Oracle Banking Trade Finance Process Management

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing trade finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle Trade Finance transaction.
- Help users to conveniently create and process Trade Finance transaction

Overview

OBTFPM is a Trade Finance middle office platform, which enables bank to streamline the trade finance operations. OBTFPM enables the customers to send request for new Trade Finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

Benefits

OBTFPM helps banks to manage Trade Finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all Trade Finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

Key Features

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

Export Documentary Collection Update

Export Documentary collection Update process involves update of an existing documentary collection under Export LC.

This section contains the following topics:

Registration

The process starts from Registration stage, on registering the task in OBTFPM, user can capture the basic details of the transaction and upload related documents. On submit, the request will be available for an collection expert to handle the request in the next stage.

1. Using the entitled login credentials for Registration stage, login to the OBTFPM application.

ORACLE®

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.
3. Click **Trade Finance> Tasks> Free Tasks.**
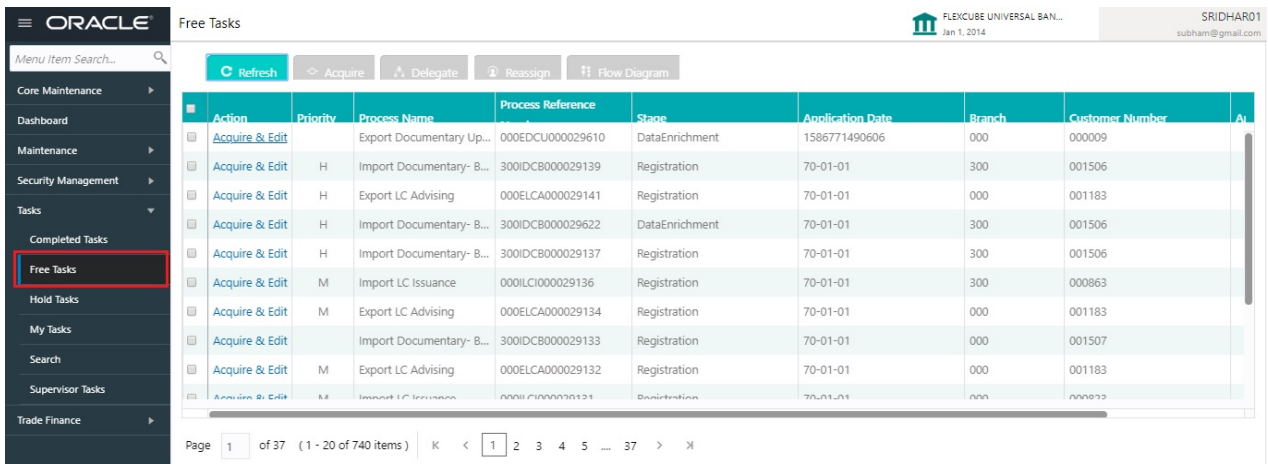

4. Select the appropriate task and click **Acquire & Edit** to edit the task or click **Acquire** to edit the task from **My Tasks**.
ORACLE®

5. The acquired task will be available in **My Tasks** tab. Click **Edit** to update the registered task.

The Data Enrichment stage has six sections as follows:

- Main Details
- Consolidated Update
- Additional Fields
- Advices
- Additional Details
- Settlement Details
- Summary

Let's look at the details for Data enrichment stage. User can enter/update the following fields. Some of the fields that are already having value from Registration/online channels may not be editable.

Main Details

Main details section has two sub section as follows:

- Application Details
- Collection Details

Application Details

All fields displayed under Basic details section, would be read only except for the **Priority**. Refer to Application Details for more information of the fields.

Collection Details

The fields listed under this section are same as the fields listed under the Collection Details section in Registration. Refer to Collection Details for more information of the fields. During Registration, if user has not captured input, then user can capture the details in this section.

