## **1. Understanding Rolled-up Patch Releases**

A Rolled-up patch release is an official Oracle patch release for Oracle Banking Trade Finance. Rolled-up patch-set will be released every quarter. The fourth & fifth digit in a patch release string indicates the rolled-up patch release number. For example, Release 14.5.0.4.0 is the fourth rolled-up patch for Release 14.5. Each rolled-up patch release includes libraries and files that have been rebuilt to implement one or more fixes. Each rolled-up patch release is incremental. In other words, the latest rolled-up patch release includes new fixes released after last rolled-up patch released for the same release.

## **2. Rolled-up Patch Requirements**

Confirm you are applying this rolled-up patch release after applying Oracle Banking Trade Finance 14.5.0.0.0 GA release is completed successfully.
