Index

Preface

This topic contains the following sub-topics:

Purpose

This manual is designed to get acquainted with how contracts in a product are settled in Oracle Banking Treasury Management. It takes you through the various steps involved in processing a Settlement.

Audience

This guide is intended for Back Office Data Entry Clerk, Back Office Managers/ Officers, Product Managers, End of Day Operators, and Financial Controller users.

Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

Access to Oracle Support

Oracle customer access to and use of Oracle support services will be pursuant to the terms and conditions specified in their Oracle order for the applicable services.

Critical Patches

Oracle advises customers to get all their security vulnerability information from the Oracle Critical Patch Update Advisory, which is available at [Critical Patches, Security Alerts and Bulletins](#). All critical patches should be applied in a timely manner to make sure effective security, as strongly recommended by [Oracle Software Security Assurance](#).

Diversity and Inclusion

Oracle is fully committed to diversity and inclusion. Oracle respects and values having a diverse workforce that increases thought leadership and innovation. As part of our initiative to build a more inclusive culture that positively impacts our employees, customers, and partners, we are working to remove insensitive terms from our products and documentation. We are also mindful of the necessity to maintain compatibility with our customers' existing technologies and the need to ensure continuity of service as Oracle's offerings and industry standards evolve. Because of these technical constraints, our effort to remove insensitive terms is ongoing and will take time and external cooperation.

Related Resources

For more information, see these Oracle resources:

Conventions

The following text conventions are used in this document:

Convention	Meaning
boldface	Boldface type indicates graphical user interface elements associated with an action, or terms defined in text or the glossary.
<i>italic</i>	Italic type indicates book titles, emphasis, or placeholder variables for which you supply particular values.
monospace	Monospace type indicates commands within a paragraph, URLs, code in examples, text that appears on the screen, or text that you enter.

Screenshot Disclaimer

Personal information used in the interface or documents is dummy and does not exist in the real world. It is only for reference purposes.

Acronyms and Abbreviations

The acronyms and abbreviations are listed in this below table:

Table Acronyms and Abbreviations

Abbreviations or Acronyms	Definition
AEOD	Automated End of Day
AIF	Alternative Investment Fund
CLS	Continuous Linked Settlement
CIF	Customer Information Files
DV	Derivatives
Dr	Debit
EOFI	End of Financial Input
ECA	External Credit Approval
ESMA	European Securities and Markets Authority
FATCA	Foreign Account Tax Compliance Act,
FCY	Foreign Currency
FX	Foreign Exchange
GL	General Ledger
HIRE	Hiring Incentives to Restore Employment
HTTP	Hypertext Transfer Protocol
IRS	Internal Revenue Service
ICCB	Interest Commission Charge and Fee
LCY	Local Currency
MM	Money Market

Table (Cont.) Acronyms and Abbreviations

Abbreviations or Acronyms	Definition
OBTR	Oracle Banking Treasury Management
OT	Over the Counter Options
UCITS	Undertaking for Collective Investment in Transferable Securities

Basic Actions

Table List of Basic Actions

Action	Description
Approve	Click Approve to approve the initiated report. This button is displayed, once the user click Authorize .
Audit	Click Audit to view the maker details, checker details of the particular record, and record status. This button is displayed only for the records that are already created.
Authorize	Click Authorize to authorize the record created. A maker of the screen is not allowed to authorize the report. Only a checker can authorize a record. This button is displayed only for the already created records.
Close	Click Close to close a record. This action is available only when a record is created.
Confirm	Click Confirm to confirm the performed action.
Cancel	Click Cancel to cancel the performed action.
Compare	Click Compare to view the comparison through the field values of old record and the current record. This button is displayed in the widget, once the user click Authorize .
Collapse All	Click Collapse All to hide the details in the sections. This button is displayed, once the user click Compare .
Expand All	Click Expand All to expand and view all the details in the sections. This button is displayed, once the user click Compare .
New	Click New to add a new record. The system displays a new record to specify the required data. Note: The fields which are marked in asterisk red are mandatory fields.
OK	Click OK to confirm the details in the screen.
Save	Click Save to save the details entered or selected in the screen.
View	Click View to view the report details in a particular modification stage. This button is displayed in the widget, once the user click Authorize .
View Difference only	Click View Difference only to view a comparison through the field element values of old record and the current record, which has undergone changes. This button is displayed, once the user click Compare .

Symbols and Icons

Settlement Service

The Settlements sub-system is part of the core of Oracle Banking Treasury Management. This system is a convenient money settlement service that interfaces with the other modules of Oracle Banking Treasury Management.

In Oracle Banking Treasury Management, there is a close association of Settlements and Messaging systems. The Settlements system provides for a common set up of money settlement accounts and routes. The Messaging system, on the other hand, handles the generation of settlement messages.

To handle money settlements in Oracle Banking Treasury Management, you have to:

- Maintain Bank Identifier Codes (BIC)
- Maintain Settlement Preferences

For a Customer/Module/Currency/Branch or a combination of any of the entities.

This topic has the following sub-topics:

1.1 Settlement Preferences

This topic describes the settlement preferences.

Maintain the settlement preferences of a customer or a bank in the Settlement Instructions Maintenance screen. Indicating preferences for an entity means defining the settlement accounts and a detailed settlement route comprising the correspondent accounts and the intermediaries through which payment is to be routed. (The party information you can capture adheres to SWIFT standards).

This topic contains the following subtopics:

1.1.1 Settlement Instructions Maintenance

This topic describes the systematic instructions to view the Settlement Instructions Maintenance screen.

Specify the **User ID** and **Password**, and login to Homepage.

Maintain the settlement preferences of a customer or a bank in the Settlement Instructions Maintenance screen. Indicating preferences for an entity means defining the settlement accounts and a detailed settlement route comprising the correspondent accounts and the intermediaries through which payment is to be routed. (The party information you can capture adheres to SWIFT standards).

