Account Class Introduction

Accelerator Pack – Islamic CASA

Account Class Introduction

- In CASA module, Account Class acts like a product which helps to segregate different types of accounts based on their features.
- The Account Class could be defined by comprising the various features that is needed for an account as per the account type selected.
- The following are the Account types that is supported in ORACLE FLEXCUBE:
 - Current Accounts
 - Savings Accounts
 - Nostro Account

Accelerator Pack – Islamic CASA

Profit Calculation Parameters

Accelerator Pack – Islamic CASA

Profit calculation Parameters

Profit Calculation:

- **Monthly Average Balance** – The day end balances of all the days in a month are added and the resultant value is divided by the number of days in a month.
- **Month End Balance** – The day end balance of the month end date is taken into account.
- **Minimum Balance** – The least balance available during the month will be considered as the balance basis for the purpose of profit sharing.
- **Combination of Daily Net Balance and Average Balance** – This method of calculation is similar to the average balance calculation (as explained above) with the only difference that, whenever the day end balance of an account falls below the minimum balance stipulated for the account, the contribution of that days balance will be taken as “zero” while doing summation for the month.

Accelerator Pack – Islamic CASA

Example

Transaction Dates	Amount	Balance in Account
Opening Balance in an account as on 1-Mar	5000 AED	5000 AED
Amount withdrawn on 8th March	2000 AED	3000 AED
Amount deposited on 20th March	2000 AED	5000 AED
Minimum Balance required to be maintained for exclusion criteria	4000 AED	NA

Profit Calculation Basis	Calculation	Amount	Inclusion in Profit Calculation
Monthly Average Balance	$((5000 * 7) + (3000 * 12) + (5000 * 12)) / 31$ (days in month)	4225.806 AED	Y
Month End Balance	Balance on last day of the month	5000 AED	Y
Average Balance with Minimum Daily Net Balance	$((5000 * 7) + (0 * 12) + (5000 * 12)) / 31$ Note: instead of 3000, 0 is taken as 3000 falls below the Minimum Balance 4000	3064.516 AED	N
Minimum Balance	Least balance available during the month	3000 AED	N

Stop Payments:

Accelerator Pack – Islamic CASA

Account Features

- **Contribute to PDM** – To decide whether the account will be allowed to contribute to the Fund for Profit Calculation.
- **Exclude from Distribution** – To decide whether account will be considered for Profit distribution i.e. whether account will get any portion of profit or not.
- Note : Even if an account is allowed to Contribute in Fund it can be excluded from Profit Distribution. But, if an account is not allowed to contribute to PDM then it must be excluded form Profit Distribution
- **Fund ID** – To specify the fund to which the account will contribute for Profit calculation. This is applicable only if account is included for contribution to PDM.

Accelerator Pack – Islamic CASA

Account Features

Account Set for Closing:

It helps to close Saving accounts which are linked to profit module automatically by the system after the profit distribution is done.

- When the user receives any Account closure request, for which the profit distribution is due, user will make the account balance as zero and give the amount to the customer. Profit would be distributed during the next profit period.
- Note : ICPDMBT at EOTI must be configured for automatic Closure.

Accelerator Pack – Islamic CASA

Account Features

Mudarabah Sweep:

- This facility is available only for the accounts which has overdraft facility. It allows a customer to attach Deposit account to its current/saving account to act as collateral.
- When account is in debit balance then during EOD, system will utilize amount from linked deposits depending upon 'Order of linkage'.
- When account is in credit balance, then during EOD, system will sweep out the utilized amount back to linked deposit (up to extent of available balance of account) depending upon 'Order of linkage'.
- Auto deposit would be created if the credit balance in the account is more than the minimum balance. If the account moves to debit balance, then it will utilize the auto deposit prior to the linked TD.
