# Oracle Banking Trade Finance Process Management

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing trade finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle trade finance transaction.
- Help users to conveniently create and process trade finance transaction

## Overview

OBTFPM is a trade finance middle office platform, which enables bank to streamline the trade finance operations. OBTFPM enables the customers to send request for new trade finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

## Benefits

OBTFPM helps banks to manage trade finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all trade finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

## Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

## Export LC Advice

As part of Export LC Advice, the advising bank receives the LC to be advised to the beneficiary from the issuing bank. The letter of credit is advised to the beneficiary through the advising bank. The various stages involved for advice of an Export Letter of Credit are:

- Receive and verify documents (Non Online Channel) - Registration stage
- Input application details
- Upload of related mandatory and non mandatory documents
- Verify documents and capture details
- Input/Modify details of LC - Data Enrichment stage
- Check for limit availability (In case of confirmation)
- Check balance availability for amount block
- Check for sanctions & KYC status
- Earmark limits/Create amount block for cash margin/charges, if applicable.
- Capture remarks for other users to check and act.
- Hand off request to back office

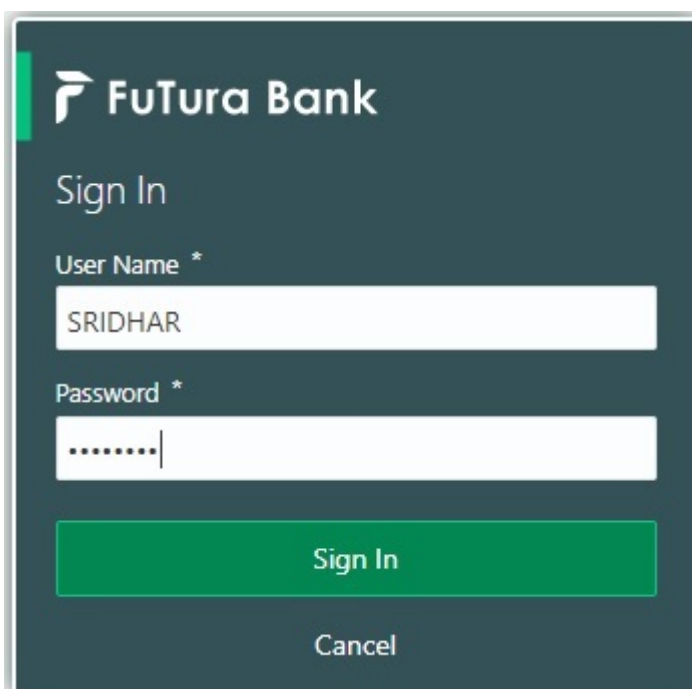

In the following sections, let's look at the details for Export LC Advising process:

This section contains the following topics:

## Exceptions

The Export LC Advice request, before it reaches the approval stage, the application will validate the Amount Block, KYC and AML. If any of these failed in validation will reach exception stage for further clearance for the exceptions.

## Exception - Amount Block

As part of amount block validation, application will check if sufficient balance is available in the account to create the block. On hand-off, system will debit the blocked account to the extent of block and credit charges/ commission account in case of charges block or credit the amount in suspense account for blocks created for collateral. Amount block check will be done for all the parties related to the LC.

The transactions that have failed amount block due to non-availability of amount in respective account will reach the amount block exception stage.

Log in into OBTFPM Application, amount block exception queue. Amount block validation failed tasks for trade transactions will be listed in the queue. Open the task to view summary of important fields with values.

Exception is created when sufficient balance is not available for blocking the settlement account and the same can be addressed by the approver in the following ways:

Approve:

- Settlement amount will be funded (outside of this process)
- Allow account to be overdrawn during hand-off

Refer:

- Refer back to DE providing alternate settlement account to be used for block.
- Different collateral to be mapped or utilize lines in place of collateral.

Reject:

Reject the transaction due to non-availability of sufficient balance in settlement account.

## Multi Level Approval

Log in into OBTFPM Application and open the task to see the summary tiles. The tiles should display a list of important fields with values. User must be able to drill down from summary Tiles into respective data segments to verify the details of all fields under the data segment.

## Authorization Re-Key (Non-Online Channel)

For non-online channel, application will request approver for few critical field values as an authorization step. If the values captured match with the values available in the screen, system will allow user to open the transaction screens for further verification. If the re-key values are different from the values captured, then application will display an error message.

Open the task and re-key some of the critical field values from the request in the Re-key screen. Some of the fields below will dynamically be available for re-key.:

- Applicant Party
- LC Currency, Amount
- Beneficiary party
- Expiry Date
- Issuing Bank

Re-key is applicable to the first approver in case of multiple approvers. All approvers will however be able see the summary tiles and the details in the screen by drill down from tiles.