1. On the Homepage, enter **ISDTRINS** in the text box, and click the next arrow.

The **Treasury Settlement Instructions Maintenance** screen is displayed.

- On the **Treasury Settlement Instructions Maintenance** screen, specify the details as required.
- On **Pay Parties**, and **Receiver Parties** tab, Click **Postal Address** to specify the Postal Address details.
- Click **Save** to save the details or click **Cancel** to close the screen.

Maintain the following basic settlement preferences for an entity (Customer /BIC), module, currency, product, Sequence Number and branch combination.

- The Pay (out) Account, and Currency
- The Receive Account (for incoming payments), and Currency.
- If the charge (for the message) is to be borne by the bank or the beneficiary, or share between them
- The charge account, which will be used as the default account for all charges during contract input
- If a receive notice (MT 210) has to be generated for money settlements made in a specific currency

For information on fields, refer to the below field description table.

Table 1-1 Treasury Settlement Instructions Maintenance - Field description

Field	Description
Counter Party	Maintain settlement instructions for all the customers or for specific customers only. From the option list select the specific customer number or choose the ALL option.

Table 1-1 (Cont.) Treasury Settlement Instructions Maintenance - Field description

Field	Description
Counterparty Type	<p>The Counterparty Type can either be CIF or BIC depending on whether your bank has an accounting relationship with the party for whom the instruction is being maintained or whether it only has a SWIFT messaging relationship. If the counterparty is a CIF in Oracle Banking Treasury Management, you will have to select CIF as the party type and choose the relevant CIF ID in the adjacent field.</p> <p>However, if the entity is not an actual customer of your bank but you would be sending/receiving payment messages to/from that party, you will have to choose BIC as the counterparty type and specify the counterparty address as well. As a result, you will need to identify the preferred Nostro/ Vostro accounts for that currency and BIC code combination.</p> <p>Note: If you opt to generate receive notices for settlements made in all currencies, involving all counter-parties, and transactions in all modules of Oracle Banking Treasury Management, an MT 210 will automatically be generated for any money settlement made by your branch.</p> <p>In addition, you can maintain the details of the various intermediaries involved in payments and receipts. The preferences maintained for an entity determine the manner in which money settlements are made on behalf of the entity.</p>
Counterparty Name	The system displays the name of the specified counterparty based on the details maintained at External Customer Input.
Module	Maintain different settlement instructions for different products. If you choose Module as 'AL,' then the Product must also be chosen as 'AL'. If you choose a specific module for maintaining settlement instructions, then you can choose any Product available under the module from the option list provided. Also, choose 'AL' to maintain settlement instructions for all products under the selected module.
Product Code	Indicate a specific product code or choose All from the option list. However, if you have chosen AL in the Module field, this field will be defaulted to AL. You will not be allowed to change this.
Currency	Maintain settlement instructions for a particular currency or for all the currencies. From the option list select the particular currency code or choose the *.* option.
Branch	Maintain settlement instructions for all the branches or for a particular branch. From the option list select the particular branch code or choose the *.* option.

Table 1-1 (Cont.) Treasury Settlement Instructions Maintenance - Field description

Field	Description
Payment By	<p>Indicate the method of payment for both Outgoing as well as Incoming Payments, for, Account and Currency combination. The following options are available:</p> <ul style="list-style-type: none"> Instrument (settlement is done through a Check, MCK etc.) Message (payment is made by means of a SWIFT Message) Clearing (the transaction is a local payment transaction and the settlement is routed through the Clearing House of the bank) <p>Note: Indicate the payment method as 'Clearing' only. If the payment currency is the local currency of the branch, If it is one of the clearing currencies defined for the branch. If you have selected '*' in the currency field</p> <p>No payment message will be generated for settlements routed through a Clearing House.</p> <p>Note: Select 'Payment By' as 'Instrument', to ensure the payment by Instrument in SI settlements screen and then the system would look for the instrument type.</p>
Charge Details	<p>Specify whether charges for the message are to be borne by the bank (ourselves) or the beneficiary, or will be shared. This information is inserted in Field 71A of an MT103 message involving the combination for which settlement instructions are being maintained. You can select one of the following options:</p> <ul style="list-style-type: none"> Ourselves – It is displayed as 'OUR' in the message and it indicates that all transaction charges are to be borne by the ordering customer. Beneficiary – It is displayed as 'BEN' in the message and it indicates that all transaction charges are to be borne by the beneficiary customer. Shared – It is displayed as 'SHA' in the message and it indicates that the transaction charges on the Sender's side are to be borne by the ordering customer and the transaction charges on the Receiver's side are to be borne by the beneficiary customer.
Postal Address	<p>Click the button to specify the postal address details.</p> <p>Note: For more information, refer Postal Address topic.</p>

5. On the **Settlement Instructions Maintenance** screen, click **Pay Parties**.

Before funds actually reach the Ultimate Beneficiary of a payment, it may have to pass through several other banks or parties.

Settlement Instructions Maintenance screen is displayed.

6. On the **Settlement Instructions Maintenance** screen, specify the details as required. These screens contain fields that mark possible routes of a payment. For information on Fields, refer to the below table.

Table 1-2 Settlement Instructions Maintenance - Field Description

Field	Description
Intermediary Reimbursement Institution	An 'Intermediary Reimbursement Institution' is the financial institution between the Sender's Correspondent and the Receiver's Correspondent, through which the reimbursement of the transfer takes place.
Intermediary	The 'Intermediary' in a payment refers to the financial institution, between the 'Receiver' and the 'Account With Institution', through which the transfer must pass. The Intermediary may be a branch or affiliate of the Receiver or the account with Institution, or an entirely different financial institution. This field corresponds to field 56a of a SWIFT message. Either enter: <ul style="list-style-type: none"> • ISO Bank Identifier Code of the bank • The Name and address of the Bank
Receiver's Correspondent	The 'Receiver's Correspondent' is the branch of the receiver, or another financial institution, at which the funds will be made available to the receiver.

