1 Getting Started

This section provides supporting information for the Oracle Financial Services Data Integration Hub (OFS DIH) Foundation Pack Extension for Oracle Banking Platform (OBP) user guide.

1.1 Audience

The OBP User Guide is intended for the following audience:

- Extract, Transform, Load (ETL) Developers: The ETL Developers who perform data sourcing from the IT Department of the financial services institution.
- Business Analysts: The business analysts who perform mapping of tables from the IT Department of the financial services institution.

1.2 Prerequisites

Foundation Pack Extension for Oracle Banking Platform (OBP) is installed and ready for configuration.

1.3 Related Information Sources

Along with this user manual, see the following documents in the [OHC Documentation Library](#):

- Oracle Financial Services Data Integration Hub User Guide Release
- Oracle Financial Services Data Integration Hub Application Pack Installation Guide

1.4 Conventions

The following text conventions are used in this document:

Table 1: Document Conventions

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action or terms defined in text or the glossary.
<i>italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for which you need to update specific values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, file names, text that appears on the screen, or text that you enter.
Hyperlink	Hyperlink type indicates links to external websites, internal document links to sections.

1.5 Abbreviations

The following table defines the abbreviations used in this guide.

Acronym	Description
DIH	Data Integration Hub
UI	User Interface
ODI	Oracle Data Integrator
OBP	Oracle Banking Platform
OFSA	Oracle Financial Services Analytical Applications
ADI	Application Data Interface
KM	Knowledge Module
EDD	External Data Descriptor
Apps	Application
EOF	End of Financial Input

2 Introduction to OBP Interface

The Data Integration Hub (DIH) Interface enables you to load the data from the source systems to the Oracle Financial Services Analytical Applications (OFSAA) staging tables, through logical interfaces, known as Application Data Interfaces (ADI). DIH provides a set of User Interfaces (UI), which is used to define and maintain External Data Descriptors (EDD), Application Data Interfaces, and map the EDDs and ADIs through Connectors. The mappings can be one-to-one, one-to-many, and many-to-many.

The source systems that supply data include the core banking systems, rating systems, modeling systems, and so on. In the absence of DIH, the data from the source systems are extracted, transformed, and loaded (ETL process) to the physical tables in Oracle Data Integrator (ODI). With DIH, the ETL activity is not replaced; but DIH serves as an abstract, logical layer to the physical tables in Oracle Data Integrator (ODI).

Oracle Financial Services Analytical Applications (OFSAA) enables financial institutions to measure and meet risk-adjusted performance objectives, cultivate a risk management culture, lower the costs of compliance and regulation, and improve customer insight.

Oracle Business Platform (OBP) is designed to help banks respond strategically to today's business challenges and progressively transform their business models through industrialized business processes, driving productivity improvements across front and back offices, and reducing operating costs.

It supports banks' growth agenda through new distribution strategies including multi-brand or white labeling to tap new markets and enterprise product origination supporting multi-product and packages to drive an increased customer-to-product ratio.

Procedures which are packaged within OBP populates data from various tables in OBP to several landing area tables after execution. Essentially a 1:1 mapping is done between the landing area table (EDD) and OFSAA staging area table (ADI). Most of the calculations and transformations are done within these extraction routines. The DIH connector pulls data from the landing tables and populates the same in the staging area tables.

2.1 List of OBP Modules

The modules used in OBP are as follows:

- Accounting
- Currents and Savings Account (CASA) Channel
- Collateral
- Collections
- Core
- Customer
- Demand Deposit Account
- Facility
- General Ledger
- Interest

- Loan
- Mitigant
- Origination
- Party
- Product
- Term Deposit
- Overdraft

NOTE The supported version of OBP is 2.6.2.0.

3 Mapping the OFSAA User to OBP User Groups

User group mapping enables you to map user or users to specific user group which in turn is mapped to a specific Information Domain and role. Every user group mapped to the infodom must be authorized.

The User Group Map window displays fields such as **User ID, Name**, and the corresponding **Mapped Groups**. You can view and modify the existing mappings within the **User Group Maintenance** window.

To access User Group Mapping, follow these steps:

