# 1. Open Development Tool Installation

## 1.1 Introduction

This document explains about the creation of .war file using ODT (Open Development Tool) and setting up database for ODT installation.

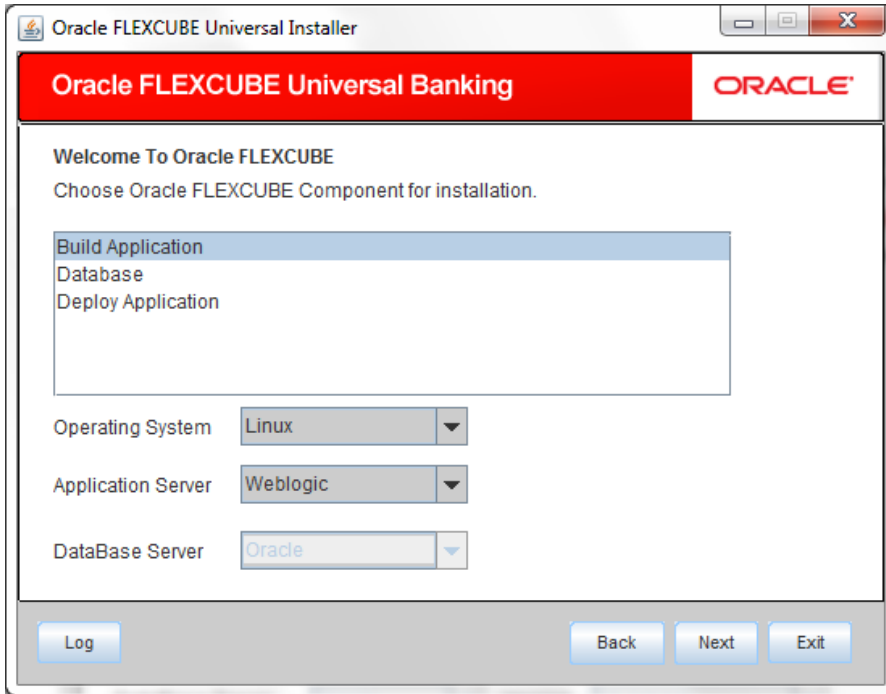

## 1.2 Installing Open Development Tool

To install ODT, follow the steps given below:

1. Click 'Next'. The following screen is displayed.

2. Click 'Open Development Tool'.
3. Click 'Next'. The following screen is displayed.

4. Select 'Build Application' as Oracle FLEXCUBE component for installation.
5. Specify the following details.

#### **Operating System**

Specify the operating system in which you are installing Oracle FLEXCUBE.

#### **Application Server**

Specify the application server on which you are installing Oracle FLEXCUBE.

6. Click 'Next'. The following screen is displayed.

7. Specify the following details.

**ODT JNDI**

Specify the JNDI for the ODT.

