

Financial Services Data Governance for North America Regulatory Reporting Release 8.1.2.9.0 One-off Patch Release #1 (8.1.2.9.1)

Oracle Financial Services Data Governance for North America Regulatory Reporting Pack is a separately licensed product.

Description

Bug **38813630** - Oracle Financial Service Data Governance for North America Regulatory Reporting Pack Release v8.1.2.9.1.

1.1 Pre-installation Requirements

The minimum required patch set level is **OFS DGUSRR Application Pack v8.1.2.9.0**.

For installation details, refer to the [Oracle Financial Services Data Governance for North America Regulatory Reporting Installation Guide, Release 8.1.2.9.0](#) (for version 8.1.2.9.0).

NOTE: A patch with the same version was previously provided. If patch 8.1.2.9.1 is already installed on the instance, please execute the scripts below.

```
delete from infodom_patches
where V_APP_ID = 'OFS_DGS'
and V_PATCH_NAME = '8.1.2.9.1';
/
delete from installer_fsapps_scripts_details
where V_APP_ID = 'OFS_DGS'
and V_APP_VERSION = '8.1.2.9.1';
/
DELETE FROM
OFSAA_INSTALLER_EXECUTION_STORAGE WHERE V_TASK_NAME IN
('CONDITIONAL_WEB_LAYER_DEPLOYMENT', 'WEB_XML', 'REVLOG4J_CONFIG_XML')
AND V_APP_ID = 'OFS_DGS';
```

1.2 Downloading and installing the OFS Data Governance for North America Regulatory Reporting Pack

To install the release, follow these steps:

1. Log in to [My Oracle Support](#), and search for **38813630** under the **Patches & Updates** tab.
2. Download the `38813630_GENERIC.zip` archive file and copy it to your OFSAA Server in **Binary Mode**.

3. Shut down all the OFSAAI Services.
For more information, see the *Stop Infrastructure Services* section in [Oracle Financial Services Data Governance for US Regulatory Reporting Installation and Configuration Guide](#).
4. Extract the contents of the patch archive file using the following command:
 - i. Unzip <name of the file to be unzipped>
 - ii. For example: `unzip 38813630_GENERIC.zip`
5. Assign RWX (755) permissions to the folder by executing the following command:
 1. `chmod -R 755 OFS_DGS`
 2. `chmod -R 755 appsLibConfig`
6. In the Installer kit path `/appsLibConfig/conf`:
 - i. Update the `params.conf` file with the Upload Model Parameter as 0.
7. Navigate to the following directory:
 - i. `<>/OFS_DGS/bin`
8. Execute the following setup command:
 - i. `./setup.sh SILENT`
9. Verify the patch installation logs in the following directory:
 - i. `<>/OFS_DGS/logs`
10. Delete the existing EAR or WAR file present in the `$FIC_HOME/ficweb` directory.
11. Generate the application EAR or WAR file and redeploy the application on your Configured Web Application Server. For more information, see [Create and deploy EAR/WAR files](#).
12. After the successful installation, restart all OFSAAI Services.

NOTE OFS DGS Repository Difference Report can be accessed [here](#).

1.3 Bugs Fixed in this Release

The following bugs are fixed in this Release.

Sl. No.	Bug ID	Bug Description	Bug Fix Summary
1	38553496	Batch Process should be executed automatically once checker approves.	Updated the Java flow to invoke <code>AdjustmentExecutor.main(args)</code> programmatically as part of the existing execution logic. This ensures that the adjustment executor is triggered automatically within the same program run, using runtime-derived parameters (MIS date, run skey, reporting entity, etc.).

Sl. No.	Bug ID	Bug Description	Bug Fix Summary
2	38737964	Incorrect configuration of N3 Validation rules.	Validation Rule for IR97 and IR49 has been configured correctly to match expected results.
3	38758289	E2 OSFI Validation Rule Configuration Issues IR015, IR065.	All rules provided by OSFI has been correctly configured for E2 report and expected results are reflected.
4	38532898	Variance Mapping Analysis – Issues are not to be logged if no variance if found.	Changes have been made in the dashboard to reflect issues only if variance is found within the timeline/date specified by the user.
5	38925187	Variance Analysis Links are broken for 0472, 0457 IN J2 AND A4-S4-6605	The column Credit Line Revolving Line Amount in Reporting currency has been added to the DGS RPD and is now getting reflected in the reports mentioned with corresponding Cell IDs.
6	38842277	PKG_DQ_CREATE_CONTROL is not logging errors in any error log table.	The database package script has been modified. Error log table has been implemented to log any error occurring during the execution of the database package.
7	38842213	VW_DQ_CHECK_MASTER is not picking latest record from DQ_CHECK_MASTER	The script for the view creation has been modified so that it only fetches latest records using the flag.
8	38305168	DGS – Rejected adjustment shown as “Pending Approval” instead of Rejected.	Changed to reflect status as rejected.

Sl. No.	Bug ID	Bug Description	Bug Fix Summary
9	38943818	DGS_RR_KI_BATCH is failing.	The criteria to delete and insert made same so that it does not lead to unique constraint.
10	38488336	A4 – OSFI validation rules were failing because no threshold was defined.	A 0% to 0.10% difference threshold has been added for the rules. The rule will be reported as a failure only if the difference is not within the 0% to 0.10% threshold.
