flat Fees	RECFLATFEES_FREQ
Retention Type Enrollment Based	Retention Type Enrollment Based	RETENRLBSD
Ancillary	Ancillary	ANCILLARY
Specific Stop-Loss	Specific Stop-Loss	SSL
Aggregate Stop-Loss	Aggregate Stop-Loss	ASL
Enrollment Based Premium	Level Funded	LVLLENRLPRE
Flat Rate Based Premium	Level Funded	LVLFLATPRE

## Pricing Rules

The self-funded plan may offer various services to the employer, such as claim administration, reinsurance or stop-loss, discount or level funding arrangement, and so on. Oracle Revenue Management and Billing enables you to define pricing rules for various services offered in the self-funded plan. The below table lists the pricing rules which you can define for the following services offered in the self-funded plan:

Service	Pricing Rule	Created for....
Claim Administration	Claim	Parent Customer
Claim Administration	Claim	Bill Group's Policy where the Parent Customer is the Policy Holder
Claim Administration	Retention Type Claim Based	Parent Customer
Claim Administration	Retention Type Claim Based	Bill Group's Policy where the Parent Customer is the Policy Holder
Claim Administration	Discount Share	Parent Customer
Claim Administration	Discount Guarantee	Parent Customer
Claim Administration	One-Time Flat Fees	Bill Group's Policy where the Parent Customer is the Policy Holder
Claim Administration	Bill Period Based Recurring Flat Fees	Bill Group's Policy where the Parent Customer is the Policy Holder
Claim Administration	Frequency Based Recurring Flat Fees	Bill Group's Policy where the Parent Customer is the Policy Holder
Enrollment	Retention Type Enrollment Based	Parent Customer
Enrollment	Retention Type Enrollment Based	Bill Group's Policy where the Parent Customer is the Policy Holder
Ancillary, such as Laboratory, Radiology, Pharmacy, Physical Therapy, or Preventive Care	Ancillary	Parent Customer

Service	Pricing Rule	Created for....
Ancillary, such as Laboratory, Radiology, Pharmacy, Physical Therapy, or Preventive Care	Ancillary	Bill Group's Policy where the Parent Customer is the Policy Holder
Stop-Loss	Specific Stop-Loss	Parent Customer
Stop-Loss	Specific Stop-Loss	Bill Group's Policy where the Parent Customer is the Policy Holder
Stop-Loss	Aggregate Stop-Loss	Parent Customer
Stop-Loss	Aggregate Stop-Loss	Bill Group's Policy where the Parent Customer is the Policy Holder
Level Funding Arrangement	Enrollment Based Premium	Parent Customer
Level Funding Arrangement	Enrollment Based Premium	Bill Group's Policy where the Parent Customer is the Policy Holder
Level Funding Arrangement	Flat Rate Based Premium	Parent Customer
Level Funding Arrangement	Flat Rate Based Premium	Bill Group's Policy where the Parent Customer is the Policy Holder

You can create the above mentioned self-funded pricing rules for a parent customer or for the policy of the bill group from the user interface and not through a health care inbound message.

The system creates a price assignment for each pricing rule. In case of the retention type claim and enrollment based pricing rules, the system creates multiple price assignments when different claim based or enrollment based fee is offered for employees with different set of employee attributes.

The system first searches for the pricing rule of a price item (i.e. service) at the bill group level. If the effective pricing rule for a price item is available at the bill group level, the system uses it for deriving the price assignment. However, if the effective pricing rule for a price item is not available at the bill group level, the system searches for the pricing rule of a price item at the parent customer level. If the effective pricing rule for a price item is available at the parent customer level, the system uses it for deriving the price assignment. However, if the effective pricing rule for a price item is not available at the bill group or parent customer level, the system does not consider the respective price item for billing.

## Price Assignments

The system creates a price assignment for each self-funded pricing rule. In case of the retention type claim and enrollment based pricing rules, the system creates multiple price assignments when different claim based or enrollment based fee is offered for employees with different set of employee attributes.

The system automatically creates a price assignment whenever you create a self-funded pricing rule. The system creates the price assignment in a price list and assigns the price list to the parent customer or bill group. The system creates multiple price assignments when you define a pricing rule for a policy of a bill group using a pricing group.

## Health Insurance Business Management

---

### Topics:

- [Policy Type](#)
- [Policy Person Role](#)
- [Contract Relationship Type](#)
- [Source System Extendable Lookup](#)
- [Extendable Lookup \(Source System\)](#)
- [Pricing Parameters](#)
- [Geographic Rating Area](#)
- [Member Relationship Pricing Parameter](#)
- [Subscription Tier Pricing Parameter](#)
- [Medicare Benefits](#)
- [Medicare Plan Benefit Package](#)
- [Geographic Rating Area Preference](#)
- [Member Relationship and Subscription Tier Preference](#)

Health insurance is a type of insurance coverage that typically pays for medical, surgical, prescription drug and sometimes dental expenses incurred by the insured. Health insurance can reimburse the insured for expenses incurred from illness or injury, or pay the care provider directly. It is often included in employer benefit packages as a means of enticing quality employees, with premiums partially covered by the employer but often also deducted from employee paychecks.

Oracle Revenue Management and Billing has extended its pricing and billing engines to meet the requirements of the following two lines of health insurance business:

- [Fully-Insured Group Health Insurance](#) on page 211
- [Self-Funded Group Health Insurance](#) on page 359

To use the pricing and billing engines for the above two lines of health insurance business, you need to set the respective prerequisites:

Line of Business	Prerequisites
Fully-Insured Group Health Insurance	Refer to the <a href="#">Pre-requisites</a> on page 213 section.
Self-Funded Group Health Insurance	Refer to the <a href="#">Pre-requisites</a> on page 361 section.

## Policy Type

Oracle Revenue Management and Billing enables you to define a policy type using which you can create a policy. The policy type helps the system to determine:

- **Policy Category** - The category implies the line of business in the health insurance domain for which the policy should be created using the policy type. The valid values are:
  - Fully-Insured Group
  - Fully-Insured Individual
  - Self-Funded

**Note:** At present, the **Fully-Insured Individual** policy category is not supported in the system.

- **Policy Business Object** - The business object using which the policy should be created in the system. You can specify the **C1-POLICY** or **C1-ASOPolicy** business object depending on whether you want to create the policy type for the fully-insured group or self-funded health insurance business.

The **Policy Type** screen allows you to define, edit, copy, and delete a policy type. It contains the following zones:

- [Policy Type List](#) on page 70
- [Policy Type](#) on page 71

### Policy Type List

The **Policy Type List** zone lists the policy types that are already defined in the system. It contains the following columns:

Column Name	Column Description
Policy Type	Displays the policy type.
Description	Displays the description of the policy type.
Policy Category	Indicates the category to which the policy type belongs. The valid values are: <ul style="list-style-type: none"> <li>• Self-Funded</li> <li>• Fully-Insured Group</li> <li>• Fully-Insured Individual</li> </ul>
Edit	On clicking the <b>Edit</b> (  ) icon, the <b>Policy Type</b> screen appears where you can edit the details of the policy type.
Duplicate	On clicking the <b>Duplicate</b> (  ) icon, the <b>Policy Type</b> screen appears where you can define a new policy type using an existing policy type.
Delete	On clicking the <b>Delete</b> (  ) icon, you can delete the policy type. <p><b>Note:</b> You can delete a policy type when a policy is not created using the policy type.</p>

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

On clicking the **Broadcast** () icon corresponding to a policy type, the **Policy Type** zone appears with the details of the respective policy type.

You can filter the list using the **Policy Category** field available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (  ) icon in the upper right corner of this zone.

## Policy Type

The **Policy Type** zone displays the details of the policy type. It contains the following sections:

- **Main** - Displays basic information about the policy type. It contains the following fields:

Field Name	Field Description
Policy Type	Displays the policy type.
Policy Business Object	Indicates the business object using which the policy should be created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.
Description	Displays the description of the policy type.
Status	Indicates the status of the policy type. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>
Policy Category	Indicates the category to which the policy type belongs. The valid values are: <ul style="list-style-type: none"> <li>• Self-Funded</li> <li>• Fully-Insured Group</li> <li>• Fully-Insured Individual</li> </ul>
Detailed Description	Displays additional information about the policy type.

- **Characteristics** - Lists the characteristics defined for the policy type. It contains the following columns:

Column Name	Column Description
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- **Record Actions** - This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the policy type.

Button Name	Button Description
Delete	Used to delete the policy type.
	<b>Note:</b> You can delete a policy type when a policy is not created using the policy type.
Duplicate	Used to create a new policy type using an existing policy type.

- **Record Information** - This section contains the following field:

Field Name	Field Description
Business Object	Indicates the business object using which the policy type is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.

By default, the **Policy Type** zone does not appear in the **Policy Type** screen. It appears when you click the **Broadcast** (📡) icon corresponding to the policy type in the **Policy Type List** zone.

## Defining a Policy Type

### Prerequisites

To define a policy type, you should have:

- Required policy business object defined in the application

**Note:** The **C1-POLICY** and **C1-ASOPolicy** business objects are shipped with the product. You can use the **C1-POLICY** business object to create a fully-insured group policy and the **C1-ASOPolicy** business object to create a self-funded policy.

### Procedure

To define a policy type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **P** and then click **Policy Type**.  
A sub-menu appears.
3. Click the **Add** option from the **Policy Type** sub-menu.

The **Policy Type** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the policy type.

- **Characteristics** - Used to define the characteristics for the policy type.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Policy Type	Used to specify the policy type.	Yes
Business Object	Indicates the business object using which you are defining the policy type.	Not applicable
Policy Business Object	Used to indicate the business object using which you want to create a policy.	Yes
Description	Used to specify the description for the policy type.	Yes
Status	Used to indicate the status of the policy type. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>	Yes
Policy Category	Used to indicate the category to which the policy type belongs. The valid values are: <ul style="list-style-type: none"> <li>• Fully-Insured Group</li> <li>• Fully-Insured Individual</li> <li>• Self-Funded</li> </ul>	Yes
	<b>Note:</b> At present, the <b>Fully-Insured Individual</b> policy category is not supported in the system.	
Detailed Description	Used to specify additional information about the policy type.	No

**Tip:** Alternatively, you can access this screen by clicking the **Add** button in the **Page Title** area of the **Policy Type** screen.

4. Enter the required details in the **Main** section.

**Note:** If you want to create a policy type for the fully-insured group health insurance business, select the **C1-POLICY** business object from the **Policy Business Object** list and the **Fully-Insured Group** option from the **Policy Category** list. However, if you want to create a policy type for the self-funded health insurance business, select the **C1-ASOPolicy** business object from the **Policy Business Object** list and the **Self-Funded** option from the **Policy Category** list.

5. Define the characteristics for the policy type, if required.
6. Click **Save**.

The policy type is defined.

### **Related Topics**

How to define a characteristic for a policy type	<a href="#">Defining a Characteristic for a Policy Type</a> on page 74

## Defining a Characteristic for a Policy Type

### Prerequisites

To define a characteristic for a policy type, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Policy Type**).

### Procedure

To define a characteristic for a policy type:

1. Ensure that the **Characteristics** section is expanded when you are defining, editing, or copying a policy type.

The **Characteristics** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Type	Used to indicate the characteristic type.	Yes (Conditional)
	<b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to the <b>Policy Type</b> .	<b>Note:</b> This field is required when you are defining a characteristic for the policy type.
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional)
	<b>Note:</b> If you select a predefined characteristic type, the <b>Search</b> (🔍) icon appears corresponding to the <b>Characteristic Value</b> field. On clicking the <b>Search</b> icon, the <b>Predefined Characteristic Search</b> window appears.  On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	<b>Note:</b> This field is required when you are defining a characteristic for the policy type.

2. Enter the required details in the **Characteristics** section.
3. If you want to define more than one characteristic for the policy type, click the **Add** (+) icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from the policy type, click the **Delete** (🗑️) icon corresponding to the characteristic.

## Editing a Policy Type

### Prerequisites

To edit a policy type, you should have:

- Required policy business object defined in the application

**Note:** The **C1-POLICY** and **C1-ASOPolicy** business objects are shipped with the product. You can use the **C1-POLICY** business object to create a fully-insured group policy and the **C1-ASOPolicy** business object to create a self-funded policy.

### **Procedure**

To edit a policy type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **P** and then click **Policy Type**.  
A sub-menu appears.
3. Click the **Search** option from the **Policy Type** sub-menu.  
The **Policy Type** screen appears.
4. In the **Policy Type List** zone, click the **Edit** (✎) icon in the **Edit** column corresponding to the policy type whose details you want to edit.

The **Policy Type** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the policy type.
- **Characteristics** - Used to define the characteristics for the policy type.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Policy Type	Displays the policy type.	Not applicable
Business Object	Indicates the business object using which you are defining the policy type.	Not applicable
Policy Business Object	Used to indicate the business object using which you want to create a policy.	Yes
Description	Used to specify the description for the policy type.	Yes
Status	Used to indicate the status of the policy type. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>	Yes
Policy Category	Used to indicate the category to which the policy type belongs. The valid values are: <ul style="list-style-type: none"> <li>• Fully-Insured Group</li> <li>• Fully-Insured Individual</li> <li>• Self-Funded</li> </ul>	Yes
	<b>Note:</b> At present, the <b>Fully-Insured Individual</b> policy category is not supported in the system.	

Field Name	Field Description	Mandatory (Yes or No)
Detailed Description	Used to specify additional information about the policy type.	No

**Tip:** Alternatively, you can edit the details of a policy type by clicking the **Edit** button in the **Policy Type** zone.

5. Modify the required details in the **Main** section.
6. Define, edit, or remove characteristics of the policy type, if required.
7. Click **Save**.

The changes made to the policy type are saved.

### Related Topics

## Copying a Policy Type

Instead of creating a policy type from scratch, you can create a new policy type using an existing policy type. This is possible through copying a policy type. On copying a policy type, the details including the characteristics are copied to the new policy type. You can then edit the details, if required.

### Prerequisites

To copy a policy type, you should have:

- Policy type (whose copy you want to create) defined in the application
- Required policy business object defined in the application

**Note:** The **C1-POLICY** and **C1-ASOPolicy** business objects are shipped with the product. You can use the **C1-POLICY** business object to create a fully-insured group policy and the **C1-ASOPolicy** business object to create a self-funded policy.

### Procedure

To copy a policy type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **P** and then click **Policy Type**.  
A sub-menu appears.
3. Click the **Search** option from the **Policy Type** sub-menu.  
The **Policy Type** screen appears.
4. In the **Policy Type List** zone, click the **Duplicate** () icon in the **Duplicate** column corresponding to the policy type whose copy you want to create.

The **Policy Type** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the policy type.
- **Characteristics** - Used to define the characteristics for the policy type.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Policy Type	Used to specify the policy type.	Yes
Business Object	Indicates the business object using which you are defining the policy type.	Not applicable
Policy Business Object	Used to indicate the business object using which you want to create a policy.	Yes
Description	Used to specify the description for the policy type.	Yes
Status	Used to indicate the status of the policy type. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>	Yes
Policy Category	Used to indicate the category to which the policy type belongs. The valid values are: <ul style="list-style-type: none"> <li>• Fully-Insured Group</li> <li>• Fully-Insured Individual</li> <li>• Self-Funded</li> </ul>	Yes
	<b>Note:</b> At present, the <b>Fully-Insured Individual</b> policy category is not supported in the system.	
Detailed Description	Used to specify additional information about the policy type.	No

**Tip:** Alternatively, you can copy a policy type by clicking the **Duplicate** button in the **Policy Type** zone.

5. Enter the required details in the **Main** section.
6. Define, edit, or remove characteristics of the policy type, if required.
7. Click **Save**.

The new policy type is defined.

## Deleting a Policy Type

### Procedure

To delete a policy type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **P** and then click **Policy Type**.  
A sub-menu appears.
3. Click the **Search** option from the **Policy Type** sub-menu.  
The **Policy Type** screen appears.
4. In the **Policy Type List** zone, click the **Delete** () icon in the **Delete** column corresponding to the policy type that you want to delete.  
A message appears confirming whether you want to delete the policy type.

**Note:** You can delete a policy type when a policy is not created using the policy type.

**Tip:** Alternatively, you can delete a policy type by clicking the **Delete** button in the **Policy Type** zone.

5. Click **OK**.  
The policy type is deleted.

## Policy Person Role

Oracle Revenue Management and Billing enables you to specify the role of a person while associating the person to a policy. This helps to indicate whether the person is a policy holder, broker, underwriter, and so on in a policy. The **Policy Person Role** screen allows you to define, edit, and delete a policy person role. It contains the following zone:

- [Policy Person Role List](#) on page 79

### Policy Person Role List

The **Policy Person Role List** zone lists the roles which you can assign to a person in a policy. It contains the following columns:

Column Name	Column Description
Policy Person Role	Displays the policy person role.
Description	Displays the description of the policy person role.
Edit	On clicking the <b>Edit</b> (  ) icon, the <b>Policy Person Role</b> screen appears where you can edit the details of the policy person role.
Delete	On clicking the <b>Delete</b> (  ) icon, you can delete the policy person role.
	<b>Note:</b> You can delete a policy person role when it is not used while associating a person with a policy.

You can define a new policy person role by clicking the **Add** link in the upper-right corner of this zone.

You can filter the list using various search criteria (such as **Policy Person Role** and **Description**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** () icon in the upper-right corner of this zone.

You can change the layout of this zone. For more information on how to change the layout, see [Changing the Layout](#) on page 3208.

## Contract Relationship Type

Oracle Revenue Management and Billing enables you to define various relationship types using which you can relate main subscriber and other dependent persons in a membership. The **Contract Relationship Type** screen allows you to define, edit, and delete such relationship types. It also allows you to filter the contract relationship types using various search criteria.

## Filtering the Contract Relationship Types

### Prerequisites

To filter the contract relationship types, you should have:

- Contract relationship types defined in the application

### Procedure

To filter the contract relationship types:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **C** and then click **Contract Relationship Type**.

The **Contract Relationship Type** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Relationship Type	Used to search a particular contract relationship type.	Yes

- Enter the search criteria in the **Relationship Type** field.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

- Click **Search**.

The search results are filtered based on the specified criteria.

## Defining a Contract Relationship Type

### Procedure

To define a contract relationship type:

- Click the **Admin** link in the **Application** toolbar.  
A list appears.
- From the **Admin** menu, select **C** and then click **Contract Relationship Type**.

The **Contract Relationship Type** screen appears. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Relationship Type	Used to specify the contract relationship type.	Yes
Description	Used to specify the description for the contract relationship type.	Yes

- Enter the required details in the **Contract Relationship Type** screen.
- If you want to define more than one contract relationship type, click the **Add (+)** icon and then repeat step 3.

**Note:** However, if you want to remove a contract relationship type, click the **Delete (🗑)** icon corresponding to the contract relationship type.

- Click **Save**.

The contract relationship type is defined.

## Editing a Contract Relationship Type

### Procedure

To edit a contract relationship type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **C** and then click **Contract Relationship Type**.

The **Contract Relationship Type** screen appears.

3. If required, you can filter the list in the **Contract Relationship Type** screen.

A list of contract relationship types that meet the search criteria appears in the search results. The **Search Results** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Relationship Type	Displays the contract relationship type.	Not applicable
Description	Used to specify the description for the contract relationship type.	Yes

4. Modify the required details in the **Contract Relationship Type** screen.
5. Click **Save**.

The changes made to the contract relationship type are saved.

## Deleting a Contract Relationship Type

### Procedure

To delete a contract relationship type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **C** and then click **Contract Relationship Type**.

The **Contract Relationship Type** screen appears.

3. If required, you can filter the list in the **Contract Relationship Type** screen.

A list of contract relationship types that meet the search criteria appears in the **Search Results** section.

4. Click the **Delete** (🗑) icon corresponding to the contract relationship type that you want to delete.

**Note:** You can delete a contract relationship type when it is not yet used in the system.

5. Click **Save**.

The contract relationship type is deleted.

## **Source System Extendable Lookup**

Oracle Revenue Management and Billing enables you to track the external system from where the fully-insured group or self-funded policies are received for billing. Each external system must be defined in the system using the **Source System (C1-SourceSystemLookup)** extendable lookup.

The **Extendable Lookup Query** screen allows you to search for an extendable lookup. It contains the following zone:

- [Extendable Lookup Search](#) on page 84

### **Extendable Lookup Search**

The **Extendable Lookup Search** zone allows you to search for an extendable lookup. It contains the following two sections:

- **Search Criteria** – The **Search Criteria** section contains the following fields:

<b>Field Name</b>	<b>Field Description</b>	<b>Mandatory (Yes or No)</b>
Business Object	Used to search a particular extendable lookup business object.	No
Description	Used to search extendable lookups with a particular description.	No

**Note:** You must specify at least one search criterion while searching for an extendable lookup.

- **Search Results** – On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

<b>Column Name</b>	<b>Column Description</b>
Business Object	Displays the extendable lookup business object.
Description	Displays the description of the extendable lookup business object.
	<b>Note:</b> It has a link. On clicking the link, the <b>Extendable Lookup</b> screen appears where you can view the details of the respective extendable lookup.

### **Related Topics**

## Searching for the Source System Extendable Lookup

### Procedure

To search for the **Source System** extendable lookup:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **E** and then click **Extendable Lookup**.  
The **Extendable Lookup Query** screen appears.
3. In the **Extendable Lookup Search** zone, enter **C1-SourceSystemLookup** in the **Business Object** field.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

4. Click **Search**.

The **Source System** extendable lookup business object appears in the **Search Results** section.

## Viewing the Values of the Source System Extendable Lookup

### Procedure

To view the values of the **Source System** extendable lookup:

1. Search for the **Source System** extendable lookup in the **Extendable Lookup Query** screen.
2. In the **Search Results** section, click the link in the **Description** column corresponding to the extendable lookup business object whose details you want to view.  
The **Extendable Lookup** screen appears.
3. View the values of the **Source System** extendable lookup in the **Extendable Lookup Value List** zone.

### Related Topics

<b>Extendable Lookup Value List zone</b>	<a href="#">Extendable Lookup Value List</a> on page 86

## Extendable Lookup (Source System)

The **Extendable Lookup** screen allows you to view the values of the **Source System (C1-SourceSystemLookup)** extendable lookup. It also allows you to define, edit, copy, and delete a source system. It contains the following zones:

- [Extendable Lookup Value List](#) on page 86
- [Extendable Lookup Value](#) on page 87

### Extendable Lookup Value List

The **Extendable Lookup Value List** zone lists the values which are already defined for the **Source System** extendable lookup. It contains the following columns:

Column Name	Column Description
Value	Displays the source system.
Description	Displays the description of the source system.
Owner	Indicates who has created the source system. The valid values are: <ul style="list-style-type: none"> <li>• Framework</li> <li>• Base</li> <li>• Customer Modification</li> </ul>
Edit	On clicking the <b>Edit</b> (  ) icon, the <b>Extendable Lookup</b> screen appears where you can edit the details of the source system.
Duplicate	On clicking the <b>Duplicate</b> (  ) icon, the <b>Extendable Lookup</b> screen appears where you can define a new source system using an existing source system.
Delete	On clicking the <b>Delete</b> (  ) icon, you can delete the source system.
	<b>Note:</b> You can delete a source system when it is not yet used in the system.
Detailed Description	Displays additional information about the source system.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation buttons, such as **Previous** and **Next** to navigate between pages.

On clicking the **Broadcast** () icon corresponding to a source system, the **Extendable Lookup Value** zone appears with the details of the respective source system.

You can filter the list using various search criteria (such as, **Value** and **Description**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** () icon in the upper right corner of this zone.

## Extendable Lookup Value

The **Extendable Lookup Value** zone displays the details of the source system. It contains the following sections:

- **Main** – Displays basic information about the source system. It contains the following fields:

Field Name	Field Description
Source System	Displays the source system.
Description	Displays the description of the source system.
Override Description	Displays the overridden description of the source system.
Detailed Description	Displays additional information about the source system.
Status	Indicates the status of the source system. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>

- **Record Actions** – This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the source system.
Delete	Used to delete the source system.
	<b>Note:</b> You can delete a source system when it is not yet used in the system.
Duplicate	Used to create a source system using an existing source system.

- **Record Information** – This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the extendable lookup business object using which the source system is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.
Owner	Indicates who has created the source system. The valid values are: <ul style="list-style-type: none"> <li>• Framework</li> <li>• Base</li> <li>• Customer Modification</li> </ul>

By default, the **Extendable Lookup Value** zone does not appear in the **Extendable Lookup** screen. It appears when you click the **Broadcast** (📡) icon corresponding to the source system in the **Extendable Lookup Value List** zone.

## **Defining a Source System**

### **Procedure**

To define a source system:

1. Search for the **Source System** extendable lookup in the **Extendable Lookup Query** screen.
2. In the **Search Results** section, click the link in the **Description** column corresponding to the extendable lookup business object whose details you want to view.

The **Extendable Lookup** screen appears.

3. Click the **Add** button in the **Page Title** area of the **Extendable Lookup** screen.

The **Extendable Lookup** screen appears. It contains the following section:

- **Main** – Used to specify basic details about the source system.

The **Main** section contains the following fields:

<b>Field Name</b>	<b>Field Description</b>	<b>Mandatory (Yes or No)</b>
Source System	Used to specify the external system from where the policies are received for billing.	Yes
Description	Used to specify the description for the source system.	Yes
Override Description	Used when you want to override the description of the source system.	No
Detailed Description	Used to specify additional information about the source system.	No
Status	Used to indicate the status of the source system. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>	Yes
	<b>Note:</b> By default, the value is set to <b>Active</b> .	

4. Enter the required details in the **Main** section.
5. Click **Save**.

The source system is added in the **C1-SourceSystemLookup** extendable lookup.

## Editing a Source System

### Procedure

To edit a source system:

1. Search for the **Source System** extendable lookup in the **Extendable Lookup Query** screen.
2. In the **Search Results** section, click the link in the **Description** column corresponding to the extendable lookup business object whose details you want to view.  
The **Extendable Lookup** screen appears.
3. In the **Extendable Lookup Value List** zone, click the **Edit** (✎) icon in the **Edit** column corresponding to the source system whose details you want to edit.

The **Extendable Lookup** screen appears. It contains the following section:

- **Main** – Used to specify basic details about the source system.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Source System	Displays the source system.	Not applicable
Description	Used to specify the description for the source system.	Yes
Override Description	Used when you want to override the description of the source system.	No
Detailed Description	Used to specify additional information about the source system.	No
Status	Used to indicate the status of the source system. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>	Yes

**Tip:** Alternatively, you can edit the details of a source system by clicking the **Edit** button in the **Extendable Lookup Value** zone.

4. Modify the required details in the **Main** section.
5. Click **Save**.

The changes made to the source system are saved.

## Copying a Source System

Instead of creating a source system from scratch, you can create a new source system using an existing source system. This is possible through copying a source system. On copying a source system, the details of the source system are copied to the new source system. You can then edit the details, if required.

### Prerequisites

To copy a source system, you should have:

- Source system (whose copy you want to create) defined in the application

### Procedure

To copy a source system:

1. Search for the **Source System** extendable lookup in the **Extendable Lookup Query** screen.
2. In the **Search Results** section, click the link in the **Description** column corresponding to the extendable lookup business object whose details you want to view.

The **Extendable Lookup** screen appears.

3. In the **Extendable Lookup Value List** zone, click the **Duplicate**  icon in the **Duplicate** column corresponding to the source system whose copy you want to create.

The **Extendable Lookup** screen appears. It contains the following section:

- **Main** – Used to specify basic details about the source system.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Source System	Used to specify the external system from where the policies are received for billing.	Yes
Description	Used to specify the description for the source system.	Yes
Override Description	Used when you want to override the description of the source system.	No
Detailed Description	Used to specify additional information about the source system.	No
Status	Used to indicate the status of the source system. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>	Yes

**Tip:** Alternatively, you can copy a source system by clicking the **Duplicate** button in the **Extendable Lookup Value** zone.

4. Enter the required details in the **Main** section.
5. Click **Save**.

The new source system is added in the **C1-SourceSystemLookup** extendable lookup.

**Deleting a Source System****Procedure**

To delete a source system:

1. Search for the **Source System** extendable lookup in the **Extendable Lookup Query** screen.
2. In the **Search Results** section, click the link in the **Description** column corresponding to the extendable lookup business object whose details you want to view.

The **Extendable Lookup** screen appears.

3. In the **Extendable Lookup Value List** zone, click the **Delete** (🗑️) icon in the **Delete** column corresponding to the source system that you want to delete.

A message appears confirming whether you want to delete the source system.

**Note:** You can delete a source system when it is not yet used in the system.

**Tip:** Alternatively, you can delete a source system by clicking the **Delete** button in the **Extendable Lookup Value** zone.

4. Click **OK**.

The source system is deleted from the **C1-SourceSystemLookup** extendable lookup.

## Pricing Parameters

---

Oracle Revenue Management and Billing enables you to create new set of pricing parameters, such as, Geographic Rating Area, Member Relationship, and Subscription Tier for a fully-insured group customer.

To create a geographic rating area pricing parameter the ORMB system uses the policy plan and geographical details (of a member person) to retrieve the appropriate rating area. This rating area is further used to obtain the rate information defined on the pricing rule that is eventually based on a particular geographical rating area. To create a member relationship pricing parameter, the ORMB system retrieves the appropriate member relationship through the post processing algorithm and stamps the retrieved member relationship on the member person belonging to a particular membership. However, to create a subscription tier pricing parameter, the ORMB system retrieves the subscription tier information through the post processing algorithm and stamps the tier information on the desired membership.

For more information on how to setup the **Pricing Parameters** feature, see [Prerequisites](#)

### Related Topics

<b>Geographic Rating Area</b>	<a href="#">Geographic Rating Area</a> on page 92
<b>Member Relationship Pricing Parameter</b>	<a href="#">Member Relationship Pricing Parameter</a> on page 106
<b>Subscription Tier Pricing Parameter</b>	<a href="#">Subscription Tier Pricing Parameter</a> on page 121

## Geographic Rating Area

---

Oracle Revenue Management and Billing enables you to use the geographic rating area as a pricing parameter while defining the age based, tier based, and additional charge pricing rules. This feature facilitates you to offer different rates for a price item based on different geographic rating area.

The system enables you to add and edit a geographic rating area from the user interface. You can also add or edit a set of geographic rating areas at once using the **File Upload Interface** utility. However, note that while editing a geographic rating area, you can only change the end date to a far future date and the status from **Active** to **Inactive**.

While maintaining a geographic rating area in the system, you can also list the policy plans available in the geographic rating area. You can add the policy plan information for a geographic rating area from the user interface or through

the **File Upload Interface** utility. But, you cannot edit the policy plan information of a geographic rating area through the **File Upload Interface** utility.

You can upload the geographic rating areas from the CSV file using the **C1GEORATINGARCSVUPLD** file request type through the **File Transformation and Upload (C1-FTRAN)** batch.

**Note:** You need to set the **Include Plan Or Product Details** parameter in the **C1-GEORAVLD** algorithm to Y or N. If the value for this parameter is set to Y, the system identifies the record using the State, Zip From, Zip Plus4 From, Zip To, Zip Plus4 To, Start Date, Policy Number, Plan Number, and Source System combination. However, if the value for this parameter is set to N, the system identifies the record using the State, Zip From, Zip Plus4 From, Zip To, Zip Plus4 To, and Start Date combination.

Once you define a geographic rating area, the system can derive the geographic rating area for a membership using the **Address Source** and **Address Type** characteristic types. The system supports two address sources named **Policy Holder** and **Main Subscriber** and three address types named **Person Mailing**, **Person Seasonal**, and **Account Override**.

On adding a membership to a policy plan, the system first derives the characteristic types from the **Address Source Characteristic Type** and **Address Type Characteristic Type** attributes of a geographic rating area preference. The system considers the geographic rating area preference which is specified in the **Geographic Rating Area Field Mapping** option type of the **C1-ASOBLLNG** feature configuration. Then, the system searches for these characteristics on the following entities in the specified sequence:

1. Policy Plan
2. State where the Policy Plan is Issued
3. Policy
4. State where the Policy is Issued

If these characteristics are not defined for any of the above listed entities, the system derives the default address source and address type from the geographic rating area preference.

**Note:** By default, the **Address Source (C1-ADSRC)** and **Address Type (C1-ADTYP)** characteristic types are shipped with the product. You need to set these characteristic types in the respective attribute of the geographic rating area preference.

If the address source is set to **Policy Holder**, the system fetches the value from the **Parent Customer Policy Person Role** option type of the **C1-ASOBLLNG** feature configuration. The system then derives the person who is associated with the policy using the parent customer policy person role. Once the address source and address type are derived, the system fetches the state and zip code from the address type of the address source. For example, if the address source is set to **Policy Holder** and address type is set to **Person Mailing**, the system fetches the state and zip code from the policy holder's mailing address. Once the state and zip code are fetched from the address, the system checks whether the zip code is a 9-digit code. If not, the system appends zeros to make it a 9-digit zip code. The system then derives the value of the **Use Plan Details** attribute from the geographic rating area preference. If the attribute is set to **Y**, the system then derives a geographic rating area for the state, zip code, policy number, plan number, and source system combination. However, if the attribute is set to **N**, the system then derives a geographic rating area for the state and zip code combination. If the system could not derive the geographic rating area, the system derives the default geographic rating area from the geographic rating area preference. Once the geographic rating area is derived, the system stores the geographic rating area for the membership. The characteristic type specified in the **Geographic Rating Area Characteristic Type** attribute of the geographic rating area preference is used to store geographic rating area for the membership. The effective date of the characteristic is set to effective date of the address.

The geographic rating area of the membership must be changed when the address of the policy holder or main subscriber is updated. Therefore, when an address of a person is change, the system identifies the following:

- Memberships of policies where the person is the policy holder
- Memberships where the person is the main customer

For each membership, the system searches for the **Address Source** and **Address Type** characteristics on the following entities in the specified sequence:

1. Policy Plan
2. State where the Policy Plan is Issued
3. Policy

#### 4. State where the Policy is Issued

If these characteristics are not defined for any of the above listed entities, the system derives the default address source and address type from the geographic rating area preference. If the address source is set to **Policy Holder**, the system fetches the value from the **Parent Customer Policy Person Role** option type of the **C1-ASOBLNG** feature configuration. The system then derives the person who is associated with the policy using the parent customer policy person role.

Once the address source and address type are derived, the system fetches the state and zip code from the address type of the address source. The system then derives a geographic rating area for the state, zip code, policy number, plan number, and source system combination or for the state and zip code combination depending on the value defined for the **Use Plan Details** attribute. If the system could not derive the geographic rating area, the system derives the default geographic rating area from the geographic rating area preference. If the geographic rating area is different, the system creates a new characteristic to store the geographic rating area for the membership. The effective date of the characteristic is set to effective date of the address.

To use the geographic rating area as a pricing parameter, you need to define the Geographic Rating Area parameter where:

- **Value Type** is set to **Adhoc**
- **Source Entity** is set to **Membership**
- **Source Type** is set to **Characteristic**
- **Source Type Code** is set to a characteristic type which is specified in the **Geographic Rating Area Characteristic Type** attribute of the geographic rating area preference
- **Parameter Usage** is set to **Price Item** and **Pricing Eligibility Criteria**

Once the Geographic Rating Area parameter is defined, you need to associate the parameter with the price items for which you want to define different rates in a pricing rule using the parameter. This helps to define different base fee for a price item based on geographic rating area to which the membership belongs.

A new screen named **Geographic Rating Area** is introduced in this release. It enables you to add, edit, and inactivate a geographic rating area.

## Prerequisites

To create a geographic rating area pricing parameter, you need to do the following:

- Ensure that the upstream system contains the geographic rating area details in **CSV** file.
- Ensure that the **CSV** file is available at the desired path on the server, before the file upload batch is triggered.
- Set the **C1-GeoRatingArea** business object validation soft parameter (**Include Plan Value Details**) to either include or exclude plan details (**Y/N**) before the file is uploaded.
- Include the **C1GEORATINGARCSVUPLD** file request type for file upload purposes.
- Ensure that **C1\_GEO\_RATING\_AREA** and **C1\_GEO\_RATING\_AREA\_REL\_OBJ** tables are populated before any memberships are created in the system for derivation purposes.
- Configure the pricing parameter with the geographic rating area on the pricing rule.
- Define the required **Address Source (C1-ADSRC)** and **Address Type (C1-ADTYP)** characteristic types in the system. Values for these characteristics can be defined either on the policy or plan characteristics level. The address source and address type can also be defined on the state of issue of the policy or plan.
- Define the parent policy role in the **C1-ASOBLNG** feature configuration.
- Define the following billing preferences in the **Field Mapping** screen:
  - Default Address Source
  - Default Address Type
  - Use Plan Details

- Address Source Value for Policy Holder
  - Address Source Value for Main Subscriber
  - Geographic Rating Area Characteristic Type
  - Address Source Characteristic Type
  - Address Type Characteristic Type
- Define the default value for **Geographic Rating Area Characteristic Type** in the **Field Mapping** screen.

## Uploading a Geographic Rating Area File in the CSV Format

To upload a geographic rating area file in the CSV format using the **File Upload Interface** utility, you need to do the following:

- Define a file request type for uploading geographic rating area in the CSV format. To define a file request type:
  1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
  2. From the **Admin** menu, select **F** and then click **File Request Type**.  
A sub-menu appears.
  3. Click the **Add** option from the **File Request Type** sub-menu.  
The **File Request Type** screen appears.
  4. Enter the file request type and description in the respective fields.
  5. Select the **Data Transformation Required** option.  
The **File Format** field is enabled.
  6. Select the **Comma Separated Values** option from the **File Format** list.
  7. Select the Upload and Process File Simultaneously option.
  8. Attach an algorithm created using the **C1-FRTA** algorithm type to the **Data Transformation Algorithm** field.
  9. In the **Services** section, enter the required sequence number.
  10. Select the **Business Object** option from the **Service Type** list.
  11. Enter the **C1-GeoRatingArea** business object or custom price item business object in the **Service Name** field.

12. Select the **Add** or **Update** option from the **Operation** list depending on whether you want to create new geographic rating area details or edit the existing geographic rating area details using the file request type.

13. In the **Field Transformation** section, specify the following details:

Field Name	Field Description	Mandatory (Yes or No)
Sequence	Used to indicate the data field in the CSV record which you want to upload in the system.	Yes
Field Name	Used to indicate the field for which the data is uploaded in the system.	Yes
Map Field XPath	Used to specify the XPath of the field where you want to store the data field from the CSV record.	Yes
Default Value	Used to specify the default value for the field.	No

14. Click **Save**.

The file request type is defined for uploading the geographic rating area in the CSV format.

## CSV File Format for Uploading Geographic Rating Areas

Before uploading a geographic rating area file through the **File Upload Interface** utility, you need to ensure that the CSV file contains the following data:

Data	Description	Mandatory (Yes or No)
GEO_RATING_AREA	Used to specify the geographic rating area.	Yes
STATE	Used to specify the state code which belongs to the geographical rating area.	Yes
ZIP_FROM	Used to specify the zip code from where the geographic rating area begins.	Yes
ZIP_PLUS4_FROM	Used to specify the additional four digits after the zip code from where the geographic rating area begins.	Yes
ZIP_TO	Used to specify the zip code till where the geographic rating area ends.	Yes
ZIP_PLUS4_TO	Used to specify the additional four digits after the zip code till where the geographic rating area ends.	Yes

Data	Description	Mandatory (Yes or No)
START_DT	Used to specify the date from when the geographic rating area is effective.	Yes
END_DT	Used to specify the date till when the geographic rating area is effective.	Yes
PLAN_NBR	Used to specify the plan number belonging to a particular geographical rating area.	No
PRODUCT_CD	Used to specify the product code belonging to a particular geographical rating area.	No
POLICY_NBR	Used to specify the policy number belonging to a particular geographical rating area.	No
SOURCE_SYSTEM	Used to specify the source system from where the policy is originated.	No
STATUS	Used to indicate the status for the geographic rating area. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>	Yes

## Sample CSV Format for Uploading Geographic Rating Areas

The CSV format must contain the following field transformation details that are used for uploading the geographic rating area information in the system:

Sequence	Field Name	Map Field XPath
1	GEO_RATING_AREA	C1-GeoRatingArea/geoRatingArea
2	STATE	C1-GeoRatingArea/state
3	ZIP_FROM	C1-GeoRatingArea/zipFrom
4	ZIP_PLUS4_FROM	C1-GeoRatingArea/zipPlus4From
5	ZIP_TO	C1-GeoRatingArea/zipTo
6	ZIP_PLUS4_TO	C1-GeoRatingArea/zipPlus4To
7	START_DT	C1-GeoRatingArea/startDate

Sequence	Field Name	Map Field XPath
8	END_DT	C1-GeoRatingArea/endDate
9	PLAN_NBR	C1-GeoRatingArea/0/geoRatingAreaRelatedObject/ planNumber
10	PRODUCT_CD	C1-GeoRatingArea/0/geoRatingAreaRelatedObject/ productCode
11	POLICY_NBR	C1-GeoRatingArea/0/geoRatingAreaRelatedObject/ policyNumber
12	SOURCE_SYSTEM	C1-GeoRatingArea/0/geoRatingAreaRelatedObject/ sourceSystem
13	STATUS	C1-GeoRatingArea/boStatus