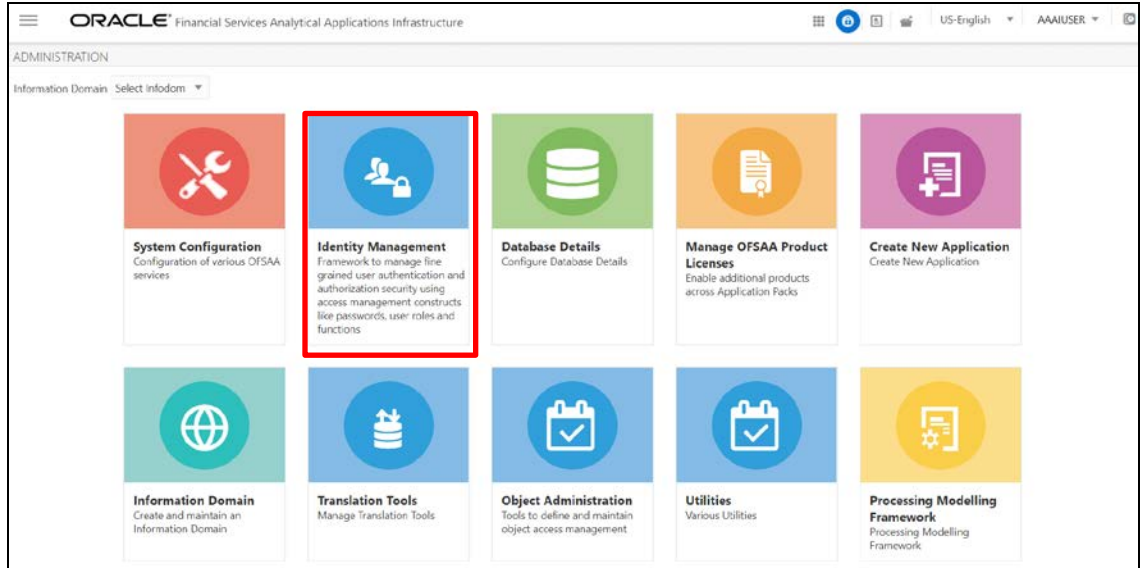

1. From the **Oracle Financial Services Analytical Applications Infrastructure** window, click Administration icon  from the header to display the Administration tools.

Figure 1: OFS AAI Administration Window

Acronym	Description
DIH	Data Integration Hub
UI	User Interface
ODI	Oracle Data Integrator
OBP	Oracle Banking Platform
OFSAA	Oracle Financial Services Analytical Applications
ADI	Application Data Interface
KM	Knowledge Module
EDD	External Data Descriptor
Apps	Application
EOFI	End of Financial Input

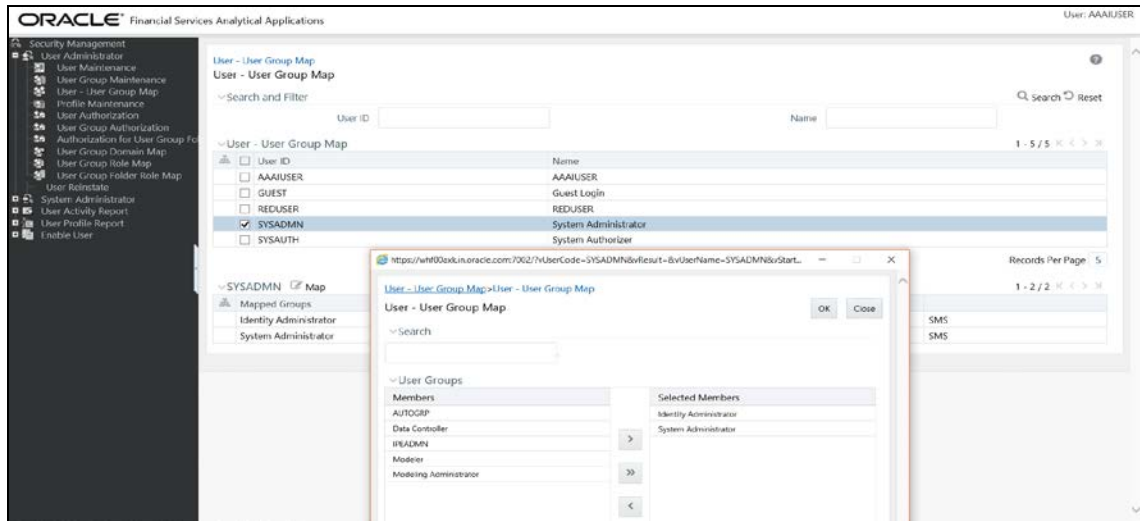

2. Select **Identity Management** from the Tiles menu to view the **Security Management** window, or
3. Click the **Navigation Menu**  to access the Navigation List.
4. Select **Identity Management** to view the **Security Management** window. You can map the users to the user groups in this window.

Figure 2: OFS AAI Security Management Window

For details on mapping users to user groups, see the [OFS Advanced Analytics Infrastructure User Guide](#). The following table lists the seeded user groups for OBP.

