1. Preface

1.1 Introduction

This user guide deals with the Oracle FLEXCUBE Business Activity Monitor. The BAM facilitates reporting of the status of transactions within a specific period. The maintenances required for the proper functioning of BAM system and the processing related to it are covered in this manual.

1.2 Audience

This manual is intended for the following User/User Roles:

Role	Function
Back office data entry Clerks	Input functions for maintenance related to the interface
Back office Managers/Officers	Authorization functions

1.3 Documentation Accessibility

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at <http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc>.

1.4 Abbreviations

Abbreviation	Description
System	Unless specified, it shall always refer to Oracle FLEXCUBE
BAM	Business Activity Monitor

1.5 Organization

This manual is organized into the following chapters:

Chapter 1	<i>Preface</i> gives information on the intended audience. It also lists the various chapters covered in this User Manual.
Chapter 2	<i>Business Activity Monitor</i> gives information on the duration flow of the transactions

1.6 Related Documents

You may refer the following manuals for more information:

1.7 Glossary of Icons

This User Manual may refer to all or some of the following icons:

Icons	Function
	Exit
	Add row
	Delete row
	Option List

Refer the Procedures User Manual for further details about the icons.

2. Business Activity Monitor

2.1 Introduction

The BAM system collects the data stored in Oracle FLEXCUBE and generates reports.

You can use the BAM system for monitoring your business activity closely. With the reports generated using BAM, you can have a vivid view of the problems in the business environment and identify the areas that require attention. You can also analyse the new business opportunities and trends that help you enhance your businesses.

The key features of BAM reporting are as follows:

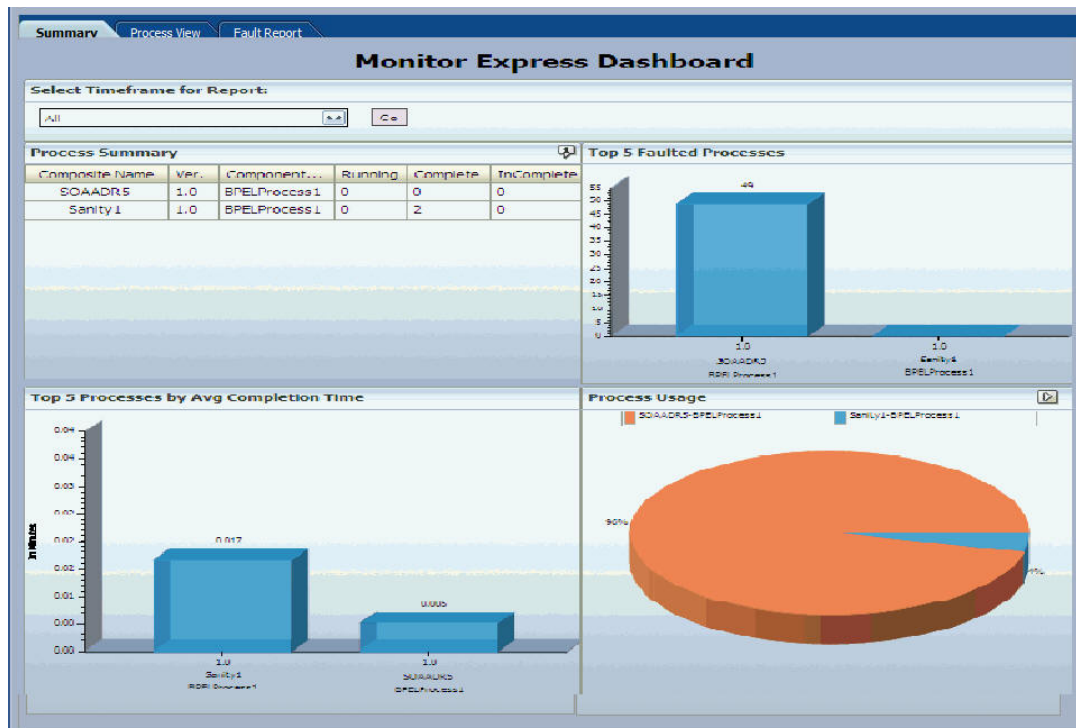

- Monitoring the key performances and displaying them on the dashboard.
- Analysing the duration flow of the transactions.

2.2 Generating Reports

You can generate the reports on the transaction duration from the Oracle BAM.

2.2.1 Monitor Express Report

You can view the key performance indicators like average interval time, number of faulted instances of all the processes in the Monitor Express Report.

