# **Oracle Banking Trade Finance Process Management**

Welcome to the Oracle Banking Trade Finance Process Management (OBTFPM) User Guide. This guide provides an overview on the OBTFPM application and takes you through the various steps involved in creating and processing trade finance transactions.

This document will take you through following activities in OBTFPM:

- To create and handle trade finance transaction.
- Help users to conveniently create and process trade finance transaction

### Overview

OBTFPM is a trade finance middle office platform, which enables bank to streamline the trade finance operations. OBTFPM enables the customers to send request for new trade finance transaction either by visiting the branch (offline channels) or through SWIFT/Trade Portal/other external systems (online channels).

## **Benefits**

OBTFPM helps banks to manage trade finance operations across the globe in different currencies. OBTFPM allows you to:

- Handle all trade finance transactions in a single platform.
- Provides support for limit verification and limit earmarking.
- Provide amount block support for customer account.
- Provides acknowledgement to customers.
- Enables the user to upload related documents during transaction.
- Enables to Integrate with back end applications for tracking limits, creating limit earmarks, amount blocks, checking KYC, AML and Sanction checks status.
- Create, track and close exceptions for the above checks.
- Enables to use customer specific templates for fast and easy processing of trade transactions that reoccur periodically.

### **Key Features**

- Stand-alone system that can be paired with any back end application.
- Minimum changes required to integrate with bank's existing core systems.
- Faster time to market.
- Capable to interface with corporate ERP and SWIFT to Corporate.
- Highly configurable based on bank specific needs.
- Flexibility in modifying processes.

# **Guarantee Advice**

As part of Guarantee Advice the advising bank advises a guarantee received from the issuing bank to the beneficiary of the guarantee.

The various stages involved in OBTFPM during advising of a guarantee are:

- Receive and verify guarantee (non-online channel) Registration stage
- Input application details
- · Upload of related mandatory and non mandatory documents
- Verify documents and capture details
- Input/Modify Details of LC Data Enrichment Stage
- Check for sanctions & KYC status
- Capture remarks for other users to check and act
- Hand off request to back office

.In the following sections, let's look at the details for Guarantee Advising process:

This section contains the following topics:

| Registration         | Scrutiny        |
|----------------------|-----------------|
| Data Enrichment      | Exceptions      |
| Multi Level Approval | Reject Approval |

# Registration

As a registration user, you can register a Guarantee Advice request, also can upload relevant documents and verify checklist items. If Guarantee to be advised is received as physical instrument, the Guarantee Advice process starts from the Registration Stage.

During registration stage, user can capture the basic details, check the signature of the authorized signatory of the Guarantee Issuing Bank and upload the guarantee. It also enables the user to capture some additional product related details as an option. On submit, the request will be available for an Guarantee Advice expert to handle the

request in the next stage

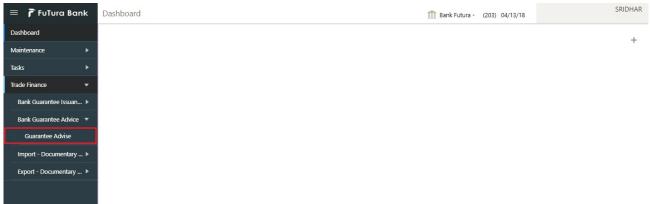

1. Using the entitled login credentials for registration stage, login to the OBTFPM application.

# **Scrutiny**

On successful completion of registration of an Guarantee advice request, the request moves to scrutiny stage.

**Non-Online Channel** - Guarantee Advice requests that were received at the desk will move to scrutiny stage post successful registration. The request will have the details entered during the registration stage.

**Online Channel** - Requests that are received via SWIFT are available directly for further processing from scrutiny stage and available data for all data segments from Application stage to Data Enrichment stage would be auto populated.

Do the following steps to acquire a task currently at Scrutiny stage:

1. Using the entitled login credentials for scrutiny stage, login to the OBTFPM application.

| 루 FuTura Bank |
|---------------|
| Sign In       |
| User Name *   |
| SRIDHAR       |
| Password *    |
|               |
|               |
| Sign In       |
|               |

2. On login, user must be able to view the dashboard screen with widgets as mapped to the user.

The Scrutiny stage has three sections as follows:

- Main Details
- Additional Details
- Summary

Let's look at the details for scrutiny stage. User can enter/update the following fields. Some of the fields that are already having value from registration/online channels may not be editable.