8. Click **Ok** to Save or **Cancel** to close the screen.

For information on fields, refer to the below table

Table 1-3 Settlement Instructions Maintenance Pay Parties - Field Description

Field	Description
Receivers Correspondent	<p>This field corresponds to field 54a of S.W.I.F.T. Enter the branch of the Receiver or another financial institution at which the funds will be made available to the Receiver. You can enter any one of the following:</p> <ul style="list-style-type: none"> • ISO Bank Identifier Code of the bank • The branch of the Receiver's Correspondent • Name and address of the Receiver's Correspondent

Table 1-3 (Cont.) Settlement Instructions Maintenance Pay Parties - Field Description

Field	Description
Senders Correspondent	<p>The Senders Correspondent is the bank of the sender, or another financial institution, at which the funds will be made available to the sender. This field corresponds to field 53a of swift message. Enter the bank of the sender or another financial institution at which the funds will be made available to the sender. You can enter any one of the following:</p> <ul style="list-style-type: none"> • ISO Bank Identifier Code of the bank • The bank of the Senders Correspondent • Name and address of the Senders Correspondent
Account With Institution	<p>An 'Account with Institution' refers to the financial institution, at which the ordering party requests the Beneficiary to be paid. The Account With Institution may be a branch or affiliate of the Receiver, or of the Intermediary, or of the Beneficiary Institution, or an entirely different financial institution.</p> <p>This field corresponds to Field 57A of a SWIFT message. Enter one of the following:</p> <ul style="list-style-type: none"> • ISO Bank Identifier Code of the bank • Branch of the Receiver's Correspondent • Name and address of the Receiver's Correspondent • Other identification codes (for example, account number)
Receiver	<p>You can specify the final Receiver as apart from the Account With Institution if the Ultimate Beneficiary desires that the payment message should be sent there. If this is not maintained, the Account With Institution becomes the default Receiver.</p> <p>Capture the Sender to Receiver Information in this screen.</p> <p>For more details relating to specific parties, please refer to the SWIFT manuals.</p>
ERI Currency	<p>For every Counterparty and 'In' Currency (combination) for which you maintain settlement instructions, you can define an Euro Related Information (ERI) Currency. The ERI Currency can be:</p> <ul style="list-style-type: none"> • 'In' currency • Euro <p>This is used during the transition period, settlements of components in 'In' currencies can be made either in the same currency or in the Euro (EUR) depending on the settlement account(s) maintained. Similarly, components in Euro can either be settled in EUR or in an 'In' currency. In the settlement messages that are generated (MT 100, MT202), the settlement amount would be reported in the Settlement Account Currency. However, you can opt to additionally furnish the value of the component in an ERI currency.</p> <p>The ERI Currency that you specify for a Counterparty and 'In' currency (combination) will default in the ERI CCY field in the Settlements Message Details screen.</p>

Table 1-3 (Cont.) Settlement Instructions Maintenance Pay Parties - Field Description

Field	Description
Ultimate Beneficiary	Specify the Beneficiary Account details or select the beneficiary account details from the available list. Note: Impact related to ISO20022 structured postal address change When the ultimate beneficiary's name lacks a valid BIC ID, maintaining a postal address (minimum Town Name and Country) is mandatory at ISDTRINS . If not maintained at SSI, users must manually enter postal details in the settlement subsystem at deal/operation screens.
Postal Address	Click the button to specify the postal address details. Note: For more information, refer Postal Address topic.
Settlement Through an Instrument or Message	When the actual settlement event for a contract (involving the entity) takes place, the payment and receive message details are updated in a message hand-off table. The Messaging system picks up the details from this table, and based on the formats set up, generates the messages.

1.1.1.1 Maintain the settlement instructions for CLS deals

This topic provides the details of settlement instructions for CLS deals Maintenance.

When maintaining settlement instructions for CLS deals, you should specify the module as 'FS' (FX Settlements). This will indicate that they are meant exclusively for CLS deals.

The pay and receive accounts specified for the settlement instructions will be used as the 'Control Accounts' for CLS deals.

Refer the 'Continuous Linked Settlements' chapter of the Foreign Exchange User Manual for details on the following:

- Maintaining settlement instructions for CLS deals,
- Other maintenance required to be CLS compliant
- The processing involved in the settlement of CLS deals in Oracle Banking Treasury Management

1.1.1.2 Postal Address

This topic describes about the Postal Address.

1. Click the **Postal Address** button.

The **Postal Address** screen displays.

- For information on fields, refer to the below table.

Table 1-4 Postal Address - Field Description

Field	Description
Structured Address	This section displays the following fields to specify the structured address.
Department	Specify the department.
Sub Department	Specify the sub department.
Street Name	Specify the street name of the branch.
Building Number	Specify the building number of the branch.
Building Name	Specify the building name of the branch.
Floor	Specify the floor of the branch.
Post Box	Specify the post box of the branch.
Room	Specify the room of the branch.
Post Code	Specify the post code of the branch.
Town Name	Specify the town name of the branch.
Town Location Name	Specify the town location name of the branch.
District Name	Specify the of the branch.
Country Sub Division	Specify the country sub division.
Country	Specify the country of the branch.
Hybrid Address	This section displays the following fields to specify the hybrid address.
Address Line 1	Specify the address for the branch.
Address Line 2	Specify the address for the branch.

In ISO20022, postal addresses can be represented in two main formats: structured and hybrid.

Structured Address

Structured address data refers to a standardized format for representing location information, typically comprising distinct components, such as street name, post code, town and country details.

This option allows using up to 14 qualifiers for the Address components and requires a minimum of the **Town Name** and **Country** to be included in a structured format.

- Each component is captured in a separate data field, allowing for precise and consistent representation.
- This format is beneficial for automated processing and validation, as it enables systems to easily parse and verify individual address elements.
- Structured addresses are particularly useful for cross-border transactions where address formats may vary significantly.