Action Buttons

Use action buttons based on the description in the following table:

| Field	Description	Sample Values
Save & Close	Save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.	
Cancel	Cancel the Data Enrichment stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.	
Hold	The details provided will be saved and status will be on hold.User must update the remarks on the reason for holding the task. This option is used, if there are any pending information yet to be received from applicant.	
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.	
Next	Click Next to move to next logical screen of Data Enrichment stage.	

ORACLE®

Consolidated Update

User can review and update the collection booking details.

Draft Details

Update the draft details from the documents submitted under Import Collection Booking Update as per the description in the following table:

Field	Description	Sample Values
Draft Code	Select the Draft Code.	
Draft Amount	Provide the Draft Amount based on the documents submitted under Import Collection Booking.	

Maturity Details

Update the maturity details based on the description in the following table:

Field	Description	Sample Values
Tenor Type	Modify the tenor type, if required.	
Tenor Basis	Update the tenor basis, if the tenor is not sight.	
Tenor Start Date	Update the tenor start date, if required.	
Tenor Days	Update the number of tenor days, if required	
Transit Days	Update the transit days, if the tenor is sight.	
Maturity date	System displays the due date for the drawing based on tenor and tenor basis. If tenor is sight, system will calculate the maturity date as 5 working days from document Received date. User can change this value to any date earlier than the maturity date up to system date. User cannot change the value to later than maturity date. If tenor is Usance, system will calculate the maturity date based on the tenor basis and populate the maturity date.	
Usance Interest Rate	Update the usance interest rate, if required.	
Usance Interest Amount	Update the usance interest amount for the LC value as per the tenor basis, if required.	

In case of multi tenor, user can provide multiple maturity details by clicking the plus icon.

Field	Description	Sample Values
Interest From Date	Update the interest From date. The interest from date cannot be earlier than branch date and later than maturity date.	

ORACLE®

Field	Description	Sample Values
Interest To Date	Update the interest To date. The interest from date cannot be earlier than branch date and later than maturity date.	
Pass Interest To	Select the party responsible for the interest charges.	
Pass Our Charges To	Select the party responsible for the charges.	

Other Bank Charges

Provide the other bank charges based on the description in the following table:

Field	Description	Sample Values
Other Bank Charges - 1	Charges to be collected for the other bank as part of the drawings transaction.	
Other Bank Charges - 2	Charges to be collected for the other bank as part of the drawings transaction.	
Other Bank Charges - 3	Charges to be collected for the other bank as part of the drawings transaction.	
Debit Value Date	Provide the debit value date.	
Credit Value Date	Provide the credit value date.	
Value Date	Provide the value date.	
Allow Pre-Payment	**Toggle On:** Set the toggle 'On' to enable pre-payment. **Toggle Off:** Set the toggle 'Off' to disable pre-payment.	
Refund Interest	**Toggle On:** Set the toggle 'On' to refund the interest. **Toggle Off:** Set the toggle 'Off' to deny the interest refund.	
Transfer Collateral from LC	**Toggle On:** Set the toggle 'On' to enable the transfer collateral from LC. **Toggle Off:** Set the toggle 'Off' to disable the transfer collateral from LC.	

Shipment Details

User can update the goods and shipment details from the documents received/Export Collection Booking.

ORACLE®

Shipment Details

This section displays the shipment details from Export Collection Booking:

Field	Description	Sample Values
Date Of Shipment	Read only field. This field displays date of shipment from Export Collection Booking.	
Place Of Taking In Charge	Read only filed. This field specifies the place of taking in charge (in case of a multi-modal transport document), the place of receipt (in case of a road, rail or inland waterway transport document or a courier or expedited delivery service document), the place of dispatch or the place of shipment to be indicated on the transport document. **Note** This field is alternate to **Port Of Loading**.	