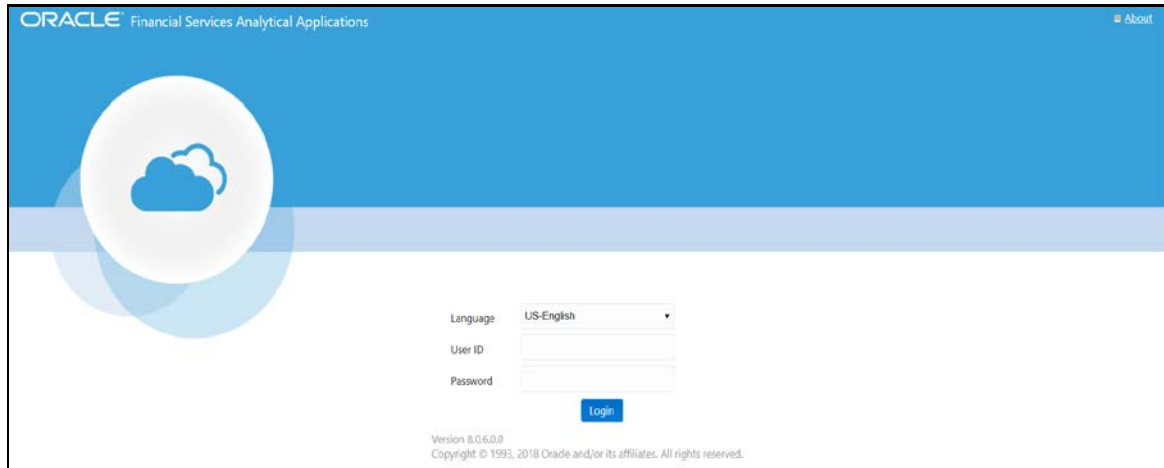

Table 1: Seeded User Groups for OFSAA - OBP Interface

Name	Description
OBP Admin	A user mapped to this group has access to all the menu items for the entire OBP Application. The exclusive menu is available only to users of this group.
OBP Data Mapping	A user mapped to this group has access to the OBP Data Mapping menu.
OBP Operator	A user mapped to this group has access to the Orchestration and Execution menu.

4 Accessing the OBP-OFSAA Interface

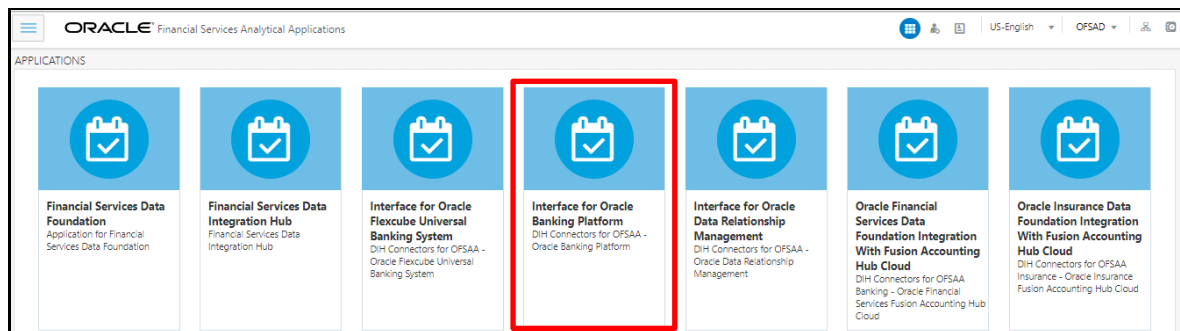

Access the OBP-OFSAA Interface using the login credentials (User ID and Password). The built-in security system ensures that you are permitted to access the window and actions based on the authorization only.

Figure 3: OBP - OFSAA Interface Login Window

After logging into the application, select **Interface for Oracle Banking Platform**.

Figure 4: Applications Window

NOTE You must be mapped to at least one OBP user groups to view the application.

5 Prerequisites for Deploying OFSAA-OBP Connectors

The deployment process requires the following actions to be performed as prerequisites. Ensure that these requirements are met using the Refresh OBP interface menu before starting the deployment.

- The user must be mapped to the OBP Admin user group to view the Refresh OBP Interface menu.
- The user must be mapped to DIH Admin and DIH Data Mapping user groups to configure the Oracle Data Integrator (ODI) settings and External Data Store respectively.

5.1 Setting up ODI Connectivity

To complete ODI setup, follow these steps:

1. From the **Data Integration Hub Designer** window, select **Configure** and then select **Settings**. This window captures the ODI set up information. The ODI settings window is displayed.

Figure 5: ODI Settings

The screenshot displays the Oracle Data Integration Hub ODI Settings window. The interface includes a navigation bar with 'Configure', 'Map', 'Publish', 'Analyse', and 'Help' options. Below the navigation bar, there are tabs for 'Settings', 'Refresh ADI', 'Parameters', and 'External Data Store'. The main content area is titled 'Manage information on connectivity with your ODI instance Start by capturing mandatory info, add optional details, test connectivity and save'. It features a 'Test Connection' button and a 'Save' button. The settings are organized into 'Mandatory' and 'Optional' sections. The 'Mandatory' section includes fields for ODI User (SUPERVISOR), ODI Password, Use INDI? (toggle), Master Repository User (DIH_ODI_REPO), Master Repository Password, Master Repository Driver (oracle.jdbc.OracleDriver), Master Repository Connection (jdbc:coraclethin://10.40.142.248:1521), Work Repository (WORKREP), Project Name (DIH), and Folder Name (DIH). The 'Optional' section includes the ODI Agent URL (http://whl00atu.in.oracle.com:20).

