3	List Of Glossary	530

1 Preface

1.1 Introduction

This User Guide helps you to familiarize you with the Servicing module of Oracle FLEXCUBE. It gives an overview of the module and explains all the maintenances required for its smooth functioning. It also takes you through the different types of transactions that can be handled through this module.

1.2 Audience

This guide is intended for the Branch Tellers, Vault Operators, and Branch Supervisors to provide quick and efficient service to customers and prospects of your bank.

1.3 Document Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

1.4 List of Chapters

This manual is organized into the following chapters:

Chapter	Description
Overview of Servicing	Provides a snapshot of the features of the entire module.
List Of Glossary	Provides a list of menus arranged in alphabetical order.

1.5 Related Documents

1. The Branch 2 User Guide

1.6 Symbols

The following symbols are used in this guide:

Symbol	Function
→	Represents Results

1.7 Shortcut Keys

The following shortcut keys can be used only for the screens which has the icons specified in the Function:

Shortcut Key	Function
Tab	Used to shift focus from one input field to other. NOTE: The last field of the last accordion will shift focus to Submit/Cancel button.
Alt + S	Used to select Submit icon.
Alt + C	Used to select Cancel icon.

2 Overview of Servicing

2.1 Introduction

Oracle Banking FLEXCUBE UI Refresh - Branch is a retail banking application that gives a 360-degree view of the customer and financial transactions to the Teller of the bank. This enables you as the Teller, to provide better customer-focused services as well as cross-sell and up-sell the other products and services of the bank.

A typical transaction under branch is classified into the following stages:

1. Teller capturing the transaction request and transaction enrichment
2. Authorization by the Supervisor
3. Teller Resubmission – applicable for certain transactions

2.2 Pre-Requisites

Follow the steps, to navigate to the **Home screen** (Branch Dashboard):

1. Specify **User Id** and **Password**, and login to FCUBS **Home screen**.

→ The FCUBS **Home screen** is displayed.

2. Click **Next Generation UI** menu to launch the maintenance screen **CSDNGUIM**.

NOTE: Ensure that user has roles for the screen.

3. Update the **Next Generation UI** Product URL in the maintenance screen **CSDNGUIM**.

NOTE: For example, **RETAILOPS** can be used as the Function id, with the description as **Retail Operations**. It is released as Static Data and ensure the user roles has been maintained for the same in FCUBS.

4. Once the roles are maintained in FCUBS, click **Next Generation UI** on the tool bar.

→ **Next Gen UI Dashboard** displays with the list of products.

5. Click **Retail Operations**.

→ The **Next Generation – Home screen** is displayed.

NOTE: Ensure the same user id is maintained in FCUBS and the **Next Generation UI**, and it has necessary roles. For example, if the user id is JOHN, the same needs to be present in FCUBS SMS system and **Next Generation UI** SMS system.

6. Do the following **Next Generation UI** changes:

SECURITY_CONFIG table in PLATO_SECURITY schema must have the following entries:

INTEGRATION_ENABLED {id} true

INTEGRATION_CALLBACK_URL {id}

https://10.00.00.00:1010/FCJNeoWeb/ValidationService/FCNonceValidation/validate

NOTE: Update the IP and port number of FCUBS server.

→ The **Home screen** (Branch Dashboard) displays.

2.3 Servicing

This section describes the overview, general layout, and features of the Servicing module. It contains the following sub-sections:

- [2.3.1 Branch Teller Application](#)
- [2.3.2 Navigating through the Application](#)
- [2.3.3 Application Layout](#)
- [2.3.4 Salient Features of Servicing](#)

2.3.1 Branch Teller Application

The Servicing module gives an overview of Branch Teller Application that are grouped into the several menus. For more information on menus, refer to [Figure 1: Mega Menu - Teller](#) and [Menu Item – Field Description](#) table.

Menu Item – Field Description table

Field	Description
Branch Operations	Branch Manager, Vault Teller, or Teller can use to cover the internal activities done at the branch where the Customer is not involved. This facilitates branch, vault, Till opening, or closing for the day and monitoring the transactions done during the day and Cash Balancing.
Till-Vault Operations	Vault Teller or Teller can use to monitor the cash and currency boxes for the day and to perform cash transfers from or to the Vault or Till as and when required.
Customer Transactions	Teller can use to perform financial transactions for Customer accounts, which includes, Cash Deposits, Cash Withdrawals, Cheque Withdrawal, Forex Transactions, and Account Closure.
Miscellaneous Transactions	Teller can use to perform General Ledger transactions such as miscellaneous debit and credit transactions against a Customer's CASA account and GL account.
Transfers	Teller can use to perform inter-bank transfer, intra-bank transfer, and cross border transactions.
Clearing	Teller can use to capture the cheque deposit transactions.
Remittances	Teller can use to issue remittances such as demand drafts and bankers cheques and perform payment or cancellation of the issued remittances.

Field	Description
Term Deposits	Teller can use to initiate Term Deposit account opening and perform redemption, top up on the existing term deposit accounts.
Credit Card Transactions	Teller can use to perform credit card advance and payment transactions.
Loan Transactions	Teller can use to perform loan disbursement and loan repayment transactions.
Islamic Transactions	Teller can use to perform various Islamic transactions.
Session Teller Transactions	Teller can use to perform financial transactions for Customer accounts in the Teller Session.
MAV Operations	Teller can use to perform the MAV operations.
Journal Log	Teller or Supervisor can use to view the status of transactions performed by them. Also, it allows to resubmit or reject an incomplete transaction, or to reverse a completed transaction.
Customer Service	Teller or Operations Executive can use to maintain customer accounts and ancillary services, and to enquire about customer account balance.
Branch Dashboard	Teller can use the Branch Dashboard to view the cash position, transaction status, alerts, to access the frequently used transaction screens, and to view the alerts and notifications.
Branch Maintenance	Covers a set of definitions maintained to perform the branch based operations, transactions, and services.

Field	Description
Customer/Account Search	Used to query for a specific Customer ID or Customer Account Number.

You can select an operation using any of the following methods:

- From **Home screen** navigate to left menu and then click the necessary operation.
- Click **Frequent Operations** widget placed at the right side of the transaction area.

2.3.2 Application Layout

The general layout of Servicing Application consists of Main Menu, Customer Search, Transaction Area including Customer Summary and additional widgets available to display the Current Till Position and frequently used transaction icons.

2.3.2.1 Main Menu

The Teller Main Menu is a Mega Menu that makes all the menu items visible at once. It is a large panel divided into groups of menu items, which simplifies the navigation. The menu items are grouped based on the type of operation performed. In addition, the **Menu Item Search** can be used to search and select a specific screen from any of the main menu items. The main menus are listed below:

- Branch Operations
- Till-Vault Operations
- Customer Transactions
- Miscellaneous Transactions
- Transfers
- Clearing
- Remittances
- Term Deposit Transactions
- Credit Card Transactions
- Loan Transactions
- Islamic Transactions

- Session Teller Transactions
- MAV Operations
- Journal Log
- Customer Services
- Branch Dashboard
- Branch Maintenance

The main menus are further categorized into specific functions that are represented by menu items in the Mega Menu.

2.3.2.2 Customer Search

The **Customer Search** is located in the Branch Dashboard and **Teller Transaction** screens. It is used to query and find a specific customer account with any of the following information:

- Customer ID
- Customer Name
- Account Number

Figure 2: Customer Search Widget

1. To process the **Customer Search** screen, click LOV.

→ The **Customer Search** screen is displayed.

Figure 3: Customer Search Screen

A screenshot of the Customer Search screen. At the top, there are three input fields labeled 'Customer ID', 'Customer Name', and 'Account Number'. To the right of these fields are two buttons: 'Search' and 'Reset'. Below the input fields is a section titled 'Customer Results'. It contains a table with two columns: 'Customer ID' and 'Customer Name'. The table is empty, displaying 'No data to display.' Below the table is a pagination bar showing 'Page 1 (0 of 0 items)' and navigation arrows. Below the 'Customer Results' section is another section titled 'Account Details'. It contains a table with three columns: 'Account Number', 'Account Name', and 'Account Currency'. This table is also empty, displaying 'No data to display.' Below this table is another pagination bar showing 'Page 1 (0 of 0 items)' and navigation arrows.

The Teller can query the details using **Customer ID** or **Customer Name** or **Account Number**. For more information on fields, refer to table [Field Description: Customer Search Screen](#).

Field Description: Customer Search Screen

Field	Description
Customer ID	Specify the customer ID which the details needs to be queried.

Field	Description
Customer Name	Specify the name of the customer for which the details needs to be queried.
Account Number	Specify the account number for which the details needs to be queried.
Search	Click Search to get the results for the specified Customer ID , Customer Name , or Account Number .
Reset	Click Reset to clear the search results.
Customer Results	Displays the customer search results.
Customer ID	Displays the customer ID.
Customer Name	Displays the customer name.
Account Details	Displays the account search results.
Account Number	Display the account number.
Account Name	Display the description of the account.
Account Currency	Display the currency of the account.

2.3.2.3 Transaction Area

The Transaction Area consists of Transaction Panel and Customer Summary within the **Teller Transaction** screens. The Transaction Panel is specific to each transaction screen. The **Customer Information widget** consist of the following details that are validated during transaction submission:

- Option to display the widget
- Customer image with customer name and KYC status
- Signature with option to verify
- Account details (CASA/Loan/Credit Card)
- Address and contact details

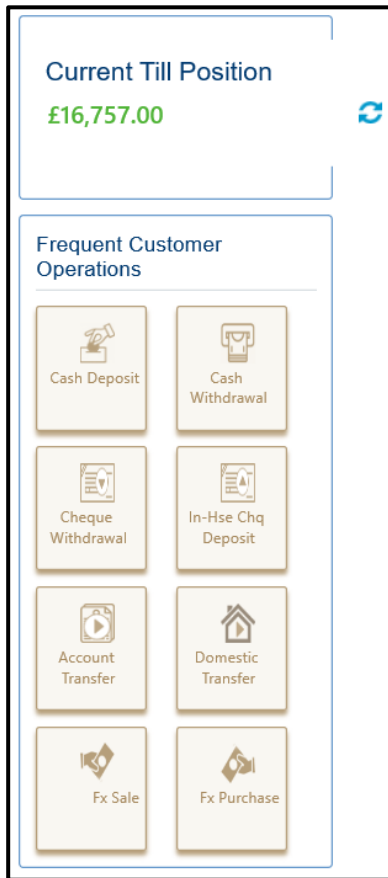

Figure 4: Transaction Area

The screenshot displays the 'Teller Transaction' interface. On the left, the 'Cash Deposit' panel includes fields for 'Account Number', 'Transaction Amount' (set to GBP), 'Exchange Rate', 'Total Charge Amount' (GBP0.00), and 'Narrative' (set to 'Cash Deposit'). Below these are expandable sections for 'Charge Details' and 'Denomination'. On the right, the 'Customer Information' widget is active, showing a placeholder for a customer image, the name 'John Smith', and a 'KYC Status' of 'Not Verified'. Below this is a signature area with a 'No Signature data to display' message. Further down, account details are listed: 'Account Name: John Smith', 'Account Branch: 000', 'Account Status: Active', 'Overdraft Limit', 'Actual Balance', and 'Account Balance'. At the bottom right, there are 'Submit' and 'Cancel' buttons. To the right of the main transaction area, a sidebar contains 'Current Till Position' (£1,200.00), an 'Alerts' section with 'No record to display', and 'Frequent Customer Operations'.

2.3.2.4 Additional Widgets

The additional widgets are located at the right side of the Transaction Area in the **Teller Transaction** screens. The additional widgets include the following:

- **Current Till Position** – displays the cash position of the logged in Teller Id in branch currency.
- **Alerts** – contains notifications specific to the customer.
- **Frequent Customer Operations** – includes some frequently used transaction icons placed to the right side of the Transaction area.

Figure 5: Additional Widgets

2.3.3 Salient Features of Servicing

2.3.3.1 Generating Teller Sequence Number

The system generates a unique Teller Sequence Number and displays an information message **Teller Sequence Number nnn** indicating the generated number after submission of each teller transaction. The generated sequence number is also displayed at the following levels:

- Completion
- Authorization Submission
- Re-submission
- Reversal
- Rejection

2.3.3.2 Generation of Advices for Teller Transactions

The system generates the transaction advice if it is enabled in the definition of function code.
The advice includes the currency and amount values involved in the transaction.

2.3.3.3 Transaction Reversal

A transaction can be manually reversed only when it is authorized and completed from the **Journal Log**.

When you reverse a transaction, the data remains in the system with the status **Reversed** and the accounting entries are reversed (negative amounts are posted into the accounts). Also, this will update the Till Balance for the currencies (for cash transactions), wherever applicable.

You can select the transaction to be reversed from the transaction screen. If the reversal is applicable for the function code, **Reversal** icon will be enabled. When you click this icon, the reversal request will be initiated.

If cash transactions are reversed, the system validates the following:

- the Till used for the reversal is the same as that used in the original transaction
- the denominations are input (If the transaction is reversed the same day of its input, the denominations of the transaction is altered.)
- a batch is open

2.3.3.4 Transaction Rejection

You can manually reject the authorized customer transactions from the Teller **Journal Log**.

NOTE: When you reject a transaction, the data remains in the system with the contract status **Discarded** and no further action is allowed on the transaction.

2.3.3.5 UDF and MIS

UDF and MIS are supported during accounting via common core Additional Fields. MIS Codes can be sent from OBREMO, which will be validated and processed as part of accounting.

2.3.3.6 External API

External APIs will be processed only if called by an external system, which is maintained in OBREMO. External system can be maintained using External System Maintenance screen. For more information on External System Maintenance screen, refer to the topic [2.19.2 External System Maintenance](#) in this guide. External APIs are supported for the following transactions:

- Cash Deposit
- Cash Withdrawal
- Account Balance Inquiry
- Account Transfer

NOTE: These transactions will work only if OAuth is enabled.

2.3.3.7 Machine Learning

OBREMO uses machine learning to process an email request from a customer automatically. When a customer sends an email request, the requirement is understood using machine learning, and the transaction is processed. Based on pre-defined machine learning in External System Maintenance, the transaction is processed automatically.

The following conditions apply to the machine learning use case for cheque book request:

- If sufficient details are provided in the email request, the transaction will be processed until completion.
- If details are insufficient in the email request to process a transaction, it will be assigned in the Electronic Journal log for user correction. After the assigned user does the correction, the transaction will be processed.

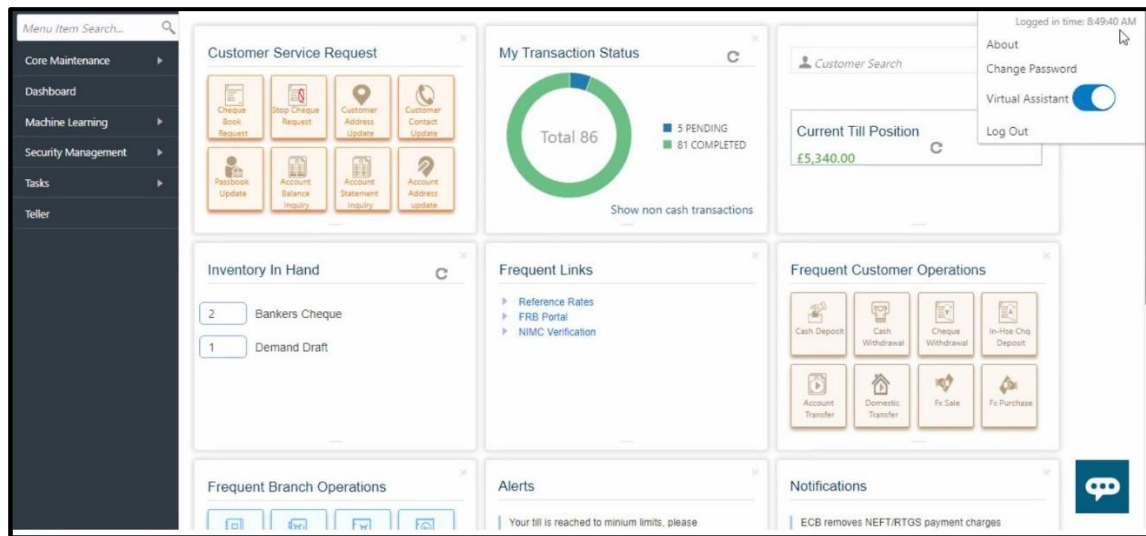

The following conditions apply to the machine learning use case for card block request:

- If sufficient details are provided in the email request, the transaction will be processed until completion.

2.3.3.8 Oracle Digital Assistant

The Oracle Digital Assistant (ODA) helps the Teller to reduce the time taken to access the transaction screens through automatic text/voice processing. To enable this feature, navigate to user menu, and select **Virtual Assistant**.

Figure 6: Virtual Assistant

The Virtual Assistant supports the following use cases:

- Teller can either type/say, **Cash Withdrawal Account Number, Do Cash Withdrawal Account Number** in ODA Chat bot. Based on the input provided, the **Cash Withdrawal** screen will be opened automatically with the specified account number.

NOTE: Teller need to type/say the specific account number while giving the input text/voice.
- Teller can either type/say, **Cash Deposit Account Number, Do Cash Deposit Account Number** in ODA Chat bot. Based on the input provided, the **Cash Deposit** screen will be opened with the specified account number.
- Teller can type/say the name of the operation like **Open Teller Batch** or **Open My Batch**. If the Teller batch is closed, the ODA will check the current Till balance and prompt for confirmation from Teller. Once the Teller confirms, then it will open the teller batch. In case the Teller batch is already open, a response message (**Teller batch already open**) will be displayed.

Figure 7: Use Case with Account Number

The screenshot shows the 'Teller Transaction' window with a 'Customer Search' bar. The main section is titled 'Cash Deposit' and contains the following fields:

- Account Number:** A text input field.
- Transaction Amount:** A text input field with a dropdown menu set to 'GBP'.
- Exchange Rate:** A text input field with up/down arrows.
- Account Amount:** A text input field.
- Total Charge Amount:** A text input field showing 'GBP0.00'.
- Narrative:** A text input field with 'Cash Deposit' entered.

Below these fields are two expandable sections: 'Charge Details' and 'Denomination'. To the right, the 'Customer Information' panel displays:

- Customer Id, Name:** John Smith
- KYC Status:** Not Verified
- Account Name:** John Smith
- Account Branch:** 000

- Account Balance:**

A chat window on the far right shows a message: 'Cash deposit' followed by a timestamp 'Wednesday, November 25, 2020, 8:44:34 AM'.

Figure 8: Use Case without Account Number

The screenshot shows a dashboard interface with a 'Menu Item Search' bar on the left. The main area contains several widgets:

- Customer Service Request:** A grid of icons for 'Create Book Request', 'State Cheque Request', 'Customer Address Update', 'Customer Contact Update', 'Feedback Update', 'Account Balance Inquiry', 'Account Statement Inquiry', and 'Account Address Update'.
- My Transaction Status:** A donut chart showing 'Total 86' with a legend for '5 PENDING' (blue) and '81 COMPLETED' (green). Below the chart is a link 'Show non cash transactions'.
- Inventory In Hand:** A list showing '2 Bankers Cheque' and '1 Demand Draft'.
- Frequent Links:** A list of links: 'Reference Rates', 'FRB Portal', and 'NIMC Verification'.
- Frequent Branch Operations:** A list of icons for various branch operations.
- Alerts:** A section with a message: 'Your fill is reached to minium limits, please'.

On the right, a chat window shows a message: 'Open my batch' followed by a timestamp 'Wednesday, November 25, 2020, 8:47:03 AM'.

2.4 Branch Operations

This section describes the various screens used to perform the branch operations. The screens are described in the following sub-sections:

- [2.4.1 Open Branch Batch](#)
- [2.4.2 Open Vault Batch](#)
- [2.4.3 Open Teller Batch](#)
- [2.4.4 Current Open Tills](#)
- [2.4.5 Branch Breaching Limits](#)
- [2.4.6 Till Vault Position](#)
- [2.4.7 Teller Totals Position](#)
- [2.4.8 Close Teller Batch](#)
- [2.4.9 Close Vault Batch](#)
- [2.4.10 Close Branch Batch](#)
- [2.4.11 Book Shortage](#)
- [2.4.12 Book Overage](#)
- [2.4.13 Teller Session](#)

2.4.1 Open Branch Batch

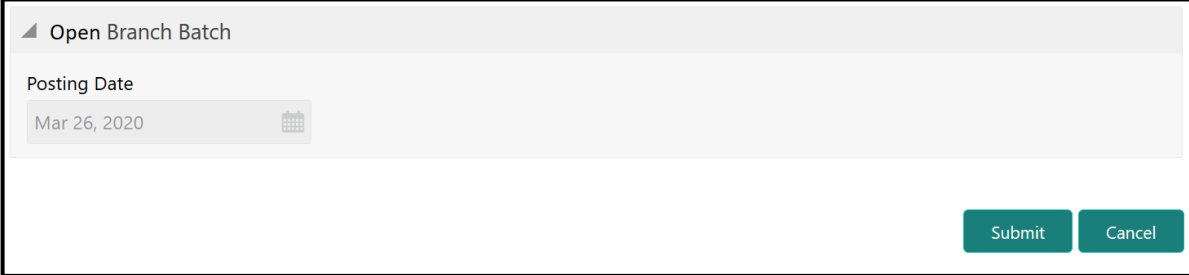

This screen is used to initiate the branch operations for the **Posting Date**. The Supervisor or Branch Manager with necessary access can open this screen. The Teller or Vault Teller can perform the branch operations only after the branch batch is submitted for the posting date. When a branch batch is closed for the day, system derives the next working day automatically, based on the branch calendar.

To process this screen, type **Open Branch Batch** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Branch Operations**, click **Open Branch Batch**.

→ The **Open Branch Batch** screen is displayed.

Figure 9: Open Branch Batch

Specify the details in the **Open Branch Batch** screen. For more information on fields, refer to table [Field Description: Open Branch Batch](#).

Field Description: Open Branch Batch

Field	Description
Posting Date	Indicates the date on which the branch batch need to be opened. NOTE: By default, the system displays the current date.

Click **Submit** to open the branch batch for the specified posting date.

NOTE: Opening branch batch indicates to the head office that the branch is open for business operations on the specified posting date. You can open a Teller batch for the posting date only after the branch batch is opened.

2.4.2 Open Vault Batch

The Vault Teller can use this screen to open a vault batch on a specified date. On the specified posting date, the Vault Teller can open only one vault batch. To open another vault batch, the vault batch which is opened previously needs to be closed. All the tellers buy additional cash and sell their excess cash to the Vault Teller. When this screen is launched, the system will default the cash balances.

To process this screen, type **Open Vault Batch** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Branch Operations**, click **Open Vault Batch**.

→ The **Open Vault Batch** screen is displayed.

Field Description: Open Vault Batch

Field	Description
Posting Date	Indicates the date on which the vault batch needs to be opened. NOTE: By default, the system displays the current
Currency	Displays the currency code.
Total Cash	Specify the total cash for a particular currency, physically present in the bank vault, at the beginning of the current posting date.
Cash Available	Displays the system calculated cash for a particular currency, which is available in the vault at the beginning of the current posting date.

Field	Description
	NOTE: The amount shown in this column depends on the cash transactions that were carried out by the vault until the last posting date.

Click **Submit** to open the vault batch for the specified posting date. The Vault Teller can perform the relevant vault operations for the posting date.

NOTE: System does not allow to open the vault batch if the physical cash entered is not same as the system cash.

2.4.3 Open Teller Batch

This screen is used to open a teller batch on a specified date. A Teller can initiate the teller batch with the current cash position that has been retained from the previous day or start with zero cash and subsequently buy cash from the vault. The system will default the cash balances on opening a teller batch.

To process this screen, type **Open Teller Batch** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Branch Operations**, click **Open Teller Batch**.

→ The **Open Teller Batch** screen is displayed.

Field Description: Open Teller Batch

Field	Description
Posting Date	Indicates the date on which the vault batch need to be opened. NOTE: By default, the system displays the current date.
Currency	Displays the currency code.
Total Cash	Specify the total cash for a particular currency, physically present in the bank teller, at the beginning of the current posting date.
Cash Available	Displays the system calculated cash for a particular currency, which is available in the vault at the beginning of the current posting date. NOTE: The amount shown in this column depends on the cash transactions that were carried out by the vault until the last posting date.

Click **Submit** to open the teller batch for the specified posting date. The Vault Teller can perform the relevant vault operations for the posting date.

NOTE: System does not allow to open the vault batch if the physical cash entered is not same as the system cash. The system also allows to re-open the Teller batch for the current system date.

2.4.4 Current Open Tills

This screen is used to view the open tills or vault for the branch during the day or before performing the end of day activity. The branch user can use this screen to view the list of logged-in tellers and to view the pending, unassigned, assigned, or tanked transactions under each Teller or Vault Teller's ID.

To process this screen, type **Current Open Tills** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Branch Operations**, click **Current Open Tills**.

→ The **Current Open Tills** screen is displayed.

Field Description: Teller Totals Position

Field	Description
Branch Code	Displays the logged-in branch.

Field	Description
Posting Date	Indicates the date on which the teller totals position need to be enquired. NOTE: By default, the system displays the current date.
Currency	Displays the currency code for which the teller totals details needs to be displayed.
Teller ID	Displays the logged-in teller ID from the LOV.
All Till	Displays the checkbox if all the Teller details need to be displayed.
Query	Displays the details if you click this icon.
Currency	Displays the currency code for which the cash position is shown.
Teller ID	Displays the Teller ID for which the cash position is shown.
Opening Balance	Displays the opening balance of the Teller ID for the specific currency.
Incoming Cash	Displays the total incoming cash received in the Till.
Outgoing Cash	Displays the outgoing cash moved out of the Till.
Closing Balance	Displays the total amount pending in the Till.

2.4.8 Close Teller Batch

This screen is used to close the teller batch for the given posting date. The system allows closing the teller batch only when the below conditions are met:

- Verify that all the transactions are successfully processed to a logical end. If there are any pending transactions, the system prompts to either complete or reject the transaction.
- Verify that there is a difference between the physical cash and the cash calculated by the system. You need to book the overage or shortage accordingly, and then each Teller can close the teller batch for that day.
- Verify that the teller cash position retains the minimum limit for every currency as maintained in the User limits. If you breach the minimum limit, the system prompts the error to maintain the required minimum balance.

NOTE: The teller batch can be opened and closed only once for the posting date.

To process this screen, type **Close Teller Batch** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Branch Operations**, click **Close Teller Batch**.

→ The **Close Teller Batch** screen is displayed.

Figure 16: Close Teller Batch

Currency	Total Cash	Cash Available	Shortage/Overage Amount

Specify the details in the **Close Teller Batch** screen. For more information on fields, refer to table [Field Description: Close Teller Batch](#).

Field Description: Close Teller Batch

Field	Description
Posting Date	Indicates the date on which the teller batch needs to be closed. NOTE: By default, the system displays the current date.
Currency	Displays the currency code in which the Teller deals.
Total Cash	Specify the total cash for a particular currency, physically present in the bank Teller, at the end of the current posting date.
Cash Available	Displays the system calculated cash for a particular currency, which is available in the teller at the end of the current posting date. NOTE: The amount displayed in this column depends on the cash transactions that were carried out by the Teller until the last posting date.
Shortage/ Overage Amount	Displays the difference between the total cash and the cash available with the Teller, at the end of the current posting date. Based on this difference, the overage or the shortage amount is displayed. NOTE: An overage indicates that the physical cash with the Teller is more than the available cash as calculated by the system. A shortage indicates that the available cash calculated by the system is more than the physical cash present with the Teller.

Click **Submit** to update the cash balance and close the teller batch for the posting date.

NOTE: If there is any overage or shortage, the system displays an error message stating that the cash is not balanced for the Teller ID. Also, if any of the conditions mentioned above fail, the system displays an appropriate error message on submit.

2.4.9 Close Vault Batch

This screen is used to close the vault batch for a specific date. The Vault Teller can log in and close the vault batch only if the below conditions are met:

- Verify that all the teller batches are closed for the posting date.
- Verify if there is a difference in the physical cash and that calculated by the system, the overage or shortage has to be booked accordingly. After the overage or shortage is booked, the Vault Teller can close the vault batch for that day.
- Verify that the cash position of the Vault Teller retains the minimum limit for every currency as maintained in the User limits. If the minimum limit is breached, the system prompts the error to maintain the required minimum balance.

NOTE: The vault batch can be opened and closed only once for the posting date.

To process this screen, type **Close Vault Batch** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Branch Operations**, click **Close Vault Batch**.

→ The **Close Vault Batch** screen is displayed.

Figure 17: Close Vault Batch

Currency	Total Cash	Cash Available
No data to display.		

Specify the details in the **Close Vault Batch** screen. For more information on fields, refer to table [Field Description: Close Vault Batch](#).

Field Description: Close Vault Batch

Field	Description
Posting Date	Indicates the date on which the vault batch needs to be closed. NOTE: By default, the system displays the current date.
Currency	Displays the currency code in which the Vault Teller deals.
Total Cash	Specify the total cash for a particular currency, physically present in the bank Vault Teller, at the end of the current posting date.
Cash Available	Displays the system calculated cash for a particular currency, which is available in the Vault Teller at the end of the current posting date. NOTE: The amount displayed in this column depends on the cash transactions that were carried out by the Teller until the last posting date.

Click **Submit** to update the cash balance and close the vault batch for the posting date.

NOTE: If there is any overage or shortage, the system displays an error message stating that the cash not balanced for the Teller ID. Also, if any of the conditions mentioned above fail, the system displays an appropriate error on submit.

2.4.10 Close Branch Batch

This screen is used to close the branch batch, after confirming that all the branch transactions have been accounted for in the account books. The posting date for closing a branch batch must be the same date on which the respective branch batch was opened. You need to close all the teller batches and the vault batches of the branch before closing the branch batch for that posting date. Archiving is done as a part of Close Branch Batch as per the archival days set up for the branch.

To process this screen, type **Close Branch Batch** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Branch Operations**, click **Close Branch Batch**.

→ The **Close Branch Batch** screen is displayed.

Figure 18: Close Branch Batch

Specify the details in the **Close Branch Batch** screen. For more information on fields, refer to table [Field Description: Close Branch Batch](#).

Field Description: Close Branch Batch

Field	Description
Posting Date	<p>Indicates the date on which the branch batch needs to be closed.</p> <p>NOTE: By default, the system displays the current date.</p>

Click **Submit** to close the branch batch for the specified posting date.

2.4.11 Book Shortage

The Teller or Vault Teller can use this screen to book the shortage if the actual or physical cash present is less than the system cash. While booking the shortage, the system lowers the cash balance to bring it in sync with the physical cash balance of the Teller by passing the difference to a cash shortage GL. After the system cash and the physical cash are synchronized, the Teller can perform the cash balancing and close the Teller/Vault Teller batch for the posting date.

To process this screen, type **Book Shortage** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Till-Vault Operations**, click **Book Shortage**.

→ The **Book Shortage** screen is displayed.

Figure 19: Book Shortage

The screenshot displays the 'Book Shortage' application window. At the top, the title bar reads 'Book Shortage'. Below the title bar, there are two main input sections. The first section is labeled 'Transaction Amount *' and contains a dropdown menu currently set to 'GBP' and an adjacent empty text input field. The second section is labeled 'Narrative *' and contains a text input field with the text 'Book Shortage' entered. Below these sections is a collapsed section titled 'Denomination' with a right-pointing arrow icon. At the bottom right of the window, there are two buttons: 'Submit' and 'Cancel'.