Hybrid Address: (semi-structured)

As of November 2025, a Hybrid option will be allowed. This means that the address can include both structured and unstructured elements with a minimum of structured **Town Name** and **Country**.

This format offers a balance between the flexibility of unstructured addresses and the benefits of structured data for certain key fields.

- Hybrid addresses are useful when the address cannot be fully captured in a structured manner or when dealing with jurisdictions that have complex or non-standard address formats.
- The new hybrid (semi-structured) postal address mandates **Town Name** and **Country** as a minimum in their respective structured elements, and up to two occurrences of the unstructured address line elements of maximum length 70 characters (2*70) are permitted. Other structured elements in addition to Country and Town Name may also be included. Example, **Post Code**.
- The structured address information provided on **Town Name** and **Country** must not be repeated in the Address Line elements.

For parties Ultimate Debtor, Ultimate Creditor, and Initiating Party a fully unstructured postal address will never be permitted for these during any time. It must be Structured or Hybrid

Note

By November 2026, the Unstructured option will be phased out, and all address fields will need to be in a structured or hybrid format.

Note

Postal address capturing is supported for all settlement parties and receivers. When maintained at **ISDTRINS** postal details will auto default to settlement subsystem.

1.1.2 Receiver Parties

This topic describes the systematic instructions to view the Settlement Instructions Maintenance - Receive Parties screen.

Specify the **User ID** and **Password**, and login to Homepage.

From the Homepage, navigate to **Settlement Instructions Maintenance** screen.

Depending on the route funds take when you receive (incoming) payments, maintain Intermediary and Beneficiary Institutions in the Receive Parties section of the **Settlements Instructions Maintenance** screen.

1. On the **Settlement Instructions Maintenance** screen, click **Receiver Parties**
Settlement Instructions Maintenance - Receive Parties screen is displayed.

6. Click **Save** to save the details or **Cancel** to close the screen.

For information on fields, refer to the below table.

Table 1-6 Settlement Instructions Maintenance - Clear Details

Field	Description
Country	Specify the country of the beneficiary institution for cover. This adjoining option list displays all valid country codes maintained in the system. You can choose the appropriate one.

7. On the **Settlement Instructions Maintenance** screen, click **Clear Details**.

When you specify settlement instructions for a customer, you can indicate whether payment for local currency transactions is to be effected via messaging or over the local clearing network. You can also indicate whether a cover is required for payment, and whether the cover is through messaging or over the local clearing network.

Specify these details in the Settlement Instructions screen. In the Payment By field, indicate the mode of payment, either Message or Clear Details; and in the Cover By field, indicate the mode through which cover must be available.

8. On the **Settlement Instruction Maintenance** screen, click **Other Details**.

Define the default values for fields in MT 103 messages that are generated in respect of contracts involving the customer. When a contract is entered for the customer in any module, the values that you maintain here will default for MT 103 generation in respect of the contract.

Settlement Instruction Maintenance with the **Other Detail** tab is displayed.

9. On the **Settlement Instruction Maintenance** screen, specify the details as required.
For information on fields, refer to the below table.

Table 1-7 Settlement Instruction Maintenance - Other Details tab - Field Description

Field	Description
Bank Operation Code	Indicate the bank operation code that will be inserted in Field 23B of the MT 103 message. The options available are SPRI, SSTD, SPAY and CRED. Note: If the Bank Operation Code contains SPAY, SSTD or SPRI, the following validations are done: C11: If an account with the institution is used with D option, then party identifier is mandatory. (Either Clearing code or account has to be specified in the account line). C12: Account is mandatory in field 59
Instruction Code Description	Specify the additional information, if any, which needs to be inserted to qualify the Instruction Code in Field 23E of the MT103 message. The instruction code description can only be maintained for the instruction codes PHON, PHOB, PHOI, TELE, TELB, TELI, HOLD or REPA. For instance, if the Instruction Code is REPA and the description is 'Repayment' then the text 'REPA/Repayment' is inserted in Field 23E.
Transaction Type	Indicate the Transaction Type that will be inserted in Field 26T of the MT103 message.

Table 1-7 (Cont.) Settlement Instruction Maintenance - Other Details tab - Field Description

Field	Description
Regulatory Reporting Details	Specify the Regulatory Reporting Details The entered value will be inserted in Field 77B of the MT103 message.
Charges Details	Indicate whether charges for the message are to be borne by the bank (ourselves) or the beneficiary or will be shared. You can specify this in the Charges Details section, in the main Settlement Instructions screen. This information is inserted in Field 71A of the MT103 message.

1.2 Settlement Instructions Resolution Sequence

This topic describes the Settlement Instructions Resolution Sequence.

While processing contracts in Oracle Banking Treasury Management, the settlement instructions maintained are resolved in the following sequence:

Table 1-8 Settlement Instructions

Level	Counterparty	CCY	Module	Product	Branch
1	Counterparty	CCY	MOD	Product	Branch
2	Counterparty	CCY	MOD	Product	All
3	Counterparty	CCY	AL	ALL	Branch
4	Counterparty	CCY	AL	ALL	All

13	All	*.*	MOD	Product	Branch
14	All	*.*	MOD	Product	All
15	All	*.*	AL	ALL	Branch
16	All	*.*	AL	ALL	All

1.3 Process Settlements

This topic describes the process settlements.

The Settlement details for a contract or deal get defaulted based on the maintenance of settlement instructions for the Customer/BIC code involved in the transaction.

This topic contains the following subtopics:

1.3.1 Settlement Details

This topic describes the systematic instructions to capture the Settlement Details.

Specify the **User ID** and **Password**, and login to Homepage.

Navigate to Contract Main screen.