ORACLE®

Field	Description	Sample Values
Port Of Loading	Read only field. This field specifies the port of discharge or airport of destination to be indicated on the transport document. **Note** This field is alternate to **Place Of Taking In Charge**.	
Port Of Discharge	Read only field. This field specifies the port of discharge or airport of destination to be indicated on the transport document. **Note** This field is alternate to **Place Of Final Destination**.	
Place Of Final Delivery	Read only field. This field specifies the final destination or place of delivery to be indicated on the transport document. **Note** This field is alternate to **Port Of Discharge**.	
Carrier Name	Read only field. This field displays the name of the carrier through which the goods were shipped from Export Collection Booking.	
Shipping Agent	Read only field. This field displays the shipping agent name from Export Collection Booking.	
Shipping Agent Address	Read only field. This field displays the name shipping agent address from Export Collection Booking.	
Transshipment	Read only field. This field displays the transshipment details of goods from Export Collection Booking.	
Partial Shipment	Read only field. This field displays the partial shipment details of goods from Export Collection Booking.	

ORACLE®

Goods Details

This section displays the goods details from Export Collection Booking:

Field	Description	Sample Values
INCO Terms	Read only field. This field displays the INCO Terms from Export Collection Booking.	
Goods Code	Read only field. This field displays the goods code from Export Collection Booking.	
Goods Description	Read only field. This field displays the goods description from Export Collection Booking.	
Country of Origin	Read only field. This field displays the country of origin from Export Collection Booking.	
Insurance Company Code	Read only field. This field displays the insurance company code from Export Collection Booking.	
Insurance Company	Read only field. This field displays the insurance company details from Export Collection Booking.	

ORACLE®

Field	Description	Sample Values
Insurance Company Address	Read only field. This field displays the insurance address from Export Collection Booking.	

Multimodal/Transshipment Details

This section displays the multimodal/transshipment details from Export Collection Booking.

Field	Description	Sample Values
Carrier Name	Read only field. This field displays the carrier name from Export Collection Booking.	
Port	Read only field. This field displays the port details from Export Collection Booking.	

Document Details

This section displays details of the documents received from Export Collection Booking.

Field	Description	Sample Values
Document Code	Read only field. This field displays the document code from Export Collection Booking.	
Document Description	Read only field. This field displays the document description from Export Collection Booking.	
Document Reference	Read only field. This field displays the document reference from Export Collection Booking.	
Received - Original	Read only field. This field displays the number of original from Export Collection Booking.	

ORACLE®

Field	Description	Sample Values
Received - Copy	Read only field. This field displays the number of copies from Export Collection Booking.	

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Save & Close	Save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.	
Cancel	Cancel the Data Enrichment stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.	
Hold	The details provided will be saved and status will be on hold. User must update the remarks on the reason for holding the task. This option is used, if there are any pending information yet to be received from applicant.	
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.	
Next	Click Next to move to next logical screen of Data Enrichment stage.	

ORACLE®

Updated Details

This section enables the user to view the details of the updated fields along with the old values for the Data Enrichment user to compare.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Save & Close	Save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.	
Cancel	Cancel the Data Enrichment stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.	
Hold	The details provided will be saved and status will be on hold.User must update the remarks on the reason for holding the task. This option is used, if there are any pending information yet to be received from applicant.	

Field	Description	Sample Values
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes: • R1- Documents missing • R2- Signature Missing • R3- Input Error • R4- Insufficient Balance/Limits • R5 - Others. Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.	
Next	Click Next to move to next logical screen of Data Enrichment stage.	

Additional Fields

Banks can configure user defined fields as per their requirement in the Additional Fields Screen.

Advices

Advices menu displays the advices from the back office as tiles. User can edit the fields in the tile, if required.

Additional Details

Charge Details

This section displays charge details:

Field	Description	Sample Values
Component	Charge Component type.	
Currency	Defaults the currency in which the charges have to be collected.	
Amount	An amount that is maintained under the product code gets defaulted in this field.	
Modified Amount	From the default value, if the rate is changed or the amount is changed, the value gets updated in the modified amount field.	