**Sample CSV**

```

**Geographic Rating Area (Used for Searching)**

The **Geographic Rating Area** screen allows you to search for a geographic rating area using various search criteria. It also allows you to create a geographic rating area. This screen consists of the following zone:

- [Search Geographic Rating Area](#) on page 98

**Search Geographic Rating Area**

The **Search Geographic Rating Area** zone allows you to search for geographic rating area using various search criteria. This zone contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for a geographic rating area detail record using the geographic rating area details or through policy or plan details. The valid values are: <ul style="list-style-type: none"> <li>• Geographic Rating Area Details</li> <li>• Policy or Plan Details</li> </ul>	No
	<b>Note:</b> By default, the <b>Geographic Rating Area Details</b> option is selected.	

Field Name	Field Description	Mandatory (Yes or No)
State Code	Used to search the geographic rating area details belonging to a particular state code.	No
	<b>Note:</b> You must specify a state code which is already defined in the system.	
Geographic Rating Area	Used to search the geographic rating area details based on a geographic rating area.	No
Zip Code From	Used to search the geographic rating area details which are effective from a particular zip code.	No
Zip Code To	Used to search the geographic rating area details which are effective till a particular zip code.	No
Start Date	Used to search the geographic rating area details which are effective from a particular date.	No
	<b>Note:</b> The geographic rating area start date cannot be later than the geographic rating area end date.	
End Date	Used to search the geographic rating area details which are effective till a particular date.	No
	<b>Note:</b> The geographic rating area end date cannot be earlier than the geographic rating area start date	
Status	Used to search the geographic rating area details based on a particular status. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>	No
Policy Number	Used to search the geographic rating area details with a particular policy number.	No
Plan Number	Used to search the geographic rating area details with a particular plan number.	No

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Geographic Rating Area	Displays the geographic rating area.
State Code	Displays the state code to which the geographic rating area belongs.
Zip Code From	Displays the zip code from where the geographic rating area is effective.
Zip Code Plus 4 From	Displays the zip code plus four additional digits which identify from where the geographic rating area is effective.
Zip Code To	Displays the zip code till where the geographic rating area is effective.
Zip Code Plus 4 To	Displays the zip code plus four additional digits which identify till where the geographic rating area is effective.
Start Date	Displays the date from when the geographic rating area is effective.

Column Name	Column Description
End Date	Displays the date till when the geographic rating area is effective.
Status	Indicates the status of the geographic rating area. The valid values are: <ul style="list-style-type: none"> <li>Active</li> <li>Inactive</li> </ul>

**Note:**

Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can filter the list using various search criteria (such as, **State Code, Geographic Rating Area, Zip Code From, Zip Code To, Start Date, End Date, and Status**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the Filters (  ) icon in the upper right corner of this zone.

**Geographic Rating Area**

The **Geographic Rating Area** zone displays the details of the geographic rating area. It contains the following sections:

- Main** - Displays basic information about the geographic rating area. It contains the following fields:

Field Name	Field Description
Geographic Rating Area	Displays information about the geographic rating area.
State Code	Displays the state code to which the geographic rating area belongs.
Zip Code From	Displays the zip code from where the geographic rating area is effective.
Zip Code Plus 4 From	Displays the zip code plus four additional digits which identify from where the geographic rating area is effective.
Zip Code To	Displays the zip code till where the geographic rating area is effective.
Zip Code Plus 4 To	Displays the zip code plus four additional digits which identify till where the geographic rating area is effective.
Start Date	Displays the date from when the geographic rating area is effective.
End Date	Displays the date till when the geographic rating area is effective.
Status	Displays the status of the geographic rating area. The valid values are: <ul style="list-style-type: none"> <li>Active</li> <li>Inactive</li> </ul>

- Plan Details** - Lists the plan information of the geographic rating area. It contains the following columns:

Column Name	Column Description
Policy Number	Displays the policy number which is associated with the geographic rating area.
Plan Number	Displays the plan number of the policy.
Source System	Displays the name of the external system from where the policy is originated.

- **Record Actions** - This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the geographic rating area.
	<b>Note:</b> The <b>Edit</b> button appears when the geographic rating area is in the <b>Active</b> status.
Inactive	Used to change the status of the geographic rating area.
	<b>Note:</b> The <b>Inactive</b> button appears when the geographic rating area is in the <b>Active</b> status.

- **Record Information** - This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the geographic rating area is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.
Status Date/Time	Displays the date and time when the geographic rating area status is updated.
Creation Date/Time	Displays the date and time when the geographic rating area is created.

## Searching for a Geographic Rating Area

### Prerequisites

To search for a geographic rating area, you should have:

- Geographic rating area defined in the application.
- Policy and plan defined in the application.

### Procedure

To search for a geographic rating area:

1. Click the **Admin** link in the **Application** toolbar.

A list appears.

- From the **Admin** menu, select **G** and then click **Geographic Rating Area**.

The **Geographic Rating Area** screen appears.

- Enter the search criteria in the **Search Geographic Rating Area** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

- Click **Search**.

A list of geographic rating area that meet the search criteria appears in the **Search Results** section.

### **Related Topics**

### **Defining a Geographic Rating Area**

#### **Procedure**

To define a geographic rating area

- Click the **Admin** link in the **Application** toolbar.

A list appears.

- From the **Admin** menu, select **G** and then click **Geographic Rating Area**.

The **Geographic Rating Area** screen appears.

- Click the **Add** button in the **Page Title** area of the **Geographic Rating Area** screen.

The **Geographic Rating Area** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the geographic rating area.
- **Plan Details** - Used to specify the plan details for the geographic rating area.

The **Main** section contains the following fields:

<b>Field Name</b>	<b>Field Description</b>	<b>Mandatory (Yes or No)</b>
Geographic Rating Area	Used to specify the geographic rating area.	Yes
State Code	Used to specify the state code which belongs to the geographical rating area. <b>Note:</b> You must specify a state code which is already defined in the system.	Yes
Zip Code From	Used to specify the zip code from where the geographic rating area begins.	Yes
Zip Code Plus 4 From	Used to specify the additional four digits after the zip code from where the geographic rating area begins.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Zip Code To	Used to specify the zip code till where the geographic rating area ends.	Yes
Zip Code Plus 4 To	Used to specify the additional four digits after the zip code till where the geographic rating area ends.	Yes
Start Date	Used to specify the date from when the geographic rating area is effective.	Yes
	<b>Note:</b> The geographic rating area start date cannot be later than the geographic rating area end date.	
End Date	Used to specify the date till when the geographic rating area is effective.	No
	<b>Note:</b> The geographic rating area end date cannot be earlier than the geographic rating area start date	
Status	Used to indicate the status for the geographic rating area. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>	Yes
	<b>Note:</b> You cannot assign an <b>Inactive</b> status to the geographic rating area record while you are defining a geographic rating area.	

4. Enter the required details in the **Main** section.
5. Add the plan details for the geographic rating area, if required.
6. Click **Save**.

The geographic rating area is defined in the **Active** status.

### **Adding the Plan Details for a Geographic Rating Area**

#### **Prerequisites**

To add plan details for a geographic rating area, you should have:

- Policy and plan defined in the application.
- Source system defined in the application.

#### **Procedure**

To add plan details for a geographic rating area:

1. Ensure that the **Plan Details** section is expanded when you are defining or editing the geographic rating area information.

The **Plan Details** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Policy Number	Used to specify the policy number which is associated with the geographic rating area.	No
Plan Number	Used to specify the plan number of the policy.	No
Source System	Used to specify the name of the external system from where the policy is originated.	No

2. Enter the required details in the **Plan Details** section.
3. If you want to define more than one plan information for the geographic rating area, click the **Add (+)** icon and then repeat step 2.

**Note:** However, if you want to remove a plan information from the geographic rating area, click the **Delete (🗑)** icon corresponding to the policy number column.

How to edit a geographic rating area	<a href="#">Editing a Geographic Rating Area</a> on page 104

### Editing a Geographic Rating Area

#### Procedure

To edit a geographic rating area

1. Search for the geographic rating area in the **Geographic Rating Area** screen.
2. In the **Search Results** section, click the **Broadcast (📡)** icon corresponding to the geographic rating area column whose details you want to view.  
The **Geographic Rating Area** zone appears.
3. Click the **Edit** button in the **Geographic Rating Area** screen.

The **Geographic Rating Area** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the geographic rating area.
- **Plan Details** - Used to specify the plan details for the geographic rating area.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Geographic Rating Area	Used to specify the geographic rating area.	Yes
State Code	Used to specify the state code which belongs to the geographical rating area.	Yes
	<b>Note:</b> You must specify a state code which is already defined in the system.	

Field Name	Field Description	Mandatory (Yes or No)
Zip Code From	Used to specify the zip code from where the geographic rating area begins.	Yes
Zip Code Plus 4 From	Used to specify the additional four digits after the zip code from where the geographic rating area begins.	Yes
Zip Code To	Used to specify the zip code till where the geographic rating area ends.	Yes
Zip Code Plus 4 To	Used to specify the additional four digits after the zip code till where the geographic rating area ends.	Yes
Start Date	Used to specify the date from when the geographic rating area is effective.	Yes
	<b>Note:</b> The geographic rating area start date cannot be later than the geographic rating area end date.	
End Date	Used to specify the date till when the geographic rating area is effective.	No
	<b>Note:</b> The geographic rating area end date cannot be earlier than the geographic rating area start date	
Status	Used to indicate the status for the geographic rating area. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>	Yes
	<b>Note:</b> You cannot assign an <b>Inactive</b> status to the geographic rating area record while you are defining a geographic rating area.	

4. Modify the geographic rating area details, if required.
5. Define, edit, or remove plan details for the geographic rating area, if required.
6. Click **Save**.

The changes made to the geographic rating area are saved.

## **Inactivating a Geographic Rating Area**

### **Procedure**

To inactivate a geographic rating area:

1. Search for the geographic rating area in the **Geographic Rating Area** screen.

- In the **Search Results** section, click the **Broadcast** (  ) icon corresponding to the geographic rating area column whose details you want to view. The **Geographic Rating Area** zone appears.
- Click the **Inactive** button in the **Geographic Rating Area** zone. The status of the geographic rating area is changed to **Inactive**.

**Note:** The **Inactive** button appears when the geographic rating area is in the **Active** status.

## Member Relationship Pricing Parameter

Oracle Revenue Management and Billing enables you to use the member relationship (i.e. how a member is related to the main subscriber of the membership) as a pricing parameter while defining the age based, tier based, and additional charge pricing rules. This feature facilitates you to offer different rates for a price item based on different member relationship.

While adding a membership to a policy plan or while adding or inactivating a member person in a membership, the system automatically derives member relationship for each member person of the membership from a member relationship structure. You can define a member relationship structure through a characteristic on the policy plan. While defining a member relationship structure for a policy plan, you must use the characteristic type specified in the **Member Relationship Structure Characteristic Type** attribute of a member relationship and subscription tier preference. The system considers the member relationship and subscription tier preference which is specified in the **Relation Structure Code Field Mapping** option type of the **C1-ASOBLNG** feature configuration.

The system enables you to define two types of member relationship structure:

- **Step Member Relationship Structure** - A step member relationship structure helps the system to determine how each member person is related to the main subscriber of the membership. You can specify a list of member relationships in a step member relationship structure. A member relationship is derived for a member person depending on the following:
  - Whether the member person is a self, spouse, or dependent
  - Number of spouses, dependents, and young adults in the membership

A relationship matrix indicates whether a member person with a particular relationship type should be considered as self, spouse, or dependent while deriving the member relationship. In a step member relationship structure, a spouse is never considered as a dependent. Only children are considered as dependents.

For example, you can create a step member relationship structure named STEPEX1 as shown below:

Member Relationship	Self	Number of Spouses	Number of Dependents	Number of Young Adults
Self	1	0	0	0
Spouse 1	1	1	0	0
Spouse 2	1	2	0	0
Child 1	1	1	1	0
Young Adult 1	1	1	0	1
CD1 and YA1	1	1	1	1
Child 2	1	1	2	0
Young Adult 2	1	1	0	2
CD2 and YA2	1	1	2	2
Additional Dependent	1	3	3	3

**Note:** You can only define one member relationship in a step member relationship structure where the sum of self, number of spouses, number of dependents, and number of young adults exceeds the maximum member count specified in the step member relationship structure.

In addition, you can create a relationship matrix in the STEPEX1 member relationship structure as shown below:

Relation	Relationship Type	Relationship
Main Subscriber	Owner	Self
Main Subscriber	Member	Self
Children	Child	Dependent
Spouse	Wife	Spouse
Spouse	Spouse	Spouse

- **Party Member Relationship Structure** - A party member relationship structure helps the system to determine how each member person is related to the main subscriber of the membership. You can specify a list of member relationships in a party member relationship structure. A member relationship is derived for a member person depending on the following:
  - Whether the member person is a self or dependent
  - Number of dependents in the membership

A relationship matrix indicates whether a member person with a particular relationship type should be considered as self or dependent while deriving the member relationship. In a party member relationship structure, a spouse is always considered as a dependent. Also, children are not categorized as young adults.

For example, you can create a party member relationship structure named PARTYEX1 as shown below:

Member Relationship	Self	Number of Spouses	Number of Dependents	Number of Young Adults
Self	1	0	0	0
Dependent 1	1	0	1	0
Dependent 2	1	0	2	0
Dependent 3	1	0	3	0
Additional Dependents	1	0	9	0

**Note:** You can only define one member relationship in a party member relationship structure where the sum of self and number of dependents exceeds the maximum member count specified in the party member relationship structure.

In addition, you can create a relationship matrix in the PARTYEX1 member relationship structure as shown below:

Relation	Relationship Type	Relationship
Main Subscriber	Owner	Self
Main Subscriber	Member	Self
Children	Child	Dependent
Spouse	Wife	Dependent
Spouse	Spouse	Dependent

Once the member relationship structure is derived from the policy plan, the system determines the member relationship for each member person in the membership. While determining the member relationship for a member person, the system derives the following characteristic types from the respective attributes of the member relationship and subscription tier preference:

- Age Calculation Date Basis
- Max Age Limit for Max Dependent Count
- Max Number of Dependents Order Priority
- Maximum Number of Dependents
- Member Relationship Derivation Date
- New Born Gift Days
- New Born Gift Days Applicability
- Young Adult Max Age Limit
- Young Adult Max Age Limit Applicability

The system then derives these characteristics from the policy plan. If the **Member Relationship Derivation Date** characteristic type is set to **Enrollment Date**, the system derives the member relationship for each member person of the membership in order of the member start date. However, if the Member Relationship Derivation Date characteristic type is set to Date of Birth, the system derives the member relationship for each member person of

the membership in order of the date of birth. For example, if a membership with the following member persons is added to a policy plan:

Member Start Date	Member End Date	Person Name	Main Subscriber	Relationship Type	Member	Date of Birth
1-Jan-18	31-Dec-20	Mark	Yes	Self	Yes	15-Jan-68
1-Jan-18	31-Dec-20	Nancy	No	Wife	Yes	20-Apr-72
1-Jan-18	31-Dec-20	Roger	No	Child	Yes	15-May-01
1-Jan-18	31-Dec-20	Tom	No	Child	Yes	16-May-04

Now, if the following characteristics are defined on the policy plan:

- Member Relationship Structure - STEPEX1
- Member Relationship Derivation Date – Date of Birth
- Age Calculation Date Basis – Enrollment Date
- Maximum Number of Dependents – 3
- Max Number of Dependents Order Priority - YOUNGEST

The system will consider the STEPEX1 member relationship structure and derives the member relationship for each member person as shown below:

Member Person	Effective Date	Characteristic Type	Characteristic Value
Mark	1-Jan-18	Member Relationship	Self
Nancy	1-Jan-18	Member Relationship	Spouse 1
Tom	1-Jan-18	Member Relationship	Child 1
Roger	1-Jan-18	Member Relationship	Child 2

Note that the member relationship of Tom is derived before Roger because he is youngest of all dependents. Now, assume if one more member person named Harry with the date of birth as 05-11-08 and relationship type as Child is added to the membership on 05-Jan-18, then the system derives the member relationship for each member person of the membership as shown below:

Effective Date	Member	Member Characteristics	Person	Value
1-Jan-18	Mark	Member Relationship		Self
1-Jan-18	Nancy	Member Relationship		Spouse 1
5-Jan-18	Harry	Member Relationship		Child 1
5-Jan-18	Tom	Member Relationship		Child 2
5-Jan-18	Roger	Member Relationship		Additional Dependent

The member relationship for Harry, Tom, and Roger is derived in the order of their age which is calculated from the enrollment date. Because the member relationship derived for Tom and Roger is different, the system creates a new characteristic to store the member relationship for Tom and Roger. Here, the effective date of the characteristics is set to the new member person's start date.

If a new born is added to the membership, the effective date of the new born's member relationship characteristic is calculated considering the gift days if applicable. If a member person is end dated, the system derives the member relationship of all other member persons once again. If the member relationship for a member person is

different, the system creates a new characteristic to store the member relationship for the member person. The effective date of the new characteristic is set to member person's end date + 1. However, if a member person is inactivated, the system derives the member relationship of all other member persons once again. If the member relationship for a member person is different, the system updates the existing member relationship characteristic of the member person.

To use the member relationship as a pricing parameter, you need to define the Member Relationship parameter where:

- **Value Type** is set to **Adhoc**
- **Source Entity** is set to **Membership Person**
- **Source Type** is set to **Characteristic**
- **Source Type Code** is set to a characteristic type which is specified in the **Member Relationship Characteristic Type** attribute of the member relationship and subscription tier preference
- **Parameter Usage** is set to **Price Item** and **Pricing Eligibility Criteria**

Once the Member Relationship parameter is defined, you need to associate the parameter with the price items for which you want to define different rates in a pricing rule using the parameter. This helps to define different base fee for a price item based on the member relationship.

A new screen named **Member Relationship/Subscription Tier Structure** is introduced in this release. It enables you to add, edit, copy, and delete the member relationship and subscription tier structures.

## Prerequisites

To create a member relationship pricing parameter, you need to do the following:

- Define the pricing parameter with the member relationship.
- The **Admin** user must define different types of member relationship structures for step or party, where all the member relationships must be defined in the **Member Relationship/Subscription Tier Structure** screen. These member relationships must also exist in the **C1-ASOBLNG** feature configuration.
- Define the required characteristic types, such as, **Member Relationship Structure (C1-MRLST)**, **Member Relationship - Derivation Date Basis (C1-MRDDDB)**, and **Age Calculation Date Basis (C1-AGCAL)** on the policy plan.
- Define the following set of characteristics while adding the characteristics for the policy plan and also when the premium billing preferences are defined:
  - Max Age of Dependent
  - Max Number of Dependents
  - Order Priority
  - Young Adult Max Age Limit
  - Young Adult Inclusion Applicability
- The above characteristic types along with the **Member Relationship (C1-MEMRL)** characteristic type would be stamped on the member person, must be specified in the **Field Mapping** screen.

## Member Relationship/Subscription Tier Structure (Used for Searching)

The **Member Relationship/Subscription Tier Structure** screen allows you to search for a member relationship/subscription tier using various search criteria. It also allows you to create a member relationship/subscription tier. Through this screen, you can navigate to the following screen. It contains the following zone:

This screen consists of the following zone:

- [Member Relationship/Subscription Tier Structure List](#) on page 111
- [Member Relationship/Subscription Tier Structure](#) on page 112

### Member Relationship/Subscription Tier Structure List

The **Member Relationship/Subscription Tier Structure List** zone displays the member relationship or subscription tier structure information. It contains the following columns:

Column Name	Column Description
Structure	Used to specify the structure code for the structure.
Description	Used to specify the description for the structure.
Edit	On clicking the <b>Edit</b> (  ) icon, the <b>Member Relationship/Subscription Tier Structure</b> screen appears where you can edit the structural details of the member relationship or subscription tier.
Duplicate	On clicking the <b>Duplicate</b> (  ) icon, the <b>Member Relationship/Subscription Tier Structure</b> screen appears where you can define a new member relationship or subscription tier using an existing member relationship or subscription tier.
Delete	On clicking the <b>Delete</b> (  ) icon, you can delete the member relationship or subscription tier structure.

#### Note:

Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can filter the list using various search criteria (such as, **Structure** and **Description**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the Filters () icon in the upper right corner of this zone.

## Member Relationship/Subscription Tier Structure

The **Member Relationship/Subscription Tier Structure** zone displays the details of the member relationship or subscription tier structure. It contains the following sections:

- **Main** - Displays basic information about the member relationship or subscription tier structure. It contains the following fields:

Field Name	Field Description
Structure	Displays the type of structure.
Description	Displays the description of the structure.
Detailed Description	Displays additional information about the structure.
Maximum Member Count	Displays the maximum count of the members allowed in the structure.

- **Member Relationship/Subscription Tier Criteria** - Lists the criteria details of the member relationship or subscription tier. It contains the following columns:

Column Name	Column Description
Member Relationship/Subscription Tier	Displays the criteria code for the member relationship or subscription tier.
Self	Displays the main subscriber who meets the member relationship or subscription tier criteria. <b>Note:</b> The total count in the <b>Self</b> column cannot exceed more than one.
Number of Spouses	Displays the total number of spouses in the membership who meet the member person relationship criteria.
Number of Dependents	Displays the total number of dependents in the membership who meet the member person relationship criteria.
Number of Young Adults	Displays the total number of young adults in the membership who meet the member person relationship criteria.

- **Relationship Matrix** - Lists the relationship matrix details defined for the member relationship or subscription tier structure. It contains the following columns:

Column Name	Column Description
Relation	Indicates an entity defined in the relationship matrix.
Relationship Type	Indicates how a member person is associated with the main subscriber using a relationship type.
Relationship	Indicates how a member person is associated with the relationship type.

- **Record Actions** - This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the structural details of the member relationship or subscription tier.
Delete	Used to delete the member relationship or subscription tier structure.
Duplicate	Used to create a new member relationship or subscription tier structure using an existing structure.

- **Record Information** - This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the member relationship or subscription tier structure is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.

### **Defining a Member Relationship Structure**

#### **Procedure**

To define a member relationship structure:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **M** and then click **Member Relationship/Subscription Tier Structure**.  
A sub-menu appears.
3. Click the **Add** option from the **Member Relationship/Subscription Tier Structure** sub-menu.

The **Member Relationship/Subscription Tier Structure** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the member relationship structure. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Structure	Used to specify a code name for the structure.	Yes
	<b>Note:</b> You must specify a unique code name for the structure.	
Description	Used to specify the description for the structure.	Yes
Detailed Description	Used to specify additional information about the structure.	No
Maximum Member Count	Used to specify the maximum number of members allowed in the structure.	No
	<b>Note:</b> If you do not specify the value, by default, it is set to zero (0).	

- **Member Relationship/Subscription Tier Criteria** - Used to specify the criteria details for the member relationship. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Member Relationship/Subscription Tier	Used to specify a code name for the criteria.	No
	<b>Note:</b> You must specify a unique code name for the member relationship/subscription criteria.	
Self	Used to specify the main subscriber for the member relationship.	No
	<b>Note:</b> The value for this field must be a positive integer.	
Number of Spouses	Used to specify the total number of spouses in the membership who meet the member relationship criteria.	No
	<b>Note:</b> The value for this field must be a positive integer.	
Number of Dependents	Used to specify the total number of dependents in the membership who meet the member relationship criteria.	No
	<b>Note:</b> The value for this field must be a positive integer.	
Number of Young Adults	Used to specify the total number of young adults in the membership who meet the member relationship criteria.	No
	<b>Note:</b> The value for this field must be a positive integer.	

**Note:** You must specify at least one criteria for the member relationship structure. However, you can specify only a single member relationship criteria, if the maximum member count is set to zero (0) or one (1).

**Relationship Matrix** - Used to specify the relationship matrix for the member relationship. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Relation	Used to indicate an entity in the relationship matrix.	No
Relationship Type	Used to indicate how a member person is associated with the main subscriber using a relationship type.	No
Relationship	Used to indicate how the relation is associated with the relationship type in the relationship matrix	No

**Note:** You must specify at least one relationship matrix.

**Tip:** Alternatively, you can access this screen by clicking the **Add** button in the **Page Title** area of the **Member Relationship/Subscription Tier Structure** screen.

4. Enter the required details in the **Main** section.
5. Define a criteria (for the member relationship structure) in the **Member Relationship/Subscription Tier Criteria** section.
6. If you want to define more than one criteria for the member relationship structure, click the **Add (+)** icon and then repeat step 5.

**Note:** However, if you want to remove a criteria from the member relationship structure, click the **Delete** (🗑️) icon corresponding to the **Member Relationship/Subscription Tier** field.

7. Define the relationship matrix (for the member relationship structure) in the **Relationship Matrix** section.
8. If you want to define more than one relationship matrix for the member relationship structure, click the **Add (+)** icon and then repeat step 7.

**Note:** However, if you want to remove a relationship matrix from the member relationship structure, click the **Delete** (🗑️) icon corresponding to the **Relation** field.

9. Click **Save**.

The member relationship structure is defined.

### **Editing a Member Relationship Structure**

#### **Procedure**

To edit a member relationship structure:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **M** and then click **Member Relationship/Subscription Tier Structure**.  
The **Member Relationship/Subscription Tier Structure** screen appears.
3. In the **Member Relationship/Subscription Tier Structure List** zone, click the **Edit** (📝) icon in the **Edit** column corresponding to the member relationship structure whose details you want to edit.

The **Member Relationship/Subscription Tier Structure** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the member relationship structure. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Structure	Displays the member relationship structure name.	Not applicable
Description	Used to specify the description for the structure.	Yes
Detailed Description	Used to specify additional information about the structure.	No

Field Name	Field Description	Mandatory (Yes or No)
Maximum Member Count	Used to specify the maximum number of members allowed in the structure.	No
	<b>Note:</b> If you do not specify the value, by default, it is set to zero (0).	

- **Member Relationship/Subscription Tier Criteria** - Used to define a criteria for the member relationship. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Member Relationship/Subscription Tier	Used to specify a code name for the criteria.	No
	<b>Note:</b> You must specify a unique code name for the member relationship/subscription criteria.	
Self	Used to specify the main subscriber for the member relationship.	No
	<b>Note:</b> The value for this field must be a positive integer.	
Number of Spouses	Used to specify the total number of spouses in the membership who meet the member relationship criteria.	No
	<b>Note:</b> The value for this field must be a positive integer.	
Number of Dependents	Used to specify the total number of dependents in the membership who meet the member relationship criteria.	No
	<b>Note:</b> The value for this field must be a positive integer.	
Number of Young Adults	Used to specify the total number of young adults in the membership who meet the member relationship criteria.	No
	<b>Note:</b> The value for this field must be a positive integer.	

**Note:**

You must specify at least one criteria for the member relationship structure. However, you can specify only a single member relationship criteria, if the maximum member count is set to zero (0) or one (1).

**Relationship Matrix** - Used to define a relationship matrix for the member relationship. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Relation	Used to indicate an entity in the relationship matrix.	No
Relationship Type	Used to indicate how a member person is associated with the main subscriber using a relationship type.	No
Relationship	Used to indicate how the relation is associated with the relationship type in the relationship matrix	No

**Note:** You must specify at least one relationship matrix.

**Tip:** Alternatively, you can edit the details of a member relationship structure by clicking the **Edit** button in the **Member Relationship/Subscription Tier Structure** zone.

- Modify the details in the **Main** section.
- Define, edit, or remove the criteria (for the member relationship structure) in the **Member Relationship/Subscription Tier Criteria** section.
- If you want to define more than one criteria for the member relationship structure, click the **Add (+)** icon and then repeat step 5.

**Note:** However, if you want to remove a criteria from the member relationship structure, click the **Delete** (🗑️) icon corresponding to the **Member Relationship/Subscription Tier** field.

- Define, edit, or remove the relationship matrix (for the member relationship structure) in the **Relationship Matrix** section.
- If you want to define more than one relationship matrix for the member relationship structure, click the **Add (+)** icon and then repeat step 7.

**Note:** However, if you want to remove a relationship matrix from the member relationship structure, click the **Delete** (🗑️) icon corresponding to the **Relation** field.

- Click **Save**.

The changes made to the member relationship structure are saved.

### **Copying a Member Relationship Structure**

#### **Procedure**

To copy a member relationship structure:

- Click the **Admin** link in the **Application** toolbar.

A list appears.

2. From the **Admin** menu, select **M** and then click **Member Relationship/Subscription Tier Structure**.

The **Member Relationship/Subscription Tier Structure** screen appears.

3. In the **Member Relationship/Subscription Tier Structure List** zone, click the **Duplicate** (📄) icon in the **Duplicate** column corresponding to the member relationship structure whose copy you want to create.

The **Member Relationship/Subscription Tier Structure** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the member relationship structure. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Structure	Used to specify a code name for the structure.	Not applicable
	<b>Note:</b> You must specify a unique code name for the structure.	
Description	Used to specify the description for the structure.	Yes
Detailed Description	Used to specify additional information about the structure.	No
Maximum Member Count	Used to specify the maximum number of members allowed in the structure.	No
	<b>Note:</b> If you do not specify the value, by default, it is set to zero (0).	

- **Member Relationship/Subscription Tier Criteria** - Used to specify the criteria details for the member relationship. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Member Relationship/Subscription Tier	Used to specify a code name for the criteria.	No
	<b>Note:</b> You must specify a unique code name for the member relationship/subscription criteria.	
Self	Used to specify the main subscriber for the member relationship.	No
	<b>Note:</b> The value for this field must be a positive integer.	
Number of Spouses	Used to specify the total number of spouses in the membership who meet the member relationship criteria.	No
	<b>Note:</b> The value for this field must be a positive integer.	

Field Name	Field Description	Mandatory (Yes or No)
Number of Dependents	Used to specify the total number of dependents in the membership who meet the member relationship criteria.	No
	<b>Note:</b> The value for this field must be a positive integer.	
Number of Young Adults	Used to specify the total number of young adults in the membership who meet the member relationship criteria.	No
	<b>Note:</b> The value for this field must be a positive integer.	

**Note:**  
You must specify at least one criteria for the member relationship structure. However, you can specify only a single member relationship criteria, if the maximum member count is set to zero (0) or one (1).

**Relationship Matrix** - Used to specify the relationship matrix for the member relationship. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Relation	Used to indicate an entity in the relationship matrix.	No
Relationship Type	Used to indicate how a member person is associated with the main subscriber using a relationship type.	No
Relationship	Used to indicate how the relation is associated with the relationship type in the relationship matrix	No

**Note:** You must specify at least one relationship matrix.

**Tip:** Alternatively, you can copy a member relationship structure by clicking the **Duplicate** button in the **Member Relationship/Subscription Tier Structure** zone.

4. Enter the required details in the **Main** section.
5. Define, edit, or remove a criteria (for the member relationship structure) in the **Member Relationship/Subscription Tier Criteria** section.
6. If you want to define more than one criteria for the member relationship structure, click the **Add (+)** icon and then repeat step 5.

**Note:** However, if you want to remove a criteria from the member relationship structure, click the **Delete** (🗑️) icon corresponding to the **Member Relationship/Subscription Tier** field.

7. Define, edit, or remove the relationship matrix (for the member relationship structure) in the **Relationship Matrix** section.
8. If you want to define more than one relationship matrix for the member relationship structure, click the **Add (+)** icon and then repeat step 7.

**Note:** However, if you want to remove a relationship matrix from the member relationship structure, click the **Delete** (🗑️) icon corresponding to the **Relation** field.

9. Click **Save**.

The new member relationship structure is created.

### **Deleting a Member Relationship Structure**

#### **Procedure**

To delete a member relationship structure:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **M** and then click **Member Relationship/Subscription Tier Structure**.  
A sub-menu appears.
3. Click the **Search** option from the **Member Relationship/Subscription Tier Structure** sub-menu.  
The **Member Relationship/Subscription Tier Structure** screen appears.
4. In the **Member Relationship/Subscription Tier Structure List** section, click the **Delete** (🗑️) icon in the **Delete** column corresponding to the member relationship structure that you want to delete.  
A message appears confirming whether you want to delete the member relationship structure.

**Tip:** Alternatively, you can click the **Delete** button in the **Member Relationship/Subscription Tier Structure** zone to delete the member relationship structure.

5. Click **OK**.

The member relationship structure is deleted.

## Subscription Tier Pricing Parameter

Oracle Revenue Management and Billing enables you to use the subscription tier as a pricing parameter while defining the tier based pricing rules. This feature facilitates you to offer different rates for a price item based on different subscription tier.

On creating the bill period timelines, the system executes the **Derive Subscription Tier for Membership (C1-DERSUBTR)** algorithm attached to the **Account and Price Item Derivation Post-Processing** system event in the respective tier based pricing rule type. This algorithm determines the subscription tier of the membership for each bill period timeline. While determining the subscription tier for a membership, the system derives subscription tier for the membership from a subscription tier structure. Note that while deriving the subscription tier of a membership for a bill period timeline, the system refers the proration rules defined on the respective policy plan and accordingly derives the subscription tier for the membership. The system invokes the **C1-DERSUBTR** algorithm in the **C1-REPC1** batch.

You can define a subscription tier structure through a characteristic on the policy plan. While defining a subscription tier structure for a policy plan, you must use the characteristic type specified in the **Subscription Tier Structure Characteristic Type** attribute of a member relationship and subscription tier preference. The system considers the member relationship and subscription tier preference which is specified in the **Relation Structure Code Field Mapping** option type of the **C1-ASOBLNG** feature configuration.

A subscription tier structure helps the system to determine the subscription tier to which the membership belongs. You can specify a list of subscription tiers in a subscription tier structure. A subscription tier is derived for a membership depending on the following:

- Whether the member person is a self, spouse, or dependent
- Number of spouses, dependents, and young adults in the membership in the respective bill period timeline

A relationship matrix indicates whether a member person with a particular relationship type should be considered as self, spouse, or dependent while deriving the subscription tier. In a subscription tier structure, a spouse is never considered as a dependent. Only children are considered as dependents.

For example, you can create a subscription tier structure named STEX1 as shown below:

Subscription Tier	Self	Number of Spouses	Number of Dependents	Number of Young Adults
<b>E</b>	1	0	0	0
<b>ES</b>	1	1	0	0
<b>ESC1</b>	1	1	1	0
<b>ESC2</b>	1	1	2	0
<b>EC1</b>	1	0	1	0
<b>EC2</b>	1	0	2	0
<b>EC3</b>	1	0	3	0
<b>F</b>	1	9	9	9

**Note:** You can only define one subscription tier in a subscription tier structure where the sum of self, number of spouses, number of dependents, and number of young adults exceeds the maximum member count specified in the subscription tier structure.

In addition, you can create a relationship matrix in the STEX1 subscription tier structure as shown below:

Relation	Relationship Type	Relationship
Main Subscriber	Owner	Self
Main Subscriber	Member	Self
Children	Child	Dependent
Spouse	Wife	Spouse
Spouse	Spouse	Spouse

Once the subscription tier structure is derived from the policy plan, the system determines the subscription tier of the membership for the bill period timeline. While determining the subscription tier of a membership for the bill period timeline, the system derives the following characteristic types from the respective attributes of the member relationship and subscription tier preference:

- Age Calculation Date Basis
- Max Age Limit for Max Dependent Count
- Max Number of Dependents Order Priority
- Maximum Number of Dependents
- New Born Gift Days
- New Born Gift Days Applicability

- Young Adult Max Age Limit
- Young Adult Max Age Limit Applicability

The system then derives these characteristics from the policy plan. For example, if a membership with the following member persons is added to a policy plan:

Member Start Date	Member End Date	Person Name	Main Subscriber	Relationship Type	Member	Date of Birth
1-Jan-20	31-Dec-20	Mark	Yes	Self	Yes	15-Jan-68
1-Jan-20	31-Dec-20	Nancy	No	Wife	Yes	20-Apr-72
1-Jan-20	31-Dec-20	Roger	No	Child	Yes	15-May-01
1-Jan-20	31-Dec-20	Tom	No	Child	Yes	16-May-04

Now, if the following characteristics are defined on the policy plan:

- Subscription Tier Structure - STEX1
- Age Calculation Date Basis – Enrollment Date
- Maximum Number of Dependents – 3
- Max Number of Dependents Order Priority - ELDEST
- Max Age Limit for Max Dependent Count – 21
- New Born Gift Days - 30
- New Born Gift Days Applicability - Y
- Young Adult Max Age Limit - 25
- Young Adult Max Age Limit Applicability - Y

The system considers the STEX1 subscription tier structure and derives the subscription tier of the membership for each bill period timeline as shown below:

Bill Period Timeline	Characteristic Type	Characteristic Value
1-Jan-20 to 31-Jan-20	Subscription Tier	ESC2
1-Feb-20 to 29-Feb-20	Subscription Tier	ESC2
1-Mar-20 to 31-Mar-20	Subscription Tier	ESC2
1-Apr-20 to 30-Apr-20	Subscription Tier	ESC2
1-May-20 to 31-May-20	Subscription Tier	ESC2
1-Jun-20 to 30-Jun-20	Subscription Tier	ESC2
1-Jul-20 to 31-Jul-20	Subscription Tier	ESC2
1-Aug-20 to 31-Aug-20	Subscription Tier	ESC2
1-Sep-20 to 30-Sep-20	Subscription Tier	ESC2
1-Oct-20 to 31-Oct-20	Subscription Tier	ESC2

Bill Period Timeline	Characteristic Type	Characteristic Value
1-Nov-20 to 30-Nov-20	Subscription Tier	ESC2
1-Dec-20 to 31-Dec-20	Subscription Tier	ESC2

Because the characteristic value is same across all bill period timelines, the system will create one subscription tier characteristic with the effective date as 01-Jan-2020. Now, assume if one more member person named Harry with the date of birth as 05-11-08 and relationship type as Child is added to the membership on 05-Mar-20, then the system derives the subscription tier of the membership for each bill period timeline as shown below:

Bill Period Timeline	Characteristic Type	Characteristic Value
5-Mar-20 to 31-Mar-20	Subscription Tier	F
1-Apr-20 to 30-Apr-20	Subscription Tier	F
1-May-20 to 31-May-20	Subscription Tier	F
1-Jun-20 to 30-Jun-20	Subscription Tier	F
1-Jul-20 to 31-Jul-20	Subscription Tier	F
1-Aug-20 to 31-Aug-20	Subscription Tier	F
1-Sep-20 to 30-Sep-20	Subscription Tier	F
1-Oct-20 to 31-Oct-20	Subscription Tier	F
1-Nov-20 to 30-Nov-20	Subscription Tier	F
1-Dec-20 to 31-Dec-20	Subscription Tier	F

In this case, the system will have two subscription tier characteristics for the membership – one with the effective date as 01-Jan-2020 where the characteristic value is set to **ESC2** and another with the effective date as 05-Mar-2020 where the characteristic value is set to **F**.

If a new born is added to the membership, the effective date of the new subscription tier characteristic is calculated considering the gift days if applicable. If a member person is end dated, the system derives the subscription tier of the membership once again. If the subscription tier for the membership is different, the system creates a new characteristic to store the subscription tier for the membership. The effective date of the new characteristic is set according to the proration rule defined for the termination event. If a member person is inactivated, the system derives the subscription tier of the membership once again. In this case, if the subscription tier for the membership is different, the system updates the existing subscription tier characteristic of the membership.

To use the subscription tier as a pricing parameter, you need to define the Subscription Tier parameter where:

- **Value Type** is to **Adhoc**
- **Source Entity** is set to **Membership**
- **Source Type** is set to **Characteristic**
- **Source Type Code** is set to a characteristic type which is specified in the **Subscription Tier Characteristic Type** attribute of the member relationship and subscription tier preference
- **Parameter Usage** is set to **Price Item** and **Pricing Eligibility Criteria**

Once the Subscription Tier parameter is defined, you need to associate the parameter with the price items for which you want to define different rates in a pricing rule using the parameter. This helps to define different base fee for a price item based on the subscription tier.

A new screen named **Member Relationship/Subscription Tier Structure** is introduced in this release. It enables you to add, edit, copy, and delete the member relationship and subscription tier structures.

## Prerequisites

To create a subscription tier pricing parameter, you need to do the following:

- Define the pricing parameter with the subscription tier.
- The **Admin** user must define different types of subscription tiers, where all the tiers must be defined in the **Member Relationship/Subscription Tier Structure** screen. These subscription tiers must also exist in the **C1-ASOBLNG** feature configuration.
- Define the required characteristic types, such as, **Subscription Tier Structure (C1-STRST)** and **Age Calculation Date Basis (C1-AGCAL)** on the policy plan.
- Define the following set of characteristics while adding the characteristics for the policy plan and also when the premium billing preferences are defined:
  - Max Age of Dependent
  - Max Number of Dependents
  - Order Priority
  - Young Adult Max Age Limit
  - Young Adult Inclusion Applicability
- The above characteristic types along with the **Subscription (C1-SUBST)** characteristic type would be stamped on member person, must be specified in the **Field Mapping** screen.

## Member Relationship/Subscription Tier Structure (Used for Searching)

The **Member Relationship/Subscription Tier Structure** screen allows you to search for a member relationship/subscription tier using various search criteria. It also allows you to create a member relationship/subscription tier. Through this screen, you can navigate to the following screen. It contains the following zone:

This screen consists of the following zone:

- [Member Relationship/Subscription Tier Structure List](#) on page 111
- [Member Relationship/Subscription Tier Structure](#) on page 112

### Member Relationship/Subscription Tier Structure List

The **Member Relationship/Subscription Tier Structure List** zone displays the member relationship or subscription tier structure information. It contains the following columns:

Column Name	Column Description
Structure	Used to specify the structure code for the structure.

Column Name	Column Description
Description	Used to specify the description for the structure.
Edit	On clicking the <b>Edit</b> (✎) icon, the <b>Member Relationship/Subscription Tier Structure</b> screen appears where you can edit the structural details of the member relationship or subscription tier.
Duplicate	On clicking the <b>Duplicate</b> (📄) icon, the <b>Member Relationship/Subscription Tier Structure</b> screen appears where you can define a new member relationship or subscription tier using an existing member relationship or subscription tier.
Delete	On clicking the <b>Delete</b> (🗑) icon, you can delete the member relationship or subscription tier structure.

**Note:**

Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can filter the list using various search criteria (such as, **Structure** and **Description**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the Filters (🔍) icon in the upper right corner of this zone.

**Member Relationship/Subscription Tier Structure**

The **Member Relationship/Subscription Tier Structure** zone displays the details of the member relationship or subscription tier structure. It contains the following sections:

- **Main** - Displays basic information about the member relationship or subscription tier structure. It contains the following fields:

Field Name	Field Description
Structure	Displays the type of structure.
Description	Displays the description of the structure.
Detailed Description	Displays additional information about the structure.
Maximum Member Count	Displays the maximum count of the members allowed in the structure.

- **Member Relationship/Subscription Tier Criteria** - Lists the criteria details of the member relationship or subscription tier. It contains the following columns:

Column Name	Column Description
Member Relationship/Subscription Tier	Displays the criteria code for the member relationship or subscription tier.

Column Name	Column Description
Self	Displays the main subscriber who meets the member relationship or subscription tier criteria. <b>Note:</b> The total count in the <b>Self</b> column cannot exceed more than one.
Number of Spouses	Displays the total number of spouses in the membership who meet the member person relationship criteria.
Number of Dependents	Displays the total number of dependents in the membership who meet the member person relationship criteria.
Number of Young Adults	Displays the total number of young adults in the membership who meet the member person relationship criteria.

- **Relationship Matrix** - Lists the relationship matrix details defined for the member relationship or subscription tier structure. It contains the following columns:

Column Name	Column Description
Relation	Indicates an entity defined in the relationship matrix.
Relationship Type	Indicates how a member person is associated with the main subscriber using a relationship type.
Relationship	Indicates how a member person is associated with the relationship type.

- **Record Actions** - This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the structural details of the member relationship or subscription tier.
Delete	Used to delete the member relationship or subscription tier structure.
Duplicate	Used to create a new member relationship or subscription tier structure using an existing structure.

- **Record Information** - This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the member relationship or subscription tier structure is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.

## Defining a Subscription Tier Structure

### Procedure

To define a subscription tier structure:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **M** and then click **Member Relationship/Subscription Tier Structure**.  
A sub-menu appears.
3. Click the **Add** option from the **Member Relationship/Subscription Tier Structure** sub-menu.

The **Member Relationship/Subscription Tier Structure** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the subscription tier structure. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Structure	Used to specify a code name for the structure.	Yes
	<b>Note:</b> You must specify a unique code name for the structure.	
Description	Used to specify the description for the structure.	Yes
Detailed Description	Used to specify additional information about the structure.	No
Maximum Member Count	Used to specify the maximum number of members allowed in the structure.	No
	<b>Note:</b> If you do not specify the value, by default, it is set to zero (0).	

- **Member Relationship/Subscription Tier Criteria** - Used to specify a criteria for the subscription tier. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Member Relationship/Subscription Tier	Used to specify a code name for the criteria.	No
	<b>Note:</b> You must specify a unique code name for the subscription tier criteria.	
Self	Used to specify the main subscriber for the subscription tier.	No
	<b>Note:</b> The value for this field must be a positive integer.	

Field Name	Field Description	Mandatory (Yes or No)
Number of Spouses	Used to specify the total number of spouses in the membership who meet the subscription tier criteria.	No
	<b>Note:</b> The value for this field must be a positive integer.	
Number of Dependents	Used to specify the total number of dependents in the membership who meet the subscription tier criteria.	No
	<b>Note:</b> The value for this field must be a positive integer.	
Number of Young Adults	Used to specify the total number of young adults in the membership who meet the subscription tier criteria.	No
	<b>Note:</b> The value for this field must be a positive integer.	

**Note:** You must specify at least one criteria for the subscription tier structure. However, you can specify only a single subscription tier criteria, if the maximum member count is set to zero (0) or one (1).

**Relationship Matrix** - Used to specify the relationship matrix for the subscription tier. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Relation	Used to indicate an entity in the relationship matrix.	No
Relationship Type	Used to indicate how a member person is associated with the main subscriber using a relationship type.	No
Relationship	Used to indicate how the relation is associated with the relationship type in the relationship matrix	No

**Note:** You must specify at least one relationship matrix.

**Tip:** Alternatively, you can access this screen by clicking the **Add** button in the **Page Title** area of the **Member Relationship/Subscription Tier Structure** screen.

4. Enter the required details in the **Main** section.
5. Define a criteria (for the subscription tier structure) in the **Member Relationship/Subscription Tier Criteria** section.
6. If you want to define more than one criteria for the subscription tier structure, click the **Add (+)** icon and then repeat step 5.

**Note:** However, if you want to remove a criteria from the subscription tier structure, click the **Delete** (🗑️) icon corresponding to the **Member Relationship/Subscription Tier** field.

7. Define a relationship matrix (for the subscription tier structure) in the **Relationship Matrix** section.

8. If you want to define more than one relationship matrix for the subscription tier structure, click the **Add (+)** icon and then repeat step 7.

**Note:** However, if you want to remove a relationship matrix from the subscription tier structure, click the **Delete** (🗑️) icon corresponding to the **Relation** field.

9. Click **Save**.

The subscription tier structure is defined.

### **Editing a Subscription Tier Structure**

#### **Procedure**

To edit a subscription tier structure:

- Click the **Admin** link in the **Application** toolbar.  
A list appears.
- From the **Admin** menu, select **M** and then click **Member Relationship/Subscription Tier Structure**.  
The **Member Relationship/Subscription Tier Structure** screen appears.
- In the **Member Relationship/Subscription Tier Structure List** zone, click the **Edit** (✎) icon in the **Edit** column corresponding to the subscription tier structure whose details you want to edit.

The **Member Relationship/Subscription Tier Structure** screen appears. It contains the following sections:

- Main** - Used to specify basic details about the subscription tier structure. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Structure	Displays the subscription tier structure name.	Not applicable
Description	Used to specify the description for the structure.	Yes
Detailed Description	Used to specify additional information about the structure.	No
Maximum Member Count	Used to specify the maximum number of members allowed in the structure.	No
	<b>Note:</b> If you do not specify the value, by default, it is set to zero (0).	

- Member Relationship/Subscription Tier Criteria** - Used to specify a criteria for the subscription tier. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Member Relationship/Subscription Tier	Used to specify a code name for the criteria.	No
	<b>Note:</b> You must specify a unique code name for the criteria.	

Field Name	Field Description	Mandatory (Yes or No)
Self	Used to specify the main subscriber for the subscription tier.	No
	<b>Note:</b> The value for this field must be a positive integer.	
Number of Spouses	Used to specify the total number of spouses in the membership who meet the subscription tier criteria.	No
	<b>Note:</b> The value for this field must be a positive integer.	
Number of Dependents	Used to specify the total number of dependents in the membership who meet the subscription tier criteria.	No
	<b>Note:</b> The value for this field must be a positive integer.	
Number of Young Adults	Used to specify the total number of young adults in the membership who meet the subscription tier criteria.	No
	<b>Note:</b> The value for this field must be a positive integer.	

**Note:**  
You must specify at least one criteria for the subscription tier structure. However, you can specify only a single subscription tier criteria, if the maximum member count is set to zero (0) or one (1).

**Relationship Matrix** - Used to specify a relationship matrix for the subscription tier. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Relation	Used to indicate an entity in the relationship matrix.	No
Relationship Type	Used to indicate how a member person is associated with the main subscriber using a relationship type.	No
Relationship	Used to indicate how the relation is associated with the relationship type in the relationship matrix.	No

**Note:** You must specify at least one relationship matrix.

**Tip:** Alternatively, you can edit the details of a member relationship structure by clicking the **Edit** button in the **Member Relationship/Subscription Tier Structure** zone.

4. Modify the details in the **Main** section.
5. Define, edit, or remove a criteria (for the subscription tier structure) in the **Member Relationship/Subscription Tier Criteria** section.

- If you want to define more than one criteria for the subscription tier structure, click the **Add (+)** icon and then repeat step 5.

**Note:** However, if you want to remove a criteria from the subscription tier structure, click the **Delete (🗑)** icon corresponding to the **Member Relationship/Subscription Tier** field.

- Define, edit, or remove a relationship matrix (for the subscription tier structure) in the **Relationship Matrix** section.
- If you want to define more than one relationship matrix for the subscription tier structure, click the **Add (+)** icon and then repeat step 7.

**Note:** However, if you want to remove a relationship matrix from the subscription tier structure, click the **Delete (🗑)** icon corresponding to the **Relation** field.

- Click **Save**.

The changes made to the subscription tier structure are saved.

### **Copying a Subscription Tier Structure**

#### **Procedure**

To copy a subscription tier structure:

- Click the **Admin** link in the **Application** toolbar.  
A list appears.
- From the **Admin** menu, select **M** and then click **Member Relationship/Subscription Tier Structure**.  
The **Member Relationship/Subscription Tier Structure** screen appears.
- In the **Member Relationship/Subscription Tier Structure List** zone, click the **Duplicate (📄)** icon in the **Duplicate** column corresponding to the subscription tier structure whose copy you want to create.

The **Member Relationship/Subscription Tier Structure** screen appears. It contains the following sections:

- Main** - Used to specify basic details about the subscription tier structure. It contains the following fields:

<b>Field Name</b>	<b>Field Description</b>	<b>Mandatory (Yes or No)</b>
Structure	Used to specify a code name for the structure. <b>Note:</b> You must specify a unique code name for the structure.	Not applicable
Description	Used to specify the description for the structure.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Detailed Description	Used to specify additional information about the structure.	No
Maximum Member Count	Used to specify the maximum number of members allowed in the structure.  <b>Note:</b> If you do not specify the value, by default, it is set to zero (0).	No

- **Member Relationship/Subscription Tier Criteria** - Used to specify the criteria details for the subscription tier. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Member Relationship/Subscription Tier	Used to specify a code name for the criteria.  <b>Note:</b> You must specify a unique code name for the member relationship/subscription criteria.	No
Self	Used to specify the main subscriber for the subscription tier.  <b>Note:</b> The value for this field must be a positive integer.	No
Number of Spouses	Used to specify the total number of spouses in the membership who meet the subscription tier criteria.  <b>Note:</b> The value for this field must be a positive integer.	No
Number of Dependents	Used to specify the total number of dependents in the membership who meet the subscription tier criteria.  <b>Note:</b> The value for this field must be a positive integer.	No
Number of Young Adults	Used to specify the total number of young adults in the membership who meet the subscription tier criteria.  <b>Note:</b> The value for this field must be a positive integer.	No

**Note:**

You must specify at least one criteria for the subscription tier structure. However, you can specify only a single subscription tier criteria, if the maximum member count is set to zero (0) or one (1).

**Relationship Matrix** - Used to specify the relationship matrix for the subscription tier. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Relation	Used to indicate an entity in the relationship matrix.	No
Relationship Type	Used to indicate how a member person is associated with the main subscriber using a relationship type.	No
Relationship	Used to indicate how the relation is associated with the relationship type in the relationship matrix	No

**Note:** You must specify at least one relationship matrix.

**Tip:** Alternatively, you can copy a member relationship structure by clicking the **Duplicate** button in the **Member Relationship/Subscription Tier Structure** zone.

- Enter the required details in the **Main** section.
- Define, edit, or remove a criteria (for the subscription tier structure) in the **Member Relationship/Subscription Tier Criteria** section.
- If you want to define more than one criteria for the subscription tier structure, click the **Add (+)** icon and then repeat step 5.

**Note:** However, if you want to remove a criteria from the subscription tier structure, click the **Delete** (🗑️) icon corresponding to the **Member Relationship/Subscription Tier** field.

- Define, edit, or remove the relationship matrix (for the subscription tier structure) in the **Relationship Matrix** section.
- If you want to define more than one relationship matrix for the subscription tier structure, click the **Add (+)** icon and then repeat step 7.

**Note:** However, if you want to remove a relationship matrix from the subscription tier structure, click the **Delete** (🗑️) icon corresponding to the **Relation** field.

- Click **Save**.

The new subscription tier structure is created.

### **Deleting a Subscription Tier Structure**

#### **Procedure**

To delete a subscription tier structure:

- Click the **Admin** link in the **Application** toolbar.

A list appears.

- From the **Admin** menu, select **M** and then click **Member Relationship/Subscription Tier Structure**.

A sub-menu appears.

- Click the **Search** option from the **Member Relationship/Subscription Tier Structure** sub-menu.

The **Member Relationship/Subscription Tier Structure** screen appears.

- In the **Member Relationship/Subscription Tier Structure List** section, click the **Delete** (🗑️) icon in the **Delete** column corresponding to the subscription tier structure that you want to delete.

A message appears confirming whether you want to delete the subscription tier structure.

**Tip:** Alternatively, you can click the **Delete** button in the **Member Relationship/Subscription Tier Structure** zone to delete the subscription tier structure.

- Click **OK**.

The subscription tier structure is deleted.

## Medicare Benefits

---

Oracle Revenue Management and Billing enables you to maintain the Medicare benefits (such as, Part A, Part B, Part D, Part D LIS, and Part D LEP) of a member person. The system enables you to define and edit the Medicare benefits from the user interface, through a health care inbound message, or through the membership repricing inbound web service. While defining a Medicare benefit of a member person for Part A, Part B, and Part D, you need to specify a Medicare plan benefit package (i.e. 800 series plan) which is applicable for the Medicare benefit. The system enables you to define and edit a Medicare plan benefit package through the **Field Mapping** screen. You can use the Medicare plan benefit package as a pricing parameter in the age based or tier based pricing rules using which the Medicare premium is calculated. While defining a Medicare benefit of a member person for Part D LIS and Part D LEP, you need to specify the benefit amount (i.e. subsidy or penalty amount).

While editing a Medicare benefit of a member person from the user interface, you can only edit the characteristics of the Medicare benefit. However, while editing a Medicare benefit of a member person through a health care inbound message or through the membership repricing inbound web service, you can edit the end date, benefit amount, and characteristics of the Medicare benefit. On editing a Medicare benefit, the system inactivates the old record and creates a new record in the system. The status of the old benefit record is set to **Inactive** and the status of the new benefit record is set to **Active**.

The system enables you to discard an active or inactive Medicare benefit from the user interface by clicking the **Discard** button.

## Benefit Status Transition

The following figure graphically indicates how a Medicare benefit moves from one status to another in its lifecycle:

## Algorithms Used in C1-Benefits

The following table lists the algorithms which are attached to the **C1-Benefits** business object:

System Event	Algorithm	Algorithm Type	Description
Audit	C1-FIAUDEV	C1-FIAUDEV	Refer to <a href="#">C1-FIAUDEV</a> on page 137.
Validation	C1-BENVAL	C1-BENVAL	<a href="#">C1-BENVAL</a> on page 138

### C1-FIAUDEV

If this algorithm is attached to the **Audit** system event of the **C1-Membership**, **C1-Benefits**, and **C1\_PERSON\_BO** business objects, it is invoked whenever you define, edit, or delete the respective entity. It checks whether an active audit event type exists for the entity business object. If so, it considers the active audit event type and creates the audit event using the respective audit event type. The system creates the audit event whenever a membership is added to a policy plan, member person is added to a membership, and a Medicare benefit is defined for a member person. It also creates the audit event whenever the membership, member person, and Medicare benefit details are updated. However, note that the audit events are created in the update scenario when the element listed for auditing in the age based, tier based, or benefit pricing rule type is updated. The system considers only those pricing rule types whose pricing rules are effective during the respective entity (i.e. membership, member person, or Medicare benefit whichever is updated) date range.

It creates one or more audit events in the **Pending** status. The entity type and entity ID for which an audit event is created are added corresponding to the audit event in the **C1\_AUDIT\_EVENT** table. In addition, the effective date is stamped corresponding to the audit event in the **C1\_AUDIT\_EVENT** table.

**Note:**

The system creates an audit event whenever the membership start and end dates and member person's start and end dates are changed in the system irrespective of whether these fields are listed for auditing or not in the age based or tier based pricing rule types.

Before creating an audit event, the system checks whether an audit event for the entity ID with the same effective date already exists in the **Pending** or **Error** status for the respective action. If so, the system does not create a new audit event for the entity. Instead, the system adds a new log entry in the existing audit event.

For each audit event, this algorithm derives the memberships on the policy plans which are impacted and the pricing rule types whose pricing rules are defined on the respective policy plans. A repricing entity detail record is then created for each membership, pricing rule type, and effective date combination in the **CI\_REPRC\_ENTITY\_DTL** table. The status of the repricing entity detail record is set to **P**. Once the repricing entity detail records are created successfully, the status of the audit event is changed to **Complete**.

It contains the following parameters:

- **Audit Event Business Object** – Used to specify the business object using which you want to create the audit event.
- **Audit Event Pending Status** – Used to specify the status in which you want to create the audit event. This parameter is also used for determining whether an audit event for the entity ID already exists in the system.
- **Audit Event Error Status** – Used to specify the status in which an audit event is transitioned when an error occurs while processing the audit event. This parameter is used for determining whether an audit event for the entity ID already exists in the system.

All the above parameters are mandatory.

**Related Topics**

<b>For more information on...</b>	<b>See...</b>

How the audit events are created and processed for a person	<a href="#">Person Audit Process</a> on page 3029
How the audit events are created and processed for a Medicare benefit	<a href="#">Medicare Benefit Audit Process</a>

**C1-BENVAL**

This algorithm validates a benefit. It checks the following:

- Whether the benefit end date is not earlier than the benefit start date.
- Whether the membership and member person are specified while defining a Medicare benefit.
- Whether the benefit amount is specified while defining a Medicare benefit of a member person for Part D LIS and Part D LEP.
- Whether the Medicare plan benefit package is specified while defining a Medicare benefit of a member person for Part A, Part B, and Part D.

While editing a Medicare benefit, this algorithm only allows you to edit the following information:

- Benefit Amount
- Benefit End Date

- Benefit Status
- Benefit Characteristics

## Benefit (Used for Searching)

The **Benefit** screen allows you to search for a Medicare benefit using various search criteria. It also allows you to create a Medicare benefit. It contains the following zone:

- [Search Benefit](#) on page 139

### Search Benefit

The **Search Benefit** zone allows you to search for a benefit using various search criteria. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for a Medicare benefit using the benefit, policy, or person details. The valid values are: <ul style="list-style-type: none"> <li>• Benefit Details</li> <li>• Policy Details</li> <li>• Person Details</li> </ul> <p><b>Note:</b> By default, the <b>Benefit Details</b> option is selected.</p>	Yes
Benefit ID	Used to search a particular Medicare benefit. <p><b>Note:</b> This field appears when the <b>Benefit Details</b> option is selected from the <b>Search By</b> list.</p>	No
Membership ID	Used to search Medicare benefits of the member persons who belong to a particular membership. <p><b>Note:</b></p> <p>This field appears when the <b>Benefit Details</b> option is selected from the <b>Search By</b> list.</p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Membership ID</b> field. On clicking the <b>Search</b> icon, the <b>Membership Search</b> window appears.</p>	No
Start Date	Used to search Medicare benefits which are availed from a particular date onwards. <p><b>Note:</b> This field appears when the <b>Benefit Details</b> option is selected from the <b>Search By</b> list.</p>	No

Field Name	Field Description	Mandatory (Yes or No)
End Date	Used to search Medicare benefits which are availed till a particular date.	No
	<b>Note:</b> This field appears when the <b>Benefit Details</b> option is selected from the <b>Search By</b> list.	
Status	Used to search Medicare benefits with a particular status. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Discarded</li> <li>• Inactive</li> </ul>	No
	<b>Note:</b> This field appears when the <b>Benefit Details</b> option is selected from the <b>Search By</b> list.	
Benefit Type	Used to search benefits of a particular type. The valid values are: <ul style="list-style-type: none"> <li>• Commercial</li> <li>• Medicare Affiliated</li> </ul>	No
	<b>Note:</b> This field appears when the <b>Benefit Details</b> option is selected from the <b>Search By</b> list.  At present, the <b>Commercial</b> benefit type is not supported. The implementation team can build the custom logic based on the business requirements.	
Benefit Sub Type	Used to search a particular type of Medicare benefits. The valid values are: <ul style="list-style-type: none"> <li>• Late Enrollment Penalty</li> <li>• Low Income Subsidy</li> <li>• Part A-Inpatient Hospital Coverage</li> <li>• Part B-Outpatient Medical Coverage</li> <li>• Part D-Medicare Prescription Drug Coverage</li> </ul>	No
	<b>Note:</b> This field appears when the <b>Benefit Details</b> option is selected from the <b>Search By</b> list.	
Benefit Source	Used to search Medicare benefits which are received from a particular source. The valid values are: <ul style="list-style-type: none"> <li>• Centers for Medicare and Medicaid Services</li> <li>• State</li> </ul>	No
	<b>Note:</b> This field appears when the <b>Benefit Details</b> option is selected from the <b>Search By</b> list.	

Field Name	Field Description	Mandatory (Yes or No)
Policy ID	Used to search Medicare benefits which are availed under a particular fully-insured group policy.	No
	<p><b>Note:</b></p> <p>This field appears when the <b>Policy Details</b> option is selected from the <b>Search By</b> list.</p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Policy ID</b> field. On clicking the <b>Search</b> icon, the <b>Policy Search</b> window appears.</p>	
Policy Plan ID	Used to search Medicare benefits which are availed under a particular fully-insured group policy plan.	No
	<p><b>Note:</b></p> <p>This field appears when the <b>Policy Details</b> option is selected from the <b>Search By</b> list.</p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Policy Plan ID</b> field. On clicking the <b>Search</b> icon, the <b>Policy Plan Search</b> window appears.</p>	
Membership Beneficiary ID	Used to search Medicare benefits which are availed by a particular Medicare beneficiary (i.e. member person).	No
	<p><b>Note:</b> This field appears when the <b>Person Details</b> option is selected from the <b>Search By</b> list.</p>	
Person Name	Used to search Medicare benefits which are availed by a particular person.	No
	<p><b>Note:</b> This field appears when the <b>Person Details</b> option is selected from the <b>Search By</b> list.</p>	
Person Identifier Type	Used to indicate the person identifier type.	Yes (Conditional)
	<p><b>Note:</b> This field appears when the <b>Person Details</b> option is selected from the <b>Search By</b> list.</p>	
Person Identifier	Used to search Medicare benefits which are availed by a particular person.	Yes (Conditional)
	<p><b>Note:</b> This field appears when the <b>Person Details</b> option is selected from the <b>Search By</b> list.</p>	

Field Name	Field Description	Mandatory (Yes or No)
Relationship Type	Used to search Medicare benefits of member persons who are related to a main subscriber using a particular relationship type.	No
	<b>Note:</b> This field appears when the <b>Person Details</b> option is selected from the <b>Search By</b> list.	

**Note:** You must specify at least one search criterion while searching for a Medicare benefit.

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Benefit Information	Displays information about the Medicare benefit.
	<b>Note:</b> It has a link. On clicking the link, the <b>Benefit</b> screen appears where you can view the details of the respective benefit.
Membership Information	Indicates the membership whose member person has availed the Medicare benefit.
	<b>Note:</b> It has a link. On clicking the link, the <b>Membership</b> screen appears where you can view the details of the respective membership.
Member Person Information	Indicates the member person who has availed the Medicare benefit. In addition, a context menu appears corresponding to this column which helps in navigating to other screens in application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Person</b> screen appears where you can view the details of the respective member person.
Status	Indicates the status of the Medicare benefit. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Discarded</li> <li>• Inactive</li> </ul>
Benefit Source	Indicates the source from where the Medicare benefit is received. The valid values are: <ul style="list-style-type: none"> <li>• Centers for Medicare and Medicaid Services</li> <li>• State</li> </ul>
Benefit Type	Indicates the type of benefit. The valid values are: <ul style="list-style-type: none"> <li>• Commercial</li> <li>• Medicare Affiliated</li> </ul>

Column Name	Column Description
Benefit Sub Type	Indicates the type of Medicare benefit. The valid values are: <ul style="list-style-type: none"> <li>• Late Enrollment Penalty</li> <li>• Low Income Subsidy</li> <li>• Part A-Inpatient Hospital Coverage</li> <li>• Part B-Outpatient Medical Coverage</li> <li>• Part D-Medicare Prescription Drug Coverage</li> </ul>
Benefit Amount	Displays the low income subsidy or late enrollment penalty amount for Medicare Part D.

**Note:** Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

### **Searching for a Medicare Benefit**

#### **Prerequisites**

To search for a Medicare benefit, you should have:

- Values defined for the **BENEFIT\_TYPE\_FLG**, **BENEFIT\_SUB\_TYPE\_FLG**, and **BENEFIT\_SRC\_FLG** lookup fields in the application.

#### **Procedure**

To search for a Medicare benefit:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Person Information** and then click **Benefit**.  
The **Benefit** screen appears.
3. Enter the search criteria in the **Search Benefit** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

4. Click **Search**.

A list of Medicare benefits that meet the search criteria appears in the **Search Results** section.

## Defining a Medicare Benefit

### Prerequisites

To define a Medicare benefit, you should have:

- Required membership defined in the application
- Required member person added to the membership in the application
- Values defined for the **BENEFIT\_TYPE\_FLG**, **BENEFIT\_SUB\_TYPE\_FLG**, and **BENEFIT\_SRC\_FLG** lookup fields in the application
- Required Medicare plan benefit packages defined in the application

### Procedure

To define a Medicare benefit:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Person Information** and then click **Benefit**.  
A sub-menu appears.
3. Click the **Add** option from the **Benefit** sub-menu.

The **Benefit** screen appears. It contains the following sections:

- **Main** - Used to specify basic details of the Medicare benefit.
- **Characteristics** - Used to define the characteristics for the Medicare benefit.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Membership ID	Used to indicate the membership whose member person has availed the Medicare benefit.  <b>Note:</b> The <b>Search</b>  icon appears corresponding to the <b>Membership ID</b> field. On clicking the <b>Search</b> icon, the <b>Membership Search</b> window appears.  On specifying the membership ID, the information about the membership appears corresponding to the <b>Membership ID</b> field.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Member Person	Used to indicate the member person who has availed the Medicare benefit.	Yes
	<p><b>Note:</b></p> <p>The <b>Search</b>  icon appears corresponding to the <b>Member Person</b> field. On clicking the <b>Search</b> icon, the <b>Person Search</b> window appears.</p> <p>On specifying the person ID, the information about the member person appears corresponding to the <b>Member Person</b> field.</p>	
Benefit Source	Used to indicate the source from where the Medicare benefit is received. The valid values are:	Yes
	<ul style="list-style-type: none"> <li>• Centers for Medicare and Medicaid Services</li> <li>• State</li> </ul> <p><b>Note:</b> The list includes only those benefit sources which are defined in the <b>BENEFIT_SRC_FLG</b> lookup field.</p>	
Benefit Type	Used to indicate the type of benefit. The valid value is:	Yes
	<ul style="list-style-type: none"> <li>• Medicare Affiliated</li> </ul> <p><b>Note:</b> The list includes only those benefit types which are defined in the <b>BENEFIT_TYPE_FLG</b> lookup field.</p>	
Benefit Sub Type	Used to indicate the type of Medicare benefit. The valid values are:	Yes
	<ul style="list-style-type: none"> <li>• Late Enrollment Penalty</li> <li>• Low Income Subsidy</li> <li>• Part A-Inpatient Hospital Coverage</li> <li>• Part B-Outpatient Medical Coverage</li> <li>• Part D-Medicare Prescription Drug Coverage</li> </ul> <p><b>Note:</b> The list includes only those benefit sub types which are defined in the <b>BENEFIT_SUB_TYPE_FLG</b> lookup field.</p>	

Field Name	Field Description	Mandatory (Yes or No)
Medicare Plan Benefit Package	Used to indicate the medicare plan benefit package (i.e. 800 series plan) which is applicable for Medicare Part A, Part B, or Part D benefit.	Yes (Conditional)  <b>Note:</b> This field is required when the benefit sub type is set to <b>Part A-Inpatient Hospital Coverage, Part B-Outpatient Hospital Coverage, Part B-Outpatient Medical Coverage, or Part D-Medicare Prescription Drug Coverage.</b>
	<b>Note:</b> This field appears when the benefit sub type is set to <b>Part A-Inpatient Hospital Coverage, Part B-Outpatient Medical Coverage, or Part D-Medicare Prescription Drug Coverage.</b>	
Start Date	Used to specify the date from when the member person has availed the Medicare benefit.	Yes
	<b>Note:</b> The start date of the Medicare benefit cannot be earlier than the member person start date or later than the member person end date.  The Medicare benefit start date cannot be later than the Medicare benefit end date.	
End Date	Used to specify the date till when the member person has availed the Medicare benefit.	No
	<b>Note:</b> The end date of the Medicare benefit cannot be earlier than the member person start date or later than the member person end date.  The Medicare benefit end date cannot be earlier than the Medicare benefit start date.	
Benefit Amount	Used to specify the low income subsidy or late enrollment penalty amount for Medicare Part D.	No
	<b>Note:</b> This field appears when the benefit sub type is set to <b>Late Enrollment Penalty or Low Income Subsidy.</b>	

**Tip:** Alternatively, you can access this screen by clicking the **Add** button in the **Page Title** area of the **Benefit** screen.

4. Enter the required details in the **Main** section.
5. Define characteristics for the Medicare benefit, if required.
6. Click **Save**.

The Medicare benefit is defined for the member person in the **Active** status.

**Note:** You cannot define more than one Medicare benefit for the same membership, member person, benefit source, benefit type, and benefit sub type combination.

### **Defining a Characteristic for a Medicare Benefit**

#### Prerequisites

To define a characteristic for a Medicare benefit, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Benefits**)

#### Procedure

To define a characteristic for a Medicare benefit:

1. Ensure that the **Characteristics** section is expanded when you are defining or editing a Medicare benefit.

The **Characteristics** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the Medicare benefit.	Yes (Conditional)
		<b>Note:</b> This field is required while defining a characteristic for the Medicare benefit.
Characteristic Type	Used to indicate the characteristic type. <b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Benefits</b> .	Yes (Conditional)
		<b>Note:</b> This field is required while defining a characteristic for the Medicare benefit.
Characteristic Value	Used to specify the value for the characteristic type. <b>Note:</b> If you select a predefined characteristic type, the <b>Search</b> (🔍) icon appears corresponding to the <b>Characteristic Value</b> field. On clicking the <b>Search</b> icon, you can search for a predefined characteristic value.  On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	Yes (Conditional)
		<b>Note:</b> This field is required while defining a characteristic for the Medicare benefit.

2. Enter the required details in the **Characteristics** section.

- If you want to define more than one characteristic for the Medicare benefit, click the **Add (+)** icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic of the Medicare benefit, click the **Delete (🗑)** icon corresponding to the characteristic.

- Click **Save**.

The characteristics are defined for the Medicare benefit.

### **Benefit (Used for Viewing)**

Once you create a Medicare benefit, the **Benefit** screen allows you to:

- View the details of the Medicare benefit
- Edit the details of the Medicare benefit
- Discard the Medicare benefit
- View the log of the Medicare benefit
- Add a log entry for the Medicare benefit

It consists of the following tabs:

- [Benefit - Main](#) on page 149
- [Benefit - Log](#) on page 151

### Benefit - Main

The **Main** tab displays information about the Medicare benefit. It contains the following zones:

- [Benefit](#) on page 149
- [Benefit Characteristics](#) on page 150

### Benefit

The **Benefit** zone displays the details of the Medicare benefit. It contains the following sections:

- **Main** - Displays basic information about the Medicare benefit. It contains the following fields:

Field Name	Field Description
Benefit Information	Displays information about the Medicare benefit.
Membership Information	Indicates the membership whose member person has availed the Medicare benefit.  <b>Note:</b> It has a link. On clicking the link, the <b>Membership</b> screen appears where you can view the details of the respective membership.
Member Person Information	Indicates the member person who has availed the Medicare benefit.  <b>Note:</b> It has a link. On clicking the link, the <b>Person</b> screen appears where you can view the details of the respective member person.
Benefit Source	Indicates the source from where the Medicare benefit is received. The valid values are: <ul style="list-style-type: none"> <li>• Centers for Medicare and Medicaid Services</li> <li>• State</li> </ul>
Benefit Type	Indicates the type of benefit. The valid value is: <ul style="list-style-type: none"> <li>• Medicare Affiliated</li> </ul>
Benefit Sub Type	Indicates the type of Medicare benefit. The valid values are: <ul style="list-style-type: none"> <li>• Late Enrollment Penalty</li> <li>• Low Income Subsidy</li> <li>• Part A-Inpatient Hospital Coverage</li> <li>• Part B-Outpatient Medical Coverage</li> <li>• Part D-Medicare Prescription Drug Coverage</li> </ul>
Medicare Plan Benefit Package	Indicates the medicare plan benefit package (i.e. 800 series plan) which is applicable for Medicare Part A, Part B, or Part D benefit.  <b>Note:</b> This field appears when the benefit sub type is set to <b>Part A-Inpatient Hospital Coverage, Part B-Outpatient Medical Coverage, or Part D-Medicare Prescription Drug Coverage.</b>
Start Date	Displays the date from when the member person has availed the Medicare benefit.

Field Name	Field Description
End Date	Displays the date till when the member person has availed the Medicare benefit.
Status	Indicates the status of the Medicare benefit. The valid values are: <ul style="list-style-type: none"> <li>Active</li> <li>Discarded</li> <li>Inactive</li> </ul>
Benefit Amount	Displays the low income subsidy or late enrollment penalty amount for Medicare Part D.  <b>Note:</b> This field appears when the benefit sub type is set to <b>Late Enrollment Penalty</b> or <b>Low Income Subsidy</b> .

- **Record Actions** - This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the Medicare benefit.  <b>Note:</b> The <b>Edit</b> button appears when the Medicare benefit is in the <b>Active</b> status.
Discard	Used to discard a Medicare benefit.  <b>Note:</b> The <b>Discard</b> button appears when the benefit is in the <b>Active</b> or <b>Inactive</b> status.

- **Record Information** - This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the Medicare benefit is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.
Status Date/Time	Displays the date and time when the Medicare benefit status is updated.
Create Date/Time	Displays the date and time when the Medicare benefit is created.

### **Related Topics**

### **Benefit Characteristics**

The **Benefit Characteristics** zone lists the characteristics of the Medicare benefit. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the characteristic is effective for the Medicare benefit.

Column Name	Column Description
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.
Description	Displays the description of the characteristic value.
	<b>Note:</b> The data appears in this column when the type of characteristic value is set to <b>Predefined Value</b> .

You can filter the list using the **Effective Date** field available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (  ) icon in the upper right corner of this zone.

### Benefit - Log

The **Log** tab contains the following zone:

- [Benefit Log](#) on page 151

### Benefit Log

The **Benefit Log** zone lists the complete trail of actions performed on the Medicare benefit. It contains the following columns:

Column Name	Column Description
Creation Date Time	Displays the date and time when the action was performed on the Medicare benefit.
Details	Displays the details about the action performed on the Medicare benefit.
User	Indicates the user who has performed the action on the Medicare benefit.
Log Type	Indicates the type of log.
Related Object	Indicates the object or entity which is created when the action is performed on the Medicare benefit.
	<b>Note:</b> At present, no data appears in this column. The implementation team can build the custom logic to meet the business requirements.
Status Reason	Indicates the reason why the status of the Medicare benefit is changed.
	<b>Note:</b> At present, no data appears in this column. The implementation team can build the custom logic to meet the business requirements.

**Note:** You can manually add a log entry for the Medicare benefit by clicking the **Add Log Entry** link in the upper right corner of the **Benefit Log** zone.

## Editing a Medicare Benefit

You can only edit the characteristics of a Medicare benefit from the user interface. On editing a Medicare benefit of a member person, the system inactivates the old record and creates a new record in the system. The status of the old benefit record is set to **Inactive** and the status of the new benefit record is set to **Active**.

### Procedure

To edit a Medicare benefit:

1. Search for the Medicare benefit in the **Benefit** screen.
2. In the **Search Results** section, click the link in the **Benefit Information** column corresponding to the Medicare benefit whose details you want to edit.

The **Benefit** screen appears.

3. Ensure that the **Main** tab is selected.
4. Click the **Edit** button in the **Benefit** zone.

The **Benefit** screen appears. It contains the following sections:

- **Main** - Displays basic details of the Medicare benefit.
- **Characteristics** - Used to define the characteristics for the Medicare benefit.

The **Main** section contains the following fields:

Field Name	Field Description
Benefit Information	Displays information about the Medicare benefit.
Membership ID	Indicates the membership whose member person has availed the Medicare benefit.
Member Person	Indicates the member person who has availed the Medicare benefit.
Benefit Source	Indicates the source from where the Medicare benefit is received. The valid values are: <ul style="list-style-type: none"> <li>• Centers for Medicare and Medicaid Services</li> <li>• State</li> </ul>
Benefit Type	Indicates the type of benefit. The valid values are: <ul style="list-style-type: none"> <li>• Commercial</li> <li>• Medicare Affiliated</li> </ul>
Benefit Sub Type	Indicates the type of Medicare benefit. The valid values are: <ul style="list-style-type: none"> <li>• Late Enrollment Penalty</li> <li>• Low Income Subsidy</li> <li>• Part A-Inpatient Hospital Coverage</li> <li>• Part B-Outpatient Medical Coverage</li> <li>• Part D-Medicare Prescription Drug Coverage</li> </ul>

Field Name	Field Description
Medicare Plan Benefit Package	Indicates the medicare plan benefit package (i.e. 800 series plan) which is applicable for Medicare Part A, Part B, or Part D benefit.  <b>Note:</b> This field appears when the benefit sub type is set to <b>Part A-Inpatient Hospital Coverage, Part B-Outpatient Medical Coverage, or Part D-Medicare Prescription Drug Coverage.</b>
Start Date	Displays the date from when the member person has availed the Medicare benefit.
End Date	Displays the date till when the member person has availed the Medicare benefit.  <b>Note:</b> The system enables you to edit the end date of a Medicare benefit through a health care inbound message or through the membership repricing inbound web service.
Benefit Amount	Displays the low income subsidy or late enrollment penalty amount for Medicare Part D.  <b>Note:</b> This field appears when the benefit sub type is set to <b>Late Enrollment Penalty or Low Income Subsidy.</b> The system enables you to edit the amount of a Medicare benefit through a health care inbound message or through the membership repricing inbound web service.

**Note:** The **Edit** button appears when the Medicare benefit is in the **Active** status.

5. Define, edit, or remove characteristics of the Medicare benefit, if required.
6. Click **Save**.

The changes made to the Medicare benefit are saved.

## **Medicare Plan Benefit Package**

You can define an Employer Group Waiver Plan (EGWP) (i.e. 800 series plan) as a Medicare plan benefit package in the system. While defining a Medicare benefit of a member person for Medicare Part A, Part B, and Part D, you need to indicate the Medicare plan benefit package which is applicable for the Medicare benefit. You can then use the Medicare plan benefit package as a pricing parameter in the age based or tier based pricing rules using which the Medicare premium is calculated. In this way, the system enables you to offer different pricing for different EGWPs (i.e. 800 series plans).

The system enables you to define, edit, delete, and copy a Medicare plan benefit package through the **Field Mapping** screen.

### **Searching for a Medicare Plan Benefit Package**

#### **Prerequisites**

To search for a Medicare plan benefit package, you should have:

- Values defined in the **FIELD\_CAT\_FLG** lookup field

#### **Procedure**

To search for a Medicare plan benefit package:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **Field Mapping**.  
A sub-menu appears.
3. Click the **Search** option from the **Field Mapping** sub-menu.  
The **Field Mapping** screen appears.
4. Select the **Medicare Plan Benefit Preferences** option from the **Preference Category** list.

5. Enter the additional search criteria in the **Search Field Mapping** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

6. Click **Search**.

A list of Medicare plan benefit packages that meet the search criteria appears in the **Search Results** section.

## Viewing the Medicare Plan Benefit Package Details

### Procedure

To view the details of a Medicare plan benefit package:

1. Search for the Medicare plan benefit package in the **Field Mapping** screen.
2. In the **Search Results** section, click the **Broadcast** (  ) icon corresponding to the Medicare plan benefit package whose details you want to view.  
The **Field Mapping** zone appears.
3. View the details of the Medicare plan benefit package in the **Field Mapping** zone.

### Related Topics

## Defining a Medicare Plan Benefit Package

### Procedure

To define a Medicare plan benefit package:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **Field Mapping**.  
A sub-menu appears.
3. Click the **Add** option from the **Field Mapping** sub-menu.

The **Select Business Object** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Field Mapping Business Object	Used to indicate the business object using which you want to create the Medicare plan benefit package. The valid values are: <ul style="list-style-type: none"> <li>• Field Mapping</li> <li>• Medicare Plan Benefit Package</li> </ul>	Yes

**Note:** Alternatively, you can access the **Select Business Object** screen by clicking the **Add** button in the **Page Title** area of the **Field Mapping** screen.

4. Select the **Medicare Plan Benefit Package** option from the **Field Mapping Business Object** list.
5. Click **OK**.

The **Medicare Plan Benefit Package** screen appears. It contains the following section:

- **Main** - Used to specify basic details of the Medicare plan benefit package. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Medicare Plan Benefit Package	Used to specify the Medicare plan benefit package (i.e. 800 series plan).	Yes
Description	Used to specify the description for the Medicare plan benefit package.	Yes

6. Enter the required details in the **Main** section.
7. Click **Save**.

The Medicare plan benefit package is defined.

## Editing a Medicare Plan Benefit Package

### **Procedure**

To edit a Medicare plan benefit package:

1. Search for the Medicare plan benefit package in the **Field Mapping** screen.
2. In the **Search Results** section, click the **Edit** (✎) icon in the **Edit** column corresponding to the Medicare plan benefit package whose details you want to edit.

The **Medicare Plan Benefit Package** screen appears. It contains the following section:

- **Main** - Used to specify basic details of the Medicare plan benefit package. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Medicare Plan Benefit Package	Displays the Medicare plan benefit package (i.e. 800 series plan).	Not applicable
Description	Used to specify the description for the Medicare plan benefit package.	Yes

**Tip:** Alternatively, you can edit the details of a Medicare plan benefit package by clicking the **Edit** button in the **Field Mapping** zone.

3. Modify the required details in the **Main** section.
4. Click **Save**.

The changes made to the Medicare plan benefit package are saved.

How to search for a Medicare plan benefit package	<a href="#">Searching for a Medicare Plan Benefit Package</a> on page 155

## Copying a Medicare Plan Benefit Package

Instead of creating a Medicare plan benefit package from scratch, you can create a new Medicare plan benefit package using an existing Medicare plan benefit package. This is possible through copying a Medicare plan benefit package. On copying a Medicare plan benefit package, the details are copied to the new Medicare plan benefit package. You can then edit the details, if required.

### Prerequisites

To copy a Medicare plan benefit package, you should have:

- Medicare plan benefit package (whose copy you want to create) defined in the application

### Procedure

To copy a Medicare plan benefit package:

1. Search for the Medicare plan benefit package in the **Field Mapping** screen.
2. In the **Search Results** section, click the **Duplicate**  icon in the **Duplicate** column corresponding to the Medicare plan benefit package whose copy you want to create.

The **Medicare Plan Benefit Package** screen appears. It contains the following section:

- **Main** - Used to specify basic details of the Medicare plan benefit package. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Medicare Plan Benefit Package	Used to specify the Medicare plan benefit package (i.e. 800 series plan).	Yes
Description	Used to specify the description for the Medicare plan benefit package.	Yes

**Tip:** Alternatively, you can copy a Medicare plan benefit package by clicking the **Duplicate** button in the **Field Mapping** zone.

3. Enter the required details in the **Main** section.
4. Click **Save**.

The new Medicare plan benefit package is defined.

## Deleting a Medicare Plan Benefit Package

### Procedure

To delete a Medicare plan benefit package:

1. Search for the Medicare plan benefit package in the **Field Mapping** screen.
2. In the **Search Results** section, click the **Delete**  icon in the **Delete** column corresponding to the Medicare plan benefit package that you want to delete.

A message appears confirming whether you want to delete the Medicare plan benefit package.

**Tip:** Alternatively, you can delete a Medicare plan benefit package by clicking the **Delete** button in the **Field Mapping** zone.

3. Click **OK**.

The Medicare plan benefit package is deleted.

## Geographic Rating Area Preference

Oracle Revenue Management and Billing enables you to use the geographic rating area as a pricing parameter while defining the age based, tier based, and additional charge pricing rules. This feature facilitates you to offer different rates for a price item based on different geographic rating area.

Once you define a geographic rating area, the system can derive the geographic rating area for a membership. While deriving the geographic rating area for a membership, the system uses the following attributes from the geographic rating area preference:

- Address Source Characteristic Type
- Address Type Characteristic Type
- Default Address Source
- Default Address Type
- Default Geographic Rating Area
- Geographic Rating Area Characteristic Type
- Use Plan Details

For more information about these attributes, see [Defining a Geographic Rating Area Preference](#) on page 160.

The system considers the geographic rating area preference which is specified in the **Geographic Rating Area Field Mapping** option type of the **C1-ASOBLLNG** feature configuration. You can define, edit, delete, and copy a geographic rating area preference through the **Field Mapping** screen.

**Related Topics**

How to setup the <b>C1-ASOBLLNG</b> feature configuration	<a href="#">Setting the C1-ASOBLLNG Feature Configuration</a> on page 3215

## Searching for a Geographic Rating Area Preference

**Prerequisites**

To search for a geographic rating area preference, you should have:

- Values defined in the **FIELD\_CAT\_FLG** lookup field

**Procedure**

To search for a geographic rating area preference:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **Field Mapping**.  
A sub-menu appears.
3. Click the **Search** option from the **Field Mapping** sub-menu.  
The **Field Mapping** screen appears.
4. Select the **Geographic Rating Area Preferences** option from the **Preference Category** list.
5. Enter the additional search criteria in the **Search Field Mapping** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

6. Click **Search**.  
A list of geographic rating area preferences that meet the search criteria appears in the **Search Results** section.

## Viewing the Geographic Rating Area Preference Details

### Procedure

To view the details of a geographic rating area preference:

1. Search for the geographic rating area preference in the **Field Mapping** screen.
2. In the **Search Results** section, click the **Broadcast** (  ) icon corresponding to the geographic rating area preference whose details you want to view.  
The **Field Mapping** zone appears.
3. View the details of the geographic rating area preference in the **Field Mapping** zone.

## Defining a Geographic Rating Area Preference

### Prerequisites

To define a geographic rating area preference, you should have:

- Values defined in the **ADDRESS\_SRC\_FLG**, **ADDRESS\_TYPE\_FLG**, and **MAP\_ENTITY\_FLG** lookup fields
- Geographic rating areas defined in the application

### Procedure

To define a geographic rating area preference:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.

- From the **Admin** menu, select **F** and then click **Field Mapping**.

A sub-menu appears.

- Click the **Add** option from the **Field Mapping** sub-menu.

The **Select Business Object** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Field Mapping Business Object	Used to indicate the business object using which you want to create the geographic rating area preference. The valid values are: <ul style="list-style-type: none"> <li>Field Mapping</li> <li>Medicare Plan Benefit Package</li> </ul>	Yes

**Note:** Alternatively, you can access the **Select Business Object** screen by clicking the **Add** button in the **Page Title** area of the **Field Mapping** screen.

- Select the **Field Mapping** option from the **Field Mapping Business Object** list.
- Click **OK**.

The **Field Mapping** screen appears. It contains the following sections:

- Main** - Used to specify basic details of the geographic rating area preference. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Preference	Used to specify the geographic rating area preference.	Yes
Description	Used to specify the description for the geographic rating area preference.	Yes
Detailed Description	Used to specify additional information about the geographic rating area preference.	No
Status	Used to indicate the status of the geographic rating area preference. The valid values are: <ul style="list-style-type: none"> <li>Active</li> <li>Inactive</li> </ul>	Yes

- Preference Category** - This section contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Preference Category	Used to indicate the category to which the preference belongs. The valid values are: <ul style="list-style-type: none"> <li>Billing Preferences</li> <li>Geographic Rating Area Preferences</li> <li>Medicare Plan Benefit Preferences</li> <li>Member Reconciliation Preferences</li> <li>Member Relationship and Subscription Tier Preferences</li> <li>Statement Construct Preferences</li> </ul>	Yes

- **Preference Settings** - Used to set the attributes in the geographic rating area preference. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Attribute	<p>Used to indicate the attribute which you want to set in the geographic rating area preference. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Address Source Characteristic Type</b> - Used when the system derives the geographic rating area for a membership.</li> <li>• <b>Address Type Characteristic Type</b> - Used when the system derives the geographic rating area for a membership.</li> <li>• <b>Default Address Source</b> - Used when the address source characteristic is not defined for any of the following entities: <ul style="list-style-type: none"> <li>• Policy Plan</li> <li>• State where the Policy Plan is Issued</li> <li>• Policy</li> <li>• State where the Policy is Issued</li> </ul> </li> <li>• <b>Default Address Type</b> - Used when the address type characteristic is not defined for any of the following entities: <ul style="list-style-type: none"> <li>• Policy Plan</li> <li>• State where the Policy Plan is Issued</li> <li>• Policy</li> <li>• State where the Policy is Issued</li> </ul> </li> <li>• <b>Default Geographic Rating Area</b> - Used when the system is unable to derive the geographic rating area for the following combination: <ul style="list-style-type: none"> <li>• State and zip code (this combination is considered when the <b>Use Plan Details</b> attribute is set to <b>No</b>)</li> <li>• State, zip code, policy number, plan number, and source system (this combination is considered when the <b>Use Plan Details</b> attribute is set to <b>Yes</b>)</li> </ul> </li> <li>• <b>Geographic Rating Area Characteristic Type</b> - Used when the system stores the geographic rating area for a membership.</li> <li>• <b>Use Plan Details</b> - Used to indicate whether the policy number, plan number, and source system should be considered while deriving the geographic rating area for a membership.</li> </ul>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required while setting an attribute in the geographic rating area preference.</p>

Field Name	Field Description	Mandatory (Yes or No)
Entity Type	Used to indicate the type of entity for which the attribute is applicable. The valid values are: <ul style="list-style-type: none"> <li>Account</li> <li>Billable Charge</li> </ul>	No
	<b>Note:</b> At present, this data is stored for informational purposes only and is not considered in the business logic. If required, you can add more entity types to the <b>MAP_ENTITY_FLG</b> lookup field.	

**Note:** While defining a geographic rating area preference, you must set at least one attribute in the geographic rating area preference.

6. Select the **Geographic Rating Area Preferences** option from the **Preference Category** list.
7. Enter the required details in the **Main** section.
8. Select the required attribute and value from the respective fields.
9. If you want to set more than one attribute in the geographic rating area preference, click the **Add (+)** icon and then repeat step 8.

**Note:** However, if you want to remove an attribute from the geographic rating area preference, click the **Delete** (🗑️) icon corresponding to the attribute.

10. Click **Save**.

The geographic rating area preference is defined.

## Editing a Geographic Rating Area Preference

### Prerequisites

To edit a geographic rating area preference, you should have:

- Values defined in the **ADDRESS\_SRC\_FLG**, **ADDRESS\_TYPE\_FLG**, and **MAP\_ENTITY\_FLG** lookup fields
- Geographic rating areas defined in the application

### Procedure

To edit a geographic rating area preference:

1. Search for the geographic rating area preference in the **Field Mapping** screen.
2. In the **Search Results** section, click the **Edit** (✎) icon in the **Edit** column corresponding to the geographical rating area preference whose details you want to edit.

The **Field Mapping** screen appears. It contains the following sections:

- **Main** - Used to specify basic details of the geographic rating area preference. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Preference	Displays the geographic rating area preference.	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
Description	Used to specify the description for the geographic rating area preference.	Yes
Detailed Description	Used to specify additional information about the geographic rating area preference.	No
Status	Used to indicate the status of the geographic rating area preference. The valid values are: <ul style="list-style-type: none"> <li>Active</li> <li>Inactive</li> </ul>	Yes
Preference Category	Indicates the category to which the preference belongs. The valid value is: <ul style="list-style-type: none"> <li>Geographic Rating Area Preferences</li> </ul>	Not applicable

- **Preference Settings** - Used to set the attributes in the geographic rating area preference. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Attribute	Used to indicate the attribute which you want to set in the geographic rating area preference. The valid values are: <ul style="list-style-type: none"> <li>• <b>Address Source Characteristic Type</b> - Used when the system derives the geographic rating area for a membership.</li> <li>• <b>Address Type Characteristic Type</b> - Used when the system derives the geographic rating area for a membership.</li> <li>• <b>Default Address Source</b> - Used when the address source characteristic is not defined for any of the following entities: <ul style="list-style-type: none"> <li>• Policy Plan</li> <li>• State where the Policy Plan is Issued</li> <li>• Policy</li> <li>• State where the Policy is Issued</li> </ul> </li> <li>• <b>Default Address Type</b> - Used when the address type characteristic is not defined for any of the following entities: <ul style="list-style-type: none"> <li>• Policy Plan</li> <li>• State where the Policy Plan is Issued</li> <li>• Policy</li> <li>• State where the Policy is Issued</li> </ul> </li> </ul>	Yes (Conditional)
		<b>Note:</b> This field is required while setting an attribute in the geographic rating area preference.

Field Name	Field Description	Mandatory (Yes or No)				
	<ul style="list-style-type: none"> <li>• <b>Default Geographic Rating Area</b> - Used when the system is unable to derive the geographic rating area for the following combination:                             <ul style="list-style-type: none"> <li>• State and zip code (this combination is considered when the <b>Use Plan Details</b> attribute is set to <b>No</b>)</li> <li>• State, zip code, policy number, plan number, and source system (this combination is considered when the <b>Use Plan Details</b> attribute is set to <b>Yes</b>)</li> </ul> </li> <li>• <b>Geographic Rating Area Characteristic Type</b> - Used when the system stores the geographic rating area for a membership.</li> <li>• <b>Use Plan Details</b> - Used to indicate whether the policy number, plan number, and source system should be considered while deriving the geographic rating area for a membership.</li> </ul>

**Tip:** Alternatively, you can edit the details of a geographic rating area preference by clicking the **Edit** button in the **Field Mapping** zone.

3. Modify the required details in the **Main** section.
4. Define, edit, or remove the attribute from the geographic rating area preference, if required.

**Note:** You must set at least one attribute in a geographic rating area preference.

5. Click **Save**.

The changes made to the geographic rating area preference are saved.

## Copying a Geographic Rating Area Preference

Instead of creating a geographic rating area preference from scratch, you can create a new geographic rating area preference using an existing geographic rating area preference. This is possible through copying a geographic rating area preference. On copying a geographic rating area preference, the details including the attributes are copied to the new geographic rating area preference. You can then edit the details, if required.

### Prerequisites

To copy a geographic rating area preference, you should have:

- Geographic rating area preference (whose copy you want to create) defined in the application
- Values defined in the **ADDRESS\_SRC\_FLG**, **ADDRESS\_TYPE\_FLG**, and **MAP\_ENTITY\_FLG** lookup fields
- Geographic rating areas defined in the application

### Procedure

To copy a geographic rating area preference:

1. Search for the geographic rating area preference in the **Field Mapping** screen.
2. In the **Search Results** section, click the **Duplicate**  icon in the **Duplicate** column corresponding to the geographical rating area preference whose copy you want to create.

The **Field Mapping** screen appears. It contains the following sections:

- **Main** - Used to specify basic details of the geographic rating area preference. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Preference	Used to specify the geographic rating area preference.	Yes
Description	Used to specify the description for the geographic rating area preference.	Yes
Detailed Description	Used to specify additional information about the geographic rating area preference.	No
Status	Used to indicate the status of the geographic rating area preference. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>	Yes
Preference Category	Indicates the category to which the preference belongs. The valid value is: <ul style="list-style-type: none"> <li>• Geographic Rating Area Preferences</li> </ul>	Not applicable

- **Preference Settings** - Used to set the attributes in the geographic rating area preference. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Attribute	<p>Used to indicate the attribute which you want to set in the geographic rating area preference. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Address Source Characteristic Type</b> - Used when the system derives the geographic rating area for a membership.</li> </ul>	<p>Yes (Conditional)</p> <div style="border: 1px solid black; padding: 2px; margin-top: 5px;"> <p><b>Note:</b> This field is required while setting an attribute in the geographic rating area preference.</p> </div>
	<ul style="list-style-type: none"> <li>• <b>Address Type Characteristic Type</b> - Used when the system derives the geographic rating area for a membership.</li> <li>• <b>Default Address Source</b> - Used when the address source characteristic is not defined for any of the following entities: <ul style="list-style-type: none"> <li>• Policy Plan</li> <li>• State where the Policy Plan is Issued</li> <li>• Policy</li> <li>• State where the Policy is Issued</li> </ul> </li> <li>• <b>Default Address Type</b> - Used when the address type characteristic is not defined for any of the following entities: <ul style="list-style-type: none"> <li>• Policy Plan</li> <li>• State where the Policy Plan is Issued</li> <li>• Policy</li> <li>• State where the Policy is Issued</li> </ul> </li> <li>• <b>Default Geographic Rating Area</b> - Used when the system is unable to derive the geographic rating area for the following combination: <ul style="list-style-type: none"> <li>• State and zip code (this combination is considered when the <b>Use Plan Details</b> attribute is set to <b>No</b>)</li> <li>• State, zip code, policy number, plan number, and source system (this combination is considered when the <b>Use Plan Details</b> attribute is set to <b>Yes</b>)</li> </ul> </li> <li>• <b>Geographic Rating Area Characteristic Type</b> - Used when the system stores the geographic rating area for a membership.</li> <li>• <b>Use Plan Details</b> - Used to indicate whether the policy number, plan number, and source system should be considered while deriving the geographic rating area for a membership.</li> </ul>	

Field Name	Field Description	Mandatory (Yes or No)						
Value	Used to specify the attribute value. The attribute value that you can specify varies depending on the attribute you want to set in the geographic rating area preference:	Yes (Conditional)						
	<table border="1" data-bbox="641 394 1182 1438"> <thead> <tr> <th data-bbox="641 394 873 478">If the attribute is set to...</th> <th data-bbox="873 394 1182 478">Then, this field is...</th> </tr> </thead> <tbody> <tr> <td data-bbox="641 478 873 1438">                     Address Source Characteristic Type                 </td> <td data-bbox="873 478 1182 1438">                     Used to specify the characteristic type that indicates the address source. 	If the attribute is set to...	Then, this field is...						
Address Source Characteristic Type	Used to specify the characteristic type that indicates the address source. The system supports two address sources named <b>Policy Holder</b> and <b>Main Subscriber</b> . This type of characteristic can be defined for the following entities: <ul style="list-style-type: none"> <li>• Policy Plan</li> <li>• State where the Policy Plan is Issued</li> <li>• Policy</li> <li>• State where the Policy is Issued</li> </ul> Here, you must specify a characteristic type where the characteristic entity is set to <b>Policy Plan, State, and Policy</b> . <div data-bbox="880 1312 1175 1423" style="border: 1px solid black; padding: 2px;"> <b>Note:</b> The C1-ADSRC characteristic type is shipped with the product.                     </div>							
Address Type Characteristic Type	Used to specify the characteristic type that indicates the address type. The system supports three address types named <b>Person Mailing, Person Seasonal, and Account Override</b> . This type of characteristic can be defined for the following entities: <ul style="list-style-type: none"> <li>• Policy Plan</li> <li>• State where the Policy Plan is Issued</li> </ul>							

Field Name	Field Description		Mandatory (Yes or No)
		<ul style="list-style-type: none"> <li>• Policy</li> <li>• State where the Policy is Issued</li> </ul> <p>Here, you must specify a characteristic type where the characteristic entity is set to <b>Policy Plan, State, and Policy</b>.</p> <p><b>Note:</b> The <b>C1-ADTYP</b> characteristic type is shipped with the product.</p>	
	Default Address Source	<p>Used to specify the address source. The valid values are:</p> <ul style="list-style-type: none"> <li>• Main Subscriber</li> <li>• Policy Holder</li> </ul> <p><b>Note:</b> The list includes only those values which are defined in the <b>ADDRESS_SRC_FLG</b> lookup field.</p>	
	Default Address Type	<p>Used to specify the address type. The valid values are:</p> <ul style="list-style-type: none"> <li>• Person Mailing</li> <li>• Person Seasonal</li> <li>• Account Override</li> </ul> <p><b>Note:</b> The list includes only those values which are defined in the <b>ADDRESS_TYPE_FLG</b> lookup field.</p>	
	Default Geographic Rating Area	<p>Used to specify the geographic rating area.</p> <p><b>Note:</b> Here, you can specify a geographic rating area which is already defined in the system.</p>	

Field Name	Field Description		Mandatory (Yes or No)
	Geographic Rating Area Characteristic Type	<p>Used to specify the characteristic type where you can store the geographic rating area. This type of characteristic is defined for the membership. Here, you must specify a characteristic type where the characteristic entity is set to <b>Membership</b>.</p> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> The <b>C1-GEORT</b> characteristic type is shipped with the product.</p> </div>	
	Use Plan Details	<p>Used to indicate whether the policy plan details should be considered while deriving the geographic rating area for a membership. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Yes</b> - Used when you want to derive the geographic rating area using the state, zip code, policy number, plan number, and source system combination.</li> <li>• <b>No</b> - Used when you want to derive the geographic rating area using the state and zip code combination.</li> </ul>	

Field Name	Field Description	Mandatory (Yes or No)
Entity Type	Used to indicate the type of entity for which the attribute is applicable. The valid values are: <ul style="list-style-type: none"> <li>Account</li> <li>Billable Charge</li> </ul>	No
	<b>Note:</b> At present, this data is stored for informational purposes only and is not considered in the business logic. If required, you can add more entity types to the <b>MAP_ENTITY_FLG</b> lookup field.	

**Note:** While defining a geographic rating area preference, you must set at least one attribute in the geographic rating area preference.

**Tip:** Alternatively, you can copy a geographic rating area preference by clicking the **Duplicate** button in the **Field Mapping** zone.

3. Enter the required details in the **Main** section.
4. Define, edit, or remove the attribute from the geographic rating area preference, if required.
5. Click **Save**.

The new geographic rating area preference is defined.

## Deleting a Geographic Rating Area Preference

### Procedure

To delete a geographic rating area preference:

1. Search for the geographic rating area preference in the **Field Mapping** screen.
2. In the **Search Results** section, click the **Delete** (🗑️) icon in the **Delete** column corresponding to the geographic rating area preference that you want to delete.

A message appears confirming whether you want to delete the geographic rating area preference.

**Tip:** Alternatively, you can delete a geographic rating area preference by clicking the **Delete** button in the **Field Mapping** zone.

3. Click **OK**.

The geographic rating area preference is deleted.

## Member Relationship and Subscription Tier Preference

---

Oracle Revenue Management and Billing enables you to use the member relationship (i.e. how a member is related to the main subscriber of the membership) as a pricing parameter while defining the age based, tier based, and additional charge pricing rules. This feature facilitates you to offer different rates for a price item based on different member relationship.

While adding a membership to a policy plan or while adding or inactivating a member person in a membership, the system automatically derives the member relationship for each member person of the membership from a member relationship structure. While deriving the member relationship for a member person, the system uses the following attributes from the member relationship and subscription tier preference:

- Age Calculation Date Basis Characteristic Type
- Max Age Limit for Max Dependent Count Characteristic Type
- Max Number of Dependents Order Priority Characteristic Type
- Member Relationship Characteristic Type
- Maximum Number of Dependents Characteristic Type
- Member Relationship Derivation Date Characteristic Type
- Member Relationship Structure Characteristic Type
- New Born Gift Days Characteristic Type
- New Born Gift Days Applicability Characteristic Type
- Young Adult Max Age Limit Characteristic Type
- Young Adult Max Age Limit Applicability Characteristic Type

For more information about these attributes, see [Defining a Member Relationship and Subscription Tier Preference](#) on page 180.

Similarly, the system enables you to use the membership subscription tier as a pricing parameter while defining the tier based pricing rules. This feature facilitates you to offer different rates for a price item based on different membership subscription tier.

While determining the subscription tier for a membership, the system derives the subscription tier for the membership from a subscription tier structure. While deriving the subscription tier for a membership, the system uses the following attributes from the member relationship and subscription tier preference:

- Age Calculation Date Basis Characteristic Type
- Max Age Limit for Max Dependent Count Characteristic Type
- Max Number of Dependents Order Priority Characteristic Type
- Maximum Number of Dependents Characteristic Type
- New Born Gift Days Characteristic Type
- New Born Gift Days Applicability Characteristic Type
- Subscription Tier Structure Characteristic Type
- Subscription Tier Characteristic Type
- Young Adult Max Age Limit Characteristic Type

- Young Adult Max Age Limit Applicability Characteristic Type

For more information about these attributes, see [Defining a Member Relationship and Subscription Tier Preference](#) on page 180.

The system considers the member relationship and subscription tier preference which is specified in the **Relation Structure Code Field Mapping** option type of the **C1-ASOBLLNG** feature configuration. You can define, edit, delete, and copy a member relationship and subscription tier preference through the **Field Mapping** screen.

## Searching for a Member Relationship and Subscription Tier Preference

### Prerequisites

To search for a member relationship and subscription tier preference, you should have:

- Values defined in the **FIELD\_CAT\_FLG** lookup field

### Procedure

To search for a member relationship and subscription tier preference:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **F** and then click **Field Mapping**.  
A sub-menu appears.
3. Click the **Search** option from the **Field Mapping** sub-menu.  
The **Field Mapping** screen appears.
4. Select the **Member Relationship and Subscription Tier Preferences** option from the **Preference Category** list.
5. Enter the additional search criteria in the **Search Field Mapping** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

6. Click **Search**.

A list of member relationship and subscription tier preferences that meet the search criteria appears in the **Search Results** section.

## Viewing the Member Relationship and Subscription Tier Preference Details

### Procedure

To view the details of a member relationship and subscription tier preference:

1. Search for the member relationship and subscription tier preference in the **Field Mapping** screen.

- In the **Search Results** section, click the **Broadcast** (📡) icon corresponding to the member relationship and subscription tier preference whose details you want to view. The **Field Mapping** zone appears.
- View the details of the member relationship and subscription tier preference in the **Field Mapping** zone.

How to search for a member relationship and subscription tier preference	<a href="#">Searching for a Member Relationship and Subscription Tier Preference</a> on page 179

## **Defining a Member Relationship and Subscription Tier Preference**

### **Prerequisites**

To define a member relationship and subscription tier preference, you should have:

- Required characteristic types defined in the application
- Values defined in the **MAP\_ENTITY\_FLG** lookup field

### **Procedure**

To define a member relationship and subscription tier preference:

- Click the **Admin** link in the **Application** toolbar.  
A list appears.
- From the **Admin** menu, select **F** and then click **Field Mapping**.  
A sub-menu appears.
- Click the **Add** option from the **Field Mapping** sub-menu.

The **Select Business Object** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Field Mapping Business Object	Used to indicate the business object using which you want to create the member relationship and subscription tier preference. The valid values are: <ul style="list-style-type: none"> <li>Field Mapping</li> <li>Medicare Plan Benefit Package</li> </ul>	Yes

**Note:** Alternatively, you can access the **Select Business Object** screen by clicking the **Add** button in the **Page Title** area of the **Field Mapping** screen.

- Select the **Field Mapping** option from the **Field Mapping Business Object** list.
- Click **OK**.

The **Field Mapping** screen appears. It contains the following sections:

- Main** - Used to specify basic details of the member relationship and subscription tier preference. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Preference	Used to specify the member relationship and subscription tier preference.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Description	Used to specify the description for the member relationship and subscription tier preference.	Yes
Detailed Description	Used to specify additional information about the member relationship and subscription tier preference.	No
Status	Used to indicate the status of the member relationship and subscription tier preference. The valid values are: <ul style="list-style-type: none"> <li>Active</li> <li>Inactive</li> </ul>	Yes

- **Preference Category** - This section contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Preference Category	Used to indicate the category to which the preference belongs. The valid values are: <ul style="list-style-type: none"> <li>Billing Preferences</li> <li>Geographic Rating Area Preferences</li> <li>Medicare Plan Benefit Preferences</li> <li>Member Reconciliation Preferences</li> <li>Member Relationship and Subscription Tier Preferences</li> <li>Statement Construct Preferences</li> </ul>	Yes

- **Preference Settings** - Used to set the attributes in the member relationship and subscription tier preference. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Attribute	Used to indicate the attribute which you want to set in the member relationship and subscription tier preference. The valid values are: <ul style="list-style-type: none"> <li><b>Age Calculation Date Basis Characteristic Type</b> - Used when the system derives the member relationship for a member person and the subscription tier for a membership.</li> <li><b>Max Age Limit for Max Dependent Count Characteristic Type</b> - Used when the system derives the member relationship for a member person and the subscription tier for a membership.</li> <li><b>Max Number of Dependents Order Priority Characteristic Type</b> - Used when the system derives the member relationship for a member person and the subscription tier for a membership.</li> </ul>	Yes (Conditional)
		<b>Note:</b> This field is required while setting an attribute in the member relationship and subscription tier preference.

Field Name	Field Description	Mandatory (Yes or No)
	<ul style="list-style-type: none"> <li>• <b>Member Relationship Characteristic Type</b> - Used when the system stores the member relationship for a member person.</li> <li>• <b>Maximum Number of Dependents Characteristic Type</b> - Used when the system derives the member relationship for a member person and the subscription tier for a membership.</li> <li>• <b>Member Relationship Derivation Date Characteristic Type</b> - Used when the system derives the member relationship for a member person.</li> <li>• <b>Member Relationship Structure Characteristic Type</b> - Used when the system derives the member relationship for a member person.</li> <li>• <b>New Born Gift Days Characteristic Type</b> - Used when the system derives the member relationship for a member person and the subscription tier for a membership.</li> <li>• <b>New Born Gift Days Applicability Characteristic Type</b> - Used when the system derives the member relationship for a member person and the subscription tier for a membership.</li> <li>• <b>Subscription Tier Structure Characteristic Type</b> - Used when the system derives the subscription tier for a membership.</li> <li>• <b>Subscription Tier Characteristic Type</b> - Used when the system stores the subscription tier for a membership.</li> <li>• <b>Young Adult Max Age Limit Characteristic Type</b> - Used when the system derives the member relationship for a member person and the subscription tier for a membership.</li> <li>• <b>Young Adult Max Age Limit Applicability Characteristic Type</b> - Used when the system derives the member relationship for a member person and the subscription tier for a membership.</li> </ul>

	Young Adult Max Age Limit Applicability Characteristic Type	<p>Used to specify the characteristic type that indicates whether you want to consider the young adults during the premium calculation. The system supports the following two characteristic values — <b>Y</b> and <b>N</b>.</p>	

Field Name	Field Description	Mandatory (Yes or No)		
	<table border="1"> <tr> <td></td> <td> <p>This type of characteristic can be defined for the following entities:</p> <ul style="list-style-type: none"> <li>• Policy Plan</li> <li>• Policy</li> </ul> <p>Here, you must specify a characteristic type where the characteristic entity is set to <b>Policy Plan</b> and <b>Policy</b>.</p> </td> </tr> </table>		<p>This type of characteristic can be defined for the following entities:</p> <ul style="list-style-type: none"> <li>• Policy Plan</li> <li>• Policy</li> </ul> <p>Here, you must specify a characteristic type where the characteristic entity is set to <b>Policy Plan</b> and <b>Policy</b>.</p>	
	<p>This type of characteristic can be defined for the following entities:</p> <ul style="list-style-type: none"> <li>• Policy Plan</li> <li>• Policy</li> </ul> <p>Here, you must specify a characteristic type where the characteristic entity is set to <b>Policy Plan</b> and <b>Policy</b>.</p>			
Entity Type	<p>Used to indicate the type of entity for which the attribute is applicable. The valid values are:</p> <ul style="list-style-type: none"> <li>• Account</li> <li>• Billable Charge</li> </ul> <p><b>Note:</b> At present, this data is stored for informational purposes only and is not considered in the business logic. If required, you can add more entity types to the <b>MAP_ENTITY_FLG</b> lookup field.</p>	No		

**Note:** While defining a member relationship and subscription tier preference, you must set at least one attribute in the member relationship and subscription tier preference.

6. Select the **Member Relationship and Subscription Tier Preferences** option from the **Preference Category** list.
7. Enter the required details in the **Main** section.
8. Select the required attribute and value from the respective fields.
9. If you want to set more than one attribute in the member relationship and subscription tier preference, click the **Add (+)** icon and then repeat step 8.

**Note:** However, if you want to remove an attribute from the member relationship and subscription tier preference, click the **Delete (🗑)** icon corresponding to the attribute.

10. Click **Save**.

The member relationship and subscription tier preference is defined.

## Editing a Member Relationship and Subscription Tier Preference

### Prerequisites

To edit a member relationship and subscription tier preference, you should have:

- Required characteristic types defined in the application
- Values defined in the **MAP\_ENTITY\_FLG** lookup field

**Procedure**

To edit a member relationship and subscription tier preference:

1. Search for the member relationship and subscription tier preference in the **Field Mapping** screen.
2. In the **Search Results** section, click the **Edit**  icon in the **Edit** column corresponding to the member relationship and subscription tier preference whose details you want to edit.

The **Field Mapping** screen appears. It contains the following sections:

- **Main** - Used to specify basic details of the member relationship and subscription tier preference. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Preference	Displays the member relationship and subscription tier preference.	Not applicable
Description	Used to specify the description for the member relationship and subscription tier preference.	Yes
Detailed Description	Used to specify additional information about the member relationship and subscription tier preference.	No
Status	Used to indicate the status of the member relationship and subscription tier preference. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>	Yes
Preference Category	Indicates the category to which the preference belongs. The valid value is: <ul style="list-style-type: none"> <li>• Member Relationship and Subscription Tier Preferences</li> </ul>	Not applicable

- **Preference Settings** - Used to set the attributes in the member relationship and subscription tier preference. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Attribute	<p>Used to indicate the attribute which you want to set in the member relationship and subscription tier preference. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Age Calculation Date Basis Characteristic Type</b> - Used when the system derives the member relationship for a member person and the subscription tier for a membership.</li> <li>• <b>Max Age Limit for Max Dependent Count Characteristic Type</b> - Used when the system derives the member relationship for a member person and the subscription tier for a membership.</li> <li>• <b>Max Number of Dependents Order Priority Characteristic Type</b> - Used when the system derives the member relationship for a member person and the subscription tier for a membership.</li> </ul>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required while setting an attribute in the member relationship and subscription tier preference.</p>

Field Name	Field Description	Mandatory (Yes or No)
	<ul style="list-style-type: none"> <li>• <b>Member Relationship Characteristic Type</b> - Used when the system stores the member relationship for a member person.</li> <li>• <b>Maximum Number of Dependents Characteristic Type</b> - Used when the system derives the member relationship for a member person and the subscription tier for a membership.</li> <li>• <b>Member Relationship Derivation Date Characteristic Type</b> - Used when the system derives the member relationship for a member person.</li> <li>• <b>Member Relationship Structure Characteristic Type</b> - Used when the system derives the member relationship for a member person.</li> <li>• <b>New Born Gift Days Characteristic Type</b> - Used when the system derives the member relationship for a member person and the subscription tier for a membership.</li> <li>• <b>New Born Gift Days Applicability Characteristic Type</b> - Used when the system derives the member relationship for a member person and the subscription tier for a membership.</li> <li>• <b>Subscription Tier Structure Characteristic Type</b> - Used when the system derives the subscription tier for a membership.</li> <li>• <b>Subscription Tier Characteristic Type</b> - Used when the system stores the subscription tier for a membership.</li> <li>• <b>Young Adult Max Age Limit Characteristic Type</b> - Used when the system derives the member relationship for a member person and the subscription tier for a membership.</li> <li>• <b>Young Adult Max Age Limit Applicability Characteristic Type</b> - Used when the system derives the member relationship for a member person and the subscription tier for a membership.</li> </ul>	

Field Name	Field Description	Mandatory (Yes or No)						
Value	<p>Used to specify the attribute value. The attribute value that you can specify varies depending on the attribute you want to set in the member relationship and subscription tier preference:</p>	Yes (Conditional)

Here, you must define the required predefined characteristic values.					

Field Name	Field Description	Mandatory (Yes or No)		
	<table border="1" style="width: 100%;"> <tr> <td style="width: 30%; vertical-align: top;">           Young Adult Max Age Limit Applicability Characteristic Type         </td> <td style="vertical-align: top;">           Used to specify the characteristic type that indicates whether you want to consider the young adults during the premium calculation. The system supports the following two characteristic values — <b>Y</b> and <b>N</b>. This type of characteristic can be defined for the following entities:           <ul style="list-style-type: none"> <li>• Policy Plan</li> <li>• Policy</li> </ul>           Here, you must specify a characteristic type where the characteristic entity is set to <b>Policy Plan</b> and <b>Policy</b>.         </td> </tr> </table>	Young Adult Max Age Limit Applicability Characteristic Type	Used to specify the characteristic type that indicates whether you want to consider the young adults during the premium calculation. The system supports the following two characteristic values — <b>Y</b> and <b>N</b> . This type of characteristic can be defined for the following entities: <ul style="list-style-type: none"> <li>• Policy Plan</li> <li>• Policy</li> </ul> Here, you must specify a characteristic type where the characteristic entity is set to <b>Policy Plan</b> and <b>Policy</b> .	
Young Adult Max Age Limit Applicability Characteristic Type	Used to specify the characteristic type that indicates whether you want to consider the young adults during the premium calculation. The system supports the following two characteristic values — <b>Y</b> and <b>N</b> . This type of characteristic can be defined for the following entities: <ul style="list-style-type: none"> <li>• Policy Plan</li> <li>• Policy</li> </ul> Here, you must specify a characteristic type where the characteristic entity is set to <b>Policy Plan</b> and <b>Policy</b> .			
Entity Type	<p>Used to indicate the type of entity for which the attribute is applicable. The valid values are:</p> <ul style="list-style-type: none"> <li>• Account</li> <li>• Billable Charge</li> </ul> <p><b>Note:</b> At present, this data is stored for informational purposes only and is not considered in the business logic. If required, you can add more entity types to the <b>MAP_ENTITY_FLG</b> lookup field.</p>	No		

**Tip:** Alternatively, you can edit the details of a member relationship and subscription tier preference by clicking the **Edit** button in the **Field Mapping** zone.

3. Modify the required details in the **Main** section.
4. Define, edit, or remove the attribute from the member relationship and subscription tier preference, if required.

**Note:** You must set at least one attribute in a member relationship and subscription tier preference.

5. Click **Save**.

The changes made to the member relationship and subscription tier preference are saved.

How to search for a member relationship and subscription tier preference	<a href="#">Searching for a Member Relationship and Subscription Tier Preference</a> on page 179

## Copying a Member Relationship and Subscription Tier Preference

Instead of creating a member relationship and subscription tier preference from scratch, you can create a new member relationship and subscription tier preference using an existing member relationship and subscription tier preference. This is possible through copying a member relationship and subscription tier preference. On copying a member relationship and subscription tier preference, the details including the attributes are copied to the new member relationship and subscription tier preference. You can then edit the details, if required.

### Prerequisites

To copy a member relationship and subscription tier preference, you should have:

- Member relationship and subscription tier preference (whose copy you want to create) defined in the application
- Required characteristic types defined in the application
- Values defined in the **MAP\_ENTITY\_FLG** lookup field

### Procedure

To copy a member relationship and subscription tier preference:

1. Search for the member relationship and subscription tier preference in the **Field Mapping** screen.
2. In the **Search Results** section, click the **Duplicate**  icon in the **Duplicate** column corresponding to the member relationship and subscription tier preference whose copy you want to create.

The **Field Mapping** screen appears. It contains the following sections:

- **Main** - Used to specify basic details of the member relationship and subscription tier preference. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Preference	Used to specify the member relationship and subscription tier preference.	Yes
Description	Used to specify the description for the member relationship and subscription tier preference.	Yes
Detailed Description	Used to specify additional information about the member relationship and subscription tier preference.	No
Status	Used to indicate the status of the member relationship and subscription tier preference. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>	Yes
Preference Category	Indicates the category to which the preference belongs. The valid value is: <ul style="list-style-type: none"> <li>• Member Relationship and Subscription Tier Preferences</li> </ul>	Not applicable

- **Preference Settings** - Used to set the attributes in the member relationship and subscription tier preference. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Attribute	<p>Used to indicate the attribute which you want to set in the member relationship and subscription tier preference. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Age Calculation Date Basis Characteristic Type</b> - Used when the system derives the member relationship for a member person and the subscription tier for a membership.</li> <li>• <b>Max Age Limit for Max Dependent Count Characteristic Type</b> - Used when the system derives the member relationship for a member person and the subscription tier for a membership.</li> <li>• <b>Max Number of Dependents Order Priority Characteristic Type</b> - Used when the system derives the member relationship for a member person and the subscription tier for a membership.</li> <li>• <b>Member Relationship Characteristic Type</b> - Used when the system stores the member relationship for a member person.</li> <li>• <b>Maximum Number of Dependents Characteristic Type</b> - Used when the system derives the member relationship for a member person and the subscription tier for a membership.</li> <li>• <b>Member Relationship Derivation Date Characteristic Type</b> - Used when the system derives the member relationship for a member person.</li> <li>• <b>Member Relationship Structure Characteristic Type</b> - Used when the system derives the member relationship for a member person.</li> <li>• <b>New Born Gift Days Characteristic Type</b> - Used when the system derives the member relationship for a member person and the subscription tier for a membership.</li> <li>• <b>New Born Gift Days Applicability Characteristic Type</b> - Used when the system derives the member relationship for a member person and the subscription tier for a membership.</li> </ul>	<p>Yes (Conditional)</p> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> This field is required while setting an attribute in the member relationship and subscription tier preference.</p> </div>

Field Name	Field Description	Mandatory (Yes or No)				
	<ul style="list-style-type: none"> <li>• <b>Subscription Tier Structure Characteristic Type</b> - Used when the system derives the subscription tier for a membership.</li> <li>• <b>Subscription Tier Characteristic Type</b> - Used when the system stores the subscription tier for a membership.</li> <li>• <b>Young Adult Max Age Limit Characteristic Type</b> - Used when the system derives the member relationship for a member person and the subscription tier for a membership.</li> <li>• <b>Young Adult Max Age Limit Applicability Characteristic Type</b> - Used when the system derives the member relationship for a member person and the subscription tier for a membership.</li> </ul>					
Value	<p>Used to specify the attribute value. 	<p>Young Adult Max Age Limit Applicability Characteristic Type</p>	<p>Used to specify the characteristic type that indicates whether you want to consider the young adults during the premium calculation. The system supports the following two characteristic values — <b>Y</b> and <b>N</b>. This type of characteristic can be defined for the following entities:</p> <ul style="list-style-type: none"> <li>• Policy Plan</li> <li>• Policy</li> </ul>	

Field Name	Field Description	Mandatory (Yes or No)		
	<table border="1"> <tr> <td></td> <td>Here, you must specify a characteristic type where the characteristic entity is set to <b>Policy Plan</b> and <b>Policy</b>.</td> </tr> </table>		Here, you must specify a characteristic type where the characteristic entity is set to <b>Policy Plan</b> and <b>Policy</b> .	
	Here, you must specify a characteristic type where the characteristic entity is set to <b>Policy Plan</b> and <b>Policy</b> .			
Entity Type	<p>Used to indicate the type of entity for which the attribute is applicable. The valid values are:</p> <ul style="list-style-type: none"> <li>Account</li> <li>Billable Charge</li> </ul> <p><b>Note:</b> At present, this data is stored for informational purposes only and is not considered in the business logic. If required, you can add more entity types to the <b>MAP_ENTITY_FLG</b> lookup field.</p>	No		

**Note:** While defining a member relationship and subscription tier preference, you must set at least one attribute in the member relationship and subscription tier preference.

**Tip:** Alternatively, you can copy a member relationship and subscription tier preference by clicking the **Duplicate** button in the **Field Mapping** zone.

- Enter the required details in the **Main** section.
- Define, edit, or remove the attribute from the member relationship and subscription tier preference, if required.
- Click **Save**.

The new member relationship and subscription tier preference is defined.

## Deleting a Member Relationship and Subscription Tier Preference

### Procedure

To delete a member relationship and subscription tier preference:

- Search for the member relationship and subscription tier preference in the **Field Mapping** screen.
- In the **Search Results** section, click the **Delete** (🗑️) icon in the **Delete** column corresponding to the member relationship and subscription tier preference that you want to delete.

A message appears confirming whether you want to delete the member relationship and subscription tier preference.

**Tip:** Alternatively, you can delete a member relationship and subscription tier preference by clicking the **Delete** button in the **Field Mapping** zone.

3. Click **OK**.

The member relationship and subscription tier preference is deleted.

- [Algorithms Used in C1-Membership](#)
- [Policy \(Used for Searching\)](#)
- [Policy \(Used for Viewing\)](#)
- [Policy Plan \(Used for Viewing\)](#)
- [Membership \(Used for Searching\)](#)
- [Membership \(Used for Viewing\)](#)

Group insurance health plans provide coverage to a group of members, usually comprised of company employees or members of an organization. Among all types of group insurance health plans, the fully-insured plan is one of the traditional ways to structure an employer-sponsored health plan. It is also commonly known as fully-insured employee health insurance.

In the fully-insured group health plan, the employer contracts an insurance company to cover the employees and their dependents. The employer pays a premium to the insurance carrier. The premium rates are fixed for a year based on the number of employees which are enrolled in the plan. The monthly premium changes during the year when the number of enrolled employees change in the plan. The insurance carrier collects the premium from the employer and pays the health insurance claims to the employees based on the coverage benefits outlined in the policy. The covered persons (i.e. employees and dependents) are responsible to pay any deductible amounts or co-payments required for covered services under the policy.

Oracle Revenue Management and Billing (ORMB) provides specialized methodologies for calculating premium for the employees and their dependents and then bill the total premium to the employer (known as the parent customer in ORMB) or to its logical designed billing entities (known as the bill groups in ORMB). The system enables you to offer different rates for a covered service depending on the following:

- Age of the employee or dependent
- How dependent person is related to the main subscriber
- Membership subscription tier
- Geographic rating area
- Membership or member person attributes

Oracle Revenue Management and Billing (ORMB) enables you to use the pricing methodologies and the billing engine for the fully-insured group health insurance business. To design the pricing and billing models for the fully-insured group health insurance business, you need to create the following entities in ORMB:

- Parent Customer
- Bill Groups
- Bill Group's Account
- Fully-Insured Group Policy
- Policy Plans
- Price Items (for each covered service in the policy)

- Pricing Rule Types
- Pricing Rules

## Pre-requisites

---

To set the billing system for a fully-insured group customer, you need to do the following:

- Define the required policy types in the system.
- Define the required policy person roles in the system.
- Define the values for the **C1-SourceSystemLookup** extendable lookup.
- Define the required characteristic types where the characteristic entity is set to **Policy Type**.
- Define the required characteristic types where the characteristic entity is set to **Policy**.
- Define the status reasons for the **Terminated** status of the **C1-POLICY** business object in the **Status Reason** screen.
- Define the status reasons for the **Reinstated** status of the **C1-POLICY** business object in the **Status Reason** screen.
- Define the required price items in the system.
- Define the required age based, tier based, pass-through billable charge, additional charge, and/or benefit pricing rule types.
- Define the required characteristic types where the characteristic entity is set to **Policy Plan**.
- Define the required contract relationship types in the system.
- Define the required characteristic types where the characteristic entity is set to **Membership**.
- Define the required characteristic types where the characteristic entity is set to **Membership Person**.
- Define the required characteristic types where the characteristic entity is set to **Benefits**.
- Define the required contracts (which you want to associate with a membership) in the system.
- Define the values for the **BILL\_TO\_TYPE\_FLG**, **BENEFIT\_TYPE\_FLG**, **BENEFIT\_SUB\_TYPE\_FLG**, and **BENEFIT\_SRC\_FLG** lookup fields
- Define the required parameter values in the following algorithm which is attached to the **C1-POLICY** business object:
  - C1-POLBOVAL
- Define the required parameter values in the following algorithms which are used in the lifecycle of the **C1-POLICY** business object:
  - C1-EVCSTSTAT
  - C1-PLCYTRMRQ
  - C1-POLCYTERM
  - C1-DELTRMLTR
  - C1-PLCYREIRQ
  - C1-POLCYREIN
  - C1-CCPOLRE1
- Define a predefined characteristic type named **Active Employee Coverage Billing Arrangement** with the following characteristic values:

Characteristic Value	Description
DRT	Direct Billing
GRP	Group Billing

You must set the characteristic entity of the **Active Employee Coverage Billing Arrangement** characteristic type to **Person**.

- Define a predefined characteristic type named **Benefit Billing Arrangement** with the following characteristic values:

Characteristic Value	Description
DRT	Direct Billing
GRP	Group Billing

You must set the characteristic entity of the **Benefit Billing Arrangement** characteristic type to **Person, Policy, and Policy Plan**.

- Define a predefined characteristic type named **COBRA Billing Arrangement** with the following characteristic values:

Characteristic Value	Description
DRT	Direct Billing
GRP	Group Billing
TPA	TPA Billing

You must set the characteristic entity of the **COBRA Billing Arrangement** characteristic type to **Person, Policy, and Policy Plan**.

- Define the required person relationship types and account relationship types in the system.
- Define the required geographic rating areas in the system.
- Define the required member relationship/subscription tier structures in the system.
- Define the required geographic rating area preference and member relationship and subscription tier preference through the **Field Mapping** screen.
- Define the required Medicare plan benefit packages in the system.
- Set the values for the following option types in the **C1-PERSTYPE** feature configuration:
  - Bill Group Person Type
  - Parent Person Type
  - TPA Person Type
- Set the values for the following option types in the **C1-ASOBLNG** feature configuration:
  - Membership ID Characteristic for Billable Charge
  - Parent Customer Policy Person Role
  - Bill Group Policy Person Role
  - Membership Inactive Status
  - Membership Person Inactive Status
  - Geographic Rating Area Field Mapping

- Relation Structure Code Field Mapping
- Billing Arrangement
- Benefit Billing Arrangement
- Cobra Billing Arrangement
- TPA Person Relationship Type
- TPA Account Relationship Type
- TPA Policy Person Role

## **Fully-Insured Group Policy**

You can create a fully-insured group policy using a policy type where the policy category is set to **Fully-Insured Group** or **Fully-Insured Individual**. The policy type indicates the business object using which the fully-insured group policy should be created in the system.

**Note:** At present, the **Fully-Insured Individual** policy category is not yet supported in the system.

As per the fully-insured group health insurance business, the system enables you to create a fully-insured group policy for the following:

- A parent customer (where a bill group is not associated)
- A bill group (where the parent customer is the policy holder)

You can create or edit a fully-insured group policy from the **Policy** screen. In addition, you can create or edit a fully-insured group policy through a customer registration object or a health care inbound message. If the fully-insured group policy information is given for a bill group in a health care inbound message, the system does the following:

- Associates the bill group with the policy using the policy person role which is specified in the **Bill Group Policy Person Role** option type of the **C1-ASOBLNG** feature configuration
- Associates the parent customer with the policy using the policy person role which is specified in the **Parent Customer Policy Person Role** option type of the **C1-ASOBLNG** feature configuration

However, if the fully-insured group policy information is given for a parent customer in a health care inbound message, the system does the following:

- Associates the parent customer with the policy using the policy person role which is specified in the **Parent Customer Policy Person Role** option type of the **C1-ASOBLLNG** feature configuration

A fully-insured group policy encapsulates the following information:

- **Policy Persons** – While creating a fully-insured group policy, you need to associate the person who is the main customer of the policy. While associating a person with a fully-insured group policy, you need to specify the policy person role which indicates the role of the person in the policy. For example, whether the person associated with the policy is the policy holder, broker, or underwriter. You can associate multiple persons with a fully-insured group policy using the same or different policy person role. However, at a time, only one person can be the main customer of the policy.
- **Policy Plans** – You can define different types of plans in a fully-insured group policy. For more information, refer to [Types of Policy Plan](#) on page 251.
- **Memberships** – You can define different types of memberships for a fully-insured group policy plan. For more information, refer to [Types of Membership](#) on page 252.
- **Member Persons** – While adding a person to a membership, you need to specify whether the person is the main subscriber of the membership, whether the person is financially responsible for the membership, and how the person is related to the main subscriber. At a time, only one person can be the main subscriber of the membership. You cannot remove a member person, who is the main subscriber, from the membership. You can inactivate a member person whenever required. If you inactivate a member person who is the main subscriber, the system automatically inactivates the membership and all other member persons which are included in the membership.
- **Membership Contracts** – You can associate one or more contracts with a membership. At present, the system uses the contract created for a policy plan on the accounts of the parent customer or bill group for billing the respective membership premium. The system does not use the membership contracts for billing the membership premium.
- **Policy Plan Contracts** – The system creates or updates contracts of a policy plan when you do either of the following:
  - Create or Edit a Policy Plan from the User Interface or through an Inbound Message
  - Create or Edit an Account from the User Interface or through an Inbound Message

The system uses the contract created for a policy plan on the accounts of the parent customer or bill group for billing the respective membership premium. For more information, refer to [Single Contract Creation Across Fully-Insured Group Policies and Plans](#) on page 218 and [Policy Plan Specific Contract Creation](#) on page 237.

On defining a fully-insured group policy, the status of the policy is set to **Pending**. You can then edit, delete or activate a policy. Once a fully-insured group policy is activated, you can terminate, reinstate, or renew the policy whenever required.

## Fully-Insured Group Policy Activation

You can activate a fully-insured group policy by clicking the **Activate** button in the **Policy** screen. On activating a fully-insured group policy, the status of the policy is set to **In Force/Active**.

**Note:** If a fully-insured group policy is created through a customer registration object or a health care inbound message, the status of the policy is directly set to **In Force/Active**

Once a fully-insured group policy is activated, you can terminate, reinstate, or renew the policy whenever required.

## Fully-Insured Group Policy Termination

The system enables you to terminate a fully-insured group policy whenever required. There are two ways in which you can terminate a fully-insured group policy:

- **Initiate Policy Termination Process** – In this method, you can initiate the policy termination process from the user interface. To initiate the termination process, you need to specify the termination date and termination reason. On initiating the termination process, the status of the policy is changed to **Pending Termination**. In addition, the

system creates an outbound message which request for confirmation whether the policy should be terminated. This outbound message can be sent to the policy processing system via custom mechanism. On receiving confirmation from the policy processing system through a health care inbound message, the system changes the status of the policy to **Terminated**.

- **Terminate Policy** – In this method, you can directly terminate a fully-insured group policy. To terminate a fully-insured group policy, you need to specify the termination reason. You can directly terminate the policy from the user interface or through a health care inbound message. On clicking the **Terminate** button, the system will terminate the fully-insured group policy on the system date. However, when you terminate a fully-insured group policy through a health care inbound message, the policy is terminated when the health care inbound message is processed in the system. On terminating a fully-insured group policy, the status of the policy is changed to **Terminated**.

Once the status of the policy is changed to **Terminated**, the system sets the end date of the following entities to the termination date when the respective condition is met:

- Policy (when the termination date is not earlier than the policy start date or later than the policy end date)
- Policy Person (when the termination date falls within the date range in which the person is associated with the policy)

**Note:** The system does not consider those persons associated with policy whose start date is later than the termination date or whose end date is earlier than the termination date.

- Policy Plan (when the termination date falls within the date range of the policy plan)

**Note:** The system does not consider those policy plans whose start date is later than the termination date or whose end date is earlier than the termination date.

- Membership (when the termination date falls within the date range of the membership)

**Note:** The system does not consider those memberships whose start date is later than the termination date or whose end date is earlier than the termination date.

- Member Person (when the termination date falls within the date range in which the person is associated with the membership)

**Note:** The system does not consider those member persons whose start date is later than the termination date or whose end date is earlier than the termination date.

- Contracts Associated with the Membership (when the termination date falls within the date range of the contract)

**Note:** The system does not consider those contracts whose start date is later than the termination date or whose end date is earlier than the termination date.

The system also changes the status of all memberships to **Terminated** irrespective of whether it is effective on the termination date or not. On terminating a membership, the system creates an audit event for the membership. For each audit event, the system identifies the policy plan to which the membership belongs and the active pricing rules defined on the policy plan. It then identifies the pricing rule types using which these active pricing rules are created in the system. An entry for each membership, pricing rule type, and effective date combination is created in the **Pending (P)** status in the **CI\_REPRC\_ENTITY\_DTL** table. For more information, see [Audit Framework for Fully-Insured Group Health Insurance Billing](#) on page 3021.

## Fully-Insured Group Policy Reinstatement

The system enables you to reinstate the terminated policy whenever required. There are two ways in which you can reinstate a fully-insured group policy:

- **Initiate Policy Reinstatement Process** – In this method, you can initiate the policy reinstatement process from the user interface. To initiate the reinstatement process, you need to specify the reinstatement reason. On initiating

the reinstatement process, the status of the policy is changed to **Pending Reinstatement**. In addition, the system creates an outbound message which request for confirmation whether the policy should be reinstated. This outbound message can be sent to the policy processing system via custom mechanism. On receiving confirmation from the policy processing system through a health care inbound message, the system changes the status of the policy to **Reinstated**.

- **Reinstate Policy** – In this method, you can directly reinstate a fully-insured group policy. To reinstate a fully-insured group policy, you need to specify the reinstatement reason. You can directly reinstate the policy from the user interface or through a health care inbound message. On clicking the **Reinstate** button, the system will reinstate the fully-insured group policy on the system date. However, when you reinstate a fully-insured group policy through a health care inbound message, the policy is reinstated when the health care inbound message is processed in the system. On reinstating a fully-insured group policy, the status of the policy is changed to **Reinstated**.

Once the status of the policy is changed to **Reinstated**, the system updates the end date of the following entities to the respective original end date:

- Policy
- Policy Person
- Policy Plan
- Membership
- Member Person
- Contracts Associated with the Membership

**Note:**

The system stores the original end date of the above listed entities when you define or edit a policy, policy plan, or membership.

Here, the assumption is that the pass-through billable charges information for the membership will be sent again through an inbound message along with the reinstatement reason. And, therefore the exiting billable charges will not be extended.

Finally, the system automatically transitions the fully-insured group policy from **Reinstated** to **In Force/Active**.

## Fully-Insured Group Policy Renewal

You can renew a fully-insured group policy only through a health care inbound message and not from the user interface. If you want to renew a fully-insured group policy, you must sent the renewal date along with the new policy end date through a health care inbound message. On processing the health care inbound message, the fully-insured group policy is renewed. The renewal date is stamped on the fully-insured group policy. The policy end date is extended as mentioned in the health care inbound message. The policy plan and membership information for the renewed period must be sent in the subsequent health care inbound messages.

**Note:** You can renew a fully-insured group policy when it is in the **In Force/Active** status.

## Single Contract Creation Across Fully-Insured Group Policies and Plans

The system automatically creates a contract for a fully-insured group policy plan on the parent customer and/or bill group accounts. The system creates or updates contracts of a policy plan when you do either of the following:

- **Create or Edit a Policy Plan from the User Interface or through an Inbound Message** – The system creates a contract in either of the following ways:
  - If a price item is associated with the policy plan, it creates a contract using the contract type which is associated with the price item.

- If a pricing rule type is associated with the policy plan and the pricing rule type contains one or more price items, it creates one contract using each contract type which may be associated with one or more price items. Let us assume that a pricing rule type named PRT1 is associated with the policy plan and it contains three price items – PI1, PI2, and PI3. Now, if the PI1 is associated with the CT1 contract type, PI2 is associated with the CT2 contract type, and PI3 is associated with the CT3 contract type, the system will create three contracts - C1 using CT1, C2 using CT2, and C3 using CT3. However, if the PI1 and PI3 are associated with the CT1 contract type and PI2 is associated with the CT2 contract type, the system will create two contracts - C1 using CT1 and C2 using CT2.

If a policy has two or more plans, multiple pricing rule types are associated with each policy plan and each pricing rule type contains multiple price items, it creates one contract using each contract type which may be associated with one or more price items. Let us assume that P1 has two plans — PP1 and PP2, PRT1 is associated with PP1, PRT2 is associated with PP2, PRT1 contains three price items – PI1, PI2, and PI3, and PRT2 contains three price items – PI1, PI4, and PI5. Now, if the PI1 is associated with the CT1 contract type, PI2 is associated with the CT2 contract type, PI3 is associated with the CT3 contract type, PI4 is associated with the CT4 contract type, and PI5 is associated with the CT5 contract type, the system will create five contracts - C1 using CT1, C2 using CT2, C3 using CT3, C4 using CT4, and C5 using CT5. However, if PI1, PI2, and PI5 are associated with the CT1 contract type and PI3 and PI4 are associated with the CT2 contract type, the system will create two contracts - C1 using CT1 and C2 using CT2.

The status of each contract is set to **Active**. The contract start date is set to the start date of the respective plan. If the same contract type is associated with different price items, and if these price items are added on different pricing rule types, and if these pricing rule types are associated with different plans, the contract start date is set to the start date of the earliest plan. The default rate schedule specified on the respective contract type is added to the contract in the rate information and its effective date is set to the contract start date.

#### **Example 1 — Contract Creation for a Parent Customer**

If a policy plan belongs to a policy of the parent customer (where a bill group is not associated), the system will create one contract using each contract type on each account of the parent customer and bill groups. Let us assume that...

- PC1 has two bill groups – BG1 and BG2
- PC1 has A1 account, BG1 has A2 account, and BG2 has A3 and A4 accounts
- A policy named P1 with two plans – PP1 and PP2 - is created for PC1 (where none of the bill groups are associated)
- PP1 (with the start date as 01-01-2019) is associated with PRT1 and PRT2
- PP2 (with the start date as 03-01-2019) is associated with PRT2 and PRT3
- PRT1 contains two price items – PI1 and PI2
- PRT2 contains three price items – PI1, PI3, and PI4
- PRT3 contains three price items – PI4, PI5, and PI6
- PI1 is associated with the CT1 contract type, PI2 is associated with the CT2 contract type, PI3 is associated with the CT3 contract type, PI4 and PI5 are associated with the CT4 contract type, and PI6 is associated with the CT6 contract type

Now, in such case, the system will create the following contracts on the A1, A2, A3, and A4 accounts:

Account	Plan	Pricing Rule Type	Price Item	Contract Type	Contract	Plans for which the contract is created...	Contract Start Date (i.e. Earliest Plan Date)
A1	PP1	PRT1	PI1	CT1	A1C1	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
			PI2	CT2	A1C2	PP1 (01-01-2019)	01-01-2019
		PRT2	PI1	CT1	A1C1	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
			PI3	CT3	A1C3	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
			PI4	CT4	A1C4	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
	PP2	PRT2	PI1	CT1	A1C1	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
			PI3	CT3	A1C3	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
			PI4	CT4	A1C4	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
		PRT3	PI4	CT4	A1C4	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019

Account	Plan	Pricing Rule Type	Price Item	Contract Type	Contract	Plans for which the contract is created...	Contract Start Date (i.e. Earliest Plan Date)
			PI5	CT4	A1C4	PP2 (03-01-2019)	01-01-2019 (because PI4 and PI5 are associated with the same contract type (i.e. CT4))
			PI6	CT6	A1C6	PP2 (03-01-2019)	03-01-2019
A2	PP1	PRT1	PI1	CT1	A2C1	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
			PI2	CT2	A2C2	PP1 (01-01-2019)	01-01-2019
		PRT2	PI1	CT1	A2C1	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
			PI3	CT3	A2C3	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
			PI4	CT4	A2C4	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
	PP2	PRT2	PI1	CT1	A2C1	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
			PI3	CT3	A2C3	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
			PI4	CT4	A2C4	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019

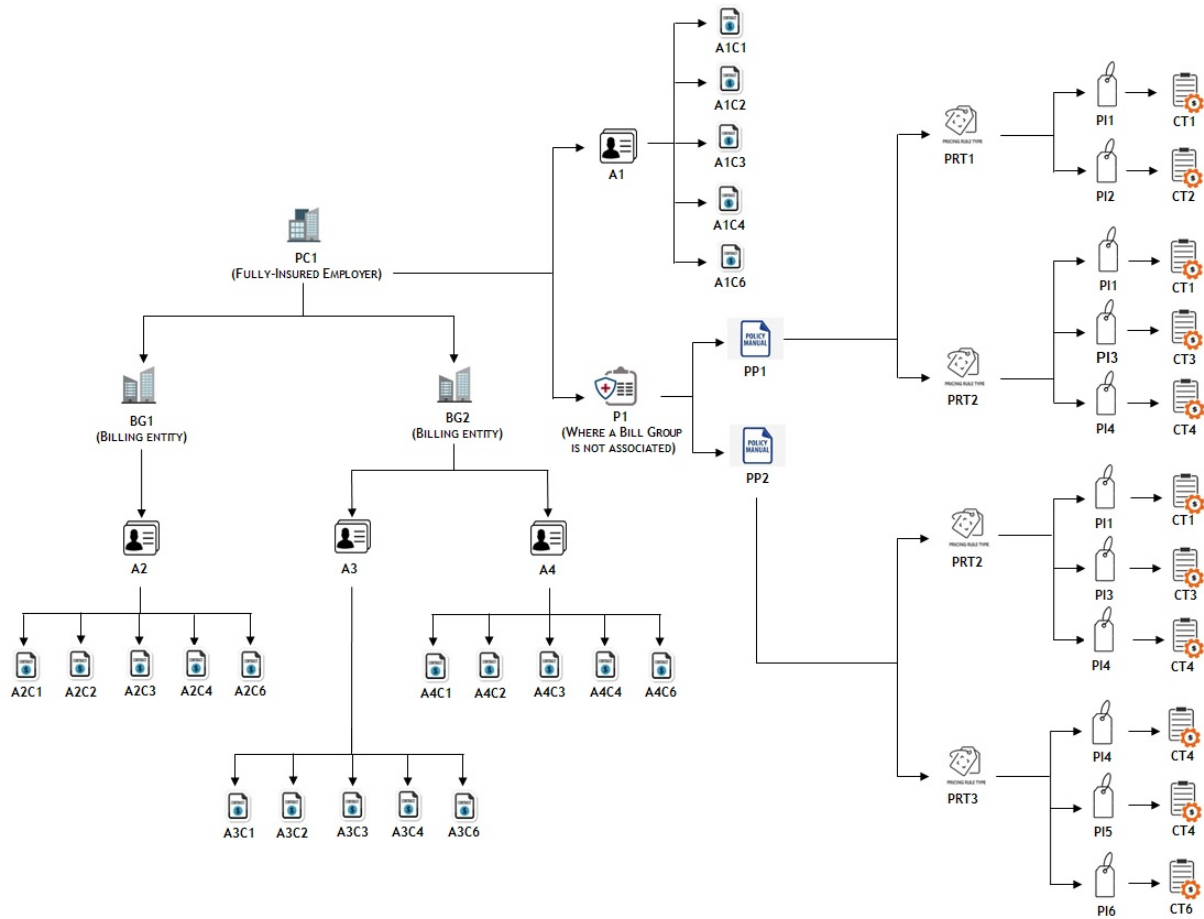

Account	Plan	Pricing Rule Type	Price Item	Contract Type	Contract	Plans for which the contract is created...	Contract Start Date (i.e. Earliest Plan Date)
		PRT3	PI4	CT4	A2C4	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
			PI5	CT4	A2C4	PP2 (03-01-2019)	01-01-2019 (because PI4 and PI5 are associated with the same contract type (i.e. CT4))
			PI6	CT6	A2C6	PP2 (03-01-2019)	03-01-2019
A3	PP1	PRT1	PI1	CT1	A3C1	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
			PI2	CT2	A3C2	PP1 (01-01-2019)	01-01-2019
		PRT2	PI1	CT1	A3C1	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
			PI3	CT3	A3C3	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
			PI4	CT4	A3C4	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
	PP2	PRT2	PI1	CT1	A3C1	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
			PI3	CT3	A3C3	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019

Account	Plan	Pricing Rule Type	Price Item	Contract Type	Contract	Plans for which the contract is created...	Contract Start Date (i.e. Earliest Plan Date)
			PI4	CT4	A3C4	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
		PRT3	PI4	CT4	A3C4	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
			PI5	CT4	A3C4	PP2 (03-01-2019)	01-01-2019 (because PI4 and PI5 are associated with the same contract type (i.e. CT4))
			PI6	CT6	A3C6	PP2 (03-01-2019)	03-01-2019
A4	PP1	PRTI	PI1	CT1	A4C1	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
			PI2	CT2	A4C2	PP1 (01-01-2019)	01-01-2019
		PRT2	PI1	CT1	A4C1	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
			PI3	CT3	A4C3	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
			PI4	CT4	A4C4	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
	PP2	PRT2	PI1	CT1	A4C1	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019

Account	Plan	Pricing Rule Type	Price Item	Contract Type	Contract	Plans for which the contract is created...	Contract Start Date (i.e. Earliest Plan Date)
			PI3	CT3	A4C3	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
			PI4	CT4	A4C4	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
		PRT3	PI4	CT4	A4C4	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
			PI5	CT4	A4C4	PP2 (03-01-2019)	01-01-2019 (because PI4 and PI5 are associated with the same contract type (i.e. CT4))
			PI6	CT6	A4C6	PP2 (03-01-2019)	03-01-2019

The following figure graphically illustrates the example 1:

### Example 2 — Contract Creation for a Bill Group

If a policy plan belongs to a policy of a bill group (where the parent customer is the policy holder), the system will create one contract using each contract type on each account of the parent customer and the bill group. Let us assume that...

- PC1 has two bill groups – BG1 and BG2
- PC1 has A1 account, BG1 has A2 account, and BG2 has A3 and A4 accounts
- A policy named P1 with three plans – PP1, PP2, and PP3 – is created for BG1 (where PC1 is the policy holder)
- PP1 (with the start date as 01-01-2019) is associated with PRT1 and PRT2
- PP2 (with the start date as 03-01-2019) is associated with PRT2 and PRT3
- PP3 (with the start date as 06-01-2019) is associated with PRT1
- PRT1 contains two price items – PI1 and PI2
- PRT2 contains three price items – PI1, PI3, and PI4
- PRT3 contains three price items – PI4, PI5, and PI6
- PI1 is associated with the CT1 contract type, PI2 is associated with the CT2 contract type, PI3 is associated with the CT3 contract type, PI4 and PI5 are associated with the CT4 contract type, and PI6 is associated with the CT6 contract type

Now, in such case, the system will create the following contracts on the A1 and A2 accounts:

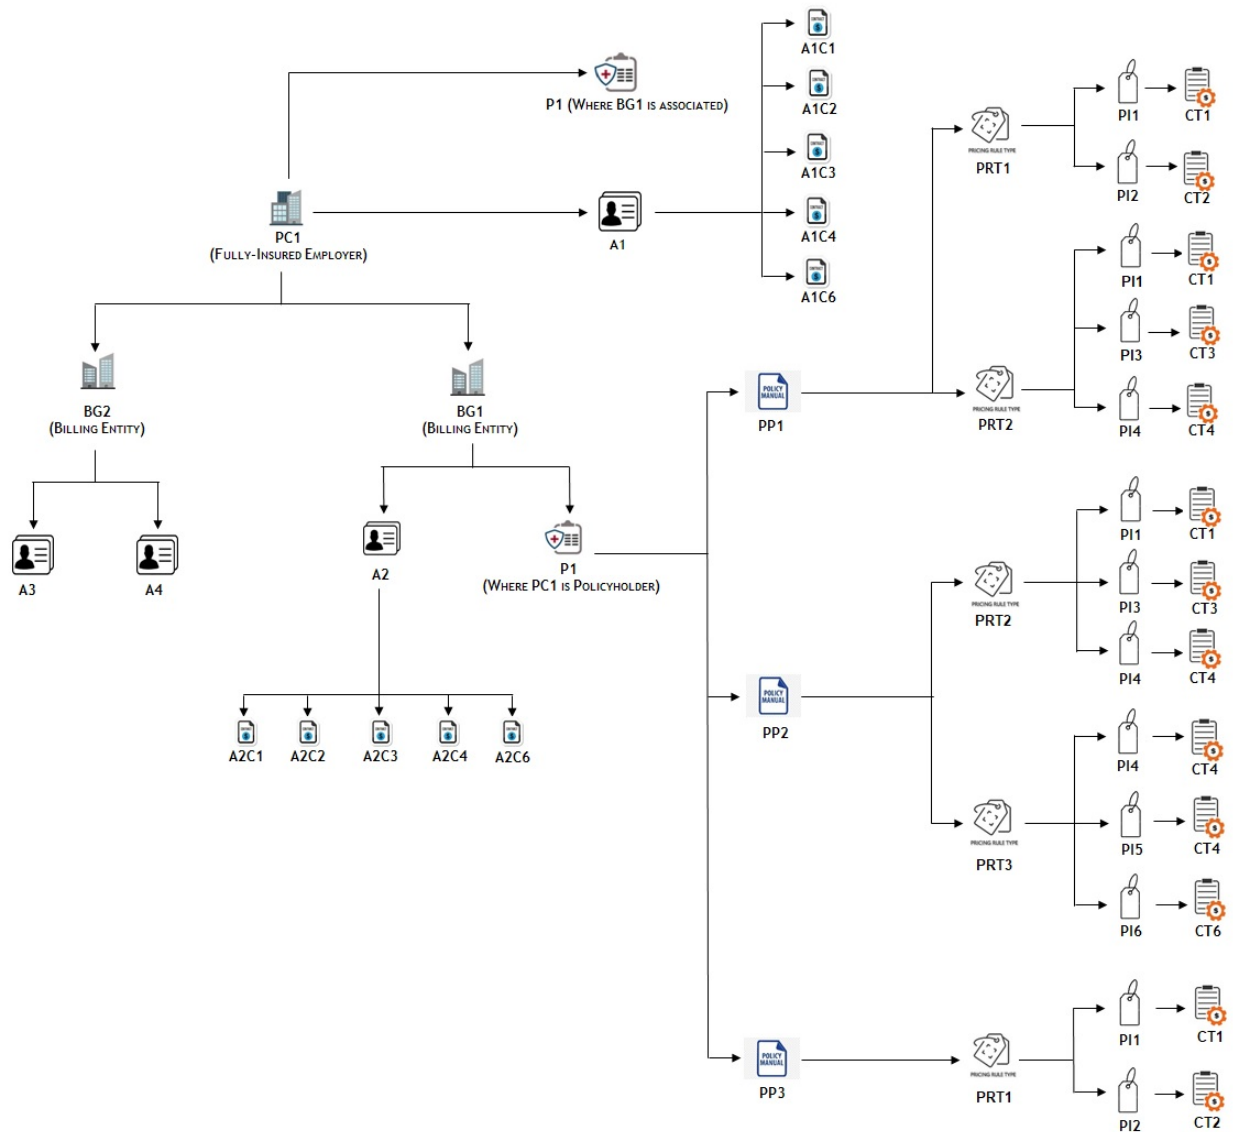

Account	Plan	Pricing Rule Type	Price Item	Contract Type	Contract	Plans for which the contract is created...	Contract Start Date (i.e. Earliest Plan Date)
A1	PP1	PRT1	PI1	CT1	A1C1	PP1 (01-01-2019), PP2 (03-01-2019), and PP3 (06-01-2019)	01-01-2019
			PI2	CT2	A1C2	PP1 (01-01-2019) and PP3 (06-01-2019)	01-01-2019
		PRT2	PI1	CT1	A1C1	PP1 (01-01-2019), PP2 (03-01-2019), and PP3 (06-01-2019)	01-01-2019
			PI3	CT3	A1C3	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
			PI4	CT4	A1C4	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
			PI1	CT1	A1C1	PP1 (01-01-2019), PP2 (03-01-2019), and PP3 (06-01-2019)	01-01-2019
	PP2	PRT2	PI3	CT3	A1C3	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
			PI4	CT4	A1C4	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
			PI1	CT1	A1C1	PP1 (01-01-2019), PP2 (03-01-2019), and PP3 (06-01-2019)	01-01-2019

Account	Plan	Pricing Rule Type	Price Item	Contract Type	Contract	Plans for which the contract is created...	Contract Start Date (i.e. Earliest Plan Date)
		PRT3	PI4	CT4	A1C4	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
			PI5	CT4	A1C4	PP2 (03-01-2019)	01-01-2019 (because PI4 and PI5 are associated with the same contract type (i.e. CT4))
			PI6	CT6	A1C6	PP2 (03-01-2019)	03-01-2019
	PP3	PRT1	PI1	CT1	A1C1	PP1 (01-01-2019), PP2 (03-01-2019), and PP3 (06-01-2019)	01-01-2019
			PI2	CT2	A1C2	PP1 (01-01-2019) and PP3 (06-01-2019)	01-01-2019
	A2	PP1	PRT1	PI1	CT1	A2C1	PP1 (01-01-2019), PP2 (03-01-2019), and PP3 (06-01-2019)
PI2				CT2	A2C2	PP1 (01-01-2019) and PP3 (06-01-2019)	01-01-2019
PRT2			PI1	CT1	A2C1	PP1 (01-01-2019), PP2 (03-01-2019), and PP3 (06-01-2019)	01-01-2019

Account	Plan	Pricing Rule Type	Price Item	Contract Type	Contract	Plans for which the contract is created...	Contract Start Date (i.e. Earliest Plan Date)
			PI3	CT3	A2C3	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
			PI4	CT4	A2C4	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
	PP2	PRT2	PI1	CT1	A2C1	PP1 (01-01-2019), PP2 (03-01-2019), and PP3 (06-01-2019)	01-01-2019
			PI3	CT3	A2C3	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
			PI4	CT4	A2C4	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
		PRT3	PI4	CT4	A2C4	PP1 (01-01-2019) and PP2 (03-01-2019)	01-01-2019
			PI5	CT4	A2C4	PP2 (03-01-2019)	01-01-2019 (because PI4 and PI5 are associated with the same contract type (i.e. CT4))
			PI6	CT6	A2C6	PP2 (03-01-2019)	03-01-2019

Account	Plan	Pricing Rule Type	Price Item	Contract Type	Contract	Plans for which the contract is created...	Contract Start Date (i.e. Earliest Plan Date)
	PP3	PRT1	PI1	CT1	A2C1	PP1 (01-01-2019), PP2 (03-01-2019), and PP3 (06-01-2019)	01-01-2019
			PI2	CT2	A2C2	PP1 (01-01-2019) and PP3 (06-01-2019)	01-01-2019

The following figure graphically illustrates the example 2:

**Note:**

The system creates a contract using a contract type for an account only when the division to which the account and contract type belongs is same.

If a contract of a contract type is already present on the account, the system will not create a new contract. Instead, it will update the start date of the existing contract, if required.

- **Create or Edit an Account from the User Interface or through an Inbound Message** – The system creates a contract when either of the following condition is met:
  - The main customer of the account is a parent customer and holds a policy (where a bill group is not associated) which is created using the policy type where the policy category is set to **Fully-Insured Group**.
  - The main customer of the account is a parent customer and holds a policy (where a bill group is associated) which is created using the policy type where the policy category is set to **Fully-Insured Group**.
  - The main customer of the account is a bill group and holds a policy (where the parent customer is the policy holder) which is created using the policy type where the policy category is set to **Fully-Insured Group**.

The system creates a contract in either of the following ways:

- If a price item is associated with the policy plan, it creates a contract using the contract type which is associated with the price item.
- If a pricing rule type is associated with the policy plan and the pricing rule type contains one or more price items, it creates one contract using each contract type which may be associated with one or more price items. Let us assume that a pricing rule type named PRT1 is associated with the policy plan and it contains three price items – PI1, PI2, and PI3. Now, if the PI1 is associated with the CT1 contract type, PI2 is associated with the CT2 contract type, and PI3 is associated with the CT3 contract type, the system will create three contracts - C1 using CT1, C2 using CT2, and C3 using CT3. However, if the PI1 and PI3 are associated with the CT1 contract type and PI2 is associated with the CT2 contract type, the system will create two contracts - C1 using CT1 and C2 using CT2.

If a policy has two or more plans, multiple pricing rule types are associated with each policy plan and each pricing rule type contains multiple price items, it creates one contract using each contract type which may be associated with one or more price items. Let us assume that P1 has two plans — PP1 and PP2, PRT1 is associated with PP1, PRT2 is associated with PP2, PRT1 contains three price items – PI1, PI2, and PI3, and PRT2 contains three price items – PI1, PI4, and PI5. Now, if the PI1 is associated with the CT1 contract type, PI2 is associated with the CT2 contract type, PI3 is associated with the CT3 contract type, PI4 is associated with the CT4 contract type, and PI5 is associated with the CT5 contract type, the system will create five contracts - C1 using CT1, C2 using CT2, C3 using CT3, C4 using CT4, and C5 using CT5. However, if PI1, PI2, and PI5 are associated with the CT1 contract type and PI3 and PI4 are associated with the CT2 contract type, the system will create two contracts - C1 using CT1 and C2 using CT2.

The status of each contract is set to **Active**. The contract start date is set to the start date of the respective plan. If the same contract type is associated with different price items, and if these price items are added on different pricing rule types, and if these pricing rule types are associated with different plans, the contract start date is set to the start date of the earliest plan. The default rate schedule specified on the respective contract type is added to the contract in the rate information and its effective date is set to the contract start date.

### Example 3 — Contract Creation for an Account of a Parent Customer

If you create an account for a parent customer who holds policies (where a bill group may or may not be associated), the system will create one contract using each contract type for all parent customer's policies on the account. Let us assume...

- PC1 has two bill groups – BG1 and BG2
- PC1 has two policies – a policy named P1 (where a bill group is not associated) and a policy named P2 (where BG1 is associated)
- BG1 has one policy named P2 where PC1 is the policy holder
- An account named A1 is added for PC1
- P1 has two plans – PP1 and PP2
- P2 has two plans – PP11 and PP12
- PP1 (with the start date as 01-01-2019) is associated with PRT1 and PRT2
- PP2 (with the start date as 06-01-2019) is associated with PRT2, PRT3, and PRT4
- PP11 (with the start date as 05-01-2019) is associated with PRT111 and PRT112
- PP12 (with the start date as 09-01-2019) is associated with PRT113 and PRT114
- PRT1 contains two price items – PI1 and PI2
- PRT2 contains two price items – PI3 and PI4
- PRT3 contains two price items – PI1 and PI5
- PRT4 contains two price items – PI6 and PI7

- PRT111 contains two price items – PI11 and PI12
- PRT112 contains two price items – PI1 and PI5
- PRT113 contains two price items – PI13 and PI14
- PRT114 contains two price items – PI7 and PI15
- PI1 is associated with the CT1 contract type, PI2 and PI3 are associated with the CT2 contract type, PI4 is associated with the CT4 contract type, PI5 is associated with the CT5 contract type, PI6 is associated with the CT6 contract type, PI7 is associated with the CT7 contract type, PI11 is associated with the CT11 contract type, PI12 is associated with the CT12 contract type, PI13 is associated with the CT13 contract type, PI14 is associated with the CT14 contract type, and PI15 is associated with the CT15 contract type

Now, in such case, the system will create the following contracts on the A1 account:

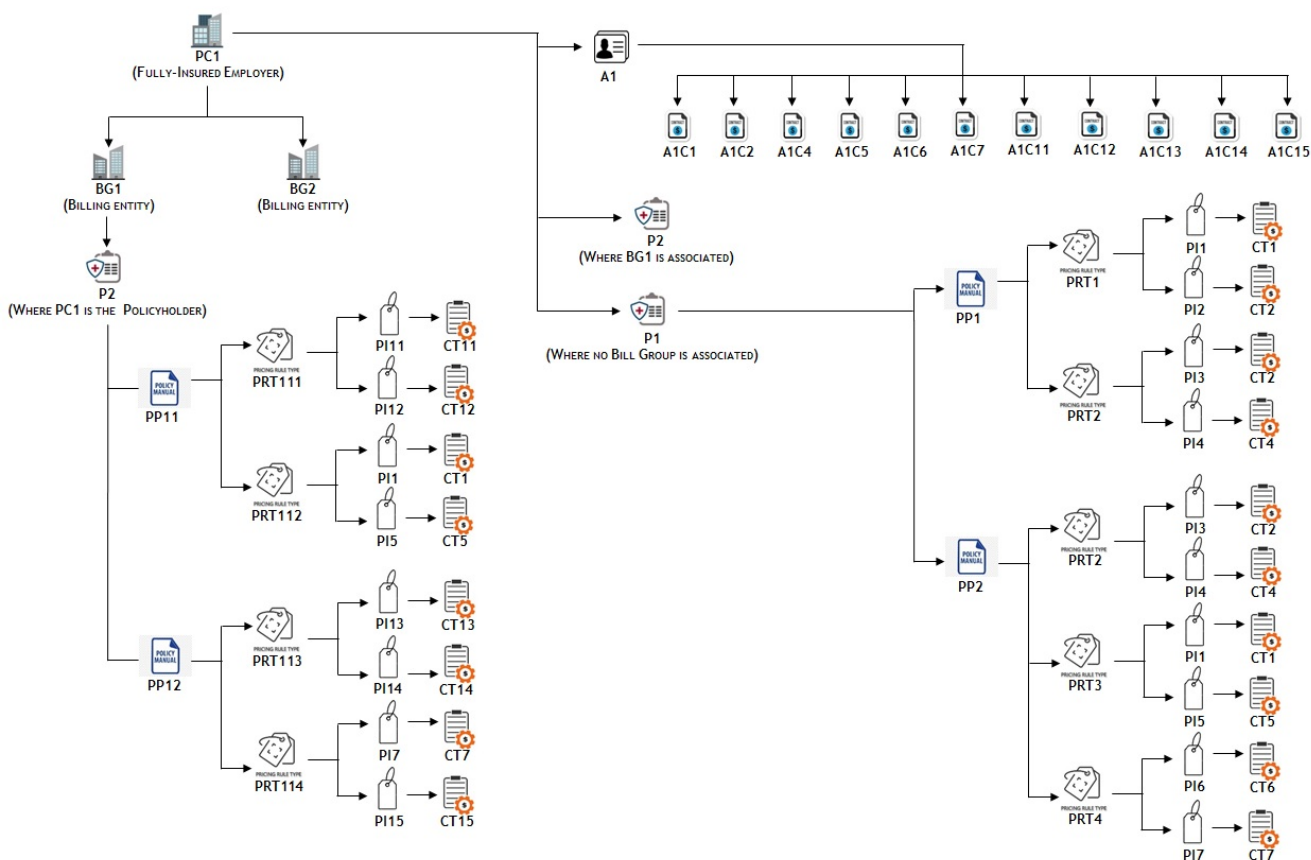

Account	Policy	Plan	Pricing Rule Type	Price Item	Contract Type	Contract	Plans for which the contract is created...	Contract Start Date (i.e. Earliest Plan Date)
A1	P1	PP1	PRT1	PI1	CT1	A1C1	PP1 (01-01-2019), PP2 (06-01-2019), and PP11 (05-01-2019)	01-01-2019
				PI2	CT2	A1C2	PP1 (01-01-2019)	01-01-2019
			PRT2	PI3	CT2	A1C2	PP1 (01-01-2019) and PP2 (06-01-2019)	01-01-2019
				PI4	CT4	A1C4	PP1 (01-01-2019) and PP2 (06-01-2019)	01-01-2019
		PP2	PRT2	PI3	CT2	A1C2	PP1 (01-01-2019) and PP2 (06-01-2019)	01-01-2019
				PI4	CT4	A1C4	PP1 (01-01-2019) and PP2 (06-01-2019)	01-01-2019

Account	Policy	Plan	Pricing Rule Type	Price Item	Contract Type	Contract	Plans for which the contract is created...	Contract Start Date (i.e. Earliest Plan Date)	
			PRT3	PI1	CT1	A1C1	PP1 (01-01-2019), PP2 (06-01-2019), and PP11 (05-01-2019)	01-01-2019	
				PI5	CT5	A1C5	PP2 (06-01-2019) and PP11 (05-01-2019)	05-01-2019	
			PRT4	PI6	CT6	A1C6	PP2 (06-01-2019)	06-01-2019	
				PI7	CT7	A1C7	PP2 (06-01-2019) and PP12 (09-01-2019)	06-01-2019	
	P2	PP11	PRT111	PI11	CT11	A1C11	PP11 (05-01-2019)	05-01-2019	
						PI12	CT12	A1C12	PP11 (05-01-2019)
				PRT112	PI1	CT1	A1C1	PP1 (01-01-2019), PP2 (06-01-2019), and PP11 (05-01-2019)	01-01-2019
					PI5	CT5	A1C5	PP2 (06-01-2019) and PP11 (05-01-2019)	05-01-2019
			PP12	PRT113	PI13	CT13	A1C13	PP12 (09-01-2019)	09-01-2019
					PI14	CT14	A1C14	PP12 (09-01-2019)	09-01-2019
				PRT114	PI7	CT7	A1C7	PP2 (06-01-2019) and PP12 (09-01-2019)	06-01-2019

Account	Policy	Plan	Pricing Rule Type	Price Item	Contract Type	Contract	Plans for which the contract is created...	Contract Start Date (i.e. Earliest Plan Date)
				PI15	CT15	A1C15	PP12 (09-01-2019)	09-01-2019

The following figure graphically illustrates the example 3:

#### Example 4 — Contract Creation for an Account of a Bill Group

If you create an account for a bill group who holds policies and its parent customer holds policies (where a bill group may or may not be associated), the system will create one contract using each contract type for the bill group’s polices and parent customer’s polices (where a bill group is not associated) on the account. Let us assume...

- PC1 has two bill groups – BG1 and BG2
- PC1 has two policies – a policy named P2 (where a bill group is not associated) and a policy named P1 (where BG2 is associated)
- BG2 has one policy named P1 where PC1 is the policy holder
- An account named A1 is added for BG2
- P1 has two plans – PP11 and PP12

- P2 has two plans – PP1 and PP2
- PP1 (with the start date as 01-01-2019) is associated with PRT1 and PRT2
- PP2 (with the start date as 04-01-2019) is associated with PRT3 and PRT4
- PP11 (with the start date as 07-01-2019) is associated with PRT11 and PRT12
- PP12 (with the start date as 11-01-2019) is associated with PRT13 and PRT14
- PRT1 contains two price items – PI1 and PI2
- PRT2 contains two price items – PI3 and PI2
- PRT3 contains two price items – PI3 and PI4
- PRT4 contains two price items – PI5 and PI6
- PRT11 contains two price items – PI111 and PI112
- PRT12 contains two price items – PI1 and PI6
- PRT13 contains two price items – PI113 and PI114
- PRT14 contains two price items – PI115 and PI5
- PI1 is associated with the CT1 contract type, PI2 and PI3 are associated with the CT2 contract type, PI4 is associated with the CT4 contract type, PI5 is associated with the CT5 contract type, PI6 is associated with the CT6 contract type, PI111 is associated with the CT111 contract type, PI112 is associated with the CT112 contract type, PI113 is associated with the CT113 contract type, and PI114 and PI115 is associated with the CT114 contract type

Now, in such case, the system will create the following contracts on the A1 account:

Account	Policy	Plan	Pricing Rule Type	Price Item	Contract Type	Contract	Plans for which the contract is created...	Contract Start Date (i.e. Earliest Plan Date)
A1	P1	PP11	PRT11	PI111	CT111	A1C111	PP11 (07-01-2019)	07-01-2019
				PI112	CT112	A1C112	PP11 (07-01-2019)	07-01-2019
			PRT12	PI1	CT1	A1C1	PP1 (01-01-2019) and PP11 (07-01-2019)	01-01-2019
				PI6	CT6	A1C6	PP2 (04-01-2019) and PP11 (07-01-2019)	04-01-2019
		PP12	PRT13	PI113	CT113	A1C113	PP12 (11-01-2019)	11-01-2019
				PI114	CT114	A1C114	PP12 (11-01-2019)	11-01-2019

Account	Policy	Plan	Pricing Rule Type	Price Item	Contract Type	Contract	Plans for which the contract is created...	Contract Start Date (i.e. Earliest Plan Date)
			PRT14	PI115	CT114	A1C114	PP12 (11-01-2019)	11-01-2019
				PI5	CT5	A1C5	PP2 (04-01-2019) and PP12 (11-01-2019)	04-01-2019
	P2	PP1	PRT1	PI1	CT1	A1C1	PP1 (01-01-2019) and PP11 (07-01-2019)	01-01-2019
				PI2	CT2	A1C2	PP1 (01-01-2019)	01-01-2019
			PRT2	PI2	CT2	A1C2	PP1 (01-01-2019)	01-01-2019
				PI3	CT2	A1C2	PP1 (01-01-2019) and PP2 (04-01-2019)	01-01-2019
		PP2	PRT3	PI3	CT2	A1C2	PP1 (01-01-2019) and PP2 (04-01-2019)	01-01-2019
				PI4	CT4	A1C4	PP2 (04-01-2019)	04-01-2019
			PRT4	PI5	CT5	A1C5	PP2 (04-01-2019) and PP12 (11-01-2019)	04-01-2019
				PI6	CT6	A1C6	PP2 (04-01-2019) and PP11 (07-01-2019)	04-01-2019

The following figure graphically illustrates the example 4:

**Note:**

The system creates a contract using a contract type for an account only when the division to which the account and contract type belongs is same.

If a contract of a contract type is already present on the account, the system will not create a new contract. Instead, it will update the start date of the existing contract, if required.

## Policy Plan Specific Contract Creation

In the [Single Contract Creation Across Fully-Insured Group Policies and Plans](#) on page 218 section, we have seen how the system creates one contract across fully-insured group policies and plans on the parent customer and/or bill group accounts. Alternatively, the system enables you to create a plan-specific contract (i.e. a contract using a contract type for each plan) on the parent customer and/or bill group accounts. You can opt for the plan-specific contract creation feature when you want to implement plan-specific business rules. For example, different payment priorities for your medical and dental plans. Under such conditions, you can create different contract types for different plans, say Medical and Dental and enable creation of different contracts using these contract types for billing different plans.

You can configure the plan-specific contract creation feature for the fully-insured group health insurance business by setting the following option types in the **C1-ASOBLNG** feature configuration:

- **Plan ID Characteristic Type** – Used to specify the characteristic type where you want to store the plan for which the contract is created. During the plan-specific contract creation, this characteristic is defined on the contract. Here, you must specify a characteristic type where the characteristic entity is set to **Contract**.
- **Plan Based Contract Creation Eligibility** – Used to indicate whether the system should create plan-specific contract on the account. The valid value is **Yes**.

Alternatively, you can also configure the plan-specific contract creation feature for specific persons (i.e. main customers of the policy) based on the business requirement. This is possible by setting the following option types in the **C1-ASOBLLNG** feature configuration:

- **Plan Based Contract Characteristic Type** – Used to specify the characteristic type which helps the system to determine whether plan-specific contracts should be created on the account. This characteristic must be defined on the person for whom you want to create plan-specific contracts on the accounts. Here, you must specify a characteristic type where the characteristic entity is set to **Person**.
- **Plan Based Contract Characteristic Value** – Used to specify the characteristic value which indicates that the system should create plan-specific contracts on the accounts.
- **Plan ID Characteristic Type** – Used to specify the characteristic type where you want to store the plan for which the contract is created. During the plan-specific contract creation, this characteristic is defined on the contract. Here, you must specify a characteristic type where the characteristic entity is set to **Contract**.

Here, the system creates or updates contracts of a policy plan when you do either of the following:

- **Create or Edit a Policy Plan from the User Interface or through an Inbound Message** – The system creates a contract in either of the following ways:
  - If a price item is associated with the policy plan, it creates a contract using the contract type which is associated with the price item.
  - If a pricing rule type is associated with the policy plan and the pricing rule type contains one or more price items, it creates one plan-specific contract using each contract type which may be associated with one or more price items. Let us assume that a pricing rule type named PRT1 is associated with the policy plan and it contains three price items – PI1, PI2, and PI3. Now, if the PI1 is associated with the CT1 contract type, PI2 is associated with the CT2 contract type, and PI3 is associated with the CT3 contract type, the system will create three contracts - C1 using CT1, C2 using CT2, and C3 using CT3. However, if the PI1 and PI3 are associated with the CT1 contract type and PI2 is associated with the CT2 contract type, the system will create two contracts - C1 using CT1 and C2 using CT2.

If a policy has two or more plans, multiple pricing rule types are associated with each policy plan and each pricing rule type contains multiple price items, it creates one plan-specific contract using each contract type which may be associated with one or more price items. Let us assume that P1 has two plans — PP1 and PP2, PRT1 is associated with PP1, PRT2 is associated with PP2, PRT1 contains three price items – PI1, PI2, and PI3, and PRT2 contains three price items – PI1, PI4, and PI5. Now, if the PI1 is associated with the CT1 contract type, PI2 is associated with the CT2 contract type, PI3 is associated with the CT3 contract type, PI4 is associated with the CT4 contract type, and PI5 is associated with the CT5 contract type, the system will create six contracts - C1PP1 using CT1 for PP1, C1PP2 using CT1 for PP2, C2PP1 using CT2 for PP1, C3PP1 using CT3 for PP1, C4PP2 using CT4 for PP2, and C5PP2 using CT5 for PP2. However, if PI1, PI2, and PI5 are associated with the CT1 contract type and PI3 and PI4 are associated with the CT2 contract type, the system will create four contracts - C1PP1 using CT1 for PP1, C1PP2 using CT1 for PP2, C2PP1 using CT2 for PP1, and C2PP2 using CT2 for PP2.

The status of each contract is set to **Active**. The contract start date is set to the start date of the respective plan. The default rate schedule specified on the respective contract type is added to the contract in the rate information and its effective date is set to the contract start date. The characteristic type, which is specified in the **Plan ID Characteristic Type** option type of the **C1-ASOBLLNG** feature configuration, is defined for each contract. It stores the plan ID which indicates the plan for which the contract is created.

#### **Example 1 — Plan-Specific Contract Creation for a Parent Customer**

If a policy plan belongs to a policy of the parent customer (where a bill group is not associated), the system will create one plan-specific contract using each contract type on each account of the parent customer and bill groups. Let us assume that...

- PC1 has two bill groups – BG1 and BG2
- PC1 has A1 account, BG1 has A2 account, and BG2 has A3 and A4 accounts

- A policy named P1 with two plans – PP1 and PP2 - is created for PC1 (where none of the bill groups are associated)
- PP1 (with the start date as 01-01-2019) is associated with PRT1 and PRT2
- PP2 (with the start date as 03-01-2019) is associated with PRT2 and PRT3
- PRT1 contains two price items – PI1 and PI2
- PRT2 contains three price items – PI1, PI3, and PI4
- PRT3 contains three price items – PI4, PI5, and PI6
- PI1 is associated with the CT1 contract type, PI2 is associated with the CT2 contract type, PI3 is associated with the CT3 contract type, PI4 and PI5 are associated with the CT4 contract type, and PI6 is associated with the CT6 contract type

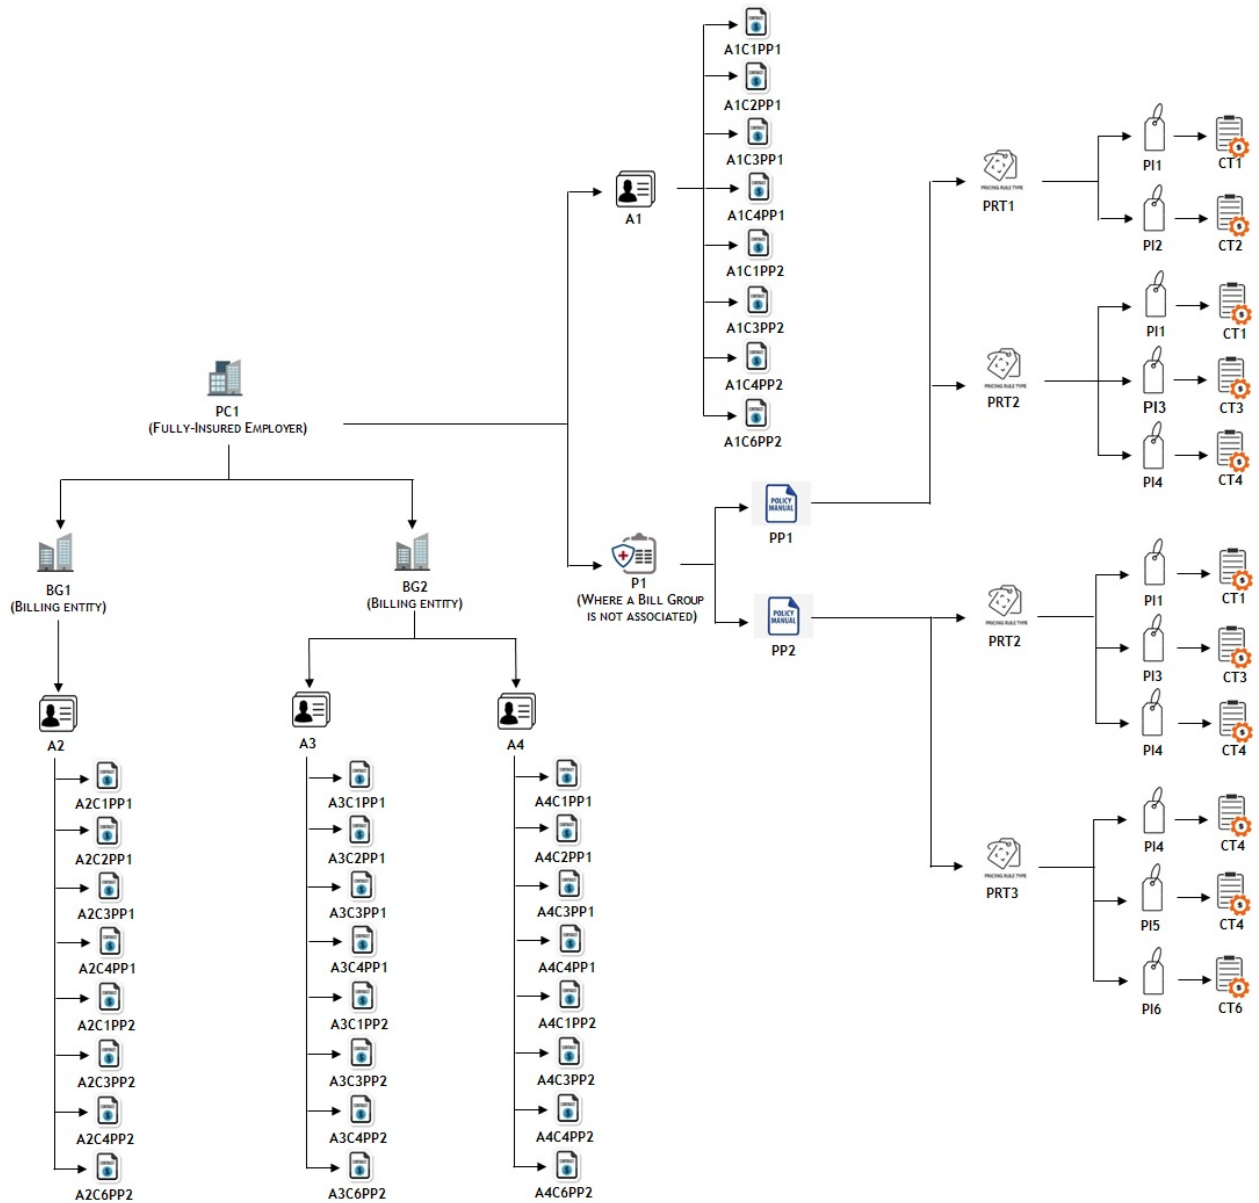

Now, in such case, the system will create the following contracts on the A1, A2, A3, and A4 accounts:

Account	Plan	Pricing Rule Type	Price Item	Contract Type	Contract	Contract Start Date
A1	PP1	PRT1	PI1	CT1	A1C1PP1	01-01-2019
			PI2	CT2	A1C2PP1	01-01-2019
		PRT2	PI1	CT1	A1C1PP1	01-01-2019
			PI3	CT3	A1C3PP1	01-01-2019
			PI4	CT4	A1C4PP1	01-01-2019
		PP2	PRT2	PI1	CT1	A1C1PP2
	PI3			CT3	A1C3PP2	03-01-2019
	PI4			CT4	A1C4PP2	03-01-2019
	PRT3		PI4	CT4	A1C4PP2	03-01-2019
			PI5	CT4	A1C4PP2	03-01-2019
			PI6	CT6	A1C6PP2	03-01-2019
	A2	PP1	PRT1	PI1	CT1	A2C1PP1
PI2				CT2	A2C2PP1	01-01-2019
PRT2			PI1	CT1	A2C1PP1	01-01-2019
			PI3	CT3	A2C3PP1	01-01-2019
			PI4	CT4	A2C4PP1	01-01-2019
PP2			PRT2	PI1	CT1	A2C1PP2
		PI3		CT3	A2C3PP2	03-01-2019
		PI4		CT4	A2C4PP2	03-01-2019

Account	Plan	Pricing Rule Type	Price Item	Contract Type	Contract	Contract Start Date
		PRT3	PI4	CT4	A2C4PP2	03-01-2019
			PI5	CT4	A2C4PP2	03-01-2019
			PI6	CT6	A2C6PP2	03-01-2019
A3	PP1	PRT1	PI1	CT1	A3C1PP1	01-01-2019
			PI2	CT2	A3C2PP1	01-01-2019
		PRT2	PI1	CT1	A3C1PP1	01-01-2019
			PI3	CT3	A3C3PP1	01-01-2019
			PI4	CT4	A3C4PP1	01-01-2019
		PP2	PRT2	PI1	CT1	A3C1PP2
	PI3			CT3	A3C3PP2	03-01-2019
	PI4			CT4	A3C4PP2	03-01-2019
	PRT3		PI4	CT4	A3C4PP2	03-01-2019
			PI5	CT4	A3C4PP2	03-01-2019
			PI6	CT6	A3C6PP2	03-01-2019
	A4	PP1	PRT1	PI1	CT1	A4C1PP1
PI2				CT2	A4C2PP1	01-01-2019
PRT2			PI1	CT1	A4C1PP1	01-01-2019
			PI3	CT3	A4C3PP1	01-01-2019
			PI4	CT4	A4C4PP1	01-01-2019
PP2			PRT2	PI1	CT1	A4C1PP2
		PI3		CT3	A4C3PP2	03-01-2019
		PI4		CT4	A4C4PP2	03-01-2019
		PRT3	PI4	CT4	A4C4PP2	03-01-2019
			PI5	CT4	A4C4PP2	03-01-2019
			PI6	CT6	A4C6PP2	03-01-2019

The following figure graphically illustrates the example 1:

**Example 2 — Plan-Specific Contract Creation for a Bill Group**

If the policy plan belongs to a policy of a bill group (where the parent customer is the policy holder), the system will create one plan-specific contract using each contract type on each account of the parent customer and the bill group. Let us assume that...

- PC1 has two bill groups – BG1 and BG2
- PC1 has A1 account, BG1 has A2 account, and BG2 has A3 and A4 accounts
- A policy named P1 with three plans – PP1, PP2, and PP3 – is created for BG1 (where PC1 is the policy holder)
- PP1 (with the start date as 01-01-2019) is associated with PRT1 and PRT2
- PP2 (with the start date as 03-01-2019) is associated with PRT2 and PRT3
- PP3 (with the start date as 06-01-2019) is associated with PRT1
- PRT1 contains two price items – PI1 and PI2

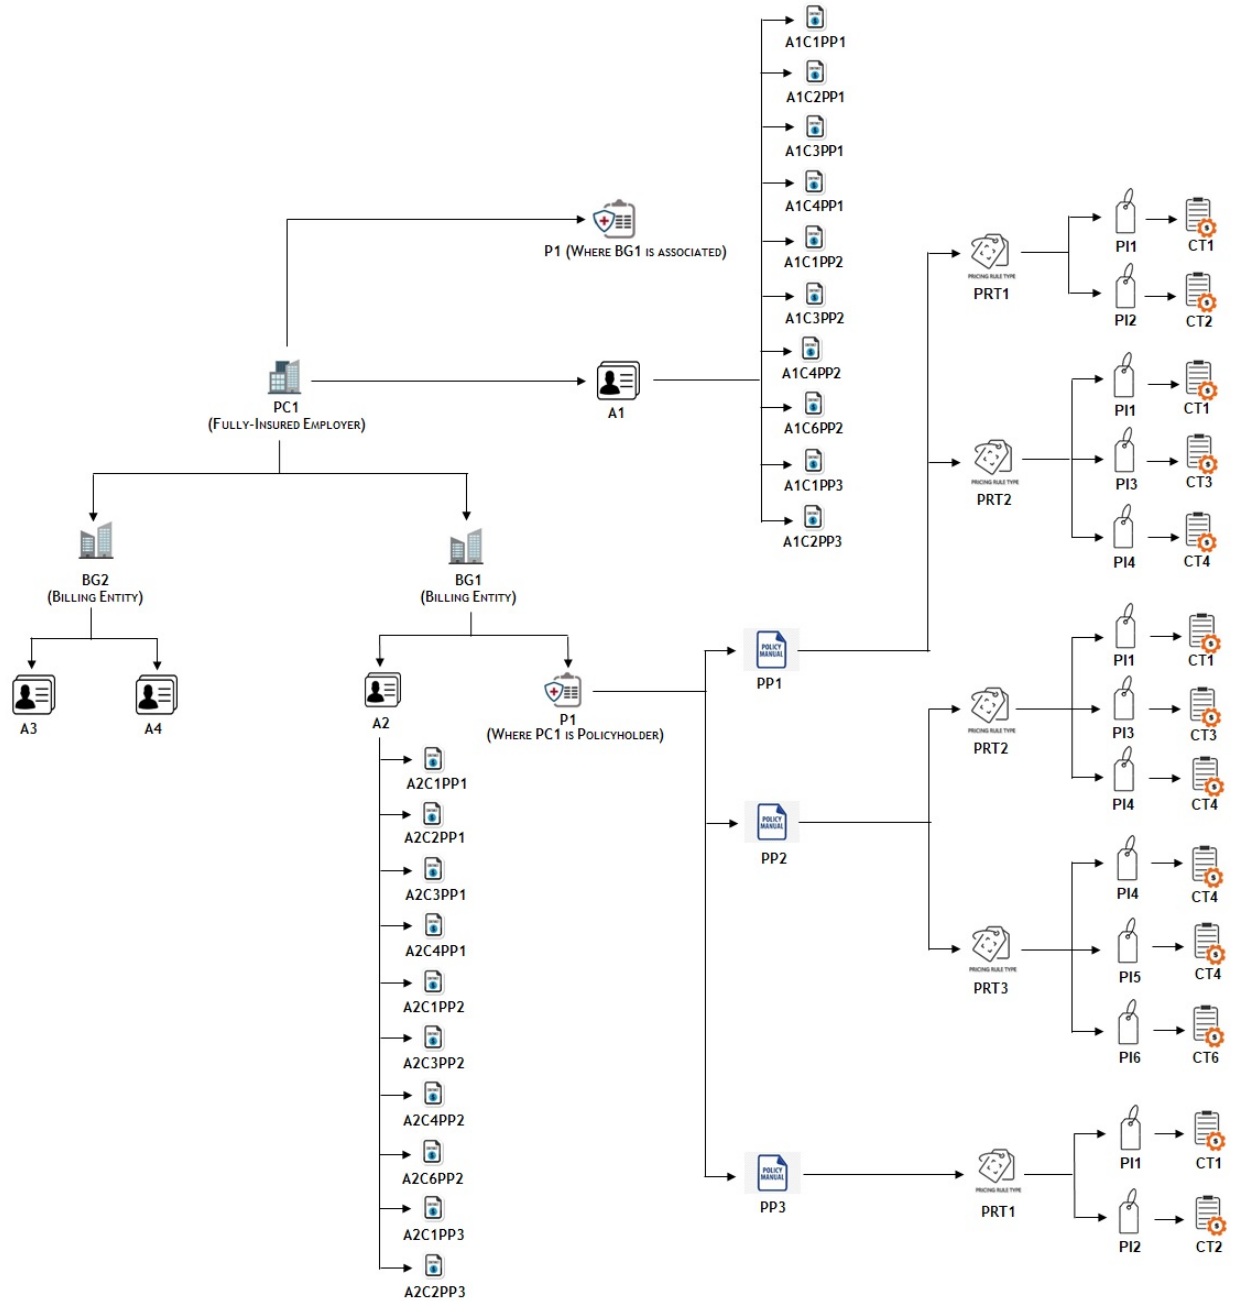

- PRT2 contains three price items – PI1, PI3, and PI4
- PRT3 contains three price items – PI4, PI5, and PI6
- PI1 is associated with the CT1 contract type, PI2 is associated with the CT2 contract type, PI3 is associated with the CT3 contract type, PI4 and PI5 are associated with the CT4 contract type, and PI6 is associated with the CT6 contract type

Now, in such case, the system will create the following contracts on the A1 and A2 accounts:

Account	Plan	Pricing Rule Type	Price Item	Contract Type	Contract	Contract Start Date
A1	PP1	PRT1	PI1	CT1	A1C1PP1	01-01-2019
			PI2	CT2	A1C2PP1	01-01-2019
		PRT2	PI1	CT1	A1C1PP1	01-01-2019
			PI3	CT3	A1C3PP1	01-01-2019
			PI4	CT4	A1C4PP1	01-01-2019
		PP2	PRT2	PI1	CT1	A1C1PP2
	PI3			CT3	A1C3PP2	03-01-2019
	PI4			CT4	A1C4PP2	03-01-2019
	PRT3		PI4	CT4	A1C4PP2	03-01-2019
			PI5	CT4	A1C4PP2	03-01-2019
			PI6	CT6	A1C6PP2	03-01-2019
	PP3	PRT1	PI1	CT1	A1C1PP3	06-01-2019
PI2			CT2	A1C2PP3	06-01-2019	
A2	PP1	PRT1	PI1	CT1	A2C1PP1	01-01-2019
			PI2	CT2	A2C2PP1	01-01-2019
		PRT2	PI1	CT1	A2C1PP1	01-01-2019
			PI3	CT3	A2C3PP1	01-01-2019
			PI4	CT4	A2C4PP1	01-01-2019
		PP2	PRT2	PI1	CT1	A2C1PP2
	PI3			CT3	A2C3PP2	03-01-2019
	PI4			CT4	A2C4PP2	03-01-2019
	PRT3		PI4	CT4	A2C4PP2	03-01-2019
				PI5	CT4	A2C4PP2

Account	Plan	Pricing Rule Type	Price Item	Contract Type	Contract	Contract Start Date
			PI6	CT6	A2C6PP2	03-01-2019
	PP3	PRT1	PI1	CT1	A2C1PP3	06-01-2019
			PI2	CT2	A2C2PP3	06-01-2019

The following figure graphically illustrates the example 2:

**Note:** The system creates a contract using a contract type for an account when the division to which the account and contract type belongs is same.

- **Create or Edit an Account from the User Interface or through an Inbound Message** – The system creates a contract when either of the following condition is met:
  - The main customer of the account is a parent customer and holds a policy (where a bill group is not associated) which is created using the policy type where the policy category is set to **Fully-Insured Group**.
  - The main customer of the account is a parent customer and holds a policy (where a bill group is associated) which is created using the policy type where the policy category is set to **Fully-Insured Group**.
  - The main customer of the account is a bill group and holds a policy (where the parent customer is the policy holder) which is created using the policy type where the policy category is set to **Fully-Insured Group**.

The system creates a contract in either of the following ways:

- If a price item is associated with the policy plan, it creates a contract using the contract type which is associated with the price item.
- If a pricing rule type is associated with the policy plan and the pricing rule type contains one or more price items, it creates one plan-specific contract using each contract type which may be associated with one or more price items. Let us assume that a pricing rule type named PRT1 is associated with the policy plan and it contains three price items – PI1, PI2, and PI3. Now, if the PI1 is associated with the CT1 contract type, PI2 is associated with the CT2 contract type, and PI3 is associated with the CT3 contract type, the system will create three contracts - C1 using CT1, C2 using CT2, and C3 using CT3. However, if the PI1 and PI3 are associated with the CT1 contract type and PI2 is associated with the CT2 contract type, the system will create two contracts - C1 using CT1 and C2 using CT2.

If a policy has two or more plans, multiple pricing rule types are associated with each policy plan and each pricing rule type contains multiple price items, it creates one plan-specific contract using each contract type which may be associated with one or more price items. Let us assume that P1 has two plans — PP1 and PP2, PRT1 is associated with PP1, PRT2 is associated with PP2, PRT1 contains three price items – PI1, PI2, and PI3, and PRT2 contains three price items – PI1, PI4, and PI5. Now, if the PI1 is associated with the CT1 contract type, PI2 is associated with the CT2 contract type, PI3 is associated with the CT3 contract type, PI4 is associated with the CT4 contract type, and PI5 is associated with the CT5 contract type, the system will create six contracts - C1PP1 using CT1 for PP1, C1PP2 using CT1 for PP2, C2PP1 using CT2 for PP1, C3PP1 using CT3 for PP1, C4PP2 using CT4 for PP2, and C5PP2 using CT5 for PP2. However, if PI1, PI2, and PI5 are associated with the CT1 contract type and PI3 and PI4 are associated with the CT2 contract type, the system will create four contracts - C1PP1 using CT1 for PP1, C1PP2 using CT1 for PP2, C2PP1 using CT2 for PP1, and C2PP2 using CT2 for PP2.

The status of each contract is set to **Active**. The contract start date is set to the start date of the respective plan. The default rate schedule specified on the respective contract type is added to the contract in the rate information and its effective date is set to the contract start date. The characteristic type, which is specified in the **Plan ID Characteristic Type** option type of the **C1-ASOBLLNG** feature configuration, is defined for each contract. It stores the plan ID which indicates the plan for which the contract is created.

### Example 3 — Plan-Specific Contract Creation for an Account of a Parent Customer

If you create an account for a parent customer who holds policies (where a bill group may or may not be associated), the system will create one plan-specific contract using each contract type for all parent customer's policies on the account. Let us assume...

- PC1 has two bill groups – BG1 and BG2
- PC1 has two policies – a policy named P1 (where a bill group is not associated) and a policy named P2 (where BG1 is associated)
- BG1 has one policy named P2 where PC1 is the policy holder
- An account named A1 is added for PC1

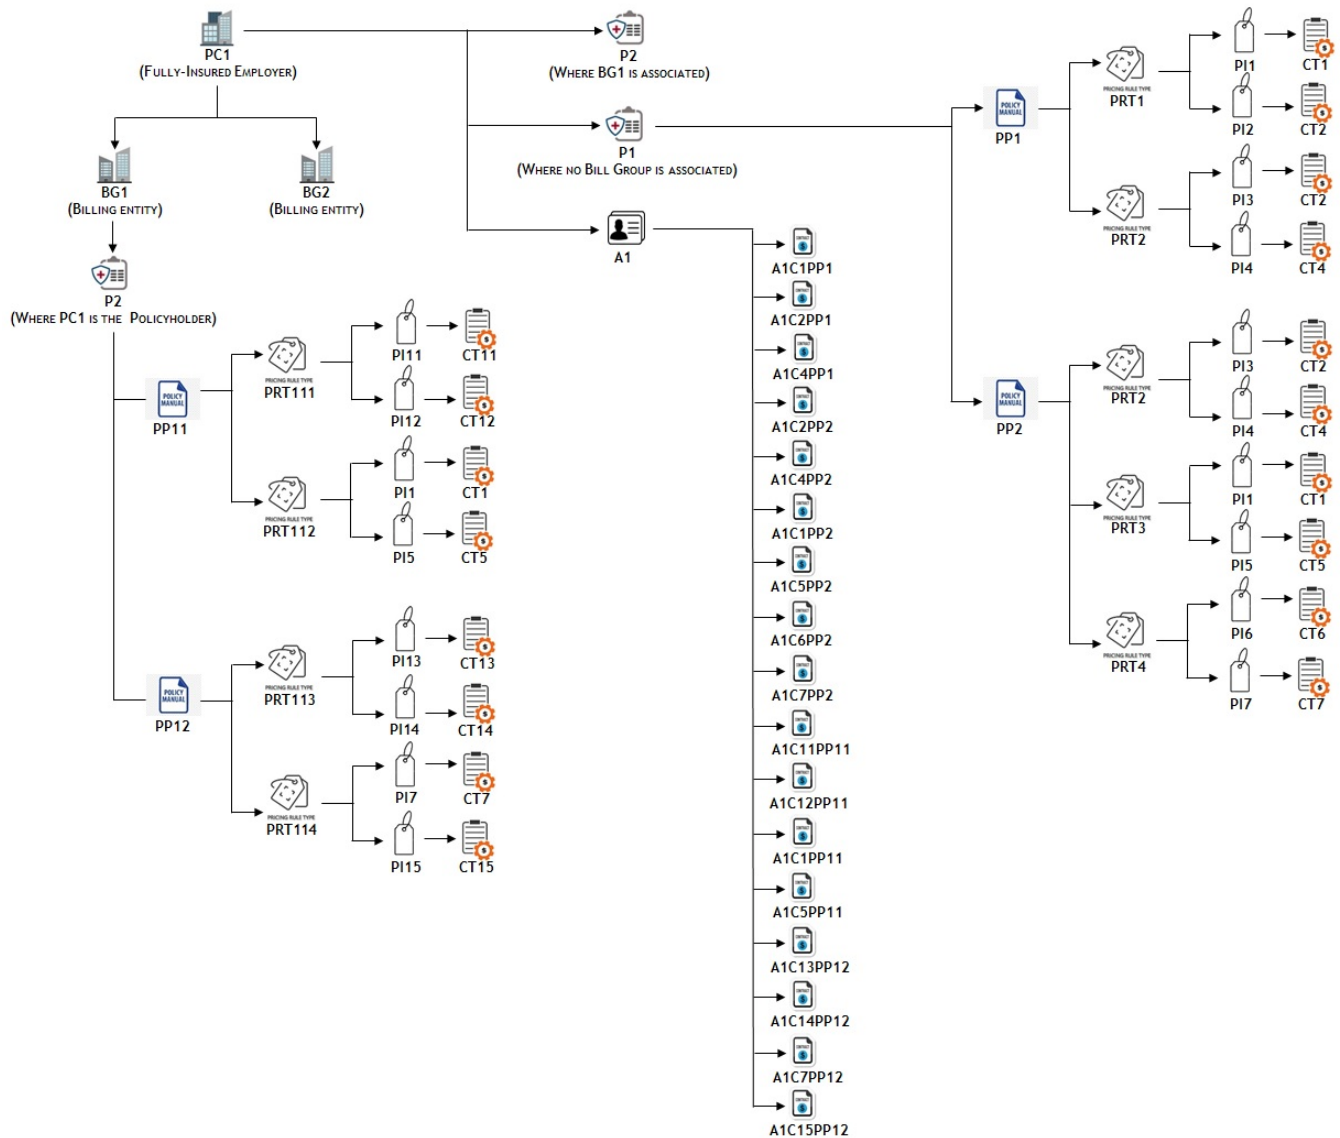

- P1 has two plans – PP1 and PP2
- P2 has two plans – PP11 and PP12
- PP1 (with the start date as 01-01-2019) is associated with PRT1 and PRT2
- PP2 (with the start date as 06-01-2019) is associated with PRT2, PRT3, and PRT4
- PP11 (with the start date as 05-01-2019) is associated with PRT111 and PRT112
- PP12 (with the start date as 09-01-2019) is associated with PRT113 and PRT114
- PRT1 contains two price items – PI1 and PI2
- PRT2 contains two price items – PI3 and PI4
- PRT3 contains two price items – PI1 and PI5
- PRT4 contains two price items – PI6 and PI7
- PRT111 contains two price items – PI11 and PI12
- PRT112 contains two price items – PI1 and PI5
- PRT113 contains two price items – PI13 and PI14
- PRT114 contains two price items – PI7 and PI15
- PI1 is associated with the CT1 contract type, PI2 and PI3 are associated with the CT2 contract type, PI4 is associated with the CT4 contract type, PI5 is associated with the CT5 contract type, PI6 is associated with the CT6 contract type, PI7 is associated with the CT7 contract type, PI11 is associated with the CT11 contract type, PI12 is associated with the CT12 contract type, PI13 is associated with the CT13 contract type, PI14 is associated with the CT14 contract type, and PI15 is associated with the CT15 contract type

Now, in such case, the system will create the following contracts on the A1 account:

Account	Policy	Plan	Pricing Rule Type	Price Item	Contract Type	Contract	Contract Start Date
A1	P1	PP1	PRT1	PI1	CT1	A1C1PP1	01-01-2019
				PI2	CT2	A1C2PP1	01-01-2019
			PRT2	PI3	CT2	A1C2PP1	01-01-2019
				PI4	CT4	A1C4PP1	01-01-2019
		PP2	PRT2	PI3	CT2	A1C2PP2	06-01-2019
				PI4	CT4	A1C4PP2	06-01-2019
			PRT3	PI1	CT1	A1C1PP2	06-01-2019
				PI5	CT5	A1C5PP2	06-01-2019
			PRT4	PI6	CT6	A1C6PP2	06-01-2019
				PI7	CT7	A1C7PP2	06-01-2019
	P2	PP11	PRT111	PI11	CT11	A1C11PP11	05-01-2019
				PI12	CT12	A1C12PP11	05-01-2019

Account	Policy	Plan	Pricing Rule Type	Price Item	Contract Type	Contract	Contract Start Date
			PRT112	PI1	CT1	A1C1PP11	05-01-2019
				PI5	CT5	A1C5PP11	05-01-2019
		PP12	PRT113	PI13	CT13	A1C13PP12	09-01-2019
				PI14	CT14	A1C14PP12	09-01-2019
			PRT114	PI7	CT7	A1C7PP12	09-01-2019
				PI15	CT15	A1C15PP12	09-01-2019

The following figure graphically illustrates the example 3:

**Example 4 — Plan-Specific Contract Creation for an Account of a Bill Group**

If you create an account for a bill group who holds policies and its parent customer holds policies (where a bill group may or may not be associated), the system will create one plan-specific contract using each contract type for the bill group's policies and parent customer's policies (where a bill group is not associated) on the account. Let us assume...

- PC1 has two bill groups – BG1 and BG2
- PC1 has two policies – a policy named P2 (where a bill group is not associated) and a policy named P1 (where BG2 is associated)
- BG2 has one policy named P1 where PC1 is the policy holder
- An account named A1 is added for BG2
- P1 has two plans – PP11 and PP12
- P2 has two plans – PP1 and PP2
- PP1 (with the start date as 01-01-2019) is associated with PRT1 and PRT2
- PP2 (with the start date as 04-01-2019) is associated with PRT3 and PRT4
- PP11 (with the start date as 07-01-2019) is associated with PRT11 and PRT12
- PP12 (with the start date as 11-01-2019) is associated with PRT13 and PRT14
- PRT1 contains two price items – PI1 and PI2
- PRT2 contains two price items – PI3 and PI2
- PRT3 contains two price items – PI3 and PI4
- PRT4 contains two price items – PI5 and PI6
- PRT11 contains two price items – PI111 and PI112
- PRT12 contains two price items – PI1 and PI6
- PRT13 contains two price items – PI113 and PI114
- PRT14 contains two price items – PI115 and PI5
- PI1 is associated with the CT1 contract type, PI2 and PI3 are associated with the CT2 contract type, PI4 is associated with the CT4 contract type, PI5 is associated with the CT5 contract type, PI6 is associated with the CT6 contract type, PI111 is associated with the CT111 contract type, PI112 is associated with the CT112 contract type, PI113 is associated with the CT113 contract type, and PI114 and PI115 is associated with the CT114 contract type

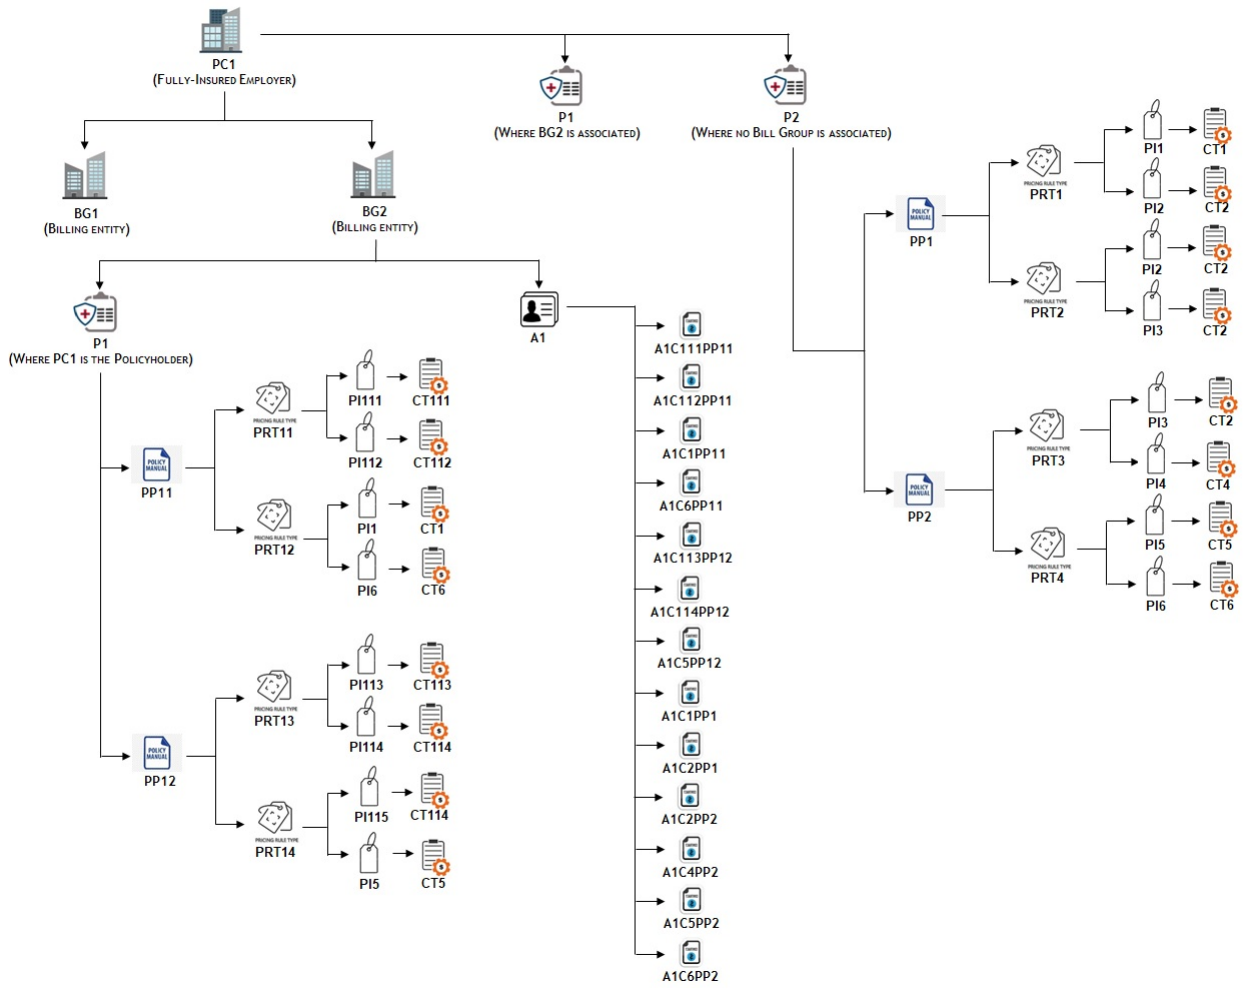

Now, in such case, the system will create the following contracts on the A1 account:

Account	Policy	Plan	Pricing Rule Type	Price Item	Contract Type	Contract	Contract Start Date
A1	P1	PP11	PRT11	PI111	CT111	A1C111PP11	07-01-2019
				PI112	CT112	A1C112PP11	07-01-2019
			PRT12	PI1	CT1	A1C1PP11	07-01-2019
				PI6	CT6	A1C6PP11	07-01-2019
		PP12	PRT13	PI113	CT113	A1C113PP12	11-01-2019

Account	Policy	Plan	Pricing Rule Type	Price Item	Contract Type	Contract	Contract Start Date
				PI114	CT114	A1C114PP12	11-01-2019
			PRT14	PI115	CT114	A1C114PP12	11-01-2019
				PI5	CT5	A1C5PP12	11-01-2019
	P2	PP1	PRT1	PI1	CT1	A1C1PP1	01-01-2019
				PI2	CT2	A1C2PP1	01-01-2019
			PRT2	PI2	CT2	A1C2PP1	01-01-2019
				PI3	CT2	A1C2PP1	01-01-2019
		PP2	PRT3	PI3	CT2	A1C2PP2	04-01-2019
				PI4	CT4	A1C4PP2	04-01-2019
			PRT4	PI5	CT5	A1C5PP2	04-01-2019
				PI6	CT6	A1C6PP2	04-01-2019

The following figure graphically illustrates the example 4:

**Note:** The system creates a contract using a contract type for an account only when the division to which the account and contract type belongs is same.

## Fully-Insured Group Policy Status Transition

The following figure graphically indicates how a fully-insured group policy moves from one status to another in its lifecycle:

## Membership Status Transition

The following figure graphically indicates how a membership moves from one status to another in its lifecycle:

## Types of Policy Plan

---

Oracle Revenue Management and Billing enables you to create different types of plan for a fully-insured group policy:

- [Commercial Plans](#) on page 251
- [Medicare Affiliated Plans](#) on page 252

### Commercial Plans

A commercial plan is a health insurance plan which is offered and administered by non-governmental entities (i.e. insurance companies). It can cover medical or dental expenses and disability income for the insured. Two of the most popular types of commercial health insurance plans are:

- **Preferred Provider Organization (PPO)** - A Preferred Provider Organization (PPO) is a medical care arrangement in which medical professionals and facilities provide services to subscribed clients at reduced rates.
- **Health Maintenance Organization (HMO)** - A Health Maintenance Organization (HMO) is an insurance structure that provides coverage through a network of physicians at a fixed annual fee.

A commercial health insurance plan can be offered to the individual or group customers. Usually, the insurance companies design special commercial health plans for fully-insured group customers and provide cost-effective health coverage for the employees and their family members (at an additional cost).

The system enables you to create and edit a policy plan from the user interface or through a health care inbound message. While creating a Commercial policy plan, you must set the benefit type to **Commercial**. While defining a Commercial policy plan, you need to specify either a price item or at least one pricing rule type. The price item given in the policy plan is used to create a pass-through billable charge for pre-calculated premium amount which is received through a health care inbound message.

Alternatively, you can associate a pricing rule type with a policy plan. You can associate the age based, tier based, pass-through billable charge, and/or additional charge pricing rule types with a Commercial policy plan. If you associate an age based pricing rule type with the policy plan, the system calculates the active employee coverage or COBRA membership premium for eligible members using the age based pricing rule type. If you associate a tier based pricing rule type with the policy plan, the system calculates the active employee coverage or COBRA membership premium using the tier based pricing rule type. The active employee coverage and COBRA membership premium are then charged through the SQI based billable charges. In case of an active employee coverage membership, the charge is billed to the bill group of the fully-insured group customer. However, in case of a COBRA membership, the charge is billed to either of the following depending on the billing arrangement which is defined for the COBRA membership:

- Bill Group of the Fully-Insured Group Customer
- TPA Person
- Financially Responsible Member Person

If you associate an additional charge pricing rule type (which is a related pricing rule type) with the policy plan, the system derives the flat or percentage based administration fee for the COBRA membership using the additional charge pricing rule type. This administration fee is charged along with the COBRA membership premium through an SQI based billable charge

If you associate a pass-through billable charge pricing rule type with the policy plan, the system creates an SQI based billable charge using the pass-through billable charge pricing rule type whenever the price item information is given, but the account information is not given in a health care inbound message. Note that if both the price item and account details are given in the billable charge information of a health care inbound message, the system directly creates the SQI based billable charge for the pre-calculated premium and does not refer to the pass-through billable charge pricing rule type which is associated with the policy plan.

The system enables you to prorate the membership premium using the proration rules defined for the fully-insured group policy plan. A proration rule indicates how you want to prorate the membership premium on various events, such as enrollment, termination, etc. For more information, refer to [Premium Proration Rules](#) on page 3034.

## Medicare Affiliated Plans

A Group Medicare Advantage plan, also known as Employer Group Waiver Plan (EGWP), is a type of Medicare Advantage plan offered by some employers to their retired or retiring employees. It may offer more benefits than traditional Medicare Advantage plans. EGWP are provided by private insurance companies who manage fully-insured large group customer's retiree Medicare benefits. The different parts of Medicare that EGWPs cover are:

- **Part A** - Medicare Part A insurance is the portion that pays for hospital costs, such as inpatient hospital care or rehabilitation facility care related to illness or injury.
- **Part B** - Medicare Part B is the Medicare portion that pays for doctor visits and related medical costs, including emergency care when you are not admitted.
- **Part D** - Medicare Part D is the prescription drug coverage portion of Medicare. Most prescription drug coverage plans involve different "tiers" of medications where you may pay little to no costs for generic medications and a greater portion of costs for name-brand medicines.

The system enables you to create and edit a policy plan from the user interface or through a health care inbound message. While creating a Medicare Affiliated policy plan, you must set the benefit type to **Medicare Affiliated**. While defining a Medicare Affiliated policy plan, you need to specify either a price item or at least one pricing rule type. The price item given in the policy plan is used to create a pass-through billable charge for pre-calculated premium amount which is received through a health care inbound message.

Alternatively, you can associate a pricing rule type with a policy plan. You can associate the age based, tier based, pass-through billable charge, and/or benefit pricing rule types with a Medicare Affiliated policy plan. If you associate an age based pricing rule type with the policy plan, the system calculates the Medicare premium for Part A, Part B, and/or Part D for eligible members using the age based pricing rule type. If you associate a tier based pricing rule type with the policy plan, the system calculates the Medicare membership premium for Part A, Part B, and Part D using the tier based pricing rule type. This membership premium is then charged through the SQI based billable charge. The charge is billed to either of the following depending on the billing arrangement which is defined for the Medicare membership:

- Bill Group of the Fully-Insured Group Customer
- Financially Responsible Member Person

The system considers the low income subsidy (LIS) and late enrollment penalty (LEP) while calculating the Medicare Part D premium. If you associate a benefit pricing rule type with the policy plan, the system determines the price items through which LIS and LEP should be charged.

If you associate a pass-through billable charge pricing rule type with the policy plan, the system creates an SQI based billable charge using the pass-through billable charge pricing rule type whenever the price item information is given, but the account information is not given in a health care inbound message. Note that if both the price item and account details are given in the billable charge information of a health care inbound message, the system directly creates the SQI based billable charge for the pre-calculated premium and does not refer to the pass-through billable charge pricing rule type which is associated with the policy plan.

The system enables you to prorate the Medicare premium using the proration rules defined for the fully-insured group policy plan. A proration rule indicates how you want to prorate the membership premium on various events, such as enrollment, termination, etc. For more information, refer to [Premium Proration Rules](#) on page 3034.

## Types of Membership

---

Oracle Revenue Management and Billing enables you to create different types of membership for a fully-insured group policy plan:

- [Active Employee Coverage Membership](#) on page 253

- [Medicare Membership](#) on page 254
- [COBRA Membership](#) on page 256

## Active Employee Coverage Membership

Oracle Revenue Management and Billing enables you to maintain an active employee coverage membership for the group insurance health plans and charge age based or tier based premium for the active employee coverage membership. An active employee coverage membership includes the employee or member of the organization who is covered under the group health insurance plan. Here, the covered employee or member is known as the main subscriber of the membership.

If the health insurance coverage is extended to the immediate family and/or other dependents of group members for an extra cost, the active employee coverage membership may include dependents who are related to the main subscriber. The system enables you to define various relationship types using which you can relate main subscriber and other dependent persons in a membership. You can define and edit relationship types through the **Contract Relationship Type** screen. The dependents can be members or non-members in an active employee coverage membership. The system calculates age based premium for both eligible members and non-members in an active employee coverage membership. If you select the **Skip Non-Members** option in the age based pricing rule type, the system will only consider the eligible members and not non-members of the active employee coverage membership during age based premium calculation.

The system enables you to create and edit an active employee coverage membership from the user interface, through a health care inbound message, or through the membership repricing inbound web service. While creating an active employee coverage membership, you must not set the membership type of the membership (i.e. leave the **Membership Type** field blank). Ideally, you must define an active employee coverage membership on a Commercial policy plan. However, at present, the system does not validate whether an active employee coverage membership is defined only on a Commercial policy plan and not on a Medicare Affiliated policy plan.

You can create an active employee coverage membership when you specify the main subscriber of the membership. Ideally, the main subscriber and dependent persons should exist as persons in the system before creating the active employee coverage membership from the user interface, through a health care inbound message, or through the membership repricing inbound web service. The system enables you to create the main subscriber, dependent persons, and active employee coverage membership through the same health care inbound message or through the same membership repricing request. In such case, the system will first create the person records for the main subscriber and dependent persons and then create the active employee coverage membership.

On creating an active employee coverage membership, the status of the membership and main subscriber is set to **Active**. On adding a dependent person to a membership, the status of the dependent person is set to **Active**. You can inactivate an active employee coverage membership from the user interface, through a health care inbound message, or through the membership repricing inbound web service. There are two ways in which you can inactivate the membership from the user interface:

- On clicking the **Inactivate** button
- On inactivating the main subscriber of the membership

However, through a health care inbound message or through the membership repricing inbound web service, you can inactivate the membership only by inactivating the main subscriber of the membership. On inactivating the main subscriber of an active employee coverage membership, the system automatically inactivates the membership and all other member persons which are included in the membership. The status of the active employee coverage membership, main subscriber, and other member persons (if any) is set to **Inactive**. In addition, the system does the following:

- Cancels the billable charges which are created for the membership
- Cancels the corresponding bill segments (if any)

If an audit event exists for the membership which is inactivated, the **BO\_STATUS\_CD** column corresponding to the record in the **C1\_AUDIT\_EVENT**, **C1\_AUDIT\_EVENT\_LOG**, and **CI\_PRCE\_CALC** tables is set to **INVALID**. If a repricing entity detail record exists for the membership in the **PENDING** or **ERROR** status, then the **BO\_STATUS\_CD** column corresponding to the record in the **CI\_REPRC\_ENTITY\_DTL** table is set to **COMPLETE**. If a repricing request exists for the membership in the **PENDING** or **ERROR** status, then the **BO\_STATUS\_CD** column corresponding to the record in the **CI\_REPRC\_REQ\_DTL** table is set to **COMPLETE**.

You can also inactivate a member person, who is not the main subscriber of an active employee coverage membership, from the user interface, through a health care inbound message, or through the membership repricing inbound web service. On inactivating the member person, the status of the member person is set to **Inactive**.

On terminating a fully-insured group policy, the status of all active employee coverage memberships on the respective policy plans is set to **Terminated**. Similarly, on reinstating a fully-insured group policy, the status of all active employee coverage memberships on the respective policy plans is set to **Active**.

The system requires the following information to create charges for an active employee coverage membership:

- Whom to bill the active employee coverage membership charges
- Age based or tier based pricing rules using which the premium should be calculated for the active employee coverage membership
- Respective age based or tier based pricing rule type associated with the respective policy plan

The system supports the following billing arrangements for an active employee coverage membership:

- **Group Billing** – Here, an active employee coverage membership is billed to a bill group which is derived for the active employee coverage membership.
- **Direct Billing** – Here, an active employee coverage membership is billed to the member who is financially responsible for the active employee coverage membership.

You can indicate the billing arrangement for the active employee coverage memberships by defining a characteristic on the bill group or parent customer. The system searches for the characteristic which is specified in the **Billing Arrangement** option type of the **C1-ASOBLNG** feature configuration on the following entities in the specified sequence:

1. Bill Group
2. Parent Customer

**Note:** If the billing arrangement characteristic is not defined for any of the above listed entities, the system, by default, charges the active employee coverage membership premium to the bill group.

The system requires the bill group and its account to bill the active employee coverage memberships when the billing arrangement is set to **Group Billing**. You can create a bill group and its account from the user interface or through a health care inbound message. On creating an account for a bill group, the system automatically creates a contract on the account using distinct contract types for all policy plans of the parent customer and bill group policies. While creating a contract, the system considers all price items in all pricing rule types (including the related pricing rule types) which are associated with the policy plans of the parent customer and bill group policies.

The system requires the member person's account to bill the active employee coverage membership when the billing arrangement is set to **Direct Billing**. You can create an account for a member person who is financially responsible for the active employee coverage membership through a health care inbound message. On creating an account for a member person, the system automatically creates a contract on the account using distinct contract types for the respective policy plan. While creating a contract, the system considers all price items in all pricing rule types (including the related pricing rule types) which are associated with the respective policy plan.

## Medicare Membership

Oracle Revenue Management and Billing enables you to maintain an employer sponsored group medicare membership (800 series plans) for a fully-insured large group customer and create age based or tier based premium charges for the Medicare Part A, Part B, and Part D. A Medicare beneficiary may qualify for a low income subsidy (LIS) for Medicare Part D or may incur late enrollment penalty (LEP) for Medicare Part D. In such case, the system enables you to consider the low income subsidy (LIS) and late enrollment penalty (LEP) while calculating the Medicare Part D premium.

The system enables you to create and edit a Medicare membership from the user interface, through a health care inbound message, or through the membership repricing inbound web service. While creating a Medicare membership, you must set the membership type to **Medicare**. Ideally, you must define a Medicare membership on a Medicare Affiliated policy plan. However, at present, the system does not validate whether a Medicare membership is defined only on a Medicare Affiliated policy plan and not on a Commercial policy plan.

You can create a Medicare membership when you specify the main subscriber of the membership. A Medicare membership should have only one member person who is covered for Medicare and who is financially responsible for the membership. Ideally, the main subscriber should exist as a person in the system before creating the Medicare membership from the user interface, through a health care inbound message, or through the membership repricing inbound web service. The system enables you to create the main subscriber and Medicare membership through the same health care inbound message or through the same membership repricing request. In such case, the system will first create the person record for the main subscriber and then create the Medicare membership.

On creating a Medicare membership, the status of the membership and main subscriber is set to **Active**. You can inactivate a Medicare membership from the user interface, through a health care inbound message, or through the membership repricing inbound web service. There are two ways in which you can inactivate the membership from the user interface:

- On clicking the **Inactivate** button
- On inactivating the main subscriber of the membership

However, through a health care inbound message or through the membership repricing inbound web service, you can inactivate the membership only by inactivating the main subscriber of the membership. On inactivating a Medicare membership, the system does the following:

- Set the status of the membership and main subscriber to **Inactive**
- Cancels the billable charges which are created for the membership
- Cancels the corresponding bill segments (if any)

If an audit event exists for the membership which is inactivated, the **BO\_STATUS\_CD** column corresponding to the record in the **C1\_AUDIT\_EVENT**, **C1\_AUDIT\_EVENT\_LOG**, and **CI\_PRCE\_CALC** tables is set to **INVALID**. If a repricing entity detail record exists for the membership in the **PENDING** or **ERROR** status, then the **BO\_STATUS\_CD** column corresponding to the record in the **CI\_REPRC\_ENTITY\_DTL** table is set to **COMPLETE**. If a repricing request exists for the membership in the **PENDING** or **ERROR** status, then the **BO\_STATUS\_CD** column corresponding to the record in the **CI\_REPRC\_REQ\_DTL** table is set to **COMPLETE**.

On terminating a fully-insured group policy, the status of all Medicare memberships on the respective policy plans is set to **Terminated**. Similarly, on reinstating a fully-insured group policy, the status of all Medicare memberships on the respective policy plans is set to **Active**.

The system enables you to maintain the Medicare benefits (such as, Part A, Part B, Part D, Part D LIS, and Part D LEP) of a member person through the **Benefit** screen. The system enables you to define and edit the Medicare benefits from the user interface, through a health care inbound message, or through the membership repricing inbound web service. While defining a Medicare benefit of a member person for Part A, Part B, and Part D, you need to specify a Medicare plan benefit package (i.e. 800 series plan) which is applicable for the Medicare benefit. The system enables you to define and edit a Medicare plan benefit package through the **Field Mapping** screen. You can use the Medicare plan benefit package as a pricing parameter in the age based or tier based pricing rules using which the Medicare premium is calculated. While defining a Medicare benefit of a member person for Part D LIS and Part D LEP, you need to specify the benefit amount (i.e. subsidy or penalty amount).

While editing a Medicare benefit of a member person from the user interface, you can only edit the characteristics of the Medicare benefit. However, while editing a Medicare benefit of a member person through a health care inbound message or through the membership repricing inbound web service, you can edit the end date, benefit amount, and characteristics of the Medicare benefit. On editing a Medicare benefit, the system inactivates the old record and creates a new record in the system. The status of the old benefit record is set to **Inactive** and the status of the new benefit record is set to **Active**.

The system enables you to discard an active or inactive Medicare benefit from the user interface by clicking the **Discard** button. You can also discard an active or inactive Medicare benefit through a health care inbound message or through the membership repricing inbound web service by changing its status to **Discarded**.

The system requires the following information to create charges for a Medicare membership:

- Whom to bill the Medicare membership (i.e. billing arrangement details)
- Age based or tier based pricing rules using which the premium should be calculated for the Medicare Part A, Part B, and Part D.

- Respective age based, tier based, and benefit pricing rule types associated with the respective policy plan

The system supports the following billing arrangements for a Medicare membership:

- **Group Billing** – Here, a Medicare benefit is billed to a bill group which is derived for the Medicare membership.
- **Direct Billing** – Here, a Medicare benefit is billed to a member person who is financially responsible for the Medicare membership.

You can indicate the billing arrangement for the Medicare memberships by defining a characteristic on the policy plan, policy, or parent customer. The system searches for the characteristic which is specified in the **Benefit Billing Arrangement** option type of the **C1-ASOBLLNG** feature configuration on the following entities in the specified sequence:

1. Policy Plan
2. Policy
3. Parent Customer

**Note:** If the benefit billing arrangement characteristic is not defined for any of the above listed entities, the system, by default, charges the Medicare membership premium to the bill group.

The system requires the bill group and its account to bill the Medicare memberships when the benefit billing arrangement is set to **Group Billing**. You can create a bill group and its account from the user interface or through a health care inbound message. On creating an account for a bill group, the system automatically creates a contract on the account using distinct contract types for all policy plans of the parent customer and bill group policies. While creating a contract, the system considers all price items in all pricing rule types (including the related pricing rule types) which are associated with the policy plans of the parent customer and bill group policies.

The system requires the member person's account to bill the Medicare membership when the benefit billing arrangement is set to **Direct Billing**. You can create an account for a member person who is financially responsible for the Medicare membership through a health care inbound message. On creating an account for a member person, the system automatically creates a contract on the account using distinct contract types for the respective policy plan. While creating a contract, the system considers all price items in all pricing rule types (including the related pricing rule types) which are associated with the respective policy plan.

## COBRA Membership

Oracle Revenue Management and Billing enables you to maintain a COBRA membership and charge age based or tier based premium and administration fee for the COBRA membership. In COBRA membership, an employer provides temporary continuation of group health coverage in certain situations where it would otherwise be terminated. This may include situations, such as:

- Death of the covered employee
- Reduction in the hours or termination of the covered employee's employment
- Covered employee becoming entitled for Medicare
- Divorce or legal separation from the covered employee
- A dependent child ceasing to be a dependent in an active employee coverage membership

The system enables you to create and edit a COBRA membership from the user interface, through a health care inbound message, or through the membership repricing inbound web service. While creating a COBRA membership, you must set the membership type to **COBRA**. Ideally, you must define a COBRA membership on a Commercial policy plan. However, at present, the system does not validate whether a COBRA membership is defined only on a Commercial policy plan and not on a Medicare Affiliated policy plan.

Through a health care inbound message, the system must receive the end date of the active employee coverage membership along with the details of the COBRA membership. You can create a COBRA membership when you specify the main subscriber of the membership. Here, the main subscriber can be an employee or member of the organization or a family member who is covered through the COBRA membership. In a COBRA membership, you need to specify the member person who is financially responsible for the COBRA membership. Note that, at a time, only one member person can be financially responsible for the COBRA membership.

On creating a COBRA membership, the status of the membership and main subscriber is set to **Active**. On adding a dependent person to a membership, the status of the dependent person is set to **Active**. You can inactivate a COBRA membership from the user interface, through a health care inbound message, or through the membership repricing inbound web service. There are two ways in which you can inactivate the membership from the user interface:

- On clicking the **Inactivate** button
- On inactivating the main subscriber of the membership

However, through a health care inbound message or through the membership repricing inbound web service, you can inactivate the membership only by inactivating the main subscriber of the membership. On inactivating the main subscriber of a COBRA membership, the system automatically inactivates the membership and all other member persons which are included in the membership. The status of the COBRA membership, main subscriber, and other member persons (if any) is set to **Inactive**. In addition, the system does the following:

- Cancels the billable charges which are created for the membership
- Cancels the corresponding bill segments (if any)

If an audit event exists for the membership which is inactivated, the **BO\_STATUS\_CD** column corresponding to the record in the **C1\_AUDIT\_EVENT**, **C1\_AUDIT\_EVENT\_LOG**, and **CI\_PRCE\_CALC** tables is set to **INVALID**. If a repricing entity detail record exists for the membership in the **PENDING** or **ERROR** status, then the **BO\_STATUS\_CD** column corresponding to the record in the **CI\_REPRC\_ENTITY\_DTL** table is set to **COMPLETE**. If a repricing request exists for the membership in the **PENDING** or **ERROR** status, then the **BO\_STATUS\_CD** column corresponding to the record in the **CI\_REPRC\_REQ\_DTL** table is set to **COMPLETE**.

You can also inactivate a member person, who is not the main subscriber of a COBRA membership, from the user interface, through a health care inbound message, or through the membership repricing inbound web service. On inactivating a member person, the status of the member person is set to **Inactive**.

On terminating a fully-insured group policy, the status of all COBRA memberships on the respective policy plans is set to **Terminated**. Similarly, on reinstating a fully-insured group policy, the status of all COBRA memberships on the respective policy plans is set to **Active**.

The system requires the following information to create charges for a COBRA membership:

- Whom to bill the COBRA membership (i.e. billing arrangement details)
- Age based or tier based pricing rules using which the premium should be calculated for the COBRA membership
- Respective age based or tier based pricing rule type associated with the respective policy plan
- Additional charge pricing rule using which the administration fee should be calculated for the COBRA membership
- Respective additional charge pricing rule type associated with the respective policy plan

The system supports the following billing arrangements for a COBRA membership:

- **Group Billing** – Here, a COBRA membership is billed to a bill group which is derived for the COBRA membership.
- **TPA Billing** – Here, a COBRA membership is billed to the third party administrator (i.e. TPA person).
- **Direct Billing** – Here, a COBRA membership is billed to the member who is financially responsible for the COBRA membership.

You can indicate the billing arrangement for the COBRA memberships by defining a characteristic on the policy plan, policy, or parent customer. The system searches for the characteristic which is specified in the **Cobra Billing Arrangement** option type of the **C1-ASOBLLNG** feature configuration on the following entities in the specified sequence:

1. Policy Plan
2. Policy
3. Parent Customer

**Note:** If the Cobra billing arrangement characteristic is not defined for any of the above listed entities, the system, by default, charges the COBRA membership premium to the bill group.

The system requires the bill group and its account to bill the COBRA memberships when the COBRA billing arrangement is set to **Group Billing**. You can create a bill group and its account from the user interface or through a health care inbound message. On creating an account for a bill group, the system automatically creates a contract on the account using distinct contract types for all policy plans of the parent customer and bill group policies. While creating a contract, the system considers all price items in all pricing rule types (including the related pricing rule types) which are associated with the policy plans of the parent customer and bill group policies.

The system requires the third party administrator (i.e. TPA person) and its account to bill the COBRA memberships when the COBRA billing arrangement is set to **TPA Billing**. You can create a third party administrator (i.e. TPA person) and its accounts through a health care inbound message. While sending the details of a TPA person through an inbound message, you must specify the parent of the TPA person and its account details. The system associates the parent customer with the TPA person using the relationship type which is specified in the **TPA Person Relationship Type** option type of the **C1-ASOBLLNG** feature configuration. If the person type specified in the health care inbound message matches the person type specified in the **TPA Person Type** option type of the **C1-PERSTYPE** feature configuration, the system creates or updates the TPA person and its account through a customer registration object. However, if the person type specified in the health care inbound message does not match the person type specified in the **TPA Person Type** option type of the **C1-PERSTYPE** feature configuration, the system creates or updates the TPA person and its accounts directly and not through a customer registration object.

The system associates the TPA person with the TPA account using the relationship type which is specified in the **TPA Account Relationship Type** option type of the **C1-ASOBLLNG** feature configuration. On creating an account for a TPA person, the system automatically creates a contract on the account using distinct contract types for all policy plans of the parent customer and bill group policies. While creating a contract, the system considers all price items in all pricing rule types (including the related pricing rule types) which are associated with the policy plans of the parent customer and bill group policies.

The system requires the member person's account to bill the COBRA membership when the COBRA billing arrangement is set to **Direct Billing**. You can create an account for a member person who is financially responsible for the COBRA membership through a health care inbound message. On creating an account for a member person, the system automatically creates a contract on the account using distinct contract types for the respective policy plan. While creating a contract, the system considers all price items in all pricing rule types (including the related pricing rule types) which are associated with the respective policy plan.

## Algorithms Used in C1-POLICY

The following table lists the algorithms which are attached to the **C1-POLICY** business object:

System Event	Algorithm	Algorithm Type	Description
Audit	C1- REAUDEVNT	C1-REAUDEVNT	Refer to <a href="#">C1-REAUDEVNT</a> on page 259.
Validation	C1- POLBOVAL	C1-POLBOVAL	Refer to <a href="#">C1-POLBOVAL</a> on page 260.

The following table lists the algorithms which are used in the lifecycle of the **C1-POLICY** business object:

Status	System Event	Algorithm	Algorithm Type	Description
Pending	Monitor	C1- TRNDFLSYS	C1- TRNDFLSYS	Refer to <a href="#">C1-TRNDFLSYS</a> on page 261.

Status	System Event	Algorithm	Algorithm Type	Description
Activate	Monitor	F1-AT-RQJ	F1-GEN-BOMNJ	Refer to <a href="#">F1-AT-RQJ</a> on page 1455.
In Force/ Active	Enter	C1-EVCSTSTAT	C1-EVCSTSTAT	Refer to <a href="#">C1-EVCSTSTAT</a> on page 261.
Pending Termination	Enter	C1-PLCYTRMRQ	C1-PLCYTRMRQ	Refer to <a href="#">C1-PLCYTRMRQ</a> on page 261.
Terminated	Enter	C1-POLCYTERM	C1-POLCYTERM	Refer to <a href="#">C1-POLCYTERM</a> on page 262.
	Enter	C1-DELTRMLTR	C1-CRTCUSCNT	Refer to <a href="#">C1-DELTRMLTR</a> on page 262.
	Enter	C1-EVCSTSTAT	C1-EVCSTSTAT	Refer to <a href="#">C1-EVCSTSTAT</a> on page 261.
Pending Reinstatement	Enter	C1-PLCYREIRQ	C1-PLCYREIRQ	Refer to <a href="#">C1-PLCYREIRQ</a> on page 263.
Reinstated	Monitor	F1-AT-RQJ	F1-GEN-BOMNJ	Refer to <a href="#">F1-AT-RQJ</a> on page 1455.
	Enter	C1-POLCYREIN	C1-POLCYREIN	Refer to <a href="#">C1-POLCYREIN</a> on page 263.
	Enter	C1-CCPOLRE1	C1-CRTCUSCNT	Refer to <a href="#">C1-CCPOLRE1</a> on page 264.
Renewed	Monitor	F1-AT-RQJ	F1-GEN-BOMNJ	Refer to <a href="#">F1-AT-RQJ</a> on page 1455.
Pending Cancellation	-	-	-	-
Canceled	-	-	-	-

## C1-READEVNT

If this algorithm is attached to the **Audit** system event of a business object, it is invoked whenever you define, edit, or delete the respective entity. It checks whether an active audit event type exists for the entity business object. If so, it considers the active audit event type and creates the audit event using the respective audit event type. The system creates the audit event while:

- Defining an entity when the **Add Action** option is selected in the audit event type.
- Editing an entity when the **Update All** option is selected in the audit event type or when the updated element is listed in the **Audit Elements for Entity Update** section.
- Deleting an entity when the **Delete Action** option is selected in the audit event type.

The entity type and entity ID for which an audit event is created are added corresponding to the audit event in the **C1\_AUDIT\_EVENT** table. In addition, the effective date is stamped corresponding to the audit event in the

**C1\_AUDIT\_EVENT** table. Note that if the entity has a start date, then the effective date is set to the entity's start date. But, if the entity does not have a start date, then the effective date is set to the system date.

**Note:** Before creating an audit event, the system checks whether an audit event for the entity ID with the same effective date already exists in the **Pending** or **Error** status for the respective action. If so, the system does not create a new audit event for the entity. Instead, the system adds a new log entry in the existing audit event

At present, this algorithm is designed to work with the business objects of the following maintenance objects:

- C1-POLICY
- C1-ASOPolicy
- C1-Membership
- C1-PolicyPlan
- C1\_PERSON\_BO
- C1-PricingRuleTierBased
- C1-PricingRuleAgeBased

In case, you want to create audit event for any other maintenance objects, you need to create a custom algorithm type.

It contains the following parameters:

- **Audit Event Business Object** – Used to specify the business object using which you want to create the audit event.
- **Audit Event Pending Status** – Used to specify the status in which you want to create the audit event. This parameter is also used for determining whether an audit event for the entity ID already exists in the system.
- **Audit Event Error Status** – Used to specify the status in which an audit event is transitioned when an error occurs while processing the audit event. This parameter is used for determining whether an audit event for the entity ID already exists in the system.

All the above parameters are mandatory.

## C1-POLBOVAL

This algorithm validates a fully-insured group policy throughout its lifecycle. It checks the following:

- Whether the policy end date is not earlier than the policy start date.
- Whether the policy person end date is not earlier than the policy person start date.
- Whether the policy person start date is not earlier than the policy start date or later than policy end date.
- Whether the policy person end date is not earlier than the policy start date or later than policy end date.

**Note:** The above validation is done when the policy is transition to the status which is not specified in the **Skip Status for Policy Person End Date Validation** parameter. For example, if you set the **Skip Status for Policy Person End Date Validation** parameter to **TERMINATED**, the system will not perform the above validation when the status of the policy is changed to **Terminated**.

- Whether the person who is the main customer is associated with the policy.
- Whether the policy person role is specified while associating a person with the policy.

It contains the following parameter:

- **Skip Status for Policy Person End Date Validation** – Used to specify the policy status in which you do not want to validate the policy person end date. You can specify comma-separated values for this parameter.

## C1-TRNDFLSYS

This algorithm checks whether the fully-insured group policy is created from the user interface or through an inbound message. If a fully-insured group policy is created through an inbound message, the system will automatically transition the fully-insured group policy to the default next status specified in its lifecycle.

## F1-AT-RQJ

This algorithm transitions the current status of the business object to the specified status. It contains the following parameters:

- **Next Status** – Used when you want to override the default next status specified in the lifecycle.
- **Next Transition Condition** – Used when you want to override the default next transition condition specified in the lifecycle.

**Note:** At a time, you can specify value for either the **Next Status** or **Next Transition Condition** parameter. If you don't specify any value for these parameters, the system will transition the business object to the default next status specified in its lifecycle.

## C1-EVCSTSTAT

This algorithm updates the **Customer Status** characteristic of the main customer of the policy. This characteristic indicates whether the customer is active or inactive. If the customer owns at least one active policy, the customer status is set to **Active**. However, if the customer does not own any active policy, the customer status is set to **Inactive**.

It is invoked while activating or terminating a fully-insured group policy. It contains the following parameters:

- **Customer Status Characteristic Type** – Used to specify the characteristic type whose value should be updated whenever the policy is activated or terminated. You must specify a characteristic type where the characteristic entity is set to **Person**.
- **Active Customer Status Characteristic Value** – Used to specify the characteristic value which should be used when the main customer owns at least one active policy.
- **Inactive Customer Status Characteristic Value** – Used to specify the characteristic value which should be used when the main customer does not own any active policy (in other words, when all policies of the main customer are terminated).
- **Policy Active Status** – Used to specify the status in which at least one policy should exist to indicate that the main customer is active.

All the above parameters are mandatory.

## C1-PLCYTRMRQ

This algorithm creates an outbound message using the outbound message type whenever you initiate the policy termination process from the user interface. While creating the outbound message, the system identifies the account using the characteristic type specified in the **Main Customer Characteristic Type** parameter. The system checks whether this characteristic type is set to the main customer's ID on any account. If so, the system considers the account and then fetches the value of the account identifier type specified in the **Account Identifier Type** parameter.

In addition, it stores the details of the outbound message (which is created) in the log of the policy. It contains the following parameters:

- **Outbound Message Type** – Used to specify the outbound message type using which you want to create the outbound message. You must specify an outbound message type which is already defined in the system.
- **Source System** – Used to specify the source system that you want to use in the outbound message. You must specify a source system which is already defined in the **C1-SourceSystemLookup** extendable lookup.

- **Account Identifier Type** – Used to specify the account identifier type whose value you want to use in the outbound message. You must specify an account identifier type which is already defined in the system.
- **Main Customer Characteristic Type** – Used to specify the characteristic type using which you want to identify the account of the main customer. You must specify a characteristic type where the characteristic entity is set to **Person**.

All the above parameters are mandatory.

## C1-POLCYTERM

This algorithm sets the end date of the following entities to the termination date when the respective condition is met:

- Policy (when the termination date is not earlier than the policy start date or later than the policy end date)
- Policy Person (when the termination date falls within the date range in which the person is associated with the policy)
- Policy Plan (when the termination date falls within the date range of the policy plan)
- Membership (when the termination date falls within the date range of the membership)
- Member Person (when the termination date falls within the date range in which the person is added to the membership)
- Contracts Associated with the Membership (when the termination date falls within the date range of the contract)

It contains the following parameters:

- **Membership Old Status** – Used to specify the status from which you want to transition the membership when the policy is terminated.
- **Membership New Status** – Used to specify the status to which you want to transition the membership when the policy is terminated.

## C1-DELTRMLTR

This algorithm creates a customer contact whenever the policy is transition to the status where it is attached. For example, if this algorithm is attached to the **TERMINATED** status, it creates a customer contact whenever the policy is terminated. You can create a customer contact while terminating a policy. Optionally, you can configure the algorithm such that a customer contact is created when a particular status reason is specified while terminating a policy.

Once a customer contact is created, the policy for which the customer contact is created is stored as a characteristic on the customer contact. In addition, the customer contact which is created for the policy is stored as a characteristic in the log of the policy.

It contains the following parameters:

- **Check Policy Status Reason** – Used when you want to create a customer contact when the policy is terminated for a particular reason. The valid values are:
  - **Y** – Used to indicate that the system should create a customer contact when a particular status reason is specified while terminating a policy.
  - **N** – Used to indicate that the system should create a customer contact while terminating a policy irrespective of the status reason.
- **Policy Status Reason Codes** – Used to specify the status reason defined for the **TERMINATED** status. You can specify comma-separated values for this parameter.
- **Customer Contact Class** – Used to specify the customer contact class using which you want to create the customer contact. This field is mandatory.
- **Customer Contact Type** – Used to specify the customer contact type using which you want to create the customer contact. This field is mandatory.

- **Consolidate Customer Contact** – Used to indicate whether the system should update the existing customer contact or create a new customer contact for the main customer of the policy. The valid values are:
  - **Y** – If this parameter is set to **Y**, the system checks whether a customer contact is already created for the main customer of the policy on the system date. If so, the system does not create a new customer contact. Instead, it updates the existing customer contact of the main customer of the policy. However, if the customer contact is not already created on the system date, the system creates a new customer contact for the main customer of the policy.
  - **N** – If this parameter is set to **N**, the system creates a new customer contact for the main customer of the policy and does not update the existing customer contact, if any.

**Note:** If you do not specify the value for this parameter, by default, it is set to **N**.

- **Policy ID Characteristic Type** – Used to specify the characteristic type which you want to define for the customer contact. This characteristic indicates the policy for which the customer contact is created. You must specify a characteristic type where the characteristic entity is set to **Customer Contact**. This field is mandatory.
- **Customer Contact Characteristic Type** – Used to specify the characteristic type which you want to use in the log of the policy. This characteristic indicates the customer contact which is created for the policy. You must specify a characteristic type where the characteristic entity is set to **Policy**. This field is mandatory.
- **Status To Skip Process** – Used when you do not want to create the customer contact when the policy is transition to a particular status. You can specify comma-separated values for this parameter.

## C1-PLCYREIRQ

This algorithm creates an outbound message using the outbound message type whenever you initiate the policy reinstatement process from the user interface. In addition, it stores the details of the outbound message (which is created) in the log of the policy.

It contains the following parameters:

- **Outbound Message Type** – Used to specify the outbound message type using which you want to create the outbound message. You must specify an outbound message type which is already defined in the system.
- **Source System** – Used to specify the source system that you want to use in the outbound message. You must specify a source system which is already defined in the **C1-SourceSystemLookup** extendable lookup.

All the above parameters are mandatory.

## C1-POLCYREIN

This algorithm updates the end date of the following entities to the respective original end date:

- Policy
- Policy Person
- Policy Plan
- Membership
- Member Person
- Contracts Associated with the Membership

**Note:** The system stores the original end date of the above listed entities when you define or edit a policy, policy plan, or membership.

Here, the assumption is that the pass-through billable charges information for the membership will be sent again through an inbound message along with the reinstatement reason. And, therefore the exiting billable charges will not be extended.

It contains the following parameters:

- **Membership Old Status** – Used to specify the status from which you want to transition the membership when the policy is reinstated.
- **Membership New Status** - Used to specify the status to which you want to transition the membership when the policy is reinstated. This field is mandatory.

## C1-CCPOLRE1

This algorithm creates a customer contact whenever the policy is transition to the status where it is attached. For example, if this algorithm is attached to the **REINSTATE** status, it creates a customer contact whenever the policy is reinstated. You can create a customer contact while reinstating a policy. Optionally, you can configure the algorithm such that a customer contact is created when a particular status reason is specified while reinstating a policy.

Once a customer contact is created, the policy for which the customer contact is created is stored as a characteristic on the customer contact. In addition, the customer contact which is created for the policy is stored as a characteristic in the log of the policy.

It contains the following parameters:

- **Check Policy Status Reason** – Used when you want to create a customer contact when the policy is reinstated for a particular reason. The valid values are:
  - **Y** – Used to indicate that the system should create a customer contact when a particular status reason is specified while reinstating a policy.
  - **N** – Used to indicate that the system should create a customer contact while reinstating a policy irrespective of the status reason.
- **Policy Status Reason Codes** – Used to specify the status reason defined for the **REINSTATE** status. You can specify comma-separated values for this parameter.
- **Customer Contact Class** – Used to specify the customer contact class using which you want to create the customer contact. This field is mandatory.
- **Customer Contact Type** – Used to specify the customer contact type using which you want to create the customer contact. This field is mandatory.
- **Consolidate Customer Contact** – Used to indicate whether the system should update the existing customer contact or create a new customer contact for the main customer of the policy. The valid values are:
  - **Y** – If this parameter is set to **Y**, the system checks whether a customer contact is already created for the main customer of the policy on the system date. If so, the system does not create a new customer contact. Instead, it updates the existing customer contact of the main customer of the policy. However, if the customer contact is not already created on the system date, the system creates a new customer contact for the main customer of the policy.
  - **N** – If this parameter is set to **N**, the system creates a new customer contact for the main customer of the policy and does not update the existing customer contact, if any.

**Note:** If you do not specify the value for this parameter, by default, it is set to **N**.

- **Policy ID Characteristic Type** – Used to specify the characteristic type which you want to define for the customer contact. This characteristic indicates the policy for which the customer contact is created. You must specify a characteristic type where the characteristic entity is set to **Customer Contact**. This field is mandatory.
- **Customer Contact Characteristic Type** – Used to specify the characteristic type which you want to use in the log of the policy. This characteristic indicates the customer contact which is created for the policy. You must specify a characteristic type where the characteristic entity is set to **Policy**. This field is mandatory.
- **Status To Skip Process** – Used when you do not want to create the customer contact when the policy is transition to a particular status. You can specify comma-separated values for this parameter.

## Algorithms Used in C1-PolicyPlan

The following table lists the algorithms which are attached to the **C1-PolicyPlan** business object:

System Event	Algorithm	Algorithm Type	Description
Audit	C1-PPCONCRE	C1-PPCONCRE	Refer to <a href="#">C1-PPCONCRE</a> on page 265.
Validation	C1-VALPPBO	C1-VALPPBO	Refer to <a href="#">C1-VALPPBO</a> on page 265.

### C1-PPCONCRE

This algorithm is invoked when you create or edit a policy plan from the user interface or through an inbound message. It creates a contract in either of the following ways:

- If a price item is associated with the policy plan, it creates a contract using the contract type which is associated with the price item.
- If a pricing rule type is associated with the policy plan and the pricing rule type contains one or more price items, it creates a contract using a distinct contract type which is associated with each price item.

Let us assume that PRT1 is associated with the policy plan and it contains three price items – P1, P2, and P3. Now, if the P1 is associated with the CT1 contract type, P2 is associated with the CT2 contract type, and P3 is associated with the CT3 contract type, the system will create three contracts - C1 using CT1, C2 using CT2, and C3 using CT3. However, if the P1 and P3 are associated with the CT1 contract type and P2 is associated with the CT2 contract type, the system will create two distinct contracts - C1 using CT1 and C2 using CT2.

If multiple pricing rule types are associated with the policy plan and each pricing rule type contains multiple price items, it creates a contract using a distinct contract type which is associated with each price item on each pricing rule type.

If a policy plan belongs to a policy of the parent customer (where a bill group is not associated), the system will create one contract using each contract type on each account of the parent customer and bill groups. If a policy plan belongs to a policy of a bill group (where the parent customer is the policy holder), the system will create one contract using each contract type on each account of the parent customer and the bill group.

The status of each contract is set to **Active**. The contract start date is set to the start date of the respective plan. If the same contract type is associated with the same or different price items on the same or different pricing rule types of different plans, the contract start date is set to the start date of the earliest plan. The default rate schedule specified on the respective contract type is added to the contract in the rate information and its effective date is set to the contract start date.

#### Note:

The system creates a contract using a contract type for an account when the division to which the account and contract type belongs is same.

If a contract of a contract type is already present on the account, the system will not create a new contract. Instead, it will update the start date of the existing contract, if required.

If the same contract type is associated with the same or different price items on the same or different pricing rule types of different plans on different policies, the contract start date is set to the start date of the earliest plan across policies.

### C1-VALPPBO

This algorithm validates a policy plan. It checks the following:

- Whether the policy plan end date is not earlier than the policy plan start date.
- Whether the policy plan start date is not earlier than the policy start date or later than policy end date.

- Whether the policy plan end date is not earlier than the policy start date or later than policy end date.
- Whether the price item or at least one pricing rule type is associated with the policy plan.

## Algorithms Used in C1-Membership

The following table lists the algorithms which are attached to the **C1-Membership** business object:

System Event	Algorithm	Algorithm Type	Description
Audit	C1-FIAUDEV	C1-FIAUDEV	Refer to <a href="#">C1-FIAUDEV</a> on page 137.
Post-Processing	C1-RTAREAMEM	C1-RTAREAMEM	<a href="#">C1-RTAREAMEM</a> on page 267
Post-Processing	C1-MEMRLSUBT	C1-MEMRLSUBT	<a href="#">C1-MEMRLSUBT</a> on page 268
Post-Processing	C1-MPCONCREA	C1-MPCONCREA	<a href="#">C1-MPCONCREA</a> on page 269
Pre-Processing	C1-MEMSTPRE	C1-MEMSTPRE	Refer to <a href="#">C1-MEMSTPRE</a> on page 269.
Validation	C1-VALMEMBO	C1-VALMEMBO	Refer to <a href="#">C1-VALMEMBO</a> on page 269.

The following table lists the algorithms which are used in the lifecycle of the **C1-Membership** business object:

Status	System Event	Algorithm	Algorithm Type	Description
Active	-	-	-	-
Inactive	Enter	C1-MEMINACT	C1-MEMINACT	Refer to <a href="#">C1-MEMINACT</a> on page 270.
Terminated	-	-	-	-

### C1-FIAUDEV

If this algorithm is attached to the **Audit** system event of the **C1-Membership**, **C1-Benefits**, and **C1\_PERSON\_BO** business objects, it is invoked whenever you define, edit, or delete the respective entity. It checks whether an active audit event type exists for the entity business object. If so, it considers the active audit event type and creates the audit event using the respective audit event type. The system creates the audit event whenever a membership is added to a policy plan, member person is added to a membership, and a Medicare benefit is defined for a member person. It also creates the audit event whenever the membership, member person, and Medicare benefit details are updated. However, note that the audit events are created in the update scenario when the element listed for auditing in the age based, tier based, or benefit pricing rule type is updated. The system considers only those pricing rule types whose pricing rules are effective during the respective entity (i.e. membership, member person, or Medicare benefit whichever is updated) date range.

It creates one or more audit events in the **Pending** status. The entity type and entity ID for which an audit event is created are added corresponding to the audit event in the **C1\_AUDIT\_EVENT** table. In addition, the effective date is stamped corresponding to the audit event in the **C1\_AUDIT\_EVENT** table.

#### Note:

The system creates an audit event whenever the membership start and end dates and member person's start and end dates are changed in the system irrespective of whether these fields are listed for auditing or not in the age based or tier based pricing rule types.

Before creating an audit event, the system checks whether an audit event for the entity ID with the same effective date already exists in the **Pending** or **Error** status for the respective action. If so, the system does not create a new audit event for the entity. Instead, the system adds a new log entry in the existing audit event.

For each audit event, this algorithm derives the memberships on the policy plans which are impacted and the pricing rule types whose pricing rules are defined on the respective policy plans. A repricing entity detail record is then created

for each membership, pricing rule type, and effective date combination in the **CI\_REPRC\_ENTITY\_DTL** table. The status of the repricing entity detail record is set to **P**. Once the repricing entity detail records are created successfully, the status of the audit event is changed to **Complete**.

It contains the following parameters:

- **Audit Event Business Object** – Used to specify the business object using which you want to create the audit event.
- **Audit Event Pending Status** – Used to specify the status in which you want to create the audit event. This parameter is also used for determining whether an audit event for the entity ID already exists in the system.
- **Audit Event Error Status** – Used to specify the status in which an audit event is transitioned when an error occurs while processing the audit event. This parameter is used for determining whether an audit event for the entity ID already exists in the system.

All the above parameters are mandatory.

## **C1-RTAREAMEM**

This algorithm derives the geographic rating area for a membership using the **Address Source** and **Address Type** characteristic types. It supports two address sources named **Policy Holder** and **Main Subscriber** and three address types named **Person Mailing**, **Person Seasonal**, and **Account Override**.

On adding a membership to a policy plan, this algorithm derives the characteristic types from the **Address Source Characteristic Type** and **Address Type Characteristic Type** attributes of a geographic rating area preference. This algorithm considers the geographic rating area preference which is specified in the **Geographic Rating Area Field Mapping** option type of the **C1-ASOBLLNG** feature configuration. Then, it searches for these characteristics on the following entities in the specified sequence:

1. Policy Plan
2. State where the Policy Plan is Issued
3. Policy
4. State where the Policy is Issued

If these characteristics are not defined for any of the above listed entities, this algorithm derives the default address source and address type from the geographic rating area preference. If the address source is set to **Policy Holder**, this algorithm fetches the value from the **Parent Customer Policy Person Role** option type of the **C1-ASOBLLNG** feature configuration. It then derives the person who is associated with the policy using the parent customer policy person role. Once the address source and address type are derived, this algorithm fetches the state and zip code from the address type of the address source. For example, if the address source is set to **Policy Holder** and address type is set to **Person Mailing**, this algorithm fetches the state and zip code from the policy holder's mailing address. Once the state and zip code are fetched from the address, this algorithm checks whether the zip code is a 9-digit code. If not, it appends zeros to make it a 9-digit zip code. It then derives the value of the **Use Plan Details** attribute from the geographic rating area preference. If the attribute is set to **Y**, this algorithm derives a geographic rating area for the state, zip code, policy number, plan number, and source system combination. However, if the attribute is set to **N**, this algorithm derives a geographic rating area for the state and zip code combination. If the geographic rating area is not derived for the specified combination, this algorithm derives the default geographic rating area from the geographic

rating area preference. Once the geographic rating area is derived, this algorithm stores the geographic rating area for the membership. The characteristic type specified in the **Geographic Rating Area Characteristic Type** attribute of the geographic rating area preference is used to store geographic rating area for the membership. The effective date of the characteristic is set to effective date of the address.

## C1-MEMRLSUBT

While adding a membership to a policy plan or while adding or inactivating a member person in a membership, this algorithm derives the member relationship for each member person of the membership from a member relationship structure. It considers the member relationship structure which is defined as a characteristic for the policy plan. While deriving the member relationship structure of the policy plan, it considers the characteristic which is defined using a characteristic type specified in the **Member Relationship Structure Characteristic Type** attribute of a member relationship and subscription tier preference. It considers the member relationship and subscription tier preference which is specified in the **Relation Structure Code Field Mapping** option type of the **C1-ASOBLNG** feature configuration.

The member relationship structure helps to determine how each member person is related to the main subscriber of the membership. A member relationship is derived for a member person depending on the following:

- Whether the member person is a self, spouse, or dependent
- Number of spouses, dependents, and young adults in the membership

While determining the member relationship for a member person, this algorithm derives the following characteristic types from the respective attributes of the member relationship and subscription tier preference:

- Age Calculation Date Basis
- Max Age Limit for Max Dependent Count
- Max Number of Dependents Order Priority
- Maximum Number of Dependents
- Member Relationship Derivation Date
- New Born Gift Days
- New Born Gift Days Applicability
- Young Adult Max Age Limit
- Young Adult Max Age Limit Applicability

It then derives these characteristics from the policy plan. Based on these characteristics defined for the policy plan, it derives the member relationship for each member person from the member relationship structure. If the **Member Relationship Derivation Date** characteristic type is set to **Enrollment Date**, this algorithm derives the member relationship for each member person of the membership in order of the member start date. However, if the **Member Relationship Derivation Date** characteristic type is set to **Date of Birth**, this algorithm derives the member relationship for each member person of the membership in order of the date of birth.

Once the member relationship is derived for a member person, this algorithm stores the member relationship for the member person. The characteristic type specified in the **Member Relationship Characteristic Type** attribute of the member relationship and subscription tier preference is used to store member relationship for the member person. On adding a membership to a policy plan or on adding a member person to a membership, the effective date of the member relationship characteristic is set to the member person's start date. If a new born is added to the membership, the effective date of the new born's member relationship characteristic is calculated considering the gift days if applicable.

If a member person is end dated, this algorithm derives the member relationship of all other member persons once again. If the member relationship for a member person is different, it creates a new characteristic to store the member relationship for the member person. The effective date of the new characteristic is set to the member person's end date + 1. For example, if the end date of a member person is set to 06-30-2021, then the effective date of the new characteristic for the remaining member persons is set to 07-01-2021. Similarly, if a member person is inactivated, this algorithm derives the member relationship of all other member persons once again. In this case, if the member relationship for a

member person is different, it updates the existing member relationship characteristic of the member person and does not create a new member relationship characteristic for the member person.

## C1-MPCONCREA

This algorithm is invoked when the following conditions are met:

- A member person who is financially responsible for the membership is added to the membership
- One or more accounts already exist for the member person in the system

If the above conditions are met, this algorithm derives the membership in which the member person is added. It then derives the policy plan to which the membership belongs. It creates contracts for each account of the member person in either of the following ways:

- If a price item is associated with the policy plan, it creates a contract using the contract type which is associated with the price item.
- If a pricing rule type is associated with the policy plan and the pricing rule type contains one or more price items, it creates a contract using a distinct contract type which is associated with each price item.

Let us assume that PRT1 is associated with the policy plan and it contains three price items – PI1, PI2, and PI3. Now, if the PI1 is associated with the CT1 contract type, PI2 is associated with the CT2 contract type, and PI3 is associated with the CT3 contract type, this algorithm will create three contracts - C1 using CT1, C2 using CT2, and C3 using CT3. However, if the PI1 and PI3 are associated with the CT1 contract type and PI2 is associated with the CT2 contract type, this algorithm will create two distinct contracts - C1 using CT1 and C2 using CT2.

If multiple pricing rule types are associated with the policy plan and each pricing rule type contains multiple price items, it creates a contract using a distinct contract type which is associated with each price item on each pricing rule type.

The status of each contract is set to **Active**. The contract start date is set to the start date of the respective plan. The default rate schedule specified on the respective contract type is added to the contract in the rate information and its effective date is set to the contract start date.

### Note:

The system creates a contract using a contract type for an account when the division to which the account and contract type belongs is same.

If a contract of a contract type is already present on the account, the system will not create a new contract. Instead, it will update the start date of the existing contract, if required.

## C1-MEMSTPRE

Once the status of the main subscriber is changed to **Inactive**, this algorithm changes the status of the membership to the value specified in the **Membership Inactive Status** option type of the **C1-ASOBLNG** feature configuration. In addition, it does not allow you to add a member person in the **Inactive** status to a membership.

## C1-VALMEMBO

This algorithm validates a membership. It checks the following:

- Whether the membership end date is not earlier than the membership start date.
- Whether the membership start date is not earlier than the policy plan start date or later than policy plan end date.
- Whether the membership end date is not earlier than the policy plan start date or later than policy plan end date.
- Whether the policy plan for which you want to define the membership is specified.
- Whether the person who is the main subscriber is added to the membership.
- Whether the relationship type is specified while adding a person to the membership.

## C1-MEMINACT

This algorithm changes the status of the member person to the value specified in the **Membership Person Inactive Status** option type of the **C1-ASOBLLNG** feature configuration. It also does the following:

- Cancels the billable charges which are created for the membership
- Cancels the corresponding bill segments (if any)

If an audit event exists for the membership which is inactivated, the **BO\_STATUS\_CD** column corresponding to the record in the **C1\_AUDIT\_EVENT**, **C1\_AUDIT\_EVENT\_LOG**, and **CI\_PRCE\_CALC** tables is set to **INVALID**. If a repricing entity detail record exists for the membership in the **PENDING** or **ERROR** status, then the **BO\_STATUS\_CD** column corresponding to the record in the **CI\_REPRC\_ENTITY\_DTL** table is set to **COMPLETE**. If a repricing request exists for the membership in the **PENDING** or **ERROR** status, then the **BO\_STATUS\_CD** column corresponding to the record in the **CI\_REPRC\_REQ\_DTL** table is set to **COMPLETE**.

## Policy (Used for Searching)

The **Policy** screen allows you to search for a policy using various search criteria. It also allows you to define a policy. It contains the following zone:

- [Search Policy](#) on page 270

Through this screen, you can navigate to the following screen:

- [Policy \(Used for Viewing\)](#) on page 281

## Search Policy

The **Search Policy** zone allows you to search for a policy using various search criteria. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for a policy using the policy or person details. The valid values are: <ul style="list-style-type: none"> <li>• Policy Date/Policy Type/Status</li> <li>• Source System/Policy Number/Description</li> <li>• Person Name/Person Identifier</li> <li>• Policy Characteristics</li> </ul>	Yes
	<b>Note:</b> By default, the <b>Policy Date/Policy Type/Status</b> option is selected.	
Policy Type	Used to search policies which are created using a particular policy type.	No
	<b>Note:</b> This field appears when the <b>Policy Date/Policy Type/Status</b> option is selected from the <b>Search By</b> list.	

Field Name	Field Description	Mandatory (Yes or No)
Start Date	Used to search policies which are effective from a particular date.	No
	<b>Note:</b> This field appears when the <b>Policy Date/Policy Type/Status</b> option is selected from the <b>Search By</b> list.	
Status	Used to search policies with a particular status. The valid values are: <ul style="list-style-type: none"> <li>• In Force/Active</li> <li>• Canceled</li> <li>• Pending Cancellation</li> <li>• Pending</li> <li>• Pending Reinstatement</li> <li>• Pending Termination</li> <li>• Post Runout</li> <li>• Reinstated</li> <li>• Runout</li> <li>• Terminated</li> </ul>	No
	<b>Note:</b> This field appears when the <b>Policy Date/Policy Type/Status</b> option is selected from the <b>Search By</b> list.	
End Date	Used to search policies which are effective till a particular date.	No
	<b>Note:</b> This field appears when the <b>Policy Date/Policy Type/Status</b> option is selected from the <b>Search By</b> list.	
Source System	Used to search policies which originated from a particular external system.	No
	<b>Note:</b> This field appears when the <b>Source System/Policy Number/Description</b> option is selected from the <b>Search By</b> list.	
Policy Number	Used to search a policy with a particular policy number.	No
	<b>Note:</b> This field appears when the <b>Source System/Policy Number/Description</b> option is selected from the <b>Search By</b> list.	
Description	Used to search policies with a particular description.	No
	<b>Note:</b> This field appears when the <b>Source System/Policy Number/Description</b> option is selected from the <b>Search By</b> list.	
Person Name	Used to search policies to which a particular person is associated.	No
	<b>Note:</b> This field appears when the <b>Person Name/Person Identifier</b> option is selected from the <b>Search By</b> list.	

Field Name	Field Description	Mandatory (Yes or No)
Person Identifier Type	Used to indicate the person identifier type.	Yes (Conditional)
	<b>Note:</b> This field appears when the <b>Person Name/Person Identifier</b> option is selected from the <b>Search By</b> list.	<b>Note:</b> If you specify the person identifier as a search criteria, you have to select the person identifier type.
Person Identifier	Used to search policies to which a person is associated.	Yes (Conditional)
	<b>Note:</b> This field appears when the <b>Person Name/Person Identifier</b> option is selected from the <b>Search By</b> list.	<b>Note:</b> If you specify the person identifier type as a search criteria, you have to specify the person identifier.
Characteristic Type	Used to search policies for which a particular characteristic type is defined.	Yes (Conditional)
	<b>Note:</b> This field appears when the <b>Policy Characteristics</b> option is selected from the <b>Search By</b> list.  The list includes only those characteristic types where the characteristic entity is set to <b>Policy</b> .	<b>Note:</b> This field is required when you are searching for a policy using a characteristic.
Characteristic Value	Used to search policies with a particular characteristic value.	Yes (Conditional)
	<b>Note:</b> This field appears when the characteristic type is selected.  If you select a predefined characteristic type, the <b>Search</b> (🔍) icon appears corresponding to the <b>Characteristic Value</b> field. On clicking the <b>Search</b> icon, the <b>Predefined Characteristic Search</b> window appears.  On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	<b>Note:</b> This field is required when you are searching for a policy using a characteristic.

**Note:** You must specify at least one search criterion while searching for a policy.

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Policy Number	Displays the policy number.

Column Name	Column Description
Policy Information	Displays additional information about the policy.
	<b>Note:</b> It has a link. On clicking the link, the <b>Policy</b> screen appears where you can view the details of the respective policy.
Source System	Indicates the external system from where the policy is originated.
Description	Displays the description of the policy.
Start Date	Displays the date from when the policy is effective.
End Date	Displays the date till when the policy is effective.
Status	<p>Indicates the status of the policy. If the policy is created using the <b>C1-POLICY</b> business object, the valid values are:</p> <ul style="list-style-type: none"> <li>• Pending</li> <li>• In Force/Active</li> <li>• Pending Cancellation</li> <li>• Canceled</li> <li>• Pending Reinstatement</li> <li>• Reinstated</li> <li>• Pending Termination</li> <li>• Terminated</li> </ul> <p>However, if the policy is created using the <b>C1-ASOPolicy</b> business object, the valid values are:</p> <ul style="list-style-type: none"> <li>• Pending</li> <li>• In Force/Active</li> <li>• Runout</li> <li>• Post Runout</li> </ul>

Column Name	Column Description						
Main Customer	<p>This column displays different data depending on whether you search for a policy using the policy or person details. The following table describes this column:</p> <table border="1"> <thead> <tr> <th>If you search for a policy using...</th> <th>Then...</th> </tr> </thead> <tbody> <tr> <td>The <b>Policy Date/Policy Type/Status, Source System/Policy Number/Description, or Policy Characteristics</b> option</td> <td> <p>The <b>Main Customer</b> column displays the name of the person who is the main customer of the policy. In addition, this column has a context menu which helps in navigating to other screens in the application.</p> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> It has a link. On clicking the link, the <b>Person</b> screen appears where you can view the details of the respective person.</p> </div> </td> </tr> <tr> <td>The <b>Person Name/Person Identifier</b> option</td> <td> <p>The <b>Main Customer</b> column indicates whether the person is the main customer of the policy. The valid values are:</p> <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul> </td> </tr> </tbody> </table>	If you search for a policy using...	Then...	The <b>Policy Date/Policy Type/Status, Source System/Policy Number/Description, or Policy Characteristics</b> option	<p>The <b>Main Customer</b> column displays the name of the person who is the main customer of the policy. In addition, this column has a context menu which helps in navigating to other screens in the application.</p> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> It has a link. On clicking the link, the <b>Person</b> screen appears where you can view the details of the respective person.</p> </div>	The <b>Person Name/Person Identifier</b> option	<p>The <b>Main Customer</b> column indicates whether the person is the main customer of the policy. The valid values are:</p> <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>
If you search for a policy using...	Then...						
The <b>Policy Date/Policy Type/Status, Source System/Policy Number/Description, or Policy Characteristics</b> option	<p>The <b>Main Customer</b> column displays the name of the person who is the main customer of the policy. In addition, this column has a context menu which helps in navigating to other screens in the application.</p> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> It has a link. On clicking the link, the <b>Person</b> screen appears where you can view the details of the respective person.</p> </div>						
The <b>Person Name/Person Identifier</b> option	<p>The <b>Main Customer</b> column indicates whether the person is the main customer of the policy. The valid values are:</p> <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>						
Person Information	<p>Indicates the person who is associated with the policy. In addition, this column has a context menu which helps in navigating to other screens in the application.</p> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>It has a link. On clicking the link, the <b>Person</b> screen appears where you can view the details of the respective person.</p> <p>This column appears when the <b>Person Name/Person Identifier</b> option is selected from the <b>Search By</b> list.</p> </div>						
Policy Person Role	<p>Indicates the role using which the person is associated with the policy.</p> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This column appears when the <b>Person Name/Person Identifier</b> option is selected from the <b>Search By</b> list.</p> </div>						

**Note:** Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

### Related Topics

For more information on...	See...
How to search for a policy	<a href="#">Searching for a Policy</a> on page 275
How to define a policy	<a href="#">Defining a Policy</a> on page 276
How to view the details of a policy	<a href="#">Viewing the Policy Details</a> on page 275

## Searching for a Policy

### Prerequisites

To search for a policy, you should have:

- Policy types and person identifier types defined in the application
- Values defined for the **C1-SourceSystemLookup** extendable lookup
- Characteristic types defined in the application (where the characteristic entity is set to **Policy**)

### Procedure

To search for a policy:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Person Information** and then click **Policy**.  
A sub-menu appears.
3. Click the **Search** option from the **Policy** sub-menu.  
The **Policy** screen appears.
4. Enter the search criteria in the **Search Policy** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search**.

A list of policies that meet the search criteria appears in the **Search Results** section.

For more information on...	See...
Policy screen	<a href="#">Policy (Used for Viewing)</a> on page 281
Search Policy zone	<a href="#">Search Policy</a> on page 270

## Viewing the Policy Details

### Procedure

To view the details of a policy:

1. Search for the policy in the **Policy** screen.
2. In the **Search Results** section, click the link in the **Policy Information** column corresponding to the policy whose details you want to view.  
The **Policy** screen appears.
3. Ensure that the **Main** tab is selected.
4. View the details of the policy in the **Policy** zone.

### Related Topics

For more information on...	See...
How to search for a policy	<a href="#">Searching for a Policy</a> on page 275
Policy screen	<a href="#">Policy (Used for Viewing)</a> on page 281
Policy zone	<a href="#">Policy</a> on page 282

## Defining a Policy

Oracle Revenue Management and Billing enables you to define a policy for the fully-insured and self-funded health insurance business. You can define a fully-insured group policy using a policy type where the policy category is set to **Fully-Insured Group** or **Fully-Insured Individual**. However, you can define a self-funded policy using a policy type where the policy category is set to **Self-Funded**.

**Note:** At present, the **Fully-Insured Individual** policy category is not supported in the system.

### Prerequisites

To define a policy, you should have:

- Policy types defined in the application
- Values defined for the **C1-SourceSystemLookup** extendable lookup

**Note:** This prerequisite is applicable only when you want to define a fully-insured group policy.

- Values defined for the **RUNOUT\_ADM\_OPT\_FLG** lookup field

**Note:** This prerequisite is applicable when you want to define a self-funded policy.

### Procedure

To define a policy:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Person Information** and then click **Policy**.  
A sub-menu appears.
3. Click the **Add** option from the **Policy** sub-menu.

The **Select Policy Type** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Policy Type	Used to indicate the policy type using which you want to create a policy.  <b>Note:</b> If you want to create a fully-insured group policy, you must select a policy type where the policy category is set to <b>Fully-Insured Group</b> or <b>Fully-Insured Individual</b> . However, if you want to create a self-funded policy, you must select a policy type where the policy category is set to <b>Self-Funded</b> .	Yes

**Tip:** Alternatively, you can access this screen by clicking the **Add** button in the **Page Title** area of the **Policy** screen.

4. Select the required policy type from the respective field.

5. Click **OK**.

The **Policy** screen appears. It contains the following sections:

- **Main** - Used to specify the basic details about the policy.
- **Persons** - Used to associate persons with the policy.
- **Characteristics** - Used to define the characteristics for the policy.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Policy Type	Indicates the policy type using which you are defining the policy.	Not applicable
Policy Number	Used to specify the policy number.	Yes
Description	Used to specify the description for the policy.	Yes
Source System	Used to indicate the external system from where the policy is originated.	Yes
	<b>Note:</b> This field appears when you are defining a policy using a policy type where the policy category is set to <b>Fully-Insured Group</b> or <b>Fully-Insured Individual</b> .	
Start Date	Used to specify the date from when the policy is effective.	Yes
	<b>Note:</b> The policy start date cannot be later than the policy end date.	
End Date	Used to specify the date till when the policy is effective.	Yes
	<b>Note:</b> The policy end date cannot be earlier than the policy start date.	
Runout End Date	Used to specify the date when the runout period of the self-funded policy ends.	No
	<b>Note:</b> The runout end date cannot be earlier than or equal to the policy end date. This field appears when you are defining a policy using a policy type where the policy category is set to <b>Self-Funded</b> .	

Field Name	Field Description	Mandatory (Yes or No)
Runout Administration Fees	<p>Used to indicate whether the administration fees must be charged when the claim transaction for the self-funded policy is processed in the runout period. The valid values are:</p> <ul style="list-style-type: none"> <li>• None</li> <li>• Percentage of Claim</li> </ul>	No
	<p><b>Note:</b></p> <p>At present, this field is used only for the informational purposes and is not considered during the billable charge creation for the claim transactions which are received in the runout period of the policy.</p> <p>This field appears when you are defining a policy using a policy type where the policy category is set to <b>Self-Funded</b>.</p>	

6. Enter the required details in the **Main** section.
7. Associate the required persons with the policy.

**Note:** While defining a policy, you must associate a person who is the main customer of the policy.

8. Define the characteristics for the policy, if required.
9. Click **Save**.

The policy is defined and its status is set to **Pending**.

### **Related Topics**

Policy screen	<a href="#">Policy (Used for Viewing)</a> on page 281
How to associate a person with a policy	<a href="#">Associating a Person with a Policy</a> on page 278
How to define a characteristic for a policy	<a href="#">Defining a Characteristic for a Policy</a> on page 280

## **Associating a Person with a Policy**

### **Prerequisites**

To associate a person with a policy, you should have:

- Required persons defined in the application
- Required policy person roles defined in the application

### **Procedure**

To associate a person with a policy:

1. Ensure that the **Persons** section is expanded when you are defining or editing a policy.

The **Persons** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Person	Used to indicate the person that you want to associate with the policy.	Yes
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Person Search</b> window appears.</p> <p>On specifying the person ID, the person name appears corresponding to the <b>Person</b> field.</p>	
Sequence	Used to specify the sequence number for the associated person.	Yes
Policy Person Role	Used to indicate the role of a person in the policy.	Yes
Main Customer	Used to indicate whether the person is the main customer of the policy.	Yes (Conditional)
	<p><b>Note:</b> At a time, only one person can be the main customer of the policy.</p>	
Start Date	Used to specify the date from when the person is associated with the policy.	Yes
	<p><b>Note:</b></p> <p>The start date cannot be later than the end date.</p> <p>The start date cannot be earlier than the policy start date and later than the policy end date.</p>	
End Date	Used to specify the date till when the person is associated with the policy.	No
	<p><b>Note:</b></p> <p>The end date cannot be earlier than the start date.</p> <p>The end date cannot be earlier than the policy start date and later than the policy end date. This validation is done when the policy is transition to the status which is not specified in the <b>Skip Status for Policy Person End Date Validation</b> parameter of the <b>C1-POLBOVAL</b> algorithm. For example, if you set the <b>Skip Status for Policy Person End Date Validation</b> parameter of the <b>C1-POLBOVAL</b> algorithm to <b>TERMINATED</b>, the system will not perform this validation when the status of the policy is changed to <b>Terminated</b>.</p>	

2. Enter the required details in the **Persons** section.

**Note:** While associating the persons with a policy, you must always ensure that one person is the main customer of the policy.

- If you want to associate more than one person with the policy, click the **Add (+)** icon and then repeat step 2.

**Note:** However, if you want to dissociate a person from the policy, click the **Delete (🗑)** icon corresponding to the person.

- Click **Save**.

The persons are associated with the policy.

## Defining a Characteristic for a Policy

### Prerequisites

To define a characteristic for a policy, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Policy**)

### Procedure

To define a characteristic for a policy:

- Ensure that the **Characteristics** section is expanded when you are defining or editing a policy.

The **Characteristics** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the policy.	Yes (Conditional)
	<b>Note:</b> The effective date cannot be earlier than the policy start date and later than the policy end date.	<b>Note:</b> This field is required when you are defining a characteristic for the policy.
Characteristic Type	Used to indicate the characteristic type.	Yes (Conditional)
	<b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Policy</b> .	<b>Note:</b> This field is required when you are defining a characteristic for the policy.

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional)
	<p><b>Note:</b></p> <p>If you select a predefined characteristic type, the <b>Search</b> (🔍) icon appears corresponding to the <b>Characteristic Value</b> field. On clicking the <b>Search</b> icon, the <b>Predefined Characteristic Search</b> window appears.</p> <p>On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.</p>	<p><b>Note:</b> This field is required when you are defining a characteristic for the policy.</p>

- Enter the required details in the **Characteristics** section.
- If you want to define more than one characteristic for the policy, click the **Add** (+) icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from the policy, click the **Delete** (X) icon corresponding to the characteristic.

- Click **Save**.

The characteristics are defined for the policy.

## **Policy (Used for Viewing)**

---

The **Policy** screen allows you to:

- View the details of a fully-insured group or self-funded policy
- View all the characteristics associated with the self-funded policy
- Edit the details of a fully-insured group or self-funded policy
- Activate a fully-insured group or self-funded policy
- Add or edit plans in a fully-insured group policy
- Add memberships to a fully-insured group policy plan
- Initiate the termination process for a fully-insured group policy
- Terminate a fully-insured group policy
- Initiate the cancellation process for a fully-insured group policy
- Cancel a fully-insured group policy
- Initiate the reinstatement process for a fully-insured group policy
- Reinststate a fully-insured group policy

- View the log of a fully-insured group or self-funded policy
- Add a log entry for a fully-insured group or self-funded policy

It consists of the following tabs:

- [Policy - Main](#) on page 282
- [Policy - Plan](#) on page 289
- [Policy - Log](#) on page 291

## Policy - Main

The **Main** tab displays information about the policy. It contains the following zones:

- [Policy](#) on page 282
- [Policy Characteristics](#) on page 288

## Policy

The **Policy** zone displays the details of the fully-insured group or self-funded policy. It contains the following sections:

- **Main** - Displays basic information about the policy. It contains the following fields:

Field Name	Field Description
Base Policy Information	Displays information about the base policy.
	<b>Note:</b> This field appears when you are viewing the details of a renewed policy which is created using a policy type where the policy category is set to <b>Self-Funded</b> .
Policy Information	Displays information about the policy.
Policy Type	Indicates the policy type using which the policy is created.
	<b>Note:</b> It has a link. On clicking the link, the <b>Policy Type</b> screen appears where you can view the details of the respective policy type.

Field Name	Field Description
Status	<p>Indicates the status of the policy. If the policy is created using the <b>C1-POLICY</b> business object, the valid values are:</p> <ul style="list-style-type: none"> <li>• Pending</li> <li>• In Force/Active</li> <li>• Pending Cancellation</li> <li>• Canceled</li> <li>• Pending Reinstatement</li> <li>• Reinstated</li> <li>• Pending Termination</li> <li>• Terminated</li> </ul> <p>However, if the policy is created using the <b>C1-ASOPolicy</b> business object, the valid values are:</p> <ul style="list-style-type: none"> <li>• Pending</li> <li>• In Force/Active</li> <li>• Runout</li> <li>• Post Runout</li> </ul>
Status Reason	<p>Indicates the reason why the policy is terminated.</p> <p><b>Note:</b></p> <p>It has a link. On clicking the link, the <b>Status Reason</b> screen appears where you can view the details of the respective termination reason.</p> <p>This field appears when you are viewing the details of a terminated or reinstated policy which is created using a policy type where the policy category is set to <b>Fully-Insured Group</b> or <b>Fully-Insured Individual</b>.</p>
Policy Number	Displays the policy number.
Description	Displays the description of the policy.
Source System	Indicates the external system from where the policy is originated.
Start Date	Displays the date from when the policy is effective.
End Date	Displays the date till when the policy is effective.
Renewal Date	<p>Displays the date when the policy is renewed.</p> <p><b>Note:</b> This field appears when you are viewing the details of a policy which is renewed.</p>

Field Name	Field Description																														
Paid Through Date	Indicates the term end date of the last fully or partially paid term. The system considers the term to be fully paid when the threshold limit is met.																														
	<p><b>Note:</b></p> <p>This field appears when the following conditions are met:</p> <ul style="list-style-type: none"> <li>When you are viewing the details of a policy which is created using a policy type where the policy category is set to <b>Fully-Insured Group</b> or <b>Fully-Insured Individual</b>.</li> <li>When the paid through date is calculated at the policy level.</li> </ul>																														
	The paid through date is calculated while freezing or canceling a payment or adjustment depending on whether the required algorithm is attached to the respective system event:																														
	<table border="1"> <thead> <tr> <th>Entity</th> <th>System Event</th> <th>Algorithm</th> </tr> </thead> <tbody> <tr> <td>Customer Class</td> <td>Payment Freeze</td> <td>C1-PSPTDCAL</td> </tr> <tr> <td>Customer Class</td> <td>Payment Cancellation</td> <td>C1-PXPTDCAL</td> </tr> <tr> <td>Adjustment Type</td> <td>Adjustment Freeze</td> <td>C1-ADPTDCAL</td> </tr> <tr> <td>Adjustment Type</td> <td>Adjustment Cancellation</td> <td>C1-AXPTDCAL</td> </tr> </tbody> </table>	Entity	System Event	Algorithm	Customer Class	Payment Freeze	C1-PSPTDCAL	Customer Class	Payment Cancellation	C1-PXPTDCAL	Adjustment Type	Adjustment Freeze	C1-ADPTDCAL	Adjustment Type	Adjustment Cancellation	C1-AXPTDCAL															