1. On the **Contract Main** screen, click **Settlement Details**.
The **Settlement Details** screen is displayed.

Figure 1-8 Settlement Details

2. On the **Settlement Details** screen, specify the details as required.

By default, the settlement details of all components of a contract affecting the customer type of account are displayed in this screen. The following are the Role Types:

- Customer
- Remitter
- Beneficiary

Choose one of the above role types for all events associated with the product which Role-to-Head mapping is provided to the product associated with the contract.

As per the maintenance done for a Product the following accounting entries is posted during the initiation of a contract.

Table 1-9 Accounting Entries

Accounting Role	Amount Tag	Dr/ Cr Indicator
ASSETGL	PRINCIPAL	Debit
CUSTOMER	PRINCIPAL	Debit

To achieve this, in the Role to Head mapping sub-screen of the Product Definition screen, you would have mapped the Accounting Role ASSETGL to an actual internal leaf GL of your Chart of Accounts.

However, you would not have maintained such a mapping for CUSTOMER since this is a role whose value gets defined at the contract level based on the counterparty involved in the contract.

While processing a contract, you can modify the following information about Settlements:

- Account details, (details about the accounts involved in the contract or deal; that have to be either debited or credited in your branch)
- Message details (payment details -- whether settled by an instrument or a messaging service such as SWIFT)
- Party details, (details about the various parties/banks involved in the transfer of funds to the Ultimate Beneficiary).
- Other Details, (the default values for fields in MT 103 messages for the contract)

3. On the **Settlement Details** screen, click **Accounting details**.

Settlement Details screen with **Accounting Details** tab details is displayed.

Figure 1-9 Settlement Details - Accounting Details

4. On the **Accounting Details** tab, specify the details as required.
5. Click **Ok** to save the details or **Exit** to close the screen.

The account details that get defaulted include the following:

- Component and its Currency
- Payment Account and its Currency
- Branch of your bank to which the account belongs

Note

If settlement instruction is not defined for the customer, then the system will always default the Nostro accounts based on the settlement instruction set. Change the settlement account branch and settlement account for charge component in case change or waiver at the contract level.

For information on fields, refer to the below table.

Table 1-10 Account Details - Field Description

Field	Description
Account Description	The system displays a brief description on account.
Netting Indicator	<p>In addition to maintaining a netting agreement for each counterparty, you have to specify whether or not the contract is under the netting agreement for each contract involving the counterparty.</p> <p>Check this box to indicate that you would like to enable the Netting option for the various components (Amount Tags) involved in the transaction. These components could be commission, interest, tax, charges etc.</p>
Rate Code	<p>Specify rate code by selecting the appropriate rate code from the selection list. Following values are available:</p> <ul style="list-style-type: none"> • Buy • Sell • Mid <p>Note: In case of charges, if charge currency and settlement currency are different, the system applies mid-rate.</p>
Spread Definition	<p>Select the spread definition from the adjoining drop-down list. The options available are:</p> <ul style="list-style-type: none"> • Point • Percentage
Customer Spread	<p>This defaults from your specification of tenor-wise spread for the relevant Currency Pair in the Customer Spread Maintenance screen. You can change this for a specific contract.</p>
Original Exchange Rate	<p>If the component currency is different from the account currency, the system requires an exchange rate for the conversion. The components of the final exchange rate used for conversion are:</p> <ul style="list-style-type: none"> • The Base Rate – this defaults from the exchange rate that you have maintained for the currency pair involved. It computes as Mid Rate +/- Spread (depending on whether it is the Buy Spread or the Sell Spread). • The Customer Spread - the spread that you have maintained for the specified Counterparty, Currency Pair and Tenor combination in the Customer Spread Maintenance screen is picked up and applied for the customer involved in the deal. <p>The final exchange rate = Base Rate +/- Customer Spread (depending on whether it is a Buy or a Sell deal).</p> <p>Note: If Customer Spread details for a specific counterparty (for the currency pair) are unavailable, the System looks for the customer spread maintained for the wild card ALL entry. If even that is not available, then the Customer Spread defaults to zero.</p> <p>The method of spread definition, whether percentage or points is also displayed.</p> <p>Note: If you have specified an account that uses an accounting class that is restricted for the product, an override is sought when you attempt to save the contract.</p>

Table 1-10 (Cont.) Account Details - Field Description

Field	Description
Exchange Rate	<p>For transactions involving any relationship pricing benefit scheme, the customer-specific exchange rate derived by adding the original exchange rate and the customer spread maintained for the relationship pricing scheme, gets displayed here.</p> <p>If Relationship Pricing is not applicable, Exchange Rate will be the same as the Original Exchange Rate.</p> <p>For more details on customer-specific exchange rates, refer to the section titled 'Specifying Pricing Benefit Details' in the Relationship Pricing user manual.</p>
Negotiated Cost Rate	The system defaults the negotiated cost rate.
Negotiation Reference	The system displays the negotiation reference here.
Generate Message	Enable this option if a payment message has to be generated for the settlement instruction.
IBAN Account Number	<p>The system displays the IBAN Account Number. Euro Currency and Euro Amount</p> <p>SWIFT messages (MT103/MT202) generated towards a settlement can furnish the value of the settlement amount in both the settlement account currency and a Euro Related Information (ERI) currency of your choice. If you opt to furnish the ERI value of the amount, you have to enter the following in this screen:</p> <ul style="list-style-type: none"> • The ERI currency • The ERI Amount <p>The system defaults to the ERI currency specified for the customer and currency combination.</p> <p>You can change the default ERI currency. The ERI amount that you specify will be validated against the Tolerance Limit specified for the ERI currency (in the Currency Maintenance screen).</p>
Cross-currency Settlements of FX deals	<p>Oracle Banking Treasury Management allows cross-currency settlements of foreign exchange deals that involve an 'In' currency. You can settle the 'In' currency leg in another 'In' currency or in 'Euro'.</p> <p>For example,</p> <p>Assume you enter into the following foreign exchange deal. You sell 100,000 FRF against USD.</p> <p>The scenario:</p> <ul style="list-style-type: none"> • User specify the exchange rate: 1 USD = 5.2 FRF • The bought amount is, therefore: 19230.769 USD • The settlement account is in EUR • The exchange rate between EUR/FRF: 1 EUR = 6.475 FRF <p>Since FRF is an 'In' currency, you can settle the sell leg of the deal through EUR (in this example). The settlement amount would be EUR 15444.015.</p>
Suppressing Settlement Messages	<p>Settlement messages, defined for components that fall due, will be generated automatically when the settlement happens for the respective component. You can delete the generation of the settlement message, defined for a component, by clearing the checkbox in the 'Gen Message' field.</p> <p>Note: If a paid component in the credit account chosen becomes the paid account. Similarly, if a component is to be received, the debit account chosen becomes the receiving account in the settlement maintenance.</p>