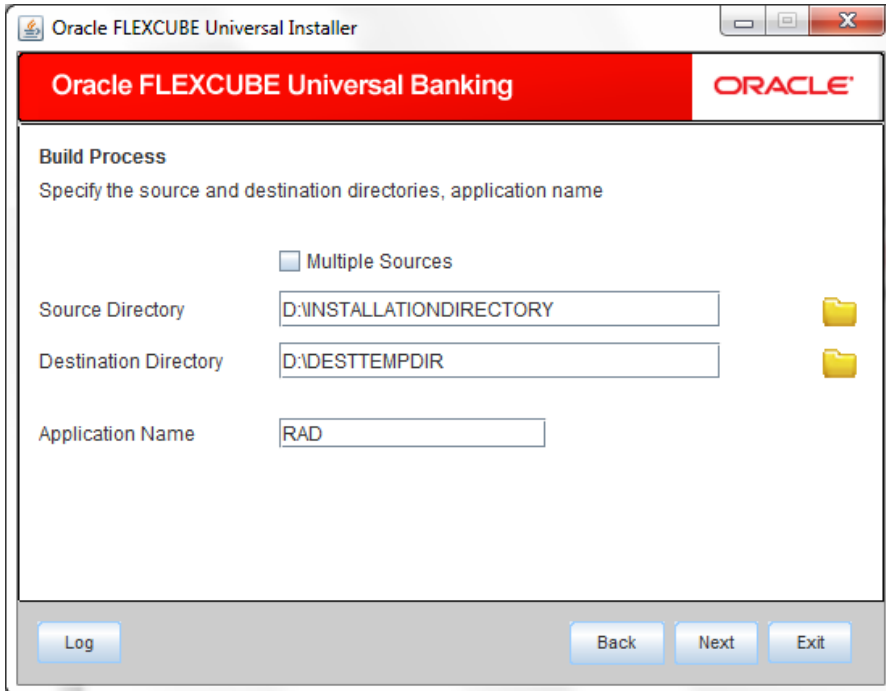

**Logger Path**

Specify the path where the logs have to be written.

**Provider\_URL**

Specify the provider URL.

8. Click 'Next'. The following screen is displayed.

### Source Directory

Specify the source directory. You can use the directory icon to browse to the source directory location. The source directory must contain src, ToolWeb folders. If the required folders are not present, then the error message is displayed.

Check the box 'Multiple Sources' to use multiple source directories.

### Destination Directory

Specify the destination directory. You can use the directory icon to browse to the source directory location.

### Application Name

Specify the desired name for the application. For example, : RAD.

9. Click 'Next'. The following screen is displayed.

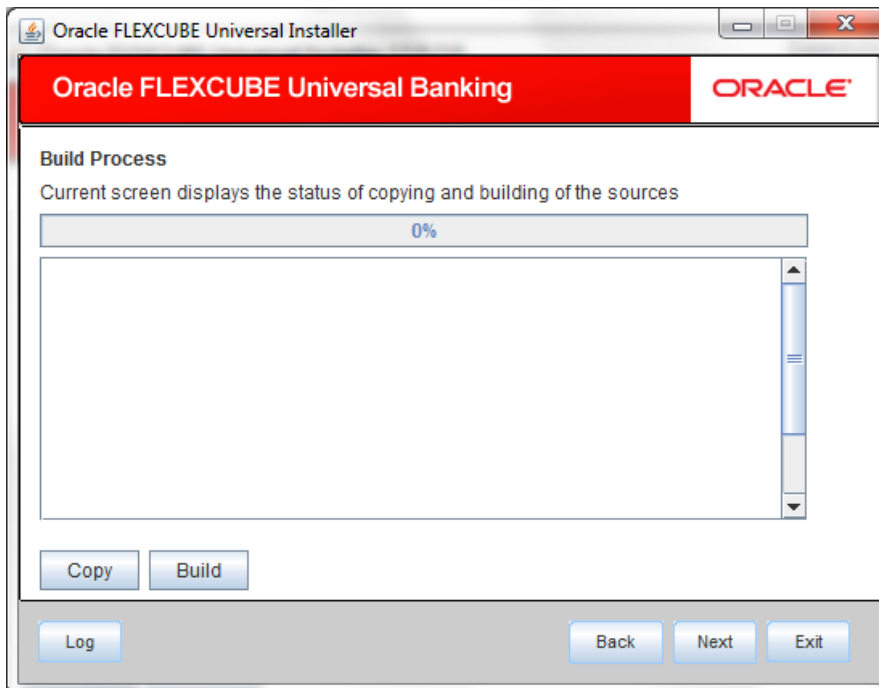

### Multiple Sources

In case of Cluster/Patch releases, you can get the files from multiple source directories. If you check this box, the installer will not allow you to specify the source directory in this screen. On clicking 'Next', the following screen is displayed.

