Oracle and Java are registered trademarks of Oracle and/or its affiliates. Other names may be trademarks of their respective owners.

U.S. GOVERNMENT END USERS: Oracle programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, delivered to U.S. Government end users are "commercial computer software" pursuant to the applicable Federal Acquisition Regulation and agency-specific supplemental regulations. As such, use, duplication, disclosure, modification, and adaptation of the programs, including any operating system, integrated software, any programs installed on the hardware, and/or documentation, shall be subject to license terms and license restrictions applicable to the programs. No other rights are granted to the U.S. Government.

This software or hardware is developed for general use in a variety of information management applications. It is not developed or intended for use in any inherently dangerous applications, including applications that may create a risk of personal injury. If you use this software or hardware in dangerous applications, then you shall be responsible to take all appropriate failsafe, backup, redundancy, and other measures to ensure its safe use. Oracle Corporation and its affiliates disclaim any liability for any damages caused by use of this software or hardware in dangerous applications.

This software and related documentation are provided under a license agreement containing restrictions on use and disclosure and are protected by intellectual property laws. Except as expressly permitted in your license agreement or allowed by law, you may not use, copy, reproduce, translate, broadcast, modify, license, transmit, distribute, exhibit, perform, publish or display any part, in any form, or by any means. Reverse engineering, disassembly, or decompilation of this software, unless required by law for interoperability, is prohibited.

The information contained herein is subject to change without notice and is not warranted to be error-free. If you find any errors, please report them to us in writing.

This software or hardware and documentation may provide access to or information on content, products and services from third parties. Oracle Corporation and its affiliates are not responsible for and expressly disclaim all warranties of any kind with respect to third-party content, products, and services. Oracle Corporation and its affiliates will not be responsible for any loss, costs, or damages incurred due to your access to or use of third-party content, products, or services.

Table of Contents

1.	Pre	face
	1.1	Intended Audience1-1
	1.2	Documentation Accessibility1-1
	1.3	Access to Oracle Support 1-1
	1.4	Structure
	1.5	Related Information Sources
2.	Pur	pose2–1
3.	Тор	oology
4.	Сог	nmon Configurations
	4.1	ODA Configurations
	4.2	OBDX Server Configurations
5.	Fac	ebook Configurations
6.	Сог	nfiguring Channels in ODA6–1
7.	Ale	xa Skill (Zig Bank) Configuration7–1
	7.1	Define the Interaction Model7-2
	7.2	Create a Webhook channel
	7.3	Configure the Endpoint

1. Preface

1.1 Intended Audience

This document is intended for the following audience:

- Customers
- Partners

1.2 **Documentation Accessibility**

For information about Oracle's commitment to accessibility, visit the Oracle Accessibility Program website at http://www.oracle.com/pls/topic/lookup?ctx=acc&id=docacc.

1.3 Access to Oracle Support

Oracle customers have access to electronic support through My Oracle Support. For information, visit

http://www.oracle.com/pls/topic/lookup?ctx=acc&id=info or visit

http://www.oracle.com/pls/topic/lookup?ctx=acc&id=trs_if you are hearing impaired.

1.4 Structure

This manual is organized into the following categories:

Preface gives information on the intended audience. It also describes the overall structure of the User Manual.

The subsequent chapters describes following details:

- Introduction
- Preferences & Database
- Configuration / Installation.

1.5 Related Information Sources

For more information on Oracle Banking Digital Experience Patchset Release 21.1.2.0.0, refer to the following documents:

Oracle Banking Digital Experience Installation Manuals

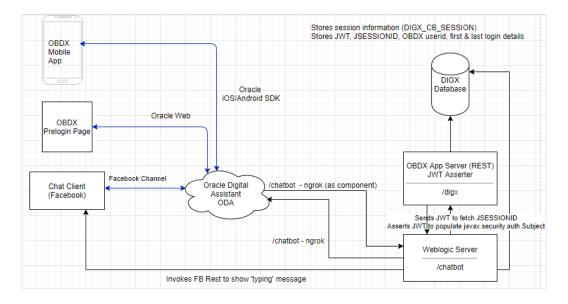

2. Purpose

OBDX provides interface for Chatbot module, integrated with Oracle Digital Assistant (ODA) out of the box. It provides end users a chat interface to interact with the bank. Transactions like balance enquiry, fund transfers to payees, enquiring about banking products and details of ATM/Branches can be achieved through chat. This document provides steps to setup OBDX chatbot module with ODA. The prerequisites include:

- ODA setup
- Facebook credentials (optional)

3. Topology

4. Common Configurations

ODA Configurations 4.1

1. Login to ODA and import the OBDX bot shipped with OBDX installer. This is a zip (OBDX201.zip) file obtained in the installer in OBDX_Installer/installables/chatbot/config directory. Import this by clicking the "Import Bot" on ODA dashboard.