	Entity	System Event	Algorithm																												
Customer Class	Payment Freeze	C1-PSPTDCAL																													
Customer Class	Payment Cancellation	C1-PXPTDCAL																													
Adjustment Type	Adjustment Freeze	C1-ADPTDCAL																													
Adjustment Type	Adjustment Cancellation	C1-AXPTDCAL																													
The following table indicates when the paid through date is calculated at the policy and/or membership level:																															
	<table border="1"> <thead> <tr> <th>If the Paid Through Date Calculation Level parameter is set to...</th> <th>If the following characteristics are defined for the billable charge or adjustment...</th> <th>Then...</th> </tr> </thead> <tbody> <tr> <td>P</td> <td>C1-POLID</td> <td>Paid through date is calculated at the policy level</td> </tr> <tr> <td>P</td> <td>C1-MPID</td> <td>Paid through date is calculated at the policy level</td> </tr> <tr> <td>P</td> <td>C1-POLID and C1-MPID</td> <td>Paid through date is calculated at the policy level</td> </tr> <tr> <td>M</td> <td>C1-POLID</td> <td>Paid through date is not calculated at the membership level</td> </tr> <tr> <td>M</td> <td>C1-MPID</td> <td>Paid through date is calculated at the membership level</td> </tr> <tr> <td>M</td> <td>C1-POLID and C1-MPID</td> <td>Paid through date is calculated at the membership level</td> </tr> <tr> <td>P, M</td> <td>C1-POLID</td> <td>Paid through date is calculated at the policy level</td> </tr> <tr> <td>P, M</td> <td>C1-MPID</td> <td>Paid through date is calculated at both the policy and membership levels</td> </tr> <tr> <td>P, M</td> <td>C1-POLID and C1-MPID</td> <td>Paid through date is calculated at both the policy and membership levels</td> </tr> </tbody> </table>	If the Paid Through Date Calculation Level parameter is set to... Field Name	Field Description
Runout End Date	Displays the date when the runout period of the self-funded policy ends.
	<b>Note:</b> This field appears when you are viewing the details of a policy which is created using a policy type where the policy category is set to <b>Self-Funded</b> .
Runout Administration Fees	Indicates whether the administration fees must be charged when the claim transaction for the self-funded policy is processed in the runout period. The valid values are: <ul style="list-style-type: none"> <li>• None</li> <li>• Percentage of Claim</li> </ul>
	<b>Note:</b> This field appears when you are viewing the details of a policy which is created using a policy type where the policy category is set to <b>Self-Funded</b> .

- **Persons** - Lists the persons which are associated with the policy. It contains the following columns:

Column Name	Column Description
Person Information	Indicates the person who is associated with the policy. In addition, this column has a context menu which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Person</b> screen appears where you can view the details of the respective person.
Sequence	Displays the sequence number of the associated person.
Policy Person Role	Indicates the role of the person in the policy.
Main Customer	Indicates whether the person is the main customer of the policy.
Start Date	Displays the date from when the person is associated with the policy.
End Date	Displays the date till when the person is associated with the policy.

- **Record Actions** - This section contains the following buttons:

Button Name	Button Description						
Edit	Used to edit the details of the fully-insured group or self-funded policy.						
	<p><b>Note:</b></p> <p>The <b>Edit</b> button appears only when a policy of the respective category is in either of the following status:</p>						
	<table border="1"> <thead> <tr> <th data-bbox="521 401 907 453">Policy Category</th> <th data-bbox="907 401 1464 453">Status</th> </tr> </thead> <tbody> <tr> <td data-bbox="521 453 907 804">Fully-Insured Group or Fully-Insured Individual</td> <td data-bbox="907 453 1464 804"> <ul style="list-style-type: none"> <li>• In Force/Active</li> <li>• Canceled</li> <li>• Pending Cancellation</li> <li>• Pending</li> <li>• Pending Reinstatement</li> <li>• Pending Termination</li> <li>• Terminated</li> </ul> </td> </tr> <tr> <td data-bbox="521 804 907 968">Self-Funded</td> <td data-bbox="907 804 1464 968"> <ul style="list-style-type: none"> <li>• In Force/Active</li> <li>• Pending</li> <li>• Runout</li> </ul> </td> </tr> </tbody> </table>	Policy Category	Status	Fully-Insured Group or Fully-Insured Individual	<ul style="list-style-type: none"> <li>• In Force/Active</li> <li>• Canceled</li> <li>• Pending Cancellation</li> <li>• Pending</li> <li>• Pending Reinstatement</li> <li>• Pending Termination</li> <li>• Terminated</li> </ul>	Self-Funded	<ul style="list-style-type: none"> <li>• In Force/Active</li> <li>• Pending</li> <li>• Runout</li> </ul>
	Policy Category	Status					
Fully-Insured Group or Fully-Insured Individual	<ul style="list-style-type: none"> <li>• In Force/Active</li> <li>• Canceled</li> <li>• Pending Cancellation</li> <li>• Pending</li> <li>• Pending Reinstatement</li> <li>• Pending Termination</li> <li>• Terminated</li> </ul>						
Self-Funded	<ul style="list-style-type: none"> <li>• In Force/Active</li> <li>• Pending</li> <li>• Runout</li> </ul>						
Activate	Used to activate the fully-insured group or self-funded policy.						
	<p><b>Note:</b></p> <p>The <b>Activate</b> button appears when a policy of the respective category is in either of the following status:</p>						
	<table border="1"> <thead> <tr> <th data-bbox="521 1213 954 1266">Policy Category</th> <th data-bbox="954 1213 1464 1266">Status</th> </tr> </thead> <tbody> <tr> <td data-bbox="521 1266 954 1381">Fully-Insured Group or Fully-Insured Individual</td> <td data-bbox="954 1266 1464 1381"> <ul style="list-style-type: none"> <li>• Pending</li> <li>• Pending Termination</li> </ul> </td> </tr> <tr> <td data-bbox="521 1381 954 1451">Self-Funded</td> <td data-bbox="954 1381 1464 1451"> <ul style="list-style-type: none"> <li>• Pending</li> </ul> </td> </tr> </tbody> </table>	Policy Category	Status	Fully-Insured Group or Fully-Insured Individual	<ul style="list-style-type: none"> <li>• Pending</li> <li>• Pending Termination</li> </ul>	Self-Funded	<ul style="list-style-type: none"> <li>• Pending</li> </ul>
	Policy Category	Status					
Fully-Insured Group or Fully-Insured Individual	<ul style="list-style-type: none"> <li>• Pending</li> <li>• Pending Termination</li> </ul>						
Self-Funded	<ul style="list-style-type: none"> <li>• Pending</li> </ul>						
Initiate Cancellation	<p>Used to initiate the cancellation process for the fully-insured group policy.</p> <p><b>Note:</b> The <b>Initiate Cancellation</b> button appears when the fully-insured group policy is in the <b>In Force/Active</b> status.</p>						
Cancel	<p>Used to cancel the fully-insured group policy.</p> <p><b>Note:</b> The <b>Cancel</b> button appears when the fully-insured group policy is in the <b>Pending Cancellation</b> status.</p>						

Button Name	Button Description
Initiate Termination	Used to initiate the termination process for the fully-insured group policy.
	<b>Note:</b> The <b>Initiate Termination</b> button appears when the fully-insured group policy is in the <b>In Force/Active</b> status.
Terminate	Used to terminate the fully-insured group policy.
	<b>Note:</b> The <b>Terminate</b> button appears when the fully-insured group policy is in the <b>In Force/Active, Pending Reinstatement, or Pending Termination</b> status.
Initiate Reinstatement	Used to initiate the reinstatement process for the terminated policy.
	<b>Note:</b> The <b>Initiate Reinstatement</b> button appears when the fully-insured group policy is in the <b>Terminated</b> status.
Reinstate	Used to reinstate the terminated policy.
	<b>Note:</b> The <b>Reinstate</b> button appears when the fully-insured group policy is in the <b>Pending Reinstatement or Terminated</b> status.
Runout	Used to transition the self-funded policy to the <b>Runout</b> status.
	<p><b>Note:</b></p> <p>The <b>Runout</b> button appears when the self-funded policy is in the <b>In Force/Active</b> status. You cannot transition a self-funded policy to the <b>Runout</b> status when:</p> <ul style="list-style-type: none"> <li>• The self-funded policy is renewed.</li> <li>• The runout end date is not specified.</li> <li>• The policy end date is earlier than the system date.</li> </ul>

- **Record Information** - This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the policy is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.
Status Date/Time	Displays the date and time when the policy status is updated.
Create Date/Time	Displays the date and time when the policy is created.

- **Termination Information** - Displays the termination details of the fully-insured group policy. It appears when the policy is in the **Pending Termination** status. It contains the following fields:

Field Name	Field Description
Terminate Date	Displays the date when you want to terminate the policy.

Field Name	Field Description
Terminate Reason	Indicates the reason why the termination process is initiated for the policy.  <b>Note:</b> It has a link. On clicking the link, the <b>Status Reason</b> screen appears where you can view the details of the respective termination reason.

- **Reinstate Information** - Displays the reinstatement details of the terminated policy. It appears when the policy is in the **Pending Reinstatement** status. It contains the following fields:

Field Name	Field Description
Reinstate Reason	Indicates the reason why you want to reinstate the fully-insured group policy.  <b>Note:</b> It has a link. On clicking the link, the <b>Status Reason</b> screen appears where you can view the details of the respective reinstatement reason.

### Policy Characteristics

The **Policy Characteristics** zone lists the characteristics of the fully-insured group or self-funded policy. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the characteristic is effective for the policy.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

Column Name	Column Description
Description	Displays the description of the characteristic value.
	<b>Note:</b> The data appears in this column when the type of characteristic value is set to <b>Predefined Value</b> .

You can filter the list using the **Effective Date** field available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** () icon in the upper right corner of this zone.

## Policy - Plan

The **Plan** tab lists the plans defined for the policy and memberships defined for each policy plan. It contains the following zones:

- [Plans](#) on page 289
- [Memberships](#) on page 290

### Plans

The **Plans** zone lists the plans which are defined in the policy. It contains the following columns:

Column Name	Column Description
Plan Information	Displays information about the policy plan. In addition, a context menu appears corresponding to this column which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Policy Plan</b> screen appears where you can view the details of the respective policy plan.
Price Item Information	Indicates the price item to which the policy plan is directly associated.
	<b>Note:</b> It has a link. On clicking the link, the <b>Price Item</b> screen appears where you can view the details of the respective price item.
Plan Number	Displays the plan number.
Plan Name	Displays the description of the policy plan.
Benefit Type	Indicates the type of health insurance plan. The valid values are: <ul style="list-style-type: none"> <li>• Commercial</li> <li>• Medicare Affiliated</li> </ul>
Start Date	Displays the date from when the policy plan is effective.
End Date	Displays the date till when the policy plan is effective.
Edit	On clicking the <b>Edit</b> (  ) icon, the <b>Plan</b> screen appears where you can edit the details of the policy plan.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can define a new policy plan by clicking the **Add** link in the upper-right corner of this zone. On clicking the **Broadcast** () icon corresponding to a policy plan, the **Memberships** zone appears.

**Note:** Ideally, you define plans in a policy which is created using a policy type where the policy category is set to **Fully-Insured Group** or **Fully-Insured Individual**.

You can filter the list using various search criteria (such as, **Price Item**, **Plan Number**, and **Effective From**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (∨) icon in the upper-right corner of this zone.

### **Memberships**

The **Memberships** zone lists the memberships which are defined for the policy plan. It contains the following columns:

<b>Column Name</b>	<b>Column Description</b>
Start Date	Displays the date from when the membership is effective.
End Date	Displays the date till when the membership is effective.
Membership Information	Displays information about the membership. <b>Note:</b> It has a link. On clicking the link, the <b>Membership</b> screen appears where you can view the details of the respective membership.
Enrolled Members	Displays the number of members who have enrolled in the policy plan.
Status	Indicates the status of the membership. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> <li>• Terminated</li> </ul>
Membership Type	Indicates the type of membership. The valid values are: <ul style="list-style-type: none"> <li>• COBRA</li> <li>• Medicare</li> </ul>
Last Billed Coverage	Indicates the last bill segment generated for the membership which is in the <b>Frozen</b> status. In addition, a context menu appears corresponding to this column which helps in navigating to other screens in application. <b>Note:</b> It has a link. On clicking the link, the <b>Bill Segment</b> screen appears where you can view the details of respective bill segment.

Column Name	Column Description
Benefits	<p>On clicking the <b>Benefits</b> () icon, the <b>Benefit</b> screen appears where you can view the Medicare benefits of the member persons who belong to the membership.</p> <p><b>Note:</b> The <b>Benefits</b> icon appears when a Medicare benefit is defined for a member person who belongs to the membership.</p>
Membership ID	Displays the membership ID.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can define a new membership by clicking the **Add** link in the upper right corner of this zone.

By default, the **Memberships** zone does not appear in the **Plan** tab. It appears when you click the **Broadcast** () icon corresponding to the policy plan in the **Plans** zone.

You can filter the list using various search criteria (such as, **External Membership ID**, **Effective From**, **Person Name**, **Effective Till**, and **Status**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** () icon in the upper right corner of this zone.

You can change the layout of this zone. For more information on how to change the layout, see [Changing the Layout](#) on page 3208

## Activating a Policy

### Procedure

To activate a policy:

1. Search for the policy in the **Policy** screen.
2. In the **Search Results** section, click the link in the **Policy Information** column corresponding to the policy that you want to activate.

The **Policy** screen appears.

3. Ensure that the **Main** tab is selected.
4. Click the **Activate** button in the **Policy** zone.

The status of the policy is changed to **In Force/Active**.

### **Note:**

The **Activate** button appears only when a policy of the respective category is in either of the following status:

Policy Category	Status
Fully-Insured Group or Fully-Insured Individual	<ul style="list-style-type: none"> <li>• Pending</li> <li>• Pending Termination</li> </ul>
Self-Funded	<ul style="list-style-type: none"> <li>• Pending</li> </ul>

## Editing a Policy

### Prerequisites

To edit a policy, you should have:

- Values defined for the **C1-SourceSystemLookup** extendable lookup

**Note:** This prerequisite is applicable only when you want to define a fully-insured group policy.

- Values defined for the **RUNOUT\_ADM\_OPT\_FLG** lookup field

**Note:** This prerequisite is applicable when you want to define a self-funded policy.

### **Procedure**

To edit a policy:

1. Search for the policy in the **Policy** screen.
2. In the **Search Results** section, click the link in the **Policy Information** column corresponding to the policy whose details you want to edit.

The **Policy** screen appears.

3. Ensure that the **Main** tab is selected.
4. Click the **Edit** button in the **Policy** zone.

The **Policy** screen appears. It contains the following sections:

- **Main** - Used to specify the basic details about the policy.
- **Persons** - Used to associate persons with the policy.
- **Characteristics** - Used to define the characteristics for the policy.

The **Main** section contains the following fields:

<b>Field Name</b>	<b>Field Description</b>	<b>Mandatory (Yes or No)</b>
Policy Information	Displays information about the policy.	Not applicable
Policy Type	Indicates the policy type using which the policy is defined.	Not applicable
Status	Indicates the status of the policy. The valid values are: <ul style="list-style-type: none"> <li>• Pending</li> <li>• In Force/Active</li> <li>• Runout</li> <li>• Post Runout</li> </ul>	Not applicable
	<b>Note:</b> This field appears when you are editing a policy which is created using a policy type where the policy category is set to <b>Self-Funded</b> .	
Policy Number	Used to specify the policy number.	Yes
Description	Used to specify the description for the policy.	Yes
Source System	Used to indicate the external system from where the policy is originated.	Yes
	<b>Note:</b> This field appears when you are editing a policy which is created using a policy type where the policy category is set to <b>Fully-Insured Group</b> or <b>Fully-Insured Individual</b> .	

Field Name	Field Description	Mandatory (Yes or No)
Start Date	Used to specify the date from when the policy is effective.	Yes
	<p><b>Note:</b></p> <p>The policy start date cannot be later than the policy end date.</p> <p>You cannot change the start date of a self-funded policy when it is in the <b>In Force/Active</b>, <b>Runout</b>, or <b>Post Runout</b> status.</p>	
End Date	Used to specify the date till when the policy is effective.	Yes
	<p><b>Note:</b></p> <p>The policy end date cannot be earlier than the policy start date.</p> <p>You cannot change the end date when the self-funded policy is in the <b>Runout</b> status.</p> <p>You cannot set the end date of a self-funded policy to a date which is later than or equal to the start date of a pricing rule which is defined for the <b>Runout</b> status.</p> <p>You cannot change the end date when the policy is renewed.</p>	
Runout End Date	Used to specify the date when the runout period of the self-funded policy ends.	No
	<p><b>Note:</b></p> <p>This field appears when you are editing a policy which is created using a policy type where the policy category is set to <b>Self-Funded</b>.</p> <p>The runout end date cannot be earlier than or equal to the policy end date.</p> <p>The runout end date cannot be earlier than or equal to the system date when the policy is in the <b>Runout</b> status.</p> <p>You cannot remove the runout end date when the policy is in the <b>Runout</b> or <b>Post Runout</b> status.</p> <p>You cannot set the runout end date to a date which is later than or equal to the start date of a pricing rule which is defined for the <b>Post Runout</b> status.</p> <p>You cannot set the runout end date to a date which is earlier than the end date of a pricing rule which is defined for the <b>Runout</b> status.</p>	

Field Name	Field Description	Mandatory (Yes or No)
Runout Administration Fees	<p>Used to indicate whether the administration fees must be charged when the claim transaction for the self-funded policy is processed in the runout period. The valid values are:</p> <ul style="list-style-type: none"> <li>• None</li> <li>• Percentage of Claim</li> </ul> <p><b>Note:</b></p> <p>At present, this field is used only for the informational purposes and is not considered during the billable charge creation for the claim transactions which are received in the runout period of the policy.</p> <p>This field appears when you are editing a policy which is created using a policy type where the policy category is set to <b>Self-Funded</b>.</p>	No

<b>Note:</b>	
The <b>Edit</b> button appears when a policy of the respective category is in either of the following status:	
Policy Category	Status
Fully-Insured Group or Fully-Insured Individual	<ul style="list-style-type: none"> <li>• In Force/Active</li> <li>• Canceled</li> <li>• Pending Cancellation</li> <li>• Pending</li> <li>• Pending Reinstatement</li> <li>• Pending Termination</li> <li>• Terminated</li> </ul>
Self-Funded	<ul style="list-style-type: none"> <li>• In Force/Active</li> <li>• Pending</li> <li>• Runout</li> </ul>

5. Modify the required details in the **Main** section.
6. Associate the persons with the policy, if required.

**Note:** While editing a policy, you must ensure that one person is associated as the main customer of the policy.

7. Define, edit, or remove characteristics of the policy, if required.
8. Click **Save**.

The changes made to the policy are saved.

## **Initiating the Termination Process for a Fully-Insured Group Policy**

### **Prerequisites**

To initiate the termination process for a fully-insured group policy, you should have:

- Reasons defined for the **Terminated** status of the **C1-POLICY** business object in the **Status Reason** screen

### **Procedure**

To initiate the termination process for a fully-insured group policy:

1. Search for the fully-insured group policy in the **Policy** screen.
2. In the **Search Results** section, click the link in the **Policy Information** column corresponding to the policy for which you want to initiate the termination process.

The **Policy** screen appears.

3. Ensure that the **Main** tab is selected.
4. Click the **Initiate Termination** button in the **Policy** zone.

The **Termination Information** window appears. It contains the following fields:

<b>Field Name</b>	<b>Field Description</b>	<b>Mandatory (Yes or No)</b>
Terminate Reason	Used to indicate the reason why you want to initiate the termination process for the fully-insured group policy.	Yes
Terminate Date	Used to specify the date when you want to terminate the policy.	Yes
	<b>Note:</b> The terminate date cannot be earlier than the policy start date or later than the policy end date.	

**Note:** The **Initiate Termination** button appears when the fully-insured group policy is in the **In Force/Active** status.

5. Enter the required details in the **Termination Information** window.
6. Click **Save**.

The status of the fully-insured group policy is changed to **Pending Termination**.

## Defining a Plan for a Fully-Insured Group Policy

### Prerequisites

To define a plan for a fully-insured group policy, you should have:

- Policy plan business objects defined in the application
- Price items defined in the application

### Procedure

To define a plan for a fully-insured group policy:

1. Search for the fully-insured group policy in the **Policy** screen.
2. In the **Search Results** section, click the link in the **Policy Information** column corresponding to the policy for which you want to define a plan.

The **Policy** screen appears.

3. Click the **Plan** tab.

The **Plan** tab appears.

4. Click the **Add** link in the upper right corner of the **Plans** zone.

The **Select Business Object** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Policy Plan Business Object	Used to indicate the business object using which you want to create a plan for a fully-insured group policy.	Yes

**Tip:** Alternatively, you can access this screen by clicking the **Add** link in the upper right corner of the **Policy Plan** zone in the **Policy Plan** screen.

**Note:** The **Select Business Object** screen appears when there are multiple policy plan business objects defined in the application. If there is only one policy plan business object defined in the application, the **Plan** screen appears.

5. Select the required policy plan business object from the respective field.
6. Click **OK**.

The **Policy Plan** screen appears. It contains the following sections:

- **Main** - Used to specify the basic details about the policy plan.
- **Pricing Rule Types** - Used to associate the pricing rule types with the policy plan.
- **Proration Rules** - Used to define the proration rules for the policy plan.
- **Characteristics** - Used to define the characteristics for the policy plan.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Policy Information	Indicates the fully-insured group policy for which you want to create the policy plan.	Not applicable
Price Item	Used to indicate the price item which you want to directly associate with the policy plan.	Yes (Conditional)
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Price Item Search</b> window appears.</p> <p>On specifying the price item, the description of the price item appears corresponding to the <b>Price Item</b> field.</p>	<p><b>Note:</b> You must either specify the price item or associate at least one pricing rule type with the policy plan.</p>
Plan Number	Used to specify the plan number.	Yes
Plan Name	Used to specify the description for the policy plan.	No
Benefit Type	Used to indicate the type of health insurance plan. The valid values are: <ul style="list-style-type: none"> <li>• Commercial</li> <li>• Medicare Affiliated</li> </ul>	No
Start Date	Used to specify the date from when the policy plan is effective.	Yes
	<p><b>Note:</b></p> <p>The policy plan start date cannot be earlier than the policy start date and later than the policy end date.</p> <p>The policy plan start date cannot be later than the policy plan end date.</p>	
End Date	Used to specify the date till when the policy plan is effective.	No
	<p><b>Note:</b></p> <p>The policy plan end date cannot be earlier than the policy start date and later than the policy end date.</p> <p>The policy plan end date cannot be earlier than the policy plan start date.</p>	

7. Enter the required details in the **Main** section.
8. Associate the pricing rule types with the fully-insured group policy plan, if required.

**Note:** You must associate at least one pricing rule type with the policy plan when the price item is not specified in the fully-insured group policy plan.

9. Define the proration rules for the fully-insured group policy plan, if required.
10. Define the characteristics for the fully-insured group policy plan, if required.

**11. Click Save.**

The plan is defined for the fully-insured group policy.

**Defining a Proration Rule for a Fully-Insured Group Policy Plan****Procedure**

To define a proration rule for a fully-insured group policy plan:

1. Ensure that the **Proration Rules** section is expanded when you are defining or editing a fully-insured group policy plan.

The **Proration Rules** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the proration rule is effective for the policy plan.	Yes (Conditional)
	<p><b>Note:</b></p> <p>The system considers the latest proration rule and not the effective proration rule while prorating the membership premium.</p> <p>The effective date cannot be earlier than the plan start date and later than the plan end date.</p>	<p><b>Note:</b> This field is required when you are defining a proration rule for the policy plan.</p>

Field Name	Field Description	Mandatory (Yes or No)
Proration Event Type	Used to indicate the event when you want to prorate the membership premium. The valid values are: <ul style="list-style-type: none"> <li>• <b>Enrollment</b> – Used when you want to prorate the membership premium on enrolling a member person.</li> <li>• <b>Termination</b> - Used when you want to prorate the membership premium on terminating a member person.</li> <li>• <b>New Born</b> - Used when you want to prorate the membership premium on enrolling a new born.</li> <li>• <b>Same Month Enrollment and Termination</b> - Used when you want to prorate the membership premium on enrolling and terminating a member person in the same month.</li> </ul>	Yes (Conditional)
		<b>Note:</b> This field is required when you are defining a proration rule for the policy plan.

Field Name	Field Description	Mandatory (Yes or No)
Proration Type	<p>Used to indicate how you want to prorate the membership premium. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Daily</b> – Used when you want to prorate the membership premium from the day the proration event has occurred.</li> <li>• <b>Mid-Month</b> – Used when you want to prorate the membership premium based on the proration date. The system calculates the proration date using the following formula:  <div style="border: 1px solid black; padding: 2px; margin: 5px 0;"> <math display="block">\text{Bill Period Start Date} + \text{Specified Number of Days}</math> </div>                     For example, if the bill period start date is 1<sup>st</sup> of every month and number of days is 15, then the proration date would be 15<sup>th</sup> of every month. If a member person is enrolled to the membership on or before the proration date, the system will charge the premium for the member person. However, if a member person is enrolled to the membership after the proration date, the system will not charge the premium for the member person. And, if a member person is terminated from the membership on or after the proration date, the system will charge the premium for the member person. However, if a member person is terminated from the membership before the proration date, the system will not charge the premium for the member person.</li> <li>• <b>Full Month</b> – Used when the premium for a member person should be charged when the member person is enrolled or terminated on the coverage start date or coverage end date, respectively. If a member person is enrolled or terminated within the coverage period, the system will not charge the premium for the member person.</li> <li>• <b>Waiver</b> – Used when the premium for a member person should be waived off completely for the month when the member person is enrolled or terminated from the membership.</li> <li>• <b>Coverage Days</b> – Used when you want to prorate the premium for a member person based on the coverage days. If a member person is covered in the membership for a period less than the specified number of days, the system will not charge the premium for the member person. However, if a member person is covered in the membership for a period equal to or more than the specified number of days, the system will charge the premium for the member person.</li> </ul> <div style="border: 1px solid black; padding: 5px; margin: 10px 0;"> <p><b>Note:</b> You can use this proration type when the proration event is set to <b>Same Month Enrollment and Termination</b>.</p> </div> <ul style="list-style-type: none"> <li>• <b>Enrollment</b> – Used when you want to prorate the premium for a member person using the proration type of the enrollment event.</li> </ul>	<p>Yes (Conditional)</p> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> This field is required when you are defining a proration rule for the policy plan.</p> </div>

Field Name	Field Description	Mandatory (Yes or No)
Number of Days	Used to specify the number of days to determine the cutoff date.	Yes (Conditional)
		<b>Note:</b> This field is required when the proration type is set to <b>Mid-Month</b> or <b>Coverage Days</b> .

- Enter the required details in the **Proration Rules** section.
- If you want to define more than one proration rule for the fully-insured group policy plan, click the **Add (+)** icon and then repeat step 2.

**Note:** However, if you want to remove a proration rule of the fully-insured group policy plan, click the **Delete (x)** icon corresponding to the proration rule.

- Click **Save**.

The proration rules are defined for the fully-insured group policy plan.

## Associating a Pricing Rule Type with a Fully-Insured Group Policy Plan

You can define a pricing rule using a pricing rule type for a fully-insured group policy plan when the pricing rule type is associated with the fully-insured group policy plan. You can associate a pricing rule type with a fully-insured group policy plan either from the user interface or through a health care inbound message.

#### Prerequisites

To associate a pricing rule type with a fully-insured group policy plan, you should have:

- Pricing rule types defined in the application (where the pricing rule type category is set to **Age Based**, **Tier Based**, or **Pass-Through Billable Charge**)

#### Procedure

To associate a pricing rule type with a fully-insured group policy plan:

- Ensure that the **Pricing Rule Types** section is expanded when you are defining or editing a fully-insured group policy plan. The **Pricing Rule Types** section contains the following field in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Pricing Rule Type	Used to indicate the pricing rule type that you want to associate with the fully-insured group policy plan.	Yes (Conditional)
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Pricing Rule Type Search</b> window appears.</p> <p>On specifying the pricing rule type, the description of the pricing rule type appears corresponding to the <b>Pricing Rule Type</b> field.</p> <p>Here, you can only specify a pricing rule type where the pricing rule type category is set to <b>Age Based</b>, <b>Tier Based</b>, or <b>Pass-Through Billable Charge</b>.</p>	<p><b>Note:</b> You must either specify the price item or associate at least one pricing rule type with the policy plan.</p>

- Enter the required details in the **Pricing Rule Types** section.
- If you want to associate more than one pricing rule type with the fully-insured group policy plan, click the **Add** (+) icon and then repeat step 2.

**Note:** However, if you want to dissociate a pricing rule type from the fully-insured group policy plan, click the **Delete** (🗑) icon corresponding to the pricing rule type.

- Click **Save**.

The pricing rule types are associated with the fully-insured group policy plan.

## **Defining a Characteristic for a Fully-Insured Group Policy Plan**

### **Prerequisites**

To define a characteristic for a fully-insured group policy plan, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Policy Plan**).

### **Procedure**

To define a characteristic for a fully-insured group policy plan:

- Ensure that the **Characteristics** section is expanded when you are defining or editing a fully-insured group policy plan.

The **Characteristics** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the fully-insured group policy plan.	Yes (Conditional)
	<b>Note:</b> The effective date cannot be earlier than the policy plan start date and later than the policy plan end date.	<b>Note:</b> This field is required when you are defining a characteristic for the fully-insured group policy plan.
Characteristic Type	Used to indicate the characteristic type.	Yes (Conditional)
	<b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Policy Plan</b> .	<b>Note:</b> This field is required when you are defining a characteristic for the fully-insured group policy plan.
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional)
	<p><b>Note:</b></p> <p>If you select a predefined characteristic type, the <b>Search</b> (🔍) icon appears corresponding to the <b>Characteristic Value</b> field. On clicking the <b>Search</b> icon, the <b>Predefined Characteristic Search</b> window appears.</p> <p>On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.</p>	<b>Note:</b> This field is required when you are defining a characteristic for the fully-insured group policy plan.

- Enter the required details in the **Characteristics** section.
- If you want to define more than one characteristic for the fully-insured group policy plan, click the **Add** (+) icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from the fully-insured group policy plan, click the **Delete** (🗑️) icon corresponding to the characteristic.

- Click **Save**.

The characteristics are defined for the fully-insured group policy plan.

How to edit a plan of a fully-insured group policy	<a href="#">Editing a Plan of a Fully-Insured Group Policy</a> on page 310

## **Editing a Plan of a Fully-Insured Group Policy**

### **Prerequisites**

To edit a plan of a fully-insured group policy, you should have:

- Price items defined in the application

**Procedure**

To edit a plan of a fully-insured group policy:

1. Search for the fully-insured group policy in the **Policy** screen.
2. In the **Search Results** section, click the link in the **Policy Information** column corresponding to the policy whose details you want to edit.

The **Policy** screen appears.

3. Click the **Plan** tab.

The **Plan** tab appears.

4. In the **Plans** zone, click the **Edit** (✎) icon in the **Edit** column corresponding to the policy plan whose details you want to edit.

The **Policy Plan** screen appears. It contains the following sections:

- **Main** - Used to specify the basic details about the fully-insured group policy plan.
- **Pricing Rule Types** - Used to associate the pricing rule types with the fully-insured group policy plan.
- **Proration Rules** - Used to define the proration rules for the fully-insured group policy plan.
- **Characteristics** - Used to define the characteristics for the fully-insured group policy plan.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Plan Information	Displays information about the fully-insured group policy plan.	Not applicable
Policy Information	Indicates the fully-insured group policy for which the policy plan is created.	Not applicable
Price Item	Used to indicate the price item which you want to directly associate with the fully-insured group policy plan.  <b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Price Item Search</b> window appears. On specifying the price item, the description of the price item appears corresponding to the <b>Price Item</b> field.	Yes (Conditional)  <b>Note:</b> You must either specify the price item or associate at least one pricing rule type with the policy plan.
Plan Number	Used to specify the plan number.	Yes
Plan Name	Used to specify the description for the fully-insured group policy plan.	No
Benefit Type	Used to indicate the type of health insurance plan. The valid values are: <ul style="list-style-type: none"> <li>• Commercial</li> <li>• Medicare Affiliated</li> </ul>	No

Field Name	Field Description	Mandatory (Yes or No)
Start Date	Used to specify the date from when the fully-insured group policy plan is effective.	Yes
	<b>Note:</b> The fully-insured group policy plan start date cannot be earlier than the policy start date and later than the policy end date. The fully-insured group policy plan start date cannot be later than the policy plan end date.	
End Date	Used to specify the date till when the fully-insured group policy plan is effective.	No
	<b>Note:</b> The fully-insured group policy plan end date cannot be earlier than the policy start date and later than the policy end date. The fully-insured group policy plan end date cannot be earlier than the policy plan start date.	

**Tip:** Alternatively, you can edit the details of a fully-insured group policy plan by clicking the **Edit** button in the **Policy Plan** zone of the **Policy Plan** screen.

- Modify the required details in the **Main** section.
- Associate the pricing rule types with the fully-insured group policy plan, if required.

**Note:** You must associate at least one pricing rule type with the policy plan when the price item is not specified in the fully-insured group policy plan.

- Define, edit, or remove the proration rules of the fully-insured group policy plan, if required.
- Define, edit, or remove characteristics of the fully-insured group policy plan, if required.
- Click **Save**.

The changes made to the fully-insured group policy plan are saved.

## Policy Plan (Used for Viewing)

The **Policy Plan** screen allows you to:

- View the details of a fully-insured group policy plan
- View the characteristics of a fully-insured group policy plan
- Add and edit a fully-insured group policy plan
- Add a membership to a fully-insured group policy plan

It contains the following zones:

- [Policy Plan](#) on page 314
- [Plan Characteristics](#) on page 316
- [Memberships](#) on page 290

### Policy Plan

The **Policy Plan** zone displays the details of the policy plan. It contains the following sections:

- Main** - Displays the basic information about the policy plan. It contains the following fields:

Field Name	Field Description
Plan Information	Displays information about the policy plan.
Policy Information	Displays information about the policy. <b>Note:</b> It has a link. On clicking the link, the <b>Policy</b> screen appears where you can view the details of the respective policy.
Price Item Information	Indicates the price item to which the policy plan is directly associated. <b>Note:</b> It has a link. On clicking the link, the <b>Price Item</b> screen appears where you can view the details of the respective price item.
Plan Number	Displays the plan number.
Plan Name	Displays the description of the policy plan.

Field Name	Field Description
Benefit Type	Indicates the type of health insurance plan. The valid values are: <ul style="list-style-type: none"> <li>• Commercial</li> <li>• Medicare Affiliated</li> </ul>
	<b>Note:</b> This field appears when the benefit type is set to <b>COBRA</b> or <b>Medicare Affiliated</b> .
Start Date	Displays the date from when the policy plan is effective.
End Date	Displays the date till when the policy plan is effective.

- **Pricing Rule Types** - Lists the pricing rule types which are associated with the policy plan. It contains the following column:

Column Name	Column Description
Pricing Rule Type	Indicates the pricing rule type which is associated with the policy plan.
	<b>Note:</b> It has a link. On clicking the link, the <b>Pricing Rule Type</b> screen appears where you can view the details of the respective pricing rule type.

- **Record Actions** - This section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the policy plan.

- **Record Information** - This section contains the following field:

Field Name	Field Description
Business Object	Indicates the business object using which the policy plan is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.

- **Proration Rules** - Lists the proration rules defined for the policy plan. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the proration rule is effective for the policy plan.
Proration Event Type	Indicates the event when the membership premium should be prorated. The valid values are: <ul style="list-style-type: none"> <li>• Enrollment</li> <li>• Termination</li> <li>• New Born</li> <li>• Same Month Enrollment and Termination</li> </ul>

Column Name	Column Description
Proration Type	Indicates how the membership premium should be prorated. The valid values are: <ul style="list-style-type: none"> <li>• Daily</li> <li>• Mid-Month</li> <li>• Full Month</li> <li>• Waiver</li> <li>• Coverage Days</li> <li>• Enrollment</li> <li>• Termination</li> </ul>
Number of Days	Displays the number of days using which the cutoff date is calculated.
	<b>Note:</b> The data appears in this column when the proration type is set to <b>Mid-Month</b> or <b>Coverage Days</b> .

You can define a new policy plan by clicking the **Add** link in the upper right corner of this zone.

## **Plan Characteristics**

The **Plan Characteristics** zone lists the characteristics of the fully-insured group policy plan. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the characteristic is effective for the policy plan.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.
Description	Displays the description of the characteristic value.
	<b>Note:</b> The data appears in this column when the type of characteristic value is set to <b>Predefined Value</b> .

You can filter the list using the **Effective Date** field available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (  ) icon in the upper right corner of this zone.

## **Memberships**

The **Memberships** zone lists the memberships which are defined for the policy plan. It contains the following columns:

Column Name	Column Description
Start Date	Displays the date from when the membership is effective.
End Date	Displays the date till when the membership is effective.
Membership Information	Displays information about the membership.
	<b>Note:</b> It has a link. On clicking the link, the <b>Membership</b> screen appears where you can view the details of the respective membership.
Enrolled Members	Displays the number of members who have enrolled in the policy plan.
Status	Indicates the status of the membership. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> <li>• Terminated</li> </ul>
Membership Type	Indicates the type of membership. The valid values are: <ul style="list-style-type: none"> <li>• COBRA</li> <li>• Medicare</li> </ul>
Last Billed Coverage	Indicates the last bill segment generated for the membership which is in the <b>Frozen</b> status. In addition, a context menu appears corresponding to this column which helps in navigating to other screens in application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Bill Segment</b> screen appears where you can view the details of respective bill segment.
Benefits	On clicking the <b>Benefits</b> (  ) icon, the <b>Benefit</b> screen appears where you can view the Medicare benefits of the member persons who belong to the membership.
	<b>Note:</b> The <b>Benefits</b> icon appears when a Medicare benefit is defined for a member person who belongs to the membership.
Membership ID	Displays the membership ID.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can define a new membership by clicking the **Add** link in the upper right corner of this zone.

By default, the **Memberships** zone does not appear in the **Plan** tab. It appears when you click the **Broadcast** () icon corresponding to the policy plan in the **Plans** zone.

You can filter the list using various search criteria (such as, **External Membership ID**, **Effective From**, **Person Name**, **Effective Till**, and **Status**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** () icon in the upper right corner of this zone.

You can change the layout of this zone. For more information on how to change the layout, see [Changing the Layout](#) on page 3208

How to view the details of a membership	<a href="#">Viewing the Membership Details</a> on page 324

## Searching for a Membership

### Prerequisites

To search for a membership, you should have:

- Price items and person identifier types defined in the application

- Contract relationship types defined in the application
- Characteristic types defined in the application (where the characteristic entity is set to **Membership**)

### Procedure

To search for a membership:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Person Information** and then click **Membership**.  
A sub-menu appears.
3. Click the **Search** option from the **Membership** sub-menu  
The **Membership** screen appears.
4. Enter the search criteria in the **Search Membership** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search**.  
A list of memberships that meet the search criteria appears in the **Search Results** section.

## Defining a Membership for a Fully-Insured Group Policy Plan

### Prerequisites

To define a membership for a fully-insured group policy plan, you should have:

- Plans defined in the policy
- Persons defined in the application
- Contract relationship types defined in the application

### Procedure

To define a membership for a fully-insured group policy plan:

1. Do either of the following:

If you want to...	Then...
Define a membership for a fully-insured group policy plan from the <b>Policy</b> screen	<ol style="list-style-type: none"> <li>1. Search for the fully-insured group policy in the <b>Policy</b> screen.</li> <li>2. In the <b>Search Results</b> section, click the link in the <b>Policy Information</b> column corresponding to the policy whose details you want to edit. The <b>Policy</b> screen appears.</li> <li>3. Click the <b>Plan</b> tab. The <b>Plan</b> tab appears.</li> <li>4. In the <b>Plans</b> zone, click the <b>Broadcast</b> (📡) icon corresponding to the policy plan for which you want to define a membership. The <b>Memberships</b> zone appears.</li> <li>5. Click the <b>Add</b> link in the upper right corner of the <b>Memberships</b> zone.</li> </ol>
Define a membership for a fully-insured group policy plan from the <b>Membership</b> screen	<ol style="list-style-type: none"> <li>1. Click the <b>Menu</b> link in the <b>Application</b> toolbar. A list appears.</li> <li>2. From the <b>Main</b> menu, select <b>Person Information</b> and then click <b>Membership</b>. A sub menu appears.</li> <li>3. Click the <b>Add</b> option from the <b>Membership</b> sub-menu.</li> </ol>

The **Membership** screen appears. It contains the following sections:

- **Main** - Used to specify the basic details about the membership.
- **Characteristics** - Used to define the characteristics for the membership.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Plan ID	<p>Used to indicate the policy plan for which you want to define the membership.</p> <p><b>Note:</b></p> <p>The <b>Search</b>(🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Policy Plan Search</b> window appears.</p> <p>On specifying the policy plan, the description of the policy plan appears corresponding to the <b>Plan</b> field.</p> <p>If you navigate to the <b>Membership</b> screen from the <b>Policy</b> screen, the data automatically appears in this field. You can change the plan, if required.</p>	Yes
Start Date	<p>Used to specify the date from when the membership is effective for a fully-insured group policy plan.</p> <p><b>Note:</b></p> <p>The membership start date cannot be later than the membership end date.</p> <p>The membership start date cannot be earlier than the policy plan start date or later than policy plan end date.</p>	Yes
End Date	<p>Used to specify the date till when the membership is effective for a fully-insured group policy plan.</p> <p><b>Note:</b></p> <p>The membership end date cannot be earlier than the membership start date.</p> <p>The membership end date cannot be earlier than the policy plan start date or later than policy plan end date.</p>	Yes
Membership Type	<p>Used to indicate the type of membership. The valid values are:</p> <ul style="list-style-type: none"> <li>• COBRA</li> <li>• Medicare</li> </ul> <p><b>Note:</b> If you want to define an active employee coverage membership, you must leave this field blank.</p>	No

Field Name	Field Description	Mandatory (Yes or No)
Main Subscriber	Used to indicate the person who is the main subscriber of the membership.	Yes
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Person Search</b> window appears. On specifying the person, the description of the person appears corresponding to the <b>Main Subscriber</b> field.	
Relationship Type	Used to indicate how the main subscriber is related to the membership.	Yes
External Membership ID	Used to specify the external membership ID.	No
	<b>Note:</b> Here, you need to specify a membership ID which is maintained in the external source system.	

**Tip:** Alternatively, you can access this screen by clicking the **Add** button in the **Page Title** area of the **Membership** screen.

2. Enter the required details in the **Main** section.
3. Define characteristics for the membership, if required.
4. Click **Save**.

The membership is defined for the fully-insured group policy plan. The status of the membership and the main subscriber is set to **Active**.

## Defining a Characteristic for a Membership

### Prerequisites

To define a characteristic for a membership, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Membership**)

### Procedure

To define a characteristic for a membership:

1. Ensure that the **Characteristics** section is expanded when you are defining or editing a membership.

The **Characteristics** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the membership.	Yes (Conditional)
	<b>Note:</b> The effective date cannot be earlier than the membership start date and later than the membership end date.	<b>Note:</b> This field is required when you are defining a characteristic for the membership.
Characteristic Type	Used to indicate the characteristic type.	Yes (Conditional)
	<b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Membership</b>	<b>Note:</b> This field is required when you are defining a characteristic for the membership.
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional)
	<b>Note:</b> If you select a predefined characteristic type, the <b>Search</b> (🔍) icon appears corresponding to the <b>Characteristic Value</b> field. On clicking the <b>Search</b> icon, the <b>Predefined Characteristic Search</b> window appears.  On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	<b>Note:</b> This field is required when you are defining a characteristic for the membership.

2. Enter the required details in the **Characteristics** section.
3. If you want to define more than one characteristic for the membership, click the **Add** (+) icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from the membership, click the **Delete** (🗑️) icon corresponding to the characteristic.

4. Click **Save**.

The characteristics are defined for the membership.

## Membership (Used for Viewing)

---

The **Membership** screen allows you to:

- View the details of a membership
- Edit the details of a membership
- Inactivate a membership
- Inactivate a member person
- Add or remove a person from a membership
- View the other plans of the main subscriber
- Associate or disassociate a contract from a membership
- View the billable charges created for a membership
- View the bill segments generated for a membership billable charge
- View the timeline details of a membership billable charge
- Viewing the pricing calculation details of a timeline
- View the log of a membership
- Add a log entry for a membership

It consists of the following tabs:

- [Membership - Main](#) on page 329
- [Membership - Contracts and Charges](#) on page 335
- [Membership - Log](#) on page 341

### Membership - Main

The **Main** tab displays information about the membership. It also lists the persons which are included in the membership and other plans (within or across policies) where the main subscriber is associated. It contains the following zones:

- [Membership](#) on page 329
- [Membership Characteristics](#) on page 332
- [Member Persons](#) on page 332
- [Member Person Characteristics](#) on page 334
- [Other Plans of Main Subscriber](#) on page 334

### Membership

The **Membership** zone displays the details of the membership. It contains the following sections:

- **Main** - Displays basic information about the membership. It contains the following fields:

Field Name	Field Description
Membership Information	Displays information about the membership.

Field Name	Field Description
Policy Information	Displays information about the policy.
	<b>Note:</b> It has a link. On clicking the link, the <b>Policy</b> screen appears where you can view the details of the policy.
Plan Information	Indicates the policy plan for which the membership is defined.
	<b>Note:</b> It has a link. On clicking the link, the <b>Policy Plan</b> screen appears where you can view the details of the respective policy plan.
Status	Indicates the status of the membership. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> <li>• Terminated</li> </ul>
Start Date	Displays the date from when the membership is effective.
End Date	Displays the date till when the membership is effective.
Membership Type	Indicates the type of membership. The valid values are: <ul style="list-style-type: none"> <li>• COBRA</li> <li>• Medicare</li> </ul>
External Membership ID	Displays the corresponding membership ID which is maintained in the external source system.

### **Membership Characteristics**

The **Membership Characteristics** zone lists the characteristics of the membership. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the characteristic is effective for the membership.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.
Description	Displays the description of the characteristic value.  <b>Note:</b> The data appears in this column when the type of characteristic value is set to <b>Predefined Value</b> .

You can filter the list using the **Effective Date** field available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (∨) icon in the upper right corner of this zone.

### **Member Persons**

The **Member Persons** zone lists the persons who are added to the membership. It contains the following columns:

Column Name	Column Description
Start Date	Displays the date from when the person is added to the membership.
End Date	Displays the date till when the person is added to the membership.

Column Name	Column Description
Person Information	Indicates the person who is added to the membership. In addition, it has the context menu which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Person</b> screen appears where you can view the details of the respective person.
Relationship Type	Indicates how the person is related to the main subscriber.
Main Subscriber	Indicates whether the person is the main subscriber of the membership. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>
Financially Responsible	Indicates whether the person is financially responsible for the membership. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>
Status	Indicates the status of the person in the membership. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>
Member	Indicates whether the person is a member or a non-member in the membership. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>
External Medicare Beneficiary ID	Displays the Medicare beneficiary identifier of the person who has availed the Medicare benefit.
Date of Birth	Displays the date when the person was born.
Edit	On clicking the <b>Edit</b>  icon, the <b>Member Person</b> screen appears where you can edit the membership details of the person.

**Note:**

By default, the member persons which are in the **Active** status are listed in the **Member Persons** zone.

You can add a person to the membership by clicking the **Add Person** link in the upper right corner of this zone.

On clicking the **Broadcast**  icon corresponding to a member person, the **Member Person Characteristics** zone appears where you can view the characteristics of the respective member person.

You can filter the list using the **Status** field available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters**  icon in the upper right corner of this zone.

You can change the layout of this zone. For more information on how to change the layout, see [Changing the Layout](#) on page 3208.

### **Billable Charges**

The **Billable Charges** zone lists the one-time or recurring billable charges which are created for the membership. It contains the following columns:

Column Name	Column Description
Start Date	Displays the start date of the billable charge.
End Date	Displays the end date of the billable charge.

Column Name	Column Description
Bill Period	Indicates the intervals at which the recurring bill segments must be created for the billable charge.
Price Item Information	Indicates the price item for which the billable charge is created. <b>Note:</b> It has a link. On clicking the link, the <b>Price Item</b> screen appears where you can view the details of the respective price item.
Account ID	Indicates the account for which the billable charge is created. <b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account.
Contract ID	Indicates the contract against which the billable charge is created. <b>Note:</b> It has a link. On clicking the link, the <b>Contract</b> screen appears where you can view the details of the respective contract.
Billable Charge Information	Displays information about the billable charge. <b>Note:</b> It has a link. On clicking the link, the <b>Billable Charge</b> screen appears where you can view the details of the respective billable charge.
Amount	Displays the billable charge amount.
Status	Indicates the status of the billable charge. The valid values are: <ul style="list-style-type: none"> <li>• Billable</li> <li>• Cancelled</li> </ul>
Last Billed Coverage	Indicates the last bill segment generated for the billable charge which is in the <b>Frozen</b> status. In addition, a context menu appears corresponding to this column which helps in navigating to other screens in application. <b>Note:</b> It has a link. On clicking the link, the <b>Bill Segment</b> screen appears where you can view the details of the respective bill segment.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

On clicking the **Broadcast** (📡) icon corresponding to a billable charge, the **Bill Segment Details** and **Billable Charge Timeline Details** zones appear.

**Note:** On clicking the **Broadcast** (📡) icon, the **Billable Charge Timeline Details** zone appears when the timeline details are available for the respective billable charge.

You can filter the list using various search criteria (such as, **Price Item**, **Start Date**, **Contract ID**, **End Date** and **Status**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (🔍) icon in the upper right corner of this zone.

### Bill Segment Details

The **Bill Segment Details** zone lists all bill segments which are generated for the billable charge. It contains the following columns:

Column Name	Column Description
Start Date	Displays the start date of the bill segment.
End Date	Displays the end date of the bill segment.
Bill Segment Details	Displays information about the bill segment. In addition, this column has a context menu which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Billable Segment</b> screen appears where you can view the details of the respective bill segment.
Amount	Displays the bill segment amount.
Status	Indicates the status of the bill segment. The valid values are: <ul style="list-style-type: none"> <li>• Incomplete</li> <li>• Error</li> <li>• Freezable</li> <li>• Pending Cancel</li> <li>• Canceled</li> <li>• Frozen</li> </ul>
Bill Information	Indicates the bill in which the bill segment is created. In addition, this column has a context menu which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Bill</b> screen appears where you can view the details of the respective bill.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

By default, the **Bill Segment Details** zone does not appear in the **Contracts and Charges** tab of the **Membership** screen. It appears when you click the **Broadcast** (📡) icon corresponding to a billable charge in the **Billable Charges** zone.

You can filter the list using various search criteria (such as, **Start Date**, **Status**, and **End Date**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (🔍) icon in the upper right corner of this zone.

### Billable Charge Timeline Details

The **Billable Charge Timeline Details** zone lists the timelines which are derived during the membership premium calculation. It appears when the timeline details are available for the billable charge. It contains the following columns:

Column Name	Column Description
Start Date	Displays the start date of the timeline.
End Date	Displays the end date of the timeline.
Amount	Displays the premium amount calculated for the timeline.
Pricing Rule Information	Indicates the pricing rule using which the premium amount is calculated. <b>Note:</b> It has a link. On clicking the link, the <b>Pricing Rule</b> screen appears where you can view the details of the respective pricing rule.
Pricing Rule Type	Indicates the pricing rule type using which the pricing rule is created. <b>Note:</b> It has a link. On clicking the link, the <b>Pricing Rule Type</b> screen appears where you can view the details of the respective pricing rule type.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

By default, the **Billable Charge Timeline Details** zone does not appear in the **Contracts and Charges** tab of the **Membership** screen. It appears when you click the **Broadcast** (📡) icon corresponding to a billable charge in the **Billable Charges** zone.

On clicking the **Broadcast** (📡) icon corresponding to a timeline, the **Pricing Calculation Details** zone appears.

You can filter the list using various search criteria (such as, **Start Date** and **End Date**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (🔍) icon in the upper right corner of this zone.

### Pricing Calculation Details

The **Pricing Calculation Details** zone indicates how the amount is calculated for the timeline. If the age based pricing is used during the membership premium calculation, this zone lists the premium calculated for each eligible member of

the membership. It also displays the base fee and modifier fee which are applicable for each eligible member. However, if the tier based pricing is used during the membership premium calculation, this zone lists the premium calculated at the membership level. It contains the following columns:

Column Name	Column Description
Entity Information	If the age based pricing is used during the membership premium calculation, this column indicates the eligible member for whom the premium amount is calculated. However, if the tier based pricing is used during the membership premium calculation, this column indicates the main subscriber of the membership.
Description on Bill	Displays the description of the rate component for which the price component is created in the age based or tier based pricing.
Pricing Parameter	Indicates the pricing eligibility criteria which is satisfied while deriving the base fee.
Amount	Displays the base fee or applicable modifier fee.
Proration Factor	Indicates the proration factor which is derived using the proration rules defined for the fully-insured group policy plan.  <b>Note:</b> The data appears in this column when the proration rule for the respective event is defined for the fully-insured group policy plan.
Distributed Amount	Displays the premium amount which is calculated for the non-skip billing periods.  <b>Note:</b> The data appears in this column when the <b>9/10 Billing (Skip Months)</b> feature is enabled for the account.  If the age based pricing is used during the membership premium calculation, this column displays the distributed amount for the eligible member. However, if the tier based pricing is used during the membership premium calculation, this column displays the distributed amount for the membership.
No. of Billing Periods	Indicates the number of the non-skip billing periods of the account.  <b>Note:</b> The data appears in this column when the <b>9/10 Billing (Skip Months)</b> feature is enabled for the account.
Total Contract Period Amount	Displays the premium which should be paid for the entire contract period (in other words, total premium for the skip and non-skip billing periods).  <b>Note:</b> The data appears in this column when the <b>9/10 Billing (Skip Months)</b> feature is enabled for the account.  If the age based pricing is used during the membership premium calculation, this column displays the total contract period amount for the eligible member. However, if the tier based pricing is used during the membership premium calculation, this column displays the total contract period amount for the membership.
Total Amount	If the age based pricing is used during the membership premium calculation, this column displays the sum total of the base fee and modifier fee (if any) for the eligible member. However, if the tier based pricing is used during the membership premium calculation, this column displays the base fee applicable for the membership.

By default, the **Pricing Calculation Details** zone does not appear in the **Contracts and Charges** tab of the **Membership** screen. It appears when you click the **Broadcast** (📡) icon corresponding to a timeline in the **Billable Charge Timeline Details** zone.

## **Membership - Log**

The **Log** tab contains the following zone:

- [Membership Log](#) on page 341

### **Membership Log**

The **Membership Log** zone lists the complete trail of actions performed on the membership. It contains the following columns:

<b>Column Name</b>	<b>Column Description</b>
Creation Date Time	Displays the date and time when the action was performed on the membership.
Details	Displays the details about the action performed on the membership.
User	Indicates the user who has performed the action on the membership.
Log Type	Indicates the type of log.
Related Object	Indicates the object or entity which is generated when the action is performed on the membership.
	<b>Note:</b> It contains a link. On clicking the link, the screen appears where you can view the details of the respective related object.
Status Reason	Indicates the reason why the status of the membership is changed.
	<b>Note:</b> At present, no data appears in this column. The implementation team can build the custom logic to meet the business requirements.

**Note:** You can manually add a log entry for the membership by clicking the **Add Log Entry** link in the upper right corner of the **Membership Log** zone.

## Editing a Membership of a Fully-Insured Group Policy Plan

### Procedure

To edit a membership of a fully-insured group policy plan:

1. Search for the membership in the **Membership** screen.
2. In the **Search Results** section, click the link in the **Membership Information** column corresponding to the membership whose details you want to edit.

The **Membership** screen appears.

3. Ensure that the **Main** tab is selected.
4. Click the **Edit** button in the **Membership** zone.

The **Membership** screen appears. It contains the following sections:

- **Main** - Used to specify the basic details about the membership.
- **Characteristics** - Used to define the characteristics for the membership.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Membership Information	Displays information about the membership.	Not applicable
Plan Information	Indicates the policy plan for which the membership is defined.	Not applicable
Start Date	Used to specify the date from when the membership is effective for a fully-insured group policy plan.  <b>Note:</b> The membership start date cannot be later than the membership end date. The membership start date cannot be earlier than the policy plan start date or later than policy plan end date.	Yes
End Date	Used to specify the date till when the membership is effective for a fully-insured group policy plan.  <b>Note:</b> The membership end date cannot be earlier than the membership start date. The membership end date cannot be earlier than the policy plan start date or later than policy plan end date.	Yes
Membership Type	Used to indicate the type of membership. The valid values are: <ul style="list-style-type: none"> <li>• COBRA</li> <li>• Medicare</li> </ul>	No

Field Name	Field Description	Mandatory (Yes or No)
External Membership ID	Used to specify the external membership ID.	No
	<b>Note:</b> Here, you need to specify a membership ID which is maintained in the external source system.	

5. Modify the required details in the **Main** section.
6. Define, edit, or remove characteristics of the membership, if required.
7. Click **Save**.

The changes made to the membership are saved.

## Adding a Person to a Membership

The system enables you to add a member person to a membership when the membership is in the **Active** status. However, you can only add a member person in the **Active** status and not in the **Inactive** status.

### Prerequisites

To add a person to a membership, you should have:

- Required persons defined in the application
- Contract relationship types defined in the application

### Procedure

To add a person to a membership:

1. Search for the membership in the **Membership** screen.
2. In the **Search Results** section, click the link in the **Membership Information** column corresponding to the membership to which you want to add a person.

The **Membership** screen appears.

3. Ensure that the **Main** tab is selected.
4. Click the **Add Person** link in the upper right corner of the **Member Persons** zone.

The **Member Person** screen appears. It contains the following sections:

- **Main** - Used to specify the basic membership details of the person.
- **Characteristics** - Used to define the characteristics for the member person.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Membership Information	Indicates the membership to which you want to add a person.	Not applicable
Person ID	Used to indicate the person whom you want to add to the membership.  <b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Person Search</b> window appears.	Yes
Relationship Type	Used to indicate how the person is related to the main subscriber.  <b>Note:</b> The list includes only those contract relationship types which are already defined in the system.	Yes
Financially Responsible	Used to indicate whether the person is financially responsible for the membership.	No
Main Subscriber	Used to indicate whether the person is the main subscriber of the membership.	No
Member	Used to indicate whether the person is a member or a non-member in the membership.	No
Start Date	Used to specify the date from when you want to add the person to the membership.  <b>Note:</b> The member person start date cannot be later than the member person end date. The member person start date cannot be earlier than the membership start date or later than the membership end date.	Yes
End Date	Used to specify the date till when you want to add the person to the membership.  <b>Note:</b> The member person end date cannot be earlier than the member person start date. The member person end date cannot be earlier than the membership start date or later than the membership end date.	No
External Medicare Beneficiary ID	Used to specify the Medicare beneficiary identifier of the person who has availed the Medicare benefit.	No

Field Name	Field Description	Mandatory (Yes or No)
Member Person Status	Used to indicate the status of the person in the membership. The valid values are: <ul style="list-style-type: none"> <li>Active</li> <li>Inactive</li> </ul>	Yes
	<b>Note:</b> By default, the <b>Active</b> option is selected.	

- Enter the required details in the **Main** section.
- Define the characteristics for the member person, if required.
- Click **Save**.

The person is added to the membership.

How to define a characteristic for a member person	<a href="#">Defining a Characteristic for a Member Person</a> on page 345

## Defining a Characteristic for a Member Person

### Prerequisites

To define a characteristic for a member person, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Membership Person**)

### Procedure

To define a characteristic for a member person:

- Ensure that the **Characteristics** section is expanded when you are adding a person to a membership or editing the membership details of a person.

The **Characteristics** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to indicate the date from when the characteristic is effective for the member person.	Yes (Conditional)
		<b>Note:</b> This field is required when you are defining a characteristic for the member person.

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Type	Used to indicate the characteristic type.	Yes (Conditional)
	<b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Membership Person</b> .	<b>Note:</b> This field is required when you are defining a characteristic for the member person.
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional)
	<b>Note:</b> If you select a predefined characteristic type, the <b>Search</b> (🔍) icon appears corresponding to the <b>Characteristic Value</b> field. On clicking the <b>Search</b> icon, the <b>Predefined Characteristic Search</b> window appears.  On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	<b>Note:</b> This field is required when you are defining a characteristic for the member person.

- Enter the required details in the **Characteristics** section.
- If you want to define more than one characteristic for the member person, click the **Add** (+) icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from the member person, click the **Delete** (🗑️) icon corresponding to the characteristic.

- Click **Save**.

The characteristics are defined for the member person.

## **Inactivating a Membership**

There are two ways in which you can inactivate the membership from the user interface:

- On clicking the **Inactivate** button
- On inactivating the main subscriber of the membership

### **Procedure**

To inactivate a membership:

- Search for the membership in the **Membership** screen.
- In the **Search Results** section, click the link in the **Membership Information** column corresponding to the membership that you want to inactivate.

The **Membership** screen appears.

3. Ensure that the **Main** tab is selected.
4. Click the **Inactivate** button in the **Membership** zone.

The status of the membership is changed to **Inactive**.

### Related Topics

For more information on...	See...
How to search for a membership	<a href="#">Searching for a Membership</a> on page 323
<b>Membership</b> screen	<a href="#">Membership (Used for Viewing)</a> on page 329
<b>Membership</b> zone	<a href="#">Membership</a> on page 329

## Inactivating a Member Person

The system enables you to inactivate a member person of a membership. If the member person is the main subscriber, the system automatically inactivates the membership and all other member persons which are included in the membership. It also does the following:

- Cancels the billable charges which are created for the membership
- Cancels the corresponding bill segments (if any)

If an audit event exists for the membership which is inactivated, the **BO\_STATUS\_CD** column corresponding to the record in the **C1\_AUDIT\_EVENT**, **C1\_AUDIT\_EVENT\_LOG**, and **CI\_PRCE\_CALC** tables is set to **INVALID**. If a repricing entity detail record exists for the membership in the **PENDING** or **ERROR** status, then the **BO\_STATUS\_CD** column corresponding to the record in the **CI\_REPRC\_ENTITY\_DTL** table is set to **COMPLETE**. If a repricing request exists for the membership in the **PENDING** or **ERROR** status, then the **BO\_STATUS\_CD** column corresponding to the record in the **CI\_REPRC\_REQ\_DTL** table is set to **COMPLETE**.

### Procedure

To inactivate a member person of a membership:

1. Search for the membership in the **Membership** screen.
2. In the **Search Results** section, click the link in the **Membership Information** column corresponding to the membership whose details you want to edit.

The **Membership** screen appears.

3. Ensure that the **Main** tab is selected.
4. In the **Member Persons** zone, click the **Edit**  icon in the **Edit** column corresponding to the member person whom you want to inactivate.

The **Add/Edit Member Person** screen appears.

5. Select the **Inactive** option from the **Membership Person Status** list.

The status of the member person is changed to **Inactive**.

## Associating a Contract with a Membership

### Prerequisites

To associate a contract with a membership, you should have:

- Contracts defined in the application
- Values defined for the **BILL\_TO\_TYPE\_FLG** lookup field

### Procedure

To associate a contract with a membership:

1. Search for the membership in the **Membership** screen.
2. In the **Search Results** section, click the link in the **Membership Information** column corresponding to the membership to which you want to associate a contract.

The **Membership** screen appears.

3. Click the **Contracts and Charges** tab.

The **Contracts and Charges** tab appears.

4. Click the **Add Contract** link in the upper right corner of the **Membership Contracts** zone.

The **Associate Contract with Membership** screen appears. It contains the following section:

- **Main** - Used to associate a contract with the membership. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Membership Information	Indicates the membership to which you want to associate a contract.	Not applicable
Contract ID	Used to indicate the contract that you want to associate with the membership.	Yes
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Contract ID</b> field. On clicking the <b>Search</b> icon, the <b>Contract Search</b> window appears.	

Field Name	Field Description	Mandatory (Yes or No)
Bill To	Used to indicate the entity against whom the corresponding charges should be billed. The valid values are: <ul style="list-style-type: none"> <li>Federal</li> <li>State</li> <li>Group</li> <li>Individual</li> </ul> <p><b>Note:</b> You cannot associate multiple contracts with the membership using the same bill to option. For example, you cannot associate C1 and C2 with M1 by selecting the <b>Group</b> option from the <b>Bill To</b> field.</p>	Yes
Start Date	Used to specify the date from when you want to associate the contract with the membership. <p><b>Note:</b> The start date cannot be later than end date. The start date cannot be earlier than the membership start date or later than the membership end date.</p>	Yes
End Date	Used to specify the date till when you want to associate the contract with the membership. <p><b>Note:</b> The end date cannot be earlier than the start date. The end date cannot be earlier than the membership start date or later than the membership end date.</p>	No

5. Enter the required details in the **Main** section.

6. Click **Save**.

The contract is associated with the membership.

## **Editing the Contract Association Details of a Membership**

### **Prerequisites**

To edit the contract association details of a membership, you should have:

- Contracts defined in the application
- Values defined for the **BILL\_TO\_TYPE\_FLG** lookup field

### **Procedure**

To edit the contract association details of a membership:

1. Search for the membership in the **Membership** screen.
2. In the **Search Results** section, click the link in the **Membership Information** column corresponding to the membership whose contract details you want to edit.

The **Membership** screen appears.

3. Click **Contracts and Charges** tab.

The **Contracts and Charges** tab appears.

4. In the **Membership Contracts** zone, click the **Edit** (✎) icon in the **Edit** column corresponding to the contract whose association details you want to edit.

The **Associate Contract with Membership** screen appears. It contains the following section:

- **Main** - Used to associate a contract with the membership. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Membership Information	Indicates the membership to which you want to associate a contract.	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
Contract ID	Used to indicate the contract that you want to associate with the membership.	Yes
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Contract ID</b> field. On clicking the <b>Search</b> icon, the <b>Contract Search</b> window appears.	
Bill To	Used to indicate the entity against whom the corresponding charges should be billed. The valid values are: <ul style="list-style-type: none"> <li>• Federal</li> <li>• State</li> <li>• Group</li> <li>• Individual</li> </ul>	Yes
	<b>Note:</b> You cannot associate multiple contracts with the membership using the same bill to option. For example, you cannot associate C1 and C2 with M1 by selecting the <b>Group</b> option from the <b>Bill To</b> field.	
Start Date	Used to specify the date from when you want to associate the contract with the membership.	Yes
	<b>Note:</b> The start date cannot be later than end date. The start date cannot be earlier than the membership start date or later than the membership end date.	
End Date	Used to specify the date till when you want to associate the contract with the membership.	No
	<b>Note:</b> The end date cannot be earlier than the start date. The end date cannot be earlier than the membership start date or later than the membership end date.	

5. Modify the required details in the **Main** section.

6. Click **Save**.

The changes made to the membership are saved.

## Viewing the Characteristics of a Member Person

### Procedure

To view the characteristics of a member person in a membership:

1. Search for the membership in the **Membership** screen.
2. In the **Search Results** section, click the link in the **Membership Information** column corresponding to the membership whose details you want to view.  
The **Membership** screen appears.
3. Ensure that the **Main** tab is selected.
4. In the **Member Persons** zone, click the **Broadcast** (📡) icon corresponding to the member person whose characteristics you want to view.  
The **Member Person Characteristics** zone appears.
5. View the characteristics of the member person in the **Member Person Characteristics** zone.

## Viewing the Billable Charges Created for a Membership

### Procedure

To view the billable charges created for a membership:

1. Search for the membership in the **Membership** screen.
2. In the **Search Results** section, click the link in the **Membership Information** column corresponding to the membership whose details you want to view.  
The **Membership** screen appears.
3. Click the **Contracts and Charges** tab.  
The **Contracts and Charges** tab appears.
4. View the billable charges created for the membership in the **Billable Charges** zone.

### Related Topics

## Viewing the Bill Segments Generated for a Billable Charge

### Procedure

To view the bill segments generated for a billable charge:

1. Search for the membership in the **Membership** screen.
2. In the **Search Results** section, click the link in the **Membership Information** column corresponding to the membership whose details you want to view.

The **Membership** screen appears.

3. Click the **Contracts and Charges** tab.

The **Contracts and Charges** tab appears.

4. In the **Billable Charges** zone, click the **Broadcast** (📡) icon corresponding to the billable charge whose bill segments you want to view.

The **Bill Segment Details** and **Billable Charge Timeline Details** zones appear.

5. View the bill segments generated for the billable charge in the **Bill Segment Details** zone.

## Viewing the Timeline Details of a Membership Billable Charge

### Procedure

To view the timeline details of a membership billable charge:

1. Search for the membership in the **Membership** screen.
2. In the **Search Results** section, click the link in the **Membership Information** column corresponding to the membership whose details you want to view.

The **Membership** screen appears.

3. Click the **Contracts and Charges** tab.

The **Contracts and Charges** tab appears.

4. In the **Billable Charges** zone, click the **Broadcast** (📡) icon corresponding to the billable charge whose timeline details you want to view.

The **Bill Segment Details** and **Billable Charge Timeline Details** zones appear.

5. View the timeline details of the billable charge in the **Billable Charge Timeline Details** zone.

## Adding a Log Entry for a Membership

### Procedure

To add a log entry for a membership:

1. Search for the membership in the **Membership** screen.
2. In the **Search Results** section, click the link in the **Membership Information** column corresponding to the membership for which you want to add a log entry.

The **Membership** screen appears.

3. Click the **Log** tab.

The **Log** tab appears.

4. Click the **Add Log Entry** link in the upper right corner of the **Membership Log** zone.

The **Add Membership Log** window appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Membership Information	Displays information about the membership.	Not applicable
Log Details	Used to specify additional comments for the membership.	Yes

5. Enter the comments in the **Log Details** field.

6. Click **Save**.

The log entry is added in the **Membership Log** zone.

## Self-Funded Group Health Insurance

---

### Topics:

- [Pre-requisites](#)
- [Self-Funded Policy](#)
- [Self-Funded Policy Status Transition](#)
- [Algorithms Used in C1-ASOPolicy](#)
- [Policy \(Used for Searching\)](#)
- [Policy \(Used for Viewing\)](#)

Self-funded group health insurance, also known as Administrative Services Only (ASO), is a self insurance arrangement whereby an employer provides health or disability benefits to employees using the company's own funds. A self-insured employer will set up a special trust fund to earmark money (corporate and employee contributions) to pay incurred claims. It is also commonly known as self-funded employee health insurance.

In the self-funded group health plan, employers operate their own health plan. However, in the fully-insured group health plan, the employer contracts an insurance company to cover the employees and dependents. Employers choose to self-insure because it allows them to save the profit margin that an insurance company adds to its premium for a fully-insured group health plan. However, self-insuring exposes the company to much larger risk when more claims than expected must be paid.

Oracle Revenue Management and Billing (ORMB) supports the following types of self-funding approach:

- **Fully Self-Funded** - In the fully self-funded approach, the employer retains all the risk and bears the claim costs irrespective of any limit.
- **Partially Self-Funded** - In the partially self-funded approach, the employer purchases reinsurance or stop loss coverage to pass the risk to insurance company.

Oracle Revenue Management and Billing (ORMB) provides specialized methodologies for calculating claim amount with or without markups, enrollment fees, claim fees, specific stop-loss credits, aggregate stop-loss credits, non-recurring or recurring flat fees for covered services, network discounts, and fixed or enrollment based premium funds. Once the charges are calculated, the system bills the amount to the employer (known as the parent customer in ORMB) or to its logical designed billing entities (known as the bill groups in ORMB).

Oracle Revenue Management and Billing (ORMB) enables you to use the pricing methodologies and the billing engine for the self-funded group health insurance business. To design the pricing and billing models for the self-funded group health insurance business, you need to create the following entities in ORMB:

- Parent Customer
- Bill Groups
- Bill Group's Account
- Self-Funded Policy
- Price Items (for each covered service in the policy)

- Pricing Rule Types
- Pricing Rules

## Pre-requisites

---

To set the billing system for a self-funded group customer, you need to do the following:

- Define the required policy types in the system.
- Define the required policy person roles in the system.
- Define the values for the **RUNOUT\_ADM\_OPT\_FLG** lookup field.
- Define the required characteristic types where the characteristic entity is set to **Policy Type**.
- Define the required characteristic types where the characteristic entity is set to **Policy**.
- Define the required parameter values in the following algorithm which is attached to the **C1-ASOPolicy** business object:
  - C1-ASOBOPOSP
- Define the required parameter values in the following algorithm which is used in the lifecycle of the **C1-ASOPolicy** business object:
  - C1-ASOPOLMOA
- Set the values for the following option types in the **C1-ASOBLLNG** feature configuration:
  - Parent Customer Policy Person Role
  - Bill Group Policy Person Role
- Set the values for the following option types in the **C1-PERSTYPE** feature configuration:
  - Bill Group Person Type
  - Parent Person Type
- Set the batch control type of the **Policy Periodic Monitor (C1-POLPR)** batch to **Timed** and define the following attributes:
  - Time Interval
  - Timer Active
  - User ID
  - Batch Language
  - Email Address

How to setup the <b>C1-ASOBLLNG</b> feature configuration	<a href="#">Setting the C1-ASOBLLNG Feature Configuration</a> on page 3215

## Self-Funded Policy

---

You can create a self-funded policy using a policy type where the policy category is set to **Self-Funded**. The policy type indicates the business object using which the self-funded policy should be created in the system.

As per the self-funded health insurance business, the system enables you to create a self-funded policy for a bill group where the parent customer is the policy holder. You can create or edit a self-funded policy from the **Policy** screen. In addition, you can create or edit a self-funded policy through a customer registration object or a health care inbound

message. If the self-funded policy information is given for a bill group in a health care inbound message, the system does the following:

- Associates the bill group with the policy using the policy person role which is specified in the **Bill Group Policy Person Role** option type of the **C1-ASOBLNG** feature configuration
- Associates the parent customer with the policy using the policy person role which is specified in the **Parent Customer Policy Person Role** option type of the **C1-ASOBLNG** feature configuration

A self-funded policy encapsulates the following information:

- **Policy Persons** – While creating a self-funded policy, you need to associate the person who is the main customer of the policy. While associating a person with a self-funded policy, you need to specify the policy person role which indicates the role of the person in the policy. For example, whether the person associated with the policy is the policy holder, broker, or underwriter. You can associate multiple persons with a self-funded policy using the same or different policy person role. However, at a time, only one person can be the main customer of the policy.
- **Policy Contracts** – The system creates a contract for a self-funded policy when the policy is created either from the user interface or through an inbound message. For more information, refer to [Self-Funded Policy Contract Creation](#) on page 365.

On defining a self-funded policy, the status of the policy is set to **Pending**. You can then edit, delete or activate a policy. Once a self-funded policy is activated, you can renew the policy whenever required.

**Note:** If a self-funded policy is created through a customer registration object or a health care inbound message, the status of the policy is set to **Pending**.

In a self-funded policy, you can specify the policy period as well as the runout period. Here, the policy period means the period between the policy start and end dates when the policy is active. And, the runout period means the period between the runout start and end dates when the policy is no more active. Note that the system sets the runout start date to the policy end date + 1 Day when you specify the runout end date.

The system enables you to create a self-funded policy for the following contract types which are used in the self-funded health insurance business:

Contract Type	Policy (Example)	Policy Period (i.e. Period when Policy will be in the Active Status)	Runout Period (i.e. Period when Policy will be in the Runout Status)	Comments
<b>12/12</b> (Claims Incurred and Paid During the Policy Period)	P1	01-01-2019 to 12-31-2019	-	Here, you will not specify the runout end date for the self-funded policy (i.e. P1).
<b>12/15</b> (Claims Incurred During the Policy Period and Paid During the Policy and Runout Periods)	P2	01-01-2019 to 12-31-2019	01-01-2020 to 03-31-2020	Here, the runout period is derived when you set the runout end date of the self-funded policy (i.e. P2) to 03-31-2020.

Contract Type	Policy (Example)	Policy Period (i.e. Period when Policy will be in the Active Status)	Runout Period (i.e. Period when Policy will be in the Runout Status)	Comments
<b>12/18</b> (Claims Incurred During the Policy Period and Paid During the Policy and Runout Periods)	P3	01-01-2019 to 12-31-2019	01-01-2020 to 06-30-2020	Here, the runout period is derived when you set the runout end date of the self-funded policy (i.e. P3) to 06-30-2020.
<b>15/12</b> (Claims Incurred Three Months Prior to the Policy Start Date and During the Policy Period and Paid During the Policy Period)	P4	01-01-2019 to 12-31-2019	-	Here, you will not specify the runout end date for the self-funded policy (i.e. P4).

The system enables you to offer different pricing for different policy periods, such as active, runout, and post runout.

## Self-Funded Policy Activation

A self-funded policy can be activated manually from the user interface or through the **Policy Periodic Monitor (C1-POLPR)** batch. You can activate a self-funded policy by clicking the **Activate** button in the **Policy** screen. On clicking the **Activate** button, the system checks whether the To Do created for the **Pending** status is completed. If the To Do created for the **Pending** status is not completed, it completes the To Do and then changes the status of the self-funded policy from **Pending** to **In Force/Active**.

**Note:** The status of the policy is not changed from **Pending** to **In Force/Active** until the system date is later than or equal to the policy start date.

On executing the **Policy Periodic Monitor (C1-POLPR)** batch, the system does the following:

- If the self-funded policy is in the **Pending** status and the policy start date - X days is earlier than or equal to the system date, it creates a To Do using the To Do type which is specified in the **To Do Type for Pending Status** parameter (of an algorithm created using the **C1-ASOPOLMOA** algorithm type).
- If the start date of the self-funded policy is earlier than or equal to the system date and the To Do created using the To Do type specified in the **To Do Type for Pending Status** parameter is completed, it changes the status of the self-funded policy from **Pending** to **In Force/Active**.

You can define pricing rules using the pricing rule types of the following categories for a self-funded policy of a bill group which is in the **Active** status:

- Claim
- Specific Stop-Loss
- Aggregate Stop-Loss
- Retention Type Claim Based
- Retention Type Enrollment Based
- Ancillary
- Flat Fees
- Level Funded

## Transition of Self-Funded Policy to Runout Status

A self-funded policy can be transitioned to the **Runout** status from the user interface or through the **Policy Periodic Monitor (C1-POLPR)** batch. You can transition a self-funded policy to the **Runout** status by clicking the **Runout** button in the **Policy** screen. On clicking the **Runout** button, the system checks whether the To Do created for the **In Force/Active** status is completed. If the To Do created for the **In Force/Active** status is not completed, it completes the To Do and then changes the status of the self-funded policy from **In Force/Active** to **Runout**.

**Note:** The status of the policy is not changed from **In Force/Active** to **Runout** when either of the following condition is met:

- The runout end date is not specified.
- The system date is earlier than or equal to the policy end date.
- The policy is renewed.

On executing the **Policy Periodic Monitor (C1-POLPR)** batch, the system does the following:

- If the self-funded policy is in the **In Force/Active** status and the policy end date - X days is earlier than or equal to the system date, it creates a To Do using the To Do type which is specified in the **To Do Type for Active Status** parameter (of an algorithm created using the **C1-ASOPOLMOA** algorithm type).
- If the end date of the self-funded policy is earlier than or equal to the system date and the To Do created using the To Do type specified in the **To Do Type for Active Status** parameter is completed, it changes the status of the self-funded policy from **In Force/Active** to **Runout**.

You can define pricing rules using the pricing rule types of the following categories for a self-funded policy of a bill group which is in the **Runout** status:

- Claim
- Specific Stop-Loss
- Aggregate Stop-Loss
- Retention Type Claim Based
- Ancillary
- Flat Fees
- Level Funded

## Transition of Self-Funded Policy to Post Runout Status

A self-funded policy can be transitioned to the **Post Runout** status only through the **Policy Periodic Monitor (C1-POLPR)** batch. On executing the **Policy Periodic Monitor (C1-POLPR)** batch, the system does the following:

- If the self-funded policy is in the **Runout** status and the runout end date - X days is earlier than or equal to the system date, it creates a To Do using the To Do type which is specified in the **To Do Type for Runout Status** parameter (of an algorithm created using the **C1-ASOPOLMOA** algorithm type).
- If the runout end date of the self-funded policy is earlier than or equal to the system date and the To Do created using the To Do type specified in the **To Do Type for Runout Status** parameter is completed, it changes the status of the self-funded policy from **Runout** to **Post Runout**.

You can define pricing rules using the pricing rule types of the following categories for a self-funded policy of a bill group which is in the **Post Runout** status:

- Claim
- Specific Stop-Loss
- Aggregate Stop-Loss

- Retention Type Claim Based
- Ancillary

## Self-Funded Policy Renewal

You can renew a self-funded policy which is associated with a bill group. However, note that you can renew a self-funded policy only when it is in the **In Force/Active** status and which is not yet renewed. You can renew a self-funded policy only from the user interface and not through a health care inbound message.

On renewing a self-funded policy, a new policy is created in the **Pending** status. The renewal date is stamped in the base policy. The information from the base policy is copied to the renewed policy. The start date of the renewed policy is set to the base policy's end date plus one day. For example, if the base policy's end date is 12-31-2018, then by default, the renewed policy's start date is set to 01-01-2019.

While renewing a self-funded policy, you cannot disassociate persons (from the renewed policy) who are associated with the base policy using a policy person role which is specified in the **Bill Group Policy Person Role** or **Parent Customer Policy Person Role** option type of the **C1-ASOBLLNG** feature configuration.

While renewing a self-funded policy, the system enables you to copy the following pricing rules of the base policy and thereby create new pricing rules for the renewed policy:

- Claim
- Retention Type Claim Based
- Retention Type Enrollment Based
- Recurring Flat Fees
- Ancillary

While copying a pricing rule, the start and end dates of the new pricing rule are set to the renewed policy's start and end dates, respectively. If there are multiple pricing rules which are created using the same pricing rule type and are effective for the different date range, the system copies only one pricing rule from the base policy with the latest date range.

Once a policy is renewed, you cannot edit the base policy's end date or manually change the status of the base policy to **Runout**. The system automatically changes the status of the base policy to **Runout** when the status of the latest renewed policy is changed to **Runout**.

## Self-Funded Policy Contract Creation

The system automatically creates contracts when a self-funded policy is created either from the user interface or through a health care inbound message. It creates a contract for a self-funded policy on each account of the bill group. It creates a contract using the contract type which is specified in the **Contract Type** parameter of an algorithm which is created using the **C1-ASOBOPOSP** algorithm type. Let us assume that the **Contract Type** parameter in the **C1-ASOBOPOSP** algorithm is set to CT1. Now, when you create the self-funded policies named P1 and P2 for BG1 and P11, P12, and P13 for BG2 through a health care inbound message, the system will create the following contracts on the respective accounts:

Bill Group	Account	Contract
BG1	A1	C1 (for P1 using the CT1 contract type)
		C2 (for P2 using the CT1 contract type)
	A2	C3 (for P1 using the CT1 contract type)
		C4 (for P2 using the CT1 contract type)
BG2	A4	C11 (for P11 using the CT1 contract type)

Bill Group	Account	Contract
		C12 (for P12 using the CT1 contract type)
		C13 (for P13 using the CT1 contract type)
		A5
	A5	C14 (for P11 using the CT1 contract type)
		C15 (for P12 using the CT1 contract type)
		C16 (for P13 using the CT1 contract type)
	A6	C17 (for P11 using the CT1 contract type)
		C18 (for P12 using the CT1 contract type)
		C19 (for P13 using the CT1 contract type)

The following figure graphically represents the above example:

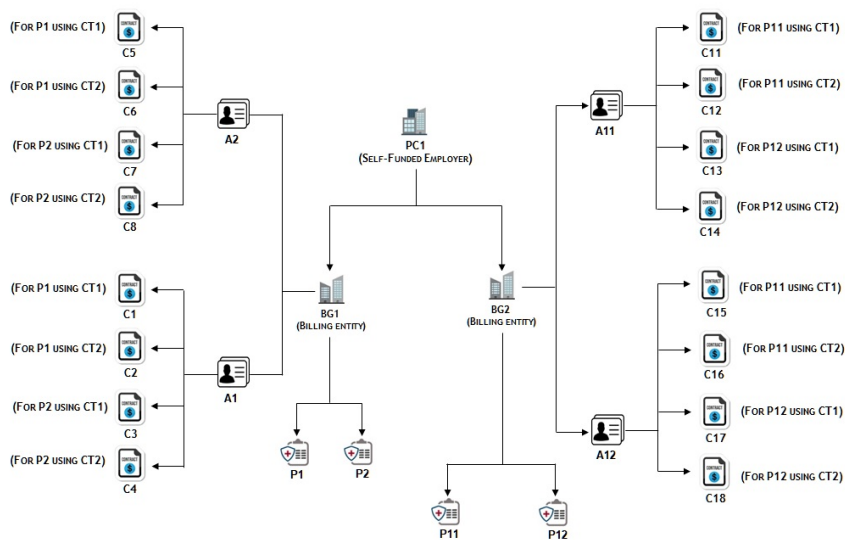

You can also specify comma-separated values for the **Contract Type** parameter. The system will then create a contract using each contract type for each self-funded policy on each account of the bill group. Let us assume that the **Contract Type** parameter in the **C1-ASOBOPOSP** algorithm is set to CT1 , CT2. Now, when you create the self-funded policies named P1 and P2 for BG1 and P11 and P12 for BG2 through a health care inbound message, the system will create the following contracts on the respective accounts:

Bill Group	Account	Contract
BG1	A1	C1 (for P1 using the CT1 contract type)
		C2 (for P1 using the CT2 contract type)
		C3 (for P2 using the CT1 contract type)
		C4 (for P2 using the CT2 contract type)
	A2	C5 (for P1 using the CT1 contract type)

Bill Group	Account	Contract
		C6 (for P1 using the CT2 contract type)
		C7 (for P2 using the CT1 contract type)
		C8 (for P2 using the CT2 contract type)
BG2	A11	C11 (for P11 using the CT1 contract type)
		C12 (for P11 using the CT2 contract type)
		C13 (for P12 using the CT1 contract type)
		C14 (for P12 using the CT2 contract type)
	A12	C15 (for P11 using the CT1 contract type)
		C16 (for P11 using the CT2 contract type)
		C18 (for P12 using the CT1 contract type)
		C19 (for P12 using the CT2 contract type)

The following figure graphically represents the above example:

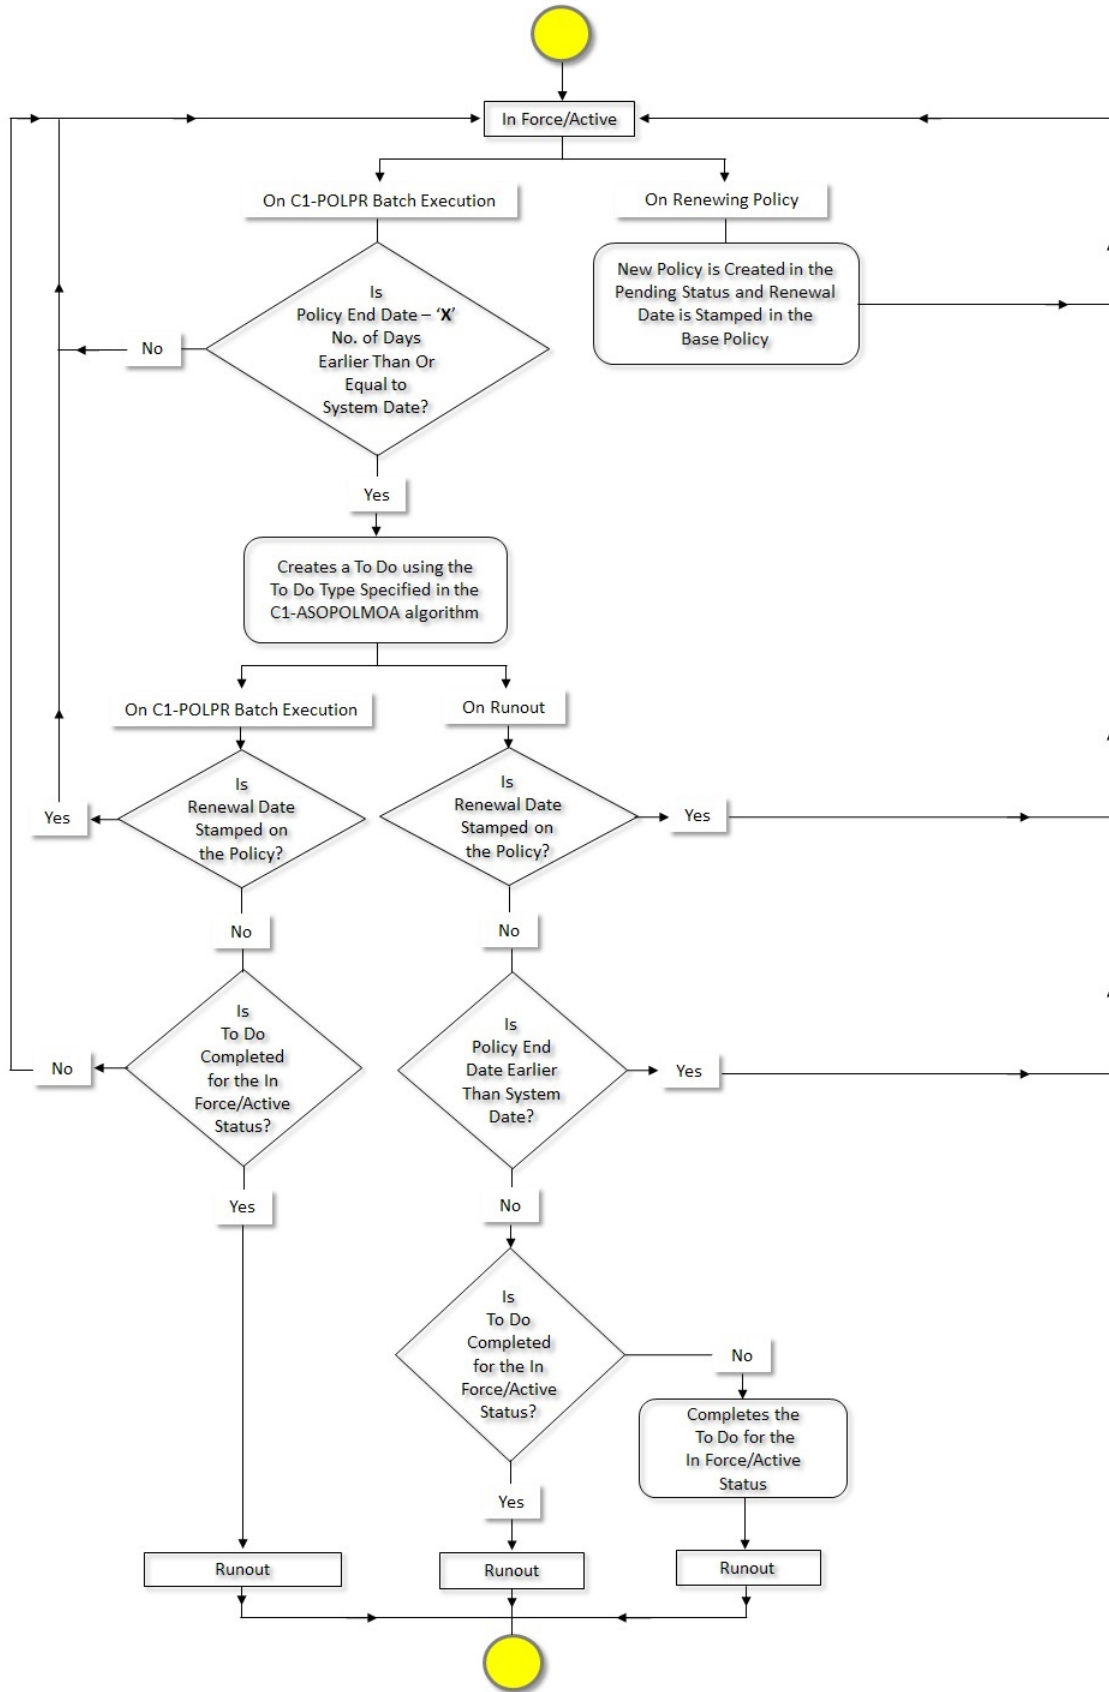

## Self-Funded Policy Status Transition

The following figure graphically indicates how a self-funded policy moves from one status to another in its lifecycle:

## Algorithms Used in C1-ASOPolicy

The following table lists the algorithms which are attached to the **C1-ASOPolicy** business object:

System Event	Algorithm	Algorithm Type	Description
Validation	C1-ASOPOLVAL	C1-ASOPOLVAL	Refer to <a href="#">C1-ASOPOLVAL</a> on page 371.
Post-Processing	C1-ASOBOPOSP	C1-ASOPOLPOS	Refer to <a href="#">C1-ASOBOPOSP</a> on page 372.

System Event	Algorithm	Algorithm Type	Description
	C1-ASOPRUCPY	C1-ASOPRUCPY	Refer to <a href="#">C1-ASOPRUCPY</a> on page 372.

The following table lists the algorithms which are used in the lifecycle of the **C1-ASOP** policy business object:

Status	System Event	Algorithm	Algorithm Type	Description
Pending	Monitor	C1-ASOPOLMOA	C1-ASOPOLMOA	Refer to <a href="#">C1-ASOPOLMOA</a> on page 372.
	Enter	C1-ASOPOLREN	C1-ASOPOLREN	Refer to <a href="#">C1-ASOPOLREN</a> on page 373.
	Exit	C1-ASOPCKTD	C1-ASOPCKTD	Refer to <a href="#">C1-ASOPCKTD</a> on page 373.

Runout	Monitor	C1-ASOPOLMOA	C1-ASOPOLMOA	Refer to <a href="#">C1-ASOPOLMOA</a> on page 372.
	Exit	C1-ASOPCKTD	C1-ASOPCKTD	Refer to <a href="#">C1-ASOPCKTD</a> on page 373.
Post Runout	-	-	-	-

## C1-ASOPOLVAL

This algorithm validates a self-funded policy throughout its lifecycle. It checks the following:

- The policy end date is not earlier than the policy start date.
- The runout end date is later than the policy end date.
- The runout end date is later than the system date while editing the policy which is in the **Runout** status.
- The runout end date is not removed when the policy is in the **Runout** or **Post Runout** status.
- The policy end date is not modified when the policy is in the **Runout** status.
- The policy end date is not set to a date which is later than or equal to the start date of a pricing rule which is defined for the **Runout** status.
- The runout end date is not set to a date which is later than or equal to the start date of a pricing rule which is defined for the **Post Runout** status.
- The runout end date is not set to a date which is earlier than the end date of a pricing rule which is defined for the **Runout** status.
- The policy is not edited when it is in the **Post Runout** status.
- The policy start date is not modified when the policy is in the **In Force/Active**, **Runout**, or **Post Runout** status.
- The policy person end date is not earlier than the policy person start date.

- The policy person role is specified while associating a person with the policy.
- One of the policy persons is set as the main customer of the policy.
- The policy end date is not changed when the policy is renewed.

## C1-ASOBOPOSP

This algorithm is invoked when you create a self-funded policy either from the user interface or through an inbound message. It creates a contract of the specified contract type for the self-funded policy on each account of the bill group. For example, if you create a self-funded policy named P1 for a bill group who has two accounts - A1 and A2, the system will create two contracts for P1 - one on the A1 account and another on the A2 account.

It contains the following parameter:

- **Contract Type** - Used to indicate the contract type whose contract you want to create for the self-funded policy on each account of the bill group. You can also specify comma-separated values for this parameter. It will then create a contract of each contract type for the self-funded policy on each account of the bill group.

## C1-ASOPRUCPY

This algorithm is invoked when the **Copy Pricing Rules** option is selected while renewing a self-funded policy. It copies the following pricing rules of the base policy and creates new pricing rules for the renewed policy:

- Claim
- Retention Type Claim Based
- Retention Type Enrollment Based
- Recurring Flat Fees
- Ancillary

While copying a pricing rule, the start and end dates of the new pricing rule are set to the renewed policy's start and end dates, respectively. If there are multiple pricing rules which are created using the same pricing rule type and are effective for the different date range, the system copies only one pricing rule from the base policy with the latest date range.

## C1-ASOPOLMOA

This algorithm is invoked when the **Policy Periodic Monitor (C1-POLPR)** batch is executed. It does the following:

- If the self-funded policy is in the **Pending** status and the policy start date - X days is earlier than or equal to the system date, it creates a To Do using the To Do type which is specified in the **To Do Type for Pending Status** parameter.
- If the start date of the self-funded policy is earlier than or equal to the system date and the To Do created using the To Do type specified in the **To Do Type for Pending Status** parameter is completed, it changes the status of the self-funded policy from **Pending** to **In Force/Active**.
- If the self-funded policy is in the **In Force/Active** status and the policy end date - X days is earlier than or equal to the system date, it creates a To Do using the To Do type which is specified in the **To Do Type for Active Status** parameter.
- If the end date of the self-funded policy is earlier than or equal to the system date and the To Do created using the To Do type specified in the **To Do Type for Active Status** parameter is completed, it changes the status of the self-funded policy from **In Force/Active** to **Runout**.
- If the self-funded policy is in the **Runout** status and the runout end date - X days is earlier than or equal to the system date, it creates a To Do using the To Do type which is specified in the **To Do Type for Runout Status** parameter.

- If the runout end date of the self-funded policy is earlier than or equal to the system date and the To Do created using the To Do type specified in the **To Do Type for Runout Status** parameter is completed, it changes the status of the self-funded policy from **Runout** to **Post Runout**.

It contains the following parameters:

- **To Do Type for Pending Status** - Used to indicate the To Do type using which you want to create the To Do, X days prior to the policy start date.
- **To Do Type for Active Status** - Used to indicate the To Do type using which you want to create the To Do, X days prior to the policy end date.
- **To Do Type for Runout Status** - Used to indicate the To Do type using which you want to create the To Do, X days prior to the runout end date.
- **X Days** - Used to specify the number of days prior to which you want to create a To Do for the self-funded policy.

All these parameters are mandatory.

## C1-ASOPOLREN

This algorithm is invoked when you renew a self-funded policy. Once the new policy is created in the **Pending** status, it stamps the renewal date on the base policy.

## C1-ASOPCKTD

This algorithm is invoked when you click the **Activate** and **Runout** buttons in the **Policy** screen. On clicking the **Activate** button, it checks whether the To Do created for the **Pending** status is completed. If the To Do created for the **Pending** status is not completed, it completes the To Do and then changes the status of the self-funded policy from **Pending** to **In Force/Active**.

Similarly, on clicking the **Runout** button, it checks whether the To Do created for the **In Force/Active** status is completed. If the To Do created for the **In Force/Active** status is not completed, it completes the To Do and then changes the status of the self-funded policy from **In Force/Active** to **Runout**.

It also validates the following:

- The status of the policy is not changed from **Pending** to **In Force/Active** until the system date is later than or equal to the policy start date.
- The status of the policy is not changed from **In Force/Active** to **Runout** when the runout end date is not specified.
- The status of the policy is not changed from **In Force/Active** to **Runout** until the system date is later than the policy end date.
- The status of the policy is not changed to **Runout** if it is renewed.

In addition, it also changes the status of the base policies to **Runout** when the status of the latest renewed policy is changed to **Runout**.

## Policy (Used for Searching)

---

The **Policy** screen allows you to search for a policy using various search criteria. It also allows you to define a policy. It contains the following zone:

- [Search Policy](#) on page 270

Through this screen, you can navigate to the following screen:

- [Policy \(Used for Viewing\)](#) on page 281

## Search Policy

The **Search Policy** zone allows you to search for a policy using various search criteria. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for a policy using the policy or person details. The valid values are: <ul style="list-style-type: none"> <li>• Policy Date/Policy Type/Status</li> <li>• Source System/Policy Number/Description</li> <li>• Person Name/Person Identifier</li> <li>• Policy Characteristics</li> </ul>	Yes
	<b>Note:</b> By default, the <b>Policy Date/Policy Type/Status</b> option is selected.	
Policy Type	Used to search policies which are created using a particular policy type.	No
	<b>Note:</b> This field appears when the <b>Policy Date/Policy Type/Status</b> option is selected from the <b>Search By</b> list.	
Start Date	Used to search policies which are effective from a particular date.	No
	<b>Note:</b> This field appears when the <b>Policy Date/Policy Type/Status</b> option is selected from the <b>Search By</b> list.	
Status	Used to search policies with a particular status. The valid values are: <ul style="list-style-type: none"> <li>• In Force/Active</li> <li>• Canceled</li> <li>• Pending Cancellation</li> <li>• Pending</li> <li>• Pending Reinstatement</li> <li>• Pending Termination</li> <li>• Post Runout</li> <li>• Reinstated</li> <li>• Runout</li> <li>• Terminated</li> </ul>	No
	<b>Note:</b> This field appears when the <b>Policy Date/Policy Type/Status</b> option is selected from the <b>Search By</b> list.	

Field Name	Field Description	Mandatory (Yes or No)
End Date	Used to search policies which are effective till a particular date.	No
	<b>Note:</b> This field appears when the <b>Policy Date/Policy Type/Status</b> option is selected from the <b>Search By</b> list.	
Source System	Used to search policies which originated from a particular external system.	No
	<b>Note:</b> This field appears when the <b>Source System/Policy Number/Description</b> option is selected from the <b>Search By</b> list.	
Policy Number	Used to search a policy with a particular policy number.	No
	<b>Note:</b> This field appears when the <b>Source System/Policy Number/Description</b> option is selected from the <b>Search By</b> list.	
Description	Used to search policies with a particular description.	No
	<b>Note:</b> This field appears when the <b>Source System/Policy Number/Description</b> option is selected from the <b>Search By</b> list.	
Person Name	Used to search policies to which a particular person is associated.	No
	<b>Note:</b> This field appears when the <b>Person Name/Person Identifier</b> option is selected from the <b>Search By</b> list.	
Person Identifier Type	Used to indicate the person identifier type.	Yes (Conditional)
	<b>Note:</b> This field appears when the <b>Person Name/Person Identifier</b> option is selected from the <b>Search By</b> list.	<b>Note:</b> If you specify the person identifier as a search criteria, you have to select the person identifier type.
Person Identifier	Used to search policies to which a person is associated.	Yes (Conditional)
	<b>Note:</b> This field appears when the <b>Person Name/Person Identifier</b> option is selected from the <b>Search By</b> list.	<b>Note:</b> If you specify the person identifier type as a search criteria, you have to specify the person identifier.

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Type	Used to search policies for which a particular characteristic type is defined.	Yes (Conditional)  <b>Note:</b> This field is required when you are searching for a policy using a characteristic.
	<b>Note:</b> This field appears when the <b>Policy Characteristics</b> option is selected from the <b>Search By</b> list.  The list includes only those characteristic types where the characteristic entity is set to <b>Policy</b> .	
Characteristic Value	Used to search policies with a particular characteristic value.	Yes (Conditional)  <b>Note:</b> This field is required when you are searching for a policy using a characteristic.
	<b>Note:</b> This field appears when the characteristic type is selected.  If you select a predefined characteristic type, the <b>Search</b> (🔍) icon appears corresponding to the <b>Characteristic Value</b> field. On clicking the <b>Search</b> icon, the <b>Predefined Characteristic Search</b> window appears.  On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	

**Note:** You must specify at least one search criterion while searching for a policy.

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Policy Number	Displays the policy number.
Policy Information	Displays additional information about the policy.
	<b>Note:</b> It has a link. On clicking the link, the <b>Policy</b> screen appears where you can view the details of the respective policy.
Source System	Indicates the external system from where the policy is originated.
Description	Displays the description of the policy.
Start Date	Displays the date from when the policy is effective.
End Date	Displays the date till when the policy is effective.

Column Name	Column Description						
Status	<p>Indicates the status of the policy. If the policy is created using the <b>C1-POLICY</b> business object, the valid values are:</p> <ul style="list-style-type: none"> <li>• Pending</li> <li>• In Force/Active</li> <li>• Pending Cancellation</li> <li>• Canceled</li> <li>• Pending Reinstatement</li> <li>• Reinstated</li> <li>• Pending Termination</li> <li>• Terminated</li> </ul> <p>However, if the policy is created using the <b>C1-ASOPolicy</b> business object, the valid values are:</p> <ul style="list-style-type: none"> <li>• Pending</li> <li>• In Force/Active</li> <li>• Runout</li> <li>• Post Runout</li> </ul>						
Main Customer	<p>This column displays different data depending on whether you search for a policy using the policy or person details. The following table describes this column:</p> <table border="1" data-bbox="574 1037 1455 1717"> <thead> <tr> <th data-bbox="574 1037 1019 1085">If you search for a policy using...</th> <th data-bbox="1019 1037 1455 1085">Then...</th> </tr> </thead> <tbody> <tr> <td data-bbox="574 1085 1019 1465"> <p>The <b>Policy Date/Policy Type/Status, Source System/Policy Number/Description, or Policy Characteristics</b> option</p> </td> <td data-bbox="1019 1085 1455 1465"> <p>The <b>Main Customer</b> column displays the name of the person who is the main customer of the policy. In addition, this column has a context menu which helps in navigating to other screens in the application.</p> <div data-bbox="1024 1304 1450 1451" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> It has a link. On clicking the link, the <b>Person</b> screen appears where you can view the details of the respective person.</p> </div> </td> </tr> <tr> <td data-bbox="574 1465 1019 1717"> <p>The <b>Person Name/Person Identifier</b> option</p> </td> <td data-bbox="1019 1465 1455 1717"> <p>The <b>Main Customer</b> column indicates whether the person is the main customer of the policy. The valid values are:</p> <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul> </td> </tr> </tbody> </table>	If you search for a policy using...	Then...	<p>The <b>Policy Date/Policy Type/Status, Source System/Policy Number/Description, or Policy Characteristics</b> option</p>	<p>The <b>Main Customer</b> column displays the name of the person who is the main customer of the policy. In addition, this column has a context menu which helps in navigating to other screens in the application.</p> <div data-bbox="1024 1304 1450 1451" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> It has a link. On clicking the link, the <b>Person</b> screen appears where you can view the details of the respective person.</p> </div>	<p>The <b>Person Name/Person Identifier</b> option</p>	<p>The <b>Main Customer</b> column indicates whether the person is the main customer of the policy. The valid values are:</p> <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>
If you search for a policy using...	Then...						
<p>The <b>Policy Date/Policy Type/Status, Source System/Policy Number/Description, or Policy Characteristics</b> option</p>	<p>The <b>Main Customer</b> column displays the name of the person who is the main customer of the policy. In addition, this column has a context menu which helps in navigating to other screens in the application.</p> <div data-bbox="1024 1304 1450 1451" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> It has a link. On clicking the link, the <b>Person</b> screen appears where you can view the details of the respective person.</p> </div>						
<p>The <b>Person Name/Person Identifier</b> option</p>	<p>The <b>Main Customer</b> column indicates whether the person is the main customer of the policy. The valid values are:</p> <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>						

Column Name	Column Description
Person Information	Indicates the person who is associated with the policy. In addition, this column has a context menu which helps in navigating to other screens in the application.
	<p><b>Note:</b></p> <p>It has a link. On clicking the link, the <b>Person</b> screen appears where you can view the details of the respective person.</p> <p>This column appears when the <b>Person Name/Person Identifier</b> option is selected from the <b>Search By</b> list.</p>
Policy Person Role	Indicates the role using which the person is associated with the policy.
	<p><b>Note:</b> This column appears when the <b>Person Name/Person Identifier</b> option is selected from the <b>Search By</b> list.</p>

**Note:** Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

### **Related Topics**

## **Searching for a Policy**

### **Prerequisites**

To search for a policy, you should have:

- Policy types and person identifier types defined in the application
- Values defined for the **C1-SourceSystemLookup** extendable lookup
- Characteristic types defined in the application (where the characteristic entity is set to **Policy**)

### **Procedure**

To search for a policy:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Person Information** and then click **Policy**.  
A sub-menu appears.
3. Click the **Search** option from the **Policy** sub-menu.  
The **Policy** screen appears.
4. Enter the search criteria in the **Search Policy** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

#### 5. Click **Search**.

A list of policies that meet the search criteria appears in the **Search Results** section.

## Viewing the Policy Details

### Procedure

To view the details of a policy:

1. Search for the policy in the **Policy** screen.
2. In the **Search Results** section, click the link in the **Policy Information** column corresponding to the policy whose details you want to view.

The **Policy** screen appears.

3. Ensure that the **Main** tab is selected.
4. View the details of the policy in the **Policy** zone.

## Defining a Policy

Oracle Revenue Management and Billing enables you to define a policy for the fully-insured and self-funded health insurance business. You can define a fully-insured group policy using a policy type where the policy category is set to **Fully-Insured Group** or **Fully-Insured Individual**. However, you can define a self-funded policy using a policy type where the policy category is set to **Self-Funded**.

**Note:** At present, the **Fully-Insured Individual** policy category is not supported in the system.

### Prerequisites

To define a policy, you should have:

- Policy types defined in the application
- Values defined for the **C1-SourceSystemLookup** extendable lookup

**Note:** This prerequisite is applicable only when you want to define a fully-insured group policy.

- Values defined for the **RUNOUT\_ADM\_OPT\_FLG** lookup field

**Note:** This prerequisite is applicable when you want to define a self-funded policy.

### **Procedure**

To define a policy:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Person Information** and then click **Policy**.  
A sub-menu appears.
3. Click the **Add** option from the **Policy** sub-menu.

The **Select Policy Type** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Policy Type	Used to indicate the policy type using which you want to create a policy.  <b>Note:</b> If you want to create a fully-insured group policy, you must select a policy type where the policy category is set to <b>Fully-Insured Group</b> or <b>Fully-Insured Individual</b> . However, if you want to create a self-funded policy, you must select a policy type where the policy category is set to <b>Self-Funded</b> .	Yes

**Tip:** Alternatively, you can access this screen by clicking the **Add** button in the **Page Title** area of the **Policy** screen.

4. Select the required policy type from the respective field.
5. Click **OK**.

The **Policy** screen appears. It contains the following sections:

- **Main** - Used to specify the basic details about the policy.
- **Persons** - Used to associate persons with the policy.
- **Characteristics** - Used to define the characteristics for the policy.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Policy Type	Indicates the policy type using which you are defining the policy.	Not applicable
Policy Number	Used to specify the policy number.	Yes
Description	Used to specify the description for the policy.	Yes
Source System	Used to indicate the external system from where the policy is originated.  <b>Note:</b> This field appears when you are defining a policy using a policy type where the policy category is set to <b>Fully-Insured Group</b> or <b>Fully-Insured Individual</b> .	Yes

Field Name	Field Description	Mandatory (Yes or No)
Start Date	Used to specify the date from when the policy is effective.	Yes
	<b>Note:</b> The policy start date cannot be later than the policy end date.	
End Date	Used to specify the date till when the policy is effective.	Yes
	<b>Note:</b> The policy end date cannot be earlier than the policy start date.	
Runout End Date	Used to specify the date when the runout period of the self-funded policy ends.	No
	<b>Note:</b> The runout end date cannot be earlier than or equal to the policy end date. This field appears when you are defining a policy using a policy type where the policy category is set to <b>Self-Funded</b> .	
Runout Administration Fees	Used to indicate whether the administration fees must be charged when the claim transaction for the self-funded policy is processed in the runout period. The valid values are: <ul style="list-style-type: none"> <li>• None</li> <li>• Percentage of Claim</li> </ul>	No
	<b>Note:</b> At present, this field is used only for the informational purposes and is not considered during the billable charge creation for the claim transactions which are received in the runout period of the policy. This field appears when you are defining a policy using a policy type where the policy category is set to <b>Self-Funded</b> .	

6. Enter the required details in the **Main** section.
7. Associate the required persons with the policy.

**Note:** While defining a policy, you must associate a person who is the main customer of the policy.

8. Define the characteristics for the policy, if required.
9. Click **Save**.

The policy is defined and its status is set to **Pending**.

### **Related Topics**

Policy screen	<a href="#">Policy (Used for Viewing)</a> on page 281
How to associate a person with a policy	<a href="#">Associating a Person with a Policy</a> on page 278
How to define a characteristic for a policy	<a href="#">Defining a Characteristic for a Policy</a> on page 280

## Associating a Person with a Policy

### Prerequisites

To associate a person with a policy, you should have:

- Required persons defined in the application
- Required policy person roles defined in the application

### Procedure

To associate a person with a policy:

1. Ensure that the **Persons** section is expanded when you are defining or editing a policy.

The **Persons** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Person	Used to indicate the person that you want to associate with the policy.	Yes
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Person Search</b> window appears.</p> <p>On specifying the person ID, the person name appears corresponding to the <b>Person</b> field.</p>	
Sequence	Used to specify the sequence number for the associated person.	Yes
Policy Person Role	Used to indicate the role of a person in the policy.	Yes
Main Customer	Used to indicate whether the person is the main customer of the policy.	Yes (Conditional)
	<p><b>Note:</b> At a time, only one person can be the main customer of the policy.</p>	
		<p><b>Note:</b> You must select this option while associating a person who is the main customer of the policy.</p>

Field Name	Field Description	Mandatory (Yes or No)
Start Date	Used to specify the date from when the person is associated with the policy.	Yes
	<b>Note:</b> The start date cannot be later than the end date. The start date cannot be earlier than the policy start date and later than the policy end date.	
End Date	Used to specify the date till when the person is associated with the policy.	No
	<b>Note:</b> The end date cannot be earlier than the start date. The end date cannot be earlier than the policy start date and later than the policy end date. This validation is done when the policy is transition to the status which is not specified in the <b>Skip Status for Policy Person End Date Validation</b> parameter of the <b>C1-POLBOVAL</b> algorithm. For example, if you set the <b>Skip Status for Policy Person End Date Validation</b> parameter of the <b>C1-POLBOVAL</b> algorithm to <b>TERMINATED</b> , the system will not perform this validation when the status of the policy is changed to <b>Terminated</b> .	

- Enter the required details in the **Persons** section.

**Note:** While associating the persons with a policy, you must always ensure that one person is the main customer of the policy.

- If you want to associate more than one person with the policy, click the **Add (+)** icon and then repeat step 2.

**Note:** However, if you want to dissociate a person from the policy, click the **Delete (🗑)** icon corresponding to the person.

- Click **Save**.

The persons are associated with the policy.

### **Related Topics**

## **Defining a Characteristic for a Policy**

### **Prerequisites**

To define a characteristic for a policy, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Policy**)

**Procedure**

To define a characteristic for a policy:

1. Ensure that the **Characteristics** section is expanded when you are defining or editing a policy.

The **Characteristics** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the policy.	Yes (Conditional)
	<b>Note:</b> The effective date cannot be earlier than the policy start date and later than the policy end date.	<b>Note:</b> This field is required when you are defining a characteristic for the policy.
Characteristic Type	Used to indicate the characteristic type.	Yes (Conditional)
	<b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Policy</b> .	<b>Note:</b> This field is required when you are defining a characteristic for the policy.
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional)
	<b>Note:</b> If you select a predefined characteristic type, the <b>Search</b> (🔍) icon appears corresponding to the <b>Characteristic Value</b> field. On clicking the <b>Search</b> icon, the <b>Predefined Characteristic Search</b> window appears.  On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	<b>Note:</b> This field is required when you are defining a characteristic for the policy.

2. Enter the required details in the **Characteristics** section.
3. If you want to define more than one characteristic for the policy, click the **Add** (+) icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from the policy, click the **Delete** (🗑) icon corresponding to the characteristic.

4. Click **Save**.

The characteristics are defined for the policy.

**Related Topics**

How to define a policy	<a href="#">Defining a Policy</a> on page 276
How to edit a policy	<a href="#">Editing a Policy</a> on page 292

**Policy (Used for Viewing)**

The **Policy** screen allows you to:

- View the details of a fully-insured group or self-funded policy
- View all the characteristics associated with the self-funded policy
- Edit the details of a fully-insured group or self-funded policy
- Activate a fully-insured group or self-funded policy
- Add or edit plans in a fully-insured group policy
- Add memberships to a fully-insured group policy plan
- Initiate the termination process for a fully-insured group policy
- Terminate a fully-insured group policy
- Initiate the cancellation process for a fully-insured group policy
- Cancel a fully-insured group policy
- Initiate the reinstatement process for a fully-insured group policy
- Reinstatement a fully-insured group policy
- View the log of a fully-insured group or self-funded policy
- Add a log entry for a fully-insured group or self-funded policy

It consists of the following tabs:

- [Policy - Main](#) on page 282
- [Policy - Plan](#) on page 289
- [Policy - Log](#) on page 291

## Policy - Main

The **Main** tab displays information about the policy. It contains the following zones:

- [Policy](#) on page 282
- [Policy Characteristics](#) on page 288

## Policy

The **Policy** zone displays the details of the fully-insured group or self-funded policy. It contains the following sections:

- **Main** - Displays basic information about the policy. It contains the following fields:

Field Name	Field Description
Base Policy Information	Displays information about the base policy.
	<b>Note:</b> This field appears when you are viewing the details of a renewed policy which is created using a policy type where the policy category is set to <b>Self-Funded</b> .
Policy Information	Displays information about the policy.
Policy Type	Indicates the policy type using which the policy is created.
	<b>Note:</b> It has a link. On clicking the link, the <b>Policy Type</b> screen appears where you can view the details of the respective policy type.

Field Name	Field Description
Status	<p>Indicates the status of the policy. If the policy is created using the <b>C1-POLICY</b> business object, the valid values are:</p> <ul style="list-style-type: none"> <li>• Pending</li> <li>• In Force/Active</li> <li>• Pending Cancellation</li> <li>• Canceled</li> <li>• Pending Reinstatement</li> <li>• Reinstated</li> <li>• Pending Termination</li> <li>• Terminated</li> </ul> <p>However, if the policy is created using the <b>C1-ASOPolicy</b> business object, the valid values are:</p> <ul style="list-style-type: none"> <li>• Pending</li> <li>• In Force/Active</li> <li>• Runout</li> <li>• Post Runout</li> </ul>
Status Reason	<p>Indicates the reason why the policy is terminated.</p> <p><b>Note:</b></p> <p>It has a link. On clicking the link, the <b>Status Reason</b> screen appears where you can view the details of the respective termination reason.</p> <p>This field appears when you are viewing the details of a terminated or reinstated policy which is created using a policy type where the policy category is set to <b>Fully-Insured Group</b> or <b>Fully-Insured Individual</b>.</p>
Policy Number	Displays the policy number.
Description	Displays the description of the policy.
Source System	Indicates the external system from where the policy is originated.
Start Date	Displays the date from when the policy is effective.
End Date	Displays the date till when the policy is effective.
Renewal Date	<p>Displays the date when the policy is renewed.</p> <p><b>Note:</b> This field appears when you are viewing the details of a policy which is renewed.</p>

Field Name	Field Description																													
Paid Through Date	Indicates the term end date of the last fully or partially paid term. The system considers the term to be fully paid when the threshold limit is met.																													
	<p><b>Note:</b></p> <p>This field appears when the following conditions are met:</p> <ul style="list-style-type: none"> <li>• When you are viewing the details of a policy which is created using a policy type where the policy category is set to <b>Fully-Insured Group</b> or <b>Fully-Insured Individual</b>.</li> <li>• When the paid through date is calculated at the policy level.</li> </ul>																													
	The paid through date is calculated while freezing or canceling a payment or adjustment depending on whether the required algorithm is attached to the respective system event:																													
	<table border="1"> <thead> <tr> <th data-bbox="513 667 781 716">Entity</th> <th data-bbox="781 667 1162 716">System Event</th> <th data-bbox="1162 667 1461 716">Algorithm</th> </tr> </thead> <tbody> <tr> <td data-bbox="513 716 781 764">Customer Class</td> <td data-bbox="781 716 1162 764">Payment Freeze</td> <td data-bbox="1162 716 1461 764">C1-PSPTDCAL</td> </tr> <tr> <td data-bbox="513 764 781 812">Customer Class</td> <td data-bbox="781 764 1162 812">Payment Cancellation</td> <td data-bbox="1162 764 1461 812">C1-PXPTDCAL</td> </tr> <tr> <td data-bbox="513 812 781 861">Adjustment Type</td> <td data-bbox="781 812 1162 861">Adjustment Freeze</td> <td data-bbox="1162 812 1461 861">C1-ADPTDCAL</td> </tr> <tr> <td data-bbox="513 861 781 909">Adjustment Type</td> <td data-bbox="781 861 1162 909">Adjustment Cancellation</td> <td data-bbox="1162 861 1461 909">C1-AXPTDCAL</td> </tr> </tbody> </table>	Entity	System Event	Algorithm	Customer Class	Payment Freeze	C1-PSPTDCAL	Customer Class	Payment Cancellation	C1-PXPTDCAL	Adjustment Type	Adjustment Freeze	C1-ADPTDCAL	Adjustment Type	Adjustment Cancellation	C1-AXPTDCAL

Field Name	Field Description
Runout End Date	Displays the date when the runout period of the self-funded policy ends.
	<b>Note:</b> This field appears when you are viewing the details of a policy which is created using a policy type where the policy category is set to <b>Self-Funded</b> .
Runout Administration Fees	Indicates whether the administration fees must be charged when the claim transaction for the self-funded policy is processed in the runout period. The valid values are: <ul style="list-style-type: none"> <li>• None</li> <li>• Percentage of Claim</li> </ul>
	<b>Note:</b> This field appears when you are viewing the details of a policy which is created using a policy type where the policy category is set to <b>Self-Funded</b> .

- **Persons** - Lists the persons which are associated with the policy. It contains the following columns:

Column Name	Column Description
Person Information	Indicates the person who is associated with the policy. In addition, this column has a context menu which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Person</b> screen appears where you can view the details of the respective person.
Sequence	Displays the sequence number of the associated person.
Policy Person Role	Indicates the role of the person in the policy.
Main Customer	Indicates whether the person is the main customer of the policy.
Start Date	Displays the date from when the person is associated with the policy.
End Date	Displays the date till when the person is associated with the policy.

- **Record Actions** - This section contains the following buttons:

Button Name	Button Description						
Edit	Used to edit the details of the fully-insured group or self-funded policy.						
	<p><b>Note:</b></p> <p>The <b>Edit</b> button appears only when a policy of the respective category is in either of the following status:</p>						
	<table border="1"> <thead> <tr> <th data-bbox="521 403 907 451">Policy Category</th> <th data-bbox="907 403 1463 451">Status</th> </tr> </thead> <tbody> <tr> <td data-bbox="521 451 907 804">Fully-Insured Group or Fully-Insured Individual</td> <td data-bbox="907 451 1463 804"> <ul style="list-style-type: none"> <li>• In Force/Active</li> <li>• Canceled</li> <li>• Pending Cancellation</li> <li>• Pending</li> <li>• Pending Reinstatement</li> <li>• Pending Termination</li> <li>• Terminated</li> </ul> </td> </tr> <tr> <td data-bbox="521 804 907 957">Self-Funded</td> <td data-bbox="907 804 1463 957"> <ul style="list-style-type: none"> <li>• In Force/Active</li> <li>• Pending</li> <li>• Runout</li> </ul> </td> </tr> </tbody> </table>	Policy Category	Status	Fully-Insured Group or Fully-Insured Individual	<ul style="list-style-type: none"> <li>• In Force/Active</li> <li>• Canceled</li> <li>• Pending Cancellation</li> <li>• Pending</li> <li>• Pending Reinstatement</li> <li>• Pending Termination</li> <li>• Terminated</li> </ul>	Self-Funded	<ul style="list-style-type: none"> <li>• In Force/Active</li> <li>• Pending</li> <li>• Runout</li> </ul>

Self-Funded	<ul style="list-style-type: none"> <li>• In Force/Active</li> <li>• Pending</li> <li>• Runout</li> </ul>						
Activate	Used to activate the fully-insured group or self-funded policy.						
	<p><b>Note:</b></p> <p>The <b>Activate</b> button appears when a policy of the respective category is in either of the following status:</p>						
	<table border="1"> <thead> <tr> <th data-bbox="521 1215 954 1264">Policy Category</th> <th data-bbox="954 1215 1463 1264">Status</th> </tr> </thead> <tbody> <tr> <td data-bbox="521 1264 954 1377">Fully-Insured Group or Fully-Insured Individual</td> <td data-bbox="954 1264 1463 1377"> <ul style="list-style-type: none"> <li>• Pending</li> <li>• Pending Termination</li> </ul> </td> </tr> <tr> <td data-bbox="521 1377 954 1438">Self-Funded</td> <td data-bbox="954 1377 1463 1438"> <ul style="list-style-type: none"> <li>• Pending</li> </ul> </td> </tr> </tbody> </table>	Policy Category	Status	Fully-Insured Group or Fully-Insured Individual	<ul style="list-style-type: none"> <li>• Pending</li> <li>• Pending Termination</li> </ul>	Self-Funded	<ul style="list-style-type: none"> <li>• Pending</li> </ul>
	Policy Category	Status					
Fully-Insured Group or Fully-Insured Individual	<ul style="list-style-type: none"> <li>• Pending</li> <li>• Pending Termination</li> </ul>						
Self-Funded	<ul style="list-style-type: none"> <li>• Pending</li> </ul>						
Initiate Cancellation	Used to initiate the cancellation process for the fully-insured group policy.						
Cancel	<p><b>Note:</b> The <b>Initiate Cancellation</b> button appears when the fully-insured group policy is in the <b>In Force/Active</b> status.</p>						
	<p>Used to cancel the fully-insured group policy.</p> <p><b>Note:</b> The <b>Cancel</b> button appears when the fully-insured group policy is in the <b>Pending Cancellation</b> status.</p>						

Button Name	Button Description
Initiate Termination	Used to initiate the termination process for the fully-insured group policy.
	<b>Note:</b> The <b>Initiate Termination</b> button appears when the fully-insured group policy is in the <b>In Force/Active</b> status.
Terminate	Used to terminate the fully-insured group policy.
	<b>Note:</b> The <b>Terminate</b> button appears when the fully-insured group policy is in the <b>In Force/Active, Pending Reinstatement, or Pending Termination</b> status.
Initiate Reinstatement	Used to initiate the reinstatement process for the terminated policy.
	<b>Note:</b> The <b>Initiate Reinstatement</b> button appears when the fully-insured group policy is in the <b>Terminated</b> status.
Reinstate	Used to reinstate the terminated policy.
	<b>Note:</b> The <b>Reinstate</b> button appears when the fully-insured group policy is in the <b>Pending Reinstatement or Terminated</b> status.
Runout	Used to transition the self-funded policy to the <b>Runout</b> status.
	<p><b>Note:</b></p> <p>The <b>Runout</b> button appears when the self-funded policy is in the <b>In Force/Active</b> status. You cannot transition a self-funded policy to the <b>Runout</b> status when:</p> <ul style="list-style-type: none"> <li>• The self-funded policy is renewed.</li> <li>• The runout end date is not specified.</li> <li>• The policy end date is earlier than the system date.</li> </ul>

- **Record Information** - This section contains the following fields:

Field Name	Field Description
Business Object	Indicates the business object using which the policy is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.
Status Date/Time	Displays the date and time when the policy status is updated.
Create Date/Time	Displays the date and time when the policy is created.

- **Termination Information** - Displays the termination details of the fully-insured group policy. It appears when the policy is in the **Pending Termination** status. It contains the following fields:

Field Name	Field Description
Terminate Date	Displays the date when you want to terminate the policy.

Field Name	Field Description
Terminate Reason	Indicates the reason why the termination process is initiated for the policy.
	<b>Note:</b> It has a link. On clicking the link, the <b>Status Reason</b> screen appears where you can view the details of the respective termination reason.

- **Reinstate Information** - Displays the reinstatement details of the terminated policy. It appears when the policy is in the **Pending Reinstatement** status. It contains the following fields:

Field Name	Field Description
Reinstate Reason	Indicates the reason why you want to reinstate the fully-insured group policy.
	<b>Note:</b> It has a link. On clicking the link, the <b>Status Reason</b> screen appears where you can view the details of the respective reinstatement reason.

### Policy Characteristics

The **Policy Characteristics** zone lists the characteristics of the fully-insured group or self-funded policy. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the characteristic is effective for the policy.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

Column Name	Column Description
Description	Displays the description of the characteristic value.
	<b>Note:</b> The data appears in this column when the type of characteristic value is set to <b>Predefined Value</b> .

You can filter the list using the **Effective Date** field available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** () icon in the upper right corner of this zone.

## Policy - Plan

The **Plan** tab lists the plans defined for the policy and memberships defined for each policy plan. It contains the following zones:

- [Plans](#) on page 289
- [Memberships](#) on page 290

### Plans

The **Plans** zone lists the plans which are defined in the policy. It contains the following columns:

Column Name	Column Description
Plan Information	Displays information about the policy plan. In addition, a context menu appears corresponding to this column which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Policy Plan</b> screen appears where you can view the details of the respective policy plan.
Price Item Information	Indicates the price item to which the policy plan is directly associated.
	<b>Note:</b> It has a link. On clicking the link, the <b>Price Item</b> screen appears where you can view the details of the respective price item.
Plan Number	Displays the plan number.
Plan Name	Displays the description of the policy plan.
Benefit Type	Indicates the type of health insurance plan. The valid values are: <ul style="list-style-type: none"> <li>• Commercial</li> <li>• Medicare Affiliated</li> </ul>
Start Date	Displays the date from when the policy plan is effective.
End Date	Displays the date till when the policy plan is effective.
Edit	On clicking the <b>Edit</b> (  ) icon, the <b>Plan</b> screen appears where you can edit the details of the policy plan.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can define a new policy plan by clicking the **Add** link in the upper-right corner of this zone. On clicking the **Broadcast** () icon corresponding to a policy plan, the **Memberships** zone appears.

**Note:** Ideally, you define plans in a policy which is created using a policy type where the policy category is set to **Fully-Insured Group** or **Fully-Insured Individual**.

You can filter the list using various search criteria (such as, **Price Item**, **Plan Number**, and **Effective From**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (∨) icon in the upper-right corner of this zone.

### **Memberships**

The **Memberships** zone lists the memberships which are defined for the policy plan. It contains the following columns:

<b>Column Name</b>	<b>Column Description</b>
Start Date	Displays the date from when the membership is effective.
End Date	Displays the date till when the membership is effective.
Membership Information	Displays information about the membership. <b>Note:</b> It has a link. On clicking the link, the <b>Membership</b> screen appears where you can view the details of the respective membership.
Enrolled Members	Displays the number of members who have enrolled in the policy plan.
Status	Indicates the status of the membership. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> <li>• Terminated</li> </ul>
Membership Type	Indicates the type of membership. The valid values are: <ul style="list-style-type: none"> <li>• COBRA</li> <li>• Medicare</li> </ul>
Last Billed Coverage	Indicates the last bill segment generated for the membership which is in the <b>Frozen</b> status. In addition, a context menu appears corresponding to this column which helps in navigating to other screens in application. <b>Note:</b> It has a link. On clicking the link, the <b>Bill Segment</b> screen appears where you can view the details of respective bill segment.

Column Name	Column Description
Benefits	On clicking the <b>Benefits</b> (  ) icon, the <b>Benefit</b> screen appears where you can view the Medicare benefits of the member persons who belong to the membership.  <b>Note:</b> The <b>Benefits</b> icon appears when a Medicare benefit is defined for a member person who belongs to the membership.
Membership ID	Displays the membership ID.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can define a new membership by clicking the **Add** link in the upper right corner of this zone.

By default, the **Memberships** zone does not appear in the **Plan** tab. It appears when you click the **Broadcast** () icon corresponding to the policy plan in the **Plans** zone.

You can filter the list using various search criteria (such as, **External Membership ID**, **Effective From**, **Person Name**, **Effective Till**, and **Status**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** () icon in the upper right corner of this zone.

You can change the layout of this zone. For more information on how to change the layout, see [Changing the Layout](#) on page 3208

## **Policy - Log**

The **Log** tab contains the following zone:

- [Policy Log](#) on page 291

### **Policy Log**

The **Policy Log** zone lists the complete trail of actions performed on the policy. It contains the following columns:

Column Name	Column Description
Creation Date Time	Displays the date and time when the action was performed on the policy.
Details	Displays the details about the action performed on the policy.
User	Indicates the user who has performed the action on the policy.
Log Type	Indicates the type of log.
Related Object	Indicates the object or entity which is created when the action is performed on the policy.  <b>Note:</b> It contains a link. On clicking the link, the screen appears where you can view the details of the respective related object.
Status Reason	Indicates the reason why the status of the policy is changed.

**Note:** You can manually add a log entry for the policy by clicking the **Add Log Entry** link in the upper right corner of the **Policy Log** zone.

## Activating a Policy

### Procedure

To activate a policy:

1. Search for the policy in the **Policy** screen.
2. In the **Search Results** section, click the link in the **Policy Information** column corresponding to the policy that you want to activate.

The **Policy** screen appears.

3. Ensure that the **Main** tab is selected.
4. Click the **Activate** button in the **Policy** zone.

The status of the policy is changed to **In Force/Active**.

### **Note:**

The **Activate** button appears only when a policy of the respective category is in either of the following status:

Policy Category	Status
Fully-Insured Group or Fully-Insured Individual	<ul style="list-style-type: none"> <li>• Pending</li> <li>• Pending Termination</li> </ul>
Self-Funded	<ul style="list-style-type: none"> <li>• Pending</li> </ul>

## Editing a Policy

### Prerequisites

To edit a policy, you should have:

- Values defined for the **C1-SourceSystemLookup** extendable lookup

**Note:** This prerequisite is applicable only when you want to define a fully-insured group policy.

- Values defined for the **RUNOUT\_ADM\_OPT\_FLG** lookup field

**Note:** This prerequisite is applicable when you want to define a self-funded policy.

### **Procedure**

To edit a policy:

1. Search for the policy in the **Policy** screen.
2. In the **Search Results** section, click the link in the **Policy Information** column corresponding to the policy whose details you want to edit.

The **Policy** screen appears.

3. Ensure that the **Main** tab is selected.
4. Click the **Edit** button in the **Policy** zone.

The **Policy** screen appears. It contains the following sections:

- **Main** - Used to specify the basic details about the policy.
- **Persons** - Used to associate persons with the policy.
- **Characteristics** - Used to define the characteristics for the policy.

The **Main** section contains the following fields:

<b>Field Name</b>	<b>Field Description</b>	<b>Mandatory (Yes or No)</b>
Policy Information	Displays information about the policy.	Not applicable
Policy Type	Indicates the policy type using which the policy is defined.	Not applicable
Status	Indicates the status of the policy. The valid values are: <ul style="list-style-type: none"> <li>• Pending</li> <li>• In Force/Active</li> <li>• Runout</li> <li>• Post Runout</li> </ul>	Not applicable
	<b>Note:</b> This field appears when you are editing a policy which is created using a policy type where the policy category is set to <b>Self-Funded</b> .	
Policy Number	Used to specify the policy number.	Yes
Description	Used to specify the description for the policy.	Yes
Source System	Used to indicate the external system from where the policy is originated.	Yes
	<b>Note:</b> This field appears when you are editing a policy which is created using a policy type where the policy category is set to <b>Fully-Insured Group</b> or <b>Fully-Insured Individual</b> .	

Field Name	Field Description	Mandatory (Yes or No)
Start Date	Used to specify the date from when the policy is effective.	Yes
	<p><b>Note:</b></p> <p>The policy start date cannot be later than the policy end date.</p> <p>You cannot change the start date of a self-funded policy when it is in the <b>In Force/Active</b>, <b>Runout</b>, or <b>Post Runout</b> status.</p>	
End Date	Used to specify the date till when the policy is effective.	Yes
	<p><b>Note:</b></p> <p>The policy end date cannot be earlier than the policy start date.</p> <p>You cannot change the end date when the self-funded policy is in the <b>Runout</b> status.</p> <p>You cannot set the end date of a self-funded policy to a date which is later than or equal to the start date of a pricing rule which is defined for the <b>Runout</b> status.</p> <p>You cannot change the end date when the policy is renewed.</p>	
Runout End Date	Used to specify the date when the runout period of the self-funded policy ends.	No
	<p><b>Note:</b></p> <p>This field appears when you are editing a policy which is created using a policy type where the policy category is set to <b>Self-Funded</b>.</p> <p>The runout end date cannot be earlier than or equal to the policy end date.</p> <p>The runout end date cannot be earlier than or equal to the system date when the policy is in the <b>Runout</b> status.</p> <p>You cannot remove the runout end date when the policy is in the <b>Runout</b> or <b>Post Runout</b> status.</p> <p>You cannot set the runout end date to a date which is later than or equal to the start date of a pricing rule which is defined for the <b>Post Runout</b> status.</p> <p>You cannot set the runout end date to a date which is earlier than the end date of a pricing rule which is defined for the <b>Runout</b> status.</p>	