#### Main Details

Main details section has three sub section as follows:

- Application
- Application Details
- Guarantee Details

#### Application

This section provides a quick snapshot of details of Guarantee Advice. This Application section will be available in all the sections of Scrutiny stage in read only mode. This section is collapsible.

## Application

Refer to Application.

#### **Charge Details**

If default charges are available under the product, they should be defaulted here with values. If customer or customer group specific charges are maintained, then the same will be defaulted from back end system.

Provide the Charge Details based on the description provided in the following table:

| Charge Deta       | ails     |        |          |         |       |       |              |                    |
|-------------------|----------|--------|----------|---------|-------|-------|--------------|--------------------|
| Component         | Currency | Amount | Modified | Billing | Defer | Waive | Charge Party | Settlement Account |
| No data to displa | y.       |        |          |         |       |       |              |                    |

| Field           | Description   | Sample Values |
|-----------------|---|---------------|
| Component       | Charge Component type.  |               |
| Currency        | Defaults the currency in which the charges have to be collected.  |               |
| Amount          | An amount that is maintained under the product code gets defaulted in this field. User can edit the value, if required.                                   |               |
| Modified Amount | From the default value, if the rate is changed or<br>the amount is changed, the value gets updated in<br>the modified amount field.                       |               |
| Billing         | If charges are handled by separate billing engine,<br>then by selecting billing the details to be available<br>for billing engine for further processing. |               |

| Field              | Description   | Sample Values |
|--------------------|---|---------------|
| Defer              | If charges have to be deferred and collected at<br>any future step, this check box has to be<br>selected. |               |
| Waive              | If charges have to be waived, this check box has to be selected.  |               |
|                    | Based on the customer maintenance, the charges should be marked for Billing or for Defer.                 |               |
| Charge Party       | Charge party will be beneficiary by default. You can change the value to applicant                        |               |
| Settlement Account | Details of the settlement account.  |               |

Provide the Commission Details based on the description provided in the following table:

| Commission        | Details |          |        |          |       |       |              |                    |
|-------------------|---------|----------|--------|----------|-------|-------|--------------|--------------------|
| Component         | Rate    | Currency | Amount | Modified | Defer | Waive | Charge Party | Settlement Account |
| No data to displa | у.      |          |        |          |       |       |              |                    |

| Field           | Description  | Sample Values |
|-----------------|--|---------------|
| Component       | Select the commission component  |               |
| Rate            | Defaults from product. User can change the rate, if required.  |               |
| Currency        | Defaults the currency in which the commission needs to be collected  |               |
| Amount          | An amount that is maintained under the product code defaults in this field. User can modify the value, if required.  |               |
| Modified Amount | From the default value, if the rate or amount is changed, the modified value gets updated in the modified amount field.  |               |
| Billing         | If charges/commission is handled by separate<br>billing engine, then by selecting billing the details<br>to be available for billing engine for further<br>processing. |               |
| Defer           | Select the check box, if charges/commissions has to be deferred and collected at any future step.  |               |

| Field              | Description  | Sample Values |
|--------------------|--|---------------|
| Waive              | Select the check box to waive charges/ commission.   |               |
|                    | Based on the customer maintenance, the charges/commission can be marked for Billing or Defer.  |               |
|                    | If the defaulted Commission is changed to defer<br>or billing or waive, system must capture the user<br>details and the modification details in the<br>'Remarks' place holder. |               |
| Charge Party       | Charge party will be 'Beneficiary' by Default. You can change the value to Applicant.  |               |
| Settlement Account | Details of the Settlement Account.   |               |

The tax component is calculated based on the commission. The tax component defaults if maintained in the product level. Tax detail cannot be updated by you and any change in Tax amount on account of modification of charges/ commission will be available on click of Re-Calculate button or on hand off to back-end system.

