1. Understanding Patch Releases

A patch release is an official Oracle patch release for Oracle Banking Trade Finance. The fourth & fifth digit in a patch release string indicates the patch release number. The first three digits indicate the release to which the patch is applied. For example, Release 14.7.0.2.0 is the incremental maintenance patch for Release 14.7. Each patch release includes libraries and files that have been rebuilt to implement one or more fixes. Each patch release is incremental. In other words, the latest patch release includes new fixes released after last patch released for the same release.