6. On the **Settlement Details** screen, click **Payment Details**.
Settlement Details with **Payment Details** is displayed.

Figure 1-10 Settlement Details - Payment Details tab

The screenshot shows the 'Settlement Details' window with the 'Payment Details' tab selected. The window is divided into several sections:

- Contract Reference *** and **Component** fields at the top.
- Account Details**, **Payment Details** (selected), **Parties**, **Parties**, and **Other Details** tabs.
- Payment By** section with radio buttons for **Instrument**, **Clearing**, and **Message**.
- Details Of Charge** section with radio buttons for **Beneficiary - All Charges**, **Remitter our Charges**, and **Remitter all Charges**.
- Details of Payment** section with four rows for **Details of Payment 1** through **Details of Payment 4**, each with a text field and a magnifying glass icon. Below these are **Banking Priority** and **Transfer Type** (set to **None**).
- Instrument Details** section with **Type** and **Number** fields.
- Terms & Additional Conditions** section with six rows for **Information 1** through **Information 6**, each with a text field and a magnifying glass icon.
- Sender to Receiver Information** section with six rows for **Information 1** through **Information 6**, each with a text field and a magnifying glass icon.
- Sender To Receiver Information For Cover** section with six rows for **Information 1** through **Information 6**, each with a text field and a magnifying glass icon.
- Additional Reporting Details** section with six rows for **Information 1** through **Information 6**, each with a text field and a magnifying glass icon.
- Exit** and **Save** buttons at the bottom right.

7. On the **Payment details** tab, specify the details as required.
8. Click **Ok** to save the details or **Exit** to close the screen.
- For information on fields, refer to the below table.

Table 1-11 Payment Details - Field Description

Field	Description
Payment By	<p>Indicate the method of payment for both Outgoing as well as Incoming Payments, for a Branch, Account and Currency combination.</p> <p>The following options are available:</p> <ul style="list-style-type: none"> • Instrument (settlement is done through a Check, MCK etc.) • Message (payment is made utilizing a SWIFT Message) • Clearing (the transaction is a local payment transaction, and the settlement is routed through the Clearing House of the bank) <p>Note: You can indicate the payment method as 'Clearing' only, If the payment currency is the local currency of the branch. If it is one of the clearing currencies defined for the branch. If you have selected '*' in the currency field.</p> <p>No payment message is generated for settlements routed through a Clearing House.</p> <p>Depending on the method in which you want to settle the contract, you should specify either Instrument or Message details.</p>
Details of Charge	<p>In this section, you can maintain details of the party who will bear the charges incurred in processing the transaction. It could be either:</p> <ul style="list-style-type: none"> • Remitter – All Charges • Beneficiary – All Charges • Remitter – Our Charges <p>Note: Remitter – All Charges - Corresponds to 'OURS' in Field 71 A of SWIFT MT 103 /103+. Beneficiary – All Charges - Corresponds to 'BEN' in Field 71 A of SWIFT MT 103 /103+. Remitter – Our Charges - Corresponds to 'SHA' in Field 71 A of SWIFT MT 103 /103+.</p>
Details of Payment	<p>Here you can specify the information, from the Ordering Party to the Beneficiary Customer, about the reason for the payment.</p> <p>This field can contain reference numbers, invoice numbers or any other details, which will enable the Beneficiary to identify the transaction. This information is passed through the payment chain to the Beneficiary.</p> <p>This field corresponds to field 70 of S.W.I.F.T. Refer to the S.W.I.F.T. manual for details on the code words and the format of the message you can input.</p>
Banking Priority	<p>Select the priority of the payment messages from the drop-down list. The options available are:</p> <ul style="list-style-type: none"> • Highly Urgent • Urgent • Normal <p>The default value is Normal.</p>
Information 1,2,3,4,5 and 6	<p>This could be instructions or additional information for the Receiver, Intermediary, Account with Institution or Beneficiary Institution.</p> <p>This field corresponds to field 72 of the S.W.I.F.T. message. The format of the message depends on the type of S.W.I.F.T. message that is generated. Refer to the S.W.I.F.T. manual for details on the format of the message and the code words to be used.</p>

Table 1-11 (Cont.) Payment Details - Field Description

Field	Description
Instrument Details	<p>If you opt to settle a contract with an instrument, you should specify the type of instrument that you would use. For example, you could settle a contract using a Manager's Check, a Check or a Demand Draft. You should also specify the number that identifies the instrument. This number is printed on the instrument.</p> <p>If the settlement is through an instrument, you cannot specify party details.</p>

9. On the **Settlement Details** screen, click **Parties**.

Settlement Details screen with **Parties** details is displayed.