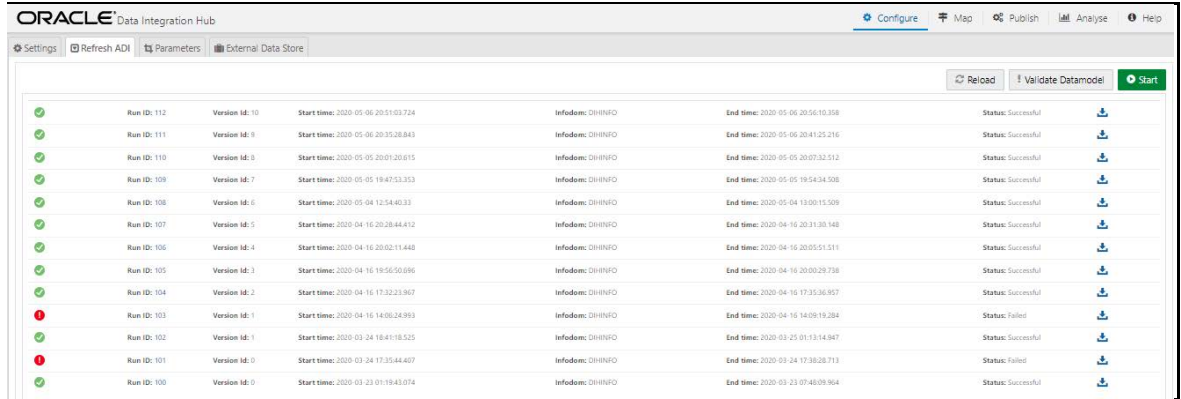

2. Update the settings before proceeding to the deployment of OBP interface connectors. The following table describes the Settings values required.

Table 2: Setting Values

Serial No.	Fields	Description
1	ODI User	The ODI supervisor user name you defined when creating the master repository or an ODI user name you defined in the Security Navigator after having created in the master repository.
2	ODI Password	The ODI supervisor password you defined when creating the master repository or an ODI user password you defined in the Security Navigator after having created the master repository.
3	Use JNDI	If Yes, enter the Master Repository JNDI. If No, enter Master Repository Database User, Master Repository Database Password, Master Database Driver, and Master Database Connection.
4	Master Repository Database User	Database user ID/login of the schema (database, library) that contains the ODI master repository.
5	Master Repository Database Password	Master Repository Database user password.
6	Master Database Driver	Specifies the driver required to connect to the RDBMS supporting the master repository created from the dropdown list. The default value is oracle.jdbc.OracleDriver. It is not changed when on the Oracle database.
7	Master Database Connection	The URL used to establish the JDBC connection to the database hosting the repository. The format is jdbc:oracle:thin:@<Hostname/IP Address>:<Port Number>:<Service Name>
8	Master Repository JNDI	JNDI name for ODI Master Repository
9	Work Repository	The name of the work repository that is created previously (Example: WorkRep1).
10	Project	Enter the Project Name created in ODI.
11	Folder	Enter the folder name under the project created in ODI. All the packages are created under this location.
12	Agent URL	Specify the agent URL where the ODI agent is running. This is used to execute a DIH connector from OFSAAI batch/RRF. This is not needed to do data mapping. The format is http://<Hostname/IP Address where ODI agent is running>:<PORT Number>/<Agent Context Name>

- From the **Data Integration Hub Designer** window, select **Configure** and then select **Refresh ADI**. The **Refresh Application Data Interface** summary is displayed.

Figure 9: Refresh Application Data Interface Summary Window

4. Click **Start**. This refreshes and creates the Application Data Interfaces for all the staging tables present in the model which are uploaded in the same Infodom.
5. From the **Data Integration Hub Designer** window, select **Publish** and then select **Refresh Target Datastores**. The **Refresh Target Datastore Interface** summary is displayed.

Figure 10: Refresh Target Datastore Interface Summary Window

6. Click **Start** to refresh all available target datastores.

6 Deploying or Undeploying OFSAA-OBP Connectors

After the prerequisites are complete, you can deploy the OBP connectors that map the multiple file EDDs to the corresponding ADIs, by using the **Refresh OBP Interface** menu. This creates the corresponding External Data Descriptor and Connectors inside **Data Mapping** menu of the OBP Interface.

To deploy or undeploy OFSAAOBP Connectors using Refresh OBP Interface window, follow these steps:

1. From the **Interface for Oracle Banking Platform** window, select **OBP Administration** and then select **Refresh OBP Interface**. The **Source Information** window is displayed.

Figure 11: Oracle Banking Platform – Source Information

Tenant Code	Tenant Name	Batch Name	JDBC Uri	DB Schema	User Id	Password	Delete	Test
T1	LE1	OBP_LE1	jdbc:oracle:thin:@10.40.136.58:1521/FC143/TRPDB	OFSAAREAD	OFSAAREAD			
T0	Default Source	OBP_DEFAULT_SOURCE	jdbc:oracle:thin:@vnt00data.in.oracle.com:1521/ORCLPDB1	dev_dih81atm	dev_dih81atm			

2. Select the **Source Application Version** (OBP Version 2.6.0.2) from the drop-down list.
3. Enter the **Number of Tenants** for the source system. The application allows specifying a credential set for each tenant with tenant name.

NOTE

- It is mandatory to add at least one tenant to proceed.
- At any point, you can change the tenant name.

4. Enter the source details and click **Save**. This saves source details without deploying connectors.

NOTE

If connectors are already deployed adding a new tenant and saving it creates a new batch for respective sources. The **Batch Name** column displays the batch names that are created.

5. Click **Test Connection**  to check the source connection.
6. Click **Save & Deploy**. A message is displayed “Are you sure you want to Deploy All?”.
7. Click **Yes**. This saves source details, deploys a selected version of connectors (if not already deployed), and creates separate batches for individual sources. The batches created for each tenant is listed in the Batch Name column.