2.4.11.1 Main Transaction Details

Specify the details in the **Book Shortage** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Book Shortage](#).

Field Description: Book Shortage

Field	Description
Transaction Amount	<p>Displays the local currency of the branch.</p> <p>NOTE: The user can select another currency from the drop down values in which shortage amount is to be booked.</p> <p>Specify the amount that needs to be booked for shortage.</p>
Narrative	<p>Displays the default narrative Book Shortage and it can be modified.</p>

2.4.11.2 Denomination Details

Figure 20: Denomination Details

Denomination					
Bills			Coins		
Denom Code	Units	Value	Denom Code	Units	Value
No data to display.			No data to display.		
Total Cash Amount			Denomination Amount		
<div></div>			<div>GBP0.00</div>		

The **Denomination** segment is used to view the denominations maintained for the transaction currency and enter the denomination units. The denomination details for the withdrawal transactions (when cash is disbursed to the Customer) will be populated automatically based on the cash availability in the Teller's Till. For more information on fields, refer to table [Field Description: Denomination Details](#).

Field Description: Denomination Details

Field	Description
Denom Code	Displays the unique denomination codes for each currency.
Units	<p>Indicates the number of units for the specified denomination.</p> <p>NOTE: By default, the till contents are incremented for inflow transactions such as cash deposits and decremented for outflow transactions such as cash withdrawal. To reverse the transaction, you can specify units in negative.</p>
Value	<p>Displays the system-computed face value of the denomination based on the number of units.</p> <p>NOTE: For example, if the denomination code represents USD 100 and the unit is specified as 3, the value will be displayed as 300.</p>
Denomination Amount	<p>Displays the system-computed value of the denomination by multiplying the denomination value with the number of units.</p> <p>NOTE: For example, if the denomination code represents USD 100 and the number of units is 10, the denomination amount will be 1000.</p>
Total Cash Amount	<p>Displays the total cash amount.</p> <p>NOTE: The system computes the Denomination Amount and validates if it is equal to the Total Cash Amount. It also prompts error during saving if there is any difference.</p>

2.4.11.3 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any warning raised when the transaction saves. On transaction completion, the system reduces the cash balance by this transaction amount to synchronize with physical cash held with Teller.

2.4.12 Book Overage

The Teller or Vault Teller can use this screen to book the physical cash held in a particular currency, which exceeds the cash in that currency shown in the system. While booking a cash overage, the system passes the difference to a cash overage liability GL and increases the cash balance, and brings it to synchronize with the physical balance with the Teller. After the system cash and the physical cash are synchronized, the Teller can perform the cash balancing and close the Teller/Vault Teller batch for the posting date.

To process this screen, type **Book Overage** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Till-Vault Operations**, click **Book Overage**.

→ The **Book Overage** screen is displayed.

Figure 21: Book Overage

2.4.12.1 Main Transaction Details

Specify the details in the **Book Overage** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Book Overage](#).

Field Description: Book Overage

Field	Description
Transaction Amount	<p>Displays the local currency of the branch.</p> <p>NOTE: The user can select another currency from the drop-down values in which shortage amount is to be booked.</p> <p>Specify the amount that needs to be booked for overage.</p>
Narrative	<p>Displays the default narrative Book Overage and it can be modified.</p>

2.4.12.2 Denomination Details

The **Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the denomination units. For more information on this segment, refer to the topic [2.4.11.2 Denomination Details](#) in this guide.

2.4.12.3 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any warning raised when the transaction saves. On transaction completion, the system increases the cash balance by this transaction amount to synchronize with physical cash held with Teller.

2.4.13 Teller Session

This section describes the various screens used to perform several transactions with the teller before leaving, all the transactions done by the customer is grouped under a single session. At the end of the session, teller accepts the cumulative amount (of all the transactions done in the session) from the customer. The screens are described in the following topics:

- [2.14.13.1 Start Teller Session](#)
- [2.4.13.2 Stop Teller Session](#)

2.4.13.1 Start Teller Session

The Teller can use this screen start the teller session for a customer. To process this screen, type **Start Teller Session** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Branch Operations**, click **Start Teller Session**.

→ The **Start Teller Session** screen is displayed.

2.4.13.2.5 Transaction Submission

1. Click **Submit** to complete the transaction.
→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

2.5 Till-Vault Operations

This section describes the various screens used to perform the Till Vault operations. The screens are described in the following sub-sections:

- [*2.5.1 Buy Cash from Currency Chest*](#)
- [*2.5.2 Sell Cash to Currency Chest*](#)
- [*2.5.3 Transfer Cash from Vault*](#)
- [*2.5.4 Transfer Cash to Vault from Till*](#)
- [*2.5.5 Transfer Cash from Till*](#)
- [*2.5.6 Transfer Cash to Till*](#)
- [*2.5.7 Denomination Exchange*](#)
- [*2.5.8 Interbranch Transactions*](#)

2.5.1 Buy Cash from Currency Chest

The Vault Teller can use this screen to get cash from the currency chest after opening the vault batch and deposit it into the vault. Once the cash is transferred from the currency chest, the system updates the cash position.

To process this screen, type **Buy Cash from Ccy Chest** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Till-Vault Operations**, click **Buy Cash from Ccy Chest**.

→ The **Buy Cash from Currency Chest** screen is displayed.

Figure 29: Buy Cash from Currency Chest

2.5.1.1 Main Transaction Details

Specify the details in the **Buy Cash from Currency Chest** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Buy Cash from Currency Chest](#).

Field Description: Buy Cash from Currency Chest

Field	Description
Total Required Cash	Specify the total cash that you need to buy from Currency Chest. NOTE: By default, the system displays the local currency of the branch. You can select another currency from the drop-down values in which cash needs to be bought from the currency chest.
Narrative	Displays the default narrative Buy Cash from Currency Chest and it can be modified.

2.5.1.2 Denomination Details

The **Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the denomination units. For more information on this segment, refer to the topic [2.4.11.2 Denomination Details](#) in this guide.

2.5.1.3 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any warning raised when the transaction saves. On transaction completion, the cash balance of the Vault Teller is updated successfully.

2.5.2 Sell Cash to Currency Chest

The Vault Teller can use this screen to sell cash to the Central Bank from the vault after all the Tellers have sold the additional cash to the Vault Teller. The Vault Teller can close the batch only if the excess cash is not available at the end of the day.

To process this screen, type **Sell Cash to Ccy Chest** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Till-Vault Operations**, click **Sell Cash to Ccy Chest**.

→ The **Sell Cash to Currency Chest** screen is displayed.

Field Description: Sell Cash to Currency Chest

Field	Description
Total Required Cash	Specify the total cash that you need to sell to the Currency Chest. NOTE: By default, the system displays the local currency of the branch. The user can select another currency from the drop-down values in which cash needs to be sold to the currency chest.
Narrative	Displays the default narrative Sell Cash to Currency Chest and it can be modified.

2.5.2.2 Denomination Details

The **Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the denomination units. For more information on this segment, refer to the topic [2.4.11.2 Denomination Details](#) in this guide.

2.5.2.3 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any warning raised when the transaction saves. On transaction completion, the cash balance of the Vault Teller is updated successfully.

2.5.3 Buy Cash from Vault

The Teller can use this screen to get cash from the vault. To process this screen, type **Buy Cash from Vault** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Till-Vault Operations**, click **Buy Cash from Vault**.

→ The **Buy Cash from Vault** screen is displayed.

Figure 31: Buy Cash from Vault

2.5.3.1 Main Transaction Details

Specify the details in the **Buy Cash from Vault** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Buy Cash from Vault](#).

Field Description: Buy Cash from Vault

Field	Description
Total Required Cash	Specify the total cash that you need to transfer from the vault to the till of the logged-in Teller. NOTE: By default, the system displays the local currency of the branch. The user can select another currency from the drop-down values in which cash needs to be transferred from the vault.
Narrative	Displays the default narrative Transfer Cash from Vault and it can be modified.

2.5.3.2 Denomination Details

The **Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the denomination units. For more information on this segment, refer to the topic [2.4.11.2 Denomination Details](#) in this guide.

2.5.3.3 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any warning raised when the transaction saves. On transaction completion, the cash positions of the Teller and the Vault Teller are updated successfully.

NOTE: If the cash position of the Vault Teller is less than the total cash requested by the Teller, the system displays an error message and the Teller need to perform this transaction after the vault is replenished sufficiently.

2.5.4 Sell Cash to Vault

The Teller can use this screen to sell cash to the vault. It is used only when the cash held exceeds the limit set at the template level for any currency. For transferring cash to vault, the Teller batch and the Vault batch need to be opened for the posting date.

To process this screen, type **Sell Cash to Vault** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Till-Vault Operations**, click **Sell Cash to Vault**.

→ The **Sell Cash to Vault** screen is displayed.

Figure 32: Sell Cash to Vault

2.5.4.1 Main Transaction Details

Specify the details in the **Sell Cash to Vault** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Sell Cash to Vault](#).

Field Description: Sell Cash to Vault

Field	Description
Total Required Cash	Specify the total cash that you need to transfer to the vault from the till of the logged-in Teller. NOTE: By default, the system displays the local currency of the branch. The user can select another currency from the drop-down values in which cash needs to be transferred to the vault.
Narrative	Displays the default narrative Transfer Cash to Vault and it can be modified.

2.5.4.2 Denomination Details

The **Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the denomination units. For more information on this segment, refer to the topic [2.4.11.2 Denomination Details](#) in this guide.

2.5.4.3 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any warning raised when the transaction saves. On transaction completion, the cash balance of the Teller and Vault Teller gets updated successfully.

2.5.5 Buy Cash from Till

The Teller can use this screen to transfer cash from another Teller in case of insufficient funds available in the till to perform the customer cash transactions. Teller can request for the required cash in a specific currency, and on completing this transaction, the system updates the cash position of both the Tellers to the extent of transaction amount.

To process this screen, type **Buy Cash from Till** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Till-Vault Operations**, click **Buy Cash from Till**.

→ The **Buy Cash from Till** screen is displayed.

2.5.5.1 Main Transaction Details

Specify the details in the **Buy Cash from Till** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Buy Cash from Till](#).

Field Description: Buy Cash from Till

Field	Description
Teller ID	Displays the Teller ID from where the cash needs to be transferred.
Total Required Cash	Specify the total cash that you need to transfer from the specified Teller ID to the till of logged-in Teller. NOTE: By default, the system displays the local currency of the branch. You can select another currency from the drop-down values in which cash needs to be transferred.
Narrative	Displays the default narrative Transfer Cash from Till and it can be modified.

2.5.5.2 Denomination Details

The **Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the denomination units. For more information on this segment, refer to the topic [2.4.11.2 Denomination Details](#) in this guide.

2.5.5.3 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any warning raised when the transaction saves. On transaction completion, the cash balance of both the Tellers are updated successfully.

2.5.6 Sell Cash to Till

The Teller can use this screen to transfer cash to another Teller in case of excess funds available in his Till. In addition, the Teller can request to transfer from the Till in a specific currency. Once the transaction is completed, the system updates the cash position of both the Tellers to the extent of transaction amount.

To process this screen, type **Sell Cash to Till** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Till-Vault Operations**, click **Sell Cash to Till**.

→ The **Sell Cash to Till** screen is displayed.

Figure 34: Sell Cash to Till

2.5.6.1 Main Transaction Details

Specify the details in the **Sell Cash to Till** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Sell Cash to Till](#).

Field Description: Sell Cash to Till

Field	Description
Teller ID	Displays the Teller ID from which the cash needs to be transferred.

Field	Description
Total Required Cash	Specify the total cash that you need to transfer to the specified Teller ID from the till of the logged-in Teller. NOTE: By default, the system displays the local currency of the branch. The user can select another currency from the drop-down values in which the cash needs to be transferred.
Narrative	Displays the default narrative Transfer Cash to Till and it can be modified.

2.5.6.2 Denomination Details

The **Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the denomination units. For more information on this segment, refer to the topic [2.4.11.2 Denomination Details](#) in this guide.

2.5.6.3 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any warning raised when the transaction saves. On transaction completion, the cash balance of both the Tellers are updated successfully.

2.5.7 Denomination Exchange

The Teller can use this screen to exchange the currency denominations. The exchange can be performed for internal purpose of the bank or based on the customer's request. This transaction involves only denomination exchange from the Till. The total value in the Till remains the same, and accounting entries are not posted for this exchange. However, the denomination count in the Till changes and hence it needs to be updated.

To process this screen, type **Denomination Exchange** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Till-Vault Operations**, click **Denomination Exchange**.

→ The **Denomination Exchange** screen is displayed.

Figure 35: Denomination Exchange

2.5.7.1 Main Transaction Details

Specify the details in the **Denomination Exchange** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Denomination Exchange](#).

Field Description: Denomination Exchange

Field	Description
Branch Code	Displays the logged-in branch code.
Transaction Currency	Specify the currency for which the denominations to be exchanged.

2.5.7.2 Denomination Details

The **Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the denomination units. For more information on this segment, refer to the topic [2.4.11.2 Denomination Details](#) in this guide.

2.5.7.3 Transaction Submission

1. Click **Submit** to complete the transaction.

A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any warning raised when the transaction saves. On transaction completion, the cash balance of both the Tellers are updated successfully.

2.5.8 Interbranch Transactions

This screen is used to send a request from a bank branch to the central cash depository, for pickup or delivery of cash. A branch requests delivery of cash when it is having a shortage of cash and request for pickup of cash when it has excess cash. The process steps to request cash delivery and pickup are explained below.

Process for Cash Delivery:

1. The requesting branch sends a request for delivery of cash using 1409 screen.
2. The remitting branch queries for the requests, and accepts the request using 1409 screen.
3. On the delivery date, the remitting branch books a transaction using 1410 screen with the denominations being sent and generates.
4. On the delivery date, the remitting branch books a transaction input using 1410 screen, generates advices, and sends money to the requesting branch.
5. On receiving money and advice, the requesting branch uses 1411 screen to verify the denominations and saves the liquidation.

Process for Cash Pickup:

1. The requesting branch sends a request for the pickup of cash using 1409 screen.
2. The receiving branch queries for the requests and accepts the request using 1409 screen.
3. On the date of cash pickup, the receiving branch generates an advice and sends to requesting branch.
4. The requesting branch receives the advice, and books transaction using 1410 screen.

5. The requesting branch generates the advice, and sends money and advice to the receiving branch.
6. The receiving branch receives the money and advice, and verifies and liquidates the request using 1411 screen.

2.5.8.1 Interbranch Transaction Request

This screen is used to create the inter-branch cash pickup or cash delivery requests. To process this screen, type **Inter Branch Txn Req** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Till-Vault Operations**, click **Inter Branch Txn Req**.

→ The **Interbranch Transaction Request** screen is displayed.

Narrative	Specify the remarks, if any.

2.5.8.1.2 Denomination Details

The **Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the denomination units. For more information on this segment, refer to the topic [2.4.11.2 Denomination Details](#) in this guide.

2.5.8.1.3 Transaction Submission

Click **Submit** to send the request to the receiving/remitting branch for further processing. The destination branch can access the same screen to accept or reject the request.

2.5.8.2 Interbranch Transaction Input

This screen is used for a branch to act as a remitting branch to book an input transaction for cash delivery. It is also used for the branch to act as a receiving branch to generate the advice and send it to the requesting branch. This option is allowed only after the destination branch has accepted the Interbranch transaction request.

To process this screen, type **Inter Branch Txn Input** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Till-Vault Operations**, click **Inter Branch Txn Input**.

→ The **Inter Branch Transaction Input** screen is displayed.

2.6.1 Cash Deposit

This screen is used to deposit the cash in a CASA. Cash can be deposited in either account currency or any foreign currency that is allowed. Whenever any transaction in foreign currency is posted to the account, it is converted to the account currency based on the maintained exchange rate for the transaction.

To process this screen, type **Cash Deposit** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Customer Transaction**, click **Cash Deposit**.

→ The **Cash Deposit** screen is displayed.

Figure 39: Cash Deposit

The screenshot displays the 'Cash Deposit' screen with the following fields and controls:

- Account Number ***: A text input field.
- Transaction Amount ***: A dropdown menu showing 'GBP' and an adjacent text input field.
- Exchange Rate**: A text input field with up and down arrow buttons.
- Account Amount**: A text input field.
- Total Charge Amount**: A text input field showing 'GBP0.00'.
- Narrative ***: A text input field containing 'Cash Deposit'.
- Charge Details**: A section header with a right-pointing triangle icon.
- Denomination**: A section header with a right-pointing triangle icon.
- Submit** and **Cancel**: Two buttons at the bottom right.

2.6.1.1 Main Transaction Details

Specify the details in the **Cash Deposit** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Cash Deposit](#).

Field Description: Cash Deposit

Field	Description
Account Number	<p>Specify a valid account number the customer. When you press Tab key, the corresponding account information will be displayed in the Customer Information widget.</p> <p>NOTE: In addition, you can use Oracle Banking Virtual Accounts. These Virtual Accounts are used as a routing account to credit the underlying physical account.</p>
Transaction Amount	<p>Displays the local currency of the branch. You can also select other transaction currency from the drop down values. Specify the transaction amount that need to be credited to the customer account.</p>
Exchange Rate	<p>Displays the exchange rate used to convert the transaction currency into account currency and it can be modified.</p> <p>NOTE: If the transaction currency is the same as the account currency, the system displays the exchange rate as 1. This field is displayed only if Multi Currency Configuration at Function Code Indicator level is set as Y.</p>
Account Amount	<p>Displays the transaction amount converted in terms of account amount based on the exchange rate.</p> <p>NOTE: This field is displayed only if Multi Currency Configuration at Function Code Indicator level is set as Y.</p>

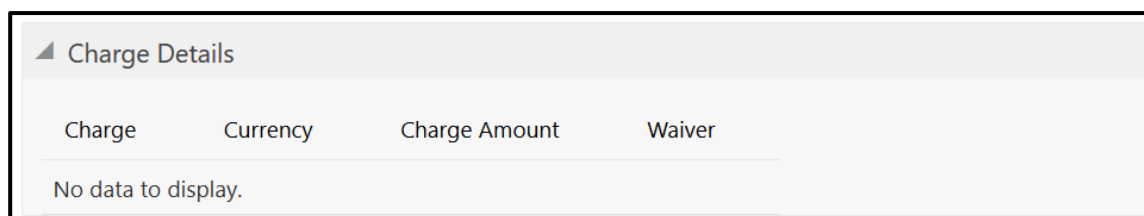

Field	Description
Total Charge Amount	Displays the total charge amount, which is computed by the system in local currency of the branch. NOTE: This field is displayed only if Total Charges Configuration at Function Code Indicator level is set as Y.
Narrative	Displays the default narrative Cash Deposit and it can be modified.

2.6.1.2 Denomination Details

The **Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the denomination units. For more information on this segment, refer to the topic [2.4.11.2 Denomination Details](#) in this guide.

2.6.1.3 Charge Details

Figure 40: Charge Details

Charge Details			
Charge	Currency	Charge Amount	Waiver
No data to display.			

The **Charge Details** segment is used to view the computed charge details based on the charge maintenance defined for the function code. This segment is applicable for all Financial Customer transactions. If no charge is maintained for the combination, then transaction is saved without any charges.

You can waive the computed charges. For more information on fields, refer to table [Field Description: Charge Details](#).

Field Description: Charge Details

Field	Description
Charge	The system defaults the charge components applicable to the transaction.
Currency	Displays the currency in which the charge has to be deducted.
Charge Amount	Displays the charge amount that needs to be deducted for the corresponding charge component.
Waiver	If necessary, check this box against the charge component to waive a certain charge for the customer.

2.6.1.4 Transaction Submission

Click **Submit** to complete the transaction. Once you **Submit** the transaction, system validates the following:

- Mandatory fields
- Allowed Min/Max limit amount for the User ID
- Allowed currency for Teller User ID
- Till Balance and Branch Breaching Limit
- Function Code preferences
- Duplicate transactions

If any of the validation fails, system will prompt an appropriate information, warning or error message. For more information, refer to the following steps:

- If information message is prompted, click **OK** to confirm and complete the transaction.
- If warning message is prompted, system will move the transaction for authorization. Once approved, the transaction is moved to Teller **Electronic Journal** for completion. Refer Authorization Procedures to know more on authorization processing.
- If error message is prompted, the transaction is discarded and do not get saved.

- If you click **Close** or **Cancel** after specifying the transaction details, then the data will not persist.

When the Teller completes the transaction, the corresponding teller cash position is updated.

→ The **Transaction Completed Successfully** information message is displayed.

2.6.2 Cash Withdrawal

This screen is used to withdraw funds from CASA account of the customer. The withdrawal is subject to the availability of sufficient balance or available credit limit. When the transaction is performed, it updates the available balance in the CASA account immediately.

To process this screen, type **Cash Withdrawal** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Customer Transaction**, click **Cash Withdrawal**.

→ The **Cash Withdrawal** screen is displayed.

Figure 41: Cash Withdrawal

The screenshot displays the 'Cash Withdrawal' screen with the following fields and controls:

- Account Number ***: A text input field.
- Transaction Amount ***: A dropdown menu showing 'GBP' and an adjacent text input field.
- Exchange Rate**: A text input field with up and down arrow buttons.
- Account Amount**: A text input field.
- Total Charge Amount**: A text input field displaying 'GBP0.00'.
- Narrative ***: A text input field containing 'Cash Withdrawal'.
- Charge Details**: A section header with a right-pointing triangle icon.
- Denomination**: A section header with a right-pointing triangle icon.
- Submit** and **Cancel**: Two green buttons at the bottom right.

2.6.2.1 Main Transaction Details

Specify the details in the **Cash Withdrawal** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Cash Withdrawal](#).

Field Description: Cash Withdrawal

Field	Description
Customer Account	Specify a valid customer account number. When you press Tab key, the corresponding account information will be displayed in the Customer Information widget.
Transaction Amount	Displays the local currency of the branch. The user can select another currency from the drop-down values. Specify the transaction amount that needs to be debited from the customer account.
Exchange Rate	Displays the exchange rate used to convert the transaction currency into account currency and it can be modified. NOTE: If the transaction currency is the same as the account currency, the system displays the exchange rate as 1. This field is displayed only if Multi Currency Configuration at Function Code Indicator level is set as Y .
Account Amount	Displays the transaction amount converted in terms of account amount based on the exchange rate. NOTE: This field is displayed only if Multi Currency Configuration at Function Code Indicator level is set as Y .
Total Charge Amount	Displays the total charge amount, which is computed by the system in local currency of the branch.

Field	Description
	NOTE: This field is displayed only if Total Charges Configuration at Function Code Indicator level is set as Y.
Narrative	Displays the default narrative Cash Withdrawal and it can be modified.

2.6.2.2 Denomination Details

The **Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the denomination units. For more information on this segment, refer to the topic [2.4.11.2 Denomination Details](#) in this guide.

2.6.2.3 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

2.6.2.4 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any approval warning raised when the transaction saves. On transaction completion, the cash is withdrawn successfully from the customer account. For more information on transaction submission and validations, refer to the topic [2.6.1.4 Transaction Submission](#) in this guide.

2.6.3 Cheque Withdrawal

This screen is used to withdraw cash from CASA account of the customer against the in-house cheque. The withdrawal is subject to availability of sufficient balance or available credit limit. To verify the signature for the transactions, you can click **Verify** button in **Customer Information Widget**. The signature verification is applicable for the transactions, which have the **Signature Verification Required** option selected as Y at the Function Code Preference level.

To process this screen, type **Cheque Withdrawal** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Customer Transaction**, click **Cheque Withdrawal**.

→ The **Cheque Withdrawal** screen is displayed.

Figure 42: Cheque Withdrawal

The screenshot displays the 'Cheque Withdrawal' screen. At the top, there is a header bar with a back arrow and the title 'Cheque Withdrawal'. Below this, the screen is divided into two main columns of input fields. The left column contains 'Account Number *', 'Cheque Number *', 'Exchange Rate' (with up/down arrows), and 'Narrative *' (containing the text 'Cheque Withdrawal'). The right column contains 'Transaction Amount *' (with a currency dropdown set to 'GBP'), 'Cheque Date *' (set to 'Mar 26, 2020' with a calendar icon), and 'Account Amount'. At the bottom of the screen, there are two expandable sections: 'Charge Details' and 'Denomination'. In the bottom right corner, there are two buttons: 'Submit' and 'Cancel'.

2.6.3.1 Main Transaction Details

Specify the details in the **Cheque Withdrawal** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Cheque Withdrawal](#).

Field Description: Cheque Withdrawal

Field	Description
Account Number	Specify a valid account number the customer. When you press Tab key, the corresponding account information will be displayed in the Customer Information widget.
Transaction Amount	<p>Displays the local currency of the branch. You can select another currency from the drop-down list.</p> <p>Specify the transaction amount that needs to be debited from the customer account.</p>
Cheque Number	Specify the cheque number of the customer account as provided by the Customer.
Cheque Date	Select the date on which cheque has been issued from the calendar option.
Exchange Rate	<p>Displays the exchange rate used to convert the transaction currency into account currency and it can be modified.</p> <p>NOTE: If the transaction currency is the same as the account currency, the system displays the exchange rate as 1. This field is displayed only if Multi Currency Configuration at Function Code Indicator level is set as Y.</p>
Account Amount	<p>Displays the transaction amount converted in terms of account amount based on the exchange rate.</p> <p>NOTE: This field is displayed only if Multi Currency Configuration at Function Code Indicator level is set as Y.</p>

Field	Description
Narrative	Displays the default narrative Cash Withdrawal and it can be modified.

2.6.3.2 Denomination Details

The **Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the denomination units. For more information on this segment, refer to the topic [2.4.11.2 Denomination Details](#) in this guide.

2.6.3.3 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

2.6.3.4 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any approval warning raised when the transaction saves. On transaction completion, the cash is withdrawn successfully against the customer cheque. For more information on transaction submission and validations, refer to the topic [2.6.1.4 Transaction Submission](#) in this guide.

2.6.4 Foreign Exchange (FX) Sale Against Account

This screen is used to sell the foreign currency from the branch through the CASA account. It is performed by debiting the corresponding account currency from the CASA account.

To process this screen, type **FX Sale - Account** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Customer Transaction**, click **FX Sale - Account**.

→ The **FX Sale Against Account** screen is displayed.

2.6.4.1 Main Transaction Details

Specify the details in the **FX Sale Against Account** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: FX Sale Against Account](#).

Field Description: FX Sale Against Account

Field	Description
Account Number	Specify the CASA account to be debited for the foreign currency sale from the adjacent option list.
Amount Sold	Specify the currency and amount sold against the CASA account. You can select the appropriate code from the adjoining option list that displays all the currency codes maintained in the system. The system also displays the amount that is being sold.
Beneficiary Name	Displays the name of the beneficiary customer based on the account number selected.
Address Line 1 to Address Line 4	Displays the address of the beneficiary.
Identification Type	Select the type of identification provided by the customer from the drop-down list.
Identification Number	Specify the identification number provided by the customer.
Exchange Rate	Displays the exchange rate used to convert the transaction (sale) currency into account currency and it can be modified. NOTE: This field is displayed only if Multi Currency Configuration at Function Code Indicator level is set as Y.
Amount Received	Displays the amount received from the CASA account.

Field	Description
	NOTE: The currency of the amount received is defaulted from the CASA account currency. The amount received will be calculated based on the Amount Sold and the Exchange Rate . This field is displayed only if Multi Currency Configuration at Function Code Indicator level is set as Y .
Total Charges	Displays the total charge amount which is computed by the system in local currency of the branch. NOTE: This field is displayed only if Total Charges Configuration at Function Code Indicator level is set as Y .
Narrative	Displays the default narrative FX Sale Against Account and it can be modified.

2.6.4.2 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

2.6.4.3 FX Out Denomination Details

The **FX Out Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the FX denomination units. The currency code and corresponding denomination codes will be defaulted based on Currency Sold. For more information on this segment, refer to the topic [2.4.11.2 Denomination Details](#) in this guide.

2.6.4.4 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any approval warning raised when the transaction saves. On transaction completion, the FCY cash is withdrawn and the equivalent account amount is debited. For more information on transaction submission and validations, refer to the topic [2.6.1.4 Transaction Submission](#) in this guide.

2.6.5 FX Sale Against Walk-in

This screen is used to sell a foreign currency to a walk-in customer in return for the equivalent amount received in another currency.

To process this screen, type **FX Sale - Walk-in** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Customer Transaction**, click **FX Sale - Walk-in**.

→ The **FX Sale Against Walk-in** screen is displayed.

Narrative	Displays the default narrative FX Purchase Against Account and it can be modified.

2.6.6.2 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

2.6.6.3 FX In Denomination Details

The **FX In Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the FX In denomination units. The currency code and corresponding denomination codes will be defaulted based on Currency Bought. For more information on this segment, refer to the topic [2.4.11.2 Denomination Details](#) in this guide.

2.6.6.4 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any approval warning raised when the transaction saves. On transaction completion, the teller cash position gets incremented based on the amount bought.

In addition, the corresponding FCY cash is deposited for an equivalent amount credit in the Customer account. For more information on transaction submission and validations, refer to the topic [2.6.1.4 Transaction Submission](#) in this guide.

2.6.7 FX Purchase Against Walk-in

This screen is used to buy a foreign currency from a walk-in customer in return for the equivalent amount in another currency.

To process this screen, type **FX Purchase - Walk-in** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Customer Transaction**, click **FX Purchase - Walk-in**.

→ The **FX Purchase Against Walk-in** screen is displayed.

Figure 46: FX Purchase Against Walk-in

The screenshot shows the 'FX Purchase Against Walk-in' screen. It features a form with the following fields and sections:

- Amount Bought ***: A dropdown menu set to 'GBP' and a text input field.
- Currency Paid ***: A search-enabled text input field.
- Beneficiary Name ***: A text input field.
- Beneficiary Address 1**: A text input field.
- Beneficiary Address 2**: A text input field.
- Beneficiary Address 3**: A text input field.
- Beneficiary Address 4**: A text input field.
- Identification Number**: A text input field.
- Identification Type**: A dropdown menu with 'Select' as the current value.
- Exchange Rate**: A text input field with up and down arrow buttons.
- Amount Paid**: A text input field.
- Total Charges**: A text input field showing 'GBP0.00'.
- Narrative ***: A text input field containing 'FX Purchase Against Walk-in'.
- Charge Details**: An expandable section.
- FX In Denomination Details**: An expandable section.
- FX Out Denomination Details**: An expandable section.
- Submit** and **Cancel** buttons at the bottom right.

2.6.7.1 Main Transaction Details

Specify the details in the **FX Purchase Against Walk-in** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: FX Purchase Against Walk-in](#).

Field Description: FX Purchase Against Walk-in

Field	Description
Amount Bought	Select the applicable currency from the drop-down list and specify the amount that is bought from the walk-in customer.
Currency Paid	Select the currency that you have paid to the walk-in customer. You can select the appropriate code from the adjoining option list that displays all the currency codes maintained in the system.
Beneficiary Name	Specify the name of the beneficiary walk-in customer.
Beneficiary Address 1 to Beneficiary Address 4	Specify the address of the beneficiary walk-in customer.
Identification Type	Select the type of identification provided by the walk-in customer from the drop-down list.
Identification Number	Specify the identification number provided by the walk-in customer.

Narrative	Displays the default narrative Close Out Withdrawal by Cash and it can be modified.