In chatbot.properties in com.ofss.digx.chatbot.ear > com.ofss.digx.chatbot.jar, enter the base URL of the OBDX server where DIGX application is running.

Note: Enter the Weblogic port. If using OHS, that should not be patched with Webgate

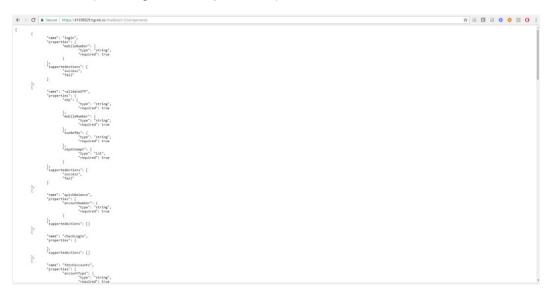

If the server needs proxy to connect to internet, enter proxy details here else leave them blank. This call is required for the chatbot to display the typing.. icon in chat. The connection is directly from OBDX Chatbot application to Facebook. The access token of the Facebook page is also required here.

Redeploy the ear after above changes.

Verification Steps

8. Check if OBDX server Chatbot application is running and accessible over the component URL given to ODA. Open a browser and enter the URL as entered in ODA component services. (as configured in Step No-4.1.3)

9. Login to ODA and click OBDXBot > Test

				Get Started	 Chat (1)

- 1. Click Get Started in the chat window > You should receive welcome message from ODA
- 2. Enquire about account balance > OTP should be received on the registered email address of the party in core banking

6. Configuring Channels in ODA

In addition to Facebook Messenger Channel, OBDX bot can be configured with Oracle Web, Oracle Android and Oracle IOS channel types to integrate with OBDX web/internet banking, OBDX Android, OBDX IOS applications respectively.

Oracle Web Channel

In order to configure this channel:

1. Choose Development ->Channels-> Users from the menu. Click Add Channel.

Developm	nent		ACLE [®] Digital Assista	ant			? 0

Chatbot widget appears only on prelogin page in OBDX UI

Add above Chatbot URL and channelld in /ui/framework/js/configurations/config.js in oda tag

To remove this chatbot widget

- Remove URL & channelld in above file
- Remove the "chat-bot" tag in prelogin dashboard → DIGX_DB_DASHBOARD → DASHBOARDDESIGN blob for anonymous dashboard

Oracle Android Channel

In order to configure this channel:

- 1. Choose Development->Channels->Users from the menu. Click Add Channel.
- 2. Then add Oracle Android as the channel type.

Create Channel		×
* Name Description	OBDXAndroid Optional short description for this channel	
Channel Type Client Authentication Enabled	Oracle Android 🔹]
* Max. Token Expiration (Minutes) Session Expiration (minutes)	60 × ^ 60 × A	
	Сгеа	te

- 3. Route the channel to your skill or digital assistant.
- 4. Switch Channel Enabled to On.

Oracle iOS Channel

In order to configure this channel:

- 1. Choose Development->Channels->Users from the menu. Click Add Channel.
- 2. Add Oracle iOS as the channel type.

Create Channel		×
* Name Description	OBDXIOS Optional short description for this channel]
Channel Type Client Authentication Enabled	Oracle iOS 🔹	
* Max. Token Expiration (Minutes) Session Expiration (minutes)	60 ~ ^ 60 ~ ^ Default _	
	Crea	te

- 3. Route the channel to your skill or digital assistant.
- 4. Switch Channel Enabled to On.

7. Alexa Skill (Zig Bank) Configuration

Creating an Alexa skill called *ZigBank* along with a Webhook channel lets you chat with a specific bot.