Provide the Tax Details based on the information in the following table:

| -   | -  |       |
|-----|----|-------|
| lax | De | tails |

| Component           | Currency | Amount | Settlement Account |
|---------------------|----------|--------|--------------------|
| No data to display. |          |        |                    |

| Field                    | Description  | Sample Values |
|--------------------------|--|---------------|
| Component                | Tax Component type   |               |
| Currency                 | The tax currency is the same as the commission.  |               |
| Amount                   | The tax amount defaults based on the percentage of commission maintained. You can edit the same. |               |
| Settlement Account       | Details of the settlement Account.   |               |
| Charges from Beneficiary | Input the amount to be collected from beneficiary on account of this transaction.                |               |

### Action Buttons

Use action buttons based on the description in the following table:

| Reject | On click of Reject, user must select a Reject Reason from a list displayed by the system.  |               |
|        | Reject Codes:  |               |
|        | <ul> <li>R1- Documents missing</li> <li>R2- Signature Missing</li> <li>R3- Input Error</li> <li>R4- Insufficient Balance/Limits</li> <li>R5 - Others.</li> </ul> |               |
|        | Select a Reject code and give a Reject<br>Description.   |               |
|        | This reject reason will be available in the remarks window throughout the process.   |               |

# **Data Enrichment**

As part of data enrichment, you can enter/update basic details of the incoming request.

Do the following steps to acquire a task which completed the registration and scrutiny and currently at Data enrichment stage:

1. Using the entitled login credentials for scrutiny stage, login to the OBTFPM application.

|             | • | Draft Confirmation P  | ending 4         | ×   | Hand-off Failure |              | Ø ×           | Priority Details |                 | ¢ ×          |  |

The Data Enrichment stage has four sections as follows:

- Main Details
- Guarantee Details
- Additional Details
- Summary

In the subsequent sub sections, let's look at the details for Data Enrichment stage. You should be able to enter/update the following fields. Some of the fields that are already having value from Scrutiny/Online channels may not be editable.

### **Main Details**

Refer to Main Details.

## **Guarantee Details**

#### Application

Refer to Application.

## **Details Of Guarantee**

The details from the SWIFT message will get auto populated in the fields, also user can add new rows to add details.

## Application

Refer to Application.

#### **Charge Details**

If default charges are available under the product, they should be defaulted here with values. If customer or customer group specific charges are maintained, then the same will be defaulted from back end system.

Provide the Charge Details based on the description provided in the following table:

| omponent | Currency | Amount | Modified | Billing | Defer | Waive | Charge Party | Settlement Account |
|----------|----------|--------|----------|---------|-------|-------|--------------|--------------------|
|----------|----------|--------|----------|---------|-------|-------|--------------|--------------------|

| Field           | Description   | Sample Values |
|-----------------|---|---------------|
| Component       | Charge Component type.  |               |
| Currency        | Defaults the currency in which the charges have to be collected.  |               |
| Amount          | An amount that is maintained under the product code gets defaulted in this field. User can edit the value, if required.                                   |               |
| Modified Amount | From the default value, if the rate is changed or<br>the amount is changed, the value gets updated in<br>the modified amount field.                       |               |
| Billing         | If charges are handled by separate billing engine,<br>then by selecting billing the details to be available<br>for billing engine for further processing. |               |

| Field              | Description   | Sample Values |
|--------------------|---|---------------|
| Defer              | If charges have to be deferred and collected at<br>any future step, this check box has to be<br>selected. |               |
| Waive              | If charges have to be waived, this check box has to be selected.  |               |
|                    | Based on the customer maintenance, the charges should be marked for Billing or for Defer.                 |               |
| Charge Party       | Charge party will be beneficiary by default. You can change the value to applicant.                       |               |
| Settlement Account | Details of the settlement account.  |               |

Provide the Commission Details based on the description provided in the following table:

▲ Commission Details

| Component Rate Currency No data to display. | Amount Modified Defer Waive Charge Party   | Settlement Account |
|---|--|--------------------|
| Field                                       | Description  | Sample Values      |
| Component                                   | Select the commission component  |                    |
| Rate  | Defaults from product. User can change the rate, if required.  |                    |
| Currency                                    | Defaults the currency in which the commission needs to be collected  |                    |
| Amount                                      | An amount that is maintained under the product code defaults in this field. User can modify the value, if required.  |                    |
| Modified Amount                             | From the default value, if the rate or amount is changed, the modified value gets updated in the modified amount field.  |                    |
| Billing                                     | If charges/commission is handled by separate<br>billing engine, then by selecting billing the details<br>to be available for billing engine for further<br>processing.         |                    |
| Defer                                       | Select the check box, if charges/commissions has to be deferred and collected at any future step.  |                    |
| Waive                                       | Select the check box to waive charges/ commission.   |                    |
|   | Based on the customer maintenance, the charges/commission can be marked for Billing or Defer.  |                    |
|   | If the defaulted Commission is changed to defer<br>or billing or waive, system must capture the user<br>details and the modification details in the<br>'Remarks' place holder. |                    |

| Field              | Description  | Sample Values |
|--------------------|--|---------------|
| Charge Party       | Charge party will be 'Applicant' by Default. You can change the value to Beneficiary |               |
| Settlement Account | Details of the Settlement Account.   |               |

The tax component is calculated based on the commission. The tax component defaults if maintained in the product level. Tax detail cannot be updated by you and any change in Tax amount on account of modification of charges/ commission will be available on click of Re-Calculate button or on hand off to back-end system.

Provide the Tax Details based on the information in the following table:

| ▲ Tax Details       |          |        |                    |
|---------------------|----------|--------|--------------------|
| Component           | Currency | Amount | Settlement Account |
| No data to display. |          |        |                    |

| Field                    | Description  | Sample Values |
|--------------------------|--|---------------|
| Component                | Tax Component type   |               |
| Currency                 | The tax currency is the same as the commission.  |               |
| Amount                   | The tax amount defaults based on the percentage of commission maintained. You can edit the same. |               |
| Settlement Account       | Details of the settlement Account.   |               |
| Charges from Beneficiary | Input the amount to be collected from beneficiary on account of this transaction.                |               |

## Action Buttons

Use action buttons based on the description in the following table:

| Field        | Description   | Sample Values |
|--------------|---|---------------|
| Submit       | Task will get moved to next logical stage of Guarantee Advice.  |               |
|              | If mandatory fields have not been captured,<br>system will display an error message until the<br>mandatory fields data are provided.                                      |               |
| Save & Close | Save the information provided and holds the task<br>in you queue for working later.<br>This option will not submit the request  |               |
| Cancel       | Cancel the Data Enrichment Stage Inputs.  |               |
| Hold         | The details provided will be registered and status<br>will be on hold.<br>This option is used, if there are any pending<br>information yet to be received from applicant. |               |

| Field  | Description   | Sample Values |
|--------|---|---------------|
| Reject | On click of Reject, user must select a Reject Reason from a list displayed by the system. |               |
|        | Reject Codes:   |               |
|        | <ul> <li>R1- Documents missing</li> </ul>   |               |
|        | R2- Signature Missing   |               |
|        | R3- Input Error   |               |
|        | <ul> <li>R4- Insufficient Balance/Limits</li> </ul>                                       |               |
|        | • R5 - Others.  |               |
|        | Select a Reject code and give a Reject Description.                                       |               |
|        | This reject reason will be available in the remarks window throughout the process.        |               |
| Next   | Click Next to move to next logical step in Data<br>Enrichment stage.                      |               |

#### Summary

User can review the summary of details updated in Data Enrichment stage Guarantee Advice request.

The tiles will display a list of important fields with values. User can drill down from summary tiles into respective data segments.

#### **Tiles Displayed in Summary**

- Main Details User can view and modify details about application details and guarantee details, if required.
- Party Details User can view and modify party details like beneficiary, advising bank etc., if required.
- Charge Details User can view and modify charge details, if required.
- Guarantee Details User can view and modify Guarantee details, if required.
- Advice Preview User can view draft guarantee details.
- Compliance User can view compliance details. The status must be verified for KYC and to be initiated for AML and Sanction Checks.