2.2.2 Process Overview Report

You can view multiple reports in the overview report.

Duration Flow graph and Updation Details of the Instance

Click on the any stage of the duration flow graph to view the task based user list. The user list displays the number of users who have worked on the task at that particular stage.

USER	CREATED DATE	END DATE
DEMOUSER1	12/7/2012 10:39:36 AM	12/7/2012 10:40:45 AM

Click on the user ID to view the user specific details. The user specific details includes the number of tasks acquired, completed, expired and suspended by the user and the supervisor.

2.2.5 User Performance

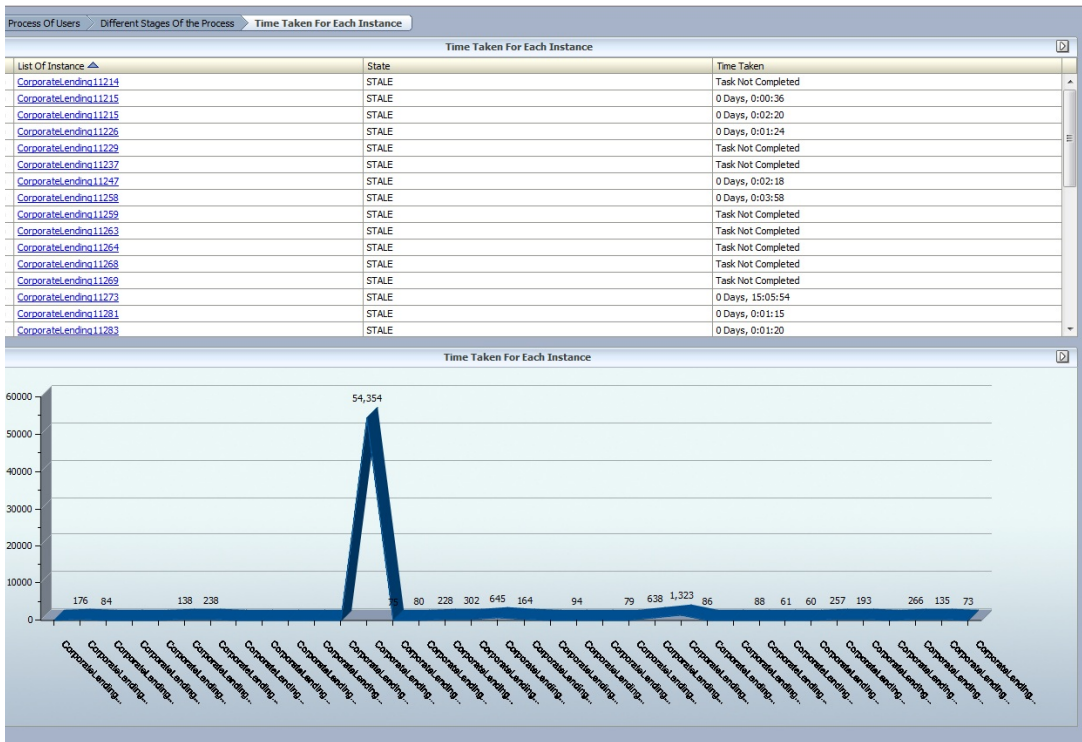

The user performance report displays the process, the number of applications the user is working in each process.

Select a process to view the stages of process where the user has worked.