Add the skill information

Set up a developer account in the Amazon Developer Portal.

- 1. Open the Amazon Developer Console.
- 2. Click on 'Create Skill'

\leftrightarrow \Rightarrow C	Secure https://d	eveloper.amazon.com/a	☆ 🖾 🕲	E K	RP 🚺 🤇	s k 🛾 D O

2. Click on 'Build Model'

🚱 English (US)	~	Save Model				
CUSTOM						
interaction Model		Invocation Users say a skills invocation name to begin an interaction with a particular custom skill.				
Invocation		For example, if the invocation name is "daily horoscopes", users can say:				
Intents (3)	Add	User: Alexa, ask daily horoscopes for the horoscope for Gemini				
 command 	6					
amount	ė	Skill Invocation Name 🛞				
payee	Ē	kigbank .				
 Built-In Intents (2) AMAZON StopIntent 		-;; Invocation name requirements				
AMAZON.NavigateHomeIntent		Your invocation name should be two or more words, and can contain only lower-case alphabetic characters, spaces between words, possessive apostrophes (for example, "sam's science trivia"), or periods used in abbreviations (for example, "s. b. c."). Other characters like numbers must be spelied out. For example, "twenty one".				
Slot Types (4)	🗘 Add	Invocation names cannot contain any of the Alexa skill launch phrases such as "launch", "tell", "load", "begin", and "enable". Wake words including "Alexa", "Amazon", "Echo", "Computer", or the				
CUSTOM_SLOT	ē	words 'skill' or 'sogi' are not allowed. Learn more about invocation names for outrom skills. Obarges to your skill's invocation name will not take effect until you have bailt your skill's interaction model. In order to successfully build, your skill's interaction model must contain an intent wit at least one sample uteraction. Learn more about control presentation models for outrom wills.

3. Also note down the alexa skill id, we will need it in next step.

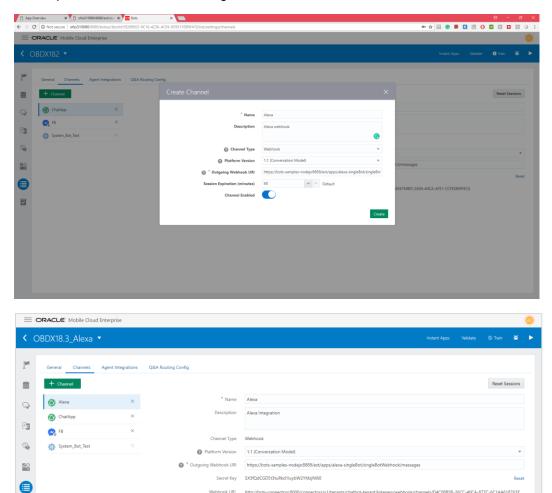

Skill ID

amzn1.ask.skill.21b18d23-da3f-417d-94ea-127b879b41fb

Create a Webhook channel 7.2

1. In the Bot Builder, create a webhook channel for your bot. In the Create Channel dialog, enter the outgoing Webhook URL as https://bots-samples-nodejs:8889/ext/apps/alexasingleBot/singleBotWebhook/messages. This URL is where your bot will send its responses back to the Alexa ZigBot skill.

els/D4C08B5B-26CC-40CA-877C-6C1AA618763E

Webbook URI

ation (minutes) 60

Channel Enabled

✓ ^ Default

7

 Keep the Secret Key and Webhook URL close by because you need to add them to the app.js file. Also, remember to set the amazon skill id (created in previous steps). For example:

```
var metadata = {
    allowConfigUpdate: true,
    waitForMoreResponsesMs: 200,
    amzn_appld: "amzn1.ask.skill.21b18d23-da3f-417d-94ea-127b879b41fb",
    channelSecretKey: 'SX3fQdCGD5t3tuRkd1luybW2YMzjNl60',
    channelUrl: 'http://bots-connectors:8000/connectors/v1/tenants/chatbot-
tenant/listeners/webhook/channels/D4C08B5B-26CC-40CA-877C-6C1AA618763E'
```

};

. .

app.js file is located at BOTS_HOME/samples/nodejs/build/apps/alexa-singleBot/app.js