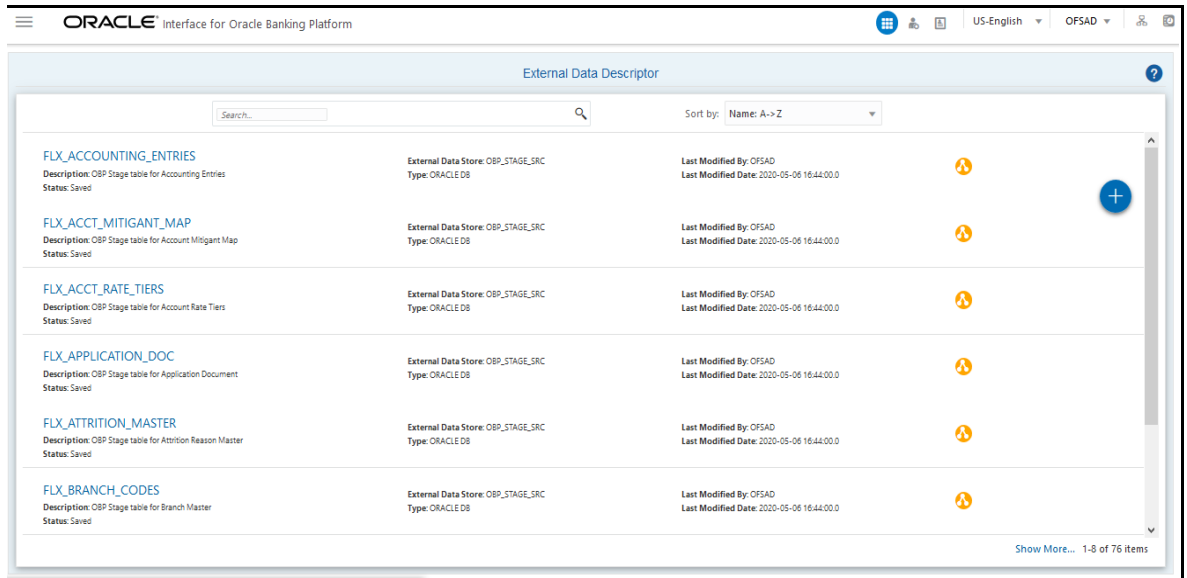

8. To delete a source tenant detail, click **Delete**  .
9. Click **Save** to update the list in the database.
10. To undeploy the connector version, click **Undeploy All**. A message is displayed “Are you sure you want to Undeploy All?”.
11. Click **Yes**. After the undeployment is complete, the “Successfully Deployed All” message is displayed.
12. To check deployed EDDs and Mappings, from the **Interface for Oracle Banking Platform** window, select **OBP Data Mapping** and then select **External Data Descriptor**.

Figure 12: External Data Descriptor Summary Window

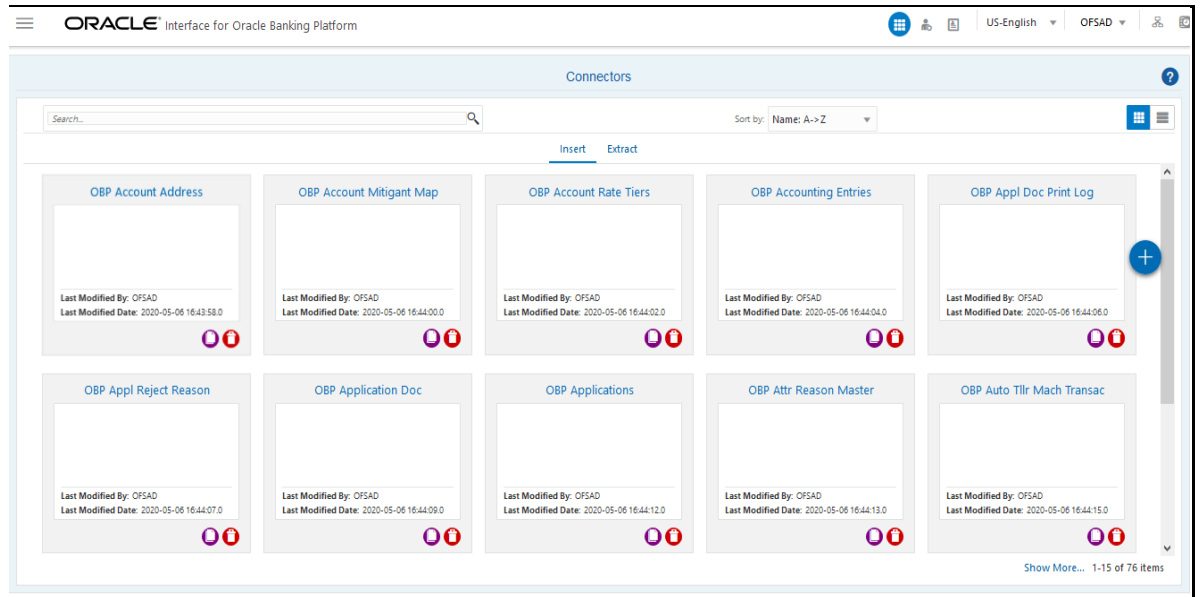

Name	Description	External Data Store	Type	Last Modified By	Last Modified Date	Actions
FLX_ACCOUNTING_ENTRIES	OBP Stage table for Accounting Entries Status: Saved	OBP_STAGE_SRC	ORACLE DB	OFSAD	2020-05-06 16:44:00.0	[Delete] [Add]

[Show More...](#) 1-8 of 76 items

13. To check deployed Connectors and Mappings, from the **Interface for Oracle Banking Platform** window, select **OBP Data Mapping** and then select **Connectors**.

