U.S. GOVERNMENT END USERS: Oracle programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, delivered to U.S. Government end users are "commercial computer software" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, use, duplication, disclosure, modification, and adaptation of the programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, shall be subject to license terms and license restrictions applicable to the programs. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate failsafe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

This software or hardware and documentation may provide access to or information on content, products and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services.

OBVAM	Oracle Banking Virtual Account Management

2. Welcome to Integration Guide

2.1 Overview

Oracle Banking Virtual Account Management supports integration with Core Banking, Payment and Receivables, and Liquidity Management systems for various use cases. Also, provides interfaces for self-service portal.

This section contains the following topics:

- [Core Banking](#)
- [Payments and Receivables](#)
- [Liquidity Management](#)
- [Self-Service Portal](#)
- [Cash Management](#)

2.1.1 Core Banking

This is an outbound integration from OBVAM to Core Banking system.

Outbound Interface

OBVAM supports the following outbound interfaces:

- **Virtual Account Creation:** This is used to populate a common data store that is used to synchronize the Core Banking data store, for virtual account so that it becomes available in transactions.

- External Account Check: For real account check mapped to virtual account.
- External Credit Approval: For balance check and amount block on debit transactions.
- Accounting Posting: Actual entries posting to the Core Banking. The entries are posted if Skip DDA option at the transaction level is set as No.

2.1.2 Payments and Receivables

This is an inbound integration to OBVAM from Payments and Receivables system.

Inbound Interface

The interface exposed by OBVAM that Payments and Receivables system can consume are:

- Virtual Account Check/External Account Check: To perform account validations.
- Virtual Account Credit Approval/External Credit Approval: To perform balance check and define an amount block on the virtual account.
- Accounting Posting on VA: To post entries on virtual account that in turn posts to Core Banking System.

2.1.3 Liquidity Management

1. Interest Re-distribution and Sweeping

This is an inbound/outbound interface with Liquidity Management system.

Outbound Interface

The outbound interfaces supported by OBVAM are:

- Virtual Account Handoff: This is an online interface. The account details are handed off to the adapter, when an account is authorized.
- Virtual Account Structure Handoff: This is an online interface. The account structure details are handed off to the adapter, when an account is authorized.

Inbound Interface

The interface exposed by OBVAM are:

- Value Date Balance Fetch: For fetching the virtual account's value dated balance.
- Accounting Posting to VA: For posting entries to virtual account.
- Sweep Eligible Balance Fetch: For fetching the virtual account's Sweep Eligible balance and value dated balance.

2. Interest Calculation and Liquidation on Individual Accounts

This is an inbound/outbound interface with Interest and Charges system.

Outbound Interface

The outbound interfaces supported by OBVAM are:

- Virtual Account Handoff: This is an online interface. The account details are handed off to the adapter, when an account is authorized.

- Value Dated Balance Handoff –To handoff value dated balances for a set of virtual accounts
- Accrued Interest Fetch: For fetching accrued interest for a Virtual Account.
- Online Interest Liquidation: To initiate interest liquidation for a Virtual Account.

Inbound Interface

The interface exposed by OBVAM are:

- Accounting Posting to VA: For posting interest liquidation entries to virtual account.

2.1.4 Self-Service Portal

This is an inbound call from self-service.

Inbound Interface

The interfaces are available for the Self-Service channel are:

- Virtual Entity Creation
- Virtual Account Creation