Field Name	Field Description	Mandatory (Yes or No)
Runout Administration Fees	<p>Used to indicate whether the administration fees must be charged when the claim transaction for the self-funded policy is processed in the runout period. The valid values are:</p> <ul style="list-style-type: none"> <li>• None</li> <li>• Percentage of Claim</li> </ul>	No
	<p><b>Note:</b></p> <p>At present, this field is used only for the informational purposes and is not considered during the billable charge creation for the claim transactions which are received in the runout period of the policy.</p> <p>This field appears when you are editing a policy which is created using a policy type where the policy category is set to <b>Self-Funded</b>.</p>	

<b>Note:</b>	
The <b>Edit</b> button appears when a policy of the respective category is in either of the following status:	
Policy Category	Status
Fully-Insured Group or Fully-Insured Individual	<ul style="list-style-type: none"> <li>• In Force/Active</li> <li>• Canceled</li> <li>• Pending Cancellation</li> <li>• Pending</li> <li>• Pending Reinstatement</li> <li>• Pending Termination</li> <li>• Terminated</li> </ul>
Self-Funded	<ul style="list-style-type: none"> <li>• In Force/Active</li> <li>• Pending</li> <li>• Runout</li> </ul>

5. Modify the required details in the **Main** section.
6. Associate the persons with the policy, if required.

**Note:** While editing a policy, you must ensure that one person is associated as the main customer of the policy.

7. Define, edit, or remove characteristics of the policy, if required.
8. Click **Save**.

The changes made to the policy are saved.

## Manually Changing the Status of a Self-Funded Policy to Runout

### Prerequisites

To manually change the status of a self-funded policy to **Runout**, you should have:

- Runout end date specified in the self-funded policy.

### Procedure

To manually change the status of a self-funded policy to **Runout**:

1. Search for the self-funded policy in the **Policy** screen.
2. In the **Search Results** section, click the link in the **Policy Information** column corresponding to the self-funded policy whose status you want to change.

The **Policy** screen appears.

3. Ensure that the **Main** tab is selected.
4. Click the **Runout** button in the **Policy** zone.

The status of the self-funded policy is changed to **Runout**.

#### **Note:**

The **Runout** button appears when the self-funded policy is in the **In Force/Active** status.

You cannot transition a self-funded policy to the **Runout** status when:

- The self-funded policy is renewed.
- The runout end date is not specified.
- The policy end date is earlier than the system date.

## Renewing a Self-Funded Policy of a Bill Group

Oracle Revenue Management and Billing enables you to renew a self-funded policy which is associated with a bill group. However, note that you can renew a self-funded policy when it is in the **In Force/Active** status and is not yet renewed. For more information, see [Self-Funded Policy Renewal](#) on page 365.

### Procedure

To renew a self-funded policy of a bill group:

1. Search for the bill group who is associated with the self-funded policy (which you want to renew) in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **View** () icon corresponding to the bill group whose details you want to view.

The **Person** tab appears in the **Customer 360° Information** screen.

3. Click the **Pricing Information** tab.

The **Pricing Information** tab appears.

4. In the **Bill Group Self-Funded Policy Information** zone, click the **Renew** () icon in the **Renew** column corresponding to the self-funded policy which you want to renew.

The **Policy** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the renewed policy.
- **Persons** - Used to associate or disassociate persons from the renewed policy.

**Note:** You cannot disassociate persons who are associated with the base policy using a policy person role which is specified in the **Bill Group Policy Person Role** or **Parent Customer Policy Person Role** option type of the **C1-ASOBLNG** feature configuration.

- **Characteristics** - Used to define the characteristics for the renewed policy.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Base Policy Information	Indicates the policy which you want to renew.	Not applicable
Policy Type	Indicates the policy type using which the base policy is created.	Not applicable
Policy Number	Used to specify the policy number of the renewed policy.	Yes
Description	Used to specify the description for the renewed policy.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Start Date	Used to specify the date from when the renewed policy is effective.	Yes
	<p><b>Note:</b></p> <p>By default, the start date is set to the base policy's end date plus one day. For example, if the base policy's end date is 12-31-2018, then by default, the renewed policy's start date is set to 01-01-2019.</p> <p>The start date cannot be later than the end date.</p> <p>The start date cannot be earlier than or equal to the base policy's end date.</p>	
End Date	Used to specify the date till when the renewed policy is effective.	Yes
	<p><b>Note:</b> The end date cannot be earlier than the start date.</p>	
Runout End Date	Used to specify the date when the runout period of the renewed policy ends.	No
	<p><b>Note:</b> The runout end date cannot be earlier than or equal to the renewed policy's end date.</p>	
Runout Administration Fees	<p>Used to indicate whether the administration fees must be charged when the claim transaction for the policy is processed in the runout period. The valid values are:</p> <ul style="list-style-type: none"> <li>• None</li> <li>• Percentage of Claim</li> </ul>	No
	<p><b>Note:</b> At present, this field is used only for the informational purposes and is not considered during the billable charge creation for the claim transactions which are received in the runout period of the policy.</p>	

Field Name	Field Description	Mandatory (Yes or No)
Copy Pricing Rules	<p>Used to indicate whether you want to copy the pricing rules of the base policy to the renewed policy. If you select the <b>Copy Pricing Rules</b> option, the system copies the following pricing rules of the base policy:</p> <ul style="list-style-type: none"> <li>• Claim</li> <li>• Retention Type Claim Based</li> <li>• Retention Type Enrollment Based</li> <li>• Recurring Flat Fees</li> <li>• Ancillary</li> </ul>	No
	<p><b>Note:</b></p> <p>While copying a pricing rule, the start and end dates of the new pricing rule are set to the renewed policy's start and end dates, respectively.</p> <p>If there are multiple pricing rules which are created using the same pricing rule type and are effective for the different date range, the system copies only one pricing rule from the base policy with the latest date range.</p>	

**Note:** The **Renew** icon appears when the policy is in the **In Force/Active** status and it is not yet renewed.

5. Enter the required details in the **Main** section.
6. Associate or disassociate persons from the renewed policy, if required.
7. Define, edit, or remove characteristics of the renewed policy, if required.
8. Click **Save**.

The renewed policy is created in the **Pending** status. The renewal date is stamped corresponding to the base policy in the **Bill Group Self-Funded Policy Information** zone.

## Viewing the Log of a Policy

### Procedure

To view the log of a policy:

1. Search for the policy in the **Policy** screen.
2. In the **Search Results** section, click the link in the **Policy Information** column corresponding to the policy whose details you want to view.

The **Policy** screen appears.

3. Click the **Log** tab.

The **Log** tab appears.

4. View the complete trail of actions performed on the policy in the **Policy Log** zone.

## Adding a Log Entry for a Policy

#### Procedure

To add a log entry for a policy:

1. Search for the policy in the **Policy** screen.
2. In the **Search Results** section, click the link in the **Policy Information** column corresponding to the policy for which you want to add a log entry.

The **Policy** screen appears.

3. Click the **Log** tab.

The **Log** tab appears.

4. Click the **Add Log Entry** link in the upper right corner of the **Policy Log** zone.

The **Add Policy Log** window appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Policy Information	Displays information about the policy.	Not applicable
Log Details	Used to specify additional comments for the policy.	Yes

5. Enter the comments in the **Log Details** field.
6. Click **Save**.

The log entry is added in the **Policy Log** zone.

# Chapter 6

---

## Customer Registration

---

### Topics:

- [Customer Registration \(Without Approval\) Status Transition](#)
- [Customer Registration \(With Approval\) Status Transition](#)
- [Customer Registration Template](#)
- [Customer Registration Type](#)
- [Customer Registration \(Used for Searching\)](#)
- [Customer Registration \(Used for Viewing\)](#)

Until now, you were able to create person, account, policy, and policy plan from the different screens. Now, ORMB provides the ability to create a person, multiple accounts for the person, multiple policies for the person, and multiple policy plans for the policy from the same user interface. A new object named **Customer Registration** is introduced in this release. Through a customer registration object, you can create person, accounts, policies, and policy plans at the same time from the same interface. Before creating a customer registration object, you need to create the following:

- Customer Registration Template
- Customer Registration Type

While creating a customer registration object, you need to specify the following:

- A customer registration type using which the customer registration object should be created
- A source system from the customer information is received
- A type of person that you want to create through the customer registration object

Once you specify the above details, the **Customer Registration** screen appears with a set of pages and sections which are added in the respective person template. The default values for the fields, characteristic types, identifier types, and phone types are shown as specified in the person template. In addition, the field values, characteristic types, characteristic values, identifier types, identifier values, phone types, and phone numbers are disabled as specified in the person template. On the Accounts page, you can view one row for each account template which is added in the customer registration type. You can then edit the row and thereby create an account for the person. You can create multiple accounts for the person using the same or different template.

### Note:

You cannot create sort records and derivation and pricing parameters for the bill group from the **Customer Registration** screen. You can only create these from the **Customer 360° Information** screen or using the health care inbound message.

The system creates effective dated address using the address business object which is specified in the customer registration type. By default, the account override address is effective from the date when the customer registration object is created in the system.

On the **Policies** page, you can view one row for each policy template which is added in the customer registration type. You can then edit the row and thereby

create a policy for the person. You can create multiple policies for the person using the same or different template. On clicking the **Add** icon corresponding to the policy row, you can view one row for each policy plan template which is added in the customer registration type. You can then edit the row and thereby create a policy plan for the policy.

On clicking the **View/Edit** icon or the **Add New Account** button in the **Accounts** page, the **Customer Registration - Add Account** screen appears with a set of pages and sections which are added in the respective account template. The default values for the fields, characteristic types, and identifier types are shown as specified in the account template. In addition, the field values, characteristic types, characteristic values, identifier types, and identifier values are disabled as specified in the account template.

On clicking the **View/Edit** icon or the **Add New Policy** button in the **Policies** page, you need to specify a policy type. The policy type indicates the category to which the policy belongs (i.e. whether it is Self Funded, Fully-Insured Group, or Fully-Insured Individual) and the policy business object using which the policy should be created. Once you specify a policy type, the **Policy** screen appears with a set of sections which are added in the respective policy template. The default values for the fields and characteristic types are shown as specified in the policy template. In addition, the field values, characteristic types, and characteristic values are disabled as specified in the policy template. You can create one or more policies for the person using the same or different policy type.

On clicking the **View/Edit** icon or the **Add New Plan** button corresponding to a policy plan row in the **Policies** page, the **Plan** screen appears with a set of sections which are added in the respective policy plan template. The default values for the fields and characteristic types are shown as specified in the policy plan template. In addition, the field values, characteristic types, and characteristic values are disabled as specified in the policy plan template.

You can save the person, account, policy, and policy plan details as and when you are entering the data by clicking the **Save as Draft** button. On clicking the **Save as Draft** button, the system creates a customer registration object in the Draft status. The status of the policies which are created through the customer registration object is set to Pending. Once the person, account, policy, and policy plan details are specified, you can click the **Validate and Save** button. The system then validates the information. You can edit, delete, or submit a customer registration object when it is in the **Draft** status. On submitting a customer registration object, the person, accounts, policies, and policy plans are created in the system. Finally, the status of the customer registration object is changed to the following depending on the type of person:

Person Type	Status
Parent Customer	Parent Customer Approved
Bill Group	Bill Group Approved
Any Other Person Type Other Than Parent Customer and Bill Group	Complete

You can optionally configure the approval process for the customer registration. If the **Approval Required** option is selected in the customer registration type, the status of the customer registration object is changed to **Approval In Progress** on submitting it. A To Do using the approval To Do type is created and assigned to the users with the approval To Do role. The approver can

then review the customer registration object and accordingly approve, reject, or request the submitter to resubmit the customer registration object for approval. On approving a customer registration object, the person, accounts, policies, and policy plans are created in the system. Finally, the status of the customer registration object is changed to the following depending on the type of person:

Person Type	Status
Parent Customer	Parent Customer Approved
Bill Group	Bill Group Approved
Any Other Person Type Other Than Parent Customer and Bill Group	Complete

If the approver rejects a customer registration object due to some reason, the status of the customer registration object is changed to **Rejected**. However, if the approver requests the submitter to resubmit a customer registration object for approval after making the required changes, the status of the customer registration object is changed to **Draft**. The submitter can then make the required changes and resubmit the customer registration object for approval.

The system provides the following two options while defining a customer registration type:

- Manual Billing Hierarchy and Pricing**- Used when you want to inform the user to create the billing hierarchy and pricing for the parent customer manually. In other words, you want the user to create the required bill groups for the parent customer, the bill group's accounts, pricing rules, bill group sorting information, and bill group derivation and pricing parameters. If this option is selected, a To Do is created using the **Billing Hierarchy and Pricing To Do** type and assigned to the users with the **Billing Hierarchy and Pricing To Do** role. This feature can be used only for customer registration objects where the person type is set to **Parent Customer**. Once the billing hierarchy and pricing is created for the parent customer, the user must complete the corresponding To Do which is created using the **Billing Hierarchy and Pricing To Do** type. On executing the **Customer Registration Monitor (C1-CUSRG)** batch, the system considers all customer registration objects which are in the **Parent Customer Approved** or **Pending Pricing Correction** status. It checks whether the corresponding To Do (if any) created using the **Billing Hierarchy and Pricing To Do** type is completed. If so, it changes the status of the customer registration object to the following depending on whether the **Final Approval Required** option is selected:

Final Approval Required (Yes or No)	Status
Yes	Pending Final Approval
No	Complete

- Final Approval Required**- Used to indicate whether the final approval is required once the approver at the first level approves the customer registration object. Ideally, the final approval is required when the **Manual Billing Hierarchy and Pricing** option is selected. This ensures that the information related to the following entities is created and verified before the customer registration object moves to the **Complete** status:
  - Bill Group

- Bill Group's Accounts
- Bill Group's Sorting Records
- Bill Group's Derivation and Pricing Parameters
- Pricing Rules for the Policy Plans

If this option is selected, a To Do is created using the **Final Approval To Do** type and assigned to the users with the **Final Approval To Do** role. This feature can be used only for customer registration objects where the person type is set to **Parent Customer**. Once the user with the **Final Approval To Do** role approves the customer registration object, the status of the customer registration object is changed to **Complete**.

If the approver requests the submitter to resubmit a customer registration object for approval, the status of the customer registration object is changed to **Pending Pricing Correction**.

**Note:** The system enables you to create maximum 10 accounts and 5 policies for a person and maximum 10 policy plans for a policy through a customer registration object from the user interface.

Once the status of a customer registration object is changed to **Complete** or **Bill Group Approved**, the system changes the status of the policies created through the customer registration object to **In Force/Active**. In addition, the status of the pricing rules which are created for such policies' policy plans is set to **Active**.

You can also create a customer registration object using the **File Upload Interface** utility through an inbound message. On creating an inbound message using the **File Upload Interface** utility, the status of the inbound message is set to **Pending**. Once the inbound message is processed, a customer registration object is created in the following status depending on the person type:

Person Type	Status
Parent Customer	Complete
Bill Group	Bill Group Approved
Any Other Person Type Other Than Parent Customer and Bill Group	Complete

**Note:** The above status transition is mentioned based on the assumption that the data uploaded through the **File Upload Interface** utility will be pre-approved and does not require any approval in the system.

At present, only the XML format is supported for creating a customer registration object using the File Upload Interface utility through an inbound message. To implement the Customer Registration feature, the following new screens are introduced in this release:

- Customer Registration Template
- Customer Registration Type
- Customer Registration

## Customer Registration (Without Approval) Status Transition

The following figure graphically indicates how a customer registration moves from one status to another when the approval process is not configured in the respective customer registration type:

## Customer Registration (With Approval) Status Transition

The following figure graphically indicates how a customer registration moves from one status to another when the approval process is configured in the respective customer registration type:

## Customer Registration Template

A customer registration template encapsulates the following information:

- List of pages that should appear when you create a person, account, policy, or policy plan using the respective customer registration template
- List of sections that should appear in each page
- Field or characteristic attributes, such as:
  - Default value for a field or characteristic type
  - Default value for a person or account identifier type or phone type
  - Primary identifier type for a person or account
  - Mandatory field in each section
  - Enable or disable the field value, identifier type, identifier value, characteristic type, characteristic value, phone type, or phone number

You can create multiple customer registration templates for person, account, policy and policy plan. Depending on whether you are creating a customer registration template for person, account, policy or policy plan, you can include the following pages and define field or characteristic attributes for the following sections:

Template Category	Template Page	Template Section
Person	Main	Person Main
		Person Names
		Person Identifiers
		Person Phones
	Contact Information	Person Address
		Person Email
	Accounts	-
	Person Hierarchy	Person Hierarchy – Main
		Person Hierarchy – Characteristics
	Person Characteristics	Person Characteristics
	Policies	Policies
		Parent Policies
	Registration Characteristics	Customer Registration Characteristics
Account	Main	Account Information

Template Category	Template Page	Template Section
		Account Identifiers
	Auto Pay	Account Autopay
	Persons	Main
		Account Address Override Information
	Bill Routing	
Account Characteristics	Account Characteristics	
Policy	Policy – Main	Policy Main
		Policy Persons
		Policy Characteristics
Policy Plan	Plan	Plan - Main
		Plan - Characteristics

## Search Customer Registration Template

The **Search Customer Registration Template** zone allows you to search for a customer registration template using various search criteria. It contains the following sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	<p>Used to indicate whether you want to search for customer registration templates using the banking template or the healthcare template details. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Banking Template</b> - Used to indicate whether you want to search for customer registration templates created using the <b>C1-CustomerRegistrationTmplBK</b> business object.</li> <li>• <b>Healthcare Template</b> - Used to indicate whether you want to search for customer registration templates created using the <b>C1-CustomerRegistrationTmplHC</b> business object.</li> </ul> <p><b>Note:</b> By default, the <b>Banking Template</b> option is selected.</p>	Yes
Template	Used to search for a particular template.	No

Field Name	Field Description	Mandatory (Yes or No)
Description	Used to search for customer registration templates having a particular description.	No
Template Category	Used to search for customer registration templates which belong to a particular category. The valid values are: <ul style="list-style-type: none"> <li>Account</li> <li>Person</li> <li>Policy</li> <li>Policy Plan</li> </ul>	No
	<b>Note:</b> The <b>Policy</b> and <b>Policy Plan</b> options appear when you select the <b>Healthcare Template</b> option from the <b>Search By</b> list.	

**Note:** You must specify at least one search criterion while searching for a customer registration template.

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Template	Displays the customer registration template.
Description	Displays the description of the customer registration template.
Template Category	Displays the category to which the customer registration template belongs. The valid values are: <ul style="list-style-type: none"> <li>Account</li> <li>Person</li> <li>Policy</li> <li>Policy Plan</li> </ul>
Edit	On clicking the <b>Edit</b> (✎) icon, the <b>Customer Registration Template</b> screen appears where you can edit the details of the customer registration template.
Duplicate	On clicking the <b>Duplicate</b> (📄) icon, the <b>Customer Registration Template</b> screen appears where you can define a new customer registration template using an existing customer registration template.
Delete	On clicking the <b>Delete</b> (🗑) icon, you can delete the customer registration template. <p><b>Note:</b> You can delete a customer registration template when a customer registration is not yet defined using the customer registration template.</p>

On clicking the **Broadcast** (📡) icon corresponding to a customer registration template, the **Customer Registration Template** zone appears with the details of the respective customer registration template.

By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (🔍) icon in the upper right corner of this zone.

**Note:** Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

## Customer Registration Template

The **Customer Registration Template** zone displays the details of the customer registration template. It also allows you to edit, copy, and delete the customer registration template. It contains the following sections

- **Main** - Displays the basic information about the customer registration template. It contains the following fields:

Field Name	Field Description
Template	Displays the customer registration template.
Template Category	Indicates the category for which the customer registration template is created in the system. The valid values are: <ul style="list-style-type: none"> <li>• Account</li> <li>• Person</li> <li>• Policy</li> <li>• Policy Plan</li> </ul> <p><b>Note:</b> The <b>Policy</b> and <b>Policy Plan</b> template categories appear when the customer registration template is created using the <b>C1-CustomerRegistrationTmplHC</b> business object.</p>
Description	Displays the description of the customer registration template.
Detailed Description	Displays additional information about the customer registration template.

- **Template Pages** - The **Template Pages** section lists the template pages, template sections added for a particular template category in a customer registration template. It contains the following columns:

Column Name	Column Description
Template Page	Indicates the template page which is added for the template category.
Template Section	Indicates the template section which is defined for the template page.

- **Record Actions** - The **Record Actions** section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the customer registration template.
Delete	Used to delete the customer registration template. <p><b>Note:</b> You can delete a customer registration template when a customer registration is not yet created using the customer registration template.</p>

Button Name	Button Description
Duplicate	Used to create a new customer registration template using an existing customer registration template.

- **Record Information** - The **Record Information** section contains the following field:

Field Name	Field Description
Business Object	Indicates the business object using which the customer registration template is created in the system. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.

By default, the **Customer Registration Template** zone does not appear in the **Customer Registration Template** screen. It appears when you click the **Broadcast** (  ) icon corresponding to the customer registration template in the **Search Customer Registration Template** zone.

## Searching for a Customer Registration Template

### Prerequisites

To search for a customer registration template, you should have:

- Customer registration template business objects defined in the application
- Customer registration templates defined in the application
- Customer registration templates associated with the template categories

### Procedure

To search for a customer registration template:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **C** and then click **Customer Registration Template**.  
A sub-menu appears.
3. Click the **Search** option from the **Customer Registration Template** sub-menu.

The **Customer Registration Template** screen appears.

4. Enter the search criteria in the **Search Customer Registration Template** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search**.

A list of customer registration templates that meet the search criteria appears in the **Search Results** section.

## Viewing the Customer Registration Template Details

### Procedure

To view the details of a customer registration template:

1. Search for the customer registration template in the **Customer Registration Template** screen.
2. In the **Search Results** section, click the **Broadcast** (  ) icon corresponding to the customer registration template whose details you want to view.

The **Customer Registration Template** zone appears.

3. View the details of the customer registration template in the **Customer Registration Template** zone.

## Defining a Customer Registration Template

### Prerequisites

To define a customer registration template, you should have:

- Customer registration template business objects defined in the application
- Template categories defined in the application
- Template pages and sections defined in the application

### Procedure

To define a customer registration template:

1. Click the **Admin** link in the **Application** toolbar.

A list appears.

- From the **Admin** menu, select **C** and then click **Customer Registration Template**.

A sub-menu appears.

- Click the **Add** option from the **Customer Registration Template** sub-menu.

The **Select Business Object** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Customer Registration Template Business Object	Used to indicate the business object using which you want to define the customer registration template. The valid values are: <ul style="list-style-type: none"> <li><b>Customer Registration Template - Banking</b> - Used to indicate that you want to define a customer registration template using the <b>C1-CustomerRegistrationTmplBK</b> business object.</li> <li><b>Customer Registration Template - Health Care</b> - Used to indicate that you want to define a customer registration template using the <b>C1-CustomerRegistrationTmplHC</b> business object.</li> </ul>	Yes

**Tip:** Alternatively, you can access the **Select Business Object** screen by clicking the **Add** button in the **Page Title** area of the **Customer Registration Template** screen.

- Select the required customer registration template business object from the respective field.
- Click **OK**.

The **Customer Registration Template for Banking** or the **Customer Registration Template for Healthcare** screen appears depending upon the selected business object. It contains the following sections:

- Main** - Used to specify basic details about the customer registration template.
- Template Pages** - Used to add template pages and its related sections for the customer registration template.
- Main** - The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Template	Used to specify the customer registration template.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Template Category	Used to indicate the category for which you want to define the customer registration template. The valid values are: <ul style="list-style-type: none"> <li>• Account</li> <li>• Person</li> <li>• Policy</li> <li>• Policy Plan</li> </ul>	Yes
	<b>Note:</b> The <b>Policy</b> and <b>Policy Plan</b> options appear when you are defining a customer registration template using the <b>CI-CustomerRegistrationTmplHC</b> business object.	
Business Object	Indicates the business object using which you want to define the customer registration template.	Not applicable
Description	Used to specify the description for the customer registration template.	Yes
Detailed Description	Used to specify additional information about the customer registration template.	No

6. Enter the required details in the **Main** section.
7. Add the template pages and template sections for the customer registration template in the **Template Pages** section.
8. Set the field attributes for the template sections in the **Template Pages** section.
9. Click **Save**.

The customer registration template is defined.

## **Adding the Pages and Sections in a Customer Registration Template**

### **Prerequisites**

To add a page and its related sections in a customer registration template, you should have:

- Template categories defined in the application
- Template pages and sections defined in the application

**Procedure**

To define a customer registration template:

1. Ensure that the **Template Pages** section is expanded when you are defining, editing, or copying a customer registration template.

The **Template Pages** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)						
Template Page	Used to indicate the page which you want to add in a customer registration template for a particular template category.	Yes (Conditional) <b>Note:</b> This field is required while adding pages and sections in a customer registration template.						
Template Section	Used to indicate the section and its field attributes which you want to define for a particular page in a customer registration template. <b>Note:</b> On clicking the <b>Add</b> (+) icon, the following columns appear: <table border="1" data-bbox="609 913 1104 1344"> <thead> <tr> <th>Column Name</th> <th>Column Description</th> </tr> </thead> <tbody> <tr> <td>Template Section</td> <td>Used to indicate the section for a particular page.</td> </tr> <tr> <td>Field Attributes</td> <td>Used to define the field attributes of a section. <b>Note:</b> On clicking the <b>Add</b> (+) icon, you can define the field attributes for the section.</td> </tr> </tbody> </table>	Column Name	Column Description	Template Section	Used to indicate the section for a particular page.	Field Attributes	Used to define the field attributes of a section. <b>Note:</b> On clicking the <b>Add</b> (+) icon, you can define the field attributes for the section.	Yes (Conditional) <b>Note:</b> This field is required while adding pages and sections in a customer registration template.
Column Name	Column Description							
Template Section	Used to indicate the section for a particular page.							
Field Attributes	Used to define the field attributes of a section. <b>Note:</b> On clicking the <b>Add</b> (+) icon, you can define the field attributes for the section.							

The following table shows the pages and sections which you can add for a particular template category.

Template Category	Template Pages		Template Sections	
	Template Page	Mandatory (Yes or No)	Template Section	Mandatory (Yes or No)
Account	Auto Pay	No	Account Autopay	No
	Account Characteristics	No	Account Characteristics	No

Template Category	Template Pages		Template Sections	
	Template Page	Mandatory (Yes or No)	Template Section	Mandatory (Yes or No)
	Credit Ratings	No	Credit Rating	No
	<div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This template page appears when you are defining, editing, or copying a customer registration template which is created using the <b>C1-Customer Registration TmplBK</b> business object.</p> </div>			
	Main	Yes	Account Identifiers	Yes
			Account Information	Yes
			Account Address Override Information	No
	Persons	Yes	Bill Routing	Yes
			Main	Yes
Person	Accounts	No	-	-
	Contact Information	No	Person Address	No
			Person Email	No

Template Category	Template Pages		Template Sections	
	Template Page	Mandatory (Yes or No)	Template Section	Mandatory (Yes or No)
	Deal Information  <b>Note:</b> This template page appears when you are defining, editing, or copying a customer registration template which is created using the <b>C1-Customer Registration TmplBK</b> business object.	No	Deal-Main	No
	Main	Yes	Person Identifiers	Yes
			Person Main	Yes
			Person Names	Yes
			Person Phones	No
	Person Characteristics	No	Person Characteristics	No
	Person Hierarchy	No	Person Hierarchy-Characteristics	No
			Person Hierarchy-Main	No

Template Category	Template Pages		Template Sections	
	Template Page	Mandatory (Yes or No)	Template Section	Mandatory (Yes or No)
	Policies	No	Parent Policy	No
	<div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This template page appears only when you are defining, editing, or copying a customer registration template which is created using the <b>C1-Customer Registration TmplHC</b> business object.</p> </div>		Policies	No
	Registration Characteristics	No	Customer Registration Characteristics	No
Policy	Policy-Main	Yes	Policy Characteristics	No
			Policy-Main	Yes
			Policy Persons	No
<div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This template category appears only when you are defining, editing, or copying a customer registration template which is created using the <b>C1-CustomerRegistration TmplHC</b> business object.</p> </div>				

Template Category	Template Pages		Template Sections	
	Template Page	Mandatory (Yes or No)	Template Section	Mandatory (Yes or No)
Policy Plan  <b>Note:</b> This template category appears when you are defining, editing, or copying a customer registration template which is created using the <b>C1-CustomerRegistration TmplHC</b> business object.	Plan	Yes	Plan-Characteristics	No
			Plan-Main	Yes

- Enter the required details in the **Template Pages** section.
- Set the field attributes for the template section, if required.
- If you want to add more than one page or section for the customer registration template, click the **Add (+)** icon and then repeat step 2.

**Note:** However, if you want to remove a page or section from the customer registration template, click the **Delete** (🗑️) icon corresponding to the page or section.

- Click **Save**.

The pages and sections are added in the customer registration template.

**Note:**

You can add all the template pages available for a particular template category by clicking the **Select All** check box in the upper left corner of the **Template Pages** section.

You cannot edit or delete a template page or section if a customer registration is already defined using the customer registration template.

## Setting the Field Attributes for a Template Section

### Prerequisites

To set the field attributes for a template section, you should have:

- Template pages and sections associated with the template category
- Fields for the sections defined in the application

### Procedure

To set the field attributes for a template section:

1. Ensure that the **Template Pages** section is expanded when you are defining, editing, or copying a customer registration template.

The **Template Pages** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)						
Template Page	Used to indicate the page which you want to add in a customer registration template for a particular template category.	Yes (Conditional)  <b>Note:</b> This field is required while adding pages and sections in a customer registration template.						
Template Section	Used to indicate the section and its field attributes which you want to define for a particular page in a customer registration template.  <b>Note:</b> On clicking the <b>Add</b>  icon, the following columns appear:	Yes (Conditional)  <b>Note:</b> This field is required while adding pages and sections in a customer registration template.						
	<table border="1"> <thead> <tr> <th>Column Name</th> <th>Column Description</th> </tr> </thead> <tbody> <tr> <td>Template Section</td> <td>Used to indicate the section for a particular page.</td> </tr> <tr> <td>Field Attributes</td> <td>Used to define the field attributes of a section.  <b>Note:</b> On clicking the <b>Add</b>  icon, you can define the field attributes for the section.</td> </tr> </tbody> </table>	Column Name	Column Description	Template Section	Used to indicate the section for a particular page.	Field Attributes	Used to define the field attributes of a section.  <b>Note:</b> On clicking the <b>Add</b>  icon, you can define the field attributes for the section.	
Column Name	Column Description							
Template Section	Used to indicate the section for a particular page.							
Field Attributes	Used to define the field attributes of a section.  <b>Note:</b> On clicking the <b>Add</b>  icon, you can define the field attributes for the section.							

2. Select the template page and template section from the respective columns.
3. Click the **Add**  icon in the **Field Attributes** column corresponding to the template section whose field attributes you want to set.

It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Sequence	Used to specify the sequence of the field attribute.	Yes (Conditional)
		<b>Note:</b> This field is required while setting the field attributes for a template section.
Field	Used to indicate the field for which you want to set attributes.	Yes (Conditional)
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Field Search</b> window appears.</p> <p>On specifying the field, the description of the field appears corresponding to the field.</p>	<p><b>Note:</b> This field is required while setting the field attributes for a template section.</p>
Default Field Value	Used to indicate the default value for the field in the template section.	Yes (Conditional)
	<p><b>Note:</b></p> <p>On specifying a field, the <b>Search</b> (🔍) icon appears corresponding to the <b>Default Field Value</b> field. On clicking the <b>Search</b> icon, a window appears depending on the field that you have selected.</p> <p>On specifying the default field value, the description of the default field value appears corresponding to the default field value.</p>	<p><b>Note:</b> This field is required while setting the field attributes for a template section.</p>
Required	Used to indicate whether the field is mandatory in the template section.	Yes (Conditional)
	<p><b>Note:</b> By default, the check box in the <b>Required</b> column is disabled. It is enabled when you specify the field in the <b>Field</b> column.</p>	<p><b>Note:</b> This field is required while setting the field attributes for a template section.</p>
Disable Field Value	Used to indicate whether the field is disabled in the template section.	Yes (Conditional)
	<p><b>Note:</b> By default, the check box in the <b>Disable Field Value</b> column is disabled. It is enabled when you specify the field in the <b>Field</b> column.</p>	<p><b>Note:</b> This field is required while setting the field attributes for a template section.</p>

Field Name	Field Description	Mandatory (Yes or No)
Identifier Type	Used to indicate the type of identifier for which you want to set attributes.	Yes (Conditional)
	<p><b>Note:</b></p> <p>On specifying a field, the <b>Search</b> (🔍) icon appears corresponding to the <b>Identifier Type</b> field. On clicking the <b>Search</b> icon, the <b>Search Zone for Person Identifier</b> window appears.</p> <p>On specifying the identifier type, the description of the identifier type appears corresponding to the <b>Identifier Type</b> field.</p>	<p><b>Note:</b> This field is required while setting the field attributes for a template section.</p>
Identifier Value	Used to specify the value for the identifier type for which you want to set attributes.	Yes (Conditional)
	<p><b>Note:</b> By default, this field is disabled. It is enabled when you specify the identifier type in the <b>Identifier Type</b> column.</p>	<p><b>Note:</b> This field is required while setting the field attributes for a template section.</p>
Primary ID	Used to indicate whether the identifier type and identifier value are primary or not.	Yes (Conditional)
	<p><b>Note:</b> By default, the check box in the <b>Primary ID</b> field is disabled. It is enabled when you specify the identifier type in the <b>Identifier Type</b> column.</p>	<p><b>Note:</b> This field is required while setting the field attributes for a template section.</p>
Disable Identifier Type	Used to indicate whether the identifier type is disabled in the template section.	Yes (Conditional)
	<p><b>Note:</b> By default, the check box in the <b>Disable Identifier Type</b> column is disabled. It is enabled when you specify the identifier type in the <b>Identifier Type</b> column.</p>	<p><b>Note:</b> This field is required while setting the field attributes for a template section.</p>
Disable Identifier Value	Used to indicate whether the identifier value is disabled in the template section.	Yes (Conditional)
	<p><b>Note:</b> By default, the check box in the <b>Disable Identifier Value</b> column is disabled. It is enabled when you specify the identifier value in the <b>Identifier Value</b> column.</p>	<p><b>Note:</b> This field is required while setting the field attributes for a template section.</p>

Field Name	Field Description	Mandatory (Yes or No)
Name Type	Used to indicate the type of name for which you want to set attributes.	Yes (Conditional)
	<p><b>Note:</b></p> <p>On specifying a field, the <b>Search</b> (🔍) icon appears corresponding to the <b>Name Type</b> field. On clicking the <b>Search</b> icon, the <b>Search Zone for Person Name Type</b> window appears.</p> <p>On specifying the name type, the description of the name type appears corresponding to the <b>Name Type</b> field.</p>	<p><b>Note:</b> This field is required while setting the field attributes for a template section.</p>
Name	Used to specify the name of the person.	Yes (Conditional)
	<p><b>Note:</b> By default, this field is disabled. It is enabled when you specify the name type in the <b>Name Type</b> column.</p>	<p><b>Note:</b> This field is required while setting the field attributes for a template section.</p>
Disable Name Type	Used to indicate whether the name type is disabled in the template section.	Yes (Conditional)
	<p><b>Note:</b> By default, the check box in the <b>Disable Name Type</b> column is disabled. It is enabled only when you specify the name type in the <b>Name Type</b> column.</p>	<p><b>Note:</b> This field is required while setting the field attributes for a template section.</p>
Disable Name	Used to indicate whether the specified name of the person is disabled in the template section.	Yes (Conditional)
	<p><b>Note:</b> By default, the check box in the <b>Disable Name</b> column is disabled. It is enabled when you specify the name in the <b>Name</b> column.</p>	<p><b>Note:</b> This field is required while setting the field attributes for a template section.</p>
Phone Type	Used to specify the type of phone for which you want to set attributes.	Yes (Conditional)
	<p><b>Note:</b></p> <p>On specifying a field, the <b>Search</b> (🔍) icon appears corresponding to the <b>Phone Type</b> field. On clicking the <b>Search</b> icon, the <b>Search Zone for Phone Type</b> window appears.</p> <p>On specifying the phone type, the description of the phone type appears corresponding to the <b>Phone Type</b> field.</p>	<p><b>Note:</b> This field is required while setting the field attributes for a template section.</p>

Field Name	Field Description	Mandatory (Yes or No)
Phone Number	Used to specify the phone number.	Yes (Conditional)
	<b>Note:</b> By default, this field is disabled. It is enabled when you specify the phone type in the <b>Phone Type</b> column.	<b>Note:</b> This field is required while setting the field attributes for a template section.
Disable Phone Type	Used to indicate whether the phone type is disabled in the template section.	Yes (Conditional)
	<b>Note:</b> By default, the check box in the <b>Disable Phone Type</b> column is disabled. It is enabled when you specify the phone type in the <b>Phone Type</b> column.	<b>Note:</b> This field is required while setting the field attributes for a template section.
Disable Phone Number	Used to indicate whether the specified phone number is disabled in the template section.	Yes (Conditional)
	<b>Note:</b> By default, the check box in the <b>Disable Phone Number</b> column is disabled. It is enabled when you specify the phone number in the <b>Phone Number</b> column.	<b>Note:</b> This field is required while setting the field attributes for a template section.
Characteristic Information	Used to indicate the characteristic type and characteristic value for which you want to set attributes.	Yes (Conditional)
	<p><b>Note:</b></p> <p>On specifying the characteristic type, the characteristic value field appears in the <b>Characteristic Information</b> column.</p> <p>On specifying a predefined characteristic type, the <b>Search</b> (🔍) icon appears corresponding to the characteristic value field. On clicking the <b>Search</b> icon, the <b>Predefined Characteristic Search</b> window appears.</p> <p>On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the characteristic value field..</p>	<b>Note:</b> This field is required while setting the field attributes for a template section.
Disable Characteristic Type	Used to indicate whether the characteristic type is disabled in the template section.	Yes (Conditional)
	<b>Note:</b> By default, the check box in the <b>Disable Characteristic Type</b> column is disabled. It is enabled when you specify the characteristic type in the <b>Characteristic Type</b> column.	<b>Note:</b> This field is required while setting the field attributes for a template section.

Field Name	Field Description	Mandatory (Yes or No)
Disable Characteristic Value	Used to indicate whether the characteristic is disabled in the template section.	Yes (Conditional)
	<b>Note:</b> By default, the check box in the <b>Disable Characteristic Value</b> column is disabled. It is enabled when you specify the characteristic value in the <b>Characteristic Value</b> column.	<b>Note:</b> This field is required while setting the field attributes for a template section.

- Enter the required details in the **Template Pages** section.
- If you want to set more than one field attribute for the template section, click the **Add (+)** icon and then repeat step 2.

**Note:** However, if you want to remove a field attribute from the template section, click the **Delete (🗑)** icon corresponding to the field.

- Click **Save**.

The field attributes are set for the template section.

## Editing a Customer Registration Template

### Prerequisites

To edit a customer registration template, you should have:

- Template categories defined in the application
- Template pages and sections defined in the application

### Procedure

To edit a customer registration template:

- Search for the customer registration template in the **Customer Registration Template** screen.
- In the **Search Results** section, click the **Edit (📎)** icon in the **Edit** column corresponding to the customer registration template whose details you want to edit.

The **Customer Registration Template for Banking** or the **Customer Registration Template for Healthcare** screen appears depending upon the business object using which the customer registration template is defined. It contains the following sections:

- **Main** - Used to specify basic details about the customer registration template.
- **Template Pages** - Used to add template pages and its related sections for the customer registration template.
- **Main** - The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Template	Displays the customer registration template.	Not applicable
Template Category	Used to indicate the category for which you want to define the customer registration template. The valid values are: <ul style="list-style-type: none"> <li>• Account</li> <li>• Person</li> <li>• Policy</li> <li>• Policy Plan</li> </ul>	Yes
	<b>Note:</b> The <b>Policy</b> and <b>Policy Plan</b> options appear when you are defining a customer registration template using the <b>C1-CustomerRegistrationTmplHC</b> business object.	
Business Object	Indicates the business object using which the customer registration template is defined in the system.	Not applicable
Description	Used to specify the description for the customer registration template.	Yes
Detailed Description	Used to specify additional information about the customer registration template.	No

**Tip:** Alternatively, you can edit the details of a customer registration template by clicking the **Edit** button in the **Customer Registration Template** zone.

3. Modify the details in the **Main** section, if required.
4. Add, edit, or remove the template pages and template sections from the customer registration template, if required.
5. Add, edit, or remove the field attributes from the template section, if required.
6. Click **Save**.

The changes made to the customer registration template are saved.

**Note:** You can edit a customer registration template only when a customer registration it is not yet defined using the customer registration template.

## Copying a Customer Registration Template

Instead of creating a customer registration template from scratch, you can create a new customer registration template using an existing customer registration template. This is possible through copying a customer registration template. On copying a customer registration template, the details including the template pages, template sections, and field attributes for the template sections are copied to the new customer registration template. You can then edit the details, if required.

### Prerequisites

To copy a customer registration template, you should have:

- Customer registration template (whose copy you want to create) defined in the application
- Template categories defined in the application
- Template pages and sections defined in the application

### Procedure

To copy a customer registration template:

1. Search for the customer registration template in the **Customer Registration Template** screen.
2. In the **Search Results** section, click the **Duplicate**  icon in the **Duplicate** column corresponding to the customer registration template whose copy you want to create.

The **Customer Registration Template for Banking** or the **Customer Registration Template for Healthcare** screen appears depending upon the business object using which the customer registration template whose copy you want to create is defined. It contains the following sections:

- **Main** - Used to specify basic details about the customer registration template.
- **Template Pages** - Used to add template pages and its related sections for the customer registration template.
- **Main** - The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Template	Used to specify the customer registration template.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Template Category	Used to indicate the category for which you want to define the customer registration template. The valid values are: <ul style="list-style-type: none"> <li>• Account</li> <li>• Person</li> <li>• Policy</li> <li>• Policy Plan</li> </ul>	Yes
	<b>Note:</b> The <b>Policy</b> and <b>Policy Plan</b> options appear when you are defining a customer registration template using the <b>CI-CustomerRegistrationTmplHC</b> business object.	
Business Object	Indicates the business object using which the customer registration template is defined in the system.	Not applicable
Description	Used to specify the description for the customer registration template.	Yes
Detailed Description	Used to specify additional information about the customer registration template.	No

**Tip:** Alternatively, you can copy a customer registration template by clicking the **Duplicate** button in the **Customer Registration Template** zone.

3. Enter the required details in the **Main** section.
4. Add, edit, or remove the template pages and template sections from the customer registration template, if required.
5. Add, edit, or remove the field attributes from the template section, if required.
6. Click **Save**.

The new customer registration template is defined.

## Deleting a Customer Registration Template

### Procedure

To delete a Customer Registration Template:

1. Search for the customer registration template in the **Customer Registration Template** screen.
2. In the **Search Results** section, click the **Delete** (🗑️) icon in the **Delete** column corresponding to the customer registration template that you want to delete.

A message appears confirming whether you want to delete the customer registration template.

3. Click **OK**.

The customer registration template is deleted.

**Note:** You can delete a customer registration template when a customer registration is not yet created using the customer registration template.

**Tip:** Alternatively, you can delete a customer registration template by clicking the **Delete** button in the **Customer Registration Template** zone.

## Customer Registration Type

---

A customer registration type encapsulates the following information:

- Users with a particular access group can only create a customer registration object using the customer registration type
- Whether the customer registration type can be used to create a customer registration object from the user interface, through the inbound message, or through the **File Upload Interface** utility
- Whether the approval is required when you create, edit, or delete a customer registration object
- Whether the final level approval is required once the approver at the first level approves the customer registration object
- Whether a To Do should be created indicating that the users have to manually create the billing hierarchy and pricing for the parent customer.
- The business objects using which the person, account, policy plan, membership, and address should be created when a customer registration object is created using the customer registration type
- A customer registration template which indicates the pages and sections that should appear when you are creating a customer registration object using the customer registration type. You can specify one customer registration template for person and one or more customer registration templates for account, policy, and policy plan.
- Information, such as person names, person identifiers, person phones, person characteristics, person addresses, person hierarchy, accounts, account identifiers, account characteristics, account auto pay information, account persons, account bill routing information, policies, policy plans, policy characteristics, or policy plan characteristics, which should be copied when you create a copy of a customer registration object which is created using the customer registration type.

## Customer Registration Type List

The **Customer Registration Type List** zone lists the customer registration types that are already defined in the system. It contains the following columns:

Column Name	Column Description
Customer Registration Type	Displays the customer registration type.
Description	Displays the description of the customer registration type.
Edit	On clicking the <b>Edit</b> (✎) icon, the <b>Customer Registration Type</b> screen appears where you can edit the details of the customer registration type.
Duplicate	On clicking the <b>Duplicate</b> (📄) icon, the <b>Customer Registration Type</b> screen appears where you can define a new customer registration type using an existing customer registration type.
Delete	On clicking the <b>Delete</b> (🗑) icon, you can delete the customer registration type.  <b>Note:</b> You can delete a customer registration type when a customer registration is not yet defined using the customer registration type.

You can filter the list using various search criteria (such as, **Customer Registration Type** and **Description**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (🔍) icon in the upper right corner of this zone.

On clicking the **Broadcast** (📢) icon corresponding to a customer registration type, the **Customer Registration Type** zone appears with the details of the respective customer registration type.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

## Customer Registration Type

The **Customer Registration Type** zone displays the details of the customer registration type. It contains the following sections:

- **Main** - Displays the basic information about the customer registration type. It contains the following fields:

Field Name	Field Description
Customer Registration Type	Displays the customer registration type.
Description	Displays the description of the customer registration type.
Customer Registration Business Object	<p>Indicates the business object using which the customer registration is created in the system. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Customer Registration - Banking</b> - Indicates customer registration is created using the <b>C1-CustomerRegistrationBanking</b> business object.</li> <li>• <b>Customer Registration - Health Care</b> - Indicates customer registration is created using the <b>C1-CustomerRegistrationHC</b> business object.</li> </ul> <p><b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.</p>
Detailed Description	Displays additional information about the customer registration type.
Status	<p>Indicates the status of the customer registration type. The valid values are:</p> <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul> <p><b>Note:</b> You cannot change the status of a customer registration type to <b>Inactive</b> when the corresponding customer registration is in a status other than <b>Processed</b> or <b>Rejected</b>.</p>
Access Group	<p>Displays the user group that can access the customer registration created using the customer registration type.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Access Group</b> screen appears where you can view the details of the respective access group.</p>
Registration Source	<p>Indicates the source through which the customer registration is created using the customer registration type. The valid values are:</p> <ul style="list-style-type: none"> <li>• File Upload</li> <li>• Inbound Message</li> <li>• Manual</li> </ul>

- **Additional Data** - Displays additional information about the customer registration type. It contains the following fields:

Field Name	Field Description
Approval Required	Indicates whether approval is required while creating the customer registration using the customer registration type.
Approval To Do Type	Indicates that the To Do entry of the specified To Do type is created when you submit the customer registration for approval.
	<p><b>Note:</b></p> <p>This field appears when the <b>Approval Required</b> check box is selected.</p> <p>It has a link. On clicking the link, the <b>To Do Type</b> screen appears with the details of the respective To Do type.</p>
Approval To Do Role	Indicates that users with the specified To Do role can only approve, reject, or resubmit the customer registration for approval.
	<p><b>Note:</b></p> <p>This field appears when the <b>Approval Required</b> check box is selected.</p> <p>It has a link. On clicking the link, the <b>To Do Role</b> screen appears with the details of the respective To Do role.</p>
Submitter To Do Type	Indicates the To Do entry of the specified To Do type is created when the customer registration is resubmitted by the approver.
	<p><b>Note:</b></p> <p>It has a link. On clicking the link, the <b>To Do Type</b> screen appears where you can view the details of the respective To Do type.</p>
Submitter To Do Role	Indicates the users with the specified To Do role for whom the To Do task is created when the customer registration is resubmitted by the approver.
	<p><b>Note:</b></p> <p>It has a link. On clicking the link, the <b>To Do Role</b> screen appears where you can view the details of the respective To Do role.</p>
Final Approval Required	Indicates whether the final approval is required once the approver at the first level approves the customer registration.
	<p><b>Note:</b></p> <p>This field appears when the <b>Customer Registration Type</b> is created using the <b>C1-CustRegTypeHealthCare</b> business object.</p> <p>The final approval is required when the <b>Manual Billing Hierarchy and Pricing</b> option check box is selected.</p>

Field Name	Field Description
Final Approval To Do Type	<p data-bbox="630 205 1464 275">Indicates that the To Do entry of the specified To Do type is created when you submit the customer registration for final approval.</p> <p data-bbox="630 296 1464 478"><b>Note:</b> It has a link. On clicking the link, the <b>To Do Type</b> screen appears with the details of the respective To Do type. This field appears when the <b>Final Approval Required</b> check box is selected.</p>
Final Approval To Do Role	<p data-bbox="630 506 1464 575">Indicates that users with the specified To Do role can only approve or resubmit the customer registration for final approval.</p> <p data-bbox="630 596 1464 779"><b>Note:</b> It has a link. On clicking the link, the <b>To Do Role</b> screen appears where you can view the details of the respective To Do role. This field appears when the <b>Final Approval Required</b> check box is selected.</p>
Manual Billing Hierarchy and Pricing	<p data-bbox="630 806 1464 947">Indicates whether the required bill groups for the parent customer, the bill group's accounts, pricing rules, bill group sorting information, and bill group derivation and pricing parameters are created manually by the user while defining the customer registration.</p> <p data-bbox="630 968 1464 1178"><b>Note:</b> This field appears when the <b>Customer Registration Type</b> is created using the <b>C1-CustRegTypeHealthCare</b> business object. This feature is used only for customer registration objects where the person type is set to <b>Parent Customer</b>.</p>
Billing Hierarchy and Pricing To Do Type	<p data-bbox="630 1205 1464 1274">Indicates the To Do entry of the specified To Do type is created for the user to define or edit the billing hierarchy and pricing for the parent customer manually.</p> <p data-bbox="630 1295 1464 1505"><b>Note:</b> It has a link. On clicking the link, the <b>To Do Type</b> screen appears with the details of the respective To Do type. This field appears when the <b>Manual Billing Hierarchy and Pricing</b> check box is selected.</p>
Billing Hierarchy and Pricing To Do Role	<p data-bbox="630 1541 1464 1610">Indicates users with the specified To Do role can only define or edit the billing hierarchy and pricing for the parent customer manually.</p> <p data-bbox="630 1631 1464 1841"><b>Note:</b> It has a link. On clicking the link, the <b>To Do Role</b> screen appears where you can view the details of the respective To Do role. This field appears when the <b>Manual Billing Hierarchy and Pricing</b> check box is selected.</p>

Field Name	Field Description
Person Business Object	Indicates the business object using which the person is created while defining the customer registration.
	<b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.
Account Business Object	Indicates the business object using which the account is created while defining the customer registration.
	<b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.
Policy Plan Business Object	Indicates the business object using which the policy plan is created while defining the customer registration.
	<b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.  This field appears when the <b>Customer Registration Type</b> is created using the <b>C1-CustRegTypeHealthCare</b> business object.
Benefits Business Object	Indicates the business object using which the benefit is created while defining the customer registration.
	<b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.
Membership Business Object	Indicates the business object using which the membership is created while defining the customer registration.
	<b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.  This field appears when the <b>Customer Registration Type</b> is created using the <b>C1-CustRegTypeHealthCare</b> business object.
Address Business Object	Indicates the business object using which the address is created while defining the customer registration.
	<b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.
Statement Construct Business Object	Indicates the business object using which the statement construct is created while defining the customer registration.
	<b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.

- **Characteristics** - Lists the characteristics defined for the customer registration type. It contains the following columns:

Column Name	Column Description
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- **Customer Registration Templates** - Lists the templates that are associated with the customer registration type for creating a customer registration. It contains the following columns:

Column Name	Column Description
Sequence	Displays the sequence of the customer registration template.
Template Category	Indicates the category to which the customer registration template belongs. The valid values are: <ul style="list-style-type: none"> <li>• Person</li> <li>• Account</li> <li>• Policy</li> <li>• Policy Plan</li> </ul> <p><b>Note:</b> The <b>Policy</b> and <b>Policy Plan</b> template categories appear when the <b>Customer Registration Type</b> is created using the <b>C1-CustRegTypeHealthCare</b> business object.</p>
Template	Displays the customer registration template associated with the customer registration type. <p><b>Note:</b> It has a link. On clicking the link, the <b>Customer Registration Template</b> screen appears where you can view the details of the respective customer registration template.</p>

- **Record Actions** - The **Record Actions** section contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of the customer registration type.
Delete	Used to delete the customer registration type. <p><b>Note:</b> You can delete a customer registration type when a customer registration is not yet defined using the customer registration type.</p>
Duplicate	Used to create a new customer registration type using an existing customer registration type.

- **Record Information** - The **Record Information** section contains the following field:

Field Name	Field Description
Business Object	Indicates the business object using which the customer registration type is created in the system. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application. <p><b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.</p>

- **Copy Customer Registration Details** - Enables you to specify the type of information you want to copy while defining a customer registration using an existing customer registration. It contains the following fields:

Column Name	Column Description
Person Names	Indicates whether you want to copy the person details while copying a customer registration.
Accounts	Indicates whether you want to copy the account details while copying a customer registration.
Person Identifiers	Indicates whether you want to copy the person identifier details while copying a customer registration.
Account Identifiers	Indicates whether you want to copy the account identifier details while copying a customer registration.
Person Phones	Indicates whether you want to copy the phone details of the person while copying a customer registration.
Account Characteristics	Indicates whether you want to copy the characteristic details of the account while copying a customer registration.
Person Characteristics	Indicates whether you want to copy the characteristic details of the person while copying a customer registration.
Account Auto Pay Information	Indicates whether you want to copy the automatic payment details of the account while copying a customer registration.
Person Addresses	Indicates whether you want to copy the address details of the person while copying a customer registration.
Account Persons	Indicates whether you want to copy the details of the persons related to the account while copying a customer registration.
Person Hierarchy	Indicates whether you want to copy the person hierarchy details while copying a customer registration.
Account Override Address	Indicates whether you want to copy the account override address details while copying a customer registration.
Bill Routing Information	Indicates whether you want to copy the bill routing details of the account while copying a customer registration.
Credit Rating History	Indicates whether you want to copy the credit rating history details while copying a customer registration.
Policies	Indicates whether you want to copy the policy details while copying a customer registration.  <b>Note:</b> This field appears when the <b>Customer Registration Type</b> is created using the <b>C1-CustRegTypeHealthCare</b> business object.
Policy Plans	Indicates whether you want to copy the policy plan details while copying a customer registration.  <b>Note:</b> This field appears only when the <b>Customer Registration Type</b> is created using the <b>C1-CustRegTypeHealthCare</b> business object.

Column Name	Column Description
Policy Characteristics	Indicates whether you want to copy the policy characteristic details while copying a customer registration.
	<b>Note:</b> This field appears when the <b>Customer Registration Type</b> is created using the <b>C1-CustRegTypeHealthCare</b> business object.
Policy Plan Characteristics	Indicates whether you want to copy the policy plan characteristic details while copying a customer registration.
	<b>Note:</b> This field appears when the <b>Customer Registration Type</b> is created using the <b>C1-CustRegTypeHealthCare</b> business object.

By default, the **Customer Registration Type** zone does not appear in the **Customer Registration Type** screen. It appears when you click the **Broadcast** (📡) icon corresponding to a customer registration type in the **Customer Registration Type List** zone.

## Searching for a Customer Registration Type

### Prerequisites

To search for a customer registration type, you should have:

- Customer registration types defined in the application

### Procedure

To search for a customer registration type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **C** and then click **Customer Registration Type**.  
A sub-menu appears.
3. Click the **Search** option from the **Customer Registration Type** sub-menu.

The **Customer Registration Type** screen appears with a list of customer registration types in the **Customer Registration Type List** zone.

4. Click the **Filters** (🔍) icon in the title bar of the **Customer Registration Type List** zone.

It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Customer Registration Type	Used to search for a particular customer registration type.	No
Description	Used to search for customer registration types having a particular description.	No

- Enter the search criteria in the **Customer Registration Type List** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

- Click **Search**.

A list of customer registration types that meet the search criteria appears in the **Search Results** section.

## Defining a Customer Registration Type

### Prerequisites

To define a customer registration type, you should have:

- Customer registration type business objects defined in the application
- Customer registration business objects defined in the application
- Access groups defined in the application
- Registration sources defined in the application
- Statement construct business object defined in the application
- Benefit business object defined in the application
- Person, account, policy plan, membership, and address business objects defined in the application

**Note:** The policy plan and membership business objects are required when you are defining a customer registration type using the **C1-CustRegTypeHealthCare** business object.

- Approval To Do types and To Do roles defined in the application
- Billing hierarchy and pricing To Do types and To Do roles defined in the application

**Note:** The billing hierarchy and pricing To Do types and To Do roles are required when you are defining a customer registration type using the **C1-CustRegTypeHealthCare** business object.

- Characteristic types defined in the application
- Template categories defined in the application

### Procedure

To define a customer registration type:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **C** and then click **Customer Registration Type**.  
A sub-menu appears.
3. Click the **Add** option from the **Customer Registration Type** sub-menu.

The **Select Business Object** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Customer Registration Type Business Object	Used to indicate the business object using which you want to create the customer registration type. The valid values are: <ul style="list-style-type: none"> <li>• Customer Registration Type - Banking</li> <li>• Customer Registration Type - Healthcare</li> </ul>	Yes

**Tip:** Alternatively, you can access the **Select Business Object** screen by clicking the **Add** button in the **Page Title** area of the **Customer Registration Type** screen.

**Note:** The **Select Business Object** screen appears when there are multiple customer registration type business objects defined in the application. If there is only one customer registration type business object defined in the application, the **Customer Registration Type** screen appears.

4. Select the required customer registration business object from the respective field.
5. Click **OK**.

The **Customer Registration Type** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the customer registration type.
- **Additional Data** - Used to define additional information about the customer registration type.
- **Characteristics** - Used to define a list characteristics for the customer registration type.
- **Customer Registration Templates** - Used to associate templates with the customer registration type.
- **Copy Customer Registration Details** - Used to specify the type of information you want to copy while defining a customer registration using an existing customer registration.
- **Main** - The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Customer Registration Type	Used to specify the customer registration type.	Yes
Business Object	Indicates the business object using which you want to create the customer registration type.	Not applicable
Description	Used to specify the description for the customer registration type.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Customer Registration Business Object	Used to indicate the business object using which you want to create the customer registration in the system.	Yes
Detailed Description	Used to specify additional information about the customer registration type.	No
Status	Used to indicate the status of the customer registration type. <ul style="list-style-type: none"> <li>Active</li> <li>Inactive</li> </ul>	Yes
Access Group	Used to specify the user group that can access the customer registration created using the customer registration type.	Yes
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Access Group</b> field. On clicking the <b>Search</b> icon, the <b>Access Group Search</b> window appears.</p> <p>On specifying the access group, the description of the access group appears corresponding to the <b>Access Group</b> field.</p>	
Registration Source	Used to indicate the source through which you want to create the customer registration in the system. The valid values are: <ul style="list-style-type: none"> <li>File Upload</li> <li>Inbound Message</li> <li>Manual</li> </ul>	Yes

- Enter the required details in the **Main** section.
- Define additional information about the customer registration type in the **Additional Data** section.
- Define a list of characteristics for the customer registration type in the **Characteristics** section.
- Associate customer registration templates with the customer registration type in the **Customer Registration Templates** section
- Specify the type of information you want to copy while defining a customer registration using an existing customer registration in the **Copy Customer Registration Details** section.
- Click **Save**.

The customer registration type is defined.

## Defining Additional Data for a Customer Registration Type

### Prerequisites

To define additional data for a customer registration type, you should have:

- Person, account, policy plan, membership, and address business objects defined in the application

**Note:** The policy plan and membership business objects are required when you are defining, editing, or copying a customer registration type which is created using the **C1-CustRegTypeHealthCare** business object.

- Approval To Do types and To Do roles defined in the application
- Billing hierarchy and pricing To Do types and To Do roles defined in the application

**Note:** The billing hierarchy and pricing To Do types and To Do roles are required when you are defining, editing, or copying a customer registration type which is created using the **C1-CustRegTypeHealthCare** business object.

### Procedure

To define additional data for a customer registration type:

1. Ensure that the **Additional Data** section is expanded when you are defining, editing, or copying a customer registration type.

The **Additional Data** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Approval Required	Used to indicate whether approval is required while creating the customer registration using the customer registration type.	Yes (Conditional)
		<b>Note:</b> This field is required for approving the customer registration which is created using the customer registration type.

Field Name	Field Description	Mandatory (Yes or No)
Approval To Do Type	Used to indicate the To Do entry of the specified To Do type is created when you submit the customer registration for approval.	Yes (Conditional)
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Approval To Do Type</b> field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.</p> <p>On specifying the To Do type, the description of the To Do type appears corresponding to the <b>Approval To Do Type</b> field.</p> <p>This field appears when the <b>Approval Required</b> check box is selected.</p>	<p><b>Note:</b> This field is required for approving the customer registration which is created using the customer registration type.</p>
Approval To Do Role	Used to indicate the users with the specified To Do role can approve, reject, or resubmit the customer registration for approval.	Yes (Conditional)
	<p><b>Note:</b></p> <p>This field appears when the <b>Approval Required</b> check box is selected.</p>	<p><b>Note:</b> This field is required for approving the customer registration which is created using the customer registration type.</p>
Submitter To Do Type	Used to indicate the To Do entry of the specified To Do type is created when the customer registration is resubmitted by the approver.	Yes (Conditional)
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Submitter To Do Type</b> field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.</p> <p>On specifying the To Do type, the description of the To Do type appears corresponding to the <b>Submitter To Do Type</b> field.</p>	<p><b>Note:</b> This field is required for resubmitting the customer registration for approval.</p>
Submitter To Do Role	Used to indicate the users with the specified To Do role for whom the To Do task is created when the customer registration is resubmitted by the approver.	Yes (Conditional)
		<p><b>Note:</b> This field is required for resubmitting the customer registration for approval.</p>

Field Name	Field Description	Mandatory (Yes or No)
Final Approval Required	<p>Used to indicate whether final approval is required once the approver at the first level approves the customer registration.</p> <p><b>Note:</b> This field appears when you are defining, editing, or copying a <b>Customer Registration Type</b> using the <b>C1-CustRegTypeHealthCare</b> business object.</p> <p>The final approval is required when the <b>Manual Billing Hierarchy and Pricing</b> option check box is selected.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required for approving the customer registration which is created using the customer registration type.</p>

## **Defining a Characteristic for a Customer Registration Type**

### **Prerequisites**

To define a characteristic for a customer registration type, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Customer Registration Type**)

### **Procedure**

To define a characteristic for a customer registration type:

- Ensure that the **Characteristics** section is expanded when you are defining, editing, or copying a customer registration type.

The **Characteristics** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Type	Used to indicate the characteristic type.	Yes (Conditional)
	<b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Customer Registration Type</b> .	<b>Note:</b> This field is required when you are defining a characteristic for the customer registration type.
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional)
	<b>Note:</b> If you select a predefined characteristic type, the <b>Search</b> (🔍) icon appears corresponding to the <b>Characteristic Value</b> field. On clicking the <b>Search</b> icon, the <b>Predefined Characteristic Search</b> window appears.  On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	<b>Note:</b> This field is required when you are defining a characteristic for the customer registration type.

- Enter the required details in the **Characteristics** section.
- If you want to define more than one characteristic for the customer registration type, click the **Add** (+) icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from the customer registration type, click the **Delete** (🗑️) icon corresponding to the characteristic.

- Click **Save**.

The characteristic is defined for the customer registration type.

## Associating a Customer Registration Template with a Customer Registration Type

### Prerequisites

To associate a customer registration template with a customer registration type, you should have:

- Template categories defined in the application
- Customer registration templates associated to the template categories

### Procedure

To associate a customer registration template with a customer registration type:

1. Ensure that the **Customer Registration Templates** section is expanded when you are defining, editing, or copying a customer registration type.

The **Customer Registration Templates** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Sequence	Used to specify the sequence for the customer registration template.	Yes (Conditional) <b>Note:</b> This field is required when you are associating a customer registration template with a customer registration type.
Template Category	Used to indicate the category to which the customer registration template belongs. The valid values are: <ul style="list-style-type: none"> <li>• Person</li> <li>• Account</li> <li>• Policy</li> <li>• Policy Plan</li> </ul> <b>Note:</b> The <b>Policy</b> and <b>Policy Plan</b> template categories appear when you are defining, editing, or copying a <b>Customer Registration Type</b> using the <b>C1-CustRegTypeHealthCare</b> business object. You can associate only one person template category and multiple account, policy, and policy plan template categories with the customer registration type.	Yes (Conditional) <b>Note:</b> This field is required when you are associating a customer registration template with a customer registration type.
Template	Used to specify the customer registration template which you want to associate with the customer registration type. <b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Template</b> field. On clicking the <b>Search</b> icon, the <b>Customer Registration Template Search</b> window appears. On specifying the template, the description of the template appears corresponding to the <b>Template</b> field.	Yes (Conditional) <b>Note:</b> This field is required when you are associating a customer registration template with a customer registration type.

2. Enter the required details in the **Customer Registration Templates** section.
3. If you want to define more than one template for the customer registration type, click the **Add** (+) icon and then repeat step 2.

**Note:** However, if you want to remove a template from the customer registration type, click the **Delete** (🗑️) icon corresponding to the customer registration template.

4. Click **Save**.

The customer registration template is associated with the customer registration type.

## Setting Attributes to Define a Customer Registration Using the Existing Customer Registration

**Prerequisites**

To set an attribute for defining a customer registration using the existing customer registration, you should have:

- **Person** attributes defined in the application
- **Account** attributes defined in the application
- **Policy** attributes defined in the application

**Note:** The **Policy** attributes are required when you are defining a customer registration type using the **C1-CustRegTypeHealthCare** business object.

- **Policy Plan** attributes defined in the application

**Note:** The **Policy Plan** attributes are required when you are defining a customer registration type using the **C1-CustRegTypeHealthCare** business object.

**Procedure**

To set an attribute for defining a customer registration using the existing customer registration:

1. Ensure that the **Copy Customer Registration Details** section is expanded when you are defining, editing, or copying a customer registration type.

The **Copy Customer Registration Details** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Person Names	Used to indicate whether you want to copy the person details while copying a customer registration.	No
Accounts	Used to indicate whether you want to copy the account details while copying a customer registration.	No
Person Identifiers	Used to indicate whether you want to copy the person identifier details while copying a customer registration.	No

Field Name	Field Description	Mandatory (Yes or No)
Account Identifiers	Used to indicate whether you want to copy the account identifier details while copying a customer registration.	No
	<b>Note:</b> The check box of this field is enabled when the <b>Accounts</b> check box is selected in the <b>Copy Customer Registration Details</b> section.	
Person Phones	Used to indicate whether you want to copy the phone details of the person while copying a customer registration.	No
Account Characteristics	Used to indicate whether you want to copy the characteristic details of the account while copying a customer registration.	No
	<b>Note:</b> The check box of this field is enabled when the <b>Accounts</b> check box is selected in the <b>Copy Customer Registration Details</b> section.	
Person Characteristics	Used to indicate whether you want to copy the characteristic details of the person while copying a customer registration.	No
Account Auto pay Information	Used to indicate whether you want to copy the automatic payment details of the account while copying a customer registration.	No
	<b>Note:</b> The check box of this field is enabled when the <b>Accounts</b> check box is selected in the <b>Copy Customer Registration Details</b> section.	
Person Addresses	Used to indicate whether you want to copy the address details of the person while copying a customer registration.	No
Account Persons	Used to indicate whether you want to copy the details of the persons related to the account while copying a customer registration.	No
	<b>Note:</b> The check box of this field is enabled when the <b>Accounts</b> check box is selected in the <b>Copy Customer Registration Details</b> section.	
Person Hierarchy	Used to indicate whether you want to copy the person hierarchy details while copying a customer registration.	No

Field Name	Field Description	Mandatory (Yes or No)
Account Override Address	Used to indicate whether you want to copy the account override address details while copying a customer registration.	No
	<b>Note:</b> The check box of this field is enabled when the <b>Accounts</b> check box is selected in the <b>Copy Customer Registration Details</b> section.	
Bill Routing Information	Used to indicate whether you want to copy the bill routing details of the account while copying a customer registration.	No
	<b>Note:</b> The check box of this field is enabled when the <b>Accounts</b> check box is selected in the <b>Copy Customer Registration Details</b> section.	
Credit Rating History	Used to indicate whether you want to copy the credit rating history details while copying a customer registration.	No
	<b>Note:</b> The check box of this field is enabled when the <b>Accounts</b> check box is selected in the <b>Copy Customer Registration Details</b> section.	
Policies	Used to indicate whether you want to copy the policy details while copying a customer registration.	No
	<b>Note:</b> This field appears only when you are defining, editing, or copying a <b>Customer Registration Type</b> using the <b>C1-CustRegTypeHealthCare</b> business object.	
Policy Plans	Used to indicate whether you want to copy the policy plan details while copying a customer registration.	No
	<b>Note:</b> This field appears when you are defining, editing, or copying a <b>Customer Registration Type</b> using the <b>C1-CustRegTypeHealthCare</b> business object.  The check box of this field is enabled only when the <b>Policies</b> check box is selected in the <b>Copy Customer Registration Details</b> section.	

Field Name	Field Description	Mandatory (Yes or No)
Policy Characteristics	Used to indicate whether you want to copy the policy characteristic details while copying a customer registration.	No
	<p><b>Note:</b></p> <p>This field appears when you are defining, editing, or copying a <b>Customer Registration Type</b> using the <b>C1-CustRegTypeHealthCare</b> business object.</p> <p>The check box of this field is enabled only when the <b>Policies</b> check box is selected in the <b>Copy Customer Registration Details</b> section.</p>	
Policy Plan Characteristics	Used to indicate whether you want to copy the policy plan characteristic details while copying a customer registration.	No
	<p><b>Note:</b></p> <p>This field appears when you are defining, editing, or copying a <b>Customer Registration Type</b> using the <b>C1-CustRegTypeHealthCare</b> business object.</p> <p>The check box of this field is enabled when the <b>Policy Plans</b> check box is selected in the <b>Copy Customer Registration Details</b> section.</p>	

2. Select the required attributes in the **Copy Customer Registration Details** section.
3. Click **Save**.

The attributes are set for defining a customer registration using the existing customer registration.

## Editing a Customer Registration Type

### Prerequisites

To edit a customer registration type, you should have:

- Customer registration business objects defined in the application
- Access groups defined in the application
- Registration sources defined in the application

- Statement construct business object defined in the application
- Benefit business object defined in the application
- Person, account, policy plan, membership, and address business objects defined in the application

**Note:** The policy plan and membership business objects are required when you are editing a customer registration type which is created using the **C1-CustRegTypeHealthCare** business object.

- Approval To Do types and To Do roles defined in the application
- Billing hierarchy and pricing To Do types and To Do roles defined in the application

**Note:** The billing hierarchy and pricing To Do types and To Do roles are required when you are editing a customer registration type which is created using the **C1-CustRegTypeHealthCare** business object.

- Characteristic types defined in the application
- Template categories defined in the application

### **Procedure**

To edit a customer registration type:

1. Search for the customer registration type in the **Customer Registration Type List** zone of the **Customer Registration Type** screen.
2. In the **Search Results** section, click the **Edit**  icon in the **Edit** column corresponding to the customer registration type whose details you want to edit.

The **Customer Registration Type** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the customer registration type.
- **Additional Data** - Used to define additional information about the customer registration type.
- **Characteristics** - Used to define a list characteristics for the customer registration type.
- **Customer Registration Templates** - Used to associate templates with the customer registration type.
- **Copy Customer Registration Details** - Used to specify the type of information you want to copy while defining a customer registration using an existing customer registration.
- **Main** - The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Customer Registration Type	Displays the customer registration type.	Not applicable
Business Object	Indicates the business object using which the customer registration type is created in the system.	Not applicable
Description	Used to specify the description for the customer registration type.	Yes
Customer Registration Business Object	Used to indicate the business object using which you want to create the customer registration in the system.	Yes
Detailed Description	Used to specify additional information about the customer registration type.	No

Field Name	Field Description	Mandatory (Yes or No)
Status	Used to indicate the status of the customer registration type. <ul style="list-style-type: none"> <li>Active</li> <li>Inactive</li> </ul>	Yes
Access Group	Used to specify the user group that can access the customer registration created using the customer registration type. <p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Access Group</b> field. On clicking the <b>Search</b> icon, the <b>Access Group Search</b> window appears.</p> <p>On specifying the access group, the description of the access group appears corresponding to the <b>Access Group</b> field.</p>	Yes
Registration Source	Used to indicate the source through which you want to create the customer registration in the system. The valid values are: <ul style="list-style-type: none"> <li>File Upload</li> <li>Inbound Message</li> <li>Manual</li> </ul>	Yes

**Tip:** Alternatively, you can edit the details of a customer registration type by clicking the **Edit** button in the **Customer Registration Type** zone.

- Modify the required details in the **Main** section, if required.
- Modify additional information about the customer registration type in the **Additional Data** section, if required.
- Define, edit, or remove characteristics of the customer registration type in the **Characteristics** section, if required.
- Associate or disassociate customer registration templates from the customer registration type in the **Customer Registration Templates** section, if required.
- Specify the type of information you want to copy while defining a customer registration using an existing customer registration in the **Copy Customer Registration Details** section, if required.
- Click **Save**.

The changes made to the customer registration type are saved.

## Copying a Customer Registration Type

Instead of creating a customer registration type from scratch, you can create a new customer registration type using an existing customer registration type. This is possible through copying a customer registration type. On copying a customer registration type, the details including the additional data, characteristics, customer registration templates, and attributes set to define a customer registration from the existing customer registration are copied to the new customer registration type. You can then edit the details, if required.

### Prerequisites

To copy a customer registration type, you should have:

- Customer registration type (whose copy you want to create) defined in the application
- Customer registration business objects defined in the application
- Access groups defined in the application
- Registration sources defined in the application
- Statement construct business object defined in the application
- Benefit business object defined in the application
- Person, account, policy plan, membership, and address business objects defined in the application

**Note:** The policy plan and membership business objects are required when you are copying a customer registration type which is created using the **C1-CustRegTypeHealthCare** business object.

- Approval To Do types and To Do roles defined in the application
- Billing hierarchy and pricing To Do types and To Do roles defined in the application

**Note:** The billing hierarchy and pricing To Do types and To Do roles are required when you are copying a customer registration type which is created using the **C1-CustRegTypeHealthCare** business object.

- Characteristic types defined in the application
- Template categories defined in the application

### Procedure

To copy a customer registration type:

1. Search for a customer registration type in the **Customer Registration Type List** zone of the **Customer Registration Type** screen.
2. In the **Search Results** section, click the **Duplicate**  icon in the **Duplicate** column corresponding to the customer registration type whose copy you want to create.

The **Customer Registration Type** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the customer registration type.
- **Additional Data** - Used to define additional information about the customer registration type.
- **Characteristics** - Used to define a list characteristics for the customer registration type.
- **Customer Registration Templates** - Used to associate templates with the customer registration type.
- **Copy Customer Registration Details** - Used to specify the type of information you want to copy while defining a customer registration using an existing customer registration.
- **Main** - The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Customer Registration Type	Used to specify the customer registration type.	Yes
Business Object	Indicates the business object using which you want to create the customer registration type.	Not applicable
Description	Used to specify the description for the customer registration type.	Yes
Customer Registration Business Object	Used to indicate the business object using which you want to create the customer registration in the system.	Yes
Detailed Description	Used to specify additional information about the customer registration type.	No
Status	Used to indicate the status of the customer registration type. <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>	Yes
Access Group	Used to specify the user group that can access the customer registration created using the customer registration type. <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Access Group</b> field. On clicking the <b>Search</b> icon, the <b>Access Group Search</b> window appears.</p> <p>On specifying the access group, the description of the access group appears corresponding to the <b>Access Group</b> field.</p> </div>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Registration Source	Used to indicate the source through which you want to create the customer registration in the system. The valid values are: <ul style="list-style-type: none"> <li>File Upload</li> <li>Inbound Message</li> <li>Manual</li> </ul>	Yes

**Tip:** Alternatively, you can copy a customer registration type by clicking the **Duplicate** button in the **Customer Registration Type** zone.

- Enter the required details in the **Main** section.
- Enter additional information about the customer registration type in the **Additional Data** section.
- Define, edit, or remove characteristics of the customer registration type in the **Characteristics** section.
- Associate or disassociate customer registration templates from the customer registration type in the **Customer Registration Templates** section.
- Specify the type of information you want to copy while defining a customer registration using an existing customer registration in the **Copy Customer Registration Details** section.
- Click **Save**.

The new customer registration type is defined.

## Deleting a Customer Registration Type

### Procedure

To delete a Customer Registration Type:

- Search for the customer registration type in the **Customer Registration Type List** zone of the **Customer Registration Type** screen.

2. In the **Customer Registration Type List** zone, click the **Delete** () icon in the **Delete** column corresponding to the customer registration type that you want to delete.

A message appears confirming whether you want to delete the customer registration type.

3. Click **OK**.

The customer registration type is deleted.

**Note:** You can delete a customer registration type when a customer registration is not yet defined using the customer registration type.

**Tip:** Alternatively, you can delete a customer registration type by clicking the **Delete** button in the **Customer Registration Type** zone.

Field Name	Field Description	Mandatory (Yes or No)
Person Name	Used to search customer registrations of persons with a particular name.	Yes (Conditional)
	<b>Note:</b> This field appears when the <b>Person Details</b> option is selected from the <b>Search By</b> list and the <b>Advanced Search</b> link available in the upper right corner of the <b>Search Customer Registration</b> zone is clicked.	<b>Note:</b> This field is required for searching customer registrations using the person details.
Person Type	Used to search customer registrations of persons which belong to a particular person type. The valid values are: <ul style="list-style-type: none"> <li>• Bill Group</li> <li>• Broker</li> <li>• Business</li> <li>• Group</li> <li>• Parent Customer</li> <li>• Person</li> </ul>	Yes (Conditional)
	<b>Note:</b> This field appears when the <b>Person Details</b> option is selected from the <b>Search By</b> list and the <b>Advanced Search</b> link available in the upper right corner of the <b>Search Customer Registration</b> zone is clicked.	<b>Note:</b> This field is required for searching customer registrations using the person details.
Address	Used to search customer registrations of persons from a particular address.	Yes (Conditional)
	<b>Note:</b> This field appears when the <b>Person Details</b> option is selected from the <b>Search By</b> list and the <b>Advanced Search</b> link available in the upper right corner of the <b>Search Customer Registration</b> zone is clicked.	<b>Note:</b> This field is required for searching customer registrations using the person details.
City	Used to search customer registrations from a particular city.	Yes (Conditional)
	<b>Note:</b> This field appears when the <b>Person Details</b> option is selected from the <b>Search By</b> list and the <b>Advanced Search</b> link available in the upper right corner of the <b>Search Customer Registration</b> zone is clicked.	<b>Note:</b> This field is required for searching customer registrations using the person details.

Field Name	Field Description	Mandatory (Yes or No)
Phone Number	Used to search for a customer registration of a person having a particular phone number.	Yes (Conditional)
	<b>Note:</b> This field appears when the <b>Person Details</b> option is selected from the <b>Search By</b> list and the <b>Advanced Search</b> link available in the upper right corner of the <b>Search Customer Registration</b> zone is clicked.	<b>Note:</b> This field is required for searching customer registrations using the person details.
Person ID	Used to search customer registration of a particular person.	Yes (Conditional)
	<b>Note:</b> This field appears when the <b>Person Details</b> option is selected from the <b>Search By</b> list.	<b>Note:</b> This field is required for searching customer registrations using the person details.
Person Identifier Type	Used to indicate the person identifier type using which you want to search for customer registrations.	Yes (Conditional)
	<b>Note:</b> This field appears when the <b>Person Details</b> option is selected from the <b>Search By</b> list.	<b>Note:</b> If you enter the person identifier as a search criteria, you have to select the person identifier type.  This field is required for searching customer registrations using the person details.
Person Identifier	Used to specify the value of the person identifier type using which you want to search for customer registrations.	Yes (Conditional)
	<b>Note:</b> This field appears when the <b>Person Details</b> option is selected from the <b>Search By</b> list.	<b>Note:</b> If you specify the person identifier type as a search criteria, you have to enter the person identifier.  This field is required for searching customer registrations using the person details.

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Type	Used to search customer registrations of persons with a particular characteristic type.	Yes (Conditional)
	<p><b>Note:</b></p> <p>The list includes only those characteristic types where the characteristic entity is set to <b>Customer Registration</b>.</p> <p>This field appears when the <b>Person Details</b> option is selected from the <b>Search By</b> list and the <b>Advanced Search</b> link available in the upper right corner of the <b>Search Customer Registration</b> zone is clicked.</p>	<p><b>Note:</b> This field is required for searching customer registrations using the person details.</p>
Characteristic Value	Used to specify the value of the characteristic type using which you want to search customer registrations of persons.	Yes (Conditional)
	<p><b>Note:</b></p> <p>If you select a predefined characteristic type, the <b>Search</b> (🔍) icon appears corresponding to the <b>Characteristic Value</b> field. On clicking the <b>Search</b> icon, the <b>Predefined Characteristic Search</b> window appears.</p> <p>On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.</p> <p>This field appears when the <b>Person Details</b> option is selected from the <b>Search By</b> list and the <b>Advanced Search</b> link available in the upper right corner of the <b>Search Customer Registration</b> zone is clicked.</p>	<p><b>Note:</b> This field is required for searching customer registrations using the person details.</p>
Inbound Message ID	Used to search for a customer registration which was created through a particular inbound message.	Yes (Conditional)
	<p><b>Note:</b> This field appears only when the <b>Inbound Message Details</b> option is selected from the <b>Search By</b> list.</p>	<p><b>Note:</b> This field is required for searching customer registrations using the inbound message details.</p>
Source System	Used to search customer registrations whose information is received from a particular external system.	Yes (Conditional)
	<p><b>Note:</b> This field appears when the <b>Inbound Message Details</b> option is selected from the <b>Search By</b> list.</p>	<p><b>Note:</b> This field is required for searching customer registrations using the inbound message details.</p>

Field Name	Field Description	Mandatory (Yes or No)
External Source ID	Used to search for a customer registrations whose information is received from a particular external source system.	Yes (Conditional)
	<b>Note:</b> This field appears when the <b>Inbound Message Details</b> option is selected from the <b>Search By</b> list.	<b>Note:</b> This field is required for searching customer registrations using the inbound message details.
External Transaction ID	Used to search for a customer registration which is created as a result of a particular transaction in the external source system.	Yes (Conditional)
	<b>Note:</b> This field appears when the <b>Inbound Message Details</b> option is selected from the <b>Search By</b> list.	<b>Note:</b> This field is required for searching customer registrations using the inbound message details.
External Batch ID	Used to search customer registrations which are created through an external batch job.	Yes (Conditional)
	<b>Note:</b> This field appears when the <b>Inbound Message Details</b> option is selected from the <b>Search By</b> list.	<b>Note:</b> This field is required for searching customer registrations using the inbound message details.
Inbound Message Type	Used to search customer registrations which are created using a particular inbound message type.	Yes (Conditional)
	<b>Note:</b> This field appears when the <b>Inbound Message Details</b> option is selected from the <b>Search By</b> list.	<b>Note:</b> This field is required for searching customer registrations using the inbound message details.
Request Id	Used to search customer registrations which are created from a particular file uploaded through the <b>File Upload Interface</b> utility.	Yes (Conditional)
	<b>Note:</b> This field appears when the <b>File Upload Details</b> option is selected from the <b>Search By</b> list.	<b>Note:</b> This field is required for searching customer registrations using the file upload details.
File Name	Used to search customer registrations created from uploading a file with a particular name.	Yes (Conditional)
	<b>Note:</b> This field appears when the <b>File Upload Details</b> option is selected from the <b>Search By</b> list.	<b>Note:</b> This field is required for searching customer registrations using the file upload details.

Field Name	Field Description	Mandatory (Yes or No)
File Status	Used to search customer registrations created from the uploaded files having a particular status. The valid values are: <ul style="list-style-type: none"> <li>• Approval Pending</li> <li>• Completed</li> <li>• Error</li> <li>• Pending</li> <li>• Rejected</li> </ul>	Yes (Conditional)
	<b>Note:</b> This field appears when the <b>File Upload Details</b> option is selected from the <b>Search By</b> list.	<b>Note:</b> This field is required for searching customer registrations using the file upload details.
File Request Type	Used to search customer registrations which are created from the uploaded files with a particular file request type.	Yes (Conditional)
	<b>Note:</b> This field appears when the <b>File Upload Details</b> option is selected from the <b>Search By</b> list.	<b>Note:</b> This field is required for searching customer registrations using the file upload details.

**Note:** You must specify at least one search criterion while searching for a customer registration. One more search criterion is required when you are searching for a customer registration using the division and/or person type.

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Creation Date Time	Displays the date and time when the customer registration is created in the system.
Customer Registration Information	Displays the concatenated string of information about the customer registration.  <b>Note:</b> It has a link. On clicking the link, the <b>Customer Registration</b> screen appears where you can view the details of the respective customer registration.

Column Name	Column Description
Status	<p>Indicates the status of the customer registration. The valid values are:</p> <ul style="list-style-type: none"> <li>• Approval In Progress</li> <li>• Bill Group Approved</li> <li>• Complete</li> <li>• Draft</li> <li>• Draft for Update</li> <li>• Parent Customer Approved</li> <li>• Pending Final Approval</li> <li>• Pending Pricing Correction</li> <li>• Rejected</li> </ul>
	<p><b>Note:</b> The values listed above appear when the <b>Registration Details</b> option is selected from the <b>Search By</b> list.</p>
	<ul style="list-style-type: none"> <li>• Pending</li> <li>• Processed</li> <li>• Rejected</li> <li>• Voided</li> </ul>
	<p><b>Note:</b> These values listed above appear when the <b>Inbound Message Details</b> option is selected from the <b>Search By</b> list.</p>
	<p><b>Note:</b> This column appears only when the <b>Registration Details</b>, <b>Person Details</b>, or <b>Inbound Message Details</b> options are selected from the <b>Search By</b> list.</p>
Request Id	<p>Displays the request Id generated while uploading a file through the <b>File Upload Interface</b> utility for creating the customer registration object.</p>
	<p><b>Note:</b> This column appears when the <b>File Upload Details</b> option is selected from the <b>Search By</b> list.</p>
Created By	<p>Displays the user who has created the customer registration.</p>
	<p><b>Note:</b> This column appears when the <b>Registration Details</b>, <b>Person Details</b>, or <b>Inbound Message Details</b> options are selected from the <b>Search By</b> list.</p>
Inbound Message Information	<p>Displays the concatenated string of information about the inbound message.</p>
	<p><b>Note:</b></p> <p>It has a link. On clicking the link, the <b>Inbound Message</b> screen appears where you can view the details of the respective inbound message.</p> <p>This column appears when the <b>Inbound Message Details</b> option is selected from the <b>Search By</b> list.</p>

Column Name	Column Description
File ID	Displays the file which is uploaded for creating the customer registration through the <b>File Upload Interface</b> utility.
	<b>Note:</b> This column appears when the <b>File Upload Details</b> option is selected from the <b>Search By</b> list.
Copy	On clicking the <b>Copy</b> (📄) icon, the <b>Customer Registration</b> screen appears where you can define a new customer registration using an existing customer registration.
	<b>Note:</b> This column appears when the <b>Registration Details</b> option is selected from the <b>Search By</b> list.
Person Name	Displays the name of the person for whom the customer registration is defined in the system.
	<b>Note:</b> This column appears when the <b>Person Details</b> option is selected from the <b>Search By</b> list.
Inbound Message Type	Indicates the inbound message type using which the inbound message is created in the system.
	<b>Note:</b> This column appears when the <b>Inbound Message Details</b> option is selected from the <b>Search By</b> list.
File Name	Displays the name of the file which is uploaded for creating the customer registration through the <b>File Upload Interface</b> utility.
	<b>Note:</b> This column appears when the <b>File Upload Details</b> option is selected from the <b>Search By</b> list.
Primary Person Identifier Type	Indicates the primary identifier type associated with the person.
	<b>Note:</b> This column appears when the <b>Person Details</b> option is selected from the <b>Search By</b> list.
Source System	Indicates the source system from where the inbound message is received for creating the customer registration.
	<b>Note:</b> This column appears when the <b>Inbound Message Details</b> option is selected from the <b>Search By</b> list.
Request Type	Indicates the request type using which the file is uploaded through the <b>File Upload Interface</b> utility for creating the customer registration.
	<b>Note:</b> This column appears only when the <b>File Upload Details</b> option is selected from the <b>Search By</b> list.
Primary Person Identifier	Displays the primary person identifier.
	<b>Note:</b> This column appears when the <b>Person Details</b> option is selected from the <b>Search By</b> list.

**Note:** Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

## **Searching for a Customer Registration**

### **Prerequisites**

To search for a customer registration, you should have:

- Customer registration business objects defined in the application
- Customer registration statuses and customer registration types defined in the application
- Divisions associated with the access group to which the user belongs
- Person types and person identifier types defined in the application
- Characteristic types defined in the application (where the characteristic entity is set to **Customer Registration**)
- Inbound message statuses, inbound message types, and source systems defined in the application.
- File statuses and file request types defined in the application.

### **Procedure**

To search for a customer registration:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Person Information** and then click **Customer Registration**.  
A sub-menu appears.
3. Click the **Search** option from the **Customer Registration** sub-menu.  
The **Customer Registration** screen appears.
4. Enter the search criteria in the **Search Customer Registration** zone.

**Note:**

You must specify at least one search criterion while searching for a customer registration object. One more search criterion is required when you are searching for a customer registration using the division and/or person type.

The criteria are grouped as indicated by line separators between the criteria. Each group is independent from the other, and only one group is used at a time for searching. If you enter criteria in more than one group, the criteria from the former group is used for searching. For example, if you enter the person name (in the second criteria group) and person identifier (in the fourth criteria group), the system searches using the person name instead of the person identifier.

You must specify the division when you are searching for a customer registration of a person using the city.

You must specify division and/or any other criteria in the second group when you are searching for a customer registration using the person type.

If you have specified any other search criterion along with the person ID, the system ignores the additional search criterion and searches for the customer registration using the person ID.

ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

The **Advanced Search** link appears in the right side of the **Search Customer Registration** zone. On clicking the **Advanced Search** link, additional fields appear in the zone which help you to refine the search.

If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

5. Click **Search**.

A list of customer registrations that meet the search criteria appears in the **Search Results** section.

## Defining a Customer Registration

### Prerequisites

To define a customer registration, you should have:

- Customer registration types, source systems, and person types defined in the application
- Divisions, customer segments, customer tiers, and access groups defined in the application
- Name types, phone types, and person identifier types defined in the application
- Address type codes and countries defined in the application
- Characteristic types defined in the application (where the characteristic entity is set to **Customer Registration**)
- Relationship types defined in the application
- Customer class, invoice currencies, account categories, bill cycles, accrual cycles, account identifier types, auto pay source codes, auto pay methods, auto pay route types, account relationship types, bill formats, address sources, bill route types, and collection class defined in the application

**Note:** The collection class is required when you are defining a customer registration using the **C1-CustomerRegistrationBanking** business object.

- Deal review frequencies and currency codes defined in the application

**Note:** These prerequisites are required when you are defining a customer registration using the **C1-CustomerRegistrationBanking** business object.

- Policy types and policy person roles defined in the application.

**Note:** These prerequisites are required when you are defining a customer registration using the **C1-CustomerRegistrationHC** business object.

### Procedure

To define a customer registration:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Person Information** and then click **Customer Registration**.  
A sub-menu appears.
3. Click the **Add** option from the **Customer Registration** sub-menu.

The **Add Customer Registration** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Customer Registration Type	Used to indicate the customer registration type using which you want to define the customer registration.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Source System	Used to indicate the external system from where the customer registration information is received.	No
Person Type	Used to indicate the type of person for whom you want to define the customer registration.	Yes

**Tip:** Alternatively, you can access the **Add Customer Registration** screen by clicking the **Add** button in the **Page Title** area of the **Customer Registration** screen.

4. Select the required **Customer Registration Type** from the respective field.
5. Select the required **Source System** from the respective field, if required.
6. Select the required **Person Type** from the respective field.
7. Click **OK**.

The **Customer Registration** screen appears. It contains the following pages:

- **Main** - Used to specify basic information about the person.
- **Contact** - Used to specify the contact information about the person.
- **Person Characteristics** - Used to define a list of characteristics for the person.
- **Hierarchy** - Used to define the person to person relationship for the person
- **Accounts** - Used to add the account details of the person.
- **Deal** - Used to specify information about the deals created for the person.

**Note:** This page appears only when you are defining a customer registration using the **C1-CustomerRegistrationBanking** business object.

- **Policies** - Used to specify the policy details of the person.

**Note:** This page appears when you are defining a customer registration using the **C1-CustomerRegistrationHC** business object.

- **Registration Characteristics** - Used to define a list of characteristics for the customer registration.

The **Main** page contains the following sections:

- **Main** - Used to specify basic details about the person.
- **Person Name** - Used to add the person names for customer registration.
- **Person Phones** - Used to add the person phone details for customer registration.
- **Person IDs** - Used to add the person identifiers for customer registration.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Person Type	Indicates the person type using which you want to define the customer registration for the person.	Not applicable
Date of Birth	Used to specify the date when the person was born.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Division	Used to indicate the division to which the person belongs.	Yes
	<b>Note:</b> You can view only those divisions to which you have access in the <b>Division</b> list.	
Person Since Date	Used to specify the date from when the person is the main customer.	Yes
Customer Segment	Used to indicate the customer segment to which the person belongs.	Yes
	<b>Note:</b> This field appears when you are defining a customer registration using the <b>C1-CustomerRegistrationBanking</b> business object.	
Customer Tier	Used to indicate the customer tier of the customer segment to which the person belongs.	Yes
	<b>Note:</b> This field appears when you are defining a customer registration using the <b>C1-CustomerRegistrationBanking</b> business object.	
Access Group	Used to indicate the user group that can access the customer registration.	Yes
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Access Group</b> field. On clicking the <b>Search</b> icon, the <b>Access Group Search</b> window appears. On specifying the access group, the description of the access group appears corresponding to the <b>Access Group</b> field.	

8. Enter the required details in the **Main** section.
9. Add the names of the person in the **Person Names** section.
10. Add the phone details for the person in the **Person Phones** section.
11. Add the identifier details for the person in the **Person IDs** section.
12. Define the addresses of the person in the **Contact** page, if required.
13. Define a list of characteristics for the person in the **Person Characteristics** page, if required.
14. Define the person to person relationship for the person in the **Hierarchy** page, if required.
15. Add the account details of the person in the **Accounts** page, if required.
16. Add information about the deals created for the person in the **Deal** page, if required.

**Note:** This page appears when you are defining a customer registration using the **C1-CustomerRegistrationBanking** business object.

17. Add the policy details of the person in the **Policies** page, if required.

**Note:** This page appears when you are defining a customer registration using the **C1-CustomerRegistrationHC** business object.

18. Define a list of characteristics for the customer registration in the **Registration Characteristics** page, if required.

19. Click **Validate and Save**.

The customer registration is defined.

## **Adding the Names of a Person**

### **Prerequisites**

To add the names of a person, you should have:

- Name types defined in the application.

### **Procedure**

To add the names of a person:

1. Ensure that the **Person Names** section is expanded in the **Main** page when you are defining, editing, or copying a customer registration.

The **Person Names** section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Name Type	Used to indicate the type of name which you want to add for the customer registration.	Yes (Conditional)
	<b>Note:</b> The list includes only those name types where the name type entity is set to <b>Customer Registration</b> .	<b>Note:</b> This field is required when you are adding a name for customer registration.
Name	Used to specify the name of the person.	Yes (Conditional)
		<b>Note:</b> This field is required when you are adding a name for customer registration.

- Enter the required details in the **Person Names** section.
- If you want to add more than one person name for the customer registration, click the **Add (+)** icon and then repeat step 2.

**Note:** However, if you want to remove a person name from the customer registration, click the **Delete (🗑)** icon corresponding to the person name.

- Click **Validate and Save**.

The names are added for the person.

## Adding the Phone Details of a Person

### Prerequisites

To add the phone details of a person, you should have:

- Phone types defined in the application.

### Procedure

To add the phone details of a person:

- Ensure that the **Person Phones** section is expanded in the **Main** page when you are defining, editing, or copying a customer registration.

The **Person Phones** section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Phone Type	Used to indicate the type of the phone which you want to add for the person. The valid values are: <ul style="list-style-type: none"> <li>• Business</li> <li>• Business Phone</li> <li>• Fax</li> <li>• Home</li> <li>• Mobile</li> </ul>	Yes (Conditional)
		<b>Note:</b> This field is required when you are adding the phone details of a person.
Phone Number	Used to specify the phone number.	Yes (Conditional)
		<b>Note:</b> This field is required when you are adding the phone details of a person.
Extension	Used to specify the extension value of the phone number.	Yes (Conditional)
		<b>Note:</b> This field is required when you are adding the phone details of a person.
Phone Format	Displays the format in which the phone number is specified for the person.	Not applicable

- Enter the required details in the **Person Phones** section.
- If you want to add more than one person phone for the customer registration, click the **Add (+)** icon and then repeat step 2.

**Note:** However, if you want to remove a person phone from the customer registration, click the **Delete (🗑)** icon corresponding to the person phone.

- Click **Validate and Save**.

The phone details are added for the person.

## **Adding the Identifier Details of a Person**

### **Prerequisites**

To add the identifier details of a person, you should have:

- Person identifier types defined in the application.

### **Procedure**

To add the identifier details of a person:

1. Ensure that the **Person IDs** section is expanded in the **Main** page when you are defining, editing, or copying a customer registration.

The **Person IDs** section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Primary ID	Used to indicate whether the person identifier is primary or not.	Yes (Conditional) <b>Note:</b> This field is required while adding the identifier details of a person.
Person Identifier Type	Used to indicate the identifier type which you want to add for the person. <b>Note:</b> The list includes only those person identifier types where the person identifier type entity is set to <b>Customer Registration</b> .	Yes (Conditional) <b>Note:</b> This field is required while adding the identifier details of a person.
Person Identifier	Used to specify the value of the person identifier type.	Yes (Conditional) <b>Note:</b> This field is required while adding the identifier details of a person.
Identifier Format	Displays the format in which the person identifier is specified for the person.	Not applicable

2. Enter the required details in the **Person IDs** section.
3. If you want to add more than one person identifier for the person, click the **Add (+)** icon and then repeat step 2.

**Note:** However, if you want to remove a person identifier from the person, click the **Delete (🗑)** icon corresponding to the person identifier.

4. Click **Validate and Save**.

The identifier details are added for the person.

## **Adding the Contact Details of a Person**

### **Prerequisites**

To add the contact details of a person, you should have:

- Address type codes and countries defined in the application.

### **Procedure**

To add the contact details of a person:

1. Ensure that the **Person Addresses** section in the **Contact** page is expanded when you are defining, editing, or copying a customer registration.

The **Person Addresses** section contains the following fields:

<b>Field Name</b>	<b>Field Description</b>	<b>Mandatory (Yes or No)</b>
Address Type Code	Used to indicate the type of address that you want to add for the person.	Yes
	<b>Note:</b> The list includes only those address type codes where the address type code entity is set to <b>Customer Registration</b> .	
Effective Date	Used to specify the date from when the address is effective for the person.	Yes
Season	Used to specify the season for which the address is effective for the person.	Yes (Conditional)
	<b>Note:</b> This field appears when you select the <b>Person Seasonal</b> option from the Address Type Code field.	
Country	Used to indicate the country where the person is located.	Yes
	<b>Note:</b> The list includes only those countries which are already defined in the system. On selecting a country, only those address fields which are set as <b>Optional</b> while defining the country appear in the <b>Person Addresses</b> section. Also, the labels of the address fields will change depending on the business label which is defined for the respective address field in the <b>Country</b> screen.	
Address 1	Used to specify the first line of the address. It may contain details, such as house number and apartment name.	No

## **Adding an Account for a Person**

### **Prerequisites**

To add the account for a person, you should have:

- Customer class, divisions, currencies, account categories, access groups, accrual cycles, and bill cycles defined in the application
- Account identifier types defined in the application
- Auto pay source codes, auto pay methods, and auto pay route types defined in the application
- Account relationship types defined in the application
- Address sources, bill formats, and bill route types defined in the application
- Characteristic types defined in the application (where the characteristic entity is set to **Account**)
- Collection class defined in the application

**Note:** The collection class is required when you are defining a customer registration using the **C1-CustomerRegistrationBanking** business object.

### Procedure

To add an account for a person:

1. Ensure that the **Accounts** section is expanded in the **Accounts** page when you are adding, editing, or removing an account of a person.

The **Accounts** section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Sequence No.	Displays the sequence number of the account.	Not applicable
Template	Displays the account template using which the account is added for the person.	Not applicable
Customer Class	Indicates the customer class to which the account belongs.	Not applicable
Division	Indicates the division to which the account belongs.	Not applicable
Primary Identifier Type	Indicates the primary identifier type using which the account is added for the person.	Not applicable
Identifier Value	Displays the value of the primary identifier type.	Not applicable
Account Information	Displays the concatenated string of information about the account that is added for the person.	Not applicable
View / Edit	On clicking the <b>View / Edit</b> (✎) icon, you can view or edit the details of the account.	Not applicable

**Note:** No information appears in the above columns if an account is not yet added for the person.

2. Click the **Add New Account** button in the **Accounts** section.

The **Customer Registration - Add Account** screen appears. It contains the following pages:

- **Main** - Used to specify basic information about the account.
- **Auto Pay** - Used to add the automatic payment details of the account.
- **Persons** - Used to associate a person to the account.
- **Account Characteristics** - Used to define a list of characteristics for the account.
- **Credit Ratings** - Used to add the credit rating details for the account.

**Note:** This page appears when you are defining a customer registration using the **C1-CustomerRegistrationBanking** business object.

The **Main** page contains the following sections:

- **Main** - Used to specify basic details about the account.
- **Account Identifiers** - Used to add the identifier details for the account.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Customer Class	Used to indicate the customer class to which the account belongs.	Yes
Division	Used to indicate the division to which the account belongs.  <b>Note:</b> You can only view those divisions to which you have access in the <b>Division</b> list.	Yes
Set Up Date	Used to specify the date from when the account is configured for the person.  <b>Note:</b> By default, the current date appears in this field.	Yes
Invoice Currency	Used to indicate the currency which you want to use for generating the invoice of the account.  <b>Note:</b> The list includes only those currencies which are defined in the system.	Yes
Account Category	Used to indicate the category to which the account belongs. The valid values are: <ul style="list-style-type: none"> <li>• Invoice Account</li> <li>• Settlement Account</li> <li>• Usage Account</li> </ul> <b>Note:</b> The list includes only those values which are present in the <b>ACCT_USAGE_FLG</b> lookup field.	Yes
Access Group	Used to indicate the user group that can access the account for the person.  <b>Note:</b>  The <b>Search</b> (🔍) icon appears corresponding to the <b>Access Group</b> field. On clicking the <b>Search</b> icon, the <b>Access Group Search</b> window appears.  On specifying the access group, the description of the access group appears corresponding to the <b>Access Group</b> field.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Exclude Accrual	Used to indicate whether the account is eligible for accrual.	No
	<p><b>Note:</b> By default, the account is eligible for accrual if the division to which the account belongs is eligible for accrual. If you do not want the account to be eligible for accrual, you must select the <b>Exclude Accrual</b> check box. On selecting the <b>Exclude Accrual</b> check box, the <b>Accrual Cycle</b> field is disabled.</p>	
Accrual Cycle	Used to indicate the accrual cycle of the account in the division.	No
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Accrual Cycle</b> field. On clicking the <b>Search</b> icon, the <b>Accrual Cycle Search for Cust Reg</b> window appears.</p> <p>On specifying the accrual cycle, the description of the accrual cycle appears corresponding to the <b>Accrual Cycle</b> field.</p> <p>This field is disabled when you click the <b>Exclude Accrual</b> check box.</p>	
Product	Used to indicate the product for which the account is enrolled.	Yes (Conditional)
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Product</b> field. On clicking the <b>Search</b> icon, the <b>Search Product</b> window appears.</p>	
Eligible for Repricing	Used to indicate whether the account is eligible for repricing when the account attributes (defined as parameters in the system) are changed.	No
	<p><b>Note:</b></p> <p>Only accounts where the person and child person are the main customers are considered for repricing.</p> <p>The system creates the repricing request for the account irrespective of whether the account is eligible for repricing or not.</p>	
Bill Cycle	Used to indicate the bill cycle for the account.	No

Field Name	Field Description	Mandatory (Yes or No)
Bill Lead Days	Used to specify the number of days which is used to derive the cut-off date for advance billing.	Yes
	<b>Note:</b> In case you don't want to bill the account in advance, you must specify <b>0</b> in this field.	
Comments	Used to specify additional information about the account.	No

3. Enter the required details in the **Main** section.
4. Add, edit, or remove the identifier details of the account in the **Account Identifiers** section.
5. Add, edit, or remove the automatic payment details of the account in the **Auto Pay** page, if required.
6. Associate or disassociate persons from the account in the **Persons** page, if required.
7. Define, edit, or remove characteristics of the account in the **Account Characteristics** page, if required.
8. Add, edit, or remove the credit rating details of the account in the **Credit Ratings** page, if required.
9. Click **Validate and Save**.

The account is added for the person.

## Adding the Bill Routing Information for an Account

### Prerequisites

To add the bill routing information for an account, you should have:

- Bill formats, address sources, and bill route types defined in the application

### Procedure

To add the bill routing information for an account:

1. Ensure that **Bill Routing Information** section is expanded in the **Persons** page when you are adding or editing the account of a person.

The **Bill Routing Information** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Receives Copy of Bill	Used to indicate whether you want the person to receive a copy of the account's bill.	Yes (Conditional)
	<b>Note:</b> By default, the <b>Receives Copy of Bill</b> check box is selected if the person is the main customer of the account.	<b>Note:</b> This field is required while adding the bill routing information for an account.
Bill Format	Used to indicate the format in which you want the person to receive the account's bill. The valid values are: <ul style="list-style-type: none"> <li>• Detailed</li> <li>• Summary</li> </ul>	Yes (Conditional)
	<b>Note:</b> By default, this field is disabled. It is enabled only when the <b>Receives Copy of Bill</b> check box is selected.	<b>Note:</b> This field is required while adding the bill routing information for an account.
Address Source	Used to indicate the address where you want to mail the account's bill. The valid values are: <ul style="list-style-type: none"> <li>• Account Override</li> <li>• Main</li> <li>• Multiple Account Override</li> <li>• Person</li> </ul>	Yes (Conditional)
	<b>Note:</b> If you select the <b>Address Source</b> as <b>Account Override</b> , the <b>Account Override Address</b> section appears in the <b>Persons</b> page where you can add the account override address of the person.	<b>Note:</b> This field is required while adding the bill routing information for an account.
Number of Bill Copies	Used to specify the number of copies of the account's bill you want the person to receive.	Yes (Conditional)
	<b>Note:</b> By default, this field is disabled. It is enabled when the <b>Receives Copy of Bill</b> check box is selected.	<b>Note:</b> This field is required while adding the bill routing information for an account.

Field Name	Field Description	Mandatory (Yes or No)
Bill Route Type	Used to indicate how the account's bill is sent to the person.	Yes (Conditional)
	<b>Note:</b> By default, this field is disabled. It is enabled when the <b>Receives Copy of Bill</b> check box is selected.	<b>Note:</b> This field is required while adding the bill routing information for an account.
Receives Notification	Used to indicate whether you want the person to receive notifications about the account's bill.	Yes (Conditional)
	<b>Note:</b> By default, the <b>Receives Notification</b> check box is selected if the person is the main customer of the account.	<b>Note:</b> This field is required while adding the bill routing information for an account.

- Enter the required details in the **Bill Routing Information** section.
- If you want to add more than one bill routing information for the account, click the **Add (+)** icon and then repeat step 2.

**Note:** However, if you want to remove a bill routing information from the account, click the **Delete (🗑)** icon.

- Click **Validate and Save**.

The bill routing information is added for the account.

## **Defining a Characteristic for an Account**

### **Prerequisites**

To define a characteristic for an account, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Account**)

### **Procedure**

To define a characteristic for an account:

- Ensure that the **Characteristics** section is expanded in the **Account Characteristics** page when you are adding or editing the account of a person.

The **Characteristics** section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the account.	Yes (Conditional)
		<b>Note:</b> This field is required while defining a characteristic for an account.
Characteristic Type	Used to indicate the characteristic type.	Yes (Conditional)
		<b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Account</b> . <b>Note:</b> This field is required while defining a characteristic for an account.
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional)
		<b>Note:</b> This field is required while defining a characteristic for an account. <b>Note:</b> If you select a predefined characteristic type, the <b>Search</b> (🔍) icon appears corresponding to the <b>Characteristic Value</b> field. On clicking the <b>Search</b> icon, the <b>Predefined Characteristic Search</b> window appears. On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.

- Enter the required details in the **Characteristics** section.
- If you want to define more than one characteristic for the account, click the **Add** (+) icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from the account, click the **Delete** (🗑️) icon corresponding to the characteristic.

- Click **Validate and Save**.

The characteristic is defined for the account.

## Defining a Policy

### Prerequisites

To define a policy, you should have:

- Policy types defined in the application.
- Source systems defined in the application.
- Policy person roles defined in the application.
- Characteristic types defined in the application (where the characteristic entity is set to **Policy**)

### **Procedure**

To define a policy:

1. Ensure that the **Policies & Plans** section is expanded in the **Policies** page when you are defining, editing, or removing a policy from the person.

The **Policies & Plans** section contains the following columns:

<b>Column Name</b>	<b>Column Description</b>	<b>Mandatory (Yes or No)</b>
Sequence No.	Displays the sequence number of the policy.	Not applicable
Template	Indicates the policy template using which the policy is defined for the person.	Not applicable
Policy Type	Indicates the policy type using which the policy is defined for the person.	Not applicable
Policy Number	Displays the policy number.	Not applicable
View / Edit	On clicking the <b>View / Edit</b> (✎) icon, you can view or edit the details of the policy.	Not applicable
Policy Plans	On clicking the <b>Add</b> (+) icon, you can add policy plans for the policy.	Not applicable

**Note:** No information appears in the above columns if a policy is not yet defined for the person.

2. Click the **Add New Policy** button in the **Policies & Plans** section.

The **Select Policy Type** screen appears. It contains the following field:

<b>Field Name</b>	<b>Field Description</b>	<b>Mandatory (Yes or No)</b>
Policy Type	Used to indicate the policy type using which you want to define a policy.  <b>Note:</b> If you want to create a fully-insured group policy, you must select a policy type where the policy category is set to <b>Fully-Insured Group</b> or <b>Fully-Insured Individual</b> . However, if you want to create a self-funded policy, you must select a policy type where the policy category is set to <b>Self-Funded</b> .	Yes

3. Select the required policy type from the **Policy Type** field.
4. Click **OK**.

The **Policy** screen appears. It contains the following sections:

- **Main** - Used to specify the basic details about the policy.
- **Persons** - Used to associate persons with the policy.

- **Characteristics** - Used to define the characteristics for the policy.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Policy Type	Indicates the policy type using which you are defining the policy.	Not applicable
Policy Number	Used to specify the policy number.	Yes
Description	Used to specify the description for the policy.	Yes
Source System	Used to indicate the external system from where the policy is originated.	Yes
	<b>Note:</b> This field is enabled when you are defining a policy using a policy type where the policy category is set to <b>Fully-Insured Group</b> or <b>Fully-Insured Individual</b> .	
Start Date	Used to specify the date from when the policy is effective.	Yes
	<b>Note:</b> The policy start date cannot be later than the policy end date.	
End Date	Used to specify the date till when the policy is effective.	Yes
	<b>Note:</b> The policy end date cannot be earlier than the policy start date.	
Policy Person Role	Used to indicate the role of the person for whom you are defining the policy.	Yes

**Note:** The **Policies** page appears when you are defining, editing, or copying a customer registration which is created using the **C1-CustomerRegistrationHC** business object.

5. Enter the required details in the **Main** section.
6. Define characteristics for the policy in the **Characteristics** section, if required.
7. Associate persons to the policy in the **Persons** section, if required.
8. Click **Validate and Save**.

The policy is defined for the person.

## Associating a Person to a Policy

### Prerequisites

To associate a person to a policy, you should have:

- Policy person roles defined in the application

### Procedure

To associate a person to a policy:

1. Ensure that the **Persons** section is expanded in the **Policy** screen when you are defining or editing a policy.

The **Persons** section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Person	Used to indicate the person that you want to associate to the policy.	Yes (Conditional)
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Person</b> field. On clicking the <b>Search</b> icon, the <b>Person Search</b> window appears.</p> <p>On specifying the person, the concatenated string of information about the person appears corresponding to the <b>Person</b> field separated by a comma (,).</p>	<p><b>Note:</b> This field is required when you are associating a person to the policy.</p>
Sequence	Used to specify the sequence number for the associated person.	Yes (Conditional)
		<p><b>Note:</b> This field is required when you are associating a person to the policy.</p>
Policy Person Role	Used to indicate the role of the associated person in the policy.	Yes (Conditional)
		<p><b>Note:</b> This field is required when you are associating a person to the policy.</p>

Column Name	Column Description	Mandatory (Yes or No)
Main Customer	Used to indicate whether the associated person is the main customer of the policy.	Yes (Conditional)
	<p><b>Note:</b></p> <p>At a time, only one person can be the main customer of the policy.</p> <p>You must select this option while associating a person who is the main customer of the policy.</p>	<p><b>Note:</b> This field is required when you are associating a person to the policy.</p>
Start Date	Used to specify the date from when the person is associated to the policy.	Yes (Conditional)
	<p><b>Note:</b></p> <p>The start date cannot be later than the end date.</p> <p>The start date cannot be earlier than the policy start date and later than the policy end date.</p>	<p><b>Note:</b> This field is required when you are associating a person to the policy.</p>
End Date	Used to specify the date till when the person is associated to the policy.	No
	<p><b>Note:</b></p> <p>The end date cannot be earlier than the start date.</p> <p>The end date cannot be earlier than the policy start date and later than the policy end date.</p>	

- Enter the required details in the **Persons** section.
- If you want to associate more than one person to the policy, click the **Add (+)** icon and then repeat step 2.

**Note:** However, if you want to remove a person from the person, click the **Delete** (🗑️) icon corresponding to the person.

- Click **Validate and Save**.

The person is associated to the policy.

## Adding a Plan in a Policy

### Prerequisites

To add a plan in a policy, you should have:

- Policy plan templates defined in the application.
- Policy plan business objects defined in the application.
- Pricing rule types defined in the application.
- Characteristic types defined in the application (where the characteristic entity is set to **Policy Plan**)

### Procedure

To add a plan in a policy:

1. Ensure that the **Policies & Plans** section is expanded in the **Policies** page when you are adding, editing, or removing a policy plan from a policy.
2. Click the **Add**  icon in the **Policy Plans** column corresponding to the policy in which you want to add a policy plan.

The following columns appear in the **Policies & Plans** section:

Column Name	Column Description	Mandatory (Yes or No)
Sequence No.	Displays the sequence number of the policy plan.	Not applicable
Template	Indicates the policy plan template using which the policy plan is added in the policy.	Not applicable
Plan Number	Displays the policy plan number.	Not applicable
Price Item	Displays the price item that is associated with the policy plan.	Not applicable
View / Edit	On clicking the <b>View / Edit</b>  icon, you can view or edit the details of the policy plan.	Not applicable

**Note:** No information appears in the above columns if a plan is not yet added in the policy.

3. Click the **Add New Plan** button in the **Policies & Plans** section.

The **Select Policy Plan Template** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Template	Used to indicate the template using which you want to define the policy plan for the policy.	Yes
	<b>Note:</b> By default, the <b>Policy Plan - Healthcare</b> option is selected.	
Business Object	Used to indicate the business object using which you want to define the policy plan for the policy.	Yes
	<b>Note:</b> By default, the <b>Policy Plan</b> option is selected.	

4. Select the required template and business object from the respective fields.
5. Click **OK**.

The **Plan** screen appears. It contains the following sections:

- **Main** - Used to specify the basic details about the policy plan.
- **Pricing Rule Types** - Used to associate the pricing rule types with the policy plan.
- **Characteristics** - Used to define the characteristics for the policy plan.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Price Item	Used to indicate the price item which you want to directly associate with the policy plan.	Yes
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Price Item</b> field. On clicking the <b>Search</b> icon, the <b>Price Item Search</b> window appears.  On the specifying the price item, the concatenated string of information about the price item appears corresponding to the <b>Price Item</b> field separated by a comma (.).	
Plan Number	Used to specify the policy plan number.	Yes
Plan Name	Used to specify the description for the policy plan.	No

Field Name	Field Description	Mandatory (Yes or No)
Start Date	Used to specify the date from when the policy plan is effective for the policy.	Yes
	<b>Note:</b> The policy plan start date cannot be earlier than the policy start date and later than the policy end date.  The policy plan start date cannot be later than the policy plan end date.	
End Date	Used to specify the date till when the policy plan is effective for the policy.	No
	<b>Note:</b> The policy plan end date cannot be earlier than the policy start date and later than the policy end date.  The policy plan end date cannot be earlier than the policy plan start date.	

6. Enter the required details in the **Main** section.
7. Associate the pricing rule types with the policy plan in the **Pricing Rule Types** section, if required.
8. Define the characteristics for the policy plan in the **Characteristics** section, if required.
9. Click **Validate and Save**.

The policy plan is added in the policy.

## Editing the Account Details of a Person

### Prerequisites

To edit the account details of a person, you should have:

- Customer class, divisions, currencies, access groups, accrual cycles, and bill cycles defined in the application
- Account identifier types defined in the application
- Auto pay source codes, auto pay methods, and auto pay route types defined in the application
- Account relationship types defined in the application
- Address sources, bill formats, and bill route types defined in the application
- Characteristic types defined in the application (where the characteristic entity is set to **Account**)
- Collection class defined in the application

**Note:** The collection class is required when you are defining a customer registration using the **C1-CustomerRegistrationBanking** business object.

### Procedure

To edit the account details of a person:

1. Search for the customer registration in the **Customer Registration** screen.
2. In the **Search Results** section, click the link in the **Customer Registration Information** column corresponding to the customer registration whose account details you want to edit.  