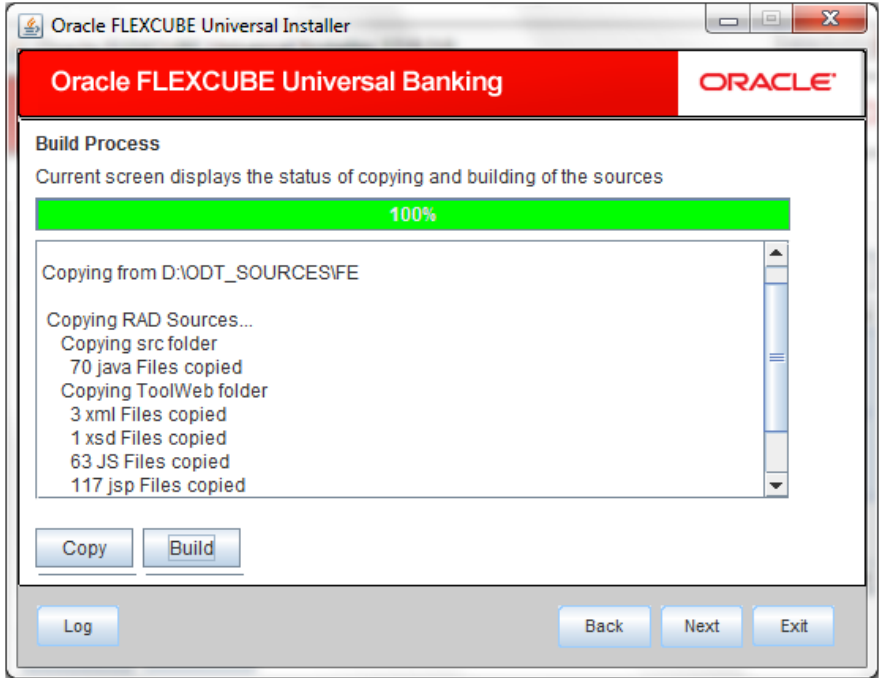

You can select all the source directories in this screen. The Installer will copy the sources from the multiple locations into the destination directory. You can have consolidated sources in the destination directory.

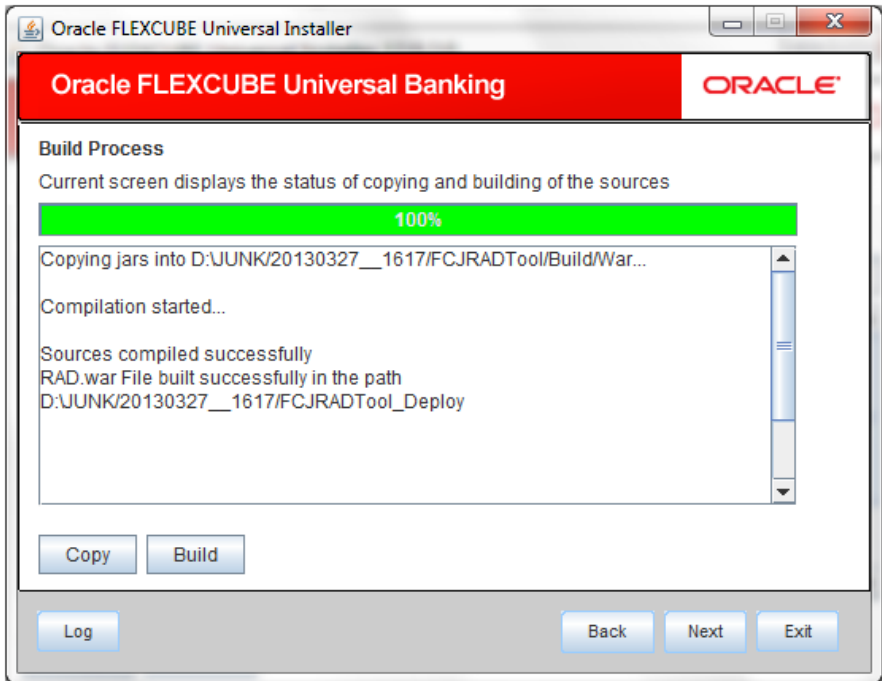

10. Click 'Next'. The following screen is displayed.

11. Click 'Copy' button to copy sources to the destination location.
12. Click 'Build' button to build the war file in the destination location.  
The system displays the following screen when the copying is complete.

13. The system displays the following screen when the building is complete.