Figure 13: Connectors Summary Window

- Multiple batches are created to execute the set of connectors deployed in the version 2.6.2.0. The batch name is in a specific format, for example OBP_<Tenant Name> (In uppercase and spaces must be replaced with underscore).

NOTE

Precedence is set and task execution is sequential through this batch.

6.1 Known Warnings

The following list of attributes in FSDF has data length smaller than the source data model (OBP) and Nullable in Source data model (OBP) and Not Nullable in the target data model (FSDF).

If you have a data error due to data length, choose one of these steps:

- a. Increase target column length as required, validate the impact on applications before making the change.
- b. Modify the connector to apply a transformation to trim the source data to the target structure.
- c. The source is expected to have data for the columns that are mapped to Not Null columns of the target.
- d. Certain DQ Checks from FSDF are not applicable for OBP Connectors. You can ignore them.

See the [Mismatched OBP](#) file for more information.

7 OFSAA-OBP Interface Modifications or Upgrade

You can use the Undeploy button to undeploy the connectors Use the Undeploy feature in the following scenarios.

7.1 Deploying Upgraded Source Version

If there is an upgraded source application (OBP) available, select the upgraded source version to undeploy the existing version of the connector, and redeploy the same. The current available source version for the OBP connector supports OBP version 2.6.2.0.

NOTE You can deploy only one source version at a time. You must upgrade the source, undeploy the version, and deploy the required version.

7.2 Changes in Source Settings

If there is a change in the source settings, then it is possible to undeploy the connectors. You must modify the settings and redeploy them to obtain the latest connector settings.

NOTE You cannot undeploy the connectors if any of the Connector or External Data Descriptor is in Published mode. Unpublish all the Connectors or External Data Descriptors before proceeding with the Undeploy feature.

For more information on how to undeploy a connector, see the section [Deploying or Undeploying OFSAA-OBP Connectors](#).

8 Ready-to-use Mappings for OBP Modules

The following sections list the OBP Modules.

8.1 Accounting Module

Table 3: List of Accounting Tables

Connector Name	ADI	ADI Subtype	EDD
Con_Obp_Accounting_Entries OBP Accounting Entries	Accounting Entries	-	FLX_ACCOUNTING_ENTRIES

For information on this connector, see the [Accounting](#) file for the OBP Column Name and the Target Logical Name.

8.2 CASA Module

Table 4: List of CASA Tables

Connector Name	ADI	ADI Subtype	EDD
OBP Cust Acct Casa Txn	Customer Account Transaction	CASA Transaction	FLX_DD_TXNS
OBP Cust Acct OD Txn	Customer Account Transaction	Over Draft Accounts Transactions	FLX_OD_TXNS
OBP Cust Acct Casa	Customer Account	CASA Contracts	FLX_DD_DETAILS
OBP Cust Acct OD	Customer Account	OD Accounts	FLX_OD_DETAILS
OBP Cust To Cust Rel	Customer To Customer Relationships	-	FLX_PI_PARTY_RELATION

For information on this connector, see the [CASA](#) file for the OBP Column Name and the Target Logical Name.

8.3 Channel Module

Table 5: List of Channel Tables

Connector Name	ADI	ADI Subtype	EDD
OBP Merchant Master	Merchant Master	-	FLX_MERCHANT_MAST

Connector Name	ADI	ADI Subtype	EDD
OBP Txn Channel Mast	Transaction Channel Master	–	FLX_TXN_CHANNELS
OBP Merchant Cat Master	Merchant Category Master	–	FLX_MERCHANT_CATGS
OBP Internet Transac	Internet Transactions Master	–	FLX_CH_NET_TXNS
OBP Branch Transactions	Branch Transactions Master	–	FLX_CH_BRANCH_TXNS
OBP Point Of Sale Transac	Point Of Sale Transactions Master	–	FLX_CH_POS_TXNS
OBP Auto Tllr Mach Transac	Automatic Teller Machine Transactions Master	–	FLX_CH_ATM_TXNS
OBP Telebanking Transac	Telebanking Transactions Master	–	FLX_CH_TB_TXNS

For information on this connector, see the [Channel](#) file for the OBP Column Name and the Target Logical Name.

8.4 Collateral Module

Table 6: List of Collateral Tables

Connector Name	ADI	ADI Subtype	EDD
OBP Collateral Master	Collateral Master	–	FLX_COLLATERAL_MASTER
OBP Collaterals	Collaterals	–	FLX_COLLATERAL
OBP Exp Mitigant Map	Mitigants	–	FLX_EXPOSURE_MITIGANT
OBP Cust Acct Guarantees	Customer Account	Guarantees	FLX_GUARANTEES
OBP Cust Acct Guarantees	Customer Account	Guarantees	FLX_GUARANTEES

For information on this connector, see the [Collateral](#) file for the OBP Column Name and the Target Logical Name.