2.6.8.2 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

2.6.8.3 Denomination Details

The **Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the denomination units. For more information on this segment, refer to the topic [2.4.11.2 Denomination Details](#) in this guide.

2.6.8.4 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated, and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any approval warning raised when the transaction saves. On transaction submission, the transaction details are handed off to UBS CASA module in the Oracle FLEXCUBE Universal Banking for account closure process.

2.6.9 Close Out Withdrawal

This screen is used to initiate an account closure and close the CASA account by dispersing the amount either to account or issuing a bankers cheque. To process this screen, type **Close Out Withdrawal** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Customer Transaction**, click **Closure - Account**.

→ The **Close Out Withdrawal** screen is displayed.

Close Out Withdrawal by Bankers Cheque:

Figure 48: Close Out Withdrawal by Bankers Cheque

The screenshot shows the 'Credit out Withdrawal' form. The form is divided into two main columns of input fields. The left column includes: 'Account Number *' (text input), 'Account Amount' (text input), 'Issue Branch' (text input), 'Instrument Number' (text input), 'Payable Branch *' (text input), 'Address Line 1' (text input), 'Address Line 3' (text input), 'Exchange Rate' (text input with up/down arrows), and 'Narrative *' (text input with 'BC Withdrawal' pre-filled). The right column includes: 'Fetch Balance' (button), 'Close Mode *' (dropdown menu with 'Bankers Cheque' selected), 'BC Amount' (text input with 'GBP' dropdown), 'MICR Number' (text input), 'Payee Name *' (text input), 'Address Line 2' (text input), 'Address Line 4' (text input), and 'Total Charge Amount' (text input). At the bottom, there is a 'Charge Details' section with a right-pointing arrow, and 'Submit' and 'Cancel' buttons.

2.6.9.1 Main Transaction Details (Bankers Cheque)

Specify the details in the **Close Out Withdrawal** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Close Out Withdrawal by Cash](#).

Field Description: Close Out Withdrawal by Cash

Field	Description
Account Number	Specify the account number for which the account closure to be requested.
Account Amount	Displays the account balance in account currency.
Fetch Balance	Click this icon to fetch the account balance details.
Close Mode	Select the close mode as Bankers Cheque .
Bankers Cheque Details	Specify the fields under this segment.
Issue Branch	Displays the issuing branch of the bankers cheque.
BC Amount	Displays the account currency and account balance. You can also modify the account currency.
Instrument Number	Specify the instrument number.
MICR Number	Specify the MICR number.
Payable Branch	Specify the payable branch.
Payee Name	Specify the payee name.
Address Line 1 to Address Line 4	Specify the address of the payee.

Field	Description
Exchange Rate	<p>Displays the exchange rate used to convert the transaction currency into account currency and it can be modified.</p> <p>NOTE: This field is displayed only if Multi Currency Configuration at Function Code Indicator level is set as Y.</p>
Total Charge Amount	<p>Displays the total charge amount, which is computed by the system in local currency of the branch.</p> <p>NOTE: This field is displayed only if Total Charges Configuration at Function Code Indicator level is set as Y.</p>
Narrative	<p>Displays the default narrative BC Withdrawal and it can be modified.</p>

2.6.9.2 Main Transaction Details (Account Transfer)

Specify the details in the **Close Out Withdrawal** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Close Out Withdrawal by Cash](#).

Field Description: Close Out Withdrawal by Account Transfer

Field	Description
Account Number	Specify the account number for which the account closure to be requested.
Account Amount	Displays the account balance in account currency.

Field	Description
Fetch Balance	Click this icon to fetch the account balance details.
Close Mode	Select the close mode as Bankers Cheque .
Payment Details	Specify the fields under this segment.
Offset Account	Specify the account number to which the funds needs to be transferred during the account closure.
Account Branch	Displays the branch code of the offset account.
Account Name	Displays the name of the offset account.
Offset Account Amount	Displays the offset account amount along with account currency.
Exchange Rate	<p>Displays the exchange rate based on the Account Currency and Offset Account Currency, and it can be modified.</p> <p>NOTE: This field is displayed only if Multi Currency Configuration at Function Code Indicator level is set as Y.</p>
Total Charge Amount	<p>Displays the total charge amount, which is computed by the system in local currency of the branch.</p> <p>NOTE: This field is displayed only if Total Charges Configuration at Function Code Indicator level is set as Y.</p>
Narrative	Displays the default narrative Close Out Withdrawal by Account and it can be modified.

2.6.9.3 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide. This segment is not applicable to Close Out Withdrawal by Account Transfer mode.

2.6.9.4 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated, and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any approval warning raised when the transaction saves. On transaction submission, the transaction details are handed off to UBS CASA module in the Oracle FLEXCUBE Universal Banking for account closure process.

2.6.10 Safe Deposit Rental By Cash

The Teller can use this screen to make payment for the safe deposit locker of the customer. To process this screen, type **Safe Deposit Rental By Cash** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Customer Transactions**, click **Safe Deposit Rental By Cash**.

→ The **Safe Deposit Rental By Cash** screen is displayed.

2.6.10.1 Main Transaction Details

Specify the details to fetch the records. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Safe Deposit Rental By Cash](#).

Field Description: Safe Deposit Rental By Cash

Field	Description
Deposit Locker	Specify the deposit locker number. When you press Tab key, the customer details and deposit locker details will be displayed in the Customer Information widget.
Rental Amount	<p>Select the rental amount currency and specify the amount.</p> <p>NOTE: By default, the rental currency is displayed as locker currency. If the Multi Currency Configuration at Function Code indicator level is set as Y, it can be modified, and if it is N, then the default value cannot be modified.</p>
Exchange Rate	<p>Displays the exchange rate.</p> <p>NOTE: If the transaction currency is same as the account currency, the system displays the exchange rate as 1. This field is displayed only if Multi Currency Configuration at Function Code indicator level is set as Y.</p>
Total Charge Amount	<p>Displays the total charges in branch local currency.</p> <p>NOTE: This field is displayed only if Total Charges Configuration at Function Code indicator level is set as Y.</p>

Field	Description
Account Amount	Displays the rental amount in locker account currency. This amount will be derived based on the Rental Amount and Exchange Rate . NOTE: This field is displayed only if Multi Currency Configuration at Function Code indicator level is set as Y.
Narrative	Displays the narrative as Safe Deposit Rental By Cash and it can be modified.

2.6.10.2 Denomination Details

The **Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the denomination units. For more information on this segment, refer to the topic [2.4.11.2 Denomination Details](#) in this guide.

2.6.10.3 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any approval warning raised when the transaction saves. On transaction completion, the system will handoff the details to UBS system to create 'Payment' transaction in SD module. After the handoff status is success in the OBREMO, the system will update the transaction status as **Completed** and update the Till cash position (by increasing the till balance).

2.6.11 RD Payment by Cash

This screen is used to make payment against the Recurring Deposit (RD) account of the customer. To process this screen, type **RD Payment – Cash** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Customer Transaction**, click **RD Payment – Cash**.

→ The **Recurring Deposit Payment by Cash** screen is displayed.

2.6.11.1 Main Transaction Details

Specify the details in the **Recurring Deposit Payment by Cash** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Recurring Deposit Payment by Cash](#).

Field Description: Recurring Deposit Payment by Cash

Field	Description
RD Account	Specify a valid RD account number. When you press Tab key, the corresponding account information will be displayed in the Customer Information widget.
Transaction Amount	Displays the local currency of the branch. The user can select another currency from the drop-down values. Specify the payment amount.
Exchange Rate	Displays the exchange rate used to convert the transaction currency into account currency and it can be modified. NOTE: If the transaction currency is the same as the account currency, the system displays the exchange rate as 1. This field is displayed only if Multi Currency Configuration at Function Code Indicator level is set as Y .
Account Amount	Displays the transaction amount converted in terms of account amount based on the exchange rate. NOTE: This field is displayed only if Multi Currency Configuration at Function Code Indicator level is set as Y .
Total Charge Amount	Displays the total charge amount, which is computed by the system in local currency of the branch. NOTE: This field is displayed only if Total Charges Configuration at Function Code Indicator level is set as Y .
Narrative	Displays the default narrative RD Payment by Cash and it can be modified.

2.6.11.2 Denomination Details

The **Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the denomination units. For more information on this segment, refer to the topic [2.4.11.2 Denomination Details](#) in this guide.

2.6.11.3 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

2.6.11.4 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any approval warning raised when the transaction saves. On transaction completion, the cash is withdrawn successfully from the customer account. For more information on transaction submission and validations, refer to the topic [2.6.1.4 Transaction Submission](#) in this guide.

2.6.12 F23C Tax Payment By Cash

This screen is used to capture data related to F23C tax document for a customer and collect the corresponding tax by cash from the customer. To process this screen, type **F23C Tax Payment - Cash** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, navigate to left menu and click **Teller**. On Teller Mega Menu, under **Customer Transaction**, click **F23C Tax Payment - Cash**.

→ The **F23C Tax Payment By Cash** screen is displayed.

2.6.12.1 Main Transaction Details

Specify the details in the **F23C Tax Payment By Cash** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: F23C Tax Payment By Cash Screen](#).

Field Description: F23C Tax Payment By Cash Screen

Field	Description
Reference Number Type	<p>Select the reference number types from the drop-down list. The drop-down list shows following values:</p> <ul style="list-style-type: none"> • Reference Number Available • Reference Number Not Available
Reference Number	Specify the Reference Number of the payment provided by the Public Authority.
Office or Institute Code	Specify the office or institute code that receives the payment.
Office or Institute Sub code	Specify the office or institute sub code that receives the payment.
Litigation	Specify the kind of litigation.
For a Total Amount	Displays the total tax amount.
Total Charge	Displays the total charge amount, which is computed by the system in local currency of the branch.
Exchange Rate	Displays the exchange rate based on the Account Currency and Offset Account Currency.
Payment Amount	<p>Displays the amount paid by the customer.</p> <p>NOTE: The currency of the amount paid is defaulted from received currency.</p>
Narrative	Displays the default narrative F23 Tax by Cash and it can be modified.

2.6.12.2 Payment Data Details

Figure 53: Payment Data Details

Specify the details in the **Payment Data Details** segment. For more information on fields, refer to table [Field Description: Payment Data Details](#).

Field Description: Payment Data Details

Field	Description
Tax Code	Specify the Tax Code.
Amount	Specify the tax amount.
Beneficiary Code	Specify the beneficiary institute code.

2.6.12.3 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

2.6.12.4 Denomination Details

The **Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the denomination units. For more information on this segment, refer to the topic [2.4.11.2 Denomination Details](#) in this guide.

2.6.12.5 Transaction Submission

After you specify the **Reference Number**, click on the **Pickup** button. The system defaults the **Elaboration Date** in the section **Reference Number Available** with the current system date. In case you do not specify the **Reference Number**, then the **Principal Fiscal Code** needs to be specified. After which the system defaults the **Elaboration Date** in the section **Reference Number Not Available** with the current system date. It then adds up the Amounts in the **Payment Data Details** block and defaults the sum in the **For a total Amount** field. The system posts the following accounting entries on save and authorization of the record:

Accounting entries posted for the payment amount:

Dr/Cr	Description	Amount
Dr	Cash Account	For a Total Amount
Cr	Account maintained in ARC of the associated product	For a Total Amount

Accounting entries posted for the charge amount:

Dr/Cr	Description	Amount
Dr	Cash Account	Charges amount computed as per ARC maintenance
Cr	Account maintained in ARC of the associated product	Charges amount computed as per ARC maintenance

2.6.12.6 Validations

The following validations are performed by the system:

- The system allows you to maintain a minimum of one row and a maximum of eight rows in the **Payment Data Details** multi entry block. If you do not maintain the minimum row or exceed the maximum row, then the system displays an appropriate error message.

- If the **Principal Fiscal Code** and **Secondary Fiscal Code** fields have a value of 16 character that is for non-individual customers the system validates the last character in the value as per the checksum algorithm for Fiscal Code. If the validation fails, then the system displays an appropriate error message. In case of individual customers, where the **Principal Fiscal Code** and **Secondary Fiscal Code** field has a value of 11 character, the system validates the last character in the value as per the checksum algorithm for VAT number. If the validation fails, then the system displays an appropriate error message.
- The system validates only the data format of the fields specified.
- If the computed value for **Payment Amount** field value is less than or equal to 0, on pickup, the system displays an appropriate error message.

Once Pickup is completed, do the following step:

1. Click **Submit** to complete the transaction.
 - A Teller Sequence Number is generated, and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any approval warning raised when the transaction saves. On transaction submission, the deposit of tax amount is completed successfully.

2.6.13 F24C Tax Payment By Cash

This screen is used to capture data related to F24C tax document for a customer and collect the corresponding tax by cash from the customer. To process this screen, type **F24C Tax Payment - Cash** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, navigate to left menu and click **Teller**. On Teller Mega Menu, under **Customer Transaction**, click **F24C Tax Payment - Cash**.

→ The **F24C Payment Details** screen is displayed.

Debit Amount	Specify the amount to be paid.
Office Code	Specify the office code.
Document Code	Specify the document code.
Total Debit Amount	Displays the Total Amount to Pay.
Final Section Amount	Displays the Final Section Amount.

2.6.13.5 F24 Tax - By Cash (Predefined)

Specify the details in the F24 Tax – By Cash segment. Based on the Form Type selection, the input fields will be displayed on this segment.

Figure 65: F24 Predefined Details

The screenshot shows a web form titled "F24 Tax - By Cash". It has a "Form Type" dropdown set to "Predefined". Below this is the "F24 Predefined" section with fields for "Elaboration Date" (displaying "Mar 26, 2020"), "Secondary Fiscal Code", and "Total Final Payment". To the right are fields for "Principal Fiscal Code" (marked with an asterisk) and "Identity code secondary fiscal code". The "Final Payment Fields" section contains the "Erario Institution" field. The "Tax Details" section features a table with columns "Payment ID" and "Amount to Pay", currently showing "No data to display." with a pagination control. At the bottom are "Total Debit Amount" and "Final Section Amount" fields.

Specify the details in this segment. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: F24 Predefined](#).

Field Description: F24 Predefined

Field	Description
Form Type	Select the Predefined tax category from the adjoining drop-down list.
F24 Predefined	Specify the fields.
Elaboration Date	Displays the elaboration date
Principal Fiscal Code	Specify the debtor fiscal code. NOTE: For Individual customers, the allowed principal fiscal code is 16 characters and for non-individual customers, this will be 11-character VAT number.

Field	Description
Secondary Fiscal Code	Specify the secondary fiscal code. NOTE: For Individual customers, the allowed secondary fiscal code is 16 characters and for non-individual customers, this will be 11-character VAT number.
Identity Code Secondary Fiscal Code	Specify the Identity code secondary fiscal code.
Erario Institution	Displays the Erario Institution.
Payment ID	Specify the payment ID.
Amount to Pay	Specify the amount to be paid.
Total Debit Amount	Displays the Total Debit Amount.
Final Section Amount	Displays the Final Section Amount.

2.6.13.6 Transaction Submission

On selection of an appropriate value from the **Form Type**, only the corresponding tab will be enabled for input. For example, if you select **F24 Standard** as the Form Type then only the tab **F24 Standard** will be enabled and all other tabs will be disabled. The **Principal Fiscal Code** needs to be specified. After entering all the form details, user need to click on Refresh button in the **F24 Payment Details** block .It then adds up the Amounts and defaults the sum in the **Payment Amount** field. The system posts the following accounting entries on save and authorization of the record.

Accounting entries posted for the payment amount:

Dr/Cr	Description	Amount
Dr	Cash Account	Final Section Amount of the corresponding tab which has been entered.

Dr/Cr	Description	Amount
Cr	Account maintained in ARC of the associated product	Final Section Amount of the corresponding tab which has been entered.

Accounting entries posted for the charge amount:

Dr/Cr	Description	Amount
Dr	Cash Account	Charges amount computed as per ARC maintenance
Cr	Income Account	Charges amount computed as per ARC maintenance

2.6.13.7 Validations

The system validates only the data format of the fields specified. If any of such validations fail, the system displays an appropriate error message. If you maintain more than the specified number of rows in any of the below blocks then the system displays an appropriate error message. The following list shows the number of rows, which can be maintained for each Form Type:

- In **F24 Standard** tab, the system allows you to maintain only the following number of records:
 - up to a maximum of 6 rows in the **ERARIO** multi record block.
 - up to a maximum of 4 rows in the **INPS** multi record block.
 - up to a maximum of 4 rows in the **REGIONI** multi record block.
 - up to a maximum of 4 rows in the **IMU E ALTRI ENTI LOCALI** multi record block.
 - up to a maximum of 4 rows in the **INAIL** multi record block.
 - up to a maximum of 3 rows in the **ALTRI ENTI** multi record block.
 - up to a maximum of 7 rows in the **ACCISE** multi record block.
- In **F24 Simplified** tab up to a maximum of 10 rows in the **Tax Details** multi record block.

- In **F24 Elide** tab up to a maximum of 28 rows in the **Tax Details** multi record block.
- In **F24 Predefined** tab up to a maximum of 1 row in the **Tax Details** multi record block.

If the computed value for **Payment Amount** field value is less than or equal to 0, the system displays an appropriate error message. If the **Principal Fiscal Code** and **Secondary Fiscal Code** fields have, a value of 16, character that is for non-individual customers the system validates the last character in the value as per the checksum algorithm for **Fiscal Code**. If the validation fails, then the system displays an appropriate error message. In case of individual customers, where the **Principal Fiscal Code** and **Secondary Fiscal Code** field has a value of 11 character, the system validates the last character in the value as per the checksum algorithm for VAT number. If the validation fails, then the system displays an appropriate error message.

Once Pickup is completed, do the following step:

1. Click **Submit** to complete the transaction.
 → A Teller Sequence Number is generated, and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any approval warning raised when the transaction saves. On transaction submission, the deposit of tax amount is completed successfully.

2.6.14 F23 Tax Payment By Account

This screen is used to capture data related to F23 tax document for a customer and collect the corresponding tax by cash from the customer. To process this screen, type **F23 Tax Payment By Account** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, navigate to left menu and click **Teller**. On Teller Mega Menu, under **Customer Transaction**, click **F23 Tax Payment By Account**.

→ The **F23 Tax Payment By Account** screen is displayed.

2.6.14.1 Main Transaction Details

Specify the details in the **F23 Tax Payment By Account** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: F23 Tax Payment By Account](#).

Field Description: F23 Tax Payment By Account

Field	Description
Reference Number Type	<p>Select the reference number types from the drop-down list. The drop-down list shows following values:</p> <ul style="list-style-type: none"> • Reference Number Available • Reference Number Not Available
Reference Number	Specify the Reference Number of the payment provided by the Public Authority.
Office or Institute Code	Specify the office or institute code that receives the payment.
Office or Institute Sub code	Specify the office or institute sub code that receives the payment.
Litigation	Specify the kind of litigation.
For a Total Amount	Displays the total tax amount.
Total Charge	Displays the total charge amount, which is computed by the system in local currency of the branch.
Exchange Rate	Displays the exchange rate based on the Account Currency and Offset Account Currency.
Payment Amount	<p>Displays the amount paid by the customer.</p> <p>NOTE: The currency of the amount paid is defaulted from received currency.</p>
Narrative	Displays the default narrative F23 Tax by Account and it can be modified.

2.6.14.2 Account Details

Figure 67: Account Details

The screenshot shows a web form titled "Account Details". It contains the following fields:

- Account Number**: A text input field with a red asterisk indicating it is required.
- Branch**: A text input field.
- Account Description**: A text input field.
- Account Amount**: A text input field.
- Net Amount**: A text input field.

Specify the details in the **Account Details** segment. For more information on fields, refer to table [Field Description: Account Details](#).

Field Description: Account Details

Field	Description
Account Number	Specify the customer account number from which the tax is being paid.
Branch	Displays the branch code.
Account Description	Displays the description of the account number specified.
Account Amount	Displays the amount available in the account.
Net Amount	Displays the amount, which is the net of total amount levied to the customer.

2.6.14.3 Payment Data Details

Figure 68: Payment Data Details

Specify the details in the **Payment Data Details** segment. For more information on fields, refer to table [Field Description: Payment Data Details](#).

Field Description: Payment Data Details

Field	Description
Tax Code	Specify the Tax Code.
Amount	Specify the tax amount.
Beneficiary Code	Specify the beneficiary institute code.

2.6.14.4 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

2.6.14.5 Transaction Submission

After you specify the **Reference Number**, corresponding fields are displayed for user to input the details. Once you specify the Payment Details and click **Refresh**, the system computes the total amount, which can be with or without charges.

If the **Reference Number** is not specified, the relevant fields are displayed for input in the section **Reference Number Not Available**. Once you specify the Payment Details and click **Refresh**, the system posts the following accounting entries on save and authorization of the record:

Accounting entries posted for the payment amount:

Dr/Cr	Description	Amount
Dr	Cash Account	For a Total Amount
Cr	Account maintained in ARC of the associated product	For a Total Amount

Accounting entries posted for the charge amount:

Dr/Cr	Description	Amount
Dr	Cash Account	Charges amount computed as per ARC maintenance
Cr	Account maintained in ARC of the associated product	Charges amount computed as per ARC maintenance

2.6.14.6 Validations

The following validations are performed by the system:

- The system allows you to maintain a minimum of one row and a maximum of eight rows in the **Payment Data Details** multi entry block. If you do not maintain the minimum row or exceed the maximum row, then the system displays an appropriate error message.

- If the **Principal Fiscal Code** and **Secondary Fiscal Code** fields have a value of 16 character that is for non-individual customers the system validates the last character in the value as per the checksum algorithm for Fiscal Code. If the validation fails, then the system displays an appropriate error message. In case of individual customers, where the **Principal Fiscal Code** and **Secondary Fiscal Code** field has a value of 11 character, the system validates the last character in the value as per the checksum algorithm for VAT number. If the validation fails, then the system displays an appropriate error message.
- The system validates only the data format of the fields specified.
- If the computed value for **Payment Amount** field value is less than or equal to 0, on pickup, the system displays an appropriate error message.

Once Pickup is completed, do the following step:

1. Click **Submit** to complete the transaction.
 → A Teller Sequence Number is generated, and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any approval warning raised when the transaction saves. On transaction submission, the deposit of tax amount is completed successfully.

2.6.15 F24 Tax Payment By Account

This screen is used to capture data related to F24 tax document for a customer and collect the corresponding tax by account from the customer. To process this screen, type **F24 Tax Payment By Account** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, navigate to left menu and click **Teller**. On Teller Mega Menu, under **Customer Transaction**, click **F24 Tax Payment By Account**.

→ The **F24 Tax Payment By Account** screen is displayed.

Elaboration Date	Displays the elaboration date

Field	Description
Principal Fiscal Code	Specify the debtor fiscal code. NOTE: For Individual customers, the allowed principal fiscal code is 16 characters and for non-individual customers, this will be 11-character VAT number.
Secondary Fiscal Code	Specify the secondary fiscal code. NOTE: For Individual customers, the allowed secondary fiscal code is 16 characters and for non-individual customers, this will be 11-character VAT number.
Identity Code Secondary Fiscal Code	Specify the Identity code secondary fiscal code.
Section	Specify the section.
Tax Code	Specify the tax code.
Institution Code	Specify the institution code.
Late Payment	Specify if the payment is a late payment.
Bounding Var.	Specify the Bounding Var.
Down Payment	Specify the down payment.
Final Payment	Specify the final payment.
Building Nr	Specify the building number.
Instalment	Specify the instalment amount.

Field	Description
Year	Specify the year.
Deduction	Specify the deduction amount.
Debit Amount	Specify the amount to be paid.
Credit Amount	Specify the compensation amount.
Office Code	Specify the office code.
Document Code	Specify the document code.
Building Reference Number	Specify the building reference number.
Total Debit Amount (G)	Displays the Total Debit Amount.
Total Credit Amount (H)	Specify the total compensation amount.
Final Section Amount (G-H)	Displays the Final Section Amount.

2.6.15.5 F24 Tax - By Account (Elide)

Specify the details in the **F24 Tax – By Account** segment. Based on the Form Type selection, the input fields will be displayed on this segment.

Figure 80: F24 Elide Details

The screenshot shows the 'F24 Tax By Account' form with the 'Elide' form type selected. The 'F24 Elide' section contains fields for 'Elaboration Date' (Mar 26, 2020), 'Principal Fiscal Code' (marked with an asterisk), 'Secondary Fiscal Code', and 'Total Final Payment'. Below this is the 'Final Payment Fields' section with 'Erario Institution'. The 'Tax Details' section is a table with columns: Type Of Vehicle/Element, Vehicle/Element ID, Tax Code, Year, and Debit Amount. It currently shows 'No data to display.' with navigation controls. At the bottom, there are fields for 'Office Code' and 'Document Code', and summary amounts: 'Total Debit Amount', 'Final Section Amount', and a 'C' button. A footer note says 'Please click on the Refresh button next to Tax amount before Submit'.

Specify the details in this segment. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: F24 Elide](#).

Field Description: F24 Elide

Field	Description
Form Type	Select the Elide tax category from the adjoining drop-down list.
F24 Elide	Specify the fields.

Identity Code Secondary Fiscal Code	Specify the Identity code secondary fiscal code.
Total Final Payment	Specify the Total final payment.
Type of Vehicle/ Element	Specify the vehicle type.
Vehicle/ Element ID	Specify the vehicle ID.
Tax Code	Specify the tax code.
Year	Specify the year.
Debit Amount	Specify the amount to be paid.
Office Code	Specify the office code.
Document Code	Specify the document code.
Total Debit Amount	Displays the Total Amount to Pay.
Final Section Amount	Displays the final section amount.

2.6.15.6 F24 Tax - By Account (Predefined)

Specify the details in the **F24 Tax – By Account** segment. Based on the Form Type selection, the input fields will be displayed on this segment.

Figure 81: F24 Predefined Details

The screenshot displays the 'F24 Tax By Account' form. At the top, there is a 'Form Type' dropdown menu set to 'Predefined'. Below this, the 'F24 Predefined' section contains several input fields: 'Elaboration Date' (showing 'Mar 26, 2020'), 'Principal Fiscal Code *' (marked as mandatory), 'Secondary Fiscal Code', 'Identity code secondary fiscal code', 'Total Final Payment', and 'Final Payment Fields' which includes 'Erario Institution'. A 'Tax Details' section at the bottom features a table with columns for 'Payment ID' and 'Amount to Pay', currently showing 'No data to display.' with a pagination control for page 1. At the very bottom, there are fields for 'Total Debit Amount' and 'Final Section Amount', along with a small circular icon. A footer note states: 'Please click on the Refresh button next to Tax amount before Submit'.

Specify the details in this segment. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: F24 Predefined](#).

Field Description: F24 Predefined

Field	Description
Form Type	Select the Predefined tax category from the adjoining drop-down list.
F24 Predefined	Specify the fields.
Elaboration Date	Displays the elaboration date

Field	Description
Principal Fiscal Code	Specify the debtor fiscal code. NOTE: For Individual customers, the allowed principal fiscal code is 16 characters and for non-individual customers, this will be 11-character VAT number.
Secondary Fiscal Code	Specify the secondary fiscal code. NOTE: For Individual customers, the allowed secondary fiscal code is 16 characters and for non-individual customers, this will be 11-character VAT number.
Identity Code Secondary Fiscal Code	Specify the Identity code secondary fiscal code.
Erario Institution	Displays the Erario Institution.
Payment ID	Specify the payment ID.
Amount to Pay	Specify the amount to be paid.
Total Debit Amount	Displays the Total Amount to Pay.
Final Section Amount	Displays the Final Section Amount.

2.6.15.7 Transaction Submission

On selection of an appropriate value from the **Form Type**, only corresponding fields of the form will be displayed for input. For example, if you select **F24 Standard** as the Form Type then only the fields of **F24 Standard** will be available. The **Principal Fiscal Code** needs to be specified. After entering all the form details, user need to click on Refresh button in the **F24 Payment Details** block .It then adds up the Amounts and defaults the sum in the **Payment Amount** field. The system posts the following accounting entries on save and authorization of the record.

Accounting entries posted for the payment amount:

Dr/Cr	Description	Amount
Dr	Cash Account	Final Section Amount of the corresponding tab which has been entered.
Cr	Account maintained in ARC of the associated product	Final Section Amount of the corresponding tab which has been entered.

Accounting entries posted for the charge amount:

Dr/Cr	Description	Amount
Dr	Cash Account	Charges amount computed as per ARC maintenance
Cr	Income Account	Charges amount computed as per ARC maintenance

2.6.15.8 Validations

The system validates only the data format of the fields specified. If any of such validations fail, the system displays an appropriate error message. If you maintain more than the specified number of rows in any of the below blocks then the system displays an appropriate error message. The following list shows the number of rows, which can be maintained for each Form Type:

- In **F24 Standard** tab, the system allows you to maintain only the following number of records:
 - up to a maximum of 6 rows in the **ERARIO** multi record block.
 - up to a maximum of 4 rows in the **INPS** multi record block.
 - up to a maximum of 4 rows in the **REGIONI** multi record block.
 - up to a maximum of 4 rows in the **IMU E ALTRI ENTI LOCALI** multi record block.
 - up to a maximum of 4 rows in the **INAIL** multi record block.

- up to a maximum of 3 rows in the **ALTRI ENTI** multi record block.
- up to a maximum of 7 rows in the **ACCISE** multi record block.
- In **F24 Simplified** tab up to a maximum of 10 rows in the **Tax Details** multi record block.
- In **F24 Elide** tab up to a maximum of 28 rows in the **Tax Details** multi record block.
- In **F24 Predefined** tab up to a maximum of 1 row in the **Tax Details** multi record block.

If the computed value for **Payment Amount** field value is less than or equal to 0, the system displays an appropriate error message. If the **Principal Fiscal Code** and **Secondary Fiscal Code** fields have, a value of 16, character that is for non-individual customers the system validates the last character in the value as per the checksum algorithm for **Fiscal Code**. If the validation fails, then the system displays an appropriate error message. In case of individual customers, where the **Principal Fiscal Code** and **Secondary Fiscal Code** field has a value of 11 character, the system validates the last character in the value as per the checksum algorithm for VAT number. If the validation fails, then the system displays an appropriate error message.

Once Pickup is completed, do the following step:

2. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated, and the **Transaction Completed Successfully** information message is displayed.

2.6.16 Circular Cheque Issue Against Cash

This screen is used to withdraw funds from CASA account of the customer. The withdrawal is subject to the availability of sufficient balance or available credit limit. When the transaction is performed, it updates the available balance in the CASA account immediately.

To process this screen, type **Circular Cheque Issue Against Cash** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Customer Transaction**, click **Circular Cheque Issue Against Cash**.

→ The **Circular Cheque Issue Against Cash** screen is displayed.

2.6.16.1 Main Transaction Details

Specify the details in the **Circular Cheque Issue Against Cash** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Circular Cheque Issue Against Cash](#).

Field Description: Circular Cheque Issue Against Cash

Field	Description
Circular Cheque Currency Account & Amount	<p>Specify the currency in which the circular cheque is to be issued. The adjoining option displays all valid open and authorized currency codes maintained in the system. You can select the appropriate one. Note that if the cheque currency is different from the Maximum Amount Currency, then the exchange rate maintained between the two currencies as on the date of issue will be used for conversion. The rate type and rate code maintained at the product level will be used for the conversion.</p> <p>For Amount, you can specify the amount for which the circular cheque has to be issued and this amount will be in the specified Cheque Currency.</p>
Instrument Number	Specify the name of the Instrument Number.
Beneficiary Name	Specify the name of the beneficiary of the circular cheque.
Purchaser Name	Specify the name of the purchaser.
Transaction Currency & Amount	<p>Specify the currency in which advance transaction is initiated. Alternatively, you can select the transaction currency code from the option list. The list displays all valid transaction currencies maintained in the system.</p> <p>For Amount, you can specify the transaction amount for which the circular cheque has been issued and this amount will be in the specified transaction Currency.</p>
Exchange Rate	Displays the exchange rate used to convert the transaction currency into GL currency and it can be modified.