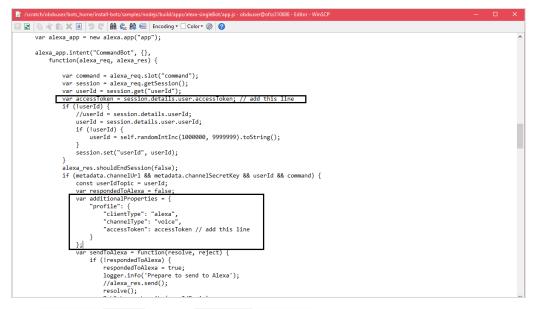

3. You can also edit the welcome message in the app.js.

```
alexa_app.launch(function (alexa_req, alexa_res) {
  var session = alexa_req.getSession();
  session.set("startTime", Date.now());
  alexa_res.say("Welcome to Zig Bank. How may I help you?");
  alexa_res.shouldEndSession(false);
});
```

4. To pass accessToken to the OBDX Chatbot endpoint, add these additional properties in app.js (Optional)

5. Restart the bots-samples-nodejs container.

7.3 Configure the Endpoint

1. Choose HTTPS

- 2. Enter the HTTPS ngrok URL for port 8888 that's appended with ext/apps/alexasingleBot/alexa/app. For example: https://<ngrok URL for port 8888>/ext/apps/alexasingleBot/alexa/app
- 3. Select SSL Certificate. Choose 'My development endpoint is a sub-domain of a domain that has a wildcard certificate from a certificate authority'.

4. Save Endpoint

7.3.1 Testing the singleBot Skill in the Amazon Developer Console

To test the skill, enter the following utterance in the Service Simulator

• ask zigbank

For each utterance, the Service Simulator window displays the response.

Alexa developer console Vour Skills ZigBank Build Test Distribution	Centification Analytics	Q O I Feedback forum
Test is enabled for this skill Alexa Simulator Manual JSON Voice & Tone	Skill I/O Device Display Device Display Device Log	0
English (US)	Skill (7) DON Input	
English	Medium Hub V (b.2010 - 2018, Amason.com, Inic, or its uffiliates. All Bights Reserved	Terms Docs Forums Blog Alexa Developer Hom

7.3.2 Testing ZigBot on an Echo Device

If your Echo device is logged to the same user account that accesses the Developer Console, then the ZigBot skill will enabled in your Amazon Echo. Try out the same utterances, but start each one with "Alexa ask zibo..." If Alexa can't understand you, or your Echo's light ring is turned off, start over by saying, "Alexa ask zibo..." For example:

"Alexa ask zibo to show my balances"

==> "ssml": "<speak>For which account do you want your balance... </speak>"

"Alexa stop" or "stop" to end the interaction

If Alexa continually misunderstands you, take a look at the bots-samples-nodejs log to see which of your commands were picked up by Alexa and sent to the bot and which weren't. (docker logs <container id of bots-samples-nodejs>)

Note: Alexa might have trouble with some interactions, like following a web link or saying a number. Alexa spells out numbers (22 becomes twenty-two), which might be problematic if your bot is expecting a cardinal number. Also, Alexa won't wait for a result when web services are slow. When this happens, Alexa will state that your skill takes too long to respond.

7.3.3 Configure Account Linking

Account linking lets you connect the identity of the user with a user's account in OBDX system.

- 1. Click on Account Linking
- 2. Select Auth Code Grant
- 3. Enter Authorization URL https://<ngrok URL of OHS server port>/ digx-auth/oauth2/authz
- 4. Enter Access Token URL https://<ngrok URL of OHS for port>/ digx-auth/v1/token
- 5. Enter client ID and client secret
- 6. Select Credentials in request body
- 7. Add Scope OBDXVoiceAstServer.SC02 and OBDXVoiceAstServer.SC05(SC02 is default scope in case if no scopes are externally added.)
- 8. Click Save

7.3.4 Translation Services

Deve	opment	E ORACLE Digital Assistant ?				
		Settings • Translation Services				
		New Translation Service ×				
		Service Type * Coople •				
		Google Microsoft				
		Authorization Tokan " Enter the tokan obtained from Google.				
		Optional HTTP Headers				
		Create				

In case input language to chatbot is other than english, configure translation services as shown above.