The **Main** tab appears in the **Customer Registration** screen.
3. Click the **Edit** button in the **Customer Registration** zone.  
The **Main** page appears in the **Customer Registration** screen.
4. Ensure that the **Accounts** section is expanded in the **Accounts** page.
5. Click the **Edit** (✎) icon in the **View / Edit** column corresponding to the account whose details you want to edit.

The **Customer Registration - Add Account** screen appears. It contains the following pages:

- **Main** - Used to specify basic information about the account.
- **Auto Pay** - Used to add the automatic payment details of the account.
- **Persons** - Used to associate a person to the account.
- **Account Characteristics** - Used to define a list of characteristics for the account.
- **Credit Ratings** - Used to add the credit rating details for the account.

**Note:** This page appears when you are defining a customer registration using the **C1-CustomerRegistrationBanking** business object.

The **Main** page contains the following sections:

- **Main** - Used to specify basic details about the account.
- **Account Identifiers** - Used to add the identifier details for the account.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Customer Class	Used to indicate the customer class to which the account belongs.	Yes
Division	Used to indicate the division to which the account belongs.  <b>Note:</b> You can only view those divisions to which you have access in the <b>Division</b> list.	Yes
Set Up Date	Displays the date from when the account is configured for the person.	Not applicable
Invoice Currency	Used to indicate the currency which you want to use for generating the invoice of the account.  <b>Note:</b> The list includes only those currencies which are defined in the system.	Yes
Account Category	Displays the category to which the account belongs. The valid values are: <ul style="list-style-type: none"> <li>• Invoice Account</li> <li>• Settlement Account</li> <li>• Usage Account</li> </ul> <b>Note:</b> The list includes only those values which are present in the <b>ACCT_USAGE_FLG</b> lookup field.	Not applicable
Access Group	Used to indicate the user group that can access the account for the person.  <b>Note:</b>  The <b>Search</b> (🔍) icon appears corresponding to the <b>Access Group</b> field. On clicking the <b>Search</b> icon, the <b>Access Group Search</b> window appears.  On specifying the access group, the description of the access group appears corresponding to the <b>Access Group</b> field.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Exclude Accrual	Used to indicate whether the account is eligible for accrual.	No
	<p><b>Note:</b> By default, the account is eligible for accrual if the division to which the account belongs is eligible for accrual. If you do not want the account to be eligible for accrual, you must select the <b>Exclude Accrual</b> check box. On selecting the <b>Exclude Accrual</b> check box, the <b>Accrual Cycle</b> field is disabled.</p>	
Accrual Cycle	Used to indicate the accrual cycle of the account in the division.	No
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Accrual Cycle</b> field. On clicking the <b>Search</b> icon, the <b>Accrual Cycle Search for Cust Reg</b> window appears.</p> <p>On specifying the accrual cycle, the description of the accrual cycle appears corresponding to the <b>Accrual Cycle</b> field.</p> <p>This field is disabled when you click the <b>Exclude Accrual</b> check box.</p>	
Product	Used to indicate the product for which the account is enrolled.	Yes (Conditional)
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Product</b> field. On clicking the <b>Search</b> icon, the <b>Search Product</b> window appears.</p>	
Eligible for Repricing	Used to indicate whether the account is eligible for repricing when the account attributes (defined as parameters in the system) are changed.	No
	<p><b>Note:</b></p> <p>Only accounts where the person and child person are the main customers are considered for repricing.</p> <p>The system creates the repricing request for the account irrespective of whether the account is eligible for repricing or not.</p>	
Bill Cycle	Used to indicate the bill cycle for the account.	No

Field Name	Field Description	Mandatory (Yes or No)
Bill Lead Days	Used to specify the number of days which is used to derive the cut-off date for advance billing.	Yes
	<b>Note:</b> In case you don't want to bill the account in advance, you must specify <b>0</b> in this field.	
Comments	Used to specify additional information about the account.	No

6. Modify the required details of the account in the **Main** page.
7. Add, edit, or remove the identifier details of the account in the **Account Identifiers** section.
8. Add, edit, or remove the automatic payment details of the account in the **Auto Pay** page, if required.
9. Associate or disassociate persons from the account in the **Persons** page, if required.
10. Define, edit, or remove characteristics of the account in the **Account Characteristics** page, if required.
11. Add, edit, or remove the credit rating details of the account in the **Credit Ratings** page, if required.
12. Click **Validate and Save**.

The changes made to the account are saved.

## **Copying a Customer Registration**

Instead of creating a customer registration from scratch, you can create a new customer registration using an existing customer registration. This is possible through copying a customer registration. On copying a customer registration, the details including the characteristics are copied to the new customer registration. You can then edit the details, if required.

### **Prerequisites**

To copy a customer registration, you should have:

- Customer registration (whose copy you want to create) defined in the application
- Divisions, customer segments, customer tiers, and access groups defined in the application
- Name types, phone types, and person identifier types defined in the application

- Address type codes and countries defined in the application
- Characteristic Types defined in the application
- Relationship types defined in the application
- Customer class, invoice currencies, account categories, bill cycles, accrual cycles, account identifier types, auto pay source codes, auto pay methods, auto pay route types, account relationship types, bill formats, address sources, bill route types, and collection class defined in the application

**Note:** The collection class is required when you are copying a customer registration which is created using the **C1-CustomerRegistrationBanking** business object.

- Deal review frequencies and currency codes defined in the application

**Note:** These prerequisites are required when you are copying a customer registration which is created using the **C1-CustomerRegistrationBanking** business object.

- Policy types and policy person roles defined in the application.

**Note:** These prerequisites are required when you are copying a customer registration which is created using the **C1-CustomerRegistrationHC** business object.

### **Procedure**

To copy a customer registration:

1. Search for the customer registration in the **Customer Registration** screen.
2. Click the **Copy**  icon in the **Copy** column corresponding to the customer registration whose copy you want to create.

The **Customer Registration** screen appears. It contains the following pages:

- **Main** - Used to specify basic information about the person.
- **Contact** - Used to specify the contact information about the person.
- **Person Characteristics** - Used to define a list of characteristics for the person.
- **Hierarchy** - Used to define the person to person relationship for the person
- **Accounts** - Used to add the account details of the person.
- **Deal** - Used to specify information about the deals created for the person.

**Note:** This page appears only when you are defining a customer registration using the **C1-CustomerRegistrationBanking** business object.

- **Policies** - Used to specify the policy details of the person.

**Note:** This page appears when you are defining a customer registration using the **C1-CustomerRegistrationHC** business object.

- **Registration Characteristics** - Used to define a list of characteristics for the customer registration.

The **Main** page contains the following sections:

- **Main** - Used to specify basic details about the person.
- **Person Name** - Used to add the person names for customer registration.
- **Person Phones** - Used to add the person phone details for customer registration.
- **Person IDs** - Used to add the person identifiers for customer registration.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Person Type	Indicates the person type using which you want to define the customer registration for the person.	Not applicable
Date of Birth	Used to specify the date when the person was born.	No
Division	Used to indicate the division to which the person belongs.	Not applicable
Person Since Date	Used to specify the date from when the person is the main customer.	No
Customer Segment	Used to indicate the customer segment to which the person belongs.  <b>Note:</b> This field appears when you are defining a customer registration using the <b>C1-CustomerRegistrationBanking</b> business object.	No
Customer Tier	Used to indicate the customer tier of the customer segment to which the person belongs.  <b>Note:</b> This field appears when you are defining a customer registration using the <b>C1-CustomerRegistrationBanking</b> business object.	No
Access Group	Used to indicate the user group that can access the customer registration.  <b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Access Group</b> field. On clicking the <b>Search</b> icon, the <b>Access Group Search</b> window appears.	No

3. Enter the required details in the **Main** section.
4. Add or remove the names of the person in the **Person Names** section.
5. Add or remove the phone details for the person in the **Person Phones** section.
6. Add, edit, or remove the identifier details for the person in the **Person IDs** section.
7. Define, edit, or remove the addresses of the person in the **Contact** page, if required.
8. Define, edit, or remove characteristics of the person in the **Person Characteristics** page, if required.
9. Define, edit, or remove the person to person relationship for the person in the **Hierarchy** page, if required.
10. Add, edit, or remove the account details of the person in the **Accounts** page, if required.
11. Add, edit, or remove information about the deals created for the person in the **Deal** page, if required.

**Note:** This page appears when you are defining a customer registration using the **C1-CustomerRegistrationBanking** business object.

12. Add, edit, or remove the policy details of the person in the **Policies** page, if required.

**Note:** This page appears when you are defining a customer registration using the **C1-CustomerRegistrationHC** business object.

13. Define, edit, or remove characteristics of the customer registration in the **Registration Characteristics** page, if required.

14. Click **Validate and Save**.

The new customer registration is defined.

## Editing the Policy Details

### Prerequisites

To edit the policy details, you should have:

- Source systems defined in the application.
- Policy person roles defined in the application.
- Characteristic types defined in the application (where the characteristic entity is set to **Policy**)

### Procedure

To edit the policy details:

1. Search for the customer registration in the **Customer Registration** screen.

- In the **Search Results** section, click the link in the **Customer Registration Information** column corresponding to the customer registration whose policy details you want to edit.

The **Main** tab appears in the **Customer Registration** screen.

- Click the **Edit** button in the **Customer Registration** zone.

The **Main** page appears in the **Customer Registration** screen.

- Ensure that the **Policies & Plans** section is expanded in the **Policies** page.

- Click the **Edit**() icon in the **View / Edit** column corresponding to the policy whose details you want to edit.

The **Policy** screen appears. It contains the following sections:

- **Main** - Used to specify the basic details about the policy.
- **Persons** - Used to associate persons with the policy.
- **Characteristics** - Used to define the characteristics for the policy.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Policy Type	Indicates the policy type using which the policy is defined in the system.	Not applicable
Policy Number	Used to specify the policy number.	Yes
Description	Used to specify the description for the policy.	Yes
Source System	Used to indicate the external system from where the policy is originated.  <b>Note:</b> This field is enabled when you are defining a policy using a policy type where the policy category is set to <b>Fully-Insured Group</b> or <b>Fully-Insured Individual</b> .	Yes
Start Date	Used to specify the date from when the policy is effective.  <b>Note:</b> The policy start date cannot be later than the policy end date.	Yes
End Date	Used to specify the date till when the policy is effective.  <b>Note:</b> The policy end date cannot be earlier than the policy start date.	Yes
Policy Person Role	Used to indicate the role of the person for whom you are defining the policy.	Yes

**Note:** The **Policies** page appears when you are defining, editing, or copying a customer registration which is created using the **C1-CustomerRegistrationHC** business object.

- Modify the required details in the **Main** section.
- Define, edit, or remove characteristics of the policy in the **Characteristics** section, if required.
- Associate or disassociate persons from the policy in the **Persons** section, if required.

### 9. Click **Validate and Save**.

The changes made to the policy are saved.

## Editing the Policy Plan Details

### Prerequisites

To edit the policy plan details, you should have:

- Pricing rule types defined in the application.
- Characteristic types defined in the application (where the characteristic entity is set to **Policy Plan**)

### Procedure

To edit the policy plan details:

1. Search for the customer registration in the **Customer Registration** screen.
2. In the **Search Results** section, click the link in the **Customer Registration Information** column corresponding to the customer registration whose policy plan details you want to edit.

The **Main** page appears in the **Customer Registration** screen.

3. Ensure that the **Policies & Plans** section is expanded in the **Policies** page.
4. Click the **Add**  icon in the **Policy Plans** column corresponding to the policy whose plan details you want to edit.

The following columns appear in the **Policies & Plans** section:

Column Name	Column Description	Mandatory (Yes or No)
Sequence No.	Displays the sequence number of the policy plan.	Not applicable
Template	Indicates the policy plan template using which the policy is added in the policy.	Not applicable
Plan Number	Displays the policy plan number.	Not applicable
Price Item	Displays the price item that is associated with the policy plan.	Not applicable
View / Edit	On clicking the <b>View / Edit</b>  icon, you can view or edit the details of the policy plan.	Not applicable

**Note:** No information appears in the above columns if a plan is not yet added in the policy.

5. Click the **Edit**  icon in the **View / Edit** column corresponding to the policy plan whose details you want to edit.

The **Plan** screen appears. It contains the following sections:

- **Main** - Used to specify the basic details about the policy plan.
- **Pricing Rule Types** - Used to associate the pricing rule types with the policy plan.
- **Characteristics** - Used to define the characteristics for the policy plan.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Price Item	Used to indicate the price item which you want to directly associate with the policy plan.	Yes
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Price Item</b> field. On clicking the <b>Search</b> icon, the <b>Price Item Search</b> window appears.</p> <p>On the specifying the price item, the concatenated string of information about the price item appears corresponding to the <b>Price Item</b> field separated by a comma (,).</p>	
Plan Number	Used to specify the policy plan number.	Yes
Plan Name	Used to specify the description for the policy plan.	No
Start Date	Used to specify the date from when the policy plan is effective for the policy.	Yes
	<p><b>Note:</b></p> <p>The policy plan start date cannot be earlier than the policy start date and later than the policy end date.</p> <p>The policy plan start date cannot be later than the policy plan end date.</p>	
End Date	Used to specify the date till when the policy plan is effective for the policy.	No
	<p><b>Note:</b></p> <p>The policy plan end date cannot be earlier than the policy start date and later than the policy end date.</p> <p>The policy plan end date cannot be earlier than the policy plan start date.</p>	

6. Modify the required details in the **Main** section.
7. Associate or disassociate pricing rule types from the policy plan in the **Pricing Rule Types** section, if required.
8. Define, edit, or remove characteristics of the policy plan in the **Characteristics** section, if required.
9. Click **Validate and Save**.

The changes made to the policy plan are saved.

## Editing the Customer Registration Details

### Prerequisites

To define a customer registration, you should have:

- Divisions, customer segments, customer tiers, and access groups defined in the application
- Name types, phone types, and person identifier types defined in the application
- Address type codes and countries defined in the application
- Characteristic types defined in the application (where the characteristic entity is set to **Customer Registration**)
- Relationship types defined in the application
- Customer class, invoice currencies, account categories, bill cycles, accrual cycles, account identifier types, auto pay source codes, auto pay methods, auto pay route types, account relationship types, bill formats, address sources, bill route types, and collection class defined in the application

**Note:** The collection class is required when you are editing a customer registration which is created using the **C1-CustomerRegistrationBanking** business object.

- Deal review frequencies and currency codes defined in the application

**Note:** These prerequisites are required when you are editing a customer registration which is created using the **C1-CustomerRegistrationBanking** business object.

- Policy types and policy person roles defined in the application.

**Note:** These prerequisites are required when you are editing a customer registration which is created using the **C1-CustomerRegistrationHC** business object.

### Procedure

To edit a customer registration:

1. Search for the customer registration in the **Customer Registration** screen.
2. In the **Search Results** section, click the link in the **Customer Registration Information** column corresponding to the customer registration whose details you want to edit.

The **Main** tab appears in the **Customer Registration** screen.

3. Click the **Edit** button in the **Customer Registration** zone.

The **Customer Registration** screen appears. It contains the following pages:

- **Main** - Used to specify basic information about the person.
- **Contact** - Used to specify the contact information about the person.
- **Person Characteristics** - Used to define a list of characteristics for the person.
- **Hierarchy** - Used to define the person to person relationship for the person
- **Accounts** - Used to add the account details of the person.
- **Deal** - Used to specify information about the deals created for the person.

**Note:** This page appears only when you are editing a customer registration which is created using the **C1-CustomerRegistrationBanking** business object.

- **Policies** - Used to specify the policy details of the person.

**Note:** This page appears when you are editing a customer registration which is created using the **C1-CustomerRegistrationHC** business object.

- **Registration Characteristics** - Used to define a list of characteristics for the customer registration.

The **Main** page contains the following sections:

- **Main** - Used to specify basic details about the person.
- **Person Name** - Used to add the person names for customer registration.
- **Person Phones** - Used to add the person phone details for customer registration.
- **Person IDs** - Used to add the person identifiers for customer registration.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Person Type	Indicates the person type using which you want to define the customer registration for the person.	Not applicable
Date of Birth	Used to specify the date when the person was born.	Yes
Division	Used to indicate the division to which the person belongs.  <b>Note:</b> You can view only those divisions to which you have access in the <b>Division</b> list.	Yes
Person Since Date	Used to specify the date from when the person is the main customer.	Yes
Customer Segment	Used to indicate the customer segment to which the person belongs.  <b>Note:</b> This field appears when you are editing a customer registration which is created using the <b>C1-CustomerRegistrationBanking</b> business object.	Yes
Customer Tier	Used to indicate the customer tier of the customer segment to which the person belongs.  <b>Note:</b> This field appears when you are editing a customer registration which is created using the <b>C1-CustomerRegistrationBanking</b> business object.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Access Group	Used to indicate the user group that can access the customer registration.	Yes
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Access Group</b> field. On clicking the <b>Search</b> icon, the <b>Access Group Search</b> window appears.</p> <p>On specifying the access group, the description of the access group appears corresponding to the <b>Access Group</b> field.</p>	

4. Modify the required details in the **Main** section.
5. Add, edit, or remove the names of the person in the **Person Names** section.
6. Add, edit, or remove the phone details of the person in the **Person Phones** section.
7. Add or remove the identifier details of the person in the **Person IDs** section.
8. Define, edit, or remove the address of the person in the **Contact** page, if required.
9. Define, edit, or remove characteristics of the person in the **Person Characteristics** page, if required.
10. Define, edit, or remove the person to person relationship for the person in the **Hierarchy** page, if required.
11. Add, edit, or remove the account details of the person in the **Accounts** page, if required.
12. Add, edit, or remove information about the deals created for the person in the **Deal** page, if required.

**Note:** This page appears when you are editing a customer registration which is created using the **C1-CustomerRegistrationBanking** business object.

13. Add, edit, or remove the policy details of the person in the **Policies** page, if required.

**Note:** This page appears when you are editing a customer registration which is created using the **C1-CustomerRegistrationHC** business object.

14. Define, edit, or remove characteristics of the customer registration in the **Registration Characteristics** page, if required.
15. Click **Validate and Save**.

The changes made to the customer registration are saved.

## Approving a Customer Registration

You can view the number of customer registrations which are pending for an approval in the **Customer Registration** screen. The approver can review, and accordingly approve, reject, or ask the submitter to resubmit the customer registration based on the observations.

**Note:** The system will not allow you to approve, reject or resubmit a customer registration submitted by you.

### Procedure

To approve a customer registration:

1. Do either of the following:

If you want to...	Then...
Approve a customer registration through the <b>Customer Registration</b> screen	<ol style="list-style-type: none"> <li>1. Search for the customer registration in the <b>Customer Registration</b> screen.</li> <li>2. In the <b>Search Results</b> section, click the link in the <b>Customer Registration ID</b> column corresponding to the customer registration which you want to review.</li> </ol>
Approve a customer registration from the <b>To Do List</b> screen	<ol style="list-style-type: none"> <li>1. Click the <b>Menu</b> link in the <b>Application</b> toolbar. A list appears.</li> <li>2. From the <b>Main</b> menu, select <b>To Do</b> and then click <b>To Do List</b>. The <b>To Do Type for User Search</b> window appears.</li> <li>3. Enter <b>C1-CustomerRegistration</b> in the <b>To Do Type</b> field.</li> <li>4. Click the <b>Search</b> button corresponding to the <b>To Do Type</b> field.</li> <li>5. Click <b>Search</b>. The <b>To Do Type Search</b> screen appears.</li> </ol>

The **Customer Registration** screen appears.

2. Review the details in the **Customer Registration** screen.
3. If the information in the customer registration is accurate, then click the **Approve** button in the **Customer Registration** zone.

**Note:** The **Approve** button appears when:

- The status of customer registration is in the **Approval In Progress**.
- A user with the approval To Do role is reviewing the customer registration.

## **Rejecting a Customer Registration**

### **Prerequisites**

To reject a customer registration, you should have:

- Reasons defined for the **Rejected** status of the **C1-CustomerRegistration** business object in the **Status Reason** screen

**Note:** The system will not allow you to approve, reject or resubmit a customer registration submitted by you.

### **Procedure**

To reject a customer registration:

- Do either of the following:

<b>If you want to...</b>	<b>Then...</b>
Reject a customer registration through the <b>Customer Registration</b> screen	<ol style="list-style-type: none"> <li>Search for the customer registration in the <b>Customer Registration</b> screen.</li> <li>In the <b>Search Results</b> section, click the link in the <b>Customer Registration Information</b> column corresponding to the customer registration which you want to review.</li> </ol>
Reject a customer registration from the <b>To Do List</b> screen	<ol style="list-style-type: none"> <li>Click the <b>Menu</b> link in the <b>Application</b> toolbar. A list appears.</li> <li>From the <b>Main</b> menu, select <b>To Do</b> and then click <b>To Do List</b>. The <b>To Do Type for User Search</b> window appears.</li> <li>Enter <b>C1-CustomerRegistration</b> in the <b>To Do Type</b> field.</li> <li>Click the <b>Search</b> button corresponding to the <b>To Do Type</b> field. The <b>To Do List</b> screen appears.</li> <li>Select the <b>Open</b> option from the <b>Filter by</b> list to view all unassigned To Dos.</li> <li>Click the link in the <b>Message</b> column corresponding to the To Do of the customer registration that you want to review.</li> </ol>

The **Customer Registration** screen appears.

- Review the details in the **Customer Registration** screen.
- If the information in the customer registration is incorrect, then click the **Reject** button in the **Customer Registration** zone.

The **Reject Customer Registration** window appears. It contains following fields:

Field Name	Field Description	Mandatory (Yes or No)
Status Reason	Used to indicate the reason why you want to reject the customer registration.	Yes
	<b>Note:</b> The list includes only those reasons which are defined for the <b>Rejected</b> status of the <b>C1-CustomerRegistration</b> business object in the <b>Status Reason</b> screen.	
Comments	Used to specify additional information while rejecting the customer registration.	No

**Note:** The **Reject** button appears when:

- The customer registration is in the **Approval In Progress** status.
- A user with the approval To Do role is reviewing the customer registration.

4. Select the reason for rejection of the customer registration from the **Status Reason** field.
5. Click **Save**.

The status of the customer registration is changed to **Rejected**.

## Requesting to Resubmit a Customer Registration for Approval

### Procedure

To initiate a resubmission request for a customer registration:

1. Do either of the following:

If you want to...	Then...
Request the submitter to resubmit a customer registration through the <b>Customer Registration</b> screen	<ol style="list-style-type: none"> <li>1. Search for the customer registration in the <b>Customer Registration</b> screen.</li> <li>2. In the <b>Search Results</b> section, click the link in the <b>Customer Registration ID</b> column corresponding to the customer registration which you want to review.</li> </ol>
Request the submitter to resubmit a customer registration from the <b>To Do List</b> screen	<ol style="list-style-type: none"> <li>1. Click the <b>Menu</b> link in the <b>Application</b> toolbar. A list appears.</li> <li>2. From the <b>Main</b> menu, select <b>To Do</b> and then click <b>To Do List</b>.</li> </ol>

If you want to...	Then...
	<p>The <b>To Do Type for User Search</b> window appears.</p> <ol style="list-style-type: none"> <li>3. Enter <b>C1-CustomerRegistration</b> in the <b>To Do Type</b> field.</li> <li>4. Click the <b>Search</b> button corresponding to the <b>To Do Type</b> field.</li> </ol> <p>The <b>To Do List</b> screen appears.</p> <ol style="list-style-type: none"> <li>5. Select the <b>Open</b> option from the <b>Filter by</b> list to view all unassigned To Dos.</li> <li>6. Click the link in the <b>Message</b> column corresponding to the To Do of the customer registration that you want to review.</li> </ol>

The **Customer Registration** screen appears.

2. Review the details in the **Customer Registration** screen.
3. If the information in the customer registration is incomplete and you want the submitter to make the required changes and resubmit the customer registration for approval, then click the **Re Submit** button in the **Customer Registration** zone.

The **Resubmit Customer Registration** window appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Comments	Used to specify the changes which the submitter should make in the customer registration before resubmitting it for approval.	Yes

**Note:** The **Re Submit** button appears when:

- The customer registration is in the **Approval In Progress** status.
- A user with the approval To Do role is reviewing the customer registration.

4. Enter the comments in the respective field and then click **Save**.

A To Do is created using the submitter To Do type and assigned to all users with a submitter To Do role specified in the customer registration type. In addition, the status of the customer registration is changed to **Draft**.

# Chapter 7

---

## Customer 360° View

---

### Topics:

- [Prerequisites](#)
- [Customer 360° View](#)
- [Customer 360° Information](#)
- [Bill Information](#)

Oracle Revenue Management and Billing provides a new screen named **Customer 360° View** which enables you to quickly view in-depth information about the person. This screen can be used to view the 360° information of a person who is associated with the fully-insured group or self-funded policy. It provides the following information:

- Basic details, characteristics, child persons, person hierarchy, person billing hierarchy, and the customer contacts of the person.
- Customer registration objects through which the bill groups are created for a parent customer.
- List of accounts to which the parent customer and its bill groups are associated.
- Basic details, characteristics, administrative contracts, automatic payment options, billing and adjustment summary, financial and collections summary, and unpaid bills of the person's account.
- Consolidated view of the transactions (such as, billing, payment, payment cancellation, adjustment, adjustment cancellation, automatic payments sent to the auto clearing house for review, refund, write off, excess credit, and reconciliation) which are carried out for the person's account.
- List of policies to which the parent customer or bill group is associated. The system lists those policies where the policy category is set to **Self-Funded** and **Fully Insured Group**.
- Basic details, related persons, and policy plans in the person's policy.
- Basic and in-depth details of the pricing rules which are defined for a parent customer who is associated with the fully-insured group or self-funded policy.
- Basic and in-depth details of the pricing rules which are defined for a self-funded policy of a bill group.
- Basic details of the pricing groups which are defined for a bill group who is associated with the self-funded policy.
- Basic and in-depth details of the pricing rules which are defined for a fully-insured group policy.
- Basic and in-depth details of the pricing rules which are defined for a fully-insured group policy plan.
- Basic and in-depth details of the pricing rules which are defined for the states where the fully-insured group policy and its plans and memberships are issued.

- Basic details of the approval transactions which are created while defining, editing, and deleting the pricing rules for the self-funded or fully-insured group business.
- Basic details of the bill, adjustments which are swept onto the bill, activities (such as, payment, offset, refund, write off, or transfer) through which the bill is settled, high-level summary and details of the bill segments which are included in the bill, active hold requests due to which the bill is kept on hold, offset requests through which the bill is offset against another bill, and refund and write off requests through which the bill or its bill segment is either refunded or written off.

In other words, this feature allows you to drill-down to see or act on all current and historical revenue management and billing details. This allows you to professionally and efficiently handle customer inquiries and complaints at the first point of contact, raising your customer service from previously unattainable levels and reducing the associated time and cost.

## Prerequisites

---

To setup the **Customer 360° View** feature, you need to do the following:

- Define the required divisions, customer classes, person types, person identifier types, account identifier types, policy types, and policy person roles in the system
- Define values for the **C1-SourceSystemLookup** extendable lookup
- Define the required characteristic types where the characteristic entity is set to **Person**
- Define the required characteristic types where the characteristic entity is set to **Account**
- Define the required characteristic types where the characteristic entity is set to **Policy**
- Define values for the **Administrative Contract Type** and **On Account Contract Type** option types in the **C1\_CMO** feature configuration

**Note:** This prerequisite is not required when you are viewing the 360° information of a person who is associated with the self-funded policy.

- Define values for **Premium Amount SQI** and **Coverage End Date SQI** option types in the **C1-BILLADJSQ** feature configuration

**Note:** This prerequisite is not required when you are viewing the 360° information of a person who is associated with the self-funded policy.

- Define value for the **Person Relationship Type** option type in the **C1-ASOBLNG** feature configuration

## Customer 360° View

---

The **Customer 360° View** screen allows you to search for a person, its accounts, and policies using various search criteria. It contains the following zone:

- [360° Search](#) on page 555

### 360° Search

The **360° Search** zone allows you to search for a person, account, and policy using various search criteria. It contains the following two sections:

- **Search Criteria** – The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for a person, account, or policy. The valid values are: <ul style="list-style-type: none"> <li>• Policy</li> <li>• Person</li> <li>• Account</li> </ul>	Yes
	<b>Note:</b> By default, the <b>Policy</b> option is selected.	
Policy Type	Used to search policies which are created using a particular policy type.	No
	<b>Note:</b> This field appears when the <b>Policy</b> option is selected from the <b>Search By</b> list.	
Source System	Used to search policies which were created in a particular external system.	No
	<b>Note:</b> This field appears when the <b>Policy</b> option is selected from the <b>Search By</b> list.	
Policy Number	Used to search a policy with a particular policy number.	No
	<b>Note:</b> This field appears when the <b>Policy</b> option is selected from the <b>Search By</b> list.	
Policy ID	Used to search a particular policy.	No
	<b>Note:</b> This field appears when the <b>Policy</b> option is selected from the <b>Search By</b> list.	
Policy Person Role	Used to search policies where a person is assigned a particular person role.	No
	<b>Note:</b> This field appears when the <b>Policy</b> option is selected from the <b>Search By</b> list.	

Field Name	Field Description	Mandatory (Yes or No)
Person Name	<p>Used to search a particular person using its primary or secondary name. If you specify the person name while searching for an account, the system searches all accounts where the person is the main customer. However, if you specify the person name while searching for a policy, the system searches all policies where the person is the main customer.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required when you are searching for a policy using the policy person role.</p>
	<p><b>Note:</b></p> <p>This field appears when:</p> <ul style="list-style-type: none"> <li>• The <b>Policy</b> or <b>Person</b> option is selected from the <b>Search By</b> list.</li> <li>• The <b>Account</b> option is selected from the <b>Search By</b> list and the <b>Advanced Search</b> link available in the right side of the <b>360° Search</b> zone is clicked.</li> </ul>	
Status	<p>Used to search policies with a particular status. The valid values are:</p> <ul style="list-style-type: none"> <li>• In Force/Active</li> <li>• Canceled</li> <li>• Pending Cancellation</li> <li>• Pending</li> <li>• Pending Reinstatement</li> <li>• Pending Termination</li> <li>• Post Runout</li> <li>• Reinstated</li> <li>• Runout</li> <li>• Terminated</li> </ul>	No
	<p><b>Note:</b> This field appears when the <b>Policy</b> option is selected from the <b>Search By</b> list.</p>	
Start Date	<p>Used to search policies which are effective from a particular date.</p> <p><b>Note:</b> This field appears when the <b>Policy</b> option is selected from the <b>Search By</b> list and the <b>Advanced Search</b> link available in the right side of the <b>360° Search</b> zone is clicked.</p>	No

Field Name	Field Description	Mandatory (Yes or No)
End Date	Used to search policies which are effective till a particular date.	No
	<b>Note:</b> This field appears when the <b>Policy</b> option is selected from the <b>Search By</b> list and the <b>Advanced Search</b> link available in the right side of the <b>360° Search</b> zone is clicked.	
Characteristic Type	Used to search persons, accounts, or policies with a particular type of characteristic.	No
	<b>Note:</b> This field appears when the <b>Advanced Search</b> link available in the right side of the <b>360° Search</b> zone is clicked.	
Characteristic Value	Used to search persons, accounts, or policies with a particular characteristic.	Yes (Conditional)
	<b>Note:</b> This field appears when you are searching for a person, account, or policy using the characteristic type. On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	
Division	Used to search persons or accounts which belong to a particular division.	No
	<b>Note:</b> This field appears when the <b>Person</b> or <b>Account</b> option is selected from the <b>Search By</b> list.	
Customer Class	Used to search accounts or persons' whose accounts belong to a particular customer class.	No
	<b>Note:</b> This field appears when the <b>Person</b> or <b>Account</b> option is selected from the <b>Search By</b> list.	
Person ID	Used to search a particular person.	No
	<b>Note:</b> This field appears when the <b>Person</b> option is selected from the <b>Search By</b> list.	
Person Identifier Type	Used to indicate the person identifier type based on which you want to search for a person.	Yes (Conditional)
	<b>Note:</b> This field appears when the <b>Person</b> option is selected from the <b>Search By</b> list.	

Field Name	Field Description	Mandatory (Yes or No)
Person Identifier	Used to search a person with a particular identifier.	Yes (Conditional)
	<p><b>Note:</b> This field appears when the <b>Person</b> option is selected from the <b>Search By</b> list.</p>	<p><b>Note:</b> If you specify the person identifier type as a search criteria, you have to enter the person identifier.</p>
Person Type	<p>Used to search persons of a particular type. The valid values are:</p> <ul style="list-style-type: none"> <li>• Business</li> <li>• Bill Group</li> <li>• Group</li> <li>• Broker</li> <li>• Person</li> <li>• Parent Customer</li> </ul>	No
	<p><b>Note:</b> This field appears when the <b>Person</b> option is selected from the <b>Search By</b> list and the <b>Advanced Search</b> link available in the right side of the <b>360° Search</b> zone is clicked.</p>	
Address	Used to search persons with a particular address or accounts' whose main customer has a particular address.	No
	<p><b>Note:</b> This field appears when the <b>Person</b> or <b>Account</b> option is selected from the <b>Search By</b> list and the <b>Advanced Search</b> link available in the right side of the <b>360° Search</b> zone is clicked.</p>	
City	Used to search persons who belong to a particular city or accounts' whose main customer belongs to a particular city.	No
	<p><b>Note:</b> This field appears when the <b>Person</b> or <b>Account</b> option is selected from the <b>Search By</b> list and the <b>Advanced Search</b> link available in the right side of the <b>360° Search</b> zone is clicked.</p>	

Field Name	Field Description	Mandatory (Yes or No)
Skip Months	Used to search accounts for which the skip months are defined through a billing preference.	No
	<p><b>Note:</b></p> <p>You can set the billing preference for an account through a characteristic type which is specified in the <b>Bill Cycle Rule Code</b> option type of the <b>C1-ASOBLLNG</b> feature configuration. The system enables you to define, edit, delete, and copy a billing preference through the <b>Field Mapping</b> screen. For more information, see <a href="#">Defining a Billing Preference</a>.</p> <p>This field appears when the <b>Account</b> option is selected from the <b>Search By</b> list and the <b>Advanced Search</b> link available in the right side of the <b>360° Search</b> zone is clicked.</p>	
Phone Number	Used to search a person with a particular phone number or accounts' whose main customer has a particular phone number.	No
	<p><b>Note:</b> This field appears when the <b>Person</b> or <b>Account</b> option is selected from the <b>Search By</b> list and the <b>Advanced Search</b> link available in the right side of the <b>360° Search</b> zone is clicked.</p>	
Account ID	Used to search a particular account.	No
	<p><b>Note:</b> This field appears when the <b>Account</b> option is selected from the <b>Search By</b> list.</p>	
Account Identifier Type	Used to indicate the account identifier type based on which you want to search for an account.	Yes (Conditional)
	<p><b>Note:</b> This field appears when the <b>Account</b> option is selected from the <b>Search By</b> list.</p>	
Account Identifier	Used to search an account with a particular identifier.	Yes (Conditional)
	<p><b>Note:</b> This field appears when the <b>Account</b> option is selected from the <b>Search By</b> list.</p>	
		<p><b>Note:</b> If you specify the account identifier as a search criteria, you have to select the account identifier type.</p>
		<p><b>Note:</b> If you specify the account identifier type as a search criteria, you have to enter the account identifier.</p>

**Note:**

You must specify at least one search criterion while searching for a person, account, or policy. One more search criterion is required when you are searching for a person or account using the division and/or customer class. Similarly, one more search criterion is required when you are searching for a policy using the policy type and/or source system.

If you have specified any other search criterion along with the person ID, account ID, or policy ID, the system ignores the additional search criterion and searches using the person ID, account ID, or policy ID, respectively.

- **Search Results** – On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Policy Information	Displays information about the policy.
	<p><b>Note:</b></p> <p>It has a link. On clicking the link, the <b>Policy</b> screen appears where you can view the details of the respective policy.</p> <p>This column appears when the <b>Policy</b> option is selected from the <b>Search By</b> list.</p>
Main Customer	Indicates the main customer of the policy or account.
	<p><b>Note:</b> This column appears when the <b>Policy</b> or <b>Account</b> option is selected from the <b>Search By</b> list.</p>
Source System	Displays the name of the external system in which the policy was created.
	<p><b>Note:</b> This column appears when the <b>Policy</b> option is selected from the <b>Search By</b> list.</p>
Policy Number	Displays the policy number.
	<p><b>Note:</b> This column appears when the <b>Policy</b> option is selected from the <b>Search By</b> list.</p>
Start Date	Displays the date from when the policy is effective.
	<p><b>Note:</b> This column appears when the <b>Policy</b> option is selected from the <b>Search By</b> list.</p>
End Date	Displays the date till when the policy is effective.
	<p><b>Note:</b> This column appears when the <b>Policy</b> option is selected from the <b>Search By</b> list.</p>

Column Name	Column Description
Status	<p>Indicates the status of the policy. The valid values are:</p> <ul style="list-style-type: none"> <li>• In Force/Active</li> <li>• Canceled</li> <li>• Pending Cancellation</li> <li>• Pending</li> <li>• Pending Reinstatement</li> <li>• Pending Termination</li> <li>• Post Runout</li> <li>• Reinstated</li> <li>• Runout</li> <li>• Terminated</li> </ul> <p><b>Note:</b> This column appears when the <b>Policy</b> option is selected from the <b>Search By</b> list.</p>
Person Information	<p>Displays information about the person. In addition, this column has a context menu which helps in navigating to other screens in the application.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Person</b> screen appears where you can view the details of the respective person. This column appears when the <b>Person</b> option is selected from the <b>Search By</b> list.</p>
Person Name	<p>Displays the name of the person.</p> <p><b>Note:</b> This column appears when the <b>Person</b> option is selected from the <b>Search By</b> list.</p>
Person Type	<p>Indicates the type of the person. The valid values are:</p> <ul style="list-style-type: none"> <li>• Business</li> <li>• Bill Group</li> <li>• Group</li> <li>• Broker</li> <li>• Person</li> <li>• Parent Customer</li> </ul> <p><b>Note:</b> This column appears when the <b>Person</b> option is selected from the <b>Search By</b> list.</p>
Primary Person Identifier Type	<p>Indicates the primary identifier type associated with the person.</p> <p><b>Note:</b> This column appears when the <b>Person</b> option is selected from the <b>Search By</b> list.</p>

Column Name	Column Description
Primary Person Identifier	Displays the primary person identifier.
	<b>Note:</b> This column appears when the <b>Person</b> option is selected from the <b>Search By</b> list.
Account Information	Displays information about the account. In addition, this column has a context menu which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account. This column appears when the <b>Account</b> option is selected from the <b>Search By</b> list.
Division	Indicates the division to which the account belongs.
	<b>Note:</b> This column appears when the <b>Account</b> option is selected from the <b>Search By</b> list.
Customer Class	Indicates the customer class to which the account belongs.
	<b>Note:</b> This column appears when the <b>Account</b> option is selected from the <b>Search By</b> list.
Primary Account Identifier Type	Indicates the primary identifier type associated with the account.
	<b>Note:</b> This column appears when the <b>Account</b> option is selected from the <b>Search By</b> list.
Primary Account Identifier	Displays the primary account identifier.
	<b>Note:</b> This column appears when the <b>Account</b> option is selected from the <b>Search By</b> list.
Current Balance	Displays the total amount of funds in the account.
	<b>Note:</b> This column appears when the <b>Account</b> option is selected from the <b>Search By</b> list.
Also Known As	Displays the non-primary names of the person separated by semi-colon (;).
	<b>Note:</b> This column appears when the <b>Person</b> option is selected from the <b>Search By</b> list.

**Note:**

You can view the 360° information of the person, account, or policy by clicking the **View** () icon corresponding to the record in the **Search Results** section.

Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

## Searching for a Person

### Prerequisites

To search for a person, you should have:

- Divisions, customer classes, person types, and person identifier types defined in the application
- Characteristic types defined in the application (where the characteristic entity is set to **Person**)

### Procedure

To search for a person:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, click **Customer 360° View**.  
The **Customer 360° View** screen appears.
3. Select the **Person** option from the **Search By** list to indicate that you want to search for a person.
4. Enter the required search criteria in the **360° Search** zone.

**Note:**

You must specify at least one search criterion while searching for a person. One more search criterion is required when you are searching for a person using the division and/or customer class.

The criteria are grouped as indicated by line separators between the criteria. Each group is independent from the other, and only one group is used at a time for searching. If you enter criteria in more than one group, the criteria from the former group is used for searching. For example, if you enter the person name (in the second criteria group) and person identifier (in the fourth criteria group), the system searches using the person name instead of the person identifier.

You must specify division and/or customer class when you are searching for a person using the city.

You must specify division, customer class, or any other criteria in the second group when you are searching for a person using the person type.

If you have specified any other search criterion along with the person ID, the system ignores the additional search criterion and searches for the person using the person ID.

ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

The **Advanced Search** link appears in the right side of the **360° Search** zone. On clicking the **Advanced Search** link, additional fields appear in the zone which help you to refine the search.

If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

#### 5. Click **Search**.

A list of persons that meet the search criteria appears in the **Search Results** section.

## Searching for an Account

### Prerequisites

To search for an account, you should have:

- Divisions, customer classes, and account identifier types defined in the application
- Characteristic types defined in the application (where the characteristic entity is set to **Account**)

### Procedure

To search for an account:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, click **Customer 360° View**.  
The **Customer 360° View** screen appears.
3. Select the **Account** option from the **Search By** list to indicate that you want to search for an account.

4. Enter the required search criteria in the **360° Search** zone.

**Note:**

You must specify at least one search criterion while searching for an account. One more search criterion is required when you are searching for an account using the division and/or customer class.

The criteria are grouped as indicated by line separators between the criteria. Each group is independent from the other, and only one group is used at a time for searching. If you enter criteria in more than one group, the criteria from the former group is used for searching. For example, if you enter the person name (in the fourth criteria group) and account identifier (in the third criteria group), the system searches using the account identifier instead of the person name.

You must specify division and/or customer class when you are searching for an account using the city.

If you have specified any other search criterion along with the account ID, the system ignores the additional search criterion and searches for the account using the account ID.

ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

The **Advanced Search** link appears in the right side of the **360° Search** zone. On clicking the **Advanced Search** link, additional fields appear in the zone which help you to refine the search.

If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

5. Click **Search**.

A list of accounts that meet the search criteria appears in the **Search Results** section.

**Searching for a Policy****Prerequisites**

To search for a policy, you should have:

- Policy types and policy person roles defined in the application
- Values defined for the **C1-SourceSystemLookup** extendable lookup
- Characteristic types defined in the application (where the characteristic entity is set to **Policy**)

**Procedure**

To search for a policy:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, click **Customer 360° View**.  
The **Customer 360° View** screen appears.
3. Select the **Policy** option from the **Search By** list to indicate that you want to search for a policy.

- Enter the required search criteria in the **360° Search** zone.

**Note:**

You must specify at least one search criterion while searching for a policy. One more search criterion is required when you are searching for a policy using the policy type and/or source system.

If you have specified any other search criterion along with the policy ID, the system ignores the additional search criterion and searches for the policy using the policy ID.

You must specify the person name when you are searching for a policy using the policy person role.

ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

The **Advanced Search** link appears in the right side of the **360° Search** zone. On clicking the **Advanced Search** link, additional fields appear in the zone which help you to refine the search.

If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

- Click **Search**.

A list of policies that meet the search criteria appears in the **Search Results** section.

**Viewing the 360° Information of a Person****Prerequisites**

To view the 360° information of a person, you should have:

- Value defined for the **Person Relationship Type** option type in the **C1-ASOBLLNG** feature configuration

**Procedure**

To view the 360° information of a person:

- Search for the person in the **Customer 360° View** screen.
- In the **Search Results** section, click the **View** (🔗) icon corresponding to the person whose details you want to view.

The **Person** tab appears in the **Customer 360° Information** screen. It contains the following zones:

- [Person Information](#) on page 581
- [Person Characteristics](#) on page 582
- [Child Persons](#) on page 583
- [Person Hierarchy](#) on page 583

**Note:** The **Person Hierarchy** zone does not appear when you are viewing the 360° information of a person whose person type is set to **Parent Customer**.

- [Person Billing Hierarchy](#) on page 584

**Note:** The **Person Billing Hierarchy** zone appears when you are viewing the 360° information of a person whose person type is set to **Parent Customer**.

- [Bill Group Derivation and Pricing Parameters](#) on page 587

**Note:** The **Bill Group Derivation and Pricing Parameters** zone appears when you are viewing the 360° information of a person whose person type is set to **Parent Customer**.

- [Bill Group Sorting](#) on page 589

**Note:** The **Bill Group Sorting** zone appears when you are viewing the 360° information of a person whose person type is set to **Parent Customer**.

- [Customer Contacts](#) on page 590
- [Bill Groups Created Via Customer Registration](#) on page 591

**Note:** The **Bill Groups Created Via Customer Registration** zone appears when you are viewing the 360° information of a person whose person type is set to **Parent Customer**.

3. View the basic details of the person in the **Person Information** zone.
4. View the characteristics of the person in the **Person Characteristics** zone.
5. View the child persons included in the person's hierarchy in the **Child Persons** zone.
6. View the accounts and policies where the person is the main customer and memberships where the person is the main subscriber in the **Person Hierarchy** zone.
7. View the parent customer's accounts and policies and its bill groups' accounts and policies in the **Person Billing Hierarchy** zone.
8. View the derivation and pricing parameters defined for the bill group and sort ID combinations in the **Bill Group Derivation and Pricing Parameters** zone.
9. View the sort IDs defined for the bill groups in the **Bill Group Sorting** zone.
10. View how and when the person was contacted in the **Customer Contacts** zone.
11. View the customer registration objects through which the bill groups are created for the parent customer in the **Bill Groups Created Via Customer Registration** zone.
12. If required, you can view the details of the account to which the person is associated in the **Account** tab.

**Note:**

If you are viewing the 360° information of a parent customer, the following zones appear in the **Account** tab when you click the **Broadcast** (  ) icon corresponding to the account in the [Account List](#) on page 592 zone:

- [Account Information](#) on page 593
- [Auto Pay Details](#) on page 596
- [Account Characteristics](#) on page 595
- [Account Financial and Collections Summary](#) on page 597
- [Open Bills](#) on page 598
- [Billed Vs Paid](#) on page 600
- [Timeline](#) on page 602
- [Trial Bills](#) on page 605

13. If required, you can view the details of the policy to which the person is associated in the **Policy** tab.

14. If required, you can view the pricing information of the parent customer or its bill groups in the **Pricing Information** tab.

## Viewing the 360° Information of an Account

### Prerequisites

To view the 360° information of an account, you should have:

- Value defined for the **Person Relationship Type** option type in the **C1-ASOBLNG** feature configuration
- Values defined for the **Administrative Contract Type** and **On Account Contract Type** option types in the **C1\_CMO** feature configuration
- Values defined for the **Premium Amount SQI** and **Coverage End Date SQI** option types in the **C1-BILLADJSQ** feature configuration

**Note:** The latter two prerequisites are not required when you are viewing the 360° information of a person who is associated with the self-funded policy.

### Procedure

To view the 360° information of an account:

1. Search for the account in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **View** () icon corresponding to the account whose details you want to view.

The **Account** tab appears in the **Customer 360° Information** screen. It contains the following zones:

- [Account List](#) on page 592

**Note:** The **Account List** zone appears when you are viewing the 360° information of a person whose person type is set to **Parent Customer**.

- [Account Information](#) on page 593

- [Auto Pay Details](#) on page 596
- [Account Characteristics](#) on page 595
- [Administrative Contracts](#) on page 596

**Note:** The **Administrative Contracts** zone appears when you are viewing the 360° information of a person whose person type is neither **Parent Customer** nor **Bill Group**.

- [Account Financial and Collections Summary](#) on page 597
- [Billing and Adjustment Summary](#) on page 597

**Note:** The **Billing and Adjustment Summary** zone appears when you are viewing the 360° information of a person whose person type is neither **Parent Customer** nor **Bill Group**.

- [Open Bills](#) on page 598
  - [Billed Vs Paid](#) on page 600
  - [Timeline](#) on page 602
  - [Trial Bills](#) on page 605
3. View the accounts of the parent customer and its bill groups in the **Account List** zone.
  4. View the basic details of the account in the **Account Information** zone.
  5. View the automatic payment options defined for the account in the **Auto Pay Details** zone.
  6. View the characteristics of the account in the **Account Characteristics** zone.
  7. View the account's contracts which should be monitored closely for various administrative reasons in the **Administrative Contracts** zone.
  8. View the financial and collection details of the account in the **Account Financial and Collections Summary** zone.
  9. View the billing and adjustment summary of the account in the **Billing and Adjustment Summary** zone.
  10. View the unpaid bills of the account in the **Open Bills** zone.
  11. View various transactions of the account, such as bills, payments, adjustments, reconciliations, and so on, in the **Billed Vs Paid** zone.
  12. View the number of customer contacts, bills, and payments created for the account in a particular month in the **Timeline** zone.
  13. View the trial bills which are created for the account in the **Trial Bills** zone.

## **Customer 360° Information**

---

The following table provides information about the **Customer 360° Information** screen:

If you are viewing the 360° information of...	Then
A parent customer who is associated with the self-funded policy	<p>The <b>Customer 360° Information</b> screen allows you to view:</p> <ul style="list-style-type: none"> <li>• Basic details, characteristics, child persons, billing hierarchy, and customer contacts of the parent customer.</li> <li>• Sort IDs of all effective child persons whose person type is set to <b>Bill Group</b> and who are related to the parent customer using a relationship type which is specified in the <b>Person Relationship Type</b> option type of the <b>C1-ASOBLNG</b> feature configuration.</li> <li>• Derivation and pricing parameters defined for the bill group and sort ID combinations.</li> <li>• Customer registration objects through which the bill groups are created for the parent customer.</li> <li>• Accounts of all effective child persons whose person type is set to <b>Bill Group</b> and who are related to the parent customer using a relationship type which is specified in the <b>Person Relationship Type</b> option type of the <b>C1-ASOBLNG</b> feature configuration.</li> <li>• Basic details, characteristics, automatic payment options, financial and collections summary, and unpaid bills of a particular bill group's account.</li> <li>• List of self-funded policies to which the parent customer's bill groups are associated.</li> <li>• Basic details and policy persons of a self-funded policy where the parent customer is the policy holder.</li> <li>• Basic details of the pricing rules which are defined for the parent customer.</li> <li>• Summarized tree view listing each bill group of the parent customer and the bill groups' self-funded policies and pricing rules.</li> <li>• Basic details of the self-funded policies which are associated with each bill group of the parent customer.</li> <li>• Basic details of the pricing rules which are defined for the self-funded policies of each bill group.</li> <li>• Basic details of the active pricing groups which are defined for each bill group.</li> <li>• Basic information about the approval transactions which are created while defining, editing, and deleting the parent customer's and bill groups' pricing rules.</li> </ul>

<b>If you are viewing the 360° information of...</b>	<b>Then</b>
A bill group who is associated with the self-funded policy	<p>The <b>Customer 360° Information</b> screen allows you to view:</p> <ul style="list-style-type: none"><li>• Basic details, characteristics, child persons, billing hierarchy, and customer contacts of the bill group.</li><li>• Basic details, characteristics, automatic payment options, financial and collections summary, and unpaid bills of the bill group’s account.</li><li>• List of self-funded policies to which the bill group is associated.</li><li>• Basic details and policy persons of a self-funded policy.</li><li>• Summarized tree view listing the parent customer and pricing rules which are defined for the parent customer.</li><li>• Basic details of the self-funded policies which are associated with the bill group.</li><li>• Basic details of the pricing rules which are defined for the self-funded policies of the bill group.</li><li>• Basic details of the active pricing groups which are defined for the bill group.</li><li>• Basic information about the approval transactions which are created while defining, editing, and deleting the pricing rules of the bill group.</li></ul>

If you are viewing the 360° information of...	Then
A parent customer who is associated with the fully-insured group policy	<p>The <b>Customer 360° Information</b> screen allows you to view:</p> <ul style="list-style-type: none"> <li>• Basic details, characteristics, child persons, billing hierarchy, and customer contacts of the parent customer.</li> <li>• Sort IDs of all effective child persons whose person type is set to <b>Bill Group</b> and who are related to the parent customer using a relationship type which is specified in the <b>Person Relationship Type</b> option type of the <b>C1-ASOBLNG</b> feature configuration.</li> <li>• Derivation and pricing parameters defined for the bill group and sort ID combinations.</li> <li>• Customer registration objects through which the bill groups are created for the parent customer.</li> <li>• List of the parent customer's and bill groups' accounts. Note that the system lists the accounts of all effective child persons whose person type is set to <b>Bill Group</b> and who are related to the parent customer using a relationship type which is specified in the <b>Person Relationship Type</b> option type of the <b>C1-ASOBLNG</b> feature configuration.</li> <li>• Basic details, characteristics, automatic payment options, financial and collections summary, and unpaid bills of the parent customer's or bill group's account.</li> <li>• List of fully-insured group policies to which the parent customer or its bill groups are associated.</li> <li>• Basic details, policy persons, and policy plans of a fully-insured group policy to which the parent customer or its bill group is associated.</li> <li>• Basic details of the pricing rules which are defined for different entities (such as parent customer, fully-insured group policy, policy plan, and state of issue).</li> <li>• Summarized tree view listing the pricing rules which are defined for the parent customer, fully-insured group policies, and policy plans.</li> <li>• Basic information about the approval transactions which are created while defining, editing, and deleting the pricing rules for different entities.</li> </ul>

If you are viewing the 360° information of...	Then
A bill group who is associated with the fully-insured group policy	<p>The <b>Customer 360° Information</b> screen allows you to view:</p> <ul style="list-style-type: none"> <li>• Basic details, characteristics, child persons, billing hierarchy, and customer contacts of the bill group.</li> <li>• Basic details, characteristics, automatic payment options, financial and collections summary, and unpaid bills of the bill group's account.</li> <li>• List of fully-insured group policies to which the bill group is associated.</li> <li>• Basic details, policy persons, and policy plans of the fully-insured group policy.</li> <li>• Basic details of the pricing rules which are defined for different entities (such as parent customer, fully-insured group policy, policy plan, and state of issue).</li> <li>• Basic information about the approval transactions which are created while defining, editing, and deleting the pricing rules for different entities.</li> </ul>
A person whose person type is neither <b>Parent Customer</b> nor <b>Bill Group</b>	<p>The <b>Customer 360° Information</b> screen allows you to view:</p> <ul style="list-style-type: none"> <li>• Basic details, characteristics, child persons, billing hierarchy, and customer contacts of the person.</li> <li>• Basic details, characteristics, automatic payment options, administrative contracts, financial and collections summary, billing and adjustment summary, and unpaid bills of the person's account.</li> <li>• List of policies to which the person is associated.</li> <li>• Basic details, policy persons, and policy plans of a policy.</li> </ul>

This screen consists of the following tabs:

- [Customer 360° Information - Person](#) on page 579
- [Customer 360° Information - Account](#) on page 591
- [Customer 360° Information - Policy](#) on page 605
- [Customer 360° Information - Pricing Information](#) on page 609

**Note:** If a person does not have an account or policy, the data does not appear in the **Account** or **Policy** tab, respectively. And, if the pricing rules are not defined for the parent customer, fully-insured group or self-funded policy, fully-insured group policy plan, or state of issue, the data does not appear in the **Pricing Information** tab.

## Customer 360° Information - Person

The following table provides information about the **Person** tab:

If you are viewing the 360° information of...	Then...
A parent customer who is associated with the self-funded or fully-insured group policy	The <b>Person</b> tab displays the following: <ul style="list-style-type: none"> <li>• Basic details, characteristics, child persons, billing hierarchy, and customer contacts of the parent customer.</li> <li>• Sort IDs of all effective child persons whose person type is set to <b>Bill Group</b> and who are related to the parent customer using a relationship type which is specified in the <b>Person Relationship Type</b> option type of the <b>C1-ASOBLNG</b> feature configuration.</li> <li>• Derivation and pricing parameters defined for the bill group and sort ID combinations.</li> <li>• Customer registration objects through which the bill groups are created for the parent customer.</li> </ul>
A bill group who is associated with the fully-insured group or self-funded policy	The <b>Person</b> tab displays the basic details, characteristics, child persons, billing hierarchy, and customer contacts of the bill group.
A person whose person type is neither <b>Parent Customer</b> nor <b>Bill Group</b>	The <b>Person</b> tab displays the basic details, characteristics, child persons, billing hierarchy, and customer contacts of the person.

It contains the following zones:

- [Person Information](#) on page 581
- [Person Characteristics](#) on page 582
- [Child Persons](#) on page 583
- [Person Hierarchy](#) on page 583

**Note:** The **Person Hierarchy** zone does not appear when you are viewing the 360° information of a person whose person type is set to **Parent Customer**.

- [Person Billing Hierarchy](#) on page 584

**Note:** The **Person Billing Hierarchy** zone appears when you are viewing the 360° information of a person whose person type is set to **Parent Customer**.

- [Bill Group Derivation and Pricing Parameters](#) on page 587

**Note:** The **Bill Group Derivation and Pricing Parameters** zone appears when you are viewing the 360° information of a person whose person type is set to **Parent Customer**.

- [Bill Group Sorting](#) on page 589

**Note:** The **Bill Group Sorting** zone appears when you are viewing the 360° information of a person whose person type is set to **Parent Customer**.

- [Customer Contacts](#) on page 590
- [Bill Groups Created Via Customer Registration](#) on page 591

**Note:** The **Bill Groups Created Via Customer Registration** zone appears when you are viewing the 360° information of a person whose person type is set to **Parent Customer**.

## Person Information

The **Person Information** zone displays the details of the person. It contains the following sections:

- **Main** - Displays the basic information about the person. It contains the following fields:

Field Name	Field Description
Person Information	Displays information about the person. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Person</b> screen appears where you can view the details of the person.
Person Type	Indicates the type of the person. The valid values are: <ul style="list-style-type: none"> <li>• Business</li> <li>• Bill Group</li> <li>• Group</li> <li>• Broker</li> <li>• Person</li> <li>• Parent Customer</li> </ul>
Date of Birth	Displays the date when the person was born.  <b>Note:</b> This field appears when the respective data is available for the person.

- **Person Names** - Lists the primary and non-primary names of the person. It contains the following columns:

Column Name	Column Description
Name Type	Indicates the type of the name.
Person Name	Displays the name of the person.

- **Person Identifiers** - Lists various types of identification associated with the person. It contains the following columns:

Column Name	Column Description
Person Identifier Type	Indicates the person identifier type.
Person Identifier	Displays the value of the person identifier type.

- **Contact Information** - Displays the contact details of the person. It contains the following fields:

Field Name	Field Description
Country	Indicates the country where the person is located.

Field Name	Field Description
Address 1	Displays the first line of the person's address. It may contain details, such as house number and apartment name.
Address 2	Displays the second line of the person's address. It may contain details, such as street name.
Address 3	Displays the third line of the person's address. It may contain the landmark details.
Address 4	Displays the fourth line of the person's address.
House Type	Indicates the type of the house.
Number 1	Displays the numeric information, if any, related to the address.
Number 2	Displays the numeric information, if any, related to the address.
In City Limit	Indicates whether the person resides within the city limit or not. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>
City	Displays the city where the person is located.
Geographic Code	Displays the geographic code of the address.
County	Displays the county where the person is located.
State	Indicates the state where the city or county is located.
Postal	Displays the postal or zip code of the address.
Email ID	Displays the e-mail ID of the person.

**Note:** The above mentioned fields appear in the **Contact Information** section when the respective data is available for the person.

- **Phone Details** – Lists the phone details of the person. It contains the following columns:

Column Name	Column Description
Phone Type	Indicates the type of the phone number.
Phone Number	Displays the phone number of the person.
Extension	Displays the telephone extension number (if any).

### Person Characteristics

The **Person Characteristics** zone lists the characteristics of the person. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the characteristic is effective for the person.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

Column Name	Column Description
Description	Displays the description of the characteristic value.
	<b>Note:</b> The data appears in this column when the type of characteristic value is set to <b>Predefined Value</b> or <b>Foreign Key Value</b> .

You can filter the list using the **Characteristic Type** field available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (∨) icon in the upper right corner of this zone.

### Child Persons

The **Child Persons** zone lists the child persons included in the person's hierarchy. It contains the following columns:

Column Name	Column Description
Child Person Information	Displays information about the child person.
	<b>Note:</b> It has a link. On clicking the link, the <b>Person</b> screen appears where you can view the details of the child person.
Relationship Type	Indicates how the child person is related to the parent person.
Start Date	Displays the date from when the child person is related to the parent person.
End Date	Displays the date till when the child person is related to the parent person.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can view the 360° information of a child person by clicking the **View** (🔗) icon corresponding to the child person in this zone.

You can create a new child person through the **Customer Registration** feature by clicking the **Add** link in the upper right corner of this zone. While adding a child person to a parent person, the child person is related to the parent person using the relationship type which is specified in the **Person Relationship Type** option type of the **C1-ASOBLNG** feature configuration.

You can filter the list using the **Person Relationship Type** field available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (∨) icon in the upper right corner of this zone.

## Bill Group Derivation and Pricing Parameters

An employer may have different bill groups. Each bill group will handle the claim and enrollment transactions of employees based on the employee attributes, such as location, employment status, employment department, and so on.

Oracle Revenue Management and Billing allows you to define the derivation and pricing parameters, such as source system, parameter 1, parameter 2, parameter 3, and parameter 4 for the bill group and sort ID combination. These parameters are used to derive the bill group against which the claim and enrollment transactions should be billed in the system. For example, if you want bill group 1 to handle claim and enrollment transactions of employees who reside in the western location of city and belong to grade A and whose transactions are received from the X system, you need to define the derivation and pricing parameters for bill group 1 where the source system is set to X, parameter 1 is set to Western, and parameter 2 is set to Grade A. Similarly, if you want bill group 2 to handle claim and enrollment transactions of employees who reside in the eastern location of city and belong to grade A and whose transactions are received from the X system, you need to define the derivation and pricing parameters for bill group 2 where the source system is set to X, parameter 1 is set to Eastern, and parameter 2 is set to Grade A.

**Note:** In the above examples, the bill group is derived based on the specified attributes when the source system, parameter 1, and parameter 2 are mapped to the appropriate transaction fields in the pricing rule type using which the pricing rules are defined for the bill group.

You can also define criteria for a rule in a pricing group using the parameters, such as source system, parameter 1, parameter 2, parameter 3, and parameter 4. If a pricing rule is defined for a bill group using a pricing group, you can define more than one price in the pricing rule which is offered based on the attributes of the employees.

The derivation and pricing parameters for the bill group and sort ID combination are effective from a particular date. However, the effective date must fall within the date range defined for the sort ID of the bill group.

The **Bill Group Derivation and Pricing Parameters** zone lists the derivation and pricing parameters defined for all effective child persons whose person type is set to **Bill Group** and who are related to the parent customer using a relationship type which is specified in the **Person Relationship Type** option type of the **C1-ASOBLLNG** feature configuration. It appears when you are viewing the 360° information of a person whose person type is set to **Parent Customer**.

You can define and edit the derivation and pricing parameters for a bill group (who is effective child person of the parent customer) and sort ID combination through this zone. You can also upload the derivation and pricing parameters for one or more bill group and sort ID combinations at the same time using the **Upload Request** feature. You can upload the derivation and pricing parameters for a bill group and sort ID combination either from this zone or from the **Upload Request** screen. While creating an upload request for the derivation and pricing parameters, you need to specify the parent customer whose bill groups' derivation and pricing parameters you want to upload. Once the upload request is processed, the derivation and pricing parameters are defined for the bill group and sort ID combination in the system.

This zone contains the following columns:

Column Name	Column Description
Bill Group Information	Indicates the parent customer's bill group for whom the derivation and pricing parameters are defined. In addition, a context menu appears corresponding to this column which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Person</b> screen appears where you can view the details of the respective bill group (i.e. person).
Bill Group ID	Displays the bill group ID (i.e. person ID).
Source System	Indicates the source system from where the claim and enrollment transactions are received.
Parameter 1	Indicates the employee attribute based on which you want to derive the bill group.
Parameter 2	Indicates the employee attribute based on which you want to derive the bill group.

Column Name	Column Description
Parameter 3	Indicates the employee attribute based on which you want to derive the bill group.
Parameter 4	Indicates the employee attribute based on which you want to derive the bill group.
Sort ID	Indicates the sort ID of the bill group.
Effective Date	Displays the date from when the derivation and pricing parameters are effective for the bill group and sort ID combination.
Status	Indicates the status of the derivation and pricing parameters defined for the bill group and sort ID combination. The valid values are: <ul style="list-style-type: none"> <li>Active</li> <li>Inactive</li> </ul>

In addition, it contains the following buttons:

Button Name	Button Description
Edit	Used to edit the derivation and pricing parameters of a bill group and sort ID combination.

If you want to edit the derivation and pricing parameters of all bill group and sort ID combinations, you need to select the check box corresponding to the column header in this zone, and then click the **Edit** button. However, if you want to edit the derivation and pricing parameters of one or more bill group and sort ID combination, you need to select the check box corresponding to the bill group and sort ID combination, and then click the **Edit** button.

**Note:**

Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

If you select the check box corresponding to the column header in this zone, the system considers only those records which are present on the respective page for editing.

You can define the derivation and pricing parameters for a bill group (who is effective child person of the parent customer) and sort ID combination by clicking the **Add** link in the upper right corner of this zone. You can also upload the derivation and pricing parameters for one or more bill group (who is effective child person of the parent customer) and sort ID combinations by clicking the **Upload** link in the upper right corner of this zone.

You can filter the list using various search criteria (such as, **Parameter 1, Parameter 2, Parameter 3, Parameter 4, Bill Group ID, Sort ID, Status, and Bill Group Name**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (∨) icon in the upper right corner of this zone.

You can change the layout of this zone. For more information on how to change the layout, see [Changing the Layout](#) on page 3208.

## Bill Group Sorting

Oracle Revenue Management and Billing allows you to define unique sort IDs for a bill group in a given date range. In future, the sort ID will be used to club transactions based on certain parameters and present them in the bill in the ascending or descending order. It may also be used to sort data while generating various reports.

The **Bill Group Sorting** zone lists the sort IDs defined for all effective child persons whose person type is set to **Bill Group** and who are related to the parent customer using a relationship type which is specified in the **Person Relationship Type** option type of the **C1-ASOBLLNG** feature configuration. It appears when you are viewing the 360° information of a person whose person type is set to **Parent Customer**.

You can define, edit, and delete a sort ID of a bill group (who is effective child person of the parent customer) through this zone. You can also upload a set of sort IDs for one or more bill groups (who are effective child persons of the parent customer) at the same time using the **Upload Request** feature. You can upload the sort IDs for bill groups either from this zone or from the **Upload Request** screen. While creating an upload request for bill group sort IDs, you need to specify the parent customer whose bill groups' sort IDs you want to upload. Once the upload request is processed, the sort ID is defined for the respective bill group in the system.

This zone contains the following columns:

Column Name	Column Description
Bill Group Information	Indicates the parent customer's bill group for whom the sort ID is defined. In addition, a context menu appears corresponding to this column which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Person</b> screen appears where you can view the details of the respective bill group (i.e. person).
Bill Group ID	Displays the bill group ID (i.e. person ID).
Sort ID	Displays the sort ID.
Description	Displays the description of the sort ID.
Start Date	Displays the date from when the sort ID is effective for the bill group.
End Date	Displays the date till when the sort ID is effective for the bill group.

In addition, it contains the following buttons:

Button Name	Button Description
Edit	Used to edit the details of a bill group's sort ID.
Delete	Used to delete a bill group's sort ID.  <b>Note:</b> You can delete a bill group's sort ID when the derivation and pricing parameters are not yet defined for the bill group and sort ID combination.

If you want to edit or delete all sort IDs of effective bill groups, you need to select the check box corresponding to the column header in this zone, and then accordingly click the **Edit** or **Delete** button. However, if you want to edit or delete

one or more sort IDs of effective bill groups, you need to select the check box corresponding to the bill group and sort ID combination, and then accordingly click the **Edit** or **Delete** button.

**Note:**

Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

If you select the check box corresponding to the column header in this zone, the system considers only those records which are present on the respective page for editing or deleting.

You can define a sort ID for a bill group (who is effective child person of the parent customer) by clicking the **Add** link in the upper right corner of this zone. You can also upload a set of sort IDs for one or more bill groups (who are effective child persons of the parent customer) by clicking the **Upload** link in the upper right corner of this zone.

You can filter the list using the **Bill Group Name** field available in the **Filter** area. By default, the **Filter** area is hidden.

You can view the **Filter** area by clicking the **Filters** (∨) icon in the upper right corner of this zone.

You can change the layout of this zone. For more information on how to change the layout, see [Changing the Layout](#) on page 3208.

**Customer Contacts**

The **Customer Contacts** zone displays information about how and when the person was contacted. It contains the following columns:

Column Name	Column Description
Contact Date	Displays the date when the person was contacted.
Customer Contact Information	Displays information about the customer contact. <b>Note:</b> It has a link. On clicking the link, the <b>Customer Contact</b> screen appears where you can view the details of the customer contact.
Contact Type	Indicates how the person was contacted.
Comments	Displays additional information about the customer contact.

You can filter the list using various search criteria (such as, **On or Before Contact Date**, **Contact Class**, **Contact Type**, and **Show Open Contacts Only**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (∨) icon in the upper right corner of this zone.

## Bill Groups Created Via Customer Registration

The **Bill Groups Created Via Customer Registration** zone lists the customer registration objects through which the parent customer's bill groups are created in the system. It appears when you are viewing the 360° information of a person whose person type is set to **Parent Customer**. It contains the following columns:

Column Name	Column Description
Customer Registration Information	Indicates the customer registration object through which the bill group is created.  <b>Note:</b> It has a link. On clicking the link, the <b>Customer Registration</b> screen appears where you can view the details of the respective customer registration object.
Person Name	Displays the name of the bill group.
Person Relationship Type	Indicates how the bill group is related to the parent customer.
Status	Indicates the status of the customer registration object. The valid value is: <ul style="list-style-type: none"> <li>Bill Group Approved</li> </ul>

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can filter the list using the **Person Relationship Type** field available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (  ) icon in the upper right corner of this zone.

## Customer 360° Information - Account

The following table provides information about the **Account** tab:

If you are viewing the 360° information of...	Then...
A parent customer who is associated with the self-funded or fully-insured group policy	The <b>Account</b> tab displays the following: <ul style="list-style-type: none"> <li>List of the parent customer's and bill groups' accounts. Note that the system lists the accounts of all effective child persons whose person type is set to <b>Bill Group</b> and who are related to the parent customer using a relationship type which is specified in the <b>Person Relationship Type</b> option type of the <b>C1-ASOBLLNG</b> feature configuration.</li> <li>Basic details, characteristics, automatic payment options, financial and collections summary, and unpaid bills of the parent customer's or bill group's account.</li> </ul>
A bill group who is associated with the fully-insured group or self-funded policy	The <b>Account</b> tab displays the basic details, characteristics, automatic payment options, financial and collections summary, and unpaid bills of the bill group's account.  <b>Note:</b> If the bill group has multiple accounts, the system, by default, picks and displays the details of any one of its account.

If you are viewing the 360° information of...	Then...
A person whose person type is neither <b>Parent Customer</b> nor <b>Bill Group</b>	<p>The <b>Account</b> tab displays the basic details, characteristics, automatic payment options, administrative contracts, financial and collections summary, billing and adjustment summary, and unpaid bills of the person's account.</p> <p><b>Note:</b> If the person has multiple accounts, the system, by default, picks and displays the details of any one of its account.</p>

It contains the following zones:

### Account List

The **Account List** zone lists the accounts of the parent customer and its bill groups. Note that the system lists the accounts of all effective child persons whose person type is set to **Bill Group** and who are related to the parent customer using a relationship type which is specified in the **Person Relationship Type** option type of the **C1-ASOBLNG** feature configuration. It appears when you are viewing the 360° information of a person whose person type is set to **Parent Customer**. It contains the following columns:

Column Name	Column Description
Person Name	Indicates the person who is linked to the account.

Column Name	Column Description
Account Information	Displays information about the account. In addition, a context menu appears corresponding to this column which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account.
Person Type	Indicates the type of the person. The valid values are: <ul style="list-style-type: none"> <li>• Business</li> <li>• Bill Group</li> <li>• Group</li> <li>• Broker</li> <li>• Person</li> <li>• Parent Customer</li> </ul>
Person's Mailing Address	Displays the mailing address of the person.
Person ID	Displays the person ID.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

On clicking the **Broadcast** (🔊) icon corresponding to an account, the following zones appear in the **Account** tab:

- Account Information
- Auto Pay Details
- Account Financial and Collections Summary
- Account Characteristics
- Open Bills
- Billed Vs Paid
- Timeline

You can filter the list using various search criteria (such as, **Person Name**, **Account ID**, and **Person Type**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (🔍) icon in the upper right corner of this zone.

### **Account Information**

The **Account Information** zone displays the details of the account. It contains the following sections:

- **Main** – Displays the basic information about the account. It contains the following fields:

Field Name	Field Description
Account Information	Displays information about the account. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account.
Management Group	Indicates the account management group to which the account belongs.
	<b>Note:</b> It has a link. On clicking the link, the <b>Account Management Group</b> screen appears where you can view the details of the respective account management group.  This field appears when the respective data is available for the account.

- **Contact Information** – Displays the contact details of the account’s main customer. It contains the following fields:

Field Name	Field Description
Address Source	Indicates which address should be used to route the account’s bills and/or quotes via the postal service.
Country	Indicates the country where the main customer is located.
Address 1	Displays the first line of the main customer’s address. It may contain details, such as house number and apartment name.
Address 2	Displays the second line of the main customer’s address. It may contain details, such as street name.
Address 3	Displays the third line of the main customer’s address. It may contain the landmark details.
Address 4	Displays the fourth line of the main customer’s address.
House Type	Indicates the type of the house.
Number 1	Displays the numeric information, if any, related to the address.
Number 2	Displays the numeric information, if any, related to the address.
In City Limit	Indicates whether the main customer resides within the city limit or not. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>
City	Displays the city where the main customer is located.
Geographic Code	Displays the geographic code of the address.
County	Displays the county where the main customer is located.
State	Indicates the state where the city or county is located.
Postal	Displays the postal or zip code of the address.

**Note:** The above mentioned fields except **Address Source** appear in the **Contact Information** section when the address source of the main customer is set to **Account Override** and the respective data is available for the account.

- **Account Identifiers** – Lists various types of identification associated with the account. It contains the following columns:

Column Name	Column Description
Account Identifier Type	Indicates the account identifier type.
Account Identifier	Displays the value of the account identifier type.

- **Billing** – Displays the billing information of the account. It contains the following fields:

Field Name	Field Description
Bill Cycle	Indicates the bill cycle of the account.
	<p><b>Note:</b></p> <p>It has a link. On clicking the link, the <b>Bill Cycle</b> screen appears where you can view the details of the respective bill cycle.</p> <p>This field appears when the respective data is available for the account.</p>
Bill After Date	Displays the date when the billing should be resumed for the account.
	<p><b>Note:</b> This field appears when the respective data is available for the account.</p>
Skip Months	Indicates the months separated by comma for which billing should be skipped for the account.
	<p><b>Note:</b> The system derives the skip months for an account using the billing preference. You can set the billing preference for an account through a characteristic type which is specified in the <b>Bill Cycle Rule Code</b> option type of the <b>C1-ASOBLLNG</b> feature configuration. The system enables you to define, edit, delete, and copy a billing preference through the <b>Field Mapping</b> screen. For more information, see <a href="#">Defining a Billing Preference</a>.</p>

### Account Characteristics

The **Account Characteristics** zone lists the characteristics of the account. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the characteristic is effective for the account.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.
Description	Displays the description of the characteristic value.
	<p><b>Note:</b> The data appears in this column when the type of characteristic value is set to <b>Predefined Value</b> or <b>Foreign Key Value</b>.</p>

You can filter the list using the **Characteristic Type** field available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (∨) icon in the upper right corner of this zone.

### Administrative Contracts

The **Administrative Contracts** zone lists the account's contracts which should be monitored closely for various administrative reasons. It appears when you are viewing the 360° information of a person whose person type is neither **Parent Customer** nor **Bill Group**. It contains the following columns:

Column Name	Column Description
Contract ID	Displays the contract ID.
	<b>Note:</b> It has a link. On clicking the link, the <b>Contract</b> screen appears where you can view the details of the respective contract.
Contract Type	Indicates the type of the contract.
Currency	Indicates the currency in which the contract balance is maintained.
Current Balance	Displays the current balance on the contract.

#### Note:

Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

The data appears in this zone when you have defined the value for the **Administrative Contract Type** option type in the **C1\_CMO** feature configuration.

### Related Topics

For more information on...	See...
How to setup the <b>C1_CMO</b> feature configuration	<a href="#">Setting the C1_CMO Feature Configuration</a> on page 3238

### Auto Pay Details

The **Auto Pay Details** zone lists the automatic payment options defined for the account. It contains the following columns:

Column Name	Column Description
Start Date	Displays the date from when the automatic payment option is effective.
End Date	Displays the date till when the automatic payment option is effective.
Auto Pay Source Code	Indicates the source of funds used to make the automatic payment. For example, debit or credit card.
Last Four Digits of Card	Displays the last four digits of the debit or credit card.
	<b>Note:</b> The data appears in this column when the external type of the auto pay source code's tender type is set to <b>Credit Card Withdrawal</b> .
Percentage	Indicates the percentage of automatic payment that must be made through the automatic payment option.
Priority	Indicates the order in which the automatic payment option should be considered for the effective date range.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

### Account Financial and Collections Summary

The **Account Financial and Collections Summary** zone displays the financial and collection details of the account. It contains the following fields:

Field Name	Field Description
Collection Class	Indicates the collection class to which the account belongs.
Current Credit Rating	Indicates the account's credit rating which is effective on the current date.
Last Credit Review Date	Displays the date when the account's debt was last reviewed.
Last Payment Date	Displays the date when the last payment was made for the account. <b>Note:</b> The system considers the last payment which is in the <b>Frozen</b> status.
Last Payment Amount	Displays the amount of the last payment. <b>Note:</b> The system considers the last payment which is in the <b>Frozen</b> status.
Current Balance	Displays the current balance of the account.
Payoff Balance	Displays the payoff balance of the account.
Account on Hold	Indicates whether the account is on hold or not. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>
Account on Promise to Pay	Indicates whether any promise to pay is scheduled for the account on the current or future date. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>
Account on Payment Arrangement	Indicates whether any payment arrangement exists for the account. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>
Account on Payment Agreement	Indicates whether any active payment agreement request exists for the account. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>

### Billing and Adjustment Summary

The **Billing and Adjustment Summary** zone displays the billing and adjustment summary of the account. It appears when you are viewing the 360° information of a person whose person type is neither **Parent Customer** nor **Bill Group**. It contains the following sections:

- **Quote Billed Balance** – Displays information about the account's billed balance. It contains the following fields:

Field Name	Field Description
Past Due Billed Balance	Displays the sum of open financial transactions of the account that are listed on a bill with a past due date.
Future Due Billed Balance	Displays the sum of open financial transactions of the account that are listed on a bill with a future due date.
Quote Billed Balance	Displays the sum of past due billed balance and future due billed balance.

- **Future Adjustments and Retroactivity** – Displays information about the account’s future adjustments and retro activities. It contains the following fields:

Field Name	Field Description
Future Adjustments	Displays the sum of adjustment financial transactions of the account which are swept onto the next bill.
Future Retro Terms (Credits)	Displays the sum of canceled bill segment financial transactions of the account which are presented on the next bill.
Future Retro Adds (Debits)	Displays the sum of membership premium billable charges which are not yet billed to the account.  <b>Note:</b> The data appears in this field when the values are defined for the <b>Premium Amount SQI</b> and <b>Coverage End Date SQI</b> option types in the <b>C1-BILLADJSQ</b> feature configuration.
Future Balance with Adjustments & Debits/Credits	Displays the sum of quote billed balance, future adjustments, future retro terms (credits), and future retro adds (debits).

### **Related Topics**

How to setup the <b>C1-BILLADJSQ</b> feature configuration	<a href="#">Setting the C1-BILLADJSQ Feature Configuration</a> on page 3236

### **Open Bills**

The **Open Bills** zone lists the unpaid bills of the account. By default, the bills where the unpaid amount is greater than zero are listed in this zone. It contains the following columns:

Column Name	Column Description										
Bill Date	<p>Displays the date when the bill was generated.</p> <p><b>Note:</b> The data in this column is presented in a different color depending on the age bucket in which the bill's days past due falls. The following table lists the color used for presentation in various age buckets:</p> <table border="1"> <thead> <tr> <th>Age Bucket</th> <th>Color</th> </tr> </thead> <tbody> <tr> <td>Age 0 to 30 DPD</td> <td>Black</td> </tr> <tr> <td>Age 31 to 60 DPD</td> <td>Green</td> </tr> <tr> <td>Age 61 to 90 DPD</td> <td>Orange</td> </tr> <tr> <td>Age &gt; 90 DPD</td> <td>Red</td> </tr> </tbody> </table>	Age Bucket	Color	Age 0 to 30 DPD	Black	Age 31 to 60 DPD	Green	Age 61 to 90 DPD	Orange	Age > 90 DPD	Red
Age Bucket	Color										
Age 0 to 30 DPD	Black										
Age 31 to 60 DPD	Green										
Age 61 to 90 DPD	Orange										
Age > 90 DPD	Red										
Bill ID	<p>Displays the bill ID.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Bill</b> screen appears where you can view the details of the respective bill.</p>										
Due Date	Displays the date when the bill is due for payment.										
Bill Amount	Displays the bill amount.										
Bill Status	<p>Indicates the status of the bill. The valid values are:</p> <ul style="list-style-type: none"> <li>• Pending</li> <li>• Complete</li> </ul>										
Unpaid Amount	Displays the unpaid amount of the bill.										
Age Bucket	<p>Indicates the age bucket in which the bill's days past due falls. The valid values are:</p> <ul style="list-style-type: none"> <li>• Age 0 to 30 DPD</li> <li>• Age 31 to 60 DPD</li> <li>• Age 61 to 90 DPD</li> <li>• Age &gt; 90 DPD</li> </ul>										
Days Past Due	Displays the number of days past after the due date.										
Overdue Process Information	<p>Indicates the overdue process which is initiated for the bill and is currently in the <b>Active</b> status. In addition, this column has a context menu which helps in navigating to other screens in the application.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Overdue Process</b> screen appears where you can view the details of the respective overdue process.</p>										
Payment Agreement Request Information	<p>Indicates the active payment agreement request in which the bill is included.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Payment Agreement Request</b> screen appears where you can view the details of the respective payment agreement request.</p>										

You can view additional information about the bill by clicking the **View** () icon corresponding to the bill in the **Open Bills** zone.

You can filter the list using various search criteria (such as, **On or Before Bill Date** and **Show All Bills**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** () icon in the upper right corner of this zone.

**Note:** If you select the **Show All Bills** option, the system lists all bills where the unpaid amount is greater than or equal to zero.

### **Related Topics**

How to view the details of a bill	<a href="#">Viewing the Bill Details</a> on page 643

### **Billed Vs Paid**

The **Billed Vs Paid** zone lists the following transactions of the account:

- Bills which are created for the account

**Note:** The system lists the bills which are created for the account either manually from the user interface or automatically through the batches. It also lists the bills which are created for the account through a manual or automatic invoice request.

- Any excess credit which is made for the account
- Payments which are created or canceled for the account
- Adjustments which are created or canceled for the account
- Refund or Write Off adjustments which are created or canceled for the account
- Payment transfer to the reconciliation contract of the account
- Payment transfer from the reconciliation contract to the payor account's contract
- Reconciliations through which the account's bill segments are reconciled
- Automatic payments sent to the auto clearing house for review before freezing them

**Note:** The excess credit information for the account appears when you have defined the value for the **On Account Contract Type** option type in the **C1\_CMO** feature configuration. Accordingly, the excess credit information (if any) on the respective contracts is listed in this zone.

It contains the following columns:

Column Name	Column Description
Due Date	Displays the date when the bill is due for payment.
	<b>Note:</b> The data appears in this column when the transaction type is set to <b>Bill</b> .
Bill ID	Displays the bill ID.
	<b>Note:</b> It has a link. On clicking the link, the <b>Bill</b> screen appears where you can view the details of the respective bill.
	The data appears in this column when the transaction type is set to <b>Bill</b> .

Column Name	Column Description																						
Transaction Date	<p>The following table indicates the date that appears depending on the type of the transaction:</p> <table border="1" data-bbox="548 296 1463 1010"> <thead> <tr> <th data-bbox="548 296 894 344">If the transaction type is...</th> <th data-bbox="894 296 1463 344">Then...</th> </tr> </thead> <tbody> <tr> <td data-bbox="548 344 894 392">Bill</td> <td data-bbox="894 344 1463 392">Date when the bill is generated for the account</td> </tr> <tr> <td data-bbox="548 392 894 441">Payment</td> <td data-bbox="894 392 1463 441">Date when the payment is made for the account</td> </tr> <tr> <td data-bbox="548 441 894 489">Adjustment</td> <td data-bbox="894 441 1463 489">Date when the adjustment is created for the account</td> </tr> <tr> <td data-bbox="548 489 894 537">Payment Cancellation</td> <td data-bbox="894 489 1463 537">Date when the payment is canceled for the account</td> </tr> <tr> <td data-bbox="548 537 894 627">Adjustment Cancellation</td> <td data-bbox="894 537 1463 627">Date when the adjustment is canceled for the account</td> </tr> <tr> <td data-bbox="548 627 894 676">Excess Credit (overpayment)</td> <td data-bbox="894 627 1463 676">Date when the excess credit is made for the account</td> </tr> <tr> <td data-bbox="548 676 894 766">Reconciliation Contract</td> <td data-bbox="894 676 1463 766">Date when the payment is transferred to the reconciliation contract of the account</td> </tr> <tr> <td data-bbox="548 766 894 856">Reconciliation Contract - Returned</td> <td data-bbox="894 766 1463 856">Date when the payment made to the reconciliation contract of the account is canceled</td> </tr> <tr> <td data-bbox="548 856 894 926">Payment Transfer</td> <td data-bbox="894 856 1463 926">Date when the pay instruction for the account is reconciled</td> </tr> <tr> <td data-bbox="548 926 894 1010">Payment Transfer Cancellation</td> <td data-bbox="894 926 1463 1010">Date when the reconciliation is canceled</td> </tr> </tbody> </table> <p><b>Note:</b> The data does not appear in this column for automatic payments which are sent to the auto clearing house for review.</p>	If the transaction type is...	Then...	Bill	Date when the bill is generated for the account	Payment	Date when the payment is made for the account	Adjustment	Date when the adjustment is created for the account	Payment Cancellation	Date when the payment is canceled for the account	Adjustment Cancellation	Date when the adjustment is canceled for the account	Excess Credit (overpayment)	Date when the excess credit is made for the account	Reconciliation Contract	Date when the payment is transferred to the reconciliation contract of the account	Reconciliation Contract - Returned	Date when the payment made to the reconciliation contract of the account is canceled	Payment Transfer	Date when the pay instruction for the account is reconciled	Payment Transfer Cancellation	Date when the reconciliation is canceled
If the transaction type is...	Then...																						
Bill	Date when the bill is generated for the account																						
Payment	Date when the payment is made for the account																						
Adjustment	Date when the adjustment is created for the account																						
Payment Cancellation	Date when the payment is canceled for the account																						
Adjustment Cancellation	Date when the adjustment is canceled for the account																						
Excess Credit (overpayment)	Date when the excess credit is made for the account																						
Reconciliation Contract	Date when the payment is transferred to the reconciliation contract of the account																						
Reconciliation Contract - Returned	Date when the payment made to the reconciliation contract of the account is canceled																						
Payment Transfer	Date when the pay instruction for the account is reconciled																						
Payment Transfer Cancellation	Date when the reconciliation is canceled																						
Transaction Type	<p>Indicates the type of the transaction. The valid values are:</p> <ul style="list-style-type: none"> <li>• Bill</li> <li>• Payment</li> <li>• Adjustment</li> <li>• Payment Cancellation</li> <li>• Adjustment Cancellation</li> <li>• Excess Credit (overpayment)</li> <li>• Reconciliation Contract</li> <li>• Reconciliation Contract - Returned</li> <li>• Payment Transfer</li> <li>• Payment Transfer Cancellation</li> </ul>																						
Transaction Description	<p>Displays the description of the transaction.</p> <p><b>Note:</b> The data appears in this column when the transaction type is set to <b>Adjustment, Adjustment Cancellation, Reconciliation Contract - Returned, Payment Transfer, and Payment Transfer Cancellation</b>. In addition, the data appears in this column when the automatic payments are sent to the auto clearing house for review before freezing them. The transaction description for such payments is set to <b>Pending Payment</b>.</p>																						

Column Name	Column Description
Transaction Amount	Displays the transaction amount.
Unpaid Amount	Displays the unpaid amount of the bill.
	<b>Note:</b> The data appears in this column when the transaction type is set to <b>Bill</b> .
Payment Date	Displays the date when the payment is created or canceled for the account.
	<b>Note:</b> The data appears in this column when the transaction type is set to <b>Payment</b> , <b>Payment Cancellation</b> , or <b>Excess Credit (overpayment)</b> .
Tender Type	Indicates the type of tender through which the payment was made.
Check Number/External Reference ID	Displays the check number or external reference ID.
Transaction ID	Displays the payment, adjustment, or reconciliation ID.
	<b>Note:</b> It has a link. On clicking the link, the <b>Payment</b> , <b>Adjustment</b> , or <b>Reconciliation</b> screen appears where you can view the details of the respective transaction.

The **View** (🔗) icon appears corresponding to a bill in this zone. On clicking the **View** (🔗) icon corresponding to a bill, the **Bill Information** screen appears where you can view the details of the respective bill.

You can filter the list using the **On or Before Due Date** field available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (🔍) icon in the upper right corner of this zone.

You can change the layout of this zone. For more information on how to change the layout, see [Changing the Layout](#) on page 3208.

For more information on...	See...
How to setup the <b>C1_CMO</b> feature configuration	<a href="#">Setting the C1_CMO Feature Configuration</a> on page 3238

### **Timeline**

The **Timeline** zone displays the following information in a graphical form:

- Number of customer contacts which are created for the account's main customer in a particular month
- Number of bills which are created for the account in a particular month
- Number of payments which are created for the account in a particular month

It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Month	Used to indicate the month till when you want to display the above stated information.	Yes
	<b>Note:</b> By default, the current month appears in this field.	

Field Name	Field Description	Mandatory (Yes or No)
Year	Used to indicate the year till when you want to display the above stated information.	Yes
	<b>Note:</b> By default, the current year appears in this field.	

Depending on the month and year specified in the above fields, the data for the respective month and previous 11 months is presented in the grid. For example, if the Month and Year is set to April 2017, then the data for the May 2016, Jun 2016, Jul 2016, Aug 2016, Sep 2016, Oct 2016, Nov 2016, Dec 2016, Jan 2017, Feb 2017, Mar 2017, and Apr 2017 appears in the grid. To view the data for a different period, you must accordingly change the month and year and then click **Search** (🔍) icon.

You can use the **Previous 12 Months** (⏮), **Previous Month** (⏪), **Go To Today** (🕒), **Next Month** (⏩), and **Next 12 Months** (⏭) icons to change the values specified in the above mentioned fields.

The following table indicates the data and the manner in which the data is presented in the grid:

Row Name	Row Description						
Customer Contacts	<p>A small icon appears for each customer contact which is created for the account's main customer in the respective month. For example, if two customer contacts are created for the main customer in the month of Jan 2017 and one customer contact is created in the month of Feb 2017, then two icons appear in the Jan 2017 column and one icon appear in the Feb 2017 column. A text indicating the day of the month when the customer contact was created appears on the icon. The following table indicates the color in which the icon appears depending on the condition which is satisfied:</p> <table border="1"> <thead> <tr> <th>If the contact action on the customer contact type is...</th> <th>Then the icon appears in...</th> </tr> </thead> <tbody> <tr> <td>Set to <b>Send Letter</b></td> <td>Red</td> </tr> <tr> <td>Set to <b>Action Algorithm</b></td> <td>Yellow</td> </tr> </tbody> </table> <p>On clicking the icon, the corresponding customer contact information appears at the bottom of this zone. It has a link. On clicking the link, the <b>Customer Contact</b> screen appears where you can view the details of the respective customer contact.</p> <p><b>Note:</b> You can change the color in which the text appears on the icon and the color in which the icon appears when the above stated conditions are met through the <b>C1-TL-CC-EVT</b> algorithm.</p>	If the contact action on the customer contact type is...	Then the icon appears in...	Set to <b>Send Letter</b>	Red	Set to <b>Action Algorithm</b>	Yellow
If the contact action on the customer contact type is...	Then the icon appears in...						
Set to <b>Send Letter</b>	Red						
Set to <b>Action Algorithm</b>	Yellow						

Row Name	Row Description										
Bills	<p>A small icon appears for each bill which is created for the account in the respective month. For example, if three bills are created for the account in the month of Jan 2017, two bills are created in the month of Feb 2017, and one bill is created in the month of Apr 2017, then three icons appear in the Jan 2017 column, two icons appear in the Feb 2017 column, and one icon appears in the Apr 2017 column. A text indicating the day of the month when the bill was due appears on the icon. You can either display the day of the due date or bill date on the icon depending on the requirement. The following table indicates the color in which the icon appears depending on the condition which is satisfied:</p> <table border="1" data-bbox="467 485 1461 737"> <thead> <tr> <th data-bbox="467 485 964 533">If the bill is...</th> <th data-bbox="969 485 1461 533">Then the icon appears in...</th> </tr> </thead> <tbody> <tr> <td data-bbox="467 539 964 588">Fully Matched</td> <td data-bbox="969 539 1461 588">Green</td> </tr> <tr> <td data-bbox="467 594 964 642">Unmatched</td> <td data-bbox="969 594 1461 642">Red</td> </tr> <tr> <td data-bbox="467 648 964 697">Credit Note</td> <td data-bbox="969 648 1461 697">Blue</td> </tr> <tr> <td data-bbox="467 703 964 737">Scheduled for billing in the next bill cycle</td> <td data-bbox="969 703 1461 737">Black</td> </tr> </tbody> </table> <p>On clicking the icon, the corresponding bill information appears at the bottom of this zone. It has a link. On clicking the link, the <b>Bill</b> screen appears where you can view the details of the respective bill.</p> <p><b>Note:</b></p> <p>If you want to display the day of the due date on the icon, you must set the <b>Date To Use (D-Due Date, B-Bill Date)</b> parameter in the <b>C1-TL-OI-EVT</b> algorithm to <b>D</b>. However, if you want to display the day of the bill date on the icon, you must set the <b>Date To Use (D-Due Date, B-Bill Date)</b> parameter in the <b>C1-TL-OI-EVT</b> algorithm to <b>B</b>.</p> <p>You can change the color in which the text appears on the icon and the color in which the icon appears when the above stated conditions are met through the <b>C1-TL-OI-EVT</b> algorithm.</p>	If the bill is...	Then the icon appears in...	Fully Matched	Green	Unmatched	Red	Credit Note	Blue	Scheduled for billing in the next bill cycle	Black
If the bill is...	Then the icon appears in...										
Fully Matched	Green										
Unmatched	Red										
Credit Note	Blue										
Scheduled for billing in the next bill cycle	Black										

Row Name	Row Description												
Payments	<p>A small icon appears for each payment which is created for the account in the respective month. For example, if one payment is created for the account in the month of Aug 2016, three payments are created in the month of Dec 2016, and four payments are created in the month of Mar 2017, then one icon appears in the Aug 2016 column, three icons appear in the Dec 2016 column, and four icons appear in the Mar 2017 column. A text indicating the day of the month when the payment was created appears on the icon. The following table indicates the color in which the icon appears depending on the status of the payment:</p> <table border="1"> <thead> <tr> <th>Status</th> <th>Color</th> </tr> </thead> <tbody> <tr> <td>Frozen</td> <td>Green</td> </tr> <tr> <td>Canceled</td> <td>Red</td> </tr> <tr> <td>Freezable</td> <td>Blue</td> </tr> <tr> <td>Error</td> <td>Red</td> </tr> <tr> <td>Incomplete</td> <td>Yellow</td> </tr> </tbody> </table> <p>On clicking the icon, the corresponding payment information appears at the bottom of this zone. It has a link. On clicking the link, the <b>Payment</b> screen appears where you can view the details of the respective payment.</p> <p><b>Note:</b> You can change the color in which the text appears on the icon and the color in which the icon appears in the different status through the <b>C1-TL-PY-EVT</b> algorithm.</p>	Status	Color	Frozen	Green	Canceled	Red	Freezable	Blue	Error	Red	Incomplete	Yellow
Status	Color												
Frozen	Green												
Canceled	Red												
Freezable	Blue												
Error	Red												
Incomplete	Yellow												

### Trial Bills

The **Trial Bills** zone lists the trial bills which are created for the account. It contains the following columns:

Column Name	Column Description
Creation Date	Displays the date when the trial bill is created.
Trial Bill Information	<p>Displays information about the trial bill.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Trial Bill</b> screen appears where you can view the details of the respective trial bill.</p>
Current Charges	Displays the trial bill amount.

### Customer 360° Information - Policy

The following table provides information about the **Policy** tab:

If you are viewing the 360° information of...	Then...
A parent customer who is associated with the self-funded policy	<p>The <b>Policy</b> tab displays the following:</p> <ul style="list-style-type: none"> <li>List of self-funded policies to which the parent customer's bill groups are associated.</li> </ul> <div data-bbox="769 373 1466 453" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> The system lists only those policies of the bill groups where the parent customer is associated as a policy holder.</p> </div> <ul style="list-style-type: none"> <li>Basic details and policy persons of a self-funded policy where the parent customer is the policy holder.</li> </ul>
A parent customer who is associated with the fully-insured group policy	<p>The <b>Policy</b> tab displays the following:</p> <ul style="list-style-type: none"> <li>List of fully-insured group policies to which the parent customer or its bill groups are associated.</li> </ul> <div data-bbox="769 688 1466 768" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> The system lists only those policies of the bill groups where the parent customer is associated as a policy holder.</p> </div> <ul style="list-style-type: none"> <li>Basic details, policy persons, and policy plans of a fully-insured group policy to which the parent customer or its bill group is associated.</li> </ul>
A bill group who is associated with the self-funded policy	<p>The <b>Policy</b> tab displays the following:</p> <ul style="list-style-type: none"> <li>List of self-funded policies to which the bill group is associated.</li> <li>Basic details and policy persons of a self-funded policy.</li> </ul>
A bill group who is associated with the fully-insured group policy	<p>The <b>Policy</b> tab displays the following:</p> <ul style="list-style-type: none"> <li>List of fully-insured group policies to which the bill group is associated.</li> <li>Basic details, policy persons, and policy plans of a fully-insured group policy.</li> </ul>
A person whose person type is neither <b>Parent Customer</b> nor <b>Bill Group</b>	<p>The <b>Policy</b> tab displays the following:</p> <ul style="list-style-type: none"> <li>List of fully-insured group or self-funded policies to which the person is associated.</li> <li>Basic details, policy persons, and policy plans of a self-funded or fully-insured group policy.</li> </ul>

It contains the following zones:

- [Policy List](#) on page 607

**Note:** The **Policy List** zone appears when there is more than one policy associated with the person.

- [Policy Information](#) on page 608
- [Policy Persons](#) on page 608
- [Policy Plans](#) on page 609

**Note:** The **Policy Plans** zone appears when you are viewing the 360° information of a person who is associated with the fully-insured group policy.

**Related Topics**

For more information on...	See...
How to view the 360° information of a policy	<a href="#">Viewing the 360° Information of a Policy</a> on page 571

**Policy List**

If you are viewing 360° information of a parent customer, the **Policy List** zone lists the policies to which the parent customer and its bill groups are associated. Note that the system lists the policies of all effective child persons whose person type is set to **Bill Group** and who are related to the parent customer using a relationship type which is specified in the **Person Relationship Type** option type of the **C1-ASOBLNG** feature configuration.

**Note:** The system lists only those policies of the bill groups where the parent customer is associated as a policy holder.

If you are viewing 360° information of a bill group, the **Policy List** zone lists the policies to which the bill group is associated. If you are viewing 360° information of a person who is neither a parent customer nor a bill group, the **Policy List** zone lists the policies to which the person is associated. This zone appears when there is more than one policy associated with the person. It contains the following columns:

Column Name	Column Description
Policy Number	Displays the policy number.
Policy Information	Displays information about the policy. <b>Note:</b> It has a link. On clicking the link, the <b>Policy</b> screen appears where you can view the details of the respective policy.
Policy Type	Indicates the type of the policy.
Status	Indicates the status of the policy.
Start Date	Displays the date from when the policy is effective.
End Date	Displays the date till when the policy is effective.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

On clicking the **Broadcast** (📡) icon corresponding to a policy, the following zones appear in the **Policy** tab:

- Policy Information
- Policy Persons
- Policy Plans

You can filter the list using various search criteria (such as, **Policy Number**, **Start Date**, **Policy Type**, **End Date**, and **Status**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (🔍) icon in the upper right corner of this zone.

## Policy Information

The **Policy Information** zone displays the details of the policy. It contains the following sections:

- **Main** – Displays the basic information about the policy. It contains the following fields:

Field Name	Field Description
Policy Information	Displays information about the policy. <b>Note:</b> It has a link. On clicking the link, the <b>Policy</b> screen appears where you can view the details of the respective policy.
Source System	Displays the name of the external system in which the policy is created.
Policy Number	Displays the policy number.
Status	Indicates the status of the policy.
Start Date	Displays the date from when the policy is effective.
End Date	Displays the date till when the policy is effective.
Runout End Date	Displays the date when the runout period of the policy ends. <b>Note:</b> This field appears when you are viewing the 360° information of a person who is associated with a self-funded policy.
Runout Administration Fees	Indicates whether the administration fees must be charged when the claim transaction for the policy is processed in the runout period. The valid values are: <ul style="list-style-type: none"> <li>• None</li> <li>• Percentage of Claim</li> </ul> <b>Note:</b> This field appears when you are viewing the 360° information of a person who is associated with a self-funded policy. At present, this field is used only for the information purposes and is not considered during the billable charge creation for the claim transactions which are received in the runout period of the policy.

- **Characteristics** – Lists the characteristics defined for the policy. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the characteristic is effective for the policy.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

## Policy Persons

The **Policy Persons** zone lists the persons associated with the policy. It contains the following columns:

Column Name	Column Description
Person Name	Indicates the person who is associated with the policy.
Policy Person Role	Indicates the role of the person with respect to the policy.
Start Date	Displays the date from when the person is associated with the policy.
End Date	Displays the date till when the person is associated with the policy.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can view the 360° information of a policy person by clicking the **View** () icon corresponding to the person in the **Policy Persons** zone.

### Policy Plans

The **Policy Plans** zone lists the plans defined in the policy. It appears when you are viewing the 360° information of a person who is associated with the fully-insured group policy. It contains the following columns:

Column Name	Column Description
Policy Plan Information	Displays information about the policy plan. In addition, this column has a context menu which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Policy Plan</b> screen appears where you can view the details of the respective policy plan.
Start Date	Displays the date from when the policy plan is effective.
End Date	Displays the date till when the policy plan is effective.
Plan Name	Indicates the plan to which the policy belongs.
Benefit Type	Indicates the benefit type of the policy plan. The valid values are: <ul style="list-style-type: none"> <li>Commercial</li> <li>Medicare Affiliated</li> </ul>
No. of Subscribers	Indicates the number of main subscribers in the policy plan.
No. of Members	Indicates the number of members in the policy plan.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can filter the list using various search criteria (such as, **Plan Start Date** and **Plan End Date**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** () icon in the upper right corner of this zone.

### Customer 360° Information - Pricing Information

The following table provides information about the **Pricing Information** tab:

If you are viewing the 360° information of...	Then...
A parent customer who is associated with the self-funded policy	<p>The <b>Pricing Information</b> tab displays the following:</p> <ul style="list-style-type: none"> <li>• Basic details of the pricing rules which are defined for the parent customer.</li> <li>• Summarized tree view listing each bill group of the parent customer and the bill groups' self-funded policies and pricing rules.</li> <li>• Basic details of the self-funded policies which are associated with each bill group of the parent customer.</li> <li>• Basic details of the pricing rules which are defined for the self-funded policies of each bill group.</li> <li>• Basic details of the active pricing groups which are defined for each bill group.</li> <li>• Basic information about the approval transactions which are created while defining, editing, and deleting the parent customer's and bill groups' pricing rules.</li> </ul>
A bill group who is associated with the self-funded policy	<p>The <b>Pricing Information</b> tab displays the following:</p> <ul style="list-style-type: none"> <li>• Summarized tree view listing the parent customer and pricing rules which are defined for the parent customer.</li> <li>• Basic details of the self-funded policies which are associated with the bill group.</li> <li>• Basic details of the pricing rules which are defined for the self-funded policies of the bill group.</li> <li>• Basic details of the active pricing groups which are defined for the bill group.</li> <li>• Basic information about the approval transactions which are created while defining, editing, and deleting the pricing rules of the bill group.</li> </ul>
A parent customer who is associated with the fully-insured group policy	<p>The <b>Pricing Information</b> tab displays the following:</p> <ul style="list-style-type: none"> <li>• Basic details of the pricing rules which are defined for different entities (such as parent customer, fully-insured group policy, policy plan, and state of issue).</li> <li>• Summarized tree view listing the pricing rules which are defined for the parent customer, fully-insured group policies, and policy plans.</li> <li>• Basic information about the approval transactions which are created while defining, editing, and deleting the pricing rules for different entities.</li> </ul>

If you are viewing the 360° information of...	Then...
A bill group who is associated with the fully-insured group policy	The <b>Pricing Information</b> tab displays the following: <ul style="list-style-type: none"> <li>• Basic details of the pricing rules which are defined for different entities (such as parent customer, fully-insured group policy, policy plan, and state of issue).</li> <li>• Basic information about the approval transactions which are created while defining, editing, and deleting the pricing rules for different entities.</li> </ul>
A person whose person type is neither <b>Parent Customer</b> nor <b>Bill Group</b>	No data appears in the <b>Pricing Information</b> tab.

It contains the following zones:

- [Parent Customer Pricing Rules](#) on page 612

**Note:** The **Parent Customer Pricing Rules** zone appears when you are viewing 360° information of a parent customer or bill group who is associated with the self-funded policy.

- [Bill Group Self-Funded Policy Pricing Rule Summary](#) on page 615

**Note:** The **Bill Group Self-Funded Policy Pricing Rule Summary** zone appears when you are viewing 360° information of a parent customer who is associated with the self-funded policy.

- [Parent Customer Pricing Rule Summary](#) on page 616

**Note:** The **Parent Customer Pricing Rule Summary** zone appears when you are viewing 360° information of a bill group who is associated with the self-funded policy.

- [Bill Group Self-Funded Policy Information](#) on page 617

**Note:** The **Bill Group Self-Funded Policy Information** zone appears when you are viewing 360° information of a parent customer or bill group who is associated with the self-funded policy.

- [Bill Group Self-Funded Policy Pricing Rules](#) on page 618

**Note:** The **Bill Group Self-Funded Policy Pricing Rules** zone appears when you are viewing 360° information of a parent customer or bill group who is associated with the self-funded policy.

- [Bill Group Pricing Groups](#) on page 623

**Note:** The **Bill Group Pricing Groups** zone appears when you are viewing 360° information of a bill group who is associated with the self-funded policy.

- [Fully-Insured Pricing Rules](#) on page 624

**Note:** The **Fully-Insured Pricing Rules** zone appears when you are viewing 360° information of a parent customer or bill group who is associated with the fully-insured group policy.

- [Pricing Rule Summary](#) on page 625

**Note:** The **Pricing Rule Summary** zone appears when you are viewing 360° information of a parent customer who is associated with the fully-insured group policy.

- [Pricing Rule Approval Transactions](#) on page 626

**Note:** The **Pricing Rule Approval Transactions** zone appears when you are viewing 360° information of a parent customer or bill group who is associated with the fully-insured group or self-funded policy.

### Bill Group Self-Funded Policy Information

The **Bill Group Self-Funded Policy Information** zone appears when you are viewing 360° information of a parent customer or bill group who is associated with the self-funded policy. If you are viewing the 360° information of a parent customer, the **Bill Group Self-Funded Policy Information** zone lists the policies to which each bill group of the parent customer is associated. However, if you are viewing the 360° information of a bill group, the **Bill Group Self-Funded Policy Information** zone lists the policies to which the bill group is associated. It contains the following columns:

Column Name	Column Description
Bill Group Information	Indicates the bill group to which the policy is associated.
	<b>Note:</b> It has a link. On clicking the link, the <b>Person</b> screen appears where you can view the details of the respective bill group (i.e. person).
Policy Information	Displays information about the policy.
	<b>Note:</b> It has a link. On clicking the link, the <b>Policy</b> screen appears where you can view the details of the respective policy.
Renew	On clicking the <b>Renew</b>  icon, the <b>Policy</b> screen appears where you can renew the policy.
	<b>Note:</b> The <b>Renew</b> icon appears when the policy is in the <b>In Force/Active</b> status and it is not yet renewed.

Column Name	Column Description
Policy Number	Displays the policy number.
Start Date	Displays the date from when the policy is effective.
End Date	Displays the date till when the policy is effective.
Status	Indicates the status of the policy. The valid values are: <ul style="list-style-type: none"> <li>• Pending</li> <li>• In Force/Active</li> <li>• Runout</li> <li>• Post Runout</li> </ul>
Runout End Date	Displays the date when the runout period of the policy ends.
Renewal Date	Displays the date when the policy is renewed.
	<b>Note:</b> The data appears in this column when the policy is renewed.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

On clicking the **Broadcast** (📡) icon corresponding to a bill group and policy combination, the **Bill Group Self-Funded Policy Pricing Rules** and **Bill Group Pricing Groups** zones appear.

You can filter the list using various search criteria (such as, **Bill Group Name**, **Policy Start Date**, and **Policy End Date**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (🔍) icon in the upper right corner of this zone.

### Bill Group Self-Funded Policy Pricing Rules

The **Bill Group Self-Funded Policy Pricing Rules** zone lists the pricing rules which are defined for a policy of a bill group. It appears when you are viewing 360° information of a parent customer or bill group who is associated with the self-funded policy. It contains the following columns:

Column Name	Column Description
Pricing Rule Type	Indicates the pricing rule type using which the pricing rule is created.
	<b>Note:</b> It has a link. On clicking the link, the <b>Pricing Rule Type</b> screen appears where you can view the details of the respective pricing rule type.

Column Name	Column Description																						
Pricing Rule Information	Displays information about the pricing rule.																						
	<b>Note:</b> It has a link. On clicking the link, the <b>Pricing Rule</b> screen appears where you can view the details of the respective pricing rule.																						
Price Item Information	Indicates the price item for which the pricing rule is created.																						
	<b>Note:</b> It has a link. On clicking the link, the <b>Price Item</b> screen appears where you can view the details of the respective price item.																						
Start Date	Displays the date from when the pricing rule is effective.																						
End Date	Displays the date till when the pricing rule is effective.																						
Status	Indicates the status of the pricing rule. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Disaggregation Initiated</li> <li>• Inactive</li> <li>• Pending</li> </ul>																						
Edit	On clicking the <b>Edit</b> (  ) icon, the following screen appears where you can edit the details of the respective pricing rule:																						
	<table border="1"> <thead> <tr> <th>If you are editing...</th> <th>Then the following screen appears...</th> </tr> </thead> <tbody> <tr> <td>A claim pricing rule</td> <td>Claim Pricing Rule</td> </tr> <tr> <td>A specific stop-loss pricing rule</td> <td>Specific Stop-Loss (SSL) Pricing Rule</td> </tr> <tr> <td>An aggregate stop-loss pricing rule</td> <td>Aggregate Stop-Loss (ASL) Pricing Rule</td> </tr> <tr> <td>A retention type claim based pricing rule</td> <td>Retention Type Claim Based Pricing Rule</td> </tr> <tr> <td>A retention type enrollment based pricing rule</td> <td>Retention Type Enrollment Based Pricing Rule</td> </tr> <tr> <td>A one-time flat fee pricing rule</td> <td>Flat Fee Pricing Rule</td> </tr> <tr> <td>A bill period based recurring flat fee pricing rule</td> <td>Flat Fee Pricing Rule</td> </tr> <tr> <td>A frequency based recurring flat fee pricing rule</td> <td>Flat Fee Pricing Rule</td> </tr> <tr> <td>An ancillary pricing rule</td> <td>Ancillary Pricing Rule</td> </tr> <tr> <td>A level funded pricing rule</td> <td>Level Funded (LF) Pricing Rule</td> </tr> </tbody> </table>	If you are editing...	Then the following screen appears...	A claim pricing rule	Claim Pricing Rule	A specific stop-loss pricing rule	Specific Stop-Loss (SSL) Pricing Rule	An aggregate stop-loss pricing rule	Aggregate Stop-Loss (ASL) Pricing Rule	A retention type claim based pricing rule	Retention Type Claim Based Pricing Rule	A retention type enrollment based pricing rule	Retention Type Enrollment Based Pricing Rule	A one-time flat fee pricing rule	Flat Fee Pricing Rule	A bill period based recurring flat fee pricing rule	Flat Fee Pricing Rule	A frequency based recurring flat fee pricing rule	Flat Fee Pricing Rule	An ancillary pricing rule	Ancillary Pricing Rule	A level funded pricing rule	Level Funded (LF) Pricing Rule
	If you are editing...	Then the following screen appears...																					
	A claim pricing rule	Claim Pricing Rule																					
	A specific stop-loss pricing rule	Specific Stop-Loss (SSL) Pricing Rule																					
	An aggregate stop-loss pricing rule	Aggregate Stop-Loss (ASL) Pricing Rule																					
	A retention type claim based pricing rule	Retention Type Claim Based Pricing Rule																					
	A retention type enrollment based pricing rule	Retention Type Enrollment Based Pricing Rule																					
	A one-time flat fee pricing rule	Flat Fee Pricing Rule																					
	A bill period based recurring flat fee pricing rule	Flat Fee Pricing Rule																					
	A frequency based recurring flat fee pricing rule	Flat Fee Pricing Rule																					
	An ancillary pricing rule	Ancillary Pricing Rule																					
A level funded pricing rule	Level Funded (LF) Pricing Rule																						
Delete	On clicking the <b>Delete</b> (  ) icon, you can delete the pricing rule.																						
	<b>Note:</b> You can delete a pricing rule only when it is not yet used in the system.																						
Pricing Group Information	Indicates the pricing group which is used while defining the pricing rule.																						

Column Name	Column Description
Price List Information	Indicates the price list that contains the price item pricing which is created through the pricing rule.
	<b>Note:</b> It has a link. On clicking the link, the <b>Price List</b> screen appears where you can view the details of the respective price list.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

By default, the **Bill Group Self-Funded Policy Pricing Rules** zone does not appear in the **Pricing** tab of the **Customer 360° Information** screen. It appears when you click the **Broadcast** (📡) icon corresponding to a bill group and policy combination in the **Bill Group Self-Funded Policy Information** zone.

You can define a new pricing rule for the bill group by clicking the **Add** link in the upper right corner of this zone.

You can filter the list using various search criteria (such as, **Price Item**, **Start Date**, **Pricing Rule Type**, **End Date**, and **Status**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (🔍) icon in the upper right corner of this zone.

You can change the layout of this zone. For more information on how to change the layout, see [Changing the Layout](#) on page 3208.

## Bill Group Pricing Groups

The **Bill Group Pricing Groups** zone lists the pricing groups which are defined for the bill group. By default, the active pricing groups are listed in this zone. It appears when you are viewing 360° information of a bill group who is associated with the self-funded policy. It contains the following columns:

Column Name	Column Description
Pricing Group	Indicates the pricing group which is created for the bill group.
Status	Indicates the status of the pricing group. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>
Edit	On clicking the <b>Edit</b> (  ) icon, the <b>Pricing Group</b> screen appears where you can edit the details of the pricing group.
Delete	On clicking the <b>Delete</b> (  ) icon, you can delete the pricing group.
	<b>Note:</b> You can delete a pricing group when it is not yet used while defining a pricing rule for the bill group.
Duplicate	On clicking the <b>Duplicate</b> (  ) icon, the <b>Pricing Group</b> screen appears where you can define a new pricing group using an existing pricing group.
Associated Price Items	Indicates the price items whose pricing is defined using the pricing group.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

By default, the **Bill Group Pricing Groups** zone does not appear in the **Pricing** tab of the **Customer 360° Information** screen. It appears when you click the **Broadcast** () icon corresponding to a bill group in the **Bill Group Self-Funded Policy Information** zone.

You can define a new pricing group for the bill group by clicking the **Add** link in the upper right corner of this zone.

You can filter the list using the **Show All** field available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** () icon in the upper right corner of this zone.

**Note:** If you select the **Yes** option from the **Show All** list, the system lists both the active and inactive pricing groups in the **Bill Group Pricing Groups** zone.

You can change the layout of this zone. For more information on how to change the layout, see [Changing the Layout](#) on page 3208.

### Fully-Insured Pricing Rules

The **Fully-Insured Pricing Rules** zone appears when you are viewing 360° information of a parent customer or bill group who is associated with the fully-insured group policy. If you are viewing the 360° information of a parent customer, the **Fully-Insured Pricing Rules** zone lists:

- Age based or tier based pricing rules defined for the parent customer's or its bill groups' fully-insured group policy plans
- Additional charge pricing rules defined for the parent customer
- Additional charge pricing rules defined for the fully-insured group policies and policy plans of the parent customer and its bill groups
- Additional charge pricing rules defined for the states where the fully-insured group policy, its policy plans, and memberships are issued

However, if you are viewing the 360° information of a bill group, the **Fully-Insured Pricing Rules** zone lists:

- Age based or tier based pricing rules defined for the bill group's fully-insured group policy plans
- Additional charge pricing rules defined for the parent customer
- Additional charge pricing rules defined for the fully-insured group policies and policy plans of the parent customer and the bill group
- Additional charge pricing rules defined for the states where the fully-insured group policy, its policy plans, and memberships are issued

It contains the following columns:

Column Name	Column Description
Pricing Rule Type	Indicates the pricing rule type using which the pricing rule is created.
	<b>Note:</b> It has a link. On clicking the link, the <b>Pricing Rule Type</b> screen appears where you can view the details of the respective pricing rule type.
Pricing Rule Information	Displays information about the pricing rule.
	<b>Note:</b> It has a link. On clicking the link, the <b>Pricing Rule</b> screen appears where you can view the details of the respective pricing rule.
Price Item Information	Indicates the price item for which the pricing rule is created.
	<b>Note:</b> It has a link. On clicking the link, the <b>Price Item</b> screen appears where you can view the details of the respective price item.

Column Name	Column Description
Pricing Level	Indicates the level at which the pricing rule is defined. The valid values are: <ul style="list-style-type: none"> <li>• Parent Customer</li> <li>• Plan</li> <li>• Policy</li> <li>• State</li> </ul>
Entity Information	Indicates the fully-insured group policy, policy plan, parent customer, or state for which the pricing rule is defined.
Start Date	Displays the date from when the pricing rule is effective.
End Date	Displays the date till when the pricing rule is effective.
Price List Information	Indicates the price list that contains the price item pricing which is created through the pricing rule.  <b>Note:</b> It has a link. On clicking the link, the <b>Price List</b> screen appears where you can view the details of the respective price list.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can filter the list using various search criteria (such as, **Price Item**, **Start Date**, **Pricing Rule Type**, **End Date**, **Status**, and **Pricing Level**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (🔍) icon in the upper right corner of this zone.

### **Pricing Rule Summary**

The **Pricing Rule Summary** zone lists the following in a tree structure:

- Information string of the parent customer
- Information string of the pricing rule defined for the parent customer
- Information string of each fully-insured group policy where the parent customer is associated
- Information string of the pricing rule defined for the fully-insured group policy of the parent customer
- Information string of each plan defined for the fully-insured group policy of the parent customer
- Information string of the pricing rule defined for the fully-insured group policy plans

It appears when you are viewing 360° information of a parent customer who is associated with the fully-insured group policy. It contains the following column:

Column Name	Column Description
Hierarchy	Displays information about the parent customer, fully-insured group policies, policy plans, and pricing rules in a tree structure.

### Pricing Rule Approval Transactions

The **Pricing Rule Approval Transactions** zone lists the following information:

If you are viewing the 360° information of...	Then...
A parent customer who is associated with the self-funded policy	The <b>Pricing Rule Approval Transactions</b> zone lists the approval transactions which are created while defining, editing, and deleting the parent customer's and bill groups' pricing rules.
A bill group who is associated with the self-funded policy	The <b>Pricing Rule Approval Transactions</b> zone lists the approval transactions which are created while defining, editing, and deleting the pricing rules of the bill group.
A parent customer who is associated with the fully-insured group policy	The <b>Pricing Rule Approval Transactions</b> zone lists the approval transactions which are created while defining, editing, and deleting the pricing rules of different entities (such as parent customer, fully-insured group policy, policy plans, and state of issue).
A bill group who is associated with the fully-insured group policy	The <b>Pricing Rule Approval Transactions</b> zone lists the approval transactions which are created while defining, editing, and deleting the pricing rules of different entities (such as parent customer, fully-insured group policy, policy plans, and state of issue).

It contains the following columns:

Column Name	Column Description
Submitted On	Displays the date and time when the approval transaction is created by the submitter.
Approval Transaction ID	Displays the approval transaction ID. <b>Note:</b> It has a link. On clicking the link, the <b>Comparison: New versus Existing</b> screen appears where you can review and accordingly approve, reject, or revert the changes.
Pricing Level	Indicates whether the approval transaction is created for a pricing rule which is defined at the parent customer or bill group level. The valid values are: <ul style="list-style-type: none"> <li>Parent Customer</li> <li>Bill Group</li> </ul>
Person Name	Indicates the person for whom the pricing rule is created.
Pricing Rule Type	Indicates the pricing rule type using which the pricing rule is created.
Price Item Information	Indicates the price item for which the pricing rule is created. <b>Note:</b> It has a link. On clicking the link, the <b>Price Item</b> screen appears where you can view the details of the respective price item.

Column Name	Column Description
Start Date	Displays the date from when the pricing rule is effective.
End Date	Displays the date till when the pricing rule is effective.
Approval Status	Indicates the status of the approval transaction. The valid values are: <ul style="list-style-type: none"> <li>• Approved</li> <li>• Cancelled</li> <li>• Deleted</li> <li>• Inprocess</li> <li>• Pending</li> <li>• Rejected</li> </ul>
Action	Indicates the type of action performed by the submitter on the pricing rule. The valid values are: <ul style="list-style-type: none"> <li>• Add</li> <li>• Update</li> <li>• Delete</li> </ul>
Submitted By	Indicates the user who has performed the action on the pricing rule.
Assigned To	Indicates the user to whom the approval transaction is manually assigned for review.
Approved/Rejected By	Indicates the user who has approved or rejected the approval transaction.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can filter the list using various search criteria (such as, **Status**, **Assigned To**, and **Price Item**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (🔍) icon in the upper right corner of this zone.

## Defining a Sort ID for a Bill Group

### Prerequisites

To define a sort ID for a bill group, you should have:

- Effective child persons whose person type is set to **Bill Group** and who are related to the parent customer using a relationship type which is specified in the **Person Relationship Type** option type of the **C1-ASOBLNG** feature configuration

### Procedure

To define a sort ID for a bill group:

1. Search for a person whose person type is set to **Parent Customer** in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **View** (🔗) icon corresponding to the person whose details you want to view.

The **Person** tab appears in the **Customer 360° Information** screen.

3. Expand the **Bill Group Sorting** zone.

**Note:** The **Bill Group Sorting** zone appears when you are viewing the 360° information of a person whose person type is set to **Parent Customer**.

- Click the **Add** link in the upper right corner of the **Bill Group Sorting** zone.

The **Bill Group Sorting** screen appears. It contains the following field:

Field Name	Field Description
Parent Customer	Indicates the parent customer whose bill groups' sort IDs you want to define.

In addition, it contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Bill Group Information	Used to indicate the bill group for whom you want to define the sort ID.	Yes
	<b>Note:</b> The values appear in this list when there are effective child persons whose person type is set to <b>Bill Group</b> and who are related to the parent customer using a relationship type which is specified in the <b>Person Relationship Type</b> parameter of the <b>C1-ASOBLNG</b> feature configuration.	
Description	Used to specify the description for the sort ID.	Yes
Sort ID	Used to specify the sort ID.	Yes
Start Date	Used to specify the date from when the sort ID is effective for the bill group.	Yes
	<b>Note:</b> The start date cannot be later than the end date.	
End Date	Used to specify the date till when the sort ID is effective for the bill group.	No
	<b>Note:</b> The end date cannot be earlier than the start date.	

- Enter the required details in the grid.
- If you want to define more than one sort ID for a bill group, click the **Add**  icon and then repeat step 5.

**Note:** However, if you want to remove a sort ID of a bill group, click the **Delete**  icon corresponding to the bill group and sort ID combination.

- Click **Save**.

A sort ID is defined for the bill group.

## Editing a Sort ID of a Bill Group

### Procedure

To edit a sort ID of a bill group:

1. Search for a person whose person type is set to **Parent Customer** in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **View** (🔗) icon corresponding to the person whose details you want to view.

The **Person** tab appears in the **Customer 360° Information** screen.

3. Expand the **Bill Group Sorting** zone.