Field	Description	Sample Values
Billing	If charges are handled by separate billing engine, then by selecting billing the details to be available for billing engine for further processing.	
Defer	If charges have to be deferred and collected at any future step, this check box has to be selected.

Amount	Amount for each component. This is populated from the transaction details of the drawing.	

Summary

User can review the summary of details updated in Data Enrichment stage of Export Documentary Collection Update request.

ORACLE®

The tiles must display a list of important fields with values. User can drill down from summary Tiles into respective data segments.
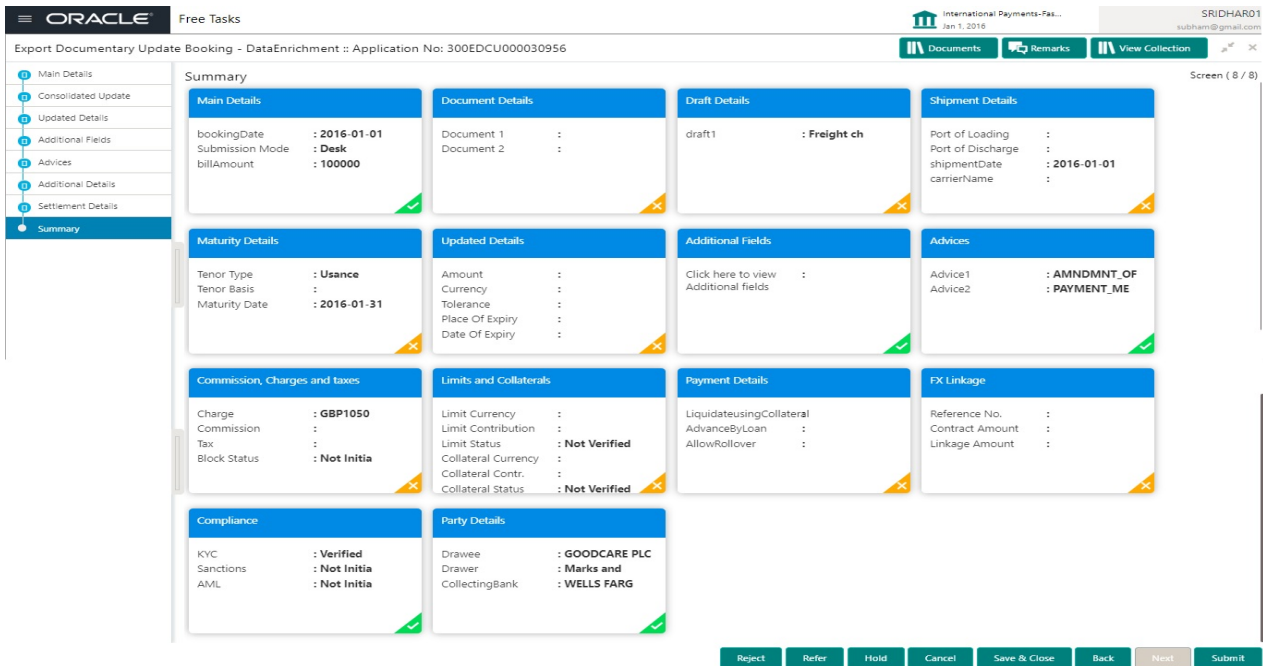

Tiles Displayed in Summary

- Main Details - User can view details about application details and LC details.
- Party Details - User can view party details like applicant, advising bank etc.
- Maturity Details - User can view the maturity details.
- Document Details - User can view the document details.
- Draft Details - User can view the draft details.
- Updated Details - User can view the updated details.
- Charges - User can view the charge details
- Additional Fields - User can view the additional fields.
- Payment Details - User can view the payment details.
- Advices - User can view the advices.
- Shipment Details - User can view the shipment details.
- Preview Message - User can view the draft preview message.
- Compliance - User can view the compliance details.