Field	Description
	NOTE: If the transaction currency is the same as the account currency, the system displays the exchange rate as 1.
Transferrable	<p>Check this box to indicate that the circular cheque should be issued as a transferable cheque. If this box is not checked, then the system will waive the stamp duty charge as maintained in the ARC Maintenance screen.</p> <p>If the Transferable box is checked, the system will validate the cheque amount against the Maximum Amount value specified at the Bank Parameters level. If the cheque amount is greater than the Maximum Amount maintained, then the system will display an appropriate error message.</p>
Narrative	Displays the default narrative CC Issued In Favour Of and it can be modified.
Total Charges	The system computes the charges applicable for the transaction and displays it here. If you modify the amount to be transferred, then click Recalc button to recalculate the charge amount.
Total Payment Amount	Displays the total amount for which the circular cheque has been issued and this amount will be in the specified Cheque Currency.

2.6.16.2 Denomination Details

The **Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the denomination units. For more information on this segment, refer to the topic [2.4.11.2 Denomination Details](#) in this guide.

2.6.16.3 Charge Details

The **Charge Details** segment is used to view, modify, or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

2.6.16.4 Validations

The following validations are performed by the system:

When you click the **Pickup** button, the system will check the following and displays an error message.

- Availability of Circular Cheque instrument in the requested Cheque Currency in the **Denominations Maintenance Screen**.
- Any stock, which is available with an amount range in which the requested Cheque Amount falls.
- Any stock which has been maintained with Denomination Value greater than or equal to the requested cheque amount and if enough units are available for that stock.
- If the above conditions are not met, the system will display an error message.

Once Pickup is completed, do the following step:

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated, and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any approval warning raised when the transaction saves. On transaction submission, the circular cheque is issued successfully.

2.6.17 Circular Cheque Issue Against Account

This screen is used to withdraw funds from CASA account of the customer. The withdrawal is subject to the availability of sufficient balance or available credit limit. When the transaction is performed, it updates the available balance in the CASA account immediately.

To process this screen, type **Circular Cheque Issue Against Account** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Customer Transaction**, click **Circular Cheque Issue Against Account**.

→ The **Circular Cheque Issue Against Account** screen is displayed.

Figure 83: Circular Cheque Issue Against Account

2.6.17.1 Main Transaction Details

Specify the details in the **Circular Cheque Issue Against Account** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Circular Cheque Issue Against Account](#).

Field Description: Circular Cheque Issue Against Account

Field	Description
Circular Cheque Currency Account & Amount	This field will indicate the amount in the debit account currency.
Instrument Number	Specify the name of the Instrument Number.

Field	Description
Beneficiary Name	Specify the name of the beneficiary of the circular cheque.
Purchaser Name	Specify the name of the purchaser.
Debit Account Branch	Displays the branch code for the account selected.
Debit Account Number	Specify the account to be debited from the list displayed.
Debit Account Description	Displays the description of the debit account selected.
Exchange Rate	<p>Displays the exchange rate used to convert the transaction currency into GL currency and it can be modified.</p> <p>NOTE: If the transaction currency is the same as the account currency, the system displays the exchange rate as 1.</p>
Debit Account Currency & Amount	This field will indicate the currency and the amount computed in debit account currency.
Transferrable	<p>Check this box to indicate that the circular cheque should be issued as a transferable cheque. If this box is not checked, then the system will waive the stamp duty charge as maintained in the ARC Maintenance screen.</p> <p>If the Transferable box is checked, the system will validate the cheque amount against the Maximum Amount value specified at the Bank Parameters level. If the cheque amount is greater than the Maximum Amount maintained, then the system will display an appropriate error message.</p>
Narrative	Displays the default narrative CC Issued In Favour Of and it can be modified.

Field	Description
Total Charges Amount	The system computes the charges applicable for the transaction and displays it here.
Total Payment Amount	Displays the total amount for which the circular cheque has been issued and this amount will be in the specified Cheque Currency.

2.6.17.2 Charge Details

The **Charge Details** segment is used to view, modify, or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

2.6.17.3 Validations

The following validations are performed by the system:

When you click the **Pickup** button, the system will check the following and displays an error message.

- Availability of Circular Cheque instrument in the requested Cheque Currency in the **Denominations Maintenance Screen**.
- Any stock, which is available with an amount range in which the requested Cheque Amount falls.
- Any stock which has been maintained with Denomination Value greater than or equal to the requested cheque amount and if enough units are available for that stock.

If the above conditions are not met, the system will display an error message. Once Pickup is completed, do the following step:

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated, and the **Transaction Completed Successfully** information message is displayed.

2.6.18 MAVs RAVs FRECCIAs Payment by Cash

This screen is used to receive payments of MAVs, RAVs and FRECCIAs in cash. To process this screen, type **MAV RAV FRECCIA Payment by Cash** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Customer Transaction**, click **MAVs RAVs FRECCIAs Payment by Cash**.

→ The **MAV RAV FRECCIA Payment by Cash** screen is displayed.

2.6.18.1 Main Transaction Details

Specify the details in the **MAV RAV FRECCIA Payment by Cash** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: MAVs RAVs FRECCIAs Payment by Cash](#).

Field Description: MAVs RAVs FRECCIAs Payment by Cash

Field Description: MAVs RAVs FRECCIAs Payment by Cash

Field	Description
Transaction Type	<p>Select the transaction type from the adjoining drop-down list. The drop-down list shows following options:</p> <ul style="list-style-type: none"> • MAV Payment • RAV Payment • FRECCIA Payment

Field	Description
Payment Amount	Select the currency and specify the amount for which payment is being received on the MAV, RAV or FRECCIA.
Payment Registration Date	System defaults current Branch Date. NOTE: For Cash, system defaults the current branch date.
Narrative	Displays the default narrative MAV/RAV/FRECCIA Receipt of Payment-By Account and it can be modified.
MAV/ RAV Details	Specify the fields.
MAV/ RAV ID	Specify the MAV or RAV ID for which the payment is being received. If the Payment Type is On Us , the adjoining option list displays all the authorized, processed, active and cancelled MAV IDs available in the system. You can choose the appropriate one. If the Payment Type is Off Us , you can specify any valid MAV or RAV ID. The system does not validate the value specified against the LOV.
Debtor Details	Specify the fields.
Debtor Name	Specify the name of the debtor.
Debtor City	Specify the city of the debtor.
Debtor Address	Specify the address of the debtor.
Debtor Zip Code	Specify the zip code of the debtor address.
Beneficiary Details	Specify the fields.

Field	Description
Branch Code & Account Number / Off UsGL	Displays the Branch Code & Account Number / Off UsGL.
Beneficiary Account Description	Displays the Account Description.
Net Account Amount	Displays the amount paid by the customer. NOTE: The currency of the amount paid is defaulted from received currency.
Exchange Rate	Displays the exchange rate based on the Account Currency and Offset Account Currency.
Additional Details	Specify the fields.
Payment Type	Displays the payment type as On Us or Off Us.
Total Charges	Displays the total charges. NOTE: The currency of the amount paid is defaulted from received currency.
Total Payment amount	Displays the total amount paid.
FRECCIA Details	Specify the fields.
IBAN of Beneficiary	Specify the IBAN of the beneficiary for the FRECCIA payment. This is applicable only for receipt of payments for FRECCIA.
Amount CIN	Specify a single-digit value for the CIN value of the payment amount value.

Field	Description
Bill Number	Specify the bill number for the FRECCIA payment. This is applicable only for receipt of payments for FRECCIA.
Intermediate CIN	Specify a single-digit value for the intermediate CIN value.
Total CIN	Specify a single-digit value for the total CIN value.
Pre-filled Bill Flag	Check this box if it is a pre-filled bill.

2.6.18.2 Charge Details

The **Charge Details** segment is used to view, modify, or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

2.6.18.3 Denomination Details

The **Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the denomination units. For more information on this segment, refer to the topic [2.4.11.2 Denomination Details](#) in this guide.

2.6.18.4 Transaction Submission

The system processes receipt of payments depending on the transaction.

When you click the **Submit** icon, the system will perform certain checks for the ID specified. If you are performing an MAV payment, it checks the **MAV ID**. If it is a valid ID in the system, it checks that the Payment amount specified matches the amount specified for this MAV in the **Issue of MAVs** screen. If it matches, the payment is identified as an **On Us** MAV payment. If there is no match, the system displays an appropriate error message. If the MAV ID has not been maintained in the system, the system will extract the internal ID number value in the MAV ID and check if this value has been blocked (in the **Blocked MAV Numbers** screen). If yes, system will identify the payment as an **On Us** MAV payment.

If internal ID number does not exist in the blocked list then, the system first validates the last 3 digits in the MAV ID using the CIN modulo 10 and CIN module 93 algorithms. If these values are not valid, the system displays an appropriate error message. It will then extract the ABI code in the entered MAV ID (the first 5 characters) and validate it against all the authorized and open bank codes maintained in **ABI Maintenance** screen. If the ABI code exists in this list, the payment is identified as an **Off Us** MAV payment. Else, the system displays an appropriate error message. If none of the conditions specified so far are met, the system displays an appropriate error message.

If you are performing an RAV payment, the system validates the RAV ID. It checks the last three digits using CIN modulo 10 and CIN module 93 algorithms. If these values are not valid, the system displays an appropriate error message. It will then extract the ABI code in the specified RAV ID (the first 5 digits + 80000) and validate it against all the authorized and open bank codes maintained in **ABI Maintenance** screen. If the ABI code does not exist in this list, the system displays an appropriate error message.

For FRECCIA payment receipts, the system picks the ABI/Bank Code from the IBAN of the Beneficiary. If the bank code belongs to the bank, it checks if the IBAN number specified exists internally. If it exists, the system identifies the current payment as an **On-Us** FRECCIA payment; if it does not exist, the system displays an appropriate error message. If the bank code does not belong to the bank, the system validates it against all the authorized and open bank codes maintained in **ABI Maintenance** screen. If it is found, the system considers the current payment as an **Off-Us** FRECCIA payment. If it is not found, the system displays an appropriate error message.

After the validation of the MAV ID or RAV ID or FRECCIA ID, the system validates the combination of the fields **Amount CIN**, **Bill Number**, **Intermediate CIN**, **Pre filled bill flag**, **Total CIN** will be validated. The validation is based on the CIN Amount, Intermediate CIN Code and Total CIF validation. If this validation is successful, the system records the receipt of the payment else, it displays an appropriate error message.

Subsequently, the system checks the **Payment Registration Date** should be a working day (not a holiday). For FRECCIA payments, this date should be the current system date, for MAV and RAV payments, it should be a date equal to or greater than the current system date. If the date is the current working date, then the system checks if sufficient funds are available in the debit account. If you are doing the payment from the front-end screen, the system checks if the debit account is a customer account. If any of the validations for the **Payment Registration Date** fails, the system displays the appropriate error message.

The system defaults the account to be credited in the **Account Number** field as follows:

- In case of an **On Us** MAV payment, the beneficiary account specified while issuing the corresponding MAV will be defaulted here.
- In case of an **Off Us** MAV payment, the **Off Us GL** maintained for MAV will be defaulted here.
- In case of a RAV payment, the **Off Us GL** maintained for RAV will be defaulted here.
- In case of an **On Us** FRECCIA payment, the customer account based on the specified
- IBAN number will be defaulted here.
- In case of an **Off Us** FRECCIA payment, the **Off Us GL** maintained for FRECCIA will be defaulted here.

When you save and authorize the record, the system updates the status as **Liquidated** and posts the following entries:

Once an **On Us** MAV payment is successfully saved and authorized, the system updates the corresponding MAV issued as **Liquidated** in the **Issue of MAVs** screen. If, for an **On Us** MAV payment, you specify a blocked MAV ID in MAV/ RAV ID field and save the record, the system creates a record for Issue of the MAV id (in the **Issue of MAVs** screen) using the **Batch No for Blocked MAV** (maintained in **Blocked MAV Numbers** screen). It posts accounting entries to debit Portfolio GL (Asset) and credit Portfolio GL (Liability) (maintained in **MAV RAV FRECCIA Parameters** screen). Subsequent checks, processing and accounting entries are the same as specified above for **On Us** transactions.

Accounting entries posted for the payment amount:

Account	Amount	Dr/Cr
Cash Account	Payment Account	Dr
Account defaulted in the Account Number field.	Payment Amount	Cr

For charge amount (based on ARC maintenance):

Account	Amount	Dr/Cr
Cash Account	Charges amount computed as per ARC maintenance	Dr
Income Account	Charges amount computed as per ARC maintenance	Cr

Once Pickup is completed, do the following step:

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated, and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any approval warning raised when the transaction saves. On transaction submission, the deposit of tax amount is completed successfully.

2.6.19 MAVs RAVs FRECCIAs Payment by Account

This screen is used to receive payments of MAVs, RAVs and FRECCIAs through account. To process this screen, type **MAV RAV FRECCIA Payment by Account** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Customer Transaction**, click **MAVs RAVs FRECCIAs Payment by Account**.

→ The **MAV RAV FRECCIA Payment by Account** screen is displayed.

2.6.19.1 Main Transaction Details

Specify the details in the **MAVs RAVs FRECCIAs Payment by Account** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Receipt of Payment of MAVs RAVs FRECCIAs by Account](#).

Field Description: Receipt of Payment of MAVs RAVs FRECCIAs by Account

Field	Description
Transaction Type	<p>Select the transaction type from the adjoining drop-down list. The drop-down list shows following options:</p> <ul style="list-style-type: none"> • MAV Payment • RAV Payment • FRECCIA Payment
Payment Amount	Select the payment currency and specify the amount for which payment is being received on the MAV, RAV or FRECCIA.
Payment Registration Date	Specify the date on which the payment should be done.
Narrative	Displays the default narrative MAV/RAV/FRECCIA Receipt of Payment-By Account and it can be modified.
Debit Account Details	Specify the fields.
Branch	Specify the branch.
Account Number	Specify customer account that should be debited for the receipt of the payment on the MAV, RAV or FRECCIA. The adjoining option list displays the customer accounts maintained in the system. You can choose the appropriate one.
MAV, RAV or FRECCIA Debit Amount	Specify the amount for which payment is being received on the MAV, RAV or FRECCIA.
Exchange Rate for MAV, RAV or FRECCIA Amount	Displays the exchange rate based on the Account Currency and Offset Account Currency.

Field	Description
MAV/ RAV Details	Specify the fields.
MAV/ RAV ID	<p>Specify the MAV or RAV ID for which the payment is being received. If the Payment Type is On Us, the adjoining option list displays all the authorized, processed, active and cancelled MAV IDs available in the system. You can choose the appropriate one.</p> <p>If the Payment Type is Off Us, you can specify any valid MAV or RAV ID. The system does not validate the value specified.</p>
Debtor Details	Displays the details of the debtor.
Debtor Name	Displays the name of the debtor.
Debtor City	Displays the city of the debtor.
Debtor Address	Displays the address of the debtor.
Debtor Zip Code	Specify the zip code of the debtor address.
IBAN of Beneficiary	Specify the IBAN of the beneficiary for the FRECCIA payment. This is applicable only for receipt of payments for FRECCIA.
Amount CIN	Specify a single-digit value for the CIN value of the payment amount value.
Bill Number	Specify the bill number for the FRECCIA payment. This is applicable only for receipt of payments for FRECCIA.
Intermediate CIN	Specify a single-digit value for the intermediate CIN value.

Field	Description
Total CIN	Specify a single-digit value for the total CIN value.
Pre-filled Bill Flag	Check this box if it is a pre-filled bill.
Beneficiary Details	Specify the fields.
Branch Code & Account / Off UsGL	Displays the Branch Code & Account / Off UsGL.
Branch Account Description	Displays the Account Description.
Net Account Amount	Displays the amount paid by the customer. NOTE: The currency of the amount paid is defaulted from received currency.
Exchange Rate	Displays the exchange rate based on the Account Currency and Offset Account Currency.
Additional Details	Specify the fields.
Payment Type	Displays the payment type as On Us or Off Us.
Total Charge	Displays the total charge. NOTE: The currency of the amount paid is defaulted from received currency.
Total Payment amount	Displays the total amount paid.

2.6.19.2 Charge Details

The **Charge Details** segment is used to view, modify, or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

2.6.19.3 Transaction Submission

The system processes receipt of payments depending on the transaction.

When you click the **Submit** icon, the system will perform certain checks for the ID specified. If you are performing an MAV payment, it checks the **MAV ID**. If it is a valid ID in the system, it checks that the Payment amount specified matches the amount specified for this MAV in the **Issue of MAVs** screen. If it matches, the payment is identified as an **On Us** MAV payment. If there is no match, the system displays an appropriate error message. If the MAV ID has not been maintained in the system, the system will extract the internal ID number value in the MAV ID and check if this value has been blocked (in the **Blocked MAV Numbers** screen). If yes, system will identify the payment as an **On Us** MAV payment.

If internal ID number does not exist in the blocked list then, the system first validates the last 3 digits in the MAV ID using the CIN modulo 10 and CIN module 93 algorithms. If these values are not valid, the system displays an appropriate error message. It will then extract the ABI code in the entered MAV ID (the first 5 characters) and validate it against all the authorized and open bank codes maintained in **ABI Maintenance** screen. If the ABI code exists in this list, the payment is identified as an **Off Us** MAV payment. Else, the system displays an appropriate error message. If none of the conditions specified so far are met, the system displays an appropriate error message.

If you are performing an RAV payment, the system validates the RAV ID. It checks the last three digits using CIN modulo 10 and CIN module 93 algorithms. If these values are not valid, the system displays an appropriate error message. It will then extract the ABI code in the specified RAV ID (the first 5 digits + 80000) and validate it against all the authorized and open bank codes maintained in **ABI Maintenance** screen. If the ABI code does not exist in this list, the system displays an appropriate error message.

For FRECCIA payment receipts, the system picks the ABI/Bank Code from the IBAN of the Beneficiary. If the bank code belongs to the bank, it checks if the IBAN number specified exists internally. If it exists, the system identifies the current payment as an **On Us** FRECCIA payment; if it does not exist, the system displays an appropriate error message. If the bank code does not belong to the bank, the system validates it against all the authorized and open bank codes maintained in **ABI Maintenance** screen. If it is found, the system considers the current payment as an **Off Us** FRECCIA payment. If it is not found, the system displays an appropriate error message.

After the validation of the MAV ID or RAV ID or FRECCIA ID, the system validates the combination of the fields **Amount CIN**, **Bill Number**, **Intermediate CIN**, **Pre filled bill flag**, and **Total CIN** will be validated. The validation is based on the **CIN Amount**, **Intermediate CIN Code** and **Total CIF** validation. If this validation is successful, the system records the receipt of the payment else, it displays an appropriate error message.

Subsequently, the system checks the **Payment Registration Date** should be a working day (not a holiday). For FRECCIA payments, this date should be the current system date, for MAV and RAV payments, it should be a date equal to or greater than the current system date. If the date is the current working date, then the system checks if sufficient funds are available in the debit account. If you are doing the payment from the front-end screen, the system checks if the debit account is a customer account. If any of the validations for the **Payment Registration Date** fails, the system displays the appropriate error message.

If the **Payment Registration Date** is a future date, the system debits the Customer Account and credits the Beneficiary Account on that particular date. For information refer **Batch Process** screen [2.6.15 MAV Batch Process](#), refer to the topic in this guide.

If there is any charge maintained in charge details that will also be liquidated on that day only. If the currency of the Debit Account is not equal to the currency in which payment is to be made (EUR), then, during liquidation of the payment, the system converts the payment amount into an equivalent amount in Debit account currency using the exchange rate maintained between the two currencies as on the date of liquidation. The Rate Code and Rate Type as maintained for the corresponding product code are used for this conversion.

The system defaults the account to be credited in the **Account Number** field as follows:

- In case of an On Us MAV payment, the beneficiary account specified while issuing the corresponding MAV will be defaulted here.
- In case of an Off Us MAV payment, the Off Us GL maintained for MAV will be defaulted here.
- In case of a RAV payment, the Off Us GL maintained for RAV will be defaulted here.
- In case of an On Us FRECCIA payment, the customer account based on the specified IBAN number will be defaulted here.
- In case of an Off Us FRECCIA payment, the Off Us GL maintained for FRECCIA will be defaulted here.

When you save and authorize the record, the system updates the status as **Liquidated** and posts the following entries:

Once an **On Us** MAV payment is successfully saved and authorized, the system updates the corresponding MAV issued as **Liquidated** in the **Issue of MAVs** screen.

If, for an **On Us** MAV payment, you specify a blocked MAV ID in MAV/ RAV ID field and save the record, the system creates a record for Issue of the MAV id (in the **Issue of MAVs** screen) using the **Batch No for Blocked MAV** (maintained in **Blocked MAV Numbers** screen). It posts accounting entries to debit Portfolio GL (Asset) and credit Portfolio GL (Liability) (maintained in **MAV RAV FRECCIA Parameters screen**). Subsequent checks, processing, and accounting entries are the same as specified above for **On Us** transactions.

Accounting entries posted for the payment amount:

Account	Amount	Dr/Cr
Debit Account	Payment Account	Dr
Account defaulted in the Account Number field.	Account maintained in ARC of the associated product	Cr

For charge amount (based on ARC maintenance):

Account	Amount	Dr/Cr
Debit Account	Charges amount computed as per ARC maintenance	Dr
Income Account	Charges amount computed as per ARC maintenance	Cr

Once Pickup is completed, do the following step:

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated, and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any approval warning raised when the transaction saves. On transaction submission, the deposit of tax amount is completed successfully.

2.7 Miscellaneous Transactions

This section describes the various screens used to perform the miscellaneous transactions. The screens are described in the following sub-sections:

- [2.7.1 Miscellaneous Customer Debit](#)
- [2.7.2 Miscellaneous Customer Credit](#)
- [2.7.3 Miscellaneous GL Debit](#)
- [2.7.4 Miscellaneous GL Credit](#)
- [2.7.5 Miscellaneous GL Transfer](#)

2.7.1 Miscellaneous Customer Debit

This screen is used to transfer funds from the customer account to General Ledger (GL). The customer account can be debited for various reasons, with corresponding credit to a GL belonging to the transaction branch.

To process this screen, type **Misc Customer Debit** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Miscellaneous**, click **Misc Customer Debit**.

→ The **Miscellaneous Customer Debit** screen is displayed.

2.7.1.1 Main Transaction Details

Specify the details in the **Miscellaneous Customer Debit** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Miscellaneous Customer Debit](#).

Field Description: Miscellaneous Customer Debit

Field	Description
Account Number	Specify the account number from which the funds need to be debited.
Account Amount	Displays the account currency based on the account number specified. Specify the amount that needs to be debited from the account currency.
GL Account	Specify the GL account to which the funds need to be credited. You can select the appropriate GL account from the adjoining option list that displays all the valid GL accounts.
GL Branch	Displays the branch code of the selected GL account number.
GL Description	Displays the description of the selected GL account number.
GL Currency	By default, the account currency is displayed and it can be modified.
GL Amount	Displays the amount in terms of GL currency. NOTE: This field is displayed only if Multi Currency Configuration at Function Code Indicator level is set as Y.
Narrative	Displays the default narrative Miscellaneous Customer Debit and it can be modified.

Field	Description
Reference Number	Specify the reference number for the transaction.
Exchange Rate	<p>Displays the exchange rate used to convert the transaction currency into GL currency and it can be modified.</p> <p>NOTE: If the transaction currency is the same as the account currency, the system displays the exchange rate as 1. This field is displayed only if Multi Currency Configuration at Function Code Indicator level is set as Y.</p>

2.7.1.2 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

2.7.1.3 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any approval warning raised when the transaction saves.

2.7.2 Miscellaneous Customer Credit

This screen is used to transfer funds from GL to the customer account. The customer account can be credited for various reasons, with corresponding debit to a GL belonging to the transaction branch.

To process this screen, type **Misc Customer Credit** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Miscellaneous**, click **Misc Customer Credit**.

→ The **Miscellaneous Customer Credit** screen is displayed.

2.7.2.1 Main Transaction Details

Specify the details in the **Miscellaneous Customer Credit** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Miscellaneous Customer Credit](#).

Field Description: Miscellaneous Customer Credit

Field Description: Miscellaneous Customer Credit

Field	Description
Account Number	Specify the account number from which the funds need to be credited. NOTE: In addition, you can use Oracle Banking Virtual Accounts. These Virtual Accounts are used as a routing account to credit the underlying physical account.
Account Amount	Displays the account currency based on the account number specified. Specify the amount to be credited from the account currency.
GL Account	Specify the GL account from which the funds need to be debited. You can select the appropriate GL account from the adjoining option list that displays all the valid GL accounts.
GL Branch	Displays the branch code of the selected GL account number.
GL Currency	By default, the account currency is displayed and it can be modified.
GL Amount	Displays the amount in terms of GL currency. NOTE: This field is displayed only if Multi Currency Configuration at Function Code Indicator level is set as Y.
GL Description	Displays the description of the selected GL account number.

Field	Description
Narrative	Displays the default narrative Miscellaneous Customer Credit and it can be modified.
Reference Number	Specify the reference number for the transaction.
Exchange Rate	<p>Displays the exchange rate used to convert the transaction currency into GL currency and it can be modified.</p> <p>NOTE: If the transaction currency is the same as the account currency, the system displays the exchange rate as 1. This field is displayed only if Multi Currency Configuration at Function Code Indicator level is set as Y.</p>

2.7.2.2 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

2.7.2.3 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any approval warning raised when the transaction saves. On transaction completion, the GL account is debited and Customer account is credited to the extent of **Account Amount**.

2.7.3 Miscellaneous GL Debit

This screen is used to debit funds from a GL account of the transaction branch and pass the corresponding credit to the Cash GL account in the same branch.

To process this screen, type **Misc GL Debit** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Miscellaneous**, click **Misc GL Debit**.

→ The **Miscellaneous GL Debit** screen is displayed.

Figure 88: Miscellaneous GL Debit

2.7.3.1 Main Transaction Details

Specify the details in the **Miscellaneous GL Debit** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Miscellaneous GL Debit](#).

Field Description: Miscellaneous GL Debit

Field	Description
GL Account	Specify the GL account from which the funds need to be debited. You can select the appropriate GL account from the adjoining option list that displays all the valid GL accounts.
GL Currency	Displays the branch account currency and allows to modify if required.

Field	Description
GL Amount	Displays the amount which is credited to GL account. NOTE: This field is displayed only if Multi Currency Configuration at Function Code Indicator level is set as Y.
GL Description	Displays the description of the selected GL account number.
Transaction Amount	Specify the appropriate currency and the amount that has to be credited to the cash account in the specified currency. NOTE: By default, the local currency of the branch is displayed, select another currency if required.
Narrative	Displays the default narrative Miscellaneous GL Debit and it can be modified.
Reference Number	Specify the reference number for the transaction.
Exchange Rate	Displays the exchange rate used to convert the transaction currency into GL currency and it can be modified. NOTE: If the transaction currency is the same as the account currency, the system displays the exchange rate as 1. This field is displayed only if Multi Currency Configuration at Function Code Indicator level is set as Y.

2.7.3.2 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

2.7.3.3 Denomination Details

The **Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the denomination units. For more information on this segment, refer to the topic [2.4.11.2 Denomination Details](#) in this guide.

2.7.3.4 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any warning raised when the transaction saves. On transaction completion, the cash balance of the Teller is updated successfully.

2.7.4 Miscellaneous GL Credit

This screen is used to credit funds to a GL account of the transaction branch and pass the corresponding debit to the Cash GL account in the same branch.

To process this screen, type **Misc GL Credit** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Miscellaneous**, click **Misc GL Credit**.

→ The **Miscellaneous GL Credit** screen is displayed.

Figure 89: Miscellaneous GL Credit

The screenshot shows the 'Miscellaneous GL Credit' screen. It features a header with the title 'Miscellaneous GL Credit'. Below the header, there are several input fields arranged in two columns. The left column includes 'GL Account' (with a search icon), 'Transaction Amount' (with a currency dropdown set to 'GBP'), 'Exchange Rate' (with up/down arrows), and 'Narrative' (with a text area containing 'Miscellaneous GL Credit'). The right column includes 'GL Description', 'GL Amount' (with a currency dropdown set to 'GBP'), and 'Reference Number'. At the bottom of the screen, there are two expandable sections: 'Charge Details' and 'Denomination Detail'. In the bottom right corner, there are two buttons: 'Submit' and 'Cancel'.

2.7.4.1 Main Transaction Details

Specify the details in the **Miscellaneous GL Credit** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Miscellaneous GL Credit](#).

Field Description: Miscellaneous GL Credit

Field	Description
GL Account	Specify the GL account to which the funds need to be credited. Select the appropriate GL account from the adjoining option list that displays all the valid GL accounts.
GL Amount	Displays the branch account currency and allows to modify if required, and shows the amount which is credited to GL account. NOTE: This field is displayed only if Multi Currency Configuration at Function Code Indicator level is set as Y.
GL Description	Displays the description of the selected GL account number.
Transaction Amount	Specify the appropriate currency and the amount that has to be debited from the cash account in the specified currency. NOTE: By default, the local currency of the branch is displayed, select another currency if required.
Narrative	Displays the default narrative Miscellaneous GL Credit and it can be modified.
Reference Number	Specify the reference number for the transaction.
Exchange Rate	Displays the exchange rate used to convert the transaction currency into GL currency and it can be modified.

Field	Description
	NOTE: If the transaction currency is the same as the account currency, the system displays the exchange rate as 1. This field is displayed only if Multi Currency Configuration at Function Code Indicator level is set as Y .

2.7.4.2 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

2.7.4.3 Denomination Details

The **Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the denomination units. For more information on this segment, refer to the topic [2.4.11.2 Denomination Details](#) in this guide.

2.7.4.4 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any warning raised when the transaction saves. On transaction completion, the cash balance of the Teller gets updated successfully.

2.7.5 Miscellaneous GL Transfer

This screen is used to transfer funds from a GL account to another GL account. To process this screen, type **Misc GL Transfer** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Miscellaneous**, click **Misc GL Transfer**.

→ The **Miscellaneous GL Transfer** screen is displayed.

2.7.5.1 Main Transaction Details

Specify the details in the **Miscellaneous GL Transfer** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Miscellaneous GL Transfer](#).

Field Description: Miscellaneous GL Transfer

Field	Description
From GL Account	Specify the GL account to which the funds need to be debited. Select the appropriate GL account from the adjoining option list that displays all the valid GL accounts.
From GL Amount	Displays the branch account currency and allows to modify if required, and shows the amount which is debited from GL account.
From GL Description	Displays the description of the selected GL account number.
GL Currency	Displays the branch currency and allows to modify if required.
To GL Account	Specify the GL account to which the funds need to be credited. Select the appropriate GL account from the adjoining option list that displays all the valid GL accounts.
To GL Amount	Displays the branch account currency and allows to modify if required, and shows the amount which is credited to GL account.
To GL Description	Displays the description of the selected GL account number.
GL Currency	Displays the branch currency and allows to modify if required.
Narrative	Displays the default narrative Miscellaneous GL Transfer and it can be modified.
Reference Number	Specify the reference number for the transaction.