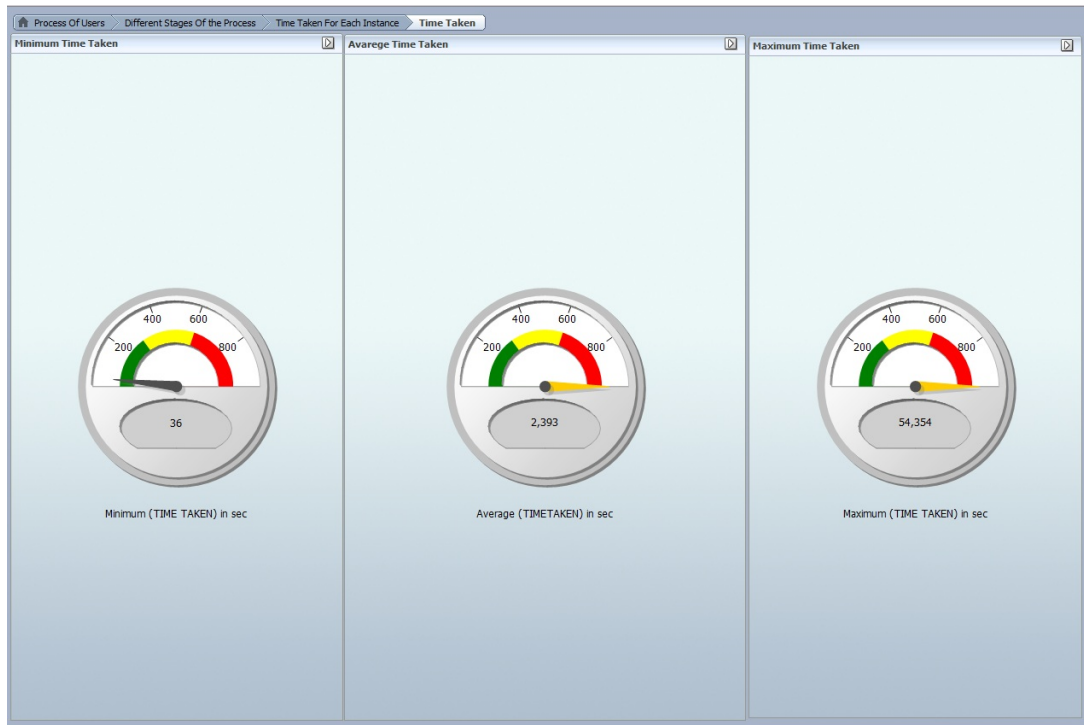

Click on a stage to view the report on the list of applications of the stage selected, the stages and the duration flow graph of each application.

You can view the details of the application in this report.

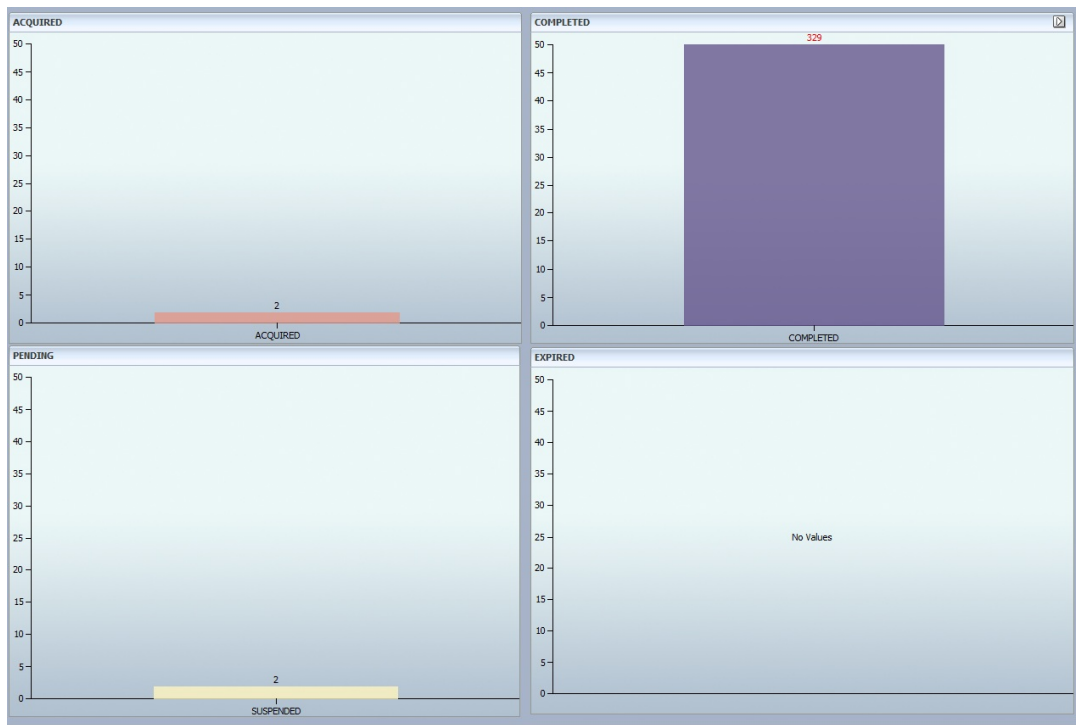

You can also view the minimum, maximum and average time taken on any application at any stage.

2.2.6 User Specific

You can view the user specific details like the number of tasks acquired, completed, expired, suspended by the user.