**Note:** The **Bill Group Sorting** zone appears when you are viewing the 360° information of a person whose person type is set to **Parent Customer**.

4. In the **Bill Group Sorting** zone, select the check box corresponding to the bill group and sort ID combination whose details you want to edit.

**Note:** If you want to edit all sort IDs of effective bill groups, you need to select the check box corresponding to the column header. In such case, the system considers only those records which are present on the respective page for editing.

5. Click **Edit**.

The **Bill Group Sorting** screen appears. It contains the following field:

Field Name	Field Description
Parent Customer	Indicates the parent customer whose bill groups' sort IDs you want to edit.

In addition, it contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Bill Group Information	Indicates the bill group whose sort ID you want to edit.	Not applicable
Description	Used to specify the description for the sort ID.	Yes
Sort ID	Displays the sort ID.	Not applicable
Start Date	Used to specify the date from when the sort ID is effective for the bill group.  <b>Note:</b> The start date cannot be later than the end date. The start date cannot be later than the effective date specified in the derivation and pricing parameters which are defined for the bill group and sort ID combination.	Yes

Field Name	Field Description	Mandatory (Yes or No)
End Date	Used to specify the date till when the sort ID is effective for the bill group.	No
	<p><b>Note:</b></p> <p>The end date cannot be earlier than the start date.</p> <p>The end date cannot be earlier than the effective date specified in the derivation and pricing parameters which are defined for the bill group and sort ID combination.</p>	

6. Modify the details of a bill group's sort ID, if required.
7. Click **Save**.

The changes made to the bill group's sort ID are saved.

## Deleting a Sort ID of a Bill Group

### Procedure

To delete a sort ID of a bill group:

1. Search for a person whose person type is set to **Parent Customer** in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **View** () icon corresponding to the person whose details you want to view.

The **Person** tab appears in the **Customer 360° Information** screen.

3. Expand the **Bill Group Sorting** zone.

**Note:** The **Bill Group Sorting** zone appears when you are viewing the 360° information of a person whose person type is set to **Parent Customer**.

4. In the **Bill Group Sorting** zone, select the check box corresponding to the bill group and sort ID combination that you want to delete.

**Note:** If you want to delete all sort IDs of effective bill groups, you need to select the check box corresponding to the column header. In such case, the system considers only those records which are present on the respective page for deleting.

5. Click **Delete**.

A message appears confirming whether you want to delete the bill group's sort ID.

**Note:** You can delete a bill group's sort ID when the derivation and pricing parameters are not yet defined for the bill group and sort ID combination.

6. Click **OK**.

The bill group's sort ID is deleted.

## Creating a Bill Group Sorting Upload Request

### **Procedure**

To create a bill group sorting upload request:

1. Search for a person whose person type is set to **Parent Customer** in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **View** () icon corresponding to the person whose details you want to view.

The **Person** tab appears in the **Customer 360° Information** screen.

3. Expand the **Bill Group Sorting** zone.

**Note:** The **Bill Group Sorting** zone appears when you are viewing the 360° information of a person whose person type is set to **Parent Customer**.

4. Click the **Upload** link in the upper right corner of the **Bill Group Sorting** zone.

The **Select Upload Request Type** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Upload Request Type	Used to indicate the upload request type using which you want to create the upload request.	Yes
	<b>Note:</b> The list includes only those upload request types where the upload request business object with the <b>Upload Type</b> option type set to <b>BG</b> is selected.	

**Note:** The **Select Upload Request Type** screen appears when there are multiple upload request types where the upload request business object with the **Upload Type** option type set to **BG** is selected. If there is only one such upload request type defined in the application, the **Bill Group Sorting Upload Request** screen appears.

5. Select the required upload request type from the respective field.
6. Click **OK**.

The **Bill Group Sorting Upload Request** screen appears. It contains the following sections:

- **Main** – Used to specify basic details about the upload request.
- **Characteristics** – Used to define the characteristics for the upload request.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Upload Request Type	Indicates the upload request type using which the bill group sorting upload request will be created.	Not applicable
Parent Customer	Used to indicate the person for whom you want to create the bill group sorting upload request.  <b>Note:</b> By default, the parent customer's ID appears in this field. You can change the person, if required.  The system allows you to create a bill group sorting upload request for a person whose person type is set to <b>Parent Customer</b> .  The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Person Search</b> window appears.	Yes
File Name	Used to specify the name and path of the file that you want to upload.  <b>Note:</b> You can also click the <b>Browse</b> button corresponding to this field to browse to the location where the file is available in the system.	Yes
Replace Existing File	Used to indicate whether you want to replace any existing file in the system. You must select this check box when you want to upload the same file once again.	No
Comments	Used to specify additional information about the upload request.	No

7. Click the **Browse** button corresponding to the **File Name** field.

The **Choose File to Upload** dialog box appears.

8. Browse to the location where the file that you want to upload is available in the system.
9. Click **Open**.

The file name along with the path appears in the **File Name** field.

10. Select the **Replace Existing File** check box depending on whether you want to upload the same file once again in the system.
11. Define characteristics for the upload request, if required.

**12. Click Save.**

A message appears indicating the number of records which are successfully uploaded. Then, a bill group sorting upload request is created in the **Draft** status. If the bill group ID is available in the record, the status of the record is set to **Pending**. However, if the system could not derive the bill group ID using the bill group identifier type and bill group identifier combination when the bill group ID is not specified in the record, the status of the record is set to **Invalid**.

## Defining the Derivation and Pricing Parameters for a Bill Group and Sort ID Combination

**Prerequisites**

To define the derivation and pricing parameters for a bill group and sort ID combination, you should have:

- Effective child persons whose person type is set to **Bill Group** and who are related to the parent customer using a relationship type which is specified in the **Person Relationship Type** option type of the **C1-ASOBLNG** feature configuration
- Sort ID defined for the bill group
- Values defined for the **C1-SourceSystemLookup** extendable lookup

**Procedure**

To define the derivation and pricing parameters for a bill group and sort ID combination:

1. Search for a person whose person type is set to **Parent Customer** in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **View** (🔗) icon corresponding to the person whose details you want to view.

The **Person** tab appears in the **Customer 360° Information** screen.

3. Expand the **Bill Group Derivation and Pricing Parameters** zone.

**Note:** The **Bill Group Derivation and Pricing Parameters** zone appears when you are viewing the 360° information of a person whose person type is set to **Parent Customer**.

4. Click the **Add** link in the upper right corner of the **Bill Group Derivation and Pricing Parameters** zone.

The **Bill Group Derivation and Pricing Parameters** screen appears. It contains the following field:

Field Name	Field Description
Parent Customer	Indicates the parent customer whose bill groups' derivation and pricing parameters you want to define.

In addition, it contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Source System	Used to indicate the source system from where the claim and enrollment transactions are received.	Yes
Parameter 1	Used to specify the employee attribute based on which you want to derive the bill group.  <b>Note:</b> You must not specify the ampersand (&) character in this field.	Yes
Parameter 2	Used to specify the employee attribute based on which you want to derive the bill group.  <b>Note:</b> You must not specify the ampersand (&) character in this field.	No
Parameter 3	Used to specify the employee attribute based on which you want to derive the bill group.  <b>Note:</b> You must not specify the ampersand (&) character in this field.	No
Parameter 4	Used to specify the employee attribute based on which you want to derive the bill group.  <b>Note:</b> You must not specify the ampersand (&) character in this field.	No
Effective Date	Used to specify the date from when the derivation and pricing parameters are effective for the bill group and sort ID combination.  <b>Note:</b> The effective date must be within the date range of the sort ID defined for the bill group.	Yes
Status	Indicates the status of the derivation and pricing parameters for the bill group and sort ID combination. The valid values are:  <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul> <b>Note:</b> By default, the value is set to <b>Active</b> .	Not applicable
Bill Group Information	Used to indicate the bill group for whom you want to define the derivation and pricing parameters.  <b>Note:</b> The values appear in this list when there are effective child persons whose person type is set to <b>Bill Group</b> and who are related to the parent customer using a relationship type which is specified in the <b>Person Relationship Type</b> parameter of the <b>C1-ASOBLLNG</b> feature configuration.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Sort ID	Used to indicate the sort ID of the bill group for which you want to define the derivation and pricing parameters.	Yes
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Sort ID Search</b> window appears.	

- Enter the required details in the grid.
- If you want to define the derivation and pricing parameters for more than one bill group and sort ID combination, click the **Add** (+) icon and then repeat step 5.

**Note:** However, if you want to remove the derivation and pricing parameters of a bill group and sort ID combination, click the **Delete** (🗑) icon corresponding to the bill group and sort ID combination.

- Click **Save**.

The derivation and pricing parameters are defined for the bill group and sort ID combination.

## Editing the Derivation and Pricing Parameters of a Bill Group and Sort ID Combination

### Procedure

To edit the derivation and pricing parameters of a bill group and sort ID combination:

- Search for a person whose person type is set to **Parent Customer** in the **Customer 360° View** screen.
- In the **Search Results** section, click the **View** (🔗) icon corresponding to the person whose details you want to view.

The **Person** tab appears in the **Customer 360° Information** screen.

- Expand the **Bill Group Derivation and Pricing Parameters** zone.

**Note:** The **Bill Group Derivation and Pricing Parameters** zone appears when you are viewing the 360° information of a person whose person type is set to **Parent Customer**.

- In the **Bill Group Derivation and Pricing Parameters** zone, select the check box corresponding to the bill group and sort ID combination whose details you want to edit.

**Note:** If you want to edit the derivation and pricing parameters of all bill group and sort ID combinations, you need to select the check box corresponding to the column header. In such case, the system considers only those records which are present on the respective page for editing.

5. Click **Edit**.

The **Bill Group Derivation and Pricing Parameters** screen appears. It contains the following field:

Field Name	Field Description
Parent Customer	Indicates the parent customer whose bill groups' derivation and pricing parameters you want to edit.

In addition, it contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Source System	Indicates the source system from where the claim and enrollment transactions are received.	Not applicable
Parameter 1	Indicates the employee attribute based on which you want to derive the bill group.	Not applicable
Parameter 2	Indicates the employee attribute based on which you want to derive the bill group.	Not applicable
Parameter 3	Indicates the employee attribute based on which you want to derive the bill group.	Not applicable
Parameter 4	Indicates the employee attribute based on which you want to derive the bill group.	Not applicable
Effective Date	Displays the date from when the derivation and pricing parameters are effective for the bill group and sort ID combination.	Not applicable
Status	Used to indicate the status of the derivation and pricing parameters for the bill group and sort ID combination. The valid values are: <ul style="list-style-type: none"> <li>Active</li> <li>Inactive</li> </ul>	Yes
Bill Group Information	Indicates the bill group for whom the derivation and pricing parameters are defined.	Not applicable
Sort ID	Indicates the sort ID of the bill group for which the derivation and pricing parameters are defined.	Not applicable

6. If required, you can inactivate the derivation and pricing parameters of a bill group and sort ID combination.

7. Click **Save**.

The changes made to the derivation and pricing parameters of a bill group and sort ID combination are saved.

## Creating a Bill Group Derivation and Pricing Parameters Upload Request

### Procedure

To create a bill group derivation and pricing parameters upload request:

1. Search for a person whose person type is set to **Parent Customer** in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **View** (🔗) icon corresponding to the person whose details you want to view.

The **Person** tab appears in the **Customer 360° Information** screen.

3. Expand the **Bill Group Derivation and Pricing Parameters** zone.

**Note:** The **Bill Group Derivation and Pricing Parameters** zone appears when you are viewing the 360° information of a person whose person type is set to **Parent Customer**.

4. Click the **Upload** link in the upper right corner of the **Bill Group Derivation and Pricing Parameters** zone.

The **Select Upload Request Type** screen appears. It contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Upload Request Type	Used to indicate the upload request type using which you want to create the upload request.	Yes
	<b>Note:</b> The list includes only those upload request types where the upload request business object with the <b>Upload Type</b> option type set to <b>BL</b> is selected.	

**Note:** The **Select Upload Request Type** screen appears when there are multiple upload request types where the upload request business object with the **Upload Type** option type set to **BL** is selected. If there is only one such upload request type defined in the application, the **Bill Group Derivation and Pricing Parameters Upload Request** screen appears.

5. Select the required upload request type from the respective field.
6. Click **OK**.

The **Bill Group Derivation and Pricing Parameters Upload Request** screen appears. It contains the following sections:

- **Main** – Used to specify basic details about the upload request.
- **Characteristics** – Used to define the characteristics for the upload request.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Upload Request Type	Indicates the upload request type using which the bill group derivation and pricing parameters upload request will be created.	Not applicable
Parent Customer	<p>Used to indicate the person for whom you want to create the bill group derivation and pricing parameters upload request.</p> <p><b>Note:</b> By default, the parent customer's ID appears in this field. You can change the person, if required.</p> <p>The system allows you to create a bill group derivation and pricing parameters upload request for a person whose person type is set to <b>Parent Customer</b>.</p> <p>The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Person Search</b> window appears.</p>	Yes
File Name	<p>Used to specify the name and path of the file that you want to upload.</p> <p><b>Note:</b> You can also click the <b>Browse</b> button corresponding to this field to browse to the location where the file is available in the system.</p>	Yes
Replace Existing File	Used to indicate whether you want to replace any existing file in the system. You must select this check box when you want to upload the same file once again.	No
Comments	Used to specify additional information about the upload request.	No

- Click the **Browse** button corresponding to the **File Name** field.

The **Choose File to Upload** dialog box appears.

- Browse to the location where the file that you want to upload is available in the system.

- Click **Open**.

The file name along with the path appears in the **File Name** field.

- Select the **Replace Existing File** check box depending on whether you want to upload the same file once again in the system.

- Define characteristics for the upload request, if required.

- Click **Save**.

A message appears indicating the number of records which are successfully uploaded. Then, a bill group derivation and pricing parameters upload request is created in the **Draft** status. If the bill group ID is available in the record, the status of the record is set to **Pending**. However, if the system could not derive the bill group ID using the bill

group identifier type and bill group identifier combination when the bill group ID is not specified in the record, the status of the record is set to **Invalid**.

## Renewing a Self-Funded Policy of a Bill Group

Oracle Revenue Management and Billing enables you to renew a self-funded policy which is associated with a bill group. However, note that you can renew a self-funded policy when it is in the **In Force/Active** status and is not yet renewed. For more information, see [Self-Funded Policy Renewal](#) on page 365.

### Procedure

To renew a self-funded policy of a bill group:

1. Search for the bill group who is associated with the self-funded policy (which you want to renew) in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **View** () icon corresponding to the bill group whose details you want to view.

The **Person** tab appears in the **Customer 360° Information** screen.

3. Click the **Pricing Information** tab.

The **Pricing Information** tab appears.

4. In the **Bill Group Self-Funded Policy Information** zone, click the **Renew** () icon in the **Renew** column corresponding to the self-funded policy which you want to renew.

The **Policy** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the renewed policy.
- **Persons** - Used to associate or disassociate persons from the renewed policy.

**Note:** You cannot disassociate persons who are associated with the base policy using a policy person role which is specified in the **Bill Group Policy Person Role** or **Parent Customer Policy Person Role** option type of the **C1-ASOBLNG** feature configuration.

- **Characteristics** - Used to define the characteristics for the renewed policy.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Base Policy Information	Indicates the policy which you want to renew.	Not applicable
Policy Type	Indicates the policy type using which the base policy is created.	Not applicable
Policy Number	Used to specify the policy number of the renewed policy.	Yes
Description	Used to specify the description for the renewed policy.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Start Date	Used to specify the date from when the renewed policy is effective.	Yes
	<p><b>Note:</b></p> <p>By default, the start date is set to the base policy's end date plus one day. For example, if the base policy's end date is 12-31-2018, then by default, the renewed policy's start date is set to 01-01-2019.</p> <p>The start date cannot be later than the end date.</p> <p>The start date cannot be earlier than or equal to the base policy's end date.</p>	
End Date	Used to specify the date till when the renewed policy is effective.	Yes
	<p><b>Note:</b> The end date cannot be earlier than the start date.</p>	
Runout End Date	Used to specify the date when the runout period of the renewed policy ends.	No
	<p><b>Note:</b> The runout end date cannot be earlier than or equal to the renewed policy's end date.</p>	
Runout Administration Fees	Used to indicate whether the administration fees must be charged when the claim transaction for the policy is processed in the runout period. The valid values are:	No
	<ul style="list-style-type: none"> <li>• None</li> <li>• Percentage of Claim</li> </ul> <p><b>Note:</b> At present, this field is used only for the informational purposes and is not considered during the billable charge creation for the claim transactions which are received in the runout period of the policy.</p>	

Field Name	Field Description	Mandatory (Yes or No)
Copy Pricing Rules	<p>Used to indicate whether you want to copy the pricing rules of the base policy to the renewed policy. If you select the <b>Copy Pricing Rules</b> option, the system copies the following pricing rules of the base policy:</p> <ul style="list-style-type: none"> <li>• Claim</li> <li>• Retention Type Claim Based</li> <li>• Retention Type Enrollment Based</li> <li>• Recurring Flat Fees</li> <li>• Ancillary</li> </ul>	No
	<p><b>Note:</b></p> <p>While copying a pricing rule, the start and end dates of the new pricing rule are set to the renewed policy's start and end dates, respectively.</p> <p>If there are multiple pricing rules which are created using the same pricing rule type and are effective for the different date range, the system copies only one pricing rule from the base policy with the latest date range.</p>	

**Note:** The **Renew** icon appears when the policy is in the **In Force/Active** status and it is not yet renewed.

5. Enter the required details in the **Main** section.
6. Associate or disassociate persons from the renewed policy, if required.
7. Define, edit, or remove characteristics of the renewed policy, if required.
8. Click **Save**.

The renewed policy is created in the **Pending** status. The renewal date is stamped corresponding to the base policy in the **Bill Group Self-Funded Policy Information** zone.

## Viewing the Bill Details

**Procedure**

To view the details of a bill:

1. Search for the account, whose bill details you want to view, in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **View** (🔗) icon corresponding to the account whose details you want to view.  
The **Account** tab appears in the **Customer 360° Information** screen.
3. In the **Open Bills** zone, click the **View** (🔗) icon corresponding to the bill whose details you want to view.  
The **Bill Information** screen appears.
4. View the basic details of the bill in the **Bill Information** zone.
5. View the adjustments which are swept onto the bill in the **Adjustments** zone.
6. View the activities, such as payment, transfer, offset, refund, or write off through which the bill is settled, in the **Settlement Activities** zone.
7. View the bill segment information, which is summarized based on the date range and price item combination, in the **Bill Segment Summary** zone.
8. View the details of the bill segments in the **Bill Segment Details** zone.
9. View the SQ details of the bill segment in the **SQ Details** zone.
10. View the calculation lines of the bill segment in the **Bill Segment Calculation Lines** zone.
11. View the transactions whose charges are billed through the bill segment in the **Transaction Details** zone.
12. View the calculation lines of all transaction legs (which are rated before billing) in the **Transaction Leg Calculation Lines** zone.
13. View the active hold requests due to which the bill is kept on hold in the **Hold Details** zone.
14. View the offset requests through which the bill is offset against another bill in the **Offset Details** zone.
15. View the refund and write off requests through which the bill or its bill segment is either refunded or written off in the **Refund and Write Off Details** zone.

- [Refund and Write Off Details](#) on page 656

## Bill Information

The **Bill Information** zone displays the details of the bill. It contains the following section:

- **Main** - Displays the basic information about the bill. It contains the following fields:

Field Name	Field Description
Bill Information	<p>Displays information about the bill. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Bill</b> screen appears where you can view the details of the respective bill.</p>
Alternate Bill ID	<p>Displays the alternate bill ID.</p> <p><b>Note:</b> This field appears only when the respective data is available for the bill.</p>
Account Information	<p>Indicates the account for which the bill is generated. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account.</p>

## Adjustments

The **Adjustments** zone lists the adjustments which are swept onto the bill. It contains the following columns:

Column Name	Column Description
Adjustment Information	<p>Displays information about the adjustment.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Adjustment</b> screen appears where you can view the details of the respective adjustment.</p>
Contract Information	<p>Indicates the contract against which the adjustment is created. In addition, this column has a context menu which helps in navigating to other screens in the application.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Contract</b> screen appears where you can view the details of the respective contract.</p>

## Settlement Activities

You may settle a bill or its bill segment by making a payment, offsetting, refunding, writing off, or by reconciling against pay instructions. The **Settlement Activities** zone lists the activities related to the bill or its bill segment settlement. It contains the following columns:

Column Name	Column Description
Activity Date	Displays the date when the settlement activity was performed in the system.
Activity Type	Indicates the type of the settlement activity. The valid values are: <ul style="list-style-type: none"> <li>• Payment</li> <li>• Offset</li> <li>• Refund</li> <li>• Write Off</li> <li>• Transfer</li> </ul>
Amount	Indicates the amount settled through the activity.
Related Object Information	Displays additional information about the settlement activity.
Related Object ID	Indicates the payment, offset request, refund request, write off request, or reconciliation adjustment which is created during settlement.  <b>Note:</b> It has a link. On clicking the link, the <b>Payment, Offset Request, Refund Request, Write Off Request, or Adjustment</b> screen appears where you can view the details of the respective activity.

## Bill Segment Summary

The system groups the bill segments with the same date range and price item combination and then provides the summarized information for each combination in the **Bill Segment Summary** zone. It contains the following columns:

Column Name	Column Description
Start Date	Displays the start date of the bill segments.
End Date	Displays the end date of the bill segments.
Policy Number	Indicates the policy for which the bill segments are generated.
Price Item Description	Indicates the price item for which the bill segments are generated.
Amount	Displays the sum of the bill segment amount.
Unpaid Amount	Displays the sum of the unpaid amount of the bill segments.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

## Bill Segment Details

The **Bill Segment Details** zone displays the details of the bill segments which are included in the bill. It contains the following columns:

Column Name	Column Description
Start Date	Displays the start date of the bill segment.
End Date	Displays the end date of the bill segment.
Policy Number	Indicates the policy for which the bill segment is generated.
Price Item Description	Displays the description of the price item.
Price Item	Indicates the price item for which the bill segment is generated.
Status	Indicates the status of the bill segment. The valid values are: <ul style="list-style-type: none"> <li>• Incomplete</li> <li>• Error</li> <li>• Freezable</li> <li>• Pending Cancel</li> <li>• Frozen</li> <li>• Canceled</li> </ul>
Amount	Displays the bill segment amount.
Billable Charge ID	Indicates the billable charge for which the bill segment is generated.  <b>Note:</b> It has a link. On clicking the link, the <b>Billable Charge</b> screen appears where you can view the details of the respective billable charge.
Unpaid Amount	Displays the unpaid amount of the bill segment.
Price Item Parameters	Displays the concatenated string consisting of a list of parameters and their values based on which the price item pricing is defined.
External Membership ID	Indicates the membership for which the bill segment is generated.
Member's Primary Identifier	Displays the concatenated string consisting of member's primary identifier type and its value which are separated by a colon (:).
Member Name	Indicates the member for whom the bill segment is generated.
Plan Information	Indicates the plan to which the membership belongs.  <b>Note:</b> It has a link. On clicking the link, the <b>Policy Plan</b> screen appears where you can view the details of the respective policy plan.
Auto Pay ID	Indicates the auto pay instruction through the automatic payment is created for the bill segment.  <b>Note:</b> It has a link. On clicking the link, the <b>Auto Pay Instruction</b> screen appears where you can view the details of the respective auto pay instruction.
Bill Segment ID	Displays the bill segment ID.  <b>Note:</b> It has a link. On clicking the link, the <b>Bill Segment</b> screen appears where you can view the details of the respective bill segment.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

On clicking the **View** () icon corresponding to a bill segment, the **Bill Segment** screen appears where you can view the additional details of the respective bill segment.

On clicking the **Broadcast** () icon corresponding to a bill segment, the **SQ Details**, **Bill Segment Calculation Lines**, and **Transaction Details** zones appear.

**Note:**

The **SQ Details** zone appears when the bill segment is generated for an SQI based billable charge.

The **Transaction Details** zone appears only when the bill segment is generated for a billable charge which is created through the transaction aggregation process.

You can filter the list using various search criteria (such as, **Start Date** and **End Date**) available in the **Filter** area.

By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** () icon in the upper right corner of this zone.

**Related Topics**

## SQ Details

The **SQ Details** zone lists the service quantity identifiers (SQIs) used in the bill segment calculation. It appears when the bill segment is generated for an SQI based billable charge. It contains the following columns:

Column Name	Column Description
SQI	Indicates the service quantity identifier.
Billed Service Quantity	Displays the service quantity used by the rates engine for calculation. This amount differs from the initial service quantity when the rate's SQ rules manipulate the service quantity.

By default, the **SQ Details** zone does not appear in the **Bill Information** screen. It appears when you click the **Broadcast** () icon corresponding to a bill segment in the **Bill Segment Details** zone.

## Bill Segment Calculation Lines

The **Bill Segment Calculation Lines** zone lists the calculation lines of the bill segment. It contains the following columns:

Column Name	Column Description
Header Sequence	Indicates the sequence in which the calculation line is generated.
Sequence	Ideally, the sequence would be 1 unless multiple versions of the rate were effective during the bill period. If there is more than one effective rate version, there will be a separate set of calculation lines for each version applied. The lines that apply to the first part of the bill period would have a Sequence of 1, the lines for the next part of the bill period would have a Sequence of 2 and so on.

Column Name	Column Description
Description on Bill	Displays the summarized information about the charge that will be printed on the bill.
Amount	Displays the charge amount.
Distribution Code	Displays the distribution code which indicates the GL account to which the charge must be posted.
Service Quantity	Indicates the service quantity which is used for calculation.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

By default, the **Bill Segment Calculation Lines** zone does not appear in the **Bill Information** screen. It appears when you click the **Broadcast** (  ) icon corresponding to a bill segment in the **Bill Segment Details** zone.

## Transaction Details

The **Transaction Details** zone lists the transactions whose charges are billed through the bill segment. It contains the following columns:

Column Name	Column Description
Transaction ID	Displays the transaction ID.
	<b>Note:</b> It has a link. On clicking the link, the <b>Transaction Details</b> screen appears where you can view the details of the respective transaction.
Transaction Date	Displays the date and time when the transaction was performed.
Transaction Volume	Displays the transaction volume.
Transaction Amount	Displays the transaction amount.
Transaction Currency	Displays the currency in which the transaction was performed.
Transaction Source	Displays the transaction source from where the transaction was received.
Transaction Record Type	Displays the record type of the transaction.
Initial Price Item	Indicates the price item to which the transaction is mapped.
Rule	Indicates the rule which was met while determining initial price item for the transaction.
	<b>Note:</b> It has a link. On clicking the link, the <b>Rule</b> screen appears where you can view the details of the respective rule.
Transaction Information	Displays information about the transaction.
	<b>Note:</b> It has a link. On clicking the link, the <b>Transaction Details</b> screen appears where you can view the details of the respective transaction.

By default, the **Transaction Details** zone does not appear in the **Bill Information** screen. It appears when you click the **Broadcast** (  ) icon corresponding to a bill segment in the **Bill Segment Details** zone.

On clicking the **Broadcast** (  ) icon corresponding to a transaction, the **Transaction Leg Calculation Lines** zone appears with the details of the respective transaction.

### Related Topics

How to view the calculation lines of all legs of a transaction	<a href="#">Viewing the Calculation Lines of All Legs of a Transaction on page 659</a>

## Transaction Leg Calculation Lines

The **Transaction Leg Calculation Lines** zone lists the calculation lines of all legs of the transaction which are rated before billing. It contains the following columns:

Column Name	Column Description
Transaction Calculation ID	Displays the transaction calculation ID.
Sequence	Indicates the sequence in which the calculation line was created. It is the sequence of the rate component which is used in the rate schedule.
Price Component ID	Indicates the price component which is used during calculation.
Rate	Indicates the rate which is used for the calculation.
SQI	Indicates the service quantity identifier (SQI) which is used in the calculation.
Billable Service Quantity	Indicates the service quantities used by the rates engine for calculation.
Calculated Amount	Displays the calculated charge amount which is rounded off (i.e. amount in precision). For example, 100. This amount appears in the invoice currency.
Precise Calculated Amount	Displays the calculated charge amount which is not rounded off (i.e. amount with precision and scale). For example, 98.67. This amount appears in the invoice currency.
Exempt Amount	Displays the amount of the calculated charge that the person does not have to pay due to tax exemption.
Base Amount	Displays the total amount derived from the cross-referenced line(s) that the current line then used to calculate the charge amount.
Pricing Amount	Displays the calculated charge amount which is not rounded off (i.e. amount with precision and scale). For example, 98.67. This amount appears in the pricing currency.
Exchange Rate	Indicates the exchange rate which is used when the invoice currency is different from the pricing currency.
Print	Indicates whether information about the calculation line must be printed on the person's bill. The valid values are: <ul style="list-style-type: none"> <li>• Y</li> <li>• N</li> </ul>
Description on Bill	Displays the summarized information about the charge that will be printed on the bill.
Distribution Code	Displays the distribution code which indicates the GL account to which the charge must be posted.
Pricing Currency	Indicates the currency in which the price item pricing is defined.
Aggregation Parameter Group ID	Indicates the aggregation parameter group using which the transaction legs are aggregated during calculation.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

By default, the **Transaction Leg Calculation Lines** zone does not appear in the **Bill Information** screen. It appears when you click the **Broadcast** (  ) icon corresponding to a transaction in the **Transaction Details** zone.

## Hold Details

The **Hold Details** zone lists the active hold requests due to which the bill is kept on hold. It contains the following columns:

Column Name	Column Description
Hold Request Information	Displays information about the hold request.
	<b>Note:</b> It has a link. On clicking the link, the <b>Hold Request</b> screen appears where you can view the details of the respective hold request.
Status	Indicates the status of the hold request.
Entity	Indicates the type of the entity. The valid values are: <ul style="list-style-type: none"> <li>• Person</li> <li>• Account</li> <li>• Bill</li> </ul>
Entity Information	Indicates the entity for which the hold request is created. In addition, this column has a context menu which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Person</b> , <b>Account</b> , or <b>Bill</b> screen appears where you can view the details of the respective entity.
Start Date	Displays the date from when the entity is kept on hold.
End Date	Displays the date till when the entity is kept on hold.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

## Offset Details

The **Offset Details** zone lists the offset requests through which the bill is offset against another bill. It contains the following columns:

Column Name	Column Description
Offset Request Information	Displays information about the offset request.
	<b>Note:</b> It has a link. On clicking the link, the <b>Offset Request</b> screen appears where you can view the details of the respective offset request.
Offset Amount	Indicates the bill amount which is offset against another bill.

Column Name	Column Description
Creation Mode	Indicates the mode in which the offset request is created. The valid values are: <ul style="list-style-type: none"> <li>• Automatic</li> <li>• Manual</li> </ul>

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

## Refund and Write Off Details

The **Refund and Write Off Details** zone lists the refund and write off requests through which the bill or its bill segment is either refunded or written off. It contains the following columns:

Column Name	Column Description
Create Date/Time	Displays the date and time when the refund or write off request is created.
Refund/Write Off Request Information	Displays information about the refund or write off request. <p><b>Note:</b> It has a link. On clicking the link, the <b>Refund Request</b> or <b>Write Off Request</b> screen appears depending on whether the request is created for refund or write off.</p>
Refund/Write Off Amount	Displays the total refund or write off amount.
Status	Indicates the status of the refund or write off request. The valid values are: <ul style="list-style-type: none"> <li>• Approval In Progress</li> <li>• Cancelled</li> <li>• Deferred Processing</li> <li>• Draft</li> <li>• Processed</li> <li>• Rejected</li> <li>• Voided</li> </ul>
Action	Indicates whether the request is created for refund or write off. The valid values are: <ul style="list-style-type: none"> <li>• Refund</li> <li>• Write Off</li> </ul>
Account Information	Indicates the account for which the refund or write off request is created. In addition, this column has a context menu which helps in navigating to other screens in the application. <p><b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account.</p>
Created By	Indicates the user who has created the refund or write off request.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can filter the list using the **Action** field available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (🔍) icon in the upper right corner of this zone.

## Viewing the SQ Details of a Bill Segment

### Procedure

To view the SQ details of a bill segment:

1. Search for the account, whose bill details you want to view, in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **View** (🔗) icon corresponding to the account whose details you want to view.

The **Account** tab appears in the **Customer 360° Information** screen.

3. In the **Open Bills** zone, click the **View** (🔗) icon corresponding to the bill whose details you want to view.

The **Bill Information** screen appears.

4. In the **Bill Segment Details** zone, click the **Broadcast** (📡) icon corresponding to the bill segment whose details you want to view.

The **SQ Details**, **Bill Segment Calculation Lines**, and **Transaction Details** zones appear.

#### Note:

The **SQ Details** zone appears when the bill segment is generated for an SQI based billable charge.

The **Transaction Details** zone appears when the bill segment is generated for a billable charge which is created through the transaction aggregation process.

5. View the SQ details of the bill segment in the **SQ Details** zone.

## Viewing the Transactions Whose Charges are Billed Through a Bill Segment

### Procedure

To view the transactions whose charges are billed through a bill segment:

- Search for the account, whose bill details you want to view, in the **Customer 360° View** screen.
- In the **Search Results** section, click the **View** () icon corresponding to the account whose details you want to view.  
The **Account** tab appears in the **Customer 360° Information** screen.
- In the **Open Bills** zone, click the **View** () icon corresponding to the bill whose details you want to view.  
The **Bill Information** screen appears.
- In the **Bill Segment Details** zone, click the **Broadcast** () icon corresponding to the bill segment whose details you want to view.

The **SQ Details**, **Bill Segment Calculation Lines**, and **Transaction Details** zones appear.

**Note:**

The **SQ Details** zone appears when the bill segment is generated for an SQI based billable charge.

The **Transaction Details** zone appears when the bill segment is generated for a billable charge which is created through the transaction aggregation process.

5. View the transactions whose charges are billed through the bill segment in the **Transaction Details** zone.

## Pricing Management (Health Insurance Business)

---

### Topics:

- [Prerequisites \(Health Insurance Business\)](#)
- [Pricing Methodologies and Pricing Variation Based on Parameters \(Health Insurance Business\)](#)
- [Parameter](#)
- [Price Item \(Health Insurance Business\)](#)
- [Price List](#)
- [Rate Definition](#)
- [Tiering Criterion](#)

Oracle Revenue Management and Billing allows you to define prices for premiums, various fees, credits, discounts, and taxes that are defined as price items. Price for the price item may vary based on various attributes, which are defined as parameters in the system. Parameter values are derived either from transaction attributes (for example, for calculating claim based fees for a self-funded customer, pricing may vary based on claim transaction's health coverage class) or based on a field or characteristic of entities (for example, for calculating premium, pricing may vary based on member person's characteristic; whether a smoker or non-smoker). The system also supports deriving the pricing parameter through an algorithm, thereby enabling the custom derivation based on requirements.

Based on the line of business and the type of charge, you can define standard pricing which is common for multiple customers (for example, pricing defined for a health plan is applicable for all the subscribers subscribing to the health plan) or customer-specific pricing (for example, for fully-insured group customer, the pricing is specific to the group and you can define the policy plan level pricing in the system to achieve this. For more information about the fully-insured pricing, see [Fully-Insured Pricing](#) on page 2937.

The system enables you to define pricing at various levels in a customer hierarchy (for example, for a self-funded group customer, the pricing can be defined at the bill group level as well as at the parent customer level). If pricing is defined at multiple levels for a customer, the precedence is given to the pricing based on the level while searching for the pricing. For example, if pricing is defined for a price item at the bill group level as well as the parent customer level, the bill group level pricing takes precedence over the parent customer level pricing. Also, the parent customer level pricing is inherited by all the bill groups.

The pricing is triggered based on the transactions to calculate various charges or credit amounts eligible for a transaction. For example, for a self-funded customer, claim amounts with additional fees and markups, claim based fees, stop loss is calculated for claim transactions, enrollment based retention fees are calculated based on enrollment transactions, and ancillary fees are calculated based on ancillary transactions. For more information about the self-funded pricing, see [Self-Funded Pricing](#) on page 2379.

**Transaction Based Pricing** is invoked using the **Transaction Feed Management** module which processes different types of transactions (for example, claim, capitation, ancillary, enrollment, etc.) using the configurable validation and mapping rules to invoke the eligible pricing rules. For more information about the transaction feed management, see [Transaction Feed Management](#) on page 1051.

Pricing can also be triggered **based on qualifying life events** (for example, premium is calculated when a new membership is added, or a new member

is added to an existing membership, or every time the plan pricing is revised, etc.). The entity audit framework enables you to define various events for which pricing should be revised. For example, **addition of a new membership, addition of a new member, updates to the plan pricing, or the membership attributes which you want to monitor for premium change, etc.** The system enables you to define the algorithms to price the eligible events by invoking pricing rules. For more information about the entity audit framework, see [Entity Audit](#) on page 3101.

## Prerequisites (Health Insurance Business)

---

To setup the pricing management feature, you need to do the following:

- Define the required SQIs and divisions in the system.
- Define the required parameters in the system.
- Define the tiering setup for rate components in the system.
- Define the required price items in the system.

## Pricing Methodologies and Pricing Variation Based on Parameters (Health Insurance Business)

---

The specialized pricing methodologies are required for pricing the fully-insured and self-funded customers. Therefore, an out of box pricing solution is provided to the fully-insured and self-funded customers through distinct pricing rule types.

### Fully-Insured Pricing

#### Age Banded Premium Pricing

Age banded premium pricing is one of the methodologies for premium calculation. In this methodology, Premium calculation is done **by determining the premium of each member separately mainly based on the age band in which the member falls, and then aggregating** these to derive the overall premium amount for a membership.

Apart from member's age, premium of age banded plans can vary based upon **different parameters; be it member's attribute or plan level attribute or LOB specific attributes**. For example, pricing can vary by different population segment characteristics such as Employee Type (Retiree, COBRA and Active) and/or by different regions, Employee Status (Permanent/contractual) etc. Age-banded pricing may also vary by different modifiers such as Tobacco usage, Gender etc.

ORMB provides Out of Box Pricing Rule Type 'Age Banded'. Using the same you can define pricing rule to define age-banded plan pricing. Pricing variation can be defined based on the pricing eligibility parameters where the source can be defined as Membership characteristics or Member characteristics or Plan characteristics. User can set **base fee** for set of parameters and can also set the **percentage or flat amount to be added over the base fee for each modifiers**.

Age-banded premium calculation algorithm which is configured in Age-banded pricing rule type process the premium pricing for each membership, derive the premium amount for each member and then aggregates the amount to derive the overall premium amount for a membership. **Maximum number of eligible dependents and the order of selection of the dependents like oldest first or youngest first is also configurable at Plan or State level.**

#### Age Banded Example:

Demo Corporation has a Group policy for the employees the Monthly premium for the policy is rated as follows

#### Base Premium Rate

Age Band	Location/Rating Area	Base Premium
Up to 15 Years	North California	\$200
	South California	\$210
16 to 18 Years	North California	\$210
	South California	\$220

Age Band	Location/Rating Area	Base Premium
18 to 40 Years	North California	\$220
	South California	\$240
40 to 60 Years	North California	\$250
	South California	\$260
60+ Years	North California	\$280
	South California	\$290

On Top of the base premium, additional 2% premium will be charged if the member is smoker

State of California is configured with the following pricing rules :

Max. No of Eligible Dependents = 2

Order of Dependent Selection = Oldest first

New Born Gift Days = 30

Proration Rule Defined for the account : Mid Month i.e. Member joining before 15<sup>th</sup> will be charged the premium for the entire month

Example 1:

North California Based Employee John Doe, a 45 years old smoker who enrolled himself with his spouse Mary Doe (Age 40) and daughter Elsa Doe aged 13, son Bob Doe aged 10 and daughter Laura Doe aged 8 the premium will be calculated as follows:

Member	Reason	Premium Contribution
John Doe	Base Premium	\$250
	Smoker	\$5
Mary Doe	Base Premium	\$250
Elsa Doe	Base Premium	\$200
Bob Doe	Base Premium	\$200
Total Premium		\$905

Example 2 :

North California Based Employee John Doe a California based Employee is enrolled in to the plan along with his spouse Mary Doe, John enrolls his new born daughter Laura born on 3<sup>rd</sup> of July on 20<sup>th</sup> of July.

John's Premium for all the months till July will be calculated as follows

Member	Reason	Premium Contribution
John Doe	Base Premium	\$250
Mary Doe	Base Premium	\$250
Total Premium		\$500

With the new enrollment in the month of July, The premium for July and the following months will be recalculated, As the state of California has New Born Gift days = 30 days, the premium will be calculated as follows:

For the Month of July:

Member	Reason	Premium Contribution
John Doe	Base Premium	\$250
Mary Doe	Base Premium	\$250
Laura Doe	Base Premium	\$200
	New Born Waiver	-\$200
Total Premium		\$500

For Month of August:

Member	Reason	Premium Contribution
John Doe	Base Premium	\$250
Mary Doe	Base Premium	\$250
Laura Doe	Base Premium	\$200
Total Premium		\$700

### Tiered Premium Pricing

Tiered based premium pricing is another methodology for premium calculation. In this methodology, Premium calculation is done by determining the **subscription tier** level for the membership directly to derive the premium amount for that membership.

Standard tier based pricing structure contains different tiers such as Employee only (E), Employee+ Spouse (ES), Family (F), Employee + Children (EC). A member can subscribe his/her dependents to a plan and fall into one of the tier. Tier-based premium varies based upon **membership tier level and different parameters**; parameters can be member's attribute or Plan level attribute or LOB specific attributes. For example, for a particular tier, pricing can vary by different population segment characteristics such as Employee Type (Retiree, COBRA and Active) and/or by different regions, Employee Status (Permanent/contractual) etc.

Like age-based pricing, tier-based pricing can be defined using pricing rule with tier-based pricing rule type You can set premium fee for set of parameters and tier level. Tier-based premium calculation algorithm which is configured in tier-based pricing rule type process the premium pricing for each membership based on the applicable rate for the parameters and tier value for that membership which is defined as membership characteristic.

### Tier Based Pricing Example

Tier	Location/Rating Area	Premium
Employee Only	N. California	\$200
	S. California	\$210
Employee + Spouse	N. California	\$300
	S. California	\$310
Family	N. California	\$450

Tier	Location/Rating Area	Premium
	S. California	\$500

Example : North California Based Employee John Doe, a 45 years old smoker who enrolled himself with his spouse Mary Doe (Age 40) and daughter Elsa Doe aged 13 the premium charged will be \$450 per month.

### State Level Configurations

Various state specific rules are defined in ORMB using state specific characteristics e.g. Gift Days to provide no additional premium when New Born is enrolled into the plan or various rules such as maximum dependents to be covered etc. The state and state characteristics can be defined state specific parameters. These parameters which define business rules may have overridden values at Plan or Membership levels. ORMB pricing calculation always checks for the parameters at membership and plan level first, if not found then the state level parameters are considered for the price calculations.

### Premium Holiday and Proration

ORMB provides several options for correctly handling of proration; when a rate changes in middle of a billing period or when new Membership is added or terminated during the bill period. Configurable Proration Rule allows to define various options such as; mid-month proration where full premium is applicable if the membership starts before mid-coverage or proration based on covered days etc.

A configuration option can be set to handle special cases where proration is not to be applied even during a long or short bill period (e.g. when a flat charge is to be applied in full; even though the billing period is half of the standard period).

ORMB allows configuring or uploading the period for which premium holiday or waive off of premium needs to be given to the membership, based on which the premium is waived off, the rate configurations allow you to provide these details on the bill lines providing the required transparency to the customer.

### Self-funded Pricing

ORMB provides you with a complete solution in terms of pricing, billing and revenue management to support ASO plans and also to provide risk coverage of offering self-funded plans through the stop loss or re-insurance services.

### Claim Amount Processing

ORMB provides capability to calculate the final claim amount to be charged to the customer by summing up all the claim line items configured as billable for the customer. It also provides a facility to mark up or markdown these line items amounts as per customer specific pricing. You can also define the capping amounts per claim.

In order to support new '**Payments Integrity model**' ORMB enables you to define **the additional fees i.e. recovery fees / savings amounts** to be calculated as **flat or percentage based** on the claim charges and charge the same to the customers along with **Max / Min capping amounts**

ORMB allows you to define pricing rules, having different pricing strategy based on policy status e.g. **during the active policy period various chargeable items** like consumer driven health insurance charges, traditional health insurance charges, **are charged to the customer** whereas during **post runout period the entire claim amount will be written off.**

To enable easy configurations ORMB provides you a capability to define **claim templates** and with definition of multiple add-on fees and its usage with default pricing. Using a file upload utility or other custom process the claim transactions can be uploaded to ORMB.

Claim transactions contain information about the membership and details of various claim line items such as **ASO service provider charges, fee for network access, fee for non-network access, fee for collection services provided by external vendor, fee for hospital audit performed by external vendor**, and so on.

ORMB allows the ASO service provider to bill employers for claim amount and various additional fees based on the pricing defined. Claim pricing rules can be defined at the parent customer and bill group levels. Claim pricing rule enables you to define whether a particular claim line item should be billable to the customer or should be written off. Eligibility for billing can be defined based on rules using the transaction attributes.

### Retention fee – Claim based

**Retention fee is based upon claim amount either the percentage of claim or flat amount per claim** transaction can also be calculated. ORMB provides you an ability to select the Claim line items eligible for claim based fees calculations. Claim based fees pricing can **vary based on either membership attributes or based on the claim transaction attributes** e.g. different claim based fees can be charged for claim with health coverage class as ‘Medical’ than that of the ‘Dental’

### Retention fee – Enrollment based

In order to calculate fees / premium amount / various limits (e.g. ASL Limit based on the enrollments), ORMB provides out of box pricing rule type – retention fee – enrollment based. Enrollment based pricing rules can be defined at both customer or bill group level where, enrollment fees are defined as per member or per subscriber charges where **pricing variation can be provided based on parameters e.g. coverage tier or health coverage class(HCC) etc.** It also calculates the retention fee based upon enrollment count.

### Flat and Recurring Fees

Ad-hoc one time fees (e.g. one time admin fees), recurring premium fees / charges e.g. charge the stop loss premium can be defined in ORMB using the flat and recurring fees pricing rule type. These types of charges are independent of no. of enrollments or claims and are charged as a flat fee per month over a period of time. ORMB provides flexibility to set up pricing rules for charging flat / one time fees or flat recurring fees with configurable recurring frequencies e.g. claim funds.

### Ancillary fees

Ancillary service charges are basically an adjustments charge which are either pre-calculated charges which need to be included into the bill or to be calculated based on the utilization of the ancillary services Ancillary pricing rule can be defined at the parent customer and bill group levels. The ancillary in ORMB enables you to create an ancillary charge in either of the following ways:

- As **pass through charge without markup or markdown** (i.e. flat charge)
- As **pass through charge** where ORMB adds a **flat or percentage based markup or markdown** to charge the customer
- Or by creating a **rate based charge** using the rate defined in the ancillary pricing and the service quantity specified in the ancillary transaction. You can also apply markup or markdown to a rate based charge

### Specific Stop Loss (SSL)

SSL is the form of excess risk coverage that provides protection for the **employer against a high claim on any one individual**. ORMB provides a pricing rule type – specific stop loss to support SSL calculations. SSL pricing rules are defined at two levels – parent level defines all the accumulation specific details which are common for all the bill groups and bill group – policy level pricing to define the limits and also **information about which charges are to be re-insured against SSL**. ORMB provides **complete flexibility** to define the **accumulation criteria** e.g. you can choose to calculate SSL only on the medical claims, out of network claim, etc. based on configurations. Ability to calculate and invoice the specific stop loss based on per subscriber or per member basis with a **facility to laser or excludes the subscribers / members**. ORMB’s flexible accumulation criteria definitions allow you to define SSL pricing for various types of policies -12/12 or 15/12 or 12/15 with ease. With ORMB you can choose the settlement frequency for the SSL

ORMB enables you to setup **SSL retrospectively or allow pricing updates by reprocessing**

### Aggregated Stop Loss (ASL)

ORMB enables you to provide a **ceiling on the dollar amount of eligible expenses** that an employer would pay, **in total for all members or subscribers**, during a contract period. **ASL limit** can be configured **as either flat limit or based on the PSPM (Per subscriber per month) basis or enrollment based**. Similar to SSL, ASL pricing rules **enables to define eligibility rules for the transactions and claim line items** for the calculations of ASL. With ORMB you can choose the settlement frequency for the ASL. ORMB enables you to setup **ASL retrospectively or allow pricing updates by reprocessing**

### Discount Arrangements Fees

ORMB discount arrangement pricing rule type enables to calculate and bill the discounts using two different methods – i.e: **discount share Fees** where discount amount to be charged to customer is calculated as percentage of the total

discount savings amount per claim and **discount guarantee** Fees where discount amount calculated based **on discount savings amount and guaranteed percentage of the covered amount**.

Pricing Rule type allows you to define maximum discount amount that can be charged per claim transaction and/or allow to configure the **minimum and maximum discount limit on the contract level**. It also allows defining the **rule based eligibility criteria to apply discount** and exclude few transactions based upon the parameters.

#### Level Funding Arrangements

ORMB level funding pricing rule type allows defining the required setup for monthly contribution mechanism which can be a **fixed monthly amount** or amount based upon enrollment **count**. ORMB enables you to collect the funds during **active policy period** to settle not only the claims and other fees during active period but also to take care of the **terminal liability** or the **claims and other fees during runout period**. ORMB also provides configurable setup to define the charges to be considered for settlement with specific criteria. ORMB enables to setup pricing rules for level funding products where the **claims, ancillary, retention based fees, discounts** can be settled against the level funded amounts.

ORMB has two variations of level funding based on the method to calculate premium fund. The portal enables you to define whether the price items included in the claim, retention type claim based, retention type enrollment based, ancillary, and discount pricing rule types are eligible for level funding. If the price items are eligible for level funding, you can then include them in the level funding pricing rule type indicating that the charges for these price items will not be included in the respective billable charge (for example, claim billable charge), but it would be settled against the funds billable charge. While adjusting such charges against the funds billable charge, there might be some **surplus or deficit** in funds at the time of settlement which is ideally at the end of year. In such case, the system enables to configure whether **a flat amount or percentage of surplus should be retained** by the ASO provider or whether a flat amount or percentage of deficit is offered as a discount to the self-funded employer. It allows you for different settlement options – **Close out – where the final settlement is done**. In case the customer is continuing for the next cycle with the payer you can provide an option to **Roll Forward the surplus funds to the next years funds**.

#### Level Funding Arrangements

ORMB level funding pricing rule type allows defining the required setup for monthly contribution mechanism which can be a **fixed monthly amount** or amount based upon enrollment **count**. ORMB enables you to collect the funds during **active policy period** to settle not only the claims and other fees during active period but also to take care of the **terminal liability** or the **claims and other fees during runout period**. ORMB also provides configurable setup to define the charges to be considered for settlement with specific criteria. ORMB enables to setup pricing rules for level funding products where the **claims, ancillary, retention based fees, discounts** can be settled against the level funded amounts.

ORMB has two variations of level funding based on the method to calculate premium fund. The portal enables you to define whether the price items included in the claim, retention type claim based, retention type enrollment based, ancillary, and discount pricing rule types are eligible for level funding. If the price items are eligible for level funding, you can then include them in the level funding pricing rule type indicating that the charges for these price items will not be included in the respective billable charge (for example, claim billable charge), but it would be settled against the funds billable charge. While adjusting such charges against the funds billable charge, there might be some **surplus or deficit** in funds at the time of settlement which is ideally at the end of year. In such case, the system enables to configure whether **a flat amount or percentage of surplus should be retained** by the ASO provider or whether a flat amount or percentage of deficit is offered as a discount to the self-funded employer. It allows you for different settlement options – **Close out – where the final settlement is done**. In case the customer is continuing for the next cycle with the payer you can provide an option to **Roll Forward the surplus funds to the next years funds**.

## Parameter

---

The pricing for a price item may differ depending upon various transaction, person, account, or product attributes. Oracle Revenue Management and Billing provides a facility to define pricing for a price item based on multiple parameters. In addition, you can define the pricing, price list, and product eligibility criteria using one or more parameters.

Each parameter must be mapped to the following:

- **Source Entity** - Indicates the entity from where the parameter value is derived. A source entity can be account, person, product, transaction, service quantity identifier, or an algorithm.

- **Source Type** - Indicates the type of source from where the parameter value is derived. A source type can be field, characteristic, usage amount, or usage counter.
- **Source Type Code** - Indicates the source (such as, field, characteristic, usage amount, usage counter, SQL, or algorithm) from where the parameter value is derived.

The system allows you to define the following types of parameters:

- **Adhoc** - Used to store an adhoc value.
- **Predefined** - Used to store a predefined value. For example, you can create a parameter named **Country** where the value type is set to **Predefined** and the following predefined values are added in the parameter:

Parameter Value	Description
AUT	Austria
AUS	Australia
CAN	Canada
CHN	China

In such case, while defining the pricing for a price item using the **Country** parameter, you can use any one of the above mentioned parameter values.

Another example, you can create a parameter named **Health Coverage Class** where the value type is set to **Predefined** and the following predefined values are added in the parameter:

Parameter Value	Description
MEDICAL	Medical
DENTAL	Dental
VISION	Vision

In such case, while defining the pricing for a price item using the **Health Coverage Class** parameter, you can use any one of the above mentioned parameter values.

- **Reference** - Used to store a value which is already present in a table. For example, you can create a parameter named **Country** where the value type is set to **Reference** and the reference entity is set to **CI\_COUNTRY\_L** (i.e. where the description of all countries is stored). In such case, while defining the pricing for a price item using the **Country** parameter, you can specify a country which is present in the **CI\_COUNTRY\_L** table in the parameter value.

## Parameter (Used for Searching)

The **Parameter** screen allows you to define, edit, delete and copy a parameter. It contains the following zone:

- [Search Parameter](#) on page 669

### Search Parameter

The **Search Parameter** zone allows you to search for a parameter using various search criteria. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Parameter	Used to search a particular parameter.	No

Field Name	Field Description	Mandatory (Yes or No)
Value Type	Used to search parameters in which you can store a particular type of value. The valid values are: <ul style="list-style-type: none"> <li>• Adhoc</li> <li>• Predefined</li> <li>• Reference</li> </ul>	No
Source Entity	Used to search parameters whose value is derived from a particular entity. The valid values are: <ul style="list-style-type: none"> <li>• Account</li> <li>• Algorithm</li> <li>• Benefit</li> <li>• Membership</li> <li>• Membership Person</li> <li>• Person</li> <li>• Plan</li> <li>• Product</li> <li>• Service Quantity Identifier</li> <li>• State</li> <li>• Transaction</li> </ul>	No
Source Type	Used to search parameters whose value is derived from a particular type of source. The valid values are: <ul style="list-style-type: none"> <li>• Characteristic</li> <li>• Field</li> <li>• Usage Amount</li> <li>• Usage Counter</li> </ul>	No
Description	Used to search parameters with a particular description.	No

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Parameter	Displays the parameter name.
Value Type	Indicates the type of value that you can store in the parameter. The valid values are: <ul style="list-style-type: none"> <li>• Adhoc</li> <li>• Predefined</li> <li>• Reference</li> </ul>
Description	Displays the description of the parameter.

Column Name	Column Description
Source Entity	Indicates the entity from where the parameter value is derived. The valid values are: <ul style="list-style-type: none"> <li>• Account</li> <li>• Algorithm</li> <li>• Benefit</li> <li>• Membership</li> <li>• Membership Person</li> <li>• Person</li> <li>• Plan</li> <li>• Product</li> <li>• Service Quantity Identifier</li> <li>• State</li> <li>• Transaction</li> </ul>
Source Type	Indicates the type of source from where the parameter value is derived. The valid values are: <ul style="list-style-type: none"> <li>• Characteristic</li> <li>• Field</li> <li>• Usage Amount</li> <li>• Usage Counter</li> </ul>
View	On clicking the <b>View</b> (  ) icon, the <b>Parameter</b> screen appears where you can view the details of the parameter.
Edit	On clicking the <b>Edit</b> (  ) icon, the <b>Parameter</b> screen appears where you can edit the details of the parameter.
Delete	On clicking the <b>Delete</b> (  ) icon, you can delete the parameter. <div style="border: 1px solid black; padding: 5px; margin-top: 5px;"> <p><b>Note:</b></p> <p>You can delete a parameter when the following conditions are met:</p> <ul style="list-style-type: none"> <li>• It is not yet associated to any price item or price item bundle.</li> <li>• It is not yet used while defining the pricing, price list, or product eligibility criteria.</li> </ul> </div>
Duplicate	On clicking the <b>Duplicate</b> (  ) icon, the <b>Parameter</b> screen appears where you can define a new parameter using an existing parameter.

**Note:** Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

## Searching for a Parameter

### Procedure

To search for a parameter:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **P** and then click **Parameter**.  
The **Parameter** screen appears.
3. Enter the search criteria in the **Search Parameter** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

4. Click **Search**.  
A list of parameters that meet the search criteria appears in the **Search Results** section.

## Defining a Parameter

### Prerequisites

To define a parameter, you should have:

- Validation algorithm defined using the **C1\_PPARM\_VAL** algorithm type (in case you want to validate an adhoc parameter value)
- An algorithm defined using the **C1-PPARM-ENT** algorithm type (in case you want to use the algorithm while validating the pricing eligibility criteria)

**Note:**

A sample algorithm type named **C1\_PPARM\_VAL** is shipped with the product. At present, it allows you to specify any special characters except ampersand (&), comma (,), underscore (\_), equal to (=), tilde (~), and semi-colon(;), in the parameter value.

A sample algorithm type named **C1-PPARM-ENT** is shipped with the product. At present, it returns a boolean value true. You can build custom logic in this algorithm which returns a value. This value can then be compared against the parameter value specified in the pricing eligibility criteria.

**Procedure**

To define a parameter:

1. Click the **Admin** link in the **Application** toolbar.

A list appears.

2. From the **Admin** menu, select **P** and then click **Parameter**.

The **Parameter** screen appears.

3. Click the **Add** button in the **Page Title** area of the **Parameter** screen.

The **Parameter** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Parameter	Used to specify the parameter name.  <b>Note:</b> You cannot specify any special character except underscore (_) in the parameter name.	Yes
Source Entity	Used to indicate the entity from where the parameter value should be derived. The valid values are: <ul style="list-style-type: none"> <li>• Account</li> <li>• Algorithm</li> <li>• Benefit</li> <li>• Membership</li> <li>• Membership Person</li> <li>• Person</li> <li>• Plan</li> <li>• Product</li> </ul> <b>Note:</b> This option is not applicable for the health insurance business. <ul style="list-style-type: none"> <li>• Service Quantity Identifier</li> <li>• State</li> <li>• Transaction</li> </ul>	Yes
Description	Used to specify the description for the parameter.	Yes

Field Name	Field Description	Mandatory (Yes or No)															
Source Type	<p>Used to indicate the type of source from where the parameter value should be derived. The valid values are:</p> <ul style="list-style-type: none"> <li>• Characteristic</li> <li>• Field</li> <li>• Usage Amount</li> <li>• Usage Counter</li> </ul> <p><b>Note:</b></p> <p>This field appears when the <b>Account</b>, <b>Person</b>, or <b>Product</b> option is selected from the <b>Source Entity</b> list.</p> <p>The <b>Usage Amount</b> and <b>Usage Counter</b> options do not appear in the <b>Source Type</b> list when the <b>Product</b> option is selected from the <b>Source Entity</b> list.</p>	Yes

Source Entity	Source Type	Source Type Code																								
Product	Field	Lists all fields of the <b>CI_PRODUCT</b> table.  <div style="border: 1px solid black; padding: 2px;"> <p><b>Note:</b> This option is not applicable for the health insurance business.</p> </div>																								
Plan	Characteristic	Lists all characteristics where the characteristic entity is set to <b>Plan</b> .																								
Plan	Field	Lists all fields of the <b>CI_POLICY_PLAN</b> table.																								
Service Quantity Identifier	—	Lists all service quantity identifiers available in the <b>CI_SQI</b> table.																								
State	Characteristic	Lists all characteristics where the characteristic entity is set to <b>State</b> .																								
State	Field	Lists all fields of the <b>CI_STATE</b> table.																								
Algorithm	—	Lists all algorithms which are defined using the <b>CI-PPARM-ENT</b> algorithm type.																								
Validation Algorithm	<p>Used to indicate the algorithm using which you want to validate the adhoc parameter value.</p> <p><b>Note:</b></p> <p>This field appears when the <b>Adhoc</b> option is selected from the <b>Value Type</b> list.</p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Validation Algorithm</b> field. On clicking the <b>Search</b> icon, the <b>Algorithm Search</b> window appears.</p>	No																								

Field Name	Field Description	Mandatory (Yes or No)
Reference Entity	Used to indicate the table whose primary key (column) you want to set as the reference entity.  <b>Note:</b> This field appears only when the <b>Reference</b> option is selected from the <b>Value Type</b> list.  The <b>Search</b> (🔍) icon appears corresponding to the <b>Reference Entity</b> field. On clicking the <b>Search</b> icon, the <b>Reference Table Search</b> window appears.  You can only specify a language table, where the <b>DESCR</b> column is available, in the <b>Reference Entity</b> field.	Yes
Field Name	Indicates the column which is the primary key of the table. The parameter value is then validated against the primary column of the table.  <b>Note:</b> This field appears when the <b>Reference</b> option is selected from the <b>Value Type</b> list.	Not applicable

In addition, this screen contains the following two sections:

- **Parameter Values** - Used to define predefined values for the parameter. It contains the following fields in the grid:

Field Name	Field Description	Mandatory (Yes or No)
Parameter Value	Used to specify the parameter value.  <b>Note:</b> You can specify any special characters except ampersand (&), comma (,), underscore (_), equal to (=), tilde (~), and semi-colon(;) in the predefined parameter value.	Yes
Description	Used to specify the description for the parameter value.	Yes

**Note:**

The **Parameter Values** section appears when the **Predefined** option is selected from the **Value Type** list. At least one parameter value should be defined for a parameter where the value type is set to **Predefined**.

If you want to define more than one predefined value for the parameter, click the **Add** (+) icon and then specify the details. However, if you want to remove a predefined value of the parameter, click the **Delete** (🗑️) icon corresponding to the parameter value.

- **Parameter Usage** - Used to indicate where the parameter can be used in the system. It contains the following options:

Option Name	Option Description	Mandatory (Yes or No)																
Price Item	Used to indicate whether the parameter can be associated with a price item or price item bundle. If a parameter is associated with a price item or price item bundle, you can use the parameter while defining the price item pricing.	Yes (Conditional)																
	<p><b>Note:</b></p> <p>The following table lists the source entity and source type combinations when the <b>Price Item</b> option is disabled in the <b>Parameter Usage</b> section:</p> <table border="1" data-bbox="542 558 1263 810"> <thead> <tr> <th>Source Entity</th> <th>Source Type</th> </tr> </thead> <tbody> <tr> <td>Account</td> <td>Usage Amount</td> </tr> <tr> <td>Account</td> <td>Usage Counter</td> </tr> <tr> <td>Person</td> <td>Usage Amount</td> </tr> <tr> <td>Person</td> <td>Usage Counter</td> </tr> </tbody> </table> <p>The following table lists the source entity and source type combinations when the <b>Price Item</b> option does not appear in the <b>Parameter Usage</b> section:</p> <table border="1" data-bbox="542 947 1263 1100"> <thead> <tr> <th>Source Entity</th> <th>Source Type</th> </tr> </thead> <tbody> <tr> <td>Algorithm</td> <td>—</td> </tr> <tr> <td>Service Quantity Identifier</td> <td>—</td> </tr> </tbody> </table>	Source Entity	Source Type	Account	Usage Amount	Account	Usage Counter	Person	Usage Amount	Person	Usage Counter	Source Entity	Source Type	Algorithm	—	Service Quantity Identifier	—	<p><b>Note:</b> You must select this option when you want to associate the parameter with a price item.</p>
	Source Entity	Source Type																
Account	Usage Amount																	
Account	Usage Counter																	
Person	Usage Amount																	
Person	Usage Counter																	
Source Entity	Source Type																	
Algorithm	—																	
Service Quantity Identifier	—																	
Pricing Eligibility Criteria	Used to indicate whether the parameter can be used while defining the pricing eligibility criteria.	Yes (Conditional)																
	<p><b>Note:</b> This option does not appear when the <b>Transaction</b> option is selected from the <b>Source Entity</b> list.</p>	<p><b>Note:</b> You must select this option when you want to define a pricing eligibility criteria using the parameter.</p>																
Price List Eligibility Criteria	Used to indicate whether the parameter can be used while defining the price list eligibility criteria.	Yes (Conditional)																
	<p><b>Note:</b></p> <p>This option does not appear when the <b>Transaction</b> option is selected from the <b>Source Entity</b> list.</p> <p>This option is not applicable for the health insurance business.</p>	<p><b>Note:</b> You must select this option when you want to define a price list eligibility criteria using the parameter.</p>																

Option Name	Option Description	Mandatory (Yes or No)
Product Eligibility Criteria	Used to indicate whether the parameter can be used while defining the product eligibility criteria.	Yes (Conditional)
	<p><b>Note:</b></p> <p>This option does not appear when the <b>Algorithm, Service Quantity Identifier</b>, or <b>Transaction</b> option is selected from the <b>Source Entity</b> list.</p> <p>This option is not applicable for the health insurance business.</p>	<p><b>Note:</b> You must select this option when you want to define a product eligibility criteria using the parameter.</p>
Rule Eligibility Criteria	Used to indicate whether the parameter can be used while defining the parameter based rule type.	Yes (Conditional)
	<p><b>Note:</b></p> <p>This option does not appear when the <b>Product, Service Quantity Identifier</b>, or <b>Transaction</b> option is selected from the <b>Source Entity</b> list.</p>	<p><b>Note:</b> You must select this option when you want to define a parameter based rule type.</p>

**Note:** You must select at least one option in the **Parameter Usage** section.

- Enter the required details in the **Parameter** screen depending on whether you want to create an adhoc, predefined, or reference parameter.
- Click **Save**.

The parameter is defined.

**Note:** If a parameter is already defined using the source entity, source type, and source type code combination, the system will not allow you to define another parameter with the same combination.

### Editing a Parameter

#### Prerequisites

To edit a parameter, you should have:

- Validation algorithm defined using the **C1\_PPARM\_VAL** algorithm type (in case you want to validate an adhoc parameter value)
- An algorithm defined using the **C1-PPARM-ENT** algorithm type (in case you want to use the algorithm while validating the pricing eligibility criteria)

**Note:**

A sample algorithm type named **C1\_PPARM\_VAL** is shipped with the product. At present, it allows you to specify any special characters except ampersand (&), comma (,), underscore (\_), equal to (=), tilde (~), and semi-colon(;) in the parameter value.

A sample algorithm type named **C1-PPARM-ENT** is shipped with the product. At present, it returns a boolean value true. You can build custom logic in this algorithm which returns a value. This value can then be compared against the parameter value specified in the pricing eligibility criteria.

**Procedure**

To edit a parameter:

1. Search for the parameter in the **Parameter** screen.
2. In the **Search Results** section, click the **Edit**  icon in the **Edit** column corresponding to the parameter whose details you want to edit.

The **Parameter** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Parameter	Used to specify the parameter name.	Yes
	<b>Note:</b> You cannot specify any special character except underscore (_) in the parameter name.	
Source Entity	Used to indicate the entity from where the parameter value should be derived. The valid values are: <ul style="list-style-type: none"> <li>• Account</li> <li>• Algorithm</li> <li>• Benefit</li> <li>• Membership</li> <li>• Membership Person</li> <li>• Person</li> <li>• Plan</li> <li>• Product</li> </ul>	Yes
	<b>Note:</b> This option is not applicable for the health insurance business. <ul style="list-style-type: none"> <li>• Service Quantity Identifier</li> <li>• State</li> <li>• Transaction</li> </ul>	
Description	Used to specify the description for the parameter.	Yes

Field Name	Field Description	Mandatory (Yes or No)															
Source Type	<p>Used to indicate the type of source from where the parameter value should be derived. The valid values are:</p> <ul style="list-style-type: none"> <li>• Characteristic</li> <li>• Field</li> <li>• Usage Amount</li> <li>• Usage Counter</li> </ul> <p><b>Note:</b></p> <p>This field appears when the <b>Account</b>, <b>Person</b>, or <b>Product</b> option is selected from the <b>Source Entity</b> list.</p> <p>The <b>Usage Amount</b> and <b>Usage Counter</b> options do not appear in the <b>Source Type</b> list when the <b>Product</b> option is selected from the <b>Source Entity</b> list.</p>	Yes															
Value Type	<p>Used to indicate the type of value that you want to store in the parameter. The valid values are:</p> <ul style="list-style-type: none"> <li>• Adhoc</li> <li>• Predefined</li> <li>• Reference</li> </ul>	Yes															
Source Type Code	<p>Used to indicate the source, such as field, characteristic, usage amount, usage counter, SQI, or algorithm, from where the parameter value should be derived.</p> <p><b>Note:</b></p> <p>This field does not appear when the <b>Transaction</b> option is selected from the <b>Source Entity</b> list.</p> <p>The following table indicates the values that are listed in the <b>Source Type Code</b> field depending on the source entity and source type combination:</p> <table border="1"> <thead> <tr> <th>Source Entity</th> <th>Source Type</th> <th>Source Type Code</th> </tr> </thead> <tbody> <tr> <td>Account</td> <td>Characteristic</td> <td>Lists all characteristics where the characteristic entity is set to <b>Account</b>.</td> </tr> <tr> <td>Account</td> <td>Field</td> <td>Lists all fields of the <b>CI_ACCT</b> table.</td> </tr> <tr> <td>Account</td> <td>Usage Amount</td> <td>Lists all values defined for the <b>BAL_FLG</b> lookup field.</td> </tr> <tr> <td>Account</td> <td>Usage Counter</td> <td>Lists all values defined for the <b>CNT_FLG</b> lookup field.</td> </tr> </tbody> </table>	Source Entity	Source Type	Source Type Code	Account	Characteristic	Lists all characteristics where the characteristic entity is set to <b>Account</b> . Pricing Eligibility Criteria	<p>Used to indicate whether the parameter can be used while defining the pricing eligibility criteria.</p> <p><b>Note:</b> This option does not appear when the <b>Transaction</b> option is selected from the <b>Source Entity</b> list.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> You must select this option when you want to define a pricing eligibility criteria using the parameter.</p>																
Price List Eligibility Criteria	<p>Used to indicate whether the parameter can be used while defining the price list eligibility criteria.</p> <p><b>Note:</b> This option does not appear when the <b>Transaction</b> option is selected from the <b>Source Entity</b> list. This option is not applicable for the health insurance business.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> You must select this option when you want to define a price list eligibility criteria using the parameter.</p>																

Option Name	Option Description	Mandatory (Yes or No)
Product Eligibility Criteria	Used to indicate whether the parameter can be used while defining the product eligibility criteria.	Yes (Conditional)
	<p><b>Note:</b></p> <p>This option does not appear when the <b>Algorithm, Service Quantity Identifier</b>, or <b>Transaction</b> option is selected from the <b>Source Entity</b> list.</p> <p>This option is not applicable for the health insurance business.</p>	<p><b>Note:</b> You must select this option when you want to define a product eligibility criteria using the parameter.</p>
Rule Eligibility Criteria	Used to indicate whether the parameter can be used while defining the parameter based rule type.	Yes (Conditional)
	<p><b>Note:</b></p> <p>This option does not appear when the <b>Product, Service Quantity Identifier</b>, or <b>Transaction</b> option is selected from the <b>Source Entity</b> list.</p>	<p><b>Note:</b> You must select this option when you want to define a parameter based rule type.</p>

**Note:** You must select at least one option in the **Parameter Usage** section.

3. Modify the required details in the **Parameter** screen.
4. Click **Save**.

The changes made to the parameter are saved.

### **Related Topics**

For more information on...	See...
How to search for a parameter	<a href="#">Searching for a Parameter</a> on page 672

### **Deleting a Parameter**

#### **Procedure**

To delete a parameter:

1. Search for the parameter in the **Parameter** screen.
2. In the **Search Results** section, click the **Delete** (🗑️) icon in the **Delete** column corresponding to the parameter that you want to delete.

A message appears confirming whether you want to delete the parameter.

**Note:**

You can delete a parameter when the following conditions are met:

- It is not yet associated to any price item or price item bundle.
- It is not yet used while defining the pricing, price list, or product eligibility criteria.

**3. Click OK.**

The parameter is deleted.

**Related Topics**

For more information on...	See...
How to search for a parameter	<a href="#">Searching for a Parameter</a> on page 672

**Copying a Parameter**

Instead of creating a parameter from scratch, you can define a new parameter using an existing parameter. This is possible through copying a parameter. When you copy a parameter, the predefined values, validation algorithm, and reference entity (depending upon the value type) are copied along with other parameter details. You can then edit the details, if required.

**Note:** You cannot change the type of value that you can store in the new parameter (which is created using an existing parameter).

**Prerequisites**

To copy a parameter, you should have:

- Parameter (whose copy you want to create) defined in the application
- Validation algorithm defined using the **C1\_PPARM\_VAL** algorithm type (in case you want to validate an adhoc parameter value)
- An algorithm defined using the **C1-PPARM-ENT** algorithm type (in case you want to use the algorithm while validating the pricing eligibility criteria)

**Note:**

A sample algorithm type named **C1\_PPARM\_VAL** is shipped with the product. At present, it allows you to specify any special characters except ampersand (&), comma (,), underscore (\_), equal to (=), tilde (~), and semi-colon(;) in the parameter value.

A sample algorithm type named **C1-PPARM-ENT** is shipped with the product. At present, it returns a boolean value true. You can build custom logic in this algorithm which returns a value. This value can then be compared against the parameter value specified in the pricing eligibility criteria.

**Procedure**

To copy a parameter:

1. Search for the parameter in the **Parameter** screen.
2. In the **Search Results** section, click the **Copy**  icon in the **Copy** column corresponding to the parameter whose copy you want to create.

The **Parameter** screen appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Parameter	Used to specify the parameter name.	Yes
	<b>Note:</b> You cannot specify any special character except underscore (_) in the parameter name.	
Source Entity	<p>Used to indicate the entity from where the parameter value should be derived. The valid values are:</p> <ul style="list-style-type: none"> <li>• Account</li> <li>• Algorithm</li> <li>• Benefit</li> <li>• Membership</li> <li>• Membership Person</li> <li>• Person</li> <li>• Plan</li> <li>• Product</li> </ul> <p><b>Note:</b> This option is not applicable for the health insurance business.</p> <ul style="list-style-type: none"> <li>• Service Quantity Identifier</li> <li>• State</li> <li>• Transaction</li> </ul>	Yes
Description	Used to specify the description for the parameter.	Yes
Source Type	<p>Used to indicate the type of source from where the parameter value should be derived. The valid values are:</p> <ul style="list-style-type: none"> <li>• Characteristic</li> <li>• Field</li> <li>• Usage Amount</li> <li>• Usage Counter</li> </ul> <p><b>Note:</b> This field appears when the <b>Account</b>, <b>Person</b>, or <b>Product</b> option is selected from the <b>Source Entity</b> list. The <b>Usage Amount</b> and <b>Usage Counter</b> options do not appear in the <b>Source Type</b> list when the <b>Product</b> option is selected from the <b>Source Entity</b> list.</p>	Yes

Field Name	Field Description	Mandatory (Yes or No)															
Value Type	Used to indicate the type of value that you want to store in the parameter. The valid values are: <ul style="list-style-type: none"> <li>• Adhoc</li> <li>• Predefined</li> <li>• Reference</li> </ul>	Yes															
Source Type Code	Used to indicate the source, such as field, characteristic, usage amount, usage counter, SQI, or algorithm, from where the parameter value should be derived. <p><b>Note:</b></p> <p>This field does not appear when the <b>Transaction</b> option is selected from the <b>Source Entity</b> list.</p> <p>The following table indicates the values that are listed in the <b>Source Type Code</b> field depending on the source entity and source type combination:</p> <table border="1"> <thead> <tr> <th>Source Entity</th> <th>Source Type</th> <th>Source Type Code</th> </tr> </thead> <tbody> <tr> <td>Account</td> <td>Characteristic</td> <td>Lists all characteristics where the characteristic entity is set to <b>Account</b>.</td> </tr> <tr> <td>Account</td> <td>Field</td> <td>Lists all fields of the <b>CI_ACCT</b> table.</td> </tr> <tr> <td>Account</td> <td>Usage Amount</td> <td>Lists all values defined for the <b>BAL_FLG</b> lookup field.</td> </tr> <tr> <td>Account</td> <td>Usage Counter</td> <td>Lists all values defined for the <b>CNT_FLG</b> lookup field.</td> </tr> </tbody> </table>	Source Entity	Source Type	Source Type Code	Account	Characteristic	Lists all characteristics where the characteristic entity is set to <b>Account</b> . Algorithm	—	Lists all algorithms which are defined using the <b>CI-PPARM-ENT</b> algorithm type.																								
Validation Algorithm	<p>Used to indicate the algorithm using which you want to validate the adhoc parameter value.</p> <p><b>Note:</b></p> <p>This field appears when the <b>Adhoc</b> option is selected from the <b>Value Type</b> list.</p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Validation Algorithm</b> field. On clicking the <b>Search</b> icon, the <b>Algorithm Search</b> window appears.</p>	No																								

Field Name	Field Description	Mandatory (Yes or No)
Reference Entity	Used to indicate the table whose primary key (column) you want to set as the reference entity.  <b>Note:</b> This field appears only when the <b>Reference</b> option is selected from the <b>Value Type</b> list.  The <b>Search</b> (🔍) icon appears corresponding to the <b>Reference Entity</b> field. On clicking the <b>Search</b> icon, the <b>Reference Table Search</b> window appears.  You can only specify a language table, where the <b>DESCR</b> column is available, in the <b>Reference Entity</b> field.	Yes
Field Name	Indicates the column which is the primary key of the table. The parameter value is then validated against the primary column of the table.  <b>Note:</b> This field appears when the <b>Reference</b> option is selected from the <b>Value Type</b> list.	Not applicable

In addition, this screen contains the following two sections:

- **Parameter Values** - Used to define predefined values for the parameter. It contains the following fields in the grid:

Field Name	Field Description	Mandatory (Yes or No)
Parameter Value	Used to specify the parameter value.  <b>Note:</b> You can specify any special characters except ampersand (&), comma (,), underscore (_), equal to (=), tilde (~), and semi-colon(;) in the predefined parameter value.	Yes
Description	Used to specify the description for the parameter value.	Yes

**Note:**

The **Parameter Values** section appears when the **Predefined** option is selected from the **Value Type** list. At least one parameter value should be defined for a parameter where the value type is set to **Predefined**.

If you want to define more than one predefined value for the parameter, click the **Add** (+) icon and then specify the details. However, if you want to remove a predefined value of the parameter, click the **Delete** (🗑️) icon corresponding to the parameter value.

- **Parameter Usage** - Used to indicate where the parameter can be used in the system. It contains the following options:

Option Name	Option Description	Mandatory (Yes or No)																
Price Item	<p>Used to indicate whether the parameter can be associated with a price item or price item bundle. If a parameter is associated with a price item or price item bundle, you can use the parameter while defining the price item pricing.</p> <p><b>Note:</b> The following table lists the source entity and source type combinations when the <b>Price Item</b> option is disabled in the <b>Parameter Usage</b> section:</p> <table border="1" data-bbox="542 558 1263 810"> <thead> <tr> <th>Source Entity</th> <th>Source Type</th> </tr> </thead> <tbody> <tr> <td>Account</td> <td>Usage Amount</td> </tr> <tr> <td>Account</td> <td>Usage Counter</td> </tr> <tr> <td>Person</td> <td>Usage Amount</td> </tr> <tr> <td>Person</td> <td>Usage Counter</td> </tr> </tbody> </table> <p>The following table lists the source entity and source type combinations when the <b>Price Item</b> option does not appear in the <b>Parameter Usage</b> section:</p> <table border="1" data-bbox="542 947 1263 1100"> <thead> <tr> <th>Source Entity</th> <th>Source Type</th> </tr> </thead> <tbody> <tr> <td>Algorithm</td> <td>—</td> </tr> <tr> <td>Service Quantity Identifier</td> <td>—</td> </tr> </tbody> </table>	Source Entity	Source Type	Account	Usage Amount	Account	Usage Counter	Person	Usage Amount	Person	Usage Counter	Source Entity	Source Type	Algorithm	—	Service Quantity Identifier	—	<p>Yes (Conditional)</p> <p><b>Note:</b> You must select this option when you want to associate the parameter with a price item.</p>

Service Quantity Identifier	—																	
Pricing Eligibility Criteria	<p>Used to indicate whether the parameter can be used while defining the pricing eligibility criteria.</p> <p><b>Note:</b> This option does not appear when the <b>Transaction</b> option is selected from the <b>Source Entity</b> list.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> You must select this option when you want to define a pricing eligibility criteria using the parameter.</p>																
Price List Eligibility Criteria	<p>Used to indicate whether the parameter can be used while defining the price list eligibility criteria.</p> <p><b>Note:</b> This option does not appear when the <b>Transaction</b> option is selected from the <b>Source Entity</b> list. This option is not applicable for the health insurance business.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> You must select this option when you want to define a price list eligibility criteria using the parameter.</p>																

Option Name	Option Description	Mandatory (Yes or No)
Product Eligibility Criteria	Used to indicate whether the parameter can be used while defining the product eligibility criteria.	Yes (Conditional)
	<p><b>Note:</b></p> <p>This option does not appear when the <b>Algorithm, Service Quantity Identifier</b>, or <b>Transaction</b> option is selected from the <b>Source Entity</b> list.</p> <p>This option is not applicable for the health insurance business.</p>	<p><b>Note:</b> You must select this option when you want to define a product eligibility criteria using the parameter.</p>
Rule Eligibility Criteria	Used to indicate whether the parameter can be used while defining the parameter based rule type.	Yes (Conditional)
	<p><b>Note:</b></p> <p>This option does not appear when the <b>Product, Service Quantity Identifier</b>, or <b>Transaction</b> option is selected from the <b>Source Entity</b> list.</p>	<p><b>Note:</b> You must select this option when you want to define a parameter based rule type.</p>

**Note:** You must select at least one option in the **Parameter Usage** section.

- Enter the required details in the **Parameter** screen depending on whether you want to create an adhoc, predefined, or reference parameter.
- Click **Save**.

The parameter is defined.

**Note:** If a parameter is already defined using the source entity, source type, and source type code combination, the system will not allow you to define another parameter with the same combination.

### Viewing the Parameter Details

#### Procedure

To view the details of a parameter:

- Search for the parameter in the **Parameter** screen.
- In the **Search Results** section, click the **View** () icon in the **View** column corresponding to the parameter whose details you want to view.

The **Parameter** screen appears.

- View the details of the parameter in the **Parameter** screen.

<b>Parameter</b> screen	<a href="#">Parameter (Used for Viewing)</a> on page 695
<b>Parameter</b> zone	<a href="#">Parameters</a> on page 742

**Parameter (Used for Viewing)**

The **Parameter** screen allows you to view the details of a parameter. It contains the following zone:

- [Parameter](#) on page 695

**Parameter**

The **Parameter** zone displays the details of the parameter. It contains the following sections:

- **Main** – Displays basic information about the parameter. It contains the following fields:

Field Name	Field Description
Parameter	Displays the parameter name.
Description	Displays the description of the parameter.
Value Type	Indicates the type of value that you can store in the parameter. The valid values are: <ul style="list-style-type: none"> <li>• Adhoc</li> <li>• Predefined</li> <li>• Reference</li> </ul>
Validation Algorithm	Indicates the algorithm which is used to validate the adhoc parameter value. <p><b>Note:</b> This field appears when the <b>Adhoc</b> option is selected from the <b>Value Type</b> list. It has a link. On clicking the link, the <b>Algorithm</b> screen appears where you can view the details of the respective algorithm.</p>
Referenced Table	Indicates the table whose primary key (i.e. column) is used to validate the parameter value. <p><b>Note:</b> This field appears when the <b>Reference</b> option is selected from the <b>Value Type</b> list. It has a link. On clicking the link, the <b>Table</b> screen appears where you can view the details of the respective table.</p>

Field Name	Field Description
Source Entity	<p>Indicates the entity from where the parameter value is derived. The valid values are:</p> <ul style="list-style-type: none"> <li>• Account</li> <li>• Algorithm</li> <li>• Benefit</li> <li>• Membership</li> <li>• Membership Person</li> <li>• Person</li> <li>• Plan</li> <li>• Product</li> <li>• Service Quantity Identifier</li> <li>• State</li> <li>• Transaction</li> </ul>
Source Type	<p>Indicates the type of source from where the parameter value is derived. The valid values are:</p> <ul style="list-style-type: none"> <li>• Characteristic</li> <li>• Field</li> <li>• Usage Amount</li> <li>• Usage Counter</li> </ul> <p><b>Note:</b> This field appears when the <b>Account, Benefit, Membership, Membership Person, Plan, , Person, Product</b> or <b>State</b> option is selected from the <b>Source Entity</b> list.</p>
Source Type Code	<p>Indicates the source, such as field, characteristic, usage amount, usage counter, SQI, or algorithm, from where the parameter value is derived.</p> <p><b>Note:</b> This field does not appear when the <b>Transaction</b> option is selected from the <b>Source Entity</b> list.</p>

- **Parameter Usage** – Indicates where the parameter can be used in the system. It contains the following options:

Option Name	Option Description						
Price Item	<p>Indicates whether the parameter can be associated with a price item or price item bundle. If a parameter is associated with a price item or price item bundle, you can use the parameter while defining the price item pricing.</p> <p>The following table lists the source entity and source type combinations when the <b>Price Item</b> option does not appear in the <b>Parameter Usage</b> section:</p> <table border="1"> <thead> <tr> <th>Source Entity</th> <th>Source Type</th> </tr> </thead> <tbody> <tr> <td>Algorithm</td> <td>—</td> </tr> <tr> <td>Service Quantity Identifier</td> <td>—</td> </tr> </tbody> </table>	Source Entity	Source Type	Algorithm	—	Service Quantity Identifier	—
Source Entity	Source Type						
Algorithm	—						
Service Quantity Identifier	—						

Option Name	Option Description
Pricing Eligibility Criteria	Indicates whether the parameter can be used while defining the pricing eligibility criteria.
	<b>Note:</b> This option does not appear when the <b>Transaction</b> option is selected from the <b>Source Entity</b> list.
Price List Eligibility Criteria	Indicates whether the parameter can be used while defining the price list eligibility criteria.
	<b>Note:</b> This option does not appear when the <b>Transaction</b> option is selected from the <b>Source Entity</b> list.
Product Eligibility Criteria	Indicates whether the parameter can be used while defining the product eligibility criteria.
	<b>Note:</b> This option does not appear when the <b>Algorithm, Service Quantity Identifier, or Transaction</b> option is selected from the <b>Source Entity</b> list.
Rule Eligibility Criteria	Indicates whether the parameter can be used while defining the parameter based rule type.
	<b>Note:</b> This option does not appear when the <b>Product, Service Quantity Identifier, or Transaction</b> option is selected from the <b>Source Entity</b> list.

- **Parameter Values** - Lists the predefined values of the parameter. It contains the following columns in the grid:

Column Name	Column Description
Parameter Value	Displays the parameter value.
Description	Displays the description of the parameter value.

**Note:** The **Parameter Values** section appears when the **Predefined** option is selected from the **Value Type** list.

<b>Parameter</b> screen	<a href="#">Parameter (Used for Viewing)</a> on page 695

## Price Item (Health Insurance Business)

The various charges that are to be charged to the customer (for example, premium or optional administration fees to a fully-insured group customer and claim based fees or enrollment based fees to a self-funded customer) are defined as price items in the system. Similarly, various charges credited to the customer are also defined as price items. Stop-loss arrangements for a self-funded customer (for example, specific stop-loss that is calculated and credited to customer) is represented using a price item in the system.

Once you define a price item, you can also define the pricing for the price item at various levels using pricing rules based on the requirements. For a fully-insured group customer, the pricing is defined at the policy plan level. Whereas, for a self-funded customer, the pricing can be defined either at the bill group policy level or at the parent customer level. For more information about the fully-insured pricing, see [Fully-Insured Pricing](#) on page 2937. And, for more information about the self-funded pricing, see [Self-Funded Pricing](#) on page 2379.

The system enables you to create price items which can be used for pricing and billing. It means that pricing can be defined for the price item and charges can be created against it in the system. The system enables you to create the following type of price items:

- **Fees Based Price Items** - The fees based services would include services on which fees is charged to the customers either annually or at regular intervals (for example, for the administrative services offered to the self-funded customer, the admin fees will be charged). You can create fees based price items which can be used for pricing and billing in the system.

You need to associate a contract type with a price item. The system allows you to create a charge (i.e. billable charge) for a price item on an account when a contract of the contract type which is associated with the price item is already present on the account.

You can create price items which can be assigned to any price list except global price list or which can assigned to only global price lists. For more information about global price list, see [Price List](#) on page 757.

You can associate one or more parameters where the parameter usage is set to **Price Item** with a price item. These parameters can then be used for:

- Aggregating transactions which are mapped to the price item
- Defining multi parameter based pricing for the price item

If the parameter usage is set to **Aggregation** while associating a parameter with a price item, the parameter is only used for aggregating transactions which are mapped to the price item. However, if the parameter usage is set to **Pricing** while associating a parameter with a price item, the parameter is used for aggregating transactions as well as for defining multi parameter based pricing for the price item.

You can associate a price item to one or more divisions. In addition, you can do the following when a price item is associated to a division:

- Associate the Service Quantity Identifiers (SQIs) with the Price Item for the Division
- Define the Division-Specific Characteristics for the Price Item

## Price Item (Used for Searching)

The **Price Item** screen allows you to search for a price item or price item bundle using various search criteria. It also allows you to create and copy a price item or price item bundle. It contains the following zone:

- [Search Price Item](#) on page 698

Through this screen, you can navigate to the following screens:

- [Price Item \(Used for Viewing\)](#) on page 740
- [Price Item Relationship](#)
- [Price Item Assignments](#)

### Search Price Item

The **Search Price Item** zone allows you to search for a price item or price item bundle using various search criteria. It contains the following two sections:

- **Search Criteria** – The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for a price item or price item bundle using the price item details. The valid value is: <ul style="list-style-type: none"> <li>• Price Item Details</li> </ul>	Yes
	<b>Note:</b> By default, the <b>Price Item Details</b> option is selected.	
Price Item	Used to search a particular price item or price item bundle.	No
Description	Used to search price items or price item bundles with a particular description.	No
Division	Used to search price items or price item bundles which are associated with a particular division.	No
	<b>Note:</b> You can only view those divisions to which you have access in the <b>Division</b> list.	
Global Price List	Used to search price items or price item bundles which can be assigned to a global price list. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	No
Price Item Usage	Used to search price items or price item bundles which is available for pricing or pricing and billing. The valid values are: <ul style="list-style-type: none"> <li>• Pricing</li> <li>• Pricing and Billing</li> </ul>	No
	<b>Note:</b> By default, the <b>Pricing and Billing</b> option is selected.	
Bundle	Used to indicate whether you want to search a price item bundle. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	No
Price Item Type	Used to search a particular type of price items or price item bundles. The valid values are: <ul style="list-style-type: none"> <li>• Fees</li> <li>• Rate</li> </ul>	No
	<b>Note:</b> This field appears when the <b>Pricing</b> option is selected from the <b>Price Item Usage</b> list.	

**Note:** You must specify at least one search criterion while searching for a price item or price item bundle.

- **Search Results** – On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Price Item Information	Displays information about the price item or price item bundle.
	<b>Note:</b> It has a link. On clicking the link, the <b>Price Item</b> screen appears where you can view the details of the respective price item or price item bundle.
Bundle Type	<p>Indicates the type of the price item bundle. If the price item bundle is available for pricing and billing, the valid values are:</p> <ul style="list-style-type: none"> <li>• Phantom</li> <li>• Ratio</li> <li>• Regular</li> </ul> <p>However, if the price item bundle is available for pricing and its price item type is set to <b>Fees</b>, the valid value is:</p> <ul style="list-style-type: none"> <li>• Regular</li> </ul>
Price Item Type	<p>Indicates the type of the price item or price item bundle. The valid values are:</p> <ul style="list-style-type: none"> <li>• Rate</li> <li>• Fees</li> </ul>
Price Item Usage	<p>Indicates whether the price item or price item bundle is available for pricing or pricing and billing. The valid values are:</p> <ul style="list-style-type: none"> <li>• Pricing</li> <li>• Pricing and Billing</li> </ul>
Duplicate	On clicking the <b>Duplicate</b> (  ) icon, the <b>Price Item</b> screen appears where you can create a new price item or price item bundle using an existing price item or price item bundle.
Price Item Assigned To	On clicking the <b>View</b> (  ) icon in the <b>Price Item Assigned To</b> column, the <b>Price Item Assignments</b> screen appears where you can view the persons, accounts, and active price lists to which the price item or price item bundle is assigned.
Price Item Relationship	On clicking the <b>View</b> (  ) icon in the <b>Price Item Relationship</b> column, the <b>Price Item Relationship</b> screen appears where you can view the list of the price items and price item bundles associated with the parent price item or added to the price item bundle.

**Note:** Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

## Searching for a Price Item or Price Item Bundle

### Prerequisites

To search for a price item or price item bundle, you should have:

- Divisions defined in the application
- Price items or price item bundles associated with the division to which the user (i.e. who is performing this action) belongs

### Procedure

To search for a price item or price item bundle:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Pricing Management** and then click **Price Item**.  
A sub-menu appears.
3. Click the **Search** option from the **Price Item** sub-menu.  
The **Price Item** screen appears.
4. Enter the search criteria in the **Search Price Item** zone depending on whether you want to search for a price item or price item bundle.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

5. Click **Search**.

A list of price items or price item bundles that meet the search criteria appears in the **Search Results** section.

### Related Topics

## Defining a Price Item or Price Item Bundle

### Prerequisites

To define a price item or price item bundle, you should have:

- Contract types, To Do types, and To Do roles defined in the application
- To Do roles associated with the required To Do type
- Value defined for the **Default Contract Type** option type in the **C1\_PRICING** feature configuration

### **Procedure**

To define a price item or price item bundle:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Pricing Management** and then click **Price Item**.

A sub-menu appears.

3. Click the **Add** option from the **Price Item** sub-menu.

The **Price Item** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the price item or price item bundle.
- **Parameters** - Used to associate a parameter with the price item or price item bundle. These associated parameters are then used for aggregating transactions and/or for defining the price item pricing.

#### **Note:**

The **Parameters** section appears in the **Price Item** screen when the **Multi Price Parameter** option type of the **C1\_PPARM\_FLG** feature configuration is set to **True**.

You cannot associate parameters to the ratio and phantom price item bundles. Therefore, while defining a ratio or phantom price item bundle, the **Parameters** section does not appear in the **Price Item** screen.

- **Divisions** - Used to associate the price item or price item bundle with one or more divisions. In addition, it enables you to:
  - Associate the Service Quantity Identifiers (SQIs) with the Price Item or Price Item Bundle for a Division
  - Define the Accrual Type Criteria of the Price Item or Price Item Bundle for a Division

**Note:** This step is not applicable for the health insurance business.

- Associate the Price Item or Price Item Bundle with a Hierarchy Entity in an Entity Hierarchy Relationship of a Division

**Note:** This step is not applicable for the health insurance business.

- Define the Cost of the Price Item or Price Item Bundle for a Division

**Note:** This step is not applicable for the health insurance business.

- Define the Average Price Floor and Ceil Limits of the Price Item or Price Item Bundle for a Division

**Note:** This step is not applicable for the health insurance business.

- Define the Negotiability Floor and Ceil Values of the Price Item or Price Item Bundle for a Division

**Note:** This step is not applicable for the health insurance business.

- Define the Division-Specific Characteristics for the Price Item or Price Item Bundle

- **Price Item Characteristics** - Used to define characteristics (which are applicable across divisions) for the price item or price item bundle.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Price Item	Used to specify the price item or price item bundle.	Yes
Description	Used to specify the description for the price item or price item bundle.	Yes
Price Item Usage	<p>Used to indicate whether the price item or price item bundle is available for pricing or pricing and billing. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Pricing</b> - Used when you want to define pricing for the price item or price item bundle, but no charges should be created against it in the system.</li> </ul> <div style="border: 1px solid black; padding: 2px; margin: 5px 0;"> <p><b>Note:</b> This option is not applicable for the health insurance business.</p> </div> <ul style="list-style-type: none"> <li>• <b>Pricing and Billing</b> - Used when you want to define pricing and create charges for the price item or price item bundle in the system.</li> </ul> <div style="border: 1px solid black; padding: 2px; margin: 5px 0;"> <p><b>Note:</b> By default, the <b>Pricing and Billing</b> option is selected.</p> </div>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Price Item Type	<p>Used to indicate the type of the price item or price item bundle. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Rate</b> - Used when you want to create a rate based price item or price item bundle. For example, savings, current, and loan interest services (i.e. price items) are rate based price items.</li> </ul> <div style="border: 1px solid black; padding: 5px; margin: 5px 0;"> <p><b>Note:</b> This option is not applicable for the health insurance business.</p> </div> <ul style="list-style-type: none"> <li>• <b>Fees</b> - Used when you want to create a fee based price item or price item bundle. For example, debit credit service (i.e. price item) is a fee based price item.</li> </ul> <div style="border: 1px solid black; padding: 5px; margin: 5px 0;"> <p><b>Note:</b> This field appears when the <b>Pricing</b> option is selected from the <b>Price Item Usage</b> list. By default, the <b>Fees</b> option is selected. You cannot create a price item bundle when the <b>Pricing</b> option is selected from the <b>Price Item Usage</b> list and <b>Rate</b> option is selected from the <b>Price Item Type</b> list. The system automatically sets the price item type of those price items or price item bundles which are available for pricing and billing to <b>Fees</b>. Therefore, this field does not appear when the <b>Pricing and Billing</b> option is selected from the <b>Price Item Usage</b> list.</p> </div>	Yes
Bundle	<p>Used to indicate whether you want to create a price item bundle. The valid values are:</p> <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul> <div style="border: 1px solid black; padding: 5px; margin: 5px 0;"> <p><b>Note:</b> By default, the <b>No</b> option is selected. This field is not applicable for the health insurance business.</p> </div>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Bundle Type	<p>Used to indicate the type of the price item bundle. If the <b>Pricing and Billing</b> option is selected from the <b>Price Item Usage</b> list, the valid values are:</p> <ul style="list-style-type: none"> <li>• <i>Phantom</i></li> <li>• <i>Ratio</i></li> <li>• <i>Regular</i></li> </ul> <p>However, if the <b>Pricing</b> option is selected from the <b>Price Item Usage</b> list and the <b>Fees</b> option is selected from the <b>Price Item Type</b> list, you can only define a regular price item bundle. Therefore, by default, the value is set to <b>Regular</b>.</p>	Yes (Conditional)
	<p><b>Note:</b></p> <p>This field appears when the <b>Yes</b> option is selected from the <b>Bundle</b> list.</p> <p>This field is enabled when the <b>Pricing and Billing</b> option is selected from the <b>Price Item Usage</b> list and the <b>Yes</b> option is selected from the <b>Bundle</b> list.</p> <p>You cannot define a price item bundle when the <b>Pricing</b> option is selected from the <b>Price Item Usage</b> list and <b>Rate</b> option is selected from the <b>Price Item Type</b> list.</p> <p>This field is not applicable for the health insurance business.</p>	<p><b>Note:</b> This field is required when you are creating a price item bundle.</p>
Global Price List	<p>Used to indicate whether the price item or price item bundle can be assigned to a global price list. The valid values are:</p> <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul> <p><b>Note:</b> By default, the <b>No</b> option is selected.</p>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Contract Type	<p>Used to indicate the contract type that you want to associate with the price item or price item bundle.</p> <p><b>Note:</b></p> <p>This field appears when the <b>Pricing and Billing</b> option is selected from the <b>Price Item Usage</b> list.</p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Contract Type</b> field. On clicking the <b>Search</b> icon, the <b>Contract Type Search</b> window appears.</p>	Yes
Price Item Manager To Do Type	<p>Used to indicate the To Do type using which a To Do should be created when the deal creator or approver requests the price item manager (i.e. clicks the <b>Send Price Items for Approval</b> button) to approve the average price for the price item or price item bundle offered in a deal.</p> <p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Price Item Manager To Do Type</b> field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.</p> <p>On specifying the To Do type, the description of the To Do type appears corresponding to the <b>Price Item Manager To Do Type</b> field.</p> <p>This field is not applicable for the health insurance business.</p>	No
Price Item Manager To Do Role	<p>Used to indicate that users with the specified To Do role can approve the average price for the price item or price item bundle offered in a deal. Note that the price item manager can approve the average price when it is within the average price floor and ceil limits defined for the To Do role.</p> <p><b>Note:</b></p> <p>The list appears when the price item manager To Do type is selected from the respective field. It includes only those To Do roles which are associated with the price item manager To Do type.</p> <p>This field is not applicable for the health insurance business.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required when the price item manager To Do type is specified for the price item or price item bundle.</p>

Field Name	Field Description	Mandatory (Yes or No)
Average Price Floor and Ceil Type	Used to indicate the manner in which you want to define the average price floor and ceil limits for the price item or price item bundle. The valid value is:	Yes (Conditional)
	<ul style="list-style-type: none"> <li>• <b>Absolute Value Range</b> - Used when you want to define the average price floor and ceil limits in the absolute values. For example, the average price for the price item or price item bundle should be between 10\$ to 15\$.</li> <li>• <b>Spread Amount</b> - Used when you want to define the average floor and ceil limits based on the spread amount.</li> <li>• <b>Spread Percentage</b> – Used when you want to define the average floor and ceil limits based on the spread percentage.</li> </ul>	<p><b>Note:</b> This field is required when you are defining the average price floor and ceil limits of the price item or price item bundle for a division.</p>
<p><b>Note:</b></p> <ul style="list-style-type: none"> <li>• In case of <b>Spread Amount</b> and <b>Spread Percentage</b> options, the system calculates the average price of a price item and based on the average price and the spread amount or spread percentage, the average floor and ceil limits are derived.</li> <li>• This field is not applicable for the health insurance business.</li> </ul>		

**Tip:** Alternatively, you can access the **Price Item** screen by clicking the **Add** button in the **Page Title** area of the **Price Item** screen.

4. Enter the required details in the **Main** section.
5. Associate the parameters with the price item or price item bundle, if required.
6. For each predefined parameter which is associated with the price item or price item bundle, you can define a set of valid predefined parameter values for the price item or price item bundle, if required.
7. Associate the price item or price item bundle with the required divisions.
8. Associate the SQIs with the price item or price item bundle for the required divisions.
9. Define the accrual type criteria of the price item or price item bundle for the required divisions.

**Note:** This step is not applicable for the health insurance business.

10. Associate the price item or price item bundle with a hierarchy entity in an entity hierarchy relationship of the required divisions.

**Note:** This step is not applicable for the health insurance business.

11. Define the cost of the price item or price item bundle for the required divisions.

**Note:** This step is not applicable for the health insurance business.

12. Define the average price floor and ceil limits of the price item or price item bundle for the required divisions.

**Note:** This step is not applicable for the health insurance business.

13. Define the negotiability floor and ceil values of the price item or price item bundle for the required divisions.

**Note:** This step is not applicable for the health insurance business.

14. Define the division-specific characteristics for the price item or price item bundle, if required.

15. Define the characteristics for the price item or price item bundle, if required.

16. Click **Save**.

The price item is defined.

**Note:** While creating a price item or price item bundle which is available for pricing, the contract type specified in the **Default Contract Type** option type of the **C1\_PRICING** feature configuration is automatically associated to the price item or price item bundle.

### **Associating a Parameter with a Price Item or Price Item Bundle**

You can define multi parameter based pricing for a price item or price item bundle when the parameters using which you want to define the price item pricing are associated with the respective price item or price item bundle during the

pricing date range. For example, a bank (from the financial services domain) may want to charge different price for the following price item depending on the return codes:

Service	Price Item	Parameter	Parameter Value	Price
SEPA Direct Debit Return	SEPADDR	Return Code (RTURNCD)	AC01	0.1\$
			AC04	0.2\$
			AC06	0.3\$
			AG01	0.10\$

In such case, you need to first define a predefined parameter named Return Code where the parameter usage is set to **Price Item**). In the Return Code parameter, you must specify the above listed return codes (i.e. AC01, AC04, AC06, and AG01) as the predefined values. Then, in order to define multi parameter based pricing for the SEPADDR price item using the Return Code parameter, you must associate the Return Code parameter with the SEPADDR price item using the following specifications:

Parameter	Display Order	Mandatory (Yes or No)	Optional Priority
Return Code	10	Yes	-

Another example, a self-funded customer (from the health insurance domain) may be charged different claim based admin fees depending on the health coverage class and network type:

Service	Price Item	Health Coverage Class	Network Type	Fees
Claim Based Fees	CLBDFS	Medical	In	\$100
		Medical	Out	\$150
		Dental	In	\$50
		Dental	Out	\$75

In such case, you need to first define two predefined parameters named Health Coverage Class and Network Type where the parameter usage is set to **Price Item**). In the Health Coverage Class parameter, you must specify the above listed values (i.e. Medical and Dental)) as the predefined values. And, in the Network Type parameter, you must specify the above listed values (i.e. In and Out)) as the predefined values. Then, in order to define parameter based pricing for the CLBDFS price item using the Health Coverage Class and Network Type parameters, you must associate these parameters with the CLBDFS price item using the following specifications:

Parameter	Display Order	Mandatory (Yes or No)	Optional Priority
Health Coverage Class	10	Yes	-
Network Type	20	Yes	-

### **Prerequisites**

To associate a parameter with a price item or price item bundle, you should have:

- Parameters defined in the application (where the parameter usage is set to **Price Item**)

### **Procedure**

To associate a parameter with a price item or price item bundle:

1. Click the **Parameters** or **Show All** link in the **Section** pane when you are defining, editing, or copying a price item or price item bundle.

The **Parameters** section appears. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Start Date	Used to specify the date from when the parameter is associated with the price item or price item bundle.	Yes
Effective End Date	Used to specify the date till when the parameter is associated with the price item or price item bundle.	No
Parameter	<p>Used to indicate the parameter that you want to associate with the price item or price item bundle.</p> <p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Parameter</b> field. On clicking the <b>Search</b> icon, the <b>Parameter Search</b> window appears.</p> <p>In the <b>Parameter Search</b> window, the system allows you to search only those parameters where the parameter usage is set to <b>Price Item</b>.</p> <p>If you select a predefined parameter, the <b>Add</b> (➕) icon appears corresponding to the <b>Parameter</b> field. On clicking the <b>Add</b> icon, a grid appears where you can specify a list of predefined parameter values which are valid for the price item or price item bundle while defining its pricing. If you do not list any predefined parameter value in this grid, the system enables you to specify any predefined value of the parameter while defining the pricing for the price item or price item bundle.</p>	Yes
Business Label	Used to specify a business label for the parameter. If you specify the business label for a parameter, the business label appears throughout the application instead of the parameter name.	No
Display Order	Used to indicate the order in which the parameter and its value should appear in the pricing parameter information string across the application.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Parameter Usage	Used to indicate whether you want to use the parameter for aggregation and/or for defining the price item pricing. The valid values are: <ul style="list-style-type: none"> <li>• <b>Aggregation</b> – Used when you want to use the parameter for aggregating transactions.</li> <li>• <b>Pricing</b> – Used when you want to use the parameter for aggregating transactions as well as for defining the price item pricing.</li> </ul>	Yes
Mandatory	Used to indicate whether the parameter is mandatory while defining the price item pricing.	No
Priority	Used to indicate the priority in which optional parameters should be considered while determining best fit price for the price item or price item bundle.	Yes (Conditional)
	<b>Note:</b> This field is disabled when the <b>Mandatory</b> option is selected.	<b>Note:</b> This field is required when the <b>Mandatory</b> option is not selected.

**Note:**

The **Parameters** section appears in the **Price Item** screen when the **Multi Price Parameter** option type of the **C1\_PPARM\_FLG** feature configuration is set to **True**.

You cannot associate parameters to the ratio and phantom price item bundles. Therefore, while defining a ratio or phantom price item bundle, the **Parameters** section does not appear in the **Price Item** screen.

2. Enter the required details in the **Parameters** section.
3. If you want to associate more than one parameter with the price item or price item bundle, click the **Add (+)** icon and then repeat step 2.

**Note:**

However, if you want to remove a parameter from the price item or price item bundle, click the **Delete** (🗑️) icon corresponding to the parameter. You can edit the parameter details and remove a parameter from the price item or price item bundle when the parameter or any other parameter from the same date range is not yet used for aggregation or for defining the price item pricing.

You can add a parameter which is used for aggregation, whenever required. However, you can add a parameter which is used for pricing when any other parameter from the same date range is not yet used for aggregation or for defining the price item pricing.

4. For each predefined parameter which is associated with the price item or price item bundle, you can define a set of valid predefined parameter values for the price item or price item bundle, if required.
5. Click **Save**.

The parameters are associated with the price item or price item bundle.

**Note:** By default, the priority of all parameters which are mandatory is set to 0.

### Defining the Valid Predefined Parameter Values for a Price Item or Price Item Bundle

A predefined parameter may have hundreds of values defined in the system. But, there might be situations when only certain predefined parameter values are applicable for a price item or price item bundle while defining its pricing. In such case, you can define a set of valid predefined parameter values for a price item or price item bundle. For example, the Return Code parameter has the following predefined parameter values:

Parameter Value	Description
AC01	Account Identifier Incorrect (i.e. invalid IBAN)
AC04	Account Closed
AC06	Account Blocked
AG01	Direct Debit Forbidden for Regulatory Reasons
AG02	Operation/Transaction Code Incorrect
AM04	Insufficient Funds
AM05	Duplicate Collection
MD01	Unauthorized Transaction
MD06	Disputed Authorized Transaction

If only the MD01 and MD06 predefined parameter values are applicable for the SEPA Debit Refund (SEPADRF) price item, you can define MD01 and MD06 as the valid predefined parameter values for the SEPADRF price item. In such case, the system will allow you to define the pricing for the SEPADRF price item only using the MD01 or MD06 parameter value. However, if all the above listed predefined parameter values are applicable for the SEPA Direct Debit Return (SEPADDR) price item, you must not define the valid predefined parameter values for the SEPADDR price item. In such case, the system will allow you to define the pricing for the SEPADDR price item using any of the above listed parameter value.

Another example, the Health Coverage Class parameter has the following predefined parameter values:

Parameter Value	Description
MEDICAL	Medical
DENTAL	Dental
VISION	Vision

If only the MEDICAL and DENTAL predefined parameter values are applicable for the Claim Based Fees (CLBDFS) price item, you can define MEDICAL and DENTAL as the valid predefined parameter values for the CLBDFS price item. In such case, the system will allow you to define the pricing for the CLBDFS price item only using the MEDICAL or DENTAL parameter value. However, if all the above listed predefined parameter values are applicable for the Claim Based Fees (CLBDFS) price item, you must not define the valid predefined parameter values for the CLBDFS price item. In such case, the system will allow you to define the pricing for the CLBDFS price item using any of the above listed parameter value.

**Prerequisites**

To define the valid predefined parameter values for a price item or price item bundle, you should have:

- Predefined values defined for the parameter which is associated with the price item or price item bundle
- Price items or price item bundles associated with the division to which the user (i.e. who is performing this action) belongs

**Procedure**

To define the valid predefined parameter values for a price item or price item bundle:

1. Click the **Parameters** or **Show All** link in the **Section** pane when you are defining, editing, or copying a price item or price item bundle.

The **Parameters** section appears.

2. Click the **Add** () icon in the **Parameter** column corresponding to the predefined parameter which is associated with the price item or price item bundle.

The following field appears in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Parameter Value	Used to indicate the predefined parameter value which you can use for the price item or price item bundle while defining the pricing.	Yes (Conditional)
	<p><b>Note:</b></p> <p>The <b>Search</b> () icon appears corresponding to the <b>Parameter Value</b> field. On clicking the <b>Search</b> icon, the <b>Predefined Parameter Value Search</b> window appears.</p> <p>On specifying the valid predefined parameter value for a price item or price item bundle, the description of the predefined parameter value appears corresponding to the <b>Parameter Value</b> field.</p>	<p><b>Note:</b> This field is required when you are defining the valid predefined parameter values for the price item or price item bundle.</p>

3. Enter a predefined parameter value which is valid for the price item or price item bundle while defining its pricing.
4. If you want to define more than one valid predefined parameter value for the price item or price item bundle, click the **Add** () icon and then repeat step 3.

**Note:** However, if you want to remove a valid predefined parameter value from the price item or price item bundle, click the **Delete** () icon corresponding to the parameter value. You can remove a valid predefined parameter value from the price item or price item bundle when the parameter value is not yet used for defining the price item pricing.

5. Click **Save**.

The valid predefined parameter values are defined for the price item or price item bundle.

## Associating a Price Item or Price Item Bundle with a Division

You can assign a price item or price item bundle to a person or account when the price item or price item bundle is associated with the division to which the person or account belongs. For example, if the SEPA Direct Debit Return (SEPADDR) and Stop Payment (STPPMT) price items are associated with the following divisions:

Price Item	Division
SEPA Direct Debit Return (SEPADDR)	001-AL
	002-CA
	003-FL
	004-IN
Stop Payment (STPPMT)	002-CA
	003-FL
	004-IN

In such case, you can assign the SEPADDR price item to any person or account which belongs to the 001-AL, 002-CA, 003-FL, or 004-IN division. However, you can assign the STPPMT price item to any person or account which belongs to the 002-CA, 003-FL, or 004-IN division.

Another example, if the Claim Based Fees (CLBDFS) price item is associated with the following divisions:

Price Item	Division
Claim Based Fees (CLBDFS)	002-CA
	003-FL
	004-IN

In such case, you can charge the CLBDFS price item to any person or account which belongs to the 002-CA, 003-FL, or 004-IN division.

### Prerequisites

To associate a price item or price item bundle with a division, you should have:

- Divisions defined in the application
- Divisions associated with the access group to which the user (i.e. who is performing this action) belongs

### Procedure

To associate a price item or price item bundle with a division:

1. Click the **Divisions** or **Show All** link in the **Section** pane when you are defining, editing, or copying a price item or price item bundle.

The **Divisions** section appears. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
SQIs	On clicking the <b>Add</b>  icon, you can associate an SQI with the price item or price item bundle for the division.	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
Division Characteristics	On clicking the <b>Add</b> (+) icon, you can define a division-specific characteristic for the price item or price item bundle.	Not applicable
Accrual Type Criteria	On clicking the <b>Add</b> (+) icon, you can define the accrual type criteria of the price item or price item bundle for the division.	Not applicable
	<b>Note:</b> This feature is not applicable for the health insurance business.	
Entity Hierarchy	On clicking the <b>Add</b> (+) icon, you can associate the price item or price item bundle with a hierarchy entity of an entity hierarchy relationship for the division.	Not applicable
	<b>Note:</b> This feature is not applicable for the health insurance business.	
Costs	On clicking the <b>Add</b> (+) icon, you can define the cost of the price item or price item bundle for the division.	Not applicable
	<b>Note:</b> This feature is not applicable for the health insurance business.	
Average Price Floor and Ceil Limits	On clicking the <b>Add</b> (+) icon, you can define the average price floor and ceil limits of the price item or price item bundle for the division.	Not applicable
	<b>Note:</b> This feature is not applicable for the health insurance business.	
Negotiability	On clicking the <b>Add</b> (+) icon, you can define the negotiability floor and ceil limits of the price item or price item bundle for the division.	
	<b>Note:</b> This feature is not applicable for the health insurance business.	
Division	Used to indicate the division to which you want to associate the price item or price item bundle.	Yes (Conditional)
	<b>Note:</b> You can only view those divisions to which you have access in the <b>Division</b> list.	<b>Note:</b> This field is required while associating the price item or price item bundle with a division.

2. Select the division from the respective field.
3. If you want to associate the price item or price item bundle with more than one division, click the **Add** (+) icon and then repeat step 2.

**Note:** However, if you want to remove the price item or price item bundle from a division, click the **Delete** (🗑️) icon corresponding to the division. You cannot remove the price item or price item bundle from a division when it is assigned to a person or account which belongs to the division.

4. Associate the SQIs with the price item or price item bundle for the required divisions.
5. Define the accrual type criteria of the price item or price item bundle for the required divisions.

**Note:** This step is not applicable for the health insurance business object.

6. Associate the price item or price item bundle with a hierarchy entity of an entity hierarchy relationship for the required divisions.

**Note:** This step is not applicable for the health insurance business object.

7. Define the cost of the price item or price item bundle for the required divisions.

**Note:** This step is not applicable for the health insurance business object.

8. Define the average price floor and ceil limits of the price item or price item bundle for the required divisions.

**Note:** This step is not applicable for the health insurance business object.

9. Define the rate negotiability floor and ceil limits of the price item or price item bundle for the required divisions.

**Note:** This step is not applicable for the health insurance business object.

10. Define the division-specific characteristics for the price item or price item bundle. if required.

11. Click **Save**.

The price item or price item bundle is associated with the divisions.

**Tip:** Alternatively, you can associate a price item or price item bundle with a division using the **Division** screen. For more information, see [Associating a Price Item or Price Item Bundle with a Division](#) on page 860.

### Associating an SQI with a Price Item or Price Item Bundle for a Division

In the transaction aggregation process, an SQI based billable charge is created for a price item or price item bundle (to which a transaction is mapped) when:

- The SQIs are associated with the price item or price item bundle for the division to which the account (i.e. for which the billable charge is created) belongs.
- The transaction aggregation rules are defined for such SQIs in the system.

Let us assume that the A1 account belongs to the 201-NJ division and the A2 account belongs to the 209-CA division. And, the Stop Payments (STPY) price item is associated with the following SQIs:

Price Item	Division	Service Quantity Identifiers (SQIs)
Stop Payments (STPY)	201-NJ	Number of Transactions (NBRTXN)
		Transaction Volume (TXNVOL)
		Transaction Amount (TXNAMT)
	209-CA	Number of Transactions (NBRTXN)
Transaction Amount (TXNAMT)		

Now, when an SQI based billable charge is created for the A1 account through the transaction aggregation process, the system calculates the following SQIs using the respective transaction aggregation rule:

- Number of Transactions (NBRTXN)
- Transaction Volume (TXNVOL)
- Transaction Amount (TXNAMT)

And, when an SQI based billable charge is created for the A2 account through the transaction aggregation process, the system calculates the following SQIs using the respective transaction aggregation rule:

- Number of Transactions (NBRTXN)
- Transaction Amount (TXNAMT)

Another example, you can calculate the enrollment based fees for a self-funded customer based on Per Subscriber Per Month or Per Member Per Month for the 201-NJ and 209-CA divisions. Therefore, you need to associate two SQIs — Subscriber Count and Member Count with the Enrollment Based Fees (ERBDFS) price item:

Price Item	Division	Service Quantity Identifiers (SQIs)
Enrollment Based Fees (ERBDFS)	201-NJ	Subscriber Count (SUBCNT)
		Member Count (MEMCNT)
	209-CA	Subscriber Count (SUBCNT)

Price Item	Division	Service Quantity Identifiers (SQIs)
		Member Count (MEMCNT)

### Prerequisites

To associate an SQI with a price item or price item bundle for a division, you should have:

- Service Quantity Identifiers (SQIs) defined in the application
- Price items or price item bundles associated with the division to which the user (i.e. who is performing this action) belongs

### Procedure

To associate an SQI with a price item or price item bundle for a division:

1. Click the **Divisions** or **Show All** link in the **Section** pane when you are defining, editing, or copying a price item or price item bundle.

The **Divisions** section appears.

2. Click the **Add** (📄) icon in the **SQIs** column corresponding to the division for which you want to associate SQIs with the price item or price item bundle.

The following field appears in a grid:

Field Name	Field Description	Mandatory (Yes or No)
SQI	Used to indicate the SQI that you want to associate with the price item or price item bundle for the division.  <b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>SQI</b> field. On clicking the <b>Search</b> icon, the <b>Service Quantity Identifier Search</b> window appears.  On specifying the SQI, the description of the SQI appears corresponding to the <b>SQI</b> field.	Yes (Conditional)  <b>Note:</b> This field is required while associating an SQI with the price item or price item bundle for the division.

3. Enter the required details in the **SQIs** grid.
4. If you want to associate more than one SQI with the price item or price item bundle for the division, click the **Add** (+) icon and then repeat step 3.

**Note:** However, if you want to remove an SQI from the price item or price item bundle for the division, click the **Delete** (🗑️) icon corresponding to the SQI. You cannot remove an SQI from the price item or price item bundle for the division when an SQI based billable charge is created using the SQI.

5. Click **Save**.

The SQIs are associated with the price item or price item bundle for the division.

## Defining a Division-Specific Characteristic for a Price Item or Price Item Bundle

### Prerequisites

To define a division-specific characteristic for a price item or price item bundle, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Division/Price Item Combination**)
- Price items or price item bundles associated with the division to which the user (i.e. who is performing this action) belongs

### Procedure

To define a division-specific characteristic for a price item or price item bundle:

1. Click the **Divisions** or **Show All** link in the **Section** pane when you are defining, editing, or copying a price item or price item bundle.

The **Divisions** section appears.

2. Click the **Add**  icon in the **Division Characteristics** column corresponding to the division for which you want to define division-specific price item or price item bundle characteristics.

The following fields appear in the grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the price item or price item bundle characteristic is effective for the division.	Yes (Conditional)
		<b>Note:</b> This field is required while defining a division-specific characteristic for the price item or price item bundle.
Characteristic Type	Used to indicate the characteristic type.	Yes (Conditional)
		<b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Division/Price Item Combination</b> .
		<b>Note:</b> This field is required while defining a division-specific characteristic for the price item or price item bundle.

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional)
	<p><b>Note:</b></p> <p>If you select a predefined characteristic type, the <b>Search</b> (🔍) icon appears corresponding to the <b>Characteristic Value</b> field. On clicking the <b>Search</b> icon, the <b>Predefined Characteristic Search</b> window appears.</p> <p>On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.</p>	<p><b>Note:</b> This field is required while defining a division-specific characteristic for the price item or price item bundle.</p>

- Enter the required details in the **Divisions** section.
- If you want to define more than one division-specific characteristic for the price item or price item bundle, click the **Add** (+) icon and then repeat step 3.

**Note:** However, if you want to remove a division-specific characteristic from the price item or price item bundle, click the **Delete** (🗑️) icon corresponding to the characteristic.

- Click **Save**.

The division-specific characteristics are defined for the price item or price item bundle.

#### Related Topics

How to define a price item or price item bundle	<a href="#">Defining a Price Item or Price Item Bundle</a> on page 701
How to edit a price item or price item bundle	<a href="#">Editing a Price Item or Price Item Bundle</a> on page 750
How to copy a price item or price item bundle	<a href="#">Copying a Price Item or Price Item Bundle</a> on page 731
How to associate a price item or price item bundle with a division	<a href="#">Associating a Price Item or Price Item Bundle with a Division</a> on page 714

#### Defining the Accrual Type Criteria of a Price Item or Price Item Bundle for a Division

**Note:** This topic is not applicable for the health insurance business.

The accrual type criteria of a price item or price item bundle is referred when the accrual is calculated for an account using an accrual type where the **Price Item Accrual Criteria Required** option is selected. The system behaves in the following manner when the **Price Item Accrual Criteria Required** option is selected in the accrual type:

If the accrual type criteria of a price item or price item bundle is set to...	Then...
Actual	The system considers the billable charges of the price item for accrual when the following conditions are met: <ul style="list-style-type: none"> <li>• The price item is not excluded in the accrual type.</li> <li>• The accrual is calculated for an account using the accrual type where the accrual criteria is set to <b>Actual</b>.</li> </ul>
Historical	The system considers the billable charges of the price item for accrual when the following conditions are met: <ul style="list-style-type: none"> <li>• The price item is not excluded in the accrual type.</li> <li>• The accrual is calculated for an account using the accrual type where the accrual criteria is set to <b>Historical</b>.</li> </ul>
Not Applicable	The system considers the billable charges of the price item for accrual when the following conditions are met: <ul style="list-style-type: none"> <li>• The price item is not excluded in the accrual type</li> <li>• The accrual is calculated for an account using the accrual type where the accrual criteria is set to <b>Actual</b> or <b>Historical</b>.</li> </ul>

The system enables you to define accrual type criteria of a price item or price item bundle for each division. For example, you can maintain different accrual type criteria of the Stop Payments (STPY) price item for each division as shown below:

Price Item	Division	Accrual Type Criteria
Stop Payments (STPY)	201-NJ	Actual
	209-CA	Historical
	210-FL	Not Applicable
	215-OX	Actual
	220-AL	Historical
	223-NJ	Not Applicable

### Prerequisites

To define the accrual type criteria of a price item or price item bundle for a division, you should have:

- Price items or price item bundles associated with the division to which the user (i.e. who is performing this action) belongs

### Procedure

To define the accrual type criteria of a price item or price item bundle for a division:

1. Click the **Divisions** or **Show All** link in the **Section** pane when you are defining, editing, or copying a price item or price item bundle.

The **Divisions** section appears.

- Click the **Add** (⊕) icon in the **Accrual Type Criteria** column corresponding to the division for which you want to define accrual type criteria of the price item or price item bundle.

The following field appears in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Accrual Type Criteria	Used to indicate whether the billable charges of the price item should be considered for accrual depending on the accrual criteria specified in the accrual type. The valid values are: <ul style="list-style-type: none"> <li><b>Actual</b> - Used when you want the system to consider billable charges of the price item for accrual when the accrual criteria in the accrual type is set to <b>Actual</b>.</li> <li><b>Historical</b> - Used when you want the system to consider billable charges of the price item for accrual when the accrual criteria in the accrual type is set to <b>Historical</b>.</li> <li><b>Not Applicable</b> - Used when you want the system to consider billable charges of the price item for accrual when the accrual criteria in the accrual type is set to <b>Actual</b> or <b>Historical</b>.</li> </ul>	Yes (Conditional)
		<b>Note:</b> This field is required while defining the accrual type criteria of the price item or price item bundle for the division.
	<b>Note:</b> By default, the <b>Not Applicable</b> option is selected.	

- Select the accrual type criteria from the respective field.
- Click **Save**.

The accrual type criteria of the price item or price item bundle is defined for the division.

### **Associating a Price Item or Price Item Bundle with a Hierarchy Entity in an Entity Hierarchy Relationship of a Division**

**Note:** This topic is not applicable for the health insurance business.

Once you design the structure of an entity hierarchy relationship, you can associate a price item or price item bundle with a hierarchy entity at any level in the entity hierarchy relationship. You can associate a price item or price item bundle with a hierarchy entity only from the **Price Item** screen. The system enables you to define division-specific hierarchy for a price item or price item bundle. Therefore, while associating a price item or price item bundle with a

hierarchy entity, you can select a hierarchy entity from any entity hierarchy relationship which is created for the division. However, the system checks whether the association date range is within the entity hierarchy relationship date range.

For example, you can associate the ACH Transfer (ACHTRN) price item with the Payments hierarchy entity in the Cash Management entity hierarchy relationship as shown below:

```
Cash Management
  Payments
    ACH Transfer
```

Associating a price item or price item bundle with a hierarchy entity does not have any impact on the billing module. At present, the price item hierarchy is only displayed in the Deal Modelling and Simulation module.

### **Prerequisites**

To associate a price item or price item bundle with a hierarchy entity in an entity hierarchy relationship of a division, you should have:

- Entity hierarchy relationships defined for the required divisions
- Hierarchy entities included at the required levels in the entity hierarchy relationship
- Price items or price item bundles associated with the division to which the user (i.e. who is performing this action) belongs

### **Procedure**

To associate a price item or price item bundle with a hierarchy entity in an entity hierarchy relationship of a division:

1. Click the **Divisions** or **Show All** link in the **Section** pane when you are defining, editing, or copying a price item or price item bundle.

The **Divisions** section appears.

2. Click the **Add**  icon in the **Entity Hierarchy** column corresponding to the division for which you want to define price item or price item bundle hierarchy.

The following fields appear in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Hierarchy	Used to indicate the entity hierarchy relationship in which you want to include the price item or price item bundle.	Yes (Conditional)
	<b>Note:</b> The <b>Search</b>  icon appears corresponding to the <b>Hierarchy</b> field. On clicking the <b>Search</b> icon, the <b>Hierarchy Search</b> window appears.	<b>Note:</b> This field is required while associating the price item or price item bundle with a hierarchy entity in an entity hierarchy relationship of the division.
Parent Entity	Used to indicate the hierarchy entity to which you want to associate the price item or price item bundle.	Yes (Conditional)
	<b>Note:</b> The list appears when the entity hierarchy relationship is specified in the <b>Hierarchy</b> field. It contains the hierarchy entities which are included at the root and subsequent levels in the entity hierarchy relationship.	<b>Note:</b> This field is required while associating the price item or price item bundle with a hierarchy entity in an entity hierarchy relationship of the division.

Field Name	Field Description	Mandatory (Yes or No)
Start Date	Used to specify the date from when the price item or price item bundle is associated with the hierarchy entity in the entity hierarchy relationship.	Yes (Conditional)  <b>Note:</b> This field is required while associating the price item or price item bundle with a hierarchy entity in an entity hierarchy relationship of the division.
	<b>Note:</b> The start date cannot be later than the end date. The start date cannot be earlier than the entity hierarchy relationship start date.	
End Date	Used to specify the date till when the price item or price item bundle is associated with the hierarchy entity in the entity hierarchy relationship.	No
	<b>Note:</b> The end date cannot be earlier than the start date. The end date cannot be later than the entity hierarchy relationship end date.	

- Enter the required details in the **Entity Hierarchy** grid.
- If you want to associate the price item or price item bundle to more the one hierarchy entity in the same or different entity hierarchy relationship, click the **Add (+)** icon and then repeat step 3.

**Note:**

You cannot associate the price item or price item bundle to multiple hierarchy entities in the same or different entity hierarchy relationship for the same or overlapping date range.

However, if you want to disassociate the price item or price item bundle from a hierarchy entity of an entity hierarchy relationship, click the **Delete (🗑)** icon corresponding to the hierarchy and parent entity combination.

- Click **Save**.

The price item or price item bundle is associated with a hierarchy entity in an entity hierarchy relationship of the division.

**Defining the Cost of a Price Item or Price Item Bundle for a Division**

**Note:** This topic is not applicable for the health insurance business.

Oracle Revenue Management and Billing enables you to maintain the different types of fixed and variable costs of a price item or price item bundle for each division. The system uses the fixed and variable cost information while calculating the cost of a price item or price item bundle in a deal. It considers the cost which is defined for the division to which the account or person belongs. It derives the fixed and/or variable cost which is effective on the deal start date.

The system enables you to maintain the following types of costs in different currencies:

- Additional Fixed Cost
- Additional Variable Cost
- Fixed Third Party Cost
- Fixed Internal Cost
- Variable Internal Cost
- Variable Third Party Cost

While calculating the cost of a price item or price item bundle in a deal, the system converts the cost in the deal currency when the cost currency is different from the deal currency. As the name implies, the fixed cost is an expense that does not change with the increase or decrease in the price item volume or commitments. Therefore, the total fixed cost is equal to the sum of fixed cost which is effective on the deal start date for the division. However, the variable cost is an expense that change with the increase or decrease in the price item volume or commitments. Therefore, the total variable cost is equal to the sum of multiplication of variable cost (which is effective on the deal start date for the division) and price item volume or commitments.

Let us understand this with the help of an example:

Price Item	Division	Cost Type	Cost Amount
PI1	201-NJ	Fixed Third Party Cost	\$5
		Fixed Internal Cost	\$3
		Additional Fixed Cost	\$1
		Variable Third Party Cost	\$0.1
		Variable Internal Cost	\$0.65
		Additional Variable Cost	\$0.5

If a deal is created for a person who belongs to the 201-NJ division and if the PI1 price item is assigned to the person in the deal and if the original volume and proposed commitment of the PI1 price item in the deal is set to 100 and 200, respectively, the system calculates the cost of the PI1 price item in the following manner:

<b>Original Cost</b>	
Total Fixed Cost	$\$5 + \$3 + \$1 = \$9$
Total Variable Cost	$(100 * \$0.1) + (100 * \$0.65) + (100 * \$0.5) = \$10 + \$65 + \$50 = \$125$
Total Cost	$\$9 + \$125 = \$134$
<b>Proposed Cost</b>	
Total Fixed Cost	$\$5 + \$3 + \$1 = \$9$

Total Variable Cost	$(200 * \$0.1) + (200 * \$0.65) + (200 * \$0.5) = \$20 + \$130 + \$100 = \$250$
Total Cost	$\$9 + \$250 = \$259$

Here, the assumption is the deal and cost currency is same (i.e. USD). The system then uses the total original and proposed costs for calculating the original and proposed profitability of the deal.

### **Prerequisites**

To define the cost of a price item or price item bundle for a division, you should have:

- Currencies defined in the application
- Price items or price item bundles associated with the division to which the user (i.e. who is performing this action) belongs

### **Procedure**

To define the cost of a price item or price item bundle for a division:

1. Click the **Divisions** or **Show All** link in the **Section** pane when you are defining, editing, or copying a price item or price item bundle.

The **Divisions** section appears.

2. Click the **Add** () icon in the **Costs** column corresponding to the division for which you want to define the costs of the price item or price item bundle.

The following fields appear in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the cost of the price item or price item bundle is effective for the division.	Yes (Conditional) <b>Note:</b> This field is required while defining the cost of the price item or price item bundle for the division.
Cost Type	Used to indicate the type of cost incurred in the division for the price item or price item bundle. The valid values are: <ul style="list-style-type: none"> <li>• Additional Fixed Cost</li> <li>• Additional Variable Cost</li> <li>• Fixed Third Party Cost</li> <li>• Fixed Internal Cost</li> <li>• Variable Internal Cost</li> <li>• Variable Third Party Cost</li> </ul>	Yes (Conditional) <b>Note:</b> This field is required while defining the cost of the price item or price item bundle for the division.
Cost Value	Used to specify the cost amount.	Yes (Conditional) <b>Note:</b> This field is required while defining the cost of the price item or price item bundle for the division.

Field Name	Field Description	Mandatory (Yes or No)
Cost Currency	Used to specify the currency in which you want to define the cost. The system does currency conversion when the cost currency is different from the deal currency.	Yes (Conditional)
	<b>Note:</b> The list includes only those currencies which are already defined in the system.	<b>Note:</b> This field is required while defining the cost of the price item or price item bundle for the division.

- Enter the required details in the **Costs** grid.
- If you want to define more than one cost of the price item or price item bundle for the division, click the **Add (+)** icon and then repeat step 3.

**Note:** However, if you want to remove the cost of the price item or price item bundle from the division, click the **Delete (🗑)** icon corresponding to the cost.

- Click **Save**.

The cost of the price item or price item bundle is defined for the division.

### **Defining the Average Price Floor and Ceil Values of a Price Item or Price Item Bundle for a Division**

**Note:** This topic is not applicable for the health insurance business.

Oracle Revenue Management and Billing enables you to define the average price floor and ceil limits of a price item or price item bundle for each division. Before you define the average price floor and ceil limits, you need to specify the floor and ceiling type for the price item or price item bundle. At present, the system supports the following floor and ceiling types for a price item or price item bundle:

- Absolute Value Range

Once the floor and ceiling type of a price item or price item bundle is set to **Absolute Value Range**, you can define the average price floor and ceil limits of the price item or price item bundle for the required divisions. The system enables you to define different average price floor and ceil limits for different To Do roles. The system uses the average price floor and ceil limits while approving the average price of the price item or price item bundle in a deal. The deal creator or an approver at any level in the division or deal approval hierarchy can approve the average price of a price item or price item bundle when the average price is within the floor and ceil limits of the To Do role to which the deal creator or approver belongs. For example, if the average price of the P1 price item in a deal is \$25 and the floor and ceil limits of the deal creator's To Do role is set to \$10-\$15, then the deal creator cannot approve the average price of the P1 price item in the deal.

If the average price floor and ceil limits is not defined for the deal creator's or approver's To Do role, the status of the price item or price item bundle in the deal is changed to **Error**. If the average price floor and ceil limits is defined for the deal creator's or approver's To Do role, but the average price of the price item or price item bundle is not within the floor and ceil limits, the status of the price item or price item bundle in the deal is changed to **Pending for Approval**. However, if the average price floor and ceil limits is defined for the deal creator's or approver's To Do role and the

average price of the price item or price item bundle is within the floor and ceil limits, the status of the price item or price item bundle in the deal is changed to **Approved**.

Here, you can also define the average price floor and ceil limits for the price item manager's To Do role. Note that the price item manager can approve the average price of the price item or price item bundle in a deal when the average price of the price item or price item bundle is within the floor and ceil limits of the price item manager's To Do role.

- Spread Amount

Once the average price floor and ceil type of a price item or price item bundle is set to **Spread Amount**, the system calculates the average price floor and ceil limits based on the average price and spread amount. The system calculates the average price of the price item or price item bundle. The system searches for the eligible price list in the price assignments assigned to the To Do roles. If a flat pricing is defined in the price assignment, then the system sets the average price to the flat rate. However, if a tiered pricing is defined in the price assignment, the system calculates the average price using the following formula:

$$\text{Average Price} = \text{Price Item Revenue} / \text{Price Item Commitments}$$

The system then considers the spread amount specified for the relationship manager's To Do role in the price item. Using the spread amount and average price, the system calculates the average price floor and ceil limit values. The deal creator or an approver at any level in the division or deal approval hierarchy can approve the average price of a price item or price item bundle when the average price is within the floor and ceil limits of the To Do role to which the deal creator or approver belongs. For example, if the spread amount set by you is 10 and the system calculated average price of the P1 price item in a deal is \$25 then the system sets the floor and ceil limits of the deal creator's To Do role to \$15-\$35. In this case the deal creator can approve the average price of the P1 price item in the deal.

The system then checks whether the average price of the price item in the deal is within the derived average price floor and ceil limits. If so, the system changes the status of the price item to **Approved**. However, if the average price of the price item in the deal is not within the derived average price floor and ceil limits, the status of the price item remains as **Pending for Approval**.

- Spread Percentage

Once the average price floor and ceil type of a price item is set to the **Spread Percentage**, the system calculates the average price floor and ceil limits based on the average price and spread percentage. The system calculates the average price of the price item or price item bundle. The system searches for the eligible price list in the price assignments assigned to the To Do roles. If a flat pricing is defined in the price assignment, then the system sets the average price to the flat rate. However, if a tiered pricing is defined in the price assignment, the system calculates the average price using the following formula:

$$\text{Average Price} = \text{Price Item Revenue} / \text{Price Item Commitments}$$

The system then considers the spread percentage specified for the relationship manager's To Do role in the price item. Using the spread percentage and average price, the system calculates the average price floor and ceil values. The deal creator or an approver at any level in the division or approver system then checks whether the average price of the price item in the deal is within the derived average price floor and ceil limits of the To Do role to which the deal creator or approver belongs. For example, if the spread percentage set by you is 10 and the system calculated average price of the P1 price item in a deal is \$50 then the system sets the floor and ceil limits of the deal creator's To Do role to \$45-\$55. In this case the deal creator can approve the average price of the P1 price item in the deal.

The system then checks whether the average price of the price item in the deal is within the derived average price floor and ceil limits. If so, the system changes the status of the price item to **Approved**. However, if the average price of the price item in the deal is not within the derived average price floor and ceil limits, the status of the price item remains as **Pending for Approval**.

### **Prerequisites**

To define the average price floor and ceil limits of a price item or price item bundle for a division, you should have:

- To Do roles and currencies defined in the application
- Price items or price item bundles associated with the division to which the user (i.e. who is performing this action) belongs

**Procedure**

To define the average price floor and ceil limits of a price item or price item bundle for a division:

1. Click the **Divisions** or **Show All** link in the **Section** pane when you are defining, editing, or copying a price item or price item bundle.

The **Divisions** section appears.

2. Click the **Add**  icon in the **Average Price Floor and Ceil Limits** column corresponding to the division for which you want to define the average price floor and ceil limits of the price item or price item bundle.

The following fields appear in a grid:

Field Name	Field Description	Mandatory (Yes or No)
To Do Role	Used to indicate that users with the specified To Do role can approve the average price of the price item or price item bundle in a deal when it is within the specified floor and ceil limits.	Yes (Conditional)
	<p><b>Note:</b></p> <p>The <b>Search</b>  icon appears corresponding to the <b>To Do Role</b> field. On clicking the <b>Search</b> icon, the <b>To Do Role Search</b> window appears.</p> <p>On specifying the To Do role, the description of the To Do role appears corresponding to the <b>To Do Role</b> field.</p>	<p><b>Note:</b> This field is required while defining the average price floor and ceil limits of the price item or price item bundle for the division.</p>
Floor Value	Used to specify the floor (i.e. lower) limit for the To Do role. The users who belong to the To Do role cannot approve the average price of the price item or price item bundle when it is below the floor limit.	Yes (Conditional)
	<p><b>Note:</b> The floor value cannot be greater than the ceil value.</p>	<p><b>Note:</b> This field is required while defining the average price floor and ceil limits of the price item or price item bundle for the division.</p>
Ceil Value	Used to specify the ceil (i.e. upper) limit for the To Do role. The users who belong to the To Do role cannot approve the average price of the price item or price item bundle when it is above the ceil limit.	Yes (Conditional)
	<p><b>Note:</b> The ceil value cannot be lower than the floor value.</p>	<p><b>Note:</b> This field is required while defining the average price floor and ceil limits of the price item or price item bundle for the division.</p>
Spread Amount	Used to specify the spread amount specified while defining a price item or price item bundle or assigned to a To Do role.	Yes (Conditional)
	<p><b>Note:</b> This column appears when you select the <b>Spread Amount</b> option from the <b>Average Price Floor and Ceil Type</b> list for a price item or price item bundle.</p>	<p><b>Note:</b> This field is required while defining the average price floor and ceil limits of the price item or price item bundle for the division.</p>

Field Name	Field Description	Mandatory (Yes or No)
Spread Percentage	Used to specify the spread percentage specified while defining a price item or price item bundle or assigned to a To Do role.	Yes (Conditional)
	<b>Note:</b> This column appears only when you select the <b>Spread Percentage</b> option from the <b>Average Price Floor and Ceil Type</b> list for a price item or price item bundle.	<b>Note:</b> This field is required while defining the average price floor and ceil limits of the price item or price item bundle for the division.
Floor and Ceil Currency	Used to indicate the currency in which you want to define the floor and ceil limits. The system does the currency conversion when the pricing currency is different from the floor and ceil currency.	Yes (Conditional)
	<b>Note:</b> The list includes only those currencies which are already defined in the system.	<b>Note:</b> This field is required while defining the average price floor and ceil limits of the price item or price item bundle for the division.

- Enter the required details in the **Average Price Floor and Ceil Limits** grid.
- If you want to define the average price floor and ceil limits for more than one To Do role, click the **Add (+)** icon and then repeat step 3.

**Note:** However, if you want to remove the average price floor and ceil limits of a To Do role from the division, click the **Delete** (🗑️) icon corresponding to the To Do role.

- Click **Save**.

The average price floor and ceil limits of the price item or price item bundle are defined for the division.

### **Defining a Characteristic for a Price Item or Price Item Bundle**

#### **Prerequisites**

To define a characteristic for a price item or price item bundle, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Price Item**)

#### **Procedure**

To define a characteristic for a price item or price item bundle:

- Click the **Price Item Characteristics** or **Show All** link in the **Section** pane when you are defining, editing, or copying a price item or price item bundle.

The **Price Item Characteristics** section appears. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the price item or price item bundle.	Yes (Conditional)
		<b>Note:</b> This field is required while defining a characteristic for the price item or price item bundle.
Characteristic Type	Used to indicate the characteristic type.	Yes (Conditional)
	<b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Price Item</b> .	<b>Note:</b> This field is required while defining a characteristic for the price item or price item bundle.
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional)
	<p><b>Note:</b></p> <p>If you select a predefined characteristic type, the <b>Search</b> (🔍) icon appears corresponding to the <b>Characteristic Value</b> field. On clicking the <b>Search</b> icon, the <b>Predefined Characteristic Search</b> window appears.</p> <p>On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.</p>	<b>Note:</b> This field is required while defining a characteristic for the price item or price item bundle.

- Enter the required details in the **Price Item Characteristics** section.
- If you want to define more than one characteristic for the price item or price item bundle, click the **Add** (+) icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from the price item or price item bundle, click the **Delete** (🗑️) icon corresponding to the characteristic.

- Click **Save**.

The characteristics are defined for the price item or price item bundle.

### Related Topics

For more information on...	See...
How to define a price item or price item bundle	<a href="#">Defining a Price Item or Price Item Bundle</a> on page 701
How to edit a price item or price item bundle	<a href="#">Editing a Price Item or Price Item Bundle</a> on page 750
How to copy a price item or price item bundle	<a href="#">Copying a Price Item or Price Item Bundle</a> on page 731

### Copying a Price Item or Price Item Bundle

Instead of creating a price item or price item bundle from scratch, you can create a new price item or price item bundle using an existing price item or price item bundle. This is possible through copying a price item or price item bundle.

On copying a price item or price item bundle, the details including the following are copied to the new price item or price item bundle:

- Parameters and Divisions associated with the price item or price item bundle
- SQIs associated with the price item or price item bundle for the divisions
- Division-specific characteristics of the price item or price item bundle
- Accrual type criteria of the price item or price item bundle for the divisions
- Hierarchy entity to which the price item or price item bundle is associated in the divisions
- Cost of the price item or price item bundle for the divisions
- Average price floor and ceil limits of the price item or price item bundle for the divisions

You can then edit the details, if required.

### **Prerequisites**

To copy a price item or price item bundle, you should have:

- Price item or price item bundle (whose copy you want to create) defined in the application
- Price item or price item bundle (whose copy you want to create) associated with the division to which the user (i.e. who is performing this action) belongs
- Contract types, To Do types, and To Do roles defined in the application
- To Do roles associated with the required To Do type
- Value defined for the **Default Contract Type** option type in the **C1\_PRICING** feature configuration

### **Procedure**

To copy a price item or price item bundle:

1. Search for the price item or price item bundle in the **Price Item** screen.
2. In the **Search Results** section, click the **Copy**  icon in the **Copy** column corresponding to the price item or price item bundle whose copy you want to create.

The **Price Item** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the price item or price item bundle.
- **Parameters** - Used to associate a parameter with the price item or price item bundle. These associated parameters are then used for aggregating transactions and/or for defining the price item pricing.

#### **Note:**

The **Parameters** section appears in the **Price Item** screen when the **Multi Price Parameter** option type of the **C1\_PPARM\_FLG** feature configuration is set to **True**.

You cannot associate parameters to the ratio and phantom price item bundles. Therefore, while defining a ratio or phantom price item bundle, the **Parameters** section does not appear in the **Price Item** screen.

- **Divisions** - Used to associate the price item or price item bundle with one or more divisions. In addition, it enables you to:
  - Associate the Service Quantity Identifiers (SQIs) with the Price Item or Price Item Bundle for a Division
  - Define the Accrual Type Criteria of the Price Item or Price Item Bundle for a Division

**Note:** This step is not applicable for the health insurance business.

- Associate the Price Item or Price Item Bundle with a Hierarchy Entity in an Entity Hierarchy Relationship of a Division

**Note:** This step is not applicable for the health insurance business.

- Define the Cost of the Price Item or Price Item Bundle for a Division

**Note:** This step is not applicable for the health insurance business.

- Define the Average Price Floor and Ceil Limits of the Price Item or Price Item Bundle for a Division

**Note:** This step is not applicable for the health insurance business.

- Define the Negotiability Floor and Ceil Values of the Price Item or Price Item Bundle for a Division

**Note:** This step is not applicable for the health insurance business.

- Define the Division-Specific Characteristics for the Price Item or Price Item Bundle
- **Price Item Characteristics** - Used to define characteristics (which are applicable across divisions) for the price item or price item bundle.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Price Item	Used to specify the price item or price item bundle.	Yes
Description	Used to specify the description for the price item or price item bundle.	Yes
Price Item Usage	<p>Used to indicate whether the price item or price item bundle is available for pricing or pricing and billing. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Pricing</b> - Used when you want to define pricing for the price item or price item bundle, but no charges should be created against it in the system.</li> </ul> <p><b>Note:</b> This option is not applicable for the health insurance business.</p> <ul style="list-style-type: none"> <li>• <b>Pricing and Billing</b> - Used when you want to define pricing and create charges for the price item or price item bundle in the system.</li> </ul>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Price Item Type	<p>Used to indicate the type of the price item or price item bundle. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Rate</b> - Used when you want to create a rate based price item or price item bundle. For example, savings, current, and loan interest services (i.e. price items) are rate based price items.</li> </ul> <div style="border: 1px solid black; padding: 2px; margin: 5px 0;"> <p><b>Note:</b> This option is not applicable for the health insurance business.</p> </div> <ul style="list-style-type: none"> <li>• <b>Fees</b> - Used when you want to create a fee based price item or price item bundle. For example, debit credit service (i.e. price item) is a fee based price item.</li> </ul> <div style="border: 1px solid black; padding: 2px; margin: 5px 0;"> <p><b>Note:</b> This field appears when the <b>Pricing</b> option is selected from the <b>Price Item Usage</b> list. You cannot create a price item bundle when the <b>Pricing</b> option is selected from the <b>Price Item Usage</b> list and <b>Rate</b> option is selected from the <b>Price Item Type</b> list. The system automatically sets the price item type of those price items or price item bundles which are available for pricing and billing to <b>Fees</b>. Therefore, this field does not appear when the <b>Pricing and Billing</b> option is selected from the <b>Price Item Usage</b> list.</p> </div>	Yes
Bundle	<p>Used to indicate whether you want to create a price item bundle. The valid values are:</p> <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul> <div style="border: 1px solid black; padding: 2px; margin: 5px 0;"> <p><b>Note:</b> This field is not applicable for the health insurance business.</p> </div>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Bundle Type	<p>Used to indicate the type of the price item bundle. If the <b>Pricing and Billing</b> option is selected from the <b>Price Item Usage</b> list, the valid values are:</p> <ul style="list-style-type: none"> <li>• <i>Phantom</i></li> <li>• <i>Ratio</i></li> <li>• <i>Regular</i></li> </ul> <p>However, if the <b>Pricing</b> option is selected from the <b>Price Item Usage</b> list and the <b>Fees</b> option is selected from the <b>Price Item Type</b> list, you can only define a regular price item bundle. Therefore, by default, the value is set to <b>Regular</b>.</p>	Yes (Conditional)
	<p><b>Note:</b></p> <p>This field appears when the <b>Yes</b> option is selected from the <b>Bundle</b> list.</p> <p>This field is enabled when the <b>Pricing and Billing</b> option is selected from the <b>Price Item Usage</b> list and the <b>Yes</b> option is selected from the <b>Bundle</b> list.</p> <p>You cannot define a price item bundle when the <b>Pricing</b> option is selected from the <b>Price Item Usage</b> list and <b>Rate</b> option is selected from the <b>Price Item Type</b> list.</p> <p>This field is not applicable for the health insurance business.</p>	<p><b>Note:</b> This field is required when you are creating a price item bundle.</p>
Global Price List	<p>Used to indicate whether the price item or price item bundle can be assigned to a global price list. The valid values are:</p> <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	Yes
Contract Type	<p>Used to indicate the contract type that you want to associate with the price item or price item bundle.</p>	Yes
	<p><b>Note:</b></p> <p>This field appears when the <b>Pricing and Billing</b> option is selected from the <b>Price Item Usage</b> list.</p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Contract Type</b> field. On clicking the <b>Search</b> icon, the <b>Contract Type Search</b> window appears.</p>	

Field Name	Field Description	Mandatory (Yes or No)
Price Item Manager To Do Type	<p>Used to indicate the To Do type using which a To Do should be created when the deal creator or approver requests the price item manager (i.e. clicks the <b>Send Price Items for Approval</b> button) to approve the average price for the price item or price item bundle offered in a deal.</p> <p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Price Item Manager To Do Type</b> field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.</p> <p>On specifying the To Do type, the description of the To Do type appears corresponding to the <b>Price Item Manager To Do Type</b> field.</p> <p>This field is not applicable for the health insurance business.</p>	No
Price Item Manager To Do Role	<p>Used to indicate that users with the specified To Do role can approve the average price for the price item or price item bundle offered in a deal. Note that the price item manager can approve the average price when it is within the average price floor and ceil limits defined for the To Do role.</p> <p><b>Note:</b></p> <p>The list appears when the price item manager To Do type is selected from the respective field. It includes only those To Do roles which are associated with the price item manager To Do type.</p> <p>This field is not applicable for the health insurance business.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required when the price item manager To Do type is specified for the price item or price item bundle.</p>

Field Name	Field Description	Mandatory (Yes or No)
Floor and Ceiling Type	<p>Used to indicate the manner in which you want to define the average price floor and ceil limits for the price item or price item bundle. The valid value is:</p> <ul style="list-style-type: none"> <li>• <b>Absolute Value Range</b> - Used when you want to define the average price floor and ceil limits in the absolute values. For example, the average price for the price item or price item bundle should be between 10\$ to 15\$.</li> <li>• <b>Spread Amount</b> - Used when you want to define the average floor and ceil limits based on the spread amount.</li> <li>• <b>Spread Percentage</b> – Used when you want to define the average floor and ceil limits based on the spread percentage.</li> </ul>	Yes (Conditional)
		<p><b>Note:</b> This field is required when you are defining the average price floor and ceil limits of the price item or price item bundle for a division.</p>
	<p><b>Note:</b></p> <ul style="list-style-type: none"> <li>• In case of <b>Spread Amount</b> and <b>Spread Percentage</b> options, the system calculates the average price of a price item and based on the average price and the spread amount or spread percentage, the average floor and ceil limits are derived.</li> <li>• This field is not applicable for the health insurance business.</li> </ul>	

3. Enter the required details in the **Main** section.
4. Associate, edit, or disassociate parameters from the price item or price item bundle, if required.
5. For each predefined parameter which is associated with the price item or price item bundle, you can define a set of valid predefined parameter values for the price item or price item bundle, if required.
6. Associate or disassociate the price item or price item bundle from the required divisions.
7. Associate or disassociate the SQIs from the price item or price item bundle for the required divisions.
8. Define, edit, or remove the accrual type criteria of the price item or price item bundle from the required divisions.

**Note:** This step is not applicable for the health insurance business.

9. Associate or disassociate the price item or price item bundle from a hierarchy entity in an entity hierarchy relationship of the required divisions.

**Note:** This step is not applicable for the health insurance business.

10. Define, edit, or remove the cost of the price item or price item bundle from the required divisions.

**Note:** This step is not applicable for the health insurance business.

11. Define, edit, or remove the average price floor and ceil limits of the price item or price item bundle from the required divisions.

**Note:** This step is not applicable for the health insurance business.

12. Define, edit or remove the negotiability floor and ceil values of the price item or price item bundle for the required divisions.

**Note:** This step is not applicable for the health insurance business.

13. Define, edit, or remove the division-specific characteristics from the price item or price item bundle. if required.

14. Define, edit, or remove characteristics of the price item or price item bundle, if required.

15. Click **Save**.

The new price item is defined.

**Note:**

While creating a price item or price item bundle which is available for pricing, the contract type specified in the **Default Contract Type** option type of the **C1\_PRICING** feature configuration is automatically associated to the price item or price item bundle.

The system allows you to add a price item to the new price item bundle when:

- Price item and price item bundle (whose copy you are creating) are associated to the same contract type.
- Price item is associated with the division to which the price item bundle (whose copy you are creating) is associated.
- Another price item bundle with the same price item, relationship type, and date range combination does not exist in the system.

## Viewing the Price Item or Price Item Bundle Details

### Procedure

To view the details of a price item or price item bundle:

1. Search for the price item or price item bundle in the **Price Item** screen.
2. In the **Search Results** section, click the link in the **Price Item Information** column corresponding to the price item or price item bundle whose details you want to view.

The **Price Item** screen appears. It contains the following zones:

- [Price Item](#) on page 741
  - [Parameters](#) on page 742
  - [Predefined Parameter Values for Price Item](#) on page 743
  - [Divisions](#) on page 744
  - [Division-Specific SQIs for Price Item](#) on page 744
  - [Division-Specific Characteristics for Price Item](#) on page 745
  - [Division-Specific Accrual Type Criteria for Price Item](#) on page 745
  - [Division-Specific Hierarchy for Price Item](#) on page 746
  - [Division-Specific Cost for Price Item](#) on page 747
  - [Division-Specific Average Price Floor and Ceil Values for Price Item](#) on page 747
  - [Division-Specific Negotiability Floor and Ceil Values for a Price Item](#)
  - [Price Item Relationship](#) on page 748
3. View the basic details and characteristics of the price item or price item bundle in the **Price Item** zone.
  4. View the parameters associated with the price item or price item bundle in the **Parameters** zone.
  5. View the valid predefined parameter values of the price item or price item bundle in the **Predefined Parameter Values for Price Item** zone.
  6. View the divisions to which the price item or price item bundle is associated in the **Divisions** zone.
  7. View the SQIs associated with the price item or price item bundle for a division in the **Division-Specific SQIs for Price Item** zone.
  8. View the division-specific characteristics of the price item or price item bundle in the **Division-Specific Characteristics for Price Item** zone.
  9. View the accrual type criteria of the price item or price item bundle for a division in the **Division-Specific Accrual Type Criteria for Price Item** zone.

**Note:** This step is not applicable for the health insurance business.

10. View the hierarchy entity to which the price item or price item bundle is associated in a division in the **Division-Specific Hierarchy for Price Item** zone.

**Note:** This step is not applicable for the health insurance business.

11. View the cost of the price item or price item bundle for a division in the **Division-Specific Cost for Price Item** zone.

**Note:** This step is not applicable for the health insurance business.

12. View the average price floor and ceil limits of the price item or price item bundle for a division in the **Division-Specific Floor and Ceil Values for Price Item** zone.

**Note:** This step is not applicable for the health insurance business.

13. View the negotiability floor and ceil values of the price item or price item bundle for a division in the **Division-Specific Negotiability Floor and Ceil Values for Price Item** zone.

**Note:** This step is not applicable for the health insurance business.

14. View the price items or price item bundles related to the parent price item or price item bundle in the **Price Item Relationship** zone.

**Note:** This step is not applicable for the health insurance business.

- [Division-Specific Average Price Floor and Ceil Values for Price Item](#) on page 747
- [Price Item Relationship](#) on page 748

## Price Item

The **Price Item** zone displays the details of the price item or price item bundle. It contains the following sections:

- **Main** – Displays basic information about the price item or price item bundle. It contains the following fields:

Field Name	Field Description
Price Item	Displays the price item or price item bundle.
Description	Displays the description of the price item or price item bundle.
Price Item Usage	Indicates whether the price item or price item bundle is available for pricing or pricing and billing. The valid values are: <ul style="list-style-type: none"> <li>• Pricing</li> <li>• Pricing and Billing</li> </ul>
Price Item Type	Indicates the type of the price item or price item bundle. The valid values are: <ul style="list-style-type: none"> <li>• Rate</li> <li>• Fees</li> </ul>
	<b>Note:</b> This field appears when the <b>Pricing</b> option is selected from the <b>Price Item Usage</b> list.
Bundle	Indicates whether the price item is a bundle. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>
Bundle Type	Indicates the type of the price item bundle. The valid values are: <ul style="list-style-type: none"> <li>• Phantom</li> <li>• Ratio</li> <li>• Regular</li> </ul>
	<b>Note:</b> This field appears when the <b>Yes</b> option is selected from the <b>Bundle</b> list.
Global Price List	Indicates whether the price item or price item bundle can be assigned to a global price list. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>
Contract Type	Displays the contract type to which the price item or price item bundle is associated.
Price Item Manager To Do Type	Indicates the To Do type using which a To Do should be created when the deal creator or approver requests the price item manager (i.e. clicks the <b>Send Price Items for Approval</b> button) to approve the average price for the price item or price item bundle offered in a deal.
	<b>Note:</b> It has a link. On clicking the link, the <b>To Do Type</b> screen appears where you can view the details of the respective To Do type.

Field Name	Field Description
Price Item Manager To Do Role	Indicates that users with the specified To Do role can approve the average price of the price item or price item bundle offered in a deal. Note that the price item manager can approve the average price when it is within the average price floor and ceil limits of the To Do role.  <b>Note:</b> It has a link. On clicking the link, the <b>To Do Role</b> screen appears where you can view the details of the respective To Do role.
Average Price Floor and Ceil Type	Indicates the manner in which you want to define the average price floor and ceil limits of the price item or price item bundle. The valid values are: <ul style="list-style-type: none"> <li>• Absolute Value Range</li> <li>• Spread Amount</li> <li>• Spread Percentage</li> </ul>

- **Price Item Characteristics** – Lists the characteristics of the price item or price item bundle. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the characteristic is effective for the price item or price item bundle.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value of the characteristic type.

- **Record Actions** – This section contains the following button:

Button Name	Button Description
Edit	Used to edit the details of the price item or price item bundle.

- **Record Information** – This section contains the following field:

Field Name	Field Description
Business Object	Indicates the business object using which the price item or price item bundle is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.

### **Parameters**

The **Parameters** zone lists the parameters which are associated with the price item or price item bundle. It contains the following columns:

Column Name	Column Description
Effective Start Date	Displays the date from when the parameter is associated with the price item or price item bundle.
Effective End Date	Displays the date till when the parameter is associated with the price item or price item bundle.
Parameter	Indicates the parameter which is associated with the price item or price item bundle.
	<b>Note:</b> It has a link. On clicking the link, the <b>Parameter</b> screen appears where you can view the details of the respective parameter.
Business Label	Displays the business label of the parameter.
Display Order	Indicates the order in which the parameter and its value should appear in the pricing parameter information string across the application.
Parameter Usage	Indicates whether you can use the parameter for aggregation and/or for defining the price item pricing. The valid values are: <ul style="list-style-type: none"> <li>• Aggregation</li> <li>• Pricing</li> </ul>
Mandatory	Indicates whether the parameter is mandatory while defining the price item pricing.
Priority	Indicates the priority in which optional parameters should be considered while determining best fit price for the price item or price item bundle.

On clicking the **Broadcast** (📡) icon corresponding to a parameter, the **Predefined Parameter Values for Price Item** zone appears where you can view the valid predefined parameter values of the price item or price item bundle.

#### **Predefined Parameter Values for Price Item**

The **Predefined Parameter Values for Price Item** zone lists the predefined parameter values which are valid for the price item or price item bundle. It contains the following columns:

Column Name	Column Description
Parameter Value	Displays the predefined parameter value.
Description	Displays the description of the predefined parameter value.

By default, the **Predefined Parameter Values for Price Item** zone does not appear in the **Price Item** screen. It appears when you click the **Broadcast** (📡) icon corresponding to a parameter in the **Parameters** zone.

### **Division-Specific Accrual Type Criteria for Price Item**

**Note:** This topic is not applicable for the health insurance business.

The **Division-Specific Accrual Type Criteria for Price Item** zone lists the accrual type criteria of the price item or price item bundle which is defined for the division. It contains the following column:

Column Name	Column Description
Accrual Type Criteria	Indicates whether the billable charges of the price item should be considered for accrual depending on the accrual criteria specified in the accrual type. The valid values are: <ul style="list-style-type: none"> <li>Actual</li> <li>Historical</li> <li>Not Applicable</li> </ul>

By default, the **Division-Specific Accrual Type Criteria for Price Item** zone does not appear in the **Price Item** screen. It appears when you click the **Broadcast** (📡) icon corresponding to a division in the **Divisions** zone.

### Related Topics

### Division-Specific Hierarchy for Price Item

**Note:** This topic is not applicable for the health insurance business.

The **Division-Specific Hierarchy for Price Item** zone lists the following in a tree structure:

- Information string of the hierarchy entity at the first level in the entity hierarchy relationship
- Information string of the hierarchy entities at the subsequent levels in the entity hierarchy relationship
- Information string of the price items which are associated with the hierarchy entities at different levels in the entity hierarchy relationship

For example,

Here, the Cash Management, US (at the first level), Payments, US (at the second level), and Statements, US (at the second level) are the hierarchy entity nodes. And, the ACH Payment, ACH Return, ACH Reversal, Mini Statement, and Yearly Statement are the price item nodes.

Each node in the tree has a link. If you click the link on the hierarchy entity node, the **Hierarchy Entity** screen appears where you can view the details of the respective hierarchy entity. However, if you click the link on the price item node, the **Price Item** screen appears where you can view the details of the respective price item.

It contains the following field:

Field Name	Field Description
Hierarchy	Displays the entity hierarchy relationship code.

In addition, it contains the following buttons:

Button Name	Button Description
Expand All	Used to expand all nodes at once in the entity hierarchy relationship.
Collapse All	Used to collapse all nodes at once in the entity hierarchy relationship.

By default, the **Division-Specific Hierarchy for Price Item** zone does not appear in the **Price Item** screen. It appears when you click the **Broadcast** (📢) icon corresponding to a division in the **Divisions** zone.

**Related Topics**

**Division-Specific Cost for Price Item**

**Note:** This topic is not applicable for the health insurance business.

The **Division-Specific Cost for Price Item** zone lists the costs of the price item or price item bundle which is defined for the division. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the cost of the price item or price item bundle is effective for the division.
Cost Type	Indicates the type of cost incurred in the division for the price item or price item bundle. The valid values are: <ul style="list-style-type: none"> <li>• Additional Fixed Cost</li> <li>• Additional Variable Cost</li> <li>• Fixed Third Party Cost</li> <li>• Fixed Internal Cost</li> <li>• Variable Internal Cost</li> <li>• Variable Third Party Cost</li> </ul>
Cost Value	Displays the cost amount.
Cost Currency	Indicates the currency in which the cost is specified. <p><b>Note:</b> It has a link. On clicking the link, the <b>Currency</b> screen appears where you can view the details of the respective currency.</p>

By default, the **Division-Specific Cost for Price Item** zone does not appear in the **Price Item** screen. It appears when you click the **Broadcast** (📡) icon corresponding to a division in the **Divisions** zone.

**Related Topics**

**Division-Specific Average Price Floor and Ceil Values for Price Item**

**Note:** This topic is not applicable for the health insurance business.

The **Division-Specific Average Price Floor and Ceil Values for Price Item** zone lists the average price floor and ceil limits of the price item or price item bundle which are defined for the division. It contains the following columns:

Column Name	Column Description
To Do Role	Indicates that users with the specified To Do role can approve the average price of the price item or price item bundle in a deal when it is within the specified floor and ceil limits.
	<b>Note:</b> It has a link. On clicking the link, the <b>To Do Role</b> screen appears where you can view the details of the respective To Do role.
Floor Value	Displays the floor (i.e. lower) limit of the To Do role.
	<b>Note:</b> This column appears when the <b>Absolute Value Range</b> option is selected for the <b>Average Price Floor and Ceil Limits</b> list for a price item or price item bundle.
Ceil Value	Displays the ceil (i.e. upper) limit of the To Do role.
	<b>Note:</b> This column appears when the <b>Absolute Value Range</b> option is selected for the <b>Average Price Floor and Ceil Type</b> list for a price item or price item bundle.
Floor and Ceil Currency	Indicates the currency in which the average price floor and ceil limits are defined for the price item or price item bundle.
	<b>Note:</b> It has a link. On clicking the link, the <b>Currency</b> screen appears where you can view the details of the respective currency.
Spread Amount	Indicates the spread amount specified while defining a price item or price item bundle or assigned to a To Do role.
	<b>Note:</b> This column appears when the <b>Spread Amount</b> option is selected for the <b>Average Price Floor and Ceil Type</b> list for a price item or price item bundle.
Spread Percentage	Indicates the spread percentage specified while defining a price item or price item bundle or assigned to a To Do role.
	<b>Note:</b> This column appears when the <b>Spread Percentage</b> option is selected for the <b>Average Price Floor and Ceil Type</b> list for a price item or price item bundle.

By default, the **Division-Specific Average Price Floor and Ceil Values for Price Item** zone does not appear in the **Price Item** screen. It appears when you click the **Broadcast** (📡) icon corresponding to a division in the **Divisions** zone.

#### **Price Item Relationship**

**Note:** This topic is not applicable for the health insurance business.

The **Price Item Relationship** zone lists the price items or price item bundles which are associated with the parent price item or added to the price item bundle. It contains the following columns:

Column Name	Column Description
Price Item Information	Displays information about the price item or price item bundle.
	<b>Note:</b> It has a link. On clicking the link, the <b>Price Item</b> screen appears where you can view the details of the respective price item or price item bundle.
Effective Start Date	Displays the date from when the price item or price item bundle is associated with the parent price item or added to the price item bundle.
Effective End Date	Displays the date till when the price item or price item bundle is associated with the parent price item or added to the price item bundle.
Relationship Type	Indicates how the price item or price item bundle is related to the parent price item or price item bundle. The valid values are: <ul style="list-style-type: none"> <li>• Bundle</li> <li>• Child Price Item</li> <li>• Custom</li> <li>• Denominator</li> <li>• Numerator</li> <li>• Other</li> <li>• Price Item</li> <li>• Product Group</li> <li>• Service</li> <li>• Service Group</li> </ul>
Bundle Type	Indicates the type of the price item bundle. The valid values are: <ul style="list-style-type: none"> <li>• Phantom</li> <li>• Ratio</li> <li>• Regular</li> </ul>
	<b>Note:</b> The data appears in this column when the associated price item is a bundle.
Price Item Parameters	Displays the parameters and their values based on which you want to determine pricing for the price item or price item bundle.

**Note:** Pagination is used to display limited number of records in this zone. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

You can filter the list using various search criteria (such as, **Price Item**, **Description**, **Effective Start Date**, and **Relationship Type**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (🔍) icon in the upper right corner of this zone.

You can change the layout of this zone. For more information on how to change the layout, see [Changing the Layout](#) on page 3208.

You can associate or disassociate a price item or price item bundle from a parent price item and add or remove a price item or price item bundle from a price item bundle by clicking the **Add/Edit** link in the upper right corner of this zone.

## Editing a Price Item or Price Item Bundle

### Prerequisites

To edit a price item or price item bundle, you should have:

- Contract types, To Do types, and To Do roles defined in the application
- To Do roles associated with the required To Do type
- Value defined for the **Default Contract Type** option type in the **C1\_PRICING** feature configuration

### Procedure

To edit a price item or price item bundle:

1. Search for the price item or price item bundle in the **Price Item** screen.
2. In the **Search Results** section, click the link in the **Price Item Information** column corresponding to the price item or price item bundle whose details you want to edit.

The **Price Item** screen appears.

3. Click the **Edit** button in the **Price Item** zone.

The **Price Item** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the price item or price item bundle.
- **Parameters** - Used to associate a parameter with the price item or price item bundle. These associated parameters are then used for aggregating transactions and/or for defining the price item pricing.

#### **Note:**

The **Parameters** section appears in the **Price Item** screen when the **Multi Price Parameter** option type of the **C1\_PPARM\_FLG** feature configuration is set to **True**.

You cannot associate parameters to the ratio and phantom price item bundles. Therefore, while defining a ratio or phantom price item bundle, the **Parameters** section does not appear in the **Price Item** screen.

- **Divisions** - Used to associate the price item or price item bundle with one or more divisions. In addition, it enables you to:
  - Associate the Service Quantity Identifiers (SQIs) with the Price Item or Price Item Bundle for a Division
  - Define the Accrual Type Criteria of the Price Item or Price Item Bundle for a Division

**Note:** This step is not applicable for the health insurance business.

- Associate the Price Item or Price Item Bundle with a Hierarchy Entity in an Entity Hierarchy Relationship of a Division

**Note:** This step is not applicable for the health insurance business.

- Define the Cost of the Price Item or Price Item Bundle for a Division

**Note:** This step is not applicable for the health insurance business.

- Define the Average Price Floor and Ceil Limits of the Price Item or Price Item Bundle for a Division

**Note:** This step is not applicable for the health insurance business.

- Define the Negotiability Floor and Ceil Values of the Price Item or Price Item Bundle for a Division

**Note:** This step is not applicable for the health insurance business.

- Define the Division-Specific Characteristics for the Price Item or Price Item Bundle
- **Price Item Characteristics** - Used to define characteristics (which are applicable across divisions) for the price item or price item bundle.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Price Item	Displays the price item or price item bundle.	Not applicable
Description	Used to specify the description for the price item or price item bundle.	Yes
Price Item Usage	<p>Used to indicate whether the price item or price item bundle is available for pricing or pricing and billing. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Pricing</b> - Used when you want to define pricing for the price item or price item bundle, but no charges should be created against it in the system.</li> </ul> <p><b>Note:</b> This option is not applicable for the health insurance business.</p> <ul style="list-style-type: none"> <li>• <b>Pricing and Billing</b> - Used when you want to define pricing and create charges for the price item or price item bundle in the system.</li> </ul> <p><b>Note:</b> You can change the price item usage of a price item or price item bundle from <b>Pricing</b> to <b>Pricing and Billing</b>. But, you cannot change the price item usage of a price item or price item bundle from <b>Pricing and Billing</b> to <b>Pricing</b>.</p>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Price Item Type	<p>Used to indicate the type of the price item or price item bundle. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Rate</b> - Used when you want to create a rate based price item or price item bundle. For example, savings, current, and loan interest services (i.e. price items) are rate based price items.</li> </ul> <div style="border: 1px solid black; padding: 2px; margin: 5px 0;"> <p><b>Note:</b> This option is not applicable for the health insurance business.</p> </div> <ul style="list-style-type: none"> <li>• <b>Fees</b> - Used when you want to create a fee based price item or price item bundle. For example, debit credit service (i.e. price item) is a fee based price item.</li> </ul> <div style="border: 1px solid black; padding: 2px; margin: 5px 0;"> <p><b>Note:</b> This field appears when the <b>Pricing</b> option is selected from the <b>Price Item Usage</b> list.  You cannot create a price item bundle when the <b>Pricing</b> option is selected from the <b>Price Item Usage</b> list and <b>Rate</b> option is selected from the <b>Price Item Type</b> list.  The system automatically sets the price item type of those price items or price item bundles which are available for pricing and billing to <b>Fees</b>. Therefore, this field does not appear when the <b>Pricing and Billing</b> option is selected from the <b>Price Item Usage</b> list.</p> </div>	Yes
Bundle	<p>Used to indicate whether you want to create a price item bundle. The valid values are:</p> <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul> <div style="border: 1px solid black; padding: 2px; margin: 5px 0;"> <p><b>Note:</b> This field is not applicable for the health insurance business.</p> </div>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Bundle Type	<p>Used to indicate the type of the price item bundle. If the <b>Pricing and Billing</b> option is selected from the <b>Price Item Usage</b> list, the valid values are:</p> <ul style="list-style-type: none"> <li>• <i>Phantom</i></li> <li>• <i>Ratio</i></li> <li>• <i>Regular</i></li> </ul> <p>However, if the <b>Pricing</b> option is selected from the <b>Price Item Usage</b> list and the <b>Fees</b> option is selected from the <b>Price Item Type</b> list, you can only define a regular price item bundle. Therefore, by default, the value is set to <b>Regular</b>.</p>	Yes (Conditional)
	<p><b>Note:</b></p> <p>This field appears when the <b>Yes</b> option is selected from the <b>Bundle</b> list.</p> <p>This field is enabled when the <b>Pricing and Billing</b> option is selected from the <b>Price Item Usage</b> list and the <b>Yes</b> option is selected from the <b>Bundle</b> list.</p> <p>You cannot define a price item bundle when the <b>Pricing</b> option is selected from the <b>Price Item Usage</b> list and <b>Rate</b> option is selected from the <b>Price Item Type</b> list.</p> <p>This field is not applicable for the health insurance business.</p>	<p><b>Note:</b> This field is required when you are creating a price item bundle.</p>
Global Price List	<p>Used to indicate whether the price item or price item bundle can be assigned to a global price list. The valid values are:</p> <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	Yes
Contract Type	<p>Used to indicate the contract type that you want to associate with the price item or price item bundle.</p>	Yes
	<p><b>Note:</b></p> <p>This field appears when the <b>Pricing and Billing</b> option is selected from the <b>Price Item Usage</b> list.</p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Contract Type</b> field. On clicking the <b>Search</b> icon, the <b>Contract Type Search</b> window appears.</p>	

Field Name	Field Description	Mandatory (Yes or No)
Price Item Manager To Do Type	<p>Used to indicate the To Do type using which a To Do should be created when the deal creator or approver requests the price item manager (i.e. clicks the <b>Send Price Items for Approval</b> button) to approve the average price for the price item or price item bundle offered in a deal.</p> <p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to the <b>Price Item Manager To Do Type</b> field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.</p> <p>On specifying the To Do type, the description of the To Do type appears corresponding to the <b>Price Item Manager To Do Type</b> field.</p> <p>This field is not applicable for the health insurance business.</p>	No
Price Item Manager To Do Role	<p>Used to indicate that users with the specified To Do role can approve the average price for the price item or price item bundle offered in a deal. Note that the price item manager can approve the average price when it is within the average price floor and ceil limits defined for the To Do role.</p> <p><b>Note:</b></p> <p>The list appears when the price item manager To Do type is selected from the respective field. It includes only those To Do roles which are associated with the price item manager To Do type.</p> <p>This field is not applicable for the health insurance business.</p>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required when the price item manager To Do type is specified for the price item or price item bundle.</p>

Field Name	Field Description	Mandatory (Yes or No)
Average Price Floor and Ceil Type	<p>Used to indicate the manner in which you want to define the average price floor and ceil limits for the price item or price item bundle. The valid value is:</p> <ul style="list-style-type: none"> <li>• <b>Absolute Value Range</b> - Used when you want to define the average price floor and ceil limits in the absolute values. For example, the average price for the price item or price item bundle should be between 10\$ to 15\$.</li> <li>• <b>Spread Amount</b> - Used when you want to define the average floor and ceil limits based on the spread amount.</li> <li>• <b>Spread Percentage</b> – Used when you want to define the average floor and ceil limits based on the spread percentage.</li> </ul>	Yes (Conditional)
		<p><b>Note:</b> This field is required when you are defining the average price floor and ceil limits of the price item or price item bundle for a division.</p>
		<p><b>Note:</b></p> <ul style="list-style-type: none"> <li>• In case of <b>Spread Amount</b> and <b>Spread Percentage</b> options, the system calculates the average price of a price item and based on the average price and the spread amount or spread percentage, the average floor and ceil limits are derived.</li> <li>• This field is not applicable for the health insurance business.</li> </ul>

4. Modify the required details in the **Main** section.
5. Associate, edit, or disassociate parameters from the price item or price item bundle, if required.

**Note:**

You can edit the parameter details and remove a parameter from the price item or price item bundle when the parameter or any other parameter from the same date range is not yet used for aggregation or for defining the price item pricing.

You can add a parameter which is used for aggregation, whenever required. However, you can add a parameter which is used for pricing when any other parameter from the same date range is not yet used for aggregation or for defining the price item pricing.

6. For each predefined parameter which is associated with the price item or price item bundle, you can define a set of valid predefined parameter values for the price item or price item bundle, if required.
7. Associate or disassociate the price item or price item bundle from the divisions, if required.

**Note:** If the price item or price item bundle is associated to a division to which you do not have access, then the corresponding row in the **Divisions** section is grayed out.

8. Associate or disassociate the SQIs from the price item or price item bundle for the required divisions.
9. Define, edit, or remove the accrual type criteria of the price item or price item bundle from the required divisions.

**Note:** This step is not applicable for the health insurance business.

10. Associate or disassociate the price item or price item bundle from a hierarchy entity in an entity hierarchy relationship of the required divisions.

**Note:** This step is not applicable for the health insurance business.

11. Define, edit, or remove the cost of the price item or price item bundle from the required divisions.

**Note:** This step is not applicable for the health insurance business.

12. Define, edit, or remove the average price floor and ceil limits of the price item or price item bundle from the required divisions.

**Note:** This step is not applicable for the health insurance business.

13. Define, edit or remove the rate negotiability floor and ceil values of the price item or price item bundle for the required divisions.

**Note:** This step is not applicable for the health insurance business.

14. Define, edit, or remove the division-specific characteristics from the price item or price item bundle. if required.

15. Define, edit, or remove characteristics of the price item or price item bundle, if required.

16. Click **Save**.

The changes made to the price item or price item bundle are saved.

## Price List

---

A price list allows you to define standard prices for a group of price items. In other words, a price list is a rate card for price items or services which are offered to the accounts or persons. You can create more than one price list. For example, you can create a price list for large, medium-sized, and small customers. You can also create a set of price lists for different regions. You can define two types of price lists — **Standard** and **Promotional**. You can also set eligibility criteria for the price list with effective start date, end date, and description. At present, there is no functionality associated with the price list type. The implementation team can use the price list type to define the custom logic as per the business requirements.

A price list and price item pricing within the price list are effective for a particular duration. You can define multiple pricing for the same price item and variance parameter or product parameters combination within a price list when the price item pricing date range is different. You can assign the same price item in multiple price lists and define different pricing for the price item in each price list based on the business requirements.

The system enables you to specify the duration for which the price list is available for assignment to an account or a person. However, note that at present, the availability start and end dates are not used in the product while assigning a price list to an account or a person. If required, the implementation team can build the custom logic using the availability start and end dates in the product.

Once you create a price list, you have to assign price items to the price list and define pricing for each price item assigned to the price list. The price lists are then assigned to accounts or persons to indicate the prices that will be charged for various price items or services offered to them. You can assign multiple price lists to an account or a person for an overlapping date range. But, you need to specify the priority or order for the price list in which the pricing from the price list should be considered. You can also assign the same price list to multiple accounts or persons.

You can define whether the account or person can avail the price item pricing listed on the parent or grandparent price list if it is not available on the assigned price list. In other words, you can define whether the account or person can inherit price item pricing from the price list hierarchy.

The system allows you to create the following:

- **Default Price List** – You can create a price list and set it as a default price list for a particular division. To define a default price list for a division, you need to set the value for the **Default Price List ID** parameter in the price assignment search algorithm which is attached to the division. If the effective price item pricing is not available at any level in the customer hierarchy, the system checks whether the default price list is specified in the price assignment search algorithm. If the default price list is specified in the algorithm, the system checks whether effective price item pricing is available in the default price list and accordingly uses the price item pricing. You can have the same price list as a the default price list for multiple divisions.
- **Global Price List** – You can create one global price list in the system. It is used when the price item pricing is not available at any level in the customer hierarchy and in the default price list associated with the division. You can assign only those price items in the global price list whose the **Global Price List** option is set to **Yes**. The global price list is used while searching an effective price item pricing when the **Global Price List** parameter in the price assignment search algorithm (attached to the division) is set to **Y**. Finally, if the effective price item pricing is not available in the default and/or global price list, an error message occurs indicating that the effective price item pricing is not available in the system.
- **Template Price List** – You can define a template price list and assign template price item pricing to a template price list. You cannot assign template price list to an account or a person. You can only create a copy of a template

price item pricing which is assigned to a template price list. Once you create a copy of the template price item pricing, you can save the new price item pricing in either **Active** or **Proposed** status.

## Price List (Used for Searching)

The **Price List** screen allows you to search for a price list using various search criteria. It also allows you to create a price list. This screen consists of the following zones:

- [Search Price List](#) on page 758
- [Price List Price Items](#) on page 761
- [Price Item Pricing](#)
- [Pricing Structure](#)

### Search Price List

The **Search Price List** zone allows you to search for a price list using various search criteria. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for a price list using the price list details. The valid value is: <ul style="list-style-type: none"> <li>• Price List Details</li> </ul>	Yes
	<b>Note:</b> By default, the <b>Price List Details</b> option is selected.	
Price List ID	Used to search a particular price list.	No
Price List Description	Used to search a price list with a particular description.	No
Effective Start Date	Used to search price lists which are effective from a particular date.	No
Effective End Date	Used to search price lists which are effective till a particular date.	No
Price List Type	Used to search a particular type of price lists. The valid values are: <ul style="list-style-type: none"> <li>• Promotional</li> <li>• Standard</li> </ul>	No
	<b>Note:</b> By default, the <b>Standard</b> option is selected.	
Global Price List	Used to indicate whether you want to search a global price list. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	No

Field Name	Field Description	Mandatory (Yes or No)
Availability Start Date	Used to search price lists which are available for assignment to an account or a person from a particular date.	No
	<b>Note:</b> By default this field does not appear. This field appears when you click the <b>Advanced Search</b> link in the upper right corner of the <b>Search Price List</b> zone.	
Availability End Date	Used to search price lists which are available for assignment to an account or a person till a particular date.	No
	<b>Note:</b> By default this field does not appear. This field appears when you click the <b>Advanced Search</b> link in the upper right corner of the <b>Search Price List</b> zone.	
Status	Used to search price lists with a particular status. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> <li>• Proposed</li> <li>• Template</li> </ul>	No
	<b>Note:</b> By default this field does not appear. This field appears when you click the <b>Advanced Search</b> link in the upper right corner of the <b>Search Price List</b> zone.	
Division	Used to search price lists which are associated with a particular division.	No
	<b>Note:</b> You can only view those divisions to which you have access in the <b>Division</b> list.	
Parent Price List	Used to search price lists which inherit pricing from a particular parent price list.	No
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Price List Search</b> window appears. By default this field does not appear. This field appears when you click the <b>Advanced Search</b> link in the upper right corner of the <b>Search Price List</b> zone.	
Parent Price List Effective Date	Used to search price lists that can inherit pricing from a parent price list which is effective from a particular date.	No
	<b>Note:</b> By default this field does not appear. This field appears when you click the <b>Advanced Search</b> link in the upper right corner of the <b>Search Price List</b> zone.	

**Note:** You must specify at least one search criterion while searching for a price list.

- **Search Results** – On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Price List Information	Displays information about the price list. <b>Note:</b> It has a link. On clicking the link, the <b>Price List</b> screen appears where you can view the details of the respective price list.
Status	Indicates the status of the price list. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> <li>• Proposed</li> <li>• Template</li> </ul>
Effective Start Date	Displays the date from when the price list is effective.
Effective End Date	Displays the date till when the price list is effective.
Availability Start Date	Displays the date from when the price list is available for assignment to an account or a person.
Availability End Date	Displays the date till when the price list is available for assignment to an account or a person.
Duplicate	On clicking the <b>Duplicate</b> (📄) icon, the <b>Price List</b> screen appears where you can create a new price list using an existing price list.
Price List Pricing	On clicking the <b>View</b> (🔗) icon in the <b>Price List Pricing</b> column, the <b>Price List Price Item Pricing</b> screen appears where you can view and edit a list of price items pricing information assigned to the price list.
Price List Assigned To	On clicking the <b>View</b> (🔗) icon in the <b>Price List Assigned To</b> column, the <b>Price List Assignments</b> screen appears where you can view the details of the persons and accounts to which the price list is assigned.
Eligible Accounts/ Persons	On clicking the <b>View</b> (🔗) icon in the <b>Eligible Accounts/Persons</b> column, the <b>Entities Eligible for Price List Assignment</b> screen appears where you can search for a list of eligible accounts and persons to which you want to assign the price list in a particular division.

**Note:**

However, when you search for a price list by specifying the date (which can be current, past or future date) in the **Parent Price List Effective Date** field, the system retrieves the price lists that meet the search criteria along with the details of the parent price list that is effective on that date.

Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

By default, the **Filter** area is visible. You can hide the **Filter** area by clicking the **Filters** (🔍) icon in the upper right corner of this zone.

On clicking the **Broadcast** (📡) icon corresponding to the **Price List Information** field, the **Price List Price Items** zone appears where you can view a list of price items to which the price list is assigned.

### Price List Price Items

The **Price List Price Items** zone lists price items that are assigned to the price list. You will not find any records in this zone if the price list does not have any price items assigned to it. It contains the following columns:

Column Name	Column Description
Pricing Information	Displays the concatenated string consisting of pricing information and pricing ID which are separated by a comma (,) for the price list.  <b>Note:</b> It has a link. On clicking the link, the <b>Price Item Pricing</b> screen appears where you can view the pricing information of the respective price list.
Price Item	Displays the price item or price item bundle.
Pricing Parameters	Used to specify multiple parameters based on which you want to determine the pricing utilization.  <b>Note:</b> This column appears only when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARAM_FLG)</b> feature configuration is set to <b>True</b> .
Pricing Status	Displays the status of pricing for the price item. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> </ul>
Start Date	Displays the date from when the price item pricing is effective for the price list.
End Date	Displays the date till when the price item pricing is effective for the price list.

Column Name	Column Description
Price Assignment Type	<p>Indicates the type of the price item pricing. The valid values are:</p> <ul style="list-style-type: none"> <li>• Regular</li> <li>• Post Processing</li> <li>• Post Processing – Invoice Based</li> <li>• Post Processing – Price Item Based</li> </ul> <p><b>Note:</b> This column appears when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>True</b>.</p>
Duplicate	<p>On clicking the <b>Duplicate</b> (📄) icon, the <b>Price Item Pricing</b> screen appears where you can define a new price item pricing using an existing price item pricing.</p>

By default, the **Price List Price Items** zone does not appear in the **Price List** screen. It appears when you click the **Broadcast** (📡) icon corresponding to the price list in the **Search Price List** zone.

You can filter the list using various search criteria (such as, **Price Item** and **Effective Start Date**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (🔍) icon in the upper right corner of this zone.

On clicking the **Broadcast** (📡) icon corresponding to the **Pricing Information** field, the **Price Item Pricing** and **Pricing Structure** zones appear where you can view the details about the price item pricing and its structure.

You can change the layout of this zone. For more information on how to change the layout, see [Changing the Layout](#) on page 3208.

## **Searching for a Price List**

### **Prerequisites**

To search for a price list, you should have:

- Divisions defined in the application
- Price list associated with the division to which the user belongs

### **Procedure**

To search for a price list:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Pricing Management** and then click **Price List**.  
A sub-menu appears.

- Click the **Search** option from the **Price List** sub-menu.

The **Price List** screen appears.

- Enter the search criteria in the **Search Price List** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

- Click **Search**.

A list of price lists that meet the search criteria appears in the **Search Results** section.

**Note:** Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

### **Related Topics**

<b>For more information on...</b>	<b>See...</b>
<b>Price List</b> screen	<a href="#">Price List (Used for Viewing)</a> on page 773
<b>Search Price List</b> zone	<a href="#">Search Price List</a> on page 758

### **Viewing Price Items Assigned to a Price List**

#### **Prerequisites**

To view price items assigned to a price list, you should have:

- An algorithm defined using the **C1-PLPINFO** algorithm type and attached to **Pricelist Products Assignment Information** system event in the **Algorithms** tab of the **Installation Options – Framework** screen

#### **Procedure**

To view price items assigned to a price list:

- Search for the price list in the **Price List** screen.
- In the **Search Results** section, click the **Broadcast** () icon corresponding to the price list whose price items details you want to view.

The **Price List Price Items** zone appears.

- View the price items that are assigned to the price list in the **Price List Price Items** zone.

### **Related Topics**

### **Defining a Price List**

#### **Procedure**

To define a price list:

- Click the **Menu** link in the **Application** toolbar.

A list appears.

- From the **Main** menu, select **Pricing Management** and then click **Price List**.

A sub-menu appears.

- Click the **Add** option from the **Price List** sub-menu.

The **Price List** screen appears. It consists the following sections:

- **Main** - Used to specify basic details about the price list.
- **Hierarchy** - Used to associate the price list with one or more parent price lists for a particular duration.
- **Divisions** - Used to associate the price list with one or more divisions.
- **Eligibility** - Used to define eligibility criteria for the price list.
- **Characteristics** - Used to define the characteristics for the price list.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Price List Description	Used to specify the description for the price list.	Yes
Effective Start Date	Used to specify the date from when the price list is effective.	Yes
	<b>Note:</b> By default, the current date appears in this field.	
Effective End Date	Used to specify the date till when the price list is effective.	No
	<b>Note:</b> The effective end date cannot be earlier than the effective start date.	
Price List Type	Used to indicate the type of the price list. The valid values are: <ul style="list-style-type: none"> <li>• Standard</li> <li>• Promotional</li> </ul>	Yes
	<b>Note:</b> By default, the <b>Standard</b> option is selected.	
Global Price List	Used to indicate whether the price list is a global price list. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	Yes
Availability Start Date	Used to the specify the date from when the price list is available for assignment to an account or a person.	No
	<b>Note:</b> At present, the availability start date is not used in the price item while assigning a price list to an account or a person. It is available for future use.	

Field Name	Field Description	Mandatory (Yes or No)
Availability End Date	Used to the specify the date till when the price list is available for assignment to an account or a person.  <b>Note:</b> The availability end date cannot be earlier than the availability start date.  At present, the availability end date is not used in the price item while assigning a price list to an account or a person. It is available for future use.	No
Available for Deal Pricing	Used to indicate whether the price list is available for deal pricing or not.	No
Standard for Deal Pricing	Used to indicate whether the price list is applicable for defining costs or floor and ceil limits or commitments at the time of deal pricing.	No
Validity Period (in Days)	Used to specify the period in days for which the price list is valid. It is used to calculate price list assignment validity end date while assigning the price list to an account or a person.	No
Status	Used to indicate the status of the price list. The valid values are: <ul style="list-style-type: none"> <li>• <b>Active</b> - Used to indicate that the price list is used for billing.</li> <li>• <b>Inactive</b> - Used to indicate that the price list is no longer used for billing.</li> <li>• <b>Proposed</b> - Used to indicate that the price list is used for quotations.</li> <li>• <b>Template</b> - Used to indicate that the price list is a template price list.</li> </ul> <b>Note:</b> By default, the <b>Active</b> option is selected.	Yes

**Tip:** Alternatively, you can access the **Price List** screen by clicking the **Add** button in the **Page Title** area of the **Price List** screen.

4. Enter the required details in the **Main** section.

**Note:** By default the **Main** section is displayed.

5. Click the **Show All** link from the **Section** to view all the sections and define or associate the following:
- Associate the price list with one or more parent price list, if required.
  - Associate price list with one or more divisions, if required.
  - Define eligibility criteria for the price list, if required.
  - Define characteristics for the price list, if required.
6. Click **Save**.

**Note:** The price list ID is generated automatically when the price list is created.

### Defining the Price List Hierarchy

Oracle Revenue Management and Billing allows you to define the price list hierarchy. It helps you to inherit the price item pricing from the parent price list if the price item pricing is not available in the price list (assigned to the account, person, or parent person). And, if the price item pricing is not available in the parent price list, the system will search for the price item pricing in the parent's parent price list (i.e. in the grandparent price list) and continue till it reaches the last level in the hierarchy.

In other words, when you define the price list hierarchy and assign the price list to an account or a person, the account or person can avail the price item pricing listed on the parent or grandparent price list if it is not available on the assigned price list. However, if the price item pricing is available on both the assigned and parent price lists, the system derives the price item pricing from the assigned price list.

You can define multiple parent price lists for a price list. But, only one parent price list is effective for a particular duration. Two or more price lists can have the same parent price list.

### Procedure

To define the price list hierarchy:

1. Click the **Hierarchy** or **Show All** link from the **Section** in the **Price List** screen when you are defining, editing, or copying a price list.

The **Hierarchy** section appears. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Parent Price List Effective From Date	Used to specify the date from when the price list inherits pricing from the parent price list.	Yes (Conditional) <b>Note:</b> This field is required when you are associating the price list with a parent price list.
Parent Price List Effective To Date	Used to specify the date till when the price list inherits pricing from the parent price list. <b>Note:</b> The parent price list effective to date cannot be earlier than the parent price list effective from date and later than price list effective end date.	No

Field Name	Field Description	Mandatory (Yes or No)
Parent Price List	Used to specify the parent price list ID to which you want to associate the price list.	Yes (Conditional)
	<p><b>Note:</b></p> <p>The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Price List Search</b> window appears.</p> <p>On specifying the parent price list, the description of the parent price list appears corresponding to the <b>Parent Price List</b> field.</p>	<p><b>Note:</b> This field is required when you are associating the price list with a parent price list.</p>

- Enter the required details in the **Hierarchy** section.

**Note:** You can search for a price list by clicking the **Search** (🔍) icon corresponding to the **Parent Price List** field.

- If you want to associate the price list with more than one parent price list, click the **Add** (+) icon corresponding to the parent price list and then repeat step 2.

**Note:**

You can associate a price list with multiple parent price lists. But, only one parent price list is effective for a particular duration. Also, while associating a price list with a parent price list, you can only specify a price list which is effective during the specified duration.

If you want to remove a parent price list from the price list hierarchy, click the **Delete** (🗑️) icon corresponding to the parent price list.

- Click **Save**.

The price list is associated with the parent price lists.

### Defining a Characteristic for a Price List

#### Prerequisites

To define a characteristic for a price list, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Price List**)

#### Procedure

To define a characteristics for a price list:

- Click the **Characteristics** or **Show All** link from the **Section** in the **Price List** window when you are defining, editing, or copying a price list.

The **Characteristics** section appears. It contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the price list.	Yes (Conditional)
		<b>Note:</b> This field is required when you are defining a characteristic for the price list.
Characteristic Type	Used to indicate the characteristic type.  <b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Price List</b> .	Yes (Conditional)
		<b>Note:</b> This field is required when you are defining a characteristic for the price list.
Characteristic Value	Used to specify the value for the characteristic type.  <b>Note:</b>  The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Predefined Characteristic Search</b> window appears.  On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	Yes (Conditional)
		<b>Note:</b> This field is required when you are defining a characteristic for the price list.

- Enter the required details in the **Characteristics** section.

**Note:** If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

- If you want to define more than one characteristic for the price list, click the **Add** (+) icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from the price list, click the **Delete** (🗑️) icon corresponding to the characteristic.

- Click **Save**.

The characteristics are defined for the price list.

### Associating a Price List with a Division

You can assign a price list only to those accounts or persons which belong to the division to which the price list is associated. Therefore, you need to associate the price list with appropriate divisions.

**Prerequisites**

To associate a price list with a division, you should have:

- Divisions defined in the application

**Procedure**

To associate a price list with a division:

1. Click the **Divisions** or **Show All** link from the **Section** in the **Price List** window when you are defining, editing, or copying a price list.

The **Divisions** section appears. It contains the following field in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Division	Used to indicate the division to which you want to associate the price list.	No
	<b>Note:</b> You can only view those divisions to which you have access in the <b>Division</b> list.	

2. Select the required division from the list.
3. If you want to associate the price list with more than one division, click the **Add (+)** icon corresponding to the division and then repeat step 2.

**Note:** However, if you want to remove the price list from a division, click the **Delete** (🗑️) icon corresponding to the division.

4. Click **Save**.

The price list is associated with the divisions.

**Tip:** Alternatively, you can associate a price list with a division using the **Division** screen.

**Defining Eligibility Criteria for a Price List****Prerequisites**

To define eligibility criteria for a price list, you should have:

- The **Price List Eligibility Criteria** check box selected in the **Parameter Usage** section while defining the parameter

**Procedure**

To define eligibility criteria for a price list:

1. Click the **Eligibility** or **Show All** link from the **Section** in the **Price List** screen when you are defining, editing, or copying a price list.

The **Eligibility** section appears. It contains the following fields in a grid:

Column Name	Column Description	Mandatory (Yes or No)
Criteria	On clicking the <b>Add</b> (+) icon, you can associate eligibility criteria of parameters for the price list.	Yes (Conditional) <b>Note:</b> This field is required when you are defining an eligibility criteria for the price list.
Effective Start Date	Used to specify the date from when the criteria is effective for the price list.	Yes (Conditional) <b>Note:</b> This field is required when you are defining an eligibility criteria for the price list.
Effective End Date	Used to specify the date till when the criteria is effective for the price list.	No
Description	Used to specify the description for the criteria type.	Yes

- Enter the required details in the **Eligibility** section.
- If you want to define more than one eligibility criteria for the price list, click the **Add** (+) icon and then repeat step 2.

**Note:** However, if you want to remove the eligibility criteria, click the **Delete** (🗑) icon corresponding to the criteria.

- Associate eligibility criteria of parameter for the price list, if required.
- If you want to define more than one eligibility criteria of parameter for the price item, click the **Add** (+) icon corresponding to the parameter.

**Note:** However, if you want to remove the eligibility criteria of parameter for the price item, click the **Delete** (🗑) icon corresponding to the parameter.

- Click **Save**.

The eligibility criteria are defined for the price list.

### Copying a Price List

Instead of creating a price list from scratch, you can create a new price list using an existing price list. This is possible through copying a price list. On copying a price list, the details including the pricing parameters, divisions,

characteristics, eligibility criteria, and the assigned price items are copied to the new price list. You can then edit the details, if required.

### **Prerequisites**

To copy a price list, you should have:

- Price list (whose copy you want to create) defined in the application
- Price list (whose copy you want to create) associated with the division to which the user belongs

### **Procedure**

To copy a price list:

1. Search for the price list in the **Price List** screen.
2. In the **Search Results** section, click the **Copy** (📄) icon in the **Copy** column corresponding to the price list using which you want to define a new price list.

The **Price List** screen appears. It contains the following sections:

- **Main** – Used to specify basic details about the price list.
- **Hierarchy** – Used to define parent price list for the price list for a particular duration.
- **Divisions** – Used to associate price list with one or more divisions.
- **Eligibility Criteria** – Used to define eligibility criteria for price list.
- **Characteristics** – Used to define the characteristics (which are applicable across divisions) for the price list.

The **Main** section contains the following fields:

<b>Field Name</b>	<b>Field Description</b>	<b>Mandatory (Yes or No)</b>
Price List Description	Used to specify the description for the price list.	Yes
Effective Start Date	Used to specify the date from when the price list is effective	Yes
Effective End Date	Used to specify the date till when the price list is effective.	No
Price List Type	Used to indicate the type of the price list. The valid values are: <ul style="list-style-type: none"> <li>• Standard</li> <li>• Promotional</li> </ul>	Yes
Global Price List	Used to Indicate whether the price list is a global price list. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	Yes
Availability Start Date	Used to specify the date from when the price list is available for assignment to an account or a person.	Yes
Availability End date	Used to specify the date till when the price list is available for assignment to an account or a person.	No
Available for Deal Pricing	Used to indicate whether the price list is available for deal pricing or not.	No

Field Name	Field Description	Mandatory (Yes or No)
Standard for Deal Pricing	Used to indicate whether the price list is applicable for defining costs or floor and ceil limits or commitments at the time of deal pricing.	No
Validity Period (in Days)	Used to specify the period in days for which the price list is valid. It is used to calculate price list assignment validity end date while assigning the price list to an account or a person.	Yes
Status	Used to indicate the status of the price list. The valid values are: <ul style="list-style-type: none"> <li>Active</li> <li>Proposed</li> <li>Template</li> </ul>	Yes
Copy Pricing	Used to indicate whether you want to copy the pricing information to the price list. The valid values are: <ul style="list-style-type: none"> <li>All</li> <li>None</li> </ul>	Yes (Conditional)

- Enter the required details in the **Main** section.
- Add, edit, or remove the parent price list details, if required.
- Associate or disassociate the price list from the required divisions.
- Define, edit, or remove the price list eligibility criteria and parameter eligibility criteria for price list in the, if required.
- Define, edit, or remove characteristics of the price list, if required.
- Click **Save**.

The new price list is defined.

**Note:** The price list ID is generated automatically when the price list is defined.

### Viewing the Price List Details

#### Procedure

To view the details of a price list:

- Search for the price list in the **Price List** screen.

- In the **Search Results** section, click the link in the **Price List Information** column corresponding to the price list whose details you want to view.

The **Price List** screen appears. It contains the following zones:

- [Price List](#) on page 773
  - [Eligibility Criteria](#) on page 775
  - [Price List Price Items](#) on page 761
- View the basic details, hierarchy, divisions, and characteristics of the price list in the **Price List** zone.
  - View the eligibility criteria to which the price list is associated in the **Eligibility Criteria** zone.
  - View the price items that are assigned to the price list in the **Price List Price Items** zone.

### Related Topics

## Price List (Used for Viewing)

The **Price List** screen allows you to view the details of a price list. It also allows you to edit a price list. It contains the following zones:

- **Price List** - Displays the basic details of the price list.
- **Eligibility Criteria** - Displays the eligibility criteria for the price list.
- **Price List Price Items** - Displays the price items that are assigned to the price list.
- **Price Item Pricing**
  - Displays the price item pricing for price items that are assigned to the price list.
- **Pricing Structure**
  - Displays the structure of the price item pricing for price item that are assigned to the price list.

### Price List

The **Price List** zone displays the details of the price list. It contains the following sections:

- **Main** - Displays basic information about the price list. It contains the following fields:

Field Name	Field Description
Price List ID	Displays the price list ID.
Price List Description	Displays the description for the price list.
Effective Start Date	Displays the date from when the price list is effective.
Effective End Date	Displays the date till when the price list is effective.
Price List Type	Indicates the type of the price list. The valid values are: <ul style="list-style-type: none"> <li>• Standard</li> <li>• Promotional</li> </ul>

Field Name	Field Description
Global Price List	Indicates whether the price list is a global price list. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>
Availability Start Date	Displays the date from when the price list is available for assignment to an account or a person.
Availability End date	Displays the date till when the price list is available for assignment to an account or a person.
Available for Deal Pricing	Indicates whether the price list can be assigned with a person or an account.
Standard for Deal Pricing	Indicates whether the price list can be considered to compare the average floor and ceil limit with the standard and average price of a price item associated with a price list.
Validity Period (in Days)	Displays the period in days for which the price list is valid. It is used to calculate price list assignment validity end date while assigning the price list to an account or a person.
Status	Indicates the status of the price list. The valid values are: <ul style="list-style-type: none"> <li>• <b>Active</b> – Indicates that the price list is used for billing.</li> <li>• <b>Inactive</b> – Indicates that the price list is no longer used for billing.</li> <li>• <b>Proposed</b> – Indicates that the price list is used for quotations.</li> <li>• <b>Template</b> – Indicates that the price list is a template price list.</li> </ul>

- **Hierarchy** - Lists the parent price list from which the price list has inherited the price item pricing for a particular duration. It contains the following columns:

Column Name	Column Description
Parent Price List ID	Displays the ID of the parent price list.
Parent Price List Effective From Date	Displays the date from when the price list can inherit pricing from the parent price list.
Parent Price List Effective To Date	Displays the date till when the price list can inherit pricing from the parent price list.

- **Divisions** - Lists the divisions to which the price list is associated. It contains the following column:

Column Name	Column Description
Division	Displays the division to which the price list is associated.  <b>Note:</b> It has a link. On clicking the link, the <b>Division</b> screen appears where you can view the details of the respective division.

- **Characteristics** - Lists the characteristics that are associated with the price list. It contains the following columns:

Column Name	Column Description
Effective Date	Displays the date from when the characteristic is effective for the price list.
Characteristic Type	Displays the characteristic type.

Column Name	Column Description
Characteristic Value	Displays the value for the characteristic type.

- **Record Actions** - This section contains the following button:

Button Name	Button Description
Edit	Used to edit the details of the price list.

- **Record Information** - This section contains the following field:

Field Name	Field Description
Business Object	Indicates the business object using which the price list is created. In addition, a context menu appears corresponding to this field which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Business Object</b> screen appears where you can view the details of the respective business object.

### Eligibility Criteria

The **Eligibility Criteria** zone lists the eligibility criteria of the price list. It contains the following columns:

Field Name	Field Description
Effective Start Date	Displays the date from when the criteria is effective for the price list.
Effective End Date	Displays the date till when the criteria is effective for the price list.
Description	Displays the description for the criteria type.
Sequence	Indicates the order in which the price list eligibility criteria should be executed.
Parameter	Indicates the parameter (on the left hand side) is used in the pricing eligibility criteria.
Operator	Displays the relational operator to define the relation between the parameter name and value.
Parameter Value Type	Indicates whether the parameter (on the left hand side) must be compared against another parameter (on the right hand side) or directly against a parameter value.
Parameter	Indicates the parameter (on the right hand side) against which you want to compare the parameter (on the left hand side).
Parameter Value	Indicates the parameter value against which you want to compare the parameter (on the left hand side).

Field Name	Field Description
Is True	Indicates what happens when the condition is true (satisfied). The valid values are: <ul style="list-style-type: none"> <li>• <b>Check Next Condition</b> – Indicates that the condition with consecutive sequence number should be executed.</li> <li>• <b>Rule Is False</b> – Indicates that the action specified in the <b>Rule False Action</b> field should be executed</li> <li>• <b>Rule Is True</b> – Indicates that the action specified in the <b>Rule True Action</b> field should be executed.</li> </ul>
Is False	Indicates what happens when the condition is false (not satisfied). The valid values are: <ul style="list-style-type: none"> <li>• <b>Check Next Condition</b> – Indicates that the condition with consecutive sequence number should be executed.</li> <li>• <b>Rule Is False</b> – Indicates that the action specified in the <b>Rule False Action</b> field should be executed</li> <li>• <b>Rule Is True</b> – Indicates that the action specified in the <b>Rule True Action</b> field should be executed.</li> </ul>
Is Insufficient	Indicates what happens when the data is insufficient. The valid values are: <ul style="list-style-type: none"> <li>• <b>Check Next Condition</b> – Indicates that the condition with consecutive sequence number should be executed.</li> <li>• <b>Rule Is False</b> – Indicates that the action specified in the <b>Rule False Action</b> field should be executed</li> <li>• <b>Rule Is True</b> – Indicates that the action specified in the <b>Rule True Action</b> field should be executed.</li> </ul>

## Editing a Price List

### Procedure

To edit a price list:

1. Search for the price list in the **Price List** screen.
2. In the **Search Results** section, click the link in the **Price List Information** column corresponding to the price list whose details you want to edit.

The **Price List** screen appears.

3. Click the **Edit** button in the **Price List** zone.

The **Price List** screen appears. It contains the following sections:

- **Main** - Used to specify basic details about the price list.
- **Hierarchy** - Used to define parent price list to inherit price item pricing for the price list for a particular duration.
- **Divisions** - Used to associate price list with one or more divisions.
- **Eligibility Criteria** - Used to define eligibility criteria for the price list.

- **Characteristics** - Used to define the characteristics (which are applicable across divisions) for the price list.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Price List Description	Used to specify the description for the price list.	Yes
Effective Start Date	Used to specify the date from when the price list is effective.  <b>Note:</b> The system will not allow you to change the effective start date when: <ul style="list-style-type: none"> <li>• There is a price item assigned to the price list on that date.</li> <li>• The price list is assigned to an account or a person on that date.</li> </ul>	Yes
Effective End Date	Used to specify the date till when the price list is effective.  <b>Note:</b> The effective end date cannot be earlier than the effective start date.	No
Price List Type	Used to indicate the type of the price list. The valid values are: <ul style="list-style-type: none"> <li>• Standard</li> <li>• Promotional</li> </ul>	Yes
Global Price List	Used to indicate whether the price list is a global price list. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	Yes
Availability Start Date	Used to the specify the date from when the price list is available for assignment to an account or a person.  <b>Note:</b> At present, the availability start date is not used in the product while assigning a price list to an account or a person. It is available for future use.	No
Availability End Date	Used to the specify the date till when the price list is available for assignment to an account or a person.  <b>Note:</b> The availability end date cannot be earlier than the availability start date.  At present, the availability end date is not used in the product while assigning a price list to an account or a person. It is available for future use.	No

Field Name	Field Description	Mandatory (Yes or No)
Validity Period (in Days)	Used to specify the period in days for which the price list is valid. It is used to calculate price list assignment validity end date while assigning the price list to an account or a person.	No
Status	Used to indicate the status of the price list. The valid values are: <ul style="list-style-type: none"> <li>• <b>Active</b> – Used to indicate that the price list is used for billing. This value appears when you are editing a proposed price list</li> <li>• <b>Proposed</b> – Used to indicate that the price list is used for quotations.</li> <li>• <b>Template</b> – Used to indicate that the price list is a template price list.</li> </ul>	Yes
	<b>Note:</b> You cannot change the status of an active and a template price list.	

- Modify the details in the **Main** section, if required.

**Note:** By default the **Main** section is displayed.

- Add, edit or remove parent price list from the price list hierarchy, if required.
- Associate or disassociate the price list from the divisions, if required.

**Note:** You can only view those divisions to which you have access in the **Division** list. If the price list is associated to a division to which you do not have access, then the **Divisions** section is grayed out.

- Define, edit, or remove eligibility criteria from the price list, if required
- Define, edit, or remove characteristics of the price list, if required.
- Click **Save**.

The changes made to the price list are saved.

How to define eligibility criteria for the price list	<a href="#">Defining Eligibility Criteria for a Price List</a> on page 769

## Price List Price Item Pricing

Once a price list is created, you can either assign a price item to the price list and then define pricing for the price item, or you can copy an existing price item pricing and assign it to the price list. The **Price List Price Item Pricing** screen allows you to:

- View and filter the price items that are assigned to the price list

- Search and assign price items to the price list
- Copy a price item pricing and assign it to the price list

This screen consists of the following zones:

- [Price List Price Items](#) on page 779
- [Search Price Item](#) on page 780

### Price List Price Items

The **Price List Price Items** zone lists price items that are assigned to the price list. You will not find any records in this zone if the price list does not have any price items assigned to it. This zone contains the following columns:

Column Name	Column Description
Pricing Information	Displays the details of price item pricing.
Price Item	Displays the price item or price item bundle.
Pricing Parameters	Displays a comma-separated list of parameter values. The order in which parameter values appear in this column is controlled by the display order (which is defined while associating a parameter with a price item).  <b>Note:</b> This column appears when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>True</b> .
Pricing Status	Indicates the status of the price item pricing. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> <li>• Proposed</li> <li>• Rejected</li> <li>• Template</li> </ul>
Start Date	Displays the date from when the price item pricing is effective for the price list.
End Date	Displays the date till when the price item pricing is effective for the price list.
Price Assignment Type	Indicates the type of the price item pricing. The valid values are: <ul style="list-style-type: none"> <li>• Regular</li> <li>• Post Processing</li> <li>• Post Processing – Invoice Based</li> <li>• Post Processing – Price Item Based</li> </ul> <b>Note:</b> This column appears when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>True</b> .
Edit	On clicking the <b>Edit</b>  icon, you can edit the price item from the price list.

Column Name	Column Description
Delete	<p>On clicking the <b>Delete</b> (🗑️) icon, you can remove the price item from the price list.</p> <p><b>Note:</b></p> <p>The <b>Delete</b> icon appears in this column only when the price list is not yet assigned to any account or person.</p> <p>This column appears when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>False</b>.</p>

You can filter the list using various search criteria (such as, **Price Item** and **Effective Start Date**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (🔍) icon in the upper right corner of this zone.

You can change the layout of this zone. For more information on how to change the layout, see [Changing the Layout](#) on page 3208.

### Search Price Item

You can assign a price item or price item bundle to a price list and then define pricing for the price item or price item bundle, or you can copy an existing price item pricing and assign it to a price list. The **Search Price Item** zone allows you to search for a price item pricing which is assigned to an account, person, or a price list. You can then create a new price item pricing using an existing price item pricing through copying the price item pricing. Once you create a copy of an existing price item pricing, the new price item pricing is assigned to the price list. On copying a price item pricing, the pricing details including the price components, eligibility and tiering criteria for each price component, and characteristics are copied to the new price item pricing. You can then edit the details, if required.

The system allows you to create a copy of active, proposed, inactive, rejected, and template price item pricing. Once you create the copy of a template price item pricing, you can save the new price item pricing in either **Active** or **Proposed** status.

The **Search Price Item** zone contains the following two sections:

- **Search Criteria** – The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	<p>Used to indicate whether you want to search price item, pricing assigned to price list and override pricing for an account, or person. The valid values are:</p> <ul style="list-style-type: none"> <li>• Price Item</li> <li>• Price list Pricing</li> <li>• Account Override Pricing</li> <li>• Person Override Pricing</li> </ul>	Yes
Price Item	Used to search a particular price item or price item bundle.	No

Field Name	Field Description	Mandatory (Yes or No)
Description	Used to search price items or price item bundles with a particular description.	No
	<b>Note:</b> This field appears when you select the <b>Price Item</b> option from the <b>Search By</b> list.	
Global Price List	Used to search price items or price item bundles which can be assigned to a global price list. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	No
Bundle	Used to indicate whether you want to search for price item bundles. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	No
Price List ID	Used to search pricing of price items or price item bundles which are assigned to a particular price list.	No
	<b>Note:</b> This field appears when you select the <b>Price List Pricing</b> option from the <b>Search By</b> list.	
Effective Start Date	Used to search price item pricing on price lists which are effective from a particular date onwards.	No
	<b>Note:</b> This field appears when you select the <b>Price List Pricing, Account Override Pricing, or Person Override Pricing</b> option from the <b>Search By</b> list.	
Effective End Date	Used to search price item pricing on price lists which are effective till a particular date.	No
	<b>Note:</b> This field appears when you select the <b>Price List Pricing, Account Override Pricing, or Person Override Pricing</b> option from the <b>Search By</b> list.	
Pricing Status	Used to search price item pricing with a particular status. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> <li>• Proposed</li> <li>• Rejected</li> <li>• Template</li> </ul>	No
	<b>Note:</b> This field appears when you select the <b>Price List Pricing, Account Override Pricing, or Person Override Pricing</b> option from the <b>Search By</b> list.	

Field Name	Field Description	Mandatory (Yes or No)
Price Assignment Type	Used to search a particular type of the price item pricing. The valid values are: <ul style="list-style-type: none"> <li>• Regular</li> <li>• Post Processing</li> <li>• Post Processing – Invoice Based</li> <li>• Post Processing – Price Item Based</li> </ul>	No
	<b>Note:</b> This field appears when you select the <b>Price List Pricing</b> , <b>Account Override Pricing</b> , or <b>Person Override Pricing</b> option from the <b>Search By</b> list.	
Account ID	Used to search pricing of price items or price item bundles which are assigned to a particular account.	Yes
	<b>Note:</b> This field appears when you select the <b>Account Override Pricing</b> option from the <b>Search By</b> list.	
Person ID	Used to search pricing of price items or price item bundles which are assigned to a particular person.	Yes
	<b>Note:</b> This field appears when you select the <b>Person Override Pricing</b> option from the <b>Search By</b> list.	

**Note:**

You must specify at least one search criterion while searching for a price item or price item bundle.

You can search for an account, person by clicking the **Search** (🔍) icon corresponding to the respective field.

- **Search Results** – On clicking the **Search** button, the search results appear based on the specified search criteria. The search results include only those price items or price item bundles that are associated with the division to which the price list belongs. It may also include price items or price item bundles that are already assigned to the price list in case those price items or price item bundles match the search criteria.

The **Search Results** section contains the following columns:

Column Name	Column Description
Assign	On clicking the <b>Assign</b> (📄) icon, the <b>Price Item Pricing</b> screen appears where you can define a new price item pricing.
Price Item Information	Displays details of the price item or price item bundle.
	<b>Note:</b> It has a link. On clicking the link, the <b>Price Item</b> screen appears where you can view the details of the respective price item or price item bundle.
Copy	On clicking the <b>Copy</b> (📄) icon, the <b>Price Item Pricing</b> screen appears where you can define a new price item pricing using an existing price item pricing.

Column Name	Column Description
Pricing Information	Displays details of the price item pricing.
	<b>Note:</b> It has a link. On clicking the link, the <b>View Price Item Pricing</b> window appears with the details of the respective price item pricing.
Account Information	Indicates the account to which the price item pricing is assigned. In addition, this column has a context menu which helps in navigating to other screens in the application.
	<b>Note:</b> This column appears when you select the <b>Account Override Pricing</b> option from the <b>Search By</b> list. It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account. The account information string appears when an algorithm defined using the <b>C1-AC-INFO</b> algorithm type is attached to the <b>Account Information</b> system event in the <b>Algorithms</b> tab of the <b>Installation Options – Framework</b> screen.
Person Information	Indicates the person to which the price item pricing is assigned. In addition, this column has a context menu which helps in navigating to other screens in the application.
	<b>Note:</b> This column appears only when you select the <b>Person Override Pricing</b> option from the <b>Search By</b> list. It has a link. On clicking the link, the <b>Person</b> screen appears where you can view the details of the respective person. The person information string appears when an algorithm defined using the <b>PERS-INFO</b> algorithm type is attached to the <b>Person Information</b> system event in the <b>Algorithms</b> tab of the <b>Installation Options – Framework</b> screen.
Price List Information	Indicates the price list to which the price item pricing is assigned. In addition, this column has a context menu which helps in navigating to other screens in the application.
	<b>Note:</b> This column appears when you select the <b>Price List Pricing</b> option from the <b>Search By</b> list. It has a link. On clicking the link, the <b>Price List</b> screen appears where you can view the details of the respective person.
Variance Parameter	Indicates the variance parameter which is used for defining the price item pricing.
	<b>Note:</b> This column appears when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>False</b> .

Column Name	Column Description
Pricing Parameters	Displays a comma-separated list of parameter values. The order in which parameter values appear in this column is controlled by the display order (which is defined while associating a parameter with a price item or price item bundle).
	<b>Note:</b> This column appears when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>True</b> .
Effective Start Date	Displays the date from when the price item pricing is effective.
Effective End Date	Displays the date till when the price item pricing is effective.
Pricing Currency	Indicates the currency in which the price item pricing is defined.
Pricing Status	Indicates the status of the price item pricing. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> <li>• Proposed</li> <li>• Rejected</li> <li>• Template</li> </ul>
Rate Schedule	Indicates the rate schedule which is used for defining the price item pricing.
Price Assignment Usage	Indicates whether the price item pricing is applicable to all customers or only to new customers. The valid values are: <ul style="list-style-type: none"> <li>• AC</li> <li>• NC</li> </ul>
Price Assignment Type	Indicates the type of the price item pricing. The valid values are: <ul style="list-style-type: none"> <li>• Regular</li> <li>• Post Processing</li> <li>• Post Processing – Invoice Based</li> <li>• Post Processing – Price Item Based</li> </ul>
	<b>Note:</b> This column appears when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>False</b> .
Price Item	Displays the price item or price item bundle code.
	<b>Note:</b> It has a link. On clicking the link, the <b>Price Item Pricing</b> screen appears where you can define the pricing for the respective price item or price item bundle.
Description	Displays the description of the price item or price item bundle.
Global Price List	Indicates whether the price item or price item bundle can be assigned to a global price list. The valid values are: <ul style="list-style-type: none"> <li>• Y</li> <li>• N</li> </ul>

Column Name	Column Description
Unit of Measure	Indicates the unit of measure associated with the price item or price item bundle.
Bundle	Indicates whether the price item is a bundle or not. The valid values are: <ul style="list-style-type: none"> <li>• Y</li> <li>• N</li> </ul>
Owner ID	Displays the ID of the person for whose account the price list is created.
Party ID	Displays the third party ID.
Price List ID	Indicates the price list to which the price item pricing is assigned. <b>Note:</b> This column appears when you select the <b>Price List Pricing</b> option from the <b>Search By</b> list.
Price Assignment ID	Displays the price assignment ID.
Price Assignment Owner Type Flag	Displays whether price list or party is the owner of the price assignment.
Bundle Type	Indicates the type of the price item bundle. If the price item bundle is available for pricing and billing, the valid values are: <ul style="list-style-type: none"> <li>• Phantom</li> <li>• Ratio</li> <li>• Regular</li> </ul> However, if the price item bundle is available for only pricing and the price item type is <b>Fees</b> then the valid value is <b>Regular</b> . <b>Note:</b> This column appears when you select the <b>Yes</b> option from the <b>Bundle</b> list.
Price Item Type	Indicates the type of the price item or price item bundle. The valid values are: <ul style="list-style-type: none"> <li>• Rate</li> <li>• Fees</li> </ul>

### **Editing a Price Item Pricing of a Price List**

#### Prerequisites

To edit a price item pricing of a price list, you should have:

- Transactions mapped to the price item defined in the application
- Rate schedules, rate versions, rate components defined in the application
- Parameters associated with the price item (in case you want to define price item pricing based on those parameters)

#### Procedure

To edit a price item pricing of a price list:

1. Do either of the following:

If you want to...	Then...
Edit pricing of a price item that is assigned to a price list from Price List screen	<ol style="list-style-type: none"> <li>1. Search for the price list in the <b>Price List</b> screen.</li> <li>2. In the <b>Search Results</b> section of <b>Price List Price Items</b> zone, click the link in the <b>Pricing</b></li> </ol>

If you want to...	Then...
	<p><b>Information</b> column corresponding to the price item whose pricing details you want to view.</p> <p>The <b>Price Item Pricing</b> screen appears.</p> <p>3. Click the <b>Edit</b> button in the <b>Record Actions</b> section.</p> <p>The <b>Price Item Pricing</b> screen appears to edit the pricing details of a price item.</p> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> The <b>Edit</b> button appears when the price item pricing is in the <b>Draft</b> status.</p> </div>
<p>Edit pricing of a price item that is assigned to a price list from Price List Price Item Pricing screen</p>	<ol style="list-style-type: none"> <li>1. Search for the price list in the <b>Price List</b> screen. <p>In the <b>Search Results</b> section, click the <b>Price List Pricing</b> () icon corresponding to the price list whose <i>details</i> you want to view.</p> <p>The <b>Price List Price Item Pricing</b> screen appears.</p> </li> <li>2. Price items assigned to the price list appears in the <b>Price List Price Items</b> zone.</li> <li>3. You can edit the pricing item pricing through the following alternatives: <ol style="list-style-type: none"> <li>a. First alternative, <ul style="list-style-type: none"> <li>• In the <b>Search Results</b> section of <b>Price List Price Items</b> zone, click the <b>Edit</b> () icon in the <b>Edit</b> column corresponding to the price item pricing whose details you want to edit.</li> </ul> <p>The <b>Price Item Pricing</b> screen appears to edit the pricing details of a price item.</p> </li> <li>b. Second alternative, <ul style="list-style-type: none"> <li>• Search for a price item in the <b>Search Price Item or Price Item Pricing</b> zone.</li> </ul> <p>In the <b>Search Results</b> section, click the <b>Assign</b> () icon corresponding to the price item.</p></li> <li>• Enter the required details in the <b>Price Item Pricing</b> screen and click <b>Save</b>.</li> <p>The <b>Price Item Pricing</b> screen appears.</p> </ol></li> </ol>

If you want to...	Then...
	<ul style="list-style-type: none"> <li>Click the <b>Edit</b> button in the <b>Record Actions</b> section.</li> </ul> <p>The <b>Price Item Pricing</b> screen appears to edit the pricing details of a price item.</p> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> The <b>Edit</b> button appears when the price item pricing is in the <b>Draft</b> status.</p> </div>

The **Price Item Pricing** screen appears. It contains the following sections:

- Main** – Used to specify basic details about the price item pricing.
- Deal Information** – Used to indicate the average price floor and ceil type to define the floor and ceil limits for the price item or price item bundle
- TFM Information** – Used to specify the transaction feed management information about the price item pricing.

**Note:** This section appears in the **Price Item Pricing** screen when the value for the **Show Default Values in Price Item Pricing** option type for **C1\_FM** feature configuration is set to **Y** and **Price Item Available For** is **Pricing and Billing**.

- Characteristics** – Used to define the characteristics for the price item pricing.
- Price Item and Parameter Information** – Used to define the parameter details segment for the price item pricing.

**Note:** This section appears when **Price Assignment Type** is **Regular**.

- Commitments** – Used to indicate the basic details about the pricing and commitments such as costs, floor and ceil limits, and negotiability specific to a division.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Start Date	<p>Used to specify the date from when the price item pricing is effective.</p> <div style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b></p> <p>The effective start date cannot be later than the effective end date.</p> <p>If you change the effective start and end dates while editing a price item pricing, you need to specify the parameters which are effective during that date range.</p> <p>This field will be in read-only mode when the price assignment has been used.</p> </div>	Yes

Field Name	Field Description	Mandatory (Yes or No)
End Date	Used to specify the date till when the price item pricing is effective.	No
	<b>Note:</b> The effective end date cannot be earlier than the effective start date.	
Price Assignment Type	<p>Used to indicate the type of price assignment. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Regular</b> – Used to indicate that the pricing must be used to generate regular bill segment.</li> <li>• <b>Post Processing</b> – Used to indicate that the pricing must be used to generate post processing bill segment. This type of price assignment can be done on usage accounts. The post processing bill segment is generated when you generate the bill for the usage account and not when you bill the usage account through an invoice account.</li> </ul> <p><b>Note:</b></p> <p>The post processing bill segment is generated when the <b>Post Processing Sequence (PPSEQ)</b> characteristic is defined for the price item and when the price item is associated with another price item using the <b>Price Item</b> relationship type.</p> <ul style="list-style-type: none"> <li>• <b>Post Processing – Invoice Based</b> – Used to indicate that the pricing must be used to generate post processing bill segment. This type of price assignment can be done on an invoice account, and, as a result, the post processing bill segment is generated on the invoice account.</li> </ul> <p><b>Note:</b> This will not be applicable for price item which are defined for <b>Only Pricing</b>.</p> <ul style="list-style-type: none"> <li>• <b>Post Processing – Price Item Based</b> – Used to indicate that the pricing must be used to generate post processing bill segment. This type of price assignment can be done on both invoice and usage accounts, but the post processing bill segment is generated only on the invoice account.</li> </ul> <p><b>Note:</b> This will not be applicable for price item which are defined for <b>Only Pricing</b>.</p>	Yes
Pricing Eligibility	Used to select pricing eligibility criteria for price item pricing.	No
	<b>Note:</b> This field will be enabled for selection if the checkbox is not selected. If the checkbox appears selected then this field will be in read-only mode.	

Field Name	Field Description	Mandatory (Yes or No)
Pricing Status	<p>Used to indicate the status of the price assignment. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Draft</b> – Indicates that the price assignment is created as a draft.</li> <li>• <b>Active</b> – Indicates that the price assignment is used for billing.</li> <li>• <b>Inactive</b> – Indicates that the price assignment is no longer used for billing.</li> <li>• <b>Proposed</b> – Indicates that the price assignment is to be used for quotations.</li> <li>• <b>Template</b> – Indicates that the price assignment is a template price list.</li> </ul>	Yes
	<p><b>Note:</b></p> <p>If a price assignment is in <b>Active</b> status, you can change its status to <b>Inactive</b>.</p> <p>If a price assignment is in <b>Draft</b> status, you cannot change its status to <b>Proposed</b>.</p>	
Pricing Currency	Used to indicate the currency in which you want to define the price item pricing.	Yes
Rate Schedule	<p>Used to specify the rate schedule that you want to use while defining price item pricing.</p>	Yes
	<p><b>Note:</b></p> <p>Rate schedules control how the bills for the price item will be calculated.</p> <p>The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Rate Schedule Search</b> screen appears.</p>	
Pricing Rule Type	<p>Used to indicate the pricing rule type. The valid value is:</p> <ul style="list-style-type: none"> <li>• Two-Dimensional</li> </ul>	Yes (Conditional)
		<p><b>Note:</b> This field is required when you are editing a two-dimensional pricing rule.</p>
Print Zero	<p>Used to indicate whether zero pricing should be displayed in the bill. The valid values are:</p> <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	Yes
	<p><b>Note:</b> By default, <b>Yes</b> is selected.</p>	

Field Name	Field Description	Mandatory (Yes or No)
Price Assignment Usage	Used to indicate whether the price item pricing is applicable to all customers or only to new customers. The valid values are: <ul style="list-style-type: none"> <li>All Customers</li> <li>New Customers</li> </ul>	Yes
Pricing Frequency	Used to indicate pricing frequency for the price item.	Yes
	<b>Note:</b> This field appears when <b>Price Item</b> is defined as <b>Only Pricing</b> and <b>Price Item Type</b> is defined as <b>Fees</b> .	

2. Modify the details in the **Main** section, if required.
3. Edit the deal information in a price item pricing, if required.
4. Edit the TFM information in a price item pricing, if required.
5. Edit the characteristics for a price item pricing, if required.
6. Edit the parameters for a price item pricing, if required.
7. Edit the pricing commitments, if required.
8. Click **Save**.

The changes made to the price item pricing are saved.

### **Assigning a Price Item to a Price List**

#### **Prerequisites**

To assign a price item to a price list, you should have:

- Transactions mapped to the price item defined in the application
- Rate schedules, rate versions, and rate components defined in the application
- Parameters associated with the price item (in case you want to define price item pricing based on multiple parameters)

### **Procedure**

To assign a price item to a price list:

1. Do either of the following:

If you want to...	Then...
Define pricing of a price item that is assigned to a price list from Price List screen	<ol style="list-style-type: none"> <li>1. Search for the price list in the <b>Price List</b> screen.</li> <li>2. In the <b>Search Results</b> section of <b>Price List Price Items</b> zone, click the link in the <b>Pricing Information</b> column corresponding to the price item whose pricing details you want to view. The <b>Price Item Pricing</b> screen appears.</li> <li>3. Click the <b>Edit</b> button in the <b>Record Actions</b> section. The <b>Price Item Pricing</b> screen appears to edit the pricing details of a price item.</li> </ol> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Note:</b> The <b>Edit</b> button appears when the price item pricing is in the <b>Draft</b> status.</p> </div>
Define pricing of a price item that is assigned to a price list from Price List Price Item Pricing screen	<ol style="list-style-type: none"> <li>1. Search for the price list in the <b>Price List</b> screen. In the <b>Search Results</b> section, click the <b>Price List Pricing</b> () icon corresponding to the price list whose <i>details</i> you want to view. The <b>Price List Price Item Pricing</b> screen appears.</li> <li>2. Price items assigned to the price list appears in the <b>Price List Price Items</b> zone.</li> <li>3. You can edit the pricing item pricing through the following alternatives:             <ol style="list-style-type: none"> <li>a. First alternative,                 <ul style="list-style-type: none"> <li>• In the <b>Search Results</b> section of <b>Price List Price Items</b> zone, click the <b>Edit</b> () icon in the <b>Edit</b> column corresponding to the price item pricing whose details you want to edit.</li> </ul> </li> </ol> </li> </ol>

If you want to...	Then...
	<p>The <b>Price Item Pricing</b> screen appears to edit the pricing details of a price item.</p> <p><b>b. Second alternative,</b></p> <ul style="list-style-type: none"> <li>• Search for a price item in the <b>Search Price Item or Price Item Pricing</b> zone.</li> </ul> <p>In the <b>Search Results</b> section, click the <b>Assign</b> (📌) icon corresponding to the price item.</p> <ul style="list-style-type: none"> <li>• Enter the required details in the <b>Price Item Pricing</b> screen and click <b>Save</b>.</li> </ul> <p>The <b>Price Item Pricing</b> screen appears.</p> <ul style="list-style-type: none"> <li>• Click the <b>Edit</b> button in the <b>Record Actions</b> section.</li> </ul> <p>The <b>Price Item Pricing</b> screen appears to edit the pricing details of a price item.</p> <div data-bbox="1003 989 1399 1100" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> The <b>Edit</b> button appears when the price item pricing is in the <b>Draft</b> status.</p> </div>

The **Price Item Pricing** screen appears. It contains the following sections:

- **Main** – Used to specify basic details about the price item pricing.
- **Deal Information** – Used to indicate the average price floor and ceil type to define the floor and ceil limits for the price item or price item bundle
- **TFM Information** – Used to specify the transaction feed management information about the price item pricing.

**Note:** This section appears in the **Price Item Pricing** screen when the value for the **Show Default Values in Price Item Pricing** option type for **C1\_FM** feature configuration is set to **Y** and **Price Item Available For** is **Pricing and Billing**.

- **Characteristics** – Used to define the characteristics for the price item pricing.
- **Price Item and Parameter Information** – Used to define the parameter details segment for the price item pricing.

**Note:** This section appears when **Price Assignment Type** is **Regular**.

- **Commitments** – Used to indicate the basic details about the pricing and commitments such as costs, floor and ceil limits, and negotiability specific to a division.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Start Date	Used to specify the date from when the price item pricing is effective.	Yes
	<p><b>Note:</b></p> <p>The effective start date cannot be later than the effective end date.</p> <p>If you change the effective start and end dates while editing a price item pricing, you need to specify the parameters which are effective during that date range.</p> <p>This field will be in read-only mode when the price assignment has been used.</p>	
End Date	Used to specify the date till when the price item pricing is effective.	No
	<p><b>Note:</b> The effective end date cannot be earlier than the effective start date.</p>	

Field Name	Field Description	Mandatory (Yes or No)
Price Assignment Type	<p>Used to indicate the type of price assignment. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Regular</b> – Used to indicate that the pricing must be used to generate regular bill segment.</li> <li>• <b>Post Processing</b> – Used to indicate that the pricing must be used to generate post processing bill segment. This type of price assignment can be done on usage accounts. The post processing bill segment is generated when you generate the bill for the usage account and not when you bill the usage account through an invoice account.</li> </ul> <div data-bbox="607 642 1203 884" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> The post processing bill segment is generated when the <b>Post Processing Sequence (PPSEQ)</b> characteristic is defined for the price item and when the price item is associated with another price item using the <b>Price Item</b> relationship type.</p> </div> <ul style="list-style-type: none"> <li>• <b>Post Processing – Invoice Based</b> – Used to indicate that the pricing must be used to generate post processing bill segment. This type of price assignment can be done on an invoice account, and, as a result, the post processing bill segment is generated on the invoice account.</li> </ul> <div data-bbox="607 1108 1203 1192" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This will not be applicable for price item which are defined for <b>Only Pricing</b>.</p> </div> <ul style="list-style-type: none"> <li>• <b>Post Processing – Price Item Based</b> – Used to indicate that the pricing must be used to generate post processing bill segment. This type of price assignment can be done on both invoice and usage accounts, but the post processing bill segment is generated only on the invoice account.</li> </ul> <div data-bbox="607 1417 1203 1501" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This will not be applicable for price item which are defined for <b>Only Pricing</b>.</p> </div>	Yes
Pricing Eligibility	<p>Used to select pricing eligibility criteria for price item pricing.</p> <div data-bbox="545 1577 1203 1692" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> This field will be enabled for selection if the checkbox is not selected. If the checkbox appears selected then this field will be in read-only mode.</p> </div>	No

Field Name	Field Description	Mandatory (Yes or No)
Pricing Status	<p>Used to indicate the status of the price assignment. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Draft</b> – Indicates that the price assignment is created as a draft.</li> <li>• <b>Active</b> – Indicates that the price assignment is used for billing.</li> <li>• <b>Inactive</b> – Indicates that the price assignment is no longer used for billing.</li> <li>• <b>Proposed</b> – Indicates that the price assignment is to be used for quotations.</li> <li>• <b>Template</b> – Indicates that the price assignment is a template price list.</li> </ul> <p><b>Note:</b> If a price assignment is in <b>Active</b> status, you can change its status to <b>Inactive</b>. If a price assignment is in <b>Draft</b> status, you cannot change its status to <b>Proposed</b>.</p>	Yes
Pricing Currency	Used to indicate the currency in which you want to define the price item pricing.	Yes
Rate Schedule	<p>Used to specify the rate schedule that you want to use while defining price item pricing.</p> <p><b>Note:</b> Rate schedules control how the bills for the price item will be calculated.</p> <p>The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Rate Schedule Search</b> screen appears.</p>	Yes
Pricing Rule Type	<p>Used to indicate the pricing rule type. The valid value is:</p> <ul style="list-style-type: none"> <li>• Two-Dimensional</li> </ul>	<p>Yes (Conditional)</p> <p><b>Note:</b> This field is required when you are editing a two-dimensional pricing rule.</p>
Print Zero	<p>Used to indicate whether zero pricing should be displayed in the bill. The valid values are:</p> <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul> <p><b>Note:</b> By default, <b>Yes</b> is selected.</p>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Price Assignment Usage	Used to indicate whether the price item pricing is applicable to all customers or only to new customers. The valid values are: <ul style="list-style-type: none"> <li>All Customers</li> <li>New Customers</li> </ul>	Yes
Pricing Frequency	Used to indicate pricing frequency for the price item.	Yes
	<b>Note:</b> This field appears when <b>Price Item</b> is defined as <b>Only Pricing</b> and <b>Price Item Type</b> is defined as <b>Fees</b> .	

- Define the details in the **Main** section.
- Define the deal information in a price item pricing.
- Define the TFM information in a price item pricing.
- Define the characteristics for a price item pricing.
- Define the parameters for a price item pricing.
- Select the required division from the **Commitments** section to define the commitments of a price item pricing.
- Define the cost of the price item or price item bundle for the required divisions
- Define the average price floor and ceil limits of the price item or price item bundle for the required divisions.
- Define the negotiability floor and ceil values of the price item or price item bundle for the required divisions
- Click **Save**.

The pricing is defined for a price item.

## Defining a Characteristic for a Price Item Pricing

### Prerequisites

To define a characteristic for a price item pricing, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Price Item**)

### Procedure

To define a characteristic for a price item pricing that is assigned to an account:

1. Ensure that the **Characteristics** section is expanded when you are defining a price item pricing.

The **Characteristics** section contains the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the price item pricing.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the price item pricing.
Characteristic Type	Used to indicate the characteristic type. <b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Price Item Pricing</b> .	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the price item pricing.
Characteristic Value	Used to specify the value for the characteristic type. <b>Note:</b> If you select a predefined characteristic type, the <b>Search</b> (🔍) icon appears corresponding to the <b>Characteristic Value</b> field. On clicking the <b>Search</b> icon, the <b>Predefined Characteristic Search</b> window appears.  On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the price item pricing.

2. Enter the required details in the **Characteristics** section.
3. If you want to define more than one characteristic for the price item pricing, click the **Add** (+) icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from the price item pricing, click the **Delete** (🗑️) icon corresponding to the characteristic.

4. Click **Save**.

The characteristics are defined for the price item pricing.

## Defining Parameters for a Price Item Pricing

### Prerequisites

To define parameters for a price item pricing, you should have:

- Parameters associated with the price item, in case, you want to define price item pricing based on multiple parameters

### Procedure

To define parameter details segment for a price item pricing that is assigned to an account:

1. Ensure that the **Price Item and Parameter Information** section is expanded when you are defining a price item pricing.

The **Price Item and Parameter Information** section contains the following field:

Field Name	Field Description
Price Item	Indicates the price item or price item bundle whose pricing details are listed in this section.

In addition, this section contains a grid which has the following columns:

Column Name	Column Description	Mandatory (Yes or No)
Parameter	Used to indicate the parameter that you want to associate with the price item pricing.  <b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Price Item Parameter Search</b> window appears. The parameter search results displays only those parameters where the <b>Price Item</b> check box is selected.	Yes
Parameter Information	Displays a comma-separated string which contains of the following: <ul style="list-style-type: none"> <li>Parameter Description</li> <li>Mandatory (Yes or No)</li> <li>Priority</li> </ul>	Not applicable
Parameter Value	Used to specify the value of the parameter.	Yes

2. Enter the required details in the **Price Item and Parameter Information** section.
3. If you want to define more than one parameter information for the price item pricing, click the **Add** (+) icon and then repeat step 2.

**Note:** However, if you want to remove a parameter information from the price item pricing, click the **Delete** (🗑️) icon corresponding to the parameter.

#### 4. Click **Save**.

The parameters are defined for the price item pricing.

### Defining TFM Information in a Price Item Pricing

#### Prerequisites

To define the TFM information in a price item pricing, you should have:

- Transactions mapped to the price item defined in the application
- Aggregation or Rating Criteria data to be defined for the price item pricing

#### Procedure

To define the TFM information in a price item pricing:

1. Ensure that the **TFM Information** section is expanded when you are defining a price item pricing.

The **TFM Information** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Ignore Transaction	Used to indicate whether the transactions mapped to the price item is considered for billing. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	Yes
Aggregate Transactions	Used to indicate whether the transactions mapped to the price item is aggregated for billing. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	Yes
Aggregation Schedule	Used to indicate the transaction aggregation cycle. The valid values are: <ul style="list-style-type: none"> <li>• Daily</li> <li>• Weekly</li> <li>• Monthly</li> <li>• Quaterly</li> <li>• Yearly</li> </ul>	Yes

Field Name	Field Description	Mandatory (Yes or No)
Transaction Rating Criteria	Used to indicate how and when the transaction legs mapped to the price item are rated. The valid values are: <ul style="list-style-type: none"> <li>Aggregate Transactions and Then Rate Aggregated SQs</li> <li>Do Not Rate Transactions</li> <li>Rate Transaction and Aggregate Calc Lines Across Transaction</li> </ul>	Yes

- Enter the required details in the **TFM Information** section.

**Note:** **TFM Information** section appears when the value for **Show Default Values in Price Item Pricing** option type of **C1\_FM feature configuration** is set to **Y** and **Price Item Available For** is **Pricing and Billing**.

- Click **Save**.

The transactions are defined for the price item pricing.

## Price List Assignment

Once a price list is defined, you can assign it to accounts or persons to indicate the prices that will be charged for the price items or services offered to the accounts or persons. You can assign multiple price lists to an account or a person along with the priority or order in which the pricing should be considered. You can also define whether the account or person can avail the price item pricing listed on the parent or grandparent price list if it is not available on the assigned price list. In other words, you can define whether the account or person can inherit the price item pricing from the price list hierarchy.

For example, suppose you have PL1 (with priority 10) and PL2 (with priority 20) assigned to an account or a person. While determining pricing for a price item, the system will search for the price item pricing in PL1. If the system does not find the price item pricing in PL1, it will search for the price item pricing in PL2. The system will behave in this manner when the price list inheritance for PL1 is set to **No** during the price list assignment.

If the price list inheritance while assigning PL1 and PL2 to an account or a person is set to **Yes**, the system will search for the price item pricing in PL1. If the system does not find the price item pricing in PL1, it will search for the price item pricing from the price list hierarchy defined for PL1. However, if the system does not find the price item pricing from the price list hierarchy of PL1, it will then search for the price item pricing in PL2 (assigned to the account or person with priority 20). If the system still does not find the price item pricing in PL2, it will search for the price item pricing from the price list hierarchy defined for PL2.

The **Price List Assignment** screen allows you to search and assign a price list to an account or a person. It also allows you to view the price lists that are already assigned to an account or a person. It contains the following zones:

- [Price List Assignments](#) on page 804
- [Price List Price Items](#) on page 806
- [Search Price List for Assignment](#)

### Price List Assignments

The **Price List Assignments** zone allows you to view and filter price lists that are currently assigned to the account or person. You can also search for the price lists assigned to the account or person which are either inactive or expired. You will not find any records in this zone if the account does not have any price lists assigned to it. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search for the current, inactive, or historical price list assignments. The valid values are: <ul style="list-style-type: none"> <li>• Current Price List Assignments</li> <li>• Inactive Price List Assignments</li> <li>• Historical Price List Assignments</li> </ul>	Yes
	<b>Note:</b> By default, the <b>Current Price List Assignments</b> option is selected.	
Price List ID	Used to search a particular price list assigned to an account or a person.	No
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Price List ID</b> field. On clicking the <b>Search</b> icon, the <b>Price List Search</b> window appears.	
Price List Description	Used to search price lists which are assigned to the account or person having a particular description.	No
Effective Start Date	Used to search price lists which are assigned to the account or person from a particular date.	No
Effective End Date	Used to search price lists which are assigned to the account or person till a particular date.	No

Field Name	Field Description	Mandatory (Yes or No)
Assignment Status	<p>Used to search price list assignments with a particular status. The valid values are:</p> <ul style="list-style-type: none"> <li>• Active</li> <li>• Rejected</li> <li>• Proposed</li> <li>• Inactive</li> </ul>	No
	<p><b>Note:</b></p> <p>The <b>Inactive</b> option is not available in the <b>Assignment Status</b> list when you have selected the <b>Current Price List Assignments</b> or <b>Historical Price List Assignments</b> option from the <b>Search By</b> list.</p> <p>This field is disabled, and by default, the <b>Inactive</b> option is selected when you select the <b>Inactive Price List Assignments</b> option from the <b>Search By</b> list.</p>	
Price List Inheritance	<p>Used to search price list assignments where the account or person inherits price item pricing from the price list hierarchy. The valid values are:</p> <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	No

**Note:** You must specify at least one search criterion while searching for price list assignments.

- **Search Results** - On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Price List Information	<p>Displays information about the price list which is assigned to the account or person.</p> <p><b>Note:</b> It has a link. On clicking the link, the <b>Price List</b> screen appears with the details of the respective price list.</p>
Effective Start Date	Displays the date from when the price list is assigned to the account or person.
Effective End Date	Displays the date till when the price list is assigned to the account or person.
Priority	Indicates the order in which the assigned price list must be considered while determining the price item pricing for the account or person.
Assignment Status	<p>Indicates the status of the price list assignment. The valid values are:</p> <ul style="list-style-type: none"> <li>• Active</li> <li>• Rejected</li> <li>• Proposed</li> <li>• Inactive</li> </ul>

Column Name	Column Description
Price List Inheritance	Indicates whether the account or person can avail the price item pricing listed on the parent or grandparent price list if it is not available on the assigned price list. In other words, it indicates whether the account or person can inherit the price item pricing from the price list hierarchy.
Edit	On clicking the <b>Edit</b> (✎) icon, the <b>Price List Assignment</b> screen appears where you can edit the price list assignment details.

**Note:** Pagination is used to display limited number of records in the **Search Results** section. You can use the navigation links, such as **Previous** and **Next** to navigate between pages.

On clicking the **Broadcast** (📡) icon corresponding to the assigned price list, the **Price List Price Items** zone appears where you can view the price items assigned to the price list.

### Price List Price Items

The **Price List Price Items** zone lists the price items that are assigned to the price list. You will not find any records in this zone if the price list does not have any price items assigned to it. It contains the following columns:

Column Name	Column Description
Pricing	Displays information about the price item pricing. <b>Note:</b> It has a link. On clicking the link, the <b>Price Item Pricing</b> screen appears where you can view the details of the price item pricing.
Pricing Parameters	Displays a comma-separated list of parameter values. The order in which parameter values appear in this column is controlled by the display order (which is defined while associating a parameter with a price item). <b>Note:</b> This column appears when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>True</b> .

Column Name	Column Description
Pricing Status	Indicates the status of the price item pricing. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Inactive</li> <li>• Proposed</li> <li>• Rejected</li> <li>• Template</li> </ul>
Effective Start Date	Displays the date from when the price item pricing is effective for the price list.
Effective End Date	Displays the date till when the price item pricing is effective for the price list.
Price Assignment Type	Indicates the type of the price assignment for price item pricing. The valid values are: <ul style="list-style-type: none"> <li>• Regular</li> <li>• Post Processing</li> <li>• Post Processing – Invoice Based</li> <li>• Post Processing – Price Item Based</li> </ul> <p><b>Note:</b> This column appears when the <b>Multi Price Parameter</b> option type of the <b>Multi Parameter Based Pricing (C1_PPARM_FLG)</b> feature configuration is set to <b>True</b>.</p>
Copy	On clicking the <b>Copy</b> (📄) icon, the <b>Price Item Pricing</b> screen appears where you can define a new price item pricing using an existing price item pricing.

By default, the **Price List Price Items** zone does not appear in the **Price List Assignment** screen. It appears when you click the **Broadcast** (📡) icon corresponding to the assigned price list in the **Price List Assignments** zone.

You can filter the list using various search criteria (such as, **Price Item** and **Effective Start Date**) available in the **Filter** area. By default, the **Filter** area is hidden. You can view the **Filter** area by clicking the **Filters** (🔍) icon in the upper right corner of this zone.

You can change the layout of this zone. For more information on how to change the layout, see [Changing the Layout](#) on page 3208.

### **Search Price List for Assignment**

The **Search Price List for Assignment** zone allows you to search for a price list that you want to assign to the account or person. It contains the following two sections:

- **Search Criteria** – The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Search By	Used to indicate whether you want to search against all price lists or against those price lists which are already assigned to an account or a person. The valid values are: <ul style="list-style-type: none"> <li>• Price List</li> <li>• Assigned Price List</li> </ul>	Yes
	<b>Note:</b> By default, the <b>Price List</b> option is selected.	
Price List ID	Used to search a particular price list.	No
Price List Description	Used to search price lists with a particular description.	No
Effective Start Date	If you have selected the <b>Price List</b> option from the <b>Search By</b> list, this field is used to search price lists which are effective from a particular date onwards. However, if you have selected the <b>Assigned Price List</b> option from the <b>Search By</b> list, this field is used to search price lists which are assigned to an account or a person from a particular date onwards.	No
Effective End Date	If you have selected the <b>Price List</b> option from the <b>Search By</b> list, this field is used to search price lists which are effective till a particular date. However, if you have selected the <b>Assigned Price List</b> option from the <b>Search By</b> list, this field is used to search price lists which are assigned to an account or a person till a particular date.	No
Account ID	Used to search price lists assigned to a particular account.	No
	<b>Note:</b> This field appears when you have selected the <b>Assigned Price List</b> option from the <b>Search By</b> list.	
Person ID	Used to search price lists assigned to a particular person.	No
	<b>Note:</b> This field appears when you have selected the <b>Assigned Price List</b> option from the <b>Search By</b> list.	
Status	Used to search price lists with a particular status. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Proposed</li> </ul>	No
	<b>Note:</b> This field appears when you have selected the <b>Price List</b> option from the <b>Search By</b> list.	

Field Name	Field Description	Mandatory (Yes or No)
Price List Type	Used to search a particular type of price lists. The valid values are: <ul style="list-style-type: none"> <li>• Standard</li> <li>• Promotional</li> </ul>	No
	<b>Note:</b> This field appears when you have selected the <b>Price List</b> option from the <b>Search By</b> list.	
Only Eligible Price Lists	Used to search price lists which are eligible for the account or person.	No
	<b>Note:</b> This field appears when you have selected the <b>Price List</b> option from the <b>Search By</b> list.	
Eligibility Date	Used to search price lists which are eligible for the account or person from a particular date.	No
	<b>Note:</b> This field appears only when you have selected the <b>Price List</b> option from the <b>Search By</b> list.  By default, the current date appears in this field when the <b>Only Eligible Price Lists</b> option is selected. You can change the value, if required.	

**Note:** You must specify at least one search criterion while searching for a price list.

- **Search Results** – On clicking the **Search** button, the search results appear based on the specified search criteria. The search results include only those price lists that are associated with the division to which the account belongs. It may also include price lists that are already assigned to the account in case those price lists match the search criteria.

The **Search Results** section contains the following columns:

Column Name	Column Description
Assign	On clicking the <b>Assign</b> (  ) icon, the <b>Price List Assignment</b> screen appears where you can assign the price list to the account or person.
Price List Information	Displays the information about the price list.
	<b>Note:</b> It has a link. On clicking the link, the <b>Price List</b> screen appears where you can view the details of the respective price list.
Account Information	Displays the information about the account.
	<b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account.

Column Name	Column Description
Person Information	Displays the information about the person.
	<b>Note:</b> It has a link. On clicking the link, the <b>Person</b> screen appears where you can view the details of the respective person.
Effective Start Date	If you have selected the <b>Price List</b> option from the <b>Search By</b> list, the date from when the price list is effective appears in this column. However, if you have selected the <b>Assigned Price List</b> option from the <b>Search By</b> list, the date from when the price list is assigned to the account or person appears in this column.
Effective End Date	If you have selected the <b>Price List</b> option from the <b>Search By</b> list, the date till when the price list is effective appears in this column. However, if you have selected the <b>Assigned Price List</b> option from the <b>Search By</b> list, the date till when the price list is assigned to the account or person appears in this column.
Availability Start Date	Displays the date from when the price list is available for assignment to an account or a person.
Availability End Date	Displays the date till when the price list is available for assignment to an account or a person.

## **Assigning a Price List to an Account**

### **Prerequisites**

To assign a price list to an account, you should have:

- Price list defined in the application
- Price list associated with the division to which the account belongs
- Value defined for the **Default Price List Priority** option type in the **C1\_PRICING** feature configuration

**Procedure**

To assign a price list to an account:

1. Search for the account in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **Show Context Menu** (  ) icon corresponding to the account whose details you want to edit.

A menu appears.

3. Click the **Go To Price List Assignment** menu option.

The **Price List Assignment** screen appears. It contains the following zones:

- **Price List Assignments** – Lists the price lists that are already assigned to the account.
  - **Price List Price Items** – Lists the price items that are assigned to the price list.
  - **Search Price List for Assignment** – Enables you to search for a price list that you want to assign to the account.
4. In the **Search Price List for Assignment** zone, select the **Price List** or **Assigned Price List** option from the **Search By** list depending on whether you want to search against all price lists or against those price lists which are already assigned to an account or a person.
  5. Enter the search criteria in the **Search Price List for Assignment** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

6. Click **Search**.

A list of price lists that meet the search criteria appears in the **Search Results** section.

**Note:** The search results include only those price lists that are associated with the division to which the account belongs. It may also include price lists that are already assigned to the account in case those price lists match the search criteria.

7. In the **Search Results** section, click the **Assign** (  ) icon corresponding to the price list that you want to assign to the account.

The **Price List Assignment** screen appears. It consists of the following sections:

- **Main** – Used to specify basic information while assigning the price list to the account.
- **Characteristics** – Used to define the characteristics for the price list assignment.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Account Information	Indicates the account to which you want to assign the price list.	Not applicable
Price List Information	Displays the information about the price list.	Not applicable

Field Name	Field Description	Mandatory (Yes or No)								
Effective Start Date	Used to specify the date from when you want to assign the price list to the account.	Yes								
	<b>Note:</b> The price list assignment start date cannot be earlier than the price list effective start date or later than the price list effective end date.									
Effective End Date	Used to specify the date till when you want to assign the price list to the account.	No								
	<p><b>Note:</b></p> <p>The effective end date cannot be earlier than the effective start date.</p> <p>If the validity period is specified for the price list, the price list assignment end date should be earlier than or equal to the following whichever is earlier:</p> <ul style="list-style-type: none"> <li>• Price list assignment validity end date (which is price list assignment start date + validity period)</li> <li>• Price list effective end date</li> </ul> <p>Let us understand this with the help of the following example:</p> <table border="1"> <tbody> <tr> <td><b>Price List Effective Start Date</b></td> <td>01-Jan-2015</td> </tr> <tr> <td><b>Price List Effective End Date</b></td> <td>31-Jan-2015</td> </tr> <tr> <td><b>Validity Period</b></td> <td>15 Days</td> </tr> <tr> <td><b>Price List Assignment Start Date</b></td> <td>15-Jan-2015</td> </tr> <tr> <td><b>Price List Assignment Validity End Date</b></td> <td>30-Jan-2015 (i.e. 15-Jan-2015 + 15 Days)</td> </tr> </tbody> </table> <p>In the above example, the price list assignment end date must be earlier than or equal to the price list assignment validity end date because the price list assignment validity end date is earlier than the price list effective end date.</p>		<b>Price List Effective Start Date</b>	01-Jan-2015	<b>Price List Effective End Date</b>	31-Jan-2015	<b>Validity Period</b>	15 Days	<b>Price List Assignment Start Date</b>	15-Jan-2015
<b>Price List Effective Start Date</b>	01-Jan-2015									
<b>Price List Effective End Date</b>	31-Jan-2015									
<b>Validity Period</b>	15 Days									
<b>Price List Assignment Start Date</b>	15-Jan-2015									
<b>Price List Assignment Validity End Date</b>	30-Jan-2015 (i.e. 15-Jan-2015 + 15 Days)									
Priority	Used to specify the order in which the price list should be considered while determining the price item pricing for the account.	Yes								
Price List Inheritance	<p>Used to indicate whether the account can avail the price item pricing listed on the parent or grandparent price list if it is not available on the price list. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Yes</b> – Used to indicate that the account can inherit the price item pricing from the price list hierarchy.</li> <li>• <b>No</b> – Used to indicate that the account cannot inherit the price item pricing from the price list hierarchy.</li> </ul>	Yes								

Field Name	Field Description	Mandatory (Yes or No)
Assignment Status	Used to indicate the status of the price list assignment. The valid values are: <ul style="list-style-type: none"> <li>• <b>Active</b> – Used to indicate that you want to use the price item pricing on the price list for billing.</li> <li>• <b>Proposed</b> – Used to indicate that you want to use the price item pricing on the price list for quotations.</li> </ul>	Yes

8. Enter the required details in the **Main** section.
9. Define characteristics for the price list assignment, if required.
10. Click **Save**.

The price list is assigned to the account.

## **Defining a Characteristic for a Price List Assignment**

### **Prerequisites**

To define a characteristic for a price list assignment, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Price List Assignment**)

### **Procedure**

To define a characteristic for a price list assignment:

1. Ensure that the **Characteristics** section is expanded when you are defining or editing characteristics for a price list assignment.

The **Characteristics** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the price list assignment.	Yes (Conditional)
		<b>Note:</b> This field is required when you are defining a characteristic for the price list assignment.

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Type	Used to indicate the characteristic type.	Yes (Conditional)
	<b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Price List Assignment</b> .	<b>Note:</b> This field is required when you are defining a characteristic for the price list assignment.
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional)
	<b>Note:</b> On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	<b>Note:</b> This field is required when you are defining a characteristic for the price list assignment.

- Enter the required details in the **Characteristics** section.

**Note:** If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

- If you want to define more than one characteristic for the price list assignment, click the **Add** (+) icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from the price list assignment, click the **Delete** (🗑️) icon corresponding to the characteristic.

- Click **Save**.

The characteristics are defined for the price list assignment.

In the <b>Search Results</b> section, click the <b>Edit</b> (✎) icon in the <b>Edit</b> column corresponding to the price list whose assignment details you want to edit.</li> </ol>
Edit the details of the price list assignment which is expired	<ol style="list-style-type: none"> <li>1. Select the <b>Historical Price List Assignments</b> option from the <b>Search By</b> list.</li> <li>2. Enter the required search criteria and then click <b>Search</b>.  The price lists assigned to an account which are expired appears in the search results.</li> <li>3. In the <b>Search Results</b> section, click the <b>Edit</b> (✎) icon in the <b>Edit</b> column corresponding to the price list whose assignment details you want to edit.</li> </ol>

The **Price List Assignment** screen appears. It contains the following sections:

- **Main** – Used to specify basic information while assigning the price list to the account.
- **Characteristics** – Used to define the characteristics for the price list assignment.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Account Information	Indicates the account whose price list assignment details you want to edit.	Not applicable
Price List Information	Displays the information about the price list.	Not applicable
Effective Date Start	Displays the date from when the price list is assigned to the account.	Not applicable

Field Name	Field Description	Mandatory (Yes or No)										
Effective End Date	<p>Used to specify the date till when you want to assign the price list to the account.</p> <p><b>Note:</b></p> <p>The effective end date cannot be earlier than the effective start date.</p> <p>If the validity period is specified for the price list, the price list assignment end date should be earlier than or equal to the following whichever is earlier:</p> <ul style="list-style-type: none"> <li>• Price list assignment validity end date (which is price list assignment start date + validity period)</li> <li>• Price list effective end date</li> </ul> <p>Let us understand this with the help of the following example:</p> <table border="1" data-bbox="516 751 1138 1129"> <tr> <td><b>Price List Effective Start Date</b></td> <td>01-Jan-2015</td> </tr> <tr> <td><b>Price List Effective End Date</b></td> <td>31-Jan-2015</td> </tr> <tr> <td><b>Validity Period</b></td> <td>15 Days</td> </tr> <tr> <td><b>Price List Assignment Start Date</b></td> <td>15-Jan-2015</td> </tr> <tr> <td><b>Price List Assignment Validity End Date</b></td> <td>30-Jan-2015 (i.e. 15-Jan-2015 + 15 Days)</td> </tr> </table> <p>In the above example, the price list assignment end date must be earlier than or equal to the price list assignment validity end date because the price list assignment validity end date is earlier than the price list effective end date.</p>	<b>Price List Effective Start Date</b>	01-Jan-2015	<b>Price List Effective End Date</b>	31-Jan-2015	<b>Validity Period</b>	15 Days	<b>Price List Assignment Start Date</b>	15-Jan-2015	<b>Price List Assignment Validity End Date</b>	30-Jan-2015 (i.e. 15-Jan-2015 + 15 Days)	No
<b>Price List Effective Start Date</b>	01-Jan-2015											
<b>Price List Effective End Date</b>	31-Jan-2015											
<b>Validity Period</b>	15 Days											
<b>Price List Assignment Start Date</b>	15-Jan-2015											
<b>Price List Assignment Validity End Date</b>	30-Jan-2015 (i.e. 15-Jan-2015 + 15 Days)											
Priority	Used to specify the order in which the price list should be considered while determining the price item pricing for the account.	Yes										
Price List Inheritance	<p>Used to indicate whether the account can avail the price item pricing listed on the parent or grandparent price list if it is not available on the price list. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Yes</b> – Used to indicate that the account can inherit the price item pricing from the price list hierarchy.</li> <li>• <b>No</b> – Used to indicate that the account cannot inherit the price item pricing from the price list hierarchy.</li> </ul>	Yes										

Field Name	Field Description	Mandatory (Yes or No)
Assignment Status	<p>Used to indicate the status of the price list assignment. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Active</b> – Used to indicate that you want to use the price item pricing on the price list for billing. This value appears when you are editing an active and proposed price list assignment.</li> <li>• <b>Proposed</b> – Used to indicate that you want to use the price item pricing on the price list for quotations. This value appears when you are editing a proposed price list assignment.</li> <li>• <b>Rejected</b> – Used to indicate that you want to reject the price list assignment. This value appears only when you are editing a proposed price list assignment.</li> <li>• <b>Inactive</b> – Used to indicate that you no longer want to use the price list assignment. This value appears when you are editing an active price list assignment.</li> </ul> <p><b>Note:</b> You cannot change the status of a rejected price list assignment.</p>	Yes

5. Modify the required details in the **Main** section.
6. Define, edit, or remove characteristics of the price list assignment, if required.
7. Click **Save**.

The changes made to the price list assignment are saved.

### **Editing the Price List Assignment Details of a Person**

#### Procedure

To edit the price list assignment details of a person:

1. Search for the person in the **Customer 360° View** screen.
2. In the **Search Results** section, click the **Show Context Menu** (  ) icon corresponding to the person whose details you want to edit.

A menu appears.

3. Click the **Go To Price List Assignment** menu option.

The **Price List Assignment** screen appears. It contains the following zones:

- **Price List Assignments** – Lists the price lists that are already assigned to the person.
- **Price List Price Items** – Lists the price items that are assigned to the price list.
- **Search Price List for Assignment** – Enables you to search for a price list that you want to assign to the person.

4. Do either of the following:

If you want to...	Then...
Edit the details of the price list assignment which is currently effective	<ol style="list-style-type: none"> <li>1. Select the <b>Current Price List Assignments</b> option from the <b>Search By</b> list.</li> <li>2. Enter the required search criteria and then click <b>Search</b>.  The price lists which are currently assigned to the person appears in the search results.</li> <li>3. In the <b>Search Results</b> section, click the <b>Edit</b> (✎) icon in the <b>Edit</b> column corresponding to the price list whose assignment details you want to edit.</li> </ol>
Edit the details of the price list assignment which is expired	<ol style="list-style-type: none"> <li>1. Select the <b>Historical Price List Assignments</b> option from the <b>Search By</b> list.</li> <li>2. Enter the required search criteria and then click <b>Search</b>.  The price lists assigned to a person which are expired appears in the search results.</li> <li>3. In the <b>Search Results</b> section, click the <b>Edit</b> (✎) icon in the <b>Edit</b> column corresponding to the price list whose assignment details you want to edit.</li> </ol>

The **Price List Assignment** screen appears. It contains the following sections:

- **Main** – Used to specify basic information while assigning the price list to the person.
- **Characteristics** – Used to define the characteristics for the price list assignment.

The **Main** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Person Information	Indicates the person whose price list assignment details you want to edit.	Not applicable
Price List Information	Displays the information about the price list.	Not applicable
Effective Start Date	Displays the date from when the price list is assigned to the person.	Not applicable

Field Name	Field Description	Mandatory (Yes or No)										
Effective End Date	<p>Used to specify the date till when the price list is assigned to the person.</p> <p><b>Note:</b></p> <p>The effective end date cannot be earlier than the effective start date.</p> <p>If the validity period is specified for the price list, the price list assignment end date should be earlier than or equal to the following whichever is earlier:</p> <ul style="list-style-type: none"> <li>• Price list assignment validity end date (which is price list assignment start date + validity period)</li> <li>• Price list effective end date</li> </ul> <p>Let us understand this with the help of the following example:</p> <table border="1" data-bbox="516 747 1138 1129"> <tbody> <tr> <td><b>Price List Effective Start Date</b></td> <td>01-Jan-2015</td> </tr> <tr> <td><b>Price List Effective End Date</b></td> <td>31-Jan-2015</td> </tr> <tr> <td><b>Validity Period</b></td> <td>15 Days</td> </tr> <tr> <td><b>Price List Assignment Start Date</b></td> <td>15-Jan-2015</td> </tr> <tr> <td><b>Price List Assignment Validity End Date</b></td> <td>30-Jan-2015 (i.e. 15-Jan-2015 + 15 Days)</td> </tr> </tbody> </table> <p>In the above example, the price list assignment end date must be earlier than or equal to the price list assignment validity end date because the price list assignment validity end date is earlier than the price list effective end date.</p>	<b>Price List Effective Start Date</b>	01-Jan-2015	<b>Price List Effective End Date</b>	31-Jan-2015	<b>Validity Period</b>	15 Days	<b>Price List Assignment Start Date</b>	15-Jan-2015	<b>Price List Assignment Validity End Date</b>	30-Jan-2015 (i.e. 15-Jan-2015 + 15 Days)	No

## **Price List Assignments**

The **Price List Assignments** screen allows you to view the price list assignments of a particular price list. It contains the following zones:

- [Persons to whom Price List is Assigned](#) on page 827
- [Accounts where Price List is Assigned](#) on page 826

### **Accounts where Price List is Assigned**

The **Accounts where Price List is Assigned** zone displays the details of the accounts where price list is assigned. It contains the following fields:

Field Name	Field Description
Account ID	Displays the account ID.
Account Information	Displays information about the account. In addition, this column has a context menu which helps in navigating to other screens in the application.  <b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account.
Price List Assignment Start Date	Displays the price list assignment start date.
Price List Assignment End Date	Displays the price list assignment end date.
Division	Displays the division to which the account belongs.
Price List Assignment ID	Displays the price list assignment ID.

## Viewing Accounts and Persons where Price List is Assigned

### Prerequisites

To view accounts and persons where price list is assigned, you should have:

- Accounts and persons created in the application
- Price list defined and assigned to the accounts and persons

### Procedure

To view accounts and persons where price list is assigned:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Pricing Management** and then click **Price List**.  
The **Price List** screen appears.
3. You can search for a price list by entering the search criteria in the **Search Price List** zone.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the ‘%’ wildcard character in all input fields except the date and ID fields. The ‘%’ wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

4. Click **Search**.  
A list of price lists that meet the search criteria appears in the search results.
5. In the **Search Results** section, click the **Assigned To** () icon in the **Assigned To** column corresponding to the price list whose details you want to view.  
The **Price List Assignments** screen appears.
6. You can view the accounts and persons list where price list is assigned in the **Price List Assignments** screen.

## Entities Eligible for Price List Assignment

The **Entities Eligible for Price List Assignment** screen allows you to view the details of a price list. It also allows you to search for multiple eligible accounts or persons and assign them to the price list. This screen consists of the following zones:

- [Eligible Accounts](#) on page 829
- [Eligible Persons](#) on page 829

## Eligible Accounts

The **Eligible Accounts** zone allows you to search the eligible accounts for price list assignments. Moreover, it also allows you to assign the multiple eligible accounts to a price list. This zone contains the following two sections:

- **Search Criteria** — The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Division	Used to indicate the division whose accounts you want to search.	Yes
Effective Date	Used to indicate the date from when the accounts are eligible for price list assignment.	No
Account ID	Used to indicate the account ID.	No

- **Search Results** — On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Account Information	Displays the information about the eligible accounts where price list can be assigned. In addition, this column has a context menu which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Account</b> screen appears where you can view the details of the respective account.
Assigned	Displays whether the account is assigned to the price list or not. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>

## Eligible Persons

The **Eligible Persons** zone allows you to search the eligible persons for price list assignments. Moreover, it also allows you to assign the multiple eligible persons to a price list. This zone contains the following two sections:

- **Search Criteria** — The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Division	Used to indicate the division whose persons you want to search.	Yes
Effective Date	Used to indicate the date from when the persons are eligible for price list assignment.	No
Person ID	Used to indicate the person ID.	No

- **Search Results** — On clicking the **Search** button, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Person Information	Displays the information about the eligible persons where price list can be assigned. In addition, this column has a context menu which helps in navigating to other screens in the application.
	<b>Note:</b> It has a link. On clicking the link, the <b>Person</b> screen appears where you can view the details of the respective person.
Assigned	Displays whether the person is assigned to the price list or not. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>

## **Assigning a Price List to One or More Eligible Accounts**

### **Prerequisites**

To assign a price list to one or more eligible accounts, you should have:

- Price list defined in the application
- Accounts created in the application
- Price list should be associated with the division to which accounts belong.
- Value defined for the **Default Price List Priority** option type in the **C1\_PRICING** feature configuration

### **Procedure**

To assign a price list to one or more eligible accounts:

1. Search for the eligible accounts in the **Eligible Accounts** zone of **Persons and Accounts Eligible for Price List Assignment** screen.
2. In the **Search Results** section, select the one or more accounts that you want to assign to the price list.
3. Click the **Assign** button available in the upper left corner of this section

The **Price List Assignment** screen appears. This screen contains following two sections:

- **Main** — Used to specify basic details about the price list. This section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Price List Information	Displays the additional information about the price list.	Not applicable
Effective Start Date	Used to specify the date from when the price list is effective.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Effective End Date	Used to specify the date till when the price list is effective.	No
Priority	Used to specify the order in which the price list should be considered while determining the price item pricing for the account.	No
Price List Inheritance	Used to indicate whether the account can avail the price item pricing listed on the parent or grandparent price list if it is not available on the price list. The valid values are: <ul style="list-style-type: none"> <li>• Yes</li> <li>• No</li> </ul>	No
Assignment Status	Used to indicate the status of the price list assignment. The valid values are: <ul style="list-style-type: none"> <li>• Active</li> <li>• Proposed</li> </ul>	No
Priority Indicator	Used to set the priority of the price list assignment. The valid values are: <ul style="list-style-type: none"> <li>• <b>Highest</b> — Used when you want the price list assignment to have the highest priority. It checks whether there are any other price list assignments for the account, derives the priority of each such price list assignment, and then sets the priority of the new price list assignment to the existing price list assignment with highest priority minus one.</li> <li>• <b>Lowest</b> — Used when you want the price list assignment to have the lowest priority. It checks whether there are any other price list assignments for the account, derives the priority of each such price list assignment, and then sets the priority of the new price list assignment to the existing price list assignment with lowest priority plus one.</li> </ul>	No

- **Characteristics** — Used to define the characteristics for the price list.

#### 4. Click **Save**.

Selected accounts are assigned to the price list.

### **Defining a Characteristic for a Price List Assignment**

#### **Prerequisites**

To define characteristics for a price list assignment, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to **Price List Assignment**)

#### **Procedure**

To define a characteristic for a price list assignment:

1. Click the **Characteristics** tab in the **Price List Assignment** screen when you are assigning a price list to multiple persons or accounts and also editing the price list assignment details of multiple persons or accounts.

The **Characteristics** tab appears. It contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the price list assignment.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the price list assignment.
Characteristic Type	Used to indicate the characteristic type. <b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to <b>Price List Assignment</b> .	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the price list assignment.
Characteristic Value	Used to specify the value for the characteristic type. <b>Note:</b> On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	Yes (Conditional) <b>Note:</b> This field is required when you are defining a characteristic for the price list assignment.

2. Enter the required details in the **Characteristics** tab.

**Note:** If you select a predefined characteristic type, the **Search** (🔍) icon appears corresponding to the **Characteristic Value** field. On clicking the **Search** icon, you can search for a predefined characteristic value.

3. If you want to define more than one characteristic for the price list assignment, click the **Add** (+) icon and then repeat step 2.

**Note:** However, if you want to remove a characteristic from the price list assignment, click the **Delete** (🗑️) icon corresponding to the characteristic.

4. Click **Save**.

The characteristics are defined for the price list assignment.

## Rate Definition

Rate schedules, rate versions, and rate components are used to define the formulas to calculate the total amount charged to a customer for a product. Some examples of formulas are: price times the number of transactions used and a flat monthly charge plus a percentage of the average daily balance.

The rate is a formula with variables whose values are supplied by a user by setting up a price list or override price. For example, a rate might add a flat monthly charge and a percentage of the average daily balance to arrive at the amount charged to the customer. This rate might be used to calculate the charge for multiple products, each product with its own flat amount and percentage. So, these two factors are defined as variables whose values must be entered by users when they setup price list or override price. In Oracle Revenue Management and Billing (ORMB), these variables are defined as rate components.

The system provides you with the ability to create tiered pricing in case standard flat pricing is not sufficient to meet the business needs. The **Rate Definition** screen allows you to indicate whether the rate component supports standard flat pricing or tiered pricing. It allows you to define, edit, and delete the tiering setup of a rate component. This screen consists of the following zones:

- [Rate Schedule Components](#) on page 835
- [Create/Edit Rate Definition](#) on page 836

## Rate Schedule Components

The **Rate Schedule Components** zone allows you to select the rate schedule whose rate components' tiering setup you want to define or edit. This zone contains the following two sections:

- **Search Criteria** — The **Search Criteria** section contains the following field:

Field Name	Field Description	Mandatory (Yes or No)
Rate Schedule	Used to select the rate schedule.	Yes

- **Search Results** — On clicking the **Search** button, the rate components of the rate schedule appear in the search results. The **Search Results** section contains the following columns:

Column Name	Column Description
Rate Schedule	Displays the rate schedule.
Rate Component Sequence	Displays the sequence number of the rate component.
Rate Component Description	Displays the description of the rate component.
Effective Start Date	Displays the date from when the rate version to which the rate component belongs is effective.
Tiering Type	Displays the tiering type.
Maximum Tiering Combinations	Displays the maximum number of tiering ranges supported by the rate component.
	<b>Note:</b> Each tiering range supports more than one tiering criteria. For example, a rate component supports tiering based on two different criteria such as transaction volumes from a bundle and balances of the priced product. In such case, for a single rate, it is possible to enter separate tiering range information for each criterion and vary this information by product.

Column Name	Column Description
Rate Component Map Description	Displays the description of the tiering setup of the rate component.
Action	Indicates the action that can be performed on the rate component. The valid values are: <ul style="list-style-type: none"> <li>• <b>Add</b> — Allows you to define the tiering setup of the rate component</li> <li>• <b>Edit</b> — Allows you to edit the tiering setup of the rate component</li> </ul>
Rate Component Map ID	Displays the rate component map ID.  <b>Note:</b> This ID is generated automatically when you define the tiering setup of the rate component.

On clicking the **Broadcast** () icon corresponding to the rate component, the **Create/Edit Rate Definition** zone appears with the details of the respective rate component.

## Create/Edit Rate Definition

The **Create/Edit Rate Definition** zone allows you to define and edit tiering setup of the rate component. This zone contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Rate Schedule	Displays the code of the rate schedule.	Not applicable
Rate Component Description	Displays the description of the rate component.	Not applicable
Effective Start Date	Displays the date from when the rate version to which the rate component belongs is effective.	Not applicable
Rate Component Sequence	Displays the sequence number of the rate component.	Not applicable
Tiering Type	Used to specify the tiering type. The valid values are: <ul style="list-style-type: none"> <li>• FLAT</li> <li>• STEP</li> <li>• THRESHOLD</li> </ul> <b>Note:</b> This field is non-editable when you edit the tiering setup of the rate component.	Yes

Field Name	Field Description	Mandatory (Yes or No)
Maximum Tiering Combinations	Used to specify the maximum number of tiering ranges supported by the rate component.	Yes
	<p><b>Note:</b></p> <p>This field is non-editable when you:</p> <ul style="list-style-type: none"> <li>Select the tiering type as <b>FLAT</b> or <b>STEP</b></li> <li>Edit the tiering setup of the rate component</li> </ul> <p>By default, <b>0</b> appears in this field when you select the tiering type as <b>FLAT</b>, and <b>1</b> appears when you select the tiering type as <b>STEP</b>.</p>	
Rate Component Map Description	Used to specify the description for the tiering setup of the rate component. For example, if you want the user to enter price per transaction for a tiering range, enter <b>Price Per Transaction</b> in the <b>Rate Component Map Description</b> field.	Yes

This zone contains the following buttons:

Button Name	Button Description (When the Action is Add)	Button Description (When the Action is Edit)
Save	Used to create the tiering setup.	Used to save the changes made in this zone.
Delete	<b>Note:</b> This button is disabled when you define the tiering setup of the rate component.	Used to delete the tiering setup of the rate component.
		<b>Note:</b> You can delete the tiering setup when the rate component is not yet used for any product pricing.
Cancel	Used to clear the fields in this zone.	Used to reset the changes made in this zone.

How to delete tiering setup of a rate component	<a href="#">Deleting Tiering Setup of a Rate Component</a> on page 839

## Defining Tiering Setup of a Rate Component

### Prerequisites

To define tiering setup of a rate component, you should have:

- Rate schedules defined in the application
- Rate components of the rate schedule defined in the application

### Procedure

To define tiering setup of a rate component:

1. Click the **Menu** link in the **Application** toolbar.

A list appears.

- From the **Main** menu, select **Pricing Management** and then click **Rate Definition**.

The **Rate Definition** screen appears.

- Select the rate schedule in the **Rate Schedule Components** zone.
- Click **Search**.

The rate components of the rate schedule appear as the search results.

- Click the **Broadcast** (📡) icon corresponding to the rate component whose tiering setup you want to define.

The **Create/Edit Rate Definition** zone appears.

- Select the tiering type from the list.
- Enter the maximum number of tiering ranges supported by the rate component.

**Note:**

The **Maximum Tiering Combinations** field is non-editable when you select the tiering type as **FLAT** or **STEP**. By default, **0** appears in the **Maximum Tiering Combinations** field when you select the tiering type as **FLAT**, and **1** appears when you select the tiering type as **STEP**.

- Enter the description for the tiering setup of the rate component.

For example, if you want the user to enter price per transaction for a tiering range, enter `Price Per Transaction` in the **Rate Component Map Description** field.

- Click **Save**.

The rate component map ID is generated automatically when you define the tiering setup of the rate component.

### **Related Topics**

<b>For more information on...</b>	<b>See...</b>
<b>Rate Definition</b> screen	<a href="#">Rate Definition</a> on page 835
<b>Rate Schedule Components</b> zone	<a href="#">Rate Schedule Components</a> on page 835
<b>Create/Edit Rate Definition</b> zone	<a href="#">Create/Edit Rate Definition</a> on page 836

## **Editing Tiering Setup of a Rate Component**

### **Procedure**

To edit tiering setup of a rate component:

- Click the **Menu** link in the **Application** toolbar.  
A list appears.
- From the **Main** menu, select **Pricing Management** and then click **Rate Definition**.  
The **Rate Definition** screen appears.
- Select the rate schedule in the **Rate Schedule Components** zone.
- Click **Search**.

The rate components of the rate schedule appear as the search results.

5. Click the **Broadcast** (📡) icon corresponding to the rate component whose tiering setup you want to edit.  
The **Create/Edit Rate Definition** zone appears.
6. Modify the details of the tiering setup.

**Note:** You can only modify the rate component map description.

7. Click **Save**.  
The changes made to the tiering setup are saved.

#### Related Topics

## Deleting Tiering Setup of a Rate Component

### Procedure

To delete tiering setup of a rate component:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Pricing Management** and then click **Rate Definition**.  
The **Rate Definition** screen appears.
3. Select the rate schedule in the **Rate Schedule Components** zone.
4. Click **Search**.  
The rate components of the rate schedule appear as the search results.
5. Click the **Broadcast** (📡) icon corresponding to the rate component whose tiering setup you want to delete.  
The **Create/Edit Rate Definition** zone appears.
6. Click **Delete**.

The tiering setup of the rate component is deleted, and the action that can be performed on the rate component changes from **Edit** to **Add** in the **Rate Schedule Components** zone.

**Note:**

The **Delete** button is disabled when you define the tiering setup of the rate component.

You can delete the tiering setup when the rate component is not yet used for any product pricing.

## Tiering Criterion

Oracle Revenue Management and Billing (ORMB) provides you with the ability to create tiered pricing in case standard flat pricing is not sufficient to meet the business needs. Through tiered pricing, you can offer more favorable pricing to the customers based on service quantity utilization.

Let us understand this with the help of an example. ABC company uses wire transfer services provided by a large bank. If ABC company initiates up to 1,000 wire transfers, the fee charged by the bank will be \$5 per transfer. If ABC company initiates more than 1,000 wire transfers, the fee will be \$3 per transfer. To introduce this flexibility in the pricing model, you will have to define tiered pricing with the following tiering ranges:

- If the number of wire transfers is greater than 0 and less than or equal to 1000, then charge \$5 per transfer to ABC company.
- If the number of wire transfers is greater than 1000, then charge \$3 per transfer to ABC company.

In the above example, number of wire transfers is the tiering criterion, 0 – 1000 and 1000 – BLANK are tiering ranges, and \$5 and \$3 are rates per transfer.

The **Tiering Criteria** screen allows you to create and edit a tiering criterion. This screen consists of the following zones:

- [Tiering Criterion List](#) on page 840
- [Edit Tiering Criterion](#) on page 840
- [Create Tiering Criterion](#) on page 841

### Tiering Criterion List

The **Tiering Criterion List** zone displays tiering criterion that are already defined in the system. This zone contains the following columns:

Column Name	Column Description
Tiering Criterion	Displays the code of the tiering criterion.
Description	Displays the description of the tiering criterion.
Service Quantity Identifier	Displays the Service Quantity Identifier (SQI) of the tiering criterion.

You can change the layout of this zone. For more information on how to change the layout, see [Changing the Layout](#) on page 3208.

On clicking the **Broadcast** () icon corresponding to the tiering criterion, the **Edit Tiering Criterion** zone appears with the details of the respective tiering criterion.

### Edit Tiering Criterion

The **Edit Tiering Criterion** zone allows you to edit the tiering criterion. This zone contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Tiering Criterion	Displays the code of the tiering criterion.	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
Description	Used to modify the description of the tiering criterion.	Yes
Service Quantity Identifier	Displays the Service Quantity Identifier (SQI) of the tiering criterion.	Not applicable

This zone contains the following two buttons:

Button Name	Button Description
Save	Used to save the changes made in this zone.
Cancel	Used to clear the changes made in this zone.

By default, the **Edit Tiering Criterion** zone does not appear in the **Tiering Criteria** screen. It appears when you click the **Broadcast** (📡) icon corresponding to the tiering criterion in the **Tiering Criteria List** zone.

### Related Topics

For more information on...	See...
How to edit a tiering criterion	<a href="#">Editing a Tiering Criterion</a> on page 842

## Create Tiering Criterion

The **Create Tiering Criterion** zone allows you to create tiering criterion. This zone contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Tiering Criterion	Used to specify the code that uniquely identifies the tiering criterion.	Yes
Description	Used to specify the description for the tiering criterion.	Yes
Service Quantity Identifier	Used to specify the Service Quantity Identifier (SQI) for the tiering criterion.  <b>Note:</b> During billing, the rating engine uses the SQI to determine which service quantities are applied to tiers.	Yes

This zone contains the following two buttons:

Button Name	Button Description
Save	Used to create the tiering criterion.
Cancel	Used to clear the fields in this zone.

### Related Topics

## Creating a Tiering Criterion

### Prerequisites

To create a tiering criterion, you should have:

- Service Quantity Identifiers (SQIs) defined in the application

### Procedure

To create a tiering criterion:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Pricing Management** and then click **Tiering Criterion**.  
The **Tiering Criterion** screen appears.
3. In the **Create Tiering Criterion** zone, enter the code that uniquely identifies the tiering criterion.
4. Enter the description for the tiering criterion.
5. Select the Service Quantity Identifier (SQI) that you want to associate with the tiering criterion.
6. Click **Save**.  
The tiering criterion is created.

### Related Topics

<b>Create Tiering Criterion</b> zone	<a href="#">Create Tiering Criterion</a> on page 841

## Editing a Tiering Criterion

### Procedure

To edit a tiering criterion:

1. Click the **Menu** link in the **Application** toolbar.  
A list appears.
2. From the **Main** menu, select **Pricing Management** and then click **Tiering Criterion**.  
The **Tiering Criterion** screen appears.
3. In the **Tiering Criterion** zone, click the **Broadcast** (  ) icon corresponding to the tiering criterion whose details you want to edit.  
The **Edit Tiering Criterion** zone appears.
4. Modify the description of the tiering criterion, if required.
5. Click **Save**.  
The changes made to the tiering criterion are saved.

# Chapter 9

---

## Division

---

### Topics:

- [Division](#)

The following two types of divisions are used while defining a contract type:

- **General Ledger (GL) Division** — GL divisions typically comprise of individual entities (for example, companies) in the general ledger. You must set up a GL division for each such entity. The GL division is used to define the accounting period for financial transactions linked to contracts. Contracts are associated with GL divisions through their contract type. The system uses accounting periods to prevent a user from creating financial transactions in the closed periods. It also uses accounting periods when it generates the flat file that contains the consolidated journal entry that is interfaced to the general ledger.
- **Division** — A division is associated with a jurisdiction. A jurisdiction is a geographic-oriented entity with unique business rules. For example, if you conduct business in California and Japan, each jurisdiction has different set of rules, and therefore you need to have a separate jurisdiction for each division. You must set up a division for each jurisdiction in which you conduct the business. For the Pricing Management functionality, setting up a division is mandatory, and the system must contain information about at least one division.

A division is associated with the following:

- **Person** — You may or may not associate person to a division. It is optional. But, when you are using division specific functionality, you have to associate person to a division while creating a local person.
- **Contract** — Contract is associated to a division through its contract type. The contract type controls multiple business rules which are defined for a given jurisdiction and contract type combination. In addition to controlling the business rules defined on the contract's contract type, the contract's division also controls the type of collection criteria used to determine if and how to collect overdue debt.
- **Account** — The division on account when combined with the account's customer class defines the jurisdiction that governs financial business rules (for example, the bill's due date, when and how late payment charges are calculated, etc.). It also allows you to assign To Do entries associated with the account to a given To Do role based on the account's division.

## Division

---

The **Division** screen allows you to define, edit, and delete a division. It consists of the following tabs:

Tab Name	Tab Description	Mandatory (Yes or No)
Main	Used to define basic details of a division.	Yes
Access Groups	Used to define the users who have right to associate objects (such as persons, accounts, price items, price lists, etc.) with this division. The users can only view those divisions to which they have access in the <b>Division</b> list used across the application.	No
Price Items	Used to define which price items are available to persons or accounts in a division.	No
	<b>Note:</b> Once the price item is created, you need to associate it with a division.	
Price Lists	Used to define which price lists are available to persons or accounts in a division.	No
	<b>Note:</b> Once the price list is created, you need to associate it with a division.  You can associate a price list with a division when all price items in the price list are already associated with the division.	
Languages	Used to limit the languages that you can select for a person's bills and correspondence in a division.	No
Invoice Currencies	Used to limit the invoice currencies that you can select for accounts in a division.	No
	<b>Note:</b> Invoice currency is a currency in which the accounts in the division can be billed.	
Person Identifier Types	Used to limit the person identifier types that you can select for persons in a division.	No

Tab Name	Tab Description	Mandatory (Yes or No)
Algorithms	<p>Used to associate algorithms with the division. Once a division is created, you must associate the <b>Price Assignment Search</b> algorithm to it. For the Banking functionality, this is required to ensure that the price item pricing is displayed in the correct order as defined by the algorithm. Each division can have unique hierarchy order or more than one division can have the same hierarchy order. The hierarchy order is also used in billing when the price determination is controlled by the sort order definition of the algorithm.</p> <p>You can define algorithms in the <b>Algorithm</b> screen. The search order is governed by the second parameter of the algorithm, and the valid values for the same are:</p> <ul style="list-style-type: none"> <li>• <b>AGREED_PRICELIST</b> - If you use this search order, the price item pricing is searched in the following order: Account Agreed, Account Price List, Account Inherited Price List, Customer Agreed, Customer Price List, Customer Inherited Price List, Parent Customer Agreed, Parent Customer Price List, and Parent Customer Inherited Price List.</li> </ul> <div data-bbox="602 961 1114 1104" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> In this search order, the account agreed level has highest precedence and parent customer inherited price list level has lowest precedence.</p> </div> <ul style="list-style-type: none"> <li>• <b>AGREED_FIRST</b> - If you use this search order, the price item pricing is searched in the following order: Account Agreed, Customer Agreed, Parent Customer Agreed, Account Price List, Account Inherited Price List, Customer Price List, Customer Inherited Price List, Parent Customer Price List, and Parent Customer Inherited Price List.</li> </ul> <div data-bbox="602 1394 1114 1537" style="border: 1px solid black; padding: 5px;"> <p><b>Note:</b> In this search order, the account agreed level has highest precedence and parent customer inherited price list level has lowest precedence.</p> </div>	No
Characteristics	Used to define the characteristics for a division.	No
Bill Messages	Used to specify the bill messages that are valid for accounts in a division.	No
Party Char Types	Used to limit the characteristic types that you can select for persons and accounts in a division.	No
Bill Cycles	Used to limit the bill cycles that you can select for accounts in a division.	No
Account Identifier Types	Used to limit the account identifier types that you can select for accounts in a division.	No

Tab Name	Tab Description	Mandatory (Yes or No)
Price Item Characteristics	Used to define division-specific characteristics for price items associated with the division.	No

## **Division - Main**

The **Main** tab displays the basic information about the division. It contains the following fields:

Field Name	Field Description
Division	Indicates the division.  <b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Division</b> field. On clicking the <b>Search</b> icon, the <b>Division Search</b> window appears where you can search for a division.
Description	Displays the description of the division.
Work Calendar	Indicates the work calendar which is associated with the division.

Field Name	Field Description
Status	Indicates the status of the division. The valid values are: <ul style="list-style-type: none"> <li>Active</li> <li>Pending</li> <li>Retired</li> </ul>
Bill Format	Indicates the format in which the bills should be printed for the accounts which belong to the division. The valid values are: <ul style="list-style-type: none"> <li>Detailed</li> <li>Summary</li> </ul>
Bill Route Type	Indicates how the bills must be sent to the main customer of the accounts which belong to the division.
Base Currency	Indicates the currency in which the GL entries should be created for the accounts which belong to the division.
Time Zone	Indicates the time zones in which the division is operational.
Eligible for Accrual	Indicates whether accrual should be calculated for the accounts which belong to the division.
Accrual Cycle	Indicates the accrual cycle of the accounts which belong to the division.
Comments	Displays additional details about the division.
Business Object	Indicates the business object using which the division is created in the system.

In addition, the **Main** tab contains the following fields in a grid:

Field Name	Field Description
To Do Type	Indicates the To Do type for which division-specific To Do role is defined.
To Do Role	Indicates the To Do role whose users must receive the To Do entries of the specified To Do type for the accounts which belong to the division.

## Division - Access Groups

The **Access Groups** tab lists the access groups which are associated with the division. It contains the following field:

Field Name	Field Description
Division	Indicates the division.

In addition, the following fields appear in a grid:

Field Name	Field Description
Access Group	Indicates the access group which is associated with the division.
Description	Displays the description of the access group.

**Related Topics**

For more information on...	See...
How to associate an access group with a division	<a href="#">Associating an Access Group with a Division</a> on page 859

**Division - Price Items**

The **Price Items** tab lists the price items which are associated with the division. It contains the following field:

Field Name	Field Description
Division	Indicates the division.

In addition, the following fields appear in a grid:

Field Name	Field Description
Price Item	Indicates the price item which is associated with the division.
Description	Displays the description of the price item.
Accrual Type Criteria	Indicates whether the billable charges of the price item should be considered for accrual depending on the accrual criteria specified in the accrual type. The valid values are: <ul style="list-style-type: none"> <li>• Actual</li> <li>• Historical</li> <li>• Not Applicable</li> </ul>

**Related Topics**

For more information on...	See...
How to associate a price item with a division	<a href="#">Associating a Price Item or Price Item Bundle with a Division</a> on page 860

**Division - Price Lists**

The **Price Lists** tab lists the price lists which are associated with the division. It contains the following field:

Field Name	Field Description
Division	Indicates the division.

In addition, the following fields appear in a grid:

Field Name	Field Description
Price List ID	Indicates the price list.
Description	Displays the description of the price list.

**Related Topics**

For more information on...	See...
How to associate a price list with a division	<a href="#">Associating a Price List with a Division</a> on page 862

## Division - Languages

The **Languages** tab lists the languages which you can select for generating invoice and correspondence for the accounts in the division. It contains the following field:

Field Name	Field Description
Division	Indicates the division.

In addition, the following field appears in a grid:

Field Name	Field Description
Language	Indicates the language associated with the division.

### Related Topics

For more information on...	See...
How to associate a language with a division	<a href="#">Associating a Language with a Division</a> on page 863

## Division - Invoice Currencies

The **Invoice Currencies** tab lists the currencies which you can use for generating the invoice of the accounts in the division. It contains the following field:

Field Name	Field Description
Division	Indicates the division.

In addition, the following fields appear in a grid:

Field Name	Field Description
Currency	Indicates the currency.
Rounding Type	Indicates the rounding type for the currency. The valid values are: <ul style="list-style-type: none"> <li>• Down</li> <li>• Nearest</li> <li>• Up</li> </ul>

### Related Topics

How to associate a person identifier type with a division	<a href="#">Associating a Person Identifier Type with a Division</a> on page 866

## **Division - Algorithms**

The **Algorithms** tab lists the algorithms which are associated with the division. It contains the following field:

Field Name	Field Description
Division	Indicates the division.

In addition, the following fields appear in a grid:

Field Name	Field Description
Division Algorithm Entity	Indicates the algorithm entity to which you want to attach the algorithm.
Sequence Number	Displays the order in which the algorithms with the same entity should be executed.
Algorithm	Indicates the algorithm.
Description	Displays the description of the algorithm.

## **Division - Characteristics**

The **Characteristics** tab lists the characteristics which are defined for the division. It contains the following field:

Field Name	Field Description
Division	Indicates the division.

In addition, the following fields appear in a grid:

Field Name	Field Description
Effective Date	Indicates the date from when the characteristic is effective for the division.
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Indicates the value for the characteristic type.

#### **Related Topics**

## Division - Bill Messages

The **Bill Messages** tab lists the bill messages which are valid for the accounts in the division for a specified duration. It contains the following field:

Field Name	Field Description
Division	Indicates the division.

In addition, the following fields appear in a grid:

Field Name	Field Description
Start Date	Indicates the date from when you want the bill message to appear on the bill.
End Date	Indicates the date till when you want the bill message to appear on the bill.
Bill Message	Indicates the bill message that is valid for the accounts in the division.
Description	Displays the description of the bill message.

### Related Topics

How to associate an account identifier type with a division	<a href="#">Associating an Account Identifier Type with a Division</a> on page 878

## **Division - Price Item Characteristics**

The **Price Item Characteristics** tab lists division-specific characteristics of price items which are associated with the division. It contains the following field:

Field Name	Field Description
Division	Indicates the division.

In addition, the following fields appear in a grid:

Field Name	Field Description
Price Item	Displays the price item count associated with the selected division to which the user belongs.
Price Item	Displays the price item associated with the division to which the user belongs.
Effective Date	Indicates the date from when the price item characteristic is effective for the division.

Field Name	Field Description
Characteristic Type	Indicates the characteristic type.
Characteristic Value	Displays the value for the characteristic type.

## Searching for a Division

### Procedure

To search for a division:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **D** and then click **Division**.  
A sub-menu appears.
3. Click the **Search** option from the **Division** sub-menu.

The **Division Search** window appears. It contains the following two sections:

- **Search Criteria** - The **Search Criteria** section contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Division	Used to search for a particular division.	No
Description	Used to search division with a particular name.	No

**Note:** You must specify at least one search criterion while searching for a division.

- **Search Results** - On clicking the **Search** button corresponding to the respective field, the search results appear based on the specified search criteria. The **Search Results** section contains the following columns:

Column Name	Column Description
Division	Displays the division.
Description	Displays the description of the division.

**Note:** ORMB search engine supports wildcard search, where you can substitute the percentage (%) symbol as a stand in for any word or letter in a search criteria. You can use the '%' wildcard character in all input fields except the date and ID fields. The '%' wildcard character is suffixed automatically at the end of the partial search criteria. Therefore, you may or may not specify the wildcard character at the end of the partial search criteria. However, you have to prefix the wildcard character manually wherever required.

4. In the **Search Results** section, click the division whose details you want to view or edit.

The **Division** screen appears.

## Defining a Division

### Prerequisites

To define a division, you should have:

- Required division business object defined in the application
- Work calendars, bill route types, currencies, time zones, accrual cycles, To Do types, and To Do roles defined in the application
- Values defined for the **BILL\_FORMAT\_FLG** lookup field

### Procedure

To define a division:

1. Click the **Admin** link in the **Application** toolbar.  
A list appears.
2. From the **Admin** menu, select **D** and then click **Division**.  
A sub-menu appears.
3. Click the **Add** option from the **Division** sub-menu.  
The **Division** screen appears.
4. Ensure that the **Main** tab is selected.

The **Main** tab contains the following fields:

Field Name	Field Description	Mandatory (Yes or No)
Division	Used to specify the division.	Yes
Description	Used to specify the description for the division.	Yes
Work Calendar	Used to indicate the work calendar that you want to associate with the division. The work calendar indicates the days when the division is operational. It is used to ensure that the system calculated dates (for example, bill due date, credit and collection event dates, etc.) fall on a working day.	Yes
	<b>Note:</b> The list includes only those work calendars which are already defined in the system.	

Field Name	Field Description	Mandatory (Yes or No)
Status	<p>Used to indicate the status of the division. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Active</b> - Indicates that you can use the division in the system.</li> <li>• <b>Pending</b> - Indicates that the division is not yet available for use.</li> <li>• <b>Retired</b> - Indicates that the division is no longer available for use.</li> </ul> <p><b>Note:</b> The list includes only those statuses which are defined in the <b>DIVISION_STATUS_FLG</b> lookup field.</p>	No
Bill Format	<p>Used to specify the format in which the bills should be printed for the accounts which belong to the division. The valid values are:</p> <ul style="list-style-type: none"> <li>• Detailed</li> <li>• Summary</li> </ul> <p><b>Note:</b> The list includes only those bill formats which are defined in the <b>BILL_FORMAT_FLG</b> lookup field.</p>	No
Bill Route Type	<p>Used to indicate how the bills must be sent to the main customer of the accounts which belong to the division.</p> <p><b>Note:</b> The list includes only those bill route types which are already defined in the system.</p>	No
Base Currency	<p>Used to specify the currency in which the GL entries should be created for the accounts which belong to the division. If the account's invoice currency and division's base currency are different, the system converts the GL amount from the account's invoice currency to the division's base currency. In such cases, the system creates the financial transactions for the accounts in both the currencies (i.e. account's invoice currency and division's base currency).</p> <p><b>Note:</b> The list includes only those currencies which are already defined in the system.</p>	Yes
Time Zone	<p>Used to indicate the time zone in which the division is operational.</p> <p><b>Note:</b> The list includes only those time zones which are already defined in the system.</p>	No

Field Name	Field Description	Mandatory (Yes or No)
Eligible for Accrual	Used to indicate whether you can calculate accrual for the accounts which belong to the division.	No
Accrual Cycle	Used to indicate the accrual cycle for the accounts which belong to the division.	Yes (Conditional)  <b>Note:</b> The field is required when the <b>Eligible for Accrual</b> option is selected.
	<b>Note:</b> This field is enabled when the <b>Eligible for Accrual</b> option is selected.  The <b>Search</b> (🔍) icon appears corresponding to the <b>Accrual Cycle</b> field. On clicking the <b>Search</b> icon, the <b>Accrual Cycle Search</b> window appears.	
Comments	Used to specify additional details about the division.	No
Business Object	Used to indicate the business object using which you want to create the division.	Yes
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Business Object</b> field. On clicking the <b>Search</b> icon, the <b>Business Object Search</b> window appears.	

In addition, the **Main** tab contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
To Do Type	Used to indicate the To Do type for which you want to define division-specific To Do role.	Yes (Conditional)  <b>Note:</b> This field is required when you are defining the division-specific To Do role for a To Do type.
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>To Do Type</b> field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.	
To Do Role	Used to indicate the To Do role whose users must receive the To Do entries of the specified To Do type for the accounts which belong to the division.	Yes (Conditional)  <b>Note:</b> This field is required when you are defining the division-specific To Do role for a To Do type.
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>To Do Role</b> field. On clicking the <b>Search</b> icon, the <b>Role for To Do Type</b> window appears.	

5. Enter the required details in the **Main** tab.
6. Associate access groups, price items, price lists, languages, invoice currencies, person identifier types, algorithms, bill messages, party characteristic types, bill cycles, and account identifier types with the division, if required.
7. Define characteristics for the division, if required.
8. Define division-specific characteristics for the price items, if required.

- Click the **Save** button in the **Page Title** area.

The division is defined. The status of the division is set to **Pending**.

## Associating an Access Group with a Division

On associating an access group with a division, the users which belong to the access group can view the division in the respective list across the system. These users can then create and edit the accounts of the division.

### Prerequisites

To associate an access group with a division, you should have:

- Access groups defined in the application

### Procedure

To associate an access group with a division:

- Search for the division to which you want to associate an access group.
- Click the **Access Groups** tab in the **Division** screen.

The **Access Groups** tab appears. It contains the following field:

Field Name	Field Description
Division	Indicates the division.
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Division</b> field. On clicking the <b>Search</b> icon, the <b>Division Search</b> window appears where you can search for a division.

In addition, it contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Access Group	Used to indicate the access group which you want to associate with the division.	Yes (Conditional)
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Access Group</b> field. On clicking the <b>Search</b> icon, the <b>Access Group Search</b> window appears. On specifying an access group, the description of the access group appears in the <b>Description</b> field.	<b>Note:</b> This field is required when you are associating an access group with the division.
Description	Displays the description of the access group.	Not applicable

- Enter the required details in the **Access Groups** tab.
- If you want to associate more than one access group with the division, click the **Add** (+) icon and then repeat step 3.

**Note:** However, if you want to remove an access group from the division, click the **Delete** (🗑️) icon corresponding to the access group.

- Click the **Save** button in the **Page Title** area.

The access group is associated with the division.

## **Associating a Price Item or Price Item Bundle with a Division**

On associating a price item with a division, you can assign the price item to the persons and accounts which belong to the division. While associating a price item with a division, you can specify the accrual type criteria for the price item. The accrual type criteria is referred when the accrual is calculated for an account using an accrual type where the **Price Item Accrual Criteria Required** option is selected. The system behaves in the following manner when the **Price Item Accrual Criteria Required** option is selected in the accrual type:

If the accrual type criteria is set to...	Then...
Actual	The system considers the billable charges of the price item when the accrual is calculated for an account using the accrual type where the accrual criteria is set to <b>Actual</b> .
Historical	The system considers the billable charges of the price item when the accrual is calculated for an account using the accrual type where the accrual criteria is set to <b>Historical</b> .

### Prerequisites

To associate a price item with a division, you should have:

- Price items defined in the application

### Procedure

To associate a price item with a division:

1. Search for the division to which you want to associate a price item.
2. Click the **Price Items** tab in the **Division** screen.

The **Price Items** tab appears. It contains the following field:

Field Name	Field Description
Division	Indicates the division.  <b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Division</b> field. On clicking the <b>Search</b> icon, the <b>Division Search</b> window appears where you can search for a division.

In addition, it contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Price Item	Used to indicate the price item which you want to associate with the division.  <b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Price Item</b> field. On clicking the <b>Search</b> icon, the <b>Price Item Search</b> window appears. On specifying a price item, the description of the price item appears in the <b>Description</b> field.	Yes (Conditional)  <b>Note:</b> This field is required when you are associating a price item with the division.
Description	Displays the description of the price item.	Not applicable

Field Name	Field Description	Mandatory (Yes or No)
Accrual Type Criteria	<p>Used to indicate whether the billable charges of the price item should be considered for accrual depending on the accrual criteria specified in the accrual type. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>Actual</b> <ul style="list-style-type: none"> <li>- Used to indicate that the billable charges of the price item should be considered for accrual when the accrual criteria in the accrual type is set to <b>Actual</b>.</li> </ul> </li> <li>• <b>Historical</b> <ul style="list-style-type: none"> <li>- Used to indicate that the billable charges of the price item should be considered for accrual when the accrual criteria in the accrual type is set to <b>Historical</b>.</li> </ul> </li> <li>• <b>Not Applicable</b> <ul style="list-style-type: none"> <li>- Used to indicate that the billable charges of the price item should be considered for accrual irrespective of the accrual criteria specified in the accrual type</li> </ul> </li> </ul>	No

3. Enter the required details in the **Price Items** tab.
4. If you want to associate more than one price item with the division, click the **Add** (+) icon and then repeat step 3.

**Note:** However, if you want to remove a price item from the division, click the **Delete** (🗑️) icon corresponding to the price item.

5. Click the **Save** button in the **Page Title** area.  
The price item is associated with the division.

## **Associating a Price List with a Division**

### **Prerequisites**

To associate a price list with a division, you should have:

- Price lists defined in the application

### **Procedure**

To associate a price list with a division:

1. Search for the division to which you want to associate a price list.
2. Click the **Price Lists** tab in the **Division** screen.

The **Price Lists** tab appears. It contains the following field:

Field Name	Field Description
Division	Indicates the division.  <b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Division</b> field. On clicking the <b>Search</b> icon, the <b>Division Search</b> window appears where you can search for a division.

In addition, it contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Price List ID	Used to specify the price list which you want to associate with the division.  <b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Price List Search</b> window appears. On specifying a price list, the description of the price list appears in the <b>Description</b> field.	Yes (Conditional)  <b>Note:</b> This field is required when you are associating a price list with a division.
Description	Displays the description of the price list.	Not applicable

3. Enter the required details in the **Price Lists** tab.
4. If you want to associate more than one price list with the division, click the **Add** (+) icon and then repeat step 3.

**Note:** However, if you want to remove a price list from the division, click the **Delete** (🗑️) icon corresponding to the price list.

5. Click the **Save** button in the **Page Title** area.

The price list is associated with the division.

## Associating a Language with a Division

### Prerequisites

To associate a language with a division, you should have:

- Languages defined in the application

### **Procedure**

To associate a language with a division:

1. Search for the division to which you want to associate a language.
2. Click the **Languages** tab in the **Division** screen.

The **Languages** tab appears. It contains the following field:

Field Name	Field Description
Division	Indicates the division.  <b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Division</b> field. On clicking the <b>Search</b> icon, the <b>Division Search</b> window appears where you can search for a division.

In addition, it contains the following field in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Language	Used to specify the language which you want to select for generating invoice and correspondence for the accounts in the division.	No

3. Select the language from the list.
4. If you want to associate more than one language with the division, click the **Add** (+) icon and then repeat step 3.

**Note:** However, if you want to remove a language from the division, click the **Delete** (🗑️) icon corresponding to the language.

5. Click the **Save** button in the **Page Title** area.

The language is associated with the division.

## **Associating an Invoice Currency with a Division**

### **Prerequisites**

To associate an invoice currency with a division, you should have:

- Currencies defined in the application

### **Procedure**

To associate an invoice currency with a division:

1. Search for the division to which you want to associate an invoice currency.
2. Click the **Invoice Currencies** tab in the **Divisions** screen.

The **Invoice Currencies** tab appears. It contains the following field:

Field Name	Field Description
Division	Indicates the division.  <b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Division</b> field. On clicking the <b>Search</b> icon, the <b>Division Search</b> window appears where you can search for a division.

In addition, it contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Currency	Used to indicate the currency which you want to use for generating the invoice of the accounts in the division.	Yes (Conditional)  <b>Note:</b> This field is required when you are associating an invoice currency with the division.
Rounding Type	Used to indicate the rounding type for the currency. The valid values are: <ul style="list-style-type: none"> <li>• Down</li> <li>• Nearest</li> <li>• Up</li> </ul>	Yes (Conditional)  <b>Note:</b> This field is required when you are associating an invoice currency with the division.

3. Select the currency and its rounding type from the respective list.
4. If you want to associate more than one invoice currency with the division, click the **Add** (+) icon and then repeat step 3.

**Note:** However, if you want to remove an invoice currency from the division, click the **Delete** (🗑️) icon corresponding to the currency.

5. Click the **Save** button in the **Page Title** area.

The invoice currency is associated with the division.

## Associating a Person Identifier Type with a Division

### Prerequisites

To associate a person identifier type with a division, you should have:

- Person identifier types defined in the application

### Procedure

To associate a person identifier type with a division:

1. Search for the division to which you want to associate a person identifier type.
2. Click the **Person Identifier Types** tab in the **Division** screen.

The **Person Identifier Types** tab appears. It contains the following field:

Field Name	Field Description
Division	Indicates the division.
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Division</b> field. On clicking the <b>Search</b> icon, the <b>Division Search</b> window appears where you can search for a division.

In addition, it contains the following field in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Person Identifier Type	Used to indicate the person identifier type.	Yes (Conditional)
		<b>Note:</b> This field is required when you are associating a person identifier type with a division.

3. Select the person identifier type from the list.
4. If you want to associate more than one person identifier type with the division, click the **Add** (+) icon and then repeat step 3.

**Note:** However, if you want to remove a person identifier type from the division, click the **Delete** (🗑️) icon corresponding to the person identifier type.

5. Click the **Save** button in the **Page Title** area.

The person identifier type is associated with the division.

## Associating an Algorithm with a Division

### Prerequisites

To associate an algorithm with a division, you should have:

- Required algorithms defined in the application

### Procedure

To associate an algorithm with a division:

1. Search for the division to which you want to associate the algorithm.

The **Division** screen appears.

2. Click the **Algorithms** tab.

The **Algorithms** tab appears. It contains the following field:

Field Name	Field Description
Division	Indicates the division.
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Division</b> field. On clicking the <b>Search</b> icon, the <b>Division Search</b> window appears where you can search for a division.

In addition, it contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Division      Algorithm Entity	<p>Used to indicate the algorithm entity to which you want to attach the algorithm. The valid values are:</p> <ul style="list-style-type: none"> <li>• <b>ASL Accumulation Post-Processing</b> - Used to attach an algorithm which must be triggered for undertaking some post-processing activities on the aggregate stop-loss accumulation amount. This algorithm is invoked when you execute the <b>C1-ACASL</b> batch.</li> </ul> <div style="border: 1px solid black; padding: 5px; margin: 5px 0;"> <p><b>Note:</b> No algorithm types for this algorithm entity are shipped with the product. Sequence Number	Used to specify the order in which the algorithms with the same entity should be executed.	Yes (Conditional)  <div data-bbox="1138 1520 1468 1619" style="border: 1px solid black; padding: 2px;"> <p><b>Note:</b> This field is required when you are associating an algorithm with the division.</p> </div>
Algorithm	Used to specify the algorithm code.  <div data-bbox="586 1709 1122 1850" style="border: 1px solid black; padding: 2px;"> <p><b>Note:</b> The <b>Search</b>  icon appears corresponding to the <b>Algorithm</b> field. On clicking the <b>Search</b> icon, the <b>Algorithm Search</b> window appears.</p> </div>	Yes (Conditional)  <div data-bbox="1138 1709 1468 1808" style="border: 1px solid black; padding: 2px;"> <p><b>Note:</b> This field is required when you are associating an algorithm with the division.</p> </div>

Field Name	Field Description	Mandatory (Yes or No)
Description	Displays the description of the algorithm.	Not applicable
	<b>Note:</b> The description appears automatically when you specify the algorithm code in the <b>Algorithm</b> field.	

- Enter the required details in the **Algorithms** tab.
- If you want to associate more than one algorithm with the division, click the **Add (+)** icon and then repeat step 3.

**Note:** However, if you want to remove an algorithm from the division, click the **Delete (🗑)** icon corresponding to the algorithm.

- Click the **Save** button in the **Page Title** area.  
The algorithm is associated with the division.

## Defining a Characteristic for a Division

### Prerequisites

To define a characteristic for a division, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to Division)

### Procedure

To define a characteristic for a division:

- Search for the division for which you want to define a characteristic.
- Click the **Characteristics** tab in the **Division** screen.

The **Characteristics** tab appears. It contains the following field:

Field Name	Field Description
Division	Indicates the division.
	<b>Note:</b> The <b>Search (🔍)</b> icon appears corresponding to the <b>Division</b> field. On clicking the <b>Search</b> icon, the <b>Division Search</b> window appears where you can search for a division.

In addition, it contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Effective Date	Used to specify the date from when the characteristic is effective for the division.	Yes (Conditional)
		<b>Note:</b> This field is required when you are defining a characteristic for the division.
Characteristic Type	Used to indicate the characteristic type. <b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to Division.	Yes (Conditional)
		<b>Note:</b> This field is required when you are defining a characteristic for the division.
Characteristic Value	Used to specify the value for the characteristic type. <b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Characteristic Value</b> field. On clicking the <b>Search</b> icon, the <b>Characteristic Value Search</b> window appears.  On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	Yes (Conditional)
		<b>Note:</b> This field is required when you are defining a characteristic for the division.

- Enter the required details in the **Characteristics** tab.
- If you want to define more than one characteristic for the division, click the **Add** (+) icon and then repeat step 3.

**Note:** However, if you want to remove a characteristic from the division, click the **Delete** (🗑️) icon corresponding to the characteristic.

- Click the **Save** button in the **Page Title** area.  
The characteristic is defined for the division.

## Associating a Bill Message with a Division

### Prerequisites

To associate a bill message with a division, you should have:

- Bill messages defined in the application

**Procedure**

To associate a bill message with a division:

1. Search for the division to which you want to associate a bill message.
2. Click the **Bill Messages** tab in the **Division** screen.

The **Bill Messages** tab appears. It contains the following field:

Field Name	Field Description
Division	Indicates the division.  <b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Division</b> field. On clicking the <b>Search</b> icon, the <b>Division Search</b> window appears where you can search for a division.

In addition, it contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Start Date	Used to specify the date from when you want the bill message to appear on the bill for the accounts in the division.	Yes (Conditional)  <b>Note:</b> This field is required when you are associating a bill message with the division.
End Date	Used to specify the date till when you want the bill message to appear on the bill for the accounts in the division.	No
Bill Message	Used to specify the bill message which is valid for the accounts in the division.  <b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to this field. On clicking the <b>Search</b> icon, the <b>Bill Message Search</b> window appears.  On specifying a bill message, the description of the bill message appears in the <b>Description</b> field.	Yes (Conditional)  <b>Note:</b> This field is required when you are associating a bill message with the division.
Description	Displays the description of the bill message.	Not applicable

3. Enter the required details in the **Bill Messages** tab.
4. If you want to associate more than one bill message with the division, click the **Add** (+) icon and then repeat step 3.

**Note:** However, if you want to remove a bill message from the division, click the **Delete** (🗑️) icon corresponding to the bill message.

5. Click the **Save** button in the **Page Title** area.

The bill message is associated with the division.

## Associating a Party Characteristic Type with a Division

### Prerequisites

To associate a party char type with a division, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to Division)

### Procedure

To associate a party char type with a division:

1. Search for the division to which you want to associate a party char type.
2. Click the **Party Char Types** tab in the **Division** screen.

The **Party Char Types** tab appears. It contains the following field:

Field Name	Field Description
Division	Indicates the division.  <b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Division</b> field. On clicking the <b>Search</b> icon, the <b>Division Search</b> window appears where you can search for a division.

In addition, it contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Entity	Used to indicate whether the characteristic type is valid for a person or an account in the division.	Yes (Conditional)  <b>Note:</b> This field is required when you are associating a party char type with the division.
Characteristic Type	Used to indicate the characteristic type.  <b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to Division.	Yes (Conditional)  <b>Note:</b> This field is required when you are associating a party char type with the division.

3. Enter the required details in the **Party Char Types** tab.
4. If you want to associate more than one party char type with the division, click the **Add** (+) icon and then repeat step 3.

**Note:** However, if you want to remove a party char type from the division, click the **Delete** (🗑️) icon corresponding to the characteristic type.

5. Click the **Save** button in the **Page Title** area.

The party char type is associated with the division.

## Associating a Bill Cycle with a Division

### Prerequisites

To associate a bill cycle with a division, you should have:

- Bill cycles defined in the application

### Procedure

To associate a bill cycle with a division:

1. Search for the division to which you want to associate a bill cycle.
2. Click the **Bill Cycles** tab in the **Division** screen.

The **Bill Cycles** tab appears. It contains the following field:

Field Name	Field Description
Division	Indicates the division.  <b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Division</b> field. On clicking the <b>Search</b> icon, the <b>Division Search</b> window appears where you can search for a division.

In addition, it contains the following field in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Bill Cycle	Used to specify the bill cycle that is valid for the accounts associated with the division.	Yes (Conditional)  <b>Note:</b> This field is required when you are associating a bill cycle with the division.

3. Select the bill cycle from the list.
4. If you want to associate more than one bill cycle with the division, click the **Add** (+) icon and then repeat step 3.

**Note:** However, if you want to remove a bill cycle from the division, click the **Delete** (🗑️) icon corresponding to the bill cycle.

5. Click the **Save** button in the **Page Title** area.

The bill cycle is associated with the division.

**Associating an Account Identifier Type with a Division****Prerequisites**

To associate an account identifier type with a division, you should have:

- Account identifier types defined in the application

**Procedure**

To associate an account identifier type with a division:

1. Search for the division to which you want to associate an account identifier type.
2. Click the **Account Identifier Types** tab in the **Division** screen.

The **Account Identifier Types** tab appears. It contains the following field:

Field Name	Field Description
Division	Indicates the division.  <b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Division</b> field. On clicking the <b>Search</b> icon, the <b>Division Search</b> window appears where you can search for a division.

In addition, it contains the following field in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Account Identifier Type	Used to specify the account identifier type valid for the accounts associated with the division.	Yes (Conditional)  <b>Note:</b> This field is required when you are associating an account identifier type with the division.

3. Select the account identifier type from the list.
4. If you want to associate more than one account identifier type with the division, click the **Add** (+) icon and then repeat step 3.

**Note:** However, if you want to remove an account identifier type from the division, click the **Delete** (🗑️) icon corresponding to the account identifier type.

5. Click the **Save** button in the **Page Title** area.

The account identifier type is associated with the division.

## Defining a Division-Specific Characteristic for a Price Item

### Prerequisites

To define a division-specific characteristics for a price item, you should have:

- Characteristic types defined in the application (where the characteristic entity is set to Division/Price Item Combination)
- Price item associated with the division to which the user belongs

### Procedure

To define a division-specific characteristic for a price item:

1. Search for the division for which you want to define a price item characteristic.
2. Click the **Price Item Characteristics** tab in the **Division** screen.

The **Price Item Characteristics** tab appears. It contains the following field:

Field Name	Field Description
Division	Indicates the division.
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>Division</b> field. On clicking the <b>Search</b> icon, the <b>Division Search</b> window appears where you can search for a division.

In addition, it contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
Price Item	Indicates the price item count associated with the selected division.	No
Price Item	Indicates the price item code associated with the division to which the user belongs.	Not applicable
Effective Date	Used to specify the date from when the price item characteristic is effective for the division.	Yes (Conditional)
		<b>Note:</b> This field is required when you are defining a division-specific characteristic for the price item.

Field Name	Field Description	Mandatory (Yes or No)
Characteristic Type	Used to indicate the characteristic type.	Yes (Conditional)
	<b>Note:</b> The list includes only those characteristic types where the characteristic entity is set to Division/Price Item Combination.	<b>Note:</b> This field is required when you are defining a division-specific characteristic for the price item.
Characteristic Value	Used to specify the value for the characteristic type.	Yes (Conditional)
	<b>Note:</b> If you select a predefined characteristic type, the <b>Search</b> (🔍) icon appears corresponding to the <b>Characteristic Value</b> field. On clicking the <b>Search</b> icon, the <b>Characteristic Value Search</b> window appears.  On specifying the value for a predefined characteristic type, the description of the characteristic value appears corresponding to the <b>Characteristic Value</b> field.	<b>Note:</b> This field is required when you are defining a division-specific characteristic for the price item.

- If the division has multiple price items associated with it, navigate to define a characteristic for the required price item.

**Note:** You can use the **Previous** (⬅️) and **Next** (➡️) buttons to navigate through the price items while defining their characteristics.

- Enter the required details in the **Price Item Characteristics** tab.
- If you want to define more than one division-specific characteristic for the price item, click the **Add** (+) icon and then repeat step 4.

**Note:** However, if you want to remove a division-specific characteristic from the price item, click the **Delete** (🗑️) icon corresponding to the characteristic.

- Click the **Save** button in the **Page Title** area.

The division-specific characteristic is defined for the price item.

## **Associating a To Do Type and To Do Role with a Division**

### **Prerequisites**

To associate a To Do type and To Do role with a division, you should have:

- To Do types and to do roles defined in the application
- To Do roles associated to the respective to do types

### **Procedure**

To associate a To Do type and To Do role with a division:

1. Search for the division to which you want to associate a To Do type and To Do role.
2. Click the **Main** tab in the **Divisions** screen.  
The **Main** tab appears.
3. The **To Do** section contains the following fields in a grid:

Field Name	Field Description	Mandatory (Yes or No)
To Do Type	Used to indicate the To Do type for which you want to define division-specific To Do role.	Yes (Conditional)
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>To Do Type</b> field. On clicking the <b>Search</b> icon, the <b>To Do Type Search</b> window appears.	<b>Note:</b> This field is required when you are defining a To Do type for the division
To Do Role	Used to indicate the To Do role whose users must receive the To Do entries of the specified To Do type for the accounts which belong to the division.	Yes (Conditional)
	<b>Note:</b> The <b>Search</b> (🔍) icon appears corresponding to the <b>To Do Role</b> field. On clicking the <b>Search</b> icon, the <b>Role for To Do Type</b> window appears.	<b>Note:</b> This field is required when you are defining a division-specific To Do role for a To Do type

4. If you want to associate more than one To Do type and To Do role with the division, click the **Add** (+) icon and then repeat step 3.

**Note:** However, if you want to remove a To Do type and To Do role from the division, click the **Delete** (🗑️) icon corresponding to the To Do type.

5. Click the **Save** button in the **Page Title** area.

The To Do type and To Do role is associated with the division.

Oracle Revenue Management and Billing may optionally be configured to use the approval workflow process whenever any addition, modification, or deletion is done manually by a user. The approval workflow process routes any changes made to the business objects (such as person, account, contract, division, and so on) to a group of people for approval. The approval workflow process allows you to manage and track all tasks involved in the approval process.

Approval workflow allows you to define the rules for requiring an approval step before the data changes are committed to the database. Once you establish the approval workflow rules, the application manages the business process flow for having data changes approved before they are reflected in the database.

The system provides you with a flexible set of options used to determine when approvals are required, and how the approval process is to be managed including:

- Turning approval on or off for individual business objects within the application
- Grouping business objects so that approval is required for the group rather than the individual business objects within the group
- Who should approve
- How many levels of approvals are required
- Different approval workflow chains based on different criteria

Once you have turned approval workflow on for an object, or a group of objects, the system will use the approval workflow configuration to manage the entire approval process including:

- Determining whether approval is required based on data changes submitted by a user
- Routing approval workflow requests to one or more qualified approvers
- Managing rejected data changes and sending these back to the submitter for resolution
- Committing the changes once all required approvals are received

(Used for Viewing)*

## Most Commonly Used Terms

---

Before you understand the approval workflow process, you must familiarize yourself with the following terms:

Term	Description
Submitter	A person who adds, modifies or deletes a business object, such as person, account, contract, and division is called a submitter.
Approver	A person who approves any changes made to a business object is called an approver.
Approval Workflow Group	A group of one or more business objects for which approval is required, under some or all conditions, when data changes are made.
Approval Workflow Chain	The approval workflow chain indicates how many levels of approvals are required to approve the changes made by the submitter.

## Approval Workflow Process

---

When a submitter adds, edits or deletes a business object (for example, an account) that belongs to an approval workflow group, the system checks whether approval workflow is activated for the approval workflow group. If the approval workflow is activated for the group, the system creates an approval workflow request. Every approval workflow request is uniquely identified in the system through the Approval Transaction ID.

The system identifies the approval workflow chain that must be used for approval depending on the pre-configured conditions or criteria. Based on the number of levels defined in the approval workflow chain, the request is sent to the approver at each level in the chain or hierarchy for approval. When the approver at the first level approves the request, a notification is sent to the approver at the second level for approval. This process continues till the approval is received from all levels in the hierarchy. Once the approvers at all levels approve the request, the changes are committed to the database.

However, if an approver at any level in the hierarchy rejects the request, a notification is sent to the submitter who has made the changes. The submitter then makes the required corrections based on the approver's comments and resubmits the changes for approval. In this case, the approval process starts once again from the beginning and not from the level at which the request was rejected.

The submitter also has the facility to modify the request before the approver at the first level in the hierarchy approves or rejects the request. Once the changes are made, the submitter submits the request for approval. The submitter also has the facility to cancel the request.

The following figure indicates the flow of the approval workflow process:

To implement the approval workflow process, you need to define the following:

- [Approval Workflow Group \(Used for Searching\)](#) on page 940
- [Approval Workflow Chain \(Used for Searching\)](#) on page 957
- [Approval Workflow Criterion Type \(Used for Searching\)](#) on page 964
- [Approval Workflow Group Chain Linkage \(Used for Searching\)](#) on page 970
- [Approval Workflow Reason \(Used for Searching\)](#) on page 987
- [Approval Workflow Setting \(Used for Searching\)](#) on page 980

For price list, price item and price assignment, the approval workflow configuration is shipped with ORMB. The following groups are available in the system:

- **C1PRODUCT** – Contains the C1\_PRICEITEM\_BO business object
- **C1PRICELST** – Contains the C1\_F\_ADDPLBO business object
- **C1PRICEASG** – Contains the C1\_PRICECOMP and C1\_PRICEASGN\_BO business objects

After creating the approval workflow chains, you need to link these groups to the corresponding approval workflow chains. To setup the approval workflow process for price assignment, you need to do the following:

For Price Item	<ol style="list-style-type: none"> <li>1. If a <b>Determine BO</b> algorithm is not specified for the <b>C1_PRICEITEM</b> maintenance object, create a <b>Determine BO</b> algorithm using the <b>F1-MOBO</b> algorithm type and specify <b>C1_PRICEITEM_BO</b> as the business object on this algorithm.</li> <li>2. Attach this algorithm on the <b>Determine BO</b> algorithm spot of the <b>C1_PRICEITEM</b> MO.</li> <li>3. Link the <b>C1PRODUCT</b> group to the appropriate approval workflow chain.</li> <li>4. Activate the approval workflow for the <b>C1PRODUCT</b> group by setting the <b>Active</b> flag corresponding to the group in the <b>Approval Workflow Settings</b> screen to <b>Y</b>.</li> </ol>
----------------	---

For Price List	<ol style="list-style-type: none"> <li>1. If a <b>Determine BO</b> algorithm is not specified for the <b>C1_PRICELIST</b> maintenance object, create a <b>Determine BO</b> algorithm using the <b>F1-MOBO</b> algorithm type and specify <b>C1_F_ADDPLBO</b> as the business object on this algorithm.</li> <li>2. Attach this algorithm on the <b>Determine BO</b> algorithm spot of the <b>C1_PRICELIST</b> MO.</li> <li>3. Link the <b>C1PRICELST</b> group to the appropriate approval workflow chain.</li> <li>4. Activate the approval workflow for the <b>C1PRICELST</b> group by setting the <b>Active</b> flag corresponding to the group in the <b>Approval Workflow Settings</b> screen to <b>Y</b>.</li> </ol>
For Price Assignments	<ol style="list-style-type: none"> <li>1. If a <b>Determine BO</b> algorithm is not specified for the <b>C1_PRICECOMP</b> maintenance object, create a <b>Determine BO</b> algorithm using the <b>F1-MOBO</b> algorithm type and specify <b>C1_PRICECOMP</b> as the business object on this algorithm.</li> <li>2. Attach this algorithm on the <b>Determine BO</b> algorithm spot of the <b>C1_PRICECOMP</b> MO.</li> <li>3. If a <b>Determine BO</b> algorithm is not specified for the <b>C1_PRICEASGN</b> maintenance object, create a <b>Determine BO</b> algorithm using the <b>F1-MOBO</b> algorithm type and specify <b>C1_PRICEASGN_BO</b> as the business object on this algorithm.</li> <li>4. Attach this algorithm on the <b>Determine BO</b> algorithm spot of the <b>C1_PRICEASGN</b> MO.</li> <li>5. Link the <b>C1PRICEASG</b> group to the appropriate approval workflow chain.</li> <li>6. Activate the approval workflow for the <b>C1PRICEASG</b> group by setting the <b>Active</b> flag corresponding to the group in the <b>Approval Workflow Settings</b> screen to <b>Y</b>.</li> </ol>

Similarly, for invoicing group, the approval workflow configuration is shipped with ORMB. The following groups are available in the system:

- **C1IGADD**
- **C1IGUPD**

After creating the approval workflow chains, you need to link these groups to the corresponding approval workflow chains, and activate the approval workflow for these groups by setting the following in the **Approval Workflow Settings** screen:

- Set **Active** flag to **Yes**
- Set **Prevalidation** flag to **Yes**

**Note:** You must set the **Active** flag to **No** for both the groups in case you do not want to activate the approval workflow for invoicing group. If you set the **Active** flag to **Yes** for either of the groups, approval workflow is triggered when you add and/or edit an invoicing group.

## Prerequisites

You need to setup the following prerequisites to implement the approval workflow process:

- **Setup Feature Configuration for Approval Workflow** — If you create new Maintenance Objects (MOs) and want the access control for these MOs in the approval workflow transactions to be based on the access group and division, then you have to create a custom algorithm and attach it to the **Approval Transaction Entity Access Algorithms** option type of the **C1\_AXENTITY** feature configuration. Note that you will then have two access algorithms; one default algorithm (that is, **C1-APPTXN**) and another custom algorithm. For more information

about the **C1\_AXENTITY** feature configuration, see [Setting the C1\\_AXENTITY Feature Configuration](#) on page 3234.

- **Create and Attach Determine BO Algorithm** — To use approval workflow for a business object, check the corresponding maintenance object to see if a **Determine BO** algorithm is already attached to it. If not, create a **Determine BO** algorithm using the **F1-MOBO** algorithm type, and specify the appropriate business object name on the newly created algorithm. Attach this algorithm on the **Determine BO** algorithm spot of the maintenance object.