### **Action Buttons**

Use action buttons based on the description in the following table:

| Field        | Description  | Sample Values |
|--------------|--|---------------|
| Submit       | Task will get moved to next logical stage of Guarantee Advice.   |               |
|              | If mandatory fields have not been captured,<br>system will display an error message until the<br>mandatory fields data are provided. |               |
| Save & Close | Save the information provided and holds the task<br>in you queue for working later.<br>This option will not submit the request       |               |
| Cancel       | Cancel the Data Enrichment stage inputs.   |               |
| Hold         | The details provided will be registered and status will be on hold.  |               |
|              | This option is used, if there are any pending information yet to be received from applicant.   |               |
| Reject       | On click of Reject, user must select a Reject<br>Reason from a list displayed by the system.   |               |
|              | Reject Codes:  |               |
|              | R1- Documents missing  |               |
|              | R2- Signature Missing  |               |
|              | R3- Input Error  |               |
|              | <ul> <li>R4- Insufficient Balance/Limits</li> <li>R5 - Others.</li> </ul>  |               |
|              | Select a Reject code and give a Reject<br>Description.   |               |
|              | This reject reason will be available in the remarks window throughout the process.   |               |

# **Exceptions**

The Guarantee Advice request, before it reaches the approval stage, the application will validate the Amount Block, KYC and AML. If any of these failed in validation will reach exception stage for further clearance for the exceptions.

#### **Exception - Amount Block**

As part of amount block validation, application will check if sufficient balance is available in the account to create the block. On hand-off, system will debit the blocked account to the extent of block and credit charges/ commission account in case of charges block or credit the amount in suspense account for blocks created for collateral.

The transactions that have failed amount block due to non-availability of amount in respective account will reach the amount block exception stage.

Log in into OBTFPM application, amount block exception queue. Amount block validation failed tasks for trade transactions will be listed in the queue. Open the task to view summary of important fields with values.

Exception is created when sufficient balance is not available for blocking the settlement account and the same can be addressed by the approver in the following ways:

Approve:

- Settlement amount will be funded (outside of this process)
- Allow account to be overdrawn during hand-off

#### Refer:

- Refer back to DE providing alternate settlement account to be used for block.
- Different collateral to be mapped or utilize lines in place of collateral.

#### Reject:

Reject the transaction due to non-availability of sufficient balance in settlement account

#### Application

Refer to Application.

#### **Amount Bock Exception**

This section will display the amount block exception details.

#### Summary

Tiles Displayed in Summary:

- Main Details- User can view details about application details and Guarantee details.
- Party Details User can view the party details like beneficiary, advising bank etc.
- Charge details User can view details provided for charges.
- Guarantee Details User can view Guarantee details and Sender to Receive Information.
- Advice Preview User can view draft guarantee details.
- Compliance User can view the compliance details tiles.

## **Action Buttons**

Use action buttons based on the description in the following table:

| Field   | Description   | Sample Values |
|---------|---|---------------|
| Reject  | On click of Reject, user must select a Reject<br>Reason from a list displayed by the system.  |               |

|         | R2- Signature Missing   |               |
|         | R3- Input Error   |               |
|         | <ul> <li>R4- Insufficient Balance- Limits</li> </ul>  |               |
|         | R5 - Others   |               |
| Cancel  | Cancel the Amount Block Exception Inputs.   |               |
| Approve | On approve, application must validate for all mandatory field values, and task must move to the next logical stage.   |               |
| Back    | Task moves to previous logical step.  |               |

## Exception - Know Your Customer (KYC)

As part of KYC validation, application will check if necessary KYC documents are available and valid for the applicant. The transactions that have failed KYC due to non-availability / expired KYC verification will reach KYC exception stage.

Log in into OBTFPM application, KYC exception queue. KYC exception failed tasks for trade finance transactions must be listed in your queue. Open the task, to see summary tiles that display a summary of important fields with values.

User can pick up a transaction and do the following actions:

#### Approve

- After changing the KYC status in the back end application (outside this process).
- Without changing the KYC status in the back end application.
- Reject (with appropriate reject reason).

### Application

Refer to Application.

#### Summary

Tiles Displayed in Summary:

- Main Details- User can view details about application details and Guarantee details.
- Party Details User can view the party details like beneficiary, advising bank etc.
- Charge details User can view details provided for charges.
- Guarantee Details User can view Guarantee details and Sender to Receive Information.
- Advice Preview User can view draft guarantee details.
- Compliance User can view the compliance details tiles.