Field	Description
Exchange Rate	<p>Displays the exchange rate used to convert the transaction currency into GL currency and it can be modified.</p> <p>NOTE: If the transaction currency is the same as the account currency, the system displays the exchange rate as 1. This field is displayed only if Multi Currency Configuration at Function Code Indicator level is set as Y.</p>

2.7.5.2 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

2.7.5.3 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any warning raised when the transaction saves.

2.8 Transfers

This section describes the various screens used to perform the transfers. The screens are described in the following sub-sections:

- [2.8.1 Account Transfer](#)
- [2.8.2 In House Cheque Deposit](#)
- [2.8.3 Domestic Transfer Against Account](#)
- [2.8.4 Domestic Transfer Against Walk-in](#)
- [2.8.5 International Transfer Against Account](#)
- [2.8.6 International Transfer Against Walk-in](#)

2.8.1 Account Transfer

This screen is used to transfer funds from one account to another account within the bank. The funding account and beneficiary account can be in different currencies and belong to different branches.

To process this screen, type **Account Transfer** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Transfers**, click **Account Transfer**.

→ The **Account Transfer** screen is displayed.

Figure 91: Account Transfer

The screenshot displays the 'Account Transfer' screen with the following fields and controls:

- Debit Account ***: A text input field.
- Debit Amount ***: A numeric input field with a dropdown arrow.
- Cheque Number**: A text input field.
- Cheque Date**: A date picker showing 'Mar 26, 2020' with a calendar icon.
- Credit Account ***: A text input field.
- Credit Account Name**: A text input field.
- Credit Account Branch**: A text input field containing '000'.
- Credit Amount**: A numeric input field.
- Exchange Rate**: A numeric input field with up and down arrows.
- Total Charges(LCY)**: A text input field containing 'GBP0.00'.
- Narrative ***: A text input field containing 'Account Transfer'.

At the bottom right, there are two buttons: **Submit** and **Cancel**.

2.8.1.1 Main Transaction Details

Specify the details in the **Account Transfer** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Account Transfer](#).

Field Description: Account Transfer

Field	Description
Debit Account	Specify the customer account from which the funds needs to be debited.
Debit Amount	Displays the transaction account currency. Specify the transaction amount that needs to be debited from customer account.
Cheque Number	Specify the cheque number of the customer account as provided by the Customer.
Cheque Date	Select the date on which cheque has been issued from the adjoining calendar.
Credit Account	Specify the account to which the funds needs to be credited. NOTE: In addition, you can use Oracle Banking Virtual Accounts. These Virtual Accounts are used as a routing account to credit the underlying physical account.
Credit Account Name	Displays the description of the account number specified.
Credit Account Branch	Displays the branch code of the account number specified.
Credit Amount	Displays the amount in terms of credit account currency. NOTE: This field is displayed only if Multi Currency Configuration at Function Code Indicator level is set as Y.

Field	Description
Exchange Rate	<p>Displays the exchange rate used to convert the transaction account currency into credit account currency and it can be modified.</p> <p>NOTE: If the transaction currency is same as the account currency, the system displays the exchange rate as 1. This field is displayed only if Multi Currency Configuration at Function Code Indicator level is set as Y.</p>
Total Charge (LCY)	<p>Displays the total charge amount, which is computed by the system.</p> <p>NOTE: This field is displayed only if Total Charges Configuration at Function Code Indicator level is set as Y.</p>
Narrative	<p>Displays the default narrative Account Transfer and it can be modified.</p>

2.8.1.2 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

2.8.1.3 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any warning raised when the transaction saves. When you submit, the transaction details are handed off to Oracle Banking Payments system for outgoing payment creation and processing with external system status as **Pending**. After the transaction is processed and responded from Oracle Banking Payments with appropriate status, the Teller selects the transaction from **Journal Log** and completes the transaction.

2.8.2 In-House Cheque Deposit

This screen is used to capture in-house cheque deposit transactions for the customers. To process this screen, type **In House Cheque Deposit** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Transfers**, click **In House Cheque Deposit**.

→ The **In House Cheque Deposit** screen is displayed.

Figure 92: In-House Cheque Deposit

The screenshot displays the 'In House Cheque Deposit' form with the following fields and values:

Field	Value
Debit Account *	[Empty]
Debit Account Name	[Empty]
Debit Account Branch	000

2.8.2.1 Main Transaction Details

Specify the details in the **In House Cheque Deposit** screen. For more information on fields, refer to table [Field Description: In House Cheque Deposit](#).

Field Description: In House Cheque Deposit

Field	Description
Debit Account	Specify the account number of the drawer.
Debit Account Name	Displays the name of the account.
Debit Account Branch	Displays the branch code of the account number specified.
Cheque Amount	Specify the currency and amount as mentioned in the cheque.
Cheque Number	Specify the cheque number.
Cheque Date	Specify the date of issue as mentioned in the cheque.
Credit Account	Specify the account number that needs to be credited with the cheque amount.
Credit Amount	<p>Displays the transaction amount based on the exchange rate.</p> <p>NOTE: This field is displayed only if Multi Currency Configuration at Function Code Indicator level is set as Y.</p>
Exchange Rate	<p>Displays the exchange rate used to convert the transaction currency into account currency and it can be modified.</p> <p>NOTE: If the transaction currency is the same as the account currency, the system displays the exchange rate as 1. This field is displayed only if Multi Currency Configuration at Function Code Indicator level is set as Y.</p>

Field	Description
Total Charges (LCY)	Displays the total charge amount, which is computed by the system. NOTE: This field is displayed only if Total Charges Configuration at Function Code Indicator level is set as Y.
Narrative	Displays the default narrative In-House Cheque Deposit and it can be modified.

2.8.2.2 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

2.8.2.3 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any warning raised when the transaction saves. When you submit, the transaction details are handed off to Oracle Banking Payments system for outgoing payment creation and processing with external system status as **Pending**. After the transaction is processed and responded from Oracle Banking Payments with appropriate status, the Teller selects the transaction from **Journal Log** and completes the transaction.

2.8.3 Domestic Transfer Against Account

This screen is used to transfer funds from an account held with the bank to an account held with another bank, within the same country. Based on the payment type selected, the transaction is routed to corresponding transaction network.

To process this screen, type **Domestic Trf - Account** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under Transfers, click **Domestic Trf - Account**.

→ The **Domestic Transfer Against Account** screen is displayed.

Email ID	Specify the email address if the mode of communication is selected as E-Mail .
Beneficiary Details	Specify the fields.
Beneficiary Bank BIC Code	Select the beneficiary BIC code from the list of values. NOTE: The LOV display all valid swift BIC codes maintained in the system.
Beneficiary Bank Code	Select the beneficiary bank code from the list of values. NOTE: The LOV display all valid clearing bank codes maintained in the system.

Field	Description
Beneficiary Bank Name	Specify the name of the beneficiary bank. NOTE: If the beneficiary bank code is selected, system displays the description.
Receiver BIC Code	Specify the receiver BIC code from the list of values. NOTE: The LOV displays all the valid swift BIC codes maintained in the system.
Beneficiary Account	Specify the account number of the beneficiary.
Account Type	Select the account type of the beneficiary from the drop-down list.
Account Name	Specify the account name of the beneficiary.
Address Line 1 to Address Line 4	Specify the address of the beneficiary.
Remittance Information	Specify the fields.
Remittance Information Line 1 to Remittance Information Line 4	Specify the remittance information in free text format.

2.8.5.3 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

2.8.5.4 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any warning raised when the transaction saves. When you submit, the transaction details are handed off to Oracle Banking Payments system for outgoing payment creation and processing with external system status as **Pending**. After the transaction is processed and responded from Oracle Banking Payments with appropriate status, the Teller selects the transaction from **Journal Log** and completes the transaction.

2.8.6 International Transfer Against Walk-in

This screen is used to facilitate international transfer by accepting cash from the walk-in customer. You can remit funds in transaction currency and transfer in another currency based on the customer's request. If the transaction currency differs from the transfer currency, the exchange rate is populated to calculate the equivalent amount.

To process this screen, type **International - Walk-in** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Transfers**, click **International - Walk-in**.

→ The **International Transfer Against Walk-in** screen is displayed.

Figure 98: International Transfer Against Walk-in

The screenshot shows the 'International Transfer Against Walk-in' screen. At the top, there's a title bar. Below it, the 'Transaction Amount' field is set to 'GBP'. The 'Transfer Currency' field has a search icon. The 'Exchange Rate' field has up and down arrows. The 'Transfer Amount' field is empty. The 'Total Charge Amount' field shows 'GBP0.00'. The 'Narrative' field contains the text 'International Transfer Against Walk-in'. Below these fields are two expandable sections: 'Payment Details' and 'Denomination'. At the bottom right, there are 'Submit' and 'Cancel' buttons.

2.8.6.1 Main Transaction Details

Specify the details in the **Domestic Transfer Against Walk-in** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: International Transfer Against Walk-in](#).

Field Description: International Transfer Against Walk-in

Field	Description
Transaction Amount	Specify the currency in which the cash is accepted from walk-in customer and the transaction amount as requested by the customer.
Transfer Currency	Specify the currency in which the funds to be transferred.
Transfer Amount	System display the transfer amount based on the exchange rate pickup. NOTE: This field is displayed only if Multi Currency Configuration at Function Code Indicator level is set as Y.
Exchange Rate	Displays the exchange rate used to convert the transfer currency into transaction currency and it can be modified. NOTE: If the transfer currency is same as the account currency, the system displays the exchange rate as 1. This field is displayed only if Multi Currency Configuration at Function Code Indicator level is set as Y.
Total Charges	Displays the total charge amount, which is computed by the system. NOTE: This field is displayed only if Multi Currency Configuration at Function Code Indicator level is set as Y.

Field	Description
Narrative	Displays the default narrative International Transfer Against Walk-in and it can be modified.

2.8.6.2 Payment Details

The **Payment Details** segment is used to specify the details of remitter, beneficiary, and remittance information. For more information on this segment, refer to the topic [2.8.5.2 Payment Details](#) in this guide.

2.8.6.3 Denomination Details

The **Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the denomination units. For more information on this segment, refer to the topic [2.4.11.2 Denomination Details](#) in this guide.

2.8.6.4 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

2.8.6.5 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any warning raised when the transaction saves. When you submit, the transaction details are handed off to Oracle Banking Payments system for outgoing payment creation and processing with external system status as **Pending**. After the transaction is processed and responded from Oracle Banking Payments with appropriate status, the Teller selects the transaction from **Journal Log** and completes the transaction.

2.9 Clearing

This section describes the screen used to perform the clearing. The **Cheque Deposit** screen is described in the following sub-section:

- [2.9.1 Cheque Deposit](#)
- [2.9.2 Cheque Return](#)
- [2.9.3 Inward Clearing Data Entry](#)
- [2.9.4 Outward Clearing Data Entry](#)

2.9.1 Cheque Deposit

The Teller can use this screen to capture the cheque deposit request submitted by the customer. To process this screen, type **Cheque Deposit** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Clearing**, click **Cheque Deposit**.
→ The **Cheque Deposit** screen is displayed.

Figure 99: Cheque Deposit

The screenshot displays the 'Cheque Deposit' screen with the following fields and controls:

- Payee Account ***: Text input field.
- Account Amount ***: Text input field.
- Cheque Amount ***: Text input field with a dropdown menu showing 'GBP'.
- Cheque Number ***: Text input field.
- Cheque Date ***: Date picker showing 'Mar 26, 2020'.
- Cheque Deposit Date ***: Date picker showing 'Mar 26, 2020'.
- Drawer Account ***: Text input field.
- Drawer Name ***: Text input field.
- Routing Number ***: Text input field.
- Exchange Rate**: Text input field with up and down arrow buttons.
- Total Charges(LCY)**: Text input field showing 'GBP0.00'.
- Network Code**: Text input field with a search icon.
- Narrative ***: Text input field showing 'Cheque Deposit'.
- Charge Details**: Section header with a right-pointing triangle icon.
- Submit** and **Cancel** buttons at the bottom right.

2.9.1.1 Main Transaction Details

Specify the details in the **Cheque Deposit** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Cheque Deposit](#).

Field Description: Cheque Deposit

Field	Description
Payee Account	<p>Specify the customer account number in which the cheque needs to be deposited. When you press Tab key, the following details are displayed:</p> <ul style="list-style-type: none"> • Customer ID • Image • Signature • KYC Status • Account Balance • Address <p>NOTE: If the specified account number is a joint account holder, the joint holder details of the account can be viewed in the Customer Information Widget along with mode of operation.</p>
Account Amount	Displays the account amount.
Cheque Amount	Specify the currency and amount mentioned in the cheque that needs to be deposited in the account.
Cheque Number	Specify the MICR number displayed on the cheque.
Cheque Date	Specify the cheque issued date.
Drawer Account	Specify the account number on which the cheque is drawn.
Cheque Deposit Date	Displays the current posting date as the cheque deposit date.
Drawer Name	Specify the name of the drawer account.

Field	Description
Routing Number	Specify the routing number for cheque clearance. The system will not validate the specified routing number.
Network Code	Specify the network code. You can also select from the list of maintained clearing codes.
Exchange Rate	<p>Displays the exchange rate used to convert the cheque currency into transaction currency and it can be modified.</p> <p>NOTE: If the transfer currency is same as the account currency, the system displays the exchange rate as 1. This field is displayed only if Multi Currency Configuration at Function Code Indicator level is set as Y.</p>
Total Charges (LCY)	<p>Displays the total charge amount, which is computed by the system.</p> <p>NOTE: This field is displayed only if Multi Currency Configuration at Function Code Indicator level is set as Y.</p>
Narrative	Displays the default narrative Cheque Deposit and it can be modified.

2.9.1.2 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

2.9.1.3 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any warning raised when the transaction saves. When you submit, the transaction details are handed off to Oracle Banking Payments system for instruments processing with external system status as **Pending**.

After the transaction is processed and responded from Oracle Banking Payments with appropriate status, the Teller selects the transaction from **Journal Log** and completes the transaction.

2.9.2 Cheque Return

The Teller can use this screen to initiate manual return of inward or outward clearing cheques. An inward cheque transaction may not be processed successfully for funds needed in the drawer account or due to stop payment of cheque. In addition, an outward cheque transaction may get returned if the same has returned from the clearing house. To process this screen, type **Cheque Return** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Clearing**, click **Cheque Return**.

→ The **Cheque Return** screen is displayed.

Figure 100: Cheque Return

The screenshot displays the 'Cheque Return' application window. It features a header bar with the title 'Cheque Return'. Below the header, the form is organized into two columns. The left column contains fields for 'Drawer Account *', 'Cheque Number *', 'Drawer Account', 'Cheque Number', 'Cheque Date', 'Payee Name', 'Return Type', and 'Reject Reason'. The right column contains fields for 'Cheque Number *', 'Drawer Routing No', 'Cheque Amount', 'Payee Account', 'Payee Routing No', 'Reject Code *', and 'Narrative *'. A 'Query' button and a 'clear' button are positioned below the first 'Drawer Account' field. A search icon is located next to the 'Reject Code' field. The 'Narrative' field contains the text 'Cheque Return'. At the bottom right of the form, there are 'Submit' and 'Cancel' buttons.

2.9.2.1 Main Transaction Details

Specify the details in the **Cheque Return** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Cheque Return](#).

Field Description: Cheque Return

Field	Description
Drawer Account	Specify the drawer account number.
Cheque Number	Specify the cheque number.
Query	Click this icon to fetch cheque details.
Clear	Click this icon to clear the cheque details.
Drawer Account	Displays the drawer account number.
Drawer Routing No	Displays the routing number of the specified drawer account.
Cheque Number	Displays the cheque number.
Cheque Amount	Displays the cheque amount.
Cheque Date	Displays the cheque date.
Payee Account	Displays the payee account number.
Payee Name	Displays the payee name.
Payee Routing No.	Displays the payee routing number.
Return Type	Displays the return type (Inward and Outward).
Reject Code	Select the reject code from the list of values.

Field	Description
Reject Reason	Displays the reject reason
Total Charges	Displays the total charge amount, which is computed by the system.
Narrative	Displays the default narrative Cheque Return and it can be modified.

2.9.2.2 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any warning raised when the transaction saves.

2.9.3 Inward Clearing Data Entry

The Teller can use this screen to initiate the inward processing of bulk instruments. This screen supports to capture bulk input of inward clearing transactions for multiple instrument types – Cheque, Bankers Cheque, and Demand Draft. It also supports bulk data entry of inward clearing transactions for single and multiple customer accounts.

To process this screen, type **Inward Clearing Data Entry** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Clearing**, click **Inward Clearing Data Entry**.

→ The **Inward Clearing Data Entry** screen is displayed.

Figure 101: Inward Clearing Data Entry

2.9.3.1 Main Transaction Details

Specify the details in the **Inward Clearing Data Entry** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Inward Clearing Data Entry](#).

Field Description: Inward Clearing Data Entry

Field	Description
Batch Reference Number	Displays the unique batch number, which is system generated.

Field	Description
Instrument Currency	Displays the current logged branch currency. You can also select the instrument currency from the drop-down values.
Total Amount	Displays the total batch amount in instrument currency.
Entry Details	Specify the fields.
Instrument Type	Select the instrument type from the drop-down values.
Drawer Account	Specify the drawer account number.
Account Name	Displays the name of the account number specified.
Account Branch	Displays the branch code of the account number specified.
Account Currency	Displays the currency of the account number specified.
Instrument No	Specify the instrument number.
Instrument Date	Specify the date of the instrument.
Instrument Amount	Specify the amount of the instrument.
Clearing Type	Specify the clearing type. You can also select from the list of values.
Drawer Routing No	Specify the routing number. You can also select from the list of values.
Payee Account	Specify the payee account number. You can also select from the list of values.

Field	Description
Payee Routing Number	Specify the routing number of the cheque. You can also select from the list of values.
Narrative	Displays the default narrative Inward Clearing Data Entry and it can be modified.
Add Entry	Click this icon to add multiple records in table and allows modifying or deleting if required.
Reset	Click this icon to reset the multiple entry details table.

2.9.3.2 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any warning raised when the transaction saves. On submission of data entry, the individual instrument details will be handed off to OBPM using Inward Clearing Service. The notification from the OBPM system will automatically resubmit the data entry and pass charge accounting entries on successful clearing.

In case of reject notification of any transaction from OBPM, teller can either modify the data and resubmit the transaction or discard the data entry.

2.9.4 Outward Clearing Data Entry

The Teller can use this screen to initiate the bulk deposit of instruments. This screen supports to capture bulk input of outward clearing transactions for multiple instrument types – Cheque, Bankers Cheque, and Demand Draft. It also supports bulk data entry of outward clearing transactions for single and multiple customer accounts.

To process this screen, type **Outward Clearing Data Entry** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Clearing**, click **Outward Clearing Data Entry**.

→ The **Outward Clearing Data Entry** screen is displayed.

Figure 102: Outward Clearing Data Entry

2.9.4.1 Main Transaction Details

Specify the details in the **Outward Clearing Data Entry** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Outward Clearing Data Entry](#).

Field Description: Outward Clearing Data Entry

Field	Description
Batch Number	Displays the unique batch number, which is system generated.

Field	Description
Instrument Currency	Displays the current logged branch currency. You can also select the instrument currency from the drop-down values.
Total Amount	Displays the total batch amount in instrument currency.
Entry Details	Specify the fields.
Payee Account	Specify the payee account number.
Account Name	Displays the name of the payee account number specified.
Account Currency	Displays the currency of the payee account number specified.
Account Branch	Displays the branch code of the payee account number specified.
Instrument Type	Select the instrument type from the drop-down values.
Drawer Account	Specify the drawer account number.
Drawer Name	Specify the name of drawer account.
Instrument No	Specify the instrument number.
Instrument Date	Specify the date of the instrument.
Instrument Amount	Specify the amount of the instrument.
Clearing Type	Select the clearing type for the deposited instrument.
Drawer Routing No	Specify the routing number of the cheque. You can also select from the list of values.

Field	Description
Narrative	Displays the default narrative Outward Clearing Data Entry and it can be modified.
Add Entry	Click this icon to add multiple records in table and allows modifying or deleting if required.
Reset	Click this icon to reset the multiple entry details table.

2.9.4.2 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any warning raised when the transaction saves. On submission of data entry, the individual instrument details will be handed off to OBPM using Outward Clearing Service. The notification from the OBPM system will automatically resubmit the data entry and pass charge accounting entries on successful clearing.

In case of reject acknowledgment of any transaction from OBPM, the teller can retry the individual record from the EJ screen until the batch is in Pending status.

2.10 Remittances

This section describes the various types of remittances performed. The remittances are categorized into following sub-sections:

- [2.10.1 Bankers Cheque](#)
- [2.10.2 Demand Drafts](#)

2.10.1 Bankers Cheque

This sub-section describes the various screens used to perform the remittances related to Bankers Cheque (BC). The screens are described in the following topics:

- [2.10.1.1 BC Issue Against Customer Account](#)
- [2.10.1.2 BC Issue Against Walk-in](#)
- [2.10.1.3 BC Issue Against GL](#)
- [2.10.1.4 BC Print/Re-print](#)
- [2.10.1.5 BC Operations](#)

2.10.1.1 BC Issue Against Customer Account

The Teller can use this screen to issue a BC against the savings account of a customer. To process this screen, type **BC Issue - Account** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Remittances**, click **BC Issue - Account**.

→ The **BC Issue Against Account** screen is displayed.

Figure 103: BC Issue Against Account

2.10.1.1.1 Main Transaction Details

Specify the details in the **BC Issue Against Account** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: BC Issue Against Account](#).

Field Description: BC Issue Against Account

Field	Description
Issuing Branch Code	Displays the code of the logged-in branch.
Branch Name	Displays the description of issuing branch.
BC Amount	Select the BC currency from the drop-down list and specify the BC amount.
BC Date	Select the date that needs to be mentioned in the BC. The current posting date is displayed by default.
MICR No	Specify the MICR number and validate. If not specified, the system generates the MICR number based on the maintenance setup.
BC No	Displays the BC number.
Payee Details	Specify the fields.
Payee Name	Specify the payee name on which the BC is drawn.
Address Line 1 to Address Line 4	Specify the address of the payee.
Identification Type	Select the identification type of the payee from the drop-down list.
Payee Identification Number	Specify the identification number of the payee.
Narrative	Displays the default narrative BC Issuance Account and it can be modified.

2.10.1.1.2 Funding Details

Figure 104: Funding Details

Specify the details in the **Funding Details** segment. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Funding Details](#).

Field Description: Funding Details

Field	Description
Drawer Account	Specify the account number of the customer who has requested the BC.
Drawer Name	Displays the name of the specified drawer account number.
Cheque Number	Specify the cheque number of the drawer account.
Cheque Date	Specify the date as mentioned in the cheque.
Exchange Rate	<p>Displays the exchange rate used to convert the BC currency into account currency and it can be modified.</p> <p>NOTE: If the transaction currency is the same as the account currency, the system will display the exchange rate as 1. This field is displayed only if Multi Currency Configuration at Function Code Indicator level is set as Y.</p>

Field	Description
Account Amount	Displays the transaction amount converted in terms of account amount based on the exchange rate. NOTE: This field is displayed only if Multi Currency Configuration at Function Code Indicator level is set as Y .
Total Charges	Displays the total charges applicable for the BC issuance. NOTE: This field is displayed only if Total Charges Configuration at Function Code Indicator level is set as Y .

2.10.1.1.3 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

2.10.1.1.4 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any warning raised when the transaction saves. When you submit, the transaction details are handed off to Oracle Banking Payments system for instruments processing with external system status as **Pending**.

After the transaction is processed and responded from Oracle Banking Payments with appropriate status, the Teller selects the transaction from **Journal Log** and completes the transaction.

2.10.1.2 BC Issue Against Walk-in

The Teller can use this screen to issue a BC to the walk-in customers who does not have account with the bank. To process this screen, type **BC Issue - Walk-in** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Remittances**, click **BC Issue - Walk-in**.

→ The **BC Issue Against Walk-in** screen is displayed.

Figure 105: BC Issue Against Walk-in

2.10.1.2.1 Main Transaction Details

Specify the details in the **BC Issue Against Walk-in** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: BC Issue Against Walk-in](#).

Field Description: BC Issue Against Walk-in

Field	Description
Issuing Branch Code	Displays the code of the logged-in branch.
Branch Name	Displays the description of issuing branch.
BC Amount	Select the BC currency from the drop-down list and specify the BC amount.
BC Date	Select the date that needs to be mentioned in the BC. The current posting date is displayed by default.
BC No	Specify the instrument number and validate. If not specified, the system generates the BC number based on the maintenance setup.
MICR Number	Displays the MICR number.
Payee Details	Specify the fields.
Payee Name	Specify the payee name on which the BC is drawn.
Address Line 1 to Address Line 4	Specify the address of the payee.
Identification Type	Select the identification type of the payee from the drop-down list.
Payee Identification Number	Specify the identification number of the payee.
Narrative	Displays the default narrative BC Issuance Against Walk-in and it can be modified.

2.10.1.2.2 Funding Details

Figure 106: Funding Details

Specify the details in the **Funding Details** segment. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Funding Details](#).

Field Description: Funding Details

Field	Description
Transaction Amount	Specify the transaction currency in which the walk-in customer deposits the cash.
Drawer Name	Specify the name of the drawer.
Address Line 1 to Address Line 4	Specify the address of the payee.
Identification Type	Select the identification type of the payee from the drop-down list.
Identification Number	Specify the identification number of the payee.
Exchange Rate	Displays the exchange rate.

Field	Description
	<p>NOTE: If the transaction currency is the same as the account currency, the system will display the exchange rate as 1. This field is displayed only if Multi Currency Configuration at Function Code Indicator level is set as Y.</p>
Total Charges	<p>Displays the total charges applicable for the BC issuance.</p> <p>NOTE: This field is displayed only if Total Charges Configuration at Function Code Indicator level is set as Y.</p>

2.10.1.2.3 Denomination Details

The **Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the denomination units. For more information on this segment, refer to the topic [2.4.11.2 Denomination Details](#) in this guide.

2.10.1.2.4 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

2.10.1.2.5 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

For more information on transaction submission and validations, refer to the topic [2.10.1.1.4 Transaction Submission](#) in this guide.

2.10.1.3 BC Issue Against GL

The Teller can use this screen to issue a BC against a GL account for the customer. To process this screen, type **BC Issue - GL** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Remittances**, click **BC Issue - GL**.

→ The **BC Issue Against GL** screen is displayed.

Figure 107: BC Issue Against GL

2.10.1.3.1 Main Transaction Details

Specify the details in the **BC Issue Against GL** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: BC Issue Against GL](#).

Field Description: BC Issue Against GL

Field	Description
Issuing Branch Code	Displays the logged-in branch code.

Field	Description
Branch Name	Displays the description of issuing branch.
BC Amount	Select the BC currency from the drop-down list and the BC amount.
BC Date	Select the date that needs to be mentioned in the BC. The current posting date is displayed by default.
BC No	Specify the instrument number and validate. NOTE: If not specified, the system generates the BC number based on the maintenance setup.
MICR Number	Displays the MICR number.
Payee Details	Specify the fields.
Payee Name	Specify the payee name on which the BC is drawn.
Address Line 1 to Address Line 4	Specify the address of the payee.
Identification Type	Select the identification type of the payee from the drop-down list.
Payee Identification Number	Specify the identification number of the payee.
Narrative	Displays the default narrative BC Issuance Against GL and it can be modified.

2.10.1.3.2 Funding Details

Figure 108: Funding Details

Specify the details in the **Funding Details** segment. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Funding Details](#).

Field Description: Funding Details

Field	Description
GL Account	Select the account number of the GL against which the BC is issued from the LOV.
GL Description	Displays a brief description on the general ledger.
Drawer Name	Specify the name of the drawer.
Identification Type	Select the identification type of the payee from the drop-down list.
Identification Number	Specify the identification number of the payee.

2.10.1.3.3 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

2.10.1.3.4 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

For more information on transaction submission and validations, refer to the topic [2.10.1.1.4 Transaction Submission](#) in this guide.

2.10.1.4 BC Print/Re-print

The Teller can use this screen to print a BC. It also used to re-print the BC, if it is not properly printed or to issue duplicate instruments. The system keeps a track of such reprints so that the bank officials or auditors can determine the reasons and validity of multiple instrument printing.

To process this screen, type **BC Print-Reprint** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Remittances**, click **BC Print-Reprint**.

→ The **BC Print-Reprint** screen is displayed.

Figure 109: BC Print-Reprint

The screenshot displays the 'BC Print-Reprint' application window. It features a left sidebar with a search bar and a main content area with two columns of input fields. The left column includes fields for 'BC No *', 'Print Type *' (with a dropdown arrow), a 'Clear' button, 'Issuing Branch Code', 'BC Date', 'Drawer Name', 'Beneficiary Details:-' (with a sub-label 'Beneficiary Name'), 'Address Line 1', 'Address Line 3', 'Reprint Count', and 'Narrative *'. The right column includes an 'Issue Branch Code *' field with a search icon and a 'Query' button, 'BC Amount' (displaying 'GBP0.00'), 'BC Status', 'Identification Details' (with sub-labels 'Address Line 2' and 'Address Line 4'), and a 'Submit' button. A 'Cancel' button is located at the bottom right of the window.

2.10.1.4.1 BC Transaction Details

Specify the details in the **BC Print-Reprint** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: BC Print-Reprint](#).

Field Description: BC Print-Reprint

Field	Description
BC No	Specify the BC number of the instrument that you need to print or re-print.
Issue Branch Code	Select the branch code where the instrument is issued from the LOV.
Print Type	Select the type Print or Reprint from the drop-down list.
Query	Click this icon to fetch details of BC transaction.
Issuing Branch Code	Displays the logged-in branch code.
BC Date	Displays the date mentioned in the BC.
BC Amount	Displays the BC currency and the BC amount.
Drawer Name	Displays the name of the drawer.
BC Status	Displays the status of the BC.
Beneficiary Details	Specify the fields.
Beneficiary Name	Displays the beneficiary name.
Identification Details	Displays the identification details of the beneficiary.
Address Line 1 to Address Line 4	Specify the address of the beneficiary.
Reprint Count	Specify the count of the current reprint operation. This is applicable for reprint option only.

Field	Description
Narrative	Displays the default narrative as Print/Reprint and it can be modified.

2.10.1.4.2 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any warning raised when the transaction saves.

2.10.1.5 BC Operations

The Teller can use this screen to handle the life cycle processing of Bankers Cheque that is already issued. The operations, which are allowed in this screen are:

- Inquiry – Teller can use this option to inquire the details of BC.
- Revalidate – When a customer requests for revalidation of instrument that is in expired status, Teller can validate the instrument details and initiate revalidation of BC. The system will allow for revalidation only if:
 - Revalidation is allowed at Instrument type level
 - Instrument is not liquidated, cancelled, or refunded
 - Instrument is issued, revalidated, or duplicate issued but not liquidated/refunded/cancelled
- Duplicate Issue – If Customer or banker lost the instrument or if the instrument is damaged, Teller can issue it again. In case of request raised by the customer, additional charges will be deducted while issuing again. The system will allow for Duplicate Issue only if:
 - Duplicate issue is allowed at Instrument type level
 - Instrument is not liquidated, cancelled, or refunded
 - Instrument is issued or revalidated but not liquidated/refunded/cancelled
- Payment Reversal – Teller can use this option to make reversal of payment for BC.