Figure 1-11 Settlement Details screen - Parties tab

The screenshot displays the 'Settlement Details' window with the 'Parties' tab selected. The interface includes a top navigation bar with 'Contract Reference' and 'Component' fields. Below this, there are tabs for 'Account Details', 'Payment Details', and 'Parties'. The 'Parties' tab is active, showing several sections for party information:

- Intermediary Reimbursement Institution:** A list of five institutions with search icons and a 'Postal Address' field.
- Intermediary:** A list of five intermediaries with search icons and a 'Postal Address' field.
- Receiver Correspondent:** A list of five correspondents with search icons and a 'Postal Address' field.
- Senders Correspondent:** A list of five correspondents with search icons and a 'Postal Address' field.
- Account With Institution:** A list of five accounts with search icons and a 'Receiver' field with a 'Postal Address' field.

At the bottom right, there are 'Exit' and 'Save' buttons.

10. On the **Parties** tab, specify the details as required.
11. Click **Ok** to save the details or **Exit** to close the screen.

When you settle a contract, funds may have to pass through a series of banks before it reaches the Ultimate Beneficiary. In the Parties screen, you can capture details of all parties involved in a contract

These screens contain fields that can capture details of all the possible parties through whom the funds involved in a contract can pass. Depending on the type of contract you are processing, and the number of banks involved, you should enter details in these screens.

Table 1-12 Parties tab - Field Description

Field	Description
Intermediary Reimbursement Institution	An Intermediary Reimbursement Institution is a financial institution between the Sender's Correspondent and the Receiver's Correspondent, through which the reimbursement of the funds will take place.
Intermediary	<p>The Intermediary contract refers to the financial institution, between the Receiver and the 'Account with Institution', through which the funds must pass.</p> <p>The Intermediary may be a branch or affiliate of the Receiver or the 'Account With Institution', or an entirely different financial institution. This field corresponds to field 56a of SWIFT.</p> <p>Here you can enter either the:</p> <ul style="list-style-type: none"> • ISO Bank Identifier Code of the bank • Name and address of the Bank
Receiver Correspondent	<p>The Receiver's Correspondent is the branch of the Receiver or another financial institution at which the funds will be made available to the Receiver. This field corresponds to field 54a of SWIFT. You can enter one of the following:</p> <ul style="list-style-type: none"> • ISO Bank Identifier Code of the bank • The branch of the Receiver's Correspondent • Name and address of the Receiver's Correspondent
Account with Institution	<p>An Account with Institution refers to the financial institution, at which the ordering party requests the Beneficiary to be paid. The 'Account with Institution' may be a branch or affiliate of the Receiver, or the Intermediary, or of the Beneficiary Institution, or an entirely different financial institution. This field corresponds to field 57a of SWIFT. You can enter one of the following:</p> <ul style="list-style-type: none"> • ISO Bank Identifier Code of the bank • The branch of the Receiver's Correspondent • Name and address of the Receiver's Correspondent • Other identification codes (for example, account number) <p>If no selection is made for Account with Institution, all beneficiaries will appear for selection in the options list for Ultimate Beneficiaries in the Parties tab two screens. If a particular Ultimate Beneficiary is selected in Parties tab 2, then the Account with Institution for the selected ultimate Beneficiary will appear by default in the AWI field in the Parties tab one screen.</p>
Senders Corresponded	<p>The Senders Correspondent is the bank of the Sender or another financial institution at which the funds will be made available to the Sender. This field corresponds to field 53a of SWIFT. message. The user can specify the below details in the Correspondent 1 to Correspondent 5 lines of this field:</p> <ul style="list-style-type: none"> • ISO Bank Identifier Code of the bank • Bank of the Sender • Name and address of the Sender • Other Identification Codes (for example, account number)
Postal Address	<p>Click the button to specify the postal address details.</p> <p>Postal address information will be used by default if it is kept at ISDTRNS.</p> <p>Note: For more information, refer Postal Address topic.</p>

12. On the **Settlement Details** screen, click **Parties**.

Settlement Details screen with **Parties** tab details is displayed.

Figure 1-12 Settlement Details screen - Parties tab

The screenshot displays the 'Settlement Details' window with the 'Parties' tab selected. The interface includes the following sections:

- Contract Reference ***: A text input field.
- Component**: A text input field.
- Account Details**, **Payment Details**, **Parties** (selected), **Other Details**: Navigation tabs.
- Ordering Institution**: Five rows for 'Ordering Institution 1' through 'Ordering Institution 5', each with a search icon and a 'Postal Address' button.
- Beneficiary Institution**: Five rows for 'Beneficiary Institution 1' through 'Beneficiary Institution 5', each with a search icon and a 'Postal Address' button.
- Ordering Customer**: Five rows for 'Ordering Customer 1' through 'Ordering Customer 5', each with a search icon and a 'Postal Address' button.
- Ultimate Beneficiary**: Five rows for 'Ultimate Beneficiary 1' through 'Ultimate Beneficiary 5', each with a search icon and a 'Postal Address' button.
- External Counterparty Details**: Fields for 'Counterparty Bank', 'Counterparty Account', and 'Counterparty Name', each with a search icon.
- Exit** and **Save** buttons at the bottom right.

13. On the **Parties** tab, specify the details as required.
14. Click **Ok** to save the details or **Exit** to close the screen.

For information on fields, refer to the below table.

Table 1-13 Parties - Field Description

Field	Description
Ordering Institution	<p>The Ordering Institution is the Financial Institution, which is acting on behalf of itself, or a customer, initiating the transaction. This field corresponds to 52a of SWIFT. In this field, you can enter one of the following:</p> <ul style="list-style-type: none"> The ISO Bank Identifier Code of the Ordering Institution The branch or city of the Ordering Institution The Name and address of the Bank