Action Buttons

Use action buttons based on the description in the following table:

Field	Description	Sample Values
Submit	Task will move to next logical stage of Export Documentary Collection Update. If mandatory fields have not been captured, system will display an error message highlighting that the mandatory fields have to be updated. In case of duplicate documents' system will terminate the process after handing off the details to back office.	

ORACLE®

Field	Description	Sample Values
Save & Close	Save the details provided and holds the task in 'My Task' queue for further update. This option will not submit the request.	
Cancel	Cancel the Data Enrichment stage inputs. The details updated in this stage are not saved. The task will be available in 'My Task' queue.	
Hold	The details provided will be saved and status will be on hold.User must update the remarks on the reason for holding the task. This option is used, if there are any pending information yet to be received from applicant.	
Reject	On click of Reject, user must select a Reject Reason from a list displayed by the system. Reject Codes: - R1- Documents missing - R2- Signature Missing - R3- Input Error - R4- Insufficient Balance/Limits - R5 - Others. Select a Reject code and give a Reject Description. This reject reason will be available in the remarks window throughout the process.	

Exceptions

The Export Collection Update request, before the task moves to the approval stage, the application will validate the Amount Block, KYC and AML. A failure in validation of any of them, the task will reach exception stage for further approval for the exceptions.

Exception - Amount Block

As part of amount block validation, application will check if sufficient balance is available in the account to create an amount block. On hand-off, system will debit the blocked account to the extent earmark and credit charges/ commission account in case of charges block or credit the amount in suspense account for earmarks created for collateral.

The transactions that have failed amount block due to non-availability of amount in respective account will reach the amount block exception stage.

Log in into OBTFPM application, amount block exception queue. Amount block validation failed tasks for trade transactions will be listed in the queue. Open the task to view summary of updated available fields with values.

Exception is created when sufficient balance is not available for blocking the settlement account and the same can be addressed by the approver in the following ways:

Approve:

ORACLE®

- Settlement amount will be funded (outside of this process)
- Allow account to be overdrawn during hand-off

Refer:

- Refer back to DE providing alternate settlement account to be used for block.
- Different collateral to be mapped or utilize lines in place of collateral.

Reject:

Reject the transaction due to non-availability of sufficient balance in settlement account

Amount Bock Exception

This section will display the amount block exception details.

Summary

Tiles Displayed in Summary:

- Main Details - User can view and modify details about application details and LC details, if required.
- Party Details - User can view and modify party details like beneficiary, advising bank etc., if required
- Limits and Collaterals - User can view and modify limits and collateral details, if required.
- Charge Details - User can view and modify details provided for charges, if required.

Action Buttons

Use action buttons based on the description in the following table:

Back	Task moves to previous logical step.	

Multi Level Approval

Log in into OBTFPM application and acquire the task available in the approval stage in free task queue. Authorization User can acquire the task for approving.

Authorization Re-Key (Non-Online Channel)

For non online channel, application will request approver for few critical field values as an authorization step. If the values captured match with the values available in the screen, system will allow user to open

ORACLE®

the transaction screens for further verification. If the re-key values are different from the values captured, then application will display an error message.

Open the task and re-key some of the critical field values from the request in the Re-key screen. Some of the fields below will dynamically be available for re-key.:

- Drawee Name
- Drawer Name
- Bill Currency
- Bill Amount

Re-key is applicable to the first approver in case of multiple approvers. All approvers will however be able see the summary tiles and the details in the screen by drill down from tiles.

Summary

Tiles Displayed in Summary:

- Main Details - User can view details about application details and LC details.
- Party Details - User can view party details like applicant, advising bank etc.

ORACLE®

- Maturity Details - User can view the maturity details.

- Documents - User can view the document details.

- Draft Details - User can view the draft details.

- Shipment Details - User can view the shipment details.

- Limits and Collaterals - User can view limits and collateral details