#### **Action Buttons**

Use action buttons based on the description in the following table:

| Field  | Description  | Sample Values |
|--------|--|---------------|
| Reject | On click of Reject, user must select a Reject<br>Reason from a list displayed by the system. |               |
|        | Reject Codes:  |               |
|        | R1- Documents missing  |               |
|        | R2- Signature Missing  |               |
|        | R3- Input Error  |               |
|        | <ul> <li>R4- Insufficient Balance/Limits</li> </ul>  |               |
|        | • R5 - Others.   |               |
|        | Select a Reject code and give a Reject Description.  |               |
|        | This reject reason will be available in the remarks window throughout the process.           |               |
| Hold   | The details provided will be registered and status will be on hold.                          |               |
|        | This option is used, if there are any pending information yet to be received from applicant. |               |

| Field   | Description   | Sample Values |
|---------|---|---------------|
| Refer   | User will be able to refer the task back to the Data<br>Enrichment user.User must select a Refer<br>Reason from the values displayed by the system.<br>Refer Codes: |               |
|         | R2- Signature Missing   |               |
|         | <ul> <li>R3- Input Error</li> <li>R4- Insufficient Balance- Limits</li> </ul>   |               |
|         | <ul> <li>R5 - Others</li> </ul>   |               |
| Cancel  | Cancel the KYC Exception inputs.  |               |
| Approve | On approve, application must validate for all mandatory field values, and task must move to the next logical stage.   |               |
| Back    | Task moves to previous logical step.  |               |

## **Exception - Limit Check/Credit**

The transactions that have failed limit check due to non-availability of limits will be available in limit check exception queue for further handling.

Log in into OBTFPM application, limit check exception queue. Limit check exception failed tasks for trade finance transactions must be listed in your queue. Open the task, to see summary tiles that display a summary of important fields with values.

Limit check Exception approver can do the following actions:

#### Approve

- Limit enhanced in the back end (outside this process).
- Without enhancing limit in the back end.

#### Refer

- Refer back to DE providing alternate limit id to map
- Refer additional collateral to be mapped

#### Reject

The transaction due to non-availability of limits capturing reject reason.

#### Application

Refer to Application.

#### Summary

Tiles Displayed in Summary:

- Main Details- User can view details about application details and Guarantee details.
- Party Details User can view the party details like beneficiary, advising bank etc.
- Charge details User can view details provided for charges.

- Guarantee Details User can view Guarantee details and Sender to Receive Information.
- Advice Preview User can view draft guarantee details.
- Compliance User can view the compliance details tiles.

#### **Action Buttons**

Use action buttons based on the description in the following table:

| Field   | Description   | Sample Values |
|---------|---|---------------|
| Reject  | On click of Reject, user must select a Reject Reason from a list displayed by the system.   |               |
|         | Reject Codes:   |               |
|         | <ul> <li>R1- Documents missing</li> </ul>   |               |
|         | R2- Signature Missing   |               |
|         | R3- Input Error   |               |
|         | <ul> <li>R4- Insufficient Balance/Limits</li> </ul>   |               |
|         | • R5 - Others.  |               |
|         | Select a Reject code and give a Reject Description.   |               |
|         | This reject reason will be available in the remarks window throughout the process.  |               |
| Hold    | The details provided will be registered and status will be on hold.   |               |
|         | This option is used, if there are any pending information yet to be received from applicant.  |               |
| Refer   | User will be able to refer the task back to the Data<br>Enrichment user.User must select a Refer<br>Reason from the values displayed by the system.<br>Refer Codes: |               |
|         | <ul> <li>R1- Documents missing</li> </ul>   |               |
|         | R2- Signature Missing   |               |
|         | R3- Input Error   |               |
|         | <ul> <li>R4- Insufficient Balance- Limits</li> </ul>  |               |
|         | R5 - Others   |               |
| Cancel  | Cancel the Limit check inputs.  |               |
| Approve | On approve, application must validate for all mandatory field values, and task must move to the next logical stage.   |               |
| Back    | Task moves to previous logical step.  |               |

# **Multi Level Approval**

Log in into OBTFPM application and open the task to see the summary tiles. The tiles should display a list of important fields with values. User must be able to drill down from summary Tiles into respective data segments to verify the details of all fields under the data segment.