- Payment – Teller can use this option to make payment against a BC.
- Refund – Teller can use this option to refund the amount against a BC.
- Cancel – Teller can use this option to cancel a BC.

To process this screen, type **BC Operations** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Remittances**, click **BC Operations**.

→ The **BC Operations** screen is displayed.

Inquiry Mode:

Figure 110: BC Operations (Inquiry)

The screenshot displays the 'BC Operations' screen in Inquiry Mode. The interface is divided into two main columns of input fields. The left column includes fields for 'BC No *', 'Operation Type *' (set to 'Enquiry'), 'BC Details' (with 'Issue Branch'), 'BC Amount', 'Issue Date', 'BC Status', 'Revalidation Date', 'Liquidation Date', 'Beneficiary Details' (with 'Beneficiary Name', 'Exchange Rate', 'Beneficiary Address 1', and 'Identification Type'). The right column includes fields for 'Issue Branch *', 'Payable Branch', 'MICR No', 'Issue Mode', 'Narrative' (with 'BC Inquiry'), 'Duplicate Issue Date', 'Liquidation Mode', 'Beneficiary Account', 'Credit Amount', 'Beneficiary Address 2', and 'Identification Number'. Fields marked with an asterisk (*) are mandatory.

2.10.1.5.1 Main Transaction Details (Inquiry Mode)

Specify the details in the **BC Operations** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: BC Operations \(Inquiry\)](#).

Field Description: BC Operations (Inquiry)

Field	Description
Operation Type	Select the type Inquiry from the drop-down list.
BC No	Specify the BC number of the instrument.
Issue Branch Code	Select the branch code where the instrument is issued from the LOV. After you specify the Issue Branch Code and Bankers Cheque No , press Tab key. The system will make a service call to OBPM and fetch the bankers cheque details.
BC Details	Displays the details of BC under this segment.
Issue Branch	Displays the logged-in branch code.
Payable Branch	Displays the payable branch for the BC.
BC Amount	Displays the BC currency and the BC amount.
MICR No	Displays the MICR number.
Issue Date	Displays the issue date mentioned in the BC.
Issue Mode	Displays the issue mode of the BC.
Bankers Cheque Status	Displays the status of the BC.
Narrative	Displays the default narrative as BC Inquiry and it can be modified.
Revalidation Date	Displays the date of BC revalidation.
Duplicate Issue Date	Displays the duplicate issue date of BC.

Field	Description
Liquidation Date	Displays the liquidation date of BC.
Liquidation Mode	Displays the liquidation mode of BC.
Beneficiary Details	Specify the fields.
Beneficiary Name	Displays the beneficiary name.
Beneficiary Account	Displays the beneficiary account number.
Customer ID	Displays the Customer ID.
Exchange Rate	<p>Displays the exchange rate and it can be modified.</p> <p>NOTE: If the transaction currency is the same as the account currency, the system will display the exchange rate as 1.</p>
Credit Amount	Displays the credit amount.
Beneficiary Address 1 and Beneficiary Address 2	Displays the address of the beneficiary.
Identification Type	Displays the identification type of the beneficiary.
Identification Number	Displays the identification number of the beneficiary.
Funding Details	Funding details are displayed under this segment.
Drawer Name	Displays the drawer name.
Drawer Account	Displays the account number of the drawer.
Customer ID	Displays the customer ID of the drawer.

Field	Description
Exchange Rate	Displays the exchange rate.
Debit Amount	Displays the amount that needs to be debited from the drawer account.
Cheque Number	Displays the cheque number.
Cheque Date	Displays the date mentioned in the cheque.
Drawer Address 1 and Drawer Address 2	Displays the address of the drawer.
Identification Type	Displays the identification type of the drawer.
Identification Number	Displays the identification number of the drawer.

Total Charge Amount	<p>Displays the total charge amount.</p> <p>NOTE: This field is displayed only if Total Charges Configuration at Function Code Indicator level is set as Y.</p>
Narrative	Displays the default narrative as BC Cancel by GL and it can be modified.

2.10.1.5.14 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. This segment is not applicable for the **Inquiry** and **Cancel** modes. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

2.10.1.5.15 Denomination Details

The **Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the denomination units. This segment is applicable to the **Duplicate**, **Payment** (Cash), and **Refund** (Cash) modes. For more information on this segment, refer to the topic [2.4.11.2 Denomination Details](#) in this guide.

2.10.1.5.16 View Bankers Cheque Details

This segment is used to view the additional details of the BC. This will be a non-editable data segment and it is not applicable for the **Inquiry** mode.

2.10.1.5.17 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any warning raised when the transaction saves. On transaction submission, the system will handoff the details to payments product processor (OBPM) for processing. When you get success notification from OBPM, the system will update the transaction status as **Success** and mark for charges accounting handoff. The transaction accounting is not applicable for the transaction. In case of reject notification from OBPM, the system will discard the transaction. In addition, the transaction accounting is not applicable for the **Duplicate Issue** mode and the transaction submission is not required for **Inquiry** mode.

2.10.2 Demand Drafts

This sub-section describes the various screens used to perform the remittances related to Demand Draft (DD). The screens are described in the following topics:

- [2.10.2.1 DD Issue Against Account](#)
- [2.10.2.2 DD Issue Against Walk-in](#)
- [2.10.2.3 DD Issue against GL](#)
- [2.10.2.4 DD Print/Re-print](#)
- [2.10.2.5 DD Operations](#)

2.10.2.1 DD Issue Against Account

The Teller can use this screen to issue a Demand Draft (DD) against the savings account of the customer. To process this screen, type **DD Issue - Account** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Remittances**, click **DD Issue - Account**.

→ The **DD Issue Against Account** screen is displayed.

Figure 123: DD Issue Against Account

The screenshot displays the 'DD Issue Against Account' form. It is organized into two main columns. The left column contains fields for 'Payable Branch Code *' (with a search icon), 'Issuing Branch Code' (pre-filled with '000'), 'DD Amount *' (with a currency dropdown set to 'GBP'), 'MICR No', and a 'Payee Details' section. The 'Payee Details' section includes 'Payee Name *', 'Address Line 1', 'Address Line 3', and 'Narrative *' (pre-filled with 'DD Issuance Account'). The right column contains 'Payable Branch Name', 'Branch Name' (pre-filled with 'FLEXCUBE UNIVERSAL BANK'), 'DD Date *' (pre-filled with 'Mar 26, 2020' and a calendar icon), and 'DD No'. Below these columns are two expandable sections: 'Funding Details' and 'Charge Details'. At the bottom right, there are 'Submit' and 'Cancel' buttons.

2.10.2.1.1 Main Transaction DD Details

Specify the details in the **DD Issue Against Account** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: DD Issue Against Account](#).

Field Description: DD Issue Against Account

Field	Description
Payable Branch Code	Specify the branch code in which the demand drafts can be liquidated.
Payable Branch Name	Displays the name of payable branch.
Issuing Branch Code	Displays the logged-in branch code.
Branch Name	Displays the branch description of issuing branch
DD Amount	Specify the DD currency and DD amount.
DD Date	Specify the date that needs to be mentioned in the DD.
MICR No	Displays the MICR number.
DD No	Specify the instrument number and validate. If not specified, system generates the DD number based on the maintenance setup.
Narrative	Displays the narrative as DD Issuance Account and it can be modified.
Payee Details	Specify the fields.
Payee Name	Specify the payee name on which the DD is drawn.
Address Line 1 to Address Line 4	Specify the address of the payee.

2.10.2.1.2 Funding Details

Figure 124: Funding Details

Specify the details in the **Funding Details** segment. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Funding Details](#).

Field Description: Funding Details

Field	Description
Drawer Account	Specify the account number of the customer who has requested the DD.
Drawer Name	Displays the name of the specified drawer account number.
Cheque Number	Specify the cheque number of the drawer account.
Cheque Date	Specify the date as mentioned in the cheque.
Exchange Rate	Displays the exchange rate. NOTE: If the transaction currency is the same as the account currency, the system will display the exchange rate as 1. This field is displayed only if Multi Currency Configuration at Function Code Indicator level is set as Y .
Account Amount	Displays the account amount in account currency.

Field	Description
	NOTE: This field is displayed only if Multi Currency Configuration at Function Code Indicator level is set as Y .
Total Charges	Displays the total charges applicable for the DD issuance. NOTE: This field is displayed only if Total Charges Configuration at Function Code Indicator level is set as Y .

2.10.2.1.3 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

2.10.2.1.4 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

For more information on transaction submission and validations, refer to the topic [2.10.1.1.4 Transaction Submission](#) in this guide.

2.10.2.2 DD Issue Against Walk-in

The Teller can use this screen to issue a DD to a walk-in customer. To process this screen, type **DD Issue - Walk-in** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Remittances**, click **DD Issue - Walk-in**.

→ The **DD Issue Against Walk-in** screen is displayed.

Figure 125: DD Issue Against Walk-in

2.10.2.2.1 Main Transaction DD Details

Specify the details in the **DD Issue Against Walk-in** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: DD Issue Against Walk-in](#).

Field Description: DD Issue Against Walk-in

Field	Description
Payable Branch Code	Specify the branch code in which the demand drafts can be liquidated.

Field	Description
Payable Branch Name	Displays the name of payable branch.
Issuing Branch Code	Displays the logged-in branch code.
Branch Name	Displays the branch description of issuing branch
DD Amount	Specify the DD currency and DD amount.
DD Date	Specify the date that needs to be mentioned in the DD.
MICR No	Displays the serial number.
DD No	Specify the instrument number and validate. NOTE: If not specified, system generates the DD number based on the maintenance setup.
Narrative	Displays the narrative as DD Issuance against Walk-in and it can be modified.
Payee Details	Specify the fields.
Payee Name	Specify the payee name on which the DD is drawn.
Address Line 1 to Address Line 4	Specify the address of the payee.

2.10.2.2.2 Funding Details

Figure 126: Funding Details

Specify the details in the **Funding Details** segment. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Funding Details](#).

Field Description: Funding Details

Field	Description
Transaction Amount	Specify the transaction currency, the currency in which the walk-in customer deposit the cash.
Drawer Name	Specify the name of the drawer.
Address Line 1 to Address Line 4	Specify the address of the payee.
Identification Type	Select the identification type of the payee from the drop-down list.
Identification Number	Specify the identification details of the payee.
Exchange Rate	<p>Displays the exchange rate.</p> <p>NOTE: If the transaction currency is the same as the account currency, the system will display the exchange rate as 1. This field is displayed only if Multi Currency Configuration at Function Code Indicator level is set as Y.</p>

Field	Description
Total Charges	<p>Displays the total charges applicable for the DD issuance.</p> <p>NOTE: This field is displayed only if Total Charges Configuration at Function Code Indicator level is set as Y.</p>

2.10.2.2.3 Denomination Details

The **Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the denomination units. For more information on this segment, refer to the topic [2.4.11.2 Denomination Details](#) in this guide.

2.10.2.2.4 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

2.10.2.2.5 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

For more information on transaction submission and validations, refer to the topic [2.10.1.1.4 Transaction Submission](#) in this guide.

2.10.2.3 DD Issue against GL

The Teller can use this screen to issue a DD against a GL account for the customer. To process this screen, type **DD Issue - GL** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Remittances**, click **DD Issue - GL**.

→ The **DD Issue Against GL** screen is displayed.

Figure 127: DD Issue Against GL

2.10.2.3.1 Main Transaction DD Details

Specify the details in the **DD Issue Against GL** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: DD Issue Against GL](#).

Field Description: DD Issue Against GL

Field	Description
Payable Branch Code	Specify the branch code in which the demand drafts can be liquidated.
Payable Branch Name	Displays the name of payable branch.

Field	Description
Issuing Branch Code	Displays the logged-in branch code.
Branch Name	Displays the branch description of issuing branch
DD Amount	Specify the DD currency and DD amount.
DD Date	Specify the date that needs to be mentioned in the DD.
MICR No	Displays the serial number.
DD No	Specify the instrument number and validate. NOTE: If not specified, system generates the DD number based on the maintenance setup.
Narrative	Displays the narrative as DD Issuance Against GL and it can be modified.
Payee Details	Specify the fields.
Payee Name	Specify the payee name on which the DD is drawn.
Address Line 1 to Address Line 4	Specify the address of the payee.

2.10.2.3.2 Funding Details

Figure 128: Funding Details

Funding Details

GL Account ^{*} 🔍

Drawer Name

Identification Number

GL Description

Identification Type

Select

Specify the details in the **Funding Details** segment. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Funding Details](#).

Field Description: Funding Details

Field	Description
GL Account	Select the account number of the GL against which the BC is issued from the LOV.
GL Description	Displays a brief description on the general ledger.
Drawer Name	Specify the name of the drawer.
Identification Type	Select the identification type of the payee from the drop-down list.
Identification Number	Specify the identification number of the payee.

2.10.2.3.3 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

2.10.2.3.4 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

For more information on transaction submission and validations, refer to the topic [2.10.1.1.4 Transaction Submission](#) in this guide.

2.10.2.4 DD Print/Re-print

The Teller can use this screen to print a DD. It also used to re-print the DD, if it is not properly printed or to issue duplicate instruments. The system keeps a track of such re-prints so that the bank officials or auditors can determine the reasons and validity of multiple instrument printing.

To process this screen, type **DD Print-Reprint** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Remittances**, click **DD Print-Reprint**.

→ The **DD Print-Reprint** screen is displayed.

Figure 129: DD Print-Reprint

The screenshot displays the 'DD Print-Reprint' application window. It features a left sidebar with a search bar and a main content area with two columns of input fields. The left column includes fields for 'Demand Draft No *', 'Print Type *', 'Issuing Branch Code', 'DD Date', 'Drawer Name', 'Beneficiary Details' (with sub-fields for 'Beneficiary Name', 'Address Line 1', 'Address Line 2', 'Address Line 3', 'Reprint Count', and 'Narrative *'), and 'DD Print-Reprint'. The right column includes 'Issue Branch Code *' with a search icon, 'Query' and 'Clear' buttons, 'DD Amount' (displaying 'GBP0.00'), 'DD Status', 'Identification Details', and 'Address Line 4'. At the bottom right, there are 'Submit' and 'Cancel' buttons.

2.10.2.4.1 DD Transaction Details

Specify the details in the **DD Print-Reprint** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: DD Print-Reprint](#).

Field Description: DD Print-Reprint

Field	Description
Demand Draft No	Specify the DD number of the instrument that you need to print or re-print.
Issue Branch Code	Select the branch code where the instrument is issued from the LOV.
Print Type	Select the type Print or Reprint from the drop-down list.
Query	Click this icon to fetch details of DD print or re-print.
Issuing Branch Code	Displays the logged-in branch code.
DD Date	Displays the date mentioned in the DD.
DD Amount	Displays the DD currency and the DD amount.
Drawer Name	Displays the name of the drawer.
DD Status	Displays the status of the DD.
Beneficiary Details	Specify the fields.
Beneficiary Name	Displays the beneficiary name.
Identification Details	Displays the identification details of the beneficiary.
Address Line 1 to Address Line 4	Specify the address of the beneficiary.
Reprint Count	Specify the count of the current reprint operation. This is applicable for reprint option only.

Field	Description
Narrative	Displays the default narrative as Print/Reprint and it can be modified.

2.10.2.4.2 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any warning raised when the transaction saves.

2.10.2.5 DD Operations

The Teller can use this screen to handle the life cycle processing of Demand Draft that is already issued. The operations, which are allowed in this screen are:

- Inquiry – Teller can use this option to inquire the details of DD.
- Revalidate – When a customer requests for revalidation of instrument that is in expired status, Teller can validate the instrument details and initiate revalidation of DD. The system will allow for revalidation only if:
 - Revalidation is allowed at Instrument type level
 - Instrument is not liquidated, cancelled, or refunded
 - Instrument is issued, revalidated, or duplicate issued but not liquidated/refunded/cancelled
- Duplicate Issue – If Customer or banker lost the instrument or if the instrument is damaged, Teller can issue it again. In case of request raised by the customer, additional charges will be deducted while issuing again. The system will allow for Duplicate Issue only if:
 - Duplicate issue is allowed at Instrument type level
 - Instrument is not liquidated, cancelled, or refunded
 - Instrument is issued or revalidated but not liquidated/refunded/cancelled
- Payment Reversal – Teller can use this option to make reversal of payment for DD.

- Payment – Teller can use this option to make payment against a DD.
- Refund – Teller can use this option to refund the amount against a DD.
- Cancel – Teller can use this option to cancel a DD.

To process this screen, type **DD Operations** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Remittances**, click **DD Operations**.

→ The **DD Operations** screen is displayed.

Inquiry Mode:

Figure 130: DD Operations (Inquiry)

The screenshot displays the 'DD Operations' screen in Inquiry Mode. The interface is divided into two main columns of input fields. The left column includes fields for 'Demand Draft No *', 'Operation Type *' (set to 'Enquiry'), 'Demand Draft Details' (with 'Issue Branch'), 'Demand Draft Amount', 'Issue Date', 'Demand Draft Status', 'Revalidation Date', 'Liquidation Date', 'Beneficiary Details' (with 'Beneficiary Name', 'Exchange Rate', 'Beneficiary Address 1', and 'Identification Type'). The right column includes fields for 'Issue Branch *', 'Payable Branch', 'MICR No', 'Issue Mode', 'Narrative' (with 'Demand Draft Inquiry'), 'Duplicate Issue Date', 'Liquidation Mode', 'Beneficiary Account', 'Credit Amount', 'Beneficiary Address 2', and 'Identification Number'. Fields marked with an asterisk (*) are mandatory.

2.10.2.5.1 Main Transaction Details (Inquiry Mode)

Specify the details in the **DD Operations** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: DD Operations \(Inquiry\)](#).

Field Description: DD Operations (Inquiry)

Field	Description
Operation Type	Select the type Inquiry from the drop-down list.
Demand Draft No	Specify the DD number of the instrument.
Issue Branch	Select the branch code where the instrument is issued from the LOV. After you specify the Issue Branch Code and Demand Draft No , press Tab key. The system will make a service call to OBPM and fetch the demand draft details.
Demand Draft Details	Displays the details of DD under this segment.
Issue Branch	Displays the logged-in branch code.
Payable Branch	Displays the payable branch for the DD.
Demand Draft Amount	Displays the DD currency and the DD amount.
MICR No	Displays the MICR number.
Issue Date	Displays the issue date mentioned in the DD.
Issue Mode	Displays the issue mode of the DD.
Demand Draft Status	Displays the status of the DD.
Narrative	Displays the default narrative as Demand Draft Inquiry and it can be modified.
Revalidation Date	Displays the date of DD revalidation.
Duplicate Issue Date	Displays the duplicate issue date of DD.

Field	Description
Liquidation Date	Displays the liquidation date of DD.
Liquidation Mode	Displays the liquidation mode of DD.
Beneficiary Details	Specify the fields.
Beneficiary Name	Displays the beneficiary name.
Beneficiary Account	Displays the beneficiary account number.
Customer ID	Displays the Customer ID.
Exchange Rate	Displays the exchange rate and it can be modified. NOTE: If the transaction currency is the same as the account currency, the system will display the exchange rate as 1.
Credit Amount	Displays the credit amount.
Beneficiary Address 1 and Beneficiary Address 2	Displays the address of the beneficiary.
Identification Type	Displays the identification type of the beneficiary.
Identification Number	Displays the identification number of the beneficiary.
Funding Details	Funding details are displayed under this segment.
Drawer Name	Displays the drawer name.
Drawer Account	Displays the account number of the drawer.
Customer ID	Displays the customer ID of the drawer.

Field	Description
Exchange Rate	Displays the exchange rate.
Debit Amount	Displays the amount that needs to be debited from the drawer account.
Cheque Number	Displays the cheque number.
Cheque Date	Displays the date mentioned in the cheque.
Drawer Address 1 and Drawer Address 2	Displays the address of the drawer.
Identification Type	Displays the identification type of the drawer.
Identification Number	Displays the identification number of the drawer.

Field	Description
Operation Type	Select the type Cancel from the drop-down list.
Demand Draft No	Specify the DD number of the instrument.
Issue Branch	Select the branch code where the instrument is issued from the LOV.
Operation Mode	Select the operation mode as Cash from the drop-down values.
Cancel Details	Specify the details under this segment.

Field	Description
Transaction Amount	Specify the transaction currency and transaction amount.
Beneficiary Name	Specify the beneficiary name.
Identification Type	Select the identification type of the beneficiary from the drop-down values.
Identification Number	Specify the identification number of the beneficiary.
Exchange Rate	<p>Displays the exchange rate and it can be modified.</p> <p>NOTE: If the transaction currency is the same as the account currency, the system will display the exchange rate as 1. This field is displayed only if Multi Currency Configuration at Function Code Indicator level is set as Y.</p>
Total Charge Amount	<p>Displays the account amount.</p> <p>NOTE: This field is displayed only if Total Charges Configuration at Function Code Indicator level is set as Y.</p>
Narrative	Displays the default narrative as DD Cancel by Cash and it can be modified.

Cancel – GL:**Figure 142: DD Operations (Cancel – GL)**
2.10.2.5.13 Main Transaction Details (Cancel – GL)

Specify the details in the **DD Operations** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: DD Operations \(Cancel – GL\)](#).

Field Description: DD Operations (Cancel – GL)

Field	Description
Operation Type	Select the type Cancel from the drop-down list.
Demand Draft No	Specify the DD number of the instrument.
Issue Branch	Select the branch code where the instrument is issued from the LOV.
Operation Mode	Select the operation mode as GL from the drop-down values.
Refund Details	Specify the details under this segment.

Field	Description
GL Account	Specify the GL account number.
GL Currency	Displays the currency of the specified GL account.
GL Branch	Displays the branch code of the specified GL account.
Exchange Rate	<p>Displays the exchange rate and it can be modified.</p> <p>NOTE: If the transaction currency is the same as the account currency, the system will display the exchange rate as 1. This field is displayed only if Multi Currency Configuration at Function Code Indicator level is set as Y.</p>
Account Amount	<p>Displays the account amount.</p> <p>NOTE: This field is displayed only if Multi Currency Configuration at Function Code Indicator level is set as Y.</p>
Total Charge Amount	<p>Displays the total charge amount.</p> <p>NOTE: This field is displayed only if Total Charges Configuration at Function Code Indicator level is set as Y.</p>
Narrative	Displays the default narrative as DD Cancel by GL and it can be modified.

2.10.2.5.14 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. This segment is not applicable for the **Inquiry** mode. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

2.10.2.5.15 View Demand Draft Details

This segment is used to view the additional details of the DD. This will be a non-editable data segment and it is not applicable for the **Inquiry** mode.

2.10.2.5.16 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any warning raised when the transaction saves. On transaction submission, the system will handoff the details to payments product processor (OBPM) for processing. When you get success notification from OBPM, the system will update the transaction status as **Success** and mark for charges accounting handoff. The transaction accounting is not applicable for the transaction. In case of reject notification from OBPM, the system will discard the transaction. In addition, the transaction accounting is not applicable for the **Duplicate Issue** mode and the transaction submission is not required for **Inquiry** mode.

2.11 Term Deposit Transactions

A deposit with a fixed tenure or term is called as time deposit or Term Deposits (TD). This section deals with open, redeem, and top-up a term deposit. Each of these is explained in the following sub-sections:

- [2.11.1 Term Deposit Account Opening](#)
- [2.11.2 Term Deposit Redemption Against Cash](#)
- [2.11.3 Term Deposit Redemption Against Account](#)
- [2.11.4 Term Deposit Top-up against Account](#)
- [2.11.5 Term Deposit Top-up against Cash](#)

2.11.1 Term Deposit Account Opening

The Teller can use this screen to open a term deposit account. The following details are necessary to open a term deposit account:

- Deposit details
- Funding details
- Joint Holder details

- Payout details
- Rollover details

To process this screen, type **TD Account Opening** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Term Deposit**, click **TD Account Opening**.

→ The **TD Account Opening** screen is displayed.

Figure 143: TD Account Opening

The screenshot displays the 'TD Account Opening' form. It is divided into two main columns of input fields. The left column includes fields for 'Customer ID *' (with a search icon), 'Deposit Product *' (with a 'Fetch' button), 'Deposit Account Description *', 'Account Type' (with radio buttons for 'Single' and 'Joint'), 'Deposit Amount *' (with a currency dropdown set to 'GBP'), and 'Interest rate'. The right column includes fields for 'Customer Name', 'Deposit Product Description', 'Deposit Account Opening Date' (pre-filled with 'Mar 26, 2020' and a calendar icon), 'Mode Of Operation' (dropdown set to 'Single'), and 'Deposit Tenor' (with two input boxes and a dropdown). Below these fields are six expandable sections: 'Funding Details', 'Joint Holders', 'Payout Details', 'Rollover Details', and 'Denomination'. At the bottom right, there are 'Submit' and 'Cancel' buttons.

2.11.1.1 Main Transaction Details

Specify the basic details for opening the term deposit account. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: TD Account Opening](#).

Field Description: TD Account Opening

Field	Description
Customer ID	Select the Customer ID from the list of values.
Customer Name	Displays the name of the specified Customer ID.
Mode of Operation	<p>Select the mode of operations from the drop-down list. The drop-down list shows the following values:</p> <ul style="list-style-type: none"> • Single • Jointly • Either Anyone or Survivor • Former or Survivor • Mandate Holder
Account Type	Select the account type (Single or Joint).
Deposit Product	Specify the deposit product. Click Fetch to select the appropriate product type.
Deposit Product Description	Displays the description of the specified deposit product.
Deposit Account Description	Specify the description of the deposit account.
Deposit Account Opening Date	Specify the account opening date of the deposit account.
Deposit Amount	Specify the currency and amount for term deposit.
Deposit Tenor	Specify the tenor of deposit in days/months/years.
Interest Rate	Specify the interest rate for the deposit account.

Specify the details in the **Funding Details** segment. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Funding Details](#).

Field Description: Funding Details

Field	Description
Pay By	Select Account or Cash for the pay-in option.
Transaction Amount	<p>Specify the transaction currency if the Pay By is selected as Cash.</p> <p>NOTE: By default, branch currency will be shown and allows for editing. In addition, the system defaults the transaction amount based on the transaction currency selected.</p>

Field	Description
Account Number	Specify the account number from which the deposit account need to be funded. NOTE: This field is applicable only if the Pay By is selected as Account .
Account Branch	Displays the branch of the selected account number. NOTE: This field is applicable only if the Pay By is selected as Account .
Account Amount	Displays the currency of the selected account number and the calculated account amount based on the exchange rate. NOTE: This field is applicable only if the Pay By is selected as Account . This field is displayed only if Multi Currency Configuration at Function Code Indicator level is set as Y .
Cheque Number	Specify the cheque number of the account. NOTE: This field is applicable only if the Pay By is selected as Account .
Cheque Date	Specify the date as mentioned in the cheque. NOTE: This field is applicable only if the Pay By is selected as Account .
Exchange Rate	Displays the exchange rate used to convert the deposit currency into account or transaction currency and it can be modified.

Field	Description
	NOTE: If deposit currency is same as the account or transaction currency, the system will display the exchange rate as 1. This field is displayed only if Multi Currency Configuration at Function Code Indicator level is set as Y.

2.11.1.3 Joint Holders Details

Figure 146: Joint Holders Details

Specify the details of the joint holders for the deposit account, if the account type is maintained as **Joint**. For more information on fields, refer to table [Field Description: Joint Holders](#).

Field Description: Joint Holders

Field	Description
Joint Holder ID	Select the customer ID which is considered as joint account holder for the deposit account.
Joint Holder Name	Displays the customer name as joint holder name.
Relationship	Select the relationship of the joint account holder from the drop-down list.
Joint Holder's Type	Select the joint holder's type from the drop-down list.

2.11.1.4 Maturity Payment Details

Figure 147: Payout Details

Specify the parameters for automatic payout through either account transfer, bankers cheque, or demand draft. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Payout Details](#).

Field Description: Payout Details

Field	Description
Component Type	Select the component type from the drop-down list. (Principal or Interest)
Repayment By	Select the repayment option from the drop-down list (Account , Bankers Cheque , or Demand Draft).
Payment Account	Specify the account to which the repayment to be made. This field allows you to input only if repayment is by account.
Account Branch	Displays the account branch based on the payment account selected.

Field	Description
Beneficiary Name	Specify the name of the beneficiary for the payout of BC or DD drawn. NOTE: This field allows you to input only if the repayment is by BC or DD.
Beneficiary Address 1 to Beneficiary Address 4	Specify the address of beneficiary for the payout.

2.11.1.5 Maturity Instruction Details

Figure 148: Rollover Details

▲ Rollover Details

Auto Renewal ☐

Renewal Type ▼

Renewal Amount ▼

Renewal Tenor ▼

Specify the parameters for auto renewal of deposit account. For more information on fields, refer to table [Field Description: Rollover Details](#).

Field Description: Rollover Details

Field	Description
Auto Renewal	Select if auto renewal required for the deposit account.
Renewal Type	Specify the renewal type from the drop down values (Principal , Interest , Principal + Interest , or Special Amount). NOTE: This field is mandatory to input if auto renewal is selected.

Field	Description
Renewal Amount	Specify the renewal amount and renewal currency. NOTE: The renewal currency is displayed as deposit currency.
Renewal Tenor	Specify the renewal tenor in days/months/year.

2.11.1.6 Denomination details

The **Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the denomination units. For more information on this segment, refer to the topic [2.4.11.2 Denomination Details](#) in this guide.

2.11.1.7 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any warning raised when the transaction saves. When you submit, the transaction details are handed off to Term Deposit module in Oracle FLEXCUBE Universal Banking for TD account opening process.

2.11.2 Term Deposit Redemption Against Cash

The Teller can use this screen to initiate to manually redeem the cash from a term deposit account. It is accomplished by the pre-mature redemption in either full or in part, ahead of maturity date or after the maturity date when TD is in grace days without maturing.

To process this screen, type **Term Deposit Redemption Against Cash** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Term Deposit**, click **Term Deposit Redemption Against Cash**.

→ The **Term Deposit Redemption Against Cash** screen is displayed.

2.11.2.1 Main Transaction Details

Specify the deposit account number to fetch the deposit details. For more information on fields, refer to table [Field Description: Term Deposit Redemption Against Cash](#).

Field Description: Term Deposit Redemption Against Cash

Field	Description
Deposit Account	Specify the deposit account number.
Query	Click this icon to fetch the deposit details.
Deposit Details	Specify the fields.
Customer ID	Displays the Customer ID of the deposit account number.
Account Name	Displays the account description of the deposit account.
Principal Amount	Click Compute to get the amount paid at the time of term deposit booking.
Interest Amount	Displays the default rate of interest at which the interest amount is calculated.
Tax Amount	Displays the amount to be deducted towards tax.
Interest Rate	Click Compute to get the current interest rate applicable after partial or full redemption.
Maturity Amount	Displays the current maturity amount after partial or full redemption.
Total Payout Amount	Displays the total payout amount.
Redemption Details	Specify the fields.

