Product Features

Accelerator Pack – Collections

Product Features

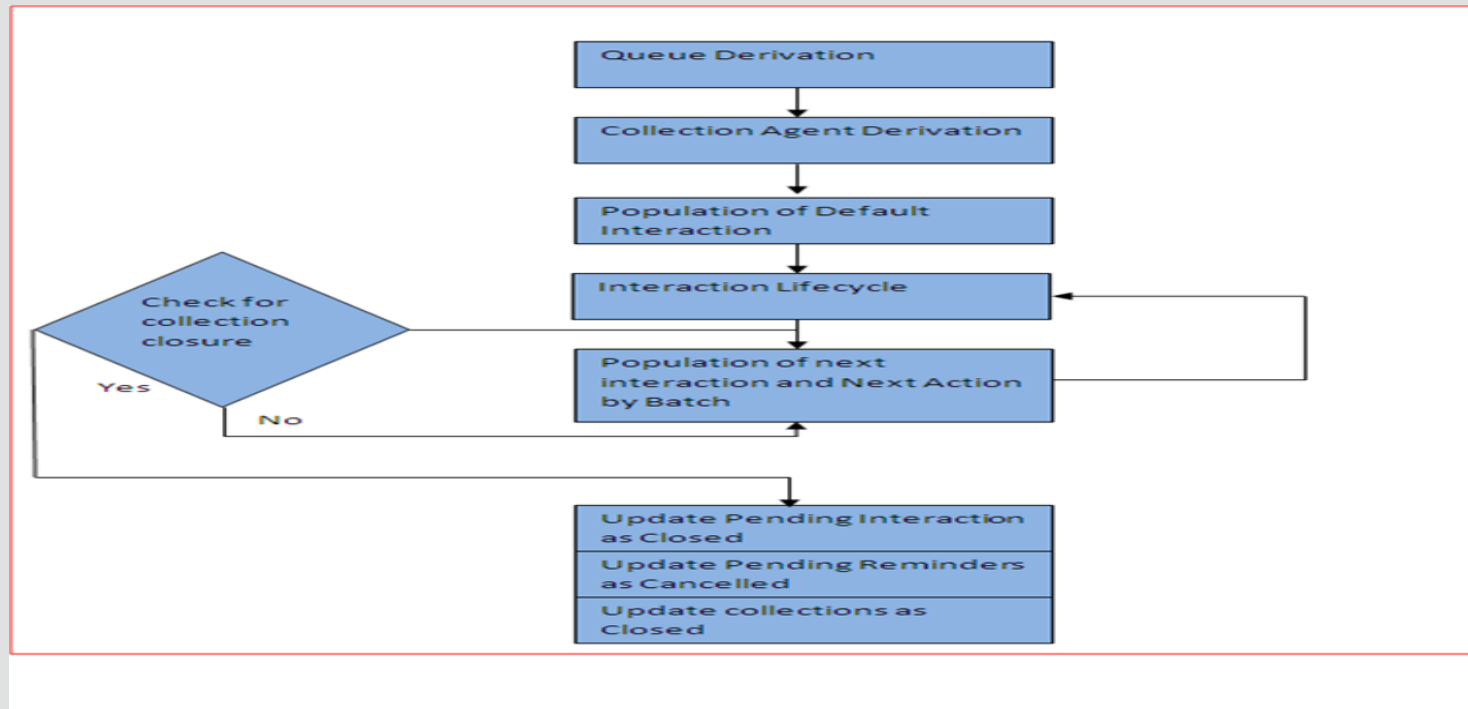

- Collection is a process flow, to track the Collection procedure of all the loans (Assets).
- Collection can be done by the collection department of the bank or an external agency.
- Currently collection is supported for - Consumer Lending, Islamic Financing Leasing, and Mortgages.
- Collection process initiates when the customer does not pay the schedule dues of a loan and the schedule becomes overdue.
- This flow ends with the Collection of the overdue amount of the loans from the customer.

Accelerator Pack – Collections

Advices

- Based on the follow up with the customer, there could be an action item which requires a reminder message(COLL_REMINDER) to be sent. When a customer interaction is recorded, a record will be created in the collection reminder message screen based on the Next action code and mode will be Auto.
- Message can also be generated manually in the screen – CNDCLDRY and also addition text can be added while sending the message.