## Authorization Re-Key (Non-Online Channel)

For non-online channel, application will request approver for few critical field values as an authorization step. If the values captured match with the values available in the screen, system will allow user to open the transaction screens for further verification. If the re-key values are different from the values captured, then application will display an error message.

Open the task and re-key some of the critical field values from the request in the Re-key screen. Some of the fields below will dynamically be available for re-key.:

- Currency
- Amount
- Beneficiary Party
- Expiry Date
- Issuing Bank
- Validity

Re-key is applicable to the first approver in case of multiple approvers. All approvers will however be able see the summary tiles and the details in the screen by drill down from tiles.

### **Action Buttons**

Use action buttons based on the description in the following table:

| Field  | Description  | Sample Values |
|--------|--|---------------|
| Reject | On click of Reject, user must select a Reject<br>Reason from a list displayed by the system. |               |
|        | Reject Codes:  |               |
|        | R1- Documents missing  |               |
|        | R2- Signature Missing  |               |
|        | R3- Input Error  |               |
|        | R4- Insufficient Balance/Limits  |               |
|        | • R5 - Others.   |               |
|        | Select a Reject code and give a Reject Description.  |               |
|        | This reject reason will be available in the remarks window throughout the process.           |               |
|        | I  | I             |

| Field   | Description  | Sample Values |
|---------|--|---------------|
| Hold    | The details provided will be registered and status<br>will be on hold.<br>This option is used, if there are any pending<br>information yet to be received from applicant.  |               |
| Refer   | User will be able to refer the task back to the<br>Data Enrichment user.User must select a Refer<br>Reason from the values displayed by the system.<br>Refer Codes:<br>R1- Documents missing<br>R2- Signature Missing<br>R3- Input Error<br>R4- Insufficient Balance- Limits<br>R5 - Others                            |               |
| Cancel  | Cancel the Guarantee Advice approval.  |               |
| Approve | On approve, application must validate for all<br>mandatory field values, and task must move to<br>the next logical stage. If there are more<br>approvers, task will move to the next approver<br>for approval. If there are no more approvers, the<br>transaction is handed off to the back end system<br>for posting. |               |

# **Reject Approval**

As a Reject approver, user can review a transaction rejected and waiting for reject confirmation.

Log in into OBTFPM application to view the reject approval tasks for Guarantee Advice in queue. On opening the task, you will see summary tiles. The tiles will display a list of important fields with values.

The tile containing the screen from where the reject was triggered will be highlighted in red.

User can drill down from reject summary tiles into respective data segments to verify the details of all fields under the data segment.

### **Application Details**

The application details data segment have values for requests received from both non-online and online channels.

#### Summary

The data captured during handling of the transaction until the stage when reject is given will be available in the summary tile. Other fields will be blank when verified from summary tile.

- Main Details User can view and modify details about application details and guarantee details, if required.
- Party Details User can view and modify party details like beneficiary, advising bank etc., if required.
- Charge Details User can view and modify charge details, if required.

- Guarantee Details User can view and modify Counter Guarantee details and Guarantee details, if required.
- Advice Preview User can view and modify draft guarantee details, legal verification and customer confirmation details, if required.
- Compliance User can view compliance details. The status must be verified for KYC and to be initiated for AML and Sanction Checks.
- Remarks As a Reject approval user, you will be able to view the remarks captured in the process during earlier stages. User also can see the Reject code with reason for rejection in the Remarks column

## **Action Buttons**

Use action buttons based on the description in the following table:

| Field          | Description   | Sample Values |
|----------------|---|---------------|
| Reject Approve | On click of Reject approve, the transaction is rejected.  |               |
| Reject Decline | On click of Reject Decline, the task moves back<br>to the stage where it was rejected. User can<br>update the reason for reject decline in remarks. |               |
| Hold           | User can put the transaction on 'Hold'. Task will remain in Pending state.  |               |
| Cancel         | Cancel the Reject Approval.   |               |