Field	Description
Redemption Mode	Select the redemption mode from the drop-down list (Partial Redemption or Full Redemption).
Redemption Amount	<p>Specify as mentioned below:</p> <ul style="list-style-type: none"> • If the Redemption Mode is selected as Partial Redemption, specify the redemption amount. • If the Redemption Mode is selected as Full Redemption, it displays the principal amount as redemption amount.
Waive Penalty	<p>Check this box to waive the penalty for redeeming the term deposit.</p> <p>NOTE: This is applicable only if the Redemption Mode is selected as Full Redemption.</p>
Waive Interest	<p>Check this box to waive the interest for redeeming the term deposit.</p> <p>NOTE: This is applicable only if the Redemption Mode is selected as Full Redemption.</p>
Transaction Currency	Specify the currency in which the cash is handed over to the customer during redemption.
Transaction Amount	<p>Displays the transaction amount based on the Redemption Amount and Transaction Currency.</p> <p>NOTE: If deposit currency is different from transaction currency, the system calculates the transaction amount based on the exchange rate. This field is displayed only if Multi Currency Configuration at Function Code Indicator level is set as Y.</p>

Field	Description
Exchange Rate	Displays the exchange rate applicable for the transaction based on the deposit currency and transaction currency. NOTE: This field is displayed only if Multi Currency Configuration at Function Code Indicator level is set as Y.
Narrative	Displays the default narrative as Term Deposit Redemption Against Cash and it can be modified.

2.11.2.2 Denomination details

The **Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the denomination units. For more information on this segment, refer to the topic [2.4.11.2 Denomination Details](#) in this guide.

2.11.2.3 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

2.11.2.4 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any warning raised when the transaction saves. When you submit, the transaction details are handed off to Term Deposit module in Oracle FLEXCUBE Universal Banking for TD redemption process.

2.11.3 Term Deposit Redemption Against Account

The Teller can use this screen to initiate to manually redeem the cash from a term deposit account. It is accomplished by the pre-mature redemption either in full or in part, ahead of maturity date or after the maturity date when TD is in grace days without maturing.

To process this screen, type **Term Deposit Redemption Against Account** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Term Deposit**, click **Term Deposit Redemption Against Account**.

→ The **Term Deposit Redemption Against Account** screen is displayed.

Figure 150: Term Deposit Redemption Against Account

2.11.3.1 Main Transaction Details

Specify the deposit account number to fetch the deposit details. For more information on fields, refer to table [Field Description: Term Deposit Redemption Against Account](#).

Field Description: Term Deposit Redemption Against Account

Field	Description
Deposit Account	Specify the deposit account number.
Account Branch	Displays the branch of the deposit account.
Query	Click this icon to fetch the deposit details.

Field	Description
Deposit Details	Specify the fields.
Customer ID	Displays the Customer ID of the deposit account number.
Account Name	Displays the account description of the deposit account.
Principal Amount	Click Compute to get the amount paid at the time of term deposit booking.
Interest Amount	Displays the default rate of interest at which the interest amount is calculated.
Tax Amount	Displays the amount to be deducted towards tax.
Interest Rate	Click Compute to get the current interest rate applicable after partial or full redemption.
Maturity Amount	Displays the current maturity amount after partial/full redemption.
Total Payout Amount	Displays the total payout amount.
Redemption Details	Specify the fields.
Redemption Mode	Select the redemption mode from the drop-down list (Partial Redemption or Full Redemption).
Redemption Amount	Specify as mentioned below: <ul style="list-style-type: none"> • If the Redemption Mode is selected as Partial Redemption, specify the redemption amount. • If the Redemption Mode is selected as Full Redemption, it displays the principal amount as redemption amount.

Field	Description
Waive Penalty	Check this box to waive the penalty for redeeming the term deposit. NOTE: This is applicable only if the Redemption Mode is selected as Full Redemption .
Waive Interest	Check this box to waive the interest for redeeming the term deposit. NOTE: This is applicable only if the Redemption Mode is selected as Full Redemption .
Offset Account	Specify the offset account number to which the redeemed funds to be paid.
Offset Account Amount	System default the amount in the offset account number.
Offset Account Branch	System default the branch of the offset account number.
Offset Account Name	System default the description of the offset account.
Exchange Rate	Displays the exchange rate applicable for the transaction based on the deposit currency and offset account currency. NOTE: This field is displayed only if Multi Currency Configuration at Function Code Indicator level is set as Y .
Narrative	Displays the default narrative as TD Redemption and it can be modified.

2.11.3.2 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

2.11.3.3 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** screen is displayed.

The transaction is moved to authorization in case of any warning raised when the transaction saves. When you submit, the transaction details are handed off to Term Deposit module in Oracle FLEXCUBE Universal Banking for TD redemption process.

2.11.4 Term Deposit Top-up against Account

The Teller can use this screen to initiate the top-up for a term deposit account. The top-up for a term deposit can be done, after the opening date and before the maturity date.

To process this screen, type **TD Topup - Account** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Term Deposit**, click **TD Topup - Account**.

→ The **TD Top-Up Against Account** screen is displayed.

Figure 167: Payout Details

Specify the parameters for automatic payout through either account transfer, bankers cheque, or demand draft. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Payout Details](#).

Field Description: Payout Details

Field	Description
Component Type	Select the component type from the drop-down list. (Principal or Profit)
Repayment By	Select the repayment option from the drop-down list (Account , Bankers Cheque , or Demand Draft).
Payment Account	Specify the account to which the repayment to be made. This field allows you to input only if repayment is by account.
Account Branch	Displays the account branch based on the payment account selected.

Field	Description
Beneficiary Name	Specify the name of the beneficiary for the payout of BC or DD drawn. NOTE: This field allows you to input only if the repayment is by BC or DD.
Beneficiary Address 1 to Beneficiary Address 4	Specify the address of beneficiary for the payout.

2.14.3.5 Maturity Instruction Details

Figure 168: Rollover Details

Specify the parameters for auto renewal of deposit account. For more information on fields, refer to table [Field Description: Rollover Details](#).

Field Description: Rollover Details

Field	Description
Auto Renewal	Select if auto renewal required for the deposit account.
Renewal Type	Specify the renewal type from the drop down values (Principal , Principal + Profit , Special Amount or Profit). NOTE: This field is mandatory to input if auto renewal is selected.

Field	Description
Renewal Amount	Specify the renewal amount and renewal currency. NOTE: The renewal currency is displayed as deposit currency.
Renewal Tenor	Specify the renewal tenor in days/months/year.

2.14.3.6 Denomination details

The **Denomination** segment is used to view the denominations maintained for the transaction currency and to enter the denomination units. For more information on this segment, refer to the topic [2.4.11.2 Denomination Details](#) in this guide.

2.14.3.7 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any approval warning raised when the transaction saves. On transaction completion, the loan repayment details are handed off to Islamic Financing TD module for account creation.

2.15 Session Teller Transactions

This section describes the various screens used to perform the Session Teller transactions. The cash transactions can be performed only when the Teller Session is started, refer to the topic [2.4.13.1 Start Teller Session](#) in this guide. The Teller can enter the denomination details for a Teller Session in the **Stop Teller Session**. For more information, refer to the topic [2.4.13.2.3 Teller Session Denomination Details](#) in this guide. The screens are described in the following sub-sections:

- [2.15.1 Cash Deposit](#)
- [2.15.2 Cash Withdrawal](#)
- [2.15.3 FX Sale Against Walk-in](#)
- [2.15.4 FX Purchase Against Walk-in](#)

2.15.1 Cash Deposit

This screen is used to deposit the cash in a CASA. Cash can be deposited in either account currency or any foreign currency that is allowed. Whenever any transaction in foreign currency is posted to the account, it is converted to the account currency based on the maintained exchange rate for the transaction.

To process this screen, type **Cash Deposit** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Session Teller Transactions**, click **Cash Deposit**.

→ The **Cash Deposit** screen is displayed.

Figure 169: Cash Deposit

The screenshot displays the 'Cash Deposit' screen with the following fields and controls:

- Account Number ***: A text input field.
- Transaction Amount ***: A dropdown menu showing 'GBP' and an adjacent text input field.
- Exchange Rate**: A text input field showing '1.00' with up and down arrow buttons.
- Account Amount**: A text input field.
- Total Charge Amount**: A text input field showing 'GBP0.00'.
- Narrative ***: A text input field showing 'Cash Deposit'.
- Charge Details**: A section header with a right-pointing arrow.
- Submit** and **Cancel** buttons: Located at the bottom right of the screen.

2.15.1.1 Main Transaction Details

Specify the details in the **Cash Deposit** screen. For more information on this segment, refer to the topic [2.6.1.1 Main Transaction Details](#) in this guide.

2.15.1.2 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

2.15.1.3 Transaction Submission

Click **Submit** to complete the transaction. For more information, refer to the topic [2.6.1.4 Transaction Submission](#) in this guide.

→ The **Transaction Completed Successfully** information message is displayed.

2.15.2 Cash Withdrawal

This screen is used to withdraw funds from CASA account of the customer. The withdrawal is subject to the availability of sufficient balance or available credit limit. When the transaction is performed, it updates the available balance in the CASA account immediately.

To process this screen, type **Cash Withdrawal** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Session Teller Transactions**, click **Cash Withdrawal**.

→ The **Cash Withdrawal** screen is displayed.

2.15.2.1 Main Transaction Details

Specify the details in the **Cash Deposit** screen. For more information on this segment, refer to the topic [2.6.2.1 Main Transaction Details](#) in this guide.

2.15.2.2 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

2.15.2.3 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any approval warning raised when the transaction saves. On transaction completion, the cash is withdrawn successfully from the customer account. For more information on transaction submission and validations, refer to the topic [2.6.1.4 Transaction Submission](#) in this guide.

2.15.3 FX Sale Against Walk-in

This screen is used to sell a foreign currency to a walk-in customer in return for the equivalent amount received in another currency.

To process this screen, type **FX Sale - Walk-in** in the Menu Item Search located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Session Teller Transactions**, click **FX Sale - Walk-in**.

→ The **FX Sale Against Walk-in** screen is displayed.

2.15.3.1 Main Transaction Details

Specify the details in the **Cash Deposit** screen. For more information on this segment, refer to the topic [2.6.5.1 Main Transaction Details](#) in this guide.

2.15.3.2 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

2.15.3.3 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any approval warning raised when the transaction saves. On transaction completion, the teller cash position to the equivalent of Sold currency is deducted and Received currency is incremented. For more information on transaction submission and validations, refer to the topic [2.6.1.4 Transaction Submission](#) in this guide.

2.15.4 FX Purchase Against Walk-in

This screen is used to buy foreign currency from walk-in customers. To process this screen, type **FX Purchase - Walk-in** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Session Teller Transactions**, click **FX Purchase - Walk-in**.

→ The **FX Purchase Against Walk-in** screen is displayed.

2.15.4.1 Main Transaction Details

Specify the details in the **Cash Deposit** screen. For more information on this segment, refer to the topic [2.6.7.1 Main Transaction Details](#) in this guide.

2.15.4.2 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

2.15.4.3 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated, and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any approval warning raised when the transaction saves. On transaction completion, the teller cash position is updated based on the currency of the **Amount Bought** and the **Amount Paid** fields. For more information on transaction submission and validations, refer to the topic [2.6.1.4 Transaction Submission](#) in this guide.

2.15.5 Loan Repayment by Cash

The Teller can use this screen to accept cash from a walk-in customer to repay the loan amount. To process this screen, type **Loan Repayment By Cash** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, navigate to left menu and click **Teller**. On Teller Mega Menu, under **Session Teller Transactions**, click **Loan Repayment by cash**.

→ The **Loan Repayment By Cash** screen is displayed.

Figure 172: Loan Repayment By Cash (without Multi Currency and Total Charges)

The screenshot shows the 'Loan Repayment By Cash' interface. It includes the following elements:

- Loan Account**: A text input field.
- Exchange Rate**: A dropdown menu showing '1.00' with up and down arrows.
- Total Charges (LCY)**: A text box displaying 'GBP0.00'.
- Repayment Amount**: A dropdown menu showing 'GBP' and an adjacent text input field.
- Account Amount**: A text input field.
- Narrative**: A text box containing 'Loan Repayment By Cash'.
- Charges**: A section header with a right-pointing arrow.
- Buttons**: 'Submit' and 'Cancel' buttons at the bottom right.

2.15.5.1 Main Transaction Details

Specify the details to fetch the records. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Loan Repayment By Cash Screen](#).

Field Description: Loan Repayment By Cash Screen

Field	Description
Loan Account	Specify the loan account number. When you press Tab key, the customer details and loan account details will be displayed in the Customer Information widget.
Repayment Amount	Select the repayment currency and specify the repayment amount. NOTE: By default, the loan account currency is displayed as repayment currency.
Exchange Rate	Displays the exchange rate. NOTE: If the transaction currency is same as the account currency, the system displays the exchange rate as 1. This field is displayed only if Multi Currency Configuration at Function Code indicator level is set as Y .
Total Charges (LCY)	Displays the total charges in branch local currency. NOTE: This field is displayed only if Total Charge Configuration at Function Code indicator level is set as Y .
Account Amount	Displays the repayment amount in loan account currency.

Field	Description
	NOTE: This field is displayed only if Multi Currency Configuration at Function Code indicator level is set as Y . If the loan account currency is different from repayment currency, then the system will derive the account amount based on the exchange rate.
Narrative	Displays the narrative as Loan Repayment By Cash and it can be modified.

2.15.5.2 Charge Details

The **Charge Details** segment is used to view or waive the computed charges. For more information on this segment, refer to the topic [2.6.1.3 Charge Details](#) in this guide.

2.15.5.3 Transaction Submission

1. Click **Submit** to complete the transaction.

→ A Teller Sequence Number is generated and the **Transaction Completed Successfully** information message is displayed.

The transaction is moved to authorization in case of any approval warning raised when the transaction saves. On transaction completion, the loan amount is repaid successfully.

2.16 MAV Operations

This section describes the various screens used to perform the MAV Operations. The screens are described in the following sub-sections:

- [2.16.1 Issue of MAVs Maintenance](#)
- [2.16.2 Cancellation of MAV Payments](#)
- [2.16.3 Batch Processing for Future Dated Payments](#)
- [2.16.4 Blocked MAV Numbers Maintenance](#)
- [2.16.5 MAV Batch Process](#)

2.16.1 Issue of MAVs Maintenance

This screen is used to view the issued MAVs. To process this screen, type **Issue of MAVs Maintenance** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **MAV Operations**, click **Issue of MAVs Maintenance**.

→ The **Issue of MAVs Maintenance** (Summary) screen is displayed.

Figure 173: Issue of MAVs Maintenance (Summary)

2. In the **Issue of MAVs Maintenance** (Summary) screen, click **+** icon.

→ The **Issue of MAVs** screen is displayed.

Figure 174: Issue of MAVs

2.16.1.1 Main Transaction Details

Specify the details in the **Issue of MAVs** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Issue of MAVs](#) Issue of MAVs Maintenance.

Field Description: Issue of MAVs

Field	Description
Issue Number	Displays the auto generated Issue Number.
Batch Number	Specify the batch under which the MAVs are being issued. You can specify a four-digit batch number for every MAV issue record created.
Beneficiary Branch	Displays the Beneficiary Branch.
Beneficiary Account	Specify the customer account that should be credited on receipt of payment Of this MAV. You can also select customer account number from the list of values.
Processed Status	By default, the status is displayed as Unprocessed . After you run the batch, the status will be updated as Processed .
Amount	Specify the amount for which the corresponding MAV is being issued.
Debtor Name	Specify the name of the debtor who will be making the payment of the MAV.
Debtor Address	Specify the address of the debtor up to twenty-five characters.
Debtor City	Specify the city of the debtor. You can specify any value up to twenty-five characters.

	<p>Click Save. On save, the system populates the following details:</p> <ul style="list-style-type: none"> • MAV ID • Issue Date • Expiration Date • Issue Status • Print Status • Print Request • ABI Code
Debtor Zip	Specify the zip of the debtor zip code to five characters.

After filling the necessary details, you can perform any of the following actions:

- Click **Save** to complete the transaction.
 - A MAV ID for each record is generated and the **Record Saved Successfully** information message is displayed.
- Click **Cancel** to terminate the operation.

When you save and authorize a MAV issue record, the system updates the **Process Status** as **Unprocessed** and the **Issue Status** of each MAV is updated as **Active**.

After running MAV Batch Process for this batch, then accounting, entries are passed as follows:

- Debit Asset GL and credit Liability GL for the total of MAV Amount issued in this batch.
- Debit beneficiary account and credit income GL for the total charges for this batch.

Once a payment is received for an MAV, the system updates the 'Issue Status' to **Liquidated**. If the issues MAV is not paid on or before expiration date then its status becomes **Cancelled**.

Receipt of Payment on an MAV or cancellation of an MAV is possible only if the process status of its issue record is **Processed**.

In the summary screen, you can also perform any of the following actions:

- Click  icon to search the Issue of MAVs based on the specified search criteria. You can search the records based on the following criteria:
 - **Issue Number**
 - **Branch Code**
 - **Batch Number**
 - **Beneficiary CIF**
 - **Beneficiary Branch**
 - **Beneficiary CIF**
 - **Processed Status**
 - **Authorization Status**
 - **Record Status**
- Click on the desired record to view the details and perform any of the following actions:
 - **New** – Click this button to create a new record.
 - **Unlock** – Click this button to modify the details and save.
 - **Delete** – Click this button to delete an unauthorized record.
 - **Authorise** – Click this button to authorise the record.
 - **Close** – Click this button to close the record.
 - **Reopen** - Click this button to re-open a closed record.
 - **Audit** – Click this button to audit the record.
- Click  icon to refresh all records configured in the summary view.

2.16.2 Cancellation of MAV Payments

This feature is used for processing the future dated payments received for MAVs and RAVs records. It can be configured only after you change the branch date. The cancellation of MAV payments is accomplished as follows:

- For an MAV issued (from **Issue of MAVs** screen) if no payment is received within the validity period, system will mark such MAV ID as **Cancelled**.

- Validity period for a MAV issued will be the period between the Issue date and (Issue Date + Validity Days) maintained in **MAV RAV FRECCIA Parameters** screen.
- A new task will be introduced to identify and cancel MAVs issued.
- Upon cancellation of an issued MAV, system will post the following accounting entries in order to reverse the accounting entries passed when the MAV was issued.

Dr/Cr	Account	Amount
Dr	Portfolio GL (Liability) maintained for MAV in DEDMAVPM screen	Amount associated with the MAV being cancelled.
Cr	Portfolio GL (Asset) maintained for MAV in DEDMAVPM screen	Amount associated with the MAV being cancelled.

- The new task functionality will be as follows:
 - This task has to be configured in post the branch date change of **OBREMO**
 - Whenever the task runs, it will identify if there are any issued MAVs whose validity period is over and no payment has been received on them i.e. issued MAVs whose (Issue Date + Validity Days) is less than or equal to the current system date and have **Issue Status** as Active.
 - If yes, amounts of all such MAVs will be added up and 1 set of consolidated accounting entries as specified above, will be passed.
 - Each of the identified MAV will be marked as **Cancelled**.
- Payments can be received on Cancelled MAVs using **Mavs Ravs Freccias Payment by Cash** or **Mavs Ravs Freccias Payment by Account** screens.

2.16.3 Batch Processing for Future Dated Payments

This feature is used for processing the future dated payments received for MAVs and RAVs records. It can be configured only after you change the branch date. The batch processing of future dated payments is accomplished as follows:

- It will identify all the MAV (**On Us** and **Off Us**) and RAV payments to be liquidated on that date i.e. payments received (From Account payments only) with Payment Registration Date equal to or less than the current system date and are yet to be liquidated (i.e. Status is **Not Liquidated**).

- From the list of identified MAV/ RAV payment records, for each payment, system will check if the associated Debit Account has sufficient funds to liquidate the payment. If yes then only the payment transaction will be done in the system. Else, the corresponding payment record will not be considered for liquidation.

2.16.4 Blocked MAV Numbers Maintenance

This screen is used to block certain Internal ID numbers (serial numbers) which are used while generating Super MAV IDs using the **Blocked MAV Numbers** screen.

To process this screen, type **Blocked MAV Numbers Maintenance** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

- From **Home screen**, click **Teller**. On Teller Mega Menu, under **MAV Operations**, click **Blocked MAV Numbers Maintenance**.

→ The **Blocked MAV Numbers Maintenance** (Summary) screen is displayed.

Figure 175: Blocked MAV Numbers Maintenance (Summary)

ACC1	12322200000030
Unauthorized	Closed
Unauthorized	Open

Page 1 of 3 (1 - 10 of 23 Items)

2. In the **Blocked MAV Numbers Maintenance** (Summary) screen, click  icon.

→ The **Blocked MAV Numbers** screen displays.

Figure 176: Blocked MAV Numbers

Specify the details in the **Blocked MAV Numbers** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Blocked MAV Numbers](#).

Field Description: Blocked MAV Numbers

Field	Description
Beneficiary Branch	Displays the Beneficiary Branch.
Beneficiary Account	Specify the beneficiary customer account for the MAVs. The adjoining option list displays all open and authorized accounts maintained in the system. You can choose the appropriate one.
Current Internal ID number	Displays the Current Internal ID number.
Value of Internal ID Number blocked till	Displays the of Internal ID Number blocked till, which is computed by the system. NOTE: The value of Internal ID Number blocked till is the sum of Current Internal ID and Number of IDs to be blocked.
Number of IDs to be blocked	Specify the number of IDs to be blocked.

After filling the necessary detail, you can perform any of the following actions:

- Click **Save** to complete the transaction.

→ **Record Saved Successfully** information message is displayed.

- Click **Cancel** to terminate the operation.

In the summary screen, you can also perform any of the following actions:

- Click  icon to search the Blocked MAV Numbers based on the specified search criteria. You can search the records based on the following criteria:
 - **Beneficiary Account**
 - **Beneficiary Branch**
 - **Authorization Status**
 - **Record Status**
- Click on the desired record to view the details and perform any of the following actions:
 - **New** – Click this button to create a new record.
 - **Unlock** – Click this button to modify the details and save.
 - **Delete** – Click this button to delete an unauthorized record.
 - **Authorise** – Click this button to authorise the record.
 - **Close** – Click this button to close the record.
 - **Reopen** - Click this button to re-open a closed record.
 - **Audit** – Click this button to audit the record.
- Click  icon to refresh all records configured in the summary view.

2.16.5 MAV Batch Process

This screen is used to process all the MAVs for a batch in the **MAV Batch Process** screen.

To process this screen, type **MAV Batch Process** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, On Teller Mega Menu, under **MAV Operations**, click **MAV Batch Process**.

→ The **MAV Batch Process** screen is displayed.

Figure 177: MAV Batch Process

2.16.5.1 Main Transaction Details

Specify the details in the **MAV Batch Process** screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: MAV Batch Process](#).

Field Description: MAV Batch Process

Field	Description
Batch Number	Specify the number of the batch that needs to be processed. The adjoining option list displays the batch numbers of all the active and unprocessed MAV records available in the system. You can choose the appropriate one. The system displays the Batch Run Date.

Click the **Submit** button. The system identifies all the authorized, active and unprocessed MAV records available in the specified branch for the specified batch number. It totals the amounts these MAV records and posts the following accounting entries:

Dr/Cr	Description	Amount
Portfolio GL (Asset) maintained for MAV	Total Amount of the MAVs in batch	Dr

The **Process Status** for each MAV taken up for processing is updated by the system as **Processed**. Once you process a batch, the system will not allow you to process it again for that branch-date combination.

For each beneficiary account for the batch number it processes, the system checks if you have maintained any **MAV Issue Charge Amount** for the beneficiary account in **Customer Accounts Maintenance** screen. If you have maintained this amount, the system computes the number of MAVs issued against this beneficiary account as part of the current batch being processed and multiplies the number with the charge amount. It then debits this amount to the account for issuing the MAVs and posts the following entries:

Dr/Cr	Description	Amount
Beneficiary Account	Amount to be charged from the account for issuing the MAVs	Dr
Income GL	Amount to be charged from the account for issuing the MAVs	Cr

2.17 Journal Log

This section describes the various screens used to check the status of the transactions. The screens are described in the following sub-sections:

- [2.16.1 Electronic Journal](#)
- [2.16.2 Servicing Journal](#)

2.17.1 Electronic Journal

Tellers and Supervisors can use this screen to view the status of the cash transactions performed by them on the posting date. Tellers can view the status of the transactions performed only by them and Supervisors can view the status of the transactions performed by them and other Tellers. This screen is used to perform the following operations:

- View the status of all transactions performed by the logged-in Teller ID.
- Reverse the completed transaction posted by Teller during the day.
- Re-submit the incomplete transactions performed by the logged-in Teller ID, that are either:
 - Approved by the supervisor and moved to Teller EJ log for re-submission.

- Transactions processed by external system (say Oracle Banking Payments) and responded to Teller with the status as **Success**.
- Reject the incomplete transactions that are either:
 - Rejected by external system (say Oracle Banking Payments) with the status as **Reject**.
 - Prompted with error due to processing validations.
- View the approval history to see the list of all transactions that are either approved or rejected by the logged-in approver ID.
- Approve or Reject the transactions that are assigned to the logged-in Approver ID during the day.

To process this screen, type **Electronic Journal** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Journal Log**, click **Electronic Journal**.

→ The **Teller Transaction** screen is displayed.

Figure 178: Teller Transaction

The screenshot displays the 'Teller Transaction' window with the following fields and controls:

- Branch Posting Date**: Mar 26, 2020 (with a calendar icon)
- Teller ID**: SHASHI (with a search icon)
- Function Code**: (with a search icon)
- Account Number**: (with a search icon)
- Teller Sequence Prefix**: (with a search icon)
- From Sequence Number**: (with up/down arrows)
- To Sequence Number**: (with up/down arrows)
- From Transaction Time**: (with a clock icon)
- To Transaction Time**: (with a clock icon)
- From Amount Range**: (empty text field)
- To Amount Range**: (empty text field)
- Transaction Status**: Sent Back (dropdown menu)

Buttons at the bottom right include **Clear**, **Fetch**, and **Exit**.

Figure 179: List of Transactions

The screenshot shows a window titled "Teller Transaction" with a close button (X) in the top right corner. The window contains the following fields:

- Branch Posting Date:** 2020-03-26
- Teller ID:** SHASHI
- Transaction Status:** Completed

A blue-bordered box on the left contains the following details:

- Transaction Reference/Teller Sequence:** 0002008600020313/ CD155
- Function Code:** 1401- Cash Deposit
- Transaction Amount:** GBP200.00
- Account Number:** 00000001060032
- Teller ID:** SHASHI
- Teller Remarks:** No Comments

At the bottom right of the window is a green "Exit" button. There are also three small circular icons at the bottom of the blue-bordered box.

Specify the details in **Electronic Journal** screen to fetch the records. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Electronic Journal](#).

Field Description: Electronic Journal

Field	Description
Branch Posting Date	Specify the branch posting date for which the inquiry is to be made. NOTE: By default, the current posting date is displayed.
Teller ID	Select the Teller ID from the list of values.
Function Code	Specify the Function code for which the inquiry is to be made.

Field	Description
	NOTE: The adjoining option provides the list of all function codes maintained.
Account Number	Specify the account number. The LOV fetch list all account numbers maintained.
Teller Sequence Prefix	Select from the list of values.
From Sequence Number	Specify the start number of the sequence range.
To Sequence Number	Specify the end number of the sequence range.
From Transaction Time	Specify the transaction start time.
To Transaction Time	Specify the transaction end time.
From Amount Range	Specify the “from” amount of the amount range.
To Amount Range	Specify the “to” amount of the amount range.
Transaction Status	Select the transaction status. NOTE: By default, Pending status is selected.

After filling the necessary fields, you can do any of the following steps:

- Click **Fetch** to get the list of transactions based on the query criteria specified. When you click **Fetch**, the following details are displayed for each transaction:
 - **Teller Reference/Teller Sequence**
 - **Function Code**
 - **Transaction Amount**
 - **Account Number**
 - **My Remarks**

- Click **Clear** to clear the transaction list.
- Click view icon to get the transaction details.
- Click reverse icon to reverse the transaction.

2.17.2 Servicing Journal

Tellers and Supervisors can use this screen to view the status of the non-cash transactions performed by them on the posting date. For more details, refer to the description in topic [2.15.1 Electronic Journal](#).

To process this screen, type **Servicing Journal** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Journal Log**, click **Servicing Journal**.

→ The **Servicing Transaction** screen is displayed.

Figure 180: Servicing Transaction

The screenshot displays the 'Servicing Transaction' window with the following fields and controls:

- Branch Posting Date**: A date picker showing 'Mar 26, 2020'.
- Teller ID**: A search field containing 'SHASHI'.
- Function Code**: A search field.
- Account Number**: A search field.
- Teller Sequence Prefix**: A search field.

- Click approve icon to approve the transaction.

2.18 Customer Service

This section describes the various screens used customer services and inquiries. The screens are described in the following sub-sections:

- [*2.17.1 Cheque Status Enquiry*](#)
- [*2.17.2 Stop Cheque Request*](#)
- [*2.17.3 Cheque Book Request*](#)
- [*2.17.4 Passbook Issue*](#)
- [*2.17.5 Passbook Update*](#)
- [*2.17.6 Passbook Status Change*](#)
- [*2.17.7 Account Balance Inquiry*](#)
- [*2.17.8 Account Statement Request*](#)
- [*2.17.9 Customer Address Update*](#)
- [*2.17.10 Account Address Update*](#)
- [*2.17.11 Customer Contact Details Update*](#)

2.18.1 Cheque Status Inquiry

The Teller can use this screen to query the details of a cheque by specifying the account number of the customer and cheque number.

To process this screen, type **Cheque Status Inquiry** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Customer Service**, click **Cheque Status Inquiry**.

→ The **Cheque Status Enquiry** screen is displayed.

- Click **Save** to get the summary view of configured Teller Branch Parameters.
- Click **Cancel** to terminate the operation.

2.20.2 Branch Role Limits

This screen is used to set the input and authorization limits for a specific role. To process this screen, type **Branch Role Limits** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Branch Maintenance**, click **Branch Role Limits**.

→ The **Branch Role Limits (Summary)** screen is displayed.

Figure 209: Branch Role Limits (Summary)

The screenshot shows the 'Branch Role Limits' application window. It features a search bar at the top left and a toolbar with icons for search, refresh, and add. The main content area contains two identical panels. Each panel has three input fields: 'Role Id:', 'Supervisor Role:', and 'Mode No:'. Below these fields are two buttons: 'Unauthorized' (with a document icon) and 'Open' (with a lock icon). At the bottom of the window, a pagination bar indicates 'Page 1 of 1 (1 - 2 of 2 items)' with navigation arrows.

2. On **Branch Role Limits** (Summary) screen, click  icon.

→ The **Branch Role Limits Maintenance** screen is displayed.

Figure 210: Branch Role Limits Maintenance

Specify the details in the **Branch Role Limits Maintenance** Screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Branch Role Limits Maintenance](#).

Field Description: Branch Role Limits Maintenance

Field	Description
Role ID	Select the role ID for which the limit preferences are to be set.
Role Description	Displays the role description for the selected Role ID .
Supervisor Role	Select if the defined role is a designated supervisor of the branch who has the authorization rights.
Limit Currency	Select the currency code in which the limits to be specified.
Input Limit	Specify the transaction input limit for a single transaction.

Field	Description
Authorization Limit	Specify the authorization limit allowed for a single transaction.