8.5 Collections Module

Table 7: List of Collections Tables

Connector Name	ADI	ADI Subtype	EDD
OBP Collections	Collections	–	FLX_COLLECTIONS
OBP Recoveries	Recoveries	–	FLX_RECOVERIES
OBP Collector Contacts	Collector Contacts	–	FLX_COLLECTOR_CONTACT

For information on this connector, see the [Collections](#) file for the OBP Column Name and the Target Logical Name.

8.6 Core Module

Table 8: List of Core Tables

Connector Name	ADI	ADI Subtype	EDD
OBP Cust Education Master	Country Master	–	FLX_PARTY_EDUCATION
OBP Product Master	Attrition Reason Master	–	FLX_PRODUCTS
OBP Attr Reason Master	Attrition Reason Master	–	FLX_ATTRITION_MASTER
OBP Branch Master	Branch Master	–	FLX_BRANCH_CODES
OBP Country Master	Country Master	–	FLX_COUNTRIES
OBP Credit Officer Master	ADI is Credit Officer Master	–	FLX_CREDIT_OFFICER
OBP Cust Acct Loan	Customer Account	Loan Contracts	FLX_LN_CONTRACTS
OBP Exchange Rates	Exchange Rates	–	FLX_EXCHANGE_RATES
OBP Geography Master	Geography Master	–	FLX_GEOGRAPHIES
OBP Issuer Master	Issuer Master	–	FLX_ISSUER_MASTER
OBP Legal Entity Master	Legal Entity Master	–	FLX_BANK_CODES
OBP Org Unit Master	Org Unit Master	–	FLX_BUSINESS_UNIT
OBP Writeoff Reason Master	Attrition Reason Master	–	FLX_WRITEOFF_MASTER

For information on this connector, see the [Core](#) file for the OBP Column Name and the Target Logical Name.

8.7 Customer Module

Table 9: List of Customer Tables

Connector Name	ADI	ADI Subtype	EDD
OBP Cust Class Master	Customer Classification Master	–	FLX_PARTY_TYPES
OBP Cust Education Master	Customer Education Master	–	FLX_PARTY_EDUCATION
OBP Cust To Cust Rel	Customer To Customer Relationships	–	FLX_PI_PARTY_RELATION
OBP Customer Address	Customer Address	–	FLX_PARTY_ADDRESSES
OBP Customer Email Address	Party Email Address	–	FLX_CUST_EMAIL_ADDR
	Customer Phone	–	FLX_PARTY_PHONE_DTLS
OBP Customer Relationships	Account Customer Relationship	–	FLX_PARTY_RELATIONS
OBP Customer Type Master	Customer Type Master	–	FLX_PARTY_CLASS
OBP Industry Master	Industry Master	–	FLX_PARTY_INDUSTRY
OBP Cust Identific Doc	Customer Identification Document	–	FLX_CUST_IDENTIFCTN_DOC

For information on this connector, see the [Customer](#) file for the OBP Column Name and the Target Logical Name.

8.8 Demand Deposit Account Module

Table 10: List of Demand Deposit Account Tables

Connector Name	ADI	ADI Subtype	EDD
OBP Cust Acct Casa	Customer Account	CASA Contracts	FLX_DD_DETAILS
OBP Cust Acct Casa Txn	Customer Account Transaction	CASA Transaction	FLX_DD_TXNS
OBP Cust Acct OD	Customer Account	OD Accounts	FLX_OD_DETAILS
OBP Cust Acct OD Txn	Customer Account Transaction	Over Draft Accounts Transactions	EDD is: FLX_OD_TXNS

For information on this connector, see the [Demand Deposit Account](#) file for the OBP Column Name and the Target Logical Name.

8.9 Facility Module

Table 11: List of Facility Tables

Connector Name	ADI	ADI Subtype	EDD
OBP Limit Structure	Limit Structure	–	FLX_FACILITY_STRUCTURE
OBP Limits Summary	Limits Summary	–	FLX_FACILITY_DETAILS
OBP Crdt Facility Details	Credit Facility Details Credit Facility Details	–	FLX_CREDIT_LINE_DTLS
OBP Credit Facility Master	Credit Facility Master	–	FLX_CREDIT_LINE_MASTER

For information on this connector, see the [Facility](#) file for the OBP Column Name and the Target Logical Name.

8.10 General Ledger (GL) Module

Table 12: List of GL Tables

Connector Name	ADI	ADI Subtype	EDD
OBP General Ledger Master	General Ledger Master	–	FLX_GL_ACCOUNTS
OBP General Ledger Data	General Ledger Data	–	FLX_LEDGER_BALANCE

For information on this connector, see the [GL](#) file for the OBP Column Name and the Target Logical Name.

8.11 Interest Module

Table 13: List of Interest Tables

Connector Name	ADI	ADI Subtype	EDD
OBP Account Rate Tiers	Account Rate Tiers	–	FLX_ACCT_RATE_TIERS

For information on this connector, see the [Interest](#) file for the OBP Column Name and the Target Logical Name.