Table 1-13 (Cont.) Parties - Field Description

Field	Description
Ordering Customer	<p>The Ordering Customer refers to the Customer ordering the transfer. Here, you can enter the name and address or the account number of the Customer, ordering the transaction. This field corresponds to field 50 of SWIFT. You will be allowed to enter details in this field only if you have initiated a customer transfer (MT 103 and MT 102). In case of a MT 910, a credit confirmation message, the first line should contain number '1' in option F of field 50.</p> <p>Note: Impact related to ISO20022 structured postal address change</p> <p>When party Ordering customer is a name without having a valid BIC id then Postal address maintenance (minimum of Town Name and Country) is mandatory at screen STDCRCAD - Customer Structured Address Maintenance. From here Postal Address details will get auto defaulted. If the same is not maintained, user will have to manually enter postal details (minimum of Town Name and Country) in the settlement subsystem at deal/operation screens.</p>
Beneficiary Institution	<p>Here, you can enter details of the institution in favor of which the payment is made. It is, in reality, the bank, which services the account of the Ultimate Beneficiary. This is applicable only in the case of bank transfers and not for customer transfers. This field corresponds to field 58a of SWIFT.</p> <p>You will be allowed to make entries into this field only for Bank Transfers (when the remitter and beneficiary of the transfer are financial institutions –MT 202). Here you can enter either:</p> <ul style="list-style-type: none"> • The ISO Bank Identifier Code of the Beneficiary Institution • The Name and Address of the Beneficiary Institution
Ultimate Beneficiary	<p>The Ultimate Beneficiary refers to the Customer to whom the amount of the component paid. This field refers to field 59 (is this now 59A) of SWIFT. You can make entries into this field only for a customer transfer (MT 103 or MT 100). This would not be applicable for Bank Transfers, only for Customer Transfers.</p> <p>You can also select an ultimate beneficiary account from the option list provided. Upon selection of the account, the Account with Institution of the selected ultimate beneficiary will appear by default in the AWI field in the Parties 1 tab. If no selection is made for AWI in the Parties tab one screen, then all accounts of ultimate beneficiaries existing in the system appear for selection.</p> <p>Note: Impact related to ISO20022 structured postal address change</p> <p>Postal address maintained at ISDTRINS will get defaulted and will be allowed for the amendment.</p>
External Counterparty Details	<p>Select the Counterparty Bank from the option list provided. All the Counterparty Accounts about this Bank will appear for selection. On selecting the Counterparty Account, the system will default the Counterparty Name as maintained for that account. If at the time of selecting Counterparty Account, Counterparty Bank is Null, then the Counterparty Bank will also appear by default.</p> <p>For processing direct debits, you will also need to capture the Agreement ID of the counterparty to facilitate a cross-referencing between the Payment and the Direct Debit instruction when a reversal of Payment is carried out due to rejection of the outbound DD.</p>

Table 1-13 (Cont.) Parties - Field Description

Field	Description
Postal Address	Click the button to specify the postal address details. Postal address information will be used by default if it is kept at ISDTRNS . Note: For more information, refer Postal Address topic.

15. On the **Settlement details** screen, click **Other details**.
Settlements details with **Other details** is displayed.

Figure 1-13 Settlements details - Other details

The screenshot shows the 'Settlement Details' window with the 'Other Details' tab selected. The window contains several sections with input fields:

- Contract Reference *** and **Component** (text input fields).
- Regulatory Reporting Details** section with fields for Bank Operation Code, Regulatory Report 1, Regulatory Report 2, and Regulatory Report 3.
- Time Indicators** section with fields for Transaction Code, Time Indicator 1, Time Indicator 2, and Time Indicator 3.
- Instruction Code Details** section with fields for Instruction Code, Instruction Code 1, Instruction Code 2, Instruction Code 3, Instruction Code 4, and Instruction Code 5, each with a search icon.
- Envelope Contents** section with fields for Envelope Contents 1 through Envelope Contents 5, each with a document icon.

At the bottom right, there are 'Exit' and 'Save' buttons.

16. On the **Other details** tab, specify the details as required.
17. Click **Ok** to Save the details or click **Exit** to close the screen.
- For information on fields, refer to the below table.

Table 1-14 Other Details - Field Description

Field	Description
Bank Operation Code	You can indicate the bank operation code inserted in Field 23B of the MT 103 message. The options available are SPRI, SSTD, SPAY and CRED.

Table 1-14 (Cont.) Other Details - Field Description

Field	Description
Transaction Code	This is the code for the transaction type. This field corresponds to field 26T of the MT103 message.
Instruction Code 1, 2, 3, 4 and 5	<p>You can indicate the Instruction code inserted in Field 23E of the MT103 message.</p> <p>You can specify a maximum of six instructions codes here. However, you cannot repeat any code that has already been specified. The options available are:</p> <ul style="list-style-type: none"> • CHBQ • TELE • PHON • PHOI • REPA • INTC • TELI • SDVA • PHOB • TELB • HOLD • CORT
Instruction Code Description	<p>You can specify the additional information, if any, which is inserted to qualify multiple Instruction Codes in Field 23E of the MT103 message. The instruction code description is maintained for the following instruction codes</p> <ul style="list-style-type: none"> • PHON • PHOB • PHOI • TELE • TELB • TELI • HOLD • REPA <p>For instance, if the Instruction Code is REPA and the description is 'Repayment' then the text 'REPA/Repayment' is inserted in Field 23E.</p>
Regulatory Reporting Details	Specify the Regulatory Reporting Details. The entered value is inserted in Field 77B of the MT103 message.
Time Indicators	<p>Time Indication, specifies one or several time indication(s) related to the processing of the payment instruction. Select the time indication code from the following values available in the options list:</p> <ul style="list-style-type: none"> • /CLSTIME/ - Time by which funding payment must be credited, with confirmation, to the CLS Bank's account at the central bank, expressed in CET • /RNCTIME/ - Time at which a TARGET payment is credited at the receiving central bank, expressed in CET • /SNDTIME/ - Time at which a TARGET payment is debited at the sending central bank, expressed in CET

1.3.2 Amend Settlement Details

This topic describes the overview to amend Settlement details.

While amending a contract, you can modify the settlement information on the following tabs:

- Message Details
- Parties

Save the contract once you have made the required changes. The system validates the modified information as in case of a new settlements operation