Click **Save** to get the summary view of configured Branch Role Limits. In the summary screen, you can also perform any of the following actions:

- Click  icon to search the Branch Role Limits based on the specified search criteria. You can search the records based on the following criteria:
 - **Role Id**
 - **Supervisor Role**
 - **Authorization Status**
 - **Record Status**
- Click on the desired record to view the details and perform any of the following actions:
 - **New** – Click this button to create a new record.
 - **Unlock** – Click this button to modify the details and save.
 - **Delete** – Click this button to delete an unauthorized record.
 - **Authorise** – Click this button to authorise the record.
 - **Close** – Click this button to close the record.
 - **Reopen** – Click this button to re-open a closed record.
 - **Audit** – Click this button to audit the record.
- Click  icon to reset the search results to default summary view.

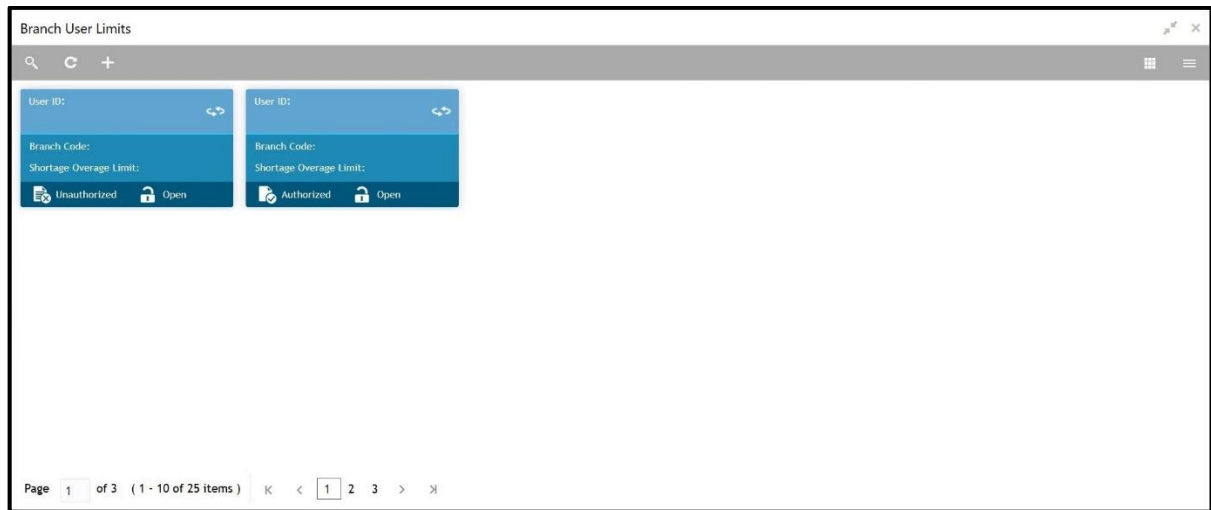

2.20.3 Branch User Preferences

This screen is used to set preferences for the branch user who either process cash transactions or process help desk activities. To process this screen, type **Branch User Limits** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Branch Maintenance**, click **Branch User Limits**.

→ The **Branch User Limits** (Summary) screen is displayed.

Figure 211: Branch User Limits (Summary)

2. On **Branch User Limits** (Summary) screen, click **+** icon.

→ The **User Preference** screen is displayed.

Figure 212: User Preference

Specify the details in the **User Preference** Screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: User Preference](#).

Field Description: User Preference

Field	Description
Branch Code	Displays the branch code.
User ID	Select the user ID for which the branch preferences to be maintained.
Till/Vault Indicator	Select from the drop down values (Till , Vault , or None).
Shortage/Overage GL	Select the GL which needs to be debited or credited for the shortage or overage during batch closure.
Carry Forward Allowed	Select if the funds are allowed to carry forward for the next day.
Inter Branch Transactions Allowed	Select if the transfer between the branches is allowed.
Receive Email	Select if the Teller needs to receive emails for approval of transactions.
Receive Notification	Select if the Teller needs to receive notifications in Dashboard.
Currency Holding Preferences	Specify the fields.
Currency Code	Select the currency code to specify the cash holding preferences.
Minimum Balance	Specify the minimum balance to be maintained for the Till or Vault.

Field	Description
Maximum Balance	Specify the maximum balance to be maintained for the Till or Vault.
Currency Limit Preferences	Specify the fields.
Currency Code	Select the currency in which the limits (transactions amounts) will be expressed.
Max Transaction Amount	Specify the maximum transaction amount allowed that the user can enter in a single transaction.
Authorization Limit	Specify the maximum amount that the user (to which the limits role is associated) is allowed to process while authorizing a transaction.

Click **Save** to get the summary view of configured User Preferences. In the summary screen, you can also perform any of the following actions:

- Click  icon to search the User Preferences based on the specified search criteria. You can search the records based on the following criteria:
 - **User Id**
 - **Authorization Status**
 - **Record Status**
- Click on the desired record to view the details and perform any of the following actions:
 - **New** – Click this button to create a new record.
 - **Unlock** – Click this button to modify the details and save.
 - **Delete** – Click this button to delete an unauthorized record.
 - **Authorise** – Click this button to authorise the record.
 - **Close** – Click this button to close the record.
 - **Reopen** – Click this button to re-open a closed record.

- **Audit** – Click this button to audit the record.
- Click  icon to reset the search results to default summary view.

2.20.4 Denominations Maintenance

This screen is used to maintain the standard currency denominations for each currency that the bank deals with. For example, the denominations for the currency USD can be maintained as shown in the table [Denominations Maintenance: USD Currency](#).

Denominations Maintenance: USD Currency

CCY CODE	DENM CODE	DESCRIPTION	VALUE	NOTE / COIN
USD	D100	100 dollars	100	NOTE
USD	D50	50 dollars	50	NOTE
USD	D20	20 dollars	20	NOTE
USD	D10	10 dollars	10	NOTE
USD	D5	5 dollars	5	NOTE
USD	D1N	1 dollar Note	1	NOTE
USD	D1C	1 dollar Coin	1	COIN
USD	C25	25 cents	0.25	COIN
USD	C10	10 cents	0.1	COIN
USD	C5	5 cents	0.05	COIN
USD	C1	1 cent	0.01	COIN

Denomination type Millionaire Certificate is used to facilitate MC/LMC (Millionaire Certificate) transactions. You can have only one denomination with denomination type as **Notes** and the currency code must be the LCY code of each country.

To process this screen, type **Denominations Maintenance** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Branch Maintenance**, click **Denominations Maintenance**.

→ The **Denominations Maintenance (Summary)** screen is displayed.

Figure 213: Denomination Maintenance (Summary)

2. On **Denominations Maintenance (Summary)** screen, click **+** icon.

→ The **Denominations Maintenance** screen is displayed.

Figure 214: Denomination Maintenance

Specify the details in the **Denomination Maintenance** Screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Denomination Maintenance](#).

Field Description: Denomination Maintenance

Field	Description
Currency Code	Specify the currency for which the currency denomination to be maintained.
Currency Description	Specify the description of the currency code.
Denomination Type	Select the denomination type.
Denomination Details	Specify the fields.
Denomination ID	Specify the denomination code.
Description	Specify the description of the denomination code.
Value	Specify the numeric value of the denomination code.
Sequence Number	Specify the number, such that the denom codes will be displayed in the same sequence maintained.
Type	Specify the type as Coin or Note .
Large Denomination	Select if a particular denomination is to be maintained as a large denomination.

After filling the necessary fields, click **Add** to add the specified denomination details as an entry to the table.

Click **Save** to get the summary view of configured Denomination. In the summary screen, you can also perform any of the following actions:

- Click  icon to search the configured Denominations based on the specified search criteria. You can search the records based on the following criteria:
 - **Currency Code**
 - **Currency Description**
 - **Authorization Status**
 - **Record Status**
- Click on the desired record to view the details and perform any of the following actions:
 - **New** – Click this button to create a new record.
 - **Unlock** – Click this button to modify the details and save.
 - **Delete** – Click this button to delete an unauthorized record.
 - **Authorise** – Click this button to authorise the record.
 - **Close** – Click this button to close the record.
 - **Reopen** – Click this button to re-open a closed record.
 - **Audit** – Click this button to audit the record.
- Click  icon to reset the search results to default summary view.

2.20.5 Function Code Definition

This screen is used to specify the preferences for the function code. For the list of function codes and the respective screen names, refer to the table [List of Function Codes](#).

List of Function Codes

Function Code	Screen Name
1001	Cash Withdrawal
1002	Cash Withdrawal (Teller Session)

Function Code	Screen Name
1005	Miscellaneous GL Tranfser
1006	Account Transfer
1008	Miscellaneous Customer Debit

TVQB	Branch Breaching Limits
TVQR	Till Vault Position

To process this screen, type **Function Code Definition** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Branch Maintenance**, click **Function Code Definition**.

→ The **Function Code Definition** (Summary) screen is displayed.

Figure 215: Function Code Definition (Summary)

2. On **Function Code Definition** (Summary) screen, click **+** icon.

→ The **Function Code Definition** screen is displayed.

Figure 216: Function Code Definition

Specify the details in the **Function Code Definition** Screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Function Code Definition](#).

Field Description: Function Code Definition

Field	Description
Function Code	Pick from the list function codes that are factory shipped. For the list of function codes and the respective screen names, refer to the table List of Function Codes .
Function Code Description	Displays the description of the function code.
Transaction Limit	Specify the maximum transaction amount allowed for this function code in branch currency.
Support Child Function Code	Select if the specified function code need to act as the parent function code.
Parent Function Code	Specify the applicable parent function code. NOTE: This field is enabled only if Support Child Function Code is not selected.
Charge Details	Specify the fields.
Apply Charges	Specify if charges are applicable for this transaction.
Exchange Rate Details	Specify the fields.
Rate Type	Select the rate type for the transaction code.
Rate Code	Select the rate code for the transaction code.

Field	Description
Override Limit	Specify the override limit. The system displays the default override limit currency as GBP.
Stop Limit	Specify the stop limit. The system displays the default stop limit currency as GBP.
Additional Preferences	Specify the fields.
Reversal Allowed	Specify if the reversal is allowed for the transaction.
Reversal Requires Authorization	Specify if the authorization is required for a reversal transaction.
Reversal includes charges	Specify if the charges is to be reversed along with transaction reversal.
Reversal Advice Name	Select the reversal advice name from the list of values.
Input Slip Name	Specify the input slip name.

Field	Description
Input Slip Confirmation	<p>Select if the input slip confirmation is required for the transaction. If this option is selected for a transaction screen, the Input-Slip button will be displayed on the screen.</p> <p>On the specified transaction screens, you can click Input-Slip to view the input slip before transaction submission. Once you click Input-Slip, the system validates mandatory fields. In addition, you can perform any of the following actions:</p> <ul style="list-style-type: none"> • Confirm & Print – This button is enabled only if Input Slip Confirmation is selected in Function Code Definition screen. In addition, the transaction can be submitted only if the receipt is confirmed. Click this button to confirm and print the receipt. • Print – Click this button to print the generated slip and provide to the customer. • Close – Click this button to close the generated receipt. <p>NOTE: If the mandatory fields are not filled, the system shows an error message Value is required, wherever applicable.</p>
Transaction Alert Preference	<p>Select the alert notification preference from the drop-down list. The values are mentioned below:</p> <ul style="list-style-type: none"> • SMS – the system sends an SMS notification of the transactions to the registered mobile number of the Customer. • Email – the system sends an email notification of the transactions to the registered email ID of the Customer.

Field	Description
	<ul style="list-style-type: none"> • Both – the system sends SMS and email notifications of the transactions to the registered mobile number and email ID of the Customer. • None – the system will not send any notifications to the Customer.
Advices	This section allows selecting advices for multiple Function Codes.
+ icon	Click this icon to add a new row.
- icon	Click this icon to delete a selected row.
Advice Name	Displays the advice name.

Click **Save** to get the summary view of configured Function Code Definition. In the summary screen, you can also perform any of the following actions:

- Click  icon to search the Function Code Definition based on the specified search criteria. You can search the records based on the following criteria:
 - **Function Code**
 - **Authorization Status**
 - **Record Status**
- Click on the desired record to view the details and perform any of the following actions:
 - **New** – Click this button to create a new record.
 - **Unlock** – Click this button to modify the details and save.
 - **Delete** – Click this button to delete an unauthorized record.
 - **Authorise** – Click this button to authorise the record.
 - **Close** – Click this button to close the record.
 - **Reopen** – Click this button to re-open a closed record.

- **Audit** – Click this button to audit the record.
- Click  icon to reset the search results to default summary view.

2.20.6 Function Code Preferences

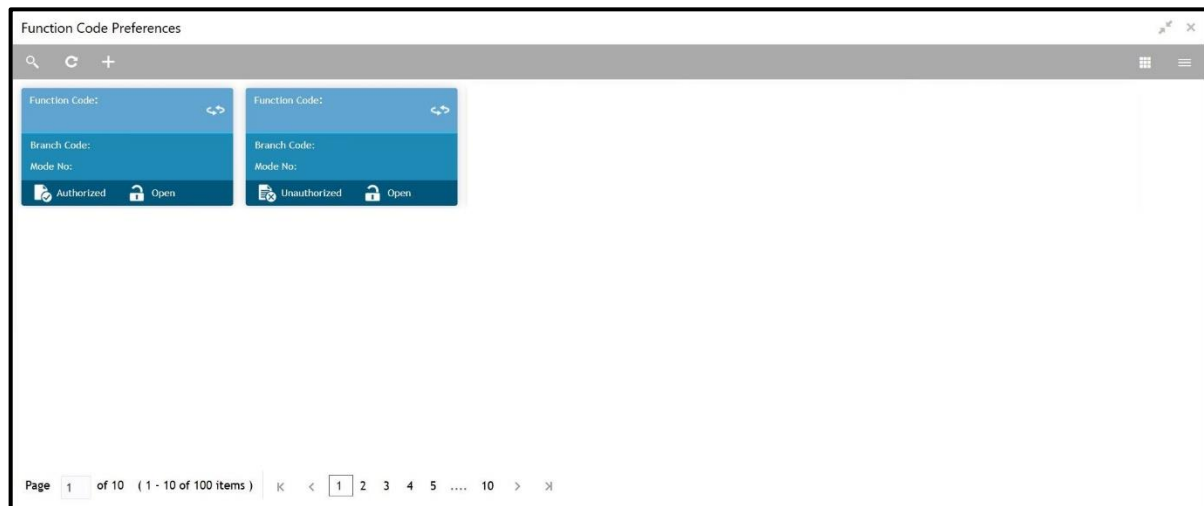

This screen is used to define the workflow preferences (validation preferences and authorization preferences) for a function code. For the list of function codes and the respective screen names, refer to the table [List of Function Codes](#).

To process this screen, type **Function Code Preferences** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Branch Maintenance**, click **Function Code Preferences**.

→ The **Function Code Preferences** (Summary) screen is displayed.

Figure 217: Function Code Preferences (Summary)

2. On **Function Code Preferences** (Summary) screen, click  icon.

→ The **Function Code Preferences** screen is displayed.

Figure 218: Function Code Preferences

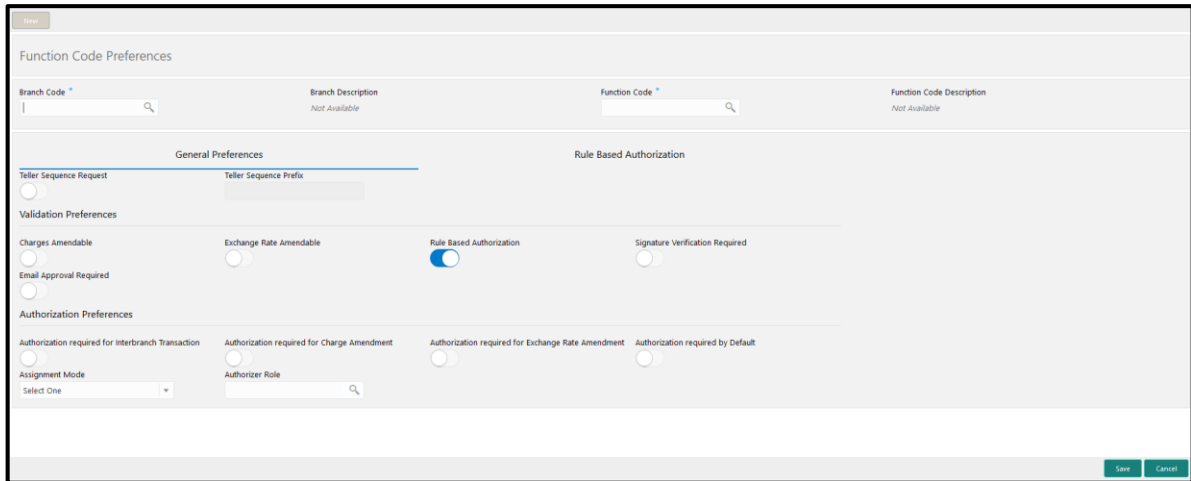

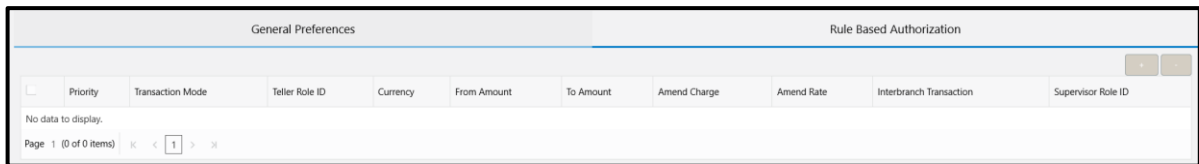

Figure 219: Role Based Authorization

Specify the details in the **Function Code Preferences** Screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Function Code Preferences](#).

Field Description: Function Code Preferences

Field	Description
Branch Code	Select the branch code from the list of values. The list of values should have *.* for ALL option.
Branch Description	Displays the description of the branch code.
Function Code	Specify the function code. The list of values display the valid function codes.

Field	Description
Function Code Description	Displays the description of the function code.
General Preferences	Specify the fields.
Teller Sequence Request	Select this option to generate the Teller sequence number.
Teller Sequence Prefix	Specify the prefix for the generation of teller sequence number. NOTE: This is mandatory only if Teller Sequence Request is selected.
Validation Preferences	Specify the fields.
Charges Amendable	Select if the charges are allowed to modify for the transaction.
Exchange Rate Amendable	Select if exchange rate is allowed to modify for the transaction.
Rule Based Authorization	Select if the rule based authorization is required for the transaction.
Email Approval Required	Select if the authorization through email is required for a transaction.

Field	Description
	<p>NOTE: If this option is selected in override confirmation, then an email will be sent as per assignment mode maintained. This email will be sent to the selected approver or to a list of approvers associated to the role maintained. The approvers will get email for authorization only if receive email flag is selected in the User Preferences screen. Once email is received, Approver can either approve or reject the transaction. When you click the Approve or Reject, an email will be automatically opened in the system where the approver can type their comments.</p>
Signature Verification Required	Select if the Teller needs to verify the Customer's signature while submitting the transaction.
Authorization Preferences	Specify the fields.
Authorization required for Interbranch Transaction	Select if the authorization is required for inter-branch transaction.
Authorization required for Charge Amendment	Select if the authorization is required in case you have amended the charge defaulted by the system.
Authorization required for Exchange Rate Amendment	Select if the authorization is required in case you have amended the exchange rate defaulted by the system.
Authorization required by Default	Select if the authorization is required by default for the transaction.
Assignment Mode	Select to indicate whether remote authorization assignment is automatic or manual operation for the transaction.

Field	Description
Authorizer Role	Select the role of the authorizers. The users belonging to this role are the valid authorizers for this workflow. NOTE: This field is applicable, if assignment mode is Manual or if assignment mode is Auto and no default authorizer is maintained for the user.
Rule Based Authorization	Specify the fields.
Priority	Specify the priority of the transaction.
Transaction Mode	Select the mode of the transaction from the drop-down list (Online or Offline).
Teller Role ID	Select the Teller Role ID for which the authorization is required.
Currency	Select the currency of the transaction from the LOV.
From Amount	Specify the From cap amount.
To Amount	Specify the To cap amount.
Amend Charge	Select Yes or No.
Amend Rate	Select Yes or No.
Interbranch Transaction	Select Yes or No.
Supervisor Role ID	Select the Supervisor Role ID from the LOV.

Click **Save** to get the summary view of configured Function Code Preferences. In the summary screen, you can also perform any of the following actions:

- Click  icon to search the Function Code Preferences based on the specified search criteria.
You can search the records based on the following criteria:
 - **Branch Code**
 - **Function Code**
 - **Authorization Status**
 - **Record Status**
- Click on the desired record to view the details and perform any of the following actions:
 - **New** – Click this button to create a new record.
 - **Unlock** – Click this button to modify the details and save.
 - **Delete** – Click this button to delete an unauthorized record.
 - **Authorise** – Click this button to authorise the record.
 - **Close** – Click this button to close the record.
 - **Reopen** – Click this button to re-open a closed record.
 - **Audit** – Click this button to audit the record.
- Click  icon to reset the search results to default summary view.

2.20.7 Default Authorizer Maintenance

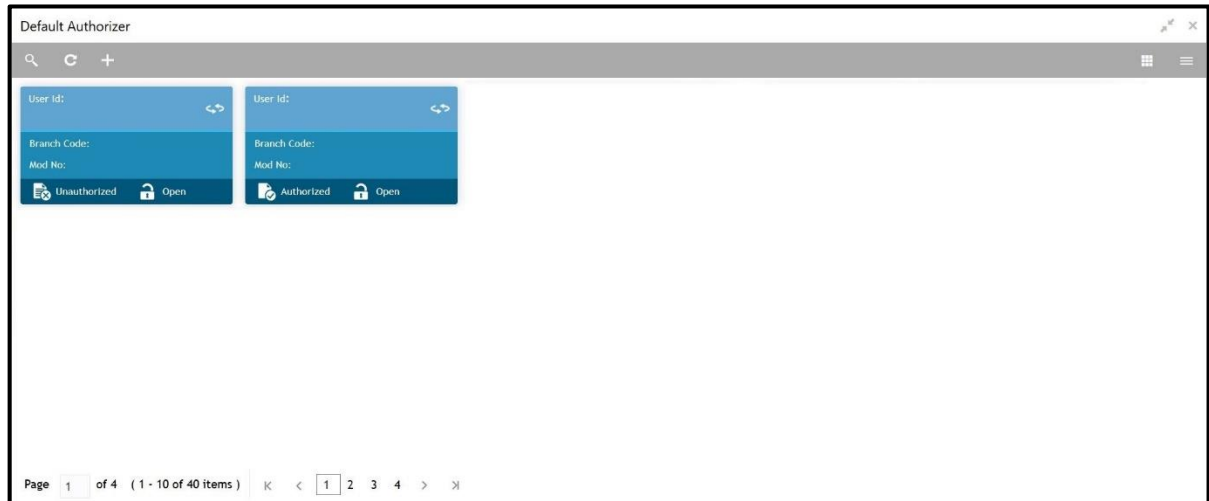

This screen is used to define the default authorizer who can authorize a specific function code for a branch user. Once it is defined, the system automatically routes the transactions of this function code to the default authorizer defined for the branch user.

To process this screen, type **Default Authorizer** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Branch Maintenance**, click **Default Authorizer**.

→ The **Default Authorizer** (Summary) screen is displayed.

Figure 220: Default Authorizer (Summary)

2. On **Default Authorizer** (Summary) screen, click **+** icon.

→ The **Default Authorizer** screen is displayed.

Figure 221: Default Authorizer Definition

Specify the details in the **Default Authorizer Definition** Screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Default Authorizer Definition](#).

Field Description: Default Authorizer Definition

Field	Description
User ID	Select the user ID from the LOV. The option list consists of user IDs for which a default authorizer needs to be maintained.
User Name	Displays the name of the user, when you select the user ID.
Branch Code	Select the branch code from the LOV. This field is enabled if the All option is chosen in the User ID field. NOTE: If specific authorizer is selected, then the system will default the home branch as branch code.
Branch Name	Displays the branch name, when you select the Branch Code .
Default Authorizer	Select the default authorizer from the LOV, if it is already set while assigning the transaction. If the mode assigned is Manual , it allows to change the default authorizer. Select the authorizer ID from the adjoining option list. The option list consists of authorizers who are mapped to a role with Savings Authorizer flag value as Y or All option.
Description	Displays the description.

Click **Save** to get the summary view of configured Default Authorizer. In the summary screen, you can also perform any of the following actions:

- Click  icon to search the Default Authorizer Maintenance based on the specified search criteria. You can search the records based on the following criteria:
 - **User Id**
 - **Branch Code**
 - **Authorization Status**
 - **Record Status**
- Click on the desired record to view the details and perform any of the following actions:
 - **New** – Click this button to create a new record.
 - **Unlock** – Click this button to modify the details and save.
 - **Delete** – Click this button to delete an unauthorized record.
 - **Authorise** – Click this button to authorise the record.
 - **Close** – Click this button to close the record.
 - **Reopen** – Click this button to re-open a closed record.
 - **Audit** – Click this button to audit the record.
- Click  icon to reset the search results to default summary view.

2.20.8 Charge Maintenance

This screen is used to define charges for a function code involving specific **Branch**, **Function Code**, **Currency**, **Customer Category**, **Account Class Group** and **Interbranch** (Y/N) combination.

Maximum of five charges can be applied for a function code.

To process this screen, type **Charge Maintenance** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Branch Maintenance**, click **Charge Maintenance**.

→ The **Charge Maintenance (Summary)** screen is displayed.

Figure 222: Charge Maintenance (Summary)

2. On **Charge Maintenance (Summary)** screen, click **+** icon.

→ The **Charge Maintenance** screen is displayed.

Figure 223: Charge Maintenance

Specify the details in the **Charge Maintenance** Screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Charge Maintenance](#).

Field Description: Charge Maintenance

Field	Description
Branch	Select the branch code from the LOV. The list of values should have *.* for ALL option.
Function Code	Select the transaction code for which the charge details need to be maintained from the LOV.
Currency	Select the currency code for which the charge details need to be maintained from the LOV.
Inter Branch	<p>Select Yes, if the charge details need to be maintained for an inter-branch transaction or select No, if it is not required to maintain the charge details.</p> <p>If the account branch of the teller transaction is different from the transaction branch, the charges maintained by inter-branch product will be applied to the transaction.</p>
Customer Group	Select the customer group for which the charge details need to be maintained from the LOV. The list of values should have *.* for ALL option.
Account Class Group	Select the account class group for which the charge details need to be maintained from the LOV. The list of values should have *.* for ALL option.
Charge Details	Specify the fields.
Charge Code	Select the charge code from drop down values. The drop down values are C1 , C2 , C3 , C4 , and C5 .
Charge Description	Specify the description of the charge code.

Field	Description
Nature Of Charge	<p>Select the type of charge.</p> <p>The following types are available in the drop-down list:</p> <ul style="list-style-type: none"> • Income – Used to deduct charges from customer account as an income to the bank. • Expense – Used to credit the customer as a cash back or an offer provided by the bank, which is an expense to the bank. • Tax – Used to deduct tax on the branch transaction from the customer based on the transaction amount or charge. • Inclusive Tax – Used to levy tax inclusive on the branch transactions by debiting charge account GL and credit tax GL account.
Charge Basis	<p>Select the basis amount on which the charge to be computed. Select Transaction Amount or Charge Code (C1, C2, C3, and C4) from drop down values. The following validations will be provided:</p> <ul style="list-style-type: none"> • If Charge Code is C1, then charge basis can be TXNAMT. • If Charge Code is C2, then charge basis can be TXNAMT or C1. • If Charge Code is C3, then charge basis can be TXNAMT, C1, or C2. • If Charge Code is C4 then charge basis can be TXNAMT, C1, C2, or C3. • If Charge Code is C5, then charge basis can be TXNAMT, C1, C2, C3, or C4.
Slab Type	<p>Select from the drop-down list to specify whether the charge computation has to be over different Amount Slab, Tier or None. If slab type is Slab or Tier, then slab details section must be provided.</p>

Field	Description
Charge Type	Select the type of charge as Percentage or Flat Amount from the drop-down list.
Charge Currency	Select the charge currency from the LOV.
Charge Rate	Specify the percentage to be applied for deriving the charge. NOTE: This field is applicable only if the Charge Type is selected as Percentage .
Charge Amount	Specify the flat charge amount. NOTE: This field is applicable only if the Charge Type is selected as Flat Amount .
Rate Type	Select the rate type to be applied for deriving the charge as Mid or Buy-Sell from the drop-down list. NOTE: This field is applicable only if the Charge Type is selected as Percentage .
Rate Code	Select the rate code to be applied for deriving the charge from the LOV. NOTE: This field is applicable only if Charge Type is selected as Percentage .
Minimum Charge	Specify if the charge percentage involving a particular transaction is less than the minimum charge then by default system to pick the minimum charge amount.
Maximum Charge	Specify if the charge percentage involving a particular transaction is more than the maximum charge then by default system to pick the maximum charge amount.

Field	Description
Netting Required	<p>Select from the following options:</p> <ul style="list-style-type: none"> Select Yes to net the accounting entries for the debit leg of the charges along with the main transaction entries. Select No to pass the entries without netting the charges of the debit leg.
Charge Account	Select the charge GL account. The list of values displays all the valid GL accounts.
Debit Txn Code	Select the transaction code used for debit charge accounting from the LOV.
Credit Txn Code	Select the transaction code used for credit charge accounting from the LOV.
Slab Tier Details	Specify the fields.
Cap Amount	Specify the amount for slab details.
Charge Rate	Specify the charge rate for slab details.
Charge Amount	Specify the charge amount for slab details.

After filling the necessary details, you can do any of the following steps:

- Click **Add Charges** to add the charge details and slab details to records.
- Click **Save** to display the configured charge details in summary view.

In the summary screen, you can also perform any of the following actions:

- Click  icon to search the Charge Maintenance based on the specified search criteria. You can search the records based on the following criteria:
 - **Function Code**
 - **Branch Code**
 - **Authorization Status**
 - **Record Status**
- Click on the desired record to view the details and perform any of the following actions:
 - **New** – Click this button to create a new record.
 - **Unlock** – Click this button to modify the details and save.
 - **Delete** – Click this button to delete an unauthorized record.
 - **Authorise** – Click this button to authorise the record.
 - **Close** – Click this button to close the record.
 - **Reopen** – Click this button to re-open a closed record.
 - **Audit** – Click this button to audit the record.
- Click  icon to reset the search results to default summary view.

2.20.9 Accounting and Settlements

This screen is used to define the settlement and accounting parameters that is applicable for processing the branch transactions involving a function code.

To process this screen, type **Settlements Definition** in the **Menu Item Search** located at the left corner of the application toolbar and select the appropriate screen (or) do the following steps:

1. From **Home screen**, click **Teller**. On Teller Mega Menu, under **Branch Maintenance**, click **Settlements Definition**.

→ The **Settlements Definition** (Summary) screen is displayed.

Figure 224: Settlements Definition (Summary)

2. On **Settlements Definition** (Summary) screen, click **+** icon.

→ The **Transaction Accounting Details** screen is displayed.

Figure 225: Transaction Accounting Details

Specify the details in the **Transaction Accounting Details** Screen. The fields, which are marked with asterisk, are mandatory. For more information on fields, refer to table [Field Description: Transaction Accounting Details](#).

Field Description: Transaction Accounting Details

Field	Description
Branch	Select the branch for which the accounting details need to be defined from the LOV. NOTE: The value *.* indicates ALL option.
Currency	Select the currency for which the accounting details need to be defined from the LOV. NOTE: The value *.* indicates ALL option.
Function Code	Select the function code for which the accounting details need to be defined from the LOV.