8.12 Loan Module

Table 14: List of Loan Tables

Connector Name	ADI	ADI Subtype	EDD
OBP Applicant	Account Address	–	FLX_OR_APPLICANT

Connector Name	ADI	ADI Subtype	EDD
OBP Applicant	Applicant	–	FLX_OR_APPLICANT
OBP Applications	Applications	–	FLX_OR_APPLICATION
OBP Channel Master	Channel Master	–	FLX_OR_CHANNELS
OBP Txn Channel Type Mast	Transaction Channel Type Master	–	FLX_OR_CHANNEL_TYPE
OBP Or Appln Evnt Decs	Application Event Decision	–	FLX_OR_APPLN_EVNT_DECS
OBP Appl Doc Print Log	Applications Document Print Log	–	FLX_LN_APL_DOC_PRNT_LOG
OBP Or App Partyrole Map	Party Liability Details	–	FLX_OR_APP_PARTYROLE_MAP
OBP Application Doc	Application Document	–	FLX_APPLICATION_DOC
OBP Or Appln Evnt Decs	Application Event Decision	–	FLX_OR_APPLN_EVNT_DECS
OBP Or Application Group	Application Group	–	FLX_OR_APPLICATION_GROUP
OBP Or Appln Grpevnt Decs	Application Group Event Decision	–	FLX_OR_APPLN_GRPEVNT_DECS

For information on this connector, see the [Origination](#) file for the OBP Column Name and the Target Logical Name.

8.15 Overdraft Module

Table 17: List of Overdraft Tables

Connector Name	ADI	ADI Subtype	EDD
OBP Cust Acct OD	Customer Account	OD Accounts	FLX_TD_DETAILS
OBP Cust Acct TD Txn	Customer Account Transaction	Over Draft Accounts Transactions	FLX_TD_TXNS

For information on this connector, see the [Overdraft](#) file for the OBP Column Name and the Target Logical Name.

8.16 Party Module

Table 18: List of Party Tables

Connector Name	ADI	ADI Subtype	EDD
OBP Party Master	Party Master	–	FLX_PARTY_DETAILS
OBP Party Address	Party Address	–	FLX_PARTY_ADDRESS
OBP Party Email Address	Customer Email Address	–	FLX_PARTY_EMAIL_ADDR
OBP Party Financials	Party Financials	–	FLX_PARTY_FINANCIALS
OBP Party Master	Party Master	–	FLX_PARTY_DETAILS
OBP Party Phone	Party Phone	–	FLX_PARTY_PHNE_DTLS
OBP Party Role Map	Party Role Map	–	FLX_PARTY_ROLE_MAP
OBP Party Empl Dtls	Party Employment Details	–	FLX_PARTY_EMPL_DTLS
OBP Party Asset Dtls	Party Asset Details	–	FLX_PARTY_ASSET_DTLS
OBP Party Expns Dtls	Party Expense Details	–	FLX_PARTY_EXPNS_DTLS
OBP Party Income Dtls	Party Income Details	–	FLX_PARTY_INCOME_DTLS
OBP Party Liability Dtls	Party Liability Details	–	FLX_PARTY_LIABILITY_DTLS
OBP Party To Party Relationship	Party To Party Relationship	–	FLX_PI_PARTY_RELATION
OBP Dealer Master	Dealer Master	–	FLX_PARTY_DEALER_MASTER

For information on this connector, see the [Party](#) file for the OBP Column Name and the Target Logical Name.

8.17 Product Module

Table 19: List of Product Tables

Connector Name	ADI	ADI Subtype	EDD
OBP Product Category Mast	Product Category Master	–	FLX_PRODUCT_GROUPS
OBP Product Master	Product Master	–	FLX_PRODUCTS
OBP Product Type Master	Product Type Master	–	FLX_PRODUCT_TYPES

For information on this connector, see the [Product](#) file for the OBP Column Name and the Target Logical Name.

8.18 Term Deposit Module

Table 20: List of Term Deposit Tables

Connector Name	ADI	ADI Subtype	EDD
OBP Cust Acct TD	Customer Account	Term Deposit	FLX_TD_DETAILS
OBP Cust Acct TD Txn	Customer Account Transaction	Term Deposits Transactions	FLX_TD_TXNS

For information on this connector, see the [Term Deposit](#) file for the OBP Column Name and the Target Logical Name.

8.19 Term Deposit Module

Table 21: List of Term Deposit Tables

Connector Name	ADI	ADI Subtype	EDD
OBP Cust Acct TD	Customer Account	Term Deposits Transactions	FLX_TD_TXNS
OBP Cust Acct TD Txn	Customer Account Transaction	Term Deposits Transactions	EDD is: FLX_TD_TXNS

For information on this connector, see the [Term Deposit](#) file for the OBP Column Name and the Target Logical Name.

OFSAA Support

Send Us Your Comments

Oracle welcomes your comments and suggestions on the quality and usefulness of this publication. Your input is an important part of the information used for revision.

- Did you find any errors?
- Is the information clearly presented?
- Do you need more information? If so, where?
- Are the examples correct? Do you need more examples?
- What features did you like most about this manual?

If you find any errors or have any other suggestions for improvement, indicate the title and part number of the documentation along with the chapter/section/page number (if available) and contact the Oracle Support.

Before sending us your comments, you might like to ensure that you have the latest version of the document wherein any of your concerns have already been addressed. You can access My Oracle Support site that has all the revised/recently released documents.
